Custom Wood ♦ Vinyl PVC ♦ Ornamental Aluminum ♦ Chain Link

Amendola's Fence Company manufactures our vinyl fences in Amityville, New York.

## ABOUT AMENDOLAS FENCE

Our goal is to deliver quality products which are designed to perform and meet expectations for security and beauty now and into the future. Before you make a decision on the vinyl fence products you will be investing in for your home or business, let us show you our product samples and see for yourself the Amendola's difference. Our fence products reflect our dedication to quality.

## THE AMENDOLA'S DIFFERENCE

Our Diverse Product Line: Available in an extensive line of styles, heights and five different colors; (white, tan, adobe, gray and cedar grain vinyl), our fence line offers infinite combinations. Suitable for a wide range of vinyl fence, railing, and pool safety applications, Amendola's Fence Company can recommend the right fence for each and every project.

Engineered Products: Our vinyl fence products are manufactured using the highest grade raw materials formulated to withstand the harsh conditions found in the Northeast. Our products are engineered with more ribs, of a heavier gauge vinyl, and are reinforced with galvanized steel stiffeners.

Customization: Our complete line of vinyl fence, railings, arbors and gates can be customized. When an off the shelf product simply will not do, we offer a build-to-order customized solutions to meet the most challenging set of on-site conditions and/or needs.

Colors shown are for representation purposes only. Actual colors may vary.

# WHAT MAKES OUR VINYL FENCE BETTER

"The Bitterness Of Poor Workmanship Is Long Remembered After The Sweetness Of A Cheap Price Is Forgotten."

**MID-RAIL:** All privacy styles with a topper are manufactured with a 2" x 6" double-ribbed mid-rail. This mid-rail with its ridge design is a key component for Amendola's interlocking fence sections.

**INTERLOCKING PANELS:** Our fence sections use an interlocking construction which locks the vertical boards into the bottom and mid-rail. Our patented 2" x 6" rails have a ridge feature that allows this interlocking system to protect sections from knock-out and wind blowouts.

**BOTTOM RAIL:** The foundation of all of our PVC sections is our patented 2" x 6" heavy duty bottom rail with an internal steel support. This rail also features a ridge design for interlocking ability. The increased structural strength of this rail reduces sagging, premature failure, and damage from wind.

**GATE FRAME:** Vinyl gates have always been an area of product failure within the vinyl fence industry. All of our gates are manufactured using our patented 3 1/2" x 3 1/2" gate master frame. Its double walled feature enables hardware screws to penetrate two layers of the frame, as well as doubling the welding surface. This makes for stronger connections and reducing screws from pulling out. This gate master design is structurally stronger than that of our competitor's hollow or narrow gate frames. Bottom Line: Our gates last longer!

**GATE STOP:** This positive stop, patented by Amendola's, is an additional piece of gate hardware that you will only find in our system. This stop is an insurance policy for all gates as it absorbs the violent act of the gate slamming and many times help protect against the resulting stress fractures and gate failure. Our gate stop is included with every walk and drive gate.

**Amendola's  
Fence co.**

PRIVACY STYLES | OKLAHOMA SOLID

The Oklahoma Style is the most commonly sold vinyl fence style for its diverse applications and maximum privacy. These sections are manufactured with our full privacy interlocking tongue & groove board and heavy duty 2" x 6" steel reinforced bottom rail. We offer the Oklahoma fence and matching gate in scalloped and crowned designs.

The Oklahoma Privacy styles are available in heights ranging from 3 to 8 feet.

| OKLAHOMA |

| OKLAHOMA with OKLAHOMA TOPPER |

Spacing measurements are approximate.

## WOOD GRAIN FENCES | CEDAR

Cedar Grain Gates are not welded.

Our Cedar Grain Vinyl Fence is unlike any other PVC fence on the market today! We offer an extensive line of Cedar Grain fence styles and gates to satisfy your rear and front yard as well as pool enclosure fence needs. We have developed this product to look like natural wood, with the low maintenance advantages of vinyl. Through advancements in vinyl and acrylic materials, our Cedar Grain Vinyl Fence line will last and outperform that of wood and other similar vinyl fence products well into the future. See for yourself how our products will outperform other composite and painted products on the market.

| LOUISIANA SCALLOPED |

POST & RAIL |

Our Post & Rail is an affordable option for dividing large properties, great along roadways, and as a corral for horses and livestock. Post & Rail styles are available in 2-Rail, 3-Rail, and 4-Rail fencing.

| STANDARD POST & RAIL with added WELDED WIRE |  
Offered in 2 – 4 horizontal rails

| CROSS BUCK | Offered in 2 – 3 horizontal rails

| DIAMOND POST & RAIL | Offered in 2 – 4 horizontal rails  
Not available in Gray or Cedar Grain

## GATES

Our gates are known in the fence industry as being one of, if not the strongest PVC gate made. Our patented welded gate profile is square rather than rectangle, which makes it structurally stronger. The wall of the profile is doubled, serving two purposes. First is that it is twice the surface to be welded for double the strength. Second is the gate hardware is secured into two walls rather than just one wall of PVC. All gates include our patented Positive Gate Stop to help protect the gate and latch in case of a hard slam. Be sure to always leave your gates closed. Please ask the sales representative at your home to show you the sample gate corner and ask other companies to show you their gate.

| OKLAHOMA with CROWNED OPEN SPINDLE  
SINGLE CROWN DOUBLE DRIVE GATE |

| ILLINOIS SCALLOPED DOUBLE DRIVE GATE [Single Scallop] |
