DVR User Manual

For H.264 4/8-channel digital video recorder All rights reserved

CAUTION

• Please read this user manual carefully to ensure that you can use the device correctly and safely.

• There may be several technically incorrect places or printing errors in this manual. The updates will be added into the new version of this manual. The contents of this manual are subject to change without notice.

• This device should be operated only from the type of power source indicated on the marking label. The voltage of the power must be verified before using. If the device doesn't work for a long time, pull out the plug from the socket.

- Do not install this device near any heat sources such as radiators, heat registers, stoves or other device that produce heat.
- Do not install this device near water. Clean only with a dry cloth.
- Place the device in a well-ventilated area.
- Do not power off the DVR at normal recording condition! The correct operation to shut off DVR is to stop recording firstly, and then to select "shut-down" button at the right of the menu bar to exit, and finally to cut off the power.

• This machine is indoor using equipment. Do not expose the machine in rain or moist environment. In case any solid or liquid get into the machine's case, please cut off the power supply immediately, and ask for qualified technicians to check the machine before restart

• Do not try to repair the device by yourself without technical aid or approval.

• When this product is in use, the relevant contents of Microsoft, Apple and Google will be involved in. The pictures and screenshots in this manual are only used to explain the usage of our product. The ownerships of trademarks, logos and other intellectual properties related to Microsoft, Apple and Google shall belong to the above-mentioned companies.

• This manual is suitable for 4/8-channel AHD digital video recorders. All examples and pictures used in the manual are from 4-channel DVR.

1 Introduction

1.1 DVR Introduction

This model is standard 4/8 CH real time 720P high resolution AHD DVR(Analog High Definition Digital Video Recorder), which adopts high performance video processing chips and embedded Linux system. Meanwhile, it utilizes many most advanced technologies, such as standard H.264 with low bit rate, Dual stream, SATA interface, VGA output mouse supported, IE browser supported with full remote control, mobile view(by phones), etc., which ensure its powerful functions and high stability. Due to these distinctive characteristics, it is widely used in banks, telecommunication, transportation, factories, warehouse, and irrigation and so on.

1.2 Main Features

COMPRESSION FORMAT

• Standard H.264 compression with low bit rate and better image quality

LIVE SURVEILLANCE

- Supports HDMI/ VGA output
- Supports 4/8 CH AHD video input
- Supports channel security by hiding live display
- Display the local record state and basic information
- Supports USB to make full control

RECORD MEDIA

• Supports one SATA HDD to record for a longer time without any limitation

BACKUP

- Supports USB 2.0 devices to backup
- Supports saving recorded files with AVI standard format to a remote computer through internet

RECORD & PLAYBACK

- Record modes: Manual, Schedule and Motion detection recording
- Supports recycle after HDD full
- Resolution, frame rate and picture quality are adjustable
- 4 /8CH 720P recording
- 1 audio channels available
- Three record search modes: time search, event search and image search
- 4/8 channels playback simultaneously
- Supports deleting and locking the recorded files one by one
- Supports remote playback in Network Client through LAN or internet

ALARM

- Supports schedule for motion detection
- Supports pre-recording and post recording

PTZ CONTROL

- Supports various PTZ protocols
- Supports 128 PTZ presets and 8 auto cruise tracks
- Supports remote PTZ control through internet

SECURITY

• Customize user right: log search, system setup, two way audio, file management, disk management, remote login, live view, manual record, playback, PTZ control and remote live view

- Supports 1 administrator and 63 users.
- Supports event log recording and checking, events unlimited

NETWORK

- Supports TCP/IP, DHCP, PPPoE, DDNS protocol
- Supports NAT technology
- Supports IE browser to do remote view
- Supports QRCODE Scanning through mobile phone client
- Supports setup client connection amount
- Supports dual stream. Network stream is adjustable independently to fit the network bandwidth and environment.
- Supports picture snap in remote live
- Supports remote time and event search, and channel playback with picture snap
- Supports remote PTZ control with preset and auto cruise
- Supports remote full menu setup, changing all the DVR parameters remotely
- Supports mobile surveillance by phones with iPhone & Android OS
- Supports CMS/NVMS to manage multi devices on internet

2 Hardware Installation

2.1 Install Hard Drive

Check the unit and the accessories after getting the DVR. Please don't power up the unit till the physical installation is complete.

Notice: 1. This series support one SATA hard drive. Please use the hard drive the manufacturers recommend specially for security and safe field.

2. Please calculate HDD capacity according to the recording setting. Please refer to "Appendix B Calculate Recording Capacity".

① Loosen the screws on the back and side of the device to remove the cover.

(3) Put the HDD on the bottom of the device.

(5) Connect the power and data cables.

(2) Take out the HDD.

(4) Turn over the device and fix the HDD with the screws.

(6) Install the cover back and fix it with the screws.

2.2 Front Panel Descriptions

The front panel descriptions are only for reference; please make the object as the standard.

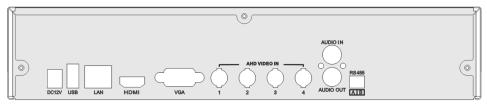

Front panel I

Name	Description
REC	When recording, the light is blue
Net	When access to network, the light is blue
Power	Power indicator, when connection, the light is blue
Fn	Switch the resolution of the VGA or HDMI output

Front panel II

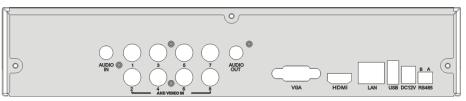

Name	Description
Power indicator	Power Indicator, when connected, the light is blue.
HDD indicator	The light turns blue when reading/writing HDD.
Net indicator	The light turns blue when it is able to access the network.
Backup indicator	The light turns blue when backing up files and data.
Play indicator	The light turns blue when playing video.
REC indicator	The light turns blue when recording
Record button	Record manually
Play button	Enter play interface
REW button	Rewind key
FF button	Fast forward
MENU/+ button	1. Enter menu in live 2. Increase the value in setup
BACKUP/- button	1. Decrease the value in setup 2. Enter backup mode in live
STOP/ESC button	1. Quit play mode 2. Exit the current interface or status
Direction button/	Change direction to select items
Multi-screen	Change screen display mode like1/4/9/16 channel
Enter button	Confirm selection
USB	Connect to USB mouse, or USB storage device

2.3 Rear Panel Instructions

Rear Panel for 4 CH

AHD DVR User Manual

Rear Panel for 8 CH

Name	Descriptions
AUDIO IN	1 CH Audio Input.
AHD VIDEO IN	4 CH AHD Video Inputs.
AUDIO OUT	Audio output, connect to the sound box.
VGA	VGA Port. Connect to monitor.
HDMI	HDMI Port. Connect to high-definition display device.
LAN	Network Port.
USB	To connect external USB devices like USB mouse or USB storage device.
DC12V	DC12V Power Input.
RS485	Connect to keyboard or speed dome; A is TX +; B is TX

2.4 Remote Controller

It uses two AAA size batteries.

- ① Open the battery cover of the remote controller.
- (2) Place batteries. Please take care the polarity (+ and -).
- ③ Replace the battery cover.

Key points to check in case the remote doesn't work.

- 1. Check batteries polarity.
- 2. Check the remaining charge in the batteries.
- 3. Check IR controller sensor for any masking.

If it still doesn't work, please change a new remote controller to try, or contact your dealers.

The interface of remote controller is shown below.

Button	Function			
REC	Record manually.			
Search	To enter search mode.			
MEUN	To enter menu.			
Exit	To exit the current interface.			
ENTER	To confirm the choice or setup.			
Direction	T			
button	To move cursor in setup.			
ZOOM	To zoom in.			
PIP	To set picture in picture.			
► ► ► ► ►	To control playback. Play/Pause/Stop/Previous			
	Section/Next Section/Rewind/Fast Forward.			
Multi	To choose multi screen display mode.			
Next	To switch between single picture and picture group.			
SEQ	To enter auto dwell mode.			
INFO	Get information about DVR like firmware version, HDD information.			

2.5 Control with Mouse

2.5.1 Connect Mouse

It supports USB mouse through the ports on the rear panel.

If mouse is not detected or doesn't work, check below steps:

- 1. Make sure the mouse is plugged in the USB mouse port.
- 2. Try with a good know mouse.

2.5.2 Use Mouse

During live:

Double-click on any camera window to see the full screen. Double-click again to return to the previous screen.

Right click to reveal the control menu on the screen. Right click again to hide the menu.

In Configuration:

Click to enter a particular option. Right click to cancel the option or to return to the previous menu.

In order to input a value in a particular screen, move cursor to the input box and click. An input window will appear as below. It supports digits, alphabets and symbols input. Click Shift button to input Capital letters and symbols; click Shift button again to return.

It supports mouse drag. Take setting up motion detection area for example: Click customized, hold down the left button and drag to set motion detection area.

****	**_								
1		3					0	Bad	kspace
q	w			У	u		р	[] \
			g	h	j				Enter
Sł	nift				b	n			1
E									- =

Click to choose the options. Right click to return to live mode.

In Backup:

Click to choose the options. Right click to return to previous picture.

In PTZ Control:

Click left button to choose the buttons to control the PTZ. Click right button to return to live.

Note: Mouse is the default tool for all operations unless an exception, as indicated.

3 Basic Function Instruction

3.1 Power On/Off

Before you power on the unit, please make sure all the connection is good.

3.1.1 Power On

- ① Connect with the power.
- (2) The device will boot and the power LED would turn blue.
- ③ A WIZZARD window will pop up and show some information about time zone, time setup, network configuration, record configuration and disk management. User can set up here and refer to the concrete setup steps from the corresponding chapters. If users don't want to set up Wizard, please click Exit button to exit. Press and hold FN/ESC key to switch the resolution of the VGA/ HDMI output.

3.1.2 Power Off

You can power off the device by using remote controller, keyboard and mouse.

- Go to Main Menu and then select "Shut Down" icon to pop up the Shut down window.
- 2 Click OK. Then the unit will power off after a while.
- Disconnect the power.

3.2 Login

User can login or log off the DVR system. Once logged off the user cannot do any other operation except changing the multi-screen display.

Notice: The default username is "admin" and the password is "123456". For complete operational steps for changing password, adding or deleting users, please refer to section 4.7 User Management Configuration.

3.3 Live Preview

Fig 3-2 Live Preview Interface

Symbol	Meaning
Green	Manual record
Yellow	Motion detection record
Blue	Schedule record

3.4 Live Playback

Click Playback button to playback the record. Refer to Fig 3-3. User can do complete operation by clicking the buttons on screen.

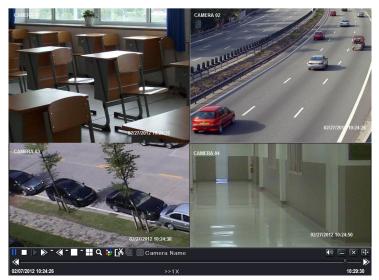

Fig 3-3 Live Playback

4 Main Menu Setup Guide

Click right mouse or press FN/ESC button on the front panel and then the control bar will display at the bottom of the screen. Refer to Fig 4-1.

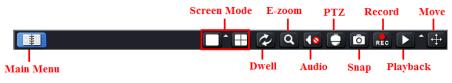

Fig 4-1 Main Menu Toolbar

Screen Mode: Click to choose screen mode.

Dwell: Dwell means to display live images from different cameras in a sequence. The images may be displayed as a single channel or in a grid fashion from different cameras. Dwell mode is enabled only when the chosen display mode is not able to display all the available cameras. **E-Zoom:** Single channel large screen electronic amplification.

Audio: Enable sound.

PTZ: Click the PTZ button to control rotation position, speed and auto scan of the PTZ.

Snap: Click this button to snap the live pictures. These pictures will automatically be saved in the SATA disk.

Record: Click this button to start/stop recording.

Playback: Click this button to playback the record files.

Click Main Menu button to pop up a window as Fig 4-2. You can also press MENU button on the front panel. Clicking Setup icon will pop up the configuration menu.

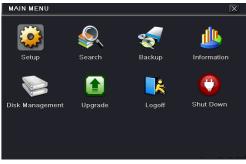

Fig 4-2 Setup

4.1 Basic Configuration

Basic configuration includes three sub menus: system, date & time and DST.

4.1.1 System

Go to Main Menu \rightarrow Setup \rightarrow Basic \rightarrow System interface. Refer to Fig 4-3.

System Date & Time DST		
Device Name	EDVR	
Device ID		
Video Format	NTSC	
Password Check		
Show System Time		
Max Online Users	10	
Video Output	VGA 800X600	
Language	English	
Logout After [Minutes]	Never	

Fig 4-3 Basic Configuration-System

In this interface you can set up the device name, device ID, video format, max network users, VGA resolution, language and so on. The definitions for every parameters display as below:

Device Name: The name of the device. It may display on the client end or CMS that help user to recognize the device remotely.

Device ID: This ID is used to map the speed dome cameras.

Video Format: Two modes: PAL and NTSC. User can select the video format according to that of camera.

Password Check: If this option is enabled, the user would need to input the user name and the password for performing corresponding operations.

Show System Time: If selected, the current time will be displayed during live monitoring.

Max Online Users: To set the max number of concurrent user logins in the DVR.

Video Output: The resolution of live display interface.

Language: Set up the menu language.

Note: After changing the language and video output, the device needs to login again.

Logout After (Minutes): A user can set up the screen interval time (30s, 60s, 180s, 300s). If there is no any operation within the setting period, the device will auto logout and return to login interface.

Show Wizard: If selected, the GUI would launch the startup wizard on every boot, allowing the user to do basic setup.

No Image When Logout: If selected, there will be no image showing when logging out.

4.1.2 Time & Date

(1) Go to Main Menu \rightarrow Setup \rightarrow Basic \rightarrow Date & Time interface. Refer to Fig 4-4.

AHD DVR User Manual

BASIC	X
System Date & Time DST	
Date Format	MM-DD-YY
Time Format	24 Hour
Time Zone	GMT
Sync Time With NTP Server	
NTP Server	time.windows.com
	Update Now
System Date	03 / 05 / 2013 25
System Time	15 : 32 : 20
	Save Now
	Default Apply Exit

Fig 4-4 Basic Configuration-Date & Time

- ② Set the date format, time format, time zone in this interface; checkmark "Sync Time With NTP Server" to refresh NTP server date. You can also adjust system date manually.
- (3) Click "Apply" button to save the setting.

4.1.3 DST

(1) Go to Main Menu \rightarrow Setup \rightarrow Basic \rightarrow DST interface. Refer to Fig 4-5.

BASIC		X
System Date & Time DST		
Daylight Saving Time		
Time Offset [Hours]	1	
Mode	💿 Week 💿 Date

Fig 4-6 Live Configuration→Live

- ② A software keyboard will pop up by clicking camera name area. Click the letters and (or) digital numbers on the keyboard to input the name you want to display in live image.
- (3) Checkmark the camera name in the show name area.
- ④ All channels will show the camera name by checking "All" checkbox.
- (5) Click "Apply" to save the setting.

4.2.2 Main Monitor

The main monitor settings allow you to set camera sequence in live display mode. Operate the following steps to set main monitor:

(1) Go to Main Menu \rightarrow Setup \rightarrow Live \rightarrow Main Monitor interface. Refer to Fig 4-7.

Fig 4-7 Live Configuration-Main Monitor

- ② Select display mode and channel.
- ③ Select dwell time. Click ▲ button to set up the previous channel groups of dwell picture. Click ▶ button to set the latter channel groups of dwell picture.
- (4) Click "Apply" to save the setting.

4.2.3 Mask

If there is something you don't want to display in the live image. You can set mask. For a

given channel a maximum of three areas can be masked.

To set up mask area:

(1) Go to Main Menu \rightarrow Setup \rightarrow Live \rightarrow Mask interface.

LIVE	- Main Monitor Mask	×
сн	Mask Area	
1	Setting	
2	Setting	
3	Setting	
4	Setting	

Fig 4-8 Live Configuration-Mask

- ② Click Setting button to go into live image.
- ③ Press and drag the left mouse button to set mask area as shown below.
- (4) Right click to exit the mask setting interface.
- (5) Click Apply button to save the setting.

To delete mask area

- ① Click Setting button in the mask interface.
- 2 Select a certain masked area and double click to delete that masked area.
- ③ Then click Apply button to save the setting.

Fig 4-9 Setting Mask Area

4.3 Record Configuration

Record configuration includes six sub menus: enable, record bit rate, time, recycle record, stamp and snap.

Before Configuration, please make sure your DVR has been installed with HDD and has completed its initialization.

4.3.1 Enable

(1) Go to Main Menu \rightarrow Setup \rightarrow Record \rightarrow Record interface. Refer to Fig 4-10.

REC	RECORD						
Enat	Record Bitra	te Time Stamp Recycle Record Sna	Р				
СН	Record	Audio					
1							
2							
3							
4							
All							
		Default Apply	Exit				

Fig 4-10 Record Configuration-Record

Parameter	Meaning
Record	To enable/disable recording for the channel
Audio	To enable/disable audio recording for the channel

- (2) Checkmark record and audio.
- ③ Select All to set up the same settings for all channels.

4.3.2 Record Bitrate

(1) Go to Main Menu \rightarrow Setup \rightarrow Record \rightarrow Record Bitrate. Refer to Fig 4-11.

				(<u></u>		_		
Enab	e Record		Time	Stamp	Rec	ycle Rec	ord	Snap	
сн	Resolutio	fps		Encode		Quality		Max Bitrate

4	5		30		Never	
All						
	5		30	-	Never	
				Default /	Apply Ex	<it< td=""></it<>

Fig 4-12 Record Configuration-Time

② Set Pre-alarm record time and post-alarm record time. Select "All" to set the same settings for all channels.

Pre-alarm Record Time: Set the time in seconds to pre-record before the actual recording begins.

Post-alarm Record Time: Set the time in seconds to post-record after the actual recording has finished, five options: 10s, 15s, 20s, 30s, 60s, 120s, 180s and 300s.

Expire Time: Set the expiration time for recorded video. If the set date is overdue, the recorded files will be deleted automatically.

③ Click "Apply" to save the setting.

4.3.4 Stamp

This provides an option to enable or disable the Camera Name and the Time stamp on the video. The user can also choose a position for the stamp on the screen. To set up stamp as follows:

(1) Go to Main Menu \rightarrow Setup \rightarrow Record \rightarrow Stamp interface. Refer to Fig 4-13.

RECORD							
Enat	Enable Record Bitrate Time Stamp Recycle Record Snap						
СН	Camera Name	Time Stamp	Position				
1			Setting

4			Setting				
All							
			Setting				
		De	fault Apply Exit				

Fig 4-13 Record Configuration-Stamp

② Checkmark camera name and time stamp. Click Setting button to set up the position of the stamp. You can drag the camera name and time stamp at random positions. Refer to below Figures:

Before drag

After drag

③ Select "All" to set up all channels with the same parameters.

4.3.5 Recycle Record

This option is used to recycle the HDD space once it is full. If enabled, the system will automatically delete the old records and recycle the space if it is completely utilized. The setting steps are as follows:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Record \rightarrow Recycle Record interface;
- ② Checkmark recycle record to activate auto recycling. If the option is disabled or not selected, the DVR would stop recording once HDD is full.
- ③ Click "Apply" button to save the setting.

4.3.6 Snap

In this interface, user can set up Resolution, quality, snap interval, snap number.

4.4 Schedule Configuration

Schedule configuration includes two sub menus: schedule and motion.

4.4.1 Schedule

This tab allows defining schedule for normal recording for seven days of a week, 24 hours of a day. Every row denotes an hourly timeline for a day. Click the grid to do relevant setup. A highlighted area denotes selected timeline. Operate the following steps to set schedule:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Schedule interface. Refer to Fig 4-14.
- ② Select channel and click " button to add a certain day schedule. Click " button to delete the selected schedule.

If you want to apply the schedule setting of a certain channel to other or all channels, you need to select channel and click "Copy" button.

SCHEDULE						×
Schedule Mo	tion					
Channel	1	5]			>
	00:00	04:00	08:00	12:00	16:00	20:00

Wednesday						
Thursday						
Friday						
Saturday						
Apply Settings	Το ΑΙΙ	F	Channe	el	Сору	
			D	efault	Apply	Exit

Fig 4-14 Schedule Configuration-Schedule

You can also set week schedule by double-clicking in the grinding area. This will take you to see a dialog box as Fig 4-15.

- Select a day and click "Add" button to set start time and end time. Then click v to save.
- ② Select other days and add schedule or copy settings from one schedule to the others under the Apply Settings To item.

SCHEDULE	X						
Week Days Wednesda • Apply Settings To All • Copy							
Start Time	End Time						
Start Time

End Time							
Hour 23 🔽 Minute 59							
	× ×						
Add Delete	OK Exit						

Fig 4-15 Schedule-Week Schedule

4.4.2 Motion Schedule

This tab allows to set schedule for motion based recording. The setting steps are as follows:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Schedule \rightarrow Motion tab.
- ② The setup steps for schedule for motion based recording are similar to normal schedule setup. You can refer to 4.4.1 Schedule for details.

Note: The default schedule of motion based recording is 24 x7. If you want to activate motion based recording, you must enable motion alarm and set up schedule for motion alarm (see Chapter 4.5.1 Motion Alarm for more details).

4.5 Alarm Configuration

Alarm configuration includes four sub menus: motion, video loss, other alarm and alarm out.

4.5.1 Motion Alarm

Motion includes two sub menus: motion and schedule. The steps to set motion alarm are as follows:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Alarm \rightarrow Motion. Refer to Fig 4-16.
- ② Enable motion alarm, set alarm hold time which refers to the time till which the system will wait for further detection of motion. e.g. If the holding time is set to 10 seconds, once the system detects a motion, it will go into alarm but would not detect any other motion alarm (specific to channel) until 10 seconds. If there is other motion detected during this period it is considered it as continuous movement, otherwise it will be considered as a single motion.

MOT	ION			X		
Motic	Schedu	e				
СН	Enable	Holding Time[S]	Trigger	Area		
		10	Setting	Setting

4		10 🛡	Setting	Setting		
All	AII					
		10 🗸				
			Default	Apply Exit		

Fig 4-16 Alarm Configuration-Motion

③ Click "Setting" button under the Trigger area. Then a window will pop up as below:

AHD DVR User Manual

TRIGGER - Channel 1					
Alarm To Record					
Buzzer					
Show Full Screen	None				
Email					
Snap					
	OK Exit				

Fig 4-17 Alarm Configuration-Motion Trigger

Buzzer: If selected, the local buzzer would be activated on an alarm.

Show Full Screen: If selected, there will pop up the chosen channel on the monitor on an alarm trigger.

Email: If selected, the DVR will send an email alert to the preconfigured email address in case of a motion based alarm from the particular input.

Snap: If selected, the system will snap images of the checked channels on an alarm and save them in the HDD automatically.

- ④ Go to To Record tab. Select recording channels. It would be recorded in case of an alarm. Click OK button to save the setting.
- (5) After clicking Area button, a dialog box will pop up as Fig 4-18.
- (6) In the Area interface, you can drag slide bar to set the sensitivity value (1-8). The higher the value is the more sensitive it is to motion. Since the sensitivity is influenced by color and time (day or night), you can adjust its value according to the practical conditions. Left click the grid and drag to delete area. Click i icon to set the whole area as detection area. Click i icon to clear the set detection area. Click i icon to test the sensitivity as per the local conditions. Once motion is sensed, it displays a figure icon. Click i icon to save the setting. Click i icon to exit the current interface.

Fig 4-18 Motion-Area

Note: Prior to setting motion detection field it is recommended that you click *field* icon to clear the existing field and set afresh.

- ⑦ Select "All" to set the same settings for all channels.
- (8) Click "Apply" button to save the setting.
- Go to Schedule tab. The setting steps for schedule for motion based alarm are similar to normal schedule setup (see Chapter 4.4.1 for more details).

4.5.2 Video Loss

This DVR can be set up to detect video loss. The setting steps are as follows:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Alarm \rightarrow Video Loss. Refer to Fig 4-19.
- ② The setup steps of video loss trigger are similar to motion trigger setting. (See Chapter 4.5.1 Motion → Trigger setting for more details).

	EO LOSS
1	Trigger
2	Trigger
3	Trigger
4	Trigger
	Trigger
	Default Apply Exit

Fig 4-19 Alarm Configuration-Video Loss

4.5.3 Other Alarm

This tab gives a choice to configure alarm for Disk Full, IP Conflict, the Disconnect event, Disk Attenuation or Disk Lost.

(1) Go to Main Menu \rightarrow Setup \rightarrow Other Alarm. Refer to Fig 4-20.

OTHER ALARM	X
Alarm Type Buzzer Email Disk Shortage Alarm	Disk Full Disk Full Disk Full Disconnect Disk Attenuation Disk Lost
	Default Apply Exit

Fig 4-20 Other Alarm

- ② Use the dropdown menu and select the event or the alarm.
- ③ Check the required trigger options.
- ④ If the selected event is "Disk Full", then use the drop down box for "Disk Shortage Alarm" to choose a threshold value for remaining HDD space. If the threshold value is reached, the system will trigger the Disk Full Alarm.
- (5) Click "Apply" to save the setting.

4.5.4 Alarm Out

To set up alarm out:

(1) Go to Main Menu \rightarrow Setup \rightarrow Alarm Out. Refer to Fig 4-21.

ALARM OUT	X
Buzzer	
Buzzer Hold Time[S]	10
	Default Apply Exit

Fig 4-21 Alarm Out

② Checkmark Buzzer and set buzzer alarm hold time. This would trigger the buzzer when the system is on an alarm.

4.6 Network Configuration

Network configuration includes six submenus: Network, Sub Stream, Email, Server, NAT and Other Settings. Network settings must be configured if DVR is used for monitoring over network.

4.6.1 Network

To set up network:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Network \rightarrow Network tab. Refer to Fig 4-22.
- ② Set HTTP port. The default HTTP port is 80. If the value is changed, you shall add the port number when typing IP address in IE address blank. e.g. If HTTP port is set to 82 and IP address is http://192.168.0.25, you should input the following IP address: http://192.168.0.25:82 into IE browser.
- ③ Set server port. The default server port is 6036.
- ④ Connect internet. There are three ways to connect internet.

NETWORK	X
Network Sub-stream Email Server	NAT Other Settings
IP Address	192.168.011.061
Subnet Mask	000.000.000.000
Gateway	192.168.011.001
Preferred DNS Server	192.168.011.001
Alternate DNS Server	000.000.000.000
PPP₀E	
User Name	
Password	
	Test
	Default Apply Exit

Fig 4-22 Network Configuration-Network

- If you have a DHCP server running and would like your DVR to automatically obtain an IP address and other network settings, check the checkbox beside "Obtain an IP address automatically". Then the device will distribute IP address, subnet mask, and gateway IP and DNS server.
- If you want to configure your own settings, disable "Obtain an IP address automatically" item and input the IP address, subnet mask, gateway IP and DNS server.
- If you connect internet through PPPoE, disable "Obtain an IP address automatically" item and check PPPoE checkbox and then enter username and password. Once the setup is completed, your DVR will automatically dial up into your network.
- (5) Test the effectiveness of the network by clicking "Test" button after you set up the network.
- 6 If the network is well connected, please click "Apply" button to save the setting.

4.6.2 Sub Stream

To set up sub stream:

(1) Go to Main Menu \rightarrow Setup \rightarrow Network \rightarrow Sub Stream interface. Refer to Fig 4-23.

Netw	ork Sub-st	ream Email	Server NAT	Other Setti	ngs
СН	Resolutio	fps	Encode	Quality	Max Bitrate
1	CIF 🛡	3	CBR 🛡	Higher 🧧	512 kbps 🕞 🖻
2	CIF 🔽	3 🗸	CBR 🗖	Higher 👼	512 kbps 🔻
3	CIF 🔽	3 💆	CBR 🛡	Higher 🥃	512 kbps 💌
4	CIF 🛡	3 💆	CBR 🛡	Higher 🥃	512 kbps 🐱
5	CIF 🛡	3 💆	CBR 🛡	Higher 🥃	512 kbps 🐱
6	CIF 🔽	3 🗸	CBR 🗖	Higher 👼	512 kbps 🔽 🗖
All	Rem	aining : 64 (CIF).		
	CIF 🛡	3X16 🖉	CBR 🛡	Higher 🥃	512 kbps 🖉

Fig 4-23 Network Configuration-Sub Stream

Parameter	Meaning
FPS	Range from: 1-25.
Resolution	Support CIF.
Quality	The quality of the clients' image. The higher the value is, the clearer the record image. Six options: lowest, lower, low, medium, higher and highest.
Encode	VBR and CBR.
Max bit rate	Range from: 256~1792kbps.

- ② Select fps, resolution, quality, encode and max bit rate
- ③ Select "All" to set the same settings for all channels.

4.6.3 Email

To set up Email:

(1) Go to Main Menu \rightarrow Setup \rightarrow Network \rightarrow Email interface. Refer to Fig 4-24.

Network Sub-stream Email Serve	er NAT Other Settings
SMTP Server	
Port	25
SSL Check	
Send Address	
Password	
Receive Address1	
Receive Address2	
Receive Address3	
	Test

Fig 4-24 Network Configuration-Email

② Set SMTP Server and port.

SMTP Server/Port: The name and port number of SMTP server. You can set up SSL check (such as Gmail) according to actual needs.

③ Set sender's address and password.

Set receiver's email address and click "Test" button to test the validity of the mailbox.Attaching image: If selected, the system will attach images when sending emails.

4.6.4 Server

This function is mainly used for connecting ECMS/NVMS. The setting steps are as follows:

- ① In the server interface, select "Enable" as shown in the Fig 4-25.
- ② Check the IP address and port of the transfer media server in the ECMS/NVMS. The default server port for auto report is 2009. If it is modified, please go into the transfer media interface to check.

NETWORK			
Network Sub-stream Email Server	NAT Other Settings		
Enable			
Server	192.168.3.123		
Server Port	10002		
Device ID	382		
	Default Apply Exit		

Fig 4-25 Network Configuration-Server

- ③ Enable the auto report in the ECMS/NVMS when adding a new device. Then input the remaining information of the device in the ECMS/NVMS and self-define a device ID.
- ④ Input the above-mentioned server IP, server port and device ID in the server interface. Then click "Apply" button to save the setting. Now, the ECMS/NVMS system will automatically connect this device.

4.6.5 NAT

- (1) Go to Main Menu \rightarrow Setup \rightarrow Network \rightarrow NAT interface. Refer to Fig 4-26.
- ② Enable NAT and input the NAT Server and Port number (The default NAT Server is www.autonat.com; the default Port number is 8989).
- ③ Click "Apply" to save the settings.

NETWORK	X
Network Sub-stream Email Server	NAT Other Settings
NAT Enable	
NAT Server	www.autonat.com
Port	8989
	Default Apply Exit

Fig 4-26 Network Configuration-NAT

4.6.6 Other Settings

If your DVR is set to use PPPoE as its default network connection, you may set up DDNS to be used in connection. The setting steps are as follows:

- ① Enable DDNS server.
- ② Select DDNS server.
- ③ Enter user name, password and host domain name of the registered website.

- ④ Click "Test" button to test the effectiveness of the relevant information.
- (5) Click "Apply" button to save the setting.

NETWORK	X
Network Sub-stream Email Server	Other Settings
DDNS	
DDNS DDNS Type	www.dvrdydns.com
User Name Password Host Domain	
User Name	
Password	
Host Domain	
DDNS Update [Hours]	3
	Test
UPnP	
	Default Apply Exit

Fig 4-27 Network Configuration-Other Settings

Note: The domain name selected by user is a banding domain name of DVR. User should logon the website provided by the server supplier to register a user name and password and then apply for a domain name online. After the successful application, user can access the device from the IE client by inputting that domain name.

Enable UPnP: Select UPnP here and then enable UPnP function in your router. Therefore, there is no need for you to forward LAN IP address and port in the router in connection of internet. After that, you can check the WAN IP address in the router.

Domain name Registration (Take www.dvrdydns.com for example)

1. Input www.dvrdydns.com in the IE address bar to visit its website. Then click "Registration" button to register as shown below.

NEW USER REGISTR	TION
USER NAME	XXXX
PASSWORD	•••••
PASSWORD	•••••
FIRST NAME	XXX
LAST NAME	ххх
SECURITY QUESTION.	My first phone number.
ANSWER	XXXXXXXX
CONFIRM YOU'RE HUMAN	New Capitha Enter the text you see above
	Submit Reset

2. Create domain name.

You must create a domain name to continue.		
Domain name must start with (a-z, 0-9). Cannot end or start, but may contain a hyphen and is not case-sensitive.		
dvrdydns.com 👻 Request Domain		

3. After you successfully request your domain name, you will see your domain in the list.

Search by Domain. Search					
		Click a name to edit your domain settings.			
NAME	STATUS	DOMAIN			
6 5 4 3 2 1 A B C	Ø	654321abc.dvrdydns.com			
Last Update: Not yet updated IP Address: 210.21.229.138					
Create additional domain names					

DVR Setting

Connect DVR to the Network Client.

1. Go to Main menu \rightarrow Network \rightarrow Other Settings, checkmark DDNS, select "dvrdydns" at the DDNS Sever pull down list box and input user name and password.

2. Go to configuration interface of the router to map the server port and IP address (if the user enables UPnP function, he can skip this step). Click Save button to save the setting.

3. Login IE browser and input registered domain name "http://www.xxx.dvrdydns.com", connect to DVR client.

You can also quickly register the domain name in this interface.

1. Set the IP address manually in the network tab and then click "Other Settings" tab. Check "DDNS".

2. Select "www.autoddns.com" in DDNS Type column as shown above.

3. Enter the host name at random, like 123.

4.Click "Register" to register the domain name. When the successful prompt pops up, it means you are successfully register your domain name.

NETWORK	X		
Network Sub-stream Email Server	Other Settings		
DDNS			
DDNS Type	www.autoddns.com		
Host Domain	.autoddns.com		
	Register		
UPnP			
	Default Apply Exit		

If your IP address is not WAN IP address, you should forward your IP address and port in your router or enable UPNP function both in router and DVR. Then you can use the domain name

plus HTTP port to access your DVR.

DDNS server					
DDNS server	Website provided by dynamic domain name supplier. The optional: www.meibu.com, www.dyndns.com, www.dvrdydns.com, www. autoddns.com, www.no-ip.com and mintdns type.				
User name	User name for log in the website of domain name supplier.				
Password	Password for log in the website of domain name supplier.				
Host domain	The domain name user registered at the supplier's website.				
Update interval	The interval time of upgrading DVR IP address.				

4.7 User Management Configuration

This tab allows you to add normal or advanced users. To add user and set up user authority:

(1) Go to Main Menu \rightarrow Setup \rightarrow Users. Refer to Fig 4-28.

USER MANAGEMENT			X
User Name		User Type	PC MAC Address
admin		Admin	00-00-00-00-00-00
Add Setup	Delete	Change Pas	sword Exit

Fig 4-28 User Management Configuration

(2) Click Add button to display a dialog box as Fig 4-29.

ADD USER	X			
General Authority

Playback	
ОК	Exit

Fig 4-30 Add User-Authority

To delete user:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Users interface.
- ② Select the added user you want to delete and then click "Delete" button.

To modify user:

- (1) Go to Main Menu \rightarrow Setup \rightarrow Users interface.
- ② Select the added user you want to modify and then click "Modify" button to do the relevant operation.

To change user password

- (1) Go to Main Menu \rightarrow Setup \rightarrow Users interface.
- ② Select the added user you want to change its password and then click "Change Password" button.

4.8 P.T.Z Configuration

P.T.Z configuration includes two submenus: serial port and advanced. Serial port settings are as follows:

(1) Go to Main Menu \rightarrow Setup \rightarrow P.T.Z \rightarrow Serial Port interface. Refer to Fig 4-31.

сн	 Advanced	_	Baud Rate	Protocol	Simulative Cruise
сп 1		J	9600 -	PELCOP	
2	2	ŧ	9600	PELCOP	
3	3	Ĵ	9600 🛡	PELCOP	i 🗆
4	4	J	9600 🛡	PELCOP 🛡	
All					
			9600 🛡	PELCOP 🔽	

Fig 4-31 P.T.Z Configuration-Serial Port

Parameter	Meaning		
Address	The address of the PTZ device.		
Baud rate	Baud rate of the PTZ device. Range form: 110, 300, 600, 1200, 2400, 4800, 9600, 19200, 34800, 57600, 115200, 230400, 460800, 921600.		
Protocol	Communication protocol of the PTZ device. Range from: NULL, PELCOP, PELCOD, LILIN, MINKING, NEON, STAR, VIDO, DSCP, VISCA, SAMSUNG, RM110, HY, N-control.		
Simulative Cruise	If enabled, no matter whether the PTZ device supports cruise or not, the presets will cruise.		

- ② Select "Enable" and set up the value of address, baud rate and protocol according to the settings of the speed dome.
- ③ Select "All" to set the same settings for all channels.

Advanced settings include preset setting, cruise setting and track setting. Go to Main Menu \rightarrow Setup \rightarrow P.T.Z \rightarrow Advanced. Refer to Fig 4-32.

P.T.Z	2		X

3	Setting	Setting	Setting		
4	Setting	Setting	Setting		
		Defa	ult Apply Exit		

Fig 4-32 P.T.Z configuration-advanced

To set up preset:

① In the Advanced interface, click preset "Setting" button to see a dialog box as Fig 4-33.

No.		
1	preset001	Setting
	preset002	Setting
3	preset003	Setting
4	preset004	Setting
5	preset005	Setting
6	preset006	Setting
7	preset007	Setting
8	preset008	Setting
9	preset009	Setting
10	preset010	Setting

Fig 4-33 Advanced-Preset Setting

② In the preset setting tab, enable preset, set the preset name and then click preset "Setting" button.

	01 02 03	04 All	
	- Zoom +	No.	1
	- Focus +		
	- Iris + 🖸		Save
Speed: 5			– X

Fig 4-34 Preset Setting

- ③ Control the dome by rotating up, up left, down, right down, left, left down, right and up right and adjust the rotate speed and the value of zoom, focus and iris of the dome.
- Select the serial number of the preset point. Click Dutton to enable the PTZ wiper and click button to enable the PTZ light.

Note: PTZ must support wiper and light button and these two buttons are just available when selecting PELCOP or PELCOD.

- (5) Click Save button to save the setting. Click icon to hide the tool bar. Right click to view this bar again. Click icon to exit the current interface.
- (6) Return to the Advanced-Preset Setting interface and click OK button to save the setting.

To set up cruise:

 In the Advanced interface, click cruise "Setting" button to see a window as shown in Fig 4-35.

AHD DVR User Manual

Fig 4-36 Modifying Cruise Line

(a) Click Add icon to set the speed and time of preset point. Select a preset point and then click Delete icon to delete that preset point. Click Modify icon to modify the setting of a preset point. User can click to those icons to adjust the position of preset point. Click Preview button to preview the cruise line. Click OK button to save the setting.

To set up track:

- ① In the Advanced interface, click track "Setting" button to see a dialog box as Fig 4-37.
- ② Control the dome by rotating up, up left, down, right down, left, left down, right and up right and adjust the rotate speed and the value of zoom, focus and iris of the dome.
- ③ Click Start Record button to record the move track of PTZ. Click this button again to stop record.
- ④ Click <u>Start</u> track button to play recorded track. Click this button again to stop playing.
- (5) Click icon to exit the current interface.

AHD DVR User Manual

Fig 4-37 Track Setting

4.9 Advanced

Advanced configuration includes three submenus: reset, import/export and Block/Allow list.

4.9.1 Reset

Reset all settings of the device.

4.9.2 Import/Export

Export the data files into mobile storage devices for backup and then import specified data files from mobile storage device to DVR.

4.9.3 Block/Allow List

BLOOK	/ ALLOW LIST		×
	O Block List	Allow List	
ID	IP From	То	
1	192.168.000.002	192.168.000.004	F
2	000.000.000.000	000.000.000.000	
3	000.000.000.000	000.000.000.000	
4	000.000.000.000	000.000.000.000	
5	000.000.000.000	000.000.000.000	
6	000.000.000.000	000.000.000.000	
7	000.000.000.000	000.000.000.000	
8	000.000.000.000	000.000.000.000	
9	000.000.000.000	000.000.000.000	
		Default Apply	Exit

Fig 4-38 Block/Allow List

Here authorized user can prohibit computer users within a certain IP address range from accessing to DVR or allow computer users within a certain IP address range to access DVR. E.g. if an admin user doesn't want computer users within IP address range from 192.168.000.002 to 192.168.000.004 to access the DVR, he can check Block list option, and then input such IP address range. If it is required that computer users within a certain IP address range access DVR, they can check Allow List option and then do the required setting.

5 Search, Playback & Backup

Search configuration includes four submenus: time search, event search, file management and image.

5.1 Time Search

(1) Go to Main Menu \rightarrow Search \rightarrow Time Search. Refer to Fig 5-1.

SE	ARCH																X
Tìr	ne Search	Even	t Search	File Mar	nager	nent Ir	nage									Sea	rch

Fig 5-3 Search Configuration-File Management

② Select date and channels. The date with highlighted borderline indicates presence of

data.

- ③ Click Search button to display the searched files in the file list box.
- ④ Use "All" button to lock/unlock or delete all files in the file management column.
- (5) Double click an unlocked item to play.

Lock: Select a file and click Lock button to lock this file, after that, that file will not be deleted or covered.

Unlock: Select a locked file and click "Lock" button to unlock this file.

Delete: Select an unlocked file and click "Delete" button to delete this file.

5.4 Search by Image

- (1) Go to Main Menu \rightarrow Search \rightarrow Image tab.
- ② Select data and channels on the right hand side.
- ③ Press "Search" button to search for a recorded image.
- ④ Once an alarm image has been identified, the user can double click the image to play recording.

Fig 5-4 Search Configuration-Image

Lock: Select the image and click "Lock" button to lock this image. Save: Click "Save" button to copy the image on the HDD. Save All: Click "Save All" button to copy all images on the HDD.

5.5 Backup

This unit supports backup by USB Flash. You can also make backup by IE browser via internet (see section 7.3.2 Remote backup).

- (1) Insert USB storage device and then go into backup configuration. Refer to Fig 5-5.
- ② Set the start & end time, select channels and click Search button to display the searched data in the data backup list box.

	Start Time	End Time	
2 1	03/21/2013 15:11:40	03/21/2013 15:12:04	Start Time 03 / 21 / 2013

Size[GB]	1.008
Storage Media	USB-1
Free[GB]	0.000
Backup Player	
Save File Type	DVR
	0 %
	Disk Cleanup Start Cance

(4) In the backup information interface, you can check the relevant information of backup files, storage type, save file type, etc. Then click Start button to start backup.

Note: If the backup files are saved in DVR format, please check backup player. Only this player can play these files in DVR format. If the backup files are saved in AVI format, you can play these files with common media player.

6 Manage DVR

6.1 Check System Information

Check system information includes six submenus: system, event, log, network, online user and record.

6.1.1 System Information

In this interface, you can check the hardware version, MCU version, kernel version, device ID, etc.

6.1.2 Event Information

In this interface, you can search for events like motion and video loss. The utility provides an interface to have a date based and a channel based search. This report can further be saved on a USB flash drive as an html file using the export button.

6.1.3 Log Information

In this interface, you can search for relevant logs as per set date and event which includes Operation, Setup, Playback, Backup, Search, Check Information and Error. This report can further be saved on a USB flash drive as an html file using the export button.

6.1.4 Network Information

In this interface, you can check relevant parameters of network.

6.1.5 Online Information

In this interface, you can check the details of the connected online users.

Refresh: Refresh the current interface.

Disconnect: Disconnect the online users to access DVR. If this function is used by the admin, the particular PC will not be able to access the device for five minutes.

6.1.6 Record Information

In this interface, a user can check resolution, ftp and record status including motion recording, manual recording or schedule recording.

6.1.7 QRCODE

User can quickly access the mobile client by scanning QRCODE. Go to Main menu \rightarrow Information \rightarrow QRCODE tab. Refer to Fig 6-1.

AHD DVR User Manual

INFORMATION			X
	Event		Network
System	Event	Log	Network
2	88		\bigcirc
Online Users	Record	QRCODE	Exit

Fig 6-1 Information Configuration

In this interface, you can scan the QRCODE through the mobile phone. Refer to Fig 6-2.

Fig 6-2 Information Configuration-QRCODE

6.2 Disk Management

To format the disk

① Go to disk management interface.

Note: please format the hard disk before record.

- (2) Click Refresh button to refresh the disk information in the list box.
- (3) Select a hard disk and click Format button to start format.

Note: All recorded files in the hard disk will be lost after formatting.

To check other information of disk

After you Go to Disk Management \rightarrow Advanced tab, you can check model, S/N, firmware, health status of the disk in this interface. You also can monitor the temperature, internal circuit,

dielectric material of the disk, analysis the potential problems of the disk and warn so as to protect its data.

6.3 Upgrade

At present, it only supports USB update. Get the software from your vendor when there is a new software version.

The upgrade steps are as follows:

- ① Copy the upgrade software which gets from vendor into the USB storage device.
- ② Connect the USB flash drive to the USB port.
- ③ Enter Main Menu→Upgrade tab. You will see the upgrade software name displaying in the upgrade list box.
- ④ Select that software and then click Upgrade button. The system will be upgraded automatically.

Note: Please wait for a while when the system reboots. Any power interruption is not allowed during upgrading.

6.4 Logoff

A log off dialogue box will pop up by clicking Log off icon. Then click OK button to confirm to log off. If you want to log in again, click icon to enter user name and password to re-login.

7 Remote Surveillance

7.1 IE Remote Surveillance by NAT

7.1.1 NAT Settings

- ① The DVR shall be powered on and connected to the network.
- ② Go to Main Menu→Setup→Network. You can obtain the IP address, Subnet Mask and Gateway automatically. You can also manually input them according to the configuration of PC. And the IP address shall be in the same network segment as the network which is used.
- 3 Set the preferred or alternative DNS Server (Please refer to 4.6.1 Network for details) .
- ④ Go to Main Menu \rightarrow Setup \rightarrow Network \rightarrow NAT tab.
- (5) Enable NAT and input the NAT Server and port number (The default NAT Server is www.autonat.com; the default port number is 8989).
- (6) Click "Apply" to save the parameters (Please refer to 4.6.5 NAT for details) .

7.1.2 NAT Access

After finishing the NAT settings, you can enter the NAT Server on the PC (Input *http://www.autonat.com* to go to the IE client). If you are the first time to access the NAT, the network will download the ActiveX automatically.

Note: If you cannot download and install ActiveX, please refer to FAQ Q8.

After installing ActiveX successfully, it will pop up the login box:

Serial No	0018AE223355
User Name	admin
User Marne	aumm
Password	
Language	English 🔹
	LOGIN

Serial No: The MAC address of the DVR(Go to Main Menu \rightarrow Information \rightarrow Network to check the MAC address of the DVR).

User Name: The login username of DVR. The default username is *admin*. Password: The login password of DVR. The default password is *123456*.

7.2 IE Remote Surveillance via LAN & WAN

In order to view the DVR from a network it may be connected to a LAN/WAN or internet. The network setup should be done accordingly. Please refer to 4.6 Network Setup. This DVR supports IE browser, on Windows XP and Vista platform.

7.2.1 Via LAN

- Enter into the DVR's Main Menu→Setup→Network interface to input IP address, Subnet Mask, etc. If using DHCP, please enable DHCP in both the DVR and the router.
- 2 Enter Record Setup to set network video parameters like resolution, frame rate etc.
- ③ Open IE on a computer on the same network. Input the IP address of the DVR in IE address bar and press enter.
- ④ IE will download ActiveX component automatically. Enter the username and password in the subsequent window

Notice: If HTTP port is not 80, other number instead, need add the port number after IP address. For example, set HTTP port as 82, need input IP address like 192.168.0.25:82.

User name and password here are the same with that used on the DVR. The default username and password is admin and 123456.

7.2.2 Via WAN

There are two ways for the DVR to connect to internet.

1. Connect the DVR to internet through router or virtual server

- ① Enter into the DVR's Main Menu→Setup→Network interface to input IP address, Subnet Mask, etc. If using DHCP, please enable DHCP in both the DVR and router.
- ⁽²⁾ Forward IP address and port number in Virtual Server setup of the router or virtual server. Configure the firewall to allow accessing the DVR (If the user has enabled the UPnP function in both the DVR and router, he can skip this step).
- ③ If users want to utilize dynamic domain name, please apply for a domain name in a DNS server supported by the DVR or router. Then add to the DVR or router.
- ④ Open IE browser, input IP address, or dynamic domain name and enter. If HTTP port is not 80, add the port number after IP address or domain name.
- (5) IE will download ActiveX automatically. Then a window pops up and asks for user name and password. Input name and password correctly, and enter to view.

Note: If you cannot download and install ActiveX, please refer to FAQ Q8.

2. Connect the DVR to internet directly

① Enter into the DVR's Main Menu→Setup→Network interface to enable PPPoE and then

input user name and password received from your ISP. Next, click 'Apply'. The DVR will connect to the server and would give a confirmation message.

- ② When accessing the remote interface of DVR, user can input WAN IP to access directly (user can enter into Main menu→Information→Network interface to check IP address). The browser will download Active X control.
- (3) The following setting steps are as the same as (4) and (5) in Point 1.

7.3 Remote Surveillance through Apple PC

Note: Because the current plug-in version of client end just only supports 32-bit mode, so the safari browser shall start 32-bit mode. If the browser is the earlier MACOS version, the default setting is 32-bit mode and the setting can be skipped.

The setting steps are as follows:

- 1 Right click safari icon and select "Show in Finder".
- ② Select Applications→Right click "Safari. App"→Select "Get Info".

③ Select "Open in 32- bit mode".

Log Out coodoo	ûжQ	her changes.	(Assist me) (Revert	Apply

- ③ After acquiring the IP address, Subnet Mask and so on, please Go to the DVR's Main Menu→Setup→Network interface to manually input IP address, Subnet Mask and Gateway according to the configuration of PC. The network segment should be the same as the PC. If using DHCP, please enable DHCP in the DVR and router.
- After the above information is completed, you can enter LAN IP and http port in the Safari browser. For example: input http://192.168.1.100:81(here 192.168.1.100 is LAN IP of DVR, 81 is the http port of DVR), and click " c" button. Then the browser will download Active X control as shown below:

(5) Click ^I icon and then select the Active X control, the welcome interface will be shown. Click "Continue"→ "Install" button, the following window will pop up :

80 0	↓ Install WebClientPlugin-64	Downloads n=64.pkg	\cap	Type your password to allow Installer to make changes.
6	Welcome to the WebClientPlugin-64 Installer	8 Downloads		
Introduction Destination Selec Installation type Installation	You will be guided through the steps necessary to install this software.			Name: coodoo Password:
Summary			▶ Details	
-	Go Back Continue	6	?	Cancel OK

Input the name and password of Apple PC and then click "OK" to install this Active X control.

6 After finishing installing the Active X control, please quit from the Safari browser. Right click Safari icon on the desktop and then select "Quit" button to quit the browser. Then restart Safari browser. Input the IP address and http port to go to the login interface of DVR.

7.3.2 Via WAN

There are also two ways for DVR to connect to Internet.

1. Connect the DVR to internet through router or virtual server

- ① The network setups are the same as step one to step four of point 1 on WAN of IE remote surveillance.
- (2) Enter WAN IP and http port in the Safari browser to install the Active control. The concrete steps are the same as step 5 and 6 of Chapter 7.2.1.

2. Connect the DVR to internet directly.

- ① The network setups are the same as step one of point 2 on WAN of IE remote surveillance.
- (2) Enter WAN IP and http port in the Safari browser to install the Active control. The concrete steps are the same as step 5 and 6 of Chapter 7.2.1.

7.4 The Remote Live Preview

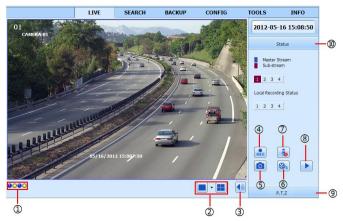

Fig 7-1 Remote Live Preview Interface

	Light button

Click the right mouse on the live interface. This will take you to a pull-down menu.

	Master Stream					
۲	Sub-stream					
	All to Master Stream					
All to Sub-stream						
	Enable Audio					
	Full Screen					
	zoom in	•				

Fig 7-2 Right Key Sub Menu

Stream: This DVR supports master stream and sub stream. Master stream has higher frame rate, max 25FPS (PAL)/30 FPS (NTSC) for every channel, but it needs higher network bandwidth simultaneously. Sub stream has low frame rate, max 6FPS (PAL)/7FPS (NTSC) for every channel, it requires low network bandwidth. Therefore, you can select the stream according to your bandwidth.

All to master/sub stream: Set all channel to master stream or sub stream.

Enable audio: Enable or disenable audio.

Full screen: The live preview picture will display with full screen and the tool bar will be hid. Double click left mouse or click right mouse to return.

Zoom in: Single channel large screen electronic amplification. Click the channel which needs to be zoomed. Right click to select zoom in button to zoom in the image. Double click or right click to exit.

7.5 Remote Playback & Backup

7.5.1 Remote Playback

Click button to go into record playback interface. Refer to Fig 7-3.

Select the record date and channels and double-click the file name in the record file list box. Then you can play that file and preview the picture.

Fig 7-3 Play Record File Interface

This DVR supports remote time search, event search and file management.

By Time Search:

- (1) Go to Search \rightarrow Time Search. Refer to Fig 7-4.
- ② The highlight date in the area ② indicates recorded data. Select the date in area ② and record channels in area ③.
- ③ Click "Search" button. The record data will be displayed in the data information list box.
- ④ Set the data playing time and display mode in the area ① as required.
- (5) Click "Play" button to playback. 8 CH DVR only supports single channel display.

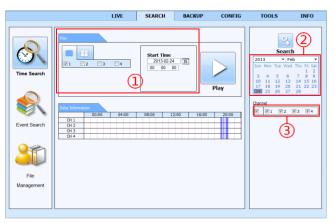

Fig 7-4 Time Search Interface

6 Click the relevant buttons in the interface for operation, like FF, pause, change channel mode, etc. Refer to Fig 7-5.

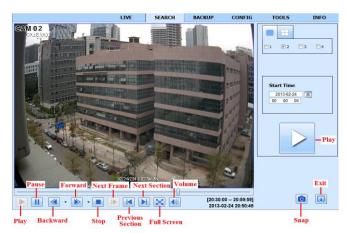

Fig 7-5 Time Search Playback

By Event Search:

- (1) Go to Search \rightarrow Event Search interface. Refer to Fig 7-6.
- ② Click the highlight date and select record channels.
- (3) Checkmark the event type: motion.
- (4) Click "Search" button.
- (5) Double-click certain item to play.

Click Backup button to go to backup interface. Please refer to Fig 7-8.

Fig 7-8 Remote Backup Interface

- ① Select channels, set the start and end time and then click "Search" button to display the file information in the file list box.
- ② Select backup files and click "Browse" button to set the save path. Then click "Backup" button to start backup. The backup files will be saved on user's PC.

7.6 Remote System Configuration

You can do remote setup of the device which includes functions like basic configuration, live configuration, record configuration, schedule configuration, alarm configuration, network configuration, PTZ configuration and user configuration. You should select an option from the menu list on the left and then set up the relative parameters. Only one user can do configuration setup at a given point of time. Click Config tab to go to the below interface The sub menu list and the options in every menu are similar to that of the DVR. Please refer to Chapter 4 Main Menu Setup Guide for more details.

Fig 7-9 Remote Menu Setup

7.7 Tools

Click on the tool's tab to access the Disk Management tool. The user can view the status of the hard drive(s), view/change the read write properties and format the hard drive(s).

7.8 Remote Management

The Info interface provides a web based interface to access the general information pertaining to the DVR's settings. The interface includes five submenus: System, Event, Log, Network and Online users.

Note: There may be subtle differences with respect to functions of remote surveillance between through IE and through Apple PC. Here we only take IE remote access for example.

Appendix A FAQ

Q1. Why the DVR doesn't turn on after connecting to the power?

- a. The power adapter could have gone bad. Please change a new power adapter.
- b. The power from the adapter may be not enough for operating the DVR. Please use the power adaptor supplied along with the DVR.
- c. It could be a hardware problem.

Q2. The DVR LED turns on but there is no output, why?

- a. The power from the adapter may be not enough for operating the DVR. Please use the power adaptor supplied along with the DVR.
- b. It could be a wiring issue. Please check the connection for the same.
- c. Check the monitor settings.

Q3. Why are no images displayed on few or all channels of the DVR?

- a. It could be a wiring issue. Please check the cable and the ports of the cameras and DVR.
- b. The problem can also be related to cameras. Please check the same.
- c. Please make sure that the channels are not programmed as hidden channels and check the status from admin login.

Q4. The HDD cannot be found.

- a. The power from the adapter may be not enough for operating the DVR. Please use the power adaptor supplied along with the DVR.
- b. It could be wiring issue. Please check the power and data cables of the HDD.
- c. The HDD could have gone bad. Change a new one.

Q5. The DVR cannot record.

- a. Make sure the HDD was formatted prior to use.
- b. Maybe the user hasn't enabled the record function or has done incorrect setup. Please refer to Chapter 5.
- c. Maybe HDD is full and thus the DVR is not able to record. Check HDD information from Disk Management and if required, please enable the recycle function.
- d. The HDD could have gone bad. Please change another one.

Q6. Mouse doesn't work.

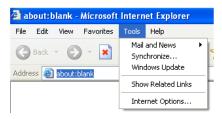

a. The mouse should be connected to the USB port at the rear side.

b. After connecting the mouse, allow the DVR to detect the mouse for seconds. If not detected, try restarting the DVR.

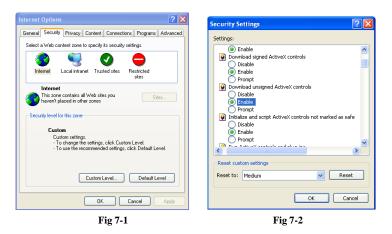

c. The mouse may be incompatible. Please change a mouse.

Q7. ActiveX control cannot be downloaded.

- a. IE browser blocks ActiveX. Please do setup as per the steps mentioned below.
- (1) Open IE browser. Click Tools \rightarrow Internet Options.

- (2) Select Security \rightarrow Custom Level. Refer to Fig 7-1.
- (3) Enable all the sub options under "ActiveX controls and plug-ins". Refer to Fig 7-2.
- (4) Then click Ok to finish setup.
- b. Other plug-ins or anti-virus blocks ActiveX. Please uninstall or do the required settings.

Q8: DVR displays "please wait..." all the time.

- a. HDD power cable and data cable may not be well connected. Please check the connections for HDD.
- b. It is also possible that the DVR was forced to stop because HDD has a bad sector and it may have caused the system to halt. Check with a good known HDD or try formatting the existing HDD.

Q9: How to input password and digital numbers?

Click the password or the input box to pop up a small keyboard. Please select characters to be input (the initial password is 123456), or you can use the digital keys on the front panel.

Q10: A hard disk is being identified as a new device however it was being used with another DVR of same model. Should it be formatted prior use?

It is possible to migrate an HDD from one DVR to another provided that the DVRs are of the same model and that the HDD being migrated would be used as the sole disk in the new DVR. However in cases where the new DVR already contains a HDD, the migrated disk being installed would have to be formatted. In general migrating disks from one DVR to another is not recommended.

PC Module	Parameters
CPU	Intel Celeron 2.4G
Motherboard	Intel 845
HDD	80G
RAM	512M
VGA	NVIDIA GeForce MX440/FX5200 ATIRADEON 7500/X300
OS	Windows 2000(SP4 above) /Windows XP(SP2 above) /VISTA
DirectX	9.0

Q11: What is the minimum configuration required for remote monitoring?

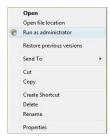

Q12: How to handle the situation that the codec Control is blocked when downloading in the VISTA or Win7 system?

This problem can be fixed in two ways:

a. Enter Control Panel→User Account and Family Safety → User Account Control (refer to the following figure) and click Turn User Account on or off. Cancel Use User Account Control (UAC) to help protect your computer.

b. Right click IE browser (refer to the following figure) and select Run as administrator to run browser.

Q13. How to play the backup file?

Insert your USB device where the backup files are saved in the USB port of PC. If your files are saved in DVR format, you must have already downloaded the backup player box before doing backup. Then double click to open your USB disk to find your backup files and backup player. Double click is income in the install backup player. After you install it, open this player and click "Open Path" button to open your backup file. Next, click playe button to play the backup file. Double click the image and then right click to enable audio. If you save your backup files in AVI format, you can directly open your file by using the media player which supports this format.

Appendix B Calculate Recording Capacity

Users can calculate the size of hard disk according to the saving time and DVR recording settings. The DVR uses fixed video bit rate. The below are the details at different settings.

Resolut ion	Frame Rate Totally(FPS)	Video Quality	Bit Rate (kbps)	Used Space(MB/h)
		Highest	6144	2700
		Higher	5420	2250
	25(PAL)/	Medium	4096	1800
720P	30(NTSC)	Low	3072	1350
		Lower	2048	900
		Lowest	1024	450

The calculation format is: Total Recording capacity =Used space per hour (MB/h) (coverage rate of hard disk) × recording time (hour) × channel numbers

For instance, one customer uses NTSC cameras, set resolution to 720P, video quality to Lowest, frame rate to 30 fps for enabling total 4 channels. He wants the unit to record continuously in a month. Below is the calculation:

Total Recoding capacity =450 (mb/h) X 24(hours/day) X30(days) X4(channels)= 1296000 (MB)≈1266(GB)

Therefore, you need to install one 2 TB SATA HDDs for recording in one month.

Appendix C Compatible Devices

1. Compatible USB drive after test.

Brand	Capacity
SSK	512MB, 1G, 2GB
Netac	4GB
Kingston	2GB
Aigo	2GB
Smatter vider	1GB
SanDisk	4GB

2. Compatible HDD list

Brand	Capacity
Seagate Barracuda	80G/160G/250G/320G /1.5T/2TB/3TB
Seagate SV35.3	1T
Seagate Pipeline HD.2	500G
Maxtor Diamondmax	160G
HITACHI Deskstar	80G/160G/250G/320G /1.5T/2TB/3TB
WD WD1600JS	160G
Samsung HD161HJ	160G
