

THE DESIGN EDGE

A new headquarters has been constructed in Hertfordshire, which perfectly showcases the complete range of products from DORMA UK.

The centrepiece of the new building is the glass façade, which features the spider fixing from the MANET Construct range. A perfect demonstration of what DORMA stands for: high quality, precision-engineered product which is perfect for the application.

DORMA OFFERS THE TOTAL PACKAGE AROUND THE DOOR AND BEYOND. FROM DOOR HARDWARE TO GLASS FITTINGS, AUTOMATIC DOORS AND MOVABLE WALLS TO SECURITY PRODUCTS, ALL BACKED UP BY SERVICE AND MAINTENANCE.

WE WORK WITH ARCHITECTS AND DESIGNERS TO ENSURE OUR PRODUCTS MEET THE DEMANDS OF THE PROJECT IN TERMS OF PERFORMANCE, QUALITY AND DESIGN. THESE MODULAR PRODUCTS AND SERVICES CAN BE CO-ORDINATED AND TAILORED TO YOUR NEEDS ALL FROM UNDER ONE ROOF, ENSURING TOGETHER WE MAKE THE DIFFERENCE.

AUTOMATICS. SETTING THE STANDARD.

Automatics Division

With the introduction of the Disability Discrimination Act, automatic doors have become an increasingly important element within the building. DORMA offers a wide range of automatic doors to provide the perfect solution every time.

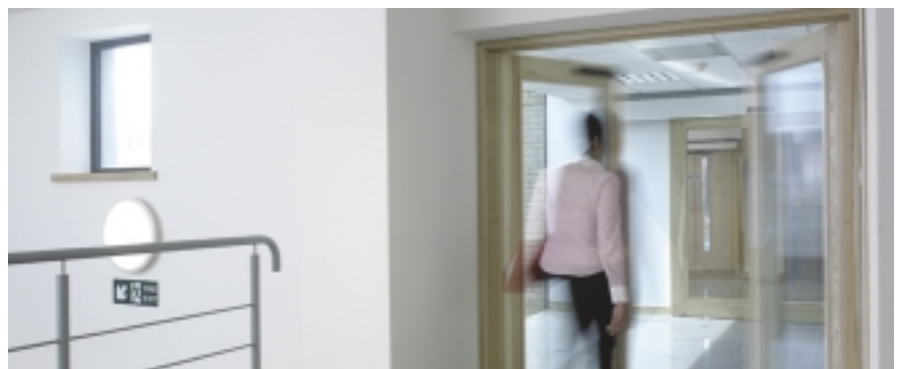

As part of our supply and install service, we offer the complete door package, ensuring that all the relevant safety standards are met.

Sliding Doors

Our sliding doors provide an inviting and friendly entrance to any building with their fast, smooth motion and ease of use. DORMA quality in production and installation ensures reliability combined with the highest levels of safety.

Swing Doors

DORMA swing door operators are ideal for both internal and external doors. They can be used for new build and are particularly suitable for automating existing doors within a building.

Low Energy Swing Doors

Our low energy door operators offer a simple solution to increased access for people with disabilities. The door can be opened manually or will open and close automatically at the push of a button.

Space Saving Doors

If operating space is limited, for instance in a corridor, the ideal solution is a folding or space saving door.

Revolving Doors

DORMA offers automatic and manual revolving doors which combine visual appeal with robust practicality, making them ideal for heavy usage in high traffic areas such as shopping centres, supermarkets, hotels, offices and airports.

DOOR HARDWARE. MORE THAN JUST DOOR CLOSERS.

Door Controls Division

DORMA is justifiably renowned as the market leader in door closers, creating new standards for innovation. DORMA invented the cam-action door closer, which due to its unique heart shaped cam ensures that the resistance encountered in opening a door decreases almost instantly with the opening action. So even children, the elderly or people with disabilities have fewer problems opening the door.

Another example of innovation is the ITS96 door closer, which is concealed within the door leaf to maintain the aesthetic integrity of the door.

DORMA also manufacture a wide range of door hardware, which includes door furniture, locks, floor springs, electromagnetic devices and panic hardware.

hardware@dorma-uk.co.uk

DORMA patch fittings, locks and rails allows an almost endless variety of options for the construction of toughened glass door assemblies. And for an extra touch of style, ARCOS fittings can be used.

**GLASS FITTINGS.
THE BENEFITS ARE
CLEARLY VISIBLE.**

Glass Division

The MANET Concept system allows the integration of pivoting or sliding doors; after that the design possibilities are only limited by your imagination. The single point fixings are equally suitable for fixing to floors, ceilings or walls. As the load bearing structure is reduced to an absolute minimum, the aesthetic effect of large areas of smooth flat glass is maximised.

glass@dorma-uk.co.uk

BEYOND THE DOOR. STRUCTURAL GLASS AND WASHROOMS

As DORMA has built its reputation in the construction of toughened glass door assemblies, it was a simple step to apply our know-how to the creation of both glass washroom and structural glass systems.

MANET Construct allows the design concept to be continued on the structural glazing within the building. Façades can be created using spiders and single point fixings. Load bearing MANET EV fixings are perfect for balustrades.

Complementing DORMA's structural glazing range our RODAN range. Canopies, roofs and façades can be created through the system of tie rods and single point fixings.

Glass cubicles are ideal for wet areas and can create a high quality image for any washroom. They are hard wearing, hygienic, easy to clean and have excellent anti-vandal qualities.

DORMA can also supply complementary glass vanity units and partition screens.

MOVABLE WALLS. TRANSFORMING SPACE.

Movable Walls Division

Regardless of their characteristics and function, rooms can be effortlessly partitioned, made smaller, larger or re-proportioned to suit individual requirements. Any area from a small conference room to a large exhibition hall can be optimally adapted to suit varying numbers of users. DORMA movable walls have excellent sound insulation to allow different events to take place in adjacent areas.

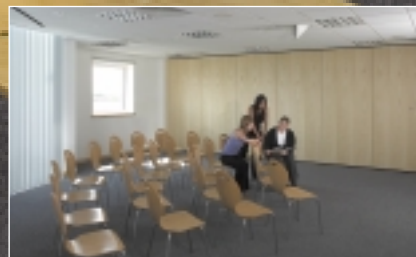

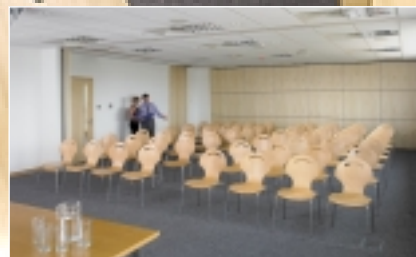

movablewalls@dorma-uk.co.uk

From one large conference room...

...the first wall moves into position...

...to create a smaller conference area with a smaller meeting room behind.

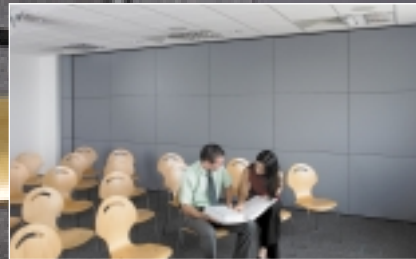

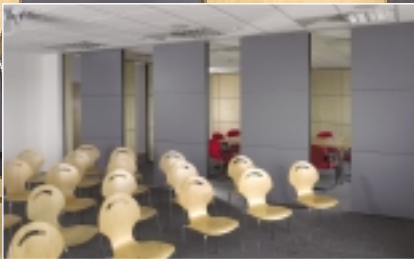

Or the second wall can be moved into position...

...to create three separate rooms...

...all at the touch of a button.

YOUR AUTOMATIC CHOICE FOR ACCESS SOLUTIONS.

Disability Discrimination Act 1995

Under the DDA, service providers have to make reasonable adjustments to the physical features of their premises to overcome physical barriers to services from 1st October 2004 onwards.

Many companies see this as simply providing automatic entrance doors. However DORMA take a systematic approach to assisting people with disabilities, with access throughout a building. They have carefully selected products throughout their range, which provide practical and economic access solutions.

SERVICE. ALL THE BACK UP YOU NEED.

Service Division

The DORMA package offers co-ordinated design backed up with lifelong reliability through our service division.

We can offer a range of maintenance programmes and 24-hour emergency cover using our nationwide network of fully employed and trained engineers. For automatic, manual and industrial doors, we're only a phone call away.

Reactive Servicing

DORMA provide reactive servicing and maintenance on a non-contracted basis. Basically this means that if you have a breakdown or malfunction you can call us in to repair or replace the faulty door even if you don't have a service contract with us.

Preventative Servicing

Our planned or preventative servicing and maintenance is undertaken on a contracted basis.
