

**CUSTOMISED VEHICLES
SOLUTIONS**

RE-DEFINING YOUR VEHICLE

TACTICARS, part of the Avnon Group, has a proven track record designing and supplying customised, special purpose mobile solutions to Law Enforcement Agencies, Military, HLS and Special Units worldwide. Client-orientated, our goal is to deliver the optimal vehicle solutions that meet mission specific operational and tactical requirements.

TACTICARS has become a leader in building and integrating advanced subsystems and equipment to vehicle platforms to meet the most challenging field missions.

FLEXIBILITY IS KEY

Using the vehicle platform of your choice, TACTICARS designs & delivers bespoke mobile platforms, from customised chassis and interior to systems integration and finished design.

our goal is to deliver the optimal vehicle solution for each client. With no ties to a production line, TACTICARS offers complete flexibility, developing scalable, adaptive vehicle solutions customised to meet the precise operational and tactical requirements of each client.

PRODUCTION & CAPABILITIES

Based in the UK, TACTICARS production facilities incorporate the latest tools and equipment, to ensure that we deliver our clients with the ultimate mission specific vehicles and mobile platforms.

EOD/IEDD VEHICLES

TACTICARS delivers customised EOD vehicles, First Responder teams with an end-to-end solution, providing rapid deployment and mission critical equipment for EOD/IEDD teams.

FEATURES

- Modular Systems Integration (Containment, Examination, Neutralisation, etc.)
- Different Levels of Terrainability and Payload
- Various Levels of Ballistic Protection
- Customised Team Accommodation
- Remote Dispatch Capabilities

EOD VEHICLES FOR A WIDE RANGE OF MISSIONS

First Response

Explosive Materials Containment

Explosives Neutralisation & Disposal

HAZMAT Detection

MODULAR INTEGRATED SYSTEMS

- EOD/IED Robot
- Portable Blast Container
- Hook & Line Kits
- Mini Recoiless
- Non-Magnetic Tool Kit
- Selective Explosive Detector
- Personal Protection Equipment
- X-ray Scanner
- Electronic Stetoscope
- Breaching Kit

CUSTOMISATION PROJECT DESIGN EXAMPLE

EOD TRUCKS

FEATURES

- Modular Systems Integration (Containment, Examination, Neutralisation, Etc)
- Different Levels of Terrainability and Payload
- Various Levels of Ballistic Protection
- Customised Personnel Accommodation
- Field Proven & Rapidly Deployed

EOD TRUCKS FOR A WIDE RANGE OF MISSIONS

First Response

Explosive Materials Containment

Explosives Neutralisation & Disposal

HAZMAT Detection

MODULAR INTEGRATED SYSTEMS

- Heavy EOD Robot
- Bomb Container
- Heavy Duty Tripod
- Mini Recoilless
- Non-Magnetic Tool Kit
- Selective Explosive Detector
- Personal Protection Equipment
- X-ray Scanner
- Breaching Kit

CUSTOMISATION PROJECT DESIGN EXAMPLE

C.B.R.N.E VEHICLES

TACTICARS delivers customised C.B.R.N.E / HAZMAT vehicles, providing First Response teams with a complete, mission specific mobile solution. The vehicles are equipped with the latest technologies to detect and handle hazardous substances out in the field.

FEATURES

- Modular Systems Integration (AWR, Sensors C.B.R.N.E. Kits, etc)
- Different Levels of Terrainability and Payload
- Mobile Laboratory
- Incident Management
- Analysis & Reporting Tools
- Customised Team Accommodation

C.B.R.N.E VEHICLES FOR A WIDE RANGE OF MISSIONS

First Response

Decontamination & Containment

Sample Collection

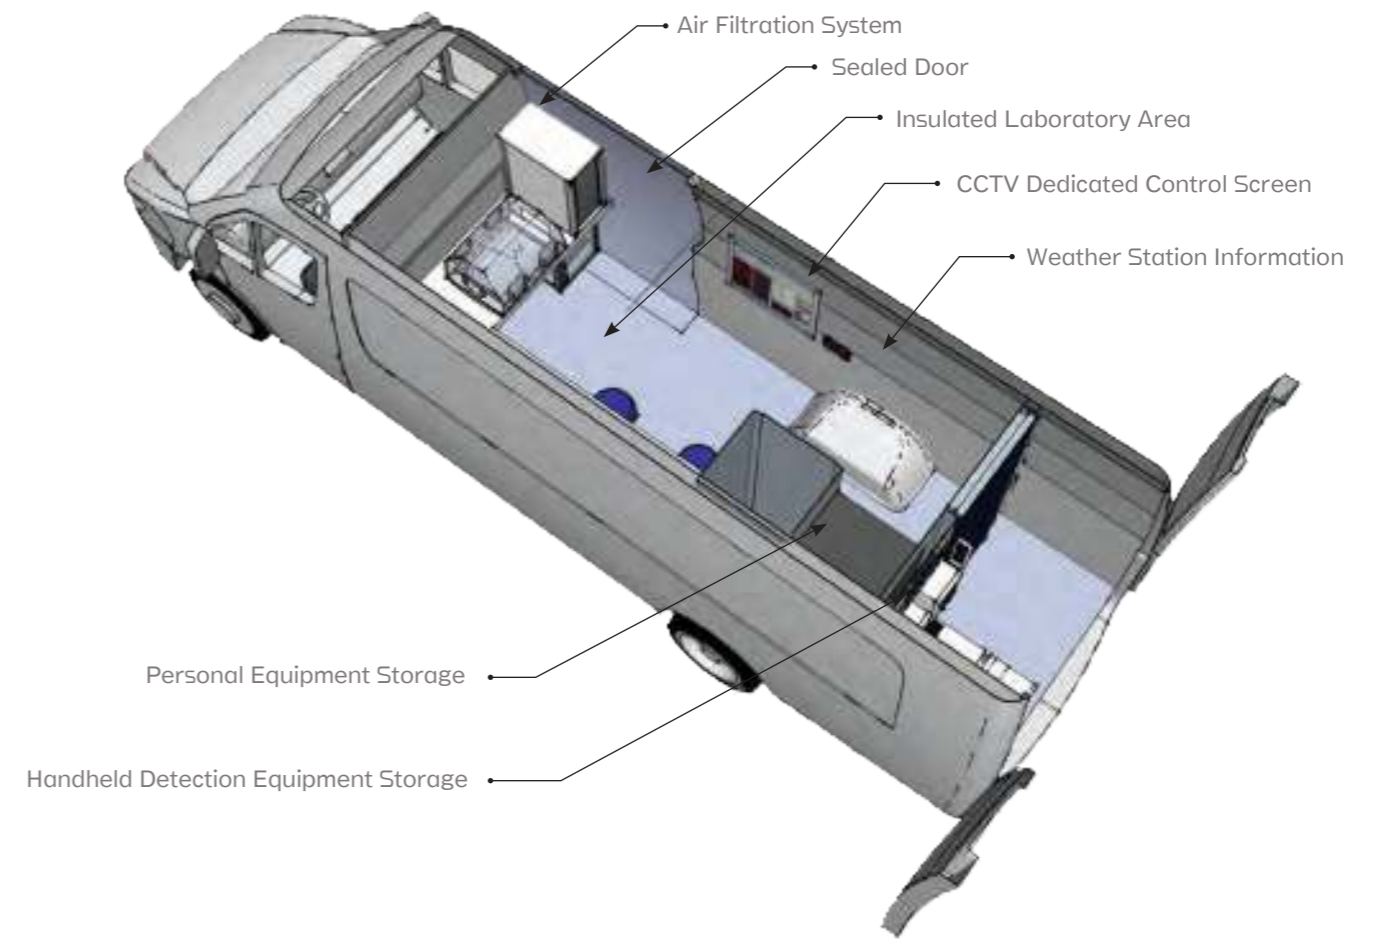

On-Site Analysis

MODULAR INTEGRATED SYSTEMS

- Mobile C&C
- GPS Location and navigation
- Environmental Monitoring System
- Integrated Breathing Systems
- C.B.R.N.E. Detection Robot
- Air Filtration Systems
- Radiation Detector
- Bioaerosol Detector
- Day/Night Visual Systems
- Analyser Kit

CUSTOMISATION PROJECT DESIGN EXAMPLE

SURVEILLANCE & INTELLIGENCE VEHICLES

TACTICARS provides the ultimate mobile platform for Law Enforcement and Intelligence Agencies providing surveillance and intelligence gathering missions. Equipped with multiple sensors and analytical tools, our customised vehicle provides your field agents with the tools to receive real-time actionable intelligence.

FEATURES

- Modular Systems Integration (OSINT, SIGINT, Analytics, etc)
- 360° Surveillance
- Operator Station
- Stabilisation Systems
- Customised Team Accommodation
- Fast Deployment

SURVEILLANCE & INTELLIGENCE VEHICLES FOR A WIDE RANGE OF MISSIONS

Evidence Collection

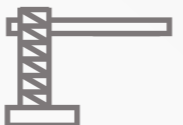

VIP Protection

Crowd Monitoring

Mass Event Protection

Border/Perimeter Surveillance

MODULAR INTEGRATED SYSTEMS

- Mobile Control Station
- GPS Location and Navigation
- Day/Night EO/IR Systems
- Automatic Target Tracking
- Audio Surveillance Systems
- UAV Station
- Biometric Recognition Systems
- Jamming Systems
- Communication Interception Systems
- 360° RF Detector
- Radar
- Visual Sensors- Facial Recognition, LPR, CCTV, Video Analytics
- HUMINT: Agents, Call Centers
- OSINT: Web, Media, Social Networks
- Communication: Cellular, GPS Location
- Observation Systems
- C&C

CUSTOMISATION PROJECT DESIGN EXAMPLE

Jammer Equipment

High performance VIP jammer, powered by battery power pack, DC/AC inverter and connected to operator workstation via RS232.

Operator Workstations

Powerful computer units equipped with mounted LCD monitors and peripheral devices suitable for up to 4 system operators.

Direction Finder

Measures the direction from which a received signal was transmitted by a mobile phone in the vicinity and locates device via triangulation calculation.

IMSI Catcher

Target Detection

Scan any public area and collect mobile phone identification for all persons within 500m radius.

Personal Profiling

Collect personal information of mobile phone ID owners including their: photos, contacts, blogs and social media posts.

Intelligence Analytics

Analyse personal profiles, social network activity and online behavior of suspects in crowded areas.

FORENSIC VEHICLES

TACTICARS incorporates advanced tools and technologies, complete with an on-site laboratory to any mobile platform. providing your Forensic team with the tools to collect, analyse and document evidence on-site.

FEATURES

- Modular Systems Integration (Evidence Collection, Examination, Analysis, etc.)
- Different Levels of Terrainability and Payload
- Customised Team Accommodation
- Remote Dispatch Capabilities
- Custom Built Storage

FORENSIC VEHICLES FOR A WIDE RANGE OF MISSIONS

Evidence Recovery

Crime Scene Processing

Documentation & Evaluation

Analysis & Reporting

MODULAR INTEGRATED SYSTEMS

- Storage & Containers
- Video System
- Refrigerator
- Communication Systems
- Photography Equipment
- Personal Protection Equipment
- Evidence Collection Kits: Trace evidence Trajectory Kits, Pattern Print Lifter, Impression Kits, Fingerprint Kits, Blood Collection Kit, Bloodstain Pattern Documentation etc.
- Operator Stations, Analysis Systems

CUSTOMISATION PROJECT DESIGN EXAMPLE

DIGITAL FORENSIC VEHICLES

Our fully customised vehicle provides your Forensic Team with the tools to extract, recover and manage data from images, texts, and video to audio media from all digital devices. Our robust analysis tools allow your team to investigate and document evidence and generate reports on site.

FEATURES

- Modular Systems Integration (Evidence Collection, Examination & Analysis, etc.)
- Operator Station
- Stabilization Systems
- Customised Team Accommodation
- Fast Deployment

DIGITAL FORENSIC VEHICLES FOR A WIDE RANGE OF MISSIONS

Computer Forensics

Mobile Forensics

Data Recovery

Audio Video Forensics

Automotive Forensics

Imaging

MODULAR INTEGRATED SYSTEMS

- Dual CPU Station
- GPS Location and Navigation
- Data Extraction and Analysis Platform
- Video Analysis Software
- Target Profiler
- Data Storage Tower
- HDD Duplicator
- IMSI Catcher
- Write Blocking Kit

CUSTOMISATION PROJECT DESIGN EXAMPLE

BORDER CONTROL VEHICLES

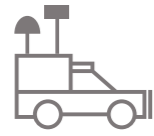

TACTICARS provides border control units with a complete, mission specific mobile solution, from customised intelligence platforms and UAV's to integrated Geo-tactical solutions. Our vehicles facilitate the monitoring of border activities from both air and land, to ensure maximum protection of air-space, territorial borders and waters.

FEATURES

- Modular Systems Integration (Imaging, Radar, Communication, etc.)
- Customised Team Accommodation
- Operator Control Units
- Different Levels of Ballistic Protection and Terrainability

BORDER SECURITY VEHICLES FOR A WIDE RANGE OF MISSIONS

Reconnaissance Patrol

Border & Port Security

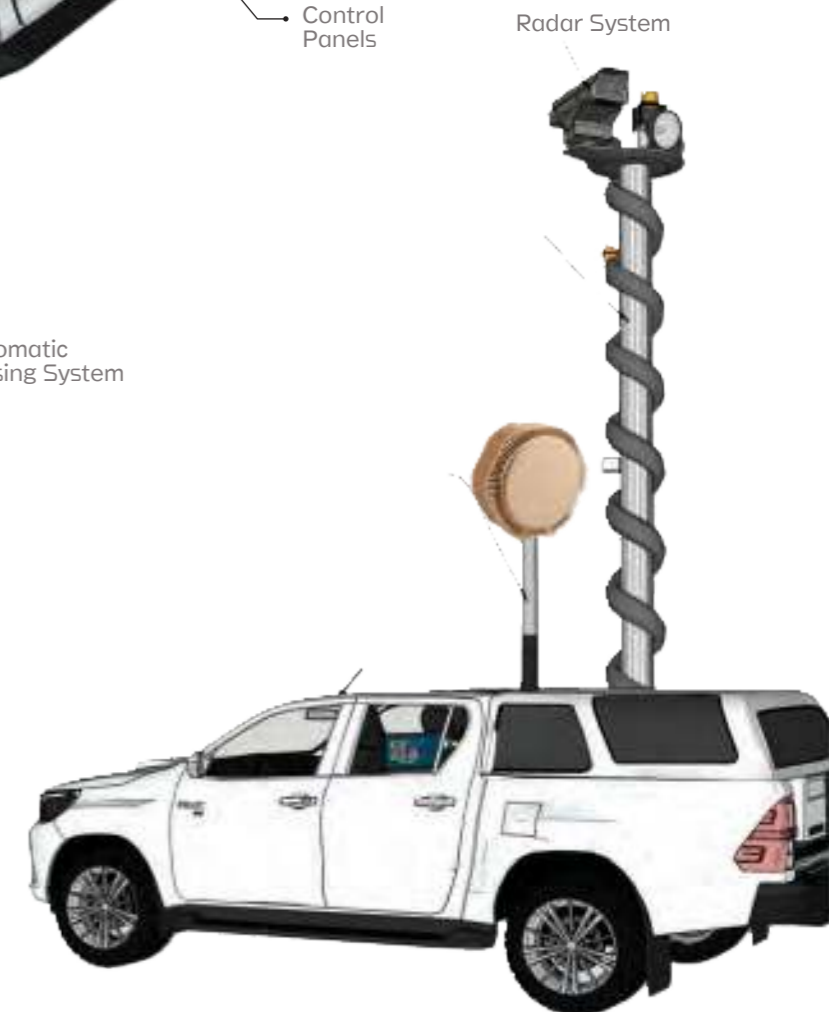

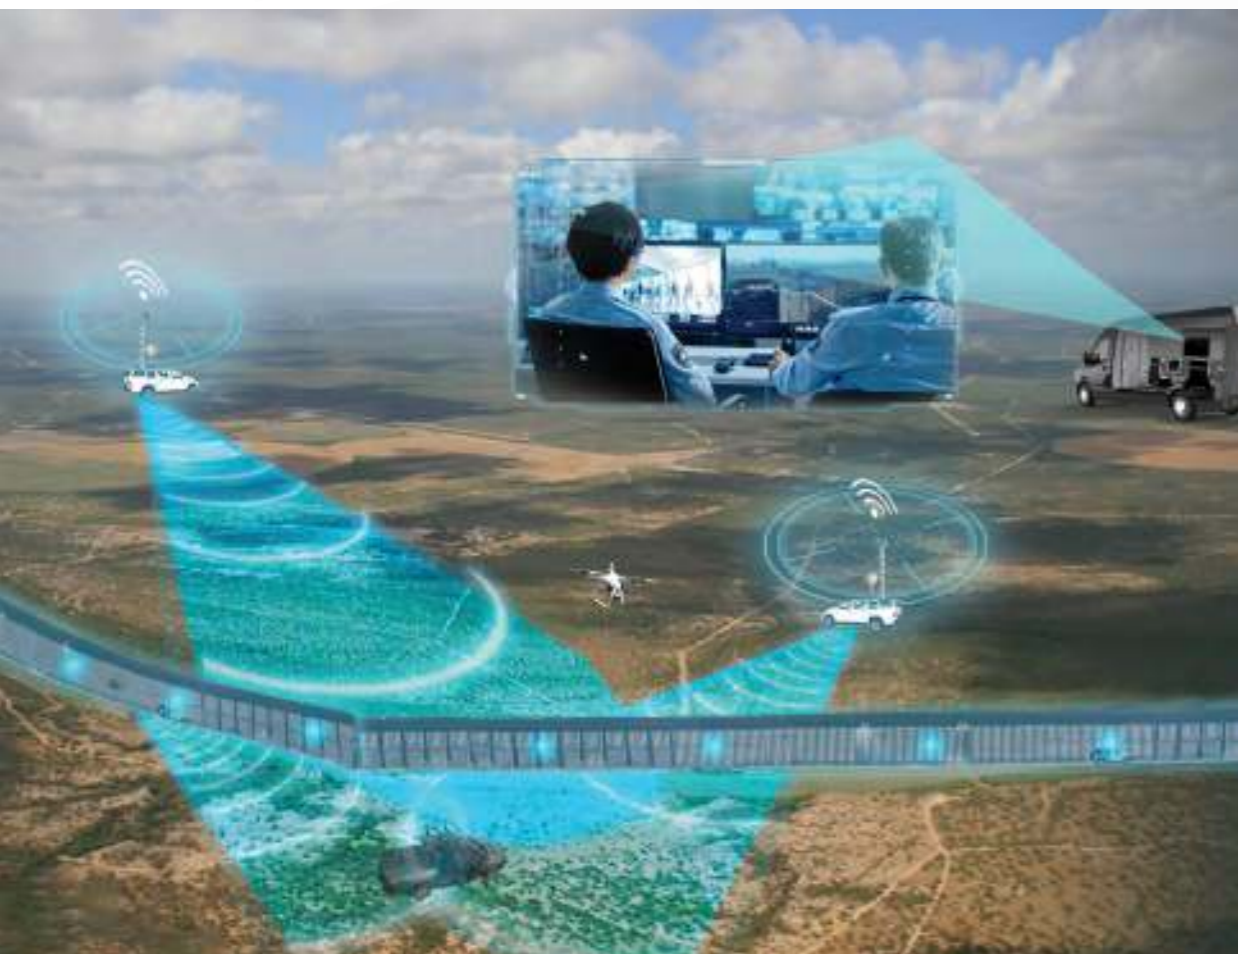

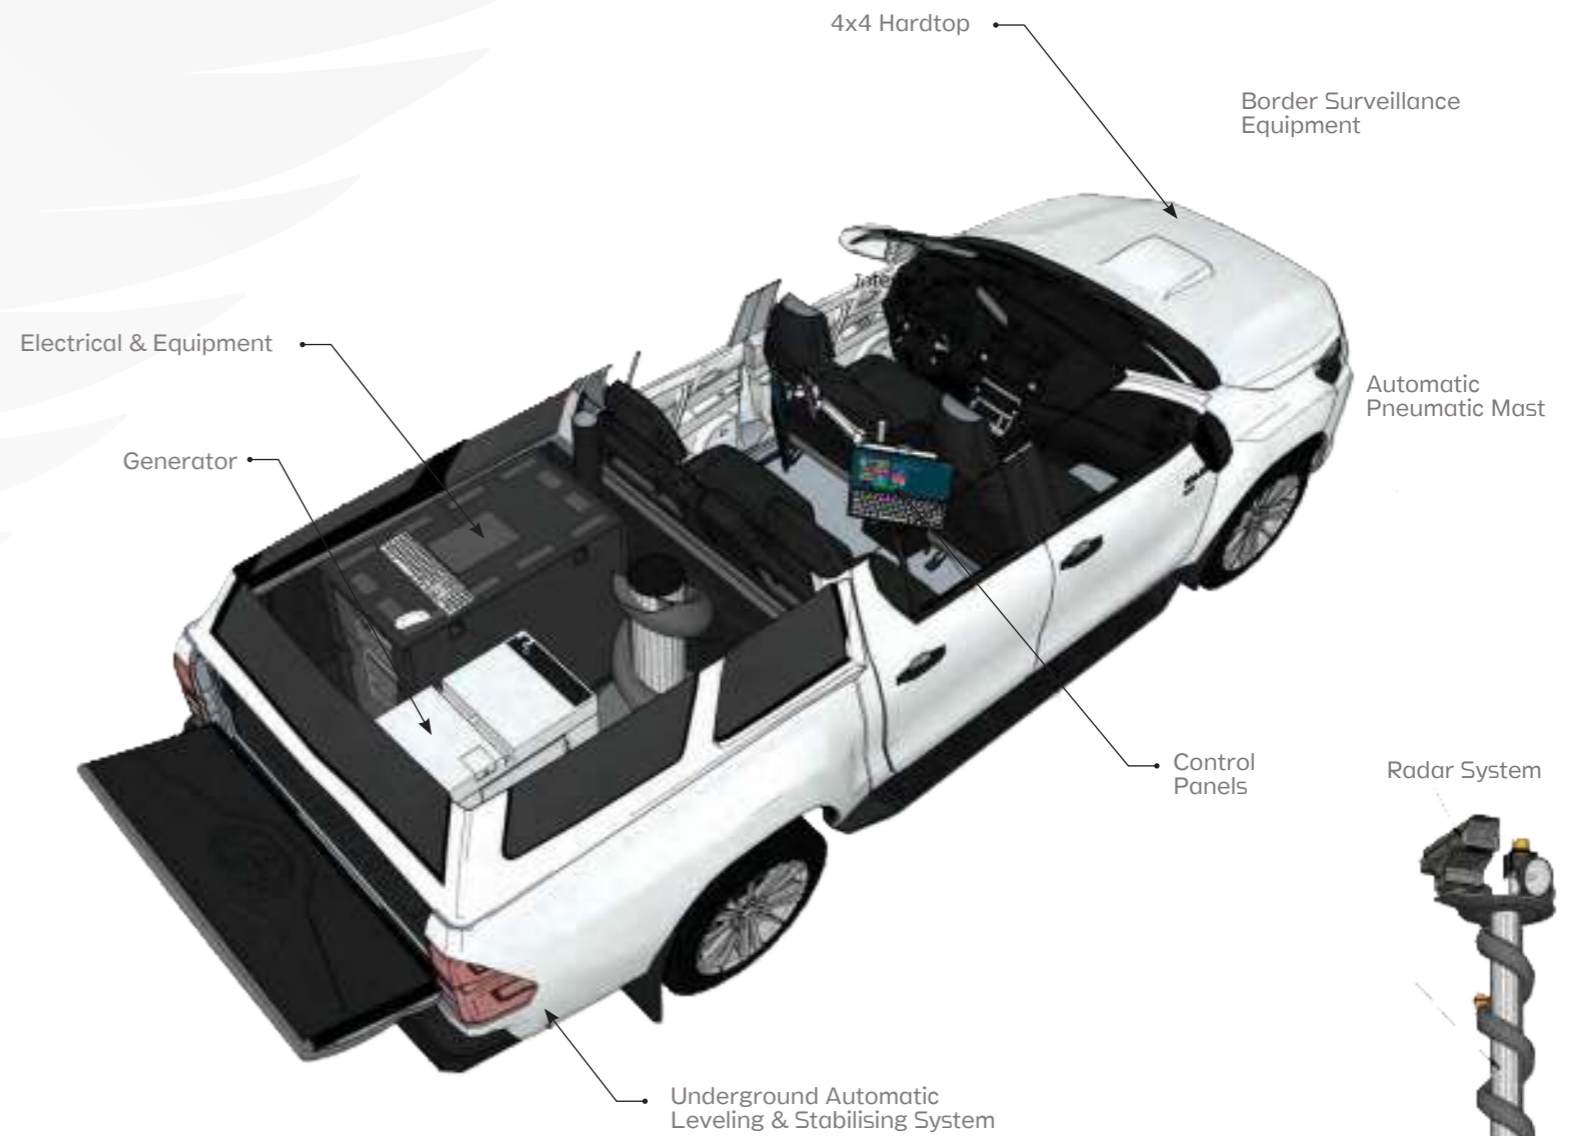

Infrastructures Security

MODULAR INTEGRATED SYSTEMS

- Mobile C&C
- GPS Location and navigation
- Vehicle Satellite System
- LTE Communication
- Mobile Data Terminals
- ANPR
- Radar
- IMSI Catcher
- Day/Night Visual Systems
- Floodlights
- PIT bumper

CUSTOMISATION PROJECT DESIGN EXAMPLE

RIOT CONTROL VEHICLES

TACTICARS
CUSTOMISED VEHICLE SOLUTIONS
PART OF THE ANON GROUP

TACTICARS delivers personalised mobile crowd management platforms, designed to protect Riot Control and Law Enforcement officers during violent protests, enabling them to monitor and maintain control of a crowd using less lethal methods.

FEATURES

- Modular Systems Integration (Video, Communication etc.)
- Different Levels of Ballistic Protection, Terrainability and Payload
- Customised Team Accommodation

RIOT CONTROL VEHICLES FOR A WIDE RANGE OF MISSIONS

Riot Control

Crowd Management

External Operations

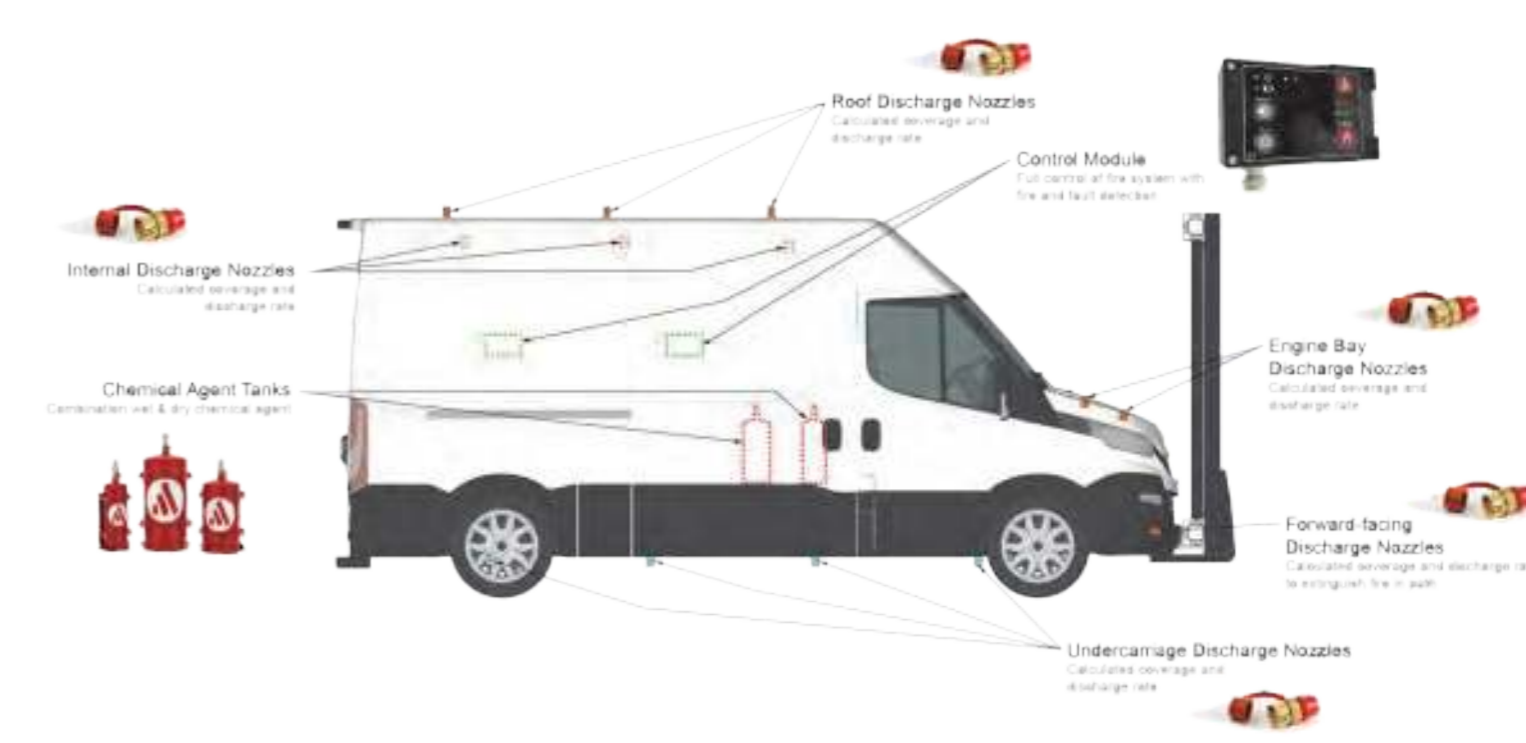

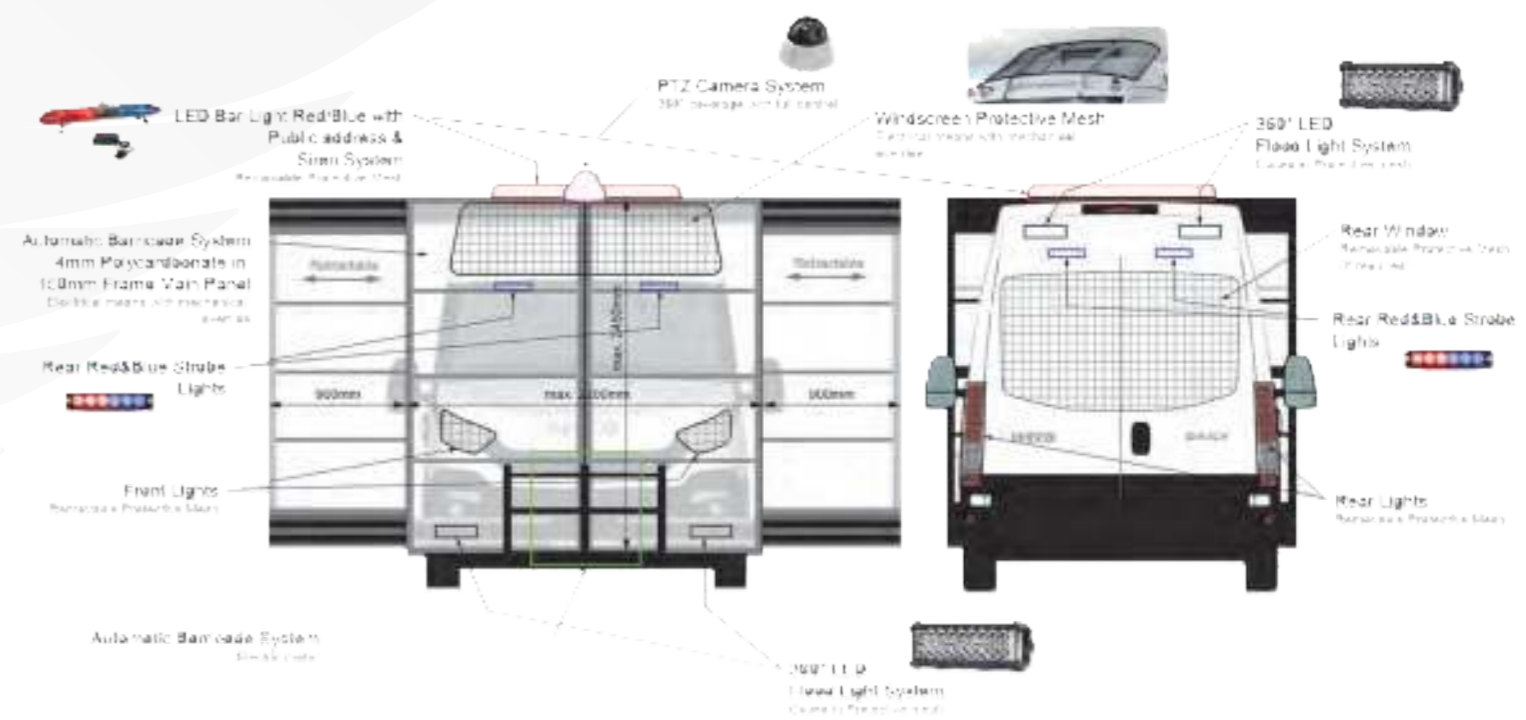

Escort of High Risk Convoys

MODULAR INTEGRATED SYSTEMS

- Mobile C&C
- GPS Location and Navigation
- Vehicle Satellite System
- LTE Communication
- Fire Suppression Systems
- Day/Night Visual Systems
- Less Lethal Systems
- Vital Signs Sensor
- Floodlights
- PIT bumper

CUSTOMISATION PROJECT DESIGN EXAMPLE

C-UAS, ANTI DRONE VEHICLES

TACTICARS provides the ultimate mobile anti-drone platforms for Law Enforcement, HLS and security agencies for the protection of airports, military bases, critical infrastructures, borders, ports and other sensitive assets. The modular, integrated mounted systems provide "on the move" protection against multiple UAS threats.

FEATURES

- Modular Systems Integration (Detection, Neutralisation, C&C, etc.)
- Different Levels of Terrainability and Payload
- Operator Station
- Stabilization Systems
- Provides "On The Move" Protection.
- Customised Team Accommodation

ANTI DRONE VEHICLES FOR A WIDE RANGE OF MISSIONS

Airport Security

Infrastructures Security

Presidential Guard

Prisons & Mass Events

Border Control

Marine Port Protection

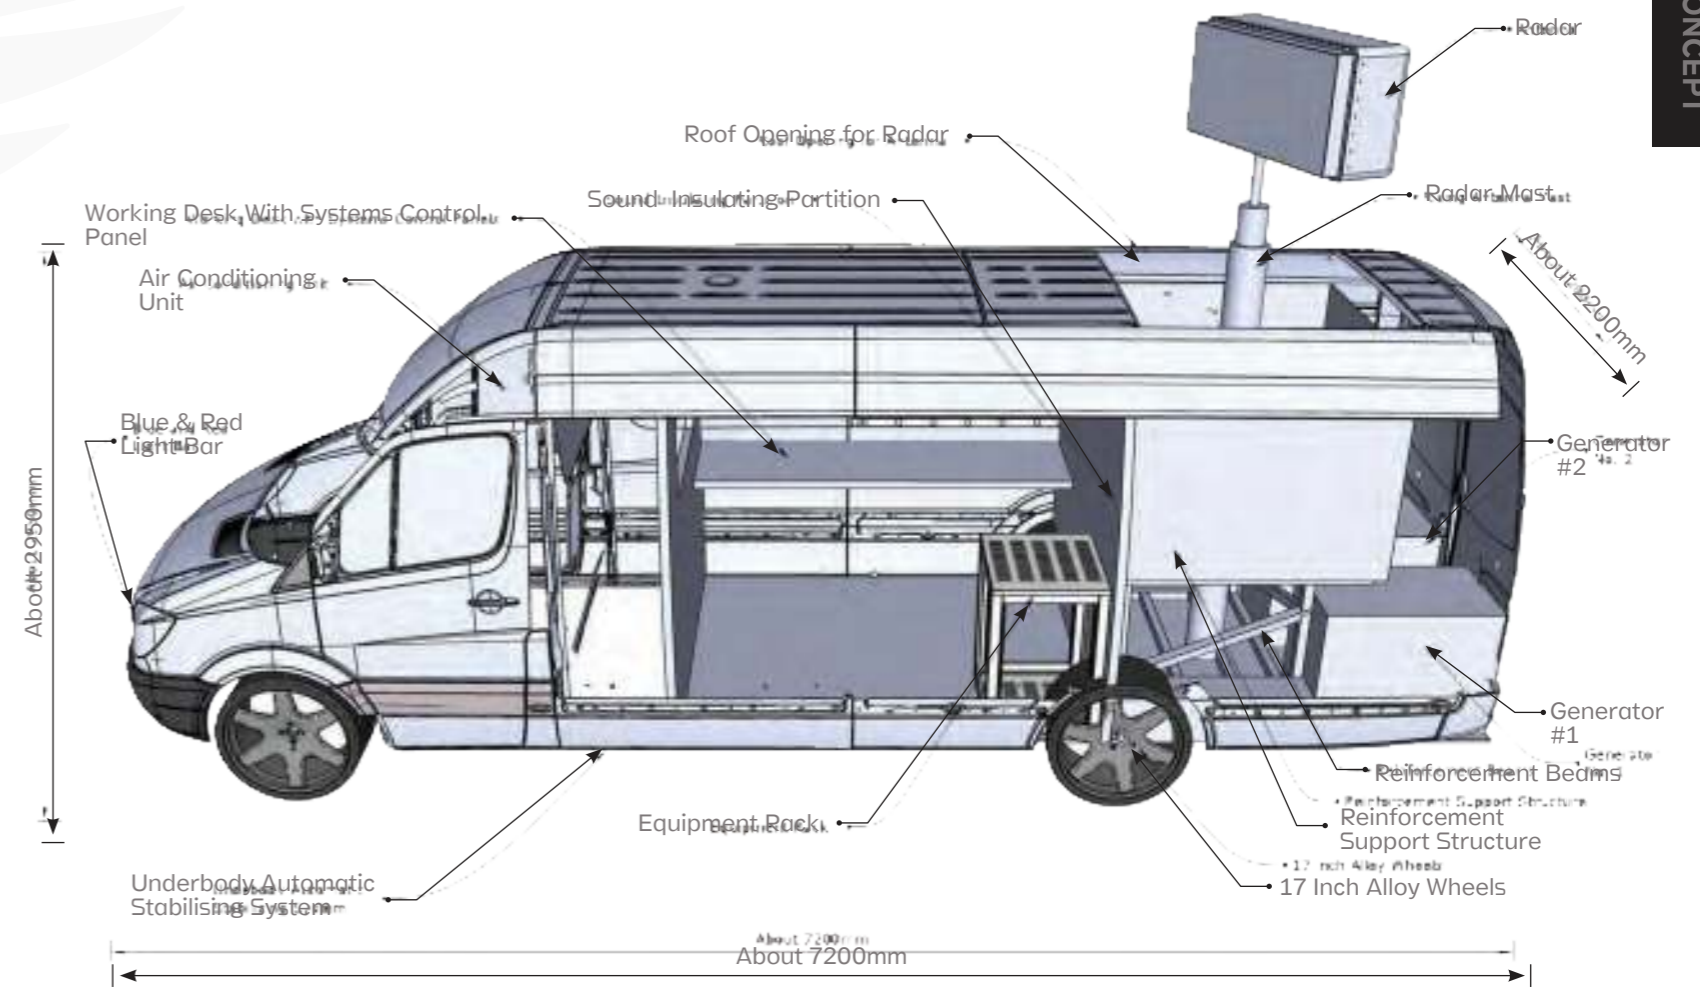

Securing Governmental Headquarters

MODULAR INTEGRATED SYSTEMS

- Mobile Control Station
- GPS Location and navigation
- Laser Burner • Wearable Solutions
- EO/IR System
- 360° RF Detector
- Jamming System
- Direction Finder
- Radar
- ULRWA

CUSTOMISATION PROJECT DESIGN EXAMPLE

LAW ENFORCEMENT PATROL VEHICLES

We offer Law Enforcement and patrol units worldwide with bespoke mobile platforms, ensuring your team is working with advanced tools and technologies to support a new, modern model of Law Enforcement.

FEATURES

- Modular Systems Integration (Video, Intelligence, Communications ,etc.)
- Different Levels of Ballistic Protection, Terrainability and Payload
- Incident and Accident Management
- Customised Team Accommodation

LAW ENFORCEMENT PATROL VEHICLES FOR A WIDE RANGE OF MISSIONS

Border Patrol

Counter-Terror Operations

Traffic Police

Maintaining Public Order

Suspects Detention

MODULAR INTEGRATED SYSTEMS

- Mobile C&C
- GPS Location and navigation
- Vehicle Satellite System
- LTE Communication
- Mobile Data Terminals
- ANPR
- Radar
- IMSI Catcher
- Mobile C&C
- Day/Night Visual Systems
- Floodlights
- PIT bumper

IN-VEHICLE ACCESS

- Searches on Locations, Suspects & Events
- Search, Geo Tagging, Mapping
- Access to Photo Library of Suspects
- Crime Reporting System
- Digital Asset Management
- Strong Internet Connection
- Video Streaming
- ANPR linked to the National Database
- Image Analysis Software
