

FILTRATION IN THE PHARMACEUTICAL INDUSTRY

Theodore H. Meltzer

Capitola Consulting Co.

Arlington, Virginia

and

Senior Consultant

Brunswick Technetics

(Filterite Corp.)

Timonium, Maryland

with contributions by

Eric W. Blakie, F. Raymond Gabler, Harwood Green, Hyman B. Katz,
Julius Z. Knapp, Alvin Lieberman, David S. Linton, Rosalie M. Mandaro

Contents

<i>Series Introduction</i>	v
<i>Foreword</i>	vii
<i>Preface</i>	ix
<i>Contributors</i>	xix
Part I FILTERS	1
1 Depth Filters, Particles, and Filter Ratings	3
1.1 Filtration	3
1.2 Depth-Type Filters	8
1.3 Filter-Medium Migration	31
1.4 Differential Pressure Effects on the Filtration Process	37
1.5 Depth Filter/Membrane Comparisons	38
1.6 Prefilter Action	39
1.7 Nominal and Absolute Ratings	40
1.8 Particles	41
1.9 Filter Permeability	50
1.10 Filter Capacity	52
1.11 Particle Deformability	58
References	58
2 Membrane Porosity: Its Origins and Modifications	61
2.1 Overview of Membrane Porosity	61
2.2 Track-Etch Membranes	62
2.3 Porous Polytetrafluoroethylene	66
2.4 Genesis of Porosity in Solution-Cast Films	70
2.5 Phase-Inversion Membranes	76
2.6 Pore Collapse	79
2.7 Clearing of Membrane	80
2.8 Orientation Effects	80

2.9	Influences on Tensile and Elongation Properties	83
2.10	Membrane Variability in Manufacture	85
	References	85
3	Filter Porosity Characteristics	87
3.1	Numerical Pore Dimensions	87
3.2	Pore-Size Distribution	100
3.3	Pore Shapes	122
3.4	Implication of the Largest Pore	127
3.5	Implications of Breadth of Pore-Size Distributions	128
3.6	Anisotropic Pore Structures	133
3.7	Effect of Pore Length on Flow and Retention	138
	References	139
4	Filter/Fluid Interactions	143
4.1	Scope of Considered Interactions	143
4.2	Extractables	143
4.3	Structural Compatibilities	159
4.4	Adsorptive Removal of Preparational Components by Filters	174
	References	178
5	Charge-Modified Depth Filters: Cationic-Charge-Modified Nylon Membranes	183
	<i>Rosalie M. Mandaro</i>	
5.1	Overview	183
5.2	Depth Filter Materials	183
5.3	Typical and Atypical Properties of Depth Filters	184
5.4	Asbestos—The First CMD Filter	184
5.5	Development of Nonasbestos Depth Filters	186
5.6	Use of CMD Filters in Blood Fractionation	187
5.7	Measurement of Surface Charge Density on CMD Filters	187
5.8	CMD Filter Use in Pharmaceutical Processing	194
5.9	Conclusions: Charge-Modified Depth Filters	196
5.10	Cationic Charge-Modified Nylon Membranes	197
5.11	Conclusions: Cation Charge-Modified Nylon Membranes	205
	References	206
6	Quality Assurance of Filters for Fluid Clarification	209
	<i>Hyman B. Katz</i>	
6.1	Introduction	209
6.2	Product Development	209
6.3	Manufacturing	211
6.4	Contamination Control	213
6.5	Cleanliness Levels	214
6.6	Performance Testing	216
6.7	Technical Support	218
	References	218

7	The Integrity Tests	219
7.1	Introduction	219
7.2	Bubble Point and Organism Retention	220
7.3	Causes of Bubble-Point Deviations	227
7.4	Bubble-Point Protocol	248
7.5	Measurement at Robust Air Flows	251
7.6	Bubble-Point Testing at Fixed Air Pressure Levels	253
7.7	Polymer Contribution to Bubble-Point Values	255
7.8	Significance of the Williams Structure	260
7.9	The Knee Region of the Curve	263
7.10	Diffusive Air Flow as Integrity Indicator	266
7.11	Effects of Membrane Anisotropy	274
7.12	Single-Point Integrity Test Measurement	275
7.13	Sensitivity of Diffusive Air Flows	278
7.14	Pressure-Hold Test	279
7.15	Sensitivity of Integrity Tests	281
7.16	Water Intrusion Test	282
7.17	Initial Integrity Test	284
7.18	Automated Integrity Testing Devices	286
7.19	Flow Ratio Test	290
7.20	Conclusions	292
	References	293
Part II	FILTRATION	299
8	Filtrative Particle Removal from Liquids	299
8.1	Particle Trapping Mechanisms	299
8.2	Adsorptive Sequestration	301
8.3	The Modeling of Filter Blocking	324
8.4	Practical Implications of Adsorptive Sequestration	330
8.5	Reliability of Adsorptive Sequestrations	332
8.6	Summary of Trapping Forces and Their Loci	336
8.7	The Sterilizing Filter	337
8.8	Retention of Latex Spheres	350
	References	363
9	Filtrative Particle Removal from Gases	369
9.1	Introduction	369
9.2	Fermentation Air Filters	369
9.3	Vent Filters	373
9.4	Service Air Filtration	374
9.5	Mechanisms Operative in Gas Filtrations	374
9.6	Hydrophobicity	387
9.7	Steam Sterilizability	387
9.8	Integrity Testing	389
9.9	Multiple Steamings	390
9.10	Criteria for Air Filters	391
9.11	Sizing of Vent Filters	391
9.12	Validation of Air Filters	391
9.13	Summary of Gas Filtration	400

9.14	Steam	401
	References	406
10	Flow and Pressure, Filter Sizing, and Filter System Design	409
	<i>Harwood Green and Theodore H. Meltzer</i>	
10.1	Influences on Flow	409
10.2	Pressure Considerations	410
10.3	Constant-Pressure Filtrations	413
10.4	Consumption of Filter Capacity	416
10.5	Constant-Flow Filtrations	420
10.6	Manufacturers' Catalog Information	420
10.7	The Utilization of Flow Decay Measurements	421
10.8	Sizing Prefilter/Final Filter Combinations	434
10.9	Design Considerations	450
	References	452
11	Principles of Tangential Flow Filtration: Applications to Biological Processing	453
	<i>F. Raymond Gabler</i>	
11.1	Introduction	453
11.2	Filter Types Used in Tangential Flow	454
11.3	Microporous Membranes and Secondary Layer Formation	456
11.4	Definition of Terms	457
11.5	Theory of Tangential Flow Filtration	459
11.6	Practical Aspects of Tangential Flow Filtration	460
11.7	Concentration Polarization	466
11.8	Determining Optimum Operating Parameters Via Total Recycle	468
11.9	Membrane Fouling	473
11.10	Particulate Loading	475
11.11	Tangential Flow Applications	476
11.12	Tangential Flow Equipment	486
11.13	Summary	488
	References	488
Part III	PARTICLES	491
12	Viable/Nonviable Particle and Pyrogen Retention	493
12.1	Parenteral Requirements	493
12.2	Sterilization by Filtration	494
12.3	Sterilizing Filter Evaluation	509
12.4	Other-Than Sterilizing Grade Filters	514
12.5	Sterility Testing	518
12.6	Determination of Bioburden	524
12.7	Depyrogenation	525
12.8	Particulate Material	527
12.9	Filter Validation	531
12.10	Grow-Through	537
	References	541

13	Detection and Measurement of Particles in Bulk Pharmaceutical Liquids	545
	<i>Alvin Lieberman</i>	
13.1	Definition of Scope	545
13.2	Sample Handling Problems	546
13.3	Particle Measurement Methods for Pharmaceutical Liquids	557
13.4	Electronic Operation	575
13.5	Liquid Feeders and Flow Controls	577
13.6	Operating Parameters for Optical Particle Counters	579
13.7	Liquid Flow Rate Effects	581
13.8	Calibration Bases	581
13.9	Dilution Effects	581
13.10	Measurement Procedures	582
13.11	Calculation of Results	583
13.12	Conclusions	584
	References	584
14	Detection and Measurement of Particles in Sealed Containers	587
	<i>Julius Z. Knapp</i>	
14.1	Introduction	587
14.2	Analytical and Visual Pharmaceutical Particulate Standards	589
14.3	Visible Particulate Sources	590
14.4	Vial Stoppers: A Major Particulate Source	590
14.5	Physiological Effect of Particulates in Parenteral Products	595
14.6	The Probabilistic Inspection	600
14.7	A Probabilistic Evaluation of the Visual Inspection for Particulates	602
14.8	Effect of Container Clarity on Visual Particulate Inspection	604
14.9	Rejection Rate Analysis by Histogram Showing Distribution of Visual Particulate Rejects	605
14.10	Visual Inspection Reject Rate Unmasked as a Mortality Table Effect	605
14.11	Relationships of Rejection Probability and Rejects in a Normal Parenteral Production Batch	607
14.12	Effect of Second or Cull Inspection of Final Reject Distribution in a Normal Parenteral Production Batch	607
14.13	Transformation of Rule-of-Thumb Quality Categories into Probabilistically Defined Regions	607
14.14	Inspection Security Evaluated with the Rejection Zone Efficiency (RZE) Parameter	612
14.15	Accept/Reject Discrimination Evaluated with the Reject Rate in the Accept and Gray Zone (RAG) Parameter	615

14.16	The Science of Visual Inspection	615
14.17	Effect on the 50% Detectability Response of a Target When Contrast and Background Luminance Are Varied in Time-Limited Trials	617
14.18	Review of Biophysics Vision Experiments Supporting and Extending Particulate Inspection Experiments Results	618
14.19	IES Lighting Recommendations for Various Visual Tasks	622
14.20	Inspector Selection and Validation	623
14.21	Bootstrap Inspector Selection under Actual Inspection Conditions Using RZE and RAG	629
14.22	Durability of RZE and RAG Determinations for a Validated Inspector Group	632
14.23	Durability of Individual and Group RZE and RAG Parameters	633
14.24	The Core Validation Problem for Visual and Optical Inspection	634
14.25	Comparison of Different Probabilistic Inspection Techniques	634
14.26	Two-Dimensional Rejection Probability Distribution	638
14.27	Application of the Manual Inspection Performance Yardstick	640
14.28	Objective Standards	644
14.29	Hologrammic Evaluation of Automated and Visual Inspection Performance	647
14.30	Visibility Region Boundaries for Actual Particulates in Parenteral Products	656
14.31	Accuracy Limitations Imposed by Sampling Inspection Procedures	657
14.32	Uhler's Model of Particulate Inspection	658
14.33	A Practical Cost-Effective Inspection Validation Procedure	661
14.34	Inspection Systems: Practical Considerations	699
14.35	Objective Physical Criteria Validations	704
14.36	Commercial Systems	705
	References	705
15	Pump Types and Their Selection	709
	<i>David S. Linton</i>	
15.1	Introduction	709
15.2	Definition of Terms	709
15.3	Pump Parameters	713
15.4	Materials of Composition	714
15.5	Sterilization of Pumps	715
15.6	Types of Pumps	717
15.7	Summary	725
	Reference	726
16	Filter and Filter Holder/Housing Design	727
16.1	General Filter Holder/Housing Design	727
16.2	Disk versus Cartridge Configuration	770

16.3	Filter Cartridges	772
16.4	Sterilization of Filter and Holder	780
16.5	Disposable Filter Devices	784
	References	787
Part V	PRACTICAL FILTRATION APPLICATIONS	789
17	Water Purification	791
17.1	Grades of Water	791
17.2	Various Water Purification Treatments	795
17.3	Overview of Water Purification	809
17.4	Deionization by Ion-Exchange Reactions	811
17.5	Reverse Osmosis	838
17.6	Ultrafiltration Membranes	854
17.7	Ultraviolet Irradiation of Water	855
17.8	Electrodialysis	858
17.9	Distillation of Water	860
17.10	Use of Filters in Water Purification	882
17.11	Water Storage and Distribution	885
17.12	Water for Injection Installations	897
	References	913
18	Pyrogens, and the Depyrogenation of Solutions with Ultrafiltration Membranes <i>F. Raymond Gabler</i>	919
18.1	Biochemistry of Bacterial Pyrogens	919
18.2	Classical Methods of Removing Pyrogens	922
18.3	Removing Pyrogens with Ultrafiltration Membrane Filters	923
18.4	Scaling Up a UF System from Laboratory to Production	936
18.5	Summary	938
	References	938
