# Work harder. Play harder.

If you're looking for the perfect balance of versatility, off-road capability, comfort, and rugged styling – you've found it. When it comes to going from job site to job site, or even for a trip to the lake, Tacoma has everything you need. Hauling camping equipment? Or anything else for that matter? No problem. Tacoma's

Sheet-Moulded Composite material in the bed isn't just a liner – it's the actual bed. To top it off, it has better impact strength than steel, so worrying about damage and wear is a thing of the past. And with a standard Deck Rail System with four adjustable tie-down cleats, securing any type of cargo is easier than ever.

# And you thought the outside was impressive.

In any other truck, the fun and excitement begins the moment you get to your destination. But with the 2015 Tacoma, the adventure starts as soon as you step inside the spacious interior. Its available 4x4 Double Cab seats five with plenty of head and leg space to spare, while the available 4x4 or 4x2 Access Cab makes carrying equipment and gear surprisingly easy.

Tacoma takes comfort and convenience seriously with premium features, advanced technology, and plenty of storage options that make every drive enjoyable. The available heated SofTex® front seats make quick work of getting you warm, no matter how cold it might be outside. Tacoma also features a 6.1-inch Display Audio System<sup>4</sup> with available Navigation<sup>5</sup> to help you take the guesswork out of getting to your destination. And for those days when you're transporting more gear than you are people, the convenient 60/40 split rear bench seat can fold down flat to create extra storage space.

## Toughness. It's built right in.

If there was one word to perfectly sum up what Tacoma is all about, that word would be "tough". Tacoma is built on a rugged frame with 8-inch cross members for reinforcement, and features an engine with Variable Valve Timing with intelligence to help maximize power using minimum fuel. The available V6 delivers a powerful 236 horsepower at 5,200 rpm and a full 266 lb.ft. of torque at 4,000 rpm. Best of all, Tacoma offers tried and tested Toyota reliability you can count on, proven by the fact that 85% of Toyotas sold in Canada in the last 20 years are still on the road today.\*

**ELECTRONICALLY CONTROLLED LOCKING REAR DIFFERENTIAL** Tacoma's available electronically controlled locking rear differential distributes power evenly to both rear wheels, providing more grip in low-traction conditions. A steel sleeve actuator locks the slide gear into the ring gear, locking the rear axles. Once locked, the rear axle can apply all of its traction to help get you moving in the right direction.

**V6 ENGINE** The design of Tacoma's available V6 engine puts the spark plugs in the centre of the combustion chamber. This pentroof combustion creates a cleaner, more efficient burn and increases both performance and fuel efficiency.

**BILSTEIN® SHOCKS** Available Bilstein® shocks deliver a ride so capable you'll mistake the off-road for the blacktop. Tacoma also offers ventilated front disc brakes that deliver confident stopping power no matter how bad the road or weather conditions are.

# 6

**AIRBAGS<sup>1</sup>** Tacoma provides a comprehensive supplemental restraint system that includes dual-stage driver and front passenger airbags, front seat-mounted side airbags, and roll-sensing front and rear head/side curtain airbags.

## There's safe. And then there's Tacoma safe.

Whether you're by yourself or travelling with friends and family, safety should always be top of mind – and with Tacoma, it is. With safety features like six standard airbags<sup>1</sup>, Active Front Headrests with Whiplash Protection and a Tire Pressure Monitoring System, you get the peace of mind you deserve with every drive. Tacoma is also designed with an impact-absorbing body structure that efficiently distributes impact energy in the event of a collision, along with a high-strength body framework that reduces cabin deformation. And if you're bringing small children on the road, the standard Anchor Points for Child Restraint Seats allow you to securely install a child seat quickly and easily. All of this and more really add up to one safe ride.

**TIRE PRESSURE MONITORING SYSTEM (TPMS)** One of the best ways to help fuel efficiency and performance is to make sure tires are inflated correctly. TPMS is designed to alert the driver if one or more of the tires are critically low.

**STAR SAFETY SYSTEM™**

**VSC VEHICLE STABILITY CONTROL**

Helps prevent slips and loss of traction by reducing engine power and applying the brake force to the wheels that need it.<sup>6</sup>

**TRAC TRACTION CONTROL**

Helps maintain traction on wet, icy, loose or uneven surfaces by applying brake force to the spinning wheel(s).

**ABS ANTI-LOCK BRAKE SYSTEM**

Prevents brakes from locking up by "pulsing" brake pressure to each wheel to help you stay in control in emergency braking situations.

**EBD ELECTRONIC BRAKE-FORCE DISTRIBUTION**

Redistributes brake force to help keep the rear wheels from locking up during sudden braking situations.

**BA BRAKE ASSIST**

Detects sudden or "panic" braking and adds the full pressure needed to help prevent a collision.<sup>7</sup>

**SST SMART STOP TECHNOLOGY**

Smart Stop Technology is designed to reduce engine power when the brake is firmly applied helping to bring the vehicle to a stop, even if the accelerator pedal is fully depressed.<sup>8</sup>

Nothing is more important than the safety of you and your family. And that's why every 2015 Toyota vehicle comes standard with the Star Safety System™. It integrates an array of active safety technologies that work together to protect occupants by helping drivers avoid accidents in the first place. Safety is our number one priority and that is why Toyota was the first manufacturer to make all of the elements of the Star Safety System™ standard on every new vehicle. No matter which Toyota you choose, you'll know it comes with peace of mind built right in.

## Committed to Canadian Communities

Being a leader in the automotive industry does not simply start and finish with making great vehicles. It also means being a leader in the community. Toyota Canada and its dealerships across the country support non-profit programs that work to make a difference for Canadians in the areas of environment, safety education and quality.

Together with Evergreen, we established the Toyota Evergreen Learning Grounds program, designed to transform Canadian school grounds into natural learning environments so students can have a healthy place to play, learn and develop a genuine respect for nature. Toyota also supports kartSTART, a program educating Canadian youth about vehicle safety in vehicles that fit them, go-karts. As part of our ongoing commitment to innovation, Toyota's Collaborative Safety Research Center is partnered with the University of Toronto in a study, designing feedback (alerts) in vehicles to help induce safer driving behaviours.

Visit us at [toyota.ca](http://toyota.ca) to learn more about our programs and commitment to Canadian communities.

## New vehicle warranty summary – No deductibles – no transfer fees

**COMPREHENSIVE COVERAGE** 3 years or 60,000 km. This warranty includes 24 hour Roadside Assistance and other benefits, as well as coverage of repairs on any part of the vehicle that is defective in material or workmanship under normal use and maintenance. Different warranties apply to original tires.

**POWERTRAIN COMPONENTS** 5 years or 100,000 km. This warranty covers repairs to powertrain components that are defective in material or workmanship under normal use and maintenance.

**MAJOR EMISSION CONTROL COMPONENTS** 8 years or 130,000 km. This warranty covers repairs to specified major emission components that are defective in material or workmanship under normal use and maintenance.

**CORROSION PERFORATION** 5 years/unlimited distance. This warranty covers any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship.

## Disclaimers

(1) All Toyota vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Toyota Dealer. (2) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (3) Toyota tests certain Bluetooth® capable phones for compatibility with Toyota vehicles. Note that the recommendation of Toyota is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the phone software version or the service coverage available in your area. Some vehicles equipped with Bluetooth® technology are available with bilingual compatibility. Please see your Toyota Dealer for details. (4) Driving while distracted can result in loss of vehicle control. Always drive safely, obey traffic laws and focus on the road and traffic conditions while driving. (5) The Toyota Navigation System is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Rely on your common sense to decide whether or not to follow a specified route. Detailed coverage is not available for every city or roadway. Optional periodic geographic updates are available at an additional cost. The Navigational systems in some vehicles are available with bilingual capability. Please see your Navigation System Owner's Manual and your Toyota Dealer for further details. (6) Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. Please see your Owner's Manual for further details. (7) Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. (8) Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions, driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. Please see your Owner's Manual for further details. (9) DAC is designed to help the driver maintain vehicle control and speed on steep downhill descents. HAC is designed to help minimize backward rolling on steep ascents. This system is not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether DAC and HAC will be effective in preventing a loss of control. Please see your Owner's Manual for further details. (10) Payload = Passengers, Equipment, Luggage and Cargo.
