## AUTOMATIC FEEDING EQUIPMENT FOR PRESS MACHINE

[www.chuhshin.com](http://www.chuhshin.com)

## Company History

- 2018** Product development import the core of industry 4.0 application
- 2017** Developed five sections precision of special leveler for thin material
- 2016** Set up service facility in Indonesia, Malaysia, Vietnam and Thailand
- 2013** Integration and development of a Wide Roll Material Cutter
- 2011** Developed a wide range width compact line (NCJ series)
- 2010** Developed a Twin Uncoiler 3 IN 1 compact line, and a Closed Circuit NC Servo System increasing the feed accuracy
- 2008** Established a Sales branch office for China market
- 2006** Developed a Forming Machine for Automobile Windshield Wipers meanwhile set up a service facility in Dongguan, Kunshan China
- 2005** Developed the Four Plane Precision Leveler unit for 2 IN 1 and 3 IN 1 model what is suitable for highly sensitive and flatness required materials. Applied for patents in Taiwan & China.
- 2003** Developed the 0.1~0.6mm, 2 Section Precision Leveler unit for the application with thin materials & then combined it with the 3 IN 1 compact line
- 2002** Developed the 2 section Precision Leveler unit with open top function
- 2001** The company moved to its present location (New Taipei Industrial Park) & established Chuh Shin Precision Machinery CO., LTD for its oversea trading business
- 1998** 3 IN 1 Compact Feed line developed
- 1995** NC Roll Feeder developed
- 1990** The wide range thickness Straightening Machine was developed
- 1989** The company moved to a larger facility due to business expansion and started doing business as Chen Hsin and under the brand name of GOW.
- 1978** The company was established in Taipei County specialized in manufacturing Uncoiler, Straightener, Cradle Type Feeder Straightener

## Key Press Line Equipment

- 03 3 IN 1 NCL Series Uncoiler / Straightener / Feeder
- 07 3 IN 1 NCT Series Two Section Uncoiler / Leveler / Feeder
- 11 3 IN 1 NCJ Series Heavy Duty Uncoiler / Straightener / Feeder
- 14 NC Servo Feeder
- 17 2 IN 1 Four Plane Surface Precision Uncoiler & Leveler
- 19 2 IN 1 Two Plane Precision Uncoiler & Leveler
- 23 2 IN 1 Series Compact Uncoiler & Straightener
- 26 Uncoiler & Straightener

Chuh Shin Precision Machinery is focused on Uncoiler, Straightener, Precision Leveler and Feeder machines as well as customized equipment for coil processing and press automation. We are part of the GOW Group which was established in 1978. With a wide range of specialized equipment for the automotive, electronics, hardware and furniture industries we continuously develop and create patented solutions for high efficiency sheet metal production. Headquartered in Taiwan and with a sales and service branch in China for prompt delivery and service to clients around the world, we are well-known industry wide for ease of use, reliability and performance. Our machines help manufacturers to reduce production costs, improve product quality while increasing their yield and bottom line.

### Features

- New concept and design reduces space requirements.
- High rigidity mechanical structure design and work with Mitsubishi servo control system to ensure the feeding accuracy.
- Friendly operation by adopting Human Machine Interface control system.
- Auto feed monitoring function which can be a safety operation when the unit interlock with press stamping operation.
- Feeder rolls and straightener rolls have undergone special heat treatment of HRC 60° for high precision leveling, rolls surface chromium-plating and then ground, high hardness, high wear-resistant characteristic and long service life cycle.
- Uncoiler hydraulic expansion design makes the job more efficiently.
- Collocation twin type uncoiler and coil car, save loading coil time increase efficiency.

**Standard Accessories**

- Programmable multi – pitch setting with cutting signal output function. (Cutting signal output function is able to control the cutting device.)
- HMI touch screen control panel.
- 2 points micro adjustment (Attached with dial gauge)
- Straightener work rolls air release.
- Motor drive uncoiler with inverter control.
- Uncoiler photoelectric sensor control unit.
- Uncoiler hydraulic mandrel expansion device.
- Manual coil guide.
- Snubber arm.
- Carry over guide.
- Carry over clamp. (Applicable to NCL4 above)
- Peeler.
- Pre – bender. (Applicable to NCL4 above)

**Optional Accessories**

- Flip – Top straightener head device.
- Coil car (Coil loading assisting device).
- Motorized pass line high adjustment device.
- Clamping peeler device.

### Features

- High rigidity mechanical structure design and work with Mitsubishi servo control system to ensure the feeding accuracy.
- Multi-functions touch panel designed, easy to configure and operation increase efficiency with pressing machine high perform connection operation.
- Special clamping peeler device, offering the solution easier to solve the customer in feeding material problem.
- Straightener / Precision leveler adopting screw lift designed by motor drive to easy adjustment the 3 IN 1 feeder machine pass line high as press machine change different dies.
- Feeder rolls and straightener rolls have undergone special heat treatment of HRC 60° for high precision leveling, rolls surface chromium-plating and then ground, high hardness, high wear-resistant characteristic and long service life cycle.
- Uncoiler hydraulic expansion design makes the job more efficiently.
- Collocation twin type uncoiler and coil car, save loading coil time increase efficiency.

(Double Feed Rolls Thick Material Type)**Features**

- High rigidity mechanical structure design and work with Mitsubishi servo control system to ensure the feeding accuracy.
- Friendly operation by adopting Human Machine Interface control.
- Programmable multi-pitch setting function to support the different feeding length and feeding frequency requirement.
- Auto feed monitoring function which can be a safety operation when the unit interlock with press stamping operation.
- Applicable for selecting the optional 4 feeding rolls to meet the thicker material request, to ensure the feeding accuracy.

# NC-RL Zig - Zag Servo Feeder

## Features

- Zig – Zag motion feeding feature is to achieve the material cost saving and that is performing better than the conventional feeders.
- The unit is made under the one-piece body construction design and adopting the linear slide rails, ball screw driving device to achieve the highest working stability.

## Standard Accessories

- Programmable multi-pitch setting with cutting signal output function. (Cutting signal output function is able to control the cutting device.)
- 5.7 "Mitsubishi Touch panel
- PLC controller - Mitsubishi (Made in Japan)
- Orientation controller - Mitsubishi (Made in Japan)
- NC servo controller - Mitsubishi (Made in Japan)
- Feeding rolls air release.

## Optional Accessories

- Micro-Adjusted lubricator
- Gear box driven type device. (Applicable to material thickness above 3 ~ 4 mm)
- Four feeding rolls set unit with gear box driving device. (Applicable to material thickness above 5 ~ 6 mm)
- Closed loop type AC servo control system.
- Special software demand.

## Micro-Adjusted Lubricator

### AT Series:

Thickness of material: 0.1~6.0 mm

### BT Series:

Thickness of material: 0.1~2.0 mm

## Standard Accessories

## Optional Accessories

- Tank with solenoid valve and level switch.
- Stainless tank with solenoid valve.
- Motor oil pump tank.

## SNC Servo Feeder

## 2 IN 1 Four Plane Surface Precision Uncoiler & Leveler

Flip – Top Leveler Head Device

## 2 IN 1 Four Plane Surface Precision Uncoiler & Leveler + Coil Car

### Features

- The unique patent design leveler (Taiwan & China).
- 2 IN 1 uncoiler & straightener is designed for save the space.
- Flip – Top leveler head device designed for easy maintenance operation.
- Customer – made accessories for pneumatic snubber arm, hydraulic expansion device...etc. It is welcome for any your special demand to create your own suitable machine.
- For high flatness required production, the unique four plane leveling design can not only make the precise flatness to front-rear (longitudinal curvature) side of the material but also left-right (transverse curvature) side of the material.

### Features

- 2 IN 1 uncoiler & straightener is designed for save the space.
- The unique 2 section leveling designed for solving the high flatness and leveling stability of material requirement.
- Flip - Top leveler head device designed for easy maintenance operation.
- Adopting the dual inverter driving motors to reduce the scratching problem of the material surface.
- Manual type in feed coil guiding device to simplify the coil loading operation.
- Custom-made accessories for pneumatic snubber arm, hydraulic expansion device...etc. It is welcome for any your special demand to create your own suitable machine.
