

IMID 2007

7th International Meeting on Information Display

Digest of Technical Papers of 7th IMID

Volume 7, Book I

August 27~31, 2007

ISSN 1738-7558

*Publisher : The Korean Information Display Society
10F, The Korean Science and Technology Bldg. 635-4
Yeogsam-dong, Kangnam-gu, Seoul, Korea 135-703
Tel : 82-2-563-7962, Website : www.k-ids.or.kr*

Table of Contents

Keynote Address

- 01 Liquid Crystals – A Key Component in LCDs ---- 3
Walter Zywoitek(Merck KGaA, Germany)
- 02 Future Trends in Information Displays ----- 4
Hee-Gook Lee(LG Electronics Inc., Korea)

1. Crystallization Technologies

- 1-1 [Invited] Excimer Laser-induced Crystallization of Si Films for Manufacturing LTPS TFT-based Displays ----- 7
U. J. Chung, A. B. Limanov, P. C. van der Wilt, A. M. Chitu, and James S. Im(Columbia Univ., USA)
- 1-2 [Invited] SLS(Sequential Lateral Solidification) Technology for High End Mobile Applications ---- 8
Myung-Koo Kang(Samsung Electronics, Co., Ltd., Korea), HyunJae Kim(Yonsei Univ., Korea), ChiWoo Kim(Samsung Electronics, Co., Ltd., Korea), and HyungGuel Kim(Samsung Electronics, Co., Ltd., Korea)
- 1-3 Recent Advances in Excimer-laser-based Crystallization for Active-Matrix Displays ----- 12
Brandon A. Turk(Coherent, Inc., USA), Ludolf Herbst, Frank Simon, and Rainer Paetzel(Coherent, GmbH, Germany)
- 1-4 The Characterization of Poly-Si Thin Film Transistor Crystallized by a New Alignment SLS Process ----- 16
S. J. Lee, J. Y. Yang, K. S. Hwang, M. S. Yang, and I. B. Kang(LG. Phillips LCD Co., Ltd., Korea)

2. PDP Discharge Physics

- 2-1 [Invited] Understanding the Physics of Plasma Display Addressing ----- 23
Vladimir P. Nagorny(Mattson Tech., USA)
- 2-2 Analysis of the Luminous Efficacy Improvement in Full HD ac Plasma Display Panel ----- 29
Hyun Sook Bae and Ki-Woong Whang(Seoul Nat'l

Univ., Korea)

- 2-3 Numerical Analysis of the Striation Phenomena in an ac Plasma Display Panel using Energy Fluid Model ----- 33
Hyun Sook Bae and K-Woong Whang(Seoul Nat'l Univ., Korea)

3. AMOLED TV

- 3-1 [Invited] Large-Sized AMOLED for TV Application ----- 39
Changwoong Chu, Jinkoo Chung, Dongwon Lee, Jaekook Ha, Junho Choi, Sungsoo Lee, Joo-Hyeon Lee, Sangpil Lee, and Sungtae Shin(Samsung Electronics Co., Ltd., Korea)
- 3-2 Method to Enhance Color Gamut up to 89 % in Bottom Emission Active-Matrix Organic Light Emitting Device ----- 43
Hwa Kyung Kim, Hong Seok Choi, Dong Hee Yoo, Woo Chan Kim, Jong Geun Yoon, and Joong Whan Yang(LG Electronics Inc., Korea)
- 3-3 Using Net Power Control for AMOLED TV ----- 47
Alexander Arkhipov, Baek-Woon Lee, Kyongtae Park, Si-duk Sung, Sungtae Shin(Samsung Electronics Co., Ltd., Korea), and Kyuhna Chung(Cheil Industries Inc., Korea)
- 3-4 Inverted OLED Structure for 3.5 Inch Full Color AMOLED Display on a-Si TFT Backplane ----- 51
Jae Hee Park, Jae Young Park, Kwang Jo Hwang, Hee Dong Choi, Noh Hoon Myung, Seok Jong Lee, Seung Chul Park(LG. Phillips LCD Co., Ltd., Korea), Jung Bum Kim, Yun Hye Hahm, Jeoung Kwen Noh, Jung Hyoung Lee, Jong Seok Kim, and Min Soo Kang(LG Chem., Ltd., Korea)

4. Flexible AMOLED

- 4-1 [Invited] Flexible Display Roadmap and the Market Outlook ----- 57
Barry Young(Displaysearch, USA)
- 4-2 [Invited] Analysis of Low Power Consumption

Table of Contents

	AMOLED Displays on Flexible Stainless Steel Substrates -----	58
	Mick Hack, Richard Hewitt, Ray Ma, Julie J. Brown(Universal Display Corp., USA) , Jae Won Choi, Jun Hyuk Cheon, Se Hwan Kim, and Jin Jang(Kyung Hee Univ., Korea)	
4-3	[Invited] Development of Flexible 3.5" QCIF[176 X144 pixels] OTFT Driven OLED : Integration Technologies Compatible with Normal Semiconductor Processes -----	62
	Seung-Youl Kang, Seong Deok Ahn, Ji-Young Oh, Gi-Hyun Kim, Jae Bon Koo, In-Kyu You, Chul-Am Kim, Chi-Sun Hwang, Sang-Hee Ko Park, Yong Suk Yang, Sung Mook Chung, Jeong-Ik Lee, Hye Yong Chu, and Kyung Soo Suh(ETRI, Korea)	
4-4	All-Printed Flexible OLEDs -----	66
	Maaninen Arto, Tuomikoski Markus, Välimäki Marja, and Maaninen Tiina(VTT Technological Research Center of Finland, Finland)	

5. Optical Films for LCD Application

5-1	[Invited] Flexible Liquid Crystal Film using Continuous Process -----	73
	Chi-Chang Liao, Hsing-Lung Wang, Kang-Hung Liu, Ru-De Chen, Chih-Yuan Chang, Shie-Chang Jeng, Yan-Rung Lin(ITRI, Taiwan), Kevin Lu, Rick Chang, and Jerry Chen(Taiflex Scientific Co., Ltd., Taiwan)	
5-2	[Invited] Films for Widening the Viewing Angle of LCDs -----	76
	Hiroyuki Mori(FUJIFILM Co., Japan)	
5-3	Adjustable Pretilt Angle of Liquid Crystal Alignment Materials -----	80
	Song-Shiang Lin, Chein-Dhau Lee(ITRI, Taiwan), Ya-Ting Su, and Yu-Der Lee(Nat'l Tsing Hua Univ., Taiwan)	

6. Advanced Manufacturing Equipment

6-1	[Invited] Challenges for Large Area Processing Equipment for TFT-LCD Manufacturing -----	85
	Tak Tanaka(AKT, USA)	

6-2	[Invited] Atmospheric Metal Doping System and Application for Poly-Si Backplane -----	87
	D. H. Shin, J. M. Lee, S. K. Lee, and H. J. Kim (Viatron Technologies Inc., Korea)	
6-3	In-Line Manufacturing Tool using Linear Belt Source Evaporation for Large Size Lighting OLED and Flexible OLED -----	91
	Chung Hun Hwang(OLEDON Co., Ltd., Korea)	
6-4	Large Area Flicker Metric for Display System -----	95
	Byung Hyuk Shin, Jaeho Oh, Hyoungsik Nam, and Nam Deog Kim(Samsung Electronics Co., Ltd., Korea)	

7. Optical Properties of LCs and Photonic Applications

7-1	[Invited] Advanced Optical Configuration for Transmissive and Reflective Mode in the In-Plane Switching LC Cell -----	101
	Kyung-Mi Kim and Gi-Dong Lee(Dong-A Univ., Korea)	
7-2	[Invited] Chiral Liquid Crystals in Photonic Device Applications -----	105
	Helen F. Gleeson, Hyung-Guen Yoon, and Nicholas W. Roberts(The Univ. of Machester, UK)	
7-3	Fabrication of a Microlens Array using a Birefringent Layer and Ferroelectric Liquid Crystal -----	109
	Yongmin Lee, Kwang-Ho Lee, Yoonseuk Choi, and Jae-Hoon Kim(Hanyang Univ., Korea)	

8. PDP Efficiency

8-1	[Invited] High Efficacy and High Speed Addressing of a Spatial Positive Column Discharge PDP -----	115
	T. Shiga and S. Mikoshiba(The Univ. of Electro-Communications, Japan)	
8-2	Luminous Efficacy of 12 lm/W in an AC PDP in Terms of Measurement of the Discharge in	

Table of Contents

Ne+20%Xe and Green Cells ----- 119
Sung-Min Lee, Kwan Hyun Cho, and Kyung Cheol Choi(KAIST, Korea)

8-3 High Luminous Efficacy AC-PDP with Long Discharge Gap and Grooved Dielectric Structure ----- 123
Dongwoo Lee, Kwnag Yeol Choi, Sung Chun Choi, Dong Gi Baek, Jong Rae Lim, Byung Nam Ahn, and Won Bae Park(LG Electronics Inc., Korea)

8-4 New Front Plate Structure of ac-PDP using Aluminum Fence-type Electrode Coated with Anodic Aluminum Oxide ----- 127
Mi-Yeon Lee, Snag-Hoon Yoon, and Yong-Seog Kim(Hongik Univ., Korea)

9. AMOLED TFT

9-1 [Invited] Novel Backplane for AM-OLED Device ----- 133
Myeon-Chang Sung, Ho-Nyun Lee, Chang Nam Kim, Sun Kil Kang, Do Youl Kim, Seong-Joong Kim, Sang Kyooung Kim, Sung-Kab Kim, Hong-Gyu Kim, and Sung-tae Kim(LG Electronics Inc., Korea)

9-2 [Invited] Ambipolar Light-emitting Organic Field-effect Transistor using a Wide-band-gap Blue-emitting Molecule ----- 137
Tomo Sakanoue, Masayuki Yahiro, and Chihaya Adachi(Kyushu Univ., Japan)

9-3 [Late News] 4 inch QVGA AMOLED display driven by GaInZnO TFT ----- 141
Jang Yeon Kwon, Kyoung Seok Son, Ji Sim Jung, Tae Sang Kim, Myung Kwan Ryu, Kyung Bae Park, Jung Woo Kim, Young Gu Lee, Young Soo Park and Sang Yoon Lee(SAIT, Korea)

9-4 4.1" Transparent QCIF AMOLED Display Driven by High Mobility Bottom Gate a-IGZO Thin-film Transistors ----- 145
J. K. Jeong, M. Kim, J. H. Jeong, H. J. Lee, T. K. Ahn, H. S. Shin, K. Y. Kang, H. Seo, J. S. Park, H. Yang, H. J. Chung, Y. G. Mo, and H. D. Kim(Samsung SDI Co., Ltd., Korea)

10. OTFT I

10-1 [Invited] Fabrication of An Organic Thin-Film Transistor Array by Wettability Patterning for Liquid Crystal Displays ----- 151
Sung-Jin Kim, Jin-Hyuk Bae(Seoul Nat'l Univ., Korea), Taek Ahn, Min Chul Suh, Seung Wook Chang, Yeon-Gon Mo, Ho-Kyoon Chung(Samsung SDI Co. Ltd., Korea), and Sin-Doo Lee(Seoul Nat'l Univ., Korea)

10-2 Fabrication of Flexible OTFT Array with Printed Electrodes by using Microcontact and Direct Printing Processes ----- 155
Jeongdae Jo, Taik-Min Lee, Dong-Soo Kim, Kwang-Young Kim(KIMM, Korea), Masayoshi Esashi(Tohoku Univ., Japan), and Eung-Sug Lee(KIMM, Korea)

10-3 Flexible OTFT-Backplane for Active Matrix Electrophoretic Display Panel ----- 159
Myung won Lee and Chung kun Song(Dong-A Univ., Korea)

11. OTFT Materials Technology

11-1 [Invited] Interfacial Engineering of Polymer Light Emitting Diode ----- 165
Show-An Chen(Nat'l Tsing Hua Univ., Taiwan)

11-2 [Invited] Vertical Type Organic Transistors and Flexible Display Applications ----- 168
Kazuhiro Kudo(Chiba Univ., Japan)

11-3 [Invited] Cruciform Thiophene-based Molecules as Organic Semiconductors for Field Effect Transistor Applications ----- 170
Dong Hoon Choi, Dae Chul Kim, Kyung Hwan Kim, Min Ju Cho, and Jung-Il Jin(Korea Univ., Korea)

11-4 Synthesis and Characterization of Novel Fused Aromatic Materials ----- 174
Jong-Won Park, Qing-Hua Zhao, Tae-Hoon Kim (Gyeongsang Nat'l Univ., Korea), Mi-Hye Yi (KRICT, Korea), Yun-Hi Kim, and Soon-Ki Kwon (Gyeongsang Nat'l Univ., Korea)

Table of Contents

12. Novel Manufacturing Technology

- 12-1 [Invited] Transparent Conductive Oxides for Displays Applications ----- 181
B. Szyszka, F. Ruske, V. Sittinger, A. Pflug, W. Werner, C. Jacobs, A. Kaiser, and S. Ulrich
(Fraunhofer Inst. for Surface Engineering and Thin Films IST, Germany)
- 12-2 Structure of Deposition Chamber using Belt Source Evaporation Techniques in AMOLED Manufacturing ----- 186
Chang Hun Hwang(OLEDON Co., Ltd., Korea)
- 12-3 Hyper Neutral Beam System for Damage Free Deposition of Indium-Tin Oxide Thin Films at Room Temperature ----- 190
Suk Jae Yoo, Daechul Kim, Jong Sik Kim, Kyoung Suk Oh, Bongju Lee(NFRC, Korea), Soung Woong Choi, Young Chun Park(Handong Global Univ., Korea), Jin-Nyoung Jang, and MunPyo Hong(Korea Univ., Korea)
- 12-4 [Invited] From Printing Graphics to Printing Electronics, The Digital Revolution in Display Manufacturing ----- 193
Eran Elizur(Kodak Graphic Communications Canada Company, Canada)

13. LC Materials and Flexible Displays

- 13-1 [Invited] Synthesis and Mesomorphic Properties of Banana-Shaped Mesogens with All-Ester Linking Group ----- 197
E-Joon Choi, Xin Cui(Kumoh Nat'l Inst. of Tech., Korea), Wang-Choel Zin, Chang-Woo Ohk(POSTECH, Korea), Tong-Kun Lim, Ji-Hoon Lee(Korea Univ., Korea), Young-Chul Kim, and Sang-Hyon Paek(Kyung Hee Univ., Korea)
- 13-2 Advanced LC Mixture Concept of Improved Response Time ----- 200
Markus Czanta, Kazuaki Tarumi(Merck KGaA, Germany), Seung-Eun Lee, Sang-Kyu Lee, and Min-Ok Jin(Merck Advanced Technologies Ltd., Korea)
- 13-3 [Invited] FLEXMatters: A Consortium for

Production of Flexible Devices ----- 203
John L. West(Kent State Univ., USA), Asad Khan (Kent Displays, USA)

- 13-4 Optically Compensated Bend Cell with Pixel-isolating Polymer Wall for a Flexible Display Application ----- 207
Seong Ryong Lee, Joong Ha Lee, Hong Jeek Jang, Jin Seok Jo, Tae-Hoon Yoon, and Jae Chang Kim (Pusan Nat'l Univ., Korea)

14. Protecting Layer

- 14-1 [Invited] Analysis of Materials for Protective Layers in AC PDPs ----- 213
Y. T. Matulevich, Min-Suk Lee, Suk-Ki Kim, Jong-Seo Choi, Dong-Sik Zang(Samsung SDI Co. Ltd., Korea), and Marco Kirm(Univ. of Tartu, Estonia)
- 14-2 [Invited] Effects of Aging Treatment of doped-MgO Layer on Discharge Characteristics of ac-PDP ----- 216
Kyung-Hyun Park, Min-Soo Ko, Sang-Hoon Yoon, and Yong-Seog Kim(Hongik Univ., Korea)
- 14-3 Optimization of MgO Secondary Electron Emission in Plasma Displays, by the Adoption of a Suitable Getter Configuration - Part I: MgO degradation studies ----- 220
Mauro Riva, Antonio Bonucci, Corrado Carretti(SAES Getters S.p.A., Italy), Yonggyu Han, and Eun-Ha Choi(Kwangwoon Univ., Korea)
- 14-4 Reconstruction Characteristics of MgO(111) Textured Protective Layer by Over-Frequency Accelerated Discharge in AC Plasma Display Pannel ----- 224
Sang-Koo Kwon, Jeong-Ho Kim, Seung-Kyu Moon(LG Electronics Inst. of Tech., Korea), Hyun-Ha Kim(LG Electronics Inc., Korea), Kyu-Ho Park, and Sung-Tae Kim(LG Electronics Inc., Korea)

15. White AMOLED

- 15-1 [Invited] Advances in White OLED Tandem

Table of Contents

	Architecture for Next Generation AMOLED Displays -----	231
	T. K. Hatwar, J. P. Spindler, J. R. Vargas, M. Helber, K. Klubek, W. Begley, M. Itoh, J. Hamer, and S. A. Van Slyke(Eastman kodak Company, USA)	
15-2	[Invited] Recent Advances In Small Molecule OLED Microdisplays -----	235
	Amalkumar P. Ghosh(eMagin Corp.k USA)	
15-3	[Invited] Highly Efficient, Long Living White PIN-OLEDs for AM Displays -----	239
	Sven Murano, Martin Vehse, Gufeng He, Jan Birnstock, and Michael Hofmann(NovaLED AG, Germany)	
15-4	[Late News] Optical Structure of White OLED for 100% Color Gamut -----	245
	Baek-woon Lee, YounIn Hwang, Sungtae Shin(Samsung Electronics Co. Ltd., Korea), and Young-gu Ju(Kyungpook Nat'l Univ., Korea)	

16. Si based TFT for Flexible Display

16-1	[Invited] Direct Fabrication of a-Si:H TFT Arrays on Flexible Substrates: Principal Manufacturing Challenges and Solutions -----	251
	Shawn M. O'Rourke, Douglas E. Loy, Curt Moyer, Scott K. Ageno, Barry P. O'Brien, Dirk Bottesch, Michael Marrs, Jeff Dailey, Edward J. Bawolek, Jovan Trujillo, Jann Kaminski, David R. Allee, Sameer M. Venugopal, Rita Cordova, Nick Colaneri and Gregory B. Raupp(Arizona State Univ., USA)	
16-2	[Invited] Large Size Plastic Display for Outdoor Application -----	255
	Nam-Seok Roh, Tae Hyung Hwang, Woojae Lee, Wang Su Hong, Sung Jin Kim, Sang Il Kim, and Peter Shin(Samsung Electronics Co., Ltd., Korea)	
16-3	A Substrate Bias Effect on the Stability of a-Si: H TFT Fabricated on a Flexible Metal Substrate -----	257
	Chang-Wook Han, Woo-Jin Nam, Chang-Dong Kim, Ki-Yong Kim, In Byeong Kang, In-Jae Chung(LG.Philips LCD Co., Ltd., Korea), and Min-Koo Han(Seoul Nat'l Univ., Korea)	

16-4	Polysilicon Thin Film Transistors on Spin-coated Polyimide Layer for Flexible Electronics ----	261
	A. Pecora, L. Maiolo, M. Cuscunà, D. Simeone, A. Minotti, L. Mariucci, and G. Fortunato(IFN-CNR, Italy)	

17. Materials for Flexible Display & BLU

17-1	[Invited] OTFT Materials Containing Fused Aromatics -----	267
	Jongwon Park, QingHua Zhao, Moon-Hak Park, Taehoon Kim, and Soon Ki Kwon(Gyeongsang Nat'l Univ., Korea)	
17-2	[Invited] Simultaneous Measurements of Drain-to-Source Current and Carrier Injection Properties of Organic Thin-Film Transistors --	271
	Yutaka Majima(Tokyo Inst. of Tech., Japan)	
17-3	Using Natural Graphite Heat Spreaders to Increase CCFL LCD Operating Temperatures --	273
	Julian Norley, Gary D. Shives, Brad Reis, and John Schober(GrafTech Intl. Ltd., USA)	
17-4	Field Emission-Back Light Unit Fabricated using Carbon Nanotube Emitter -----	277
	H. S. Kim, J. W. Lee, S. K. Lee, C. S. Lee, K. W. Jung, J. H. Lim, J. W. Moon, M. I. Hwang, I. H. Kim, Y. H. Kim, B. G. Lee, Y. C. Choi, H. R. Seon, S. J. Lee, and J. H. Park(Samsung SDI Co. Ltd., Korea)	

18. Display Measuring & Analysis System

18-1	Advanced Array Test Sensor -----	283
	Jong-Ho Lee, Tom Pye, and Pat Maxton(Photon Dynamics, USA)	
18-2	In-line Automatic Defect Inspection and Repair Method for TFT-LCD Production -----	286
	Hideyuki Honoki, T. Arai, T. Edamura, K. Yoshimura, and N. Nakasu(Hitachi Ltd., Japan)	
18-3	Twisted Nematic LC Modulator for TFT Array Inspection -----	290
	B. S. Bae(Hoseo Univ., Korea), D. H. Park, H. K. Lee,	

Table of Contents

S. E. Lee(Merck Advanced Technologies Ltd., Korea),
S. H. Kim, D. H. Jeong(LG Electronics Inc., Korea),
and B. G. Rho(Sesim Photonics Tech., Korea)

- 18-4 Improve the Gamma Variation by Monitoring the
Angle of the Polarizer Absorption Axis ----- 293
Chun-Wei Wu, Chiu-Jung Huang, Cheng-Chung Hu,
and Yao-Li Cheng(Chunghwa Picture Tubes,
Taiwan)

19. LC Technologies

- 19-1 [Invited] Surface modification method for
controlling liquid crystal alignment ----- 299
Hak-Rin Kim(Kyungpook Nat'l Univ., Korea),
June-Yong Song, Kwang-Soo Bae, and Jae-Hoon
Kim(Hanyang Univ., Korea)
- 19-2 [Invited] Carbon-Nanotube Doping in Liquid
Crystals of Display Interest ----- 303
Wei Lee and Hui-Yu Chen(Chung Yuan Christian
Univ., Taiwan)
- 19-3 [Invited] Lyotropic Chromonic Liquid Crystals:
Effects of Additives and Optical Applications --- 307
H. S. Park, L. Tortora, R. M. Vasyuta, A. B.
Golovin, E. Augustin, D. Finotello, and O. D.
Lavrentovich(Kent State Univ., USA.)

20. PDP Materials and Manufacturing Process

- 20-1 [Invited] Recent Advances with the 3M PDP High
Resolution Rib Replication Process ----- 313
P. McGuire(3M Company, USA), J. C. Cha, H.
Kikuchi, and A. Yoda(Sumitomo 3M Ltd., Japan)
- 20-2 High Precision Molding Process for
Barrier Ribs of PDP by using a Soft Mold and
a Green Sheet ----- 316
Seung-Min Ryu(KAIST, Korea), Lee Soon Park
(Kyungpook Nat'l Univ., Korea), and Dong-Yol
Yang(KAIST, Korea)
- 20-3 ICCD Observation on Discharge Characteristics
of 42-in. AC Plasma Display Panel Fabricated by

Vacuum Sealing Method ----- 320
Choon-Sang Park, Heung-Sik Tae(Kyungpook Nat'l
Univ., Korea), Young-Kuk Kwon, Eun Gi Heo, and
Byung-Hak Lee(Samsung SDI Co. Ltd., Korea)

21. OLED Process

- 21-1 [Invited] Scaleable, Cost Effective Display
Manufacturing Technology Based on
White OLED ----- 327
James R. Buntaine(Eastman Kodak Company, USA)
and G. Rajeswaran(Eastman Kodak Company &
Kodak Japan Ltd., Japan)
- 21-2 High Control Alkali & Alkaline-earth Metal
Sources for OLED Devices ----- 332
Antonio Bonucci, Johnny Mio Bertolo, Mauro Riva,
Corrado Carretti, Stefano Tominetti(SAES Getters
S.p.A., Italy), Sung Hyun Kim(Seoul Nat'l Univ.,
Korea), and Jun Yeob Lee(Dankook Univ., Korea)
- 21-3 Enhanced Control of OLED Deposition Processes
by OVPD[®] ----- 336
M. Schwambera, N. Meyer, D. Keiper, M. Heuken
(AIXTRON AG, Germany), S. Hartmann,
W. Kowalsky(TU Braunschweig, Germany),
A. Farahzadi, P. Niyamakom, M. Beigmohamadi, and
M. Wuttig(RWTH Aachen Univ. of Technology,
Germany)
- 21-4 Recent Advances in Performance of Solution
Processed Small Molecule OLEDs at DuPont
Displays ----- 340
Daniel D. LeCloux(Dupont Displays, USA)

22. E-paper/Flexible LCD

- 22-1 [Invited] Advances in Microencapsulated
Electrophoretic Displays ----- 347
Michael McCreary(E Ink Corp., USA)
- 22-2 [Invited] Active-matrix Flexible Display on
Plastic Substrate Fabricated by Glass Line -- 348
Cheng-Chung Lee, Yung-Hui Yeh, and Tzong-Ming
Lee(ITRI, Taiwan)

Table of Contents

- 22-3 New Structure of Rigid Spacers for Tight Bonding of Two Plastic Substrates in Plastic LCD ----- 352
 Hong Choi, Se-Jin Jang, Ji-Hong Bae, Yoon-Seuk Choi(Hanyang Univ., Korea), Sang-Il Kim, Sung-Sik Shin(Samsung Electronics Co. Ltd., Korea), and Jae-Hoon Kim(Hanyang Univ., Korea)
- 22-4 Writable Cholesteric Liquid Crystal Display and the Algorithm Used to Detect its Image ----- 356
 Da-Wei Lee, Jyh-Wen Shiu, Yi-An Sha, and Yu-Pei Chang(ITRI, Taiwan)

23. BLU Components & System Technology

- 23-1 [Invited] Intelligent Backlighting System for LCD TV ----- 363
 Jorge P. Sanchez(CEYX[®] Technologies, USA) and Sungkyoo Lim(Dankook Univ., Korea)
- 23-2 [Invited] Influence of Glass Tube Dielectrics on the New Generation of External Electrode Fluorescent Lamps ----- 367
 Guangsup Cho(Kwangwoon Univ., Korea)
- 23-3 High Brightness LED BLU for Large Size LCD TV
 Choi Yong-Seok, Yu Soon Jae, Kim Donsoo, Chung Cheon Kee, Lee Jeong Hyeon (ITSWELL Co., Ltd., Korea)

24. Film & Patterning Process Technology

- 24-1 [Invited] Through Flow Technology - Enabling Highly Reliable Inkjet Manufacturing of Flat Panel Displays ----- 373
 John Attard(Xaar Plc, UK)
- 24-2 Theoretical Investigation of Jetting and Wetting Phenomena for the Fabrication of TFT LCD Color Filters ----- 376
 Dong-Youn Shin(KIMM, Korea) and Kenneth A. Brakke(Susquehanna Univ., USA)
- 24-3 Color Filter Pattern Generation by Screen Printing ----- 380
 Yong-Jung Choi(Zeus Co. Ltd., Korea), Taik-Min

Lee(KIMM, Korea), Soo-Yong Nam(Pukyung Nat'l Univ., Korea), Yong-Sung Kim(KIMM, Korea), Dae-Yup Na(Pukyung Nat'l Univ., Korea), Choon-Woo You(ZeusCo. Ltd., Korea), Dong-Youn Shin, Kwangyoung Kim(KIMM, , Korea), Kwang-Il Jung(Zeus Co. Ltd., Korea)

25. LCD Mode

- 25-1 [Invited] Advanced-MVA(A-MVA) Mode for High Quality LC Displays ----- 387
 Yi-Pai Huang(Nat'l Chiao Tung Univ., Taiwan), Wei-Kai Huang, Cheng-Han Tsao, Jeng-Jia Su, Hong-Lung Hou, Pei-Chun Liao, Chung-Yi Chiu, and Chia-Yu Lee(AU Optonics Technology Center, Taiwan)
- 25-2 Viewing Angle Switching of Tristate Liquid Crystal Display ----- 391
 Chao Ping Chen(Pusan Nat'l Univ., Korea), Chul Gyu Jhun(Hoseo Univ., Korea), Tae-Hoon Yoon, and Jae Chang Kim(Pusan Nat'l Univ., Korea)
- 25-3 Pixel Design for Improving Transmittance in OCB LCD ----- 395
 K. C. Lee, Y. A. Sha, P. J. Su, C. H. Hsieh, K. H. Chang, C. C. Hsiao, S. Y. Fuh, W. Y. Cheng, Y. C. Liao, J. C. Yang, K. L. Lo, D. W. Lee, Y. P. Chang, and J. W. Shiu(ITRI, Taiwan)
- 25-4 Viewing Angle Switching of a Liquid Crystal Panel by using 3-terminal Electrode Structure ----- 399
 Yong-Hoan Kwon, Jong-In Baek, Jae Chang Kim, and Tae-Hoon Yoon(Pusan Nat'l Univ., Korea)
- 25-5 New S-PVA Technology for Advanced LCD Performance ----- 403
 Yoon Sung Um, Seung Beom Park, Hoon Kim, Hye Ran You, Jae jin Lyu, Kyeong-Hyeon Kim and Sang Soo Kim(Samsung Electronics Co., Ltd., Korea)

26. Display Electronics I

- 26-1 [Invited] Technology Trend and Requirement of Mobile Displays using Low-Temperature

Table of Contents

	Poly-Si(LTPS) Technologies -----	409
	Oh-Kyong Kwon(Hanyang Univ., Korea)	
26-2	Motion Blur Reduction based on Motion Compensation -----	413
	Jae-Hyeung Park, Yun-Jae Kim, Minkyu Park, Tadashi Amino, Jaeho Oh, Nam Deog Kim, and Sang Soo Kim(Samsung Electronics Co. Ltd., Korea)	
26-3	Design of Line Memory with Low-temperature Poly-silicon(LTPS) Thin-film Transistor(TFT) for System-on-Glass(SoG) -----	417
	Jinyong Choi, Kyungyoul Min, and Changsik Yoo(Hanyang Univ., Korea)	
26-4	PHUND(Portable Head Up Navigation Display) for a Motor Vehicle -----	421
	Sung Chul Shin, Sang Hoon Hahn, Yongseok Chi, Tae-Jeong Ahn, Hoyoung Choi, Tae Soo Park, and Sung Tae Kim(LG Electronics Inc., Korea)	

27. OLED Materials

27-1	[Invited] Full-Color Phosphorescent OLEDs: Maximizing Performance Today for Small-Area Portable Products and Tomorrow for TVs ---	427
	Julie J. Brown, Vadim. I. Adamovich, Bin Ma, Brian D'Andrade, Raymond C. Kwong, and Michael S. Weaver(Universal Display Corp., USA)	
27-2	[Invited] Development of P-OLED Materials for Displays and Lighting -----	431
	Scott Brown(Sumation Co. Ltd., UK), Michael Cass, Natasha Conway, Ilaria Grizzi, Mary McKiernan, Matthew Roberts(CDT Ltd., UK), Yoshiaki Tsubata, Chizu Sekine, Takeshi Yamada(Sumitomo Chemical Co. Ltd., Japan), and Richard Wilson(CDT Ltd., UK)	
27-3	Hole Transfer Layer P-doped with a Metal Oxide for Low Voltage Operation of OLEDs -----	435
	Won-Ju Shin, Je-Yun Lee, Jae-Chang Kim, Tae-Hoon Yoon(Pusan Nat'l Univ., Korea), Tae-Shick Kim, and Ok-Keun Song(Samsung SDI Co. Ltd., Korea)	
27-4	Synthesis and Characterization of Novel Blue Materials based on Anthracene Derivatives for	

	High Efficient OLED -----	439
	Qing Hua Zhao, Sung-Ouk Jung, Dong-Min Kang, Yun-Hi Kim, and Soon-Ki Kwon(Gyeongsang Nat'l Univ., Korea)	

28. Flexible Substrate and Passivation

28-1	[Invited] Flexible Ultra-high Gas Barrier Substrate for Organic Electronics -----	445
	Min Yan, Ahmet Gün Erhat, Ri-an Zhao, Brian Scherer, Cheryl Jones, David J. Smith, Paul A. McConnelee, Thomas Feist, and Anil Duggal(General Electric Global Research Center, USA)	
28-2	[Invited] Commercializing Flexible Substrates for Displays and Lighting – Challenges and Opportunities -----	447
	Mark Auch, Senthil Ramadas, and Chua Soo Jin (Inst. of Materials Research and Engineering, Singapore)	
28-3	The Impact of Thermal Stress, Mechanical Stress and Environment on Dimensional Reproducibility of Polyester Film during Flexible Electronics Processing -----	448
	William A. MacDonald, Robert Eveson, Duncan MacKerron, Raymond Adam, Keith Rollins, Robert Rustin, M. Kieran Looney, John Stewart, and Katsuyuki Hashimoto(DuPont Teijin Films, UK)	
28-4	Silicon Carbide Barrier Technology to Enable Flexible OLED Displays -----	452
	Sang-Jin Kim, Ludmil Zambov, Ken Weidner, Vasgen Shamamian, and Glenn Cerny(Dow Corning Corp., USA)	

29. New Materials and Processing Technology for FPD

29-1	[Invited] Joule-Heating Induced Crystallization (JIC) of Amorphous Silicon Films -----	459
	Won-Eui Hong(Hongik Univ., Korea), Joo-Yeol Lee(EnSilTech Corp., Korea), Bo-Kyung Kim, and Jae-Sang Ro(Hongik Univ., Korea)	

Table of Contents

29-2	Ink-Jet Printing Technology for Color Filter -- 463 Zih-Jie Jian, Wei-Jen Liou, Hong-Ming Lin(Tatung Univ., Taiwan), Yu-Cheng Lo, Pei-Yu Liu, Jiun-Ming Wang, and Huai-An Li(Chunghwa Picture Tubes, Ltd., Taiwan)
29-3	Ultrafine ITO Nanoparticle for Ink Jet Printing ----- 467 Sung-Jei Hong, Yong-Hoon Kim, and Jeong-In Han(KETI, Korea)
29-4	High Extraction Efficiency of Photonic Crystal Microcavity GaN based Light Emitting Diode -- 471 Minsu Cho, Kiwon Moon, Haewook Han(Pohang Univ. of Science and Technology, Korea), Jisu Yoon, ByoungKoan Jeong, Jong Keun Shin, and Injae Chung(LG. Phillips LCD Co., Ltd., Korea)

30. Driving Methods & System

30-1	[Invited] Field Emission Display with Design Elements for Control of Uniformity, Color Purity, Luminance, and Invisible Spacers ----- 475 Emmett M. Howard, Bernard F. Coll, Ken A. Dean, Michael R. Johnson, Scott V. Johnson, James E. Jaskie, and Hao Li(Motorola Inc., USA)
30-2	A Study on Phosphor Activation and Persistence for High Performance Driving 20" Carbon Nanotube Backlight Units ----- 479 Chiao-Nan Huang, Chao-Chiun Liang(ITRI, Taiwan), Shang-Ying Chung, Ching-Ming Lai(Nat'l Tsing Hua Univ. China), Biing-Nan Lin, Yau-Chen Jiang, Cheng-Chung Lee(ITRI, Taiwan), and Ching-Tsai Pan(Nat'l Tsing Hua Univ., China)
30-3	[Invited] Fabrication and Driving of Active-Matrix Field Emission Display ----- 483 Yoon-Ho Song, Jin-Woo Jeong, Dae-Jun Kim, Juntae Kang, and Kyoung-Ik Cho(ETRI, Korea)
30-4	Effect of Liquid Surface Treatments on Field Emission Properties of Carbon Nanotube Cathodes ----- 486 Ji-Eon Lee, Young-Je An, Heon-Cheol Shin, Won-Sub Chung, and Young-Rae Cho(Pusan Nat'l Univ., Korea)

Poster Session I

P1-1	Thermal Reaction of Cinnamate Oligomers and their Effect on the Orientational Stability of Liquid Crystals ----- 493 Hyundae Hah, Shi-Joon Sung, and Jung-Ki Park(KAIST, Korea)
P1-2	Homeotropic Liquid Crystal Cell without Vertical Alignment Layers ----- 496 Shie-Chang Jeng, Hsing-Lung Wang, Chia-Wei Kuo, Yan-Rung Lin, and Chi-Chang Liao(ITRI, Taiwan)
P1-3	Vertical Alignment Nematic Liquid Crystal Display with Patterned Electrode using Positive Liquid Crystal Materials ----- 499 Hun Ki Shin, Tae-Hoon Yoon, and Jae Chang Kim(Pusan Nat'l Univ., Korea)
P1-4	An Improved Electrode Structure of the Patterned Vertical Alignment Liquid Crystal Cell for High Optical Property ----- 502 Yong-Hyun Choi, Jung-Hee Son, Jin-Seok Yang, Seung-Hoon Ji, and Gi-Dong Lee(Dong-A Univ., Korea)
P1-5	Liquid Crystal Alignment on the Inkjet Printed Polyimide by using New Alignment Method -- 506 J. Y. Hwang, H. Wonderly, and L. C. Chien(Kent State Univ., USA)
P1-6	Implementation of Q-Tensor Model into 3-D Finite Element Method(FEM) Numerical Solver ----- 509 Woo-Jung Shin(Inha Univ., Korea), Hyung-Jin Yoon(Sanayi System Co., Ltd., Korea), and Taeyoung Won(Inha Univ., Korea)
P1-7	The Optimization of New Alignment Films in the TNLC for Low Image-sticking ----- 513 Jong Hyun Lee(Samsung Electronics Co.,Ltd., Korea), Junsin Yi(Sungkyunkwan Univ., Korea), Hwan Kyung Jung, Seung Guk Lee, Hyohak Nam, Yoojoung Nam, and Sungwoo Choi(Samsung Electronics Co., Ltd., Korea)
P1-8	Comparative Study on Tensor and Vector Approaches for 3D-FEM Numerical Simulator ----- 517

Table of Contents

<p>Sang Young Cho, Seung Soo Yang(Inha Univ., Korea), Hyoung Jin Yoon(Sanayi System Co., Ltd. Korea), and Tae Young Won(Inha Univ., Korea)</p> <p>P1-9 Investigation on the Flicker for the Optimal Design of LCD Panel ----- 520 Jung-Bok Lee and Taeyoung Won(Inha Univ., Korea)</p> <p>P1-10 The Injection of PDLC Solution Mixture in a Reduced Pressure ----- 524 Kang-Pil Kim, Kee-Jeong Yang, Dae-Hwan. Kim, and Byeong-Dae Choi(DGIST, Korea)</p> <p>P1-11 Film Compensation based on Discotic Film in Fringe Field Switching Mode ----- 527 Seong Han Hwang, Byoung Sun Jung, Seong Su Kim, Seung Hee Lee(Chonbuk Nat'l Univ., Korea), and Gi-Dong Lee(Dong-A Univ., Korea)</p> <p>P1-12 Accurate Measurement of Twist Angle for Analysis of Azimuthal Anchoring Energy and Rubbing Direction of LC Panels of IPS Mode ----- 531 S. H. Baek, B. G. Rho(Sesim Photonics Tech. Co., Ltd., Korea), J. M. Oh, W. S. Dong(Jeil Textile Co., Ltd., Korea), B. K. Yang, and J. S. Kim(Chonbuk Nat'l Univ., Korea)</p> <p>P1-13 Advanced Nanoimprinting Material for Liquid Crystal Alignment ----- 534 Jin Seog Gwag, Masahito Oh-e, Makoto Yoneya, Hiroshi Yokoyama(Japan Science and Technology Agency, Japan), H. Satou, and S. Itami(Chisso Petrochemical Corp., Japan)</p> <p>P1-14 Lateral Field Effects on the Horizontal Switching of the Bistable Chiral Splay Nematic Device - 538 Chul Gyu Jhun, Yi-Jun Kim, Kwan-Sik Min, Sugn Sik Shin(Hoseo Univ., Korea), Jae Chang Kim(Pusan Nat'l Univ., Korea), and Soon-Bum Kwon(Hoseo Univ. Korea)</p> <p>P1-15 Synthesis and Properties of Liquid Crystalline Y-shaped Molecules Containing 1,3,4-Oxadiazole ----- 542 Eun-Kyoung Kwon and E-Joon Choi(Kumoh Nat'l Inst. of Technology, Korea)</p> <p>P1-16 Viewing Angle Switching of Fringe-Field</p>	<p>Switching(FFS) Liquid Crystal Display by Optimizing Pixel Structure ----- 545 Eun Jeong, Mi Hyung Chin, Youn Sik Kim, Young Jin Lim, Myong-Hoon Lee, and Seung Hee Lee(Chonbuk Nat'l Univ., Korea)</p> <p>P1-17 Optimized Electrode Design to Improve Transmittance in the Patterned Vertical Alignment Liquid Crystal Display ----- 549 Seong Jin Hwang, Youn Sik Kim, Seung Hee Lee(Chonbuk Nat'l Univ., Korea), Jae-Jin Lyu, and Kyeong-Hyeon Kim(Samsung Electronics Co., Ltd., Korea)</p> <p>P1-18 Synthesis and Characterization of New Azomethine Polymers Containing Bent-Core Mesogen with Sharp Bend Angle ----- 553 Eun Chol Kim, E-Joon Choi(Kumoh Nat'l Inst. of Technology, Korea), Chang-Woo Ok, and Wang-Choel Zin(Pohang Univ. of Science and Technology, Korea)</p> <p>P1-19 Electro-optic Characteristics of Carbon Nanotube-doped Liquid Crystal Cell Driven by In-plane Switching and Fringe-field Switching ----- 556 Seung Hwan Shin, Seok Jin Jeong, Eun Mi Jo, Seung Hee Lee(Chonbuk Nat'l Univ., Korea), Hoon Kang, Kyeong-Jin Kim, In-Su Baik(LG.Philips LCD Co., Ltd., Korea), Seok Ho Jeong, Young Hee Lee (Sungkyunkwan Univ., Korea), Hee Kyu Lee, and Seung Eun Lee(Merck Advanced Technologies, Ltd., Korea)</p> <p>P1-20 Light Efficiency of Fringe-field Switching Nematic Liquid Crystal Cell Depending on Dielectric Anisotropy Value of a Liquid Crystal ----- 560 Je Woo Ryu, Ji Youn Lee, Ji Woong Park, Seung Hee Lee(Chonbuk Nat'l Univ., Korea), and Gi-Dong Lee(Dong-A Univ., Korea)</p> <p>P1-21 Positive Type Photoresist for Patterning of Interdielectric Layer of TFT Array ----- 564 Hyo-Jung Lee, Hyo-Jin Kim, Soon Hak Kim, Lee Soon Park, Yun Su Lee, Gab Deuk Song(Kyungpook Nat'l Univ. , Korea)</p> <p>P1-22 Experimental and Numerical Study on Anisotropic Phase Separation of</p>
--	--

Table of Contents

<p>Liquid Crystal and Polymer Composites as Cell Gap Variation ----- 567 Min Young Jin(Image Lab Corp., Korea), Ji-Hong Bae, and Jae-Hoon Kim(Hanyang Univ. Korea)</p>	<p>Univ., Korea), Min Hur, Soo-Ho Park, Minson Yoo, and Eun Gi Heo(Samsung SDI Co., Ltd., Korea)</p>
<p>P1-23 The Study of the Charge Transport on the Surface Layer of the Patterned Vertical Alignment(PVA) Mode ----- 571 Nakcho Choi(Samsung Electronics Co., Ltd, Korea), Jaeyong You, Jiyoung Jung, Kungwon Rhie(Korea Univ., Korea), and Sungtae Shin(Samsung Electronics Co., Ltd., Korea)</p>	<p>P1-31 Wall Voltage Transfer Characteristics according to Address Bias Voltage ----- 601 Y. M. Lee and D.C. Jeong(Hoseo Univ., Korea)</p>
<p>P1-24 Spatiotemporal Behavior of Excited Xe Atoms Density in Counter Discharged Type AC-PDP -- 574 Young June Hong, Phil Yong Oh, Se hoon Jeong, Jong Hwa Hong, Jung Hyun Kim, Yong Gyu Han, Seok Ho Cho, Sung Hee Hong, Byoung Hee Hong, and Eun Ha Choi(Kwangwoon Univ.,Korea)</p>	<p>P1-32 Effect of Auxiliary Address Pulse on Face-to-face Sustain Electrode Structure in AC-PDP ----- 605 Bo-Sung Kim and Heung-Sik Tae(Kyungpook Nat'l Univ., Korea)</p>
<p>P1-25 Characteristics of Microplasma Modes in a Plasma Display with an Auxiliary Electrode -- 578 Seung Hun Kim, Jeong Hun Mun, and Kyung Cheol Choi(KAIST, Korea)</p>	<p>P1-33 Load Current Prediction Method for a DC-DC Converter in Plasma Display Panel ----- 609 S. Y. Chae, B. C. Hyun, W. S. Kim, and B. H. Cho (Seoul Nat'l Univ., Korea)</p>
<p>P1-26 Studies about Visible Light Distribution in PDP Cells with 3-dimesional Optical Code ----- 582 Chulwhan Eom and Jungwon Kang(Dankook Univ., Korea)</p>	<p>P1-34 Relationship between Image Retention and Time Lag in an AC PDP ----- 613 Yun Seon Do, Cheol Jang, and Kyung Cheol Choi(KAIST, Korea)</p>
<p>P1-27 Effect of Self-Erase Discharge on the Luminous Efficacy of Long Gap AC PDPs ----- 585 Tae Jun Kim, Jae Chul Jung, Hae-Yoon Jung, and Ki-Woong Whang(Seoul Nat'l Univ., Korea)</p>	<p>P1-35 Experimental Observation of Temporal Dark Image Sticking in AC PDP with Face-to-Face Sustain Electrode Structure ----- 617 Jae Hyun Kim, Choon-Sang Park, Bo-Sung Kim, Ki-Hyung Park, and Heung-Sik Tae(Kyungpook Nat'l Univ., Korea)</p>
<p>P1-28 IBS Electrode Structure for Enhanced Performance in ac PDP ----- 589 Seung Hee Yang, Jae Seung Moon, Kwang Nyun Kim, and Cheol Hee Moon(Hoseo Univ., Korea)</p>	<p>P1-36 Synthesis and Electroluminescent Properties of Fluoranthene Derivatives ----- 621 Soo-Kang Kim and Jong-Wook Park(The Catholic Univ. of Korea, Korea)</p>
<p>P1-29 Bendable ac-PDP using Fence-Structured Electrodes on Polyethylene Terephthalate Substrate ----- 593 Won-Yeol Choi, Cho Rong Hong, and Yong-Seog Kim(Hongik Univ., Korea)</p>	<p>P1-37 High Efficiency and Long Lifetime for Organic Light-Emitting Diode using New Electron Transport Materials ----- 625 Tsuyoshi Tanaka, Masaru Sato(Tosoh Co., Ltd.,Korea), Hidenori Aihara, Naoko Yanai, and Tetsu Yamakawa(Sagami Chemical Research Center, Japan)</p>
<p>P1-30 Observation and Analysis of Address and Sustain Discharges and Related Wall Voltage Characteristics in AC-PDP ----- 597 Hyung Dal Park, Heung-Sik Tae(Kyungpook Nat'l</p>	<p>P1-38 New Green Fluorescent Materials for OLEDs -- 628 Chil-Won Lee, Eun-Jung Lee, Joon-Woo Kim, Jong-Hyeok Yun(Daejoo Electronic Materials Co. Ltd., Korea), Jun-Yeob Lee, and Myoung-Seon Gong(Dankook Univ., Korea)</p>
	<p>P1-39 Effects of ITO Surface Modification using Self-assembly Molecules on the Characteristics</p>

Table of Contents

<p>of OLEDs ----- 632 Se Young Oh and Dong Hwi Kim(Sogang Univ., Korea)</p>	<p>P1-47 Highly Efficient Red Phosphorescent OLEDs Employing a Multifunctional Oligofluorene Host ----- 663 Ming-Han Tsai, Hai-Ching Su, Chung-Chih Wu, Ken-Tsung Wong(Nat'l Taiwan Univ., Taiwan), and Wen-Ren Li(Nat'l Central Univ., Taiwan)</p>
<p>P1-40 Novel Bipolar Host Materials for Phosphorescent OLEDs ----- 636 Eun-Sun Yu, Nam-Soo Kim, Young-Hoon Kim, Mi-Young Chae, and Tu-Won Chang(Cheil Industries Inc., Korea)</p>	<p>P1-48 Highly Efficient Light-Emitting PPV Derivatives Containing Polyhedral Oligomeric Silsesquioxanes(POSSs) ----- 667 Jong-Min Kang(Kumoh Nat'l Inst. of Technology, Korea), Hoon-Je Cho(KAIST, Korea), Jae-Hoon Eom(Kumoh Nat'l Inst. of Technology, Korea), Jeong-Ik Lee(ETRI, Korea), Sang-Kyu Lee, Jonghee Lee, Nam-Sung Cho, Hong-Ku Shim(KAIST, Korea), and Do-Hoon Hwang(Kumoh Nat'l Inst. of Technology, Korea)</p>
<p>P1-41 The Effect of Plasma Damage on Electrical Properties of Amorphous GaInZnO Film ----- 640 Minkyu Kim, Jin-Seong Park, Jae Kyeong Jeong, Jong Han Jeong, Tae Kyung Ahn, Huiwon Yang, Hun Jung Lee, Hyun-Joong Chung, Yeon-Gon Mo, and Hye Dong Kim(Samsung SDI Co., Ltd, Korea)</p>	<p>P1-49 Characteristics of a Conducting Polymer Anode for Flexible OLED using Screen Printing Method ----- 671 Jin Woo Huh, Young Min Kim, Young Wook Park, Jin Hwan Choi(Korea Univ., Korea), Jong Woo Lee(DPI Solutions, Inc., Korea), Jae Woong Yang, Sung Hoo Ju, Kyeong Kap Paek(Daejin Univ., Korea), and Byeong Kwon Ju(Korea Univ., Korea)</p>
<p>P1-42 Effect of Thermal Heat Treatment on the Characteristics of Vertical Type Organic Thin Film Transistor using Alq₃ as Active Layer and Its Application for OLET ----- 644 Se Young Oh, Young Do Kim, and Sun Kak Hwang(Sogang Univ., Korea)</p>	<p>P1-50 Efficiency Enhancement of Organic Light Emitting Diodes by the Aluminum Oxynitride Buffer Layer ----- 675 Hyungjun Park, Kyungsoo Jang, Sungwook Jung, Sunghyun Hwang, Jeoungin Lee, Kwangsoo Lee, Keunhee Park, Eunkyong Nam, Donggeun Jung, and Junsin Yi(Sungkyunkwan Univ., Korea)</p>
<p>P1-43 Study of White Polymer Electrophosphorescent Light-emitting Diode with Heteroleptic Ir-Complex ----- 648 Jaywoo Lee and Eugene Kim(Hongik Univ., Korea)</p>	<p>P1-51 Low Voltage Organic Light-emitting Devices with New Electron Transport Layer ----- 679 Mi-Young Ha, So-Youn Kim, and Dae-Gyu Moon(Soonchunhyang Univ., Korea)</p>
<p>P1-44 Synthesis and Electro-optic Properties of Anthracene Derivatives for Blue Emitting OLED Devices ----- 651 Eun Jung Park, Eon Joo Lyu, Lee Soon Park, Soon Hak Kim, Giseop Kwak, and Yun Su Lee(Kyungpook Nat'l Univ., Korea)</p>	<p>P1-52 Transparent Organic Light-emitting Devices with CsCl Passivation Layer ----- 683 So-Youn Kim, Chan-jae Lee(Soonchunhyang Univ., Korea), Mi-Young Ha, Dae-gyu Moon(KETI, Korea), and Jeong-In Han(Soonchunhyang Univ., Korea)</p>
<p>P1-45 Characteristics of Directly Sputtered Al Cathode Film using Twin Target Sputtering System for OLEDs ----- 655 Jong-Min Moon(Kumoh Nat'l Inst. of Technology, Korea), Sang-Hyeon Lee(Top Engineering, Korea), and Han-Ki Kim(Kumoh Nat'l Inst. of Technology, Korea)</p>	<p>P1-53 Emission Characteristics of Green OLED with Hole Transport Material ----- 687 Xinwei Gao, Jong Yek Park, Yong Gu Baek(ELM</p>
<p>P1-46 Passivation of Organic Light Emitting Diodes with a-SiN_x Thin Films Grown by Catalyzer Enhanced Chemical Vapor Deposition ----- 659 Jin-A Jeong(Kumoh Nat'l Inst. of Technology, Korea), Jae-Wook Kang(Seoul Nat'l Univ., Korea), and Han-Ki Kim(Kumoh Nat'l Inst. of Technology, Korea)</p>	

Table of Contents

<p>Co. Ltd., Korea), Sung Hoo Ju, Jae Woong Yang, Bong Sub Lee, Jung Taek Kim, and Kyeong Kap Paek(Daejin Univ., Korea)</p> <p>P1-54 Electrical Properties of the Molybdenum Oxide Doped Hole Transport Layer ----- 691 Jin-Young Yun, Changhee Lee, Won Jun Song, and Yeun Joo Sung(Seoul Nat'l Univ., Korea)</p> <p>P1-55 Highly Efficient Phosphorescent Polymer OLEDs Fabricated by Screen Printing ----- 694 D. H. Lee, J. S. Choi, and S. M. Cho(Sungkyunkwan Univ., Korea)</p> <p>P1-56 The Triple Layer Anode for Flexible Top Emission Organic Light-emitting Devices ---- 698 Sung Mook Chung, Chi-sun Hwang, Jeong-Ik Lee, Sang Hee Ko Park, Yong Suk Yang, Lee-Mi Do, and Hye Yong Chu(ETRI, Korea)</p> <p>P1-57 Synthesis and Characterization of Heteroleptic Iridium Complex with Phenylpyridine and 5'-methyl-diphenylquinoline ----- 702 Seung-chan Lee and Young Sik Kim(Hongik Univ., Korea)</p> <p>P1-58 Study on the Touch Screen Panel Based on the Light over Electro Phoretic Display ----- 706 Uk Chul Choi, Ho Young Jung, Cheol Woo Park, and Sung Jin Hong(Samsung Electronics Co. Ltd., Korea)</p> <p>P1-59 Bending Effect of Flexible Liquid Crystal Display ----- 710 Yan-Rung Lin, Shie-Chang Jeng, Chia-Wei Kuo, Chi-Chang Liao(ITRI, Taiwan), Cheng-Chung Chen, and Joe-Tsong Shy(Nat'l Tsing Hua Univ., Taiwan)</p> <p>P1-60 Flexible EL Display Printed on a Paper ----- 713 Taik-Min Lee, Dong-Youn Shin, Yong-Sung Kim, Chung Hwan Kim, Jeongdai Jo, Byung-Oh Choi, and Dong-Soo Kim(KIMM, Korea)</p> <p>P1-61 3.5 Inch QCIF AMOLED Panel with Ultra Low Temperature Polycrystalline Silicon Thin Film Transistor on Plastic Substrate ----- 717 Yong-Hae Kim, Choong-Heui Chung, Jaehyun Moon, Dong-Jin Park, Su-Jae Lee, Gi Heon Kim, and Yoon-Ho Song(ETRI, Korea)</p>	<p>P1-62 Printable Low Work Function Cathode for OLED Devices ----- 721 Tiina Maaninen, Markus Tuomikoski, and Arto Maaninen(VTT, Finland)</p> <p>P1-63 Influence an Oxide Layer Thickness on Resistivity of Cu Conductive Film and Ink-jet Printing of Cu Nanoparticle Ink ----- 724 Sunho Jeong, Kyoohye Woo, Dongjo Kim(Yonsei Univ., Korea), Soonkwon Lim, Jang Sub Kim(Samsung Electronics Co. Ltd., Korea), and Jooho Moon(Yonsei Univ., Korea)</p> <p>P1-64 Gate Dielectric based on Organic-inorganic Hybrid Polymer in Organic Thin-film Transistors ----- 727 Seong Hui Lee, Sunho Jeong, and Jooho Moon (Yonsei Univ., Korea)</p> <p>P1-65 Investigation of Charge Injection in Organic Thin Film Transistor using Ink-jet Printed Silver Electrodes ----- 730 Dongjo Kim, Sunho Jeong, Sul Lee, Daehwan Jang, and Jooho Moon(Yonsei Univ., Korea)</p> <p>P1-66 Substrate Bonding Technique using the Agar-epoxy Composites for Flexible LCD ---- 733 Ji-Hong Bae, Se-Jin Jang, Hong Choi(Hanyang Univ., Korea), Sang-Il Kim(Samsung Electronics Co. Ltd., Korea), and Jae-Hoon Kim(Hanyang Univ., Korea)</p> <p>P1-67 The Effects of Hydrophobic Buffer Layer Without Losing Dielectric Property on Organic Transistors ----- 737 June-Yong Song, Jae-Il Jung, Yoonseuk Choi(Hanyang Univ., Korea), Hak-Rin Kim (Kyungpook Nat'l Univ., Korea), and Jae-Hoon Kim (Hanyang Univ., Korea)</p> <p>P1-68 Double Hole Transport Layers Deposited by Spin-coating and Thermal-evaporating for Flexible Organic Light Emitting Diodes ----- 741 Shin Liang Chen, Shun Hsi Wang, Fuh Shyang Juang, and Yu Sheng Tsai(Nat'l Formosa Univ., Taiwan)</p> <p>P1-69 The Thermal Annealing Effect on Electrical Performances of a-Si: H TFT Fabricated on a Metal Foil Substrate ----- 745</p>
---	--

Table of Contents

<p>Chang-Wook Han, Woo-Jin Nam, Chang-Dong Kim, Ki-Yong Kim, In Byeong Kang, In-Jae Chung(LG.Philips LCD Co. Ltd., Korea), and Min-Koo Han(Seoul Nat'l Univ., Korea)</p> <p>P1-70 Formation of Buffer Layer on Mica for Application to Flexible Thin Film Transistors ----- 749 Joon Seok Oh, Seung Ryul Lee(KAIST, Korea), Jin Ho Lee(ETRI, Korea), and Byung Tae Ahn(KAIST, Korea)</p> <p>P1-71 The Analysis of the Characteristics According to Polymer Concentration for Polymer Light Emitting Diode Fabricated on Flexible Substrates ----- 752 Woo Jin Cho, Su Hwan Kim, Byoung Ho Kang, Do Eok Kim, and Shin Won Kang(Kyungpook Nat'l Univ., Korea)</p> <p>P1-72 Organic TFT Fabricated on Ultra-thin Flexible Plastic with a Rigid Glass Support ----- 756 Young Rae Son, Seung Hoon Han, Sun Hee Lee, Ki Jung Lee, Min Hee Choi, Dong Joon Choo, and Jin Jang(Kyung Hee Univ., Korea)</p> <p>P1-73 Effect of Fe Catalyst on Growth of Carbon Nanotubes by Thermal CVD ----- 760 Seung-il Yoon, Sung-Taek Heo, Sam-Soo Kim, Yang-Kyu Lee, and Dong-Gu Lee(Kumoh Nat'l Inst. of Technology, Korea)</p> <p>P1-74 Electron Field Emission for a Cylindrical Emitter of Single Carbon Nanotube ----- 764 Youn-Ju Lee, Chang-Duk Kim, and Hyeong-Rag Lee(Kyungpook Nat'l Univ., Korea)</p> <p>P1-75 Synthesis of Carbon Nanotubes by using Inductively Coupled Plasma Chemical Vapor Deposition at Low Temperature ----- 768 Young Rae Kim, Ingoo Jang, Hyun Jin Cho, Hong Jun Jeon(Sejong Univ., Korea), Jung Keun Cho, Hosoo Hwang, Byung Yun Kong(System Engineering Mega Solution, Korea), and Naesung Lee(Sejong Univ., Korea)</p> <p>P1-76 Improvement Field Emission Uniformity in Carbon Nanotube Composite using Zinc Nano-Fillers ----- 772 Sungyun Jeon, Jae-Hong Park, Jong-Hak Lee, Jun-Ho Shin, Sung-min Park, Alegaonkar Prashant,</p>	<p>and Ji-Beom Yoo(Sungkyunkwan Univ., Korea)</p> <p>P1-77 Field Emission Properties of Expanded Graphite Composite ----- 775 P. S. Alegaonkar, J. H. Park, S. Y. Jeon, J. H. Shin, A. S. Berdinsky, and J. B. Yoo(Sungkyunkwan Univ., Korea)</p> <p>P1-78 Dispersion of Carbon Nanotube in Polymer Composite and Their Field Emission Superiority ----- 778 J. H. Park, S. Y. Jeon, P. S. Alegonkar, and J. B. Yoo(Sungkyunkwan Univ., Korea)</p> <p>P1-79 Effect of Current-Aging on Field Emission from Carbon Nanotube Field Emitter Arrays ----- 782 Ki Seo Kim, Je Hwang Ryu, Chang Seok Lee, S. Manivannan, Jong Hyun Moon, Jung Sun Ahn, Jin Jang, and Kyu Chang Park(Kyung Hee Univ., Korea)</p> <p>P1-80 Field Emission Characteristics of Dot-patterned Photosensitive CNT Paste ----- 786 Jinhee Kim, Hansung Lee, Jihyeon Jeon, Jeung Choon Goak, and Naesung Lee(Sejong Univ., Korea)</p> <p>P1-81 Synthesis of Thin Multiwalled Carbon Nanotubes for Field Emission by Optimizing Gas Compositions in Thermal Chemical Vapor Deposition ----- 790 Hong Jun Jeon, Hyun Jin Cho, Young Rae Kim, and Naesung Lee(Sejong Univ., Korea)</p> <p>P1-82 Adaptive Contrast Ratio Enhancement Algorithm for Mobile LCD ----- 794 Seung-rok Shin, Hyun-ha Hwang(Hanyang Univ., Korea), Byung-sung Bae(Hoseo Univ., Korea), and Sung-ho Kim(LG Innotek Co. Ltd., Korea)</p> <p>P1-83 Design Considerations on Partition of SOP, CMOS and PCB Technologies for Mobile Display System Implementation ----- 798 Seung Yong Lee and Jae Hee You(Hongik Univ., Korea)</p> <p>P1-84 Hardware Architecture of a Wavelet based Multiple Line Addressing Driving System for Passive Matrix Displays ----- 802 San Lam and Herbert De Smet(Ghent Univ., Belgium)</p>
--	---

Table of Contents

<p>P1-85 High Speed Parallel Fault Detection Design for SRAM on Display Panel ----- 806 Kyu Ho Jeong and Jae Hee You(Hongik Univ., Korea)</p> <p>P1-86 An Efficient Frame Rate Up-conversion Method with Adaptive Motion Estimation and Compensation for Mobile Projection Displays ----- 810 Jong Ok Lee, Seul Ki Jang, Qiao Song Chen, and Choon-Woo Kim(Inha Univ., Korea)</p> <p>P1-87 A Hybrid Hardware Architecture for LCD Overdrive Frame Buffer Reduction ----- 814 Jiyong Choi, Ansun Jeong, and Jungeun Baek(Dawin Technology Inc., Korea)</p> <p>P1-88 Novel Impulsive Driving Schemes for 120Hz LCD Panels ----- 818 Hyoungsik Nam, Jacho Oh, Byung Hyuk Shin, Kwan Young Oh, Brian H. Berkeley, Nam Deog Kim, and Sang Soo Kim(Samsung Electronics Co. Ltd., Korea)</p> <p>P1-89 Design of Integrated a-Si:H Gate Driver Circuit with Low Noise for Mobile TFT-LCD ----- 822 Yong-hui Lee, Yong-ju Park, Jin-oh Kwag, Hyung-guel Kim(Samsung Electronics Co. Ltd., Korea), and Junsin Yi(Sungkyunkwan Univ., Korea)</p> <p>P1-90 Response Time Compensation of LCD with Integrated Thermal Sensor ----- 825 Ki-Chan Lee, Yun-Jae Park, Ik-Hyun Ahn, Kyung-Uk Choi, and Seung-Hwan Moon(Samsung Electronics Co. Ltd., Korea)</p> <p>P1-91 A High-Speed and High-Accurate Common Source Type Analog Buffer Circuit using LTPS TFTs for TFT-LCDs ----- 829 Hyun-Wook Kim, Chun-Won Byun, and Oh-Kyong Kwon(Hanyang Univ., Korea)</p> <p>P1-92 Low Power and Small Area Source Driver using Low Temperature Poly-Si(LTPS) Thin Film Transistors(TFTs) for Mobile Displays ----- 833 Sueng-Kyun Hong, Chun-Won Byun, Joong-Sun Yoon, and Oh-Kyong Kwon(Hanyang Univ., Korea)</p> <p>P1-93 A Novel Digital Driving Method for AM-OLED -- 837 Seung-Woo Lee, Jae Won Choi, Jin Jang(Kyung Hee</p>	<p>Univ., Korea), and Hoon-Ju Chung(Kumoh Nat'l Inst. of Technology, Korea)</p> <p>P1-94 The Research on Vertical Block Mura in TFT-LCD ----- 841 Chunping Long, Wei Wang, and Hongjiang Wu(Beijing BOE Optoelectronics Technology Co. Ltd., China)</p> <p>P1-95 Study of Point Defects Caused by a Thin Contamination Layer in a-Si TFT-LCD ----- 845 Jae Young Oh, Jae Kyun Lee, Mounq Su Yang, and In Byeong Kang(LG. Philips LCD Co. Ltd., Korea)</p> <p>P1-96 High Performance Thin Film Transistor with ZnO Channel Layer Deposited by DC Magnetron Sputtering ----- 849 Yeon-Keon Moon, Dae-Yong Moon, Sang-Ho Lee, Ki-Hoon Park(Hanyang Univ., Korea), Chang-Oh Jeong(Samsung Electronics Co. Ltd., Korea), and Jong-Wan Park(Hanyang Univ., Korea)</p> <p>P1-97 New Cellulose-Based Photopolymer with High Thermal and UV Stability ----- 853 Han-Dong Cho(Hoseo Univ., Korea), Seo-Kyu Park(NDIS Corp., Korea), Chul-Gyu Jhun, Soon-Bum Kwon(Hoseo Univ., Korea), Yu. Kurioz, Yu. Reznikov, and I. Gerus(Nat'l Academy of Science, Ukraine)</p> <p>P1-98 The Durability of LCD Glass Substrate in Dry Etching ----- 857 Tomoki Yanase, Shinkichi Miwa, and Hiroki Yamazaki(Nippon Electric Glass Co. Ltd., Japan)</p> <p>P1-99 Characterization of ZnO for Transparent Thin Film Transistor by Injection Type Delivery System of ALD ----- 860 Woon-Seop Choi(Hoseo Univ., Korea)</p> <p>P1-100 Interaction Between Transparent Dielectric and Bus Electrode for Heating Profile in PDP ---- 864 Sangwook Lee, Dongsun Kim, Mikyung Park, Seongjin Hwang, and Hyungsun Kim(Inha Univ., Korea)</p> <p>P1-101 Improvement of Photo-Alignment Characteristics for Device Applications ----- 867 Yong-Jae Hwang(Hongik Univ., Korea), Kil-Yeong Choi, Mi-Hie Yi(KRICT, Korea), Sung-Hwan Hong,</p>
---	--

Table of Contents

<p>and Dong-Myung Shin(Hongik Univ., Korea)</p> <p>P1-102 Low-Temperature Processable Polyimide Gate Insulator and Hybridization Approach for High Performance Pentacene Thin Film Transistor -- 871 Taek Ahn, Jin Woo Kim, and Mi Hye Yi(KRICT, Korea)</p> <p>P1-103 Direct Writing of Semiconducting Oxide Layer using Ink-Jet Printing ----- 875 Sul Lee, Youngmin Jeong, and Jooho Moon(Yonsei Univ., Korea)</p> <p>P1-104 Optical and Dielectric Properties Dependent on Glass Composition for Photolithographic Process of Barrier Ribs in PDP ----- 878 Juyeon Won, Jongwoo Kim, Seongjin Hwang, Namsuk Kim, and Hyungsun Kim(Inha Univ., Korea)</p> <p>P1-105 The Effect of Ink Adhesion on Color Filter Glass Substrates by Different Plasma Treatment -- 882 Ko-Shao Chen and Sheng-Hsiang Hsu(Tatung Univ., Taiwan), Yu-Cheng Lo, Pei-Yu Liu, Jiun-Ming Wang, and Huai-An Li(Chunghwa Picture Tubes, Ltd., Taiwan)</p> <p>P1-106 Effect of Liquid Crystal Structures on Polymerization-induced Phase Separation Behavior by Simultaneous Resistivity and Turbidity Measurement ----- 886 Sucheol Park, Sangsub Lee, and Jin Who Hong(Chosun Univ., Korea)</p> <p>P1-107 Synthesis and Characterization of a Novel TTF Derivative ----- 890 Lei Wang, and Myong-Hoon Lee(Chonbuk Nat'l Univ., Korea)</p> <p>P1-108 New Liquid Crystal Photoalignment Materials Based on Photosensitive Polyimides Having Long Alkoxy Cinnamate Chains ----- 893 Jingjing Wu, Seokjin Jeong, Seung Hee Lee, and Myong-Hoon Lee(Chonbuk Nat'l Univ.)</p> <p>P1-109 Carbon Nanotube Based Transparent Electrodes for Flexible Displays using Liquid Crystal Devices ----- 897 Jun-Ho Shin, H. C. Lee, J. H. Lee, S. M. Park, P. S. Alegaonkar, and J. B. Yoo(Sungkyunkwan Univ., Korea)</p>	<p>P1-110 Surface Modification of Thin Film using Trimethylchlorosilane Vaporization Treatment ----- 900 Byoung-Kwon Choo, Ki-Hwan Kim, Na-Young Song, Jung-Su Choi, Kyu-Chang Park, Jin Jang(Kyung Hee Univ., Korea), Jin-Ook Kim, Yeon-Heui Nam, Gi-Sung Chae, and In-Jae Chung(LG.Philips LCD Co., Ltd., Korea)</p> <p>P1-111 Study of Surface State Density of Hydrogenated Amorphous Silicon Thin-film Transistors by Admittance Spectroscopy ----- 904 Ming-Ta Hsieh, Chan-Ching Chang, Jenn-Fang Chen, Hsiao-Wen Zan, Kuo-Hsi Yen(Nat'l Chiao Tung Univ., Taiwan), Ching-Chieh Shih, Chih-Hsien Chen, Yeong-Shyang Lee, Hsin-Chih Chiu(AU Optronics Corp., Taiwan)</p> <p>P1-112 Electrostatic Discharge in TFT Manufacturing Process ----- 908 Chunping Long, Xinxin Lee, and Wei Wang(Beijing BOE Optoelectronic Technology Co. Ltd., China)</p> <p>P1-113 High Performance of Crystallization for LPTS TFTs using Solid Green Laser ----- 911 K. Nishida, R. Kawakami, J. Izawa, N. Kawaguchi, F. Matsuzaka, M. Masaki, M. Morita, A. Yoshinouchi, and Y. Kawasaki(IHI Corp., Japan)</p> <p>P1-114 Gate Dielectric SiO₂ Film Deposition on Poly Silicon using UV-excited Ozone Gas without Heating Substrate ----- 915 Naoto Kameda, Tetsuya Nishiguchi, Yoshiki Morikawa, Mitsuru Kekura(Meidensha Corp., Japan), Hidehiko Nonaka, and Shingo Ichimura (AIST, Japan)</p> <p>P1-115 Development of Laser Thermal Printing Device ----- 919 Illhyun Park, Jin Hyuk Kwon, and Jonghoon Yi(Yeungnam Univ., Korea)</p> <p>P1-116 Analysis and Interpretation of Electric Characteristics of Dry Etching Process for the TFT-LCD Fabrication ----- 922 O-Dae Kwon, Han-Bum Kwon, Su-Jin Yoo, Jong-Keun Kim, Jae-Hong Jeon, Kang-Woong Lee, HeeHwan Choe, Jong-Hyun Seo(Korea Aerospace Univ., Korea), Dae-Jin Seong, Jung-Hyun Kim, and Yong-Hyeon Shin(KRISS, Korea)</p>
--	--

Table of Contents

- P1-117 A Study on Wet Etch Behavior of Zinc Oxide Semiconductor in Acid Solutions ----- 926
Bo-Hyun Seo, Sang-Hyuk Lee, Jea-Hong Jeon, HeeHwan Choe, Kang-Woong Lee, Yong Uk Lee (Hankuk Aviation Univ., Korea), and Jong Hyun Seo (KETI, Korea)
- P1-118 Doping Control of Belt Source Evaporation Techniques for Large Size AMOLED ----- 930
Chang Hun Hwang(OLEDON Co.Ltd., Korea)
- P1-119 Development of Internal Linear Inductively Coupled Plasma Sources for Large Area Flat Penal Display Processing ----- 933
Jong Hyeuk Lim, Jung Kyun Park, Kyong Nam Kim, and Geun Young Yeom(Sungkyunkwan Univ., Korea)
- P1-120 CNT Emitter Coated with Titanium Oxide Nanoparticles for FED Application ----- 937
Jong-Ung Kim, Byong-Hwan Ryu (KRICT, Korea), Heesung Moon, Jaemyeong Kim(Samsung SDI Co.Ltd., Korea), Hang No Cho, Seoung Uk Park(IMD Co.Ltd., Korea), Youngmin Choi(KRICT, Korea)
- P1-121 A New Cost-Effective Optical Plate for High Performance LCD-TVs ----- 940
Juhwa Ha, Jungwook Paek, Taeseok Jang, Jinsung Choi(Samsung Electronic Co. Ltd., Korea), and Youngsub Jung(Bayer Sheet Korea, Korea)
- P1-122 Electrooptic Characteristics of Flat Fluorescent Lamps Depending on the Driving Conditions -- 944
Young-Youb Kim, Jae-Young Choi, and Jae-Hyeon Ko(Hallym Univ., Korea)
- P1-123 [Late News] Optimization of Chiral Dopant and Rubbing Direction in Liquid Crystal Display -- 948
Kyung-Jun Lee, Jun-Back Park, Jong-Min Park, Hoe-Chang Kim, Jae-Ho Seo, Yoo-Jin Kim, and Byung-Hwan Jung(BOE HYDIS Technology Co. Ltd., Korea)
- P1-124 [Late News] Monte Carlo simulation of interacting liquid crystal and substrate using rigid model molecules ----- 952
Yosuke Hyodo, Tomonori Koda(Yamagata Univ., Japan), Yuichi Momoi, Woo Yeol Kim(LG.Philips LCD Co. Ltd., Japan), Akihiro Nishioka, Ken Miyata, and Go Murasawa(Yamagata Univ., Japan)
- P1-125 [Late News] Electro-optical Properties of Polymer-stabilized Nematic Pi Cells ----- 954
Chi-Yen Huang, Ri-Xin Fung, and Ying-Ging Lin(Nat'l Changhua Univ. of Education, Taiwan)
- P1-126 [Late News] Electrical Characteristics of Bottom-Contact Organic Thin-Film-Transistors Inserting Adhesion Layer Fabricated by Vapor Deposition Polymerization and Ti Adhesion Metal Layer ----- 958
Il Hwang Park, Gun Woo Hyung, Hak Bum Choi, and Young Kwan Kim(Hongik Univ., Korea)
- P1-127 [Late News] Study about High Temperature Operating Test Result for Thin Film-Transistor Electro Phoretic Display on Plastic ----- 962
Sun Young Kim, Woo Jae Lee(Samsung Electronics Co. Ltd., Korea), and Jun-Sin Yi(Sungkyunkwan Univ., Korea)
- P1-128 [Late News] Enhancement of on-axis Luminance of Flat Fluorescent Lamps (FFLs) by using Micro-lens Arrays ----- 965
Ji-Hee Park, Ji-Young Lee, and Jae-Hyeon Ko(Hallym Univ., Korea)
- P1-129 [Late News] Electronic Ink using the Electrophoretic High Mobility Particles ----- 969
Chul Am Kim, Seung-Youl Kang, Gi Heon Kim, Seong Deok Ahn, Jiyoung Oh, and Kyung Soo Suh(ETRI, Korea)
- P1-130 [Late News] Pentacene Thin-Film Transistors with Polyimide/SiO₂ Dual Gate Dielectric ---- 972
Hirokazu Imahara(Tokyo Inst. of Technology, Japan), Woo Yeol kim, and Yasuhisa Oana (LG.Philips LCD Co. Ltd., Japan), and Yutaka Majima(Tokyo Inst. of Technology, Japan)

31. New LCD Modes

- 31-1 [Invited] Tandem Reflective LCD and OLED - 977
Jiun-Haw Lee(Nat'l Taiwan Univ., Taiwan), Haiqing Xianyu, Zhibing Ge, Kou-Chen Liu(Univ. of Central Florida, USA), and Shin-Tson Wu(Univ. of Chang Gung, Taiwan)
- 31-2 [Invited] Polarizer-free Liquid Crystal Devices - 980
Yi-Hsin Lin(Nat'l Chiao Tung Univ., Taiwan),

Table of Contents

Hongwen Ren, Yung-Hsun Wu, and Shin-Tson Wu(Univ. of Central Florida, USA)

- 31-3 [Invited] Single-Layer Color Cholesteric Liquid Crystal Displays ----- 982
Shin-Ying Lu, Yu-hui Lin, and Liang-Chy Chien(Kent State Univ., USA)

- 31-4 [Invited] Materials Aspects for Fast Switchable NLC/FLC Devices ----- 986
Wolfgang Haase, Vladimir Bezborodov, Valery Lapanik, and Fedor Podgornov(Darmstadt Univ. of Technology, Germany)

32. Display Electronics II

- 32-1 [Invited] Design Issues of Digital Display Interface ----- 993
Deog-Kyoon Jeong and Do-Hwan Oh(Seoul Nat'l Univ., Korea)

- 32-2 Novel Method of Color Correction LUT Generation for LCDs ----- 997
Jae Won Jeong, Hoi Sik Moon, Brian H. Berkeley, and Sang Soo Kim(Samsung Electronics Co. Ltd., Korea)

- 32-3 New X-Y Channel Driving Method for LED Backlight System in LCD TVs ----- 1001
Daeyoun Cho, Won Sik Oh, Kyu Min Cho, Gun Woo Moon(KAIST, Korea), Byungehoon Yang, and Taeseok Jang(Samsung Electronics Co.Ltd., Korea)

- 32-4 A Low Power Source Driver of Small Chip Area for QVGA TFT-LCD Applications ----- 1005
Nan-Xiong Hung(Feng Chia Univ., Taiwan), Wei-Shan Jiang(Nat'l Chung Hsin Univ., Taiwan), Bo-Cang Wu, Ming-Yuan Tsao(Feng Chia Univ., Taiwan), Han-Wen Liu, Chen-Hao Chang(Nat'l Chung Hsin Univ., Taiwan), Miin-Shyue Shiau(Graduate Inst. of Electrical and Communication Engineering,Taiwan), Hong-Chong Wu, Ching-Hwa Cheng, and Don-Gey Liu(Feng Chia Univ., Taiwan)

33. OLED Device Structure

- 33-1 [Invited] High Performance OLEDs with a New Device Structure ----- 1011
Jeoung Kwen Noh, Min Soo Kang, Jong Seok Kim, Jung Hyoung Lee, Yun Hye Ham, Jung Bum Kim, and Sehwan Son(LG Chem., Korea)

- 33-2 Novel OLED Structure Allowing for the In-situ Ohmic Contact and Reduction of Charge Accumulation in the Device ----- 1014
Won Jun Song, Boris Kristal, Chong Hoon Lee, Yeun joo Sung, Sung Soo Koh, Mu Hyun Kim, Seong Taek Lee, Hye Dong Kim(Samsung SDI Co., Ltd., Korea), ChangHee Lee(Seoul Nat'l Univ.), and Ho Kyoong Chung(Samsung SDI Co.Ltd., Korea)

- 33-3 High Efficiency in Phosphorescent Organic Light-Emitting Diodes using Carbazole Type Exciton Blocking Layer ----- 1019
Sung hyun Kim, Jyongsik Jang(Seoul Nat'l Univ., Korea), and Jun Yeob Lee(Dankook Univ., Korea)

- 33-4 An Inverted Bottom Emission Organic Light Emitting Device with a New Electron Injection Layer ----- 1023
YouJong Lee, JooHyung Kim, SoonNam Kwon, and MunPyo Hong(Korea Univ., Korea)

34. Human Factor I

- 34-1 [Invited] Temporal Factors of Human Depth Perception ----- 1029
Satoshi Shioiri(Tohoku Univ., Japan)

- 34-2 [Invited] The Effects of Three Dimensional Stimulus Configuration on Self-Motion Perception Induced by Large Visual Display ----- 1031
Shinji Nakamura(Nihon Fukushi Univ., Japan)

- 34-3 An Improvement Method of Color Image using Saturation Extension ----- 1035
Kyoung-Ok Yang, Jong-Ho Yun, Hwa-Hyun Cho, and Myung-Ryul Choi(Hanyang Univ., Korea)

- 34-4 Motion Blur Analysis by Gabor Patch ----- 1039

Table of Contents

Koichi Oka and Daisuke Oka(Nanosoftware Ltd.,
Japan)

36-4 A Study on Negative Bias Temperature
Instability in ELA Based Low-Temperature
Polycrystalline Silicon Thin-Film Transistors
----- 1075

Kiju Im, Byoung-Deog Choi, Hye Hyang Park, Yun
Gyu Lee, Hui Won Yang, and Hye Dong Kim
(Samsung SDI Co.Ltd., Korea)

35. Emission Material & Applications

- 35-1 [Invited] Field Emission Display and Backlight
for LCD using Printed Carbon Nanotubes --- 1045
Yong Churl Kim, D. S. Jung, B. K. Song, M. J. Bae,
H. S. Kang, I. T. Han, Jong Min Kim(SAIT), Y. C.
Choi, M. I. Hwang, I. H. Kim, and J. H.
Park(Samsung SDI Co. Ltd., Korea)
- 35-2 [Invited] Low Work Function and Sharp Field
Emitter Arrays by Transfer Mold Fabrication
Method ----- 1049
Masayuki Nakamoto, Genta Sato, and Kohji
Shiratori(Shizuoka Univ., Japan)
- 35-3 [Invited] Recycle of CRT Glass Cullet
S. H Chang(Kumoh Nat'l Inst. of Technology,
Korea)
- 35-4 The Stress Positioning Control Method for Slim
CRTs Glass Design using FEM ----- 1053
Yoing-ik Hwang and Tae-hoon
Lee(LG.Philips-Displays Co. PCT, Korea)

36. Poly-Si TFTs

- 36-1 [Invited] Thin-Beam Excimer
Laser Annealing ----- 1061
Woo Boon Ang(TCZ Pte. Ltd.,Singapore), Dirk
Rothweiler, and David S. Knowles(TCZ LLC, USA)
- 36-2 [Invited] Electrical Instabilities in P-channel
Polysilicon TFTs: Role of Hot Carrier and
Self-heating Effects ----- 1065
G. Fortunato, P. Gaucci, L. Mariucci, A. Pecora, and
A. Valletta(IFN-CNR, Italy)
- 36-3 6 Mask LTPS CMOS Technology for AMLCD
Application ----- 1071
Soo-Jeong Park, Seok-Woo Lee, Myoung Kee Baek,
Yong Su Yoo, Chang Yeon Kim, Chang-Dong Kim,
and In Byeong Kang(LG.Philips LCD
Co.Ltd.,Korea)
