jet-stream

The Softub hydrotherapy system was designed with one thing in mind - a customized hydrotherapy experience that you create! Personalize the unique Jet-Stream System with one or all of the following jet options:

A

B

C

A. X-Stream Spinning Jet #9813520

This jet features a spinning "center eye" that creates a rotating blast of water. The X-Stream is fully directional so that you control how broad - or tight - the pattern of water is by easily adjusting the location of the eyeball.

B. Pulse-Stream Spinning Jet #9813535

Two streams of water can be more fun than one! The Pulse-Stream jet spins to create a circular pattern of two dancing blasts of water.

C. Vari-Stream Jet Internal #9813540

The Vari-Stream Jet Internal replaces the Strong-Stream Jet Internal that is standard on every Softub model. The Vari-Stream allows you to control the amount of water flow simply by rotating the jet face. Turn the jet completely off to focus more power at the other jets, or open it wide to enjoy a soft, less turbulent flow than the standard Strong-Stream Internal.

THE JET-STREAM SYSTEM IS FOR SOFTUB MODELS MANUFACTURED AFTER JANUARY 1, 2006. SEE YOUR DEALER FOR OPTIONS ON TUBS MANUFACTURED PRIOR TO THAT DATE.

water filtration

A. Great Barrier Snap-on Extra for Softub #8555

Upgrade Your Spa Filter! High temperatures and the wet environment make the filter surface a target for bacteria. Great Barrier filters are made with **Reemay® Liberty™ with Microban®**. Microban antimicrobial protection inhibits the growth of bacteria that can cause stains, odors and degradation of the filter surface. The continuous cleaning action of Microban makes the filter easier to clean, and fresher between cleanings.

B. Great Cleaning Canister #5047

This handy canister can soak 1 - 2 filters at a time. Allows storage area for spa products when not in use.

C. Great Start Filter #5044

Don't fill your spa with water containing metals and other deposits then add chemicals to make them go away. Prep your water before it enters your spa and use less chemicals at start-up.

D. Great Grit Filter #5039

Grit and other debris can damage spa surfaces when filling from garden hoses and water heaters. Eliminate grit with this filter that attaches to any garden hose.

E. Great Filter Protector #5036

Not only does this scum sponge absorb 40 times its weight in body oils and lotions to help protect your filter from clogging, it's the perfect reminder to clean your spa filter. When it's dirty so is your filter.

F. Softcare Filter Renu #9802506

Clean your filter monthly to reduce scale and build-up and increase filter life. 16 oz.

G. Great Easy Clean #5050

Simply attach your garden hose to the Great Easy Clean and turn the valve. Watch as the water projects with high velocity in a flat fan pattern, working its way into the center of the filter for deep cleaning action. Cuts cleaning time dramatically.

lid lift

In the open position, the cover can act as a privacy screen to make your spa setting more secluded.

Softub Lid Lift

#8220CA

The only cover lift system in the world designed for the Softub spa! The new Lid Lift is the perfect accompaniment to the Softub Thermal Hinged Cover. Enjoy your Softub experience without struggling to remove the cover.

The Lid Lift stays securely under the spa due to the weight of the water in the spa. The lifting device utilizes two gas shocks to allow easy one-handed operation.

cover enhancements

I. Replacement Lid Strap with Locks

For use with the Thermal Hinged Cover. Combination locks avoid unauthorized access to the spa.
