1995 – 2011	UCLA, School of Nursing	Professor
2011 – 2016	UCLA, School of Nursing	Distinguished Professor
2017 – present	UCI Sue & Bill Gross School of Nursing	Distinguished Professor
2022, July – present	Kitasato University, School of Nursing	Visiting Faculty
2022, September - present	Basel University, Institute of Nursing Science	Visiting Faculty

ANCILLARY POSITIONS HELD:

<u>Dates</u>	<u>Institution and Location</u>	<u>Appointment Title</u>
1973 – 1976	Emergency Room, Bellevue Hospital New York, N.Y.	Staff Nurse
1978 – 1979	Medical Surgical Nursing, St. Francis Hospital Roslyn, N.Y.	Nurse Practitioner
1979 ANCILLARY	Critical Care, Farmington University	Continuing Education

POSITIONS HELD**CONTINUED:**

	Farmington, N.Y.	Instructor
1981 – 1982	Cardiac Monitoring Unit, University Hospitals Cleveland, Ohio	Staff Nurse
<u>Dates</u>	<u>Institution and Location</u>	<u>Appointment Title</u>
1982 – 1983	CWRU, FPB School of Nursing Cleveland, Ohio	Instructor
October 1998	AIDS Clinic, USC Medical Center	Adult Nurse Practitioner
1995 – 1997	Cardiology Clinic, VA Medical Center- Sepulveda, CA	Adult Nurse Practitioner

CERTIFICATIONS:

<u>Dates</u>	<u>Organization</u>
1984	California Board of Registered Nursing, License No. I372011
1987	State Certified AIDS Educator
1995	California Board of Registered Nursing, Certified Nurse Practitioner

HONORS AND AWARDS:

<u>Dates</u>	<u>Award</u>
1981	Sigma Theta Tau, National Honor Society
1985	Nominated for American Association of University Women Young Investigator Award
1987	Distinguished Research Award, California Nurses Association
1987 – 1988	UCLA Faculty Career Development Award
1991	Nominated for Scientific Council, National Institute on Drug Abuse
1992 – 1993	Distinguished Lecturer, Sigma Theta Tau International
1992	Visiting Lecturer, University of California, San Francisco,
1992	Fellow of the American Academy of Nursing
1994	Distinguished Research Lecturer, Western Society of Research in Nursing
1994	Distinguished UCLA Wellness Lecturer. University Series
1994 – 2000	Distinguished Lecturer, Sigma Theta Tau International
1995	Philip Y. Hahn Lecturer. University of San Diego. San Diego, CA
2003 – 2016	Audrienne H. Moseley Endowed Chair in Community Health Research
2005	AACN Leadership Training for Academic Nursing Program
2005	Fellow in the Western Academy of Nursing
2008	Helen Tobin Writers' Award, May 2008
2009	Excellent Paper – First Award by 2009 Shanghai International Nursing Conference
2011	Distinguished Alumni Award – SUNY at Stony Brook University
2011 – 2016	Visiting Professor, Anhui Medical University, Anhui, China
2011 – 2016	Distinguished Professor, UCLA
2011 October	Davis Sams Visiting Scholar, University of Indiana
2013 – 2016	Visiting Professor, Hunan Provincial Tumour Hospital & Tumour Hospital Xiangya School of Medicine at Central South University

HONORS AND AWARDS (continued):

2013	First Nurse Elected Vice Chairperson of the First Board of Specialty Committee of Nursing of the World Federation of Chinese Medicine Societies
<u>Dates</u>	<u>Award</u>
2014, February	Sigma Theta Tau International Nurse Researcher Hall of Fame
2014, June	Honorary Professor, Shanghai Sipo Polytechnic School of Health Science & Nursing
2019, May	2019 Outstanding Community Researcher Award, UCI, Institute for Clinical and Translational Science
2011 – 2014	Adjunct Professor, University of Technology, Sydney
2013 August	Competitive selection to attend NIH/UCLA mHealth Summer Training Institute
2013	Distinguished Alumni Award – Case Western Reserve University
2013	California Nurse.com Nursing Excellence Regional Winner in Advancing and Leading the Profession
2013	NIH Standing Committee Member – Behavioral and Social Consequences of HIV
2017 – present	Distinguished Professor Above Scale, UCI
2019	Outstanding Community Researcher Award, UC Irvine, ICTS
2022 April	Best Poster Award, Non-Student, Western Institute of Nursing

MEMBERSHIPS IN PROFESSIONAL ORGANIZATIONS: (1980-present)

<u>Dates</u>	<u>Organizations</u>	
1981 – 1990	Midwest Nursing Research Society	
1982 – present	Sigma Theta Tau, Gamma Tau Chapter	
1983 – 1985	American Nurses Association	
1985 – present	California Nurses Association	
1988 – 1992	Western Society for Research in Nursing	
1988 – 1992	American Heart Association, Council of Cardiovascular Nursing	
1988 – 1995	American Association of Critical-Care Nurses	
1989 – 1995	ANA Council of Nurse Researchers

RESEARCH AND CREATIVE ACTIVITY:

- I. Coping Responses of Spouses of Myocardial Infarction (MI) Patients. California Nurses Foundation W-P 860922.

The overall focus of research has been investigating the coping processes of two groups of individuals at risk for ineffective coping and subsequent poor adaptive outcome. These have included the spouses of cardiac patients and subsequently vulnerable populations at risk for HIV infection and other infectious diseases. As delineated in the synopsis of each specific research activity, a complex and sophisticated building of knowledge within each area has been developed.

- II. Nyamathi, A., Flaskerud, J. and Lewis, C. Counseling/HIV Testing for At-Risk Minority Women. National Institute on Drug Abuse, DA05565, 1988-1993.

This study was designed to assess the effect of a Specialized and a Traditional nurse counseling program on coping and adaptive outcome of African-American and Latina women at risk for HIV/AIDS (i.e., IDUs or partners of IDUs, etc).

- III. Nyamathi, A., Flaskerud, J., Lewis, C. AIDS Program for Addicted/Homeless Minority Women. National Institute on Drug Abuse (NIDA), DA 06719, 1991-1995.

This recently completed four-year (1991-1995) longitudinal study assessed the effect of long-term education and counseling with 232 homeless and drug-addicted women at risk for HIV infection and their 232 supportive persons (SPs). HIV testing was offered at baseline, and at 6- and 12-month follow-ups to all women and their SP's.

- IV. Nyamathi, A., Gelberg, L. Decision-Making Regarding Drug Use Among Homeless Women. NIDA, DA 09122, 1994-1997.

The study was designed to determine the etiology, nature, concomitants and consequences of drug abuse by homeless women with a history of recent drug use and seek a scientific basis for decision-making regarding drug use and risky sexual behavior in these women. A quantitative assessment was conducted with 1400 (900 recent drug-dependent and 500 non-drug-dependent) homeless women by nurses and outreach workers of the subjects' ethnicity.

- V. Nyamathi, A., Flaskerud, J. Health Promotion Among Homeless Women at Risk for AIDS. National Institute of Mental Health (NIMH). MH52029-01A2, 1994-2000

The goal of this five-year study was to enhance health status among homeless women by conducting a two year longitudinal quasi-experimental study designed to assess the effectiveness of a Peer Mentored Program and a Case Managed Program on subjective and objective measures of risky behaviors, health protecting behaviors, and health outcome of 648 African-American, Latina and White women and 648 significant others (S0s) at risk for AIDS.

- VI. Nyamathi, A., Wiley, D. HCV Screening Among Homeless Women and Their Intimate Partners. NIMH. Supplement, MH52029-01A2, 1999-2000.

Dr Nyamathi and colleagues initiated a post-hoc HCV prevalence study that included 884 homeless women and/or their partners. Findings revealed an overall HCV seroprevalence of 22%. Results of multiple logistic regression analysis controlling for clustering within couples indicated that older age and lifetime drug history of IDU independently predicted anti-HCV test positivity ($p < .001$). A lifetime history of methamphetamine use was also found to independently predict a positive anti-HCV test result ($p = .05$). Regression results also revealed that IDUs had over 25 times greater odds of having HCV infection than non-IDUs. Also, homeless adults who were on their own before the age of 18 and those homeless for greater than two years were significantly more likely to be HCV-infected than those not reporting these characteristics (Nyamathi et al., 2002). Importantly, homeless adults who reported a history of drug and mental health treatment were more likely to be HCV-infected.

RESEARCH AND CREATIVE ACTIVITY: (continued)

- VII. Nyamathi, A., Morisky, D., & Gelberg, L. TB/HIV Risk Reduction with Homeless and Drug Addicted. NIDA, DA11145, 1998-2003.

Currently, Dr. Nyamathi serves as PI in a five-year NIDA-funded grant: TB/HIV Risk Reduction with Homeless and Drug Addicted Persons. This prospective five-year study using a two-group quasi-experimental design will evaluate the effectiveness of a nurse case-managed, incentive-based intervention program focused primarily on compliance with TB prophylactic treatment, and secondarily on HIV risk reduction, with 400 sheltered men and women in the high TB prevalence area of Skid Row in downtown Los Angeles.

- VIII. Nyamathi, A., Robbins, W. Assessment of HCV in Semen of HCV-Infected Homeless Men. UCLA School of Nursing Intramural Award, 2000-2001.

In this pilot study, our purpose was to assess and quantify HCV RNA in the seminal fluid of 100 homeless men by means of branched DNA, and by so doing, shed light on whether sexual transmission of HCV is possible, and whether HCV RNA viral load in the semen is associated with HCV viral load in blood plasma and with demographic and behavioral risk factors. Current literature supports the fact that HCV in the semen is observed in less than 5% of participants.

- IX. Nyamathi, A., Koniak-Griffin, D. HIV Vaccine Preparedness Among High Risk Homeless. UCLA, School of Nursing Intramural Award, 2002-2003.

For this intramural grant, our goal is to conduct the Phase I in-depth qualitative assessment via focus group methodology with 60 primarily racial-ethnic minorities at high risk for HIV and who reside in low-income apartments, homeless shelters, and run-away youth residence sites. The research aims are to 1) understand the decision-making processes of high risk participants in considering participation in future HIV vaccine trials (HIVVTs); 2) describe their facilitators of and barriers to being retained in future HIVVTs; 3) describe the potential impact of HIVVT participation on risky drug and sexual behavior; 4) revise in a culturally-sensitive and linguistically-appropriate manner the CDC Vaccine Attitude Survey on HIVVT, based on suggestions from focus groups and assistance from a newly formulated Community Advisory Board (CAB); and 5) ascertain recommendations for preparing the high-risk groups to participate in HIVVTs.

- X. Nyamathi, A. International Training Grant in Epidemiology Related to AIDS ISM. National Institute of Health Fogarty Supplement. TW00013, 2002-2003.

The purpose of this supplement is to build on well developed linkages between UCLA Fogarty AIDS International Training and Research Programs (AITRP) and the Homeopathy component of the India System of Medicine (ISM) and to extend these linkages to the Ayurvedic program and CCRA. The linkage of UCLA Fogarty AITRP to these programs for traditional therapies will provide opportunities to obtain objective data, relative to their therapeutics and/or as complementary to modern allopathic medicine. A plan will be developed for education and capacity-building programs to include: 1) post doctoral training at UCLA with 2-year in-country follow-up; 2) in country training courses, workshops and consultations, developed and conducted as joint endeavors at UCLA with CCRA and Homeopathy. Similar production and training programs will be developed with the CCRA.

- XI. Nyamathi, A., AIDS Prevention with Traditional Systems of Medicine (ISM). AIDS Institute International Activities Core. 2002-2003

In this grant, we propose to conduct a two-phased study in two Indian sites, which contain key Homeopathy Medical colleges and clinical facilities. In Phase I, in-depth qualitative assessments will be conducted by focus group methodology with 40 randomly selected Homeopathy educators as well as 40 randomly selected and currently active Homeopathic practitioners to examine and evaluate their training in terms of HIV education and prevention as well as their delivery of prevention modalities,

RESEARCH AND CREATIVE ACTIVITY: (continued)

especially HIV/AIDS prevention messages. Feedback on a developing ISM Practitioner Survey will be reviewed with each focus group and by a newly created Community (aka Professional) Advisory Board (CAB), representative of leaders in the Homeopathy educational institutions and of active Homeopathy practitioners. Moreover, we will determine the applicability of community-based participatory approaches for the future development and implementation of an AIDS education and prevention training program utilizing Train the Trainer processes. Phase II will pilot test the revised ISM Practitioner Survey, which will have been suitably modified according to the local values and needs of this professional community, with a sample of 30 Homeopathy practitioners. The outcomes in this study will be to gather information on promoting best practices in the future development and implementation of a HIV Education and Prevention program for Homeopathy providers.

XII. Nyamathi, A et al. HBV Prevention for Homeless At-Risk for HBV/HCV/HIV. NIDA. DA016147. 2003-2008

In this prospective four group quasi-experimental design, we will evaluate with approximately 1254 sheltered men and women in the Skid Row area of Los Angeles, the effectiveness of a theoretically-based HBV vaccination intervention focused primarily on completion of the HBV vaccination series and secondarily on HBV/HCV/HIV risk reduction. We will also evaluate the relative cost of each of these programs in terms of completion of HBV vaccination, the cost effectiveness of improving vaccination completion, the cost per seroprotected case, and the cost per infection prevented. Once determined eligible, participants will be randomized by shelter into one of four programs: a Nurse Case Managed Plus Incentive (NCMI) program, a Nurse Case Managed without Incentive (NCM) program (both of which provide tracking), an Incentive with tracking (IT), and an Incentive-Only (I-O) program without tracking. The proposed study is innovative in that the inclusion of an NCMI program, an NCM program, an IT program, and an I-O program will allow us to look at individual effects of nurse case management and incentives separately, the joint effect of both together, and the impact of tracking in terms of completing the HBV vaccination series. Participants in all four programs will receive the 3-series vaccination by trained research nurses at the study clinic over six months, along with either an enhanced HBV/HCV/HIV education program (NCMI and NCM), or a brief HBV/HCV/HIV (IT and I-O) education program. All participants will be assessed at baseline and six- and twelve-month follow-up using a battery of psychosocial, behavioral, health and physical status, as well as HBV, HCV and HIV serostatus measurements. This proposal is focused on assessing the effectiveness of intervention programs promoting the prevention of medical consequences of HBV/HCV/HIV in homeless and drug-abusing populations.

XIII. Nyamathi et al. Alcohol Use Reduction in Methadone Individuals with HCV. National Institute on Alcohol Abuse and Alcoholism (NIAAA). AA015759, 2006-2008

The purpose of two-phased exploratory R21, is to explore a qualitative assessment with 40 opiate maintained (OM) HCV-infected adults, 20 moderate alcohol users and 20 heavy alcohol users, equally divided by gender and readiness to change alcohol use: 1) factors impacting access to alcohol use reduction and health promotion services and free vaccination for HAV/HBV; and 2) strategies that MM staff can use to assist their clients in seeking services. Staff of a MM clinic will also explore the feasibility of providing these services. Phase II will pilot an alcohol use reduction and liver health promotion intervention with 250 eligible, HCV-infected, alcohol-using OM clients receiving MM. Two intervention groups incorporating MI) will provide on-site brief MI (3 sessions) counseling to participants using either one-on-one delivery (MI-Single) or the group-delivery (MI-Group). In addition, each group will be offered the Liver Health Promotion (LHP) program, which includes a 30-minute health promotion education session, referral to a community 12-Step alcohol outpatient program, and an offer for free screening for HAV/HBV, and the HAV/HBV vaccination series, if eligible (defined as being HAV and/or HBV seronegative). A third group, the Usual Care (UC) group will receive the same components offered to the intervention groups except for a time balanced on-site brief 3 session health promotion counseling as opposed to the MI. The short-term goals of the proposed study are to refine strategies that can be fully tested in a large-scale intervention trial. The long-term goals are to contribute to knowledge about promoting alcohol-related health-seeking and treatment completion behaviors in MM clinic settings that serve OM HCV-positive clients, so that population-specific intervention strategies can be developed.

RESEARCH AND CREATIVE ACTIVITY: (continued)

XIV. Nyamathi et al. An Arts Intervention for Drug-Using Homeless Youth – Phase I. NIDA. DA023521, 2008-2011

In this two phased investigation, researchers, homeless youth and staff from a drop-in site frequented by homeless youth, along with our CalArts partners, will participate in the development, pilot testing and evaluation of a youth-centered drug-use and health-promoting intervention program. In Phase I of this R21, a CBPR approach will be utilized with a steering committee to develop a youth-centered drug use and health promoting intervention program, Art Messaging which will be assessed in terms of acceptability via focus group sessions with street youth and subsequently refined based upon homeless youth feedback. In Phase 2, investigators and community partners will conduct a pilot study to explore the acceptability of the Art Messaging program as well as test the impact of the program, compared to a control group, with 128 similar youth in terms of: completion of the program; reduction of risky drug and alcohol use; completion of a HAV/HBV vaccine series; and improvement in knowledge about hepatitis. The short-term goals are to refine strategies that can be fully tested in a large-scale intervention trial. The long-term goals are to contribute to knowledge about promoting innovative and youth-designed drug-related behaviors, and treatment completion in settings where youth congregate.

XV. Nyamathi et al. ASHA HIV Health Promotion Intervention in India. NIMH. MH082662, 2008-2011

In this study, village women in India, living with HIV (WLH), along with researchers from the US, HIV & TB experts from the Indian Council for Medical Research and the AII India Institute for Medical Sciences will plan an intervention designed to support women who are receiving treatment and care for HIV and TB, and to help promote their adjustment to illness and improve their health as it relates to their coping and behavioral responses and physical health outcomes. This intervention, delivered by specially trained village women (ASHAs), will then be tested with WLH to assess how acceptable and effective the intervention might be compared to WLH who receive usual care. We anticipate this three-year study will lead to a culturally tailored intervention that will be tested in a larger study.

XVI. Nyamathi et al., HBV Prevention for Homeless At-Risk for HBV/HCV/HIV. DA016147, NIDA, 2009-2014.

The purpose of this study is to design a program to assist young homeless stimulant-using gay and bisexual homeless men to complete the HAV/HBV vaccine and in reducing drug and sexual activity. We will evaluate the effectiveness of a program, which includes specialized education, and contingency management and tracking with a standard program, including brief education, contingency management and tracking with these young homeless men. This study combines optimal strategies to approach, engage and intervene with a hidden and high-risk population to assess interventions that may prove beneficial in preventing HBV and HAV infections. We will also assess the cost of these programs in terms of completion of the HAV/HBV vaccination series. As Stimulant use threatens to increase risk of exposure to HAV and HBV, particularly among young users who may not yet be HBV-infected, this research is targeted to engage this group in treatment, until they are suitably protected from HBV, and hopefully reduce risk for HCV and HIV as well.

XVII. Nyamathi et al. Health Promotion Coaching Vaccine for Homeless Parolees. NIDA, DA027213, 2009-2014

The purposes of this study are to conduct a prospective, three-group study that randomly assigns recent ex-offenders attending a residential drug treatment program into one of three levels of intensity. Peer coach and nurse-partnered intervention programs were studied, specifically, a peer coach and nurse case managed (PC - NCM) program, (2) peer coaching (PC) program with brief nurse counseling; and (3) a usual care (UC) program with brief peer coaching and nurse counseling in a RCT. The proposed study will assess the effectiveness of three programs on reducing rearrest among recently released homeless ex-offenders at six- and 12-month follow-up.

RESEARCH AND CREATIVE ACTIVITY: (continued)

- XVIII. Nyamathi et al. Asha Improving Health and Nutrition of Indian Women with AIDS and Their Children. National Institute of Mental Health, MH098729-01, 2013-2018

The proposed longitudinal study will use a 2x2 factorial design, and randomize 600 Women Living with AIDS (WLA) and their children into four groups: 1) Asha support alone for WLA; 2) Asha support for WLA + nutrition (food-based) training; 3) Asha support for WLA + food supplementation; and 4) Asha support for WLA + nutrition training + food supplementation. The primary outcome of the intervention is to test the effects of nutrition training and/or food supplementation on primary outcomes of anthropometric parameters and immune status (CD4 levels) of the WLA at 6-, 12- and 18-month follow-up; and secondarily on ART adherence, psychological health, nutritional adequacy and lipid status of the WLA.

- XIX. Nyamathi et al. Homeless Female Offenders Returning to the Community: Improving Hopeful Futures. National Institute on Drug Abuse. DA035409; 2014 – 2017.

The proposed study will utilize our successful community participatory approach to engage a vulnerable group of women who experience major health and social disparities as a result of incarceration. A gender-sensitive criminogenic needs-focused intervention program designed to reduce and or prevent relapse to drug use, recidivism, and eliminate or prolong number of days to re-incarceration will be examined. We will randomize 130 HFOs participating in one of two residential drug treatment programs to assess the impact of the FEM-CARE or a Health Promotion control program on reduction of drug and alcohol use and recidivism.

- XX. Nyamathi et al. Nurse-Led Community Health Worker Adherence Model in 3HP Delivery among Homeless Adults at Risk for TB Infection and HIV. National Institute on Minority Health & Health Disparities. R21- D012696; 4/3/2018-11/30/2019

In this proposal, we will develop and pilot test an innovative, community-based directly observed intervention, including delivery of the 12-dose therapy (3HP; rifapentine [RPT] plus isoniazid [INH]) weekly. We will address critical individual level factors which are potential mechanisms that underlie health disparities in completing TBI treatment among the predominantly minority homeless. We hypothesize that improving these conditions, and promoting health by focused screening for TBI, and early detection and treatment for these vulnerable adults will improve TB treatment completion and prevent future TB disease.

- XXI. Nyamathi, et al. Development of a Community-Based HCV Treatment Completion Intervention Among HCV Positive Homeless Adults. National Institute on Minority Health & Health Disparities. R21 – MD013580; 09/20/2019-06/30/2021.

Factors associated with low adherence to hepatitis treatment among homeless adults include untreated mental illness, ongoing drug and alcohol use, unstable housing, and limited access to care. To address these disparities, we will pilot test a theoretically-based innovative model of care, successfully implemented by our team in other vulnerable populations, among HCV-infected homeless persons. Utilizing a community-based delivery approach, a community health worker (CHW), guided by a registered nurse (RN), will deliver a CHW/RN program, with HCV medication treatment delivered using directly observed therapy (DOT) to eligible HCV-infected homeless adults.

- XXII. Nyamathi, et al. Exploration of the Impact of Homelessness on Risk for COVID-19 Infection and Substance Use Patterns among Substance-Using Homeless Adults. UCI office of Research Craft-COVID. 06/19/20 – 05/31/2021

This grant aims to examine COVID-19 epidemiology among homeless persons who use substances (HPWUS). HPWUS is among the most vulnerable groups for COVID-19 infections, but little research has been conducted to understand the effect of substance use on SARS-CoV-2 infection onset and progression of CPVOD-19 disease. The findings from this study can inform developing intervention programs to reduce substance use and COVID-19 infections.

- XXIII. Nyamathi, et al. UCI- Susan Samueli Integrative Health Institute. **Impact of Community-Based Biofeedback Program on Drug Use and Mental Health among People Experiencing Homelessness**

This application aims to refine and pilot test a study focused on providing a critical understanding of the impact of

Heart Rate Variability-Biofeedback (HRV-BF) on homeless and unstably housed adults who have a history of drug and alcohol use, as well as depression during COVID-19 pandemic.

- 1984 – 1986 Principal Investigator: A. Nyamathi, Ph.D., Co-Investigator: K. Dracup, D.N.Sc. “Spousal Coping Instrument -- A Pilot Study.” UCLA Academic Senate Grant. \$3,900.

SCHOOL OF NURSING PEDAGOGICAL AWARDS:

- 2017 – 2019 Principal Investigator: A. Nyamathi, ANP, PhD/Written by Susan Tiso, DNP, FNP. 17-8025 State of CA – H&W, Statewide Health Planning & Development (Office of) OSHPD BSN Capitation,
- 2009 – 2010 Principal Investigator: A. Nyamathi, ANP, PhD Hospital Association. Nurse Educator Program. \$42,000.
- 2008 Principal Investigator: C. Lyder, ND, FAAN. New UCLA Bruins in the Making. Cardin, Suzette & Nyamathi, A. (authors), \$300,000. 9/1/08 – 8/31/11
- 2008 Principal Investigator: C. Lyder, ND, FAAN. Ralph Parsons Foundation Proposal. Kehoe, P., Keenan, C., & Nyamathi, A. (authors). \$200,000. 7/1/08 – 6/30/10
- 2007 Principal Investigator: A. Nyamathi, ANP, Ph.D., S. Cardin, Hospital Association, \$29,500
- 2006 Principal Investigator: S. Cardin & A. Nyamathi, QGE Doctoral Supplement Awards. UCLA Graduate Division, \$32,000.
- 2005 Principal Investigator: A. Nyamathi, ANP, Ph.D., K Baker, QGE Doctoral Supplement Awards. UCLA Graduate Division, \$24,000
- 2004 Principal Investigator: A. Nyamathi, ANP, Ph.D. QGE Doctoral Supplement Awards. UCLA Graduate Division, \$21,000
- 2002 – 2003 Principal Investigator: A. Nyamathi, ANP, Ph.D. John Hartford/AACN. Creating Careers in Geriatric Advanced Practice Nursing, \$36,000.
- 2001 Principal Investigator: A. Nyamathi, ANP, Ph.D. Co-Investigator: D. Koniak-Griffin, RN, PhD. Supplement to Enhance Vulnerable Populations Research Colloquia Visibility. UCLA AIDS Institute, \$8,000.
- 2001 Principal Investigator: A. Nyamathi, ANP, Ph.D. Co-Investigator: D. Koniak-Griffin. HIV Preparedness Think Tank: Focus on Los Angeles UCLA AIDS Institute, \$4,500.
- 2001 Principal Investigator: A. Nyamathi, ANP, Ph.D. Technology Feasibility Study between UCLA School of Nursing, UCLA Extension, UC Riverside and UCSF, School of Nursing. Office of Instructional Development, \$2,652.
- 1999 – 2001 Principal Investigator: A. Nyamathi, ANP, Ph.D. Development of Online Nursing Administration Program. e.College.com, \$186,500.
- 1998 – 1999 Helene Fuld Health Trust Award Recipient, “Development of a Proposal to Promote the Recruitment and Retention of Economically Disadvantaged Nursing Students, \$50,000

INTERNATIONAL CONTRACTS:

July 2016 – June 2019	Hong Kong Sanatorium & Hospital contract
June 2015 – May 2020	Hong Kong Sanatorium & Hospital contract
June 2010 – May 2015	Hong Kong Sanatorium & Hospital contract

INTERNATIONAL MOUs:

8 – 12 Universities over the last 10 years, each with program development

TEACHING: (1986-present)

At present, the focus of teaching is global health, coping, adaptation, biobehavioral assessment and prevention, and interventions clinical trials for impoverished populations affected by AIDS, Tuberculosis, Hepatitis B and C and other infectious diseases. In addition, I teach measurement theory to doctoral students; in particular, theories and research relating to coping are discussed as they relate to vulnerable populations. I previously taught in 423A, B, C Advanced Medical-Surgical Nursing and 214 Assessment in Cardiovascular Nursing to the graduate students. I co-developed and taught 226 Psycho Physical Environment for the doctoral students. Moreover, I have coordinated and taught 299B, and C which are research seminars designed for the doctoral students. I have also taught National Research Service Award (NRSA) courses where students present a nearly completed NRSA upon passing the course.

FORMAL SCHEDULED CLASSES

<u>Quarter</u>	<u>Academic Year</u>	<u>Course No. And Title</u>	<u>Credits</u>	<u>Class Size</u>
Winter	1986	423C Advanced Medical-Surgical	4	10
		598 Thesis Research	4	3
Spring	1986	423A Advanced Medical-Surgical Nursing (Coordinator and rounds)	8	60
		598 Thesis Research	4	3

Winter - Fall	2022	Sabbatical post Deanship		

Other Teaching Activities:

Spring 1986	Guest Lecturer, "Participant Observation" N205A
	Guest Lecturer, "Use of Computer Assisted Instruction in Nursing"
Winter 1997	Guest Lecturer, "History Taking in Cardiovascular Nursing" N414
Spring 1987	Guest Lecturer, "Participant Observation" N205A
Summer 1987	Guest Lecturer, "Data Collection Methods" N193
Fall 1987	Guest Lecturer, "Borrowed Theory-Coping" N206A
Winter 1988	Guest Lecturer, "Qualitative Data Collection Methods" N193
Spring 1988 – 91	Guest Lecturer, "Participant Observation" N205A
Summer 1988	Guest Lecturer, "Qualitative Data Collection Methods" N193
Fall 1988	Guest Lecturer, "Qualitative Data Collection Methods" N193
Winter 1989, 1993	Guest Lecturer, "Borrowed Theory-Coping" N206A
Spring 1989	Guest Lecturer, "Stress, Adaptation and Coping as a Framework for Nursing Practice" N226
Summer 1989	Guest Lecturer, "Qualitative Data Collection Methods" N193
Winter 1989- 93, 1996 - 02	Guest Lecturer, "Qualitative Research Methodology" N207
Fall 1990	Guest Lecturer, "Coping with AIDS: A Focus on Patients in the Acute Care Setting" N209A
Winter 1992 – 16	Guest Lecturer, "AIDS Research Among Minority Populations". CHS 298, School of Public Health
Fall 1992	Guest Lecturer, "Coping with AIDS: A Focus on Patients in the Acute Care Setting" N209A
Fall 1993 – 94	Guest Lecturer, "Management of Cardiovascular Problems" N429A
Summer 1994 – 95	Guest Lecturer, "Physical Assessment of the Heart" N192
Fall 1994 – 95	Guest Lecturer, "Physical Assessment of the Heart" N192
Spring 1995	Guest Lecturer, "Athrosclerosis and Myocardial Infarction" N429A
Fall 1995 – 97	Guest Lecturer, "Health Assessment" N200A
Winter 1998 – 03	Guest Lecturer, "SEM: An Analysis for Model Building" N206B
Fall 1998-99, 2013	Guest Lecturer, "Health Behavior Models" N200A
Spring 1999 – 04	Guest Lecturer, "Vulnerable Populations Research" N190
Fall 2001	Guest Lecturer, "Health Disparities in Vulnerable Populations Research" N104
Fall 2006 – 2007	Guest Lecturer, "Innovation Educational Strategies", N220
Winter 2008, 2009	Guest Lecturer, "Theoretical Foundations for Research", N210C
Winter 2009	Guest Lecturer, "Culturally Sensitive Research Approaches", N173

UCI

Winter 2017	Guest Lecturer, "Health Promotion/Disease Prevention", NS215
Winter 2017	Guest Lecturer, "Research Methods and Applications in Health Care", NS125

Spring 2018	Guest Lecturer, “Community Based Healthcare”, NS170
Winter 2019	Guest Lecturer, “Research Trajectory over 30 Years, Dr Sorkin’s Research Group
Fall 2021	Guest Lecturer, “Yuqing Guo
Winter 2022	Guest Lecturer, “Sanghyuk Shin”

THESIS COMMITTEE CHAIR (1986-1994)

1. Jean Kasper, The Perceived Needs of Parents of Children in the Intensive Care Unit: A Descriptive Study. Completed 8/86
2. Adella Robinson, Perceived Body Image/Self Concept of Mechanical Heart Valve Recipients. Completed 8/86
3. Annette Kashiwabara, Effects of Timing of Pre-Operative Teaching on Pre-Op Anxiety and Post-Op Pain and Emotional Distress. Completed 6/87
4. Kathy Styer, Life Style Changes of Gay and Bisexual Males. Completed 3/88.
5. Maureen Keckeisen, Coping and Psychosocial Adjustment to Illness in Acute MI Patients. Completed 9/88.
6. Rosemarie Hirsh, Social Supports of Cardiovascular Patients. Completed 1991.
7. Ruthanne Kuiper, Perceptions, Stressors and Coping Strategies of Patients with the Automatic Implantable Cardioverter-Defibrillator. Completed 6/89.
8. Pauline Mohrman, The Effect of Music on Labor Pain in First Full Term Pregnancies. Completed 8/89.
9. Stephanie Chang. Informational Needs of Newly Diagnosed Cancer Patients. Co-Chair, Completed 1989.
10. Linda Crosby, AIDS Awareness from a Health Promotion/Prevention Perspective. Terminated Thesis Project, 5/1990.
11. Ellen Balk, AIDS Education in Malawian Children. Completed 6/90.
12. Natalie Correll, Coping and Hassles Assessment of Adult Children of Female Cardiac Patients. Completed 1991.
13. Yvette Miller, The Care Giver Needs of a Brain Tumor Patient as Perceived by Neuroscience Intensive Care Nurses and Floor Nurses. Completed 1991.
14. Kathleen Klick, Coping Responses of Male Spouses of Cardiac Surgery Patients. Completed 1993.

COMMITTEE MEMBER:

1. Carol Josephs, A Comparison of Burnout Experienced by Registered Nurses Caring for Oncology Patients. Completed 1986.
2. Dee Dee Smith, An application of the Derdarian Behavioral System Instrument in Theory and Research Development: The Myocardial Infarction Patient. Completed 1987.
3. Debbie Schobel, Perceived Life Changes in Adults with Acquired Immune Deficiency Syndrome and Kaposi's Sarcoma using a Behavior Systems Model. Completed 1987.
4. Lisa Philici, Family Adaptation and Coping Mechanisms. Completed 1987.
5. Richard Loving, Daily Light Exposure of Psychiatric Inpatients. Completed 1987.
6. Dorothy Tullman, Measurement and Description of the Johnson Behavioral System Model Changes in Myocardial Infarction Patients Using the Derdarian Systems Model. Completed 1989.
7. Malinda Bratosh, Need for Discharge Instruction in the Elderly Cardiac Patient. Completed 1988.
8. Janet Egbert, AIDS Home/Hospice Care: Nursing Behaviors that Meet the Needs of SOs. Completed 1988.
9. Mary Woo, A Comparison of Thermodilution & Transthoracic Electrical Bioimpedence. Completed 1988.
10. Susan Tatum, The Efficacy of Shoe Covers in Preventing Surgical Wound Infections. Completed 1988.
11. Beverly Firth, The Relationship Between Social Support and Psychosocial Adjustment in Patients with Recurrent Ventricular Arrhythmias. Completed 1991.
12. Sharon Coleman, CPR Instruction: Differing Methods of Instruction on Learning and Retention. Completed 1989.
13. Elizabeth Sullivan, Hope, Spiritual-Well Being, and QOL Among Pts with Recurrent Ovarian CA. Completed 1991.
14. Mary Ann Shinnick, The Effects of Nursing Intervention on the Quality and Quantity of Sleep in Postoperative Cardiac Surgical Patient in the ICU. Completed 1991.
15. Noel Marie Schnedl, Critical Care Nurses' Response to Slow Codes. Completed 1991.
16. Allison Reilly, Factors Influencing Pre-Hospital Delay in Those Experiencing Chest Pain. Completed 1992.
17. Susan Dempsey, Coping Processes Affecting Delay of Acute Myocardial Infarction Patients. Completed 1994.

DISSERTATION COMMITTEES:

*** Students representing under-represented minorities**

1. Barbara Riegel, Relationship between Support and Adjustment to Coronary Disease. (Member) Completed 4/91.
2. Pamela Shuler, Assessing Homeless Women's Holistic Needs as They Relate to Family Planning: An Exposition and Test of the Nurse Practitioner Practice Model. (Member). Completed 4/91.
3. Nancy Fawzy, An Educational Nursing Intervention to Enhance Coping, Affective State, and Delayed Cutaneous Hypersensitivity in Newly Diagnosed Malignant Melanoma Patients. (Member). Completed 6/91.
4. Shoni Davis, Chemical Dependency in Women at Risk for HIV Infection. **NRSA Sponsor.** (Chair). Completed 8/92.
5. Evelyn Calvillo*, Pain Response in Mexican-American and Non-Hispanic Women. (Member). Completed 4/91.
6. Crystal Bennett, Assessing the Needs of Significant Others of Persons with AIDS. (Chair). **NRSA Sponsor.** Completed 5/93.
7. Mary Woo, Patterns of Heart Rate Variability. (Member). Completed 5/92.
8. Debra Moser, Effects of a Combined Biofeedback-Relaxation Technique on Hemo-Consumption with Advanced Heart Failure. (Member). Completed 5/92.
9. Dorothy Anderle, Cognitive-Behavior Therapy with Fibrositis Subjects. (Member). Completed 1/94.
10. Kathleen Boyle, An Ethnographic Study of Drug Addicted Individuals. Department of Psychology. (Member). Completed 6/92.
11. Lisa Rapport, Gender Differences and Psychosocial Factors Associated with Cardiovascular Variability in the Natural Environment. Department of Psychology. (Member). Completed 5/92.
12. Karen Jensen, Patterns of Adaptation and Coping in Alzheimer Caregivers. (Member). Completed 5/96.
13. Bonnie Siegel, The Development and Testing of a Tool to Measure Privacy Needs of Intensive Care Patients. (Member). Completed 6/94.
14. Maria Rosa-Morales* - Cognitive-Behavioral Processes that Affect the Decision of Substance Dependent-Schizophrenic African-American Men in Choosing to Remain in or Drop Out of Treatment. (Chair). Completed 6/94.
15. Lynn Doering - The Effect of Orthostatic Change on Hemodynamic Stability in Orthotopic Heart Transplant Recipients. (Member). Completed 6/94.
16. Jeanne Guiss - The Relation of a Health Promotion Program to Physical Well Being of Fire Fighters. (Member) Completed 5/94.
17. Deborah Walker - Alternative Prenatal Care Visit Schedule for Low-Risk Pregnant Women. (Member). Completed 6/94.
18. Jesus Sarol *- High-Risk Behaviors Related to HIV Transmission Among Drug Users Attending Treatment in the Philippines. School of Public Health. (Member). Completed 10/95.
19. Genevive Monahan, A Profile of Pregnant Drug Using Female Arrestees in California. (Member). Completed 6/96.
20. Janna Lesser, From Childhood Maltreatment to Motherhood: An Exploration of the Triad of Childhood Abuse, Depression, and Maternal Role Attainment in Adolescent Mothers. (Member). Completed 6/97.
21. Elizabeth Henneman, Effect of a Collaborative Weaning Plan on Patient Outcome in the Critical Care Setting. (Member). Completed 12/97.
22. Sheryl Tyson*, Anxiety, Depression, and Post Traumatic Stress Disorder: Health Outcomes of Women Who Cope with Conjugal Violence Chair. Completed 05/02.
23. Cheryl Westlake, Causal Antecedents of Threat Appraisal and Adaptational Outcomes in Heart Failure Patients. (Member). Completed 4/98.
24. Ancetta Caridad*, HIV Risk Behaviors of Overseas Workers in the Philippines. (Member). Completed 8/98.
25. Lorraine A. Jaecks. HIV Risk Behaviors of Overseas Workers in the Philippines. (Member). Completed.
26. Susan T. Roberts, Impact of Gender Roles on Communication Involving Sexual Practices Among Mexican Americans. (Member). Completed 2003.
27. Elizabeth Dixon, Neighborhoods and Adult Health Status: A Multi-level Analysis of Social Determinants of Health Disparities in Los Angeles County. (Chair). Completed 2004.

DISSERTATION COMMITTEES (Continued)

28. Tonia Jones*, Relationship Between Biological and Psychosocial Factors and Immunologic Response to Hepatitis B Vaccination in Homeless Adults (Chair). Completed 2006.
 29. Barbara Greengold, Cost-Effective Analysis of Behavioral Change: Improving Vaccination Compliance Among Homeless Adults (Chair). Completed 2006.
 30. Cleopatra Beaton*, Understanding the process of pain management in Veteran men with Rheumatoid Arthritis. (Member). Completed 2006.
 31. Gwen Spears*, "An Examination of Psychosocial, Behavioral and Sociodemographic Factors Associated with Substance Use among Pregnant Adolescents". (Member). Completed 2007.
 32. Sherri Mendelson, A Community-Based Parish Nurse Intervention Program for Mexican-American Women with Gestational Diabetes (Member). Completed 2007.
 33. Salah Aqtash*, Determinations of Health Promoting Lifestyle Behaviors Among Arab Immigrants from the Region of Levant (Member). Completed 2007.
 34. Darlene Tyler, Attitudes and Beliefs About Hepatitis C Virus Infection, and Perceived Risk for Hepatitis C Virus Infection, Among Homeless Adults (Chair). Completed 2009.
- DISSERTATION COMMITTEES (Continued)**
34. Mary Ann Shinnick, The Impact of Human Patient Simulation on Nursing Clinical Knowledge. (Member). Completed 2010.
 35. Claudia Davis*, What are the Relative Contributions of Biological and Psychosocial Factors in Predicting Quality of Life and Psychological Functioning in African American Breast Cancer Survivors? (Member), Completed 2013.
 36. Susan Stemmler*, Methamphetamine-Using Mothers: The Experience of Taking-Care of Oneself in Pregnancy. **T-32 Recipient.** (Chair). Completed 2012
 37. Ann Anaebere*, Exploring Sexual Decision-Making Patterns Among African American Women from Urban Communities. **T-32 Predocoral Recipient. NRSA Sponsor** (Chair). Completed 4/01/11. **Awarded NRSA. T-32 Postdoctoral Recipient, NRSA Sponsor.**
 38. Maria Hayes Bautista*, Coping Processes of Latino Mothers whose Sons are Incarcerated. **NRSA Co-Sponsor** (Member). **T-32 Recipient.** Awarded NRSA. Completed in 2013. Cynthia Albarran. Coping responses of Female Farm Workers. **T-32 Recipient. Awarded NRSA** (Member). Completed in 2013.
 40. Benissa Salem*, Characterizing Frailty-Related Phenotype among Homeless Older Adults. **T-32 Predoc and Post-doc Recipient** (Chair). Completed in 2013.
 41. Carol DeLilly*, Factors Affecting Blood Pressure Outcomes among Young African American Men. **T-32 Recipient** (Chair). Completed 2014.
 42. Ariel Rankin*, **T-32 Recipient.** Repurposing a Legacy: The Experiences of African-American Women Who Received a HIV Diagnosis at the Age of 50 or Older. (Chair). Completed 2015.
 43. Neomie Ceta Congello*, Influences of Perceived Environment, Partner Support, and Attitudinal Familism on Physical Activity among Mexican American Women. (Member). Completed 2015.
 44. Fayette Nguyen*, Factors Affecting Medication Adherence Among Vietnamese Immigrants: A Mixed Design. (Chair). Scheduled 5/2016.
 45. Tiffany Montgomery*, "Adapting a Brief Evidence-based Intervention for Text Message Delivery to Young Adult Black Women." (Member). Completed 5/ 2016.
 46. Roman Samiley, Push-Pull Tensions: A Grounded Theory on Social Experience of Use of Healthcare Services Among Homeless Veterans. (Member). Completed 5/2016.
 47. Marlon Saria*. The Hidden Morbidity of Cancer: An Exploratory Study of Burden in Caregivers of Cancer Patients with Brain Metastases. (Member). Completed 5/2016.

UCI DISSERTATION COMMITTEES

48. Shawana Al Harassi, Predictors of Depression among Adult Women in Wilayat of Rustaq. (**UCLA Chair until January 2017/Member**). Completed May 2017.

DISSERTATION COMMITTEES (Continued)

49. Salpy Akaragian, Prevalence of High Blood Pressure in Armenians Attending a Local Clinic in the Lori Region of Armenia. (**UCLA Chair until January 2017/Member**). Completed May 2017.
50. Sharrica Miller*, Health Services Utilization and Transition Readiness in Transitional Age Foster Youth. (**UCLA Chair until January 2017/Member**). Completed May 8, 2017.
51. Jannett Hildebrand*, Integrating Coached Care into Shared Medical Appointments in Adult Latinos with Type 2 Diabetes. (**Member**). Completed May 31, 2018.
52. Yusra Al Nasiri, Parent Educational Intervention Program (PEIP) for Improving Parental Knowledge, Self-Efficacy, & Parent Perception of Health-Related Quality of Life in Children with Sickle Cell Disease Using Smartphone Technology. (**UCLA Member until January 2017/Member**). Completed June 6, 2018.
53. Valerie Pham. Latent Tuberculosis Screen by Civil Surgeons: A Population-Based Assessment of Current Practice. Completed September 2, 2022 (Member).
54. Donna Balsam, An App-based Mindfulness Meditation Intervention to Lower Stress and Anxiety for Women with Hypertensive Disorders of Pregnancy. (**Chair**). Completed November XX, 2022.
55. Renee Smith, Evaluating Physiological Correlates of PTSD Symptoms in Trauma Exposed Physicians, In Process. Doctoral Advisor
56. Shana Matthews* The Relationship of Traumatic Stress on Somatic Complaints and Mother Infant Bonding among Postpartum Black Women. Doctoral Candidate (Chair).
57. Sophia Okudu* In Process
58. Chel Baker, Spatial and Social Network Analysis to Characterize Tuberculosis Transmission in Botswana. Committee Member. Doctoral Candidate.

STUDENT MENTORSHIP: UNDERGRADUATE STUDENTS**2018**

Klansek, E.

2018 - 2020

Kuriakose, M.

UROG STUDENTS**2017**

Lee, S

Reed, J

Yanuarina, L

2020

Cuellar, H*, SURP and Honors Student

POST BACALEURIATE STUDENTS – Social Ecology, Department of Psych Sciences (With Dr. Dana Garfin)

Deguzman, R.

Harvey, G.

Adams, I.

Halas, K.

Jones, A

Arce, N.

Goodjoin, M

PhD Students 2019 – present

S. Mathews 2019 – present

R. Smith 2019 - present

S. Okudu 2021

POST DOCTORAL FELLOWSHIP

Dr Dana Garfin - 2018-present. Recipient of a K Award on first submission.

Charles Drew University, Mervyn M Dymally School of Nursing – UCI UNITE CDU (Program) – Initiated by Dean Nyamathi with Group Mentorship with Associate Deans and Directors of PhD Program. Additional Individual mentoring by Dr Nyamathi is demarcated as “&”.

2019-2020
