Prescott.....	65

## Methodology

The Alumni Survey: One Year After Graduation - was administered using a mixed mode survey design. Respondents were initially given the opportunity to complete the survey online. Approximately 1 month after the online survey implementation, postcards were mailed to non-respondents. The survey was conducted in the Fall of 2015. Questions were developed by the Office of Institutional Research in consultation with Career Services Office, College Deans, Department Chairs, and Program Coordinators at both Daytona Beach and Prescott campuses. Core questions, common throughout all surveys, addressed educational goals, current employment status, overall ERAU satisfaction, and acquired general education and research skills. Each college and program was given the opportunity to incorporate additional questions specific to their graduates. Additionally, program-specific items meant to address student learning outcomes were incorporated. The following tables reflect the responses from the graduating class of 2013/14 for both the Daytona Beach (n=392, response rate = 37%) and Prescott (n= 125, response rate = 38%) campuses.
