Our Horseboxes

Being horses owners ourselves means that our lorries are built with your horse in mind and of course easy of use !We are constantly updating our models and build using the latest products and design. All our Horseboxes are built to the highest of standards and can be built to your own specification or chosen from our current stock.

A Family run business, with over 40 years as horse owners ourselves we are able to offer advice and knowledge to guide you with your choice of horse to suit your requirements.

Built using the latest materials to offer the best possible payload without compromising on safety for you and your horse. Constructed of lightweight composite panels ,offering exceptional strength to weight ratio. Unlike a lot of other horsebox manufactures we feel the need for a full size spare

wheel , which is found stored away securely underneath your horsebox.

The original steel bulked is retained between the driver and the horse area , this is then reinforced with composite and runners for our partition.

We produce to models - The Athena and The Apollo. These are built on carefully selected new to 3 year old chassis . Mainly Renault Masters DCI but we also use Nissan NV400, Vauxhall Movano's . All are

built on LWB so as to give your horse the best possible ride.

The Athena

This has been designed with modern styling and looks. Handcrafted fibreglass moulding, Modern 'Bonded' tinted windows, LED lighting , CCTV , all come as standard.

The Athena comes with an innovative ramp design which has a longer top door to allow for easier loading and unloading as well as

making it bright and inviting for your horse.

The grooms area comes with double bench seating with storage underneath . Easy clean interior. Extra large rear grooms door with stow away step. There is also two large tack lockers as well as storage above the cab.

Wonderful 'Gliding' partition, which enables you to fully utilise the internal horse area.

The Apollo

Has been designed for its practicality and ease of use. Light easy low level ramp, gliding partition, LED lighting and different designs in the grooms area are a few of its features. CCTV viewable from the cab and reversing camera come as standard.

Your Horsebox can be customised to suit your requirements.

At the design stage, we are able to offer you options such as Paint work colours, grooms area configuration, leather seating, Electric hookup, sink/hob, TV to name a few options.

Each of our 3.5 tonne horseboxes can be up rated to 3.9 tonne, giving an extra 400kg payload to the already 1000kg, making a huge 1400kg for you to be able to carry in your

horsebox. Please note that your driving licence needs to be the correct driver group for you to be able to drive a 3.9 tonne. Please enquire for more details.

Our horseboxes come in 3 sizes lengths, Compact, Standard and Extra. The horse area stays the same size but the change in length is in the grooms area, thus allowing for a sink/hob unit if required.

If you prefer we can also build on your own chassis or you can choose from one of our carefully selected chassis.

We have amongst our staff, qualified Coachbuilders , who have worked for some of the most prestigious Horsebox builders .

We are small enough to care , listen to your requirement, Knowable enough to advise and also offer that personal touch !
