Department of Business, Economic Development and Tourism

STATE OF HAWAII

This publication is produced by the Research and Economic Analysis Division (READ) of the Department of Business, Economic Development & Tourism (DBEDT), State of Hawaii, which is responsible for its content and presentation.

Source of data

U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Acknowledgement

This report is prepared by Carlie Fogleman, Research Statistician, under the direction of Jan Nakamoto. Dr. Yang-Seon Kim, Research and Statistics Officer, provided guidance on the report.

Executive Summary

This report describes the demographic, social, economic, and housing characteristics of fourteen “race alone and in combination with one or more other races” groups in the state of Hawaii using data collected by the U.S. Census Bureau. Statistics in this report are based on the selected population data from the American Community Survey for data collected between 2011 and 2015. This report uses the inclusive “race alone or in combination” racial grouping; therefore, the sum of individual categories may add to more than the total population because people who reported more than one race were tallied in each race category.

Some highlights from this report are:

- Nearly a fourth, 23.7%, of Hawaii’s population identified as multiracial during the 2011-2015 period.
- The five largest “race alone or in combination” groups were as follows: White (43.0%), Filipino (25.0%), Japanese (22.1%), Native Hawaiian (21.3%), and Chinese (14.1%). An estimated 57.0% of the total population was non-white.
- The median age in Hawaii was 38.0 years old. Of the groups studied, the Japanese have the oldest median age at 43.9 years old, and the Marshallese have the youngest median age at 18.5.
- 53.8%, of the population living in Hawaii during the 2011-2015 period were born in Hawaii. As a percentage of their total populations, Native Hawaiians have the largest native-born population and the Marshallese have the largest foreign-born population.
- An estimated 33.5% of all households had at least one child living in it, and an estimated 32.5% of households had at least one person 65 or older living in it.
- Over 95% of the White, Japanese, Black or African American, and Okinawan populations in Hawaii had at least a high school diploma during the 2011-2015 period.
- Blacks or African Americans aged 16 and older had the highest rates of labor force participation in Hawaii. Okinawans had the lowest civilian unemployment rate during the 2011-2015 period.
- One-tenth, 10.4%, of civilian workers in Hawaii were self-employed during the 2011-2015 period. The Vietnamese had the highest rates of self-employment.
- The median household income in Hawaii was \$69,515. Of the five largest race groups in Hawaii, Filipinos had the highest household income and Native Hawaiians had the lowest.
- An estimated 7.7% of families in Hawaii lived in poverty during the 2011-2015 period. An estimated 11.2% of all people in Hawaii lived in poverty.
- Homeownership rates in Hawaii were some of the lowest in the nation. An estimated 56.9% of people in Hawaii owned their homes. Only two race groups had homeownership rates greater than 70%: the Japanese and Okinawans.

Introduction and Data Overview

This report provides a statistical portrait of the diverse population in Hawaii, highlighting demographic, social, economic, and housing characteristics of fourteen “race alone and in combination with one or more other races” groups in the state of Hawaii. The data are tabulated from the Census Bureau’s selected population data from the American Community Survey (ACS) conducted between 2011 and 2015. Data represent the average of the five years surveyed. During the 2011-2015 period, the Census Bureau surveyed a total of 47,993 households in Hawaii, an average of 9,599 households per year. Over 9% of Hawaii’s population were surveyed between this 2011 to 2015 period.

Five major race groups are currently categorized by the U.S. Census Bureau: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian and other Pacific Islander. Survey respondents may select one or more of these five race groups or identify as “Some other race” in an open-ended response. Respondents are also asked to indicate whether they are of Hispanic or Latino ethnicity, which is considered a separate concept from race by the Census Bureau. In the American Community Survey, more detailed race data are gathered for Asian groups and Native Hawaiians and Other Pacific Islanders groups.

The selected population data from the 5-year ACS, available once every five years, allows for the separation of discrete racial groups from the larger racial categories typically reported by the Census Bureau. For example, we are able to look at data specifically for Native Hawaiians rather than getting data for only the broader “Native Hawaiian and Other Pacific Islander” category.

Because an estimated 23.7% of Hawaii’s population are multiracial, this report uses the “race alone or in combination” data to most fully capture the diversity of the state. Therefore, the sum of the individual “race alone or in combination” categories may add to more than the total population or households because people who reported more than one race were tallied in each race category.

Finally, many of the racial groups are small relative to Hawaii’s total population, making it difficult to obtain good data about their characteristics from a survey. This report aims to present as much data as possible; however, caution should be used when drawing comparative conclusions about small populations, as margins of error may be too large to draw meaningful distinctions between groups.

The data in this report are presented for the following fourteen race groups, sorted by estimated percentage and population size of the total Hawaii population.

Table 1: Population Estimates and Percentages by Race Group

Race Alone or in Combination ¹	Population		Household ²	
	Population Estimate	Percent of Total	Household Estimate	Percent of Total
Total	1,406,299	100.0%	450,572	100.0%
White	604,474	43.0%	203,877	45.2%
Filipino	352,100	25.0%	73,578	16.3%
Japanese	310,595	22.1%	101,734	22.6%
Native Hawaiian	299,451	21.3%	69,217	15.4%
Chinese	197,905	14.1%	53,203	11.8%
Black or African American	48,863	3.5%	13,932	3.1%
Korean	47,394	3.4%	13,360	3.0%
Samoan	35,554	2.5%	5,824	1.3%
American Indian and Alaska Native	32,989	2.3%	9,231	2.0%
Vietnamese	13,373	1.0%	3,899	0.9%
Marshallese	9,215	0.7%	1,202	0.3%
Okinawan	6,821	0.5%	2,027	0.4%
Guamanian or Chamorro	6,570	0.5%	1,423	0.3%
Tongan	6,241	0.4%	915	0.2%

1. The sum of the individual race "alone or in combination" categories may add to more than the total population or households because people who reported more than one race were tallied in each race category.
2. Household race is determined by the race of the householder.

Demographic Characteristics

Age. Hawaii’s diverse race groups have noticeably different age distributions. Our state’s older population, those 65 and older, accounts for an estimated 15.6% of the total population, and the under-18 population is an estimated 21.9% of the population. However, individual group composition looks much different. For example, 22.3% of Japanese are 65 and older, which is one reason their median age, 43.9, is higher than any other group. Marshallese (49.2%), Tongans (42.5%), and Samoans (42.0%) have the largest under-18 populations as a percentage of their total populations, helping to explain their low median ages.

The state’s prime working age population, those between 18 and 64, is 62.5% of the total population. Most individual groups’ working-age populations are similar to the state total. Blacks or African Americans have a slightly higher age 18-64 population at 64.3%, and Marshallese have a noticeable, and expected, lower age 18-64 population at 48.7%.

Figure 1: Median Age by Race Group

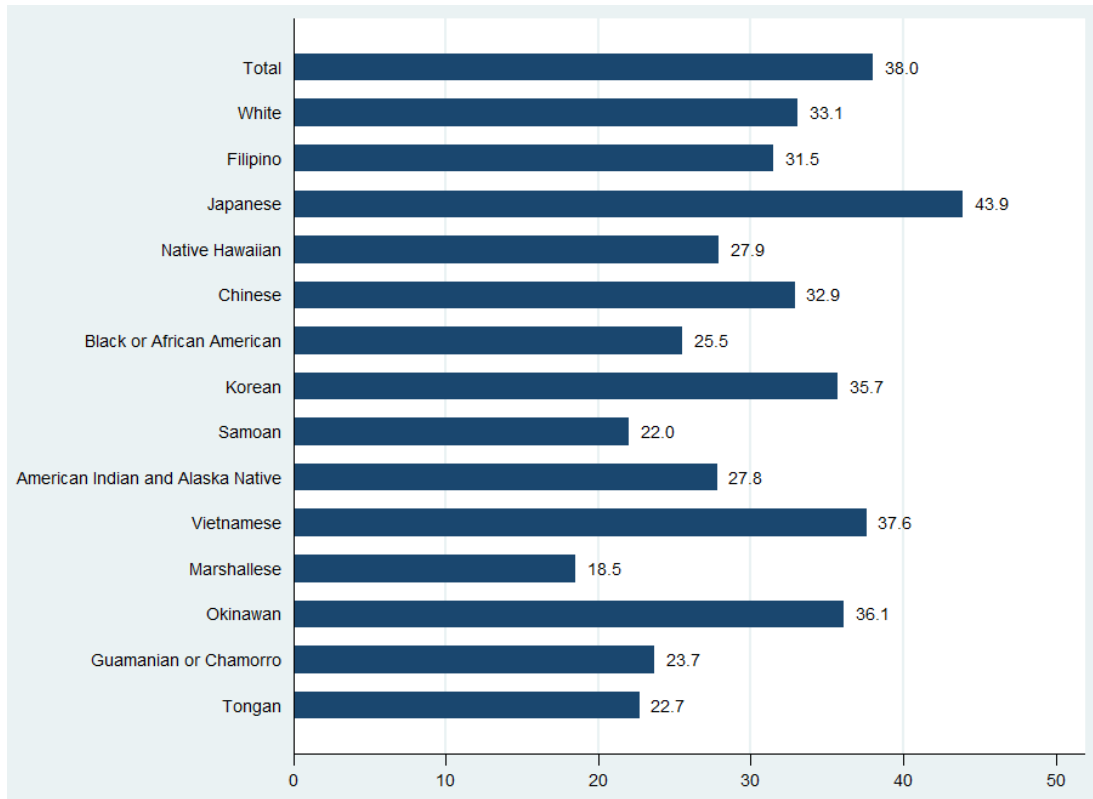

Table 2: Age Structure by Race Group

Race Alone or in Combination	Age group (Percent of total population of race group)		
	Under 18	Ages 18-64	Ages 65+
Total population	21.9%	62.5%	15.6%
White	25.1%	62.7%	12.2%
Filipino	29.7%	59.4%	10.9%
Japanese	22.5%	55.2%	22.3%
Native Hawaiian	34.2%	57.5%	8.3%
Chinese	30.2%	57.3%	12.4%
Black or African American	32.1%	64.3%	3.6%
Korean	27.5%	57.8%	14.7%
Samoan	42.0%	53.7%	4.3%
American Indian and Alaska Native	34.1%	59.2%	6.7%
Vietnamese	26.9%	62.6%	10.6%
Marshallese	49.2%	48.7%	2.1%
Okinawan	28.9%	56.6%	14.4%
Guamanian or Chamorro	38.5%	56.4%	5.1%
Tongan	42.5%	53.7%	3.8%

Social Characteristics

Birthplace. Hawaii’s culture and tropical climate, as well as its proximity to Asia and military presence, bring people to live here from across the country and globe. A total of 53.8% of the population was born in Hawaii. Others likely came to be reunited with family, for higher education, or for work and job opportunities, as 399,893 people, or 28.4% of the population, were born in another state or U.S. territory and 249,319 people, or 17.7% of the total population, are foreign born. The diverse backgrounds from which Hawaii residents come enrich the culture with unique traditions and languages, and may provide insights about the connections Hawaii has to the wider global economy.

Native Hawaiians have the highest percentage of their population born in Hawaii, 93.3%, and the lowest foreign-born population, 0.4%. Okinawans and Japanese have the next highest percentages of Hawaii-born populations, at 88.5% and 84.7% respectively. Marshallese (61.2%) and Vietnamese (58.0%) have the greatest percentage of foreign-born individuals in Hawaii.

Table 3: Birthplace and Citizenship Status by Race Group

Race Alone or in Combination	Birthplace and citizenship status (Percent of total population of race group)			
	Hawaii-Born	Born in Other U.S. State or Territory ¹	Foreign Born, Naturalized Citizen	Foreign Born, Not a U.S. Citizen
Total population	53.8%	28.4%	10.1%	7.6%
White	44.7%	50.6%	2.4%	2.3%
Filipino	60.4%	7.6%	20.6%	11.4%
Japanese	84.7%	7.3%	3.2%	4.8%
Native Hawaiian	93.3%	6.3%	0.2%	0.2%
Chinese	76.6%	7.3%	11.3%	4.7%
Black or African American	25.2%	69.8%	3.4%	1.6%
Korean	54.3%	11.1%	24.9%	9.8%
Samoan	64.8%	28.4%	3.7%	3.1%
American Indian and Alaska Native	51.9%	45.9%	1.0%	1.1%
Vietnamese	29.9%	12.1%	42.9%	15.1%
Marshallese	35.0%	3.8%	2.1%	59.2%
Okinawan	88.5%	9.2%	2.1%	0.3%
Guamanian or Chamorro	51.2%	45.9%	2.5%	0.4%
Tongan	54.7%	12.6%	11.8%	20.9%

1. Also includes U.S. citizens born abroad to American parent(s).

Births. The average births per year during the 2011-2015 period was 20,257.¹ Hawaii ranks 6th among the fifty states and District of Columbia in terms of fertility rate.² An estimated

¹ The American Community Survey estimates are based on survey data, and thus the average births per year may differ from sources which use administrative records to track births.

² Fertility rate is the number of women 15 to 50 years old who had a birth in the past 12 months per 1,000 women 15 to 50 years old.

43.9% of births were given by women who were at least partly White, 28.5% of births were to Filipino or part-Filipino women, and 24.8% were to Native Hawaiian or part-Native Hawaiian women.

Household occupancy. Average household size in Hawaii is the second largest in the United States and District of Columbia. However, across Hawaii’s largest race groups, household size varies considerably. For all race groups, renters have smaller household sizes than owners. Among renters, five race groups have an average household size greater than 4. Among homeowners, three race groups have an average household size greater than 6. Whites have the smallest average household size, 3.01 for owners and 2.70 for renters, and the Marshallese have the largest average household size, 16.45 for owners and 6.15 for renters.

Table 4: Average Household Size by Race Group

Race Alone or in Combination	Owner-occupied	Renter-occupied
Total population	3.17	2.83
White	3.01	2.70
Filipino	5.17	4.10
Japanese	3.07	2.78
Native Hawaiian	4.47	3.91
Chinese	3.78	3.39
Black or African American	4.13	2.99
Korean	4.07	2.79
Samoan	9.06	4.74
American Indian and Alaska Native	3.80	3.11
Vietnamese	4.24	2.86
Marshallese	16.45	6.15
Okinawan	3.49	2.91
Guamanian or Chamorro	5.60	4.02
Tongan	8.31	5.65

Household composition. Knowing how families, children, and older individuals are arranged in households can help us understand family needs. The majority of households in Hawaii are family households, with 69.6% of households comprised of families. An estimated 33.5% of all households have at least one child living in it, and an estimated 32.5% of households have at least one person 65 or older living in it. Of the five most populous racial groups living in Hawaii, Filipinos have the highest percentage of households with children, 48.5%, followed by Native Hawaiians, 44.5%. Of the same top five, Native Hawaiians (26.1%) and Whites (26.4%) have the lowest percentage of households in which one or more people are 65 years or older.

Marshallese and Tongans, among the smallest racial groups with some of the youngest median ages, have the highest percentage of family households, at 96.8% and 91.5%,

respectively. Relatedly, 91.9% of Marshallese households and 65.7% of Tongan households have children. Japanese households have the lowest percentage of households with children (25.7%) and highest percentage of households with at least one person age 65 and older (43.4%).

Education. Educational attainment is associated with lower unemployment and higher immediate and lifetime earnings. Hawaii is ranked 11th among the fifty states and District of Columbia in terms of percent of population 25 and older with at least a high school diploma or equivalent, 18th with a Bachelor’s degree or higher, and 22st with a graduate or professional degree. About 86,000 adults over age 25 living in Hawaii have not earned a high school diploma or equivalent. Over 95% of the White, Japanese, Black or African American, and Okinawan populations in Hawaii have at least a high school diploma or equivalent. Over a third of the White, Japanese, and Okinawan populations in Hawaii have at least a Bachelor’s degree. At least 10% of the White, Japanese, Chinese, Korean, and Okinawan populations age 25 and older have graduate or professional degrees.

Although 28.7% of the Vietnamese population age 25 and older do not have a high school diploma, nearly a fifth of the population has at least a Bachelor’s degree, suggesting that many of the Vietnamese in Hawaii continue to college once obtaining their high school diplomas. Of the Vietnamese population with a high school education, over 64% have at least some college.

Table 5: Educational Attainment of the Population Aged 25 and Older by Race Group

Race Alone or in Combination	Educational Attainment (Percent of total population of race group)				
	Less than high school	High school diploma or equivalent	Some college or Associate's degree	Bachelor's degree	Graduate or professional degree
Total population	9.0%	27.9%	32.3%	20.4%	10.5%
White	4.8%	24.4%	34.8%	22.0%	14.0%
Filipino	15.0%	32.3%	33.6%	15.4%	3.7%
Japanese	5.0%	26.6%	30.8%	26.4%	11.2%
Native Hawaiian	8.2%	42.8%	32.6%	11.1%	5.3%
Chinese	11.5%	28.1%	29.3%	19.7%	11.3%
Black or African American	4.8%	20.4%	48.5%	17.5%	8.8%
Korean	9.8%	30.6%	28.7%	20.8%	10.2%
Samoan	10.4%	40.6%	34.3%	11.9%	2.8%
American Indian and Alaska Native	8.4%	26.0%	41.9%	15.1%	8.6%
Vietnamese	28.7%	25.5%	26.1%	14.3%	5.5%
Marshallese	24.0%	53.5%	19.9%	2.3%	0.3%
Okinawan	3.8%	20.5%	34.3%	28.6%	12.8%
Guamanian or Chamorro	5.9%	27.6%	46.2%	11.7%	8.6%
Tongan	11.2%	44.6%	25.8%	11.5%	6.9%

Economic Characteristics

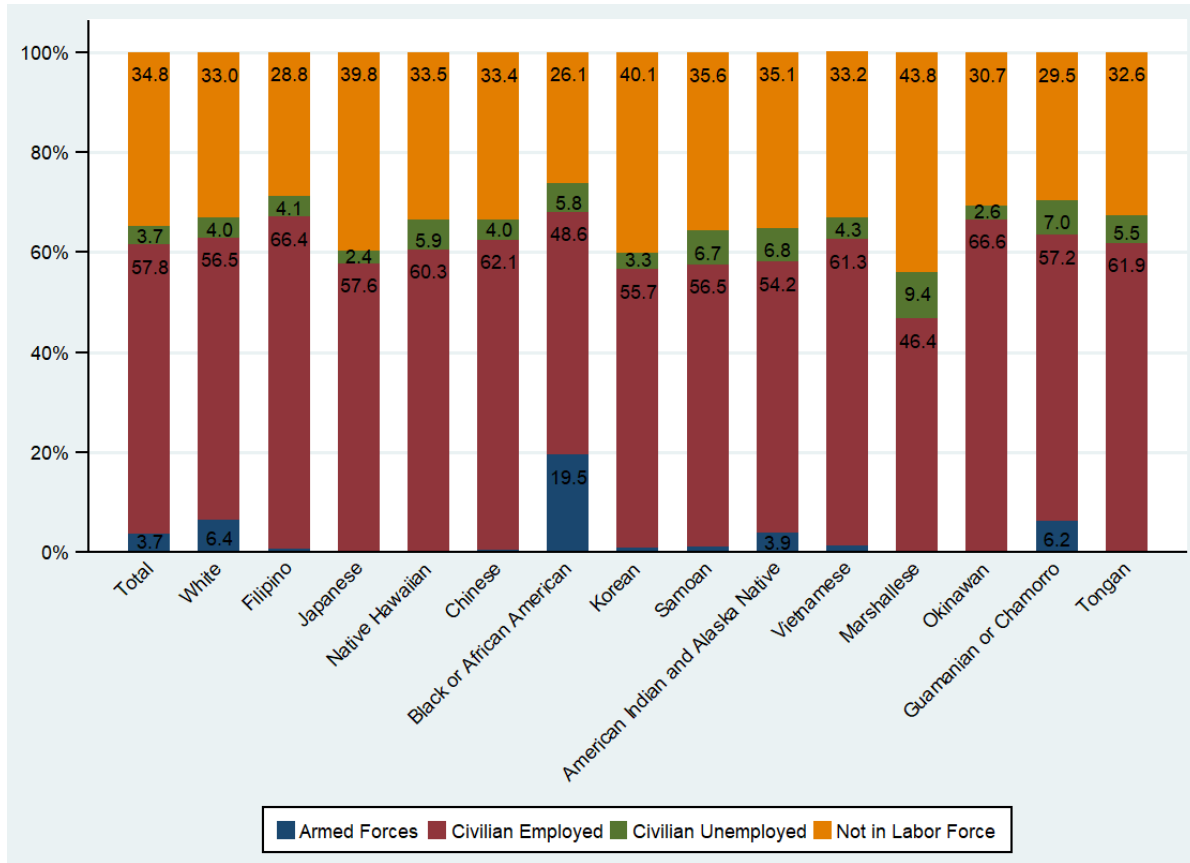

Employment and workforce. The labor force participation rate is a measure of the portion of an economy's labor force relative to its size. It includes those who are employed, either as civilians or in the Armed Forces, and those who are actively looking for work. Some people exit the labor force by choice to raise children, care for family members, retire, or go to school. Others have left the labor force reluctantly—because they have become discouraged about their job search and have stopped looking or because they cannot find adequate child care or transportation to facilitate returning to work, among other reasons. The labor force participation rate in Hawaii was 65.2% for the 2011-2015 time period, 1.6% lower than the labor force participation rate for the 2006-2010 time period.³

Blacks or African Americans have the highest rates of employment, with 68.0% of the population aged 16 and older either employed as a civilian or in the Armed Forces. The Marshallese have the lowest rates of employment, with only 46.7% of the population aged 16 and older employed. However, this population is considerably younger than others. It is possible a portion of the population is still in school, and thus not in the labor force. It should also be noted that race groups with older populations, such as the Japanese, Koreans, and Okinawans, possibly have artificially lower rates of labor force participation due to retirement among the elderly population.

Finally, a fifth of the Black or African American population is employed by the Armed Forces. Three other race groups have Armed Forces participation rates greater than the state average of 3.7%: they are the White population (6.4%), the Guamanian or Chamorro population (6.2%), and the American Indian and Alaska Native population (3.9%).

³ The estimates of the labor force participation rate reported herein may differ from estimates reported by the U.S. Bureau of Labor Statistics. The U.S. Bureau of Labor Statistics estimates are based on the Current Population Survey. Survey and methodological differences between the American Community Survey and the Current Population Survey may produce differing estimates.

Figure 2: Labor Force Participation and Employment Status of Population Aged 16 and Older by Race Group

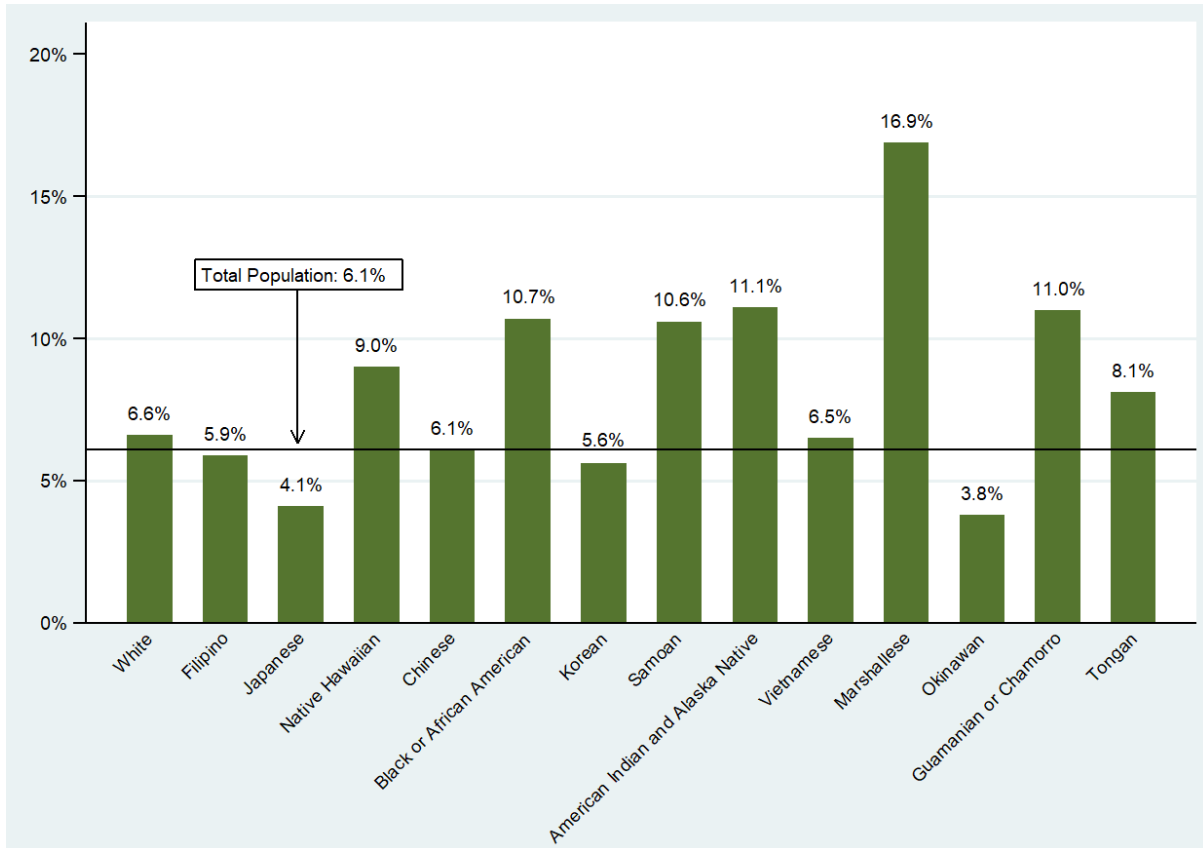

Civilian unemployment rate. In its official definition, the labor force is made up of those employed and actively seeking work (unemployed). An annual average of more than 42,000 Hawaii residents were unemployed during the 2011-2015 period.⁴ Five groups have civilian unemployment rates equal to or lower than the state civilian unemployment rate of 6.1%: Okinawans, the Japanese, Koreans, Filipinos, and the Chinese. Guamanians or Chamorros, American Indians and Alaska Natives, and the Marshallese have elevated levels of unemployment, roughly two to three times the civilian unemployment rates of Okinawans, Japanese, and Koreans.

It should be noted, however, that the data shown here reflect the average economic characteristics during 2011-2015, as five years of data are necessary to show statistics for small racial groups. The state’s economy has improved since the data were collected, and current civilian employment rates may be lower than shown below.

⁴ The estimates of the civilian unemployment rate reported herein may differ from estimates reported by the U.S. Bureau of Labor Statistics. The U.S. Bureau of Labor Statistics estimates are based on the Current Population Survey. Survey and methodological differences between the American Community Survey and the Current Population Survey may produce differing estimates.

Figure 3: Civilian Unemployment Rates by Race Group

Class of Workers. Over two-thirds of civilian workers in Hawaii are private wage and salary workers. Government agencies, at the local, state, and federal level, are the second largest employers for civilian workers in Hawaii.

The Marshallese have the highest rates of total private wage and salary workers, with 90.9% employed in the private sector. Among the five largest race groups, Filipinos have the largest rates of employees in private wage and salary jobs, at 80.1% of the employed population aged 16 and older.

Blacks or African Americans have the highest rates of government employees at 33.5% of civilian workers. Most of those employees are work for the federal government—27.8% of all civilian workers are employed by the federal government. Of the five largest race groups, the Japanese have the highest rates of government employees.

Business owners in Hawaii are more likely to have unincorporated businesses than incorporated businesses. Over two-thirds of business owners in Hawaii have unincorporated businesses. However, business ownership, as a whole, is small in Hawaii, as only 10.4% of civilian workers are business owners. The Vietnamese population has the highest rates of

business ownership—24.5% of civilian workers are self-employed, and they have the highest rates of both incorporated self-employed workers and unincorporated self-employed workers.

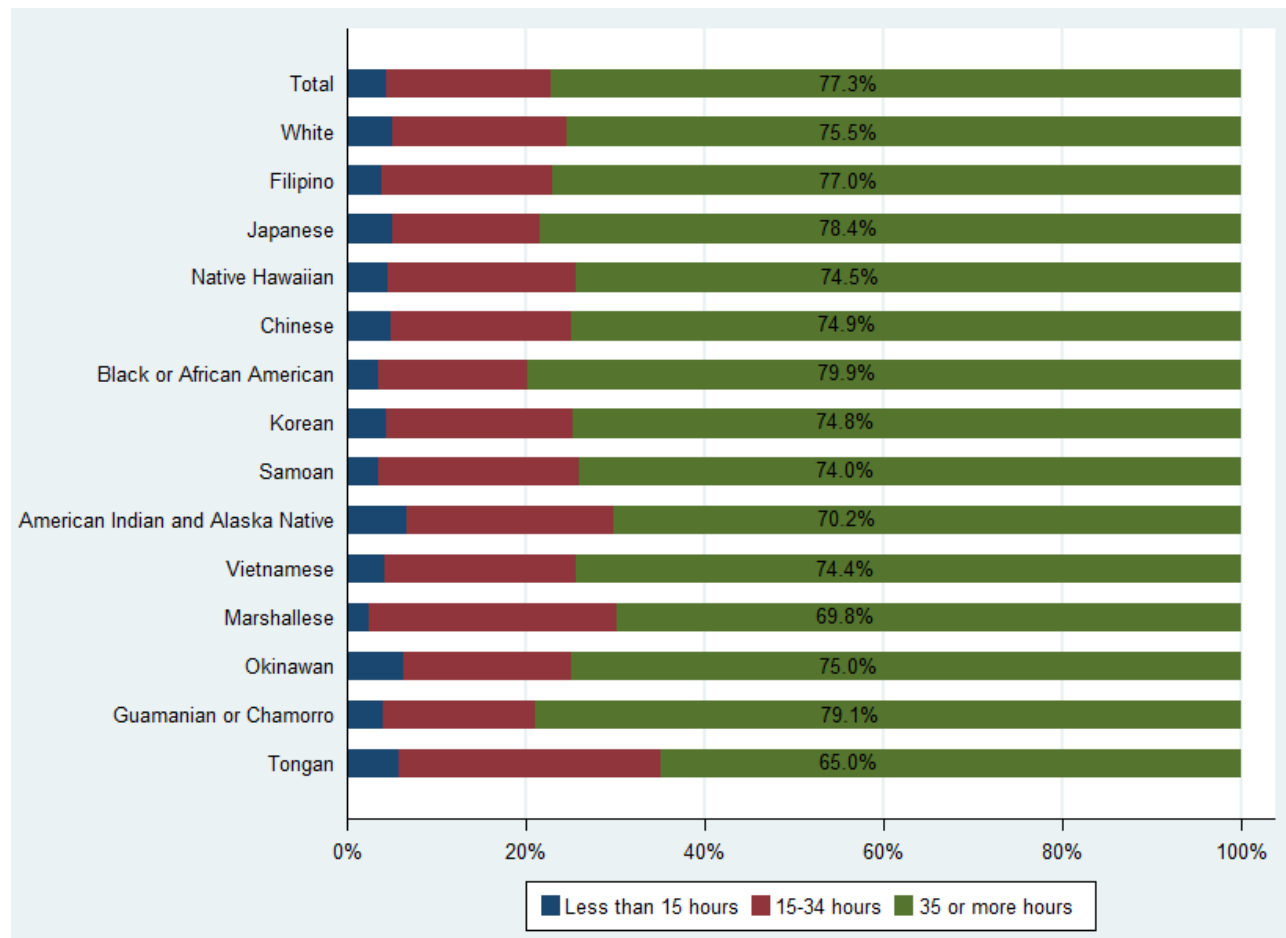

Table 6: Class of Worker by Race Group

Race Alone or in Combination	Class of Worker (Percent of total employed of race group)				
	Private wage and salary workers	Government employees	Self-employed		Unpaid workers
			Incorporated business	Unincorporated business	
Total population	68.8%	20.6%	3.5%	6.9%	0.2%
White	64.0%	21.7%	4.8%	9.3%	0.3%
Filipino	80.1%	15.3%	1.2%	3.3%	0.1%
Japanese	66.2%	24.9%	3.1%	5.6%	0.2%
Native Hawaiian	72.6%	21.3%	1.6%	4.3%	0.1%
Chinese	70.5%	20.4%	2.9%	6.0%	0.2%
Black or African American	59.2%	33.5%	2.1%	4.9%	0.3%
Korean	66.1%	18.5%	5.6%	9.3%	0.5%
Samoan	72.9%	21.8%	1.7%	3.5%	0.1%
American Indian and Alaska Native	67.8%	20.0%	2.3%	9.4%	0.5%
Vietnamese	65.3%	9.4%	8.9%	15.6%	0.8%
Marshallese	90.9%	3.4%	1.8%	3.9%	0.0%
Okinawan	63.0%	30.0%	3.4%	3.7%	0.0%
Guamanian or Chamorro	69.4%	26.4%	0.3%	3.9%	0.0%
Tongan	78.8%	9.0%	0.7%	11.3%	0.1%

Usual hours worked. Full-time work (working 35 or more hours per week) is generally associated with higher wages and salaries than part-time work. Full-time workers are more likely to have access to benefits like health insurance and retirement plans, which increases their quality of life and lifetime earning potential. These data show the usual hours worked by all employed individuals between ages 16 and 64. They do not, however, indicate if people are working only part of the year, multiple part-time jobs, a full-time job only, or a full-time job and a part-time job too. Nor do the data indicate if those working less than full-time are doing so by choice or if they would prefer to be working more hours.

According to the data, almost 8 out of 10 Blacks or African American workers are full-time. Of the five most populous racial groups living in Hawaii, Native Hawaiians and Chinese are the most likely to work part-time, with about 1 out of 4 workers in each respective group working part-time.

Figure 4: Usual Hours Worked a Week by Employed Workers Ages 16-64 by Race Group

Income. The median household income in Hawaii was \$69,515 during the 2011-2015 period, which ranked Hawaii 6th among the 50 states and District of Columbia and 29.0% greater than the U.S. average. Five race groups have median household incomes which are greater than the state average: the Filipino, Japanese, Chinese, Okinawans, and Guamanians or Chamorro. The same five race groups also have median family incomes which are greater than the state average of \$80,778. However, only Whites, the Japanese, and Okinawans have a per capita income greater than the state average of \$29,822.

Per capita income in Hawaii, while still greater than the U.S. average, ranks 19th among the 50 states and the District of Columbia. This suggests that household structure plays a role in Hawaii’s high median household income and median family income. Hawaii ranks first in the nation for multigenerational families and second in household size. More adults in the home means that more people can contribute to the household income and financial upkeep of the home.

Figure 5: Median Household Income by Race Group

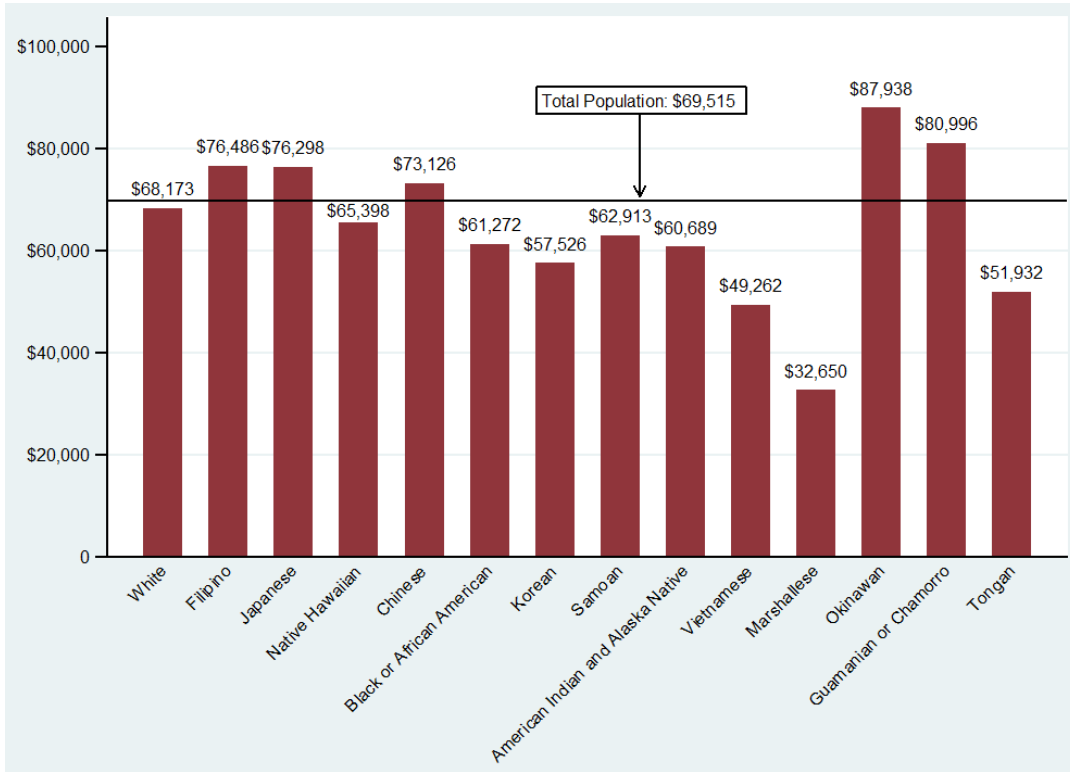

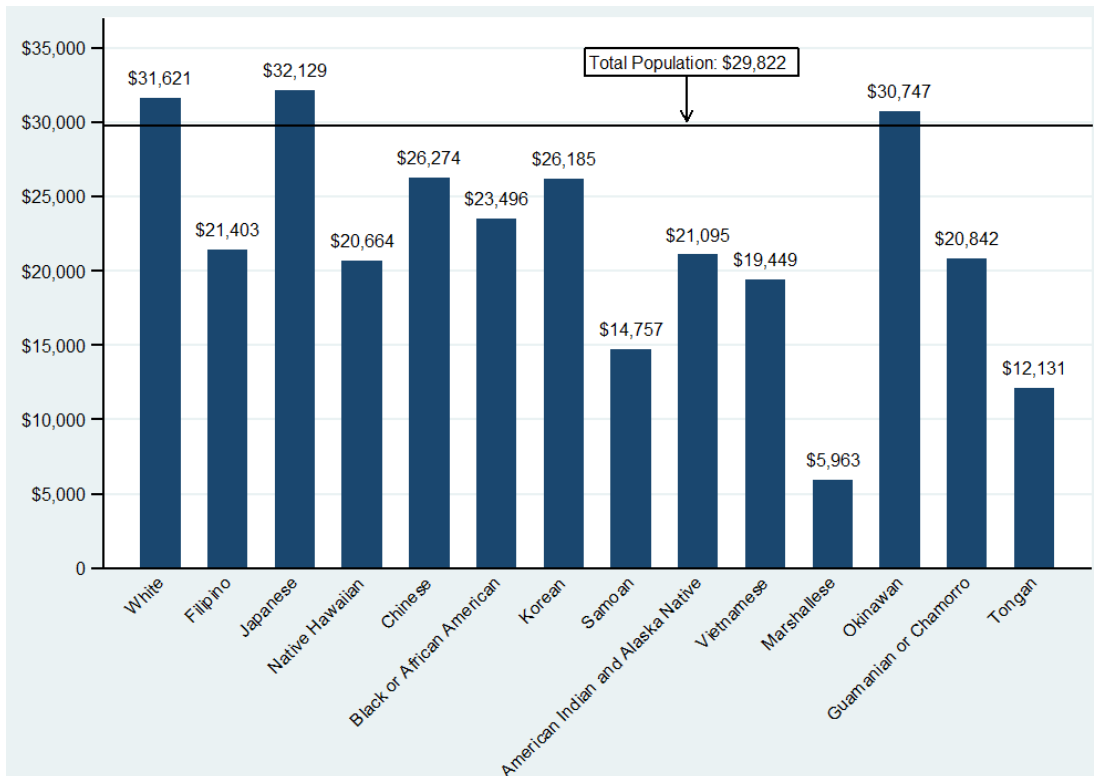

Figure 6: Per Capita Income by Race Group

Poverty Rate. People living below the poverty threshold can struggle with limited access to food, clothing, shelter, health care, and education. Hawaii’s individual poverty rate, 11.2%, was the 6th lowest among the United States and District of Columbia during the 2011-2015 period, and the poverty rate among families, 7.7%, was the 8th lowest in the nation; however, poverty rates in Hawaii vary significantly between race groups, with some groups experiencing very little poverty while others experience double-digit levels.

Okinawans have the lowest poverty rates for both families and individuals, with an estimated 25 families (1.8% of families) and 216 individuals (3.2% of the population) living in poverty. The Marshallese have the highest poverty rates for both individuals and families, with 538 families (46.2% of families) and 4,566 individuals (51.1% of the population) living in poverty.

Of the five largest race groups, the Japanese have the lowest poverty rates for individuals and families, with 2,619 families (3.8% of families) and 20,214 individuals (6.6% of the population) below the poverty level. Of those same five groups, Native Hawaiians have the highest poverty rates for individuals and families, with 6,610 families (12.6% of families) and 45,420 individuals (15.5% of the population) living below the poverty level.

Table 7: Families and People Who Live in Poverty by Race Group

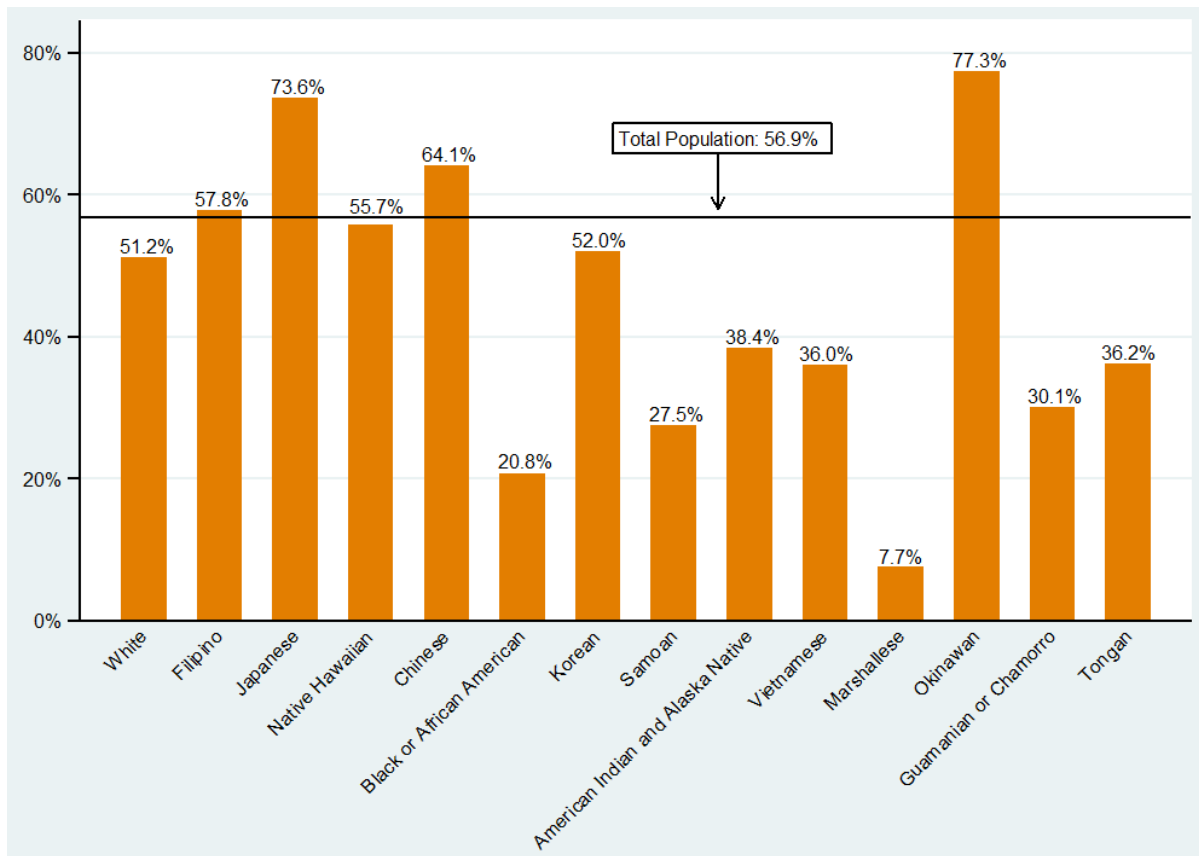

Race Alone or in Combination	All families	All people
Total population	7.7%	11.2%
White	7.3%	11.4%
Filipino	7.5%	9.4%
Japanese	3.8%	6.6%
Native Hawaiian	12.6%	15.5%
Chinese	8.0%	10.1%
Black or African American	9.6%	13.5%
Korean	9.1%	11.2%
Samoan	17.9%	20.4%
American Indian and Alaska Native	15.1%	18.1%
Vietnamese	19.4%	18.0%
Marshallese	46.2%	51.1%
Okinawan	1.8%	3.2%
Guamanian or Chamorro	8.5%	9.0%
Tongan	21.9%	16.2%

Housing Characteristics

Homeownership. A home is often the largest financial asset held by many households. Households who rent do not accumulate economic value in their homes and are at risk of fluctuations in their rental rates, while many homeowners pay a fixed mortgage and see a return on their investment if their homes appreciate in value. Homeowners may pass their homes onto their children, creating wealth opportunities for multiple generations of families.

Hawaii ranks 47th among the fifty states and District of Columbia in homeownership rates for occupied housing units. Although homeownership rates are low for all racial groups except the Japanese and Okinawans, it is particularly low among those with younger age structures. Six of the seven populations with homeownership rates under 50% are populations with median ages under 28 years old.

Figure 7: Homeownership by Household Race

Gross Rent and Selected Monthly Owner Costs. The Census definition of gross rent is the contract rent plus the estimated cost of utilities and fuels, if these costs are paid for by the renter. It is a measure of average monthly housing cost expenses for renters. Selected monthly owner costs (SMOC) are a comparable measure for housing costs for owners, with and without mortgages. Selected monthly owner costs are the mortgage payments, real estate taxes, insurances, utilities, fuels, mobile home costs, and condominium fees.

Housing cost expenses are greatest for owners with mortgages. Median gross rent is 36.7% cheaper than the median SMOC with a mortgage. However, the median selected monthly owner costs drop 77.8% for homeowners who have paid off their mortgages, an eventual savings that renters will never see.

Blacks or African Americans and Guamanians or Chamorro have the highest median gross rents, at \$1,945 and \$1,940, respectively. This is about 16%—over \$300 a month—more than the third highest median gross rent, \$1,636, paid by Whites. Only the Marshallese have a median gross rent less than \$1,000; however, 92.3% of Marshallese rent rather than own.

Samoans, Marshallese, and Blacks or African Americans have the greatest median selected monthly owner costs among homeowners with mortgages, at \$2,728, \$2,663, and \$2,605, respectively. Only Native Hawaiian homeowners with mortgages have a median SMOC less than \$2,000. Of those homeowners without mortgages, only Vietnamese have a median SMOC greater than \$600. Marshallese and Tongans without mortgages have the lowest median SMOC at \$226 and \$277, respectively.

Table 8: Gross Rent and Median Selected Monthly Owner Costs by Household Race

Race Alone or in Combination	Median Gross Rent	Median Selected Monthly Owner Costs	
		With Mortgages	Without Mortgages
Total population	\$1,438	\$2,270	\$505
White	\$1,636	\$2,352	\$524
Filipino	\$1,313	\$2,297	\$463
Japanese	\$1,245	\$2,190	\$488
Native Hawaiian	\$1,252	\$1,996	\$447
Chinese	\$1,211	\$2,342	\$549
Black or African American	\$1,945	\$2,605	\$536
Korean	\$1,299	\$2,353	\$543
Samoan	\$1,274	\$2,728	\$463
American Indian and Alaska Native	\$1,441	\$2,133	\$390
Vietnamese	\$1,150	\$2,431	\$676
Marshallese	\$987	\$2,663	\$226
Okinawan	\$1,054	\$2,167	\$432
Guamanian or Chamorro	\$1,940	\$2,353	\$475
Tongan	\$1,175	\$2,331	\$277

This report contains data that describe the demographic, social, economic, and housing experiences of Hawaii’s 14 largest race groups. Many of the graphs and tables show disparities in education, income, and resources among Hawaii’s residents. This report is not, however, a complete portrait of an individual’s or group’s overall well-being. Family ties, community structure, and culture all play a role in shaping the lives of a population. The groups highlighted here are more than statistics—they are diverse populations made up of people with multi-faceted interests and identities. They are supported by friends, neighbors, nonprofits, mentors, and faith and community leaders, and their stories are richer than that which can be told by Census data alone.

APPENDIX 1

Summary Table for Hawaii's Largest Race Alone
or in Combination Groups

**SUMMARY TABLE FOR HAWAII'S LARGEST RACE ALONE OR IN COMBINATION GROUPS
STATE OF HAWAII: 2011-2015**

[In percentages, unless otherwise specified. The 2011-2015 5-year dataset that was used describes the average characteristics of people living in Hawaii between the years 2011 and 2015. Based on a sample and subject to sampling variability]

Subject	Total population	White	Filipino	Japanese	Native Hawaiian	Chinese	Black or African American	Korean	Samoan	American Indian and Alaska Native	Vietnamese	Marshallese	Okinawan	Guamanian or Chamorro	Tongan

APPENDIX 2

Demographic, Social, Economic, and Housing Profiles by Race Group

Total Population

	Population estimate	Percent of total population
Total Population	1,406,299	100.0%
One race	1,073,180	76.3%
Two or more races	333,119	23.7%

The characteristics below are based on the total population estimates from the 2011-2015 5-year ACS.

Social and Demographic Characteristics

Gender	Male 50.5%		Female 49.5%	
Age distribution	5-17 years old 15.4%	18-64 years old 62.5%	65 years & older 15.6%	Median age 38.0
Educational attainment (25 years and older)	Less than high school diploma 9.0%	High school diploma 27.9%	Some college or Bachelor's degree 52.7%	Graduate degree 10.5%
Nativity and citizenship status	Native born 82.3%	Foreign-born & citizen 10.1%	Foreign-born & not citizen 7.6%	
Language used at home (5 years and over)	English only 74.8%	Language other than English & speaks English "very well" 12.7%	Language other than English & speaks English less than "very well" 12.5%	

Household & Housing Characteristics (universe: households)

Family households		Non-family households	
Married-couple households	Other family households	Living alone	Other non-family households
51.9%	17.7%	23.6%	6.8%

Homeownership rate	Household size		Owner costs (with mortgage) \geq 35% of median household income	Gross rent \geq 35% of median household income
	Owner	Renter		
56.9%	3.2	2.8	34.6%	46.9%

Economic Characteristics

Labor force participation rate	Unemployment rate	Median household income	People living in poverty
65.2%	6.1%	\$69,515	11.2%

Employment Characteristics (universe: civilian employees)

Class of workers	Share	Occupation	Share
Private wage and salary workers	68.8%	Office and administrative support	13.5%
Government employees	20.6%	Management, business, and financial	13.3%
Self-employed	10.4%	Sales and related	11.3%
Unpaid workers	0.2%	Education, legal, community service, arts, and media	11.3%
		Food preparation and serving related	7.9%
		Other occupations	42.7%

Race Group: White

	Population estimate	Percent of total population
Alone	357,164	25.4%
Alone or in combination	604,474	43.0%

The characteristics below are based on the "alone or in combination with one or more other races" population estimates from the 2011-2015 5-year ACS.

Social and Demographic Characteristics

Gender	Male 53.2%		Female 46.8%	
Age distribution	5-17 years old 17.1%	18-64 years old 62.7%	65 years & older 12.2%	Median age 33.1
Educational attainment (25 years and older)	Less than high school diploma 4.8%	High school diploma 24.4%	Some college or Bachelor's degree 56.8%	Graduate degree 14.0%
Nativity and citizenship status	Native born 95.3%	Foreign-born & citizen 2.4%	Foreign-born & not citizen 2.3%	
Language used at home (5 years and over)	English only 90.3%	Language other than English & speaks English "very well" 7.7%	Language other than English & speaks English less than "very well" 2.0%	

Household & Housing Characteristics (universe: households with White householders)

Family households		Non-family households	
Married-couple households	Other family households	Living alone	Other non-family households
51.3%	14.3%	24.9%	9.4%

Homeownership rate	Household size		Owner costs (with mortgage) \geq 35% of median household income	Gross rent \geq 35% of median household income
	Owner	Renter		
51.2%	3.0	2.7	36.7%	49.9%

Economic Characteristics

Labor force participation rate	Unemployment rate	Median household income	People living in poverty
67.0%	6.6%	\$68,173	11.4%

Employment Characteristics (universe: civilian employees)

Class of workers	Share	Occupation	Share
Private wage and salary workers	64.0%	Management, business, and financial	14.7%
Government employees	21.7%	Education, legal, community service, arts, and media	13.9%
Self-employed	14.1%	Office and administrative support	11.7%
Unpaid workers	0.3%	Sales and related	11.2%
		Food preparation and serving related	7.1%
		Other occupations	41.3%
