Revision History

Date	Notes / Comments / Changes
November 3, 2022	Added information about NextGen UI; made modifications throughout; cover revision date updated
October 1, 2022	Removed references to faxing as part of the fax feature decommissioning on November 1, 2022.
June 20, 2022	Users may upload an unlimited number of receipts when using the NextGen UI.
June 18, 2022	Added information about additional support for Portugal for the Receipts Digitalization feature. Content refinements in the Receipts Digitalization sections.
April 1, 2022	Correct link to government digital receipt site.
January 22, 2022	Added information about additional supported receipt types such as OFD. Removed mentions of uploading HTML (formatted) files as this is no longer supported.
October 18, 2021	Added a <i>NextGen UI</i> section to the <i>Process Reports</i> section that features a table that explains the differences in the Legacy UI versus the NextGen UI for handling expense entries with a timestamp image (specifically, before and after expense report submission).
October 12, 2021	Added a new <i>Specifically About Timestamped Images</i> section to <i>Section 5: Guidelines for Uploads, Emails, and Digitalized Receipts</i> . Updated <i>Section 6: What the User Sees</i> to reflect the changes associated with moving, removing, and detaching receipt images at the report level (both before and after report submission). Updated <i>Section 12: Japan e-Bunsho Receipt Timestamps</i> to reflect UI changes since the last guide update.
May 14, 2021	Updated the <i>About Emails and Uploads – General</i> section to include HTML as an acceptable file format.
January 27, 2021	Added three new sections: <i>Specifically About Fapiao Receipts</i> , <i>Fapiao Receipt Capture</i> , and <i>(Optional) Enable Fapiao Capture</i> .
January 7, 2021	Updated the copyright; added Concur to the cover page title; cover date not updated.
September 25, 2020	Updated fax doc title. Added a note regarding fax feature being legacy; cover date not updated.
April 9, 2020	Renamed the Authorization Request check box to Request on the guide's title page; cover date not updated.
March 24, 2020	Fixed broken link.
January 2, 2020	Updated the copyright; no other changes; cover date not updated
November 15, 2019	Minor edit.
October 31, 2019	Updated the Concur Travel & Expense Web Receipts Google Chrome extension images

Date	Notes / Comments / Changes
October 30, 2019	Updated the SAP Concur Sign In page images
October 2, 2019	Updated the legislation for France in the Glossary of Terms for the Specifically for Digitalized Receipts section. Other minor edits.
October 1, 2019	Added content for the Receipt Digitalization feature.
February 13, 2019	Corrected the image requirement for eligible e-Bunsho receipts from 5M pixels to 3.88M pixels.
January 24, 2019	Minor edits.
January 12, 2019	Updated e-Bunsho graphics to show updated timestamp icon (🔧). Updated e-Bunsho graphics with new timestamp labels.
January 4, 2019	Updated the copyright; no other changes; cover date not updated.
November 2, 2018	Removed the note that states that the Missing Receipt Declaration is not available on SAP Concur's mobile app.
September 14, 2018	The September release has been moved to September 22, 2018.
September 15, 2018	Updated the E-Bunsho section to include the <i>Digital Compliance Administrator</i> role. Removed mentions of uploading HTML (formatted) files as this is no longer supported.
June 6, 2018	Added the following note to the <i>Email Verification</i> section: To verify the email address, the user must have the <i>Expense User</i> role/permission activated, otherwise the verification button will not display.
April 4, 2018	Changed the check boxes on the front cover; no other changes; cover date not updated.
January 8, 2018	Updated the copyright; no other changes; cover date not updated.
August 19, 2017	Updated references (screenshots) to remove "Captured" date and time for e-Bunsho receipts.
July 8, 2017	Added e-Bunsho feature.
December 14, 2016	Changed copyright and cover; no other content changes.
December 9, 2016	Updated the guide content to new corporate style; no content changes.
November 30, 2016	Add notes that HTML files cannot be successfully uploaded and processed if they contain double-byte characters.
October 28, 2016	Added a note that the Missing Receipt Declaration is not available on SAP Concur's mobile app.
May 13, 2016	Updated instances of he/she to they
September 28, 2015	The Save button auto-attaches a receipt to the selected line item.
July 6, 2015	Fixed a typo; no other content changes
June 19, 2015	Added notes about the email feature being available for a Production entity but not a Test entity.

Date	Notes / Comments / Changes
June 3, 2015	Added a note about the Available Receipts library/section contains only the images received by Concur in the previous 365 days.
April 20, 2015	Provided additional detail throughout.
	Older revision history has been removed. Initial publication of this guide was January 16, 2015.

Uploaded and Emailed Images

Section 1: Permissions

A company administrator may or may not have the correct permissions to use this feature. The administrator may have limited permissions, for example, they can affect only certain groups and/or use only certain options (*view* but not *create* or *edit*).

If a company administrator needs to use this feature and does not have the proper permissions, they should contact the company's SAP Concur administrator.

Also, the administrator should be aware that some of the tasks described in this guide can be completed only by SAP Concur. In this case, the client must initiate a service request with SAP Concur support.

Section 2: Several Guides about Imaging and Receipts

There are several ways for the user to manage receipts and receipt images – depending on the needs and configuration of the client. There are several guides about the different processes. Choose the appropriate guide based on your company's configuration.

Method	Description	Guide
Upload	<p>The user can upload an electronic receipt (for example, a scanned image or a picture taken with a mobile device) or a digitalized receipt (a conformed original paper receipt that has successfully been digitalized) into Concur Expense.</p> <p>Then, the user can:</p> <ul style="list-style-type: none"> • Attach it at the report level, if applicable. • Attach it at the expense entry level, if applicable. • Save it directly to the Available Receipts library, where later the user can attach it at the expense entry level. <p>NOTE: Images in the library cannot be attached at the report level.</p> <p>NOTE: The ability to digitalize a receipt captured at the report level is not yet available.</p>	<i>Expense: Receipt Handling – Digital Receipts Setup Guide</i>

Method	Description	Guide
Email	<p>The user can email an electronic image (for example, a scanned image or a picture taken with a mobile device) to Concur Expense.</p> <p>In Concur Expense, the image is automatically saved to the Available Receipts library, where later the user can attach it at the expense entry level.</p> <p>NOTES:</p> <ul style="list-style-type: none">• Images in the library cannot be attached at the report level.• This feature is available only in Production – not Test – sites.	
CFDi	<p>Digital CFDi files are in XML format to support the digital format requirement for Mexico.</p> <p>CFDi files:</p> <ul style="list-style-type: none">• Are XML files – not images• Can be attached only at the expense entry level• Cannot be saved to the Available Receipts library	<i>Expense: Receipt Handling – Digital Tax Invoice Setup Guide</i>

Section 3: Overview

This Guide

Imaging is a free service hosted entirely by SAP Concur. It enables users to upload and email images to Concur Expense. Once the images are received by the service, they are displayed in PDF file format (using Adobe Reader) within Concur Expense. This guide describes the upload and email processes – for users, delegates, approvers, and processors.

This guide also describes the Receipt Digitalization feature, which provides the ability to conform a paper receipt into a *legal* digital copy according to a country's regulatory or government authorities.

Overview

There are several ways to obtain an electronic image of a receipt. For example, the user can:

- Scan a receipt
- Take a picture of a receipt with a mobile device
- Take a picture of a paper receipt and create a legal, digitalized receipt using the latest version of the SAP Concur mobile app or ExpenseIt
- Use an attachment sent via email

- PDF an email or other document

The user can then:

- Upload the receipt into Concur Expense and:
 - ♦ Attach it at the report level, if applicable
 - ♦ Attach it at the expense entry level, if applicable
 - ♦ Save it directly to the **Available Receipts** library, where later the user can attach it at the expense entry level
- Email an electronic receipt to Concur Expense; it is automatically saved to the **Available Receipts** library, where later the user can attach it at the expense entry level

NOTE: The ability to email receipts to the **Available Receipts** library cannot be used in a Test entity. It is available only for Production entities.

Upload versus Email

If the configuration allows the user to upload and attach images, then they also have access to the **Available Receipts** library – a repository that stores the user's images or digitalized receipts until the user is ready to use them.

There are several factors that may determine which process the user uses, like:

- If the user is currently creating or modifying an expense or report, the user might upload and immediately attach the image to the report or expense entry. In this case, perhaps there is no reason to have the image in the **Available Receipts** library.
- If the user is using the Receipt Digitalization feature, once the digitalized receipt is conformed and certified through the digitalization process, the digitalized receipt is automatically uploaded to the **Available Receipts** library and displays as a "Certified" receipt.
- If the user simply wants to store the receipt until later, then they might upload or email it to the **Available Receipts** library.
- The first step in the email process involves verification of the incoming email address (described on the following pages). Until that verification is complete, a user cannot email receipts to the **Available Receipts** library but they can upload to it.

Report Level versus Expense Entry Level

Whether the user attaches a receipt at the report level or expense entry level can depend on:

- Company policy/configuration may dictate where the receipt is attached. For example, the client may not allow its users to attach it at the report level.
- If the receipt is in the **Available Receipts** library, it cannot be attached at the report level; it must be attached at the expense entry level.

Section 4: Prepare to Use the Available Receipts Library

Once the Imaging service has been configured (as described in the configuration section of this guide), users can begin uploading receipts and attaching them directly to a report or expense entry (whichever is appropriate) or to the **Available Receipts** library. However, before the user can email receipts to the **Available Receipts** library, SAP Concur requires verification of the user's email address.

The user can register more than one email address with SAP Concur, but an email address can be registered only once.

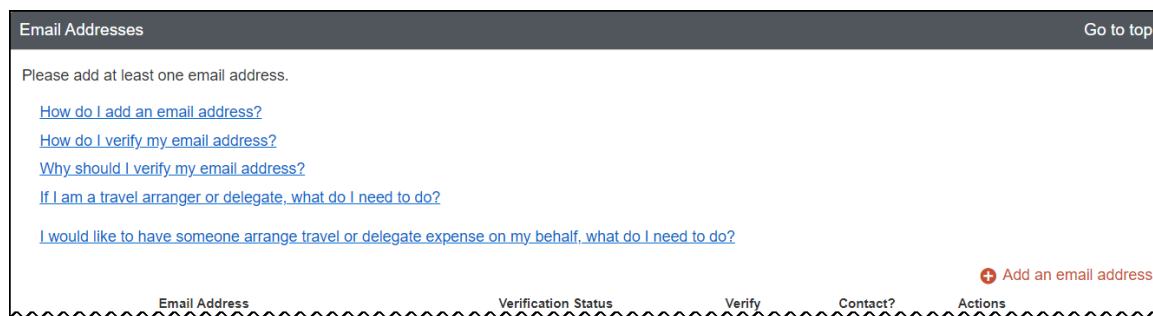

NOTE: The **Available Receipts** library contains receipts received by Concur Expense within the previous 365 days. Older receipts will not be available.

Email Verification

To provide an email address for verification, the user clicks **Profile > Profile Settings**.

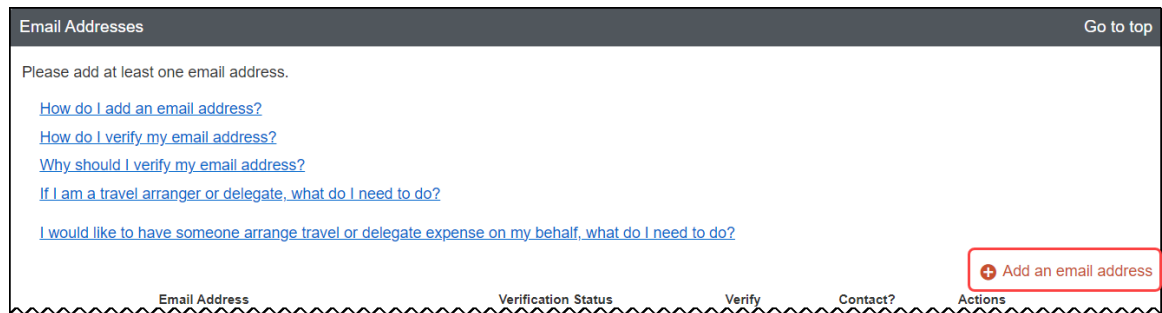

The user clicks **Email Addresses** in the left menu. The **Email Addresses** section of Profile appears.

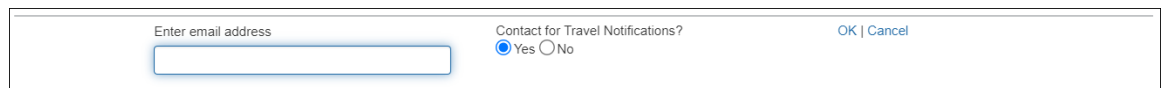

The user adds an email address for verification by clicking **Add an email address**.

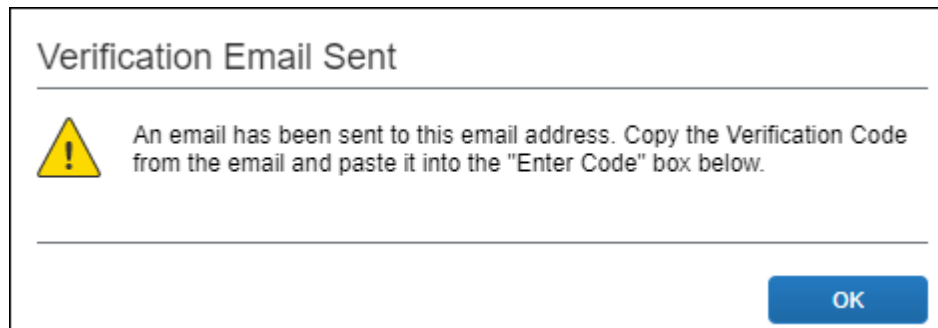

Section 4: Prepare to Use the Available Receipts Library

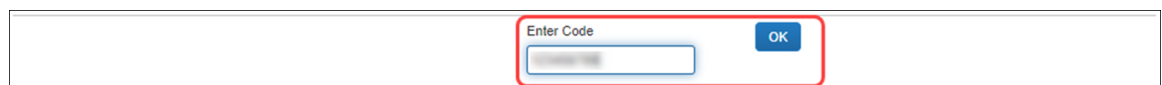

A new row appears, where the user must enter their email address. They can opt to select whether they want to be contacted for travel notifications. The user clicks **OK**.

The user clicks **Verify** and this message appears.

The user accesses their email, finds the email from SAP Concur, copies the verification code, and then types the code in the **Enter Code** field. The user clicks **OK**.

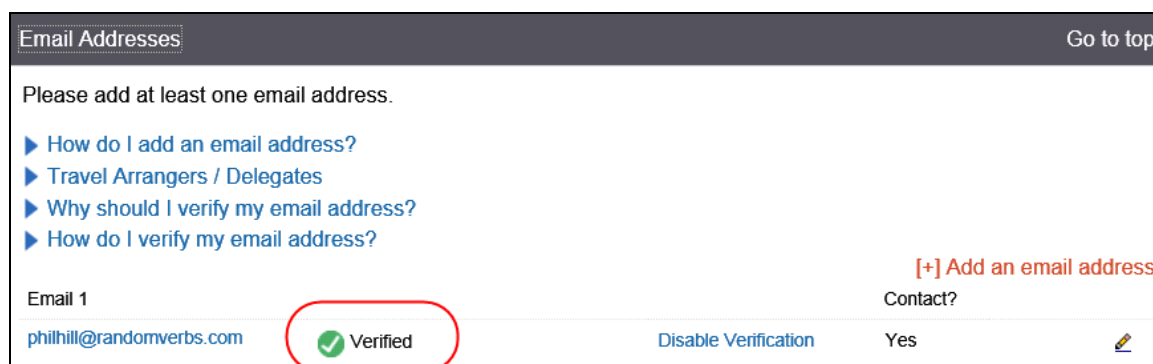

! **IMPORTANT:** The user should allow several minutes for the email to arrive before clicking **Resend**. Otherwise, there will likely be confusion around multiple emails and multiple verification codes.

NOTE: To verify the email address, the user must have the *Expense User* role/permission activated, otherwise the verification button will not display.

Section 5: Guidelines for Uploads, Emails, and Digitalized Receipts

When the *Verified* message appears, the process is complete.

The screenshot shows a web interface titled "Email Addresses" with a "Go to top" link. It prompts the user to "Please add at least one email address." and lists four links: "How do I add an email address?", "Travel Arrangers / Delegates", "Why should I verify my email address?", and "How do I verify my email address?". A red button labeled "[+] Add an email address" is on the right. Below, a table lists email addresses. The first entry, "philhill@randomverbs.com", has a green checkmark and the word "Verified" circled in red. Other options like "Disable Verification" and "Contact?" are also visible.

Email	Verified	Disable Verification	Contact?
philhill@randomverbs.com	✓ Verified	Disable Verification	Yes

The user can now email receipt images from the verified address to receipts@concur.com, using the information in *Guidelines for Uploads and Emails* in this guide.

Delegates and Registration

Refer to *Delegate Experience* in this guide.

Section 5: Guidelines for Uploads, Emails, and Digitalized Receipts

About Emails and Uploads (General Information)

Uploaded or emailed, the file format **must** be PNG, JPG, JPEG, PDF, TIF, or TIFF files.

NOTE: Some PDFs may fail to process to an image because there are many types of complex PDF file types. If you have multiple examples of a type of PDF that is **not** processing, please contact SAP Concur support; we may be able to make system adjustments to accept those types of PDFs.

Refer to *Specifically About Digitalized Receipts* in this section of this guide for details regarding digitalized receipts.

About Uploaded Images

Note the following:

- When scanning, the images should be scanned at 300 dpi or lower to reduce file size. For best results, scan or take a photo as a black and white picture with no more than 1024 x 768 image resolution.

- There is a size limit for each image file; the **Receipt Upload and Attach** window displays that limit.
- No more than 10 files may be uploaded in a single session.
- To upload more than 10, simply upload the first 10 and then upload another 10, until done.
- Occasionally, we must recompress an image sent to us. If a **non-PDF** image is over 1 megabyte or if a single page of a **PDF** is over 100k, we must move the file to a queue for reprocessing. If we cannot manage the reprocessing task within a reasonable time limit, we send the image "as is" to the user – in an effort to *not* keep the user waiting. Some of these images may not be as legible if the image background color too closely matches to the font color. In this case, the user should save the original image again as a black and white picture with no more than 1024 x 768 image resolution.

About Fapiao Receipts

A fapiao is a legal tax receipt required for every business transaction in China. A fapiao is issued by the State Taxation Administration of the People's Republic of China but provided by the merchant.

Users must use the SAP Fapiao Capture mini app in the WeChat™ mobile app, specifically built for fapiao capture. This mini app is the only compliant means of fapiao capture and upload to Concur Expense. For VAT fapiao, captured fapiao in the WeChat app satisfies government requirements on fapiao authenticity and uniqueness.

For more information, refer to the [State Taxation Administration of the People's Republic of China](#)

For more details, refer to *Section 13: Fapiao Receipt Capture* in this document.

About Digitalized Receipts

When a user takes a picture of an original paper receipt in the SAP Concur mobile app, or using ExpenseIt, the digitalization process occurs, which conforms the paper receipt according to country-specific compliance rules. Once this process occurs, the receipt is considered "certified", meaning that the digitalized copy has the same probatory value as the original paper receipt, thus enabling users to retain the digitalized copy and eliminate the paper. Digitalized receipts can then be used like any other receipt on an expense.

NOTE: The paper digitalization process applies only to receipts originally issued on paper and that are digitalized. The application that captures the receipt and transforms it must be part of the certified solution to ensure fidelity (i.e., that the original and the digitalized copy are identical). For this reason, pictures of receipts from other phone apps or previously uploaded receipts in the Available Receipt library (not certified) cannot be conformed through the SAP Concur mobile digitalization process.

NOTE: Electronic receipts are considered original receipts from an electronic source and subject to different regulations around validation of the receipt.

Glossary of Terms

Term	Definition
"Certified"	Label applied to a digitalized receipt as displayed in Concur Expense.
Certification / Homologation	<p>The two words are similar in the context in this document, with homologation being more specific (homologation is the process of certifying or approving a product to indicate that it meets regulatory standards and specifications by an official authority)</p> <ul style="list-style-type: none">• For paper into digital in Spain, to be compliant SAP Concur requires a mandatory homologation granted by the tax authorities. Homologation is granted by the Agencia Estatal de Administración Tributaria (AEAT - Central Spanish tax authority) and the 4 regional tax agencies (Hacienda forales: Araba-Álava, Bizkaia, Guipuzkoa, Navarra)
Compliance	Adherence to the set of rules or regulations published by a governmental body; for example, SAP Concur's compliance with the rules of how a receipt must be digitalized.
Conform	The process of applying the rules/regulations of a specific country regarding converting a paper receipt into a digital copy with probatory value (the process).
Digitalization	The result of conformation of a paper receipt; a conformed receipt is considered "digitalized." A digitalized receipt in Concur Expense will have an icon that displays "Certified."
Rule / Regulation	Applicable legislation relating to the conformation and digitalization of paper invoices/receipts.
Validation	In the context of data validation, any service or person that takes a value and validates it against an internal or third-party source.

Supported Markets

The SAP Concur business solution for capturing, consuming, storing, and retrieving paper receipts and/or legal copies of paper receipts is currently only compliant to the rules published in France, Spain, and Portugal.

In all cases, clients should consult with their own tax and/or legal authorities in their country to determine what is compliant in their country or region. There are many countries that do *not* have strict rules regarding legal digital copies of receipts, like the United States. In those countries, SAP Concur strongly advises that clients consult with their own authorities to ensure compliance with their laws.

E-Archiving Guidelines (Portugal)

Clients who want to go paperless with digitalized receipts in Portugal must also have an e-archival process in place that complies with the local legislation. Having a defined e-archiving process is a best practice for SAP Integration with Concur

Solutions (SAP ICS) for ERP integration and ensures compliance with the e-archiving rules established by Portuguese authorities.

NOTE: Non-SAP ERP clients can use this best practice process as a guide but will need to adapt it to their specific ERP or e-archiving solutions. Clients that activate the receipt digitalization process and follow the e-archiving best practices will be fully compliant and can go paperless.

E-Archiving Guidelines include the following requirements:

- **Document type:** Users must be able to easily identify all documents and tracking of document movements within Concur Expense
- **General Accounts:** A list of general accounts to be used and tracking of accounting movements within Concur Expense
- **Images:** Required naming of images to be archived in the ERP system
 - The images names must contain the expense report number and an additional number that represents the index lines in the report. This information provides a link between the report number and each image.
 - For example, if an expense report contains three lines of text, each image will be identified as: 12345689 – 01, 12345689 – 02, 123456789 – 03, according to the line with which it's associated.
- **Additional Information:** Tracking of additional information.
 - For example, the expense report number can be tracked in a specific field, such as the **Reference** field, so that accounting information can be reviewed. This information can then be searched in both the expense report and the associated archive.
 - This example allows information to be tracked in accounting documents associated with the expense report. Additional reports can be generated using **Transaction ID** field, like the one used in the SAF-T file; the statutory reporting file format in Portugal used for tax reporting purposes.

For more information regarding the SAF-T file, refer to [SAF-T for Portugal User Guide](#).

About Emailed Images

Note the following:

- Each email attachment is treated as a *single* image file – a single image file with two receipt images *within* it is still treated as a single receipt image.
- An image embedded in the body of the email is treated as a single image file.
- The system does not support a combination of attached image files along with an image embedded in the body of the same email. In this scenario, the embedded images are ignored.

NOTE: The ability to email receipt images to the **Available Receipts** library cannot be used in a Test entity. It is available only for Production entities.

About PDF Files

There are several types of PDF files. The PDF files listed here **cannot be successfully uploaded** as images:

- **Password protected:** These files cannot be decrypted so they cannot be stored by Concur Expense.
- **AcroForm PDFs:** These PDFs may upload but the text in these Acrobat fill-in-the-blanks forms will likely not be visible. In fact, this issue occurs only if multiple AcroForms are uploaded; single AcroForms likely upload properly. Best practice is to avoid uploading AcroForms since the results are not reliable.
- **XFA PDFs:** These XML-based PDFs collect information associated with electronic forms. Since they are interactive, they cannot be successfully uploaded.

There is another type of PDF file known as a **Portfolio PDF**. These "collection" PDFs can contain files with various file types. Concur Imaging keeps any included file with an acceptable imaging file type (PNG, JPG, JPEG, PDF, TIF, OR TIFF) and discards the remaining files.

About Timestamped Images

Note the following:

- Timestamped images can be deleted, detached, and moved from reports.
- Corresponding Concur Expense UI behavior depends on the report status (specifically, before or after report submission) and user action (for example, remove, detach, and move).

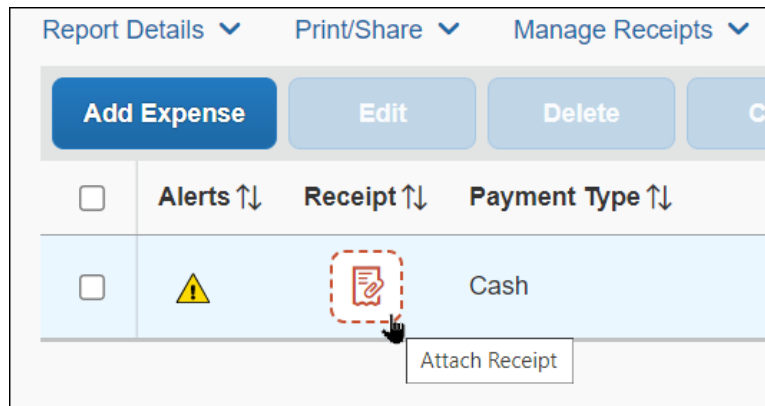

Section 6: User Experience

This section describes a common user process. The user generally:

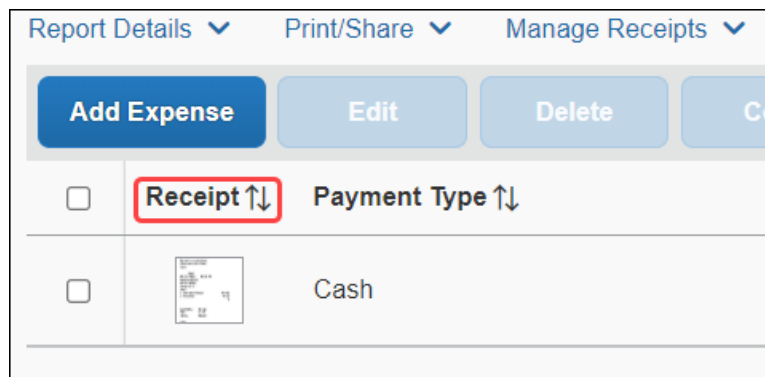

1. Completes the expense report as usual
2. Determines if receipts are required
3. If required:
 - ♦ Attaches or uploads one or more receipt attachments
 - ♦ Checks to ensure the attached receipts are clear and readable
4. Submits the report

Determine if a Receipt is Required

The client defines when receipts are required, for example, for dinners over \$50, for all airline tickets, etc. If a receipt is required, Expense displays an **Alerts** column with an alert icon  beside the default **Receipt** column, where a receipt icon  appears.

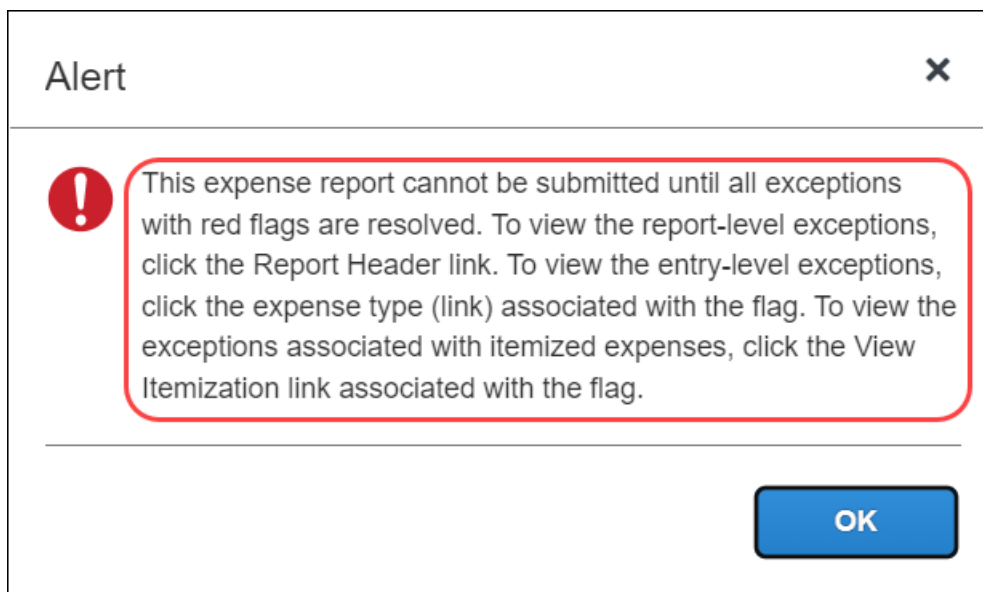

Once the receipt is attached, the **Alerts** column is no longer displayed (provided all other report errors are cleared), and the **Receipt** column displays the receipt image.

ON SUBMIT

The user is also reminded in the **Alert** window when the user clicks **Submit Report**.

NOTE: The reminder instructions – shown below **Reminder: Receipts Required!** – can be customized. Refer to the configuration information in this guide.

Upload/View/Remove a Receipt at the Report Level – *Before* Report Submission

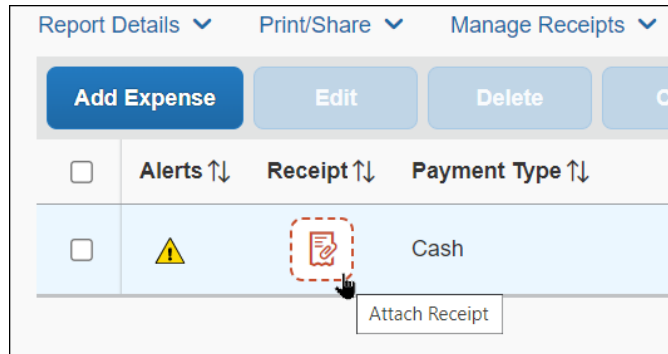

Upload – Report Level

The client may not allow its users to upload to the report level; the client may prefer that the user upload for each individual expense. However, if the user is allowed to do so, the user may do this at the report level.

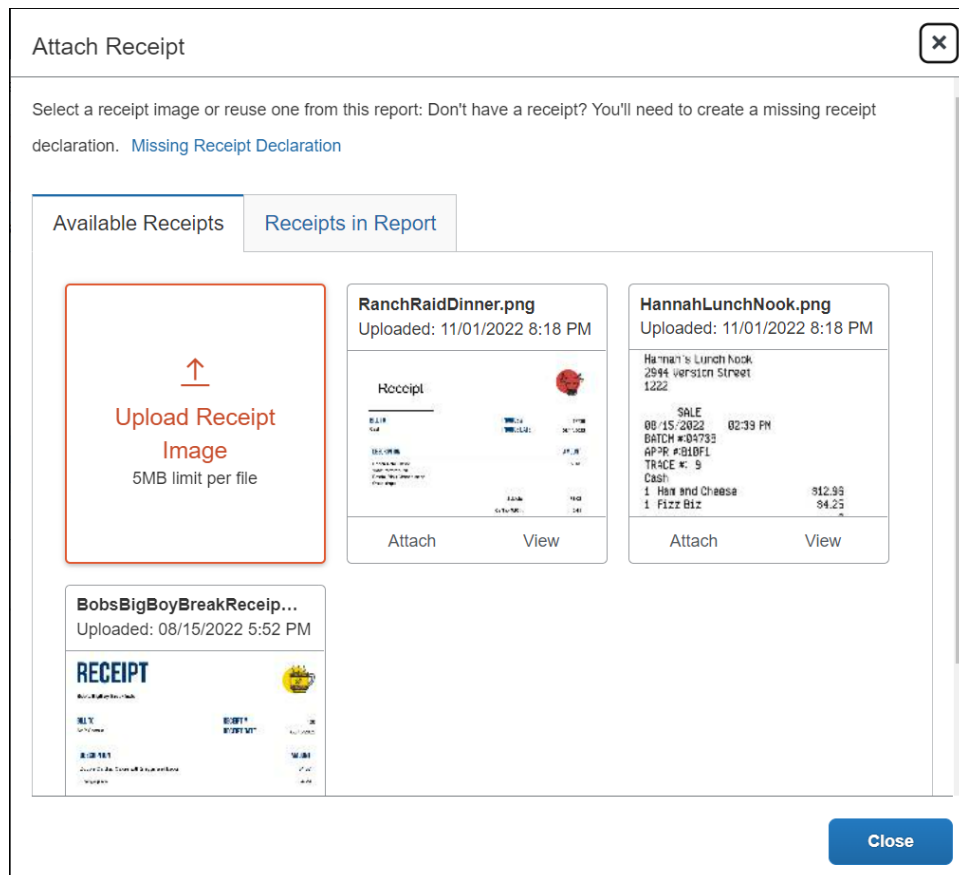

The amount of time required to upload the receipt depends both on the size of each file and the overall connection speed.

UPLOAD WHILE CREATING/EDITING THE REPORT

With the report open, the user clicks the receipt icon .

The **Attach Receipt** window appears. Use the options on this page to review **Available Receipts** resident in the **Available Receipts** library and upload the required receipt using the **Upload Receipt Image** tile.

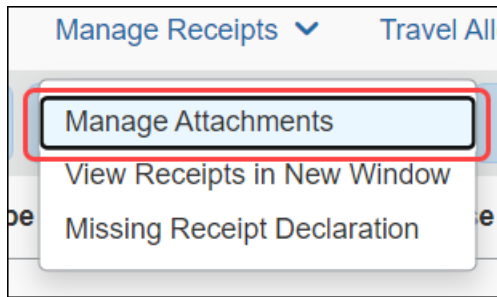

UPLOAD WHILE SUBMITTING THE REPORT

Section 6: User Experience

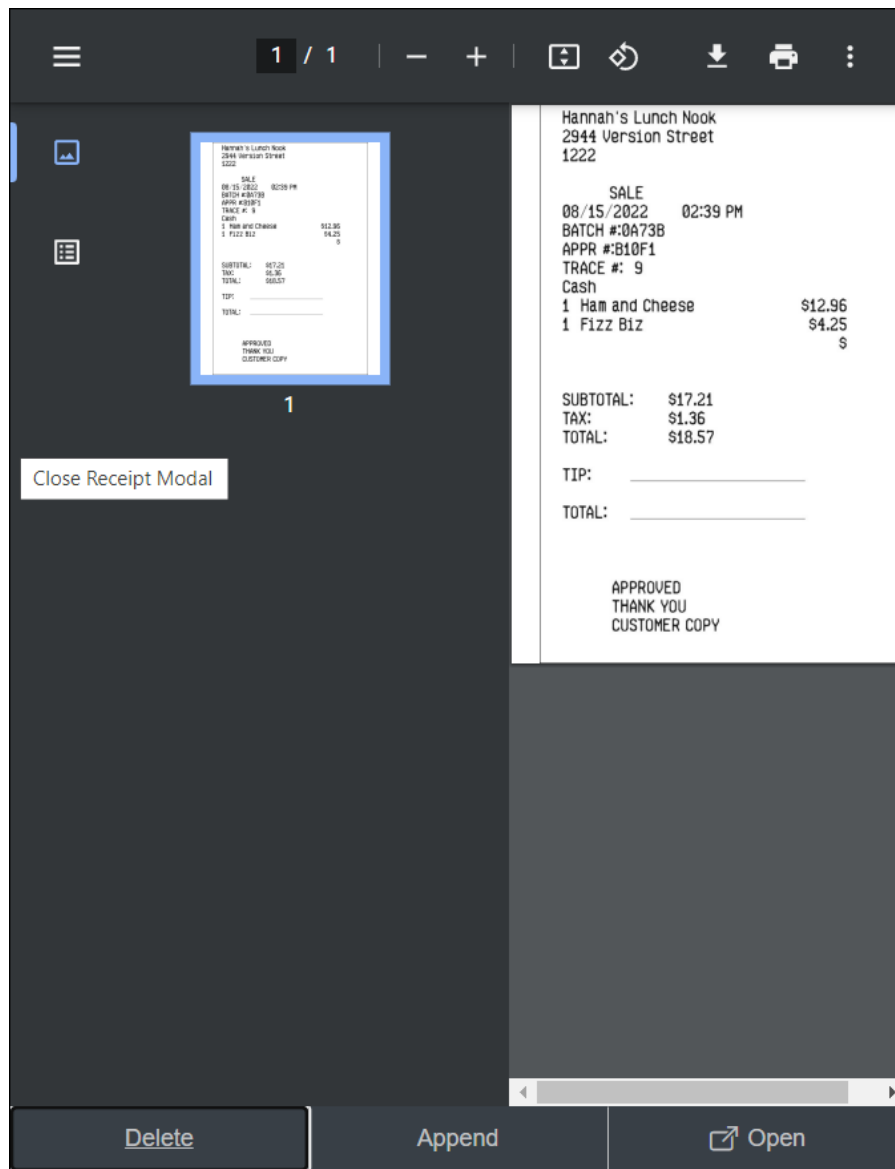

While an alert appears as a reminder, there is no option to add a receipt when submitting the report. Open the report and add the receipt using the instructions above.

View – Report Level

Once the upload is complete, to view the receipts, the user clicks **Manage Receipts** > **Manage Attachments**.

In the window that appears the user may manage the receipt as required, including removing, adding additional receipts, and opening the receipt in a separate window.

Remove – Report Level

As described above, the user may remove the receipt from the expense using the **Delete** option.

Note the following:

- The entire set of receipts (PDF) will be removed from the report.
- For reports that have been returned to the user:
 - ◆ Concur Expense creates an audit trail entry indicating that receipts have been deleted.
 - ◆ If Concur Expense had marked the receipts as received (in Processor), the delete process will mark the receipts as **not** received.

Upload/View/Remove a Receipt at the Expense Entry Level

Upload – Expense Entry Level

The amount of time required to upload the receipt depends both on the size of each file and the overall connection speed.

With the expense entry open, the user first notes if receipts are required by referencing the **Alerts** column. If so, the user clicks the receipt icon in the **Receipt** column and, in the **Details** tab of the window that appears, clicks **Upload Receipt Image**.

The screenshot displays the 'Details' tab of an expense entry form. On the left, various fields are populated: Expense Type is 'Lunch', Transaction Date is '08/15/2022', Enter Vendor Name is 'Hannah Lunch Nook', Payment Type is 'Cash', Amount is '18.57', and Currency is 'US, Dollar'. The Receipt Status is set to 'No Receipt'. On the right, a large light blue rectangular area contains a red-bordered box with a red document icon and the text 'Upload Receipt Image' with a cursor pointing to it. A 'Hide Receipt' link is visible in the top right corner of the interface.

The **Attach Receipt** window appears. Use the options on this page to review **Available Receipts** resident in the **Available Receipts** repository and upload the required receipt.

When open, the image, when attached, appears directly to the right of the expense entry.

Section 6: User Experience

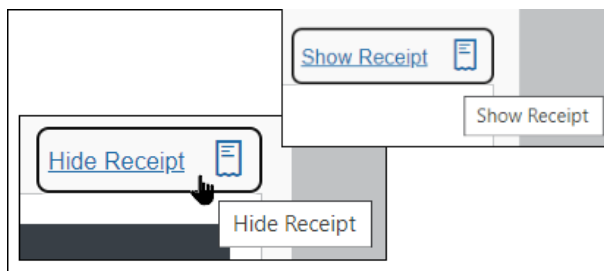

The screenshot shows the SAP Concur Expense Entry form for a lunch expense. The form is titled 'Lunch \$18.57' and includes a 'Cancel' button and a 'Save Expense' button. The form is divided into two tabs: 'Details' and 'Itemizations'. The 'Details' tab is active, showing fields for 'Expense Type' (Lunch), 'Transaction Date' (08/15/2022), 'Business Purpose', 'Enter Vendor Name' (Hannah Lunch Nook), 'City', 'Payment Type' (Cash), 'Amount' (18.57), 'Currency' (US, Dollar), 'Custom 01 - Tips Foreign', 'Receipt Status' (No Receipt), 'Custom 03', 'Custom 04', and 'Comment'. A red box highlights the 'Receipt' view, which displays the receipt from 'Hannah's Lunch Nook' for a sale on 08/15/2022 at 02:39 PM. The receipt includes a list of items: '1 Ham and Cheese' for \$12.96 and '1 Fizz Biz' for \$4.25, with a subtotal of \$17.21, tax of \$1.36, and a total of \$18.57. The receipt also includes a 'TIP' field and a 'TOTAL' field. The receipt is signed 'APPROVED THANK YOU CUSTOMER COPY' and has a file name 'HannahLunchNook.png' at the bottom. The receipt view has a toolbar with 'Detach' and 'Append' buttons.

The user can use the toolbar to zoom and rotate the image, if desired.

NOTE: Rotating is not available for all image formats.

The user may also toggle the receipt view by clicking **Hide Receipt** and **Show Receipt** links.

Remove – Expense Entry Level

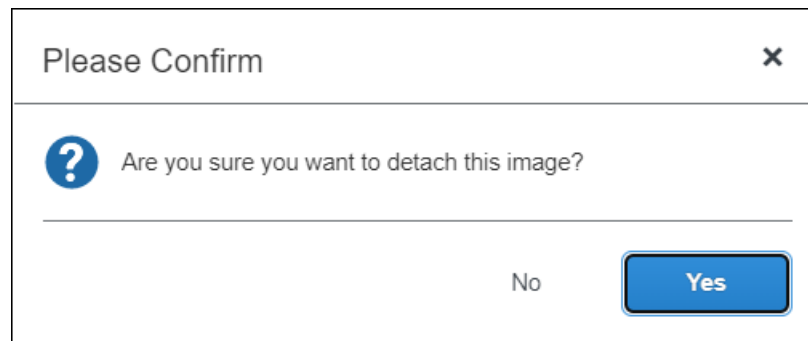

If the user uploaded the wrong image, they can delete it and try again. The user can delete the receipts **only** if the report has not yet been submitted or if the report has been submitted then returned to the user.

NOTE: A recalled report does not allow for removal.

Note the following:

- A removed/detached receipt is not actually deleted. It is moved or added to the **Available Receipts** library – even if it was not originally housed in the **Available Receipts** library.
- Once the receipt is removed/detached, the icon associated with the expense entry is changed from the receipt image to the receipt required icon .
- For reports that have been returned to the user:
 - ♦ Concur Expense creates an audit trail entry indicating that receipts have been deleted.
 - ♦ If Concur Expense had marked the receipts as received (in Processor), the delete process will mark the receipts as **not** received.

When you click **Detach**, a confirmation dialog appears.

Click **Yes** to detach the receipt from the expense entry. The receipt image is returned or added to the **Available Receipts** library and the expense entry no longer has the corresponding receipt attached to it.

Attach/View/Remove a Receipt in the Available Receipts Library

Attach – Available Receipts Library

Receipts in the **Available Receipts** library may be attached at the expense entry level using the receipt required  icon.

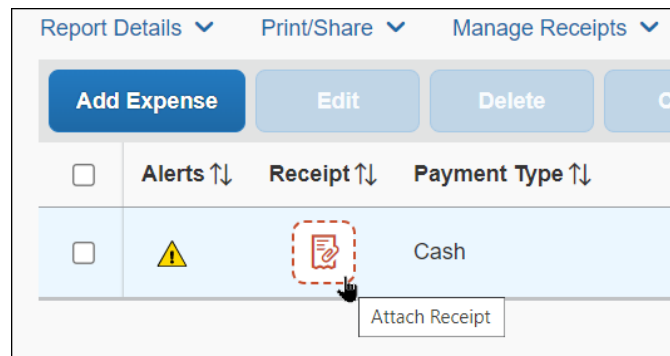

Note the following:

Section 6: User Experience

- Receipts in the **Available Receipts** library can be attached to expense entries. They cannot be attached at the report level.
- The **Available Receipts** library contains receipts received by Concur Expense within the **previous 365 days**. Older receipts will not be available.
- Once the receipt is attached, the **Alerts** column is no longer displayed (provided all other report errors are cleared), and the **Receipt** column displays the receipt image.

USE THE RECEIPT ICON TO OPEN THE AVAILABLE RECEIPTS LIBRARY

With the report open, the user clicks the receipt icon .

The **Attach Receipt** window appears, displaying for view (only) all **Available Receipts** in the Available Receipt library. Use the options on this page to review **Available Receipts** and upload the required receipt using the **Upload Receipt Image** tile.

Section 7: Delegate Experience

Delegate Configuration and User Profile

Whether or not a delegate can view, add, or remove receipts (either directly or in the user's **Available Receipts** library) depends on two factors:

- If the client's delegate configuration allows it.

Refer to the configuration information in this guide.

– and –

- If the configuration allows it, then whether the user allows it (as shown below).

If the client configuration allows delegates to manage receipts, then the **Can View Receipts** option is available in Profile for users to define the options available to their delegates.

<input type="checkbox"/>	Name	Can Prepare	Can Submit Reports	Can Submit Requests	Can View Receipts	Receives Emails	Can Approve	Can Approve Temporary	Can Preview For Approver	Receives Approval Emails
<input type="checkbox"/>	Adinarayanan, Vines <small>Vines.A@concur.com</small>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

The user clicks **Profile > Profile Settings** and then **Expense Delegates** (left menu). For the desired delegate, the user selects (enables) the **Can View Receipts** check box.

NOTE: The setting says "view", but it includes view, add, delete, etc.

If the **Can View Receipts** check box is **not** checked, these are not visible/available to the delegate:

- Receipts Received  icon
- **Manage Receipts** menu
- The **Upload Receipt** image tile (at the expense entry level)
- The **Available Receipts** library

The remaining information in this section assumes that the **Can View Receipts** is enabled.

Email Registration for the Available Receipts Library

To allow the delegate to email receipts into a user's **Available Receipts** library, the user's email address **and** the delegate's email address must be verified in their respective profiles.

First, the delegate verifies their own email address (as described in *Prepare to Use the **Available Receipts** Library* in this guide).

Then, the user can verify their own email address or the delegate can initiate the verification process on behalf of a user, but the delegate cannot complete it. To do so, the delegate – while working on behalf of the user – clicks **Verify** in the user's profile. Concur Expense sends the verification email to the user – *not* the delegate. The user opens the email and enters the verification code into their own profile.

When the process is complete, the delegate can email receipts on behalf of the user as described below.

Email Receipts to a User's Available Receipts Library

To email receipts for a user, the delegate:

1. Prepares an email to receipts@concur.com
2. Enters **only** the user's verified email address in the *Subject:* line
3. Attaches the receipts
4. Sends the email

The system:

- Confirms that both the delegate sending the email and the user in the subject line (delegator) have verified email addresses
- Confirms that a delegate-to-delegator relationship exists between the sender (delegate) and the user in the subject line (delegator)

Then:

- If both verification steps are found to be true, the receipt is added to the *user's **Available Receipts*** library.
- If the sender is not the delegate of the user in the subject line (delegator), the receipt is added to the *delegate's **Available Receipts*** library.
- If the delegate does not have a verified email address, the email is discarded.

! Notice of discarding is not generated – the user and delegate must confirm and correct any issues with unverified email addresses.

Delegate Permissions When Using the Available Receipts Library

A delegate can – while working as a user – perform all actions allowed to the user they are working on behalf of within the user's **Available Receipts** library. The delegate uses the steps in *User Experience* section in this guide.

Section 8: Approver and Processor Experience

The approver and processor:

- Can view receipts
- Can upload receipts at the report level, if the configuration allows report level attachments
 - ♦ If a receipt already exists at this level, then the approver/processor attachment is appended to the original.
 - ♦ If there is not already an attachment, then the approver/processor attachment is the only receipt.
- Can upload receipts at the expense level (not from the **Available Receipts** library)
 - ♦ If a receipt already exists at this level, then the approver/processor attachment is appended to the original.
 - ♦ If there is not already an attachment, then the approver/processor attachment is the only receipt.
- Cannot remove a receipt, even if the approver/processor added the receipt
- Cannot access or view the user's **Available Receipts** library

To upload and view, the approver and processor uses the steps in *User Experience* in this guide.

If the processor or approver wants a receipt removed, they must return the report the user (or delegate) to complete that task.

Section 9: Manage the Available Receipts Library

This section provides additional information about the **Available Receipts** library, including how to:

- Email receipts to the library
- Upload receipts to the library if you are allowed to upload
- Delete receipts from library
- View, zoom, and rotate receipts
- Send receipts to the library

Email Receipts to the Library

The user prepares the attachments using the information in *Guidelines for Uploads and Emails* in this guide. Then, the user prepares the email to receipts@concur.com, attaches the receipts, and sends the email.

Delegates

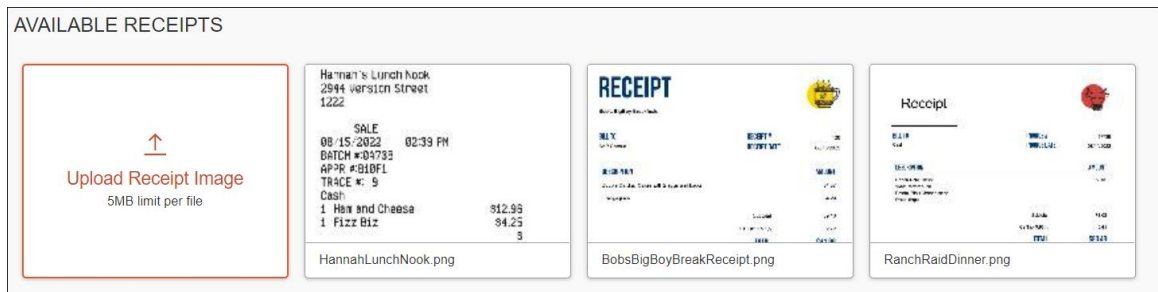

For information about delegates sending receipts to the **Available Receipts** library, refer to *Delegate Experience* in this guide.

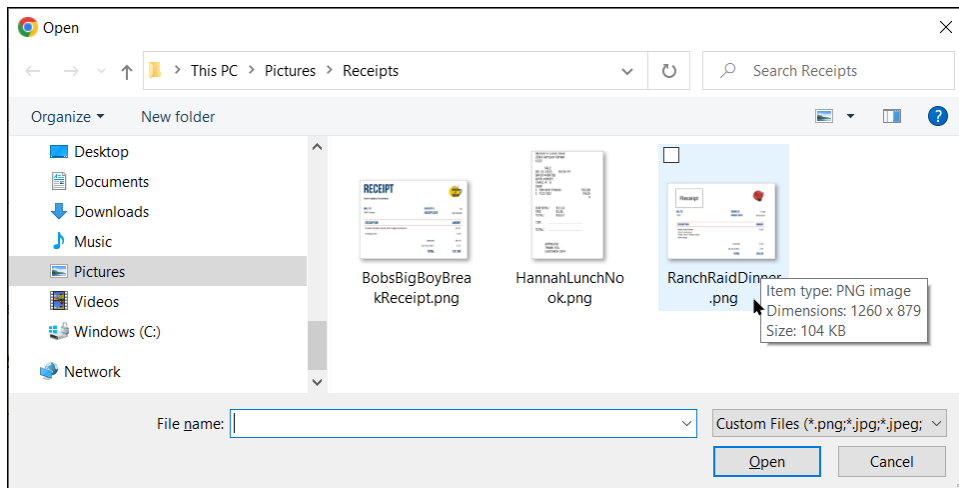

Upload Receipts to the Available Receipts Library

From the Expense Home Page

The user clicks **Expense**, then scrolls to the bottom of the screen to display the **Available Receipts** section.

At the bottom of the page, the user clicks the **Upload Receipt Image** tile. The **Open** window appears.

The user clicks **Browse** and locates the desired receipt, then clicks Open to add the receipt image to the library. The receipt is then available to be attached at any time.

Section 9: Manage the Available Receipts Library

From the Expense Entry

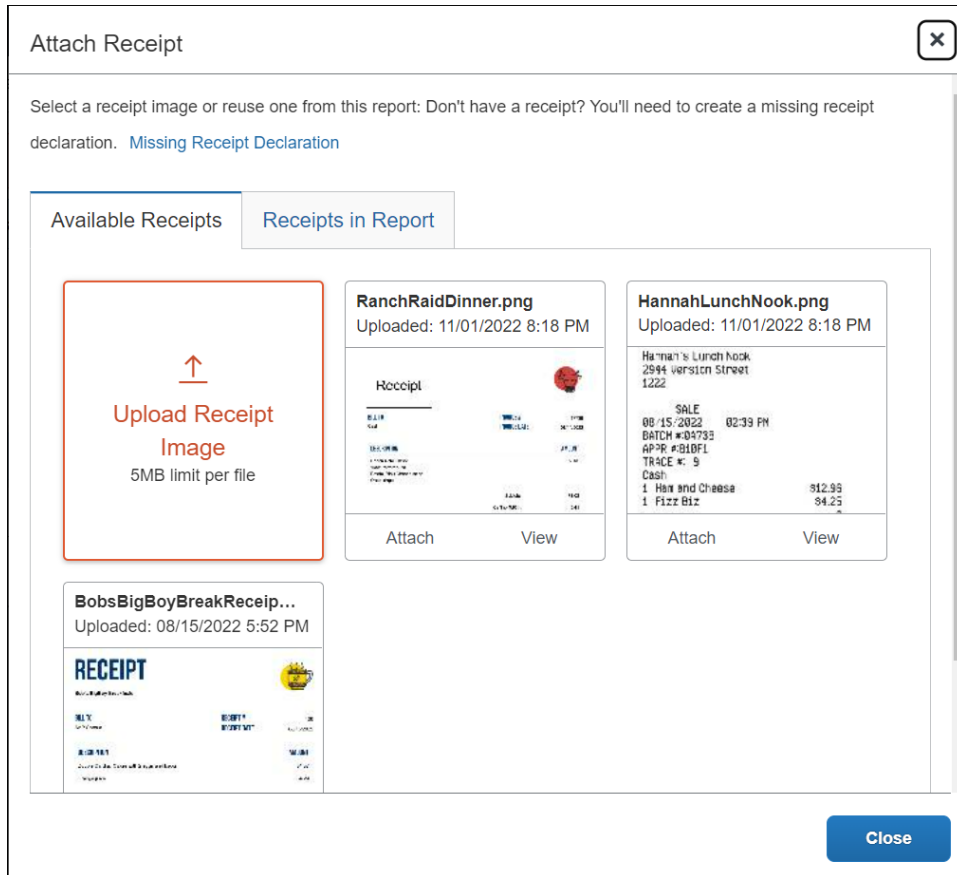

With the expense entry open, the delegate clicks the receipt icon in the **Receipt** column and, in the **Details** tab of the window that appears, clicks **Upload Receipt Image**.

The screenshot displays the 'Details' tab of an expense entry form. The form is divided into two main sections: a left sidebar with input fields and a right main area. The left sidebar contains the following fields:

- Expense Type ***: A dropdown menu with 'Lunch' selected.
- Transaction Date ***: A date field showing '08/15/2022' with a calendar icon.
- Business Purpose**: A text input field.
- Enter Vendor Name ?**: A text input field with 'Hannah Lunch Nook' entered.
- City**: A dropdown menu with a globe icon and a search icon.
- Payment Type ***: A dropdown menu with 'Cash' selected.
- Amount ***: A text input field with '18.57' entered.
- Currency ***: A dropdown menu with 'US, Dollar' selected.
- Custom 01 - Tips Foreign**: A text input field.
- Receipt Status ***: A dropdown menu with 'No Receipt' selected.
- Custom 03**: A text input field with a '2' icon.
- Custom 04**: A text input field with a '3' icon.
- ☐ **Personal Expense (do not reimburse)**

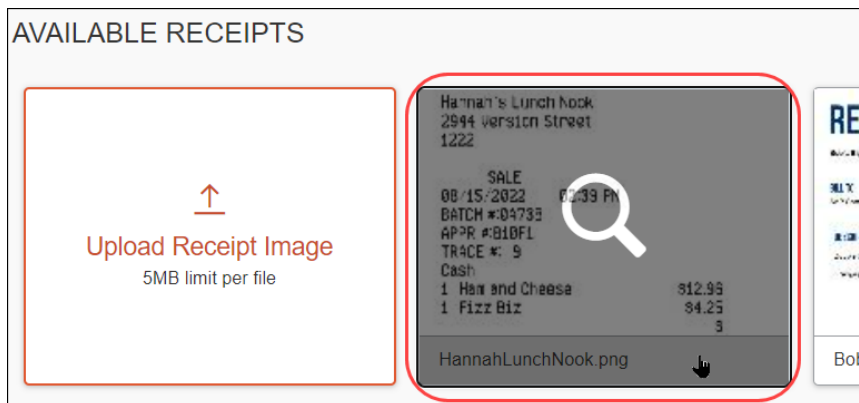

The right main area is a large light blue rectangle. In the center of this area is a red rounded rectangle containing a document icon with a plus sign and the text 'Upload Receipt Image' with a mouse cursor icon pointing at it. In the top right corner of the window, there is a 'Hide Receipt' button with a document icon.

The **Attach Receipt** window appears. Use the options on this page to review **Available Receipts** resident in the **Available Receipts** repository and upload the required receipt.

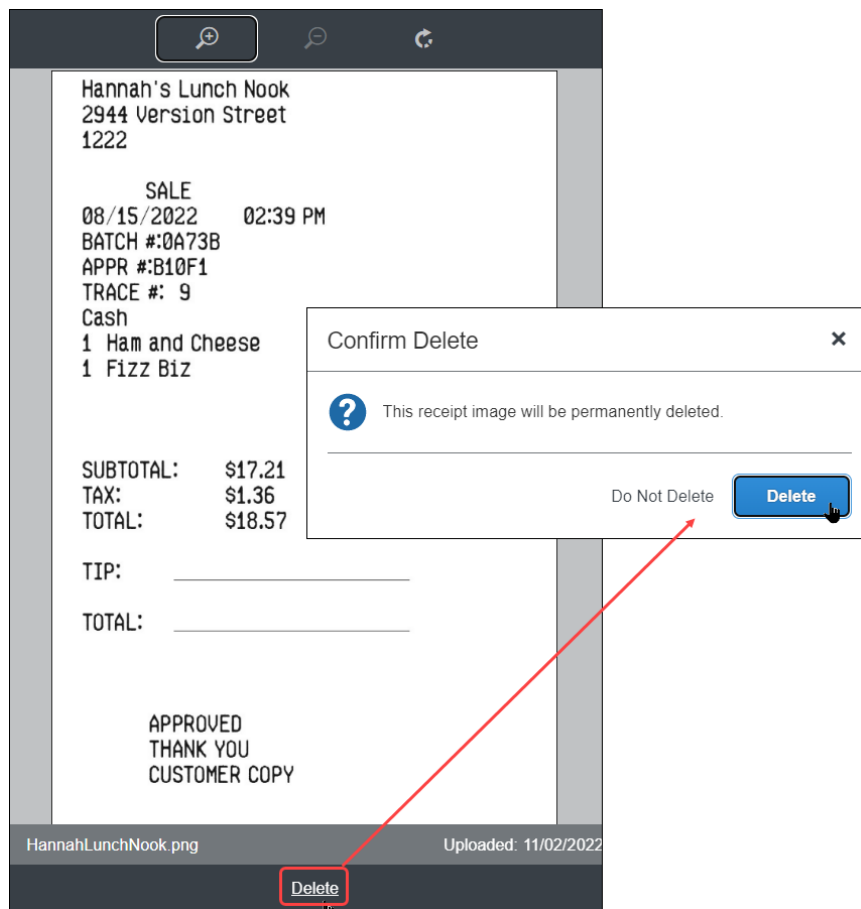

Delete Receipts from the Library

In the **Available Receipts** library, click the image to be deleted.

The image opens in a separate window. Click **Delete**, then **Delete** in the **Confirm Delete** window.

Section 10: Other Considerations

If the receipt is associated with a mobile expense (an expense generated on a mobile device using the SAP Concur mobile app) or is an e-receipt, the user cannot delete the receipt from the library.

- To delete a receipt associated with a mobile expense, the user must delete the mobile expense.
- To delete an e-receipt, the user must delete it from the **Available Expenses** area, providing the client's configuration allows deletions.

Section 10: Other Considerations

Hold for Receipt Image Workflow Step

The administrator can add a step to the Concur Expense workflow that requires receipt images to be attached to an expense report *before* the report can be sent to the first approver. Once the Imaging service receives the receipts, they are attached to the report in PDF format and the report can move to the next step in the workflow.

For more information, refer to the *Concur Expense: Workflow - General Information Setup Guide*.

Adobe Reader

Every client computer that utilizes the Imaging service must have the correct version of Adobe Reader installed. SAP Concur recommends version 8.0 or newer. Concur Expense does not provide Adobe Reader as part of Imaging. Adobe Reader is free to install and can be downloaded at <http://www.adobe.com>.

NOTE: The first time an employee submits or prints a report from within Concur Expense **and** Imaging has been activated, the system checks for the availability of Adobe Reader on the employee's computer. To assist the employee with the application installation, a link can be provided during configuration of Imaging that will direct the employee to the Adobe website to install the application, or to any other URL that is designated as the access point for Adobe Reader.

Adobe Reader must be configured to display the PDF in the browser and not in a separate window.

Compression

The Imaging service compresses larger PDFs. Images are not affected immediately; however, if a user views a PDF later, the user may notice that the receipt image is now grayscale and may not be quite as clear.

Troubleshooting Receipt Image Uploads

The following table displays error messages or scenarios that the employee may experience after attempting to upload receipt images to the Image Upload Server.

Error Message	Description	Solution
No files selected.	There are no files to be uploaded in the Files selected for uploading list.	Use the Browse button to select files to upload.
Completed.	The file is successfully uploaded.	N / A.
File Exceeds Size Limit.	The maximum file size is displayed in the Attach Files window. Refer to that information.	Save the file in a different format or rescan the file at 300 dpi or lower to reduce the file size. For best results, scan or take a photo as a black and white picture with no more than 1024 x 768 image resolution. NOTE: Do NOT attempt to compress the file using file compression software.

Section 11: Using the Missing Receipt Declaration

Error Message	Description	Solution
File Format not Supported.	The format of the file is not supported by the Receipt Image Upload feature.	Save the file in the PNG, JPG, JPEG, PDF, TIF, OR TIFF formats only. <i>Also, refer to Specifically About PDF Files in this guide.</i>
Upload Error.	The file was not successfully uploaded for unspecified reasons.	The upload process was not successful. You may attempt to upload the file in a new session. If this error continues, consult your SAP Concur Administrator for further directions.
Session has expired. Please log on to the application again.	The session has timed out due to inactivity over 24 hours.	Close and log in again.
Unable to upload images at this time. There may have been an error in the application, or you may have clicked the Refresh button. Close this browser window and retry the image upload from within the application.	The file was not successfully uploaded for a variety of reasons.	Open a new instance of Expense and try again to upload files.

Section 11: Using the Missing Receipt Declaration

Overview

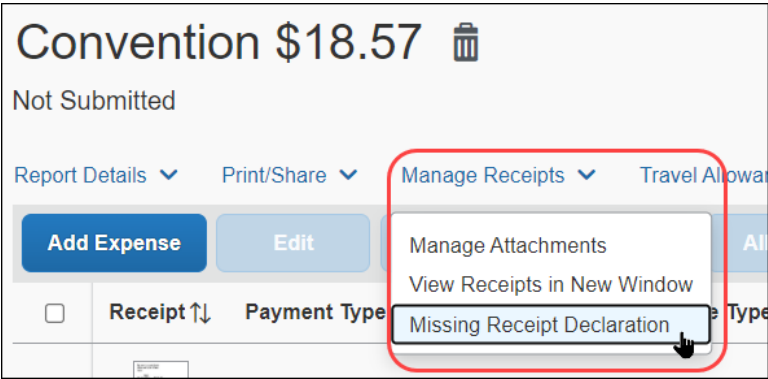

When a user is required to provide receipt images but cannot locate them (for example, they are lost or destroyed), the user can digitally sign an affidavit that is submitted instead of the actual imaged receipts. This way, the report can be submitted in a timely manner and, at the same time, comply with company policy on receipt submission.

User, Delegate, and Proxy

The affidavit can be submitted **only** by the user – not the user's delegate or a proxy.

User Experience

The user requiring an affidavit clicks Manage **Receipts** > **Missing Receipt Declaration**.

The **Create Receipt Declaration** window appears. Select the correct expense (there may be several listed) and then click **Accept & Create**.

Create Receipt Declaration ×

Please provide an official declaration about these missing receipts.

To create a Missing Receipt Declaration, select the expense(s) below that require a receipt.

<input checked="" type="checkbox"/>	Expense Type ↑↓	Vendor ↑↓	Date ≡	Amount ↑↓
<input checked="" type="checkbox"/>	Business Meal (attendees)	100		\$100.00

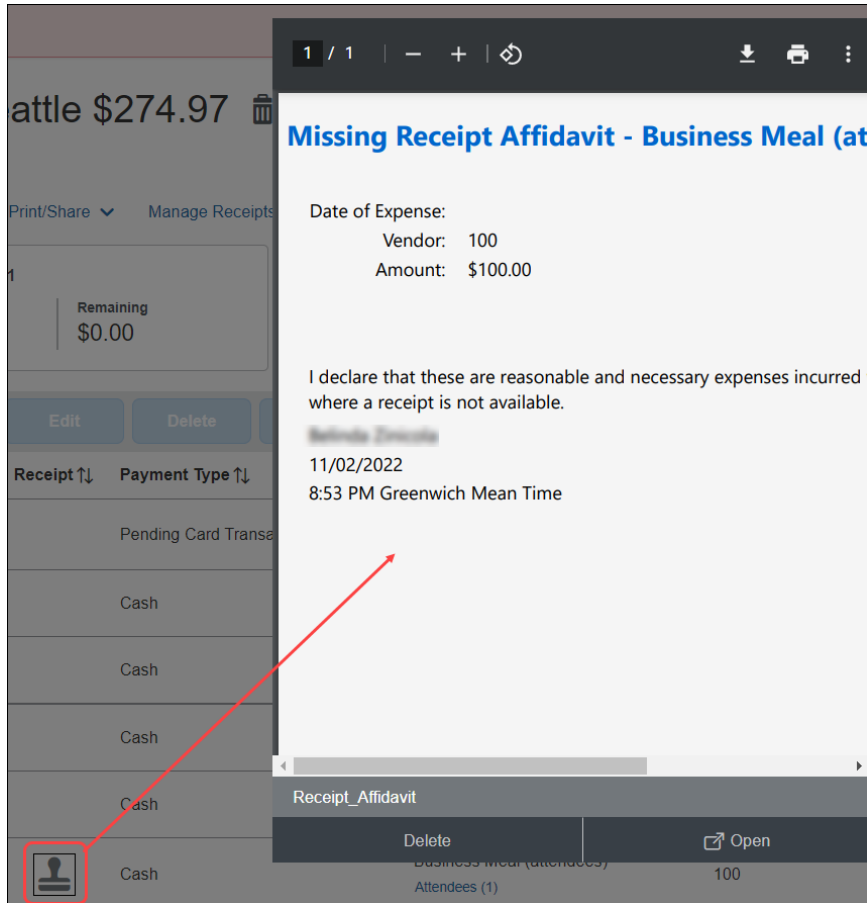

i I declare that these are reasonable and necessary expenses incurred while conducting company business, where a receipt is not available.

Cancel Accept & Create

NOTE: The client can add customized text above and below the listed expenses in the **Create Receipt Declaration** window. The text can also be localized. Both processes are described in the configuration section in this guide.

Section 11: Using the Missing Receipt Declaration

The system adds the  icon to each expense entry associated with the affidavit:

attle \$274.97

Print/Share Manage Receipts

Remaining \$0.00

Edit Delete

Date of Expense:

Vendor: 100

Amount: \$100.00

I declare that these are reasonable and necessary expenses incurred where a receipt is not available.

11/02/2022

8:53 PM Greenwich Mean Time

Receipt_Affidavit

Delete Open

Business meal (attendees)

Attendees (1)

100

The system also creates an image of the affidavit statement, attaches it to the entry or entries, and creates a record of the date, time, employee name, and other details for review purposes.

NOTE: In addition, a flag is set that can be used for audit rules to identify reports using the affidavit image type, as described in the configuration section of this guide.

Delete the Declaration

If the user later finds the receipt (before the report is submitted), they can delete the affidavit and attach the receipt image. To do so, the user clicks the icon and then clicks **Delete**. Then, in the **Confirm Delete** window, clicks **Delete**.

Configuration

To configure the affidavit feature, refer to the configuration section below.

Section 12: Japan E-Bunsho Receipt Timestamps

The e-Bunsho Timestamp feature for Japan allows admins to configure timestamping of receipts for groups of users.

Admins may use these timestamps in workflow rules and audit rules.

There is a validation process for monitoring received, pending, requested, and ineligible timestamps. The validation process revalidates the successfully timestamped images and displays counts and totals by date range for valid and invalid timestamped images.

This feature allows clients in Japan to maintain legal compliance to use images in lieu of paper receipts, per the e-Bunsho regulations.

User Experience

When creating expense reports, users see successfully timestamped receipts display with a new icon (🔗). **Available Receipts** display a valid timestamp or a status for each receipt image.

NOTE: Users cannot append another image once an image has been timestamped.

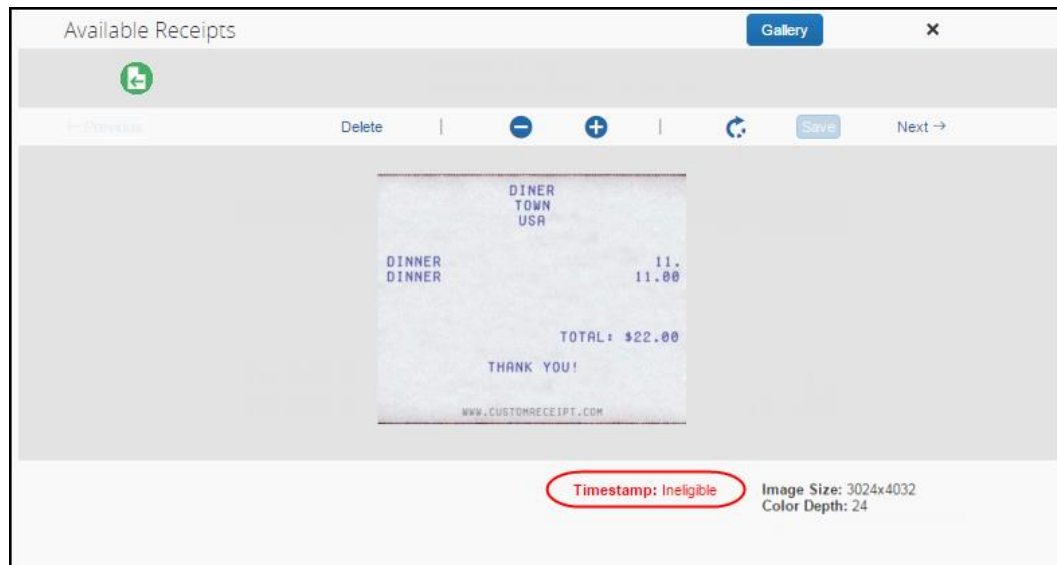

E-BUNSHO ICON

The screenshot displays the SAP Concur Expense report interface. The top navigation bar includes 'CONCUR', 'Travel', 'Expense', and 'App Center'. The main header shows 'Pacific Conference' with a 'Copy Report' button. Below the header, there are tabs for 'Summary', 'Details', 'Receipts', and 'Print / Email'. The 'Expenses' table has columns for 'Date', 'Expense Type', 'Amount', and 'Requested'. The first row shows a date of '06/02/2017', 'Expense Type' of 'Lunch', 'Amount' of '\$800.00', and 'Requested' of '\$800.00'. A red callout box highlights the 'e-Bunsho Timestamp icon' (🔗) next to the first expense entry. The 'Report Summary' section on the right shows 'Report Totals' with 'Amount Due Company' as '\$0.00' and 'Amount Due Employee' as '\$800.00'. The bottom of the table shows 'TOTAL AMOUNT' as '\$800.00' and 'TOTAL REQUESTED' as '\$800.00'.

RECEIPT WITH E-BUNSHO TIMESTAMP

RECEIPT WITHOUT E-BUNSHO TIMESTAMP

POSSIBLE TIMESTAMP STATUSES

Status	Description
Received	The receipt has entered the system.
Pending	The image is not yet queued for a timestamp.
Requested	A timestamp has been requested.

Status	Description
Ineligible	The image is not eligible for a timestamp because it is less than 3.88M pixels. NOTE: To be eligible for an e-Bunsho timestamp, images must be more than 200dpi (scanner) or 3.88M pixels (smartphone/digital camera) and at least 24-bit color for RGB.
Invalid	The image has failed a validation check.

NOTE: Timestamp statuses display to the user and are described in this guide; however, validation statuses do not display to users and are available to Concur Expense for troubleshooting purposes only. The validation statuses are:

- ENTITY NOT FOUND
- NOT TIMESTAMP IMAGE
- INELIGIBLE IMAGE
- INVALID IMAGE ID
- IMAGE NOT FOUND
- DELETED
- TIMESTAMP NOT YET RECEIVED
- INVALID
- VALID

DELETING RECEIPT IMAGES

There are instances when the system disables a user's ability to delete or remove a receipt image:

- In the Receipt Library, when a receipt image is successfully timestamped or if the status is in pending, the user may not delete the receipt image.
- On an expense entry, when a receipt image is successfully timestamped or if the status is in pending, the user may not detach the receipt image from the entry.

NOTE: Deleting and detaching receipt images is permitted when the timestamp status displays in red text, such as ineligible and invalid statuses, unless the status is in pending.

Admin Experience

Admins see changes in the following places:

- **Group Configurations**
- **Workflow Rules**
- **Audit Rules**
- **Receipt Rules**
- **Tools**

- **Process Reports**

Group Configurations

Receipt Handling

Admins can create limits using **Receipt Handling**.

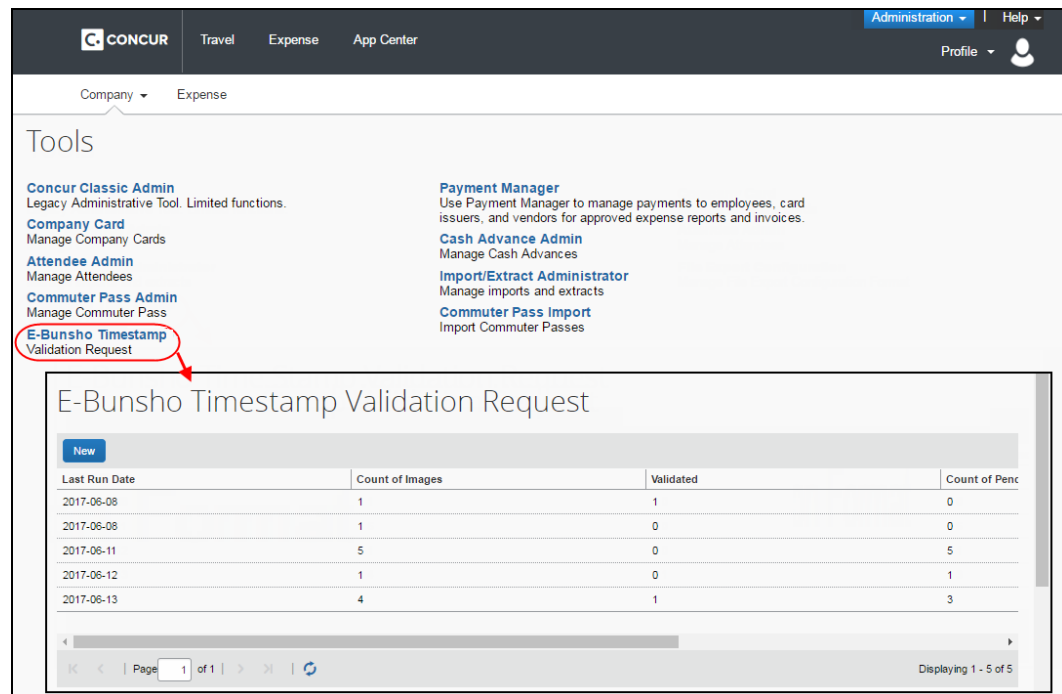

The screenshot shows the 'Receipt Handling' configuration window. At the top, there are tabs for 'Receipt Limits', 'Payment Hold Configurations', 'Scan Configurations', 'Receipt Imaging', and 'Approved Senders'. Below these, there are two sub-tabs: '1 General' and '2 Conditions'. The '2 Conditions' tab is active. On the left, there are buttons for 'Insert' and 'Remove'. Below these, there is a table with three columns: 'Data Object/Operator', 'Field/Value', and 'Operation'. The first row has a dropdown menu for 'Data Object/Operator' with 'Entry' selected, a text input field for 'Field/Value' containing 'Is Digitally compliant', and an empty 'Operation' field. The second row has a dropdown menu for 'Data Object/Operator' with 'Value' selected, an empty 'Field/Value' text input field, and an empty 'Operation' field. On the right side of the table, there is a list of conditions. The condition 'Is Digitally compliant' is highlighted with a red circle. Other conditions in the list include 'Has Merchant Tax ID', 'Has Mileage Calculator', 'Has Missing Receipt Affidavit', 'Has Mobile Receipt', 'Has Request Entry', 'Has Travel Reservation', 'Has User-Attached Receipt Image', 'Has VAT', 'Has commute deduction', 'Hotel Location (Hotel E-Receipt)', 'Hotel Name (Hotel E-Receipt)', 'Is Billable', 'Is a Company Card Entry', 'Last Modifying Source', 'Missing Tax Receipt', 'Number Of Days (Car Rental E-Receipt)', 'Number Of Units (Booked)', 'Number of Attendees', 'Number of Rental Days', and 'Number of days the vehicle was rented'. At the bottom right, there are buttons for 'Cancel', '<<Previous', and 'Done'.

Tools

The **E-Bunsho Timestamp** validation tool allows the company to validate the timestamps on a selected set of expense reports, usually done during the course of a government audit. The tool displays counts of images submitted for validation during a date range and can be used to view images that failed validation.

This tool is available to admins. The *Digital Compliance Administrator* role was created to provide access to this tool.

On the **Tools** page, users can see the **E-Bunsho Timestamp** validation request tool.

The screenshot shows the Concur user interface. In the 'Tools' section, the 'E-Bunsho Timestamp Validation Request' link is circled in red. Below this, the 'E-Bunsho Timestamp Validation Request' tool interface is displayed, featuring a table with the following data:

Last Run Date	Count of Images	Validated	Count of Penc
2017-06-08	1	1	0
2017-06-08	1	0	0
2017-06-11	5	0	5
2017-06-12	1	0	1
2017-06-13	4	1	3

The table includes a 'New' button and a pagination bar at the bottom indicating 'Page 1 of 1' and 'Displaying 1 - 5 of 5'.

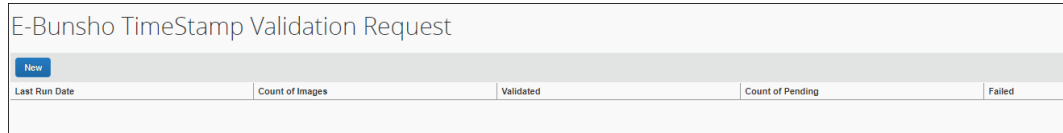

The tool can be used to view the following information by date:

- Total Number / **Count of Images**
- Total Number / Count of **Validated** Images
- Total Number / **Count of** (images) **Pending** validation
- Total Number / Count of **Failed** images
 - ◆ **Report Name**

2. Click **X** to close the **Timestamp Validation Failure** window.

Process Reports

Users with sufficient permissions may create queries from the **Process Reports** page using the timestamp fields:

- **Digital Compliance validation date**
- **Digital Compliance Status**

Sufficient permissions in this instance means having one of the following:

- **Expense Processor**
- **Expense Processor (Audit)**
- **Expense Processor Manager**

Configuration/Feature Activation

To configure the e-Bunsho feature, refer to the configuration section below.

NextGen UI

There are differences in behavior between the Legacy UI and NextGen UI in terms of handling expense entries with a timestamp image. Once the expense report is submitted, users will no longer be able to detach the image, delete or move the expense entry from a report in NextGen UI.

It is recommended all administrators are aware of the differences when migrating to the NextGen UI and consider the appropriate process for e-Bunsho.

	Legacy UI		NextGen UI	
	Before Submit	After Submit	Before Submit	After Submit
Delete entry	X	X	✓	X
Move entry	✓	✓	✓	X
Detach Image	X	X	✓	X

UNLIMITED RECEIPT UPLOAD SUPPORTED

The NextGen UI supports and unlimited number of receipt uploads.

Section 13: Fapiao Receipt Capture

The Fapiao Receipt Capture integration allows users to capture and upload fapiao into Concur Expense according to Chinese regulatory or government authorities.

A fapiao is a legal receipt required for business transactions, employee reimbursement, and VAT deduction. A fapiao is issued by the State Taxation Administration of the People's Republic of China but provided by the merchant.

NOTE: The feature is available to new and existing clients based in China and deployed to the China datacenter. Other datacenters are not included at this time.

The Fapiao Receipt Capture for China feature includes:

- Offering a fapiao solution in compliance with State Taxation Administration of the People's Republic of China and as provided by the merchant
- Providing reimbursement and VAT reporting process efficiency, reducing time to perform these tasks
- Capturing of VAT fapiao and non-VAT fapiao documents via the SAP Concur mini app in the WeChat™ app
 - ♦ Supported fapiao and documents include:
 - General VAT fapiao in paper form
 - General VAT - Roll fapiao in paper form
 - Special VAT fapiao in paper form
 - Special VAT fapiao in PDF form
 - General VAT fapiao in electronic form as stored in WeChat wallet
 - General VAT fapiao in PDF form
 - General VAT fapiao in OFD form
 - Official China Rail tickets
 - Official airline tickets issued by China Aviation
 - Official taxi fapiao
 - Official fix amount fapiao
- Uploading of fapiao and documents to Concur Expense:
 - ♦ For VAT fapiao, a validation is performed against State Taxation Administration of the People's Republic of China prior to the fapiao upload
 - ♦ For VAT fapiao, a duplication check is performed prior to the fapiao upload
 - ♦ Additional documents, such as itemized receipts, can also be uploaded with each fapiao submission
- Improving efficiency when capturing and merging multiple documents into one e-receipt transaction
- Displaying fapiao information in custom fields in Concur Expense with assistance from an SAP implementation coach

For more information, refer to the [State Taxation Administration of the People's Republic of China](#).

Unsupported fapiao or documents for the initial feature release include:

Section 13: Fapiao Receipt Capture

- Vehicle sales fapiao
- Freight Special fapiao
- Traffic fee fapiao
- Secondhand vehicle fapiao

Capturing Fapiao

To capture legal copies of original paper receipts, customers must use an SAP Concur mini program embedded in the WeChat™ mobile app. Customers can also upload fapiao information from WeChat wallet. The user takes a picture of the paper receipt within the mobile app. Once the picture is taken, the mobile app uploads the image to an approved third-party vendor for validation. A message is returned to the user in the mobile app indicating success or failure.

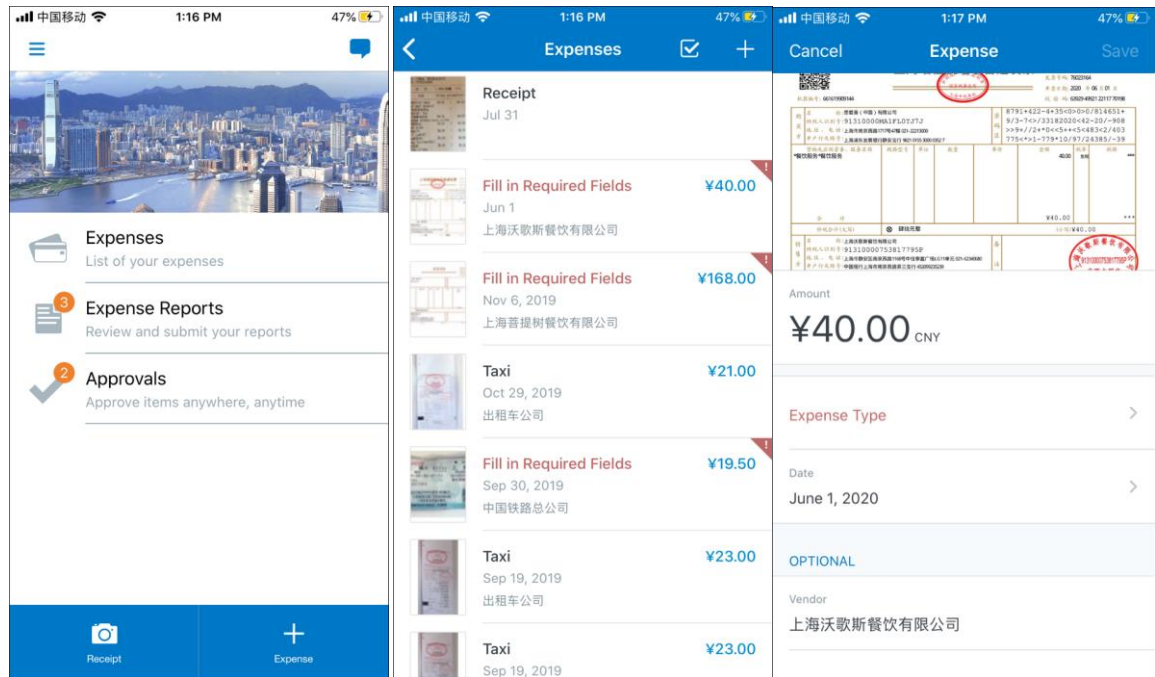

Once the image capture is verified, a **Validated** stamp  displays on the electronic fapiao in the SAP Concur min app in the WeChat program, indicating the electronic fapiao is validated. The mini program also checks for duplicate entries of VAT fapiao.

Once the fapiao is validated, users can upload the fapiao to Concur Expense by clicking the **Send to Concur** button. The fapiao also displays in the SAP Concur mini app for the applicable expense.

! **IMPORTANT:** SAP cannot guarantee compliance of fapiao receipts if users are not using the SAP Concur mini app in the WeChat™ mobile app to capture and upload receipts to Concur Expense.

FAPIAO IN THE SAP CONCUR MINI APP

On the SAP Concur mini app, an individual e-receipt expense item within an expense report only shows one attachment at the expense item level. Additional attachment images are located at the report level. This means if an expense item has additional attachment other than the fapiao image (such as an itemized receipt), it is viewable on the Receipt tab of the expense report, as shown in the following image.

Section 13: Fapiao Receipt Capture

User Experience

The captured fapiao displays for users in Concur Expense like any other receipt.

The screenshot shows the SAP Concur Expense interface. The main table lists expenses with columns for Expense Detail, Expense Type, Source, and Amount. A modal window is open, displaying a scanned Shanghai VAT receipt (上海增值税电子普通发票) with a QR code and a red circular stamp. The receipt details include the invoice number, date, and amount.

Expense Detail	Expense Type	Source	Amount
<input type="checkbox"/> 上海华程西南旅行社有限公司	Airfare		CNY 3,130.00
<input type="checkbox"/> 出租车公司	Taxi		CNY 30.00
<input type="checkbox"/> 出租车公司	Taxi		CNY 23.00
<input type="checkbox"/> 出租车公司	Taxi		CNY 23.00
<input type="checkbox"/> 中国铁路总公司			CNY 19.50
<input type="checkbox"/> 出租车公司	Taxi		CNY 21.00
<input checked="" type="checkbox"/> 上海菩提树餐饮有限公司			CNY 168.00
<input type="checkbox"/> 上海沃歌斯餐饮有限公司			CNY 40.00

FAPIAO ATTACHED TO AN EXPENSE REPORT

The screenshot shows the SAP Concur Expense interface with an expense report. The main table lists expenses with columns for Expense Type, Date, Amount, and Exception. A modal window is open, displaying a scanned Shanghai VAT receipt (上海增值税电子普通发票) with a QR code and a red circular stamp. The receipt details include the invoice number, date, and amount.

Expense Type	Date	Amount	Exception
Undefined	2019-11-06	CNY 168.00	The entry has Undefined expense type. You must select an expense type for the entry before you can submit the expense report.
Undefined	2019-11-06	CNY 168.00	Missing required field: City of Purchase, Receipt Status.
Undefined	2020-06-01	CNY 40.00	The entry has Undefined expense type. You must select an expense type for the entry before you can submit the expense report.

Admin Experience

Concur Expense will post a Standard Accounting Extract (SAE) together with fapiao details to various SAP VAT management systems for monthly VAT processing and reporting to the China's e-tax filing system.

Section 14: Receipt Digitalization

Overview

The Receipt Digitalization feature allows clients in France, Spain and Portugal or clients who have employees or configurations in these countries, to digitalize paper receipts per the country's relevant regulatory requirements, meaning that the document resulting of the digitalization process has the same value than the original paper document, thus enabling for paper to be dematerialized.

NOTE: This feature requires that users must be using the latest version of SAP Concur mobile and the NextGen UI. The entire company does not need to transition to the NextGen UI. However, any users associated to a group configuration, who want to use the Receipt Digitalization feature, must transition to the NextGen UI.

For more information, refer to the NextGen UI for Concur Expense [guides and resources](#).

The Receipt Digitalization feature includes:

- Enabling the conversion of paper receipts into digital copies with probatory value
- Configuring audit rules that look for expenses with paper receipts
- Viewing the "Certified" status of the digitalized receipt in the NextGen UI
- (Spain only) A solution audited and homologated by the Spanish tax authority, Agencia Estatal de Administración Tributaria (AEAT), as well as the four regional authorities (Haciendas Forales)
- (Portugal) E-archiving guidelines to ensure compliance with the e-archiving rules established by Portuguese authorities.

For more information on e-archiving, refer to *E-Archiving Guidelines (Portugal)* in the *Specifically for Digitalized Receipts* section of this guide. Non-SAP clients are welcome to reference e-archiving guidelines.

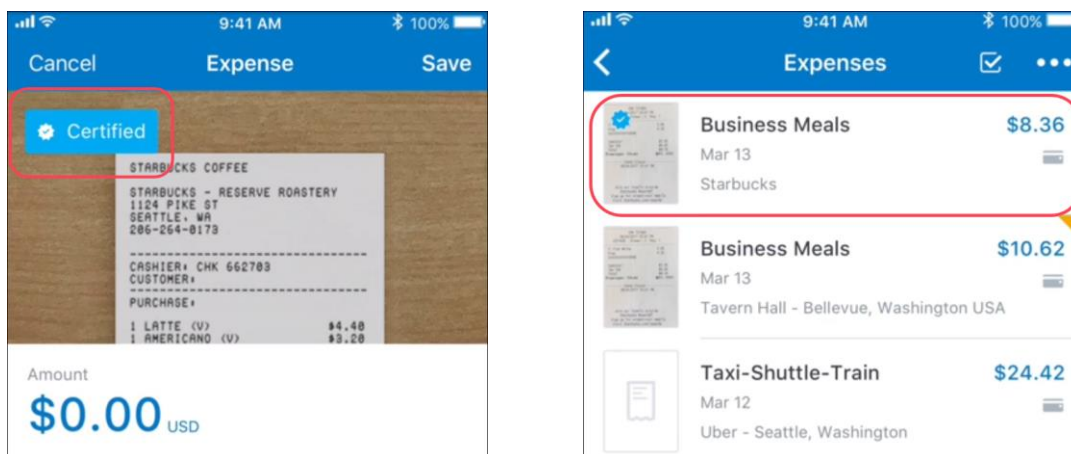

For more information regarding legislation, refer the following:

- Spain: refer to the [AEAT](#) website.
- France: refer to the [Legifrance](#) website.
- Portugal: refer to the [Diário de República Eletrónico](#) website.

NOTE: For information regarding the Quality Management Plan for Receipt Digitalization, contact your SAP Concur account representative.

Digitalizing Paper Receipts

To digitalize original paper receipts, users must use the latest version of the SAP Concur mobile app, and can use Expense It with the mobile app. The user takes a picture of the paper receipt with mobile app. Once the picture is captured, the relevant digitalization process is applied to the image. Once the process is complete, a stamp displays on the digitalized receipt in the mobile app confirming whether the digitalization process has been successful.

NOTE: The ability to digitalize a receipt captured at the report header level is not yet available.

Failed Digitalization of Receipts

If the digitalization process is interrupted, a message appears to the user that the image is not certified and asks the user to try again. The SAP Concur mobile app camera appears so the user can capture a picture of the receipt again.

If the picture is taken using ExpenseIt, the types of technical failure include:

- Image capture fail through ExpenseIt due to low lighting or camera being too far away
- Loss of internet connectivity
- Service processing error

In each case, a message appears in the app advising the user to either retake the picture or wait for processing to complete.

For more information, refer to the *SAP Concur Mobile App User Guide for Concur Expense*.

For more information, refer to ExpenseIt [training videos](#) on image capture optimization and best practices.

User Experience

When creating expense reports, users see successfully conformed digitalized receipts display with a "Certified" icon (🔒). Digitalized receipts display for users in the NextGen UI in **Available Expenses**, **Available Receipts**, and in the expense list.

Delegates can complete an expense report for a user once the user has taken a picture of the digitalized receipt using the SAP Concur mobile app.

Users or admins who have permissions to open an expense report can go to any line item with a digitalized receipt and download the digitalized PDF file. The PDF created through the receipt digitalization process includes all information required for it to have or evidential value.

Digitalized Receipt in Available Expenses

The following example shows receipts that are certified displaying in **Available Expenses**. A "Certified" icon 🔒 displays for receipts that are certified.

AVAILABLE EXPENSES View: All Expenses ▾					
<div> <input type="checkbox"/> Delete <input type="checkbox"/> Combine Expenses <input type="button" value="Move to ▾"/> </div>

AUDIT RULES FOR RECEIPT DIGITALIZATION

The following table provides examples for configuring audit rules for receipt digitalization. These rules may help with establishing correct use from travelers, as well as alert approvers and processors of non-compliance receipts.

Description	Event	Conditions	Exception	Comments
This rule will trigger an expense save if there is a receipt attached (whether the receipt has been added from SAP Concur mobile or the NextGen UI for Concur Expense) to the expense which is not digitally compliant. It will not trigger for Concur Expense e-receipts.	Expense Save	Is digitally compliant = NO AND Has E-Receipts = no AND Has User-Attached Receipt Image = Yes	The receipt attached to this entry is flagged as non-digitally compliant. If this is a copy of an original paper receipt, please, capture the receipt again using the compliant method. If this is a genuine electronic receipt, ignore this exception	Clients should choose whether to create a Warning or Blocking Exception.
This rule will trigger on expense save if there is a receipt attached (whether the receipt has been added from SAP Concur mobile) to the expense which is not digitally compliant. It will not trigger for Concur Expense e-receipts.		Is digitally compliant = NO AND Has E-Receipts = no AND Has Mobile Receipt = Yes	The receipt attached to this entry is flagged as non-digitally compliant. If this is a copy of an original paper receipt, please, capture the receipt again using the compliant method. If this is a genuine electronic receipt, ignore this exception	Clients should choose whether to create a Warning or Blocking Exception.

For more information, refer to the *Concur Expense: Audit Rules Setup Guide* or the *Expense: Workflow General Information Setup Guide*.

Receipt Handling

Admins can create limits using **Receipt Handling**.

The screenshot shows the 'Receipt Handling' configuration window. The 'Conditions' tab is selected. The main area contains a table with the following columns: 'Data Object/Operator', 'Field/Value', and 'Operation'. The first row has 'Entry' in the first column and 'Is Digitally compliant' in the second. To the right of the table is a list of available conditions, including 'Has Merchant Tax ID', 'Has Mileage Calculator', 'Has Missing Receipt Affidavit', 'Has Mobile Receipt', 'Has Request Entry', 'Has Travel Reservation', 'Has User-Attached Receipt Image', 'Has VAT', 'Has commute deduction', 'Hotel Location (Hotel E-Receipt)', 'Hotel Name (Hotel E-Receipt)', 'Is Billable', 'Is Digitally compliant' (highlighted in red), 'Is a Company Card Entry', 'Last Modifying Source', 'Missing Tax Receipt', 'Number Of Days (Car Rental E-Receipt)', 'Number Of Units (Booked)', 'Number of Attendees', 'Number of Rental Days', and 'Number of days the vehicle was rented'. At the bottom right are buttons for 'Cancel', '<<Previous', and 'Done'.

For more information, refer to the *Concur Expense: Receipt Handling – Receipt Limits Setup Guide*.

Process Reports

Users with sufficient permissions may create queries from the **Process Reports** page using the timestamp fields:

- **Digital Compliance validation date**
- **Digital Compliance Status**

Configuration/Feature Activation

To configure the Receipt Digitalization feature, refer to the configuration section in this guide.

Section 15: Configuration

This process is likely completed during implementation. If not, the client can contact SAP Concur support for assistance.

The basic steps are listed here and described *in detail* on the following pages.

- Step 1: Enable the Concur-internal setting
- Step 2: Enable the Imaging Service

Section 15: Configuration

- Step 3: Create or modify a receipt imaging configuration
- Step 4: Assign the configuration to a policy
- Step 5: (Optional) Modify the receipt reminder text
- Step 6: (Optional) Modify the delegate configuration
- Step 7: (Optional) Hold for Receipt workflow step
- Step 8: (Optional) Enable the Missing Receipt **Declaration**
- Step 9: (Optional) Enable e-Bunsho timestamps
- Step 10: (Optional) Enable Fapiao Capture
- Step 11: (Optional) Enable Receipt Digitalization

NOTE: Some of these steps are completed by SAP Concur; some may be completed by the client. The client and SAP Concur should work closely to coordinate efforts.

Step 1: Enable the Concur-Internal Setting

In the Concur-internal management console, the Concur Admin sets the **Allow Image Upload** option (on the **Settings** page) to Yes.

Step 2: Enable the Imaging Service

The Concur Admin enters the client's unique company ID and public key in Imaging Settings.

Refer to the *Shared: Imaging Settings Setup Guide*.

Step 3: Create or Modify a Receipt Imaging Configuration

► **To create or modify a receipt imaging configuration:**

1. Click **Administration** > **Expense** (on the sub-menu).
2. Click **Receipt Handling** (left menu). The **Receipt Handling** window appears.
3. Click the **Receipt Imaging** tab.

Name	Adobe Reader Download URL	Mark Receipts ...	Display How To?	Enable Image ...	Allow Images ...
DEFAULT	http://www.adobe.com/products/acrobat/readstep2.html	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

4. Either:
 - ◆ Click the default row to edit the existing default configuration.
 - or –
 - ◆ Click **New** to create a new configuration. A new row appears.
5. Complete the appropriate fields.

Field name	Description/Action
Name	Enter a unique name for the configuration. This name will appear as an option when setting up policies.
Acrobat Reader Download URL	Enter the link to the Adobe website where the employee can download the software. The link appears in the error message that displays when the system checks to see if Adobe Reader is installed. NOTE: The system checks to see if Adobe Reader is installed when the employee clicks the Receipts menu.
Mark Receipts Received?	Select (enable) this check box to have the system change the Receipts Received flag in Expense Processor from <i>No</i> to <i>Yes</i> when receipts have been received successfully.
Display How To?	No longer used.
Enable Image Upload?	Select (enable) this check box to allow users to upload images. If enabled: <ul style="list-style-type: none"> • The Attach Receipt Images link appears on the Receipts menu. • With the expense entry open, the Attach Receipt link appears at the bottom of the Expense tab. • The user can upload to the Available Receipts library.
Allow Images on Report?	Select (enable) this check box to allow users to attach an image at the report level. If enabled, the user can attach at the report level and the expense entry level. NOTE: If the user is allowed to upload, the user can always attach at the expense entry level, regardless of this setting.

6. Click **Save**.

Step 4: Assign to a Policy

► To assign an imaging configuration to a policy:

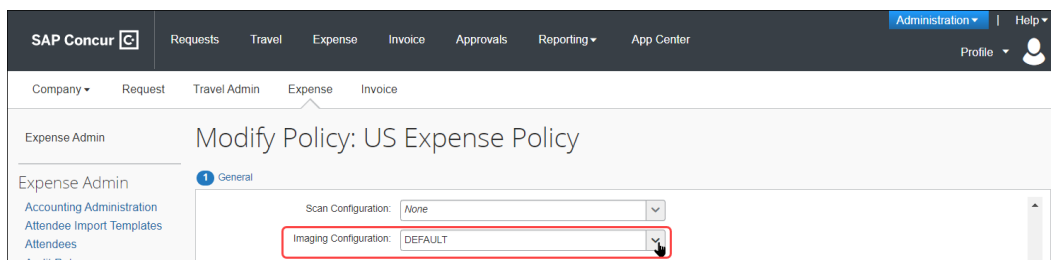

1. Click **Administration > Expense** (on the sub-menu).
2. Click **Policies**. The **Policies** page appears.
3. Either:
 - ◆ Click the desired policy and click **Modify**.
 - or –

Section 15: Configuration

- ◆ Double-click the desired policy.

The **Modify Policy** page appears.

4. From the **Imaging Configuration** list, select the appropriate imaging configuration.

The screenshot shows the SAP Concur web interface. The top navigation bar includes 'Requests', 'Travel', 'Expense', 'Invoice', 'Approvals', 'Reporting', and 'App Center'. The left sidebar has 'Expense Admin' selected. The main content area is titled 'Modify Policy: US Expense Policy'. Under the 'General' tab, there are two dropdown menus: 'Scan Configuration' (set to 'None') and 'Imaging Configuration' (set to 'DEFAULT'). The 'Imaging Configuration' dropdown is highlighted with a red rectangular box.

5. Click **Save**.

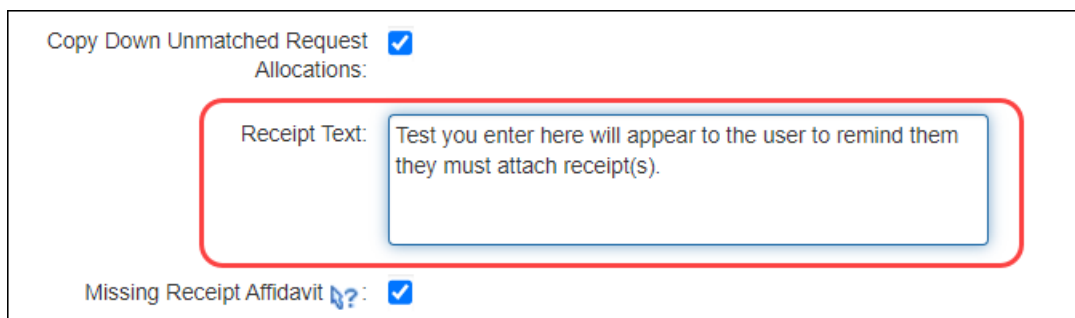

For more information about adding or editing a policy, refer to the *Concur Expense: Policies Setup Guide*.

Step 5: (Optional) Modify the Receipt Reminder Text

If desired, you can edit the reminder text that appears to the user.

► **To edit the receipt text:**

1. In Policies (as described in the previous step), enter the desired text in the **Receipt Text** field.

The screenshot shows a configuration form. At the top, 'Copy Down Unmatched Request' is checked. Below it, 'Allocations:' is followed by a red-bordered box containing the 'Receipt Text' field. The field has a placeholder text: 'Test you enter here will appear to the user to remind them they must attach receipt(s)'. At the bottom, 'Missing Receipt Affidavit' is checked.

2. Click **Save**.

Step 6: (Optional) Modify the Delegate Configuration

You can grant or deny delegates the ability to manage receipt images for expense reports they are preparing on behalf of another employee. If your company allows delegates to manage receipts, individual users can still deny in Profile.

Refer to *Delegate Experience* in this guide.

► **To modify the delegate configuration:**

1. Click **Administration > Expense** (on the sub-menu).
2. Click **Delegate Configurations** (left menu). The **Expense Delegate Configurations** page appears.

Name	Can Prepare	Can Submit Reports	Can Submit Requests	Can Approve	Can Approve Temporary	Can View Receipts	Can Use Reporting	Can Preview For Approver	Restrict Delegates to Group	Need Approver Role to Approve	Applies to Groups	Maximum Time Period to Approve (Days)
Default	Yes	Yes	Yes	Yes	Yes	Yes	No	Yes	Yes	Yes	Global	

3. Either:
 - ◆ Click the desired configuration and click **Modify**.
 - or –
 - ◆ Double-click the desired configuration.

The **Edit Expense Delegate Configuration** page appears.

Edit Expense Delegate Configuration:

Delegate can preview report/request for approver	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Delegate can view receipt images for reports	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Group Name Name

4. Select (enable) the **Delegate can view receipt images for reports** check boxes as required.

NOTE: The setting says "view" but it includes view, add, delete, etc.

5. Click **Save**.

Step 7: (Optional) Hold for Receipt Workflow Step

For more information, refer to the *Other Considerations* section in this document.

Step 8: (Optional) Enable the Missing Receipt Declaration

Enable the Feature

► **To enable the Declaration feature and customize the text:**

1. Click **Administration** > **Expense** (on the sub-menu).
2. Click **Policies** (left menu). The **Policies** page appears.
3. Either:
 - ◆ Click the desired policy and click **Modify**.
 - or –
 - ◆ Double-click the desired policy.

The **Modify Policy** page appears.

4. Select **Missing Receipt Declaration**. When you do this, two additional text boxes appear as shown in the figure below:

5. Enter the explanation and acceptance text as desired.

NOTE: The affidavit text can be localized via Administration > Expense Admin > Localization. Select the desired language. Select **Policy Names** in the **Category** column. Then, modify the text for one or more policies.

6. Click **Save**.

For more information, refer to the *Concur Expense: Policies Setup Guide*.

Declaration Rule

The admin can use the entry field *Has Missing Receipt Declaration* to detect expense entries with affidavits. A sample audit rule is shown below:

Step 9: (Optional) Japan E-Bunsho Timestamps

Enable the Feature

To enable this feature, contact SAP Concur support.

► To configure a group to Use e-Bunsho Timestamps

1. On the **Group Configurations** page, select the group and click **Modify**.
2. On the **Configuration for Group** page, from the **Digital Compliance Country Rule** list, select **Japan e-Bunsho**.

Section 15: Configuration

Configuration for Group: Global

Group: Global

Group Name: Global

Attendee List Form: Default Attendee Detail View

Digital Compliance Country/Region Rule: None

For Expense Assistant, allow users to opt out or to use:

- Spain

- Japan e-Bunsho
- China e-Fapiao
- None

☐ Allow user to register Yodlee Credit Cards (This setting cannot be revoked once granted)

☐ Allow user to upload XML tax receipts.

☐ Utilize rich card data for receipts handling

Cancel Save

3. Click **Save**.

Step 10: (Optional) Enable Fapiao Capture

To enable this feature, contact support or your implementation coach.

Concur Admins can enable fapiao receipt capture for clients who have purchased it. Once enabled, all Concur users in the company are eligible to use the SAP Concur mini app program embedded in the WeChat™ mobile app, regardless of their nationality.

Step 11: (Optional) Enable Receipt Digitalization

An administrator with the Concur Expense Group Administration role can configure the Receipt Digitalization feature in Group Configuration. Once configured, the feature is available for all users in that group.

► To configure a group to use Receipt Digitalization:

1. On the **Group Configurations** page, select **New**. The **Select Group** window appears.

NOTE: If you do not define a group, then it will inherit from the next level that is defined. You *always* inherit the policy for undefined groups.

2. In the **Select Group** box, select the desired group.
3. Click **Done**. The **Configuration for Group** window appears.

Configuration for Group: Global

Group: Global

Group Name:

Attendee List Form:

Digital Compliance Country/Region Rule:

For Expense Assistant, allow users to opt out or to use:

☐ Allow user to register Yodlee Credit Cards (This setting cannot be revoked once granted)

☐ Allow user to upload XML tax receipts.

☐ Utilize rich card data for receipts handling

Cancel Save

4. On the **Configuration for Group** page, in the **Group Name** field, type in a name for the group.
5. In the **Digital Compliance Country Rule** list, select the appropriate process to be followed:
 - ◆ For Spanish or Portuguese users, select *Spain*
 - ◆ For French users, select *France*
 - ◆ For Japan users, select *Japan e-Bunsho*
 - ◆ For China users, select *China e-Fapiao*
6. Click **Save**.

For more information regarding Group Configuration settings, refer to the *Concur Expense: Group Configurations for Expense Setup Guide*.
