

CREATE

CONVERT EXISTING MULTIMEDIA CONTENT INTO NEARPOD

Simply drag and drop existing ppts, pdfs, images, videos or Google Slideshows and Nearpod will automatically convert it to a Nearpod presentation (NPP).

CREATE NEW SLIDES

Easily create original slides using audio, text, and images. Images can be added from Google Images, your computer, or your cloud storage account (Google Drive, Dropbox, and Box).

VIDEOS

Include videos in every lesson to enrich daily content. You can embed videos from Youtube, or upload videos from your cloud storage account, Google Apps account, or from your computer/mobile device.

AUDIO FILES

Add songs, podcasts, sounds, or any audio file to your lessons and [bring content to life!](#) This has been a popular feature among early elementary and foreign language teachers. Creativity at its highest expression!

SLIDESHOW

Share a set of images, slides, or PDFs with your students for them to explore at their own pace.

PDF VIEWER

Upload any PDF file to Nearpod. This gives you the possibility to add papers, research, surveys, news articles and other files to your lesson.

LIVE TWITTER STREAM

Twitter is a social network that encourages great discussions and debates. Follow a specific person or a topic to get live information about important issues, or create your own class hashtag and follow the conversation in Nearpod.

ADD WEB CONTENT

Add any website to your presentation and let your students explore, all while staying within the Nearpod app.

Add Activities

OPEN ENDED QUESTION

Include a question in your Nearpod that allows students to freely share their thoughts and ideas. Student answers can be anonymously shared to the class by the teacher to analyze different perspectives or address misconceptions.

POLL

Ask your students a multiple choice question to increase class participation. Gauge student comprehension of the topic being studied and use these questions to create debates among your students.

QUIZ

Pose multiple choice questions related to the lesson and immediately get feedback from the entire class. Share answers with the class to enhance learning, immediately gather feedback from every student in the class.

DRAW IT

With the Draw It feature, students can draw or type onto a white canvas, draw, type, or highlight on a previously set background, and take, edit, and annotate multiple pictures on the same canvas. Students send their work to the teacher who can then choose to share them with the entire class.

FILL IN THE BLANKS

Students can complete texts in an interactive way by dragging and dropping words to the correct place in the text. You select the word bank after typing sentences.

Nearpodize This!

FOR IPAD/IPHONE USERS WITH IOS8 OR HIGHER

Choose pictures, files, and videos and turn them into a Nearpod in just one click! Nearpod will automatically turn the file into a presentation and launch a live

FOR CHROME USERS

Automatically turn Google Presentations into Nearpods in just one click.

Share and Edit

SHARE

Share your Nearpod presentations with colleagues, friends, or professional learning network via email, your blog/website, or social media. If you've received a shared presentation, you can change it to meet the needs of your classroom.

CLONE

Create a copy of a presentation in your library, then modify it for different classes or to meet the needs of individual students.

Google Apps Integration

GOOGLE SINGLE SIGN ON

One click sign on from your gmail or Google Apps for Education account. No need to remember additional usernames and passwords.

GOOGLE DRIVE ACCESS

Instant access to all files in your Google Drive while creating a presentation.

GOOGLE IMAGE SEARCH

Search Google's huge image database to add diagrams and pictures to your presentation.

GOOGLE DOCS COLLABORATION

Share a Google Doc URL via "Add Web Content" and have all students in your presentation collaborating on a single document.

GOOGLE FORMS

Search Google's huge image database to add diagrams and pictures to your presentation.

3rd Party Integrations

DROPBOX ACCESS

Instant access to all files in your Dropbox Account while creating a Nearpod presentation.

BOX ACCESS

Instant access to all files in your Box account while creating a Nearpod presentation.

MICROSOFT SINGLE SIGN ON

Single sign on with your v account. No need to remember an additional username and password. One click and you're in.

ENGAGE

LIVE SESSION / TEACHER-PACED

Live sessions allow for teachers and students to be in the same part of a lesson, all devices magically synchronized. Teachers can control the pace of the lesson, make sure that all students are on task, and get real-time answers for all activities.

HOMework / STUDENT-PACED

This feature allows students to join any Nearpod, any time, anywhere, and explore it at their own pace. Teachers will receive individual student answers in a Homework Report. This is great for homework, centers, or even individualized instruction during class.

PDF DOWNLOAD

Going offline? Nearpod allows you to download any NPP as a PDF and print it out as needed.

Presentation features

REAL TIME ASSESSMENT

Receive your students' answers instantly any of our interactive activities in real time to better inform your instruction.

STUDENT WORK SHARING

Anonymously share student work to every students' device during any teacher-paced NPP.

STUDENT LIST

Nearpod lets you see a list of all the students attending your session and indicates if any of them leave the Nearpod app. This helps teachers keep their classes focused and on task.

SHARE WEBSITES ON THE FLY

Nearpod's Share Web feature allows teachers to share any web link with students in real time, even if that URL wasn't initially included as a slide in the presentation.

(NEW!) EMBED A NEARPOD

Do you have a class website or blog? Easily embed your Nearpod presentations for visitors to access them at any time! This can work great for parents and even for students who couldn't attend the class. Embedded Nearpods are self-paced.

(NEW!) STUDENT NOTES

Students can now take notes on each slide during Live and Homework sessions! After the lesson, students can share notes with classmates or send the notes to themselves for further review.

TEACHER HEAD'S UP DISPLAY (HUD)

In live session/teacher-paced mode, navigate to any slide in your presentation without interrupting your lesson flow.

STUDENT HUD

When in self-paced/homework mode, students can navigate the presentation and jump to any slide in an instant by dragging the Student HUD (Head's Up Display). This allows them to move through a presentation more efficiently.

ASSESS

POST SESSION REPORTS

Every time your students answer an interactive assessment question in a Nearpod presentation, results are saved on a report that teachers can later access via the Content Tool or app. A PDF or CSV version of this Report can be sent to your email.

STUDENT REPORT

Get detailed info on each student's performance during the different activities shared during a lesson. As a teacher, you are able to check your class performance as a whole and view reports by student and get specific details on individual student progress.

SHARE REPORTS VIA EMAIL

After a Nearpod lesson, you can send the student report via email to explore it later and keep track of your students' performance.

HOMEWORK REPORT

Every time you assign a Nearpod Homework to your students, you can get a report of that lesson delivered to your inbox. Whether students are running it at school or at home, results will later appear on a Nearpod Report, similar to the ones that Nearpod generates for Live sessions. the ones that Nearpod generates for Live sessions.

Administrator Features

SCHOOL ADMINISTRATOR

Add, edit, or remove licenses, share presentations between teachers, and view usage and assessment reports from all users at your school.

MULTIPLE USER PROFILES

Assign different profiles to your users: District administrator, School Administrators or Teacher accounts.

SCHOOL / DISTRICT WIDE REPORTS

View usage and post-session reports by class, teacher or student to get in depth information about your school or district.

PRIVATE LIBRARY

Increase collaboration, buy or create curriculum exclusive to your school or district by setting up a private library in Nearpod.
