### Barzso Playsets - Reissue Fortified Abbey (54mm)

RBZ001rg This expanded foam castle includes ten pieces - a fortified gatehouse, four walls, four towers (each with red slate roofs), and a fortified chapel. "The Fortified Abbey" was originally produced by Ron Barzso in the late 2000's as an upgraded centerpiece for his Robin Hood Playset. Sculpted and painted to a high detail, it can stand alone or be combined with The Duke's Stronghold and/or the separate walls and towers we offer. Because this item is oversized, we will have to charge you an additional shipping fee. Once we weigh the carton we will advise you of the amount. \$ 290.00

### Barzso Playsets - Duke's Stronghold (54mm) (see photos on website)

RBZ001r Standing 31 inches tall from base to the top of the crenelated tower, this expanded foam castle keep includes five pieces - the rocky base, two tower pieces, the top of the tower, and a small tower. "The Duke's Stronghold" was originally produced by Ron Barzso in 2016. Painted to a high detail, it will become one of the centerpieces of any Medieval toy soldier collection. Because this item is oversized, we have added a shipping surcharge to the price. You will pay no more than the listed price plus standard shipping and, if in NY or NJ, sales tax. \$ 365.00

# BARZSO ORIGINALS

(U.S.A.) 54mm painted expanded foam resin.

The original pieces were produced before Ron Barzso re-tired. The Reissues are current LOD production.

### Barzso Playsets - ORIGINAL Tripoli Town Wall (54mm)

RBZ304 1st version paint job. Mint condition. 54mm figures shown for scale. This great Barzso item is part of his modular City of Tripoli town wall series. The walls were not part of his "Shores of Tripoli" playset, but were intended to enhance play. There are two different paint schemes for this item, the one shown is a highly-detailed version, with lots of the Mediterranean blue details seen in our photos. The second type was less detailed. Measures 22 inches long x 8 8inches wide x 9.5 inches high. These walls can be used interchangeably to create an endless barrier, a 4-piece (or more) stand-alone fortress or be mixed with other foam buildings and fortification elements to build an entire city. You can use these walls in many different historical eras.....\$ 319.95

### Barzso Playsets - ORIGINAL Fort Ticonderoga "Stone Fort" (54mm)

RBZ002t This is the ORIGINAL Barzso Fort Ticonderoga, not a reissue. Ron Barzso visited upstate New York's Fort Ticonderoga in the early 2000's. The result was a massive model, which Ron sculpted himself. This huge expanded foam fort is comprised of 12 pieces: four angled corner bastions, 2 straight walls with gateways, 2 straight walls without entries and four interior buildings. The structure measures 4 x 4 feet and can hold a garrison of hundreds of figures! "Fort Ticonderoga" was originally produced in 2005, which is when I bought it from Ron. Sculpted and painted to a high detail, it is one of the largest stand-alone defense positions ever produced. (54mm figures and accessories are shown for scale - you are buying just the 12-piece fort). Because this item is oversized, we will have to charge you an additional shipping fee. Once we weigh the carton we will advise you of the amount. \$ 895.00
