It is important that you **Save** your job filing any time you make changes, otherwise your changes will be lost.

If you're creating a new filing you'll need to complete the **Location Information, Applicant Information, and Job Description** sections in order to save it the first time. The following message will appear when you save successfully:

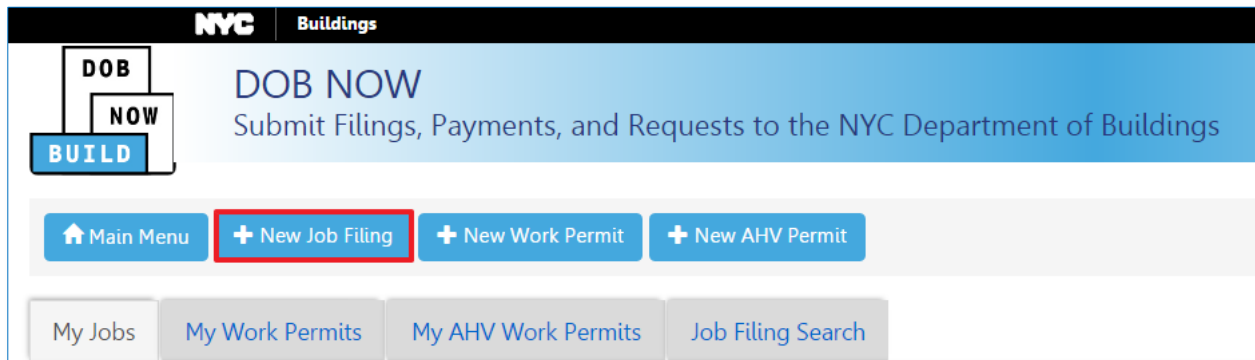

If you have not yet completed the required fields, you'll receive the message below, which specifies what sections still need to be completed:

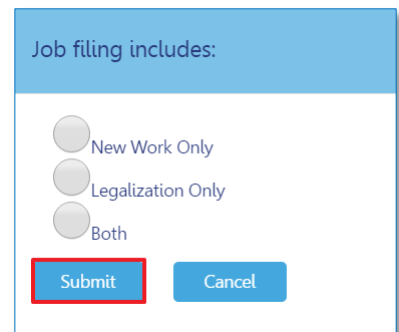

## Enter a New Job Filing

This section guides you through how to enter a new job filing from the main dashboard. To begin a new job filing, click on the **+ New Job Filing** button located in the upper right on the dashboard screen.

A Dialog Box with the following options will open:

- **New Work Only:** Select this option when submitting an application for new work only
- **Legalization Only:** Select this option when submitting an application for legalization only
- **Both:** Select this option when submitting an application for both new work and legalization

Select the type of job filing from the list and click on **Submit**. Clicking on **Cancel** will return you to the dashboard.

*Please note: If you need to change your selection, you will be able to do so once the form opens.*

There can only be one Design Professional, Filing Representative and Owner assigned per filing on the Portal. However, the Filing Representative and Contractor can be changed (only if permit has not been issued) through processing a Post Approval Amendment (PAA).

If a job filing has been submitted to DOB but NOT approved, it is possible to make a correction. Design Professionals can initiate, save corrections, and file it.

The Scope of Work form needs to include all planned work that is part of the job filing. The steps below describe how to complete each section of the **Scope of Work** form.

*Please Note: The Work Type cannot be selected in the Scope of Work screens. What is shown in the Scope of Work screens is based on the previous work type selection in Section 6 of PW1 form. To change this information, it must be changed on the PW1 first.*

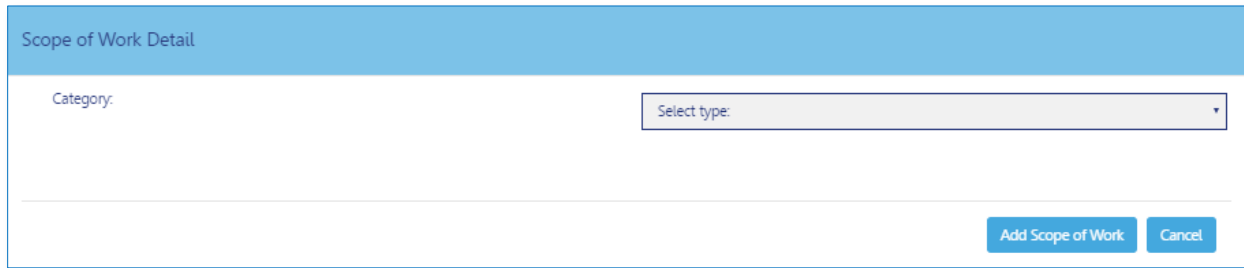

## Add Scope of Work Items

1. **New Work Only:** If the job involves only new work, click on **+Add** to add items to the scope of work.
2. **Legalization Only:** If the job involves only legalization, click on **+Add** to add items to the scope of work.

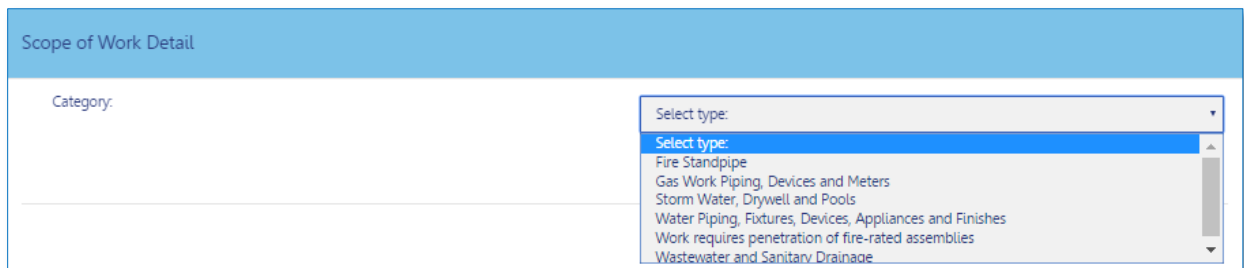

*Please Note: If the job involves both new work and legalization work, there will be two grids. Click on **+Add** to add items to the scope of work respectively for **New Work** and **Legalization**.*

## QA Failed

### QA Failed at Permit Level – For Standard Plan Exam or Professional Certification (without PW2) Filings

After a PW2 has been submitted to DOB, it is reviewed by a QA Clerk. If there are any issues with the submission, such as missing required documents, the QA Clerk will fail the submitted PW2, and the status of the permit will be changed to QA Failed. The Contractor will need to go to the PW2 screen and fix the issue and resubmit the filing.

To address the issue, first locate the job filing that has failed on your dashboard under the **My Work Permits** tab and open it.

After resolving the issue, you'll need to re-submit the filing. Only the Contractor can re-submit the filing. To re-submit, scroll to the bottom of the PW2 window and click on the **Re-Submit** button.

After resubmitting the filing, both fields will be greyed out and you will not be able to make any additional changes.

## QA Failed at Job Level – For Professional Certification (with or without PW2) Filings

If during the Professional Certification QA Clerk review process there is an issue with the filing, the Professional Certification QA Clerk will fail it and the status of your filing will be updated to QA Failed. A filing can only fail at the job level when it is a Professional Certification filing, and it has been failed by the Professional Certification QA Clerk.

To address the issue, first locate the job filing that has failed on your dashboard under the **My Jobs** tab and open it.

Once the job filing window is open, under the **Fees** section there will be a **Failure Reason** section that displays the failure details. This will provide the reason for why the filing failed. The status for the failure will also be Open.

Once you resolve the issue, go to the **Status** dropdown and update the status to Resolved.

A screenshot of a web form showing a label 'Status:' followed by a dropdown menu. The dropdown menu is open and displays the word 'Resolved' with a downward-pointing chevron icon on the right side.

After resolving the issue, the filing will need to be re-submitted to DOB. When a filing fails at the job level, the Design Professional and Owner will need to once more provide attestation (electronic signature) and only the Design Professional can re-submit the filing.

After resubmitting the filing, both fields will be greyed out and you will not be able to make any additional changes.
