Dell EMC PowerVault

PowerVault ME4 Series family

It doesn't need to be big to be powerful

Product Name:

ME4012

ME4024

ME4084

ME4 Expansion Enclosures

ME412

ME424

ME484

Configuration:

2U12 drives

2U24 drives

5U84 drives

2U12 drives

2u24 drives

5U84 drives

Max Raw Capacity	3.1PB	3.0PB	4PB	
Min/Max Drives	2/264	2/276	28/336	
Media	Hybrid (0-100% Flash)			
Protocols	8/16Gb FC, 1/10Gb iSCSI, 12Gb SAS		12Gb SAS Backend	
Data Protection	Virtual Copy, Snapshots, Async Replication, SEDs			
Performance	Tiering, Read Cache			
Integration	VMware Vcenter Plugin, SRM Plugin			
Management	ME Storage Manager			
Architecture	Thin provisioning, Adapt, Internal Key Manager (encryption)			

Your “Go To” entry level storage array

transition
today

ME4
over
MD3

Increased Performance

- Read IOPS: 320K¹ (4X increase)
- Backend Interface: 12G SAS (100% increase)
- Sequential Writes: 5500 MB/s¹ (2.6X increase)

Improved Scale

- Raw Capacity: 4PB (122% increase)
- Total System Drives: 336 (75% increase)
- Dense Expansion: 5U84 drives (40% increase)

More Connectivity

- Connect: 4 ports 1/10G iSCSI SFP+, 4 ports 1/10G iSCSI BaseT, 4 ports 8/16G FC, 4 ports 12G SAS

Simple Management

- Web-based GUI: ME Storage Manager

Improvements are in comparison to the MD3

¹ AD# G18000167 Based on Seagate Technology's LX-3 Performance Characterization report, 2018 (Virtual Test Results)

PowerVault ME4 software is all-inclusive

No separate licensing – everything to store, manage and protect data

BUILT-IN SOFTWARE FEATURES

ADAPT (Distributed RAID)

Improved DDP-like functionality enabling affordable capacity expansion and faster drive rebuild times.

Thin Provisioning

Allocate and consume physical storage capacity as needed in disk pools

SSD Read Cache

Increase execution speed of applications by caching previously read data

IP Remote Replication

Replicate data to any global location that includes mirroring thin provisioned pools

FC Remote Replication

Replicate data to any global location that includes mirroring thin provisioned pools

Snapshots

Easily recover files after accidental deletion or alteration with point-in-time copies of data

3 Level Tiering

Improve performance and efficiency with less hardware expense

Volume Copy

Seamlessly clone volumes for re-purposing on different spindles and drives

Encryption (SED)

Render data useless to unauthorized users with drive-level encryption, even if the drive has been removed from the enclosure

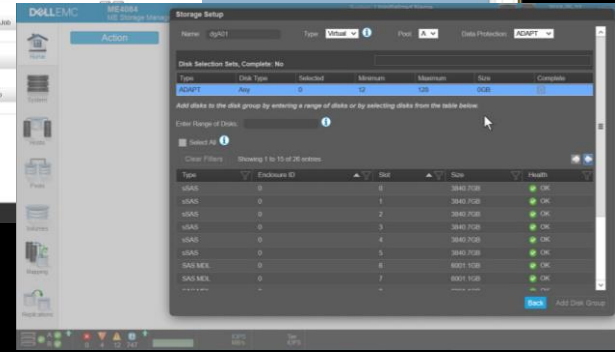

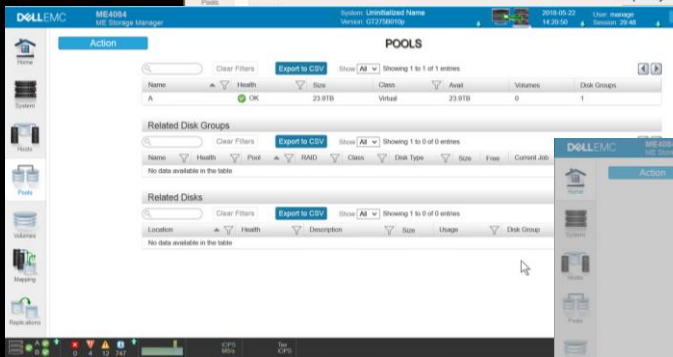

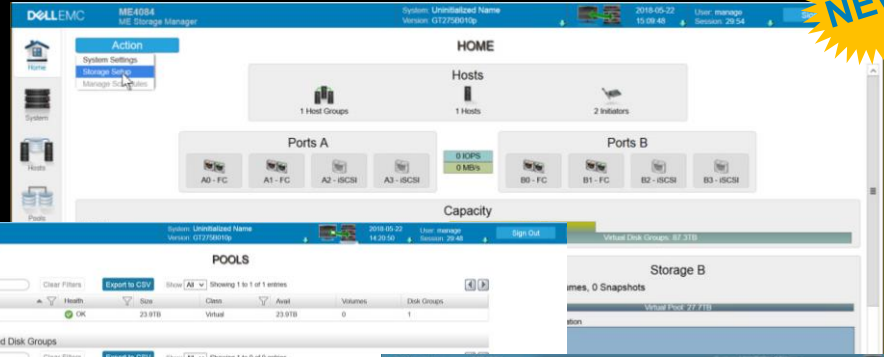

vCenter/SRM

VMware vCenter Server & SRM integration to move live VMs at scale between sites

Simplified web-based management

Manage ME4 Series storage from anywhere

- HTML5
- Single-array intuitive element manager
- Use common management tasks from convenient locations
- Manage storage profiles, network connections, alerts, more
- Configure in 15 minutes

ME Storage Manager Login Screen

ME4 Series supports CLI & REST API management

Dell EMC SC Series

SC Series Family

Memory/Proc.	32GB 6c/1.7GHz	128GB 8c/2.4GHz	256GB 2x 8c/2.5GHz	512GB 2x 8c/3.2GHz	128GB 8c/2.4GHz	256GB 2x 8c/2.5GHz
Media	Hybrid (0-100% Flash)				All-Flash	
Protocols	FC, iSCSI, SAS		FC, iSCSI	FC, iSCSI, FCoE	FC, iSCSI	
Data reduction	Compression	Compression + Deduplication				
Multi-array	Federation (Live Migrate), Snapshot Mobility, Volume Advisor, Replication					
Business continuity	Sync Replication, Auto-Failover (Live Volume), Metro DR, RecoverPoint for VM, D@RE ³					
Management	HTML5 Unisphere ⁴ , CloudIQ ⁴ , Dell Storage Manager, Openstack, QoS, Vvols					
Architecture	Dynamic RAID Tiering, Always Thin, Virtualized Page Pool, Distributed Sparring ⁴					

1 - SCv3xxx max capacity may be increased to 2PB using 4MB page sizes.

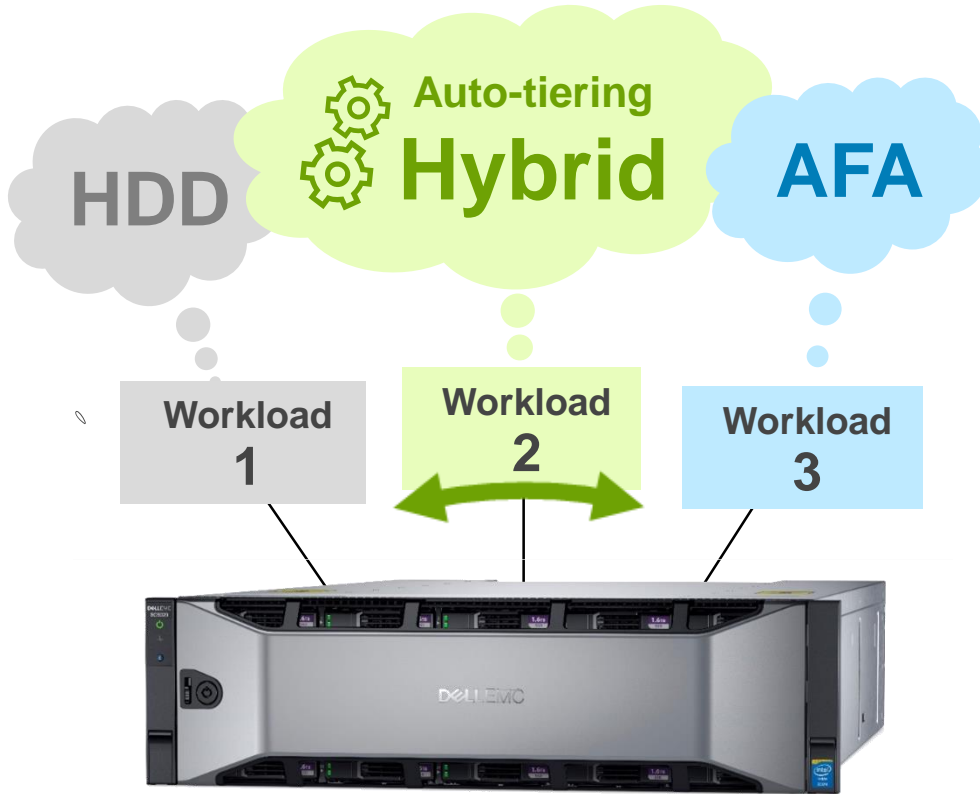

2 - With 2MB page size. For maximum flash performance, 512K page sizes are recommended. See Release Notes and Sizer for details.

3 - External key manager

4 - Planned for Q1-2018 v7.3 release

Give each workload the love it deserves

**Like having 3
arrays in one box**

- Pin volumes to any tier
- ...or let **Data Progression** distribute automatically

**Size flash tier as needed
– but \$/GB remains
lowest at any mix***

* Source: Based on Dell internal analysis, March 2017, compared to major-vendor midrange products. Net effective capacity after applying data reduction. Customer's price and reduction ratio may vary.

SC Software Features

Data Progression

RAID tiering

Cross-platform replication

Secure Encryption

Departmental Chargeback

Best-in-Class Dedupe and Compression

Business Continuity / Disaster Recovery

Federated scale, mobility, availability

Cloud-based AI/ML

Multi-protocol

VLAN tagging

Replication over FC or IP

CloudIQ

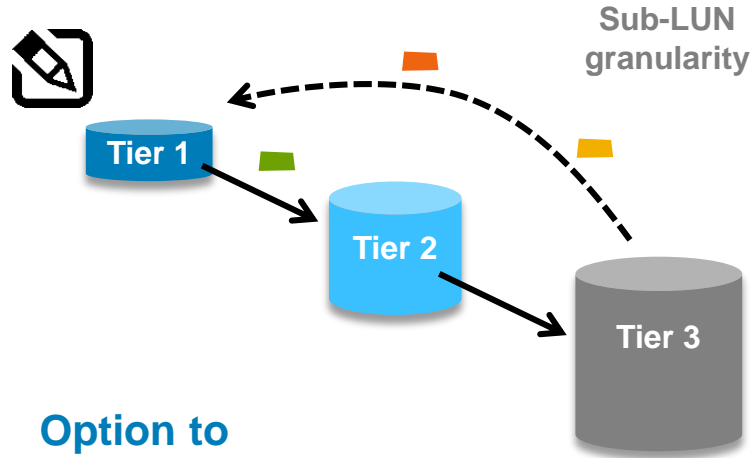

VVOLs, Qos

EASY to purchase, maintain – no matter how your business evolves

Industry's most advanced auto-tiering

Drive Tiering

Option to
pin volumes
to any tier

RAID Tiering

Multiple RAID levels on same drives
expand and contract as needed

ALL writes
RAID 10
FAST!

Auto-converts
to RAID 5/6

- ✓ Same read speed
- ✓ 50% space savings

Get great performance with less hardware expense

Store LESS with Intelligent Data Reduction

Dedupe & Compression

On both **SSDs** and **HDDs**

Even on volumes that auto-tier across media types!

Select by volume

Dedupe + Compression

Compression only

Optimize automatically

Targeted at a sub-LUN level

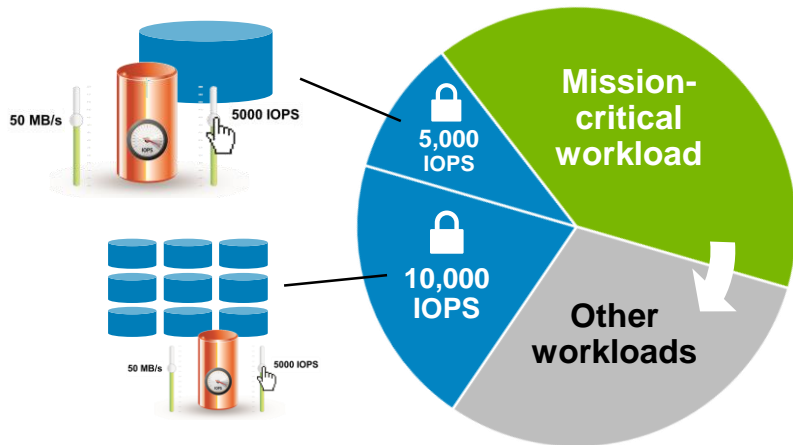

- ✓ Designed for performance
- ✓ Cost-reduce ANY config

* Note SCv3000 Series includes compression only, but it can still be applied to both SSDs and HDDs. Deduplication AND Compression are available on SC9000, SC7020, SC5020 and SC4020 arrays.

QoS (Quality of Service)

Map storage resources to match your business priorities

Define resource limits for individual volumes or groups of volumes

- Prioritize by IOPS, MB/s or Latency
- Works on standard volumes or VVols

Ensure top performance for your most important workloads

- Set relative priorities among volumes
- Eliminate “noisy neighbor” problems

Easy to customize and apply

- User-defined alerts
- Scriptable via REST
- Include in Storage Profiles

QoS reporting

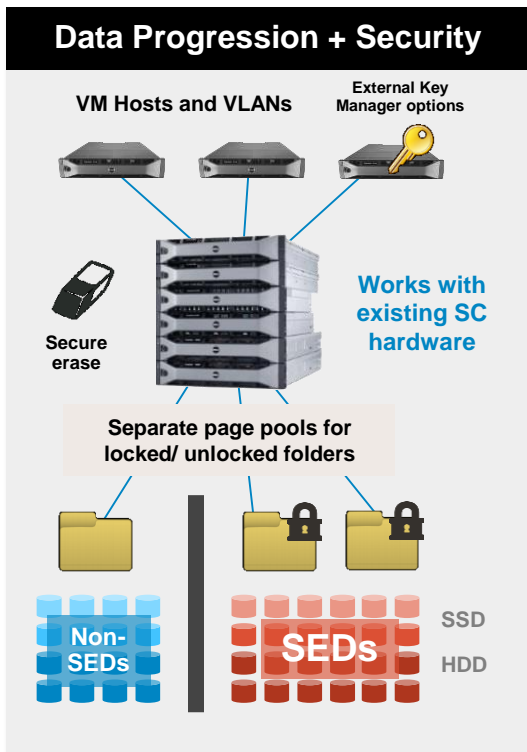

- Track impact of QoS settings over time

Ideal for enterprise departments, private cloud, multi-tenancy (service providers)

Data-at-rest encryption

Failsafe security and compliance solutions

Unique Dell Storage Encryption features

- SED/non-SEDs in same array
- Incremental SED roll-out – no forklift upgrades required
- Key FIPS 140-2 Security level 2 certification
- External Key Manager protects data against loss or theft of drives, enclosures or an entire array

Growing SED market among

- Government, Health Care
- Ecommerce/Retail
- Service Providers
- Financial Institutions

Now available
with re-key
functionality

Self-Encrypting Drive (SED) support

- “Data at Rest” encryption (DAR)
- External Key Management via Key Management Interoperability Protocol (KMIP) v1.0

SC Series “storage hypervisor” features

Storage changes
transparent to hosts

Virtualized LUN mappings
increase flexibility and control

Data migration

No need to re-map servers

Live Migrate, DSM

Federated systems

Balance workloads on demand

+ Volume Advisor

Disaster recovery

Always in sync: RTO/RPO = 0

Live Volume

Live Migrate: Move workloads transparently

LUN presentation
virtualized across arrays

Data movement within
federation does **NOT**
affect applications

Volume Advisor

Monitors cluster,
recommends ideal
load balancing

Live Migrate

Move volumes
anywhere **without**
remapping hosts

Rebalance your data
center arrays in minutes!

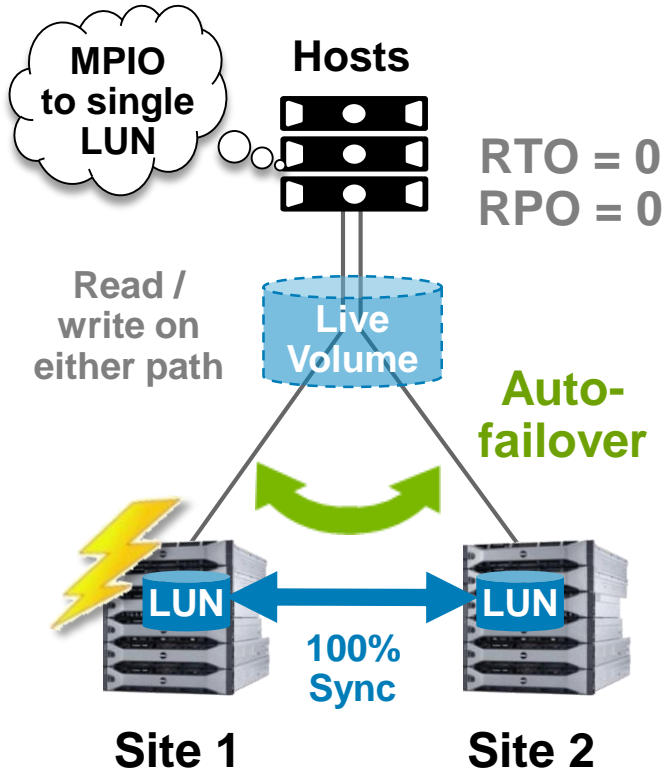

1. **Volume Advisor** sends alert
2. Start **Live Migrate** wizard,
accept recommendations
3. Click “complete migration”

- ✓ **Standard SC feature**
- ✓ **100% storage-side control**

**Offer a consistent, highly-available
storage *service* for your IT clients**

Live Volume: Built-in business continuity

ZERO workload downtime during unplanned outages

-  **No admin intervention**
-  **Auto-repair (resync)**
-  **3rd site replication support**
-  **Native SC array solution**

vmware® Stretch Cluster support

Built-in migration

Migrates LUNs (no snaps) from PS and MD series to SC series

Built-in solution: self-service without requiring any third party tool

Offers both offline and online thin import depending on use case

Online minimally disruptive: requires unmount and mount

Dell EMC SC Series SCOS 7.3

FREE software update provides quantum leap forward in

Performance

**Huge IOPS boost
across all platforms**

Increased max capacity

- SC9000 now 6PB (2X)
- SC7020/F now 4 PB

10X faster networks

- With 100Gb iSCSI

Simplicity

Web UI (HTML 5)

Now manage anywhere!

CloudIQ support

Easier upgrades and expansion

- DIP upgrades (SC4020)
- Full federation for SCv2000

Efficiency

Distributed Sparring

HA enhancements

- Live Volume ALUA: lower latency, less network traffic
- Up to 500 Live Volumes

***Lowest \$/GB for Flash
and Hybrid Flash***

Increase value for every SC All-Flash and Hybrid model: SC9, 8, 7, 5, 4, v3, v2

* 2MB pages

Expandable Dynamic Pools

Maximize performance & efficiently save space and budget

TRADITIONAL POOL

DYNAMIC POOL

Flash drives – as needed

ADD SINGLE
DRIVE TO POOL

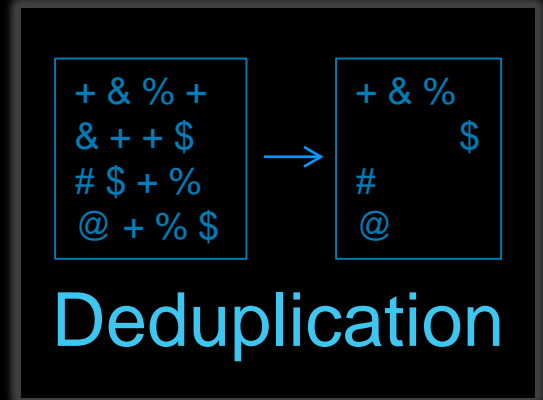

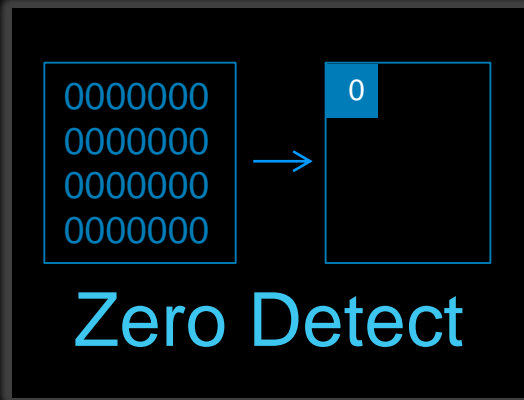

HIGHER SPACE
UTILIZATION

FASTER
REBUILD TIME

SIMPLER AND
LOWER TCO

Distributed sparing and flexible pool size

Dell EMC Unity Inline Data Reduction

Multiple technologies supporting Dell EMC 4:1 Efficiency Guarantee

Unified: Data reduction applicable to both file and block

Inline: Data reduction in memory before being written to flash

Simple: Single on/off setting – enable per LUN/filesystem

Dell EMC Unity Data at Rest Encryption

Encrypts all user data on the array—at the drive level

All Dell EMC Unity data services supported

Embedded internal key manager

Key Management Interoperability Protocol (KMIP) compliant

Advanced Encryption Standard (AES) - 256 encryption

- Drive vendor and type agnostic
- Allows use of any drive type
- Eliminates drive vendor specific overhead
- No impact to data services
- No performance impact

External Key Management

Dynamic All-Flash File

4X more file power for transactional and traditional NAS

256TB SCALE-UP FILESYSTEM

Scales to 256TB usable capacity per file system with 10M+ sub-directories and files

INLINE DATA REDUCTION

Pointer based snaps with simple space reclaim and low IO impact

FILESYSTEM SHRINK

Reclaim free blocks and shrink file system to reflect new capacity

VMDK IMPLEMENTATION

Independent VMDK clones with up to 256 clones across multiple levels

FLEXIBLE SNAPSHOTS

Pointer based snaps with simple space reclaim and snap mobility to remote site

SIMPLIFIED QUOTAS

User and Tree Quotas with ability to change online

Simple, Seamless Built-in Data Migration

VNX1 & VNX2

Dell EMC UNITY

FC, iSCSI, NFS and CIFS/SMB migration from VNX

Migrates LUNs, file systems, quotas, ACLs, and exports

Built-in solution: self-service without requiring any third party tool

Transparent to file applications, minimally disruptive for block

Dell EMC Unity VSA Software Defined Storage

Agile, virtual storage

IN SOFTWARE DEFINED INFRASTRUCTURE
(SCALEIO OR VSAN)

Simple, Intuitive Management from Anywhere

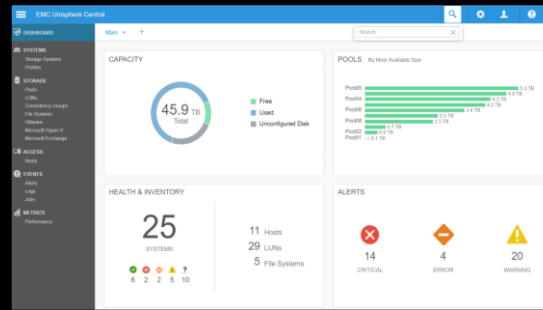

Ease of use; ease of management; ease of deployment; the GUI is very user-friendly.” *Allen Riviera, Data Center Architect, Iron Bow Technologies*

UNISPHERE

Single array unified management

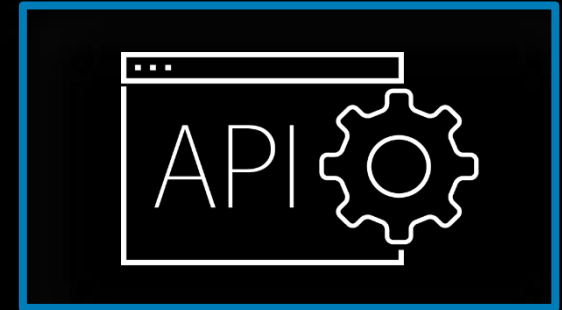

- ✓ Compatible with most modern browsers
- ✓ Easy navigation, simple workflows
- ✓ Modern look and feel

UNISPHERE CENTRAL

Centralized management

- ✓ Remotely monitor up to 1000 Dell EMC Unity arrays
- ✓ View/analyze aggregated metrics for managed systems
- ✓ Launch Unisphere for individual systems

UNIFIED CLI & REST API

Manage from the console

- ✓ Easier app integration
- ✓ Simple http commands
- ✓ API access from CLI, browser, app and script

CloudIQ

Cloud-based storage analytics

Included with every midrange array:
**NO ADDITIONAL COST &
NOTHING TO INSTALL**

Storage Array Health Scores

Manage your entire storage infrastructure from anywhere, via the web

Efficiency Ratios

Flash Gauge

Performance Anomalies

SW Update Notifications

Purpose-built for the cloud

- Native cloud application
- Built on the Pivotal Cloud Foundry
- Applied machine learning
- Proactive monitoring, predictive analytics, remediation
- Comprehensive health scores for your arrays
- New features added non-disruptively in the cloud
- Independent secure portal per customer

Dell EMC Unity

SC Series

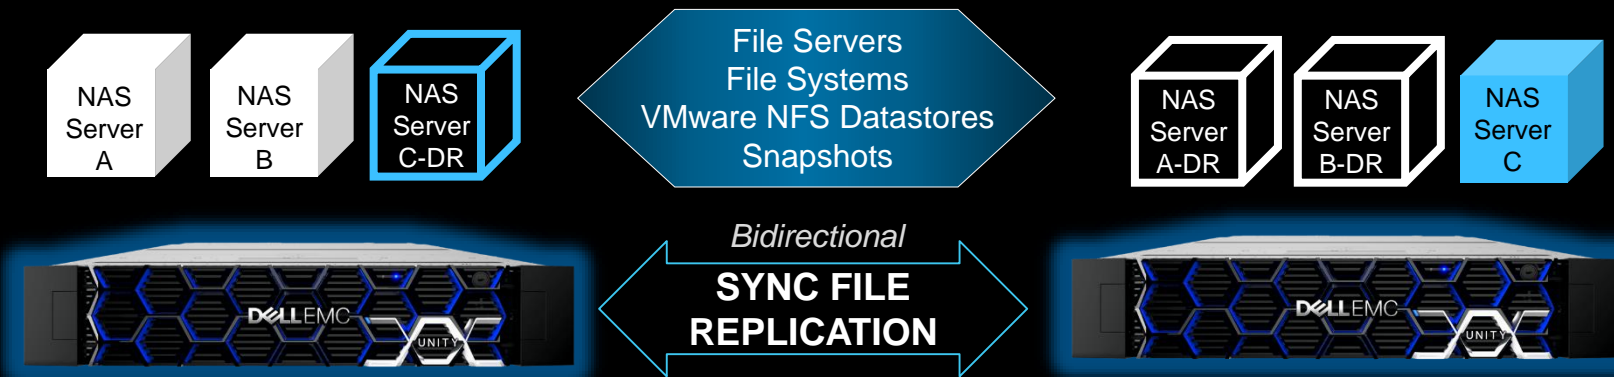

Dell EMC Unity OE v4.4

- LDAP Enhancements
 - LDAP Domain Look-Up
 - Forest Level Authentication
 - Support for Multiple LDAP servers
- SAN Copy Pull: integrated block migration from 3rd party arrays
- MetroSync- Synchronous File replication
- Snapshot shipping/replication
- Async replication to 3rd site
 - Cabinet level DR w/advanced snap scheduling
- 2-way NDMP

Synchronous File Replication

NEW

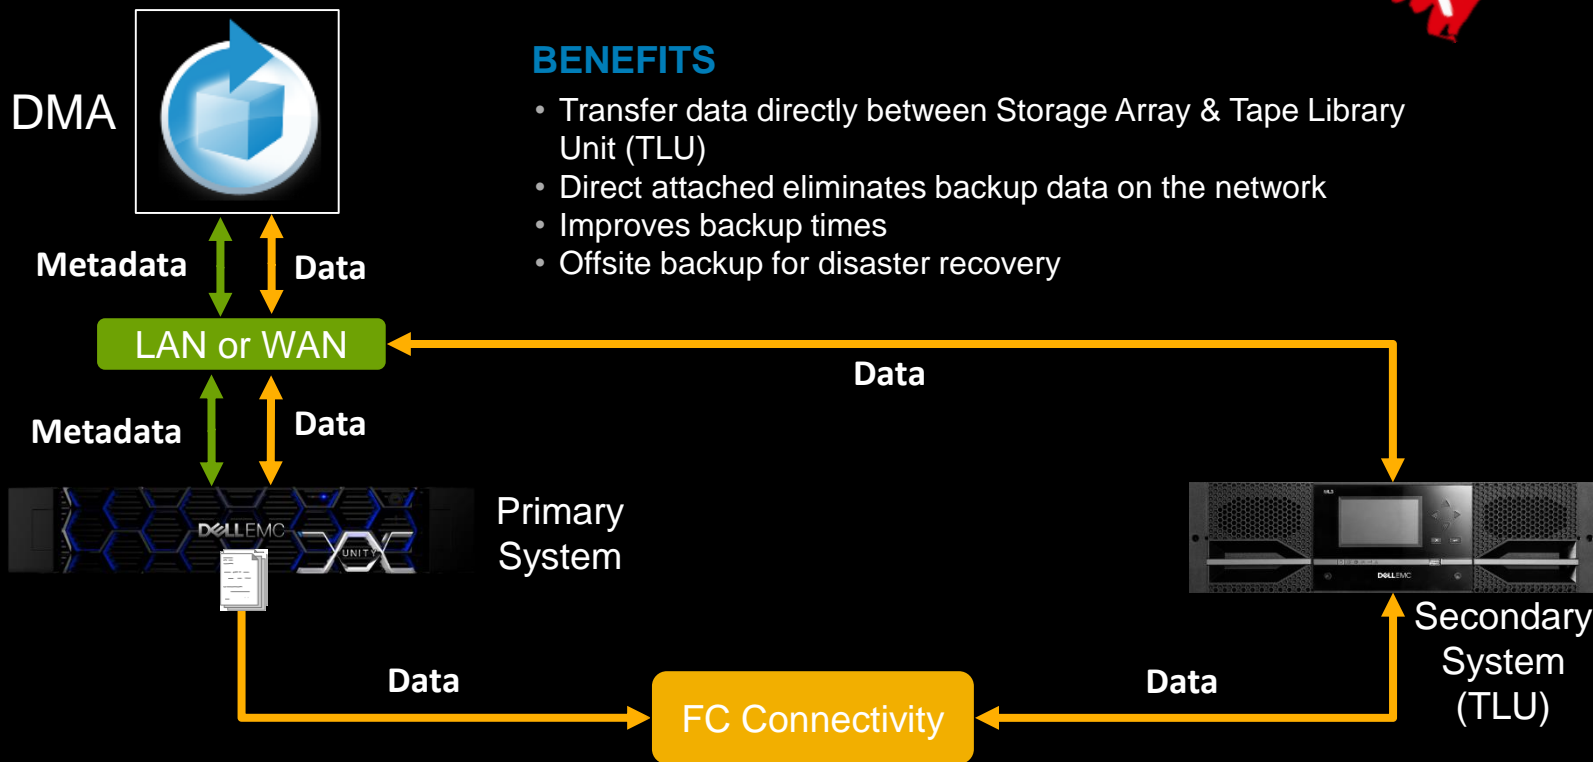

- ✓ Sync file replication to mirror site within metro distance
- ✓ Zero RPO solution for NAS data and file-based applications

- ✓ Snapshots (scheduled or user-initiated) replicated to mirror site
- ✓ Extension/shrink of source replicated to mirror

2-Way NDMP

NEW

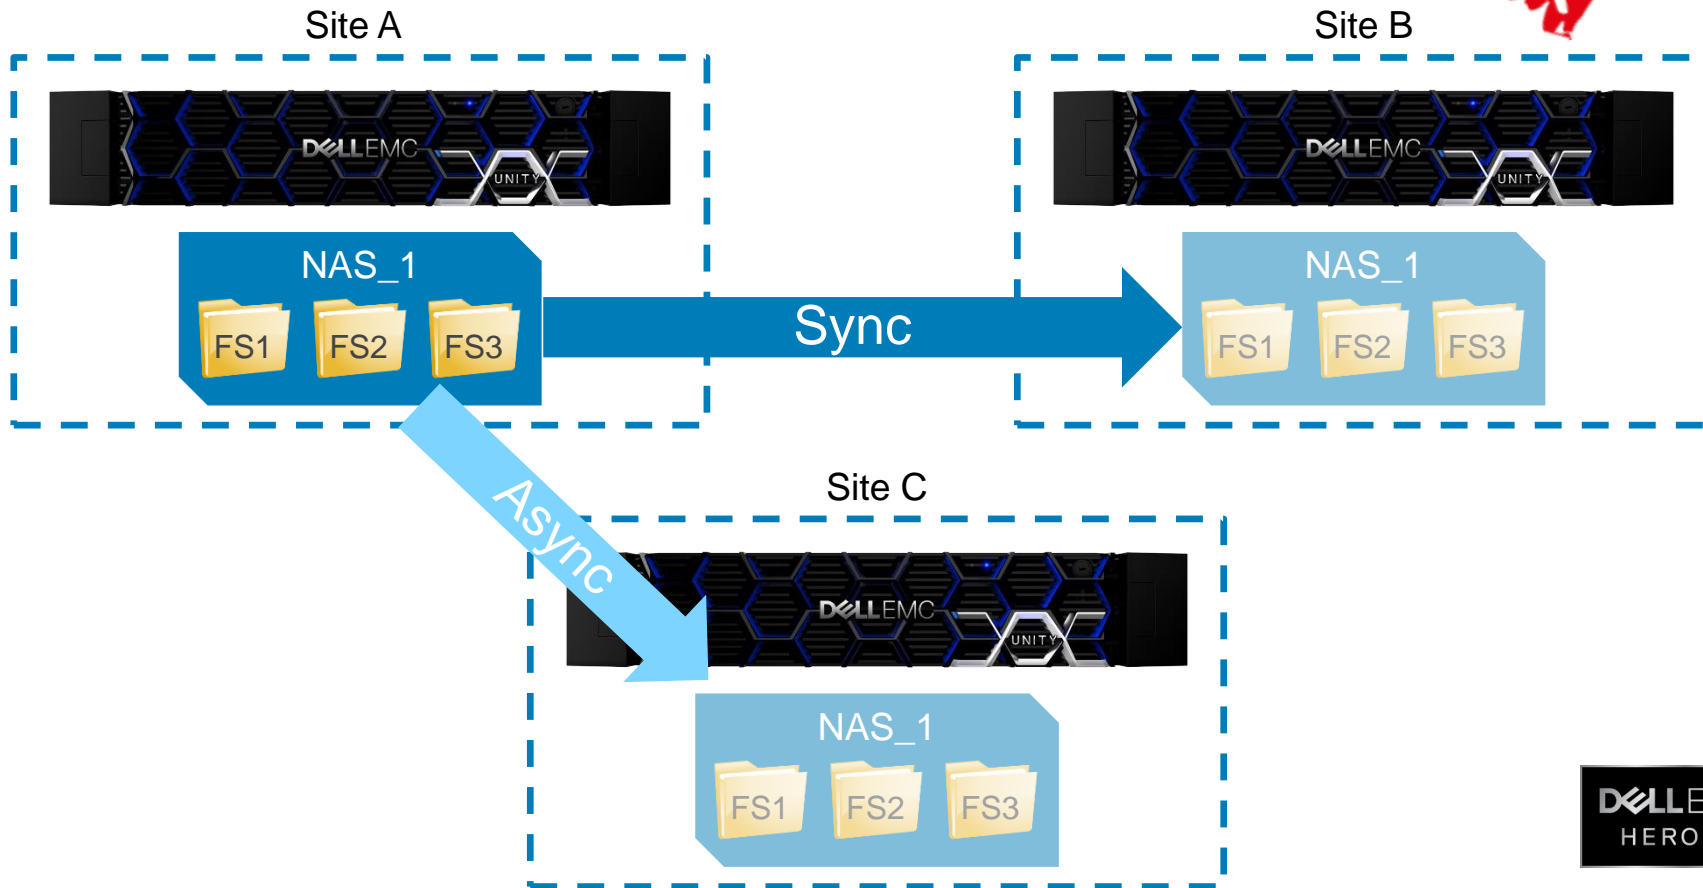

BENEFITS

- Transfer data directly between Storage Array & Tape Library Unit (TLU)
- Direct attached eliminates backup data on the network
- Improves backup times
- Offsite backup for disaster recovery

Async Replication to a 3rd Site

NEW

Third-Party Block Data Migration

NEW

- ✓ Leverage SANCopy – nothing to install on hosts
- ✓ Manage with CLI or REST API
- ✓ Support Migration functionality like pause/resume, create, delete, rollback, throttle
- ✓ Ability to test destination before cutover
- ✓ Migrate multiple volumes at the same
- ✓ Report real-time migration metrics.

Support Planned for:

HP EVA

HPE 3PAR

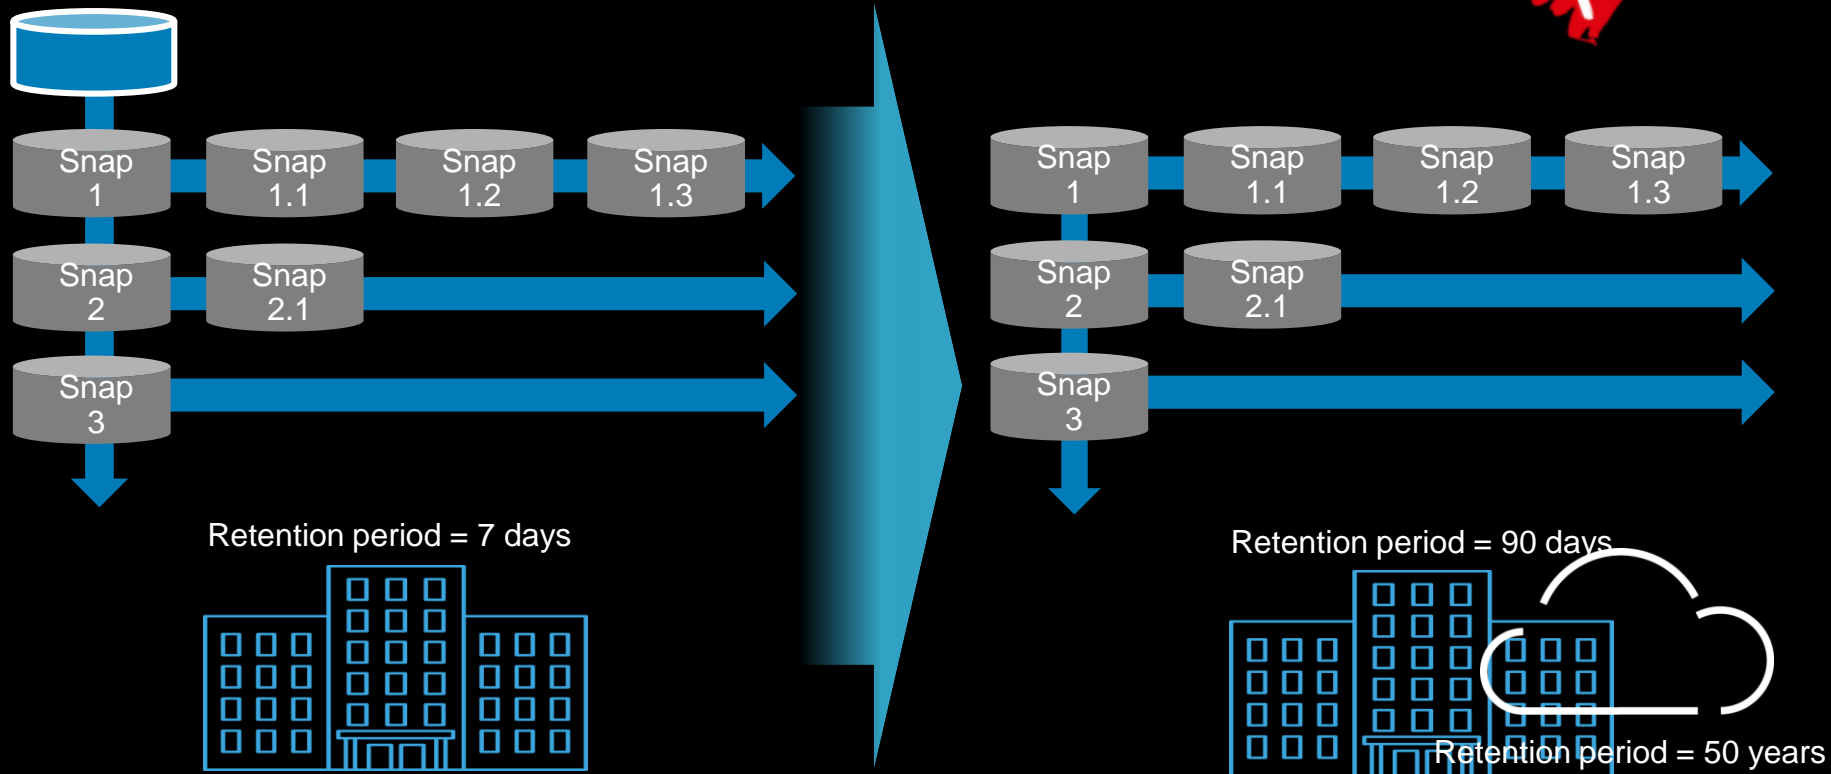

HITACHI HDS

NETAPP FAS

Plus: Dell EMC VMAX, SC Series & PS Series

Snapshot Backup and Archive

Cloud Tiering Appliance

Free up capacity with the benefits of cloud economics

- No cost RTU License included
- Reduce your backup windows
- Improve your TCO
- Flexibility with Physical, Virtual, HA options

Move your 'cold' data to cloud

FILE TIERING &
SNAPSHOT ARCHIVE

**AUTOMATIC
POLICY-BASED**

**PUSH OUT SELECTED DATA
BASED ON POLICIES**

**TRANSPARENT,
NON-DISRUPTIVE**

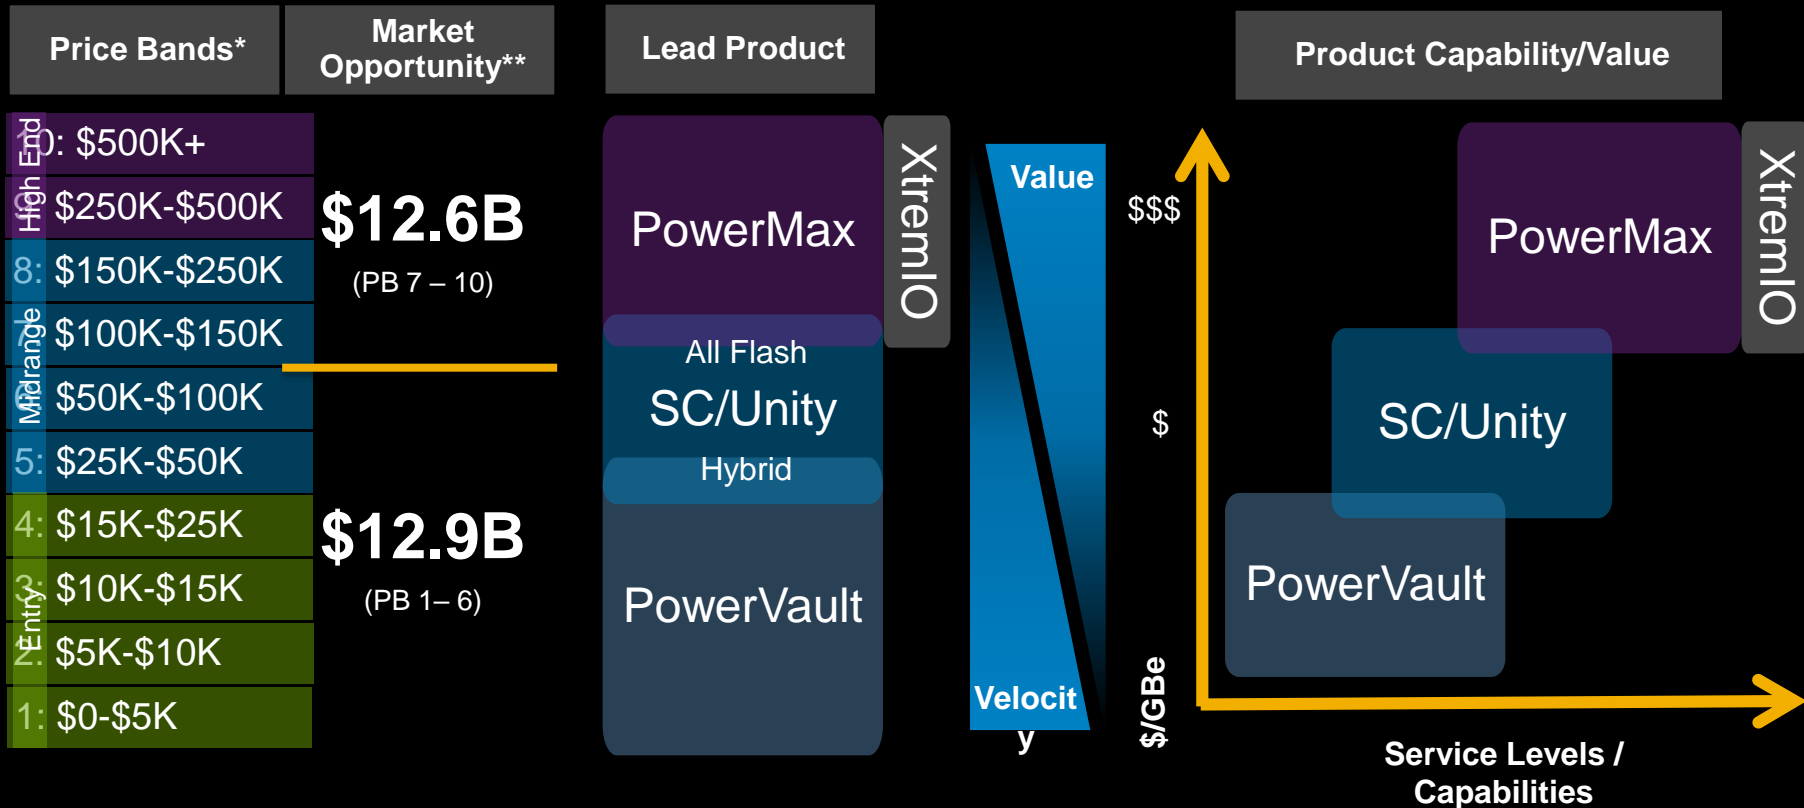

**NO CHANGE TO APPS; NO
IMPACT TO USERS**

**ON DEMAND
RECALL**

**EASILY RECALL DATA
WHEN NEEDED**

Midrange Product Positioning

Price Bands & Primary Storage Positioning

*Price Bands Based on Product Only – DO NOT USE FOR PRICING AND QUOTING;

**IDC External Storage Forecast for CY19

Dell EMC Unity & SC Series benefits

Simple	Customer installable and serviceable with CloudIQ™
Inline Compression	Inline data reduction for balanced cost/performance
Unified	Transactional and traditional file workloads with block
Flexible	Converged, software defined or cloud enabled. DIP upgrades.

Dell EMC Unity

Federated	Scale-up block with the ability to federate arrays
Compression & Deduplication	Post-process compression/dedupe for flash & hybrid max cost savings
SAS Front-end	Option to connect using SAS interconnect
Metro DR	Transparent Metro DR for block with Live Volume Auto Failover

SC Series

D  **LEMC**
