

Digital Ship Copenhagen 2016

6 April 2016

Eric Hoogenbosch – Director Retail Sales EMEA, Inmarsat Maritime

Digital Ship Copenhagen 2016

Agenda

- 1 Inmarsat at a glance
- 2 Maritime data evolution
- 3 FleetBroadband and Global Xpress update
- 4 Fleet Xpress – a new standard in maritime communications

01

Inmarsat at a glance

Our market

The Internet of everywhere

Maritime

Enterprise

Aviation

US Government

Global Government

Powering global connectivity for mission critical communications

02

Maritime Data Evolution

Global mobile data shows explosive growth

1 Exabyte = 1,000,000,000,000 Megabytes

Global Mobile data traffic:

- > Global mobile data traffic grew 74 percent in 2015
- > 3.7 exabytes per month at end of 2015
- > 30.6 exabytes per month by 2020

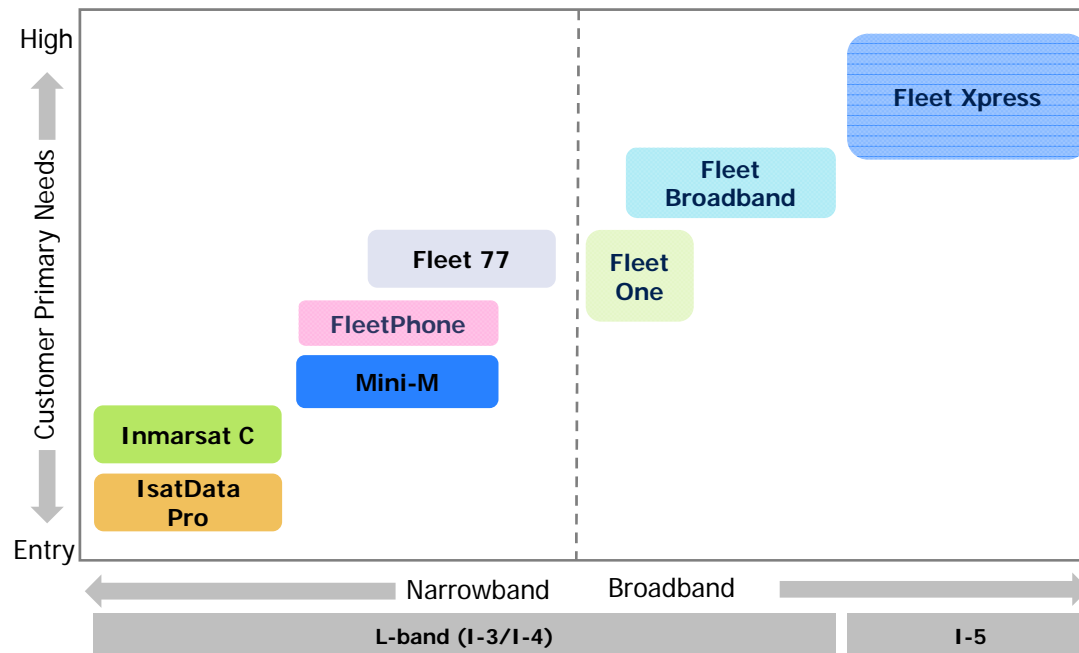

Maritime data evolution

Inmarsat Maritime services portfolio

Satellite connectivity for all vessels

- > Inmarsat enables the maritime industry to stay connected with a broad portfolio of voice and data services
- > Fleet Xpress (FX) has been designed for customers looking for high-speed broadband connectivity
- > FX replaces the XpressLink Ku-band service

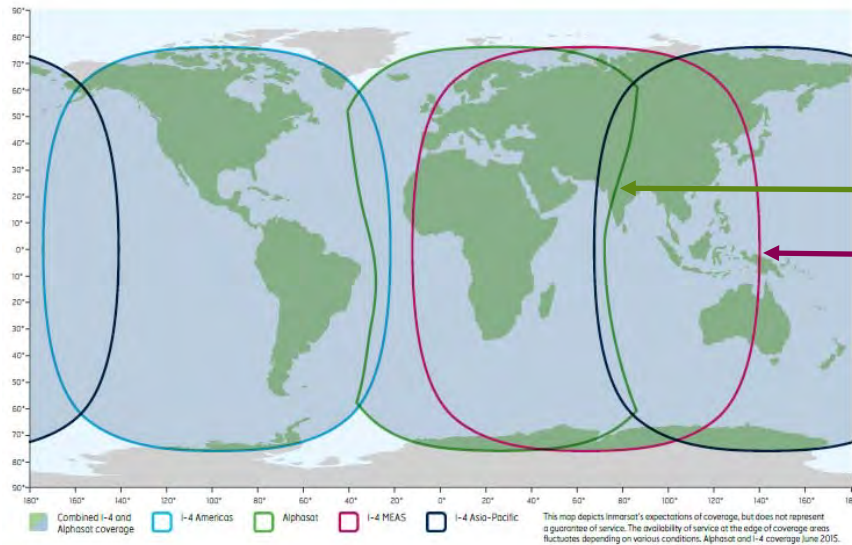

03

FleetBroadband & Global Xpress

FleetBroadband

Global broadband connectivity and voice solution

- > FleetBroadband is a proven maritime broadband solution
- > Continued growth with over 45,000 active terminals
- > Alphasat online adding more capability
- > I-4 F2 moved, creating a 4th Region: MEAS
- > Fast growth of 'Internet Access' subscribers on FleetBroadband
- > Utilising smart box technology
- > Enabling crew internet access
- > FleetBroadband provides unlimited back-up for Fleet Xpress

\$1.6bn

Global broadband network

2015

Commercial launch

89

Ka-band beams on each satellite

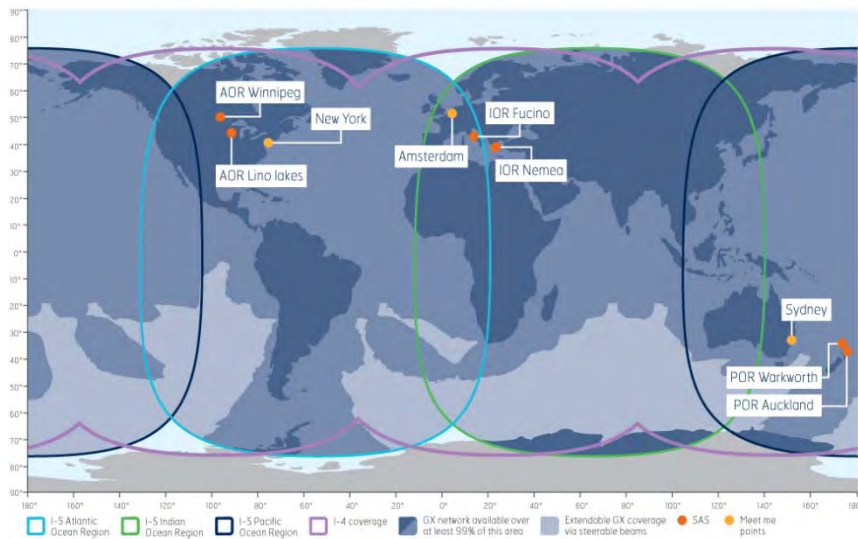

Inmarsat Global Xpress

One high speed network, one trusted provider, one seamless global solution

- > Next generation high throughput satellites
- > One single operator delivering seamless coverage, worldwide
- > Powered by three Inmarsat-5 (I-5) satellites built by Boeing
- > Each I-5 satellite has an expected lifespan of 15 years
- > Wide range of terminals
- > Fleet Xpress is the maritime Global Xpress solution

Ground station infrastructure

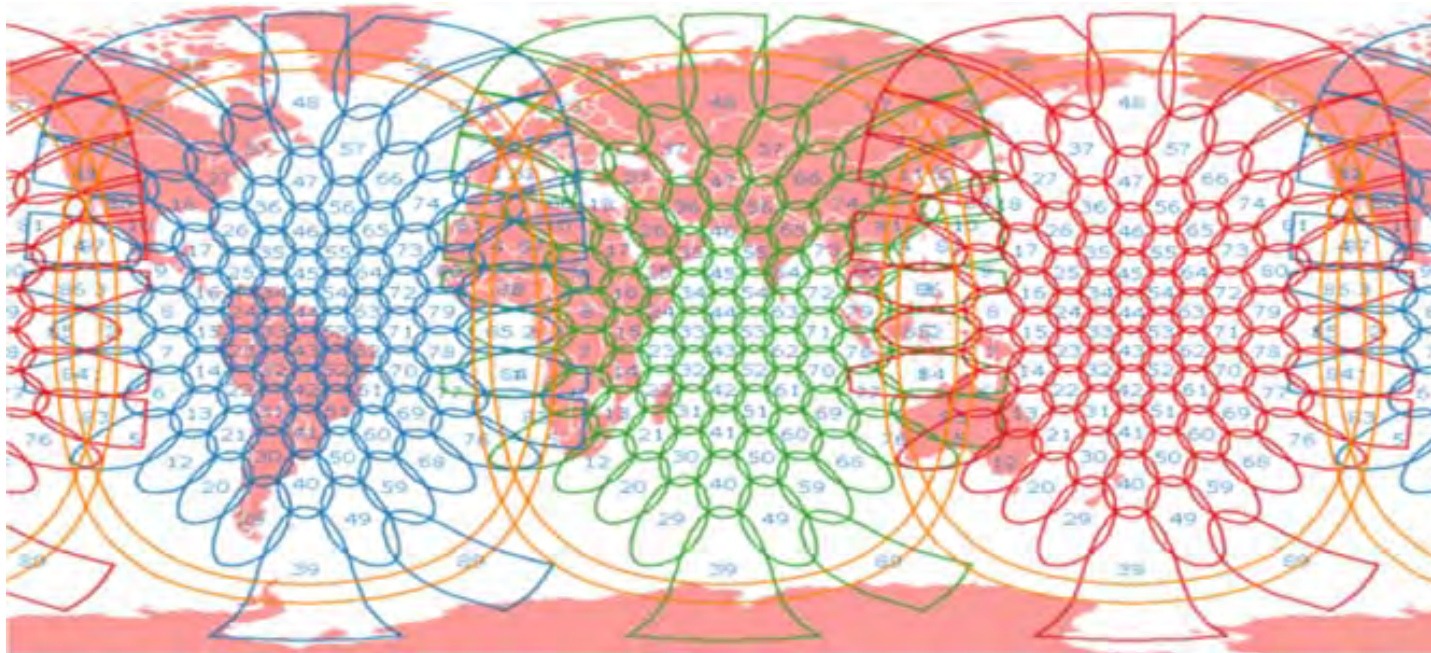

Dual ground stations support redundancy

- > Duplicated ground infrastructure
 - > Secured, operated and managed by Inmarsat
 - > 2 Satellite Access Stations per satellite, total 8
- > Both sites receive all terminal traffic
 - > When a fade event is experienced traffic is handed over to the alternate site immediately
 - > No traffic loss

Service designed for mobility

Spot beam design provides the same connectivity performance everywhere

The network

Inmarsat specific Network Management System functions

Dual receiver on the remote site

- > Allows beam switching and load balancing

Advanced adaptive modem technology

- > Flexible Modulation and Coding to mitigate for rain fade
- > Also allows Uplink Power Control

Adjusts the power from the terminal within a controlled regulatory framework

04

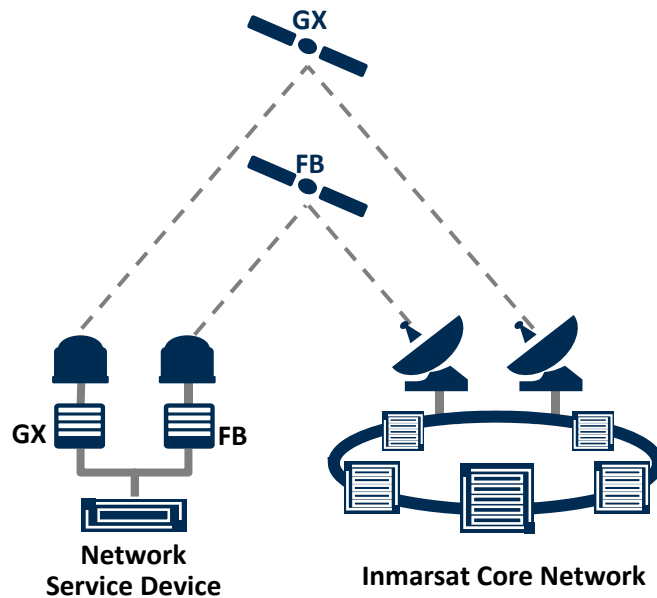

Discover the power of Fleet Xpress

A new standard in maritime communications

Fleet Xpress network

Network designed for high-speed, mobility and continuous connectivity

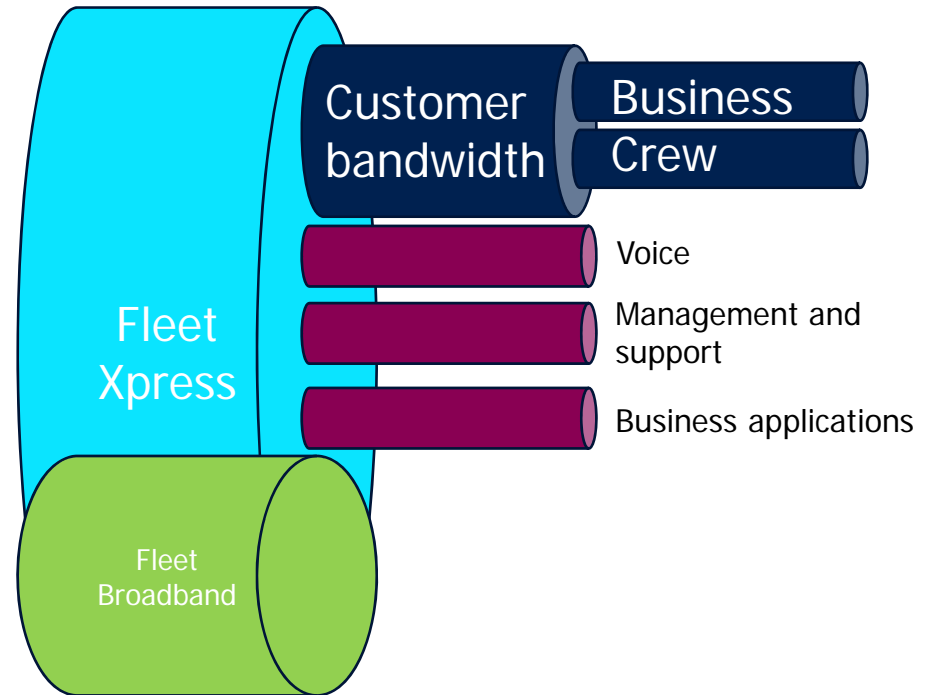

- > **Redundant**
 - Dual terminal, satellite and teleport design
- > **Expandable**
 - Satellite capacity can be increased
- > **Global high-speed service**
 - Single operator – global standard
 - Flexible Bandwidth options
 - Seamless handover
 - Secure operation
- > **Maritime eco-environment**

Fleet Xpress Primary Subscription

Revolutionary bandwidth design enables more accurate customer bandwidth planning, management and support and 3rd party applications

Bandwidth elements:

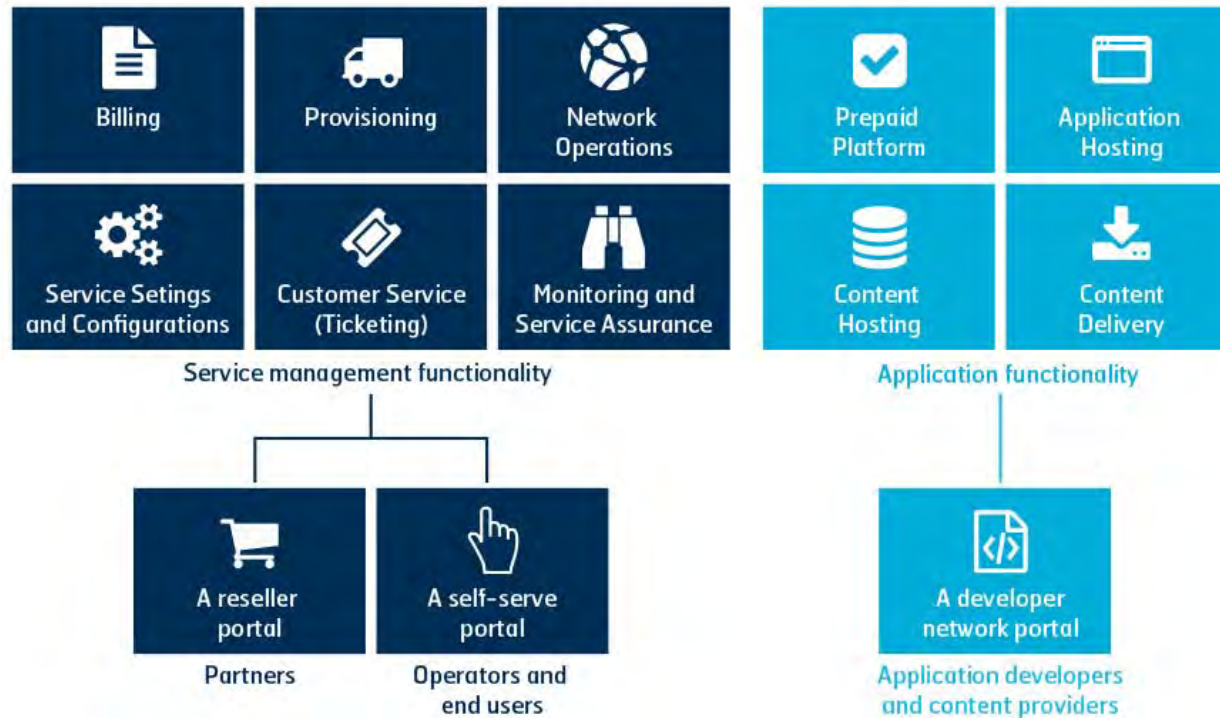

- > Customer bandwidth for business and crew
- > Voice service is separate from customer bandwidth
- > Site management and support for service assurance
- > Bandwidth for third party applications
- > Unlimited FleetBroadband back-up

Inmarsat Gateway

Customer interface to the Inmarsat Service Enablement Platform (ISEP)

A new maritime ecosystem of business applications

Development of specialist third party maritime applications

Operational efficiency

- > Engine Monitoring
- > Planned Maintenance
- > Chart Updates
- > Weather / routing

Safety and compliance

- > Emissions monitoring
- > Anti-piracy
- > Telemedicine
- > Remote surveillance

Crew welfare

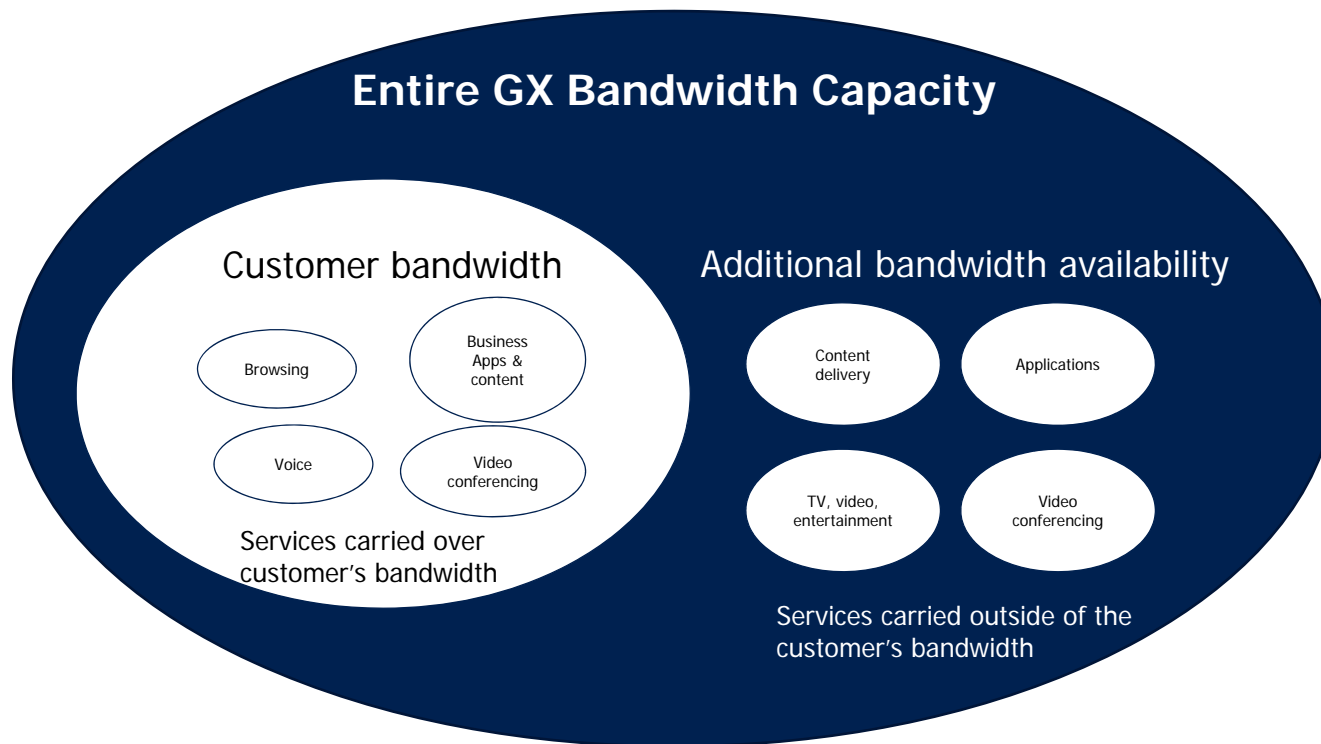

- > Internet access
- > Voice and video
- > Current news and sports
- > TV, radio and gaming

IT and security

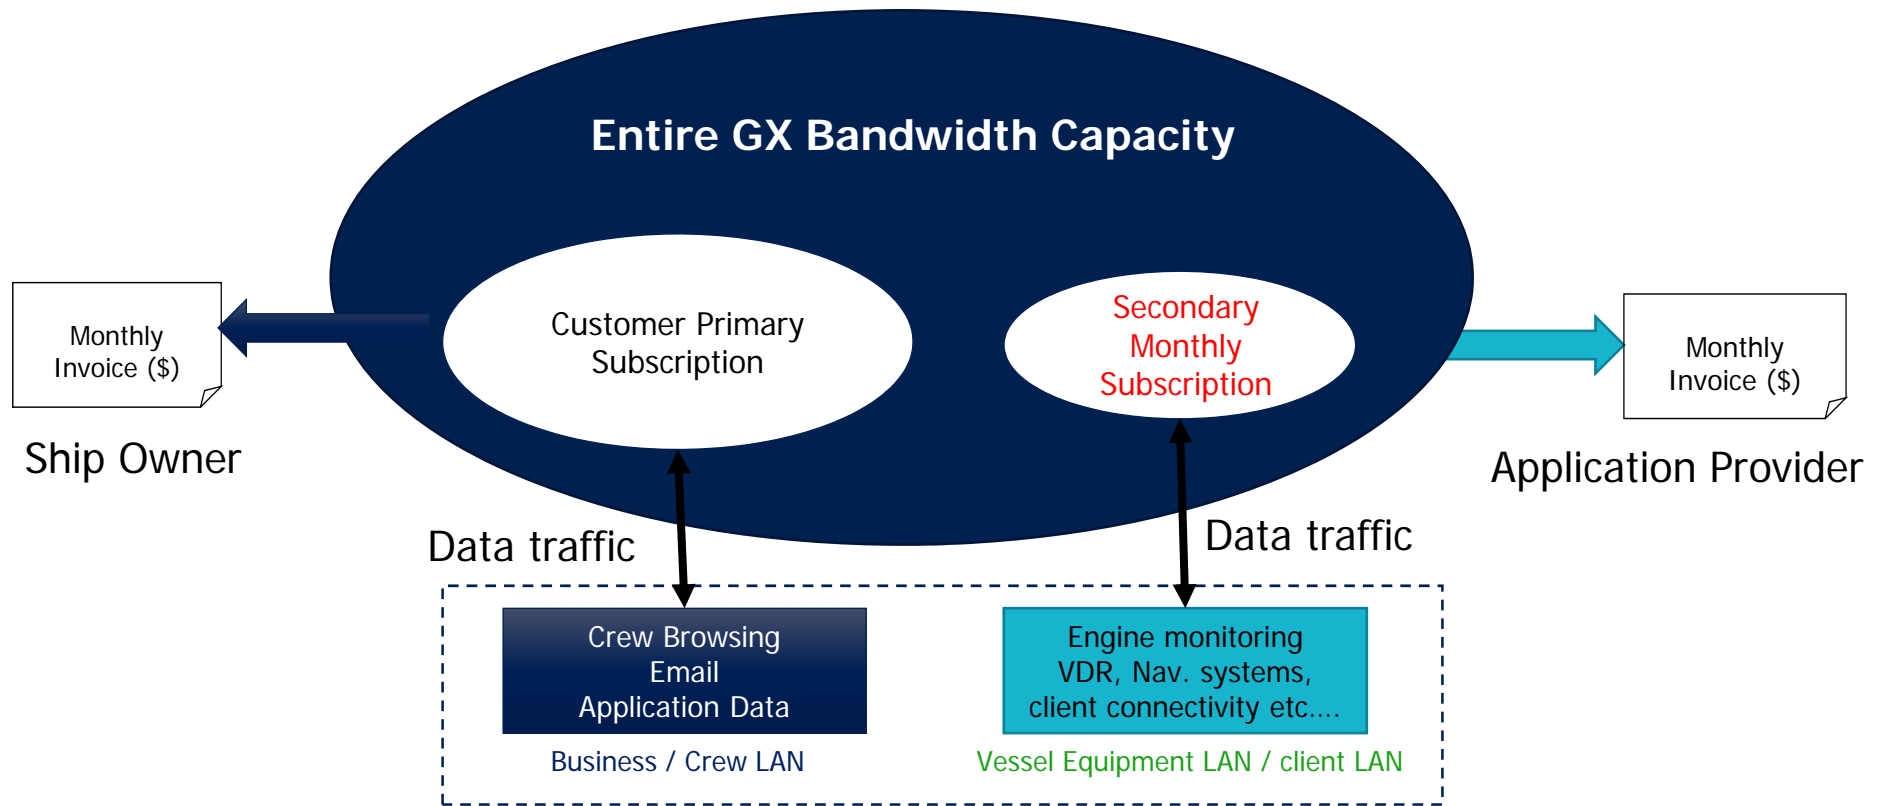

- > Remote IT support
- > Corporate email
- > Voice & Video Chat
- > Cyber Security

Powered by Fleet Xpress

Flexible Real-Time Bandwidth Control

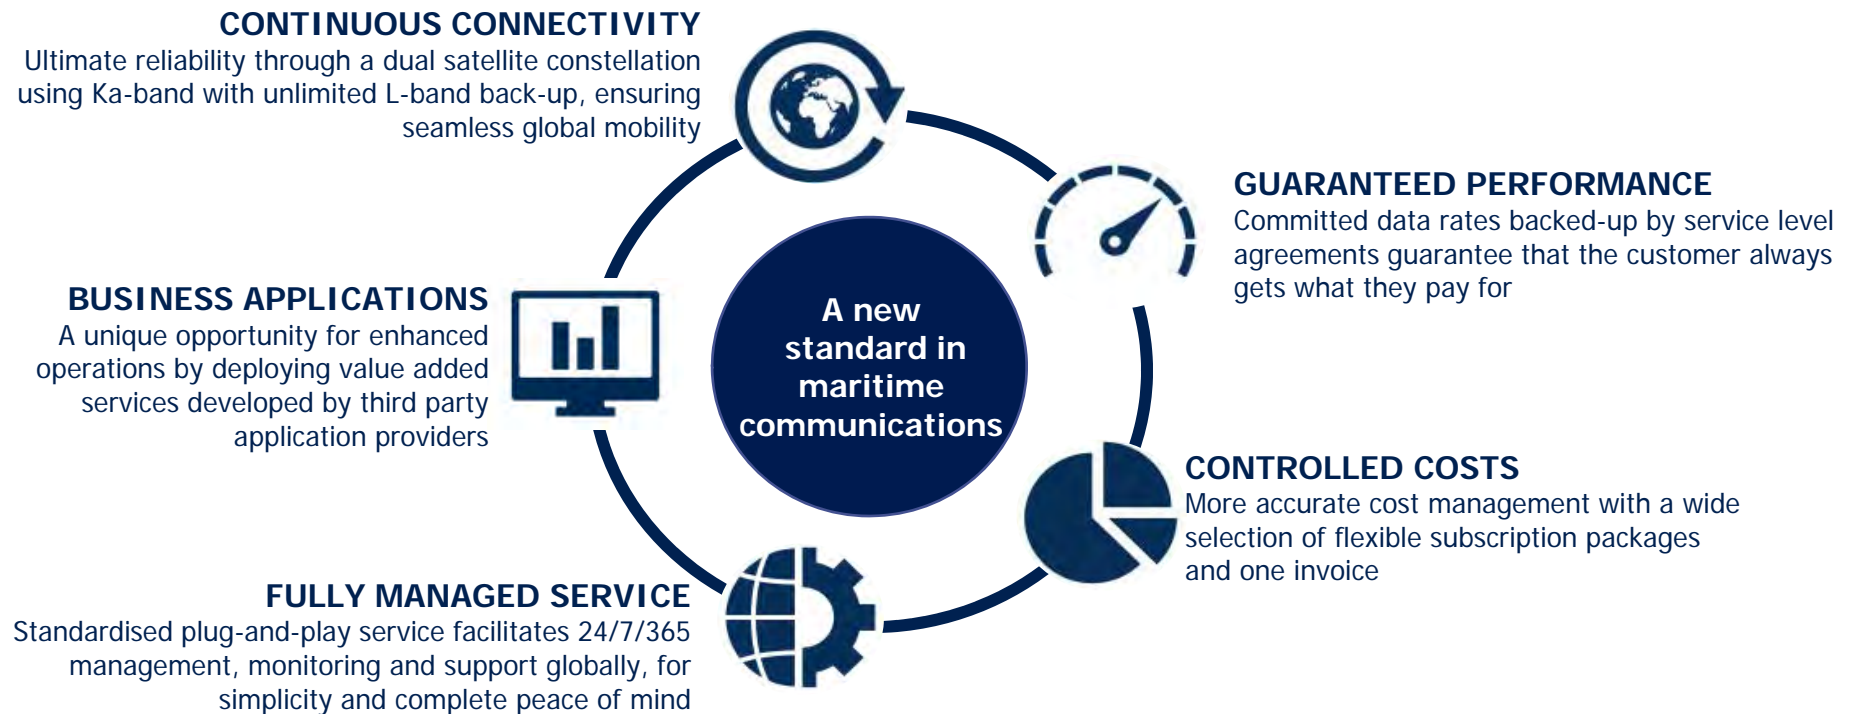

Secondary subscription

A new standard in maritime communications
