

COVID-19 Vaccine Implementation

Dr. Nancy Messonnier
Dr. Amanda Cohn

December 3, 2020

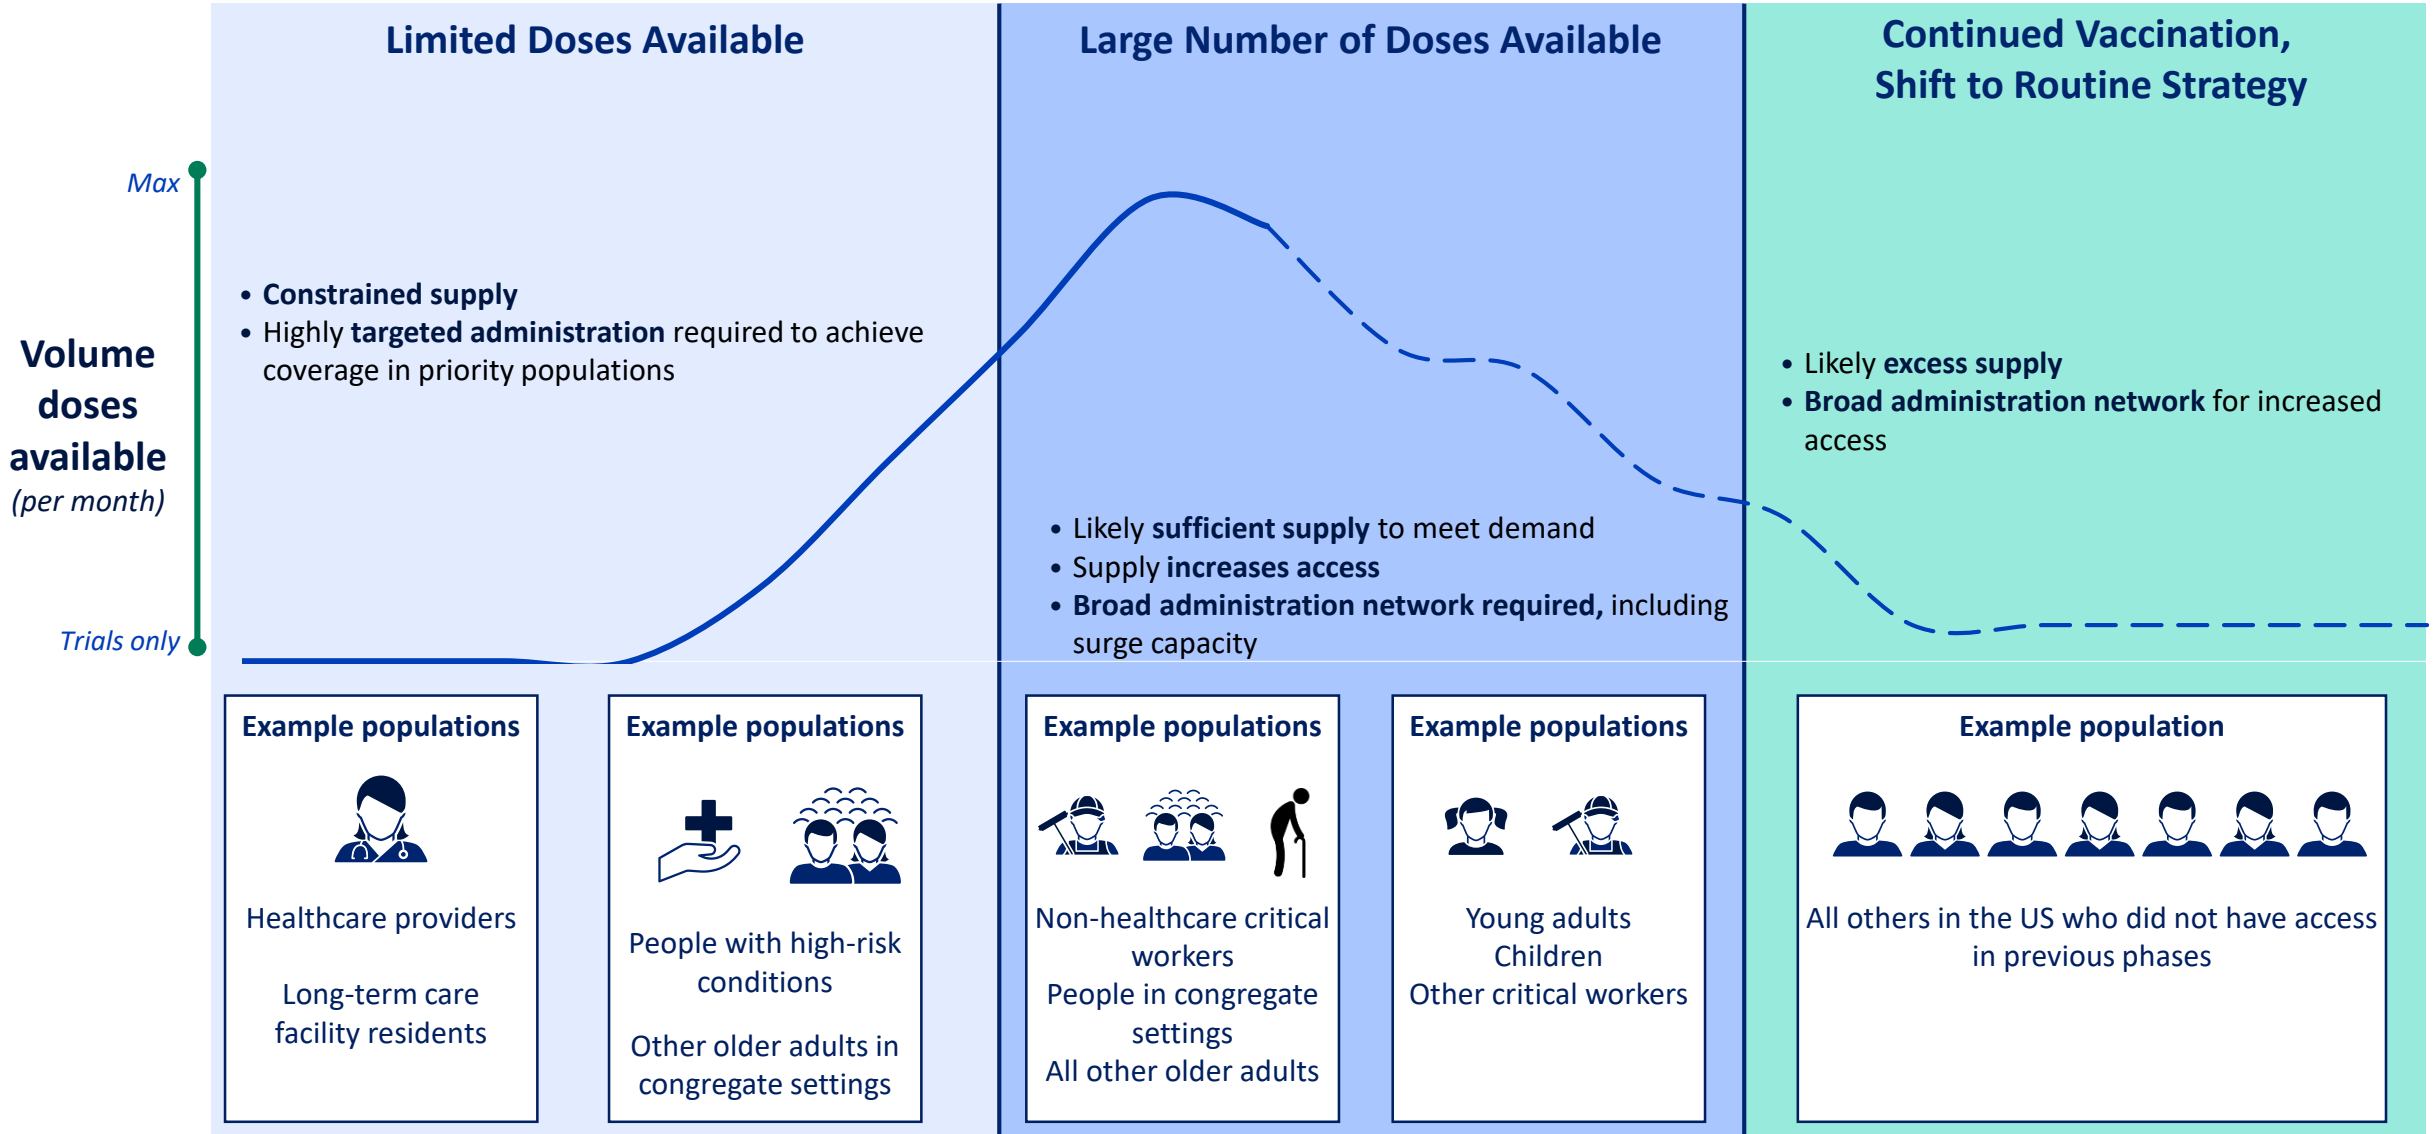

Multiple Components to Vaccine Implementation

Public health impact relies on rapid, efficient, and high uptake of complete vaccine series, with particular focus on those at increased risk for severe COVID-19 illness

Distribution will adjust as volume of vaccine doses increases

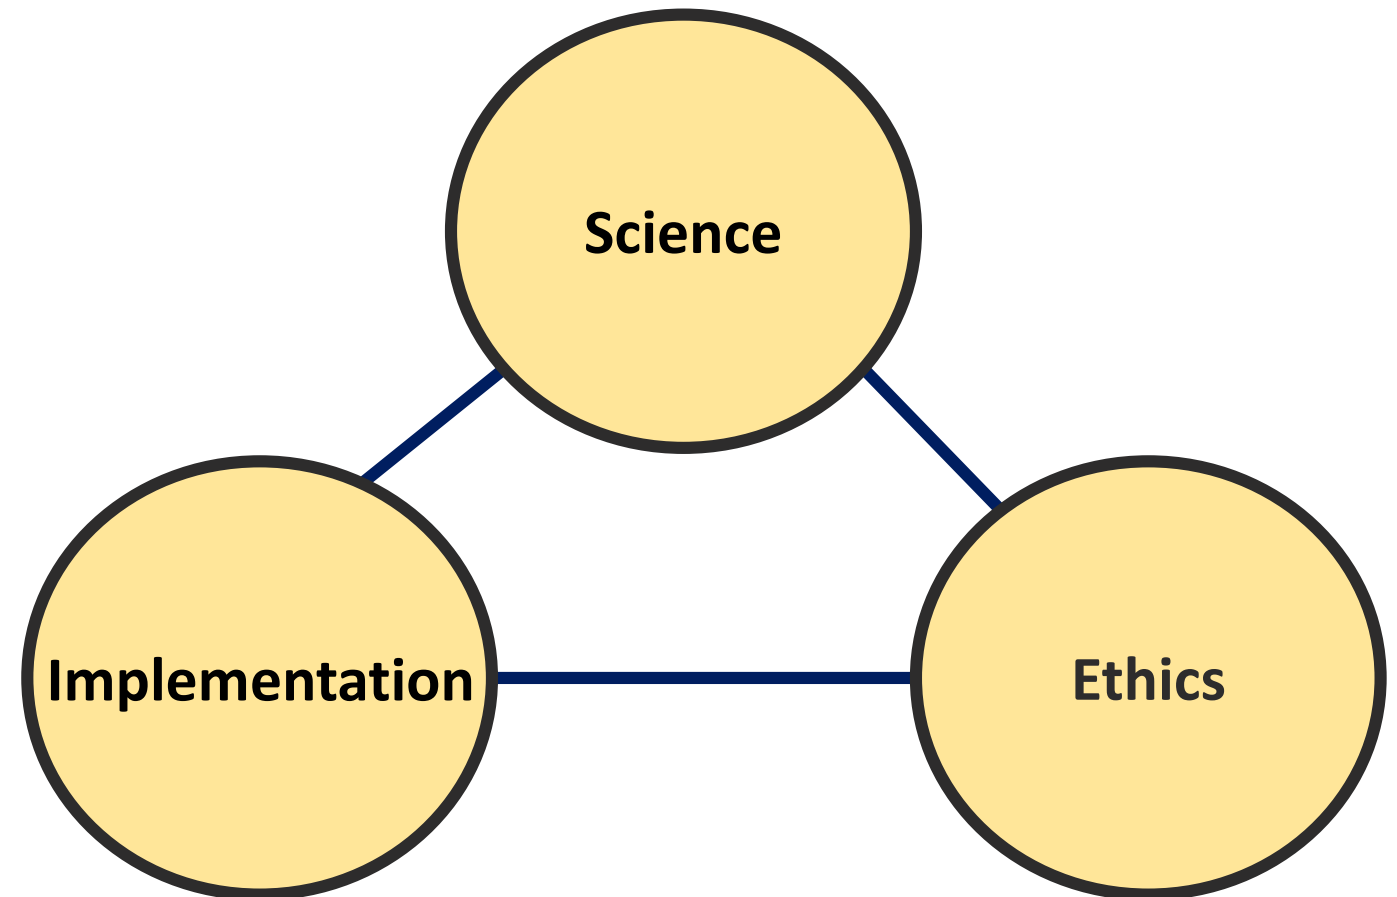

ACIP Allocation of COVID-19 Vaccine

Which groups should be recommended to receive COVID-19 vaccine 'X' during Phase 1?

Ethical Principles:

- Maximize benefits & minimize harms
- Promote justice
- Mitigate health inequities
- Promote transparency

ACIP Recommendations for Use of Vaccine Against COVID-19

When a COVID-19 vaccine is authorized by FDA and recommended by ACIP, **ACIP recommends that 1) health care personnel and 2) residents of long-term care facilities be offered vaccination in the initial phase of the COVID-19 vaccination program (Phase 1a).**

Goals for vaccination if supply is limited

ACIP has set the following goals for recommending which groups should receive COVID-19 vaccines if supply is limited:

- Decrease death and serious disease as much as possible
- Preserve functioning of society
- Reduce the extra burden the disease is having on people already facing disparities
- Increase the chance for everyone to enjoy health and well-being

Groups for Phase 1a Vaccination

Health Care Personnel ^{1,2} (HCP) (~21 million)	Long-Term Care Facility (LTCF) Residents ³ (~3 million)
Examples	
<ul style="list-style-type: none">■ Hospitals■ Long-term care facilities■ Outpatient clinics■ Home health care■ Pharmacies■ Emergency medical services■ Public health	<ul style="list-style-type: none">■ Skilled nursing facilities (~1.3 M beds)■ Assisted living facilities (~0.8 M beds)■ Other residential care (~0.9 M beds)

2. <https://www.cisa.gov/publication/guidance-essential-critical-infrastructure-workforce>

3. <https://www.cdc.gov/longtermcare/index.html>

Additional Considerations for Phase 1a Implementation

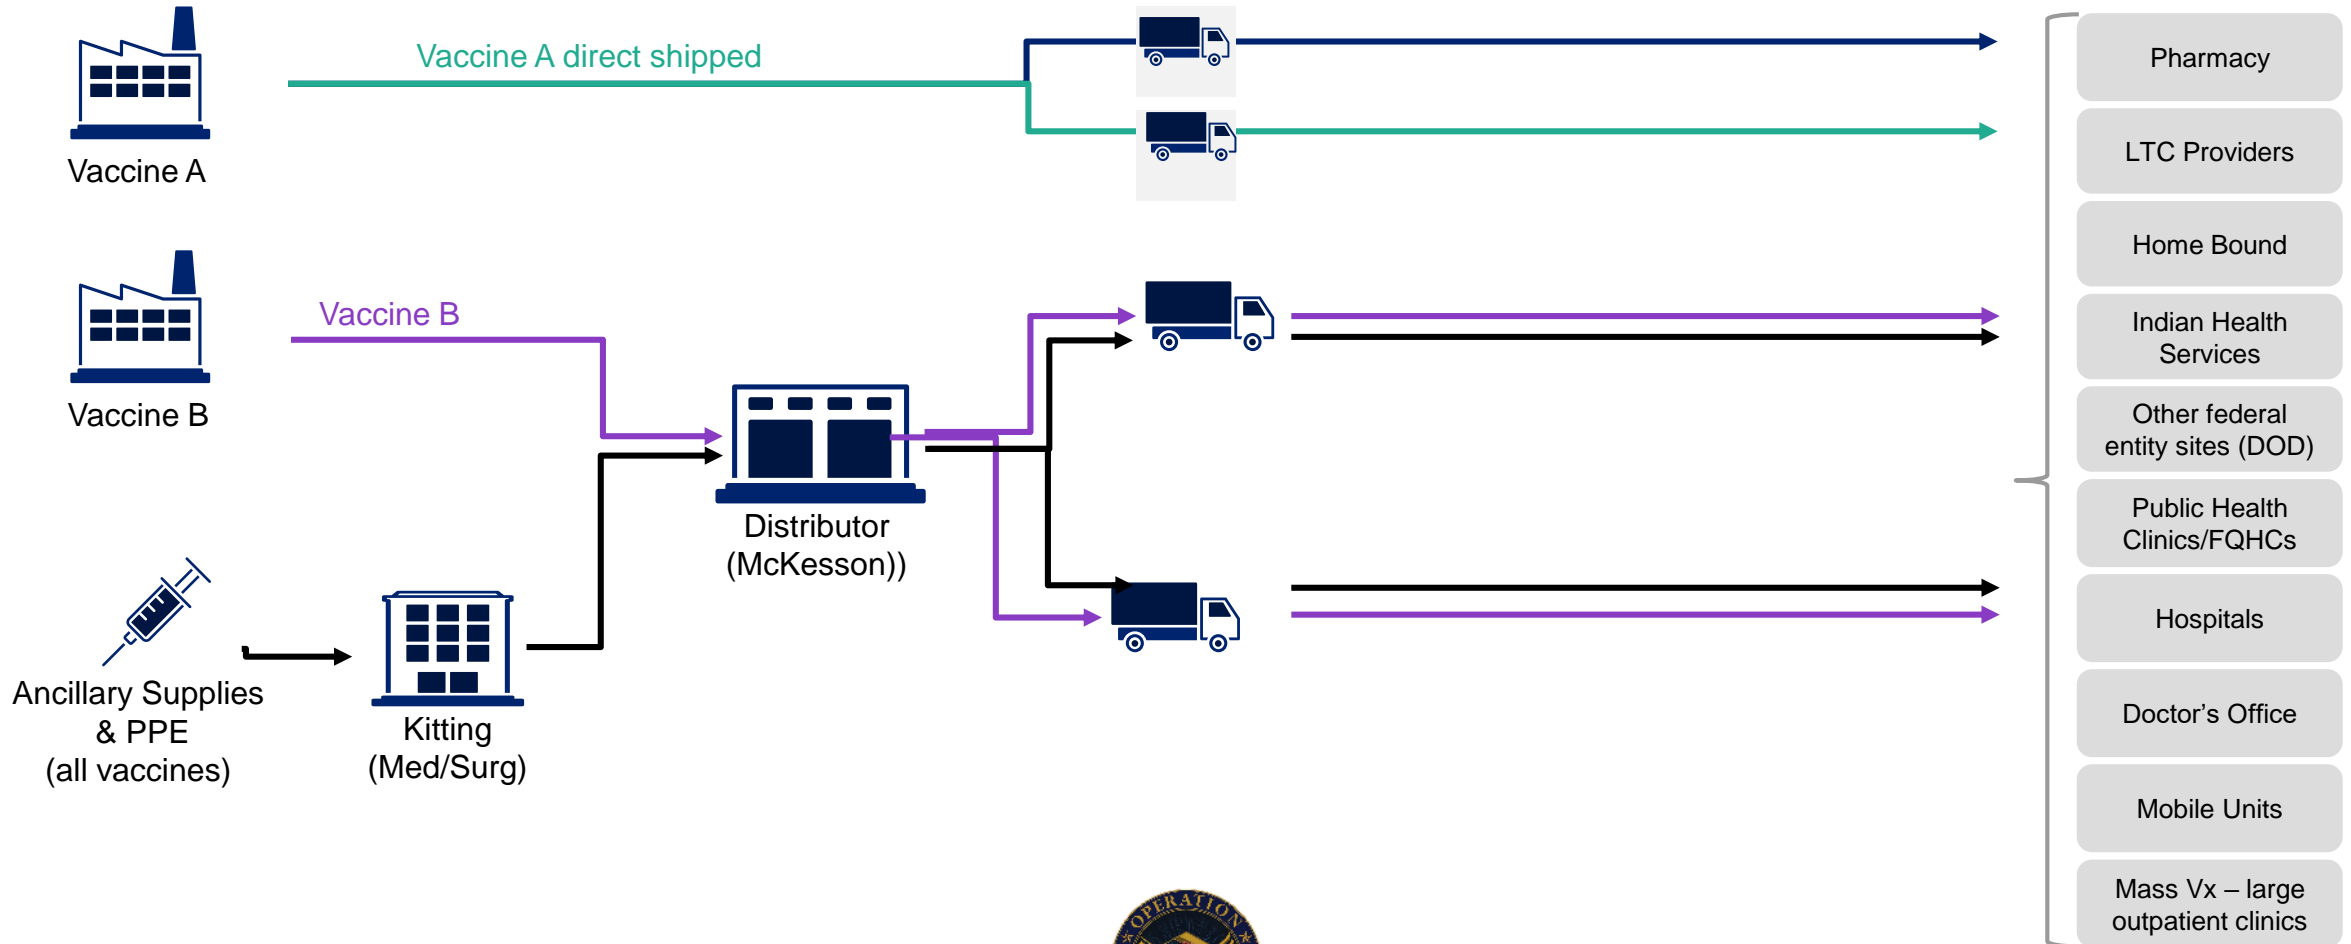

- **Sub-prioritization** may be required with initial limited supply
- Implementation of vaccination programs for healthcare personnel will need to consider **reactogenicity** post-vaccination
 - Additional post-vaccination guidance forthcoming from CDC
- Reactogenicity appears **lower** in older adult population for mRNA vaccines
 - No reactogenicity data in LTCF residents
- **Safety monitoring** of all populations in Phase 1a, especially LTCF residents, will be critical post-authorization

ACIP Proposed Interim Phase 1 Sequence

Time

Distribution Concept of Operations

OWS coordination cell

Working Toward Jurisdictional Vaccine Implementation

- **Continue to enroll vaccination provider sites**, particularly sites for Phase 1a
- **Assess expected vaccine allocations**
- **Finalize microplanning** with expected products and allocations to plan for Phase 1a
- **Place pre-orders** for vaccine
- **Continue preparations** for accessing under-resourced communities and disproportionately affected groups
- **Identify critical metrics** for post-implementation monitoring

Centers for Disease Control and
Prevention (CDC)

COVID-19 Vaccination Provider Recruitment and Enrollment

- Ongoing, variable numbers by state
- States working with healthcare and hospital systems and local health departments
 - Closed pods and open pods
- Training of COVID-19 vaccination providers is vital to ensure the success of the COVID-19 Vaccination Program
- Training and clinical materials include:
 - Toolkits for health systems and clinics, long-term care facilities, and health departments
 - Training materials on vaccine administration, storage and handling, vaccine products, etc.

COVID-19 Vaccine Safety Strategy

- 1. Use established systems** to implement heightened safety monitoring for COVID-19 vaccines
- 2. Develop new platforms** and leverage other federal data sources to complement existing systems
- 3. Communicate clearly** on the vaccine safety process and systems now; provide COVID-19 vaccine safety data and monitoring results once available

VAERS is the nation's early warning system for vaccine safety

VAERS

Vaccine Adverse Event Reporting System

Co-managed by
CDC and FDA

<http://vaers.hhs.gov>

A screenshot of the VAERS website homepage. At the top left is the VAERS logo with the text 'Vaccine Adverse Event Reporting System' and the URL 'www.vaers.hhs.gov'. Below the logo is a navigation bar with five items: 'About VAERS', 'Report an Adverse Event', 'VAERS Data', 'Resources', and 'Submit Follow-Up Information'. The main content area is divided into two columns. The left column contains a question 'Have you had a reaction following a vaccination?' with two numbered steps: '1. Contact your healthcare provider.' and '2. Report an Adverse Event using the VAERS online form or the new downloadable PDF. *New!*'. Below this is an 'Important' box with text: 'If you are experiencing a medical emergency, seek immediate assistance from a healthcare provider or call 9-1-1. CDC and FDA do not provide individual medical treatment, advice, or diagnosis. If you need individual medical or health care advice, consult a qualified healthcare provider.' Underneath is a Spanish version of the question: '¿Ha tenido una reacción después de recibir una vacuna?' with two numbered steps: '1. Contacte a su proveedor de salud.' and '2. Reporte una reacción adversa utilizando el formulario de VAERS en línea o la nueva versión PDF descargable. *Nuevo!*'. The right column features a large image of a family (father, mother, and two children) looking at a laptop. Below the image is the text 'What is VAERS?'. At the bottom of the page are four tiles, each with an image and a title: 'REPORT AN ADVERSE EVENT' (with a doctor and patient), 'SEARCH VAERS DATA' (with hands on a tablet), 'REVIEW RESOURCES' (with a woman at a computer), and 'SUBMIT FOLLOW-UP INFORMATION' (with a woman at a computer). Each tile has a short description below the title.

Active Safety Monitoring for COVID-19 Vaccines

- **V-safe** is a new CDC smart-phone based monitoring program for COVID-19 vaccine safety
 - Uses text messaging and web surveys to check-in with vaccine recipients after vaccination
 - Participants can report any side effects or health problems after COVID-19 vaccination
 - Includes active telephone follow-up by CDC for reports of significant health impact

The Vaccine Demand Continuum

INCREASING CONFIDENCE IN VACCINE, VACCINATOR, AND HEALTH SYSTEM

**May have questions, take “wait and see”
approach, want more information**

Demand

Vaccinate with **Confidence**

A National Strategy to Reinforce Confidence in COVID-19 Vaccines

Reinforce Trust

Objective: Regularly share clear and accurate COVID-19 vaccine information and take visible actions to build trust in the vaccine, the vaccinator, and the system.

Empower Healthcare Providers

Objective: Promote confidence among healthcare personnel in their decision to get vaccinated and to recommend vaccination to their patients.

Engage Communities & Individuals

Objective: Engage communities in a sustainable, equitable and inclusive way—using two-way communication to listen, increase collaboration and build trust in COVID-19 vaccine.

Available Soon! – Vaccine Communication Toolkits

- **Ready-made materials to inform healthcare providers, patients, and communities about COVID-19 vaccines**
 - Discussion guide and readiness checklist
 - Slide decks for immunization coordinators, healthcare teams, and other support personnel
 - Colorful posters
 - Informational factsheets and FAQs
 - Sample social media messages and graphics
 - Drop-in articles and blog posts
 - “Vaccinated against COVID” button design to make vaccination visible

COVID-19 Vaccine Implementation

- There will be **unanticipated challenges**, but CDC will continue to work closely with partners to **find solutions and overcome obstacles**.
- Vaccines are an important tool to control the pandemic, but we need to continue to **wear masks, social distance, and wash hands**.
- **Jurisdictions are under immense stress** and will be implementing COVID-19 vaccination amidst a surge in disease, strain on the healthcare system, and nearly a year spent fighting this pandemic.
- We need to continue to lay the foundation to **build vaccine confidence** across the United States.

For up-to-date COVID-19 vaccine information visit:

www.cdc.gov/coronavirus/2019-ncov/vaccines

The screenshot shows the CDC website's 'Vaccines' page for COVID-19. At the top, the CDC logo and navigation menu are visible. The main heading is 'Coronavirus Disease 2019 (COVID-19)' with a banner that says 'WEAR A MASK. PROTECT OTHERS.' Below this, there are navigation tabs for 'Your Health', 'Community, Work & School', 'Healthcare Workers & Labs', 'Health Dept.', 'Cases & Data', and 'More'. The 'Your Health' section is active, displaying a list of topics on the left and a main content area on the right. The main content area features a large image of a healthcare worker administering a vaccine to a patient, with a text overlay: 'Safety Is a Top Priority. The U.S. vaccine safety system ensures that all vaccines are as safe as possible. [Learn more](#).' Below the image, there are sections for 'Vaccine Information for You & Your Family' and '8 Things to Know about Vaccination Planning'. The 'Vaccine Information for You & Your Family' section includes links to '8 Things to Know about U.S. COVID-19 Vaccination Plans', 'How CDC is Making COVID-19 Vaccine Recommendations', 'Ensuring the Safety of COVID-19 Vaccines', and 'Frequently Asked Questions about COVID-19 Vaccination'. The '8 Things to Know about Vaccination Planning' section includes a link to 'Vaccination Plans'. At the bottom, there is a 'Get Email Updates' form and a 'Related Links' section with links to 'Advisory Committee on Immunization Practices', 'Vaccination Guidance during a Pandemic', and 'Guidance for Planning Vaccination Clinics'. The footer includes the text 'Last Updated Oct. 14, 2020' and 'Content source: National Center for Immunization and Respiratory Diseases (NCIRD), Division of Field Epidemiology'.

Thank you
