

## DIGITAL LIVING

There's no doubt we live in the digital era. Music, photography, video — it is all digital, and it is at our fingertips. Digital technology has transformed the way we work, play and communicate. From the pictures we take with our digital cameras, to the music we listen to on our digital music players, and all the information stored on our computers, PDAs, and mobile phones, everything is based on some type of digital file format.

Whether we are traveling by train, plane, automobile, or boat; while studying, jogging, working out—and even swimming—we obviously want our videos, music, movies, TV programs, and podcasts with us. The industry overall has made great progress toward developing innovative products and services that are helping make digital living a reality for consumers.

### Apricorn Padlock

USB 2.0 Encrypted Hard Drive with PIN Access

Stores up to 10 secure PIN passkeys with 256-bit military grade AES hardware encryption for ultimate security. Administrator function allows IT departments to secure its mobile users by assigning admin access to the drive before being distributed. The drive also self destructs after a predetermined number of failed PIN entries.

It assumes it's being attacked and destroys the encryption key and locks itself, rendering the data useless and requiring a total reset to redeploy the Padlock. Variable Time Circuit technology prevents against timing attacks aimed at accessing the drive by studying its behavior and infiltrating the Padlock's electronics.

Additional features include weather resistant key pad, 16-point omni-directional shock mounting system and super tough, epoxy compound protecting the circuitry and encryption chip.
