FOREWORD

Susannah and I have both been involved in agriculture from an early age, and in 1998 we were successful in obtaining a farm tenancy from Hampshire County Council enabling us to farm in our own right and to build a sound, family dairy farm near Winchester.

We started with no stock at all, but in a very short while we were milking 60 cows. In those early days, we ran a 'flying herd,' increasing our herd with strong traditional types of cattle, often looking for 4th or 5th lactation cows, feeling confident these would last well in our system.

With the outbreak of Foot and Mouth in 1999 and the increasing threat from TB, we started to believe that a closed herd, breeding our own replacements, was the way forward. It was at this time that we visited Susannah's distant relative, David Spalton, with the 'Maxton' herd of Dairy Shorthorns. We came home from that visit thinking that the beautiful cattle we had seen would really suit our system.

We purchased our foundation Shorthorns from the Cotley and Chicklade dispersal sales and with Susannah qualified as an AI technician, we started down a path where the Shorthorns became an important part of our herd.

These cattle are also responsible for our daughter Florence becoming besotted with the Dairy industry, showing a real stockman's eye and ability from an early age. Her enthusiasm has led us to the show ring with the Attwoods herd of Dairy Shorthorns. She has competed at many local shows, but also ventured further afield to bigger shows such as the South West Dairy Event and the National Show at Cheshire and has recently gained Supreme Champion Honours twice this season.

It is with a great deal of sadness that this chapter in our lives is coming to a close, but with the council's policy of short term tenancies to encourage new entrants, we must move on. We are moving to a small farm in Kent, taking some youngstock with us, no longer milking cows but with a new set of challenges before us.

The cows that are in the ring today represent our dreams and ambitions and we will look back on this 20-year period in our lives with immense pride, and we hope that you can see the potential in these animals and that they will in turn, serve you well.

Keith Mannerings
August 2017

HERD HEALTH AND MANAGEMENT

Holding Number: 15/294/0050

BOVINE TB:

The herd is in an annual testing area

Last test **31/07/2017** – All Clear

No TB reactors ever recorded

The herd is vaccinated for Lepto & BVD; the latest booster was late May 2017.

The herd is naturally Johne's free and there is no evidence of IBR through bulk sampling.

The herd is NMR milk recorded monthly.

DRY COW THERAPY:

Cows are routinely dried off using Cepravin Dry Cow and Orbeseal.

DIY AI is carried out.

Sires have been sourced through Red Cattle Genetics and Cogent.

A quarter of the herd are Dairy Shorthorns, with the rest being non-pedigree Holstein Friesians.

The whole herd 305d average (Cows/Heifers) is 7300kg

In isolation, the Shorthorn figures show: -

The Dairy Shorthorn Cow 305d average is 6717kg

The Dairy Shorthorn Heifer 305d average is 5774kg

Our aim has been for a high forage diet, using forage maize and grass; with any concentrate fed through the herringbone parlour to balance the ration. Concentrates are fed according to yield (0.24kg/l).

As we are on a dry, chalk farm, we extend grazing for as long as possible with cows being loose-housed in winter.

All replacements are also home-reared.

Costings have been carried out by Martin Attwell of Attwell Associates for the last 15 years.

Our local vets are **Endell Farm Vets, Salisbury**. We use them for Routine visits, TB testing, call outs and Medical Supplies, and they have no hesitation in recommending our herd as a dispersal of genuine cows with an outstanding level of welfare.

REGISTERING WITH THE SHORTHORN SOCIETY

Non-members of the Shorthorn Society who make purchases at this sale should note:

- a) That calves must be correctly tagged to be entered for Coate's Herd Book or the Grading Register within 40 days of birth, upon entry forms obtainable from the Shorthorn Society, N.A.C. Stoneleigh, Kenilworth, Warwickshire.
- b) That, as entries for Coate's Herd Book or the Grading Register are not accepted from non-members of the Shorthorn Society, it is desirable for Purchasers to apply for membership as soon as they acquire Pedigree or Grading Register Stock.
- c) That application forms for membership may be obtained from the Auctioneers.

ABBREVIATIONS: In this catalogue, Coate's Herd Book numbers are given after the Classification and Animal's name. This is then followed by the Ear-Tag numbers. A percentage figure quoted indicates the proportion of pure Dairy Shorthorn blood in that animal's genetic make-up, as contributed by its pedigree and ancestry.

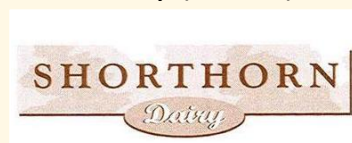

OFFICIAL PEDIGREE CERTIFICATES: Purchasers are reminded to collect from the Auctioneers upon settlement, the official Pedigree Certificates of their animals and Cattle Passports. The Shorthorn Society makes no charge for the transfer of pedigrees between members.

THE SHORTHORN SOCIETY of Great Britain & Ireland

Secretary: Ros Rimmer
