Implementer Selection

EPICOR.

Support Transformation – Driven From Customer Feedback

Drivers for The EpicCare Program

↑ Customer Satisfaction

- ► Ability to Anticipate Customer Service Requirements
- ► Improved Responsiveness to Customer Calls & Service Delivery
- ► Making it Easier to Do Business
- ► Improved NPS

Reduced Service Costs

- ► Complete Charge Capture of Service Delivery
- ► Improved Technician Productivity
- ► Reduced Time in the "Service-to-Cash" Cycle

Streamlined Workflow

- ► Improved Processes & Technologies
- ► Automating Manual Processes Where Appropriate
- ► Separation of Case and Service Request (pre-defined workflows)

Improved Service Levels

- ► Vastly improved analytics and service controls
- ► Standardized Operating Model
- ► Ability to Deliver Consistent Service (Globally)

Enhanced Quality & Growth

- ► Modularity for Supporting Growth
- ► Improve Quality and Reduced Costs
- ► Maximized Cross-selling and Up-selling opportunities
- ► Ability to leverage services as a Competitive Advantage

EPICOR

Our Critical Choice

CRM

Customer Service Management

- **Customer relationship management** (**CRM**) is a system for managing a company's interactions with current and future customers.

- It often involves using technology to organize, automate and **synchronize sales, marketing, customer service, and technical support.**

- Today's CRM software is highly scalable and customizable, allowing businesses to gain **actionable customer insights** with a back-end analytical engine, view **business opportunities** with predictive analytics, streamline operations and **personalize customer service** based on the customer's known history and prior interactions.

- ITIL is the process of aligning enterprise IT services with business and a primary focus on the delivery of **best services** to end user (customer)

- ITIL focuses on delivering services such that that the end-user **experiences the most desired result**

- **Focus is on standardizing**

- Measures the **operational efficiency** in meeting service level expectations

- ITIL is a **comprehensive suite of best practices**

... BUT with an External Focus!!

EPICOR.

Epicor's Decisions

Drivers to Undertake Transformation

Critical Decision: CRM vs. CSM

Vendor Selection

Implementer Selection

Improve Customer Satisfaction

CSM: Customer Service Management

servicenow

COVESTIC

A Few Words About servicenow

▶ A fast-growing, global company

- Revenues of c.US$1.4bn p.a.

- 4,800 employees

▶ 100% cloud-based solution delivery

▶ Leader in ITSM solutions for internal IT

▶ Emerging leadership in CSM

As of August 2014

EPICOR.

Our Approach

- To *partner* with ServiceNOW to deliver the EpicCare platform

- Initial focus on **system implementation** and the **global roll-out**
  - With the minimum of true 'customizations'

- Then move into a **'Continuous Improvement'** phase
  - Delivering service improvements to Customers & Partners
 - Improving the user experience and efficiency for our Support Analysts

How We Have Positioned EpicCare

▶ *Transformational* project focused on improving the overall customer experience

▶ Major investment, driven from customer feedback

▶ Combination of *systems* and *processes*

- **A single support system** across all products, for all customers & partners, all geographies, based upon the ServiceNOW CSM platform

- **Consistent support processes**, leveraging best-in-class ITIL/ITSM practices, driven by Command Center team

▶ Move to Knowledge-Centric Support (KCS)

▶ Continuous improvement focus

▶ A 'proper' Change Management program – internal and external

EPICOR

EpicCare Customer Portal

Epicor Case Management and Positive Case Closure (PCC)

Submission ➡ **Solution Determined** ➡ **Solution Proposed** ➡ **Solution Accepted** ➡ **Quality Review**

Accepted

Rejected

|				
Case is submitted to Epicor Support. The selected Asset, Category, and Subcategory are used to route the case to the best support team.	Epicor works the request. Multiple teams may be involved in the determining a solution. Case Work notes show the progression of the Case.	Once a solution is determined, the solution is proposed to the customer and they are notified via eMail along with several reminders. Customers can choose to … • **Accept** the solution • **Reject** the solution • **Wait** – This option requires that the customer is registered on the Portal. The customer chooses the number of days to Wait and the Case will be suspended until that time after which the customer will again be notified via eMail on these options.	If **Accepted**, the Case is marked as closed and customer accepted. If **Rejected**, the Case is returned to In Progress with a Status of "Customer Reactivated". If **NO customer response** is received after the several requests, the Case is marked as auto-closed.	Immediately upon closure, the Epicor Survey Process is initiated and the Case moves into the Quality Review process.
State = New	State = In Progress State = Awaiting Customer	State = Resolved	State = Closed	

Business Results

EpicCare – The Results

- 51,000 users from Customers and Partners registered for EpicCare

- Run-rate of 500,000+ support cases annually going through the single EpicCare platform

- 33% of all support cases being logged through the new EpicCare customer portal
  - Increasing 1-2pp per month

Customer NPS

EpicCare Customer Feedback

"…HUGE improvement over the old system …

What am I going to do with all of my free time?"

— Retail Customer

"The new portal is amazing…Especially like the formatting in the Knowledge Base"

— Distribution Customer

"You can actually drop screen shots right into the website [and] reply to a case notification email with a screen shot…Just those two things and the ability to simply reply by email to the cases are HUGE…"

— Distribution Customer

"EpicCare is working well and support has been great…certainly a well-functioning support system"

— Manufacturing Customer

"Congratulations…. EpicCare helps us !"

— Channel Partner

And most importantly…
Early Indication of NPS Improvement….

EPICOR.

What's next for Customer Support at Epicor ?

▶ EpicCare global rollout completed

- • Now in EpicCare *Continuous Improvement* phase

▶ Upgrade EpicCare from Geneva to Jakarta

▶ Continued partnership with ServiceNow for Customer Service

▶ ServiceNow used for other parts of Epicor

- • ITSM for Internal IT completed May 2017

- • Other areas ?

servicenow

EPICOR.

And Finally…

EPICOR.

An Award for EpicCare

▶ May 2017: The EpicCare project announced as the winner of a 'Stevie' for **Customer Service Department of the Year** in the 2017 American Business Awards

▶ Comments from the judges:

"A transformative year for Epicor. Not many can replace all their systems and still show improving metrics"

"The new electronic case management system is impressive"

"You have been able to navigate the complexity of mergers and acquisitions nicely. Congratulations"

"All I can say is 'well done'."

EPICOR.
