

Dekoruma Experience Center

Design Features

CONCEPT- overall

Inspiration

Here customers are expected to feel inspired for their home & may experience the end result of our design & build services. They may touch, feel and see our quality of finishes.

The inspiration comes into 3 display units which resembles their typical homes with varies-curated style which suits our customers typical persona

Rather than aesthetic, customers are expected to get inspired from knowledge of our products - or interior knowledge as general. This will supported by graphic design throughout the interior and the material display

Consultation

To realize their dream home, the process of our design & build projects are maintained by our interior designer partners - and so does consulting at experience center. Store attendants & in-charge designer partners are expected to have broad knowledge of our products (especially design for IDPs) and able to explain to customers, so they will feel 'fulfilled' after going to DEC. The consultation may take place on designated display-meeting areas in the display units

Community

A regular event will be held on DEC for our best and loyal customers and for IDP. The event may take place on the display units and the event space upstairs on 2nd floor.

CONCEPT - Stage of life

Part of our branding is Dekorama is in everyone's stage of life. To feature more personalized home inspiration & ideas to our customer, three display units represents three stage of life. The customer will be guided from the first stage through the last stage with printed path signage on the floor.

1st Stage - Multifunction Apartment (1BR)

2nd Stage - Modern Apartment (1BR)

3rd Stage - Scandinavian House (2BR)
