

T 180 T 190 Compact Track Loader

Bobcat engineering sets the standard for value, comfort and operator-friendly performance!

The Bobcat Standard Combine all these outstanding features with ease of operation, versatility, maneuverability, wide choice of attachments, worldwide dealer support, service backup, parts availability and high resale, and it all adds up to total value that can't

be matched.

Track tensioning.
Track adjustment is easily accomplished by adding grease to the tensioning cylinder.

Coil spring absorbs varying loads when working in tough applications.

Permanently lubricated idlers and rollers. Fully sealed and grease-lubricated for life. No maintenance is required.

The **Bobcat belt drive advantage** means Bobcat loader engines can be run slower, resulting in a quieter machine that lasts longer and uses less fuel. This system also maximizes pump efficiency and minimizes steering lever effort.

Built-in safety. The Bobcat Interlock Control System (BICS™) requires the operator to be seated in the loader with the seat bar in place and the engine running.

Clean cooling. The exclusive Bobcat dual path cooling system brings clean, cool air from above, through the engine and hydraulic oil coolers, mixes it with engine compartment air, then exhausts it out two

Bobcat serviceability is unsurpassed. Simply open the swing-out tailgate for full access to the engine's checks and fills, filters and battery. Shop time is spent repairing, not gaining access.

Setting the standard for comfort, safety and visibility.

The T180/T190 cab is designed to give you more operator comfort and better all-around visibility.

The standard, fully-adjustable suspension seat allows comfortable all-day operation. The innovative seat bar pivots from the rear, providing secondary restraint protection and serving as a comfortable armrest for operators of all sizes.

Climate-controlled cab. High-visibility front door — with 49% more glass — includes wiper and washer. Along with top, rear and side windows, it will completely seal the cab for efficient heater/vent/AC use.

All-around visibility. Bobcat cab design gives you a super view in all directions.

State-of-the-art instrument panels provide dozens of operational features, diagnostics and monitoring. Optional deluxe instrument panel includes keyless start security system, feature lockouts, digital time and job clocks,

multi-language display, even a "help" menu.

T190 Compact Track Loader Works Where Others Can't!

This tough machine delivers excellent

flotation, traction, smooth ride and more efficient use of power even in the toughest digging conditions. Its increased flotation and minimal ground disturbance are definite benefits when working on soft ground or landscaped areas.

Only 66 inches wide (68 inches with bucket), the T190 is equipped with a hefty 61-hp Kubota diesel engine. The result: impressive power, hydraulic breakout force and superior tractive effort — features that make quick work of digging, loading, pushing, backfilling, grading, spreading and carrying materials.

The T190's low-profile lift arms give you a great view from the operator's seat, and the vertical lift path provides excellent reach and 1,900 pounds of lift.

Worldwide Support.

With the Bobcat
T180 and T190, you
get more than an
exceptional loader.
You also get the
support of a worldwide network of
Bobcat dealers offering
industry-leading
attachments,
accessories and
parts availability.

Their factory-trained service technicians are equipped to handle all your parts and service requirements, including engine and hydrostatic/hydraulic components.

There's an excellent warranty program, too. Get all the details from your Bobcat dealer.

12.6-inch rubber tracks

The unique Bobcat track system gives you a smooth ride as well as all the traction you need for the toughest digging and pushing applications. Other track advantages — low ground pressure, reduced ground disturbance and superior flotation — make the T180 and T190 perfect for working in soft, wet, even muddy conditions where other machines stop dead!

T180 Compact Track Loader — **The Right Track**

Experience the power and smooth ride of the T180 compact track loader. It's definitely the right loader for tough applications. Climb aboard the T180 and you'll be on the right track!

The 61 hp, 4-cylinder Kubota diesel engine produces plenty of power that translates into impressive tractive effort and pushing ability. A 16.9 GPM pump and 3,300 PSI generate excellent hydraulic breakout as well as power for running attachments, including augers,

landscape rakes, tillers, breakers and others.

All that muscle in such a compact machine — only 76 inches high, 66 inches wide and 130 inches long!

Other performance features include the T180's transverse-mounted engine for single-side servicing, dual path cooling, sealed and lubricated roller bearings, unsurpassed operator com-

fort and security, and cushioned tilt cylinders.

Choice of Attachments

As with any Bobcat loader, you can count on a variety of quick-mounting Bobcat attachments for the T180 and T190. The operator can easily replace a bucket with a backhoe, pallet fork, landscape rake, sweeper, tiller, grapple and many more. Hookup is easier with the optional Power Bob-Tach™ mounting system!

Radial Path vs. Vertical Path

We pride ourselves on listening to our customers — and we listened when we received requests for a radial lift path loader that was 66 inches wide, as well as requests for the same size loader with vertical lift path. Each lift-arm design has its own advantages in certain applications:

T180 (Radial Lift Path)

Grading, digging, trenching, backfilling.

T190 (Vertical Lift Path)

Lifting, carrying, loading trucks.

Both loaders can take care of all types of jobs, but some applications can be handled more effectively by a particular lift-arm design.

Remember — whether your jobs require radial lift or vertical lift, you get built-in toughness and dependability with every Bobcat product!

Operator Training

Training kits, available through

your Bobcat dealer's parts department, let you train current and new operators and service technicians on the latest safety, operation and servicing functions on Bobcat loaders.

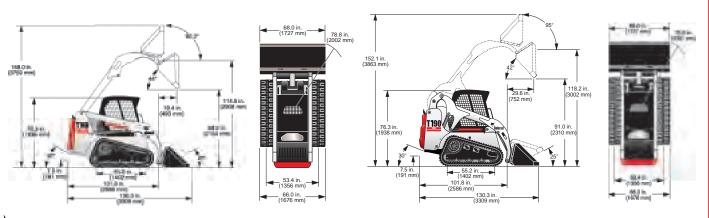

A Spanish language version is also available. Check the Bobcat website for more information: www.bobcat.com

TRAINING

Make tracks to your local Bobcat dealer and see for yourself how the new T180 and T190 compact track loaders can help you work easier, faster, more comfortably — and more productively!

¹Operating capacity rated with standard digging bucket according to SAE standard J818 - OPERATING CAPACITY TO EQUAL NO MORE THAN 35% OF TIP LOAD.

NOTE — Where applicable, dimensions are in accordance with Society of Automotive Engineers (SAE) and ISO standards. Specifications and design are subject to change without notice. Pictures of Bobcat loaders may show other than standard equipment. All dimensions are given for loader equipped with standard tracks. All dimensions are shown in inches. Respective metric dimensions are enclosed by parentheses Bobcat Company complies with the requirements of ISO 9001 as registered with BSI.
