

AIR TAHITI NUI

Dreams

COME TRUE

WELCOME

Ia Orana

Vivid turquoise lagoons, soaring lava-rock peaks, lush tropical plants, beautiful, hospitable people. These natural wonders fill the senses of all those that set foot on our islands. But we believe our guests should feel the spirit of Tahiti from the moment they step onboard. And so, to coincide with our 20th year of operations, we proudly unveil The Tahitian Dreamliner. This technological marvel detailed with the story, heart and soul of Tahiti will captivate our guests and deliver what we believe to be the ultimate travel experience.

OUR INSPIRATION:

Mana

Every culture centers around an unmistakable spirit. For the people of Tahiti, this is *Mana*. It is a force that flows through all living things, places and objects.

It inspires us to be protective of our islands, but also to share them generously with the world. It connects us toward common goals, but also drives us to make our individual mark. It moves us to boldly chase a better future, while respecting the teachings of our past. It is the luster of the black pearl, the unique recipe of a family's *monoi*, the iridescent shimmer of the rainbow fish, the melody from a ukulele rolling gently through palm leaves, the ocean surges that renew the lagoons, the ray, the peak, the reef, a Mama's smile.

So, when designing The Tahitian Dreamliner, we were not only inspired by Mana, we wished to express it so clearly, our guests would feel it, understand it and take it with them back to their home.

The background of the advertisement is a photograph of two Air Tahiti Nui crew members. On the left, a female flight attendant in a teal uniform with a white ruffled collar and a black sash is smiling. On the right, a male steward in a dark blue suit with a teal shirt and tie is holding a silver tray with a bouquet of white flowers. The background is a blurred airport tarmac with a blue sky. On the far left, there is a large, stylized teal graphic of a Tahitian 'Nui' symbol.

Nui

20 YEARS OF AMBASSADORSHIP

As you will see in the design details of The Tahitian Dreamliner, we at Air Tahiti Nui believe each of us serves as an ambassador of our homeland.

The *Nui* in our name literally means “Big” as in the big carrier to The Islands of Tahiti, but Tahitians know *Nui* can also mean “Grand” and “Great” which captures aspects of our adventurous spirit, our desire to connect with the healing power of nature, and the love and pride we have for our culture.

As we chart our course of the next 20 years, the idea of *Nui* will be a shining star that guides us forward. We will challenge ourselves to examine every part of the travel experience we provide our guests to find ways to make it more relaxing, more immersive, and more “*Nui*.”

And the clearest example of this yet: the 3 year journey, from idea to purchase to design of 4 Boeing 787-9s...our new fleet of what we call The Tahitian Dreamliner.

INTRODUCING THE

Tahitian Dreamliner

Our Dreamliner fleet begins a new chapter in our proud history of connecting Tahiti to the world. We've selected what we believe to be the best aircraft flying the skies, the Boeing 787-9, and we've made it uniquely Tahitian. Come fly with us and be among the first to be carried to your dream destination on the wings of our Dreamliner.

Our new livery

THE COLOR STORY

Three shades of blue draw inspiration from the ocean, the lagoon and the skies over Tahiti.

THE TATTOOS

A collection of tattoos graces the rear portion of our fleet and tells a visual story about Tahiti and its people.

The tiare is encircled by ripples on the water with flocks of birds that represent friendship and helping others.

A manta ray represents wisdom, protection and elegance, while a whale represents strength and abundance.

The Albatross represents freedom and the ability to rise above to gain an elevated perspective.

A Tiki and Tiki eye watch over our flights, providing symbolic protection.

Ocean waves represent our ancestral home, life and continuity.

Fish hooks are a symbol of prosperity, abundance and luck.

THE TIARE

From the very beginning, a white tiare, a symbol of beauty in Tahiti, has adorned our tails. And while our fleet and livery design has changed, we have kept the original tiare unchanged, carrying us into the future while being a proud reminder of our past. Each guest receives a real tiare flower upon arrival, a living, beautifully fragrant extension of our mark.

THE FLAG AND REGISTRATION NUMBERS

Our Tahitian Dreamliner carries two red lines on its sides representing the flag of our home, a symbol of our people and the 118 different Islands of French Polynesia.

All international airplanes are assigned a 2 letter registration code designating its country of origin, and 3 more letters unique to each plane. We've used those 3 letters for meaningful Tahitian words: MUA, (forward), NUI (big), VAA (canoe), TOA (warrior). Woven together our fleet names have a hidden meaning: *The warrior (TOA) going forward (MUA) in the great (NUI) canoe (VAA)!*

Like Tahiti in the air

BREATH CLEAN AIR

The unspoiled beauty of Tahiti may best be expressed in something visitors can't see: the clear, fresh air. On The Tahitian Dreamliner, the air goes through an innovative purification method known as gaseous filtration. By cleaning the cabin air of gaseous contaminants and offensive odors, our guests will experience fewer throat, eye and nose irritations.

TAKE IN THE VIEW

The windows are the largest of any jet – almost 80% percent larger than our previous fleet– and positioned higher, so every passenger can see out to the horizon for visual relief and an open cabin feel. Windows can be dimmed electronically at the touch of a button, allowing you to choose the brightness you prefer.

YOUR FORECAST: LOW PRESSURE AND COMFORTABLE HUMIDITY

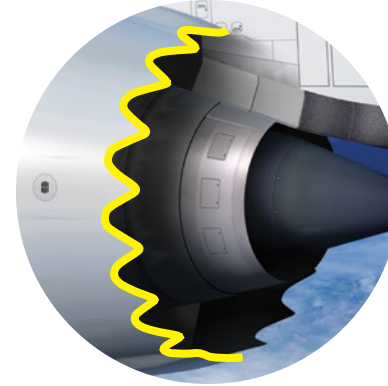

Intercontinental travel can take its toll on your body and steal time away from the point of your vacation, to relax and refresh. The Tahitian Dreamliner addresses two common sources of fatigue from travel. While most airplanes are pressurized to a typical cabin altitude of 6,500 to 7,000 feet, a stronger composite fuselage means the 787 can be pressurized to 6,000 feet, which studies have demonstrated is significantly more comfortable. The cabin also delivers a higher humidity level than in other airplanes, which has been shown to reduce symptoms of dryness and increase comfort for passengers.

It is this precise tropical humidity that gives to the Polynesian sky its incredible deep blue and spectacular sunsets.

To emulate this atmosphere, the Tahitian Dreamliner is equipped with the last generation of LED lighting technology that can create an infinite combination of mood scenes.

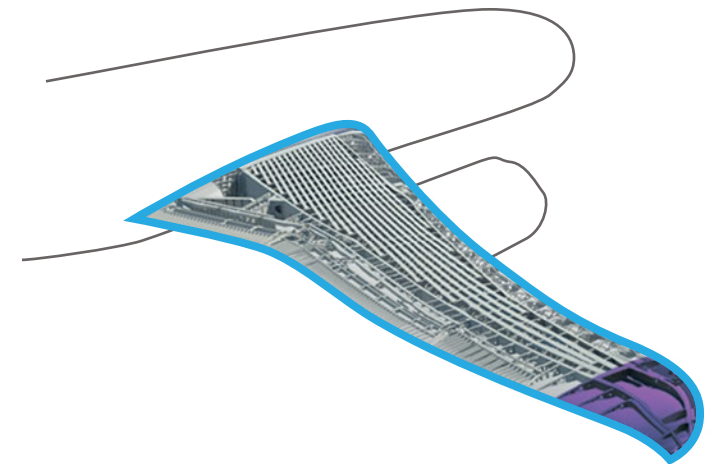

Our guests will gently wake up with the mauve and pink of Gauguin's color palette, or dine in the cozy atmosphere of a never ending sunset, a scene that we have named Tahitian Bliss.

More features, less impact

ESCAPE THE NOISE

Breaking waves, gently swaying palm leaves, a melodic “*Maūru’uru*” (thank you). This is the pleasant soundscape of Tahiti. The Tahitian Dreamliner generates a 60 percent smaller sound footprint than that of the airplanes it replaces. Advances by General Electric in engines and engine casings reduce noise and make travel more pleasant for guests, crew and those that live near airports.

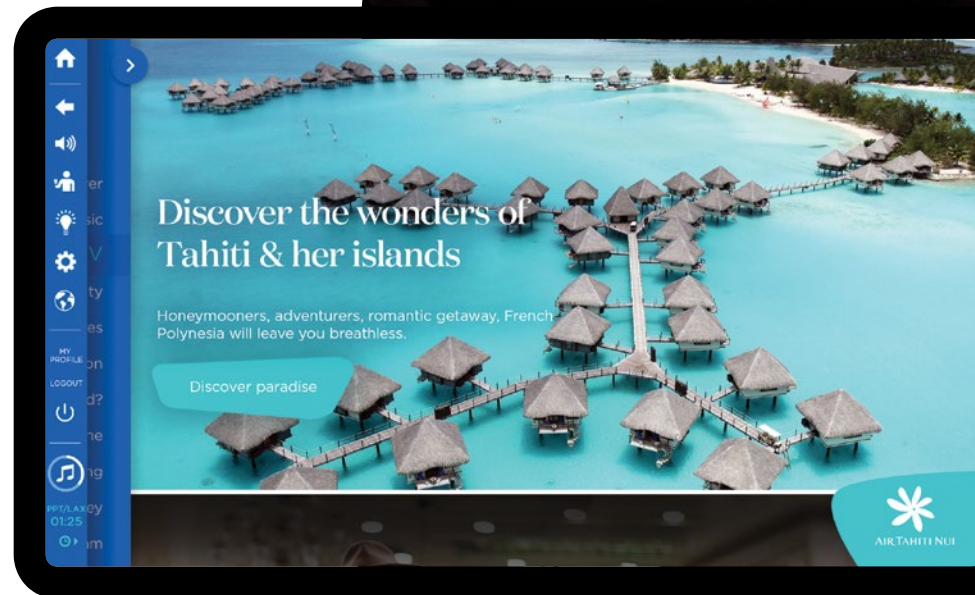

SAIL SMOOTHLY

As if like a traditional outrigger canoe gliding across a calm lagoon, The Tahitian Dreamliner cuts through the air using Smoother Ride Technology. Smart sensors detect turbulence as it comes and adjust control surfaces automatically. The result: up-and-down movement is reduced for a consistently smooth, more comfortable ride and an eightfold reduction in motion sickness.

HELP PROTECT THE ISLANDS

Having an ancestral history of thriving from the gifts the land and sea provides makes us protective of the environment. So when it came to select our next fleet, low impact specifications were critical factors in the decision. With fuel efficiency that's 20 to 25 percent less than the airplanes it replaces and a full 10 percent better than today's competition, The Tahitian Dreamliner delivers 20-25 percent fewer CO2 emissions as well. The elegant design of the iconic Dreamliner wing features smoother surfaces, a simpler structure and fewer parts, all of which improve airflow for better fuel efficiency. Overall, the Dreamliner is manufactured using fewer harmful chemicals and with less scrap and waste than other traditional airplanes. And the materials are recyclable when the airplane is eventually retired.

Sights to see

STAY ENTERTAINED & CONNECTED

At every turn, Tahiti excites and entertains. While on board our Tahitian Dreamliners, you'll have access to Panasonic's most advanced Inflight Entertainment (IFE) system in operation today. Audio Video on Demand (AVOD) at every seat through multi-touch screens ensures that every passenger enjoys an immersive and entertaining experience while onboard. Business class seats will be equipped with 16-inch screens, Premium Economy will feature 13-inch screens and Economy class will have 12-inch screens.

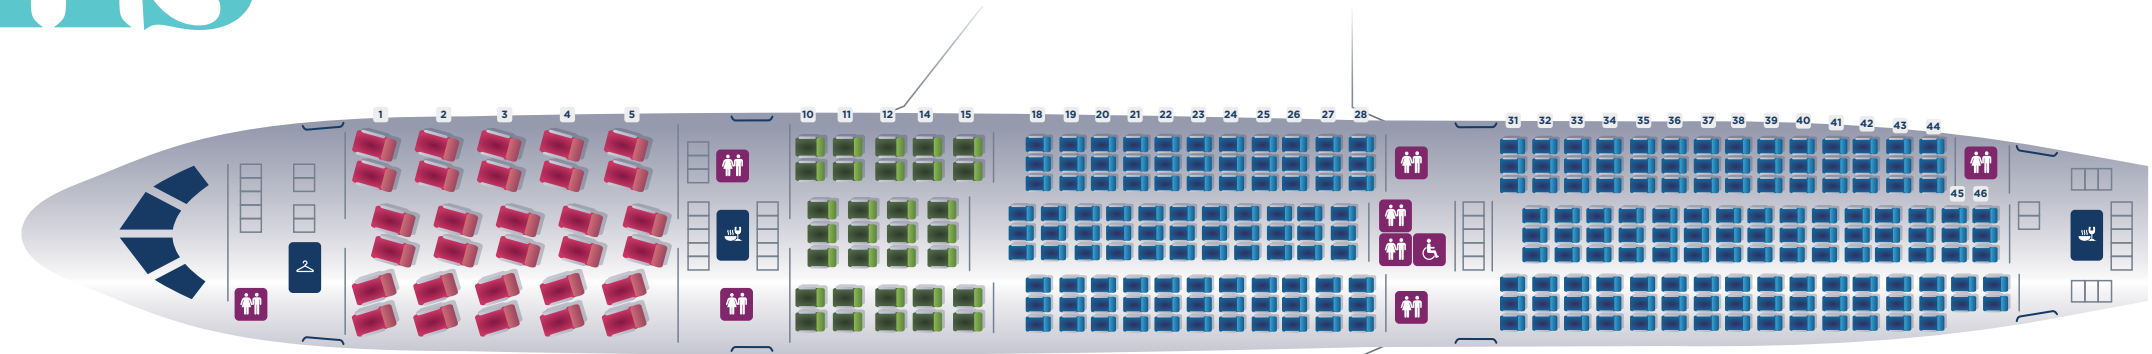

Guests will be able to stay connected with Panasonic's eXConnect satellite broadband during the airline's short- and long-haul flights from Los Angeles, Paris, Auckland and Tokyo to Tahiti. Additionally, high speed internet will be accessible directly with the in-seat system and via PDA through onboard Wi-Fi.

Our Cabins

With an annual visitor total that equals a week in the more densely packed Hawaii, nothing is easier in Tahiti than escaping into open spaces. The Tahitian Dreamliner's spacious architecture welcomes you on board, helping you leave behind the annoyances of getting to and through the airport. The tall, dramatically lit entryway is wide and welcoming, evoking a sense of the sky that continues throughout the airplane. The vaulted ceiling stretching upward for extra space and sidewalls that are more vertical give you more shoulder and head room.

POERAVA Business
30 seats

MOANA Premium
32 seats

MOANA Economy 1
99 seats

MOANA Economy 2
133 seats

POERAVA BUSINESS CLASS

Our famous Poerava Business Class has been enhanced with the introduction of a 180-degree full-flat seat designed by Rockwell Collins. The Parallel Diamond, designed to optimize space, includes a wide range of storage areas. The cabin features a total of 30 seats configured in five rows on a six-abreast (2-2-2) arrangement. Installed at a 60 inches of pitch, the new business class product moves into a fully flat 78 inches bed for sleeping. Each seat is equipped with a luxurious cushion and cover comfort system for restful travel. The seats also offer an individual touch screen remote control for the inflight entertainment system, personal lighting and privacy divider.

The onboard amenities include: a thick duvet, one large and comfortable pillow and a luxury kit of accessories.

MOANA

PREMIUM ECONOMY

The Tahitian Dreamliner inaugurates Air Tahiti Nui's first premium economy product. ZODIAC Aerospace is providing our new Z535 Premium Economy class seat. The cabin offers a more comfortable flying experience with extra leg room and relaxation space. The Z535 seat features a unique recline motion that cradles the passenger while optimizing living space. The 20.4 inches wide seats are installed at a pitch of 38 inches and offer a recline of 8 inches. The Moana Premium features a total of 32 seats configured in five rows on a seven-abreast (2-3-2) arrangement.

The onboard amenities include: a comfortable polar blanket, one big pillow and a complete kit of accessories.

MOANA ECONOMY

The two Moana Economy class cabins feature a total of 232 seats specially designed for long-haul travel by ZODIAC Aerospace. The Z300's articulating seat pan makes it one of the best next generation long-range economy class seats available in the industry. The economy class seats are installed on a nine-abreast (3-3-3) configuration with a pitch of 31 inches offering a seat recline of 6 inches for improved comfort.

The onboard amenities include: a comfortable polar blanket, one comfortable pillow and a complete kit of personal accessories.

WORLD-CLASS Hospitality

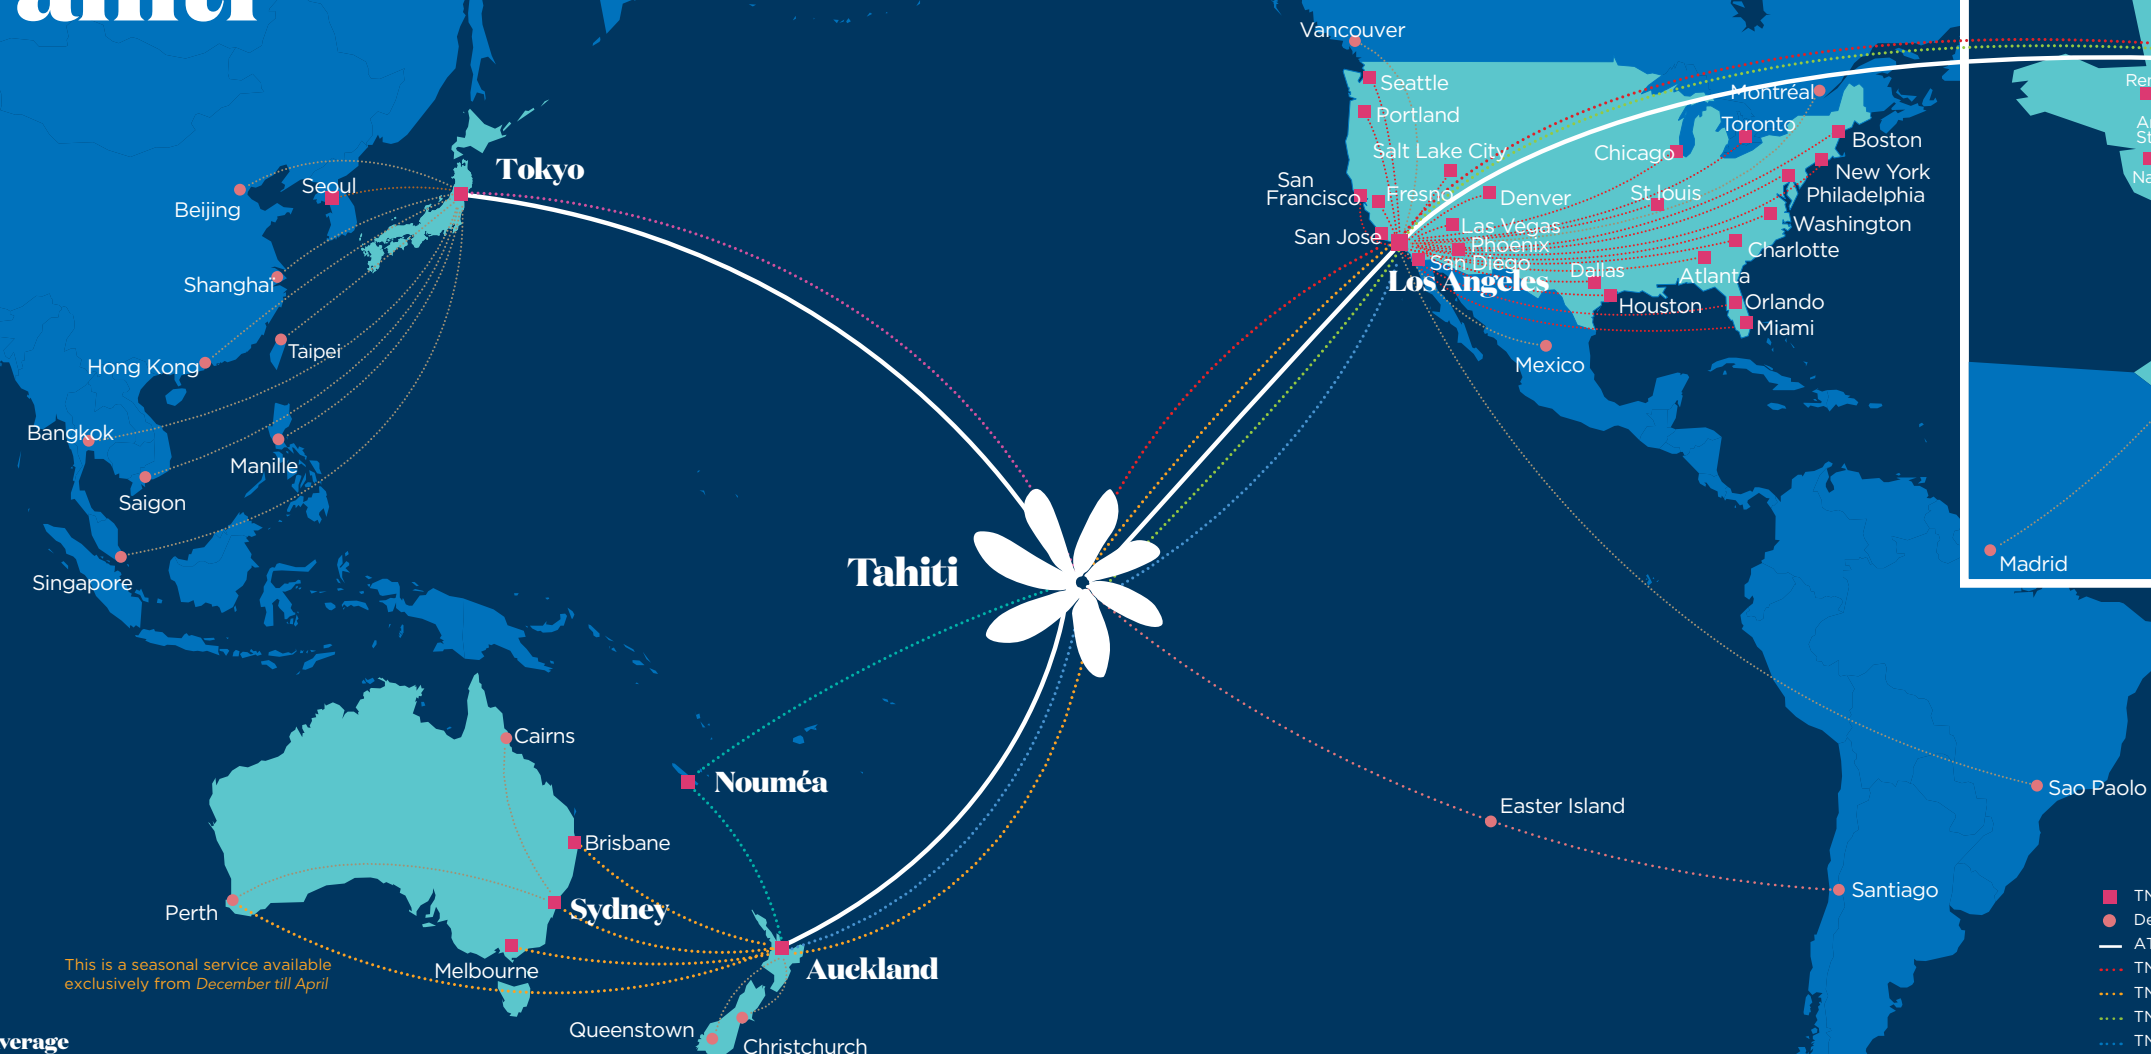

Warm hospitality is in the hearts of all Tahitians. Our cabin crews take pride in making every guest feel welcome, comfortable and cared for— a fitting representation of Tahiti at 35,000 feet. Guests are delighted when our crews change from formal uniforms to more comfortable, resort-style wear.

Our inflight menu offers delicious meals with Polynesian and French culinary influences and can be paired with wines from France and the New World. As an all-inclusive airline, guests can enjoy amenities without hassle or concern.

Connecting the world to Tahiti

This is a seasonal service available exclusively from December till April
