# DayMark Gateway/Menu Pilot Installation Instructions

Please note this installation process will vary by tablet brand and Android version. Also note it may not work on your Android Device. Our Applications require Android Version 4.4.4 or higher. Screen appearances may also differ by the tablet's manufacturer.

To check your Tablets Android Version go into your tablet settings and find About Tablet, this will tell you what Android version you are currently running. Then go to the Table of Contents on page 2 to jump to the page regarding your Android Version.

If you run into an error stating "Tablet will not find app to open apk file". There is an installation app on the Google Play store that will help install our application on your tablet. The App from the Google Play store is called File Manager By Astro (File Browser). The app is made by Metago.
