The **Schedule Sales Query (SSQ)** enables you to easily access the sales reported by our Federal Supply Schedule contractors. The report generator allows you to quickly select a preformatted report for the information you need. To facilitate the process, the ten formats were developed based on historically requested data. Some of the reports will instruct you to selected either a Schedule number, a Fiscal Year, a Contract number, or a Company name. Unsure about the Schedule or contract number for your report?? The [Schedules e-Library](#) is a valuable source of information, so click over if you need extra facts before selecting the report format.

Schedule Sales Query presents sales figures as reported to GSA by contractors. The reports are generated as quarterly reports for the current year and the past five fiscal years. The sales data reported here are updated as contractors' reports are received, but the data may not be up to date. The information on this site is used by GSA for contract administration and fee management. It is not the official source of sales data. This data should be used for informational purposes only.
