

E-MAP PROGRAM OVERVIEW

Engineering Math Advancement Program NSF STEM-STEP Awardees

Third Year Review

BY Dr. Karen Boykin University of Alabama College of Engineering kboykin@eng.ua.edu

E-MAP Introduction

- Program Overview
- Program Outcomes
- Evaluation
- Sustainability

Program Goal

- Provide basic environment leading to the retention of students in the college of engineering overcoming:
 - MATH SKILLS -- No ramp-up program for entering students for calculus
 - WHAT ENGINEERING IS ABOUT -- Increase enthusiasm for engineering, math & science classes
 - KNOW YOUR CAMPUS -- Informal intro to learning setting with formal college-structured classes

Program Objectives

- Improve math skills
 - Target students identified with need for additional instruction BEFORE calculus
- Increase motivation
 - Comfortable learning environment, remove intimidation, build self-esteem
- Improve learning experience
 - Multiple learning models: imitation, trial & error, association, insight, and transfer

Target Students

 60% of incoming COE students scoring 190 to 439 on Math Placement Exam (Math 112 to Math 115)

M	a the part of the second	K. Mary	A CARLER	P. K.	A.F. Ka	A BANK

Marrie VI	< 10% of Engine Entering	eering Students College	60% of Enginee Entering	•	30% of Engineering Students Entering College			

Key Components

- "E-Math"
 - Formal lecture, problem solving, and teaming exercises
 - Intro new material, 1-on-1 tutoring, peer review
- "Living Laboratory"
 - Interdisciplinary
 - Demonstrates E-Math/generates problems for E-Math
- Field Events, Chamber Project, Tutoring
- Evening Calculus Lab (New)
- Study Skills (New)
- Minority Mentoring (New)

Program Oversight

Advisory Units:

- External
 - Ed Moscovitch
 - K-14 teachers
- Internal
 - Program
 Administrators
 - Multicultural Engineering Program
 - Living Lab Instructors

Program Advisory Board

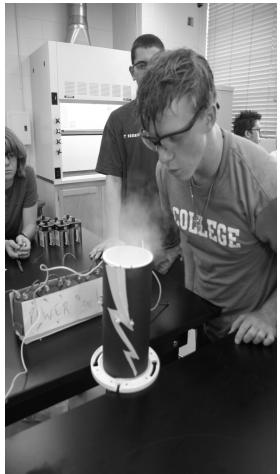

- Program Administrators Serve as Advisory Board
 - Dr. Kevin Whitaker Associate Dean COE
 - Dr. Z.J. Wu Head Mathematics
 - Dr. Pauline Johnson Living-Learning Lab
 - Ms. Sandy Wood Freshman Engineering
 - Dr. Karen Boykin Coordinator
 - Dr. Larry Bowen CTL Director
 - Mr. Sam Evers Lead Math Instructor
 - Steven Hsia and Celina Micu Graduate Students
 - Tunde Ajilore Undergraduate Student

Living Lab Instructors

- Dr. Chris Brazel CHE
- Dr. Pauline Johnson ENV
- Dr. Marcus Brown CS
- Dr. Jim Richardson CE
- Dr. Chuck Karr AE
- Dr. Clark Midkiff ME
- Dr. Harold Stern EE
- Dr. Greg Thompson MTE
- Dr. Dan Fonseca IE

Program Outcomes

- Successes
 Experienced
- Surprises and
 Unexpected Benefits
- Student Impact
- Significant Changes and Deviations
- Implementation
 Challenges

Successes Experienced

- Success 1: On-line homework and tutorials
- Success 2: Students enjoyment of math classes
- Success 3: Early training on the need for interdisciplinary team building for engineering projects
- Success 4: Long-term student bonding
- Success 5: Website, internal blog, and conference presentations
- Success 6: Creation of an integrated program

Surprises and Unexpected Benefits

- Surprises
 - General lack of math study skills
 - Level of maturation
 - Adapting to being "on their own" for the first time
 - Number of extra-collegiate participants
 - Difficulty in obtaining students
- Benefits
 - Development of study skills component for program
 - Students began to grow personally
 - adjust to college earlier
 - social impact of college does not have large impact on 1st semester
 - Knowledge flowed from professional sector back into COE
 - Student surveys of non-E-MAP participants

Significant Changes & Deviations

- Program Model Changed to Add Components
- Deep Embedment of Math Skills into Living Labs
 - Original concept was demonstrations
- Adjustments to tutorial program
 - Formerly in afternoon and voluntary
 - Now mandatory for poor-performance in class
 - Now both in afternoon and evening
- Attendance policy
 - Three missed classes result in program expulsion
- Scheduled "down-time"
- Standardized Living-Laboratories around a central project
- Field trips standardized around lab experiments and central project
 - Industry trips represent engineering disciplines
 - Provided instruction related to project components.

Significant Changes Cont.

 Living Lab and Societal Benefit Project

Challenges Faced

- Time and Resource Allotment for Experiment Development
 - Tracking student grades to address deficiencies
- Addressing individual student math needs
 - Class scope broadened
 - Graduate student tutoring to fill gaps
- Interweaving math class materials with laboratories and events
 - Requested math problems be presented by field-trip hosts
 - Field trips and labs organized around the math class syllabus
- Logistics planning

Challenges Faced Cont.

- University looking at dropping placement testing
- Placement test is an integral part of evaluation process
- Making up for math deficiencies
- Sometimes need more than 5 weeks
- Adding more components to E-MAP
 - New components include a calculus evening lab
 - Study skills section
 - Minority engineering meetings
 - Introduction to physics
- Must not overwhelm the students
- Must keep the primary focus on the basic algebra and trigonometry core of the class

E-MAP Evaluation

Engineering Math Advancement Program NSF STEM-STEP Awardees

Third Year Review

BYDr. Larry BowenMr. Sam EversUniversity of AlabamaUniversity of AlabamaCenter for Teaching and LearningMathematics DepartmentIbowen@ctl.ua.edusevers@gp.as.ua.edu

Program Evaluation

We are compiling:

- <u>Tracking</u> student participants who enroll in the program
- Student participant interviews at end of program
- Exit interview for students leaving COE or U of A who where in the program
- Student retention vs. overall retention data

Student Basics

Year

Measures and Metrics

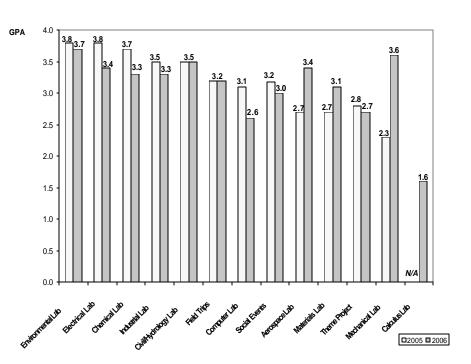

- Measures and Metrics for Progress
- Information on high schools/standings
- UA Math Placement Scores
- ACT/SAT Scores
- LASSI (Learning & Study Strategies Inv) Results
- Math and Science Attitude Inventory Results

Measures and Metrics, Cont.

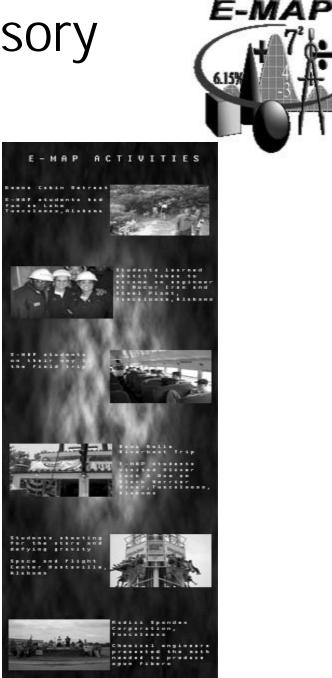

- Grades in Summer Program
- Subsequent Grades in UA Courses
- Retention information
- Student Evaluations
 & Feedback
- Advisory Board & Evaluator feedback

Relationship with Advisory Board

- Grant Activities and the Internal Advisory Board and External Evaluators
- Planning
- Evaluation
- Suggestions for improvements
- Active involvement by many members logistically and in the implementation of summer program activities.

Advisory Board Meetings

- How often does the Advisory Board meet to discuss this grant?
- Minimum of Quarterly Meetings for full board
 First Year Meetings Developed Subcommittees
- Frequently via e-mail discussions
- Average about 6 or 8 meetings (perhaps more) per academic year in working subcommittees of the full Advisory Board
 - Pre-Program Ramp-Up Meetings
 - Post-Program Summary and Brainstorming Meetings

Advisory Board Input/Feedback

- Advisory Board (and Evaluators) Input and Feedback:
- The primary input has been related to making year to year program improvements. Major changes due at least in part to feedback were:
- (1) Changing beginning and ending dates of summer program
- (2) Adjusting the content of the summer mathematics course
- (3) Making Engineering lab experiences and site visits more 'hands-on' and integrated

Advisory Board Input/Feedback, Cont.

- (1) Adding sessions designed to ease the transition into calculus
- (2) Making concerted effort to collect student feedback on all aspects of the program
- (3) Adding a Study Skills and an Intro to Physics component
- (4) Integrating even more tightly the mathematics content with the Engineering labs.

Grant Improvements

Grant Improvements

- During the summer program--more personal and intrusive interventions with students who are not performing at the desired level
- Finding time and resources to develop more interactive experiments to include in the math component of the program
- More follow-up and support for students especially during the first year following their participation in the summer program.

Lessons Learned

- Lessons Learned from Project Implementation/Advise to PIs
- Importance of early recruitment along with early and detailed planning
- Importance of factoring in individual information gleaned from transcripts, study strategies inventory, and math and science attitudes inventory
- Importance of getting complete feedback from all (or most) participating students
- Importance of making lab activities 'hands-on' and closely correlating math lessons to these activities
- Importance of making the math class as interactive and interesting as possible
- Importance of getting excellent people on board, especially those with direct interaction with program students
- Importance of providing follow-up services for students as they continue their matriculation

E-MAP Sustainability

Engineering Math Advancement Program NSF STEM-STEP Awardees

Third Year Review

BY Dr. Kevin Whitaker University of Alabama College of Engineering kwhitaker@eng.ua.edu

Vision for Sustainability

- U of A Parsing of Students by Ability
 - Make more homogeneous classes
 - Creates powerful coalitions
 - Levels for Entry into Engineering
 - Calculus ready
 - One-semester from calculus
 - Otherwise "Pre-engineering"
- E-MAP will be bridge program to divert students from "Pre-engineering"

Activity Integration

- Have the project activities been integrated within your (department, school, college and/or university)? If so, what is the nature of the integration?
- Instituting "Early Alert Program"
 - Parental notification of poor-performance
 - E-MAP implementing
- Common Projects
 - Integration of math, chemistry, physics, engineering, etc., etc.

Actions Toward Sustainability

- What actions have you taken to address sustainability of this project beyond the grant period?
- Broaden idea into other sciences
 E-MAP for chemistry, physics, etc.
- Building living-learning communities in new residence halls

Project Original Targets

Original Goals

- Improve math skills
- Increase motivation
- Improve learning experience
- Status
 - Math skills show to have been improved
 - Students are motivated
 - Learning experience has improved

E-MAP

Impact Beyond Goals

- Early Study Skills Learning
- Development of On-Line Coursework
- College of Engineering
 - Stimulated Service Learning Projects
 - Pre-Engineering Classification
- Institutional
 - Living Learning Environments
 - Integrated and Homogenous Courses
