FIFTY-NINTH ANNUAL REPORT

OF THE

DIRECTORS

OF THE

GENERAL HOSPITAL SOCIETY

OF

CONNECTICUT.

FOR THE YEAR 1885.

Presented at the Annual Meeting, January 28th, 1886.

NEW HAVEN:
TUTTLE, MOREHOUSE & TAYLOR, PRINTERS.
1886.

FORM OF BEQUEST.

Hem. I give and bequeath to the General Hospital Society of Connecticut, in the City of New Haven, the sum of ——dollars, to be paid by my executors, out of my real or personal estate, as soon as the settlement of my affairs will permit, to the treasurer of said institution for the time being, in trust, to be applied by the directors thereof to the humane purposes of said institution.

OFFICERS

OF THE

GENERAL HOSPITAL SOCIETY OF CONNECTICUT.

1886

JAMES E. ENGLISH, President. T. H. BISHOP, Secretary.
MORRIS F. TYLER, Vice-Pres. LEONARD S. HOTCHKISS, Treas.

State Commissioners.

His Excellency, HENRY B. HARRISON, GOVERNOR, ex-officio. Hon. WM. J. MILLS, Hon. JOHN P. STUDLEY.

Directors whose terms of office expire, respectively, in

1887.	1888.	1889.
FRANCIS BACON,	J. E. ENGLISH,	E. H. BISHOP,
S. E. BALDWIN,	D. L. DAGGETT,	LEVI IVES,
H. G. LEWIS,	E. E. SALISBURY,	S. E. MERWIN, Jr.,
C. A. LINDSLEY,	L. J. SANFORD,	FRANCIS WAYLAND,

REPORT OF THE DIRECTORS.

The board of directors has the honor to present herewith to the General Hospital Society of Connecticut its fifty-ninth annual report as prepared by the prudential committee:

The past year has been remarkable chiefly for an interruption of the continuous increase in the number of patients which we had occasion to notice from 1879 down to 1884. The average number of patients in the hospital for those years has been as follows:

1879	1880	1881	1882	1883	1884	1885
675	81%	89	1061	112	115.7	105.2

The average has thus fallen slightly below what it was in 1882. The total number of patients under treatment, however, has been very nearly as large as it was in 1884, it having been in that year 873, and 862 in 1885; and the average number of weeks occupied by each patient in the hospital has been less. The average time spent in the hospital by each patient for the past six years has been as follows:

1880	1881	1882	1883	1884	1885
8.2	7.1	7.8	7.2	6.8	6.3

These figures indicate a considerable and steady increase in the activity of the hospital. The severity of the service during the past year is shown still more strikingly in the number of surgical cases treated, which was 389 in 1884, and 418 in 1885, while the number of surgical operations was 98 in 1884, and 125 in 1885. The medical cases naturally showed a corresponding falling off, the number in 1884 having been 426, and 390 in 1885.

This very remarkable increase in the work of the hospital in spite of the falling off in the number of patients, we attribute largely to the opening of the Bridgeport Hospital as well as to the continued use of the Soldiers' Home at Noroton. We are constantly sending patients to both institutions, and as those that we send are usually chronic cases, or cases requiring little treatment, the natural result is a constant increase in the proportion of acute and severe cases in the hospital.

This fact is also one of the chief causes of the unfavorable financial outcome of the year. Our total current receipts for the year have been \$32,130.06; our current expenditures, exclusive of special improvements, were \$40,879.33, making a deficit of \$8,749.23. This remarkably unfavorable showing can be explained only by a careful study of the figures. It will be noticed that our current receipts are nearly four thousand dollars less than they were last year, while our current expenses were more than one thousand dollars greater. The falling off in receipts is, of course, due to the diminution in the number of patients. This fall and its distribution over the different classes shows itself in the following table:

Change in the number of weeks occupied by the different classes of patients during 1885 as compared with 1884.

Marine patients, -9.6% Self-paying patients, -18.1% State soldier patients, -26.4% Free bed patients, -7% Town patients, +4.5% Charity patients, -35.5%

It will be noticed here that the class of patients which pay the least, i. e., the town patients, has increased somewhat, while both the soldier patients and the self-paying patients have fallen off. The average earnings per patient, including the State appropriation of five thousand dollars, have consequently been somewhat less than they were in 1884, the earnings in that year having been \$5.77 and in 1885, \$5.75. This fall would have been greater were it not for the fact that we had an unusually profitable class of selfpaying patients, the earnings per week from these patients average ing \$6.75 in 1884 and \$7.08 in 1885. But while our earnings have fallen off, it has not been possible to diminish our expenses in the same ratio. The fall in the number of patients was sudden and unexpected, and we have no reason to believe that it will be permanent. We cannot therefore run the risk of crippling the service in order to make a temporary economy. This is particularly true with regard to the number of attendants and nurses required to perform the service. We must be prepared at all times for an emergency. The consequence is that we have had a much larger number of attendants and nurses in proportion to the number of patients than in the previous year, the number in 1884 having been 70.2 with an average of 115.7 patients, while in 1885 it was 76 with an average of 105.2 patients. Many of our items of expense have increased not only relatively but absolutely, and the average cost of maintaining patients, which was \$6.43 per week in 1884, has risen to \$7.32 in 1885.

The increase in the various items per patient shows itself in the following table:

	1881	1882	1883	1884	1885	
Food,	\$3.18	\$3.40	\$2.90	\$2.98	\$3.38	
Furniture, bedding and						
current repairs,	.27	.40	.29	.45	.56	
All other items except extra-						
ordinary improvements,	2.91	2.89	2.89	3.00	3.38	
Total,	\$6.37	\$6.70	\$6.08	\$6.43	\$7.32	

It should be remembered that the outlay for food does not represent the outlay per inmate but per patient. The average cost of food per inmate per day has increased from 27.6 cents in 1884 to 28% cents in 1885, or by about one cent.

To go into more detail, we find that, while there has been a fall in the consumption of liquors and beer, and in the outlay for surgical instruments, there has been a very decided increase in the outlay for medicines, surgical dressings, and salaries and wages. The principal increase in the number of attendants has been due to the increase in the number of nurses, the average number at the hospital during the past year having been 34½, while during the year 1884 it was 29+.

The loss of the hospital during the past year has, as usual, been attributable in the main to two classes of patients—the town patients and the soldier patients, both of whom are received at a rate considerably less than cost. Our gross loss upon the soldier patients during the past year has been \$1,789.06, while our loss on town patients, allowing for the appropriation of five thousand dollars, has been \$4,533.71. It would be difficult to obtain any change in the rates charged for town patients, but it does seem reasonable that the State should pay for its soldier patients a sum at least approximating the cost of maintaining them. The rate at present paid for such patients is \$5.50 a week. During the past year an application was made to the Soldiers' Hospital Board, which has control of such matters, asking them to increase the rate, and we were assured of the concurrence of the Hartford and Bridgeport hospitals in this request. Owing to an oversight, however, our application was not acted upon in time to obtain the necessary appropriation from the legislature, and consequently was laid over until the present session. We intend to renew our application this year in conjunction with the other two hospitals interested, and we have good reason to hope that it will be acted upon favorably and that one cause of loss to the hospital may thus be partially checked.

Among the improvements made upon the hospital grounds during the past year, two are especially prominent, the addition to the nurses' dormitory, which was erected by the Training School during the summer, and the superintendent's house, which is still in process of construction. Both were authorized by votes of the Society passed at special meetings. It is expected that the new superintendent's house will greatly facilitate the administration of the hospital, as it will enable us to use for such purposes the rooms at present occupied by him. At the same time, if it should ever be necessary to extend the hospital by building wings at the northern extremity corresponding to those at the south, there will be no difficulty in arranging for an approach to such an addition through the corridor, which, as long as the superintendent occupies his present quarters, is necessarily closed. The building of this new house, therefore, seems a necessary preliminary to any extension of the hospital.

Among the minor improvements may be mentioned the rebuilding of the back steps, and the enlargement of the refrigerator.

The new system of ventilation, which was described at length in our last annual report, and which was put into operation a year ago, has worked on the whole satisfactorily, and it is gratifying to be able to state that we have thus far this winter not had a single case of erysipelas in the hospital. This freedom from that disease which troubled us so much a year ago we attribute to the improved ventilation.

We have received during the past year several important gifts and legacies. The Misses Hotchkiss have generously contributed five thousand dollars to endow a free bed, and a legacy of one thousand dollars from the late Mrs. Mary Ann Miller was paid to us during the summer. The late W. O. Armstrong also made a legacy of five thousand dollars which has not yet been paid, but which probably will be during the year. Finally, on Hospital Sunday of this year a check for twenty-five hundred dollars was put into the contribution box of the Dwight Place Church for the purpose of founding a free bed for that church, and though the generous donor of this sum does not wish his name to be mentioned, we feel justified in saying that, were we at liberty to publish it, this proof of interest in the hospital would but add to your

appreciation of the kindness of one whose name is not unfamiliar in connection with such gifts.

In conclusion we wish to thank the two boards of visitors for their faithful and systematic attention to their duties, and for the valuable suggestions which we have received from them from time to time. The kind friends who contributed towards the Thanksgiving and Christmas dinners, and who gave the patients so much pleasure by means of the Christmas tree and entertainment, have our heartiest thanks. We are also indebted to the clergymen who have conducted services in the chapel, and to the many benefactors who have helped in various ways during the year.

We take pleasure in testifying to our continued confidence in the ability and fidelity of the superintendent and his staff, and to the efficiency of the officers and nurses of the Training School in their exacting and responsible duties.

Respectfully submitted by

HENRY W. FARNAM, W. H. CARMALT, THOMAS HOOKER.

Prudential Committee.

NEW HAVEN, January 28, 1886.

REPORT OF THE MEDICAL BOARD.

To the Board of Directors of the New Haven Hospital:

Gentlemen—I enclose the medical and surgical statistics of the hospital for the year 1885.

These the Medical Board presents as its report for the year. Respectfully,

> SAMUEL D. GILBERT, M.D., Secretary Medical Board.

REPORT OF THE SUPERINTENDENT.

NEW HAVEN, CONN., JAN. 20, 1886.

To the Prudential Committee of the General Hospital Society of Connecticut:

Gentlemen:—I herewith respectfully submit the fifty-ninth annual report of receipts and disbursements, number of patients

in hospital, and other items of information.

The number of patients remaining in the hospital, December 31st, 1884, was 124—87 males and 37 females; admitted during the year 1885, 738—522 males, 216 females; making a total of 862 under treatment—609 males, 253 females. Of this number 360 were discharged cured, 222 improved, 63 unimproved, 106 died, and 111 remained under treatment, December 31st, 1885. There were 11 births, 7 males, 4 females; also one still birth.

The whole number of weeks occupied was 5,4853, of which 3,9715 were occupied by charity patients, or those not paying

full rates.

The patients admitted came from 78 different towns and villages in this State and 16 other States or countries; 396 were residents of New Haven.

The greatest number of patients any one day was 121; the lowest 82; the daily average 105. The attendants and other inmates averaged 76, making a total of 181.

The current receipts, less amount refunded to patients, were \$32,130.06; the current expenses were \$40,879.33; excess of expenses over receipts, \$8,749.27.

The average cost of supporting each patient was \$7.323 per

week.

Respectfully submitted, LEONARD S. HOTCHKISS, Treasurer.

NEW HAVEN, January 1, 1886.

We have examined the within and foregoing account, and have compared the same with the account as entered upon the books of the Treasurer, and have compared the payments thereon made with the vouchers therefor, and find the same correct, and that on the first day of January, 1886, there was a balance of 2,606.18 dollars to the credit of the Treasurer in the New Haven County National Bank. We also find that the Treasurer has in his possession all the securities and property in the foregoing account specified as belonging to the Society.

We also find that on the first day of January, 1886, the Treasurer had to his credit in said bank the further sum of 401.94 dollars, being the balance of money belonging to the "Improvement

Fund."

1995

DANIEL TROWBRIDGE, Auditors.

REPORT OF THE BOARD OF VISITORS.

NEW HAVEN, Jan. 25, 1886.

To the Prudential Committee of the General Hospital Society of Connecticut:

Gentlemen: The Board of Visitors, according to custom, herewith presents its annual report.

Members of this board have visited and carefully inspected every part of the hospital, which had any connection with the care of the sick, during every month in the year, and have endeavored to become familiar with the management so far as it concerns at all the remedial treatment and comfort of patients. The board has not found in its visits anything calling for serious criticism. Minor suggestions made by members of the board have been promptly carried out. The patients also have almost uniformly expressed themselves as well satisfied with their treatment.

Certain sensational stories with regard to the hospital have from time to time appeared in some of our local papers during the year. The most serious charges were investigated by this board and found to be absolutely false.

The training school we believe provides more intelligent and kindly care of the sick than could be secured by the hospital in any other way.

We notice with satisfaction that hand-grenades, as an additional security against fire, have been provided, and that additional refrigerator room, which was urgently required, has also been supplied, as recommended by this board.

It is our opinion that it is desirable to secure additional store room for provisions, etc., and that the present accident room might be used for this object and a portion of the chapel might be used for an accident room.

Some doubt having arisen in the minds of certain members of this board as to the efficiency of the system of ventilation recently introduced into the hospital, we earnestly commend this to the careful inspection of the Prudential Committee if possible to ascertain whether or not it is worthy of continued use.

All which is respectfully submitted.

C. B. Bowers,
Max Adler,
E. W. Babcock,
Patrick Maher,
J. O. Peck,
E. H. Jenkins, Secretary.

REPORT OF THE BOARD OF LADY VISITORS.

To the Prudential Committee of the General Hospital Society of Connecticut:

Gentlemen: The Board of Lady Visitors have during the past year continued to hold their monthly meetings, and weekly visits have been made by members of the Board. While some among us have felt that a larger expenditure in the purchase of certain articles would in the end be the truest economy, we are on the whole satisfied that the management of the hospital deserves, and should have, the entire confidence of the public. From our frequent visits to the patients, and our personal observation during these visits, we feel convinced that the patients are well and kindly cared for, and that in these respects this hospital will compare most favorably with those in other cities.

Among other improvements we notice with pleasure that the refrigerator room has been increased—an improvement which was greatly needed.

We also wish to express here our sense of how greatly the hospital is indebted to the training school for most efficient nursing. The gratitude felt by many of the patients towards their nurses is the best proof of the loving spirit in which their work is done. Nor can we close this report without bearing our witness to the faithful and conscientious manner in which the superintendent discharges his many and arduous duties, and his courteous attention to the suggestions which we have from time to time made to him.

Very respectfully submitted,

Mary T. Everit, Chairman. Mary R. J. DuBois, Secretary.

ADMISSION OF PATIENTS.

- 1. Applications for the admission of patients should be accompanied by a certificate from some respectable physician, stating the nature and probable duration of the disease, and should be addressed to the Superintendent of the Hospital, New Haven, Conn. In accordance with the regulations of the hospital, the superintendent, as the representative of the prudential committee, arranges the terms of admission according to the circumstances of the case and the accommodation required.
- 2. The nursing is performed by the Connecticut Training School for Nurses.
- 3. The ordinary charge per week for accommodation in the wards is \$6.00, which includes medical and surgical attendance, together with medicine, nursing and washing.
- 4. Private rooms are furnished at \$12.00 or more per week, according to the requirements of the case.
- 5. Persons partly supported by the towns in which they reside and partly by the State appropriation, are admitted on an order from the town authorities. Town patients are received at \$4.00 per week, the remainder is paid out of the State appropriation.
- 6. Soldiers enrolled on the State quota in the late war, or in the quotas of other States if residents of Connecticut at the time of enlistment, and now residents, are admitted as State patients, to receive treatment for wounds or disability, under the Acts of the General Assembly of 1878, 1882 and 1884.
- 7. Sailors whose support is provided for from the marine hospital fund are admitted on the order of the collector of the port of New Haven.
- 8. Persons carried directly to the hospital from the place of an accident are admitted immediately.
 - 9. A written history of the case should be sent with the patient.
- 10. Insane persons and those suffering from contagious diseases are not admitted.

NEW HAVEN, CONN.,

18

In consideration of the admission of of into the Institution of the "General Hospital Society of Connecticut," at New Haven, I engage to provide, or pay for, a sufficiency of clothing for use, and pay to the treasurer of said institution dollars per week for board, medicine and medical attendance; and to cause said patient to be removed when discharged, without expense to said institution, and, in the event of death, to pay the expense of burial.

Principal.

For value received, I hereby engage to become responsible for the fulfillment of the above stipulation.

Surety

APPENDIX.

CONNECTICUT TRAINING SCHOOL FOR NURSES.

The Training School for nurses has been established for twelve years. At first the number of pupils was limited to six : within two years it was increased to eleven, then to fourteen, and these not being sufficient to meet the many demands for special and continuous attention which critical cases required, the prudential committee raised the number to seventeen in 1880, to nineteen in 1882, and to twenty-three in 1883. In 1884 the number was made to depend upon the number of patients in the Hospital, and averaged during the past year with the head nurse and assistant thirty-four and one quarter. The pupils remain in the hospital for one year and pursue their studies and daily routine of work under the superintendence of the head nurse. Each nurse is assigned to one ward or department for several weeks, and in the course of a year has studied surgical, medical, and obstetrical nursing, and also the preparation of special dishes suitable for invalids and convalescents. Symptom records are kept which enable the physician to ascertain the varied phases of the disease, since he last saw the patient.

At the close of the year of study the nurse has a vacation of one month, and then returns to take for six months such cases of private practice as shall be assigned to her. Her home is in the hospital, when her services are not called for elsewhere, and the school pays for all the nurses there in excess of the number allowed.

The hospital authorities appreciate most highly the advantages of having this school established here. Those who enter it either have a special gift for nursing or, with a true spirit of self-sacrifice, have devoted themselves to the noble work of ministering to others; consequently the duties of that department are performed more faithfully and more skillfully than in former years, when it was thought that strength was the only requisite in a nurse.

Those wishing to receive this course of instruction must apply to the secretary of the school, when, if approved by the executive committee, they will be accepted as pupils in the hospital. The candidates must be over twenty-three and under forty years of age, and must present a certificate from a clergyman and physician as to their good moral character and sound health. They will be received for one month on probation and without compensation.

Information concerning the school will be furnished by the president, vice-president, or other members of the executive committee.

Pupils are received from any State.

Applications for admission should be made as early as possible to the Secretary, Mrs. Chas. B. Richards, 43 Elm street, New Haven.

Physicians or others in any part of the State desiring to secure the services of trained nurses for men or women, medical or surgical patients, should apply by telegraph or letter, stating the nature of the case, to the Superintendent of Nursing, New Haven Hospital.

The price per week for services of a trained nurse is \$12.00, unless two members of the family are ill at the same time, when there will be a slight additional charge. It cannot be too stongly impressed upon the public that it is more economical and safer for the patient to employ a reliable nurse, than to indulge in a natural but misplaced sentiment, which sacrifices the strength of an entire family in the care of one invalid member.

Connecticut Training School for Nurses.
