

2019
OUTLANDER

EXCITING AND INGENUOUS

THE 2019 MITSUBISHI OUTLANDER BOLDLY GOES WHEREVER YOUR AMBITION TAKES YOU. ITS FORWARD-THINKING DESIGN AND INGENUOUS ENGINEERING DELIVER TRUE DRIVING CONFIDENCE, FAMILY-SIZE ROOMINESS AND EXCEPTIONAL COMFORT.

On the outside, it shows off a new-look grille, revised skid plate styling and available LED headlamps with new LED high beams at the front. At the rear, a new spoiler and revised skid plate styling complete the look. Inside, you'll discover an abundance of intelligently conceived amenities, including a revised seat design offering exceptional comfort and support, appointed in your choice of cloth, artificial suede or buttery-soft leather – all crafted with a meticulous attention to detail that Mitsubishi Motors is known for. Outlander offers a long list of unexpected standard features for your driving comfort and convenience. Rear privacy glass, a windshield wiper de-icer, heated power side mirrors, heated front seats, dual-zone climate control and a rearview camera are standard on every trim level.

Available in 5- and 7-passenger configurations with up to 1,792 L (63.3 cu. ft.) of family-friendly cargo space, the 2019 Outlander is designed with your adventurous spirit in mind.

SMART CLIMATE CONTROL

All Outlander trim levels come with standard dual-zone automatic climate control that allows the driver and front passenger to choose their own, individual comfort settings. The system automatically maintains the selected settings, year-round, so you're never too hot or too cold. It's perfect, set-and-forget comfort and convenience, complemented with a micron air filter to help keep the cabin air dust- and pollen-free.

INSIDE STORY

MITSUBISHI MOTORS FOCUSES ON THE INTELLIGENT APPLICATION OF TECHNOLOGY TO PROVIDE DRIVERS WITH NEW AND BETTER APPROACHES TO COMFORT, CONTROL AND CONVENIENCE. YOU CAN SEE IT THROUGHOUT THE CABIN OF THE 2019 OUTLANDER.

As a standard feature, the 7" Smartphone Link Display Audio system supports Apple CarPlay for iPhone users, and lets you access Apple Music, Maps, make phone calls and send text messages through the large display screen or with your voice using Siri¹. The system also supports Android Auto™². Simply activate the voice control of the vehicle, and you can talk to Google™ and access all the most commonly used features on the Android platform, such as Google Maps and Google Play Music.

S-AWC

Available Super All-Wheel Control (S-AWC)* features four driver-selectable modes for superior performance and driving confidence: ECO primarily uses front-wheel drive to improve fuel efficiency until the moment wheel slip is detected; NORMAL pro-actively engages S-AWC as driving conditions change; SNOW delivers optimal traction in winter conditions; LOCK is intended for low traction situations where equal traction is needed at each wheel.

6-SPEED SPORTRONIC® AUTOMATIC TRANSMISSION

DRIVE WITH CONFIDENCE

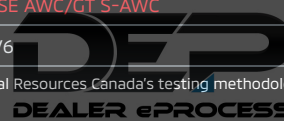

THE 2019 OUTLANDER FEATURES MITSUBISHI MOTORS' FOREMOST SUV TECHNOLOGIES, PROVEN IN THE WORLD'S MOST DEMANDING RALLY DRIVING ENVIRONMENTS AND CALIBRATED FOR EFFORTLESS PERFORMANCE. WHETHER YOU'RE DRIVING ON YOUR DAILY COMMUTE OR TAKING YOUR FAMILY ON A COUNTRY GETAWAY, OUTLANDER LETS YOU TRAVEL WORRY-FREE THROUGH WINTER, SPRING, SUMMER AND FALL.

Every Outlander comes standard with Mitsubishi Motors' proprietary, electronic All-Wheel Control (AWC) - an advanced 4-wheel drive system that automatically distributes power to all four wheels, as needed, for all-weather traction. Super All-Wheel Control (S-AWC), standard on the Outlander GT model, adds an Active Front Differential (AFD) and Active Yaw Control (AYC) plus four driver-selectable modes for superior handling and traction in virtually any on, or off-road situation. And you can count on abundant power and efficiency with a choice of two smooth and reliable engines: a fuel-efficient 166 HP 2.4 L MIVEC I-4 on the Outlander ES or a robust 224 HP 3.0L MIVEC V6 that provides Outlander SE and GT models with up to 3,500 lbs. of towing capacity***.

SEVEN STANDARD AIRBAGS

SAFETY FOR ALL

A SYSTEMATIC APPROACH TO COLLISION PROTECTION AND AVOIDANCE STARTS WITH THE USE OF HIGH TENSILE STRENGTH STEEL AND REINFORCED IMPACT SAFETY EVOLUTION (RISE) ENGINEERING, CREATING A VEHICLE BODY THAT SAFELY ABSORBS AND DEFLECTS CRASH ENERGY WHILE PROVIDING A RIGID, PROTECTIVE STRUCTURE AROUND THE OCCUPANTS.

Blind Spot Warning with Lane Change Assist

BLIND SPOT WARNING (BSW)¹ WITH LANE CHANGE ASSIST (LCA)¹ work together to alert you when a vehicle is in or approaching your blind spot. When a vehicle in the next lane is travelling at the same speed or faster in the detection areas, a warning light illuminates on the corresponding side mirror. If you switch the turn signal on, the warning light on the corresponding mirror will blink and the system will beep three times to alert you that it is unsafe to change lanes.

Auto High Beam

AUTO HIGH BEAM (AHB)¹ When driving on dimly-lit roads, switching between low and high beams is handled seamlessly by the Outlander. Its available Auto High Beam (AHB) detects light levels of the headlights of oncoming vehicles and switches automatically between low and high beams.

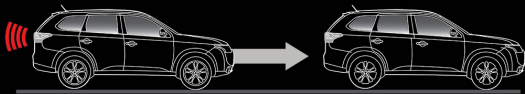

Multi View Camera System

MULTI VIEW CAMERA SYSTEM (MVCS)[†] creates a virtual 360° panoramic bird's-eye view of the area surrounding the vehicle, allowing you to navigate tight driveways, look out for blind spots, and park with confidence and safety.

Forward Collision Mitigation

FORWARD COLLISION MITIGATION (FCM)[†] with Pedestrian Warning[†] utilizes both laser radar and camera technology to determine if a frontal collision with a vehicle or pedestrian is imminent. If so, it warns you with audible and visual signals, and automatically applies moderate to emergency braking to reduce the severity of the collision and, if possible, prevent the collision altogether.

Adaptive Cruise Control

ADAPTIVE CRUISE CONTROL (ACC)[†] uses radar technology to judge distances between you and the vehicle ahead, helping you maintain a safe distance. If that vehicle moves out of your lane or goes beyond your set speed, the system will resume your set speed.

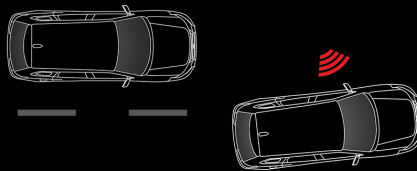

Rear Cross Traffic Alert

REAR CROSS TRAFFIC ALERT (RCTA)[†] detects a vehicle approaching from the side while you're backing up. It alerts you with flashing warning lights on both side mirrors, a buzzer that sounds in the cabin and a warning message that appears in the instrument cluster.

Lane Departure Warning

LANE DEPARTURE WARNING (LDW)[†] uses an onboard camera to monitor lane position in front of the vehicle, providing audible and visual alerts if it detects your vehicle leaving the lane unintentionally.
