* **Supplier Diversity:** DFI Construction, Inc has been approved, through the Small Business Association (SBA), as a “qualified HUBZone small business concern(SBC). As such, our firm is eligible for HUBZone opportunities. Original Certification Date 09/15/2015, **HUBZone Certificate No. 53406.**

DFI Construction, Inc., through planning, administration, and monitoring has maintained an accident free work site throughout the years. Safety is of the highest priority in all DFI operations.

All DFI employees must participate and cooperate with DFI’s construction safety program as a requirement of their employment. Consistent compliance with this program, along with all other applicable local, state, and federal programs is not an option. It is a necessity.

Our commitment to safety has earned DFI Construction the Executive Level CEO Safety Leadership Award in 2004. Several hundred contractors competed for this award and only one attained this pinnacle in safety. It was DFI Construction. This award was for achieving a leadership position in safety and health among all Down- stream contractors for MOTIVA Enterprises.

DFI Construction requires employees to obtain and maintain the Transportation Worker Identification Credential (TWIC). TWIC is administered by the Transportation Security Administration (TSA) and U.S. Coast Guard.

DFI Construction also meets the criteria of supplier prequalification services, such as PICS, ISNetwork and CVM Solutions, as well safety orientation and verification programs, such as Power Safe Training.

DFI CONSTRUCTION, INC.

Hydro-testing

DFI Construction has been involved in the hydro-testing of fuel oil and process piping for various clients throughout the United States. All testing was done in accordance with industry standards.

We also have the knowledge and capabilities of implementing hydro-test packages for new construction projects necessary for the completion of said projects.

API 653 / STI Tank Inspections

DFI Construction has the capability of performing API 653 Tank inspections, floor scanning, UT Thickness readings and tank repairs according to current industry standards. This includes annual visual inspections as well as internal inspections.

API 570 Piping Inspections

DFI Construction has the capability of performing API 570 piping inspections with ultrasonic thickness survey of all process piping. DFI also has access to guided wave G3 technology.

API 510 Pressure Vessel Inspections

DFI Construction has the capability of performing API 510 pressure vessel inspections

API 571 Corrosion and Damage Mechanisms Professional on staff.

CWI Certified Welding Inspector, NACE III, and CP-1 on staff.

General Plant Maintenance

Since its inception in 1999, DFI Construction has been involved in general plant maintenance, which has covered basically all phases of plant operations. Some of these are listed below:

- Repair of underground process lines.
- Installation of new piping and associated structural steel
- Erection of steel buildings.
- Pumping out fuel oil tanks and installation of truck loading facilities.
- Construction of structural steel platforms, concrete foundations, installation of containment areas, maintaining dock facilities, and removal of brush and debris.

DFI CONSTRUCTION, INC.

Fabrication

DFI Construction has a new state of the art 7500 sq ft fabrication facility that specializes in all types of metal fabrication which include the following:

- Miscellaneous pipe supports
- Miscellaneous steel fabrication
- Piping handrail fabrication
- Angle handrail fabrication
- Small bore piping fabrication
- Large bore piping fabrication
- Vessel trim fabrication

Project Management and Construction

The owners of DFI Construction have been involved in various projects throughout the world for various contractors in management positions. These positions have ranged from Foreman to Project Superintendent. Many of the jobs were completed from the grass roots construction to the completing of the hydro-test packages and punch lists. We believe we have the capabilities to assist the larger companies in maintaining a job direction or Quality Assurance program from a third party perspective.

In conclusion, DFI Construction consists of people with the knowledge and capabilities of being an asset to any phase of a construction or maintenance project.
