

Embalming Powder

Sanisorb

A must have in any embalming room, Dodge Sanisorb can be used in any situation where a dependable absorptive product with a pleasant scent is required.

Sanisorb

Performance Highlights:

- Absorbs copious amount of moisture.
- Perfect inside plastic garments where leakage or oedema may cause problems.
- Excellent for use in coffins of repatriation cases.
- Use in coffins stored in vaults or mausoleums.
- Cleans up any embalming room spills instantly.
- Absorbs moisture in the cavities of autopsy cases as well as inside bone donation incisions.
- Uses for Sanisorb are limited only by your imagination.

Q-S Powder

Performance Highlights

- Forms powerful, positive and dependable closures.
- Contains highly effective deodorising and preserving chemicals.
- Pleasant to use, does not create dust in the air.
- Will not cake or turn gummy, Q-S Powder lasts for years if container is kept closed.
- Excellent for incisions, wounds, open lesions, suture needle holes, body orifices and autopsy cases.
- Works virtually on contact. No waiting around for a seal to develop.

A low cost, high bulking absorbent compound that can be used for drying and filling autopsied cases. Hardening Compound delivers limited preservation and helps to suppress offensive odours. Hardening Compound will not cake or solidify in the drum and is simple and economical in application.

Paraformaldehyde Prills

A convenient way of applying Paraformaldehyde to the surfaces or cavities of a body in a relatively dust free manner. Paraformaldehyde Prills can be used in lieu of Hypo work on autopsies and difficult cases, or applied to bodies where decomposition has rendered arterial injection impossible. Paraformaldehyde Prills fume heavily and care should always be taken to apply in a well ventilated area.

Embalming Powder

Action Powder

a.

A real must have for any and every embalming room. Dodge Action powder delivers fast dependable preservation to areas not receiving fluid through arterial injection. Action powder may be used freely on autopsy cases for treating the trunk walls or cranial vault. Action may also be used for cases requiring deodorising and preservative treatment which are beyond arterial injection.

Action Embalming Powder

Performance Highlights:

- Assured performance on cases where arterial injection could be difficult if not impossible.
- Excellent inside caskets, grave vaults, mausoleums and crypts.
- Very useful for treating bed sores, cancerous or putrefactive areas.
- Effective in lieu of hypo work on wet or dry decomposed cases or autopsy cases where trunk walls do not receive adequate fluid during injection.
- Use with plastic undergarments to preserve and dry oedematous limbs.
- Useful for treating infant cases where traditional treatments would be impracticable.
- Used by many for the treatment of exhumed or disinterred cases.

Absorbent Products

Superabsorbent Sachets

a.

Sold in boxes of 50 individual sachets, this absorbent product can be used to seal leaking incisions, pack the nose and throat of the deceased and even to close anal and vaginal orifices. Dodge Superabsorbent is applied in the same way as cotton wool or cellulose wadding. This product will absorb a remarkable amount of fluid and form a leak proof seal.

Superabsorbent Cranium Caps

Sold individually, these caps are made especially to deal with any leakage from the cranium of the deceased due to trauma or post mortem examination before and after embalming. The cap is simply placed between the head of the deceased and the coffin or casket pillow. Containing the same ingredients as the Superabsorbent sachet, any leakage is captured and solidified to prevent staining of the interior of the coffin or casket.
