PURPOSE & METHODS

This study was conducted in order to gather demographics of the Council of Graduate Students (CGS) at The Ohio State University during the 2019-2020 academic year. The data in this report are compared to that of the graduate student population at The Ohio State University, when applicable. This report is an important step in understanding the diversity of our governing body and in identifying how CGS and The Ohio State University can become as welcoming an environment as possible. Additionally, this report serves to provide transparency and a deeper portal of understanding of the Council of Graduate Students' governing body in comparison to the graduate student body. We believe students have the right to know how they are being represented and by whom.

This survey was administered electronically, via email and Carmen, from November 1st, 2019 to November 24th, 2019. It was sent to 116 CGS officers, delegates, senators, and committee representatives. One hundred and three responses were received, yielding a response rate of 88.79%. All university level comparison data was collected from the Office of Student Academic Success (Strategic Enrollment Planning – Analysis and Reporting division) and/or the Graduate School.

This survey and report were compiled by Mr. DaVonti' D. Haynes, Treasurer of the Council of Graduate Students; Ms. Andrea Davis, Diversity and Inclusion Chair; and Mr. Jack Brandl, Chief of Staff.

MESSAGE FROM THE DEMOGRAPHIC REPORT COMMITTEE

The Council of Graduate Students (CGS) at The Ohio State University strives to represent all graduate students at the university and include their diverse perspectives in our advocacy for the student body. In an effort to better understand our own governmental body demographically, and in the interest of transparency, we have compiled and published key demographic data from CGS membership.

This report highlights the demographic data of CGS in comparison to the overall graduate student body. These statistics include data on gender, race/ethnicity, enrollment, employment,

and other identities. The collection of all demographic data was voluntary. Members were encouraged but not required to share this information.

Despite our best efforts, there was feedback from delegates surrounding language used and questions asked, or lack thereof, in the survey that we feel is important to acknowledge. For example, respondents were not asked to disclose veteran or disability status, so this data is missing from the report. Demographic data is important but so is how that data is collected; we are taking note of these concerns and will address them in future surveys so that our results best reflect the

identities and experiences of our Council and the graduate student population.

However, we are very pleased to be able to provide this information about and for our membership. We welcome additional feedback and suggestions for improvements to our collection and reporting of demographic data. Suggestions may be emailed to any of the Co-Chairs, listed below, or to the CGS account at cgs@osu.edu.
