RACK MOUNT INTERCONNECT CENTER (RIC3)

The RIC3 provides the best overall value for exceptional fiber management. The RIC3 enclosure offers superior fiber density (up to 288 fibers in just 4 RMS) without sacrificing fiber protection and accessibility. Features include a fully removable tray, improved labeling, standard front and rear door locks, and single-finger door latches. With superior cable management, port identification, fiber accessibility and security, the RIC3 is the best way to protect mission critical fiber connections.

- 1 Quick-Release Hinges** — Spring loaded quick-release hinges enable easy removal of front and rear doors for complete access to fiber connections
- 2 Enhanced Labeling** — Label virtually any port configuration with our hinged labels. The labels hang on the front door for improved visibility. When the door is opened, labels flip down allowing ready viewing of the label and corresponding ports
- 3 Rotating Grommets** — Patented rotating grommets facilitate loading and retention of jumpers and fiber while minimizing microbending stress when using the sliding tray
- 4 Complete Access** — Management tray has a positive stop in both front and rear working positions providing complete access for moving, adding, changing, or cleaning of fiber connections
- 5 Maximum Capacity** — The RIC3 enables a maximum amount of fibers to be patched or patched and spliced in a 2, 3, and 4 RMS enclosure without compromising the accessibility. This allows more efficient utilization of rack space
- 6 Superior Design** — Top and bottom access holes located at the rear of the enclosure allow fibers to be routed between tandem enclosures without having to run fibers outside of the enclosure

Removable Tray

The RIC3 cable management tray is now completely removable from the front or rear of the enclosure, allowing the entire tray to be moved to a work table for more convenient loading of adapter plates, pigtails and splice trays.

Improved Door Latching and Locking

The RIC3 features a single-finger latch on both front and rear doors. Included door locks prevent unauthorized access for enhanced security.

Quick-Pack™ Adapter Plates

Never fumble with clumsy latches in a densely packed fiber enclosure again! Siemon Quick-Pack adapter plates can be inserted or removed with a single-finger for quick and easy access to fiber connections.

RACK MOUNT INTERCONNECT CENTER (RIC3)

FOCUS PATENTED 

Siemon RIC3 enclosures are designed for enhanced fiber management and ease of use. They are compatible with an array of Siemon fiber Quick-Pack™ adapter plates for your choice of fiber adapters and port density (see page 4.6).

ULTRASPLICE®

PATENTED

The patented ULTRAsplice is a high performance, cost effective, mechanical fiber optic splice that is reusable and easy to install for emergency or permanent installations. The splice features a patented glass capillary alignment tube, pre-loaded with index matching gel, to allow inspection of fiber location during installation. Additionally, the collet locking nuts allow users to tune and secure the fiber for optimum alignment and retention.

The glass capillary allows inspection of fiber misalignments. Using the Visual Fault Locator (P/N: FT-VFL), a light will amplify the fiber misalignment point and allow the user to fine tune the splice.

When fibers are properly aligned, no light will be visible. This feature allows the installer to obtain a low loss splice quickly and efficiently.

| Part # | Description |
|------------------|-------------------------------|
| US-126 | Singlemode, yellow |
| US-128 | Multimode, 125 micron, orange |

By utilizing a VFL during installation, fiber misalignment can easily be detected and corrected.
ULTRAsplice connectors accommodate fiber buffer sizes from 250-900 microns.

ULTRASLEEVE®

PATENTED

Dramatically reduce fiber splicing installation time and cost with Siemon's innovative ULTRAsleeve splice cover. Simply load the fused fiber and close the sleeve — no heat shrink, curing, crimping or gluing required. ULTRAsleeve features an acrylic foam tape, which seals the sleeve and protects the splice from damage. The ULTRAsleeve fusion splice protector can accept a range of fiber buffer sizes from 250-900 microns for a single fiber or up to a 4 strand mass or ribbon fiber (singlemode or multimode).

| Part # | Description |
|-----------------|---|
| FS-40 | 40mm (1.57 in.) fusion splice protection sleeve |
| FS-60 | 60mm (2.36 in.) fusion splice protection sleeve |

Technical Tip!

For cleave lengths greater than 12mm (0.47 in.), FS-60 sleeves are recommended.

MASSSLEEVE®

PATENTED

The MASSsleeve provides the same time-saving advantages as the ULTRAsleeve, but for mass or ribbon fiber. This protective fusion splice sleeve can accept 2-12 strand mass or ribbon fiber (singlemode or multimode).

The MASSsleeve fusion splice protector can accept 2-12 fused ribbon fiber.

MASSsleeve closing tool is required to insure proper installation. The tool's soft form holder and alignment pins assure accurate alignment.

| Part # | Description |
|-----------------|---|
| MFS | 40mm (1.57 in.), fusion splice protection cover for fused ribbon fiber |
| MFSCT | MASSsleeve closing tool length: 115mm (4.5 in.), width: 51mm (2.0 in.), height: 25mm (1.0 in.) |

Siemon offers a solution for streamlining fiber installation and termination — the fiber Plug and Play system. This system reduces the labor and logistics of standard fiber installations by providing a pre-terminated, pre-tested fiber optic connection system.

Other plug and play options available. Contact Siemon Customer Service for availability.

- 1 Quick Connections** — Are completed by plugging 6- or 12-fiber MPO connectors in Plug and Play modules which can be snapped into wall or rack mount enclosures
- 2 Factory Termination** — Significantly reduces labor costs during installation and ensures high performance and reliability of the installed system
- 3 Multiple Interfaces** — In both standard and laser optimized 50/125µm and 62.5/125µm fiber with LC, SC and ST connections
- 4 Turn-Key Solution** — No connectors, termination kits or consumables required

Pre-Terminated Fiber

All fiber connections are factory-terminated and tested, enabling faster installation to meet tight deadlines.

Plug and Play Modules

Modules feature integrated latches for snap-in installation and single-finger removal.

Wall or Rack Mount Solutions

Siemon's Plug and Play modules can be used with any Siemon fiber enclosure (RIC3, SWIC3, FCP3).

PLUG AND PLAY MODULES

The Plug and Play modules snap into any Siemon enclosure (RIC3, SWIC3, FCP3) to provide individual port access when transitioning from MPO connectors at the rear. The modules are factory-terminated and tested for 100% guaranteed performance with SC and ST interfaces. Installer-friendly snap-in design ensures fast and reliable installation.

PLUG AND PLAY REEL AND EXTENDER SYSTEM

The cable for the Plug and Play system is provided on cable reels with 6- or 12-fiber MPO connectors on each end. The cable is available in 50/125µm or 62.5/125µm riser and plenum grade fiber cable and can be ordered in any length. A cable pulling eye on one end protects the fiber during installation and facilitates fast installation. Cable extenders are also available to add onto existing Plug and Play reels and include an adapter to join the extender to the cable reel.
