

# CUMMINS REMOTE MONITORING

**THERE FOR YOU  
WHATEVER LIFE  
THROWS AT YOU.**

Today's world is Always On. Backup emergency power must be ready at a moments notice, consistently running without interruption. Whether we are traveling for business or pleasure, running a family business, or completing simple daily tasks, having unexpected power outages can be inconvenient and expensive.

Power is the lifeblood of the modern world and Cummins Connect Cloud™ is there with you, always giving you the peace of mind that your family is protected wherever you are in the world.

Accessed via your desktop, tablet or smart phone via a single easy-to-use interface, Cummins remote monitoring solutions allows you to check your generator status, identify faults, and receive notifications before issues occur. To give you even more peace of mind, you can even get your local Cummins dealer to monitor your generator for you.

With Cummins remote monitoring solutions, you can be reassured your generator is Always On to protect your home or business.

**ALWAYS ON**

# UTILIZING THE LATEST IN CLOUD TECHNOLOGY.

## HOW DOES IT WORK?

Cummins offers cloud based remote monitoring solutions available for the Cummins QuietConnect™ series with an app available to download from Apple iTunes, Google Play or Amazon Appstore.

Connecting your generator to you through cloud based technology, gives you the flexibility to monitor your backup power via your desktop, tablet or smart phone.

Wherever you are you can see: the status of your generator, when it last exercised, if there are any problems, when maintenance is due; you can even turn it on and off remotely.

# CLASS LEADING FEATURES HELPING YOU STAY CONNECTED.

**Notifications** - These will not only allow you to regularly monitor the status of your generators, but provide critical notifications before issues occur so your backup power is there when you need it the most.

**Exercise** - This is where exercise information is available. Exercising helps you test the generator so you know it will be available when you need it most. You can change the exercise schedule anytime just as you can do with thermostats in your home.

**Control** - If you're away and there's a power outage you can remote start / stop the generator. This unique feature gives you complete control over your generator remotely. With the use of the Cummins Connect Cloud™ app, you can start your generator and get power to your home right away.

**Help finding a dealer** - There are definite benefits in having a dealer monitor your generator. It gives you the reassurance that any potential concerns won't become problems. You can do that by linking a dealer to your Cummins Connect Cloud™ account via the 'Find a dealer' function or by calling 1-800-CUMMINS.

\*Image shown is available on QuietConnect generator models 13, 17 and 20kW, all other models use a different interface. Both are available to download as apps, your Dealer will be able to give you more information.

**YOUR  
DATA  
PRIVACY  
IS OUR  
TOP  
CONCERN.**

Cummins remote monitoring solutions are Cummins owned entire end-to-end solution, from gateway to app. Meaning you can be sure of a completely secure system where your data is safe on a trusted, secure platform that adheres to regional privacy laws. You can be assured that our system conforms to the latest data and cybersecurity standards.

And, because Cummins remote monitoring solutions are fully integrated solutions, we're here to support you with regular updates and the latest features and benefits so you can maximize your system's potential.

# FEEL SUPPORTED BY OUR EXPERT NETWORK OF DEALERS

Your Cummins Dealer will help guide you through the process of set-up and get you up and running. You can choose to monitor your generator yourself, or for added peace of mind and simplicity, you can opt to have your Cummins Dealer monitor it for you.\*

They will ensure that your generator is always ready to provide back-up support whenever you need it. Whether you are lounging in Barbados or stuck in a 3 hour meeting at work, they will make sure that potential problems are fixed before they become issues.

To locate your nearest Cummins Authorized Dealer visit: [homegenerators.cummins.com/find-a-dealer](http://homegenerators.cummins.com/find-a-dealer) or call 1-800-CUMMINS and speak to one of our friendly Customer Support Representatives.

\*Dealers can provide information of maintenance and service contracts

# THE CUMMINS ADVANTAGE.

Cummins Connect Cloud™ and Power Command Cloud™ are part of Cummins overall digital solution, which delivers an holistic customer centric cloud based solution to enable Cummins' products to deliver the best value to our customers.

Our cloud technologies are connecting customers with our products across the globe, whether it's a truck driver in the US, a mine operator in Chile, or you in your own home.

You can be assured that Cummins is always working on the next generation solution to make your life better and keep you Always On.
