/******

FORMULA NAME: Absence Accrual Matrix Formula

FORMULA TYPE: Global Absence Accrual Matrix

DESCRIPTION: This sample formula will find the weighted average of the Accrual value based on the number of the days the employee was eligible in a particular band. For example, I an employee has changed from Band 1 to Band 2 on 03-Mar-2014 and accrual value for Band 1 and Band 2 is 100 and 200 respectively. The formula will return:

accrual =

$(100 * (\text{number of days employee in Band1}) + 200 * (\text{number of days Employee in Band 2})) / 365$
