

A close-up photograph of an elderly couple embracing. The woman is on the left, her eyes closed and a gentle smile on her face. The man is on the right, looking towards her with a soft expression. They are both wearing light-colored, textured sweaters. The background is a bright, slightly blurred outdoor setting, possibly a beach or a park.

INDIVIDUALS INSPIRATIONS INNOVATIONS

INDIVIDUALS

At Medline, we know that no two people are alike. That's why we have a complete line of incontinence management products tailored to meet the exact needs of the individual.

Our product line includes:

- DryPads
- Protective underwear
- Baby and youth items
- Overnight briefs
- Liners and pads
- Wipes and cloths
- Adult briefs
- Underpads
- Skincare products

Medline knows that incontinence doesn't have a "one-size-fits-all" solution. That's why the individual is at the heart of our incontinence products line.

INSPIRATIONS

Each Medline disposable incontinence management product was inspired by a specific need or goal – for example, maintaining a free and active lifestyle despite incontinence. Medline is proud to offer discreet and breathable MoliCare® Premium Air Active briefs and Protection Plus® underwear, among other products, to meet this specific goal.

Explore our catalog to learn more on the inspirations behind Medline's full line of incontinence care products!

INNOVATIONS

Medline strives to bring you cutting-edge incontinence products. Our unique features range from a cloth-like backing for better skin care and comfort to pH-neutralizing curly fiber. We even have a brief lined with Remedy™ skin repair cream – the Restore™ disposable brief – to provide skin protection and to nourish the skin.

We value your feedback on our products and how they meet your needs. Working together, we can continue to develop incontinence care products designed with the individual in mind.

THE MEDLINE DIFFERENCE

Medline truly is your partner, not just your provider. Our commitment to you doesn't stop when you receive our products. Our clinical support team of nurses and regional incontinence care professionals will happily provide training and in-servicing where needed.

Ultrasorbs[®] AP

Premium DryPads

AIR-PERMEABLE DRYPADS ALLOW AIR TO FLOW THROUGH — and nothing else!

ULTRASORBS[®] AP DRYPADS

Ultrasorbs[®] AP Advanced Technology

The power of ONE

ONE PAD for healthier skin. The innovative backsheet on Ultrasorbs AP allows air to flow through the pad while still acting as a barrier to moisture*. The result is superior skin dryness and comfort.

ONE PAD for lower cost. Ultrasorbs AP are so strong and absorbent that they eliminate the need for multiple pads. They also reduce the need for draw sheets, linens or reusable underpads. The result is a dramatically lower cost.

ONE PAD for easier care. Ultrasorbs AP can be used on both standard beds and air support therapy beds.

Soft, non-woven topsheet
– softer against skin for increased comfort

Advanced SuperCore[®] absorbent sheet
– thermo-bonded to provide better pad integrity and superior skin dryness

AquaShield film
– traps moisture, providing better leakage protection

Innovative backsheet
– air permeability means better skin comfort

*MVTR of 3600 +/- 1000 g/m²/24h

Indications for Use

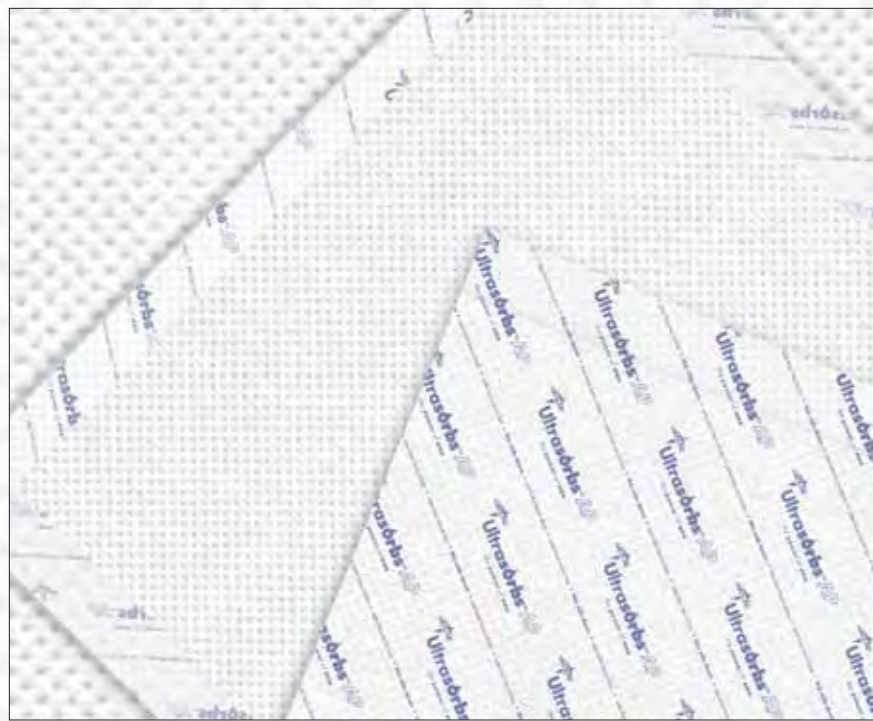

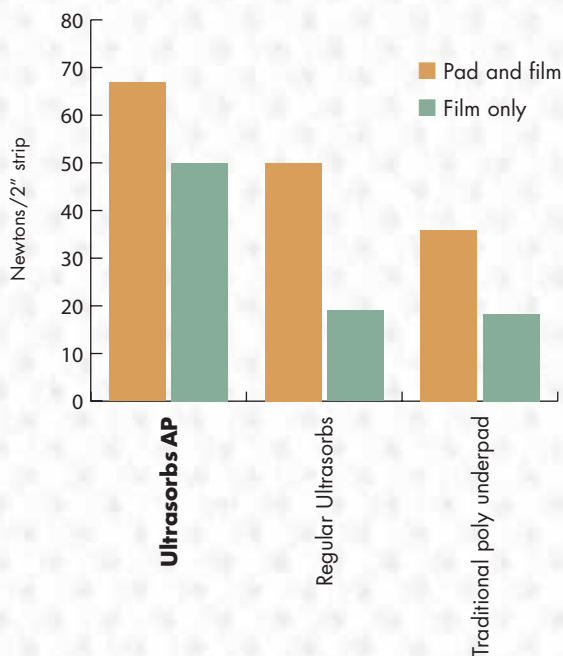

- Open airing/incontinence management
- ICU/CCU patients who should not be disrupted/moved more than necessary
- ER for absorbing significant/ongoing fluid loss
- Labor and delivery
- OR use
- Any other area where skin dryness is needed

Protect the resident, not just the bedding

- The advanced SuperCore® thermo-bonded core wicks moisture away from the skin and locks fluid away for increased dignity, superior odor control and better skin care.
- Ultrasorbs AP are super absorbent – one pad has the absorbing power of three or more standard underpads.
- The extra-strong pad and film provide exceptional resistance to tearing and resulting linen changes.

Underpad Comparison

(pad and film breaking strength)

As noted in

WOCN 2003 Guidelines:

“Managing skin moisture is a critical factor in maintaining skin integrity and reducing the incidence of pressure ulcers.”

MoliCare® Premium

Air Active Briefs

Finally...a **FULLY BREATHABLE** Brief!

Fully breathable materials

for the ultimate in comfort and skin care

backsheet

Advanced Three-Part Core

for superior dryness and skin care

Largest leg cut-out

for the best sizing

side panels

Air Active's **Advanced Three-Part Core** contains a *Curly Fiber Acquisition Layer* — a center core with a homogeneous mix of MoliCare's odor-limiting CyDex SAP and cellulose fibers — for optimum dryness, speed of acquisition, security and all-around better skin health.

Comfort-Fit two-piece tape system
stretchable and refastenable for improved comfort and fit

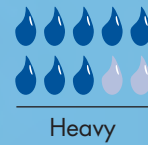

Every inch of an Air Active brief is fully breathable – not just the side panels! For the first time, you get complete comfort and maximum air flow for dermatologically tested improved skin health.

The revolutionary design of the Air Active brief ensures:

- Generous cut
- Discreet fit
- Cost savings
- Dignity

Anti-leak guards
for the best possible leak prevention

restore™ disposable briefs

The only disposable brief that keeps skin healthy and dry!

Advanced skin protection is built right into every Restore disposable brief. That's because each brief's inner liner is coated with Medline's Remedy™ Skin Repair Cream. This exclusive, all-natural cream helps provide skin protection.

(See Page 26 for the complete family of Remedy products.)

RESTORE™ DISPOSABLE BRIEFS

Breathable side panels

Restore disposable briefs have 100 percent breathable side panels. Improved airflow not only keeps residents more comfortable, it also helps to prevent skin irritation.

Additional features of the Restore brief:

The **super-absorbent UltraCare core** helps provide maximum dryness for improved comfort and healthier skin.

Skin-safe closures with “grab anywhere” technology allow for the best possible fit and also reduce waste – now caregivers can quickly check and refasten briefs.

Anti-leak cuffs perform up to 20 percent better than standard cuffs, which helps to protect clothing, bedding, etc.

The **cloth-like outer cover** is comfortable against skin, helping to prevent irritation and rashes.

Heavy Plus

Comfort-Aire™ HC

EXTENDED WEAR  HIGH CAPACITY

**An all-new
cloth-like
overnight
brief**

COMFORT-AIRE™ HC BRIEFS

The Comfort-Aire HC brief maximizes airflow to the skin – because airflow equals comfort! These briefs also have a super-absorbent core for superior dryness all through the night.

Additional features of the Comfort-Aire HC brief:

The **cloth-like outer cover** is comfortable against skin, helping to prevent irritation and rashes.

Anti-leak cuffs perform up to 20 percent better than standard cuffs, which helps to protect clothing, bedding, etc.

Velvet soft breathable side panels for increased air flow and comfort.

Skin-safe closures with “grab anywhere” technology allow for the best possible fit and also reduce waste – now caregivers can quickly check and refasten briefs.

Remedy™ Skin Care

Nourish and protect the skin

Remedy skincare products go beyond cleansing, moisturizing and protecting – they literally feed the skin. The secret is Remedy’s proprietary blend of antioxidants, amino acids, vitamins (A, B₃, B₆, C and D₃) and methylsulfonylmethane (MSM). Each of these ingredients is renowned for its role in basic cellular reconstruction and protection.

Instead of using surfactant-based formulations – which can strip the skin of its natural oils – Remedy cleansers contain phosolipids, which help clean and remove odors while retaining the skin’s moisture.

Remedy products also contain natural oils, such as olive oil, to provide essential fatty acids to the skin. Silicones, including dimethicone, are included to help protect the skin for longer periods of time.

SKIN CARE

Remedy 4-in-1 Cleansers

For face, body, perineal & peristomal areas

Item #	Description	Case

For all common fungal infections. Cream stays in place longer; powder is appropriate for feet

MSC094604	Cream, 4 oz tube	12/cs
MSC094603	Powder, 3 oz	12/cs

TO ORDER

Disposable Absorbent Product Identification System

No two individuals experience incontinence in exactly the same way – so why should they all use the same incontinence management product?

Guides from the Centers for Medicare and Medicaid Services (CMS) require individualized care plans for each incontinent resident. Concerns about dignity and privacy mean these plans need to be discreet.

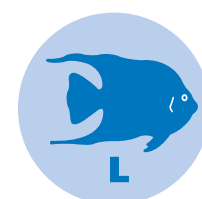

Shown below is an example of an easy, discreet system for selecting and distributing appropriate incontinence management products. The system uses a variety of stickers to match products to residents. These stickers can be placed outside the door to the resident’s room, inside the room or in a closet. A legend indicating the product each sticker represents can be kept at the nursing station.

In this system, a sticker with a blue fish on it designates a large-sized brief. All employees, whether delivery staff, nurses or nursing assistants, should be able to identify the blue fish and know which product it represents.

Step-by-Step Instructions for Use

The product identification system (*below*) is designed to promote product selection, fit and comfort.

- Step 1:** Identify resident’s continence categories by using MDS 2.0 definition of continence self-control (section H.1)
- Step 2:** Assess resident’s status regarding mobility, contractures, chronic diarrhea, combative behavior and size
- Step 3:** Identify the proper product type using the decision tree for disposable incontinence products
- Step 4:** Measure the resident and identify proper size using the sizing guide or matrix
- Step 5:** Select sticker with symbol representing product and size
- Step 6:** Place sticker next to resident’s nametag or designated location
- Step 7:** Instruct staff to use proper product and size for each resident

Compass Fit Right Program

Now more than ever, it's crucial that clinicians evaluate their incontinence management programs in order to comply with CMS F315 – and to understand how residents are impacted by incorrect product usage.

Incontinence management isn't a "one-size-fits-all" issue. Residents aren't all the same size. The varying degrees of incontinence mean that they won't all have the same needs in terms of absorbency and leakage protection. Level of continence, skin condition, mobility and circulation can dictate whether residents would benefit from including nourishing skincare products in their care plans.

It's a lot to think about, and it can be confusing. That's why Medline developed the Compass Fit Right Program. With this comprehensive system of educational tools, best-practice protocols and clinical aids, you can:

- Select the right product based on type of incontinence
- Help your staff promote normal bladder function
- Meet standards of practice
- Improve care outcomes
- Be "survey ready" at all times

The Survey Readiness: Tag F315 box

A key component of the Compass Fit Right Program is the Survey Readiness: Tag F315 box. This convenient package comes to you full of resources to help you and your staff take the guesswork out of developing an effective incontinence management program at your facility.

What's in the box?

- DON manual – a "teacher's guide" for the program
- Survey readiness resource books – can be conveniently placed on treatment carts or at nurses' stations
- A four-DVD set – educates staff on all aspects of incontinence
- Rulers – to assist in proper sizing
- Continuous pressure ulcer prevention booklets – to encourage and improve communication and documentation on pressure ulcers
- Tablets of forms – for documenting key F315 issues

FIT RIGHT PROGRAM

A custom cost analysis

We know you want to do what's best for your residents – and we know that cost is a concern. To help you provide ideal care and contain costs, Medline will partner with you to create a custom cost analysis.

Our team of experts will analyze your facility's current incontinence product usage and compare it to industry usage benchmarks. We'll then create projected patient-per-day costs based on your facility's needs.

Follow-up care

Once an incontinence management plan is in place, Medline helps guarantee it's a success! This is done by:

- Developing formulary and par levels
- Providing a disposable incontinence product identification system
- Implementing a product distribution protocol
- Providing on-site clinical and sales support

Medline will also generate automated reports and continue to monitor your product utilization costs in terms of your goals. Based on these reports, possible recommendations and interventions to lower costs will be presented to you.

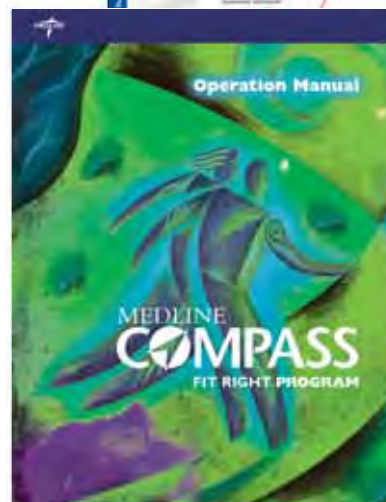

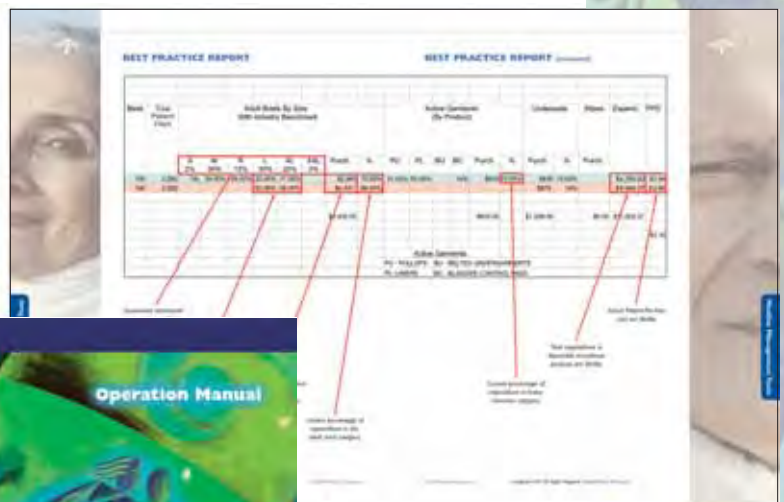

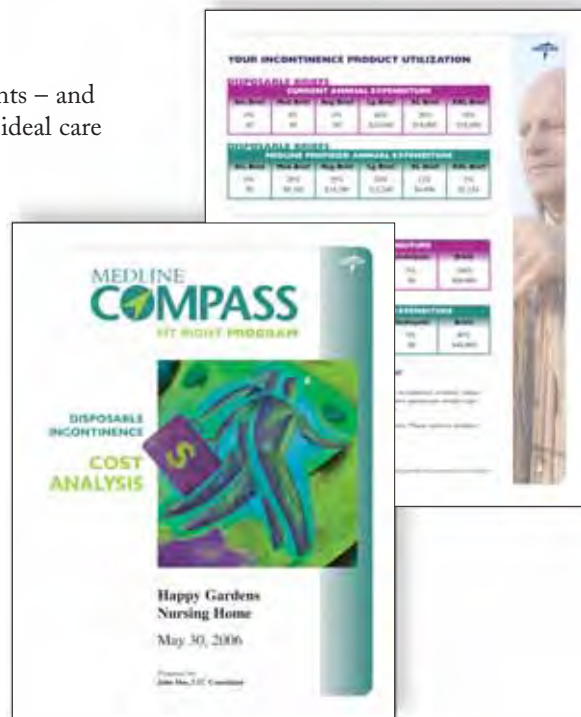

Financial programs

Budgeting for a successful incontinence management program can cause a strain on facilities.

To that end, Medline offers:

- A consignment program to improve cash flow
- Extended credit terms
- A leasing program for capital goods
- A rebate program for guaranteed savings

Sizing Guide

Measure the hips or waist (select the larger of the two) as follows:

- Step 1:** Measure hip bone to hip bone and over the abdomen
- Step 2:** Double the largest measurement obtained in Step 1 and add two inches
- Step 3:** Using this figure, make product size selection from the chart below

EXAMPLE

Hip bone to hip bone = 19 inches

19 inches x 2 inches =

38 inches + 2 inches = 40 inches

40 inches = Medium/Large brief

PRODUCT SIZING GUIDE

BRIEF SIZE SELECTION

MEDLINE BRAND	MOLICARE® CLASSIC PLUS

Finally...a brief with
total protection that's
completely breathable.

The ultimate innovation

Every inch of an Air Active brief is *fully breathable* (not just the side panels). For the first time, you get complete comfort and maximum airflow for improved skin health.

Cutting-edge technology

- ▶ Advanced Three-Part Core with curly fiber dramatically decreases odor
- ▶ Refastenable, stretchable tape tabs for better comfort and fit
- ▶ Revolutionary design ensures
 - generous cut
 - cost savings
 - discreet fit
 - dignity

Protection that lets you breathe 100 percent easier.
