Revision History

Date	Notes / Comments / Changes
February 16, 2022	Updated the new rule option for Location for rate determination, foreign and removed the unused rule options from the Viewing the statutory rate bundle section
July 19, 2021	Created new guide for the travel allowance solution available with the NextGen UI for Concur Expense

Travel Allowance

Section 1: Permissions

A company administrator may or may not have the correct permissions to use this feature. The administrator may have limited permissions, for example, they can affect only certain groups and/or use only certain options (*view* but not *create* or *edit*).

If a company administrator needs to use this feature and does not have the proper permissions, they should contact the company's Concur Expense administrator.

Also, the administrator should be aware that some of the tasks described in this guide can be completed only by SAP Concur. For tasks not completed during implementation, the client must initiate a service request with SAP Concur support.

Section 2: Overview

This document provides country-specific template information about the SAP Concur-managed, statutory bundle for Poland.

 **IMPORTANT:** This guide is a **supplement** to the *Expense: Travel Allowance Setup Guide* which contains essential information about the travel allowance feature.

Clients who use the statutory bundle for Poland, but also want to supersede some of the statutory rates, may also create configurable bundles.

For more information about client-managed bundles, refer to the *Expense: Travel Allowance Generic Configurable Bundle Setup Guide*.

Section 3: What the User Sees

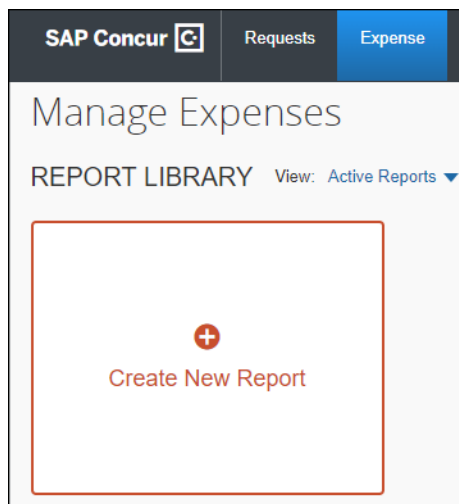

This section uses the most common method of reimbursement in Poland – *daily* allowances for incidentals and meals and *actual* expenses for lodging.

Creating an Expense Report

When the travel allowance feature is available to a user, after the user completes the header on a new expense report, they are prompted for itinerary and adjustment information.

▶ **To create an expense report:**

1. From Concur Expense, click **Create New Report**.

NOTE: There are other valid paths to start a new expense report.

2. On the **Create New Report** page, commonly referred to as the report header, complete all required fields. An asterisk indicates a required field.

The screenshot shows the 'Create New Report' form with the following fields and values:

- Report Name ***: 2021 Continuing Education
- Business Purpose** (Required field): Annual training
- Report Key**: (Empty)
- Report Date**: 06/23/2021
- Policy ***: *Global Expense Policy
- Company Hierarchy Level 1**: Search by Text
- Company Hierarchy Level 2**: (Empty)
- Comment**: (Empty text area)
- Claim Travel Allowance**:
 - Yes, I want to claim Travel Allowance
 - No, I do not want to claim Travel Allowance

At the bottom right, there are 'Cancel' and 'Next' buttons. A note at the bottom of the form reads: 'Next: Create report and add itinerary details for your travel allowances'.

NOTE: The policy selected may impact which fields display.

NOTE: When claiming travel allowance is available to the user, **Yes, I want to claim Travel Allowance** is selected by default.

3. Click **Next** to create the expense report and display the **Itinerary** page.

- On the **Itinerary** page, complete all required fields. An asterisk indicates a required field.

The following table shows the fields and their descriptions. An asterisk indicates a required field.

Field/Option	Description
Itinerary Name *	Enter an itinerary name or use the default name provided that matches the Report Name .
Start Location *	Enter the first few letters of the origination city for this itinerary and select it from the list of cities.
Start Date *	Enter a beginning month, day, and year for the time period covered by this itinerary.
Start Time *	Enter a beginning hour and minutes for the time period covered by this itinerary.

Field/Option	Description
Add Destination	Click Add Destination to display another set of location fields to this itinerary. This option displays twice for convenience.
Arrival Location *	Enter the first few letters of the destination city and select it from the list of cities.
Arrival Date *	Enter the beginning month, day, and year of your time at this Arrival Location .
Arrival Time *	Enter the beginning hour and minutes of your time at this Arrival Location .
Border Crossing Date*	Enter the beginning month, day, and year on the date when you crossed the Polish border on your way to this Arrival Location . NOTE: This field is only enabled for foreign trips and defaults to match the Arrival Date . IMPORTANT: Users must edit the default contents of this field as needed to accurately reflect the date that the border crossing occurred.
Border Crossing Time*	Enter the beginning hour and minutes on the date when you crossed the Polish border on your way to this Arrival Location . NOTE: This field is only enabled for foreign trips and defaults to match the Arrival Time . IMPORTANT: Users must edit the default contents of this field as needed to accurately reflect the local Polish time that the border crossing occurred, such as the time when the flight departed from Poland.
Departure Location *	Enter the first few letters of the last location at this Arrival Location and select it from the list of cities.
Departure Date *	Enter the month, day, and year that you left the Departure Location .
Departure Time *	Enter the hour and minutes that you left the Departure Location .
End Location *	Enter the first few letters of the final city for this trip and select it from the list of cities.
End Date *	Enter a ending month, day, and year for the time period covered by this itinerary.
End Time *	Enter an ending hour and minutes for the time period covered by this itinerary.

5. Click **Next** to save the itinerary and display the **Adjustments** page.

Adjustments (view)

This is the default view where a user can see a row for each calculated daily allowance and select provided meals and claim overnight stays that do not have a receipt, such as when staying with a friend.

Travel Allowance x

Adjustments

Adjustments allow you to reduce your specific travel allowances if meals were provided or if you stayed with family/friends. In the event of personal leave, you can exclude the day. Refer to your company's policy guidelines.

NOTE: For foreign trips, the **Reimbursable Amount** displays in the reimbursement currency, while the **Rate Amount** displays in the currency against which the rate is defined.

The following table shows the fields and their descriptions. An asterisk indicates a required field.

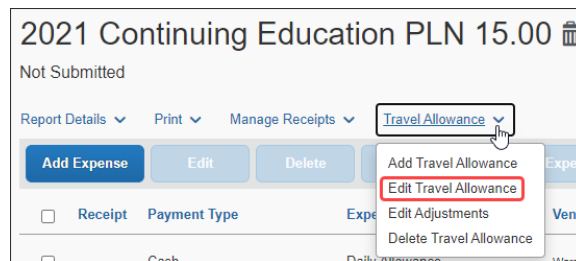

Column	Description
Exclude Day	Select this check box to mark a date as personal time and therefore not eligible for travel allowance benefits. NOTE: There is a Select All check box available for this column.
Overnight	If configured for your company, and selected, the system will add an amount to the calculated meals rate if you stayed overnight, but do not have a (hotel or similar) receipt for the purpose of purchasing a gift for the host.

Column	Description
Breakfast	Select this check box to mark the meal as provided and therefore not eligible for travel allowance benefits. NOTE: Provided meals reduce the daily allowance total shown in the Amount column. NOTE: There is a Select All check box available for this column.
Lunch	Select this check box to mark the meal as provided and therefore not eligible for travel allowance benefits. NOTE: Provided meals reduce the daily allowance total shown in the Amount column. NOTE: There is a Select All check box available for this column.
Dinner	Select this check box to mark the meal as provided and therefore not eligible for travel allowance benefits. NOTE: Provided meals reduce the daily allowance total shown in the Amount column. NOTE: There is a Select All check box available for this column.

- (Optional) Click **Back** to edit the itinerary page.
- (Optional) Click **Cancel** to close the adjustments page without saving your selections.

NOTE: The expense report is not deleted and the itinerary and allowances can be edited later by selecting **Travel Allowance > Edit Travel Allowance**.

- Click **Finish** to create the daily allowances and display the expense report.

<input type="checkbox"/>		Cash	Daily Allowance	Warsaw, POLAND	06/14/2021	PLN 7.50	
						PLN 15.00	

It is important to understand the following about system-created expenses:

- As applicable, daily allowance expenses are assigned the default expense type of **Daily Allowance** or **Daily Allowance (Lodging)**.
 - If there are both meals and lodging allowances on the same day, an expense is created for each expense type for each day.
 - If rate information is changed *after* the daily allowance expenses have been created, the amounts are not updated unless the user returns to the adjustments page and clicks **Finish** again.
 - If the actual meals expenses are imported through the company card import but the user was reimbursed with daily allowances, then the user should mark the imported meals expenses as provided.
- Click **Add Expense** to add actual expenses. This step is not specific to the travel allowance feature and is accomplished in the same manner that is used to add non-travel allowance expenses to an expense report.

Adding Additional Itineraries to an Expense Report

▶ **To add additional itineraries to an expense report**

1. Open the expense report and click **Travel Allowance > Add Travel Allowance**. The **Travel Allowance** wizard begins again from the **Itinerary** page.

NOTE: There is no restriction on the number of itineraries that may be associated with an expense report.

2. Complete the wizard and click **Finish**.

Deleting an Itinerary from an Expense Report

▶ **To delete an itinerary from an expense report**

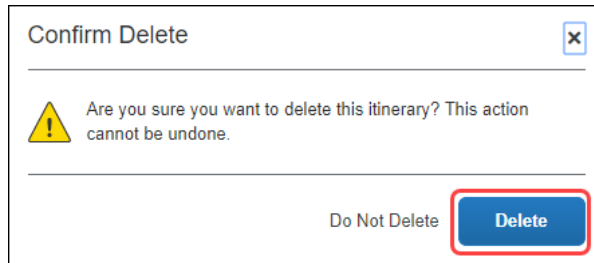

1. Open the expense report and click **Travel Allowance > Delete Travel Allowance**.

2. On the **Itinerary Management** page of the **Travel Allowance** wizard, in the desired row, click **Delete**.

3. Click **Delete**.

Section 4: View the Poland Statutory Bundle

A bundle is a set of rates. The simplest initial configuration of the travel allowance feature uses the statutory rate bundle provided by SAP Concur to create a configuration code.

- A **Rate Bundle** consists of rate types, calculation rules, trip types, meal types, lodging types, rates, deductions, and adjustments. SAP Concur provides statutory bundles based on current data available from each country's government.

Administrators may create their own configurable bundles to supersede the provided statutory bundles.

For more information about creating a (configurable) copy of an SAP-provided (read-only) statutory bundle, refer to the *Expense: Travel Allowance Generic Configurable Bundle Setup Guide*.

- A **Configuration Code** consists of a statutory and/or a configurable **Rate Bundle**.

For more information about enablement, hierarchy, mappings, configuration codes, and optional configuration, refer to the *Expense: Travel Allowance Setup Guide*.

Accessing the Travel Allowance Configuration Page

- ▶ **To access the Travel Allowance Configuration page:**
 - Click **Administration > Expense > Expense Admin > Travel Allowance Configuration**.

Viewing a Statutory Rate Bundle

- ▶ **To view a statutory rate bundle:**
 1. On the **Travel Allowance Configuration** page, click **Rate Bundles**. The **Rate Bundles** page displays.
 2. On the **Rate Bundles** page, in the row for the statutory bundle, click **View** (🔍).

The **View Rate Bundle** page displays.

The following table shows the read-only values that exist in the statutory Poland rates, **and also the possible options** in the event that a configurable bundle is needed to supersede portions of the statutory bundle. An asterisk indicates a required field.

For more information about configurable bundles, refer to the *Expense: Travel Allowance Generic Configurable Bundle Setup Guide*.

Field	Description
Required Fields	The value is <i>Incidentals, Lodging, or Meals</i> .
Rate Type *	

Field	Description
Required Fields Amount * Currency *	<p>The value is an amount and a currency to which the rate applies.</p> <p>When creating an expense report, the currency displayed here will be converted into the user's reimbursement currency as determined by the user's User Administration settings.</p>
Required Fields Valid From * Valid To *	<p>This value is a date range.</p> <p>A date range allows previous rates to remain applicable when processing trips in the past.</p> <p>NOTE: Regulatory rates are typically updated annually by calendar or financial year and so are valid only for limited date ranges.</p>
Required Fields Applicable for (days) *	<p>This value is <i>First day, Last day, All days, or Intervening days</i>.</p> <p>Intervening days are the days between the first and last day of a trip. The <i>All days</i> value includes the first day, intervening days, and the last day, and applies to one-day trips.</p>
Location Country/Region	<p>If this field is used for this rate, the value is the country where these rates apply.</p>
Location Subdivision	<p>If this field is used for this rate, the value is the state or province where these rates apply.</p>
Location Administrative Region	<p>If this field is used for this rate, the value is the county where these rates apply.</p>
Location Locality	<p>If this field is used for this rate, the value is the city where these rates apply.</p>
Time-Based Constraints From Day of Trip To Day of Trip	<p>If these fields are used for this rate, they display a number range of days during which the rate applies.</p> <p>This setting may be used when meal rates decrease after a certain number of days, since it is assumed that users become familiar with the place and find ways to spend less on meals.</p> <p>For example, meal per diems may be reduced to 80% as of day 15 of travel, and further reduced to 60% as of day 30 of travel.</p> <p>NOTE: This setting creates a per trip rate constraint and does not apply across multiple itineraries or trips.</p>
Time-Based Constraints Minimum trip length in days Maximum trip length in days	<p>If these fields are used for this rate, they display a number range of days from 1 to 999 to which this rate applies.</p> <p>This setting may be used when single-day trips have different rates than multi-day trips.</p> <p>For example, when both the minimum and maximum days display 1, then this rate applies only to a single-day trip.</p>

Field	Description
Time-Based Constraints Minimum duration in minutes Maximum duration in minutes	If these fields are used for this rate, they display a number range of minutes to which this rate applies. For example, users may receive a meal per diem, such as 12 EUR when their trip is more than 8 hours (481 minutes) and less than 24 hours (1439 minutes) on a given day.
Time-Based Constraints Start Time End Time	If these fields are used for this rate, they display a clock time range during which the travel allowance is valid. For example, if a meal allowance is defined for travel between 13:00 and 14:00 and the trip ends at 12:30, then no meal allowance is provided.
Time-Based Constraints The itinerary must cover the whole period -or- The itinerary must cover a part of the period	If one of these constraints is used for this rate, the other cannot be used because these choices are mutually exclusive. For example, if a meal allowance is defined for travel between 13:00 and 14:00 and the trip ends at 13:30, then <i>The itinerary must cover the whole period</i> means no allowance is provided; however <i>The itinerary must cover a part of the period</i> means the allowance is provided as long as the <i>Minutes to be covered at least</i> is met.
Time-Based Constraints Minutes to be covered at least Minutes to be covered at most	If the <i>The itinerary must cover a part of the period</i> constraint displays, then these fields display a number range of minutes to which that constraint applies.
Time-Based Constraints Season start (month and day) Season end (month and day)	If these fields are used for this rate, they display months and days to which this rate applies. This setting is used when rates are different depending on the season. For example, rates in Darwin, Australia are lower during the rainy season (December – March) than during the rest of the year.
Type Codes Lodging Type Note: Type Codes (trip, meal, and lodging) are highly configurable and will impact this section of the page.  For more information, refer to the <i>Editing a Configurable Bundle</i> procedure of this guide.	If this field is used for this rate, the value is <i>Overnight</i> .

5. Click **Back**.

Viewing Deductions

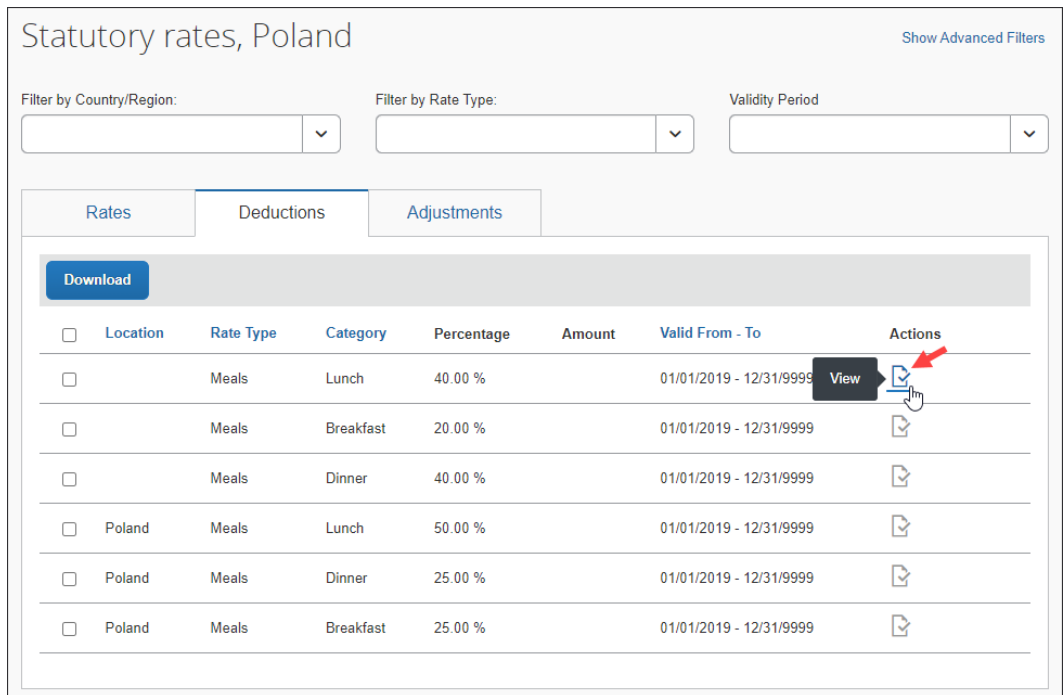

► **To view deductions in a rate bundle:**

1. On the **Rate Bundles** page, in the bundle's row, click **View contents** (☰).

The bundle's contents page displays with tabs for rates, deductions, and adjustments.

2. Click the **Deductions** tab.
3. In the desired row, click **View** (📄).

4. The **View Deduction** page displays.

The following table shows the read-only values that exist in the statutory Poland deductions, **and also the possible options** in the event that a configurable bundle is needed to supersede portions of the statutory bundle. An asterisk indicates a required field.

For more information about custom bundles, refer to the *Expense: Travel Allowance Generic Configurable Bundle Setup Guide*.

Field	Description
Required Fields Rate Type *	The value is <i>Incidentals, Lodging, or Meals</i> .
Required Fields Deduction Category *	This value is a further break-down of the Rate Type .
Required Fields Deduction Type Code *	This value is a further breakdown of the Deduction Category .
Required Fields Percentage *	<p>This value is a percentage amount.</p> <p>This is the amount by which the daily rate is reduced calculated as a percentage of the associated rate.</p> <p>For example, a breakfast deduction may be configured as 20% of the meal rate.</p> <p>NOTE: The Percentage field and Amount field are mutually exclusive.</p>
Required Fields Applicable for Full Rate	<p>This value is selected or cleared.</p> <p>This setting is used for a deduction percentage.</p> <p>Typically, the percentage deduction is calculated on the rate for a full day in which case this option is selected. In some instances, the percentage deduction is calculated for the actual rate of that day. This may be a reduced rate for the first or last day of a trip.</p> <p>For example, when Applicable for Full Rate is selected, a breakfast deduction is defined as 20% of the meal rate. If the meal rate for full days is 28 EUR and the meal rate for the first and last day is 14 EUR, and the user receives a free breakfast on the last day of travel, then the breakfast deduction is 20% of 28 EUR, which is 5.60 EUR.</p> <p>NOTE: A rate for a full day is an <i>All_days</i> rate defined for a duration of 1440 minutes, the equivalent of 24 hours.</p>
Rounding to Full Amount	<p>This value is selected or cleared.</p> <p>This setting is used for a deduction percentage.</p> <p>Selecting the check box means deduction amounts which are calculated from deduction percentages are rounded to the next full number.</p> <p>If the setting is cleared, deduction amounts which are calculated from deduction percentages retain the number of decimal places used for the currency.</p>

Field	Description
Required Fields Amount / Currency *	This value is a fixed amount and a currency to which the deduction amount will apply. When creating an expense report, the currency displayed here will be converted into the user's reimbursement currency as determined by the user's User Administration settings. NOTE: The Percentage field and Amount field are mutually exclusive.
Required Fields Benefit in Kind Amount / Currency	This value is an amount and a currency to which the deduction amount applies. This is a taxable benefit amount, which is created for a free meal when there is no meal allowance from which to deduct it. For example, if the user travels less than 8 hours and does not get a meal allowance, but gets a free meal, the system will then treat this amount as a taxable benefit. NOTE: This amount is not visible to the user and does not affect their reimbursement. It is displayed here in anticipation of further processing by a payroll system.
Required Fields Valid From * Valid To *	This value is a date range. The date range allows previous rates to remain applicable when processing trips in the past. NOTE: Regulatory rates are typically updated annually by calendar or financial year and so are valid only for limited date ranges.
Required Fields Applicable for (days) *	This value will be <i>First day, Last day, All days, or Intervening days</i> . Intervening days are the days between the first and last day of a trip. The <i>All days</i> value includes the first day, intervening days, and the last day, and applies to one-day trips.
Location Country/Region	If this field is used for this rate, the value is the country where these rates apply.
Location Subdivision	If this field is used for this rate, the value is the state or province where these rates apply.
Location Administrative Region	If this field is used for this rate, the value is the county where these rates apply.
Location Locality	If this field is used for this rate, the value is the city where these rates apply.
Time-Based Constraints From Day of Trip To Day of Trip	If these fields are used for this deduction, they display a number range of days during which the deduction applies. NOTE: This setting creates a per trip deduction constraint and does not apply across multiple itineraries or trips.

Field	Description
<p>Time-Based Constraints</p> <p>Minimum trip length in days</p> <p>Maximum trip length in days</p>	<p>If these fields are used for this deduction, they will display a number range of days from 1 to 999 to which this deduction applies.</p> <p>This setting may be used when single-day trips have different deductions than multi-day trips.</p> <p>For example, when both the minimum and maximum days display 1, then this deduction applies only to a single-day trip.</p>
<p>Time-Based Constraints</p> <p>Minimum duration in minutes</p> <p>Maximum duration in minutes</p>	<p>If these fields are used for this deduction, they will display a number range of minutes to which this deduction applies.</p>
<p>Time-Based Constraints</p> <p>Season start (month and day)</p> <p>Season end (month and day)</p>	<p>If these fields are used for this deduction, they display months and days to which this deduction applies.</p> <p>This setting is used when deduction are different depending on the season.</p>
<p>Type Codes</p> <p>Lodging Type</p> <p>Note: Type Codes (trip, meal, and lodging) are highly configurable and will impact this section of the page.</p>	<p>If this field is used for this deduction, the value is <i>Overnight</i>.</p>

Section 5: Poland-Specific Statutory Validations, Calculations Logic, and Adjustments

Using the Poland travel allowance bundle, the system calculates reimbursements based on the *duration* the user is away from the user's home location. Each 24-hour interval of time from the time of departure is considered a day. In the event of a border crossing, a new 24-hour interval begins.

Foreign and domestic trip segments are calculated separately. Further, the domestic segments at the beginning and ending of a trip are calculated separately. Typically the domestic parts of a foreign trip are usually less than 24 hours and so are calculated as if they were single day trips even though the total trip duration including foreign segments may be longer than 24 hours. Only when the domestic segment of the trip is longer than 24 hours do first day or last day rules apply. The system differentiates between segments using the border crossing times provided by the user in their itinerary. For example, a mixed trip from Warsaw (home) to Berlin to Barcelona and back to Warsaw would be considered four segments, each calculated separately.

The most common method of reimbursement in Poland uses *daily* allowances for meals and *actual* expenses for lodging.

Rates

The statutory rates for domestic Poland travel are the same throughout Poland, but vary for international travel depending on the country visited.

Currently, for foreign locations, the Polish rates are split into 75% for Meals and 25% for Incidentals.

The currency of the rate for the location may or may not match the expected currency for that country because domestic rates are published in Polish Zloty (PLN) and foreign rates are published in various currencies. The system will convert these

allowances to the user's reimbursement currency using either the OANDA rates or imported corporate conversion rates.

Calculations for Multiple Trips in a Day

While end users have the ability to expense multiple trips in a day, the system treats each trip independently and calculates allowances separately.

⚠ IMPORTANT: It is recommended that clients who have end users with travel patterns that may lead to unexpected reimbursement amounts, address this possible scenario through training, monitoring, or other means to ensure that government requirements for calculations are met.

Lodging Allowance

Lodging allowances are based on whether or not the user spent the night at accommodations other than the user's home. The lodging allowance is defined for each location and the user is either eligible for the whole allowance or no allowance for lodging – there are no partial lodging allowances.

The user may be reimbursed the actual amount of the lodging cost without tax implications, as long as a receipt is provided for the expense.

Domestic Overnight

For domestic travel, the statutory bundle provides *Overnight* supplements of 150% of the daily meal allowance to users who travel at least six hours between 9 PM and 7 AM **and** select the **Overnight** check box when creating their expense report.

This rate is available on the **Rates** tab.

The details of this setting can be viewed on the **View Adjustment** page.

EXAMPLE

Foreign Trips

Foreign single-day and multiple-day trips also use trip length logic to calculate partial day allowances.

The trip length logic is based on the configuration of an adjustment factor (percentage of the full daily allowance).

Duration	Expression	Percentage of Full Daily Allowance
Up to and including 8 hours	< or = 8 hours	33%
More than 8 hours and up to and including 12 hours	>8 – 12 hours	50%
More than 12 hours	>12 hours	100%

In the statutory bundle, the value of the setting, **Minimum duration in minutes**, displays on the **Adjustments** tab.

The details of this setting can be viewed on the **View Adjustment** page.

EXAMPLE

Provided Meals

Provided meals must be indicated by the user and are deducted from the allowed allowance. The amount of the allowance attributed to a specific meal is shown on the **Reimbursement Details** view of the **Adjustments** page.

DOMESTIC DEDUCTIONS

Breakfast	Lunch	Dinner
25% reduction	50% reduction	25% reduction

FOREIGN DEDUCTIONS

NOTE: Deductions do not apply to the 25% reserved for Incidentals.

Breakfast	Lunch	Dinner
15% reduction	30% reduction	30% reduction

DEDUCTING FROM THE APPROPRIATE 24-HR REIMBURSEMENT INTERVAL

When the user deducts a meal, sometimes the amount is deducted from the reimbursement from the previous day. This is because a calendar date view is used on the **Adjustments** page, however 24-hour intervals are used to calculate the different segments of a trip - together with deduction times (times of day that are assigned to Breakfast, Lunch and Dinner):

DEDUCTION TIMES

Breakfast	Lunch	Dinner
08:00	13:00 (1:00 o'clock PM)	19:00 (7:00 o'clock PM)

Example

A Trip from Poland to Germany, starting on Monday at 1900 and returning at 2200 on Wednesday:

1. First trip segment: Poland – 0.00 PLN (1 hour)
 - ◆ Day 1 – Mon 1900 – Domestic Trip Starts
 - ◆ Day 1 – Mon 2000 – Domestic Trip Ends (1 hour in Poland - user crosses border at 2000 from Poland to Germany)
2. Second trip segment – Germany – 49.00 EUR (24 hours)
 - ◆ Day 1 – Mon 2000 – Foreign Day 1 Starts
 - ◆ Day 2 – Tue 1959 – Foreign Day 1 Ends
3. Third trip segment – Germany – 49.00 EUR (18 hours)
 - ◆ Day 2 – Tue 2000 – Foreign Day 2 Starts
 - ◆ Day 3 – Wed 1400 – Foreign Day 2 Ends (18 hours in Germany – user crosses border at 1400 from Germany to Poland)
4. Fourth trip segment – Poland – 15.00 PLN (8 hours)
 - ◆ Day 3 – Wed 1400 – Domestic Trip Starts
 - ◆ Day 3 – Wed 2200 – Domestic Trip Ends (8 hours in Poland)

Section 5: Poland-Specific Statutory Validations, Calculations Logic, and Adjustments

The second trip segment is showing as the first line on the **Adjustments** page because the 24-hour period started on Monday at 8 PM and carried over into Tuesday. The Breakfast on Tuesday happened in Germany at 08:00, which belongs to the first 24-hour segment rate – which belongs to the 49.00 EUR rate showing on Monday:

Pro-Rated Incidentals (Foreign)

For foreign travel, a user is entitled to a 25% incidentals amount even if all meals are provided, though this may be further adjusted for partial days.

Meal deductions are based on the full daily allowance, while the system will always provide 25% pro-rated Incidentals for foreign trips. This is supported by using a dedicated Incidentals rate which is only applicable to foreign locations. Meals are configured as 75% of the foreign rate, while Incidentals are configured as 25% of the calculated rate (pro-rated). By configuring the Incidentals as its own dedicated rate type, this amount will not be affected by any meal deductions thus ensuring the user always receives a minimum 25% pro-rated allowance for all foreign days of travel.

To ensure the correct deductions - applicable for full rate, but only applied to 75% of the Meals rate - foreign deduction percentages (15%, 30%, 30%) are multiplied by 1.3333 (100/75):

MEALS DEDUCTIONS

Breakfast	Lunch	Dinner
20% reduction	40% reduction	40% reduction

NOTE: Because incidentals are required configuration (for foreign trips) but not used for domestic trips, the **Adjustments** page will display the Incidentals rate type – and in the case of domestic trips, the rate amount will be zero.

Section 6: Considerations for Creating Configurable Bundles

This section lists important considerations and options available to clients who choose to create custom configurable bundles to supersede portions of the Poland statutory bundle.

NOTE: When using a configurable bundle along with a statutory bundle, the configurable bundle only needs to contains the settings that will supersede the statutory bundle, **not all settings**.

Paying Higher or Lower Than Statutory Meals Allowances

It is common for larger customers to require supported rate deviations due to company policy or agreements with the state, such as:

- Reduced domestic rates for travel to company locations

If desired, the system can be configured to pay higher or lower than the statutory amounts for meals allowances based on time:

- Partial Day
- Full Day

- Both Partial and Full Days

Paying higher rates would mean that the difference (compared to the tax-free rate) is subject to income tax.

Using a Calendar Date vs 24-Hour "Day"

Some clients may want to define a "day" as a calendar date rather than a period of 24 hours.

Supporting Extended Trips

Some clients may want to add support for extended trip calculations.

Extended stay rules differ greatly based on labor agreements with the various unions.

As the statutory bundle for Poland will not be delivered with extended trips, any client who requires this functionality would need an additional client bundle.

This can be configured using an Adjustment.

Example

- With Meals allowance adjusted to 90% (0.900000) for trips over 30 days (from Day 31 onwards)
- With all locations (domestic and foreign - **Country/Region** is left blank).

NOTE: If the client requires different extended trip logic for domestic, select *Poland* as the **Country/Region**.

Paying Pro-Rated Provided Meals Deductions for Partial Days

Some clients may want to pro-rate the domestic and/or international meals deductions for a partial day of travel.

By default, Meal deductions in the statutory bundle are based on full daily allowances.

Pro-rated provided meals allows the deduction to be pro-rated based on the same percentage used for the partial-day allowance. If the partial-day allowance is 50% of the full-day allowance, then the provided meal deduction would also be reduced by 50%.

Section 6: Considerations for Creating Configurable Bundles

To pro-rate the domestic and/or international meals deduction for a partial day of travel, a generic configurable bundle is needed. The configuration would contain only Meal Deductions configured to exactly match the setup in the statutory bundle, with the exception that the **Applicable for Full Rate** setting is cleared.
