Your Solution is here

Mobile Applications (MOB) (APP)

Project Objective

We have built mobile apps for various purposes to be used in Uganda and Nigeria by Malaria Consortium, all associated partners, distributors and health works. Below are listed applications.

MTI Uganda

MTI Nigeria

The above mobile apps are used by used by health workers in Uganda and Nigeria for collecting data of the patients for assessing symptoms of malaria affected individuals and provide adequate and rapid actions accordingly. The application works seemlessly even in areas with no or low internet connectivity and later gets synced with server data as and when internet is detected by the application. The data appears in the dashboard for Malaria Consortium which will be used for various analytical purposes.

MTI Inventory

Above mobile app is integrated with ERP SCM application to be used by distributors of RDT medical kits for creating and receiving purchase orders.
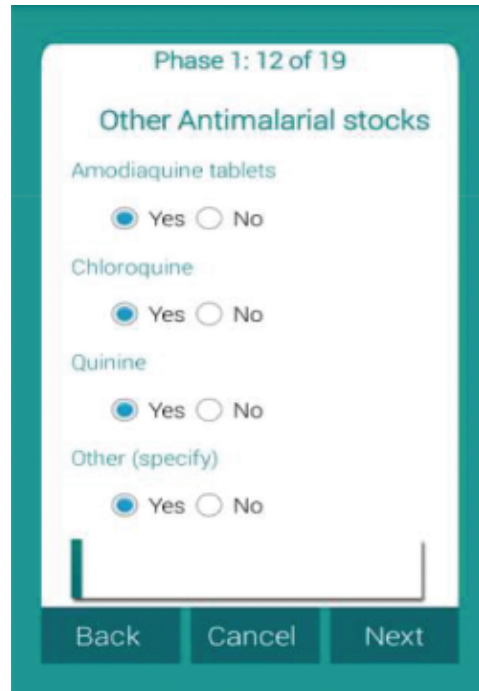

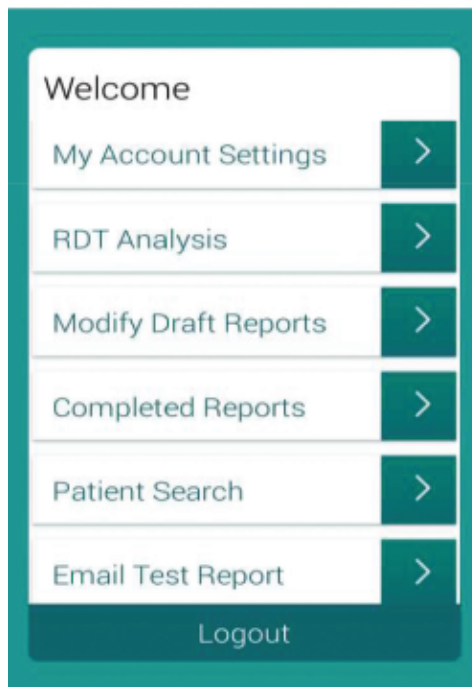

Supervisor/Feedback App

Client Name: **Malaria Consortium** mRDT
Project Technology Initiatives

Project Objective

Above mobile app is used by malaria consortium and associated partners for assessing the performance of health care

Picpasto

Client Name: ● **Picpasto**

Project Objective

Exuberant is working on developing a social-media based web portal for foodies to be hosted in the Kingdom of Saudi Arabia using web-based Java technology. The application will be a platform for professional and amateur chefs to showcase their profile, their services and hence boost their business. The application is targeting core foodies. They can have reference posted by any one professionally or nonprofessionally dealt with user at some point of life event. This project is currently in the pre-beta phase and not yet launched.

Referany

Client Name: ● **Referany**

◉Refer^{Any}

Project Objective

Exuberant is currently working on developing a social-media based job-application site for a client using web-based Java technology. The application will have users registered on free-mium and paid terms and they can post their academic as well as professional experiences. The application is targeting more of non techies & non pro-users. They can have reference posted by any one professionally or nonprofessionally dealt with user at some point of life event. For eg, the user's physical trainer from his school can make reference about his/her ener-getic approach in the training session. The user's neighborhood friend can make a reference about his leadership quality which he used to showcase during football game they used play together. This project is currently in beta phase.

SCM Implementation Projects

Client Name

Malaria Consortium mRDT Project Technology Initiatives (Budget 580K USD)

Malaria Consortium, an international organization working primarily in Africa and Asia on communicable disease control, is working closely with Ministries of Health (MoH) and is involved in all aspects of malaria and other communicable disease control from policy and strategy development to implementation, monitoring and evaluation and operational research. Malaria Consortium International's has offices in London, UK and the Africa Regional Office in Kampala, Uganda.

Malaria consortium identified several issues that cropped up including poor recording of data flow down the supply chain, poor reporting upstream as no stock cards were maintained, wide variations in demand as stock outs happened, poor recording and falsification of results etc. Most of these issues can be over - come by use of technology and hence the technology initiatives were being taken to address these issues in this project.

Malaria Consortium proposes to use technology for

Supply chain tracking

Monitoring correct interpretation of test results

Marketing communications and product promotion programs

Barcode Implementation Project

Project Objective

- Identify the business requirement & conduct a ground study for the bar code implementation towards effective management of blood bags in warehouse management

- Identify the different type of products derived out of blood, themselves (as a legal entity), locations, logistic units, expiry date, individual company assets, returnable assets (returnable pallets, etc.), and service relationships.

- Identify the bar code size, color, informations to be encoded & the placement of barcodes on the units.

- Managed an effective project delivery within the given timelines and equipped the team with effective process towards smooth operations within the organization.
