<i>Introduction</i>	<i>xxv</i>

## Part I FORMATION OF ROCKS

<b>1</b>	<b>Historical Geology</b>	<b>3–14</b>
1.1	Introduction	3
1.2	A Short History of Earth and Division of Geological Time	3
1.3	Geological History (Time Scale and Rock Scale)	5
1.4	Division of Geological Scales	5
1.5	Historical Divisions of Geological Formations in India	7
1.6	Geologic Formation and Series	7
1.7	Physiographic and Stratigraphical Divisions of India	8
1.7.1	Physiographic Division of India	8
1.7.2	Stratigraphical Division of India	9
1.8	Examples of Descriptions in Engineering Geology	11
1.9	Plate Tectonics and Continental Drift	11
1.9.1	The Theory of Isostasy	13
1.9.2	Movements between Plates	13
1.10	Summary	13
	<i>Review Questions</i>	14
	<i>References</i>	14
<b>2</b>	<b>Elements and Minerals</b>	<b>15–17</b>
2.1	Introduction	15
2.2	Minerals and Rocks	15
2.2.1	Rock-forming Minerals	15
2.2.2	Clay Minerals	16
2.2.3	Activity of Clays	16

2.3	Study of Rocks and Soils by Civil Engineers	16
2.4	Composition of Principal Minerals	17
2.5	Summary	17
	<i>Review Questions</i>	17

### **3 Rocks and Their Formation 18–22**

3.1	Introduction	18
3.2	Comparison of Formation of Different Types of Rocks with Formation of Steel Concrete and Bricks	19
3.3	Kinds of Rocks	19
3.3.1	Formation of Igneous Rocks—"The Parent Rock" from Magma	20
3.3.2	Formation of Sedimentary Rocks	20
3.4	How Metamorphism Can Take Place	21
3.5	Summary	22
	<i>Review Questions</i>	22
	<i>References</i>	22

### **4 Igneous Rocks 23–28**

4.1	Introduction	23
4.2	Extrusive and Intrusive	23
4.2.1	Extrusive or Volcanic Rocks	24
4.2.2	Intrusive or Plutonic Rock	24
4.3	Forms of Intrusive Rocks	24
4.4	Chemical and Mineralogical Composition—Classification of Igneous Rocks	25
4.4.1	Acidic and Basic Rocks	26
4.5	Important Igneous Rocks	27
4.6	Rocks of Peninsular India	27
4.6.1	The Deccan Trap	27
4.6.2	Charnokites	27
4.7	Summary	27
	<i>Review Questions</i>	28
	<i>References</i>	28

### **5 Sedimentary Rocks 29–33**

5.1	Introduction	29
5.2	Formation of Sedimentary Rocks	29
5.3	Cementation of Clastic Deposits	30
5.3.1	Gravel to Conglomerates and Breccias (Rudaceous Deposits)	31
5.3.2	Sand to Sandstone (Arenaceous Deposits)	31
5.3.3	Silt and Clay Form Shales (Argillaceous Deposits)	32
5.4	Chemically Formed Sedimentary Rocks	32
5.4.1	Marl to Limestone and Dolomite (Calcareous Deposits)	32
5.5	Importance of Immersion Tests on Sedimentary Rocks	32
5.6	Summary	33
	<i>Review Questions</i>	33

<b>6</b>	<b>Metamorphic Rocks</b>	<b>34–38</b>
6.1	Introduction	34
6.2	Changes in Sedimentary Rock Due to High Temperature and Pressure	34
6.2.1	Argilaceous Rocks	35
6.3	Formation of Slate from Shale	35
6.4	Marble from Crystalline Limestone and Dolomite	35
6.5	Quartzite from Sandstone and Formation of Schist	37
6.6	Formation of Gneiss	37
6.7	Criteria for Distinguishing between Metamorphosed, Igneous Rocks and Sedimentary Rocks	38
6.8	Summary	38
	<i>Review Questions</i>	38
<b>7</b>	<b>Structural Features in Rocks</b>	<b>39–47</b>
7.1	Introduction	39
7.2	Rock Structures	39
7.3	Structural Features	40
7.4	Joints	41
7.5	Folds	41
7.5.1	Dip, Strike and Angle of Plunge	42
7.6	Faults	43
7.6.1	Overthrust	44
7.7	Cleavage	45
7.8	Minor Structural Features in Sedimentary Rocks Produced by Erosion	45
7.9	Summary	46
	<i>Review Questions</i>	47
	<i>References</i>	47
<b>8</b>	<b>Chemical Weathering of Rocks</b>	<b>48–50</b>
8.1	Introduction	48
8.2	Nature of Action of Groundwater on Igneous Rocks	48
8.3	Action of Groundwater on Limestone	49
8.4	Action of Groundwater on Dolomites	49
8.5	Action of Groundwater on Clastic Rocks	49
8.6	Action of Groundwater on Metamorphic Rocks	49
8.7	Formation of Laterites	49
8.8	Formation of Expansive Soils (Black Cotton Soils)	49
8.9	Summary	50
	<i>Review Questions</i>	50
<b>9</b>	<b>Engineering Properties of Rocks</b>	<b>51–59</b>
9.1	Introduction	51
9.2	Standard Laboratory Tests	51
9.2.1	Test for Density or Specific Gravity and Porosity	52
9.2.2	Water Absorption (Immersion) Test	52

9.2.3	Compressive Strength and Elastic Modulus	52
9.2.4	Split Test for Strength in Tension (Brazilian Test)	53
9.2.5	Modulus of Rupture Test	53
9.2.6	Abrasion Resistance Tests by Dorry's Machine	54
9.2.7	Attrition Test by Deval's Attrition Test Machine	54
9.2.8	Impact Test for Toughness	55
9.2.9	Crushing Strength Test	55
9.2.10	Alkali-Aggregate Reaction Test and Test for Deleterious Substances	56
9.3	Field and In Situ Tests for Rock Quality	56
9.4	Field Permeability Test	57
9.4.1	Tests for Permeability of Overburdens	57
9.4.2	Pressure Test for Field Permeability of Rocks	57
9.5	Summary	58
	<i>Review Questions</i>	58
	<i>References</i>	58

## **10 Weathering of Rocks and Geomorphology 60–65**

10.1	Introduction	60
10.2	General Landforms and Forces Making Them	60
10.3	Weathering of Rocks	61
10.4	Mechanical Weathering	61
10.5	Chemical Weathering	62
10.6	Transport of Products of Weathering	63
10.7	Type of Regolith at a Place	64
10.8	Symbols Used to Describe the State of Weathering of Rocks	64
10.9	Summary	64
	<i>Review Questions</i>	65
	<i>References</i>	65

## **11 Groundwater and Groundwater Recharging 66–77**

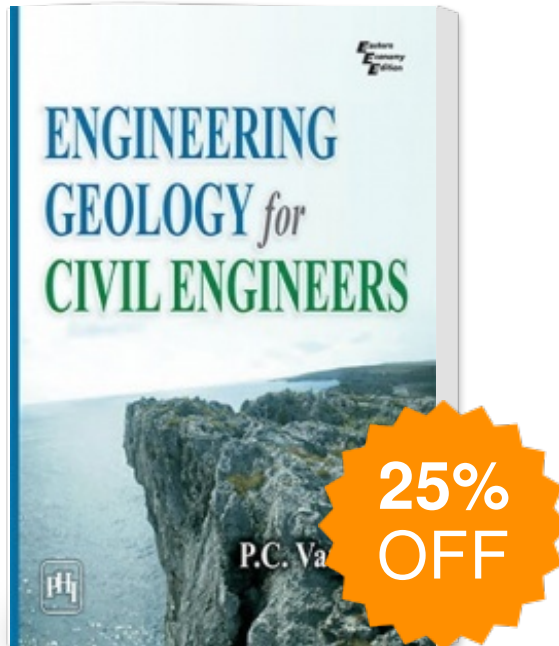

11.1	Introduction	66
11.2	Porosity and Permeability	66
11.3	Sources of Groundwater	67
11.3.1	Flow of Rainwater	67
11.3.2	Groundwater Zones	68
11.4	Freshwater and Salt Water Levels Near the Sea	69
11.5	Movement of Groundwater	69
11.6	Seepage and Springs	70
11.6.1	Thermal Springs	70
11.6.2	Aquifers and Artesian Water	70
11.7	Movement of Water in Rocks	71
11.7.1	Movement of Water in Igneous Rocks	71
11.7.2	Sedimentary Rocks as Aquifers	71
11.7.3	Metamorphic Rocks as Aquifers	72

11.8	Perched Water Tables	72
11.9	Wells for Extraction of Groundwater	72
11.9.1	Pumping from Wells	73
11.9.2	Groundwater Exploration	73
11.10	An Interesting Case of Dewatering and Recharging of Foundation	74
11.11	Recharge of Groundwater by Rainwater Harvesting	74
11.11.1	Roofwater Collection	75
11.12	Summary	76
	<i>Review Questions</i>	77
	<i>References</i>	77

## **Part II FORMATION OF SOIL DEPOSITS**

<b>12</b>	<b>Field Identification and Classification of Soils</b>	<b>81–89</b>
12.1	Introduction	81
12.2	Unified Soil Classification Systems (USCS)	81
12.3	Subdivisions of Coarse-Grained Soils	82
12.4	Symbols for Grading Classification of Gravel and Sand	83
12.5	Classifications of Fine-Grained Soils by Laboratory Tests	83
12.6	Summary of Symbols Used and Simplified Classification of Soils	84
12.7	Field Identification of Fine-Grained Soils	84
12.8	Summary of the Procedure for Field Identification of Soils	86
12.9	Examples of Field Description of Soils	87
12.10	U.S. Department of Agriculture Classification of Soils (Sand, Silt and Clay)	88
12.11	Summary	89
	<i>Review Questions</i>	89
<b>13</b>	<b>Streams Rivers and Their Deposits</b>	<b>90–100</b>
13.1	Introduction	90
13.2	Streams and Rivers	90
13.3	Playfair's Law (Functions of a River)	91
13.4	Particles Carried or Deposited by River Water	91
13.4.1	Erosion	92
13.4.2	Transportation of Eroded Materials	93
13.4.3	Deposition (Alluvial Deposits)	93
13.4.4	The Problem Faced by Civil Engineers while Dealing with Rivers	93
13.5	The Normal Stream Cycle	94
13.5.1	Stream Cycle	94
13.6	Rejuvenation of Rivers	99
13.7	Coriolis Effect and Ferrel's Law	99
13.8	Soil Deposits Along the River	99
13.9	Summary	100
	<i>Review Questions</i>	100
	<i>References</i>	100
