Dermoscopy Method	Permanent cross polarised (CP)	CP & surface-polarized modes to see deep structures & skin surface	Cross-polarised and non-polarised modes	Permanent CP Bright 1800 foot-candle light	Switch between CP, CP with Fluid & Fluid only view
Attach to a camera?	NO	NO	Only iPhone 4	YES	YES
Battery	Disposable Lithium 2CR5	Disposable Lithium 2CR5	Recharges from any laptop or PC	Rechargeable Lithium ion	Rechargeable Lithium ion

DermLite DL100 Dermatoscope

DermLite DL100

- Simple, quick and precise lesion diagnosis for earlier detection without the use of oil. Ideal for detection of melanoma and dysplastic nevi
- LED technology for bright white natural illumination
- 10x Hastings Triplet lens with advanced glare free cross-polarisation for clear, deep views into pigmented lesions
- Lithium battery for 1200 examinations

DER151	DL100 Dermatoscope	£355.21
DER152	Protective Pouch	£37.15

DermLite Carbon Dermatoscope

DermLite Carbon

- Instant toggle control over lesion visualisation
- The first group of eight LEDs produces cross-polarized light, ideal for visualizing deep structures
- The second set of eight LEDs is linearly polarized, giving a clear rendition of the skin surface
- Supplied with 1 x 2CR5 lithium battery and belt pouch

DER148	Carbon Dermatoscope	£487.53
--------	---------------------	---------

DermLite II HR Dermatoscope

- DermLite II PRO HR redefines the best in portable skin imaging
- The most light in any portable dermoscope, the largest lens in its class, button-activated light intensity adjustment, rechargeable battery, and camera-ready
- 16 or 32 LEDs (light emitting diodes), for a maximum output of 1800 footcandles.
- Deeper pigmentation allows you see more detail at various depths than ever before using cross-polarization
- The innovative device makes it easier than ever to record what you see
- Camera can be attached via the DermLite II PRO HR's built-in threaded connection. A retractable spacer comes standard with a removable glass faceplate and 10mm scale
- Supplied with 3Gen's 5-year warranty and battery
- 900 or 1800 footcandles of light
- Retractable spacer with removable faceplate with scale
- Large 25mm 10x lens

DER153 | DermLite II HR Dermatoscope | £805.00

DermLite III (DL3)

DermLite DL3 combines the unique advantages of polarized and immersion fluid dermoscopy in one device.

- Developed by the world's leading dermatologists
- First handheld DermLite to integrate a 25mm four-element lens, which offers greatly reduced optical distortion and a sharper image across the field of view
- 30% more illumination in cross-polarized mode than in the DermLite II
- Focal range in excess of $\pm 4\text{mm}$ or -5.5 to $+7.6$ diopters
- Camera compatible via the product's built-in threaded 28mm connection
- Low-battery indicator
- Solid aluminium
- Removable aluminium faceplate spacer
- Supplied with charging base, eyepiece, leather belt case, spacer, and lanyard
- Fits most cameras; a lens adapter may be required

DER149 | DermLite III (DL3) Dermatoscope | £964.47

DermLite DL1

The DermLite DL1 is a small pocket sized device designed to view skin lesions with high magnification and clarity.

Four bright LEDs provide even illumination and a special spacer with cross-polarisation provides a glare-free image. A non-polarised spacer may be used for traditional immersion fluid dermoscopy. A high quality three element lens configuration, designed to provide excellent results with the iPhone 4 and the included connection kit, offers superb colour correction and reduced image distortion for images rich in surface detail.

The all-new DL1

- 9cm long x 2cm wide
- 14mm lens viewing area
- 4 Bright LEDs
- Cross-polarised and non-polarised modes
- Glass faceplate with 10 mm scale
- Recharges from any laptop or PC
- Takes superb images with your iPhone 4
- Battery life for 1 hours continuous operation
- Smart battery indicator is red when charging, green when fully charged and will give a flashing warning when less than 25% of battery charge remains

In the sales package:

- DL1
- Spacer (for contact) polarised
- Spacer (for contact) non polarised
- Clip style spacer (non contact) for polarised
- iPhone 4 connection cradle
- 28mm screw thread receiver for iPhone 4 connection cradle
- USB charging cable

NEW DermLite Connection Kit for iPhone 4 / 4S

Finally, you can use the functional power and optical beauty of the DermLite you already know & own to take digital images with your iPhone. Each DermLite Connection Kit for iPhone 4 / 4S comes with 3Gen's 5-year warranty, includes an iPhone 4 / 4S snap case and 28 mm adapter ring

Compatible with iPhone 4 / 4S, any DermLite II or D

DER154 | DermLite Connection Kit for iPhone 4 / 4S | £503.81
 DER156 | I-Phone 4 Connection Kit For Dermatoscope | £65.64

Shoot and Print Dermoscopy Camera

A complete starter set that provides everything needed to capture and store clinical and dermoscopic images.

- 1 x DermLite II HR Dermatoscope
- 1 x Camera*
- 1 x 4GB camera memory
- 1 x printer PictBridge enabled*
- 1 x Starter pack of paper and ink cartridge (allows for 5 prints)
- 1 x universal camera adapter
- Step down rings
- Dermoscopy - the Essentials

*Please note that cameras and printers are subject to change without notification and we reserve the right to substitute these items for an alternative of similar or higher specification. Please call our Sales Team for confirmation of the currently available model.

DER170	Shoot and Print Package	£1193.81

Ri-Derma Dermatoscope

Ri-Derma Dermatoscope offers physicians and specialists a reliable method of screening and early identification of malignant melanomas. Proven epiluminescence microscopy allows melanocytic and non-melanocytic structures to be distinguished and enables precise observation of changes in skin pigmentation.

- 10x magnification of the structure of the skin with focusing, achromatic lens
- Two different skin-friendly and sterilisable contact plates are available: with scale from 0-10mm for exact measurement of pigmented skin lesions and one without scales
- Bulbs can be quickly replaced at the base of the instrument head
- Stable casing of black chrome-plate metal and dust-proof
- 2.5v battery handle
- Practical eyeglass protection
- Bayonet fitting for quick and secure attachment of the instrument head to the handle
- Non-reflecting and high transparent contact plate made of stable and scratch-resistant material
- Especially flat protective ring made of plastic for optimal adaption to the skin
- Requires 2 x C size batteries - not included

DER157	2.5V HL Dermatoscope	£300.15
DER158	Contact plate without scaling	£28.90
DER159	Contact plate with scaling 0-10mm	£34.48
DIS354	Duracell C Size Batteries, pack of 2	£3.01

MAGW150 Wood's Light

The DARAY MAGW150 Wood's light is a must-have diagnostic tool for analysing skin conditions.

The MAGW150 allows clinicians to correctly inspect and diagnose a variety of conditions. Lightweight and easy to use, the MAGW150 emits an ultraviolet light with the remarkable ability to note skin colour changes and variations in skin tone. Various mounting options available – please call for details.

- Emits an ultraviolet light allowing clinicians to correctly inspect and diagnose a variety of conditions
- Remarkable ability to note skin colour changes and variations in skin tones
- Used in a variety of applications including dermatology, forensic science, veterinary medicine and childcare
- Lightweight and easy to use

Specification

- 9W UV lamp
- 5,000 hrs life per lamp
- 3 dioptre
- Protective cover plate
- 230V mains operated
- Lens size 110 x 75mm

LOU088	MAGW150 Wood's Light	£138.00
--------	----------------------	---------

Compact U.V. Light

- Hand-held ultraviolet fluorescent lamp, ideal for the detection of certain disorders
- Integral white torch and 130mm UV tube
- Battery operated, AA size batteries included

LOU085	Compact U.V. light	£54.89
LOU086	Spare Bulb	£9.66

Woods U.V. Lamp

- Portable, hand-held lights for maximum flexibility
- Mains operated
- Optically ground and polished magnifier lens with 3 power magnification and focal length of 203mm
- Available with U.V. and white bulbs for application needs

LOU080	Lamp	£234.90
LOU081	Lamp Replacement UV Tube	£22.79
LOU082	Lamp Replacement White Bulb	£16.08

Handyscope – The Exclusive iPhone connected Dermatoscope

“For many years we have been speaking and even publishing on ‘Mobile teledermoscopy – melanoma diagnosis by one click?’ And now I envision that the Handyscope probably will do the job.”

H. Peter Soyer, MD, FACD, Brisbane, Australia

- Handyscope allows the clinician to take pictures remotely and send them to colleagues and consultants for second opinions. The ability to take Dermoscopy out in to the community and interact with patients by showing them what you are looking at when you are diagnosing suspicious lesions
- Handyscope converts your iPhone 3GS, 4 and 4S into a digital dermatoscope. It allows you to take brilliant polarized mole pictures of up to 20X magnification and to save them in the password protected App
- Handyscope lifts handheld dermoscopy to a new quality level. The first of its kind in the world!

- Explore mobile dermoscopy like you have never seen it before with the flexibility of the Handyscope that you can take anywhere in the world!
- Please state which iPhone 3GS, 4 and 4S compatible model you require
- Pack comprises: 1 x Handyscope Dock for iPhone, in presentation box
- Does not include iPhone. Handyscope App can be downloaded from www.iTunes.com and does not come as part of this purchase
- Help combat referrals with Fotofinder Hub

MoleMate

“We decided to purchase MoleMate to assist with patient reassurance and minimise excisions. We chose MoleMate because it provides clear imagery, is easy to show patients and explain and allows us to keep a record.”

Dr James, QLD

MoleMate allows the clinician to make informed judgements on suspect lesions quickly, accurately and affordably. MoleMate allows you to show your patients what you see on screen in clear reports that are recorded and easy to explain to your patient.

- Quick assessment of lesions using inbuilt Primary Care Scoring Algorithm
- Clear concise PDF reports for patient records and referrals
- High sensitivity and specificity for melanoma diagnosis, reducing false negatives
- Proven in General Practice to limit unnecessary excisions
- Includes a training program rated by practitioners as effective and easy to use
- Reduces practice costs by limiting unnecessary Seb K excisions

MoleMate system, comprising of a Siascope, software, training CD and first year's license key including up to 3 technical support phone calls and software updates. Licenses for years 2 & 3 are currently £300 per annum.

Minimum PC specification*:

- 2.0ghz Pentium 4 processor, or equivalent
- Windows XP/Vista/Windows 7 operating systems
- 512Mb RAM
- 32Mb Graphics memory (DirectX 9 compatible)
- 20Gb hard disc
- 1024x768 min screen resolution
- 2 x USB connections
- 32bit and 64bit processor

* PC not part of sales package. Not MAC compatible

DermaBlade Biopsy Blades

DernaBlade Biopsy Blades have been specially designed for shave biopsies. Their flexible design allows the removal of surface protuberances, as well as deep lesions, while reducing ragged skin edges.

'Sure-Grip' side teeth facilitate a three-digit grip to provide stability, control and direction. The design prevents slippage and ensures the blades can be picked up safely and conveniently.

Supplied individually wrapped in packs of 50 blades.

- Individually wrapped
- Sterile
- Single-patient use

DER164

£64.12

Surgical Skin Marking Pens

Applications

Pre-operative skin marking in:

- Minor Surgery
- Dermatology
- Radiotherapy
- Plastic / Eye / Neuro / Vascular and General Surgery

Features

- Non toxic gentian violet ink
- Provides sharp, distinct markings that remain visible for several days but can easily be removed with soap and water, ethyl alcohol or acetone
- Bullet point tip design allows thin or broad line
- Non-toxic gentian violet ink

Supplied sterile in individual peel packs of 10

Dermoscopy - The Essentials

Dermoscopy - The Essentials is written by five dermatologists with vast teaching experience, this book aims to take the mystery out of dermoscopy and make this technique accessible for all dermatologists, GPs and other medical clinicians responsible for diagnosing skin cancer.

This book clearly and concisely explains the principles of this revolutionary technique, how to perform a dermoscopy and how to interpret the results using checklists, algorithms, and brief test descriptions to convey the key messages

Key authors include : Peter Soyer, University of Graz, Austria Giuseppe Argenziano, University Federico II of Naples, Naples, Italy

Contains over 375 colour dermoscopic images with clinical correlates
