**Consultant Demand Services on an Annual Contract  
Addendum #4  
RP015-21**

This Addendum is made part of the Proposal Documents of the above noted solicitation. Please make the following revisions to the above listed solicitation.

- **VI. PROPOSAL EVALUATION CRITERIA, Table 1. Proposal Evaluation Criteria, Step 4. :**  
Delete "Availability,"
- **VI. PROPOSAL EVALUATION CRITERIA,** after last paragraph, add:  
Based upon the results of the proposal scoring, the County may negotiate with the firm(s) ranked highest in an attempt to reach an agreement. If negotiations with the highest ranked firm(s) are unsuccessful the County may then negotiate with the next highest ranked firm(s) and so on until a satisfactory agreement has been reached.

**Questions and Answers**

Q4-1: Step 4 of the proposal evaluation criteria asks for "Availability, experience, location and qualification of key staff" **Q: Tab E – Does not ask for availability. Does Gwinnett want the availability or was this left over from the previous RFP.**

A4-1: *Availability is not needed. See addendum text at the beginning of this document.*

Q4-2: For Tab B, Major Subconsultants Information: I know that it states that an 11 x 17 organization chart should be provided. **What if the Prime is only using ONE (1) subconsultant? Should a corporate org chart be provided for the one major subconsultant, or would this be optional to include?**

A4-2: *See A3-4. See language on Page Limit: "May include 1..."*

Q4-3: Question: For Tab D if we don't use 4 pages per project, can we use one page as an introduction page for our experience?

A4-3: *No. The page limit is associated with the specific project reference.*

Q4-4: From time to time we have had the opportunity to do condemnation work representing property owners against Gwinnett DOT. I want to be assured that signing this agreement voids our opportunity to do that work – This contract is public works related, not transportation related.

A4-4: *The execution of a contract to provide DWR demand services would not, in and of itself, prohibit your firm from providing engineering/design services for a property owner in relation to the County's acquisition of right-of-way (and/or easements) for a DOT project. However, that is not to say that no conflict of interest could exist or arise in any such situation. Also, the execution of a contract with the County would impose certain obligations and duties upon your firm that would be applicable to such property owner representation (such that it may affect the manner in which the firm currently provides such services).*

Q4-5: In the RFP on page 23 under Tab B – Major Subconsultant Identification, it states “Major Subconsultants are defined as a subconsultant that may perform a majority of the work on a project and/or provides a majority of project team members to the Lead Consultant for total project delivery.” To be considered a Major Subconsultant, does the consultant need to perform a majority of the work on a single task order or for the category’s proposed team/contract as a whole?

A4-5: *GCDWR issues a specific Work Authorization for each project. A major subconsultant may do a majority of the work on that Work Authorization and any others.*

Q4-6: In Tab D – Page 24 – Is it required or preferred that we include 1 additional page at 11x17?  
“Page Limit: Each project reference will be limited to 3 pages per project plus 1 additional page at 11” x 17” (4 pages total) if needed.”

A4-6: *It is the Consultant’s responsibility to determine how to present the project reference information within the page limits and criteria specified.*

Q4-7: "In page 24, Tab D of the RFP it states that "Page Limit: Each project reference will be limited to 3 pages per project plus 1 additional page at 11” x 17” (4 pages total) if needed." We would like to include a write up that will discuss these project references as a whole. Do we need to consider any page limit for this write up? We intend to put this write ups before the project references."

A4-7: *The page limits are as specified in Tab D. No additional pages beyond those specified shall be allowed.*

Q4-8: According to the instructions on page 23 of the RFP, Tab C, Minor Subconsultant Identification, resumes are not required for minor subconsultants. Must the resumes under Tab G of the proposal be only those of the prime? If not, do subconsultant resumes used under Tab G count toward the Tab C page count for minor subconsultants?

A4-8: *It is up to the consultant to determine key personnel under Tab G and provide resumes according to the page limit criteria established in Tab G. The page limits are established for each Tab.*

Q4-9: As part of the 4-6 projects the prime consultant must submit, can any of them be from a minor subconsultant? Or will they count toward the page count identified on page 23 of the RFP, Tab C, Minor Subconsultant Identification?

A4-9: *No. See page 24, second paragraph regarding project reference sheets. “For each project experience sheet, the Lead Consultant and/or Major Sub-Consultants should provide...” Tab C is strictly for minor subconsultant identification, not project references. See first paragraph of Tab C regarding role of minor subconsultant.*

Q4-10: I wanted to see if it was possible to get a list of the projects awarded under RP016-16 and RP013-18 from inception to date for each (excel if available is preferred).

A4-10: *Please see attached list.*

Q4-11: If a prime is pursuing multiple categories, can they use the same project on more than one proposal? (So long as the content is tailored to illustrating relevant experience for the different categories.)

A4-11: *No. See page 24, first paragraph, last sentence “Project References can only be used in one service category proposal.”*

Q4-12: For Category H, can we submit 4-6 projects for each of the requested services in Category H (Asset Management, Hydraulic Modeling (Water and Sewer), and Master Planning)?

A4-12: *No.*

Q4-13: If an individual is proposed for the "demand service category manager" which is a non-billable category, can that same person be proposed on a "technical position" and be billed under this category?

*A4-13: Yes, provided their resume supports the billing category related Job Summaries for Relevant Labor Categories provided in Attachment 2.*

Q4-14: Can a consultant be a lead consultant under a category and also be a major or minor subconsultant under the same category to another lead consultant?

*A4-14: No.*

Q4-15: Under Tab A, firms may include an organizational chart with all required information. Will a table of all proposed staff be acceptable instead of an org chart format?

*A4-15: An organization chart is preferred.*

Q4-16: Will Commissioning Services be procured under this RFP (RP015-21)?

*A4-16: Possibly, under Category I – Specialized Services.*

Q4-17: In Tab A and B, you ask the consultant to list the number of people outside of Gwinnett County. Are you looking for outside the County but in GA or does outside the County mean anywhere in the world?

*A4-17: Tab A, item 6 and Tab B, item 5 refer to the number of full-time employees "...that would support the Demand Services Contract." This may be anywhere as long as the employees support the Demand Services Contract.*

Q4-18: For Category F only, can we use a multi-year Construction Management/Program Management contract for which we have completed 5 years of service but the project is not 90% complete as a qualifying project?

*A4-18: Yes.*

Q4-19: If an individual on the org chart in Tab E is not identified as a key staff member, can we still include a resume for that person in Tab G?

*A4-19: See Tab G, first sentence "... and other key personnel". If the individual is not considered a key staff member, do not provide a resume.*

Q4-20: For the required forms, you require the prime consultant to submit the Contract Affidavit and agreement, Code of Ethics Affidavit, and Firm Information forms with our proposal, do the subconsultants also need to submit these forms?

*A4-20: No. See A2-8.*

Q4-21: In response to Addendum 2 Question/Answer to Q2-4 can you confirm that the personnel listed under Principal-in-Charge, Client Services Manager, or Demand Services Category Manager are able to bill on this project while serving in other roles under the category, (i.e. subject matter expert) ?

*A4-21: Yes, provided their resume supports the Job Summaries for Relevant Labor Categories provided in Attachment 2.*

Q4-22: Solicitation document requires cover letter to be signed by the Lead Consultant Principal-in-Charge, the Client Services Manager, and the Demand Services Category Manager. Are these three categories required to be separate personnel? i.e. can principal-in-charge be the same person as Client Service Manager? or can Client Service Manager be the same as the Demand Service Category Manager?

*A4-22: No, it is not required that the three categories be separate personnel.*

Q4-23: For category I, it is noted that it can be used for firms to participate on a limited role. Is it allowed to propose subset of area of work categories noted in other categories under this category?

A4-23: Yes.

Q4-24: Could you define the intended scope of Disaster Recovery products mentioned for Category I? Does this include IT Disaster Recovery Planning, Business Continuity, Financial Recovery, Emergency Water Distribution Plans?

A4-24: *This is a broad scope and includes any services or products for DWR for disaster recovery. Consultant to identify specialty service and project references for disaster recovery. Yes.*

Q4-25: Service Category E – Dam Services will require Georgia Safe Dams Engineers of Record (EOR) in Geotechnical and Hydraulics/Hydrology. However, on Page 3, the first paragraph below the list of service categories states: "Providing geotechnical services are not required under any of the above listed Services Categories." Please clarify if the proposal for Service Category E should include providing the services of a Georgia Safe Dams EOR in Geotechnical Engineering.

A4-25: *Geotechnical services are considered the materials testing aspect of projects, i.e. borings, soils analysis, concrete cylinder testing, etc. and are provided by DWR through their annual Construction Materials Testing Contract. It is the consultant's responsibility to determine the key personnel to meet the services needed in the demand services category.*

A4-26: Section 4. Insurance Requirements: Will claim-based professional liability coverage comply with the insurance requirements listed in Section 4 of Insurance Requirements, because there are no professional liability policies available to the design professional community that are occurrence based.?

A4-26: Claims can be made.

Q4-27: For Category I, Specialized Technical Support Services, are companies that specialize in communication, public engagement and outreach appropriate for submission in this category?

A4-27: Yes

Q4-28: The organizational chart in Tab A is for the Lead Consultant firm only. The organizational chart in Tab E is for the overall proposed team– Which in the case of *Category I* does not apply because it is only the lead consultant and there are no sub-consultant firms. Can the county please clarify the difference in request? Are we to provide the same org chart twice?

A4-28: Yes, the same org chart is to be provided twice.

This addendum should be acknowledged on page 43 of the bid document.

Shelley McWhorter, CPPB  
Purchasing Associate III
