3M Dynatel™ Advanced Modular System 965AMS

Future-Proof Testing Platform

THE 3M" DYNATEL" ADVANCED MODULAR SYSTEM 965AMS. WHATEVER THE TECHNOLOGY, WE'VE GOT THE TESTER.

The new Dynatel 965AMS system contains every feature of our previous 965 model plus a larger, brighter display that features 3M™ Vikuiti™ Display Enhancement technology, a user-friendly icon-based interface and rugged field-swappable modules.* These external modules can be shared between technicians and allow transmission testing of a variety of OSP technologies. The platform is available with an optional ADSL2+ modem module, and in the future, will also feature additional modules, such as: VDSL2,

FTTx fiber test, VoIP and new technologies yet to come.

*Except for ISDN modem test

3M Dynatel Advanced Modular System 965AMS

FEATURES AND BENEFITS

Communications Capability to work with a PC or handheld computer supporting software upload and data downloads Flexible architecture Supports various data modem protocols such as ADSL2+ Graphical user interface User-friendly, icon-based display of test results Help function An internal help and tutorial provides information as needed during operation Backlight High resolution/high contrast black and white LCD display Vehicle power adapter Plugs into standard vehicle accessory outlet Windows/CE operating system Provides open architecture software environment Keyboard Allows rapid access to twelve different "blue key" functions, reducing menu levels. Also has cursors, and supports alpha-numeric entry Yellow and green LED lights Signal battery state and communication status Software TDR and autotest knowledge based systems aids technicians during test interpretation Bright big screen Highly visible even in bright sunlight due to proprietary 3M™ Vikuiti™ brightness enhancement technology; 80% larger than 965DSP Modular design All you need is a new module to increase test capability (no need to replace test set) Dynatel yellow Rugged, dependable

THE COMPLETE TESTING PLATFORM FOR ALL OUTSIDE PLANT TELECOMMUNICATIONS

This microcomputer-controlled flexible test set family provides full-featured testing for the triple play—voice, video and data circuits. Because it's a Dynatel 965 series tester, the AMS model is easy to use, requiring minimal training for testing professionals. And because it emphasizes fault diagnosis and fault location, customer problems can be solved quickly.

AUTOTEST

The knowledge-based smart autotest function is the product of more than a hundred years of Dynatel team experience. It allows an automatic test of active and inactive lines with pass/fail limits. Autotest capabilities also include expert system analysis of test results with advice on how to repair or how to locate faults. 3M™ Dynatel™ Far End Device FED II and customizable selections of tests are supported by the autotest feature of the 965AMS platform.

EXTERNAL MODULES

The 3M™ Dynatel™ Advanced Modular System 965AMS modules are field swappable, testing the exact digital transmission modem needed for each job. The module supports special circuits technicians who work on a variety of circuit standards during a typical day. Because the modules are field swappable, the technicians can share them. So it's no longer necessary to buy a separate testing platform for each set of modules. The ADSL2+ module is currently available. The following is a list of future modem protocols: VDSL2, FTTx fiber test and VoIP.

RUGGED, WEATHER-RESISTANT DESIGN

The hand-held 965AMS product is housed in a lightweight, ergonomically-designed case for portability and ease of handling. The unit is weather-resistant and weighs only 5 lbs (2.2 kg). The unit operates on a desktop, on the ground, up in an aerial environment and in underground locations.

The Dynatel brand and the distinctive Dynatel yellow case are your assurance of rugged dependability.

ACCESSORIES

PRODUCT NAME	DESCRIPTION
Test leads	Five 5-ft (1.5 m) test leads with 2 mm gold-plated banana plugs one end and chrome-plated alligator clips on other end (black/red, blue/yellow, green) Lead styles include bed of nails, no nails, spike and Canadian test leads
European test leads	Five 5-ft (1.5 m) test leads with 2 mm gold-plated banana plugs one end and 4-mm gold-plated banana plugs on other end (black/red, blue/yellow, green)
RFL strap	1.5 ft (0.5 m) with alligator clips on ends
AC/DC adapter	100-250 VAC (50/60 Hz) input, 12 VDC (1 A) output Power cord with IEC socket, US cord included

ENVIRONMENTAL SPECIFICATIONS

Operating temperature	0° to 140°F (-18 to 60°C)
Storage temperature	-40° to 165°F (-40 to 75°C)
Moisture: rain, water and humidity proof	Meets or exceeds IP65, IP67

PHYSICAL SPECIFICATIONS

	SIZE (H X W X D) IN. (CM)	WEIGHT (INCLUDING BATTERIES)
965AMS (includes ADSL2+ module)	11.5 x 5.75 x 3.25 (29 x 14.5 x 8.3)	5 LB (2.2 KG)

GENERAL SPECIFICATIONS

Drop test	Survives 3 ft (1 m) drop onto concrete, (survives 5 ft drop onto concrete with soft case) using ASTM D4169 assurance level I method 5276
Vibration	Meets Mil 810F method 514.5
Water, dust and chemical proof	Meets IP65 per IEC 529 (1989) for rain and dust Immersion test IP67 0.15 m deep
Emissions	Standards meet FCC part 15, class A: Digital Devices for the US, and EN55022 (radiated emissions)
Built to ISO9001/2000 certification for manufacturing facilities and TL 9000 compliant	
Built to ANSI/IPC A610-C manufacturing standards	
Language	English, Spanish, and French Canadian*
Units	Feet or meters, Fahrenheit or Celsius, dBrnC or dBm0p, m/uS or Vp
Battery	Rechargeable battery pack or alkaline, 9 hours typical use (50% on/off measures voltage)
Display	4.1" x 3.1" (104 x 79 mm), 320 x 240 pixel resolution, high visibility in bright sunlight due to $3M^{m}$ Vikuiti™ film technology
Stored results (All Results)	100 results total of all types maximum

 $\textbf{Note:} \ \ \textbf{Routine lab calibration is not recommended or required}$

High power interrupted signal for tracing and identification Kick test Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs Voice band tests Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility Indicates the presence of load coils in a loop circuit and distance to the first load coil Loss Noise Measures voiceband loss Noise Measures noise metallic and noise to ground in dBrnC or dBm0p Longitudinal balance Level trace Measures and displays the impedance of the un-terminated	Ringers	
Kick test Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs Voice band tests Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility Load coil count Indicates the presence of load coils in a loop circuit and distance to the first load coil Loss Measures voiceband loss Noise Measures noise metallic and noise to ground in dBrnC or dBm0p Longitudinal balance Level trace Measures and displays the impedance of the un-terminated	Ground resistance	Measures the resistance of the ground path
Voice band tests Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility Load coil count Indicates the presence of load coils in a loop circuit and distance to the first load coil Loss Measures voiceband loss Noise Measures noise metallic and noise to ground in dBrnC or dBm0p Longitudinal balance Level trace Measures and displays the impedance of the un-terminated	ID tone	High power interrupted signal for tracing and identification
Load coil count Indicates the presence of load coils in a loop circuit and distance to the first load coil Loss Measures voiceband loss Noise Measures noise metallic and noise to ground in dBrnC or dBm0p Longitudinal balance Provides active measurement of line balance Level trace Measures and displays the impedance of the un-terminated	Kick test	
and distance to the first load coil Loss Measures voiceband loss Noise Measures noise metallic and noise to ground in dBrnC or dBm0p Longitudinal balance Provides active measurement of line balance Level trace Measures and displays the impedance of the un-terminated	Voice band tests	Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility
Noise Measures noise metallic and noise to ground in dBrnC or dBm0p Longitudinal balance Provides active measurement of line balance Level trace Measures and displays the impedance of the un-terminated	Load coil count	·
Longitudinal balance Provides active measurement of line balance Level trace Measures and displays the impedance of the un-terminated	Loss	Measures voiceband loss
Level trace Measures and displays the impedance of the un-terminated	Noise	Measures noise metallic and noise to ground in dBrnC or dBm0p
	Longitudinal balance	Provides active measurement of line balance
	Level trace	
Tone Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz	Tone	testing. 10 default tones, user selectable. Voiceband to 20 kHz,
Autotest Supports 3M™ Dynatel™ Far End Device FED II	Autotest	Supports 3M [™] Dynatel [™] Far End Device FED II
Dialing Offhook, dialing capability, monitoring capability	Dialing	Offhook, dialing capability, monitoring capability
Microphone and speaker capability Speaker has 1-watt power output for noisy environments	Microphone and speaker capability	Speaker has 1-watt power output for noisy environments
Caller ID functionality Displays number, name, date, and time just like the customers callbox	Caller ID functionality	Displays number, name, date, and time just like the customers callbox

FEATURES

Wideband shortrange testing	Wideband loss with limited range, wideband tone. This feature set is enabled in the basic and TDR units. Wideband loss measurements for short range or low frequency
Test impedance	135 ohms only
Tone	20 kHz to 1.2 MHz at OdBm

OPTIONAL FEATURES

TDR	Full-featured TDR with user-selectable pulse widths, length, gain zoom, filter and Vp. The TDR feature is enabled in the TDR and SA models
Single trace	Provides graphical representation of events on a pair. Including expert system analysis of trace results
Dual trace	Allows active comparison of two traces
Differential	Displays difference between two circuits
Crosstalk	Displays the crosstalk from one pair to another
Memory	Allows comparison of an active trace with a trace stored in memory
Memory diff	Difference between memory and live trace
Peak	Displays a history of maximum and minimum values with the live trace
WideBand tests	Wideband loss, wideband noise, wideband tone, Spectrum Analyzer this feature set is enabled in the SA models
WideBand	Continuous sine wave insertion loss and noise measurements
Test impedances	100 and 135
Wideband loss	Loss measurements to 2.2 MHz for pre-qualifying xDSL
Tone	20kHz to 2.2 MHz at 0dBm
E, F, G, G2 filter	Weighted noise and impulse noise counting

Available soon. To order, call 800/426 8688 and specify the appropriate 965AMS with optional ADSL2+ modem. The platform includes the NiMH battery pack, AC Adapter, AC power cord, test leads, alkaline battery holder, conductor strap and user's guide. You may order the ADSL2+ modem and 3M™ Dynatel™ Far End Device FED accessory for the 965AMS separately. For further information, please contact your local 3M representative or visit our website at http://www.3M.com/dynatel for more details.

ORDERING INFORMATION

PRODUCT NUMBER	STOCK NUMBER
965AMS-TDR/SA/ADSL2+/AC/DC/BON	80-6113-1614-4
965AMS-TDR/SA/ADSL2+/AC/DC/NN	80-6113-1660-7

KIT COMPONENTS

965AMS BASIC	DESCRIPTION
965AMS Basic	965AMS base unit, storage bag, blue, yellow, green, red and black test leads. Conductor strap, NiMH battery pack (packed in unit), alkaline battery holder, wire gauge, self test circuit board and chain bead, 110/220V AC adapter, certificate of calibration, vehicle power adapter, instruction manual, warranty card, quick reference card, USB cable, and ethernet cable (with ADSL2 options)

The full-service 3M repair facility can help you with any spare part needs. Contact the 3M
repair center at 800/426 8688, or online at www.3MRepair.com.
