

Filtros de alto rendimiento

Filtros de alto rendimiento

¿Por qué elegir un filtro de aire GREEN?

- Un filtro GREEN aumenta la potencia entre entre un 3 y un 10% y el par motor entre un 5 y 10%.
- Mantiene el motor limpio incrementando su vida útil.
- Disminuye el consumo en un 3%
- Disminuye la contaminación.
- Su diseño de pliegues permite incrementar el volumen de aire que penetra en los cilindros del motor en un 40%.

Alto Rendimiento

Los filtros de algodón Green son pre-tratados con un aceite especialmente diseñado para atrapar la suciedad. Este aceite crea un polo de atracción en el filtro que atrae la carga negativa de las partículas de suciedad, alargando la vida del filtro.

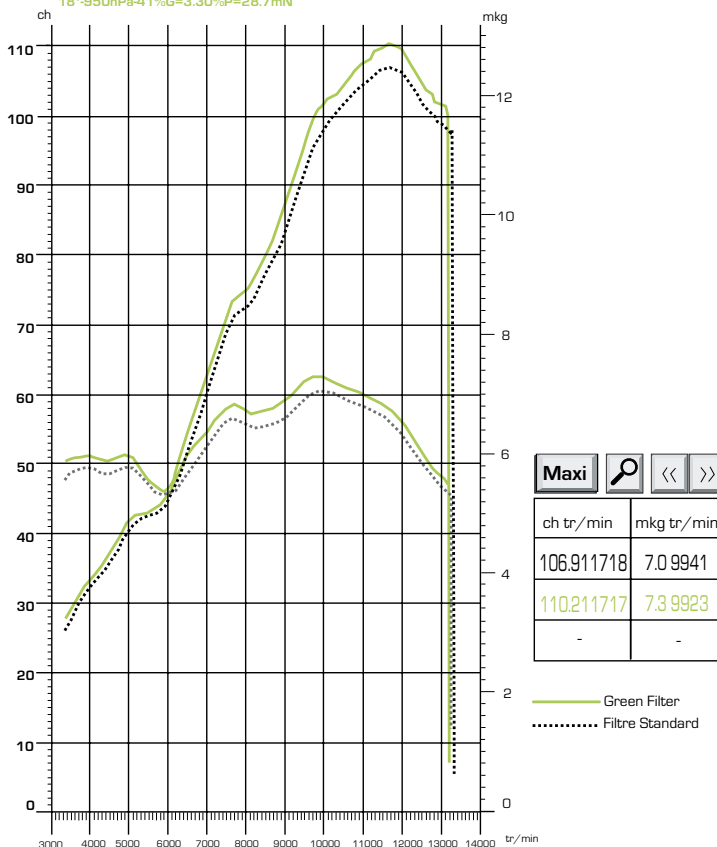

*Los filtros de esponja y de papel tienden a absorber la suciedad en lugar de atraparla por lo que, cuando se humedecen, la capacidad de filtración queda limitada.

FZ 600 FAZER

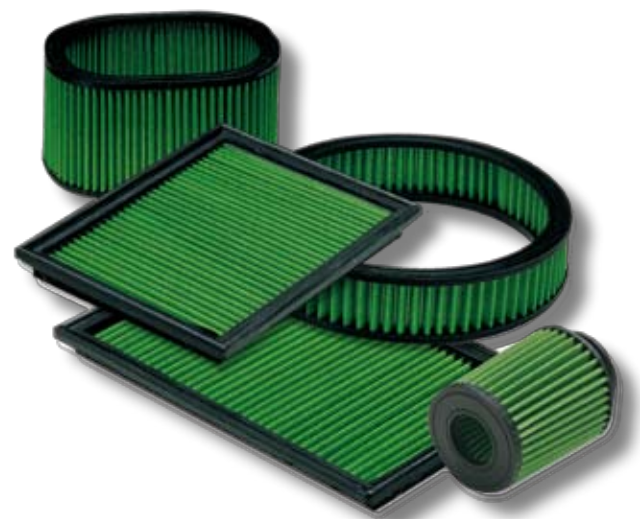

FUCHS

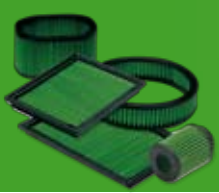

V.2.11

18°-950hPa-41%G=3.48%P=22.6mN
18°-950hPa-41%G=3.30%P=28.7mN

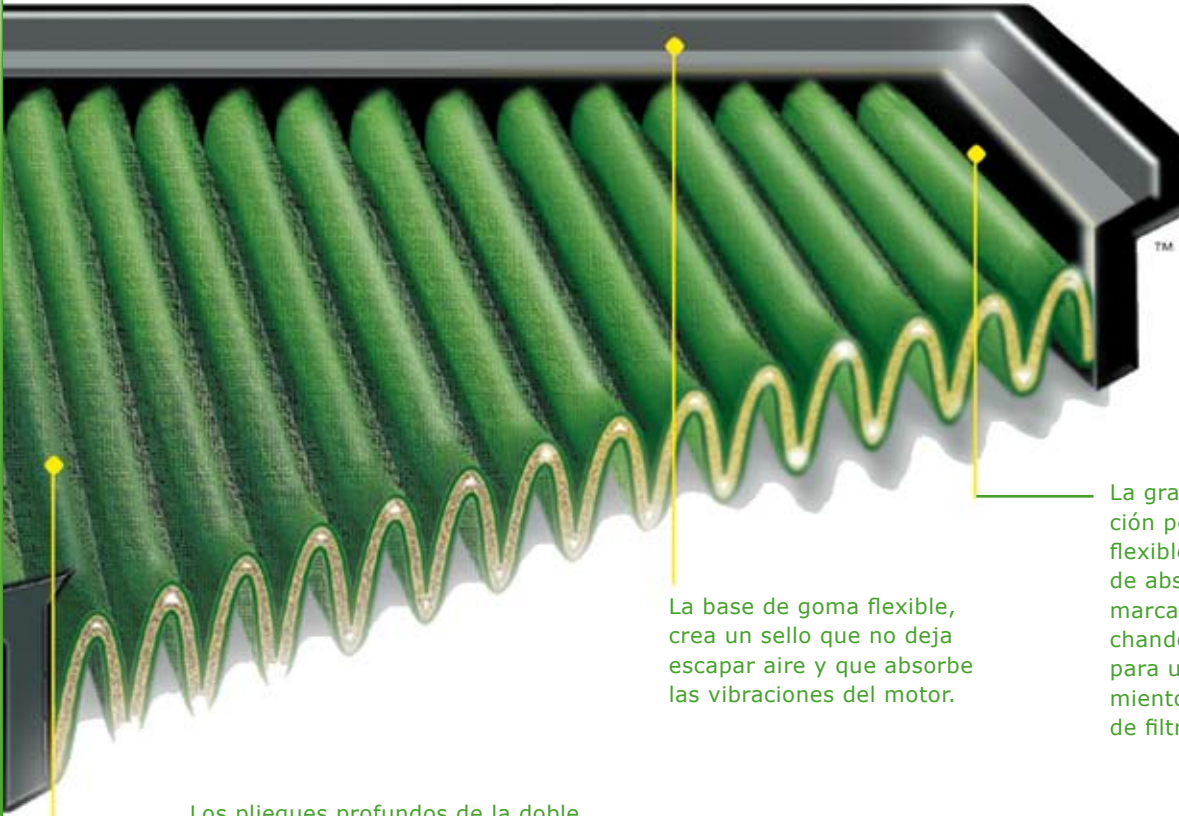

Attention : les valeurs de puissance standard sont parfois celles des versions libres, pour utilisation circuit.

Filtros de alto rendimiento

Los pliegues profundos de la doble capa de algodón aumentan en un 10-20% la superficie de filtrado. Ésto permite incrementar el volumen de aire que penetra en los cilindros

La base de goma flexible, crea un sello que no deja escapar aire y que absorbe las vibraciones del motor.

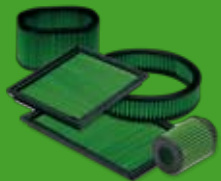

La gran calidad de construcción permite que la goma flexible no invada la zona de absorción, como en otras marcas de filtros, aprovechando toda la superficie para un perfecto funcionamiento sin perder superficie de filtración

Cómo limpiar los filtros GREEN?

- 1) Los filtros de aire Green se pueden limpiar a los 8000 kilómetros o dos veces por año, excepto en caso de utilización en condiciones extremas como en los quads o motocross. Cada filtro puede ser lavado de 15 a 20 veces.
- 2) Seguir las instrucciones suministradas dentro de los kits de limpieza
