The first lesson taught in Esoteric philosophy is, that the incognizable Cause does not put forth evolution, whether consciously or unconsciously, but only exhibits periodically different aspects of itself to the perception of finite Minds. Now the collective Mind -- the Universal -- composed of various and numberless Hosts of Creative Powers, however infinite in manifested Time, is still finite when contrasted with the unborn and undecaying Space in its supreme essential aspect. That which is finite cannot be perfect. Therefore there are inferior Beings among those Hosts, but there never were any devils or "disobedient Angels," for the simple reason that they are all governed by Law. The Asuras who incarnated (call them by any other name), followed in this a law as implacable as any other. They had manifested prior to the Pitris, and as time (in Space) proceeds in Cycles, their turn had come -- hence the numerous allegories (Vide "Demon est Deus inversus," Part II., Vol. I.). The name of Asura was first given by the Brahmans indiscriminately to those who opposed their mummeries and sacrifices, as the great Asura called "Asurendra" did. It is to those ages, probably, that the origin of the idea of the demon, as opposer and adversary, has to be traced.

The Hebrew Elohim, called in the translations "God," and who create "light," are identical with the Aryan Asuras. They are also

[[Vol. 2, Page]] 488 THE SECRET DOCTRINE.

referred to as the "Sons of Darkness" as a philosophical and logical contrast to light immutable and eternal. The earliest Zoroastrians did not believe in Evil or Darkness being co-eternal with Good or Light, and they give the same interpretation. Ahriman is the manifested shadow of AHURA-MAZDA (Asura-mazda), himself issued from Zeruana Akerne "boundless (circle of) Time" or the Unknown Cause. "Its glory," they say of the latter, "is too exalted, its light too resplendent for either human intellect or mortal eye to grasp and see." Its primal emanation is eternal light, which, from having been previously concealed in DARKNESS was called to manifest itself and thus was formed Ormazd, the "King of Life." He is the "first-born" in BOUNDLESS TIME, but, like his own antitype (pre-existing Spiritual idea), has lived within darkness from all eternity. The six Amshaspends (seven with himself, chief of all), the primitive Spiritual Angels and Men are collectively his Logos. The Zoroastrian Amshaspends create the world in six days or periods also, and rest on the Seventh; whereas that Seventh is the first period or "day," in esoteric philosophy, (Primary creation in the Aryan cosmogony). It is that intermediate AEon which is the Prologue to creation, and which stands on the borderland between the uncreated eternal Causation and the produced finite effects; a state of nascent activity and energy as the first aspect of the eternal immutable Quiescence. In Genesis, on which no metaphysical energy has been spent, but only an extraordinary acuteness and ingenuity to veil the esoteric Truth, "Creation" begins at the third stage of manifestation. "God" or the Elohim are the "Seven Regents" of Pyramider. They are identical with all the other Creators.

But even in Genesis that period is hinted at by the abruptness of the picture, and the "darkness" that was on the face of the deep. The Alahim are shown to "create" -- that is to say, to build or to produce the two or "double heaven" (not Heaven and Earth); which means, in so many words, that they separated the upper manifested (angelic) heaven, or plane of consciousness, from the lower or terrestrial plane; the (to us) eternal and immutable AEons from those periods that are in space, time and duration; Heaven from Earth, the unknown from the KNOWN -- to the profane. Such is the meaning of the sentence in Pyramider, which says that: "THOUGHT, the divine, which is LIGHT and LIFE (Zeruana Akerne) produced through its WORD, or first aspect," the other, operating THOUGHT, which being the god of Spirit and Fire, constructed seven Regents enclosing within their circle the world of Senses, named "fatal destiny." The latter refers to Karma; the "seven circles" are the seven planets and planes, as also the seven invisible Spirits, in the angelic spheres, whose visible symbols are the seven planets,* the

[[Footnote(s)]] -----

* Another proof, if any were needed, that the ancient Initiates knew of more than seven planets is to be found in the Vishnu Purana, Book II., ch. xii., where, describing [[Footnote continued on next page]]

[[Vol. 2, Page]] 489 THE ONE PASSIVE DEITY.

seven Rishis of the great Bear and other glyphs. As said of the Adityas by Roth: "they are neither sun, nor moon, nor stars, nor dawn, but the eternal sustainers of this luminous life which exists as it were behind all these phenomena."

It is they -- the "Seven Hosts" -- who, having "considered in their Father (divine Thought) the plan of the operator," as says Pyramider, desired to operate (or build the world with its creatures) likewise; for, having been born "within the sphere of operation" -- the manifesting Universe -- such is the Manvantaric LAW. And now comes the second portion of the passage, or rather of two passages merged into one to conceal the full meaning. Those who were born within the sphere of operation were "the brothers who loved him well." The latter -- the "him" -- were the primordial angels: the Asuras, the Ahriman, the Elohim -- or "Sons of God," of whom Satan was one -- all those spiritual beings who were called the "Angels of Darkness," because that darkness is absolute light, a fact now neglected if not entirely forgotten in theology. Nevertheless, the spirituality of those much abused "Sons of Light" which is Darkness, must be evidently as great in comparison with that of the Angels next in order, as the ethereality of the latter would be, when contrasted with the density of the human body. The former are the "First-born"; therefore so near to the confines of pure quiescent Spirit as to be merely the "PRIVATIONS" -- in the Aristotelian sense -- the ferouers or the ideal types of those who followed. They could not create material, corporeal things; and, therefore, were said in process of time to have refused to create, as commanded by "God" -- otherwise, TO HAVE REBELLED.

Perchance, this is justified on that principle of the Scientific theory which teaches us about light and sound and the effect of two waves of equal length meeting. "If the two sounds be of the same intensity, their coincidence produces a sound four times the intensity of either, while their interference produces absolute silence."

Explaining some of the "heresies" of his day, Justin Martyr shows the identity of all the world religions at their starting points. The first beginning opens invariably with the unknown and PASSIVE deity, from which emanates a certain active power or virtue, the Mystery that is sometimes called WISDOM, sometimes the SON, very often God, Angel, Lord, and LOGOS.* The latter is sometimes applied to the very first emanation, but in several systems it proceeds from the first androgyne or double ray produced at the beginning by the unseen. Philo depicts this wisdom as male and female. But though its first manifestation

[[Footnote(s)]] -----

[[Footnote continued from previous page]] the chariots attached to Dhruva (the pole star), Parasara speaks of "the chariots of the NINE planets," which are attached by aerial cords.

* Justin: "Cum. Trypho," p. 284.

[[Vol. 2, Page]] 490 THE SECRET DOCTRINE.

had a beginning, for it proceeded from Oulom* (Aion, time), the highest of the AEons when emitted from the Father, it had remained with him before all creations, for it is part of him.** Therefore, Philo Judaeus calls Adam Kadmon "mind" (the Ennoia of Bythos in the Gnostic system). "The mind, let it be named Adam.***

As the old Magian books explain it, the whole event becomes clear. A thing can only exist through its opposite -- Hegel teaches us, and only a little philosophy and spirituality are needed to comprehend the origin of the later dogma, which is so truly satanic and infernal in its cold and cruel wickedness. The Magians accounted for the origin of evil in their exoteric teachings in this way. "Light can produce nothing but light, and can never be the origin of evil"; how then was the evil produced, since there was nothing co-equal or like the Light in its production? Light, say they, produced several Beings, all of them spiritual, luminous, and powerful. But a GREAT ONE (the "Great Asura," Ahriman, Lucifer, etc., etc.) had an evil thought, contrary to the Light. He doubted, and by that doubt he became dark.

This is a little nearer to the truth, but still wide of the mark. There was no "EVIL thought" that originated the opposing Power, but simply THOUGHT per se; something which, being cogitative, and containing design and purpose, is therefore finite, and must thus find itself naturally in opposition to pure quiescence, the as natural state of absolute Spirituality and Perfection. It was simply the law of Evolution that asserted itself; the progress of mental unfolding, differentiated from spirit, involved and entangled already with matter, into which it is irresistibly drawn. Ideas, in their very nature and essence, as conceptions bearing relation to objects, whether true or imaginary, are opposed to absolute THOUGHT, that unknowable ALL of whose mysterious operations Mr. Spencer predicates that nothing can be said, but that "it has no kinship of nature with Evolution" (Principles of Psychology,**** 474) -- which it certainly has not.

The Zohar gives it very suggestively. When the "Holy One" (the Logos) desired to create man, he called the highest host of Angels and said to them what he wanted, but they doubted the wisdom of this desire and answered: "Man will not continue one night in his glory" -- for

[[Footnote(s)]] -----

* A division indicative of time.

** Sanchoniathon calls time the oldest AEon, Protogonos, the "first-born."

*** Philo Judaeus: "Cain and his Birth," p. xvii.

**** It is suggestive of that spirit of paradoxical negation so conspicuous in our day, that while the evolution hypothesis has won its rights of citizenship in science as taught by Darwin and Haeckel, yet both the eternity of the Universe and the pre-existence of a universal consciousness, are rejected by the modern psychologists. "Should the Idealist be right, the doctrine of evolution is a dream," says Mr. Herbert Spencer. (See foot note, pp. 1 and 2, Book II.)

[[Vol. 2, Page]] 491 THE ZOHAR ON THE FALLEN ONES.

which they were burnt (annihilated?), by the "Holy" Lord. Then he called another, lower Host, and said the same. And they contradicted the "Holy One": "What is the good of Man?" they argued. Still Elohim created man, and when man sinned there came the hosts of Uzza and Azael, and twitted God: "Here is the Son of Man that thou hast made," they said. "Behold, he sinned!" Then the Holy One replied: "If you had been among them (men) you would have been worse than they." And he threw them from their exalted position in Heaven even down on the Earth; and "they were changed (into men) and sinned after the women of the earth"; (Zohar, 9, b.). This is quite plain. No mention is made in Genesis of these "Sons of God" (chap. vi.) having been punished for it. The only reference to it in the Bible is in Jude (6). "And the angels which kept not their first estate but left their habitation, he hath reserved in everlasting chains under darkness unto the judgment of the great day." And this means simply that the "Angels," doomed to incarnation, are in the chains of flesh and matter, under the darkness of ignorance, till the "Great Day," which will come as always after the seventh round, after the expiration of the "Week," on the SEVENTH SABBATH, or in the post-Manvantaric Nirvana.

How truly esoteric and consonant with the Secret Doctrine is "PYMANDER the Thought Divine" of Hermes, may be inferred from its original and primitive translations in Latin and Greek only. On the other hand how disfigured it has been later on by Christians in Europe, is seen from the remarks and unconscious confessions made by de St. Marc, in his Preface and letter to the Bishop of Ayre, in 1578. Therein, the whole cycle of transformations from a Pantheistic and

Egyptian into a mystic Roman Catholic treatise is given, and we see how PYMANDER has become what it is now. Still, even in St. Marc's translation, traces are found of the real PYMANDER -- the "Universal Thought" or "MIND." This is the verbatim translation from the old French translation, the original being given in the foot-note* in its quaint old French:--

"Seven men (principles) were generated in Man." "The nature of the harmony of the Seven of the Father and of the Spirit. Nature

[[Footnote(s)]] -----

* "SECTION 16 (chap. i., Mercure Trismegiste -- PIMANDRE "Oh, ma pensee, que s'ensuit il? car je desire grandement ce propos. Pimandre dict, ceci est un mystere cele, jusques a ce jour d'hui. Car nature, soit mestant avec l'home, a produit le miracle tres merueilleux, aiant celluy qui ie t'ay dict, la nature de l'harmonie des sept du pere, et de l'esprit. Nature ne s'arresta pas la, mais incontinent a produict sept homes, selon les natures des sept gouverneurs en puissance des deux sexes et esleuez. . . . La generation de ces sept s'est donnee en ceste maniere"

And a gap is made in the translation, which can be filled partially by resorting to the Latin text of Apuleius. The commentator, the Bishop, says: "Nature produced in him (man) seven men" (seven principles).

[[Vol. 2, Page]] 492 THE SECRET DOCTRINE.

produced seven men in accordance with the seven natures of the Seven Spirits" "having in them, potentially, the two sexes."

Metaphysically, the Father and the Son are the "Universal Mind" and the "periodical Universe"; the "Angel" and the "Man." It is the SON and the FATHER at one and the same time; in Pymander, the active IDEA and the passive THOUGHT that generates it; the radical key-note in Nature which gives birth to the seven notes -- the septenary scale of the creative Forces, and to the seven prismatic aspects of colour, all born from the one white ray, or LIGHT -- itself generated in DARKNESS.

C.

THE MANY MEANINGS OF THE "WAR IN HEAVEN."

The Secret Doctrine points out, as a self-evident fact, that Mankind, collectively and individually, is, with all manifested nature, the vehicle (a) of the breath of One Universal Principle, in its primal differentiation; and (b) of the countless "breaths" proceeding from that One BREATH in its secondary and further differentiations, as Nature with its many mankind proceeds downwards toward the planes that are ever increasing in materiality. The primary Breath informs the higher Hierarchies; the secondary -- the lower, on the constantly descending planes.

Now there are many passages in the Bible which prove on their face, exoterically, that this belief was at one time Universal; and the most convincing are the two chapters Ezekiel xxviii. and Isaiah xiv. Christian theologians are welcome to interpret both as referring to the great War before Creation, the Epos of Satan's rebellion, etc., if they so choose, but the absurdity of the idea is too apparent. Ezekiel addresses his lamentations and reproofs to the King of Tyre; Isaiah -- to King Ahaz, who indulged in the worship of idols, as did the rest of the nation, with the exception of a few Initiates (the Prophets, so called), who tried to arrest it on its way to exotericism, or idolatry, which is the same thing. Let the student judge.

In Ezekiel xxviii. it is said, "Son of Man, say unto the prince of Tyrus, thus saith the Lord God (as we understand it, the "god" KARMA): Because thine heart is lifted up, and thou hast said I am a God and yet thou art a man behold I shall bring strangers upon thee and they shall draw their swords against the beauty of thy wisdom and they shall bring thee down to the pit" or Earth-life.

The origin of the "prince of Tyrus" is to be traced to, and sought in

[[Vol. 2, Page]] 493 THE REAL MEANING OF THE CHERUB.

the "divine Dynasties" of the iniquitous Atlanteans, the Great Sorcerers (See last Comments, on Stanza XII., verses 47-49). There is no metaphor in the words of Ezekiel, but actual history, this time. For the voice in the prophet, the voice of the "Lord," his own Spirit, which spake unto him, says:-- "Because thou hast said, 'I am a God, I sit in the seat of God(s) -- (divine Dynasties), in the midst of the seas,' yet thou art a man. . . . Behold thou art wiser than Daniel; there is no secret that they can hide from thee: with thy wisdom . . . thou hast increased thy riches, and thine heart is lifted up because of thy riches. Behold therefore . . . strangers shall draw their swords against the beauty of thy wisdom . . . they shall bring thee down . . . and thou shalt die the deaths of them that are slain in the midst of the seas." (Verses 3-8.) All such imprecations are not prophecy, but simply reminders of the fate of the Atlanteans, the "Giants on Earth."

What can be the meaning of this last sentence if it is not a narrative of the fate of the Atlanteans? Verse 17 saying, "thine heart was lifted up because of thy beauty," may refer to the "Heavenly Man" in Pymander, or to the Fallen Angels, who are accused of having fallen through pride on account of the great beauty and wisdom which became their lot. There is no metaphor here, except in the preconceived ideas of our theologians, perhaps. These verses relate to the Past and belong more to the Knowledge acquired at the mysteries of Initiation than to retrospective clairvoyance! Says the voice, again:--

"Thou hast been in Eden, the garden of God (in the Satya Yuga) every precious stone was thy covering . . . the workmanship of thy tabrets and thy pipes was prepared in thee in the day thou was created. . . Thou art the anointed

cherub . . . thou hast walked up and down in the midst of the stones of fire . . . thou wast perfect in thy ways from the day that thou wast created, till iniquity was found in thee. Therefore I will cast thee out of the mountain of God and destroy thee. . . ."

The "Mountain of God" means the "Mountain of the Gods" or Meru, whose representative in the Fourth Race was Mount Atlas, the last form of one of the divine Titans, so high in those days that the ancients believed that the heavens rested on its top. Did not Atlas assist the giants in their war against the gods? (Hyginus). Another version shows the fable as arising from the fondness of Atlas, son of Iapetus and Clymene, for astronomy, and from his dwelling for that reason on the highest mountain peaks. The truth is that Atlas, "the mountain of the gods," and also the hero of that name, are the esoteric symbols of the Fourth Race, and his seven daughters, the Atlantides, are the symbols of its Seven Sub-races. Mount Atlas, according to all the legends, was three times as high as it is now; having sunk at two different times. It is of a volcanic origin, and therefore the voice

[[Vol. 2, Page]] 494 THE SECRET DOCTRINE.

within Ezekiel says: "I will bring forth a fire from the midst of thee, it shall devour thee," etc. (v. 18). Surely it does not mean, as seems to be the case from the translated texts, that this fire was to be brought from the midst of the Prince of Tyrus, or his people, but from Mount Atlas, symbolising the proud race, learned in magic and high in arts and civilization, whose last remnant was destroyed almost at the foot of the range of those once gigantic mountains.

Truly, "thou shalt be a terror, and never shalt thou be any more"; as the very name of the race and its fate is now annihilated from man's memory. Bear in mind, that almost every ancient King and priest was an initiate; that from toward the close of the Fourth Race there had been a feud between the Initiates of the Right and those of the Left Path; finally, that the garden of Eden is referred to by other personages than the Jews of the Adamic race, since even Pharaoh is compared to the fairest tree of Eden by this same Ezekiel, who shows "all the trees of Eden, the choicest and best of Lebanon, . . . comforted in the nether parts of the earth . . .," for "they also went down into hell with him" (Pharaoh)* unto the nether parts, which are in fact the bottom of the ocean, whose floor gaped wide to devour the lands of the Atlanteans and themselves. If one bears all this in mind and compares the various accounts, then one will find out that the whole of chapters xxviii. and xxxi. of Ezekiel relate neither to Babylon, Assyria, nor yet Egypt, since none of these have been so destroyed, but simply fell into ruins on the surface, not beneath the earth -- but indeed to Atlantis and most of its nations. And he will see that the "garden of Eden" of the Initiates was no myth, but a locality now submerged. Light will dawn upon him, and he will appreciate such sentences as these at their true esoteric value: "Thou hast been in Eden; . . . thou wast upon the holy mountain of God" -- for every nation had and many still have holy mountains: some, Himalayan Peaks, others, Parnassus, and Sinai. They were all places of initiation and the abodes of the chiefs of the communities of ancient and even modern adepts. And again: "Behold, the Assyrian (why not Atlantean, Initiate?) was a cedar in Lebanon; . . . his height was exalted above all the trees; . . . the cedars in the garden of God could not hide him, . . . so that all the trees of Eden . . . envied him" (Ezekiel xxxi. 3-9).

Throughout all Asia Minor, the Initiates were called the "trees of Righteousness," and the cedars of Lebanon, as also were some kings of Israel. So were the great adepts in India, but only the adepts of the

[[Footnote(s)]] -----

* The only Pharaoh whom the Bible shows going down into the Red Sea was the king who pursued the Israelites, and who remained unnamed, for very good reasons, perhaps. The story was surely made up from the Atlantean legend.

[[Vol. 2, Page]] 495 VARIOUS NAMES FOR INITIATES.

left hand. When Vishnu Purana narrates that "the world was overrun with trees," while the Prachetasas -- who "passed 10,000 years of austerity in the vast ocean" -- were absorbed in their devotions, the allegory relates to the Atlanteans and the adepts of the early Fifth Race -- the Aryans. Other "trees (adept Sorcerers) spread, and overshadowed the unprotected earth; and the people perished . . . unable to labour for ten thousand years." Then the sages, the Rishis of the Aryan race, called Prachetasas, are shown "coming forth from the deep,"* and destroying by the wind and flame issuing from their mouths, the iniquitous "trees" and the whole vegetable kingdom; until Soma (the moon), the sovereign of the vegetable world, pacifies them by making alliance with the adepts of the Right Path, to whom he offers as bride Marisha, "the offspring of the trees."** This means that which is given in the Stanzas and Commentaries, and what is also given in Part II. of Vol. I., "The Sacred Island." It hints at the great struggle between the "Sons of God" and the Sons of the Dark Wisdom -- our forefathers; or the Atlantean and the Aryan Adepts.

The whole History of that period is allegorized in the Ramayana, which is the mystic narrative in epic form of the struggle between Rama -- the first king of the divine dynasty of the early Aryans -- and Ravana, the symbolical personation of the Atlantean (Lanka) race. The former were the incarnations of the Solar Gods; the latter, of the lunar Devas. This was the great battle between Good and Evil, between white and black magic, for the supremacy of the divine forces, or of the lower terrestrial or cosmic powers. If the student would understand better the last statement, let him turn to the Anugita episode of the Mahabharata, chapter v., where the Brahmana tells his wife, "I have perceived by means of the Self the seat abiding in the Self -- (the seat) where dwells the Brahman free from the pairs of opposites and the moon, together with the fire (or the sun), upholding (all) beings (as), the mover of the intellectual principle." The moon is the deity of the mind (Manas) but only on the lower plane. "Manas is dual -- lunar in the lower, solar in its upper portion," says a commentary. That is to say, it is attracted in its higher aspect towards Buddhi, and in its

[[Footnote(s)]] -----

* Vishnu Purana, Book I., ch. xv.

** This is pure allegory. The waters are a symbol of wisdom and of occult learning. Hermes represented the sacred Science under the symbol of fire; the Northern Initiates, under that of water. The latter is the production of Nara, the

"Spirit of God," or rather Paramatman, the "Supreme Soul," says Kulluka Bhatta, Narayana, meaning "he who abides in the deep" or plunged in the Waters of Wisdom -- "water being the body of Nara" (Vayu). Hence arises the statement that for 10,000 years they remained in austerity "in the vast Ocean"; and are shown emerging from it. Ea, the God of Wisdom, is the "Sublime Fish," and Dagon or Oannes is the Chaldean man-fish, who emerges from the waters to teach wisdom.

[[Vol. 2, Page]] 496 THE SECRET DOCTRINE.

lower descends into, and listens to the voice of its animal soul full of selfish and sensual desires; and herein is contained the mystery of an adept's as of a profane man's life, as also that of the post-mortem separation of the divine from the animal man. The Ramayana -- every line of which has to be read esoterically -- discloses in magnificent symbolism and allegory the tribulations of both man and soul. "Within the body, in the midst of all these life-winds (? principles), which move about in the body, and swallow up one another,* blazes the Vaishvana fire** sevenfold, of which 'I' am the goal," says the Brahmana.***

But the chief "Soul" is Manas or mind; hence, Soma, the moon, is shown as making an alliance with the solar portion in it, personified as the Prachetasas. But of the seven keys that open the seven aspects of the Ramayana, as of every other Scripture, this is only one -- the metaphysical.

The symbol of the "Tree" standing for various Initiates was almost universal. Jesus is called "the tree of Life," as also all the adepts of the good Law, while those of the left Path are referred to as the "withering trees." John the Baptist speaks of "the axe" which "is laid to the root of the trees" (Matth. iii. 10); and the King of Assyria's armies are called trees (Isaiah x. 19).

The true meaning of the Garden of Eden was sufficiently given in "Isis Unveiled."

The writer has more than once heard surprise expressed that Isis should contain so few of the doctrines now taught. This is quite erroneous. For the allusions to such teachings are plentiful, even if the teachings themselves were still withheld. The time had not arrived then, as the hour has not struck now to say all. "No Atlanteans, or the Fourth Race which preceded our Fifth Race, are mentioned in 'Isis Unveiled,' " a critic on "Esoteric Buddhism" wrote one day. I, who wrote Isis Unveiled, maintain that the Atlanteans are mentioned as our predecessors, namely, in Volume I., p. 133, when speaking of the Book of Job. For what can be plainer than this: "In the original text, instead of 'dead things,' it is written dead Rephaim, giants, or mighty primitive men, from whom 'Evolution' may one day trace our present race." It is invited to do so now, now that this hint is explained quite openly; but Evolutionists are as sure to

[[Footnote(s)]] -----

* This is explained by the able translator of Anugita in a foot-note (p. 258) in these words: "The sense appears to be this: the course of worldly life is due to the operations of the life-winds which are attached to the SELF, and lead to its manifestations as individual souls.

** "Vaisvanara (or Vaishvanara) is a word often used to denote the Self" -- explains Nilakantha. *** Translated by Kashinath Trimbak Telang, M.A., Bombay.

[[Vol. 2, Page]] 497 TRACES OF PRE-HISTORIC STRIFES.

decline nowadays as they did ten years ago. Science and theology are against us: therefore we question both, and have to do so in self-defence. On the strength of hazy metaphors scattered throughout the prophets, and in St. John's Revelation, a grand but re-edited version of the Book of Enoch, on these insecure grounds Christian theology built its dogmatic Epos of the War in Heaven. It did more: it used the symbolical visions, intelligible only to the Initiates, as pillars upon which to support the whole bulky edifice of its religion; and now the pillars have been found very weak reeds, and the cunning structure is foundering. The entire Christian scheme rests upon these Jakin and Boaz -- the two contrary forces of good and evil, Christ and Satan the [[agathai kai kakai dunameis]]. Take away from Christianity its main prop of the Fallen Angels, and the Eden Bower vanishes with its Adam and Eve into thin air; and Christ, in the exclusive character of the One God and Saviour, and the victim of Atonement for the Sin of animal-man, becomes forthwith a useless, meaningless myth.

In an old number of the Revue Archaeologique for the year 1845 (p. 41), a French writer, M. Maury, remarks:-- "This universal strife between good and bad spirits seems to be only the reproduction of another more ancient and more terrible strife, that, according to an ancient myth, took place before the creation of the universe, between the faithful and the rebellious legions."

Once more, it is a simple question of priority. Had John's Revelation been written during the Vedic period, and were not one sure now of its being simply another version of the Book of Enoch and the Dragon legends of pagan antiquity -- the grandeur and the beauty of the imagery might have biased the critics' opinion in favour of the Christian interpretation of that first war, whose battle field was stary Heaven, and the first slaughterers -- the Angels. As the matter stands now, however, one has to trace Revelation, event by event, to other and far older visions. For the better comprehension of the Apocalyptic allegories and of the esoteric epos we ask the reader to turn to Revelation, and to read chapter xii., from verse 1 to verse 7.

This has several meanings, most of which have been found out with regard to the astronomical and numerical keys of this universal myth. That which may be given now, is a fragment, a few hints as to its secret meaning, as embodying the record of a real war, the struggle between the Initiates of the two schools. Many and various are the still existing allegories built on that same foundation stone. The true narrative, that which gives the full esoteric meaning, is in the Secret books, but the writer has had no access to these.

In the exoteric works, however, the episode of the Taraka war, and some esoteric commentaries, may offer a clue perhaps. In every Purana

[[Vol. 2, Page]] 498 THE SECRET DOCTRINE.

the event is described with more or less variations, which show its allegorical character.

In the Mythology of the earliest Vedic Aryans as in the later Puranic narratives, mention is made of Budha, the "Wise"; one "learned in the Secret Wisdom," and who is the planet Mercury in his euhemerization. The Hindu Classical Dictionary credits Budha with being the author of a hymn in the Rig Veda. Therefore, he can by no means be "a later fiction of the Brahmins," but is a very old personation indeed.

It is by inquiring into his genealogy, or theogony, rather, that the following facts are disclosed. As a myth, he is the son of Tara, the wife of Brihaspati the "gold coloured," and of "Soma" the (male) Moon, who, Paris-like, carries this new Helen of the Hindu sidereal Kingdom away from her husband, which causes a great strife and war in Swarga (Heaven). The episode brings on a battle between the gods and the Asuras: King Soma, finds allies in Usanas (Venus), the leader of the Danavas; and the gods are led by Indra and Rudra, who side with Brihaspati. The latter is helped by Sankara (Siva), who, having had for his guru Brihaspati's father, Angiras, befriends his son. Indra is here the Indian prototype of Michael, the Archistrategus and the slayer of the "Dragon's" angels -- since one of his names is Jishnu "leader of the (celestial) Host." Both fight, as some Titans did against other Titans in defence of revengeful gods, one -- of Jupiter tonans (in India, Brihaspati is the planet Jupiter, which is a curious coincidence); the other, in support of the ever-thundering Rudra Sankara. During this war, he is deserted by his body-guard, the storm-gods (Maruts). The story is very suggestive in some of its details.

Let us examine some of them, and seek to discover their meaning.

The presiding genius, or "regent" of the planet Jupiter is Brihaspati, the wronged husband. He is the instructor or spiritual guru of the gods, who are the representatives of the procreative powers. In the Rig Veda, he is called Brahmanaspati, a name meaning "the deity in whom the action of the worshipped upon the gods is personified." Hence Brahmanaspati represents the materialization of the divine grace, so to say, by means of ritual and ceremonies, or the exoteric worship.

"TARA"* -- his wife -- is on the other hand the personification of the powers of one initiated into Gupta Vidya (secret knowledge), as will be shown.

SOMA is the moon astronomically; but in mystical phraseology, it is also the name of the sacred beverage drunk by the Brahmins and the Initiates during their mysteries and sacrificial rites. The "Soma" plant is the *asclepias acida*, which yields a juice from which that mystic beverage,

[[Vol. 2, Page]] 499 ALLEGORIES ON THE "WAR IN HEAVEN."

the Soma drink, is made. Alone the descendants of the Rishis, the Agnihotri (the fire priests) of the great mysteries knew all its powers. But the real property of the true Soma was (and is) to make a new man of the Initiate, after he is reborn, namely once that he begins to live in his astral body (See "The Elixir of Life"); for, his spiritual nature overcoming the physical, he would soon snap it off and part even from that etherealized form.**

Soma was never given in days of old to the non-initiated Brahman -- the simple Grihasta, or priest of the exoteric ritual. Thus Brihaspati -- "guru of the gods" though he was -- still represented the dead-letter form of worship. It is Tara his wife -- the symbol of one who, though wedded to dogmatic worship, longs for true wisdom -- who is shown as initiated into his mysteries by King Soma, the giver of that Wisdom. Soma is thus made in the allegory to carry her away. The result of this is the birth of Budha -- esoteric Wisdom -- (Mercury, or Hermes in Greece and Egypt). He is represented as "so beautiful," that even the husband, though well aware that Budha is not the progeny of his dead-letter worship -- claims the "new-born" as his Son, the fruit of his ritualistic and meaningless forms.*** Such is, in brief, one of the meanings of the allegory.

War in Heaven refers to several events of that kind on various and different planes of being. The first is a purely astronomical and cosmical fact pertaining to cosmogony. Mr. John Bentley thought that with the Hindus war in Heaven is only a figure referring to their calculations of time periods (see Bentley's Hindu Astronomy).****

[[Footnote(s)]] -----

* See "Five Years of Theosophy."

** The partaker of Soma finds himself both linked to his external body, and yet away from it in his spiritual form. The latter, freed from the former, soars for the time being in the ethereal higher regions, becoming virtually "as one of the gods," and yet preserving in his physical brain the memory of what he sees and learns. Plainly speaking, Soma is the fruit of the Tree of Knowledge forbidden by the jealous Elohim to Adam and Eve or Yah-ve, "lest Man should become as one of us."

*** We see the same in the modern exoteric religions.

**** "Historical Views of Hindu Astronomy." Quoting from the work in reference to Aryachatta, who is said to give a near approach to the true relation among the various values for the computations of the value of π , the author of the "Source of Measures" reproduces a curious statement. Mr. Bentley, it is said, "was greatly familiar with the Hindu astronomical and mathematical knowledge . . . this statement of his then may be taken as authentic: the same

remarkable trait, among so many Eastern and ancient nations of sedulously concealing the arcana of this kind of knowledge, is a marked one among the Hindus. That which was given out to be popularly taught and to be exposed to public inspection, was but the approximate of a more exact but hidden knowledge. And this very formulation of Mr. Bentley will strangely exemplify the assertion; and explained, will show that it (the Hindu exoteric astronomy and sciences) was derived from a system exact beyond the European one, in which Mr. Bentley himself, of [[Footnote continued on next page]]

[[Vol. 2, Page]] 500 THE SECRET DOCTRINE.

This served as a prototype, he thinks, for the Western nations to build their war of the Titans upon. The author is not quite wrong, but neither is he quite right. If the sidereal prototype refers indeed to a pre-manvantaric period, and rests entirely on the Knowledge claimed by the Aryan Initiates of the whole programme and progress of cosmogony,* the war of the Titans is but a legendary and deified copy of the real war that took place in the Himalayan Kailasa (heaven) instead of in the depths of Cosmic interplanetary Space. It is the record of the terrible strife between the "Sons of God" and the "Sons of the Shadow" of the Fourth and the Fifth Races. It is on these two events, blended together by legends borrowed from the exoteric account of the war waged by the Asuras against the gods, that every subsequent national tradition on the subject has been built.

Esoterically, the Asuras, transformed subsequently into evil Spirits and lower gods, who are eternally at war with the great deities -- are the gods of the Secret Wisdom. In the oldest portions of the Rig Veda, they are the spiritual and the divine, the term Asura being used for the Supreme Spirit and being the same as the great Ahura of the Zoroastrians. (See Darmesteter's VENDIDAD). There was a time when the gods Indra, Agni, and Varuna themselves belonged to the Asuras.

In the Aitareya Brahmana, the breath (asu) of Brahma-Prajapati became alive, and from that breath he created the Asuras. Later on, after the war, the Asuras are called the enemies of the gods, hence -- "A-suras," the initial "A" being a negative prefix -- or "no-gods" -- the "gods" being referred to as "Suras." This then connects the Asuras and their "Hosts," enumerated further on, with the "Fallen Angels" of the Christian Churches, a hierarchy of spiritual Beings to be found in every Pantheon of ancient and even modern nations -- from the Zoroastrian down to that of the Chinaman. They are the sons of the primeval Creative Breath at the beginning of every new Maha Kalpa, or Manvantara; in the same rank as the Angels who had remained "faithful." These were the allies of Soma (the parent of the Esoteric Wisdom) as against Brihaspati (representing ritualistic or ceremonial

[[Footnote(s)]] -----

[[Footnote continued from previous page]] course, trusted as far in advance of the Hindu Knowledge, at any time, in any generation."

Which is Mr. Bentley's misfortune, and does not take away from the glory of the ancient Hindu astronomers, who were all Initiates.

* The Secret Doctrine teaches that every event of universal importance, such as geological cataclysms at the end of one race and the beginning of a new one, involving a great change each time in mankind, spiritual, moral and physical -- is pre-cogitated and preconcerted, so to say, in the sidereal regions of our planetary system. Astrology is built wholly upon this mystic and intimate connection between the heavenly bodies and mankind; and it is one of the great secrets of Initiation and Occult mysteries.

[[Vol. 2, Page]] 501 SARPAS -- SERPENTS -- NAGAS.

worship). Evidently they have been degraded in Space and Time into opposing powers or demons by the ceremonialists, on account of their rebellion against hypocrisy, sham-worship, and the dead-letter form.

Now what is the real character of all those who fought along with them? They are (1) the Usanas, or the "host" of the planet Venus, become now in Roman Catholicism -- Lucifer, the genius of the "morning star" (see Isaiah xiv., 12), the tsaba, or army of "Satan." (2) The Daityas and Danavas are the Titans, the demons and giants whom we find in the Bible (Gen. vi.) -- the progeny of the "Sons of God" and the "Daughters of Men." Their generic name shows their alleged character, and discloses at the same time the secret animus of the Brahmins: for they are the Krati-dwishes -- the "enemies of the sacrifices" or exoteric shams. These are the "hosts" that fought against Brihaspati, the representative of exoteric popular and national religions; and Indra -- the god of the visible heaven, the firmament, who, in the early Veda, is the highest god of Cosmic heaven, the fit habitation for an extra-Cosmic and personal God, higher than whom no exoteric worship can ever soar.

(3) Then come the Nagas,* the Sarpa (serpents or Seraphs). These, again, show their character by the hidden meaning of their glyph. In Mythology they are semi-divine beings with a human face and the tail of a Dragon. They are therefore, undeniably, the Jewish seraphim (from Serapis and Sarpa, Serpent); the plural being saraph, "burning, fiery" (See Isaiah, vi. 23). Christian and Jewish angelology distinguishes between the Seraphim and the Cherubim or Cherubs, who come second in order; esoterically, and Kabalistically, they are identical; the cherubim being simply the name for the images or likenesses of any of the divisions of the celestial hosts. Now, as said before, the Dragons and Nagas were the names given to the Initiates-hermits, on account of their great Wisdom and Spirituality and their living in caves. Thus, when Ezekiel applies the adjective of Cherub to the King of Tyre, and tells him that by his wisdom and his understanding there is no secret that can be hidden from him (v. 3, 4, xxviii.), he shows to an Occultist that it is a "prophet," perhaps, still a follower of exoteric worship, who fulminates against an Initiate of another school and not against an imaginary Lucifer, a fallen cherub from the stars, and then from the garden of Eden. Thus the so-called "war" is, in one of its many meanings, also an allegorical record of the strife between the two classes of adepts -- of the right and of the left path. There were three classes of Rishis in India, who were

[[Footnote(s)]] -----

* The Nagas are described by the Orientalists as a mysterious people whose landmarks are found abundantly in India to this day, and who lived in Naga dwipa one of the Seven continents or divisions of Bharatavarsha (old India), the town of Nagpur being one of the most ancient cities in the country.

[[Vol. 2, Page]] 502 THE SECRET DOCTRINE.

the earliest adepts known; the royal, or Rajarshis, kings and princes, who adopted the ascetic life; the Devarshis, divine, or the sons of Dharma or Yoga; and Brahmarshis, descendants of those Rishis who were the founders of gotras of Brahmans, or caste-races. Now, leaving the mythical and astronomical keys for one moment aside, the secret teachings show many Atlanteans who belonged to these divisions; and there were strifes and wars between them, de facto and de jure. Narada, one of the greatest Rishis, was a Devarishi; and he is shown in constant and everlasting feud with Brahma, Daksha, and other gods and sages. Therefore we may safely maintain that whatever the astronomical meaning of this universally accepted legend, its human phase is based on real and historical events, disfigured into a theological dogma only to suit ecclesiastical purposes. As above so below. Sidereal phenomena, and the behaviour of the celestial bodies in the heavens, were taken as a model, and the plan was carried out below, on earth. Thus, space, in its abstract sense, was called "the realm of divine knowledge," and by the Chaldees or Initiates Ab Soo, the habitat (or Father, i.e., the source) of knowledge, because it is in space that dwell the intelligent Powers which invisibly rule the Universe.*

In the same manner and on the plan of the Zodiac in the upper Ocean or the heavens, a certain realm on Earth, an inland sea, was consecrated and called "the Abyss of Learning"; twelve centres on it in the shape of twelve small islands representing the Zodiacal signs -- two of which remained for ages the "mystery signs"*** and were the abodes of twelve Hierophants and masters of wisdom. This "sea of knowledge" or learning*** remained for ages there, where now stretches the Shamo, or Gobi desert. It existed until the last great glacial period, when a

[[Footnote(s)]] -----

* Not less suggestive are the qualities attributed to Rudra Siva, the great Yogi, the forefather of all the Adepts -- in Esotericism one of the greatest Kings of the Divine Dynasties. Called "the Earliest" and the "Last," he is the patron of the Third, Fourth, and the Fifth Root-Races. For, in his earliest character, he is the ascetic Dig-ambara, "clothed with the Elements," Trilochana, "the three-eyed"; Pancha-anana, "the five-faced," an allusion to the past four and the present fifth race, for, though five-faced, he is only "four-armed," as the fifth race is still alive. He is the "God of Time," Saturn-Kronos, as his damaru (drum), in the shape of an hour-glass, shows; and if he is accused of having cut off Brahma's fifth head, and left him with only four, it is again an allusion to a certain degree in initiation, and also to the Races.

** G. Seiffarth's idea that the signs of the Zodiac were in ancient times only ten is erroneous. Ten only were known to the profane; the initiates, however, knew them all, from the time of the separation of mankind into sexes, whence arose the separation of Virgo-Scorpio into two; which, owing to a secret sign added and the Libra invented by the Greeks, instead of the secret name which was not given, made 12. (Vide Isis Unveiled, Vol. II., p. 456.)

*** The above is, perhaps, a key to the Dalai-Lama's symbolical name -- the "Ocean" lama, meaning the Wisdom Ocean. Abbe Huc speaks of it.

[[Vol. 2, Page]] 503 THE MYTH OF BEL AND MERODACH.

local cataclysm, which swept the waters south and west and so formed the present great desolate desert, left only a certain oasis, with a lake and one island in the midst of it, as a relic of the Zodiacal Ring on Earth. For ages the watery abyss -- which, with the nations that preceded the later Babylonians, was the abode of the "great mother" (the terrestrial post-type of the "great mother chaos" in heaven), the parent of Ea (Wisdom), himself the early prototype of Oannes, the man-Fish of the Babylonians -- for ages, then, the "Abyss" or Chaos was the abode of wisdom and not of evil. The struggle of Bel and then of Merodach, the Sun-god, with Tiamat, the Sea and its Dragon, a "war" which ended in the defeat of the latter, has a purely cosmic and geological meaning, as well as an historical one. It is a page torn out of the History of the Secret and Sacred Sciences, their evolution, growth and DEATH -- for the profane masses. It relates (a) to the systematic and gradual drying up of immense territories by the fierce Sun at a certain pre-historic period; one of the terrible droughts which ended by a gradual transformation of once fertile lands abundantly watered into the sandy deserts which they are now; and (b) to the as systematic persecution of the Prophets of the Right Path by those of the Left. The latter, having inaugurated the birth and evolution of the sacerdotal castes, have finally led the world into all these exoteric religions, invented to satisfy the depraved tastes of the "hoi polloi" and the ignorant for ritualistic pomp and the materialization of the ever-immortal and Unknowable Principle.

This was a certain improvement on the Atlantean sorcery, the memory of which lingers in the remembrances of all the literary and Sanskrit-speaking portion of India, as well as in the popular legends. Still it was a parody on, and the desecration of the Sacred Mysteries and their science. The rapid progress of anthropomorphism and idolatry led the early Fifth, as it had already led the Fourth Race, into sorcery once more, though on a smaller scale. Finally, even the four "Adams" (symbolizing under other names the four preceding races) were forgotten; and passing from one generation into another, each loaded with some additional myths, got at last drowned in that ocean of popular symbolism called the Pantheons. Yet they exist to this day in the oldest Jewish traditions, as the Tzelem, "the Shadow-Adam" (the Chhayas of our doctrine); the "model" Adam, the copy of the first, and the "male and female" of the exoteric genesis (chap. i.); the third, the "earthly Adam" before the Fall, an androgyne; and the Fourth -- the Adam after his fall, i.e., separated into sexes, or the pure Atlantean. The Adam of the garden of Eden, or the forefather of our race -- the fifth -- is an ingenious compound of the above four. As stated in Zohar (iii., fol. 4, col. 14, Cremona Ed.) Adam, the FIRST man, is not found

[[Vol. 2, Page]] 504 THE SECRET DOCTRINE.

now on earth, he "is not found in all, below." Because, "where does the lower earth come from? From the chain of the Earth, and heaven above," i.e., from the superior globes, those which precede and are above our Earth. "And there came out from it (the chain) creatures of all kinds. Some of them in (solid) skins, some in shells (Klipboth) . . . some in red shells, some in black, some in white, and some of other colours . . ." (See Qabalah).

As in the Chaldean Cosmogony of Berossus and the Stanzas just given, some treatises on the Kabala speak of creatures with two faces, some with four, and some with one face: for "the highest Adam did not come down in all the countries, or produce progeny and have many wives," but is a Mystery.

So is the Dragon a mystery. Truly, says Rabbi Simeon Ben-lochai, that to understand the meaning of the Dragon is not given to the "Companions" (students, or chelas), but only to "the little ones," i.e., the perfect Initiates.* "The work of the beginning the companions understand; but it is only the little ones who understand the parable on the work in the Principium by the mystery of the serpent of the Great Sea."** And those Christians, who may happen to read this, will also understand by the light of the above sentence who their "Christ" was. For Jesus states repeatedly that he who "shall not receive the Kingdom of God as a little child, he shall not enter therein"; and if some of his sayings have been meant to apply to children without any metaphor, most of what relates to the "little ones" in the Gospels, related to the Initiates, of whom Jesus was one. Paul (Saul) is referred to in the Talmud as "the little one."

That "Mystery of the Serpent" was this: Our Earth, or rather terrestrial life, is often referred to in the Secret Teachings as the great Sea, "the sea of life" having remained to this day a favourite metaphor. The Siphrah Dzeniouta speaks of primeval chaos and the evolution of the Universe after a destruction (pralaya), comparing it to an uncoiling serpent:-- "Extending hither and thither, its tail in its mouth, the head twisting on its neck, it is enraged and angry. . . It watches and conceals itself. Every thousand Days it is manifested." (I., § 16).

[[Footnote(s)]] -----

* Such was the name given in ancient Judea to the Initiates, called also the "Innocents" and the "Infants," i.e., once more reborn. This key opens a vista into one of the New Testament mysteries; the slaughter by Herod of the 40,000 "Innocents." There is a legend to this effect, and the event which took place almost a century B.C., shows the origin of the tradition blended at the same time with that of Krishna and his uncle Kansa. In the case of the N. T., Herod stands for Alexander Janneus (of Lyda), whose persecution and murder of hundreds and thousands of Initiates led to the adoption of the Bible story.

** Zohar ii., 34.

[[Vol. 2, Page]] 505 THE SACREDNESS OF THE SERPENT.

A commentary on the Puranas says: "Ananta-Sesha is a form of Vishnu, the Holy Spirit of Preservation, and a symbol of the Universe, on which it is supposed to sleep during the intervals of the Days of Brahma. The seven heads of Sesha support the Universe. . . ."

So the Spirit of God "sleeps," is "breathing" (meracha' pheth') over the Chaos of undifferentiated matter, before each new "Creation." (Siphrah Dzeniouta). Now one "Day" of Brahma is composed, as already explained, of one thousand Mahayugas; and as each "Night" or period of rest is equal in duration to this "day," it is easy to see to what this sentence in Siphrah Dzeniouta refers, viz.:-- that the serpent manifests "once in a thousand days." Nor is it more difficult to see whither the initiated writer of the Siphrah is leading us, when he says: "Its head is broken in the waters of the great sea, as it is written: 'Thou dividest the sea by thy strength, thou brakest the heads of the dragons in the waters' " (Ixxiv. 13). It refers to the trials of the Initiates in this physical life, the "sea of sorrow," if read with one key; it hints at the successive destruction of the seven spheres of a chain of worlds in the great sea of space, when read with another key: for every sidereal globe or sphere, every world, star, or group of stars, is called in symbolism "the Dragon's head." But however it may read, the Dragon was never regarded as Evil, nor was the Serpent either -- in antiquity. In the metaphors, whether astronomical, cosmical, theogonical or simply physiological, i.e., phallic -- the Serpent was always regarded as a divine symbol. When it is said "The (Cosmic) Serpent which runs with 370 leaps" (Siphrah Dzeniouta, § 33) it means the cyclic periods of the great Tropical year (25,868 years), divided in the esoteric calculation into 370 periods or cycles, as one solar year is divided into 365 days. And if Michael was regarded by the Christians as the Conqueror of Satan, the Dragon, it is because in the Talmud this fighting personage is represented as the Prince of Waters, who had seven subordinate Spirits under him -- a good reason why the Latin Church made him the patron Saint of every promontory in Europe. In the Kabala (Siph. Dzen.) the creative Force "makes sketches and spiral lines of his creation in the shape of a Serpent." It "holds its tail in its mouth," because it is the symbol of endless eternity and of cyclic periods. Its meanings, however, would require a volume, and we must end.

Thus the reader may now see for himself what are the several meanings of the "War in Heaven," and of the "great dragon." The most solemn and dreaded of church dogmas, the alpha and omega of Christian faith, and the pillar of its FALL and ATONEMENT, dwindles down to a pagan symbol, in the many allegories about those prehistoric struggles.

[[Vol. 2, Page]] 506 THE SECRET DOCTRINE.

§ XIX.

IS PLEROMA SATAN'S LAIR?

THE subject is not yet exhausted, and has to be examined from still other aspects.

Whether Milton's grandiose description of the three Days' Battle of the Angels of Light against those of Darkness justifies the suspicion that he must have heard of the corresponding Eastern tradition -- it is impossible to say. Nevertheless, if not himself in connection with some Mystic, then it must have been through some one who had obtained access to the secret works of the Vatican. Among these there is a tradition of the "Beni Shamash" -- the "children of the Sun" -- concerning the Eastern allegory, with far more minute details in its triple version, than one can get either from the Book of Enoch, or the far more recent Revelation of St. John about the "Old Dragon" and his various Slayers, as just shown.

It seems inexplicable to find, to this day, authors belonging to Mystical Societies who yet continue in their preconceived doubts as to the "alleged" antiquity of the "Book of Enoch." Thus, while the author of the "Sacred Mysteries among the Mayas and Quiches" is inclined to see in Enoch an Initiate converted to Christianity (!!) (vide p. 16), the English compiler of Eliphas Levi's works -- "The Mysteries of Magic" -- is also of a like opinion. He remarks that: "Outside the erudition of Dr. Kenealy, no modern scholarship attributes any more remote antiquity to the latter work (the 'Book of Enoch') than the fourth century B.C." (Biograph. and Critical Essay, p. xxxviii.). Modern scholarship has been guilty of worse errors than this one. It seems but yesterday that the greatest literary critics in Europe denied the very authenticity of that work, together with the Orphic Hymns, and even the Book of Hermes or Thot, until whole verses from the latter were discovered on Egyptian monuments and tombs of the earliest dynasties. The opinion of Archbishop Laurence is quoted elsewhere.

The "Old Dragon" and Satan, now become singly and collectively the symbol of, and the theological term for, the "Fallen Angel," is not so described either in the original Kabala (the Chaldean "Book of Numbers") or in the modern. For the most learned, if not the greatest of modern Kabalists, namely Eliphas Levi, describes Satan in the following glowing terms:-- "It is that Angel who was proud enough to believe himself God; brave enough to buy his independence at the price of eternal suffering and torture; beautiful enough to have adored

[[Vol. 2, Page]] 507 THE LIVING DEVILS.

himself in full divine light; strong enough to reign in darkness amidst agony, and to have built himself a throne on his inextinguishable pyre. It is the Satan of the Republican and heretical Milton. . . . the prince of anarchy, served by a hierarchy of pure Spirits (!!) . . . " (Histoire de la Magie, 16-17) This description -- one which reconciles so cunningly theological dogma and the Kabalistic allegory, and even contrives to include a political compliment in its phraseology -- is, when read in the right spirit, quite correct.

Yes, indeed; it is this grandest of ideals, this ever-living symbol -- nay apotheosis -- of self-sacrifice for the intellectual independence of humanity; this ever active Energy protesting against Static Inertia -- the principle to which Self-assertion is a crime, and Thought and the Light of Knowledge odious. It is -- as Eliphas says with unparalleled justice and irony -- "this pretended hero of tenebrous eternities, who, slanderously charged with ugliness, is decorated with horns and claws, which would fit far better his implacable tormentor -- it is he who has been finally transformed into a serpent -- the red Dragon." But Eliphas Levi was yet too subservient to his Roman Catholic authorities; one may add, too jesuitical, to confess that this devil was mankind, and never had any existence on earth outside of that mankind.*

In this, Christian theology, although following slavishly in the steps of Paganism, was only true to its own time-honoured policy. It had to isolate itself, and to assert its authority. Hence it could not do better than turn every pagan deity into a devil. Every bright sun-god of antiquity -- a glorious deity by day, and its own opponent and adversary by night, named the Dragon of Wisdom, because it was supposed to contain the germs of night and day -- has now been turned into the antithetical shadow of God, and has become Satan on the sole and unsupported authority of despotic human dogma. After which all these producers of light and shadow, all the Sun and the Moon Gods, were cursed, and thus the one God chosen out of the many, and Satan, were both anthropomorphised. But theology seems to have lost sight of the human capacity for discriminating and finally analysing all that is artificially forced upon its reverence. History shows in every race and even tribe, especially in the Semitic nations, the natural impulse to exalt its own tribal deity above all others to the hegemony

[[Footnote(s)]] -----

* What devil could be possessed of more cunning, craft and cruelty than the "Whitechapel murderer" "Jack the Ripper" of 1888, whose unparalleled blood-thirsty and cool wickedness led him to slaughter and mutilate in cold blood seven unfortunate and otherwise innocent women! One has but to read the daily papers to find in those wife and child-beating, drunken brutes (husbands and fathers!), a small percentage of whom is daily brought before the courts, the complete personifications of the devils of Christian Hell!

[[Vol. 2, Page]] 508 THE SECRET DOCTRINE.

of the gods; and proves that the God of the Israelites was such a tribal God, and no more, even though the Christian Church, following the lead of the "chosen" people, is pleased to enforce the worship of that one particular deity, and to anathematize all the others. Whether originally a conscious or an unconscious blunder, nevertheless, it was one. Jehovah has ever been in antiquity only "a god among other Gods," (lxxxii. Psalm). The Lord appears to Abraham, and while saying, "I am the Almighty God," yet adds, "I will establish my covenant to be a God unto thee" (Abraham), and unto his seed after him (Gen. xvii. 7) -- not unto Aryan Europeans.

But then, there was the grandiose and ideal figure of Jesus of Nazareth to be set off against a dark background, to gain in radiance by the contrast; and a darker one the Church could hardly invent. Lacking the Old Testament symbology, ignorant of the real connotation of the name of Jehovah -- the rabbinical secret substitute for the ineffable and unpronounceable name -- the Church mistook the cunningly fabricated shadow for the reality, the anthropomorphized generative symbol for the one Secondless Reality, the ever unknowable cause of all. As a logical sequence the Church, for purposes of duality, had to invent an anthropomorphic Devil -- created, as taught by her, by God himself. Satan has now turned out to be the monster fabricated by the "Jehovah-Frankenstein," -- his father's curse and a thorn in the divine side -- a monster, than whom no earthly Frankenstein could have fabricated a more ridiculous bogey.

The author of "New Aspects of Life" describes the Jewish God very correctly from the Kabalistic stand-point as "the Spirit of the Earth, which had revealed itself to the Jew as Jehovah" (p. 209). "It was that Spirit again who, after the death of Jesus, assumed his form and personated him as the risen Christ" -- the doctrine of Cerinthus and several Gnostic sects with slight variation, as one can see. But the author's explanations and deductions are remarkable: "None knew . . . better than Moses . . . and so well as he how great was the power of those (gods of Egypt) with whose priests he had contended," he says . . . "the gods of which Jehovah is claimed to be the God" (by the Jews only). "What were these gods, these Achar of which Jehovah, the Achad, is claimed to be the God . . . by overcoming them?" the author asks; to which our Occultism answers: "those whom the Church now calls the Fallen Angels and collectively Satan, the Dragon, overcome, if we have to accept her dictum, by Michael and the Host, that Michael being simply Jehovah himself, one of the subordinate Spirits at best." Therefore, the author is again right in saying: "The Greeks believed in the existence of . . . daimons. But . . . they were anticipated by the Hebrews, who held that

[[Vol. 2, Page]] 509 JEHOVAH, A PERSONATING SPIRIT.

there was a class of personating spirits which they designated demons, 'personators.' Admitting with Jehovah, who expressly asserts it, the existence of other gods, which were personators of the One God, were these other gods simply a higher class of personating spirits, which had acquired and exercised greater powers? And is not personation the Key to the mystery of the Spirit state? But once granting this position, how are we to know that Jehovah was not a personating Spirit, a Spirit which arrogated to itself that it was, and thus became, the personator of the one unknown and unknowable God? Nay, how do we know that the Spirit calling itself Jehovah, in arrogating to itself his attributes did not thus cause its own designation to be imputed to the One who is in reality as nameless as incognizable?" (pp. 144-145.)

Then the author shows "that the Spirit Jehovah is a personator" on its own admission. It acknowledged to Moses "that it had appeared to the patriarchs as the God Shaddai" . . . and "the god Helion" . . . With the same breath it assumed the name of Jehovah; and it is on the faith of the assertion of this personator that the names El, Eloah, Elohim, and Shaddai, have been read and interpreted in juxtaposition with Jehovah as "the Lord God Almighty." Then when the name Jehovah became ineffable . . . the designation Adonai, "Lord" was substituted for it, and" . . . it was owing to this substitution that the 'Lord' passed from the Jewish to the Christian 'Word' and 'World' as a designation of God" (p. 146). And how are we to know, the author may add, that Jehovah was not many spirits personating even that seemingly one -- Jod or Jod-He?

But if the Christian Church was the first to make the existence of Satan a dogma, it was because, as shown in Isis, the Devil -- the powerful enemy of God (? !) had to become the corner stone of the pillar of the Church. For, as a Theosophist, M. Jules Baissac, truly observes in his "Satan ou le Diable" (p. 9): "Il fallait eviter de paraitre autoriser le dogme du double principe en faisant de ce Satan createur une puissance reelle, et pour expliquer le mal originel, on profere contre Manes l'hypothese d'une permission de l'unique tout Puissant."* The choice and policy were unfortunate, anyhow. Either the personator of the lower god of Abraham and Jacob ought to have been made entirely distinct from the mystic "Father" of Jesus, or -- the "Fallen" Angels should have been left unslandered by further fictions.

Every god of the Gentiles is connected with, and closely related to,

[[Footnote(s)]] -----

* After the polymorphic Pantheism of some Gnostics came the esoteric dualism of Manes, who was accused of personifying Evil and creating of the Devil a God -- rival of God himself. We do not see that the Christian Church has so much improved on that exoteric idea of the Manicheans, for she calls God her King of Light, and Satan, the King of Darkness, to this day.

[[Vol. 2, Page]] 510 THE SECRET DOCTRINE

Jehovah -- the Elohim; for they are all One Host, whose units differ only in name in the esoteric teachings. Between the "Obedient" and the "Fallen" Angels there is no difference whatever, except in their respective functions, or rather in the inertia of some, and the activity of others among those "Dhyan Chohans" or Elohim who were "commissioned to create," i.e., to fabricate the manifested world out of the eternal material.

The Kabbalists say that the true name of Satan is that of Jehovah placed upside down, for "Satan is not a black god but the negation of the white deity," or the light of Truth. God is light and Satan is the necessary darkness or shadow to set it off, without which pure light would be invisible and incomprehensible.* "For the initiates," says Eliphas Levi, "the devil is not a person but a creative Force, for Good as for Evil." They (the Initiates) represented this Force, which presides at physical generation, under the mysterious form of God Pan -- or Nature: whence the horns and hoofs of that mythical and symbolic figure, as also the Christian "goat of the Witches' Sabbath." With regard to this too, Christians have imprudently forgotten that the goat was also the victim selected for the atonement of all the sins of Israel, that the scape-goat was indeed the sacrificial martyr, the symbol of the greatest mystery on earth -- the Fall into generation. Only the Jews have long forgotten the real meaning of their (to the non-initiated) ridiculous hero, selected from the drama of life in the great mysteries enacted by them in the desert; and the Christians never knew it.

Eliphas Levi seeks to explain the dogma of his Church by paradoxes and metaphors, but succeeds very poorly in the face of the many volumes written by pious Roman Catholic demonologists under the approbation and auspices of Rome, in this nineteenth century of ours. For the true Roman Catholic, the devil or Satan is a reality; the drama enacted in the sidereal light according to the seer of Patmos -- who desired, perhaps, to improve upon the narrative in the "Book of Enoch" -- is as real, and as historical a fact as any other allegory and symbolical event in the Bible. But the Initiates give an explanation

[[Footnote(s)]] -----

* To quote in this relation Mr. Laing in his admirable work "Modern Science and Modern Thought" (p. 222, 3rd Ed.): "From this dilemma (existence of evil in the world) there is no escape, unless we give up altogether the idea of an

anthropomorphic deity, and adopt frankly the Scientific idea of a First Cause, inscrutable and past finding out; and of a universe whose laws we can trace, but of whose real essence we know nothing, and can only suspect, or faintly discern a fundamental law which may make the polarity of good and evil a necessary condition of existence." Were Science to know "the real essence," instead of knowing nothing of it, the faint suspicion would turn into the certitude of the existence of such a law, and the knowledge that this law is connected with Karma.

[[Vol. 2, Page]] 511 AKASA, THE "MYSTERIUM MAGNUM."

which differs from that given by Eliphas Levi, whose genius and crafty intellect had to submit to a certain compromise dictated to him from Rome.

Thus, the true and uncompromising Kabalists admit that, for all purposes of Science and philosophy, it is enough that the profane should know that the great magic agent called by the followers of the Marquis de St. Martin -- the Martinists -- astral light, by the mediaeval Kabalists and Alchemists the Sidereal Virgin and the Mysterium Magnum, and by the Eastern Occultists Aether, the reflection of Akasa -- is that which the Church calls Lucifer. That the Latin scholastics have succeeded in transforming the universal soul and Pleroma, the vehicle of Light and the receptacle of all the forms, a force spread throughout the whole Universe, with its direct and indirect effects, into Satan and his works, is no news to any one. But now they are prepared to give out to the above-mentioned profane even the secrets hinted at by Eliphas Levi without adequate explanation; for the latter's policy of veiled revelations could only lead to further superstition and misunderstanding. What, indeed, can a student of Occultism, a beginner, gather from the following highly poetical sentences of Eliphas Levi, as apocalyptic as the writings of any of the Alchemists?

"Lucifer, the Astral Light . . . is an intermediate force existing in all creation, it serves to create and to destroy, and the Fall of Adam was an erotic intoxication which has rendered his generation a slave to this fatal light . . . every sexual passion that overpowers our senses is a whirlwind of that light which seeks to drag us towards the abyss of death, Folly. Hallucinations, visions, ecstasies are all forms of a very dangerous excitation due to this interior phosphorus (?). Thus light, finally, is of the nature of fire, the intelligent use of which warms and vivifies, and the excess of which, on the contrary, dissolves and annihilates. Thus man is called upon to assume a sovereign empire over that (astral) light and conquer thereby his immortality, and is threatened at the same time with being intoxicated, absorbed, and eternally destroyed by it. This light, therefore, inasmuch as it is devouring, revengeful, and fatal, would thus really be hell-fire, the serpent of the legend; the tormented errors of which it is full, the tears and the gnashing of teeth of the abortive beings it devours, the phantom of life that escapes them, and seems to mock and insult their agony, all this would be the devil or Satan indeed." (Histoire de la Magie, p. 197).

There is no wrong statement in all this; nothing save a superabundance of ill-applied metaphors, as in the application of Adam -- a myth -- to the illustration of the astral effects. Akasa -- the astral light* -- can be defined in a few words; it is the universal Soul, the Matrix of the Universe, the "Mysterium Magnum" from which all that exists is born by separation or differentiation. It is the cause of existence; it

[[Footnote(s)]] -----

* Akasa is not the Ether of Science, as some Orientalists translate it.

[[Vol. 2, Page]] 512 THE SECRET DOCTRINE

fills all the infinite Space; is Space itself, in one sense, or both its Sixth and Seventh principles.* But as the finite in the Infinite, as regards manifestation, this light must have its shadowy side -- as already remarked. And as the infinite can never be manifested, hence the finite world has to be satisfied with the shadow alone, which its actions draw upon humanity and which men attract and force to activity. Hence, while it is the universal Cause in its unmanifested unity and infinity, the Astral light becomes, with regard to Mankind, simply the effects of the causes produced by men in their sinful lives. It is not its bright denizens --- whether they are called Spirits of Light or Darkness -- that produce Good or Evil, but mankind itself that determines the unavoidable action and reaction in the great magic agent. It is mankind which has become the "Serpent of Genesis," and thus causes daily and hourly the Fall and sin of the "Celestial Virgin" -- which thus becomes the Mother of gods and devils at one and the same time; for she is the ever-loving, beneficent deity to all those who stir her Soul and heart, instead of attracting to themselves her shadowy manifested essence, called by Eliphas Levi - - "the fatal light" which kills and destroys. Humanity, in its units, can overpower and master its effects; but only by the holiness of their lives and by producing good causes. It has power only on the manifested lower principles -- the shadow of the Unknown and Incognizable Deity in Space. But in antiquity and reality, Lucifer, or Luciferus, is the name of the angelic Entity presiding over the light of truth as over the light of the day. In the great Valentinian gospel Pistis Sophia (§ 361) it is taught that of the three Powers emanating from the Holy names of the Three [[Tridunamis]], that of Sophia (the Holy Ghost according to these gnostics -- the most cultured of all), resides in the planet Venus or Lucifer.

Thus to the profane, the Astral Light may be God and Devil at once --

[[Footnote(s)]] -----

* Says Johannes Trithem, the Abbot of Spanheim, the greatest astrologer and Kabbalist of his day:-- "The art of divine magic consists in the ability to perceive the essence of things in the light of nature (astral light), and by using the soul-powers of the spirit to produce material things from the unseen universe, and in such operations the Above and the Below must be brought together and made to act harmoniously. The spirit of Nature (astral light) is a unity, creating and forming everything, and acting through the instrumentality of man it may produce wonderful things. Such are accomplished, if you learn to know yourself. You will know it by the power of the spirit that is in yourself, and accomplish it by mixing your spirit with the essence that comes out of yourself. If you wish to succeed in such a work you must know how to separate Spirit and Life in Nature, and, moreover, to separate the astral soul in yourself and to make it tangible, and then the substance of the soul will appear visibly and tangibly rendered objective by the power of the spirit." -- (Quoted in Dr. Hartman's "Paracelsus.")

Demon est Deus inversus: that is to say, through every point of Infinite Space thrill the magnetic and electrical currents of animate Nature, the life-giving and death-giving waves, for death on earth becomes life on another plane. Lucifer is divine and terrestrial light, the "Holy Ghost" and "Satan," at one and the same time, visible Space being truly filled with the differentiated Breath invisibly; and the Astral Light, the manifested effects of the two who are one, guided and attracted by ourselves, is the Karma of humanity, both a personal and impersonal entity: personal, because it is the mystic name given by St. Martin to the Host of divine Creators, guides and rulers of this planet; impersonal, as the Cause and effect of universal Life and Death.

The Fall was the result of man's knowledge, for his "eyes were opened." Indeed, he was taught Wisdom and the hidden knowledge by the "Fallen Angel," for the latter had become from that day his Manas, Mind and Self-consciousness. In each of us that golden thread of continuous life -- periodically broken into active and passive cycles of sensuous existence on Earth, and super-sensuous in Devachan -- is from the beginning of our appearance upon this earth. It is the Sutratma, the luminous thread of immortal impersonal monadship, on which our earthly lives or evanescent Egos are strung as so many beads -- according to the beautiful expression of Vedantic philosophy.

And now it stands proven that Satan, or the Red Fiery Dragon, the "Lord of Phosphorus" (brimstone was a theological improvement), and Lucifer, or "Light-Bearer," is in us: it is our Mind -- our tempter and Redeemer, our intelligent liberator and Saviour from pure animalism. Without this principle -- the emanation of the very essence of the pure divine principle Mahat (Intelligence), which radiates direct from the Divine mind -- we would be surely no better than animals. The first man Adam was made only a living soul (nephesh), the last Adam was made a quickening Spirit* -- says Paul, his words referring to the building or Creation of man. Without this quickening spirit, or human Mind or soul, there would be no difference between man and beast; as there is none, in fact, between animals with respect to their actions. The tiger and the donkey, the hawk and the dove, are each one as pure and as innocent as the other, because irresponsible. Each follows its instinct, the tiger and the hawk killing with the same unconcern as the donkey eats a thistle, or the dove pecks at a grain of corn. If the Fall had the significance given to it by theology; if that

[[Footnote(s)]] -----

* The real original text of I Corinthians, rendered Kabbalistically and esoterically would read (in Chap. xv., verses 44 and 45): "It is sown a soul body (not 'natural' body), it is raised a spirit body." St. Paul was an Initiate, and his words have quite a different meaning when read esoterically. The body "is sown in weakness (passivity); it is raised in power" (43) -- or in spirituality and intellect.

fall occurred as a result of an act never intended by nature, -- a sin, how about the animals? If we are told that they procreate their species in consequence of that same "original sin," for which God cursed the earth -- hence everything living on it -- we will put another question. We are told by theology, as by Science, that the animal was on earth far earlier than man? We ask the former: How did it procreate its species, before the fruit of the Tree of Knowledge, of the Good and the Evil, had been plucked off? As said: "The Christians -- far less clear-sighted than the great Mystic and Liberator whose name they have assumed, whose doctrines they have misunderstood and travestied, and whose memory they have blackened by their deeds -- took the Jewish Jehovah as he was, and of course strove vainly to reconcile the Gospel of Light and Liberty with the Deity of Darkness and Submission." ("War in Heaven.")*

But, it is sufficiently proven now that all the soi-disant evil Spirits who are credited with having made war on the gods, are identical as personalities; moreover, that all the ancient religions taught the same tenet save the final conclusion, which latter differs from the Christian. The seven primeval gods had all a dual state, one essential, the other accidental. In their essential state they were all the "Builders" or Fashioners, the Preservers and the rulers of this world, and in the accidental state, clothing themselves in visible corporeality, they descended on the earth and reigned on it as Kings and Instructors of the lower Hosts, who had incarnated once more upon it as men.

[[Footnote(s)]] -----

* By Godolphin Mitford, later in life, Murad Ali Bey. Born in India, the son of a Missionary, G. Mitford was converted to Islam, and died a Mahomedan in 1884. He was a most extraordinary Mystic, of a great learning and remarkable intelligence. But he left the Right Path and forthwith fell under Karmic retribution. As well shown by the author of the article quoted "The followers of the defeated Elohim, first massacred by the victorious Jews (the Jehovites), and then persuaded by the victorious Christians and Mohamedans, continued nevertheless. . . Some of these scattered sects have lost even the tradition of the true rationale of their belief -- to worship in secrecy and mystery the Principle of Fire, Light, and Liberty. Why do the Sabeian Bedouins (avowedly Monotheists when dwelling in the Mohamedan cities) in the solitude of the desert night yet invoke the starry 'Host of Heaven'? Why do the Yezidis, the 'Devil Worshipers,' worship the 'Muluk-Taos' -- The 'Lord Peacock' -- the emblem of pride and of hundred-eyed intelligence (and of Initiation also), which was expelled from heaven with Satan, according to an old Oriental tradition? Why do the Gholaites and their kindred Mesopotamo-Iranian Mohamedan Sects believe in the 'Noor Illahee' -- the Light of the Elohim -- transmitted in anastasis through a hundred Prophet Leaders? It is because they have continued in ignorant superstition the traditional religion of the 'Light Deities whom Jahveh overthrew' (is said to have overthrown rather); for by overthrowing them he would have overthrown himself. The 'Muluk-Taos' -- is Maluk -- 'Ruler' as is shown in the foot-note. It is only a new form of Moloch, Melek, Molech, Malayak, and Malachim" -- Messengers, Angels, etc.

Thus, esoteric philosophy shows that man is truly the manifested deity in both its aspects -- good and evil, but theology cannot admit this philosophical truth. Teaching the dogma of the Fallen Angels in its dead-letter meaning, and having made of Satan the corner-stone and pillar of the dogma of redemption -- to do so would be suicidal. Having once shown the rebellious angels distinct from God and the Logos in their personalities, the admission that the downfall of the disobedient Spirits meant simply their fall into generation and matter, would be equivalent to saying that God and Satan were identical. For since the LOGOS (or God) is the aggregate of that once divine Host accused of having fallen, it would follow that the Logos and Satan are one.

Yet such was the real philosophical view of the now disfigured tenet in antiquity. The Verbum, or the "Son," was shown in a dual aspect by the Pagan Gnostics -- in fact, he was a duality in full unity. Hence, the endless and various national versions. The Greeks had Jupiter, the son of Chronos, the Father, who hurls him down into the depths of Kosmos. The Aryans had Brahma (in later theology) precipitated by Siva into the Abyss of Darkness, etc., etc. But the fall of all these Logoi and Demiurgi from their primitive exalted position, had in all cases one and the same esoteric signification in it; the curse -- in its philosophical meaning -- of being incarnated on this earth; an unavoidable rung on the ladder of cosmic evolution, a highly philosophical and fitting Karmic law, without which the presence of Evil on Earth would have to remain for ever a closed mystery to the understanding of true philosophy. To say, as the author of the *Esprits Tombes des Paiens* (p. 347) does, that since "Christianity is made to rest on two pillars, that of evil ([[ponerou]]), and of good [[Iagathou]]; on two forces, in short, [[Iagathau kai kakai dunomeis]]: hence, if we suppress the punishment of the evil forces, the protecting mission of the good Powers will have neither value nor sense" -- is to utter the most unphilosophical absurdity. If it fits in with, and explains Christian dogma, it obscures the facts and truths of the primitive wisdom of the ages. The cautious hints of Paul have all the true esoteric meaning, and it took centuries of scholastic casuistry to give them the present false colouring in their interpretation. The verbum and Lucifer are one in their dual aspect; and the "Prince of the Air" (princeps aeris hujus) is not the "God of that period," but an everlasting principle. If the latter was said to be ever circling around the world -- qui circumambulat terram -- the great Apostle referred simply to the never-ceasing cycles of human incarnations, in which evil will ever predominate unto the day when Humanity is redeemed by the true divine Enlightenment which gives the correct perception of things.

It is easy to disfigure vague expressions written in dead and long-

[[Vol. 2, Page]] 516 THE SECRET DOCTRINE.

forgotten languages, and palm them off as truths and revealed facts on the ignorant masses. The identity of thought and meaning is the one thing that strikes the student in all the religions which mention the tradition of the fallen Spirits, and in those great religions there is not one that fails to mention and describe it in one or another form. Thus, Hoang-Ty, the great Spirit, sees his Sons, who had acquired active wisdom, falling into the valley of Pain. Their leader, the FLYING DRAGON, having drunk of the forbidden ambrosia, fell to the Earth with his Host (Kings). In the Zend Avesta, Angra Mainyu (Ahriman), surrounding himself with fire (the "Flames" -- vide supra) seeks to conquer the Heavens,* when Ahura Mazda, descending from the solid Heaven he inhabits, to the help of the Heavens that revolve (in time and space, the manifested worlds of cycles including those of incarnation), and the Amshaspends, "the seven bright Sravah," accompanied by their stars, fight Ahriman, and the vanquished Devas fall to the Earth along with him. (*Acad. des Inscript.*, Vol. xxxix., p. 690; see *Vendidad*, Farg. xix., iii.) In the *Vendidad* the Daevas are called "evil-doing," and shown to rush away "into the depths of the world of hell," or matter. (47.) This is an allegory showing the Devas compelled to incarnate, once that they have separated themselves from their parent essence, or, in other words, after the unit had become a multiple, after differentiation and manifestation.

Typhon the Egyptian, Python, the Titans, the Suras and the Asuras, all belong to the same legend of Spirits peopling the Earth. They are not "demons commissioned to create and organize this visible universe," but fashioners (the "architects") of the worlds, and the progenitors of man. They are the Fallen angels, metaphorically -- "the true mirrors of the Eternal Wisdom."

What is the absolute and complete truth as well as the esoteric meaning about this universal myth? The whole essence of truth cannot be transmitted from mouth to ear. Nor can any pen describe it, not even that of the recording Angel, unless man finds the answer in the sanctuary of his own heart, in the innermost depths of his divine intuitions. It is the great SEVENTH MYSTERY of Creation, the first and the last; and those who read St. John's Apocalypse may find its shadow lurking under the seventh seal. . . . It can be represented only in its apparent, objective form, like the eternal riddle of the Sphinx. If the latter threw herself into the sea and perished, it is not because OEdipus had unriddled the secret of the ages, but because, by anthropomorphizing the ever-spiritual and the subjective, he had

[[Footnote(s)]] -----

* So does every Yogi and even Christian: one must take the Kingdom of heaven by violence -- we are taught. Why should such a desire make of any one a devil?

[[Vol. 2, Page]] 517 BARESMA, THE DIVINE TWIG.

dishonoured the great truth for ever. Therefore, we can give it only from its philosophical and intellectual planes, unlocked with three keys respectively -- for the last four keys of the seven that throw wide open the portals to the mysteries of Nature are in the hands of the highest Initiates, and cannot be divulged to the masses at large -- not in this, our century, at any rate.

The dead letter is everywhere the same. The dualism in the Mazdean religion, was born from exoteric interpretation. The holy "Airyaman," "the bestower of weal," invoked in the prayer called Airyama-ishyo, is the divine aspect of Ahriman, "the deadly, the Dae of the Daevas" (Farg. xx., 43), and Angra Mainyu is the dark material aspect of the former. "Keep us from the Hater, O Mazda and Armaita Spenta" (*Vendidad Sadah*), has, as a prayer and invocation, an identical meaning with "Lead us not into temptation," and is addressed by man to the terrible Spirit of duality in man himself. For (Ahura) Mazda

is the spiritual, divine, and purified man, and Armaita Spenta, the Spirit of the Earth or materiality, is the same as Ahriman or Angra Mainyu in one sense.

The whole of the Magian or Mazdean literature -- or what remains of it -- is magical, occult, hence allegorical and symbolical -- even its "mystery of the law" (see the Gatha in Yasna XLIV.). Now the Mobed and the Parsi keep their eye on the Baresma during the sacrifice, the divine twig off Ormazd's "tree" having been transformed into a bunch of metallic rods; and wonder why neither the Amesha-Spentas, nor "the high and beautiful golden Haomas, nor even their Vohu-Mano (good thoughts), nor their Rata (sacrificial offering)," help them much. Let them meditate on the "tree of Wisdom," and study, assimilating one by one, the fruits thereof. The way to the tree of eternal life, the white Homa, the Gaokerena, is through one end of the earth to the other; and Haoma is in heaven as it is on earth. But to become once more a priest of it, and a healer, man must heal himself before he can heal others.

This proves once more that the so-called "myths," in order to be at least approximately dealt with in any degree of justice, have to be closely examined from all their aspects. In truth, every one of the seven Keys has to be used in its right place, and never mixed with the others, if we would unveil the entire cycle of mysteries. In our day of dreary soul-killing materialism, the ancient priest Initiates have become, in the opinion of our learned generations, the synonyms of clever impostors, kindling the fires of superstition in order to obtain an easier sway over the minds of men. This is an unfounded calumny, generated by scepticism and uncharitable thoughts. No one believed more in Gods -- or, we may call them, the Spiritual and now invisible Powers, or Spirits,

[[Vol. 2, Page]] 518 THE SECRET DOCTRINE.

the noumena of the phenomena -- than they did; and they believed just because they knew. If, initiated into the Mysteries of Nature, they were forced to withhold their knowledge from the profane, who would have surely abused it, such secrecy was undeniably less dangerous than the policy of their usurpers and successors. The former taught only that which they well knew. The latter, teaching what they do not know, have invented, as a secure haven for their ignorance, a jealous and cruel Deity, who forbids man to pry into his mysteries under the penalty of damnation. As well they may, for his mysteries can at best be only hinted at in polite ears, never described. Turn to King's Gnostics, "Description of the Plates" (Plate H), and see for yourself what was the primitive Ark of the Covenant, according to the author, who says: "There is a Rabbinical tradition that the cherubin placed over it were represented as male and female, in the act of copulation, in order to express the grand doctrine of the Essence of Form and Matter, the two principles of all things. When the Chaldeans broke into the sanctuary and beheld this most astounding emblem, they naturally enough exclaimed, 'Is this your God, of whom you boast that He is such a lover of purity?' " (p. 441.)

King thinks that this tradition "savours too much of Alexandrian philosophy to demand any credit," to which we demur. The shape and form of the wings of the two cherubim standing on the right and left sides of the Ark, these wings meeting over the "Holy of Holies," are an emblem quite eloquent in itself, besides the "holy" Jod within the ark! The Mystery of Agathadaemon, whose legend states, "I am Chnumis, Sun of the Universe, 700," can alone solve the mystery of Jesus, the number of whose name is 888." It is not the key of St. Peter, or the Church dogma, but the narthex -- the wand of the candidate for initiation -- that has to be wrenched from the grasp of the long-silent Sphinx of the ages. Meanwhile ----

The augurs, who, upon meeting each other, have to thrust their tongues into their cheeks to suppress a fit of laughter, may be more numerous in our own age than they ever were in the day of Sylla.

[[Vol. 2, Page]] 519 THE "FATHER OF MORTALS."

§ XX.

PROMETHEUS, THE TITAN.

HIS ORIGIN IN ANCIENT INDIA.

IN our modern day there does not exist the slightest doubt in the minds of the best European symbologists that the name Prometheus possessed the greatest and most mysterious significance in antiquity. While giving the history of Deukalion, whom the Boeotians regarded as the ancestor of the human races, and who was the Son of Prometheus, according to the significant legend, the author of the *Mythologie de la Grece Antique* remarks: "Thus Prometheus is something more than the archetype of humanity; he is its generator. In the same way that we saw Hephaestus moulding the first woman (Pandora) and endowing her with life, so Prometheus kneads the moist clay, of which he fashions the body of the first man whom he will endow with the soul-spark" (Apollodorus, l., 7, 1). After the Flood of Deukalion, Zeus, it was taught, had commanded Prometheus and Athena to call forth a new race of men from the mire left by the waters of the deluge (Ovid, *Metam.* 1, 81. *Etym. M. v.* [[Prometheus]]); and in the day of Pausanias the slime which the hero had used for this purpose was still shown in Phoea (Paus. x, 4, 4). "On several archaic monuments one still sees Prometheus modelling a human body, either alone or with Athena's help" (*Myth. Grece Ant.* 246).

The same authors remind the world of another equally mysterious personage, though one less generally known than Prometheus, whose legend offers remarkable analogies with that of the Titan. The name of this second ancestor and generator is Phoroneus, the hero of an ancient poem, now unfortunately no longer extant -- the Phoronidae. His legend was localized in Argolis, where a perpetual flame was preserved on his altar as a reminder that he was the bringer of fire upon earth (Pausanias, 11, 19, 5; Cf. 20, 3.) A benefactor of men as Prometheus was, he had made them participators of every bliss on earth. Plato (*Timaeus*, p. 22), and Clemens Alexandrinus (*Strom.* 1, p. 380) say that Phoroneus was the first man, or "the father of mortals." His genealogy, which assigns to him as his father Inachos, the river, reminds one of that of Prometheus, which makes that Titan the son of the Oceanid Clymene. But the mother of Phoroneus was the nymph Melia; a significant descent which distinguishes him from Prometheus.

Melia, Decharme thinks, is the personification of the ash-tree, whence,

[[Vol. 2, Page]] 520 THE SECRET DOCTRINE.

according to Hesiod, issued the race of the age of Bronze* (Opera et Dies, 142-145); and which with the Greeks is the celestial tree common to every Aryan mythology. This ash is the Yggdrasil of the Norse antiquity, which the Norns sprinkle daily with the waters from the fountain of Urd, that it may not wither. It remains verdant till the last days of the Golden Age. Then the Norns -- the three sisters who gaze respectively into the Past, the Present, and the Future -- make known the decree of Fate (Karma, Orlog), but men are conscious only of the Present. But when Gultweig comes (the golden ore) "the bewitching enchantress who, thrice cast into the fire, arises each time more beautiful, and fills the souls of gods and men with unapproachable longing, then the Norns . . . enter into being, and the blessed peace of childhood's dreams passes away, and Sin comes into existence with all its evil consequences . . ." and KARMA (See "Asgard and the Gods," p. 10-12). The thrice purified Gold is -- Manas, the Conscious Soul.

With the Greeks, the "ash-tree" represented the same idea. Its luxuriant boughs are the sidereal heaven, golden by day and studded with stars by night -- the fruits of Melia and Yggdrasil, under whose protecting shadow humanity lived during the Golden Age without desire as without any fear . . . "That tree had a fruit, or an inflamed bough, which was lightning," Decharme guesses.

And here steps in the killing materialism of the age; that peculiar twist in the modern mind, which, like a Northern blast, bends all on its way, and freezes every intuition, allowing it no hand in the physical speculations of the day. After having seen in Prometheus no better than fire by friction, the learned author of the "Mythologie de la Grece Antique" perceives in this "fruit" a trifle more than an allusion to terrestrial fire and its discovery. It is no longer fire, owing to the fall of lightning setting some dry fuel in a blaze, and thus revealing all its priceless benefits to Palaeolithic men; -- but something more mysterious this time, though still as earthly. . . . "A divine bird, nestled in the boughs of the celestial ash-tree, stole that bough (or the fruit) and carried it down on the earth in its bill. Now the Greek word [[Phoroneus]] is the rigid equivalent of the Sanskrit word bhuranyu ('the rapid') an epithet of Agni, considered as the carrier of the divine spark. Phoroneus, son of Melia or of the celestial ash, thus corresponds to a conception far more ancient, probably, than that one which transformed the pramantha (of the old Aryan Hindus) into the Greek Prometheus. Phoroneus is the

[[Footnote(s)]] -----

* According to the Occult teaching, three yugas passed away during the time of the Third Root-Race, i.e., the Satya, the Treta, and the Dvapara yuga, answering to the golden age of its early innocence: to the silver -- when it reached its maturity: and to the Bronze age, when, separating into sexes, they became the mighty demi-gods of old.

[[Vol. 2, Page]] 521 THE POETRY OF MODERN ORIENTALISTS.

(personified) bird, that brings the heavenly lightning to the Earth. Traditions relating to the birth and origin of the race of Bronze, and those which made of Phoroneus the father of the Argians, are an evidence to us that this thunderbolt (or lightning), as in the legends of Hephaestus or Prometheus, was the origin of the human race" (266).

This still affords us no more than the external meaning of the symbols and the allegory. It is now supposed that the name of Prometheus has been unriddled, and the modern mythologists and Orientalists see in it no longer what their fathers saw on the authority of the whole of classical antiquity. They only find therein something far more appropriate to the spirit of the age, namely, a phallic element. But the name of Phoroneus, as well as that of Prometheus, bears not one, nor even two, but a series of esoteric meanings. Both relate to the seven celestial fires; to Agni Abhimanin, his three sons, and their forty-five sons, constituting the forty-nine fires. Do all these numbers relate only to the terrestrial mode of fire and to the flame of sexual passion? Did the Hindu Aryan mind never soar above such purely sensual conceptions? that mind which is declared by Prof. Max Muller to be the most spiritual and mystically inclined on the whole globe? The number of those fires alone ought to have suggested an inkling of the truth.

We are told that one is no longer permitted, in this age of rational thought, to explain the name of Prometheus as the old Greeks did. The latter, it seems, "basing themselves on the false analogy of [[prometheus]] with the verb [[Promanthanein]], saw in him the type of the 'foreseeing' man, to whom, for the sake of symmetry, a brother was added -- Epimetheus, or 'he who takes counsel after the event.' " But now the Orientalists have decided otherwise. They know the real meaning of the two names better than those who invented them.

The legend is based upon an event of universal importance. It was built "to commemorate a great event which must have strongly impressed itself upon the imagination of the first witnesses to it, and its remembrance has never since faded out from popular memory." What is it? Laying aside every poetical fiction, all those dreams of the golden age, let us imagine -- argue the modern scholars -- in all its gross realism, the first miserable state of humanity, the striking picture of which was traced for us after AEschylus by Lucretius, and the exact truth of which is now confirmed by science; and then one may understand better that a new life really began for man, on that day when he saw the first spark produced by the friction of two pieces of wood, or from the veins of a flint. How could man help feeling gratitude to that mysterious and marvellous being which they were henceforth enabled to create at their will, and which was no sooner born, than it grew and expanded, developing with singular power. "This terrestrial flame,

[[Vol. 2, Page]] 522 THE SECRET DOCTRINE.

was it not analogous in nature to that one which they received from above, or that other which frightened them in the thunderbolt?"

"Was it not derived from the same source? And if its origin was in heaven, it must have been brought down some day on earth. If so, who was the powerful being, the beneficent being, god or man, who had conquered it? Such are the

questions which the curiosity of the Aryans offered in the early days of their existence, and which found their answer in the myth of Prometheus"; (Mythologie de la Grece Antique, p. 258).

The philosophy of Occult Science finds two weak points in the above reflections, and points them out. The miserable state of Humanity described by AEschylus and Prometheus was no more wretched then, in the early days of the Aryans, than it is now. That "state" was limited to the savage tribes; and the now-existing savages are not a whit more happy or unhappy than their forefathers were a million years ago.

It is an accepted fact in Science that "rude implements, exactly resembling those in use among existing savages," are found in river-gravels and caves geologically "implying an enormous antiquity." So great is that resemblance that, as the author of "The Modern Zoroastrian" tells us: "If the collection in the Colonial Exhibition of stone celts and arrow-heads used now by the Bushmen of South Africa were placed side by side with one from the British Museum of similar objects from Kent's Cavern or the Caves of Dordogne, no one but an expert could distinguish between them" (p. 145). And if there are Bushmen existing now, in our age of the highest civilization, who are no higher intellectually than the race of men which inhabited Devonshire and Southern France during the Palaeolithic age, why could not the latter have lived simultaneously with, and have been the contemporary of, other races as highly civilized for their day as we are for ours? That the sum of knowledge increases daily in mankind, "but that intellectual capacity does not increase with it," is shown when the intellect, if not the physical knowledge, of the Euclids, Pythagorases, Paninis, Kapilas, Platos, and Socrates, is compared with that of the Newtons, Kants, and the modern Huxleys and Haeckels. On comparing the results obtained by Dr. J. Barnard Davis, the Craniologist, worked out in 1868 (Trans. of the Royal Society of London), with regard to the internal capacity of the skull -- its volume being taken as the standard and test for judging of the intellectual capacities -- Dr. Pfaff finds that this capacity among the French (certainly in the highest rank of mankind) is 88.4 cubic inches, being thus "perceptibly smaller than that of the Polynesians generally, which, even among many Papuans and Alfuras of the lowest grade, amounts to 89 and 89.7 cubic inches"; which shows that it is the quality and not the quantity of the brain that is the cause of intellectual capacity. The

[[Vol. 2, Page]] 523 THE BOON GIVEN BY PROMETHEUS.

average index of skulls among various races having been now recognized to be "one of the most characteristic marks of difference between different races," the following comparison is suggestive: "The index of breadth among the Scandinavians (is) at 75: among the English at 76; among Holsteiners at 77; in Bresgau at 80; Schiller's skull shows an index of breadth even of 82 . . . the Madurese also 82!" Finally, the same comparison between the oldest skulls known and the European, brings to light the startling fact "that most of these old skulls, belonging to the stone period, are above rather than below the average of the brain of the now living man in volume." Calculating the measures for the height, breadth, and length in inches from the average measurements of several skulls, the following sums are obtained:--

1. Old Northern skulls of the stone age 18.877 ins.
2. Average of 48 skulls of the same period from England 18.858 "
3. Average of 7 skulls of the same period from Wales 18.649 "
4. Average of 36 skulls of the stone age from France 18.220 "

The average of the now living Europeans is 18.579 inches; of Hottentots, 17.795 inches!

Which figures show plainly "that the size of the brain of the oldest populations known to us is not such as to place them on a lower level than that of the now living inhabitants of the Earth" ("The Age and Origin of Man"). Besides which, they show the "missing link" vanishing into thin air. Of these, however, more anon: we must return to our direct subject.

The race which Jupiter so ardently desired "to quench, and plant a new one in its stead" (Aesch. * 241), suffered mental, not physical misery. The first boon Prometheus gave to mortals, as he tells the "Chorus," was to hinder them "from foreseeing death" (256); he "saved the mortal race from sinking blasted down to Hades' gloom" (244); and then only, "besides" that, he gave them fire (260). This shows plainly the dual character, at any rate of the Promethean myth, if Orientalists will not accept the existence of the seven keys taught in Occultism. This relates to the first opening of man's spiritual perceptions, not to his first seeing or discovering fire. For fire was never "discovered," but existed on earth since its beginning. It existed in the seismic activity of the early ages, volcanic eruptions being as frequent and constant in those periods as fog is in England now. And if we are told that men appeared so late on Earth that nearly all the volcanoes, with the exception of a few, were already extinct, and that geological disturbances had made room for a more settled state of things, we answer: Let a new race of men -- whether evolved from angel or gorilla -- appear now on any uninhabited

[[Vol. 2, Page]] 524 THE SECRET DOCTRINE.

spot of the globe, with the exception perhaps of the Sahara, and a thousand to one it would not be a year or two old before discovering fire, through the fall of lightning setting in flames grass or something else. This assumption, that primitive man lived ages on earth before he was made acquainted with fire, is one of the most painfully illogical of all. But old AEschylus was an initiate, and knew well what he was giving out.*

No occultist acquainted with symbology and the fact that Wisdom came to us from the East, will deny for a moment that the myth of Prometheus has reached Europe from Aryavarta. Nor is he likely to deny that in one sense Prometheus represents fire by friction. Therefore, he admires the sagacity of M. F. Baudry, who shows in his *Les Mythes du feu et breuvage celeste* (Revue germanique, 1861 p. 356)** one of the aspects of Prometheus and his origin from India. He shows the reader the supposed primitive process to obtain fire, still in use to-day in India to light the sacrificial flame. This is what he says:--

"This process, such as it is minutely described in the Vedic Sutras, consists in rapidly turning a stick in a socket made in the centre of a piece of wood. The friction develops intense heat and ends by setting on fire the particles of wood in contact. The motion of the stick is not a continuous rotation, but a series of motions in contrary senses, by means of a cord fixed to the stick in its middle: the operator holds one of the ends in each hand and pulls them alternately. . . . The full process is designated in Sanskrit by the verb manthami, mathnani; which means 'to rub, agitate, shake and obtain by rubbing,' and is especially applied to rotatory friction, as proved by its derivation from mandala, which signifies a circle. . . . The pieces of wood serving for the production of fire have each their name in Sanskrit. The stick which turns is called pramantha; the discus which receives it is called arani and arani: "the two aranis" designating the ensemble of the instrument" (p. 358 et seq.).***

It remains to be seen what the Brahmins will say to this. But supposing Prometheus has been conceived in one of the aspects of his

[[Footnote(s)]] -----

* The modern attempt of some Greek scholars (poor and pseudo scholars, they would have appeared in the day of the old Greek writers!) to explain the real meaning of the ideas of AEschylus, which, being an ignorant ancient Greek, he could not express so well himself, is absurdly ludicrous!

** See also his Memoires de la Societe de la Linguistique following the "Fire Myths," (Vol. I, p. 337, et seq.)

*** There is the upper and nether piece of timber used to produce this sacred fire by attrition at sacrifices, and it is the arani which contains the socket. This is proven by an allegory in the Vayu Purana and others, which tell us that Nemi, the son of Ikshwaku, had left no successor, and that the Rishis, fearing to leave the earth without a ruler, introduced the king's body into the socket of an arani -- like an upper arani -- and produced from it a prince named Janaka. "It was by reason of the peculiar way in which he was engendered that he was called Janaka." (But see Goldstucker's Sanskrit Dictionary at the word Arani.) Devaki, Krishna's mother, in prayer addressed to her, is called "the arani whose attrition engenders fire."

[[Vol. 2, Page]] 525 GREEK IDEAS MISUNDERSTOOD.

myth as the producer of fire by means of pramantha, or as an animate and divine pramantha, would this imply that the symbolism had no other than the phallic meaning attributed to it by the modern symbologists? Decharme, at any rate, seems to have a correct glimmering of the truth; for he unconsciously corroborates by his remarks all that the Occult sciences teach with regard to the Manasa Devas, who have endowed man with the consciousness of his immortal soul: that consciousness which hinders man "from foreseeing death," and makes him know he is immortal. * "How has Prometheus got into the possession of the (divine) spark?" he asks. "Fire having its abode in heaven, it is there he must have gone to find it before he could carry it down to men, and, to approach the gods, he must have been a god himself." The Greeks held that he was of the divine race; the Hindus, that he was a Deva. Hence "with the Greeks he was the son of the Titan Iapetos," [[Iapetonides]] (Theog. 528) "But celestial fire belonged in the beginning to the gods alone; it was a treasure they reserved for themselves . . . over which they jealously watched . . . 'The prudent son of Iapetus,' says Hesiod, 'deceived Jupiter by stealing and concealing in the cavity of a narthex, the indefatigable fire of the resplendent glow' (Theog. 565) . . . Thus the gift made by Prometheus to men was a conquest made from heaven. . . ." "Now according to Greek ideas," (identical in this with those of the Occultists) "this possession forced from Jupiter, this human trespassing upon the property of the gods, had to be followed by an expiation. . . . Prometheus, moreover, belongs to that race of Titans who had rebelled** against the gods, and whom the master of Olympus had hurled down into Tartarus; like them, he is the genius of Evil, doomed to cruel suffering, etc., etc."

That which is revolting in the explanations that follow, is the one-sided view taken of this grandest of all the myths. The most intuitional among modern writers cannot or will not rise in their conceptions above the level of the Earth and Cosmic phenomena. It is not denied that the moral idea in the myth, as presented in the Theogony of Hesiod, plays a certain part in the primitive Greek conception. The Titan is more than a thief of the celestial fire. He is the representation of humanity - active, industrious, intelligent, but at the same time ambitious, which aims at equalling divine powers. Therefore it is humanity punished in the person of Prometheus, but it is only so with the Greeks. With the latter, Prometheus is not a

[[Footnote(s)]] -----

* The monad of the animal is as immortal as that of man, yet the brute knows nothing of this; it lives an animal life of sensation just as the first human would have lived, when attaining physical development in the Third Race, had it not been for the Agnishwatta and the Manasa Pitris.

** The fallen angels, therefore; the Asuras of the Indian Pantheon.

[[Vol. 2, Page]] 526 THE SECRET DOCTRINE.

criminal, save in the eyes of the gods. In his relation with the Earth, he is, on the contrary, a god himself, a friend of mankind ([[philanthropos]]), which he has raised to civilization and initiated into the knowledge of all the arts; a conception which found its most poetical expounder in AEschylus. But with all other nations Prometheus is -- what? The fallen Angel, Satan, as the Church would have it? Not at all. He is simply the image of the pernicious and dreaded effects of lightning. He is the "evil fire" (mal feu) and the symbol of the divine reproductive male organ. "Reduced to its simple expression, the myth we are trying to explain is then simply a (Cosmic) genius of fire" (p. 261). It is the former idea (the phallic) which was pre-eminently Aryan, if we believe Ad. Kuhn (in his Herabkunft des Feuers und des Gottertranks) and Baudry. For --

"The fire used by man being the result of the action of pramantha in the arani, the Aryas must have ascribed (?) the same origin to celestial fire, and they must* have imagined (?) that a god armed with pramantha, or a divine pramantha,

exercised in the bosom of the clouds a violent friction, which gave birth to lightning and thunderbolts. . . . This idea is supported by the fact that, according to Plutarch's testimony (Philosoph. Plant., iii. 3), the Stoics thought that thunder was the result of the struggle of storm-clouds and lightning -- a conflagration due to friction; while Aristotle saw in the thunderbolt only the action of clouds which clashed with each other. What was this theory, if not the scientific translation of the production of fire by friction? Everything leads us to think that, from the highest antiquity, and before the dispersion of the Aryans, it was believed that the pramantha lighted fire in the storm cloud as well as in the aranis." (Revue Germanique, p. 368.)

Thus, suppositions and idle hypotheses are made to stand for discovered truths. Defenders of the Bible dead-letter could never help the writers of missionary tracts more effectually, than do materialistic Symbologists in thus taking for granted that the ancient Aryans based their religious conceptions on no higher thought than the physiological.

But it is not so, and the very spirit of Vedic philosophy is against such an interpretation. And if, as Decharme himself confesses, "this idea of the creative power of fire is explained at once by the ancient assimilation of the human soul to a celestial spark," as shown by the imagery often made use of in the Vedas when speaking of Arani, it would mean something higher than simply a gross sexual conception. A hymn to Agni in the Veda is cited as example:-- "Here is the pramantha, the generator is ready. Bring the mistress of the race (the female Arani). Let us produce Agni by attrition, according

[[Footnote(s)]] -----

* The italics are ours; they show how assumptions are raised to laws in our day.

[[Vol. 2, Page]] 527 THE SIX BROTHERS OF KRISHNA.

to ancient custom" -- which means no worse than an abstract idea expressed in the tongue of mortals. The "female Arani," the mistress of the race, is Aditi, the mother of the gods, or Shekinah, eternal light -- in the world of Spirit, the "Great Deep" and CHAOS; or primordial Substance in its first remove from the UNKNOWN, in the manifested Kosmos. If, ages later, the same epithet is applied to Devaki, the mother of Krishna, or the incarnated LOGOS; and if the symbol, owing to the gradual and irrepressible spread of exoteric religions, may already be regarded as having a sexual significance, this in no way mars the original purity of the image. The subjective had been transformed into the objective; Spirit had fallen into matter. The universal kosmic polarity of Spirit-Substance had become, in human thought, the mystic, but still sexual union of Spirit and Matter, and had thus acquired an anthropomorphic colouring which it had never had in the beginning. Between the Vedas and the Puranas there is an abyss of which both are the poles, like the seventh (atmic) and the first or lowest principle (the physical body) in the Septenary constitution of man. The primitive, purely spiritual language of the Vedas, conceived many decades of millenniums earlier, had found its purely human expression for the purpose of describing events taking place 5,000 years ago, the date of Krishna's death (from which day the Kali Yuga, or Black-Age, began for mankind).

As Aditi is called Surarani (the matrix or "mother" of the sura gods), so Kunti, the mother of the Pandavas, is called in Mahabharata Pandavarani -- which term is already physiologized. But Devaki, the antetype of the Roman Catholic Madonna, is a later anthropomorphized form of Aditi. The latter is the goddess mother, the "Deva-matri" of Seven Sons (the six and the seven Adityas of early Vedic times); the mother of Krishna, Devaki, has six embryos conveyed into her womb by Jagaddhatri (the "nurse of the world"), the seventh (Krishna, the Logos,) being transferred to that Rohini. Mary, the mother of Jesus, is the mother of seven children, of five sons and two daughters, (a later transformation of sex) in Matthew's Gospel (xiii. 55-56). No one of the worshippers of the Roman Catholic Virgin would object to reciting in her honour the prayer addressed by the gods to Devaki. Let the reader judge.

"Thou art that Prakriti (essence), infinite and subtle, which bore Brahma in its womb. Thou eternal being, comprising in thy substance the essence of all created things, wast identical with creation; thou wast the parent of the triform sacrifice, becoming the germ of all. . . . Thou art sacrifice, whence all fruit proceeds; thou art the arani whose attrition engenders fire" . . . ("Womb of Light," "holy Vessel," are the epithets of the Virgin). "As Aditi, thou art the parent of the gods. . . . Thou art Jyotsna (the morning twilight)." The Virgin

[[Vol. 2, Page]] 528 THE SECRET DOCTRINE.

is often addressed as the "morning Star" and the "star of Salvation" -- the light whence day is begotten. "Thou art Samnati (humility, a daughter of Daksha), the mother of Wisdom; thou art Niti, the parent of harmony (Naya); thou art modesty, the progenitrix of affection (Prasraya or vinaya); thou art desire, of whom love is born. . . . Thou art the mother of knowledge (Avabodha); patience (Dhriti), the parent of fortitude (Dhairya) . . . etc., etc."

Thus arani is shown here as the Roman Catholic "vase of election" and no worse. As to its primitive meaning, it was purely metaphysical. No unclean thought traversed these conceptions in the ancient mind. Even in the Zohar -- far less metaphysical than any other symbolism -- the idea is an abstraction and nothing more. Thus, when the Zohar (iii., 290) says: "All that which exists, all that which has been formed by the ancient, whose name is holy, can only exist through a male and female principle," it means no more than this: "The divine Spirit of Life is ever coalescing with matter." It is the WILL of the Deity that acts; and the idea is purely Schopenhauerian. "When Atteekah Kaddosha, the ancient and the concealed of the concealed, desired to form all things, it formed all things like male and female. This wisdom comprises ALL when it goeth forth." Hence Chochmah (male wisdom) and Binah (female consciousness or Intellect) are said to create all between the two -- the active and the passive principles. As the eye of the expert jeweller discerns under the rough and uncouth oyster shell the pure immaculate pearl, enshrined within its bosom, his hand dealing with the former but to get at its, so the eye of the true philosopher reads between the lines of the Puranas the sublime Vedic truths, and corrects the form with the help of the Vedantic wisdom. Our Orientalists, however, never perceive the pearl under the thick coating of the shell, and -- act accordingly.

From all that has been said in this section, one sees clearly that, between the Serpent of Eden and the Devil of Christianity, there is an abyss. Alone the sledge hammer of ancient philosophy can kill this dogma.

[[Vol. 2, Page]] 529 WHO INVENTED WRITING?

§ XXI.

ENOICHION-HENOCH.

THE history of the evolution of the Satanic myth would not be complete if we omitted to notice the character of the mysterious and Cosmopolitan Enoch, variously called Enos, Hanoch, and finally Enoichion by the Greeks. It is from his Book that the first notions of the Fallen Angels were taken by the early Christian writers.

The "Book of Enoch" is declared apocryphal. But what is an Apocrypha? The very etymology of the term shows that it is simply a secret book, i.e., one that belonged to the catalogue of temple libraries under the guardianship of the Hierophants and initiated priests, and was never meant for the profane. Apocrypha comes from the verb Crypto, [[krupto]], "to hide." For ages the Enoichion (the Book of the SEER) was preserved in the "city of letters" and secret works -- the ancient Kirjath-Sepher, later on, Debir (see Joshua xv., 15).

Some of the writers interested in the subject -- especially Masons -- have tried to identify Enoch with Thoth of Memphis, the Greek Hermes, and even with the Latin Mercury. As individuals, all these are distinct one from the other; professionally -- if one may use this word, now so limited in its sense -- they belong one and all to the same category of sacred writers, of Initiators and Recorders of Occult and ancient Wisdom. Those who in the Quran (see Surat XIX.) are generically termed the Edris, or the "Learned" (the Initiated), bore in Egypt the name of "Thoth," the inventor of arts, sciences, writing or letters, of music and astronomy. Among the Jews the Edris became "Enoch," who, according to Bar-Hebraeus, "was the first inventor of writing," books, arts, and sciences, the first who reduced to a system the progress of the planets. In Greece he was called Orpheus, and thus changed his name with every nation. The number Seven being attached to, and connected with, each of those primitive Initiators,* as well as the number 365, of the days in the year, astronomically, it identifies the mission, character, and the sacred office of all those men, but certainly not their personalities. Enoch is the seventh Patriarch; Orpheus is the possessor of the phorminx, the 7-stringed lyre, which is the seven-fold mystery of initiation. Thoth, with the seven-rayed Solar Discus on his head, travels in the Solar boat, the 365 degrees, jumping out every fourth (leap) year for one day. Finally, Thoth-Lunus is the septenary

[[Footnote(s)]] -----

* Khanoch, or Hanoch, or Enoch means the "Initiator" and "teacher," as well as the "Son of Man," Enos (vide Genesis iv., 26), esoterically.

[[Vol. 2, Page]] 530 THE SECRET DOCTRINE.

god of the seven days, or the week. Esoterically and spiritually, Enoichion means the "Seer of the Open Eye."

The story about Enoch, told by Josephus, namely, that he had concealed under the pillars of Mercury or Seth his precious rolls or books, is the same as that told of Hermes, "the father of Wisdom," who concealed his books of Wisdom under a pillar, and then, finding the two pillars of stone, found the science written thereon. Yet Josephus, notwithstanding his constant efforts in the direction of Israel's unmerited glorification, and though he does attribute that science (of Wisdom) to the Jewish Enoch -- writes history. He shows those pillars as still existing during his own time. He tells us that they were built by Seth; and so they may have been, only neither by the Patriarch of that name, the fabled son of Adam, nor by the Egyptian god of Wisdom -- Teth, Set, Thoth, Tat, Sat (the later Sat-an), or Hermes, who are all one, -- but by the "sons of the Serpent-god," or "Sons of the Dragon," the name under which the Hierophants of Egypt and Babylon were known before the Deluge, as were their forefathers, the Atlanteans.

What Josephus tells us, therefore, must be allegorically true, with the exception of the application made of it. According to his version the two famous pillars were entirely covered with hieroglyphics, which, after the discovery, were copied and reproduced in the most secret corners of the inner temples of Egypt, and have thus become the source of its Wisdom and exceptional learning. These two "pillars," however, are the prototypes of the two "tables of stones" hewn by Moses at the command of the "Lord." Hence, in saying that all the great adepts and mystics of antiquity -- like Orpheus, Hesiod, Pythagoras and Plato -- got the elements of their theology from those hieroglyphics, he is right in one sense, and wrong in another; for he errs in accuracy. The Secret Doctrine teaches us that the arts, sciences, theology, and especially the philosophy of every nation which preceded the last universally known, but not universal Deluge, had been recorded ideographically from the primitive oral records of the Fourth Race, and that these were the inheritance of the latter from the early Third Root-Race before the allegorical Fall. Hence, also, the Egyptian pillars, the tablets, and even the "white Oriental porphyry stone" of the Masonic legend -- which Enoch, fearing that the real and precious secrets would be lost, concealed before the Deluge in the bowels of the Earth -- were simply the more or less symbolical and allegorical copies from the primitive Records. The "Book of Enoch" is one of such copies and is a Chaldean, now very incomplete compendium. As already said, Enoichion means in Greek the "inner eye," or the Seer; in Hebrew, and with the help of Masoretic points it means the initiator and instructor, [[hebrew]]. It is a generic title; besides which his legend is

[[Vol. 2, Page]] 531 THE ADEPT DIES BUT TO LIVE.

that of several other prophets, Jewish and heathen, with changes of made-up details, the root-form being the same. Elijah is also taken up into Heaven alive; and the astrologer, at the court of Isdubar, the Chaldean Hea-bani, is likewise raised to heaven by the god Hea, who was his patron, as Jehovah was of Elijah (whose name means in Hebrew "God-Jah,"

Jehovah, [[hebrew]], and again of Elihu, which has the same meaning. This kind of easy death, or euthanasia, has an esoteric meaning. It symbolises the death of any adept who has reached the power and degree, as also the purification, which enable him to die only in the physical body and still live and lead a conscious life in his astral body. The variations on this theme are endless, but the secret meaning is ever the same. The Pauline expression (Hebrews xi. 5) "that he should not see death" -- ut non videret mortem -- has thus an esoteric meaning, but nothing supernatural in it. The mangled interpretation given of some Biblical hints to the effect that Enoch, "whose years will equal those of the world," (of the Solar year, 365 days,) will share with Christ and the prophet Elijah the honours and bliss of the last advent and of the destruction of Antichrist -- signify, esoterically, that some of the great adepts will return in the Seventh Race, when all Error will be made away with, and the advent of TRUTH will be heralded by those Sishta, the holy "Sons of Light."

The Latin church is not always logical, nor prudent either. She declares the "Book of Enoch" an apocrypha, and has gone so far as to claim, through Cardinal Cajetan and other luminaries of the Church, the rejection from the Canon of even the Book of Jude, who, though an inspired apostle, quotes from and thus sanctifies the Book of Enoch, which is alleged to be an apocryphal work. Fortunately, some of the dogmatics perceived the peril in time. Had they accepted Cajetan's resolution, they would have been forced to reject likewise the fourth Gospel; as St. John borrows literally from Enoch, and places in the mouth of Jesus, a whole sentence! (Vide supra, § XVIII., sub-sect. A, about the sheep and the robbers.)

Ludolph, the "father of Ethiopic literature," commissioned to investigate the various Enochian MSS. presented by Pereisc, the traveller, to the Mazarine Library, declared that "no book of Enoch could exist among the Abyssinians"! Further researches and discoveries worsted his too dogmatic assertion, as all know. Bruce and Ruppel found and brought that same work from Abyssinia some years later, and Bishop Laurence translated it. But Bruce despised it, and scoffed at its; as did all the rest of the Scientists. He declared it "a Gnostic work," in which "the age of giants who devour " men -- is given . . . hence it is another "Apocalypse." Giants! another fairy-tale.

[[Vol. 2, Page]] 532 THE SECRET DOCTRINE.

Such, however, was not the opinion of all the best critics. Dr. Hanneberg places the Book of Enoch along with the Third Book of the Maccabees, at the head of the list of those whose authority stands the nearest to that of the canonical works.

Verily, "where doctors disagree . . ."

As usual, however, they were all right and all wrong. To accept Enoch as a Biblical character, a single living man, is like accepting Adam as the first one. Enoch was a generic title, applied to, and borne by, scores of individuals, at all times and ages, and in every race and nation. This may be easily inferred from the fact that the ancient Talmudists and the teachers of Midrashim are not agreed generally in their views about Hanokh, the Son of Yered. . . . Some say Enoch was a great Saint, beloved by God, and taken alive to heaven (i.e., one who reached Mukti or Nirvana, on earth, as Buddha did and others still do); and others maintain that he was a sorcerer, a wicked magician. This shows only that Enoch, or its equivalent, was a term, even during the days of the later Talmudists, which meant "Seer," "Adept in the Secret Wisdom," etc., without any specification as to the character of the title-bearer. When Josephus, speaking of Elijah and Enoch (Antiquities, ix., 2), remarks that "it is written in the sacred books they (Elijah and Enoch) disappeared, but so that nobody knew that they died," it means simply that they had died in their personalities, as Yogis die to this day in India, or even some Christian monks to the world. They disappear from the sight of men and die -- on the terrestrial plane -- even for themselves. A seemingly figurative way of speaking, yet literally true.

"Hanokh transmitted the science of (astronomical) calculation and of computing the seasons to Noah," says the Midrash Pirkah R. Eliezar (cap. viii.), referring to Henoch that which others did to Hermes Trismegistus, because the two are identical in their esoteric meaning. "Hanokh" in this case, and his "Wisdom," belong to the cycle of the Fourth Atlantean Race,* and Noah to that of the Fifth.** In this case both represent the Root-Races, the present one and the one that preceded it. In another sense, Enoch disappeared, "he walked with God, and he was not, for God took him," the allegory referring to the disappearance of the Sacred and Secret knowledge from among men; for "God" (or Java Aleim -- the high hierophants, the heads of the colleges of initiated priests***) took him; in other words, the Enochs or the Enoichions, the Seers and their knowledge and wisdom, became strictly

[[Footnote(s)]] -----

* Says the Zohar, "Hanokh had a book which was one with the book of the generations of Adam; this is the Mystery of Wisdom."

** Noah is heir to the Wisdom of Enoch; in other words, the Fifth is heir to the Fourth Race.

*** Vide Isis Unveiled, Vol. I, p. 575, et seq.

[[Vol. 2, Page]] 533 WHAT ENOCH IS, ESOTERICALLY.

confined to the Secret Colleges of the Prophets, with the Jews, and to the temples with the Gentiles.

Interpreted with the help of merely the symbolical key, Enoch is the type of the dual nature of man -- spiritual and physical. Hence he occupies the centre of the astronomical cross (given by Eliphaz Levi from a secret work), which is a six-pointed star, "the Adonai." In the upper triangle is the Eagle; in the left lower triangle stands the lion; in the right, the bull: while between the bull and the lion, over them and under the eagle, is the face of Enoch or man. (Vide illustrated diagram in Isis Unveiled, Vol. II., p. 452). Now the figures on the upper triangle represent the Four Races, leaving out the first -- the Chhayas or Shadows -- and the "Son of Man," Enos or Enoch, is in the centre, because he stands between the two (the Fourth and the Fifth) Races, as he represents the Secret Wisdom of both. These are the four animals of Ezekiel and of the Revelation. The same double triangle which in Isis, Vol. II, (p. 453), faces the Hindu Adanari, is by far the best. For there, only the three (for us) historical races are symbolized: the third, the androgynous, by Ada-nari; the fourth,

symbolized by the strong, powerful lion; and the fifth -- the Aryan -- by that which is its most sacred symbol to this day, the bull (and the cow).

A man of great erudition -- a French savant -- M. de Sacy, finds several most singular statements in the Book of Enoch, "worthy of the most serious examination," he says. For instance, "the author (Enoch) makes the solar year consist of 364 days, and seems to know periods of three, of five, and of eight years, followed by four supplementary days, which, in his system, appear to be those of the equinoxes and solstices."* To which he adds, later on, "I see but one means to palliate them (these 'absurdities'), it is to suppose that the author expounds some fanciful system which may have existed BEFORE THE ORDER OF NATURE HAD BEEN ALTERED AT THE PERIOD OF THE UNIVERSAL DELUGE."

Precisely so; and the Secret Doctrine teaches that that "order of nature" has been thus altered, and the series of the Earth's humanities too. For, as the angel Uriel tells Enoch: "Behold, I have showed thee all things, O Enoch; and all things have I revealed to thee. Thou seest the Sun, the Moon, and those which conduct the stars in Heaven, which cause all their operations, seasons, and arrivals to return. In the days of sinners THE YEARS SHALL BE SHORTENED the moon shall change its laws, etc." (chap. lxxix). In those days also, years before the great Deluge that carried away the Atlanteans and changed the face of the whole earth -- because "the earth (on its axis) became inclined" --

[[Footnote(s)]] -----

* See Daniello's criticisms upon De Sacy, in the Annales de Philosophic, p. 393.

[[Vol. 2, Page]] 534 THE SECRET DOCTRINE.

nature, geologically, astronomically, and cosmically in general, could not have been the same, just because the Earth had inclined. See chap. 1xiv. (Sect. xi.) "And Noah cried with a bitter voice 'Hear me, hear me, hear me'; three times. And he said 'The earth labours and is violently inclined; surely, I shall perish with it.'"

This, by the way, looks like one of those many "inconsistencies," if the Bible is read literally. For, to say the least, this is a very strange fear in one who had "found grace in the eyes of the Lord" and been told to build an ark! But here we find the venerable Patriarch expressing as much fear as if, instead of a "friend" of God, he had been one of the Giants doomed by the wrathful deity. The earth has already inclined, and the deluge of waters has become simply a question of time, and yet Noah seems to know nothing of his intended salvation.

A decree had come indeed; the decree of nature and the Law of Evolution, that the earth should change its race, and that the Fourth Race should be destroyed to make room for a better one. The Manvantara had reached its turning point of three and a half Rounds, and gigantic physical Humanity had reached the acme of gross materiality. Hence the apocalyptic verse that speaks of a commandment gone forth that they may be destroyed, "that their end may be" (of the race); for they knew truly "every secret of the angels, every oppressive and secret power of the Satans, and every power of those who commit sorcery, as well as of those who make molten images in the whole earth."

And now a natural question. Who could have informed the apocryphal author of this powerful vision (to whatever age he may be assigned before the day of Galileo) that the Earth could occasionally incline her axis? Whence has he derived such astronomical and geological knowledge if the Secret Wisdom, of which the ancient Rishis and Pythagoras had drunk, is but a fancy, an invention of the later ages? Has Enoch read prophetically perchance in Frederick Klee's work on the Deluge (p. 79) these lines: "The position of the terrestrial globe with reference to the Sun has evidently been, in primitive times, different from what it is now; and this difference must have been caused by a displacement of the axis of rotation of the Earth."?

This reminds one of that other unscientific statement made by the Egyptian priests to Herodotus, namely, that the Sun has not always risen where it arises now, and that in former times the ecliptic had cut the equator at right angles.*

There are many such "dark sayings" throughout Puranas, Bible and Mythology; and to the occultist they divulge two facts: (a) that the ancients knew as well, and better, perhaps, than the moderns

[[Footnote(s)]] -----

* Astronomie Ancienne, Bailly, Vol. I., p. 203, and Vol. II., p. 216.

[[Vol. 2, Page]] 535 ST. AUGUSTINE AND ENOCH.

do, astronomy, geognosy and cosmography in general; and (b) that the globe and its behaviour have altered more than once since the primitive state of things. Thus, on the blind faith of his "ignorant" religion, which taught that Phaeton, in his desire to learn the hidden truth, made the Sun deviate from its usual course -- Xenophantes asserts somewhere that, "the Sun turned toward another country"; which is a parallel, however slightly more scientific, if as bold, of Joshua stopping the course of the Sun altogether. Yet it may explain the teaching of the Northern mythology (in Jeruskoven) that, before the actual order of things, the Sun arose in the South, and its placing the Frigid Zone in the East, whereas now it is in the North.

The Book of Enoch, in short, is a resume, a compound of the main features of the History of the Third, Fourth and Fifth Races; a very few prophecies from the present age of the world; a long retrospective, introspective and prophetic summary of universal and quite historical events -- geological, ethnological, astronomical, and psychic -- with a touch of theogony out of the antediluvian records. The Book of this mysterious personage is referred to and quoted copiously in the Pistis Sophia, and also in the Zohar and its most ancient Midrashim. Origen and Clement of Alexandria held it in the highest esteem. To say, therefore, that it is a post-Christian forgery is to utter an absurdity and to become guilty of an anachronism, since Origen, among others, lived in the second century of the Christian era, yet he mentions it as an ancient and venerable work. The secret and sacred name and its potency are well and clearly though allegorically

described in the old volume. From the XVIIIth to the Lth chapter, the Visions of Enoch are all descriptive of the Mysteries of Initiation, one of which is the Burning Valley of the "Fallen Angels."

Perhaps St. Augustine was quite right in saying that the Church rejected the BOOK OF ENOCH out of her canon owing to its too great antiquity, ob nimiam antiquitatem.* There was no room for the events noticed in it within the limit of the 4004 years B.C. assigned to the world from its "creation"!

§ XXII.

THE SYMBOLISM OF THE MYSTERY-NAMES IAO AND JEHOVAH, WITH THEIR RELATION TO THE CROSS AND CIRCLE.

WHEN the Abbe Louis Constant -- known as Eliphas Levi -- said in his *Histoire de la Magie* that the "Sepher Jezirah, the Zohar, and the Apocalypse (of St. John) are the master-pieces of the Occult Sciences," he ought, if he wanted to be correct and clear, to have added, "in Europe." It is quite true that these works contain "more significance than words"; and that "its expression is poetical, while in numbers it is exact." Unfortunately, before any one can appreciate the poetry of the expressions, or the exactness of the numbers, he will have to learn the real significance and meaning of the terms and symbols used. And man will never learn this so long as he remains ignorant of the fundamental principle of the Secret Doctrine, whether in Oriental Esotericism, or in the Kabalistical symbology:-- the key, or value, in all their aspects, of the "God"-names, "Angel"-names, and "Patriarchal" names in the Bible -- their mathematical or geometrical value, and their relations to manifested nature.

Therefore, if, on the one hand, the Zohar "astonishes (the mystic) by the profundity of its views and the great simplicity of its images," on the other hand, that work misleads the student by such expressions as those used with respect to AIN-SOPH and Jehovah, notwithstanding the assurance that "the book is careful to explain that the human form with which it clothes God is but an image of the word, and that God should not be expressed by any thought, or any form." It is well known that Origen, Clemens, and the Rabbis confessed, with regard to the Kabala and the Bible, to their being veiled and secret Books; but few know that the esotericism of the Kabalistic books in their present re-edited form is simply another and still more cunning veil thrown upon the primitive symbolism of these secret volumes.

The idea of representing the hidden deity by the circumference of a Circle, and the Creative Power (male and female, or the Androgynous WORD), by the diameter across it, is one of the oldest symbols. It is upon this conception that every great Cosmogony was built. With the old Aryans, the Egyptians, and the Chaldeans, it was complete, as it embraced the idea of the eternal and immovable Divine Thought in its absoluteness, separated entirely from the incipient stage of (the so-called)

[[Vol. 2, Page]] 537 THE JEWS ALONE THE HEIRLOOM OF JEHOVAH.

creation; and comprised psychological and even Spiritual evolution, and its mechanical work, or cosmogonical construction. With the Hebrews, however, though the former conception is to be distinctly found in the Zohar, and the Sepher Jezirah -- or what remains of the latter -- that which has been embodied subsequently in the Pentateuch proper, and especially in Genesis, is simply this secondary stage, to wit, the mechanical law of creation, or rather of construction; while theogony is hardly, if at all, outlined.

It is only in the first six chapters of Genesis, in the rejected Book of Enoch, and the misunderstood and mistranslated poem of Job, that true echoes of the archaic doctrine may now be found. The key to it is lost, even among the most learned Rabbis, whose predecessors in the early period of the middle ages have preferred, in their national exclusiveness and pride, and especially in their profound hatred of Christianity, to cast it into the deep sea of oblivion, rather than to share their knowledge with their relentless and fierce persecutors. Jehovah was their own tribal property, inseparable from, and unfit to play a part in, any other but the Mosaic Law. Violently torn out of his original frame, which he fitted and which fitted him, the "lord god of Abraham and Jacob" could hardly be crammed without damage and breakage into the new Christian Canon. Being the weakest, the Judeans could not help the desecration; but they kept the secret of the origin of their Adam Kadmon, or male-female Jehovah; and the new tabernacle proved a complete misfit for the old god: they were, indeed, avenged!

The statement that Jehovah was the tribal god of the Jews and no higher, will be denied like many other things. Yet the theologians are not in a position to tell us, in that case, the meaning of verses 8 and 9 in Deuteronomy, chapter xxxii. These verses say quite plainly: "When the MOST HIGH (not the "Lord," or "Jehovah" either) divided to the nations their inheritance, when he separated the Sons of Adam he set the bounds . . . according to the number of the children of Israel. . . . The Lord's (Jehovah's) portion is his people; Jacob is the lot of his inheritance." This settles the question. So impudent were the modern translators of Bibles and Scriptures and so damaging are these verses, that, following in the steps traced for them by their worthy Church Fathers, each translator rendered these verses in his own way. While the above-cited quotation is taken verbatim from the authorized English version, in the French Bible (of the Protestant Biblical Society of Paris, according to the version revised in 1824 by J. E. Ostervald) one finds the "Most High" translated by Soverain (a Sovereign!!), the "sons of Adam" rendered by "the children of men," and the "Lord" changed into the "Eternal." For impudent sleight-of-hand, the French Protestant Church seems thus to have surpassed even English ecclesiasticism.

[[Vol. 2, Page]] 538 THE SECRET DOCTRINE.

Nevertheless, one thing is patent: the "Lord's ("Jehovah's") portion" is his "chosen people" and none else, for, Jacob alone is the lot of his inheritance. What, then, have other nations, who call themselves Aryans, to do with this Semitic deity, the tribal god of Israel? Astronomically, the "Most High" is the Sun, and the "Lord" is one of his seven planets, whether it be Iao, the genius of the moon, or Ilda-Baath-Jehovah, that of Saturn, according to Origen and the Egyptian Gnostics.* Let the "Angel Gabriel," the "Lord" of Iran, watch over his people; and Michael-Jehovah, over his Hebrews. These are not the gods of other nations, nor were they ever those of Jesus. As each Persian Dev is chained to his planet (see Origen's Copy of the Chart), so each Hindu Deva (a "Lord") has its allotted portion, a world, a planet, a nation or a race. Plurality of worlds implies plurality of gods. We believe in the former, and may recognize, but will never worship, the latter. (Vide Part III., "On Chains of Worlds and their Plurality.")

It has been repeatedly stated in this work that every religious and philosophical symbol had seven meanings attached to it, each pertaining to its legitimate plane of thought, i.e., either purely metaphysical or astronomical; psychic or physiological, etc., etc. These seven meanings and their applications are hard enough to learn when taken by themselves; but the interpretation and the right comprehension of them become tenfold more puzzling, when, instead of being correlated, or made to flow consecutively out of and to follow each other, each, or any one of these meanings is accepted as the one and sole explanation of the whole symbolical idea. An instance may be given, as it admirably illustrates the statement. Here are two interpretations given by two learned Kabbalists and scholars, of one and the same verse in Exodus, xxxiii, 18-23. Moses beseeches the Lord to show him his "glory." Evidently it is not the crude dead letter phraseology as found in the Bible that is to be accepted. There are seven meanings in the Kabala, of which we may give two as interpreted by the said two scholars. One of them quotes, while explaining: "Thou canst not see my face . . . I will put thee in the cleft of the rock . . . cover thee with my hand while I pass by. And then I will take away mine hand, and thou shalt see my a'hoor, my back; . . ." and tells us in a gloss, "That is, I will show you 'My back,' i.e., my visible universe, my lower manifestations, but, as a man still in the flesh, thou canst not

[[Footnote(s)]] -----

* With the Egyptian Gnostics it was Thoth (Hermes), who was chief of the Seven (Vide "Book of the Dead"). Their names are given by Origen, as Adonai (of the Sun) Iao (of the Moon), Eloï (Jupiter), Sabao (Mars), Orai (Venus), Astapkoï (Mercury), and, finally, Ildabaoth (Saturn).

[[Vol. 2, Page]] 539 A GROTESQUE VERSE EXPLAINED.

see my invisible nature. So proceeds the Qabalah." This is correct, and is the cosmo-metaphysical explanation. And now speaks the other Kabbalist, giving the numerical meaning. As it involves a good many suggestive ideas, and is far more fully given, we may allow it more space. This synopsis is from an unpublished MS., and explains more fully what was given in § XVII, "The Holy of Holies," page 467.

The numbers of the name Moses are those of "I AM THAT I AM," so that the names Moses and Jehovah are at one in numerical harmony.

The word Moses is [[hebrew]] [[over]] 5,300,40, and the sum of the values of its letters is 345; Jehovah -- the genius par excellence of the lunar year -- assumes the value of 543, or the reverse of 345. . . . In the third chapter of Exodus, in the 13th and 14th verses, it is said: And Moses said . . . Behold when I come unto the children of Israel, and shall say unto them, The God of your fathers hath sent me unto you; and they shall say, What is his name? What shall I say unto them? and God said unto Moses -- "I am that I am."

The Hebrew words for this expression are ahiye asher ahiye, and in the value of the sums of their letters stand thus:--

[[hebrew]] [[hebrew]] [[hebrew]]
21 501 21

. . . This being his (God's) name, the sum of the values composing it are 21, 501, 21 are 543, or simply a use of the simple digit numbers in the name of Moses . . . but now so ordered that the name of 345 is reversed, and reads 543. . . . So that when Moses asks "Let me see Thy face or glory," the other rightly and truly replies "Thou canst not see my face" . . . but thou shalt see me behind -- (the true sense, though not the precise words); because the corner and the behind of 543 is the face of 345 -- "for check and to keep a strict use of a set of numbers to develop certain grand results, for the object of which they are specifically employed." "In other uses," adds the learned Kabbalist, "of the number they saw each other face to face. It is strange that if we add 345 to 543 we have 888, which was the gnostic Kabbalistic value of the name Christ, who was Jehoshua or Joshua. And so also the division of the 24 hours of the day gives three eights as quotient. . . . The chief end of all this system of number checks was to preserve in perpetuity the exact value of the Lunar year in the natural measure of days."

This is the astronomical and numerical meaning in the secret theogony of sidereo-cosmical gods invented by the Chaldeo-Hebrews,

[[Footnote(s)]] -----

* The Qabalah, by Isaac Myer.

[[Vol. 2, Page]] 540 THE SECRET DOCTRINE.

and two meanings out of seven. The other five would astonish the Christians still more.

The series of OEdipuses who have endeavoured to interpret the riddle of the Sphinx, is long indeed. For many ages she has been devouring the brightest and the noblest intellects of Christendom; but now the Sphinx is conquered. In the great

intellectual struggle which has ended in the complete victory of the OEdipuses of Symbolism, it is not the Sphinx, however, who, burning with the shame of defeat, has had to bury herself in the sea, but verily the many-sided symbol, named Jehovah, whom Christians -- the civilized nations -- have accepted for their God. The latter has collapsed under the too close analysis, and is -- drowned. Symbologists have discovered with dismay that their adopted deity was only a mask for many other gods, an Euhemerized extinct planet, at best, the genius of the Moon and Saturn with the Jews, of the Sun and Jupiter, with early Christians; that the Trinity was, in truth, only an astronomical triad -- unless they accepted the more abstract and metaphysical meanings given to it by the Gentiles -- composed of the Sun (the Father), and the two planets Mercury (the Son) and Venus (the Holy Ghost, Sophia, the Spirit of Wisdom, Love and Truth, and Lucifer, as Christ, the bright and morning Star; vide "Revelation," ch. xxii., 15). Because, if the Father is the Sun (the elder Brother in the Eastern inner philosophy), the nearest planet to it is Mercury (Hermes, Budha, Thot), the name of whose mother on Earth was Maia; the planet which receives seven times more light than any other: which fact led the Gnostics to call their Christos, and the Kabalists their Hermes (in the astronomical meaning), the "seven-fold light" (vide at end of this §). Finally, this God was Bel; the Sun being "Bel," with the Gauls, "Helios" with the Greeks, "Baal," with the Phoenicians; "El" in Chaldean, hence "EL-ohim," "Emanu-EL," "El," "god," in Hebrew. But even the Kabalistic god has vanished in the rabbinical workmanship, and one has now to turn to the innermost metaphysical sense of the Zohar to find in it anything like Ain-Soph, the nameless deity and the Absolute, so authoritatively and loudly claimed by the Christians. But it is certainly not to be found in the Mosaic books, by those who try to read without a Key to them. Ever since it was lost Jews and Christians have tried their best to blend these two conceptions, but in vain. They have only succeeded in finally robbing even the Universal Deity of ITS majestic character and primitive meaning.

This is what was said in "Isis Unveiled":--

It would seem, therefore, but natural to make a difference between the mystery-god [[lao]], adopted from the highest antiquity by all who participated in the esoteric knowledge of the priests, and his phonetic counterparts, whom we find treated with so little reverence by the Ophites and other Gnostics.

[[Vol. 2, Page]] 541 THE ANTIQUITY OF THE CROSS.

In the Ophite gems of King ("Gnostics") we find the name of IAO repeated, and often confounded with that of Jevo, while the latter simply represents one of the genii antagonistic to Abraxas. But the name IAO neither originated with, nor was it the sole property of the Jews. Even if it had pleased Moses to bestow the name upon the tutelary "Spirit," the alleged protector and national deity of the "chosen people of Israel," there is yet no possible reason why other nationalities should receive Him as the Highest and One-living God. But we deny the assumption altogether. Besides, there is the fact that Jaho or lao was a "Mystery name" from the beginning, for [[hebrew]] and [[hebrew]] never came into use before King David. Anterior to his time, few or no proper names were compounded with lah or Jah. It looks rather as though David, being a sojourner among the Tyrians and Philistines (2 Samuel), brought thence the name of Jehovah. He made Zadok high priest, from whom came the Zadokites or Sadducees. He lived and ruled first at Hebron [[hebrew]], Habir-on or Kabeir-town, where the rites of the four (mystery-gods) were celebrated. Neither David nor Solomon recognized either Moses or the law of Moses. They aspired to build a temple to [[hebrew]], like the structures erected by Hiram to Hercules and Venus, Adon and Astarte.

Says Furst: "The very ancient name of God, Yaho, written in the Greek law, appears, apart from its derivation, to have been an old mystic name of the Supreme deity of the Shemites. Hence it was told to Moses when he was initiated at Hor-eb -- the cave -- under the direction of Jethro, the Kenite (or Cainite) priest of Midian. In an old religion of the Chaldeans, whose remains are to be found among the Neo-Platonists, the highest divinity, enthroned above the seven heavens, representing the Spiritual Light-Principle . . . and also conceived of as Demiurgus,* was called [[lao]]([[hebrew]]), who was, like the Hebrew Yaha, mysterious and unmentionable, and whose name was communicated to the Initiated. The Phoenicians had a Supreme God, whose name was trilateral and secret, and he was [[lao]]."*** (Isis Unveiled), Vol. II., p. 298.)

The Cross, say the Kabalists, repeating the lesson of the Occultists, is one of the most ancient -- nay, perhaps, the most ancient of symbols. This is demonstrated at the very beginning of the Proem (Vol. I.). The Eastern Initiates show it coeval with the circle of Deific infinitude and the first differentiation of the Essence, the union of spirit and matter. This was rejected, and the astronomical allegory alone was accepted and made to fit into cunningly imagined terrestrial events.

Let us demonstrate this statement. In astronomy, as said, Mercury is the son of Coelus and Lux -- of the sky and light, or the Sun; in mythology he is the progeny of Jupiter and Maia. He is the "messenger" of his Father Jupiter, the Messiah of the Sun; in Greek, his name "Hermes," means, among other things, the "Interpreter" -- the "Word" by mouth; the LOGOS, or VERBUM. Now, Mercury, besides being born on Mount Cyllene among shepherds, is the patron of the

[[Footnote(s)]] -----

* By very few though, for the creators of the material universe were always considered as subordinate gods to the Most High Deity.

** Lydus I., c. Ledrenus, l. c.

[[Vol. 2, Page]] 542 THE SECRET DOCTRINE.

latter. A psychopompic genius, he conducted the souls of the dead to Hades and brought them back, an office attributed to Jesus, after his death and resurrection. The symbols of Hermes-Mercury (Dii Termini) were placed along and at the turning points of highways (as crosses are now placed in Italy) and they were cruciform.* Every seventh day the priests anointed these termini with oil, and once a year hung them with garlands, hence they were the anointed. Mercury, when speaking through his oracles said, "I am he whom you call the Son of the Father (Jupiter) and Maia. Leaving the King of Heaven (the Sun) I come to help you, mortals." Mercury heals the blind and restores sight, mental and physical.** He was often represented as three-headed and called "Tricephalos," "Triplex," as one with the Sun and Venus. Finally, Mercury,

as Cornutus*** shows, was sometimes figured under a cubic form, without arms, because "the power of speech and eloquence can prevail without the assistance of arms or feet." It is this cubic form which connects the termini directly with the cross, and the eloquence or the power of speech of Mercury, which made the crafty Eusebius say "Hermes is the emblem of the Word which creates and interprets all," for it is the creative word; and he shows Porphyry teaching that the speech of Hermes, (now interpreted "Word of God" (!) in Pymander) a creative speech (Verbum), is the seminal principle scattered throughout the Universe.**** In Alchemy "Mercury" is the radical Moyst, primitive or elementary water, containing the seed of the Universe, fecundated by the solar fires. To express this fecundating principle, a phallus was often added to the cross (the male and female, or the vertical and the horizontal united) by the Egyptians (Vide Egyptian Museums). The cruciform termini also represented this dual idea, which was found in Egypt in the cubic Hermes. The author of "Source of Measures" tells us why. (But see the last page of § XVI., about the Gnostic Priapus).

As shown by him, the cube unfolded becomes in display a cross of the tau, or the Egyptian, form; or again, "the circle attached to the tau gives the ansated cross" of the old Pharaohs. They had known this from their priests and their "Kings Initiates" for ages, and also what was meant by "the attachment of a man to the cross," which idea "was made to co-ordinate with that of the origin of human life, and hence the phallic form." Only the latter came into action aeons and ages after the idea of the carpenter and artificer of the Gods,

[[Footnote(s)]] -----

[[Vol. 2, Page]] 543 A PERSONAL, IS A FINITE GOD.

Visvakarma, crucifying the "Sun-Initiate" on the cruciform lathe. As the same author writes: "the attachment of a man to the cross . . . was made use of in this very form of display by the Hindus"; but, made "to co-ordinate" with the idea of the new rebirth of man by spiritual, not physical regeneration. The candidate for initiation was attached to the tau or astronomical cross with a far grander and nobler idea than that of the origin of mere terrestrial life.

On the other hand, the Semites seem to have had no other or higher purpose in life than that of procreating their species. Thus, geometrically, and according to the reading of the Bible by means of the numerical method, the author of the "Hebrew-Egyptian Mystery" is quite correct. Their (the Jewish) entire system --

"Seems to have been anciently regarded as one resting in nature, and one which was adopted by nature, or God, as the basis of law of the exertion practically of creative power -- i.e., it was the creative design, of which creation was practically the application. This seems to be established by the fact that, under the system set forth, measures of planetary times serve coordinately as measures of the size of planets, and of the peculiarity of their shapes -- i.e., in the extension of their equatorial and polar diameters" . . . etc., etc. (p. 3) . . . "This system seems to underlie the whole Biblical structure (that of creative design), as a foundation for its ritualism and for its display of the works of the Deity in the way of architecture, by use of the sacred unit of measure in the Garden of Eden, the Ark of Noah, the Tabernacle, and the Temple of Solomon."

Thus, on the very showing of the defenders of this system the Jewish Deity is proved to be, at best, only the manifested duad, never the One absolute ALL. Geometrically demonstrated, he is a NUMBER; symbolically, an euhemerized Priapus; and this can hardly satisfy a mankind thirsting after the demonstration of real spiritual truths, and the possession of a god with a divine, not anthropomorphic, nature. It is strange that the most learned of modern Kabalists can see in the cross and circle nothing but a symbol of the manifested creative and androgyne deity in its relation to, and interference with, this phenomenal world.* One author believes that "man (read the Jew and Rabbi) obtained knowledge of the practical measure . . . by which nature was thought to adjust the planets in size to harmonize with the notation of their movements" . . . and adds: "it seems he did obtain it, and esteemed its possession as the means of his realization of the Deity -- that is, he approached so nearly to a conception of a Being having a mind like his own, only infinitely more powerful, as to be able to realize a law of creation

[[Footnote(s)]] -----

* See the Zohar and the two Qabalahs (by Messrs. I. Myer and Mathers), with interpretations, if the reader would satisfy himself of this.

[[Vol. 2, Page]] 544 THE SECRET DOCTRINE.

established by that Being, which must have existed prior to any creation (Kabalistically called the Word) " ("Source of Measures," p. 5).

This may have satisfied the practical Semite mind, but the Eastern Occultist has to decline the offer of such a God; indeed, a Deity, a Being, "having a mind like that of man, only infinitely more powerful," is no God that has any room beyond the cycle of creation. He has nought to do with the ideal conception of the eternal universe. He is, at best, one of the creative subordinate powers, the Totality of which is called the "Sephiroth," the "Heavenly Man," and Adam Kadmon, the second logos of the Platonists.

This very same idea is clearly found at the bottom of the ablest definitions of the Kabala and its mysteries, e.g., by John A. Parker, as quoted in the same work:--

"The key of the Kabala is thought to be the geometrical relation of the area of the circle inscribed in the square, or, of the cube to the sphere, giving rise to the relation of diameter to circumference of a circle with the numerical value of this relation expressed in integrals. The relation of diameter to circumference, being a supreme one connected with the god-names of Elohim and Jehovah (which terms are expressions numerically of these relations respectively, the first being of circumference, the latter of diameter), embraces all. Two expressions of circumference to diameter in integrals are used in the Bible: (1) The perfect, and (2) the imperfect. One of the relations between these is such that (2) subtracted from (1) will leave a unit of a diameter value in terms, or in the denomination of the circumference value of the perfect circle, or a unit straight line having a perfect circular value, or a factor of circular value" (p. 22).

Such calculations can lead one no further than to unriddle the mysteries of the third stage of Evolution, or the "third creation of Brahma." The initiated Hindus know how to "square the circle" far better than any European. But of this more anon. The fact is that the Western Mystics commence their speculation only at that stage when the universe "falls into matter," as the occultists say. Throughout the whole series of Kabalistic books we have not met with one sentence that would hint in the remotest way at the psychological and spiritual, as well as at the mechanical and physiological secrets of "creation." Shall we, then, regard the evolution of the Universe as simply a prototype, on a gigantic scale, of the act of procreation? as "divine" Phallicism, and rhapsodize on it as the evilly-inspired author of a late work of this name has done? The writer does not think so. And she feels justified in saying so, since the most careful reading of the Old Testament -- esoterically, as well as exoterically -- seems to have carried the most enthusiastic enquirers no further than a certainty on mathematical grounds that from the first to the last chapter of the Pentateuch every scene, every character or event are shown connected, directly or indirectly, with the origin of birth in its crudest and most

[[Vol. 2, Page]] 545 A PLAGIARISM BY PASCAL.

brutal form. Thus, however interesting and ingenious the rabbinical methods, the writer, in common with other Eastern Occultists, must prefer those of the Pagans.

It is not, then, in the Bible that we have to search for the origin of the Cross and Circle, but beyond the Flood. Therefore, returning to Eliphas Levi and the Zohar, we answer for the Eastern Occultists and say that, applying practice to principle, they agree entirely with Pascal, who says that "God is a circle, the centre of which is everywhere and the circumference nowhere," whereas the Kabalists say the reverse, and maintain it solely out of their desire to veil their doctrine. By the way, the definition of Deity by the Circle is not Pascal's at all, as E. Levi thought. It was borrowed by the French philosopher from either Mercury Trismegistus or Cardinal Cusa's Latin work, *De Docta Ignorantia*, in which he makes use of it. It is, moreover, disfigured by Pascal, who replaces the words "Cosmic Circle," which stand symbolically in the original inscription, by the word *Theos*. With the ancients both words were synonymous.

A.

CROSS AND CIRCLE.

Something of the divine and the mysterious has ever been ascribed, in the minds of the ancient philosophers, to the shape of the circle. The old world, consistent in its symbolism with its pantheistic intuitions, uniting the visible and the invisible Infinitudes into one, represented Deity and its outward VEIL alike -- by a circle. This merging of the two into a unity, and the name *theos* given indifferently to both, is explained, and becomes thereby still more scientific and philosophical. Plato's etymological definition of the word *theos* has been shown elsewhere. He derives it from the verb *[[theein]]* (see *Cratylus*), "to move," as suggested by the motion of the heavenly bodies which he connects with deity. According to the Esoteric philosophy, this Deity is during its "nights" and its "days" (i.e., cycles of rest or activity) "the eternal perpetual motion," "the EVER-BECOMING, as well as the ever universally present, and the ever Existing." The latter is the root-abstraction, the former -- the only possible conception in human mind, if it disconnects this deity from any shape or form. It is a perpetual, never-ceasing evolution, circling back in its incessant progress through aeons of duration into its original status -- ABSOLUTE UNITY.

It was only the minor gods, who were made to carry the symbolical attributes of the higher ones. Thus, the god Shoo, the personification of Ra, who appears as "the great Cat of the Basin of Persea, in An"

[[Vol. 2, Page]] 546 THE SECRET DOCTRINE.

(See "Book of the Dead," Ritual XVII, 45-47), was often represented in the Egyptian monuments seated, and holding a cross, symbol of the four quarters, or the Elements, attached to a Circle.

In that very learned work, "The Natural Genesis," by Mr. Gerald Massey, on pp. 408-455 (Vol. I.), under the heading, "Typology of the Cross," there is more information to be had on the cross and circle than in any other work we know of. He who would fain have proofs of the antiquity of the Cross is referred to these two volumes. The author shows that "the circle and the cross are inseparable. . . . The *crux ansata* unites the circle and cross of the four corners. From this origin they came to be interchangeable at times. For example, the Chakra, or Disk of Vishnu, is a circle. The names denote the circling, wheeling round, periodicity, the wheel of time. This the god uses as a weapon to hurl at the enemy. In like manner, Thor throws his weapon, the Fylfot, a form of the four-footed cross (Swastica) and a type of the four quarters. Thus the cross is equivalent to the circle of the year. . . . The wheel emblem unites the cross and circle in one, as does the hieroglyphic cake and the Ankh-tie *[[diagram]]*."

Nor was the double glyph sacred with the profane, but only with the Initiates. For Raoul-Rochette shows (*ibid*) "the sign *[[diagram]]*, occurring as the reverse of a Phoenician coin, with a Ram as the obverse. . . . The same sign, sometimes

called Venus' Looking-Glass, because it typified reproduction, was employed to mark the hind-quarters of valuable brood mares of Corinthian and other beautiful breeds of horses" (Raoul-Rochette, loc. cit. De La Croix Ansee, Mem. de l'Academie des Sciences, pl. 2, Nos. 8, 9, also 16, 2, p. 320, quoted in "Nat. Gen."), which proves that so far back as those early days the cross had already become the symbol of human procreation, and that oblivion of the divine origin of Cross and Circle had been forgotten.

Another form of the cross is given from the Journal of the Royal Asiatic Society (vol. xviii., p. 393, pl. 4):--

"At each of the four corners is placed a quarter arc of an oviform curve, and when the four are put together they form an oval; thus the figure combines the cross with the circle round in four parts, corresponding to the four corners of the cross. The four segments answer to the four feet of the Swastica cross and the Fylfot of Thor. The four-leaved lotus flower of Buddha, is likewise figured at the centre of this cross, the lotus being an Egyptian and Hindu type of the four quarters. The four quarter arcs, if joined together, would form an ellipse, and the ellipse is also figured on each arm of the cross. This ellipse therefore denotes the path of the earth . . . Sir J. Y. Simpson copied the following specimen [[diagram]], which is here presented, as the cross of the two equinoxes and the two solstices placed within the figure of the earth's path.

[[Vol. 2, Page]] 547 VARIATIONS OF THE SYMBOLISM.

The same ovoid or boat-shaped figure appears at times in the Hindu drawings with seven steps at each end as a form or a mode of Meru."

This is the astronomical aspect of the double glyph. There are six more aspects, however, and an attempt may be made to interpret a few of these. The subject is so vast that it would require in itself alone many volumes.

But the most curious of these Egyptian symbols of Cross and Circle, spoken of in the above cited work, is one which receives its full explanation and final colour from Aryan symbols of the same nature. Says the author:--

"The four-armed Cross is simply the cross of the four quarters, but the cross sign is not always simple.* This is a type that was developed from an identifiable beginning, which was adapted to the expression of various ideas afterwards. The most sacred cross of Egypt that was carried in the hands of the gods, the Pharaohs, and the mummied dead, is the Ankh [[diagram]] the sign of life, the living, an oath, the covenant . . . The top of this is the hieroglyphic Ru [[diagram]] set upright on the Tau-Cross. The Ru is the door, gate, mouth, the place of outlet. This denotes the birth-place in the northern quarter of the heavens, from which the Sun is reborn. Hence the Ru of the Ankh sign is the feminine type of the birth-place, representing the north. It was in the NORTHERN QUARTER that the GODDESS OF THE SEVEN STARS, called the "Mother of the Revolutions," gave birth to time in the earliest cycle of the year. The first sign of this primordial circle and cycle made in heaven is the earliest shape of the Ankh-cross [[diagram]], a mere loop which contains both a circle and the cross in one image. This loop or noose is carried in front of the oldest genitrix, Typhon of the great Bear, as her Ark, the ideograph of a period, an ending, a time, shown to mean one revolution.

"This then represents the circle made in the northern heaven by the Great Bear, which constituted the earliest year of time, from which we infer that the loop or Ru of the North represents that quarter, the birth-place of time when figured as the Ru of the Ankh symbol. Indeed this can be proved. The noose is an Ark or Rak type of reckoning. The Ru of the Ankh-cross was continued in the Cypriote [[diagram]] and the Coptic Ro, P.** The Ro, was carried into the Greek cross [[diagram]], which is formed of the Ro and Chi or R-K. . . The Rak, or Ankh, was the sign of all beginning (Arche) on this account, and the Ank-tie is the cross of the North, the hind part of Heaven. . . ."

Now this, again, is entirely astronomical and phallic. The Puranic version in India gives the whole another colour; and without, however,

[[Footnote(s)]] -----

* Certainly not; for very often there are symbols made to symbolize other symbols, and these are in turn used in ideographs.

** The R of the Slavonian and Russian alphabets (the Kyriletza) is also the Latin P.

[[Vol. 2, Page]] 548 THE SECRET DOCTRINE.

destroying the above interpretation it is made to reveal a portion of its mysteries with the help of the astronomical key, and thus offers a more metaphysical rendering. The "Ankh-tie" [[diagram]] does not belong to Egypt alone. It exists under the name of pasa, a cord which Siva holds in the hand of his right back arm* (Siva having four arms). The Mahadeva is represented in the posture of an ascetic, as Maha-Yogi, with his third eye [[diagram]], which is "the Ru, [[diagram]], set upright on the Tau-Cross" in another form. The pasa is held in the hand in such a way that it is the first finger and hand near the thumb which make the cross, or loop and crossing. [[diagram]] Our Orientalists would have it to represent a cord to bind refractory offenders with, because, forsooth, Kali, Siva's consort, has the same as an attribute!

The pasa has here a double significance, as also has Siva's trisula and every other divine attribute. This significance lies in Siva, as Rudra has certainly the same meaning as the Egyptian ansated cross in its cosmic and mystic meaning. In the hand of Siva it becomes linga and yonic. That which is meant is this: Siva, as said before, is unknown by that name in the Vedas; and it is in the white Yajur Veda that he appears for the first time as the great god -- MAHADEVA -- whose symbol is the lingham. In Rig Veda he is called Rudra, the "howler," the beneficent and the maleficent Deity at the same time, the Healer and the Destroyer. In the Vishnu Purana, he is the god who springs from the forehead of Brahma, who separates into male and female, and he is the parent of the Rudras or Maruts, half of whom are brilliant and gentle, others, black and ferocious. In the Vedas, he is the divine Ego aspiring to return to its pure, deific state, and at the same time that divine ego imprisoned in earthly form, whose fierce passions make of him the "roarer," the "terrible." This is well shown in the Brihadaranyaka Upanishad, wherein the Rudras, the progeny of Rudra, god of fire, are called the "ten vital breaths"

(prana, life) with manas, as eleventh, whereas as Siva, he is the Destroyer of that life. Brahma calls him Rudra, and gives him, besides, seven other names, which names are his seven forms of manifestation, also the seven powers of nature which destroy but to recreate or regenerate.

Hence the cruciform noose (pasa) in his hand, when he is represented as an ascetic, the Mahayogin, has no phallic signification, and it, indeed, requires a strong imagination bent in this direction to find such even in

[[Footnote(s)]] -----

[[Vol. 2, Page]] 549 "GUHA," THE MYSTERIOUS.

an astronomical symbol. As an emblem of "door, gate, mouth, the place of outlet" it signifies the "strait gate" that leads to the kingdom of heaven, far more than the "birth-place" in a physiological sense.

It is a Cross in a Circle and Crux Ansata, truly; but it is a Cross on which all the human passions have to be crucified before the Yogi passes through the "strait gate," the narrow circle that widens into an infinite one, as soon as the inner man has passed the threshold.

As to the mysterious constellation of the Seven Rishis in the great Bear, if Egypt made them sacred to "the oldest genitrix, Typhon" -- India has connected all these symbols ages ago with time or Yuga revolutions, and the Saptarishis are intimately connected with our present age -- the Dark Kali Yug.* The great Circle of Time, on the face of which fancy in India has represented the Tortoise (Kurma, or Sisumara, one of the Avatars of Vishnu), has the Cross placed on it by nature in its division and localisation of stars, planets and constellations. Thus in Bhagavata Purana V., xxx., it is said that "at the extremity of the tail of that animal, whose head is directed toward the South and whose body is in the shape of a ring (Circle), Dhruva (the ex-pole star) is placed; and along that tail are the Prajapati, Agni, Indra, Dharmā, etc.; and across its loins the Seven Rishis." This is then the first and earliest Cross and Circle, into the formation of which enters the Deity (symbolized by Vishnu), the Eternal Circle of Boundless Time, Kala, on whose plane lie crossways all the gods, creatures, and creations born in Space and Time; -- who, as the philosophy has it, all die at the Mahapralaya.

Meanwhile it is they, the Seven Rishis, who mark the time and the duration of events in our septenary life cycle. They are as mysterious as their supposed wives, the Pleiades, of whom only one -- she who hides -- has proven virtuous. The Pleiades (Krittika) are the nurses of Karttikeya, the God of War (Mars of the Western Pagans), who is called the Commander of the celestial armies -- or rather of the Siddhas (translated Yogis in heaven, and holy sages on the earth) -- "Siddha-sena," which would make Karttikeya identical with Michael, the "leader of the celestial hosts" and, like himself, a virgin Kumara.** Verily he is the "Guha," the mysterious one, as much so as are the Saptarshis and the Krittika (seven Rishis and the Pleiades), for the interpretation of all these combined, reveal to the adept the greatest mysteries of occult nature. One point is worth mention in this question of cross and

[[Footnote(s)]] -----

* Described in the "Mission des Juifs" by the Marquis St. Yves d'Alveydre, the hierophant and leader of a large party of French Kabalists, as the Golden Age!

** The more so since he is the reputed slayer of Tripurasura and the Titan Taraka. Michael is the conqueror of the dragon, and Indra and Karttikeya are often made identical.

[[Vol. 2, Page]] 550 THE SECRET DOCTRINE.

circle, as it bears strongly upon the elements of fire and water, which play such an important part in the circle and cross Symbolics. Like Mars, who is alleged by Ovid to have been born of a mother alone (Juno), without the participation of a father, or like the Avatars (Krishna, for instance), in the West as in the East -- Karttikeya is born, but in a still more miraculous manner -- begotten by neither father nor mother, but out of a seed of Rudra Siva, via Agni, who dropped it into the Ganges. Thus he is born from fire and water -- a "boy bright as the Sun and beautiful as the moon." Hence he is called Agnibhuva (Agni's son) and Ganga-putra (Son of Ganges). Add to this the fact that the Krittika, his nurses, as Matsya Purana shows, are presided over by Agni, or, in the authentic words -- "The seven Rishis are on a line with the brilliant Agni," and hence are called Agneya -- and the connection is easy to follow.

It is, then, the Rishis who mark the time and the periods of Kali-yuga, the age of sin and sorrow. See in the Bhagavata Purana XII., II, 2, 6, 32, and Vishnu Purana. Says the latter: "When the splendour of Vishnu (Krishna) departed for heaven, then did the Kali Yug, during which men delight in sin, invade the world. . . . When the Seven Rishis were in Magha, the Kali Yug, comprising 1,200 (divine) years (432,000 years of mortals), began; and when from Magha, they shall reach Purvashadha, then will this Kali age attain its growth, under Nanda and his successors."* This is the revolution of the Rishis "when the two first stars of the Seven Rishis (of the Great Bear) rise in the heavens, and some lunar asterism is seen at night, at an equal distance between them, then the Seven Rishis continue stationary in that conjunction for a hundred years," a hater of Nanda makes Parasara say. According to Bentley, it is in order to show the quantity of the precession of the equinoxes that this notion originated among the astronomers. It was done "by assuming an imaginary line, or great circle, passing through the poles of the ecliptic and the beginning of the fixed Magha, which circle was supposed to cut some of the stars in the Great Bear. . . . The seven stars being called the Rishis, the Circle so assumed was called the line of the Rishis . . . and being invariably fixed to the beginning of the lunar asterism Magha, the precession would be noted by stating the degree . . . of any moveable lunar mansion cut by that line or circle as an index" ("Historical View of the Hindu Astronomy," p. 65).

[[Footnote(s)]] -----

* Nanda is the first Buddhist Sovereign, Chandragupta, against whom all the Brahmins were so arrayed; he of the Morya Dynasty, and the grandfather of Asoka. This is one of those passages that do not exist in the earlier Puranic MSS. They were added by the Vaishnavas, who interpolated almost as much, out of Sectarian spite, as the Christian Fathers did.

[[Vol. 2, Page]] 551 THE RISHIS AND THE PLEIADES.

There was, and still exists, a seemingly endless controversy about the chronology of the Hindus. Here is a point that could help to determine -- approximately at least -- the age when the symbolism of the Seven Rishis and their connection with the Pleiades began. When Karttikeya was delivered to them by the gods to be nursed, the Krittika were only six -- whence Karttikeya is represented with six heads; but when the poetical fancy of the early Aryan symbologists made of them the consorts of the Seven Rishis, they were seven. Their names are given, and these are Amba, Dula, Nitatui, Abrayanti, Maghayanti, Varshayanti, and Chupunika. There are other sets of names which differ, however. Anyhow, the Seven Rishis were made to marry the Seven Krittika before the disappearance of the seventh Pleiad. Otherwise, how could the Hindu astronomers speak of that which, without the help of the strongest telescopes, no one can see? This is why, perhaps, in every such case the majority of the events described in the Hindu allegories is fixed upon as "a very recent invention, certainly within the Christian era"?

The oldest MSS. in Sanskrit on astronomy, begin their series of Nakshatras (the 27 lunar asterisms) with the sign of Krittika, and this can hardly make them earlier than 2780 B.C., (see the "Vedic Calendar," accepted even by the Orientalists); though they get out of the difficulty by saying that the said Calendar does not prove that the Hindus knew anything of astronomy at that date, and assure their readers that, Calendars notwithstanding, the Indian pundits may have acquired their knowledge of the lunar mansions headed by Krittika from the Phoenicians, etc. However that may be, the Pleiades are the central group of the system of sidereal symbology. They are situated in the neck of the constellation of Taurus, regarded by Madler and others, in astronomy, as the central group of the system of The Milky Way, and in the Kabala and Eastern Esotericism, as the sidereal septenate born from the first manifested side of the upper triangle, the concealed [[diagram]]. This manifested side is Taurus, the Symbol of ONE (the figure 1), or of the first letter of the Hebrew alphabet, Aleph [[hebrew]] (bull or ox) whose synthesis is ten (10), or [[hebrew]] Yodh, the perfect letter and number. The Pleiades (Alcyone, especially), are thus considered, even in astronomy, as the central point around which our Universe of fixed stars revolves, the focus from which, and into which the divine breath, MOTION, works incessantly during the Manvantara. Hence -- in the Occult philosophy and its sidereal symbols -- it is this Circle and the starry cross on its face, which play the most prominent part.

The Secret Doctrine teaches us that everything in the universe, as well as the universe itself, is formed (created) during its periodical manifestations -- by accelerated MOTION set into activity by the BREATH of

[[Vol. 2, Page]] 552 THE SECRET DOCTRINE.

the ever-to-be-unknown power (unknown to present mankind, at any rate) within the phenomenal world. The Spirit of Life and Immortality was everywhere symbolized by a circle: hence the serpent biting his tail, represents the circle of Wisdom in infinity; as does the astronomical cross -- the cross within a circle, and the globe, with two wings added to it, which then became the sacred Scarabaeus of the Egyptians, its very name being suggestive of the secret idea attached to it. For the Scarabaeus is called in Egypt (in the papyri) Khopirron and Khopri from the verb Khopron "to become," and has thus been made a symbol and an emblem of human life and of the successive becomings of man, through the various peregrinations and metempsychoses (reincarnations) of the liberated Soul. This mystical symbol shows plainly that the Egyptians believed in reincarnation and the successive lives and existences of the Immortal entity. Being, however, an esoteric doctrine, revealed only during the mysteries by the priest-hierophants and the Kings-Initiates to the candidates, it was kept secret. The incorporeal intelligences (the Planetary Spirits, or Creative Powers) were always represented under the form of circles. In the primitive philosophy of the Hierophants these invisible circles were the prototypic causes and builders of all the heavenly orbs, which were their visible bodies or coverings, and of which they were the souls. It was certainly a universal teaching in antiquity. (See Ezekiel, ch. 1.)

"Before the mathematical numbers," says Proclus (in Quinto Libro, EUCLID), "there are the Self-moving numbers; before the figures apparent -- the vital figures, and before producing the material worlds which move in a Circle, the Creative Power produced the invisible Circles."

Deus enim et circulus est, says Pherecydes, in his hymn to Jupiter. It was a Hermetic axiom, and Pythagoras prescribed such a circular prostration and posture during the hours of contemplation. "The devotee must approach as much as possible the form of a perfect circle," prescribes the Secret Book. Numa tried to spread among the people the same custom, Pierius* tells his readers; and Pliny says: "During our worship, we roll up, so to say, our body in a ring, totum corpus circumagimur."** The vision of the prophet Ezekiel reminds one

[[Footnote(s)]] -----

* Pierius Vale.

** The goddess Basht (or Pasht) was represented with the head of a cat. This animal was sacred in Egypt for several reasons: as a symbol of the Moon "the eye of Osiris" or the "Sun," during night. The cat was also sacred to Sokhit. One of the mystic reasons was because of its body being rolled up in a circle when asleep. The posture is prescribed for occult and magnetic purposes, in order to regulate in a certain way the circulation of the vital fluid, with which the cat is pre-eminently endowed. "The nine lives of a cat" is a popular saying based on good physiological and occult reasons. Mr. G. Massey gives also an astronomical reason for it which may be found in § I. "SYMBOLISM." "The cat saw the Sun, had it in its eye by night (was the eye [[Footnote continued on next page]])

[[Vol. 2, Page]] 553 THE DEGRADATION OF THE SYMBOL.

forcibly of this mysticism of the circle, when he beheld a whirl-wind from which came out "one wheel upon the earth" whose work "was as it were a wheel in the middle of a wheel" (ch. i. vv. 4-16). . . . "for the Spirit of the living creature was in the wheels" (v. 20).

"Spirit whirlleth about continually and returneth again according to his circuits" -- says Solomon (Eccles. i. 6), who is made in the English translation to speak of the "Wind," and in the original text to refer both to the Spirit and the Sun. But the Zohar, the only true glossary of the Kabbalistic Preacher, in explanation of this verse, which is, perhaps, rather hazy and difficult to comprehend, says that "it seems to say that the sun moves in circuits, whereas it refers to the Spirit under the Sun, called the holy Spirit, that moves circularly, toward both sides, that they (It and the Sun) should be united in the same Essence." . . . (Zohar, fol. 87, col. 346.)

The Brahmanical "Golden Egg," from within which emerges Brahma, the creative deity, is the "circle with the Central Point" of Pythagoras, and its fitting symbol. In the Secret Doctrine the concealed UNITY -- whether representing PARABRAHMAM, or the "GREAT EXTREME" of Confucius, or the Deity concealed by PHTA, the Eternal Light, or again the Jewish EN-SOPH, is always found to be symbolized by a circle or the "nought" (absolute No-Thing and Nothing, because it is infinite and the ALL); while the god-manifested (by its works) is referred to as the diameter of that circle. The symbolism of the underlying idea is thus made evident: the right line passing through the centre of a circle has, in the geometrical sense, length, but neither breadth or thickness: it is an imaginary and feminine symbol, crossing eternity and made to rest on the plane of existence of the phenomenal world. It is dimensional, whereas its circle is dimensionless, or, to use an algebraical term, it is the dimension of an equation. Another way of symbolizing the idea is found in the Pythagorean sacred Decade which synthesizes, in the dual numeral Ten (the 1 and a circle or cipher), the absolute ALL manifesting itself in the WORD or generative Power of Creation.

B.

THE FALL OF THE CROSS INTO MATTER.

Those who would feel inclined to argue upon this Pythagorean symbol by objecting that it is not yet ascertained, so far, at what period of

[[Footnote(s)]] -----

[[Footnote continued from previous page]] of night), when it was otherwise unseen by men (for as the moon reflects the light of the Sun, so the cat was supposed to reflect it on account of its phosphorescent eyes) . . . We might say the moon mirrored the solar light, because we have looking-glasses. With them the cat's eye was the mirror."

[[Vol. 2, Page]] 554 THE SECRET DOCTRINE.

antiquity the nought or cipher occurs for the first time -- especially in India -- are referred to Vol. II. of "Isis Unveiled," pp. 299, 300, et seq.

Admitting for argument's sake that the ancient world was not acquainted with our modes of calculation or Arabic figures -- though we know it was -- yet the circle and diameter idea is there to show that it was the first symbol in cosmogony. Before the trigrammes of Fo-hi, Yang, the Unity, and Yin, the binary, explained cunningly enough by Eliphas Levi thus (Dogme et Rituel, Vol. I., p. 124):-- China had her Confucius, and her Tau-ists.* The former circumscribes the "great extreme" within a circle with a horizontal line across; the latter place three concentric circles beneath the great circle, while the Sung Sages showed the "great Extreme" in an upper circle, and Heaven and Earth in two lower and smaller circles. The Yangs and the Yins are a far later invention. [[diagram]] Plato and his school never understood the Deity otherwise, many epithets of his applied to the "God over all" ([[ho epi pasi theos]]) notwithstanding. Plato having been initiated, could not believe in a personal God -- a gigantic Shadow of Man. His epithets of "monarch" and "Law-giver of the Universe" bear an abstract meaning well understood by every Occultist, who, no less than any Christian, believes in the One Law that governs the Universe, recognizing it at the same time as immutable. "Beyond all finite existences," he says, "and secondary causes, all laws, ideas and principles, there is an INTELLIGENCE or MIND ([[nous]]), the first principle of all principles, the Supreme Idea on which all other ideas are grounded . . . the ultimate substance from which all things derive their being and essence, the first and efficient cause of all the order, and harmony, and beauty and excellency, and goodness, which pervades the Universe" -- who is called, by way of preeminence and excellence, the Supreme** good "the god" ([[Theos]]), and "the god over all." These words apply, as Plato himself shows, neither to the "Creator" nor to the "Father" of our modern Monotheist, but to the ideal and abstract cause. For, as he says, "this [gk char], the god over all, is not the truth or the intelligence, but the FATHER of it," and its Primal cause. Is it Plato, the greatest pupil of the archaic Sages, a sage himself, for whom there was but a single object of attainment in this life -- REAL KNOWLEDGE -- who would have ever believed in a deity that curses and damns men for ever, on the slightest provocation?*** Not he, who considered only those to be

[[Footnote(s)]] -----

* Also in T'sang-t-ung-ky, by Wei-Pa-Yang.

** Cocker's "Christianity and Greek Philosophy," xi., p. 377.

*** The cry of despair uttered by Count de Montlosier in his *Mysteres de la Vie Humaine*, p. 117, is a warrant that the Cause of "excellence and goodness," supposed by Plato to pervade the Universe is neither his Deity, nor our World. "Au spectacle de tant [[Footnote continued on next page]]

[[Vol. 2, Page]] 555 THE LAW OF RETRIBUTION.

genuine philosophers and students of truth who possessed the knowledge of the really existing in opposition to mere seeming; of the always existing in opposition to the transitory; and of that which exists permanently in opposition to that which waxes, wanes, and is developed and destroyed alternately.* Speusippus and Xenocrates followed in his footsteps. The ONE, the original, had no existence, in the sense applied to it by mortal men. "The [[timion]] (honoured one) dwells in the centre as in the circumference, but it is only the reflection of the Deity -- the world Soul"*** -- the plane of the surface of the circle. The Cross and Circle are a universal conception -- as old as human mind itself. They stand foremost on the list of the long series of, so to say, international symbols, which expressed very often great scientific truths, besides their direct bearing upon psychological, and even physiological mysteries; and this symbol is precisely one of this kind, and is based upon the oldest esoteric cosmogony.

It is no explanation to say, as Eliphas Levi does, that God, the universal Love, having caused the male unit to dig an abyss in the female Binary, or chaos, produced thereby the world. Besides being as gross a conception as any, it does not remove the difficulty of conceiving it without losing one's veneration for the rather too human-like ways of the Deity. It is to avoid such anthropomorphic conceptions that the Initiates never use the epithet "God" to designate the One and Secondless Principle in the Universe; and that -- faithful in this to the oldest traditions of the Secret Doctrine the world over -- they deny that such imperfect and often not very clean work could ever be produced by Absolute Perfection. There is no need to mention here other still greater metaphysical difficulties. Between speculative Atheism and idiotic anthropomorphism there must be a philosophical mean, and a reconciliation. The Presence of the Unseen Principle throughout all nature, and the highest manifestation of it on Earth -- MAN, can alone help to solve the Problem, which is that of the mathematician whose x must ever elude the grasp of our terrestrial algebra. The Hindus have tried to solve it by their avatars, the Christians think

[[Footnote(s)]] -----

[[Footnote continued from previous page]] de grandeur oppose a celui de tant de misere, l'esprit qui se met a observer ce vaste ensemble, se represente je ne sais quelle grande divinite qu'une divinite, plus grande et plus pressante encore, aurait comme brisee et mise en pieces en dispersant les debris dans tout l'Univers." The "still greater and still more exacting divinity" than the god of this world, supposed so "good" -- is KARMA. And this true Divinity shows well that the lesser one, our inner God (personal for the time being), has no power to arrest the mighty hand of this greater Deity, the CAUSE awakened by our actions generating smaller causes, which is called the LAW OF RETRIBUTION.

* See "Isis Unveiled," Before the Veil, xii. (Vol. I.).

[[Vol. 2, Page]] 556 THE SECRET DOCTRINE.

they did it -- by their one divine Incarnation. Exoterically -- both are wrong; esoterically both of them are very near the truth. Alone, among the Apostles of the Western religion, Paul seems to have fathomed -- if not actually revealed -- the archaic mystery of the Cross. As for the rest of those who, by unifying and individualizing the Universal Presence, have thus synthesized it into one symbol -- the central Point in the Crucifix -- they have shown thereby that they have never seized the true Spirit of the teaching of Christ, and by their interpretations they have degraded it in more than one way. They have forgotten the Spirit of that universal symbol and have selfishly monopolized it -- as though the Boundless and the Infinite can ever be limited and conditioned to one manifestation individualized in one man, or even in a nation!

The four arms of the "[[diagram]]," the decussated cross, and of the "Hermetic," pointing to the four cardinal points -- were well understood by the mystical minds of the Hindus, Brahmins and Buddhists, thousands of years before it was heard of in Europe; and that symbol was and is found all over the world. They bent the ends of that cross and made of it their Swastica [[diagram]] now the Wan of the Buddhist Mongolian.* It implies that the "Central point" is not limited to one individual, however perfect. That the Principle (God) is in Humanity, and Humanity, as all the rest, is in it, like drops of water are in the Ocean, the four ends being toward the four cardinal points, hence losing themselves in infinity.

Isarim, an Initiate, is said to have found at Hebron, on the dead body of Hermes, the well known Smaragdine tablet, which, it is said, contained the essence of Hermetic wisdom "Separate the earth from the fire, the subtle from the gross Ascend from the earth to heaven and then descend again to earth" was traced on it. The riddle of the cross is contained in these words, and its double mystery is solved -- to the Occultist.

"The philosophical cross, the two lines running in opposite directions, the horizontal and the perpendicular, the height and breadth, which the geometrizing Deity divides at the intersecting point, and which forms the magical as well as the scientific quaternary, when it is inscribed within the perfect square, is the basis of the occultist. Within its mystical precinct lies the master-key which opens the door of every science, physical as well as spiritual. It symbolizes our human existence, for the circle of life circum-

[[Footnote(s)]] -----

* The Swastica is certainly one of the oldest symbols of the Ancient Races. In our century, says Kenneth R. H. Mackenzie (Royal Masonic Cyclopeadia) it (the Swastica) "has survived in the form of the mallet" in the Masonic Fraternity. Among the many "meanings" the author gives of it, we do not find, however, the most important one, masons evidently not knowing it.

[[Vol. 2, Page]] 557 THE PRIMITIVE CROSS

scribes the four points of the cross, which represent in succession birth, life, death, and IMMORTALITY.

" 'Attach thyself,' say the alchemists, 'to the four letters of the tetragram disposed in the following manner: The letters of the ineffable name are there, although thou mayest not discern them at first. The incommunicable axiom is kabalistically contained therein, and this is what is called the magic arcanum by the masters.' " ("Isis Unveiled.")

Again:-- The  (Tau), and the astronomical cross of Egypt  are conspicuous in several apertures of the remains of Palenque. In one of the basso-relievos of the Palace of Palenque, on the west side, sculptured as a hieroglyphic right under the seated figure, is a Tau. The standing figure, which leans over the first one, is in the act of covering its head with the left hand with the veil of initiation; while it extends its right with the index and middle finger pointing to heaven. The position is precisely that of a Christian bishop giving his blessing, or the one in which Jesus is often represented while at the Last Supper. . . . The Egyptian Hierophant had a square head-dress which he had to wear always during his functions. . . . The perfect Tau, formed of the perpendicular (descending male ray), and a horizontal line (matter, female principle), and the mundane circle was an attribute of Isis, and it is but at death that the Egyptian cross was laid on the breast of the mummy." These square hats are worn unto this day by the Armenian priests. The claim that the cross is purely a Christian symbol introduced after our era, is strange indeed, when we find Ezekiel stamping the foreheads of the men of Judah, who feared the Lord (Ezekiel ix. 4), with the signum Thau, as it is translated in the Vulgate. In the ancient Hebrew this sign was formed thus , but in the original Egyptian hieroglyphics as a perfect Christian cross  (Tat, the emblem of stability). In the Revelation, also, the "Alpha and Omega" (spirit and matter), the first and the last, stamps the name of his Father in the foreheads of the elect, (p. 323, Vol. II.) Moses, in Exodus xii. 22, orders his people to mark their door-posts and lintels with blood, lest the "Lord God" should make a mistake and smite some of his chosen people, instead of the doomed Egyptians. And this mark is a tau! The identical Egyptian handled cross, with the half of which talisman Horus raised the dead, as is shown on a sculptured ruin at Philoe.

Enough was said in the text about the Swastica and the Tau. Verily may the Cross be traced back into the very depths of the unfathomable Archaic Ages! Its Mystery deepens rather than clears, as we find it on the statues of Easter Island -- in old Egypt, in Central Asia, engraved on rocks as Tau and Swastica, in pre-Christian Scandinavia,

[[Vol. 2, Page]] 558 THE SECRET DOCTRINE.

everywhere! The author of the "Hebrew Egyptian Mystery" stands perplexed before the endless shadow it throws back into antiquity, and is unable to trace it to any particular nation or man. He shows the Targums handed down by the Hebrews, obscured by translation. In Joshua (viii. 29) read in Arabic, and in the Targum of Jonathan, it is said: "The king of Ai he crucified upon a tree." The Septuagint rendering is of suspension from a double word (Wordsworth on Joshua.) . . . The strangest expression of this kind is in Numbers xxv. 4, where, by Onkalos (?) it is read: "Crucify them before the Lord (Jehovah) against the Sun." "The word here , to nail to, is rendered properly (Fuerst) by the Vulgate to crucify. The very construction of this sentence is mystic."

So it is, but the spirit of it has been ever misunderstood. "To crucify before (not against) the sun" is a phrase used of initiation. It comes from Egypt, and primarily from India. The enigma can be unriddled only by searching for its key in the Mysteries of Initiation. The initiated adept, who had successfully passed through all the trials, was attached, not nailed, but simply tied on a couch in the form of a tau  (in Egypt) of a Svastika without the four additional prolongations (thus: , not ) plunged in a deep sleep (the "Sleep of Siloam" it is called to this day among the Initiates in Asia Minor, in Syria, and even higher Egypt). He was allowed to remain in this state for three days and three nights, during which time his Spiritual Ego was said to confabulate with the "gods," descend into Hades, Amenti, or Patala, (according to the country), and do works of charity to the invisible beings, whether souls of men or Elemental Spirits; his body remaining all the time in a temple crypt or subterranean cave. In Egypt it was placed in the Sarcophagus in the King's Chamber of the Pyramid of Cheops, and carried during the night of the approaching third day to the entrance of a gallery, where at a certain hour the beams of the rising Sun struck full on the face of the entranced candidate, who awoke to be initiated by Osiris, and Thoth the God of Wisdom.

Let the reader who doubts the statement consult the Hebrew originals before he denies. Let him turn to some most suggestive Egyptian bas reliefs. One especially from the temple of Philoe, represents a scene of initiation. Two Gods-Hierophants, one with the head of a hawk (the Sun), the other ibis-headed (Mercury, Thoth, the god of Wisdom and secret learning, the assessor of Osiris-Sun), are standing over the body of a candidate just initiated. They are in the act of pouring on his head a double stream of water (the water of life and new birth), which stream is interlaced in the shape of a cross and full of small ansated crosses. This is allegorical of the awakening of the candidate

[[Vol. 2, Page]] 559 ITS EARLY SIGNIFICANCE.

(now an Initiate), when the beams of the morning sun (Osiris) strike the crown of his head (his entranced body being placed on its wooden tau so as to receive the rays). Then appeared the Hierophants-Initiators, and the sacramental words were pronounced, ostensibly, to the Sun-Osiris, addressed in reality to the Spirit Sun within, enlightening the newly-born man. Let the reader meditate on the connection of the Sun with the Cross in both its generative and spiritually regenerative capacities -- from the highest antiquity. Let him examine the tomb of Bait-Oxly, in the reign of Ramses II., where he will find the crosses in every shape and position. So again, on the throne of that sovereign, and finally on a fragment from the Hall of the ancestors of Totmes III., preserved in the National Library of Paris, which represents the adoration of Bakhan-Aleare.

In this extraordinary sculpture and painting one sees the disc of the Sun beaming upon an ansated cross placed upon a cross of which those of the Calvary were perfect copies. The ancient MSS. mention these as the "hard couches of those who were in (spiritual) travail, the act of giving birth to themselves." A quantity of such cruciform "couches," on which the candidate, thrown into a dead trance at the end of his supreme initiation, was placed and secured, were found in the underground halls of the Egyptian temples after their destruction. The worthy and holy Fathers of the Cyril and Theophilus types used them freely, believing they had been brought and concealed there by some new converts. Alone Origen, and after him Clemens Alexandrinus and other ex-initiates, knew better. But they preferred to keep silent.

Again, let the reader read the Hindu "fables," as the Orientalists call them, and remember the allegory of Visvakarma, the creative power, the great architect of the world, called in the Veda "the all-seeing god," who "sacrifices himself to himself" (the Spiritual Egos of mortals are his own essence, one with him, therefore). Remember that he is called Deva Vardhika "the builder of the gods" and that it is he who ties (the Sun) Surya, his son-in-law, on his lathe, in the exoteric allegory; on the Swastika, in esoteric tradition, as on earth he is the Hierophant Initiator, and cuts away a portion of his brightness. Visvakarma, remember again, is the Son of Yoga-Siddha, i.e., the holy power of Yoga, and the fabricator of the "fiery weapon," the magic Agneyastra. The narrative is given more fully elsewhere. The author of the Kabalistic work so often quoted from, asks:--

"The theoretical use of crucifixion must have been somehow connected with the personification of this symbol (the structure of the garden of Paradise symbolized by a crucified man). But how? And as showing what? The symbol was of the origin of measures, shadowing forth creative law or design. What practically, as regards humanity,

[[Vol. 2, Page]] 560 THE SECRET DOCTRINE.

could actual crucifixion betoken? Yet, that it was held as the effigy of some mysterious working of the same system, is shown from the very fact of the use. There seems to be deep below deep as to the mysterious workings of these number values -- (the symbolization of the connection of 113 : 355, with 20612 : 6561, by a crucified man). Not only are they shown to work in the Kosmos . . . but by sympathy, they seem to work out conditions relating to an unseen and spiritual world, and the prophets seem to have held knowledge of the connecting link. . . . Reflection becomes more involved when it is considered that the power of expression of the law, exactly, by numbers, clearly defining a system, was not the accident of the language, but was its very essence, and of its primary organic construction; therefore, neither the language, nor the mathematical system attaching to it, could be of man's invention, unless both were founded upon a prior language, which afterwards became obsolete . . ." (p. 205).

The author proves these points by further elucidation, and reveals the secret meaning of more than one dead-letter narrative, by showing that probably [[hebrew]] man was the primordial word -- "the very first word possessed by the Hebrews, whoever they were, to carry the idea by sound of a man. The essential of this word was 113 (the numerical value of that word) from the beginning, and carried with it the elements of the cosmical system displayed."

This is demonstrated by the Hindu Wittoba -- a form of Vishnu -- as said already. The figure of Wittoba, even to the nail-marks on the feet,* is that of Jesus crucified, in all its details save the Cross; and that MAN was meant is proved to us further by the fact of the Initiate being reborn after his crucifixion on the TREE OF LIFE. This "tree" has now become exoterically, through its use by the Romans as an instrument of torture, and the ignorance of the early Christian schemers, the tree of death!

Thus, one of the seven esoteric meanings implied in this mystery of Crucifixion by the mystic inventors of the system -- the original elaboration and adoption of which dates back to the very establishment of the MYSTERIES -- is discovered in the geometrical symbols containing the history of the evolution of man. The Hebrews, whose prophet Moses was so learned in the esoteric Wisdom of Egypt, and who adopted their numerical system from the Phoenicians, and later from the Gentiles, from whom they borrowed most of their Kabalistic Mysticism, adapted, most ingeniously, the Cosmic and anthropological symbols of the "heathen" nations to their peculiar secret records. If Christian

[[Footnote(s)]] -----

* See Moor's Hindu Pantheon, where Wittoba's left foot bears the mark of the nail -- on the figure of his idol.

[[Vol. 2, Page]] 561 THE MEANING OF THE CRUCIFIXION.

sacerdotalism has lost the key of it to-day, the early compilers of the Christian Mysteries were well versed in Esoteric philosophy and the Hebrew occult metrology, and used it dexterously. Thus they took the word aish (one of the Hebrew word forms for MAN) and used it in conjunction with that of Shanah "lunar year," so mystically connected with the name of Jehovah, the supposed "father" of Jesus, and embosomed the mystic idea in an astronomical value and formula.

The original idea of "Man Crucified" in Space belongs certainly to the ancient Hindus, and Muir shows it in his "Hindu Pantheon" in the engraving that represents Wittoba. Plato adopted it in his decussated Cross in Space, the [[diagram]], "the Second God who impressed himself on the Universe in the form of the Cross"; Krishna is likewise shown "crucified." (See Dr. Lundy's Monumental Christianity, fig. 72.) Again it is repeated in the Old Testament in the queer injunction to crucify men before the Lord, the Sun -- which is no prophecy at all, but has a direct phallic significance. In § II. of that same most suggestive work on the Kabalistic meanings -- "The Hebrew-Egyptian Mystery," we read again:--

"In symbol, the nails of the cross have for the shape of the heads thereof a solid pyramid, and a tapering square obeliscal shaft, or phallic emblem, for the nail. Taking the position of the three nails in the Man's extremities and on the cross, they form or mark a triangle in shape, one nail being at each corner of the triangle. The wounds or stigmata in the extremities are necessarily four designative of the square. . . . The three nails with the three wounds are in number 6, which denotes the 6 faces of the cube unfolded (which make the cross or man-form, or 7, counting three horizontal and four vertical bars) on which the man is placed; and this in turn points to the circular measure transferred on to the edges of the cube. The one wound of the feet separates into two when the feet are separated, making three together for all, and four when separated, or 7 in all -- another most holy (and with the Jews) feminine base number."

Thus, while the phallic or sexual meaning of the "Crucifixion Nails" is proven by the geometrical and numerical reading, its mystical meaning is indicated by the short remarks upon it, as given above, in its connection with, and bearing upon, Prometheus. He is another victim, for he is crucified on the Cross of Love, on the rock of human passions, a sacrifice to his devotion to the cause of the spiritual element in Humanity.

Now, the primordial system, the double glyph that underlies the idea of the Cross, is not "of human invention," for Cosmic ideation and the Spiritual representation of the divine Ego-man are at its basis. Later, it expanded in the beautiful idea

adopted by and represented in the Mysteries, that of regenerated man, the mortal, who, by crucifying the man of flesh and his passions on the

[[Vol. 2, Page]] 562 THE SECRET DOCTRINE.

Procrustean bed of torture, became reborn as an Immortal. Leaving the body, the animal-man, behind him, tied on the Cross of Initiation like an empty chrysalis, the Ego Soul became as free as a butterfly. Still later, owing to the gradual loss of spirituality, the cross became in Cosmogony and Anthropology no higher than a phallic symbol.

With the Esotericists, from the remotest times the Universal Soul or anima mundi, the material reflection of the Immaterial Ideal, was the Source of Life of all beings and of the life principle of the three kingdoms; and it was Septenary with the Hermetic philosophers, as with all ancients. For it is represented as a Sevenfold cross, whose branches are respectively, light, heat, electricity, terrestrial magnetism, astral radiation, motion, and Intelligence, or what some call self-consciousness.

We have said it elsewhere. Long before the cross or its sign were adopted as symbols of Christianity, the sign of the cross was used as a sign of recognition among adepts and neophytes, the latter being called Chrests (from Chrestos, man of tribulation and sorrow). Says E. Levi: "The sign of the cross adopted by the Christians does not belong exclusively to them. It is Kabalistic, and represents the opposition and quaternary equilibrium of the elements. We see by the Occult verse of the Paternoster that there were originally two ways of making it, or, at least two very different formulas to express its meaning -- one reserved for priests-initiates, the other given to neophytes and the profane. Thus, for example, the initiate, carrying his hand to his forehead, said: To thee; then he added, belong: and continued, while carrying his hand to the breast -- the kingdom; then, to the left shoulder -- justice: to the right shoulder -- and mercy. Then he joined the two hands, adding: throughout the generating cycles: 'Tibi sunt Malchut et Geburah et Chessed per Aeonas' -- a sign of the Cross, absolutely and magnificently kabalistic, which the profanations of Gnosticism made the militant and official Church completely lose." (Dogma et Ritual, etc., Vol. II., p. 88.)

The "militant and official Church" did more: having helped herself to what had never belonged to her, she took only that which the "profane" had, the Kabalistic meaning of the male and female Sephiroth. She never lost the inner and higher meaning since she never had it -- E. Levi's pandering to Rome, notwithstanding. The sign of the cross adopted by the Latin Church was phallic from the beginning, while that of the Greeks was the cross of the neophytes, the CREST.

[[Vol. 2, Page]] 563 THE SEVEN THUNDERS.

§ XXIII.

THE UPANISHADS IN GNOSTIC LITERATURE.

We are reminded in King's "Gnostics" that the Greek language has but one word for vowel and voice; and this has led the uninitiated to many erroneous interpretations. On the simple knowledge, however, of that well-known fact a comparison may be attempted, and a flood of light thrown upon several mystic meanings. Thus the words, so often used in the Upanishads and the Puranas, "Sound" and "Speech," may be collated with the Gnostic "Vowels" and the "Voices" of the Thunders and Angels in "Revelation." The same will be found in Pistis Sophia, and other ancient Fragments and MSS. This was remarked even by the matter-of-fact author of "The Gnostics and their Remains."

Through Hippolytus, an early Church Father, we learn what Marcus -- a Pythagorean rather than a Christian Gnostic, and a Kabalist most certainly -- had received in mystic revelation. It is said that "Marcus had it revealed unto him that 'the seven heavens'* . . . sounded each one vowel, which, all combined together, formed a complete doxology"; in clearer words: "the Sound whereof being carried down (from these seven heavens) to earth, became the creator and parent of all things that be on earth." (See "Hippolytus," vi., 48, and King's Gnostics, p. 200.) Translated from the Occult phraseology into still plainer language this would read: "The Sevenfold LOGOS having differentiated into seven Logoi, or creative potencies (vowels) these (the second logos, or "Sound") created all on Earth.

Assuredly one who is acquainted with Gnostic literature can hardly help seeing in St. John's Apocalypse, a work of the same school of thought. For we find John saying (chap. x. 3, 4), "Seven thunders uttered their voices . . . and I was about to write . . . (but) I heard a voice from heaven saying unto me, 'Seal up those things which the seven thunders uttered, and write them not.'" The same injunction is given to Marcus, the same to all other semi and full Initiates. Yet the sameness of equivalent expressions used, and of the underlying ideas, always betrays a portion of the mysteries. We must always seek for more than one meaning in every mystery allegorically revealed, especially in those in which the number seven and its multiplication seven by seven, or forty-nine, appear. Now when the Rabbi Jesus is requested (in Pistis

[[Footnote(s)]] -----

* The "Heavens" are identical with "Angels," as already stated.

[[Vol. 2, Page]] 564 THE SECRET DOCTRINE.

Sophia) by his disciples to reveal to them, "the mysteries of the Light of thy (his) Father" (i.e., of the higher SELF enlightened by Initiation and Divine knowledge), Jesus answers: "Do ye seek after these mysteries? No mystery is more excellent than they which shall bring your souls unto the Light of Lights, unto the place of Truth and Goodness, unto the place where there is neither male nor female, neither form in that place but Light, everlasting, not to be uttered. Nothing therefore is more excellent than the mysteries which ye seek after, saving only THE MYSTERY of the seven vowels and

their FORTY AND NINE POWERS, and their numbers thereof; and no name is more excellent than all these vowels." "The Seven Fathers and the Forty-nine Sons blaze in DARKNESS, but they are the LIFE and LIGHT and the continuation thereof through the Great Age" -- says the Commentary speaking of the "Fires."

Now it becomes evident that, in every esoteric interpretation of exoteric beliefs expressed in allegorical forms, there was the same underlying idea -- the basic number seven, the compound of three and four, preceded by the divine THREE ([[diagram]]) making the perfect number ten.

Also, these numbers applied equally to divisions of time, to cosmography metaphysical and physical, as well as to man and everything else in visible nature. Thus these Seven vowels with their forty-nine powers are identical with the three and the Seven Fires of the Hindus and their forty-nine fires; identical with the numerical mysteries of the Persian Simorgh; identical with those of the Jewish Kabalists. The latter, dwarfing the numbers (their mode of blinds), made the duration of each successive renewal (what we call in esoteric parlance Round) of the seven renewals of the globe only of 7,000 years, instead of, as is more likely, 7,000,000,000, and assigned to the total duration of the universe 49,000 years only. (Compare § "Chronology of the Brahmins.")

Now, the Secret Doctrine furnishes a key which reveals to us on indisputable grounds of comparative analogy that Garuda, the allegorical and monstrous half-man and half-bird, -- the Vahan or vehicle on which Vishnu (who is Kala, "time") is shown to ride -- is the origin of all other such allegories. He is the Indian phoenix, the emblem of cyclic and periodical time, the "man-lion" Singha, of whose representations the so-called "gnostic gems" are so full.* "Over the seven rays of the lion's crown, and corresponding to their points, stand, in many cases, the seven vowels of the Greek alphabet [Gk char], testifying to the Seven Heavens." This is the Solar lion and the emblem of the Solar cycle, as

[[Footnote(s)]] -----

* As confessed by King, the great authority on Gnostic antiquities, these gnostic gems are not the work of the Gnostics, but belong to pre-Christian periods, and are the work of magicians (p. 241).

[[Vol. 2, Page]] 565 WHEN TIME BE NO LONGER.

Garuda* is that of the great cycle, the "Maha-Kalpa" co-eternal with Vishnu, and also, of course, the emblem of the Sun, and Solar cycle. This is shown by the details of the allegory. At his birth, Garuda is mistaken for Agni, the God of Fire, on account of his (Garuda's) "dazzling splendour," and called thereupon Gaganeswara, "lord of the sky." Again, his being represented as Osiris, and by many heads of allegorical monsters on the Abraxas (gnostic) gems, with the head and beak of an eagle or a hawk (solar birds), denotes Garuda's solar and cyclic character. His Son is Jatabu, the cycle of 60,000 years. As well remarked by C. W. King:-- "Whatever the primary meaning (of the gem with the solar lion and vowels) it was probably imported in its present shape from INDIA, that true fountain head of gnostic iconography" (Gnostics, p. 218).

The mysteries of the seven gnostic vowels, uttered by the thunders of St. John, can be unriddled only by the primeval and original Occultism of Aryavarta, brought into India by the primeval Brahmins, who had been initiated in Central Asia. And this is the Occultism we study and try to explain, as much as is possible in these pages. Our doctrine of seven Races and Seven Rounds of life and evolution around our terrestrial chain of spheres, may be found even in Revelation.** When the seven "thunders," or "sounds," or "vowels" -- one meaning out of the seven for each such vowel relating directly to our own Earth and its seven Root-Races in each Round -- "had uttered their voices" -- but forbidden the Seer to write them, and made him "seal up those things" -- what did the Angel "standing upon the sea and upon the earth" do? He lifted his hand to heaven "and swore by him that liveth for ever and ever . . . that there should be time no longer." "But in the days of the voice of the seventh angel when he shall begin to sound, the Mystery of God (of the Cycle) should be finished" (x. 7), which means, in theosophic phraseology, that when the Seventh Round is completed, then Time will cease. "There shall be time no longer" very naturally, since pralaya shall set in and there will remain no one on earth to keep a division of time, during that periodical dissolution and arrest of conscious life.

Dr. Kenealy and others believed this doctrine of the Rabbins (their calculations of cyclic seven and forty-nine) to have been brought by

[[Footnote(s)]] -----

* The lack of intuition in Orientalists and antiquarians past and present, is remarkable. Thus, Wilson, the translator of Vishnu Purana, declares in his Preface that in the Garuda Purana he found "no account of the birth of Garuda." Considering that an account of "Creation" in general is given therein, and that Garuda is co-eternal with Vishnu, the Maha Kalpa, or Great Life-Cycle, beginning with and ending with the manifesting Vishnu, what other account of Garuda's birth could be expected!

** Vide Revelation xvii., verses 2 and 10; and Leviticus xxiii., verses 15 to 18; the first passage speaking of the "Seven Kings," of whom five have gone; and the second about the "Seven Sabbaths," etc.

[[Vol. 2, Page]] 566 THE SECRET DOCTRINE.

them from Chaldea. This is more than likely. But the Babylonians, who had all those cycles and taught them only at their great initiatory mysteries of astrological magic, got their wisdom and learning from India. It is not difficult, therefore, to recognize in them our own esoteric doctrine. In their secret computations, the Japanese have the same figures in their cycles. As to the Brahmins, their Puranas and Upanishads are a good proof of it. The latter have passed entirely into Gnostic literature; and a Brahmin needs only to read Pistis Sophia* to recognize his forefathers' property, even to the phraseology and similes used. Compare: in Pistis Sophia the disciple says to Jesus: "Rabbi, reveal unto us the Mysteries of the Light (i.e., the "Fire of Knowledge or Enlightenment") . . . forasmuch as we have heard thee saying that there is another baptism of smoke, and another baptism of the Spirit of Holy Light," i.e., the Spirit of FIRE. "I baptize you with

water, but . . . he shall baptize you with the Holy Ghost and with fire," says John of Jesus (Matt. iii. 2); meaning this esoterically. The real significance of this statement is very profound. It means that he, John, a non-initiated ascetic, can impart to his disciples no greater wisdom than the mysteries connected with the plane of matter (water being a symbol of it). His gnosis was that of exoteric and ritualistic dogma, of dead-letter orthodoxy; ** while the wisdom which Jesus, an Initiate of the higher mysteries, would reveal to them, was of a higher character, for it was the "FIRE" Wisdom of the true gnosis or the real spiritual enlightenment. One was FIRE, the other the SMOKE. For Moses, the fire on Mount Sinai, and the spiritual wisdom imparted; for the multitudes of the "people" below, for the profane, Mount Sinai in (through) smoke, i.e., the exoteric husks of orthodox or sectarian ritualism.

Now, having the above in view, read the dialogue between the sages Narada and Davamata in the Anugita, the antiquity and importance of which MS. (an episode from the Mahabharata) one can learn in the "Sacred Books of the East," edited by Prof. Max Muller.** Narada is discussing upon the breaths or the "life-winds," as they are called in

[[Footnote(s)]] -----

* Pistis Sophia is an extremely important document, a genuine Evangel of the Gnostics, ascribed at random to Valentinus, but much more probably a pre-Christian work in its original. It was discovered in a Coptic MS. by Schwartz, in the British Museum, quite accidentally, and translated by him into Latin; after which text and (Latin) version were published by Petermann in the year 1853. In the text itself the authorship of this Book is ascribed to Philip the Apostle, whom Jesus bids to sit down and write the revelation. It is genuine and ought to be as canonical as any other gospel. Unfortunately it remains to this day untranslated.

** In the Cycle of Initiation, which was very long, water represented the first and lower steps toward purification, while trials connected with fire came last. Water could regenerate the body of matter; FIRE alone, that of the inner Spiritual man.

*** See Introduction by Kashinath Trimbak Telang, M.A.

[[Vol. 2, Page]] 567 TRUTH BETWEEN TWO CONTRASTS.

the clumsy translations of such words as Prana, Apana, etc., whose full esoteric meaning and application to individual functions can hardly be rendered in English. He says of this Science that "it is the teaching of the Veda that the fire verily is all the deities, and knowledge of it arises among Brahmans, being accompanied by intelligence." By "fire," says the Commentator, he means the SELF. By "intelligence," the Occultist says, Narada means neither "discussion" nor "argumentation," as Aruna Misra believes, but "intelligence" truly, or the adaptation of the fire of Wisdom to Exoteric Ritualism for the profane. This is the chief concern of the Brahmans (who were the first to set the example to other nations who thus anthropomorphized and carnalized the grandest metaphysical truths). Narada makes it plain and is made to say: "The smoke of that fire, which is of excellent glory, appears in the shape of darkness" (verily so!); "its ashes (are) passion; and goodness is that in connection with it in which the offering is thrown": i.e., that faculty in the disciple which apprehends the subtle truth (the flame) which escapes heavenward, while the objective sacrifice remains as a proof and evidence of piety only to the profane. For what can Narada mean in teaching that "those who understand the sacrifice understand the Samana and the Vyana as the principal (offering)"; and "the Prana and Apana, but portions of the offering . . . and between them is the fire . . . that is the excellent seat of the Udana as understood by Brahmanas. As to that which is distinct from these pairs, hear me speak about that. Day and night are a pair, between them is the fire. . . That which exists and that which does not exist are a pair, between them is the fire, etc.," and after every such contrast Narada adds "That is the excellent seat of the Udana as understood by Brahmanas."

Now many people do not know the full meaning of such terms as Samana and Vyana, Prana and Apana, explained as being "life-winds" (we say "principles and their respective faculties and senses"), being offered up to Udana, the so-called principal "life wind," (?) said to act at all the joints. Therefore the reader, who is ignorant that the word "fire" means in these allegories both the "Self" and the higher divine knowledge, will understand nothing in this; and will therefore entirely miss the point of our argument, as its translators and even its editor the great Oxford Sanskritist, Max Muller, has missed the true meaning of Narada's words. Exoterically, all this enumeration of "life winds" means, of course, approximately, that which is surmised in the foot-notes; namely, "The sense appears to be this . . . worldly life is due to the operations of the life-winds which are attached to the SELF, and lead to its manifestations as individual souls (?). Of these the Samana and Vyana are controlled and held under check by

[[Vol. 2, Page]] 568 THE SECRET DOCTRINE.

the Prana and Apana. . . The latter two are held in check and controlled by the Udana, which thus controls all. And the control of this, which is the control of all five . . . leads to the Supreme Self" (p. 259, Anugita, "Sacred Books of the East," Vol. VIII.)

The above is given as an explanation of the text, which records the words of the Brahmana, who narrates how he reached the ultimate Wisdom of Yogism, and had reached all knowledge in this wise. Saying that he had "perceived by means of the SELF the seat abiding in the SELF," where dwells the Brahman free from all; and explaining that that indestructible principle was entirely beyond the perception of senses (i.e., of the five "life-winds"), he adds that "in the midst of an these (life-winds) which move about in the body and swallow up one another, blazes the Vaisvanara fire sevenfold." This "Fire," according to Nilakantha's Commentary, is identical with the "I," the SELF, which is the goal of the ascetic (Vaisvanara being a word often used for the Self). Then the Brahmana goes on to enumerate that which is meant by the word "Sevenfold," and says, "The nose (or smell), the tongue (taste), the eye, and the skin, and the ear as the fifth, the mind, and the understanding, these are the seven tongues of the blaze of Vaisvanara,* . . . those are the seven (kinds of) fuel for me,** . . . these are the seven great officiating priests."

These seven priests are accepted by Arjuna Misra in the sense of meaning "the soul distinguished as so many (souls, or principles) with reference to these several powers"; and, finally, the translator seems to accept the explanation, and

reluctantly admits that "they may mean" this; though he himself takes the sense to mean "the powers of hearing, etc. (the physical senses, in short) which are presided over by the several deities." (Vide loc. cit., p. 259, f.n. 6.)

But whatever it may mean, whether in scientific or orthodox interpretations, this passage on page 259 explains Narada's statements on page 276, and shows them referring to exoteric and esoteric methods and contrasting them. Thus the Samana and the Vyana, though subject to the Prana and the Apana, and all the four to Udana in the matter of acquiring the Pranayama (of the Hatha-Yogi, chiefly, or the "lower" form of the Yoga) are yet referred to as the principal offering, for, as rightly argued by the commentator, their "operations are more practically important for vitality"; i.e., they are the grossest, and are offered in the sacrifice, to disappear, so to speak, in the quality of darkness of that fire or its SMOKE (mere exoteric ritualistic form). But

[[Footnote(s)]] -----

* In the astronomical and cosmical key, Vaisvanara is Agni, son of the Sun, or Viswanaras, but in the psycho-metaphysical symbolism it is the SELF, in the sense of non-separateness, i.e., both divine and human.

** Here the speaker personifies the said divine SELF.

[[Vol. 2, Page]] 569 THE DIVINE SELF'S WISDOM.

Prana and Apana, though shown as subordinate (because less gross or more purified), have the FIRE between them: the Self and the secret knowledge possessed by that Self. So for the good and evil, and for "that which exists and that which does not exist"; all these "pairs"* have fire between them, i.e., esoteric knowledge, the Wisdom of the divine SELF. Let those who are satisfied with the Smoke of the FIRE remain wherein they are, that is to say within the Egyptian darkness of theological fictions and dead-letter interpretations.

The above is written only for the Western students of Occultism and Theosophy. The writer presumes to explain these things neither to the Hindus, who have their own Gurus; nor to the Orientalists, who think they know more than all the Gurus and Rishis, past and present, put together. These rather lengthy quotations and examples cited are necessary, if even to point out to the student the works he has to study so as to derive benefit and learning from comparison. Let him read Pistis Sophia in the light of the Bhagavatgita, the Anugita and others; and then the statement made by Jesus in the Gnostic Gospel will become clear, and the dead letter blinds disappear at once. Read this and compare with the explanation from the Hindu scriptures just given. . . . "And no name is more excellent than all these (seven) vowels. A name wherein be contained all names, all Lights, and all (the forty-nine) powers, knowing it, if a man quits this body of matter** no Smoke (i.e., no theological delusion),*** no darkness, nor Ruler of the Sphere (no personal genius or planetary spirit called God), or of Fate (karma) shall

[[Footnote(s)]] -----

* Compare with these "pairs of opposites," in the Anugita, the "pairs" of AEons, in the elaborate system of Valentinus, the most learned and profound master of Gnosis. As the "pairs of opposites," male and female, are all derived from Akasa (undeveloped and developed, differentiated and undifferentiated, or SELF or Prajapati), so are the Valentinian "pairs" of male and female AEons shown to emanate from Bythos, the pre-existing eternal Depth, and in their secondary emanation from Ampiou-Ouraan (or sempiternal Depth and Silence), the second Logos. In the esoteric emanation there are seven chief "pairs of opposites"; and so also in the Valentinian system there were fourteen, or twice seven. Epiphanius, copying incorrectly, "copied one pair twice over," Mr. C. W. King thinks, "and thus adds one pair to the proper fifteen." ("The Gnostics," etc., pp. 263-4.) Here King falls into the opposite error: the pairs of AEons are not 15 (a blind) but 14, as the first AEon is that from which others emanate, Depth and Silence being the first and only emanation from Bythos. As Hippolytus shows: "The AEons of Valentinus are confessedly the Six Radicals of Simon (Magus)," with the seventh, Fire, at their head. And these are: Mind, Intelligence, Voice, Name, Reason and Thought subordinate to FIRE, the higher self, or precisely the "Seven Winds" or the "Seven Priests" of Anugita.

** Not necessarily at death only, but during Samadhi or mystic trance.

*** All the words and sentences between parenthetical marks, are the writer's. This is translated directly from the Latin MS. of the British Museum. King's translation in the Gnostics conforms too much to the gnosticism as explained by the Church-Fathers.

[[Vol. 2, Page]] 570 THE SECRET DOCTRINE.

be able to hold back the soul that knoweth that name. . . If he shall utter that (Name) unto the fire, the darkness shall flee away. . . And if he shall utter that name unto . . . all their Powers, nay, even unto Barbelo,* the Invisible God, and the triple-powered Gods, so soon as he shall have uttered that name in those places, they shall all be shaken and thrown one upon the other, so that they shall be ready to melt, perish and disappear, and shall cry aloud, 'O, Light of all Lights that art in the Boundless Light, remember us also and purify us!'

It is easy to see who this Light and Name are: the light of Initiation and the name of the "Fire-Self," which is no name, no action, but a Spiritual, ever-living Power, higher even than the "Invisible God," as this Power is ITSELF.

But if the able and learned author of the "Gnostics and their Remains" has not sufficiently allowed for the Spirit of allegory and mysticism in the fragments translated and quoted by him, in the above named work, from Pistis Sophia -- other Orientalists have done far worse. Having neither his intuitional perception of the Indian origin of the Gnostic Wisdom still more than of their "gems," most of them, beginning with Wilson and ending with the dogmatic Weber, have made most extraordinary blunders with regard to almost every symbol. Sir M. Monier Williams and others show a very decided contempt for the "Esoteric Buddhists" as theosophists are now called; yet no Student of Occult philosophy has ever mistaken a cycle for a living personage and vice versa, as was very often the case with our learned Orientalists. An instance or two may illustrate the statement more graphically. Let us choose the best known.

In the Ramayana, Garuda is called "the maternal uncle of Sagara's 60,000 sons"; and Anumat, Sagara's grandson, "the nephew of the 60,000 uncles" reduced to ashes by the look of Kapila, "the Purushottama" (or infinite Spirit), who caused Sagara's horse for the Aswamedha sacrifice to disappear. Again, Garuda's son** -- Garuda being himself the Maha-Kalpa or great cycle -- Jatayu, the king of the feathered tribe, when on the point of being slain by Ravana who carries off Sita -- says, speaking of himself:

"It is 60,000 years O King, that I am born," after which turning his back on the Sun -- he dies.

Jatayu is, of course, the cycle of 60,000 years within the great cycle of GARUDA; hence he is represented as his son, or nephew, ad libitum,

[[Footnote(s)]] -----

* Barbelo is one of the three "Invisible Gods," and, as C. W. King believes, includes "the Divine Mother of the Saviour," or rather Sophia Achamoth (Vide cap. 359).

** In other Puranas Jatayu is the son of Aruna, Garuda's brother, both the Sons of Kasyapa. But all this is external allegory.

[[Vol. 2, Page]] 571 THE ANTIQUITY OF THE KAPILAS.

since the whole meaning rests in his being placed on the line of Garuda's descendants. Then, again, there is Diti -- the Mother of the Maruts -- whose descendants and progeny belonged to the posterity of Hiranyaksha, "whose number was 77 crores (or 770 millions) of men." (See Padma Purana.) All such narratives are pronounced meaningless fictions and absurdities. But -- Truth is the daughter of Time, verily; and time will show.

Meanwhile, what could be easier than an attempt, at least, to verify Puranic chronology? There are many Kapilas; but the Kapila who slew King Sagara's progeny -- 60,000 men strong -- was undeniably Kapila, the founder of the Sankhya philosophy, since it is so stated in the Puranas; although one of them flatly denies the imputation without explaining its esoteric meaning. It is the Bhagavata Purana (IX. viii., 12 and 13), which says that "the report that the sons of the King were reduced to ashes by the mere glance of the sage is not true." "For," as it argues, "how can the quality of darkness, the product of anger, exist in a sage whose goodness was the essence that purified the world -- the earth's dust, as it were, attributed to Heavens! How should mental perturbation distract that sage, identified with the Supreme Spirit, and who has steered here (on earth) that solid vessel of the Sankhya (philosophy), with the help of which he who desires to obtain liberation crosses the dreaded ocean of existence, that path to death?"

The Purana is in duty bound to speak as it does. It has a dogma to promulgate and a policy to carry out -- that of great secrecy with regard to mystical divine truths divulged for countless ages only at initiation. It is not in the Puranas, therefore, that we have to look for an explanation of the mystery connected with various transcendental states of being. That the story is an allegory is seen upon its very face: the 60,000 Sons, brutal, vicious, and impious, are the personification of the human passions that a "mere glance of the sage" -- the SELF who represents the highest state of purity that can be reached on earth reduces to ashes. But it has also other significations -- cyclic and chronological meanings, -- a method of marking the periods when certain sages flourished, found also in other Puranas.

Now it is as well ascertained as any tradition can be, that it was at Hardwar (or Gangadwara, the "door or gate of the Ganges") at the foot of the Himalayas, that Kapila sat in meditation for a number of years. Not far from the Sewalik range, the "pass of Hardwar" is called to this day "Kapila's Pass"; and the place, "Kapilasthan," by the ascetics. It is there that Ganga (Ganges) emerging from its mountainous gorge, begins its course over the sultry plains of India. And it is as clearly ascertained by geological survey that the tradition which claims that the

[[Vol. 2, Page]] 572 THE SECRET DOCTRINE.

ocean ages ago washed the base of the Himalayas -- is not entirely without foundation, for there are traces left of this.

The Sankhya philosophy may have been brought down and taught by the first, and written out by the last Kapila.

Now Sagara is the name of the Ocean, and even of the Bay of Bengal, at the mouth of the Ganges, to this day in India (Vide Wilson's Vishnu Purana, Vol. III. p. 309). Have geologists ever calculated the number of millenniums it has taken the sea to recede to where it is now, from Hardwar, 1,024 feet above the level of the sea at present? If they did, those Orientalists who show Kapila flourishing from the 1st to the 9th cent. A.D., might change their opinions, if only for one of two very good reasons: the true number of years elapsed since Kapila's day is in the Puranas unmistakably, though the translators fail to see it. And secondly -- the Kapila of the Satya, and the Kapila of the Kali-Yugas may be one and the same INDIVIDUALITY, without being the same PERSONALITY.

Kapila, besides being the name of a personage, of the once living Sage and the author of Sankhya philosophy, is also the generic name of the Kumaras, the celestial ascetics and virgins; therefore the very fact of Bhagavata Purana calling that Kapila -- which it showed just before as a portion of Vishnu -- the author of Sankhya philosophy, ought to have warned the reader of a blind containing an esoteric meaning. Whether the Son of Vitatha, as Harivansa shows him to be, or of anyone else, the author of Sankhya cannot be the same as the Sage of the Satya Yuga -- at the very beginning of the Manvantara, when Vishnu is shown in the form of Kapila, "imparting to all creatures true Wisdom"; for this relates to that primordial period when "the Sons of God" taught to the just created men the arts and sciences, which have been cultivated and preserved since then in the sanctuaries by the Initiates. There are several well-known Kapilas in the Puranas. First the primeval sage, then Kapila, one of the three "Secret" Kumaras; and Kapila, son of Kasyapa and Kadru -- the "many-headed Serpent," (See Vayu Purana placing him on the list of the forty renowned sons of Kasyapa), besides

Kapila, the great sage and philosopher of the Kali Yuga. Being an Initiate, "a Serpent of Wisdom," a Naga, the latter was purposely blended with the Kapilas of the former ages.

[[Vol. 2, Page]] 573 THE Gnostics AND Pythagoras.

§ XXIV.

THE CROSS AND THE Pythagorean DECADE.

THE early Gnostics claimed that their Science, the GNOSIS, rested on a square, the angles of which represented respectively Sige (Silence), Bythos (depth), Nous (Spiritual Soul or Mind), and Aletheia (Truth).

It is they who were the first to introduce and reveal to the world that which had remained concealed for ages: namely, the Tau, in the shape of a Procrustean bed, and Christos as incarnating in Chrestos, he who became for certain purposes a willing candidate for a series of tortures, mental and physical.

For them the whole of the Universe, metaphysical and material, was contained within, and could be expressed and described by the digits of Number 10, the Pythagorean decade.

This Decade representing the Universe and its evolution out of Silence and the unknown Depths of the Spiritual Soul, or anima mundi, presented two sides or aspects to the student. It could be, and was at first so used and applied to the Macrocosm, after which it descended to the Microcosm, or Man. There was, then, the purely intellectual and metaphysical, or the "inner Science," and the as purely materialistic or "surface science," both of which could be expounded by and contained in the Decade. It could be studied, in short, from the Universals of Plato, and the inductive method of Aristotle. The former started from a divine comprehension, when the plurality proceeded from unity, or the digits of the decade appeared, but to be finally re-absorbed, lost in the infinite Circle. The latter depended on sensuous perception alone, when the Decade could be regarded either as the unity that multiplies, or matter which differentiates, its study being limited to the plane surface; to the Cross, or the Seven which proceeds from the ten -- or the perfect number, on Earth as in heaven.

This dual system was brought, together with the Decade, by Pythagoras from India. That it was that of the Brachmans and Iranians, as they are called by the ancient Greek philosophers, is warranted to us by the whole range of Sanskrit literature, such as the Puranas and the laws of Manu. In these "Laws" or "Ordinances of Manu," it is said that Brahma first creates "the ten lords of Being," the ten Prajapati or creative Forces; which ten produce "seven" other Manus, or, rather, as some MSS. have it, Munin, instead of Manun = "devotees," or holy Beings, which are the Seven Angels of the Presence in the

[[Vol. 2, Page]] 574 THE SECRET DOCTRINE.

Western religion. This mysterious number Seven, born from the upper triangle [[diagram]], the latter itself born from the apex thereof, or the Silent Depths of the unknown universal soul (Sige and Bythos), is the sevenfold Saptaparna plant, born and manifested on the surface of the soil of mystery, from the threefold root buried deep under that impenetrable soil. This idea is fully elaborated in Vol. I. § "Primordial Substance and Divine Thought," which the reader has to notice carefully, if he would grasp the metaphysical idea involved in the above symbol. In man as in nature, it is, according to the cis-Himalayan esoteric philosophy (which is that of the original Manu Cosmogony), the septenary division that is intended by Nature herself. The seventh principle (purusha) alone is the divine SELF, strictly speaking; for, as said in Manu, "He (Brahma) having pervaded the subtle parts of those six of unmeasured brightness," created or called them forth to "Self"-consciousness or the consciousness of that One SELF (V. 16, ch. i. Manu). Of these six, five elements (or principles, or Tattva, as Medhatithi, the commentator thinks) "are called the atomic destructible elements" (v. 27); they are described in the above-named section.

We have now to speak of the Mystery language, that of the prehistoric races. It is not a phonetic, but a purely pictorial and symbolical tongue. It is known at present in its fulness to the very few, having become with the masses for more than 5,000 years an absolutely dead language. Yet most of the learned Gnostics, Greeks and Jews, knew it, and used it, though very differently. A few instances may be given.

On the plane above, the Number is no Number but a nought -- a CIRCLE. On the plane below, it becomes one -- which is an odd number. Each letter of the ancient alphabets having had its philosophical meaning and raison d'etre, the number I signified with the Alexandrian Initiates a body erect, a living standing man, he being the only animal that has this privilege. And, by adding to the I a head, it was transformed into a P, a symbol of paternity, of the creative potency; while R signified a "moving man," one on his way. Hence PATER ZEUS had nothing sexual or phallic either in its sound or form of letters; nor had [[pater Deus]] (vide Ragon). If we turn now to the Hebrew Alphabet, we shall find that while I or aleph, [[hebrew]], has a bull or an Ox for its symbol, 10, the perfect number, or One of the Kabala is a Yodh [[hebrew]] (y, i, or j); and means, as the first letter of Jehovah, the procreative organ, et seq.

The odd numbers are divine, the even numbers are terrestrial, devilish, and unlucky. The Pythagoreans hated the binary. With them it was the origin of differentiation, hence of contrasts, discord, or matter, the beginning of evil. In the Valentinian theology, Bythos and Sige (Depth, Chaos, matter born in Silence) are the primordial binary.

[[Vol. 2, Page]] 575 THE THREE SCIENCES.

With the early Pythagoreans, however, the duad was that imperfect state into which the first manifested being fell when it got detached from the Monad. It was the point from which the two roads -- the Good and the Evil -- bifurcated. All that which was double-faced or false was called by them "binary." ONE was alone Good, and Harmony, because no

disharmony can proceed from one alone. Hence the Latin word Solus in relation to one and only God, the Unknown of Paul. Solus, however, very soon became Sol -- the Sun.

The ternary is thus the first of the odd numbers, as the triangle is the first of the geometrical figures. This number is truly the number of mystery par excellence. To study it on the exoteric lines one has to read Ragon's Cours Interpretatif des Initiations; on the esoteric -- the Hindu symbolism of numerals; as the combinations which were applied to it are numberless. It is on the occult properties of the three equal lines or sides of the Triangle that Ragon based his studies and founded the famous masonic society of the Trinosophists (those who study three sciences; an improvement upon the ordinary three masonic degrees, given to those who study nothing except eating and drinking at the meetings of their lodges). "The first line of the triangle offered to the apprentice for study," writes the founder, -- "is the mineral kingdom, symbolized by Tubalc . . . (Tubal-cain). The second side on which the 'companion' has to meditate, is the vegetable kingdom, symbolized by Schibb [[diagram]] (Schibboleth). In this kingdom begins the generation of the bodies. This is why the letter G is presented radiant before the eyes of the adept (? !). The third side is left to the master mason, who has to complete his education by the study of the animal kingdom. It is symbolized by Maoben [[diagram]] (Sun of putrefaction)" etc., etc.

The first solid figure is the Quaternary, symbol of immortality. It is the pyramid: for the pyramid stands on a triangular, square, or polygonal base, and terminates with a point at the top, thus yielding the triad and the quaternary or the 3 and 4. It is the Pythagoreans who taught the connection and relation between the gods and the numbers -- in a Science called arithmomancy. The Soul is a number, they said, which moves of itself and contains the number 4; and spiritual and physical man is number 3, as the ternary represented for them not only the surface but also the principle of the formation of the physical body. Thus animals were ternaries only, man alone being a septenary, when virtuous; a quinary when bad, for:--

Number 5 was composed of a binary and a ternary, which binary threw everything in the perfect form into disorder and confusion. The

[[Footnote(s)]] -----

* The reason for it is simple, and was given in "Isis Unveiled." In geometry, one line fails to represent a perfect body or figure, nor can two lines constitute a demonstratively perfect figure. The triangle alone is the first perfect figure.

[[Vol. 2, Page]] 576 THE SECRET DOCTRINE.

perfect man, they said, was a quaternary and a ternary, or four material and three immaterial elements; which three spirits or elements we likewise find in 5, when it represents the microcosm. The latter is a compound of a binary directly relating to gross matter, and of three Spirits:

"since 5 is the ingenious union of two Greek accents [[diagram]] placed over vowels which have or have not to be aspirated. The first sign [[diagram]] is called 'Strong Spirit' or superior Spirit, the spirit of God aspired (spiratus) and breathed by man. The second sign [[diagram]] the lower, is the Spirit of Love, representing the secondary Spirit; the third embraces the whole man. It is the universal Quintessence, the vital fluid or Life." (Ragon.)

The more mystic meaning of 5 is given in an excellent article by Mr. Subba Row, in "Five Years of Theosophy" (pp. 110, et seq.) -- "The Twelve Signs of the Zodiac," in which he gives some rules that may help the inquirer to ferret out "the deep significance of ancient Sanskrit nomenclature in the old Aryan myths and allegories." Meanwhile, let us see what has been hitherto stated about the constellation Capricornus in theosophical publications, and what is known of it generally. Every one knows that [[diagram]] is the tenth sign of the Zodiac into which the Sun enters at the winter solstice, about December 21st. But very few are those who know -- even in India, unless they are initiated -- the real mystic connection which seems to exist, as we are told, between the names Makara and Kumara. The first means some amphibious animal called flippantly 'crocodile,' as some Orientalists think, and the second is the title of the great patrons of Yogins (See "Saiva Puranas,") the Sons of, and even one with, Rudra (Siva); a Kumara himself. It is through their connection with Man that the Kumaras are likewise connected with the Zodiac. Let us try to find out what the word Makara means.

The word Makara, says the author of "The Twelve Signs of the Zodiac," "contains within itself the clue to its correct interpretation. The letter Ma is equivalent to No. 5, and Kara means hand. Now in Sanskrit Thribhujam means a triangle, bhujam or Karam (both synonyms) being understood to mean a side. So Makaram or Panchakaram means a Pentagon" - the five-pointed star or pentagon representing the five limbs of man.* Under the old system, we are told, Makara was the eighth instead of the tenth sign.** It is "intended to represent the faces of the Universe, and indicates that the Universe is bounded by Pentagons," as the Sanskrit writers "speak also of

[[Footnote(s)]] -----

* What is the meaning and the reason of this figure? Because, Manas is the fifth principle, and because the pentagon is the symbol of Man -- not only of the five-limbed, but rather of the thinking, conscious MAN.

** The reason for it becomes apparent when Egyptian symbology is studied. See further on.

[[Vol. 2, Page]] 577 POSEION'S FIVE MINISTERS.

Ashtadisa or eight faces bounding Space," referring thus to the loka-palas, the eight points of the compass (the four cardinal and the four intermediate points) . . . "From an objective point of view the Microcosm is represented by the human body. Makaram may be taken to represent simultaneously both the microcosm and the macrocosm, as external objects of perception." (pp. 113, 115).

But the true esoteric sense of the word "Makara," does not mean "crocodile," in truth, at all, even when it is compared with the animal depicted on the Hindu Zodiac. For it has the head and the fore-legs of an antelope and the body and tail of a fish. Hence the tenth sign of the Zodiac has been taken variously to mean a shark, a dolphin, etc.; as it is the vahan of Varuna, the Ocean God, and is often called, for this reason, Jala-rupa or "water-form." The dolphin was the vehicle of Poseidon-Neptune with the Greeks, and one with him, esoterically; and this "dolphin" is the "sea-dragon" as much as the Crocodile of the Sacred Nile is the vehicle of Horus, and Horus himself. "I am the fish and seat of the great Horus of Kemour," says the mummy-form God with the crocodile's head (ch. lxxxviii., 2, "Book of the Dead"). With the Peratae Gnostics it is Chozzar (Neptune), who converts into a sphere the dodecagonal pyramid, "and paints its gate with many colours." He has FIVE androgyne ministers -- he is Makara, the Leviathan.

The rising Sun being considered the Soul of the Gods sent to manifest itself to men every day, and the crocodile rising out of the water at the first sunbeam, that animal came finally to personify a Solar-fire devotee in India, as it personified that fire, or the highest soul with the Egyptians.

In the Puranas, the number of the Kumaras changes according to the exigencies of the allegory. For occult purposes their number is given in one place as seven, then as four, then as five. In the Kurma Purana it is said of them: "These five (Kumara), O Brahman, were Yogins who acquired entire exemption from passion." Their very name shows their connection with the said constellation -- the Makara, and with some other Puranic characters connected with the Zodiacal signs. This is done in order to veil what was one of the most suggestive glyphs of the primitive Temples. They are mixed up astronomically, physiologically, and mystically, in general, with a number of Puranic personages and events. Hardly hinted at in the "Vishnu," they figure in various dramas and events throughout all the other Puranas and sacred literature; so that the Orientalists, having to pick up the threads of connection hither and thither, have ended by proclaiming the Kumaras "due chiefly to the fancy of the Puranic writers." But --

Ma, -- we are told by the author of the "Twelve Signs of the Zodiac" -- is Five; kara, a hand with its five fingers, as also a five-sided sign or

[[Vol. 2, Page]] 578 THE SECRET DOCTRINE.

a pentagon. The Kumara (in this case an anagram for occult purposes) are five in esotericism, as Yogis -- because the last two names have ever been kept secret; they are the fifth order of Brahmadevas, and the fivefold Chohans, having the soul of the five elements in them, Water and Ether predominating, and therefore their symbols were both aquatic and fiery. "Wisdom lies concealed under the couch of him who rests on the golden lotos (padma) floating on the water." In India it is Vishnu (one of whose avatars was Budha, as claimed in days of old). The Prachetasas, the worshippers of Narayana (who, like Poseidon moved or dwelt over not under the waters), plunged into the depths of the ocean for their devotions and remained therein 10,000 years; and the Prachetasas are ten exoterically, but five, esoterically. "Prachetas" is in Sanskrit, the name of Varuna, the water god, Nereus, an aspect of the same as Neptune, the Prachetasas being thus identical with the "five ministers" of [[CHÓZZAR]] (Poseidon) of the Peratae Gnostics. These are respectively called [[AOT, AOAI, OTO, OTOB]], "the fifth, a triple name (making Seven) being lost" -- i.e., kept secret. This much for the "aquatic" symbol; the "fiery" connecting them with the fiery symbol -- spiritually. For purposes of identity, let us remember that as the mother of the Prachetasas was Savarna, the daughter of the Ocean, so was Amphitrite the mother of Neptune's mystic "ministers."

Now the reader is reminded that these "five ministers" are symbolized both in the Dolphin, who had overcome the chaste Amphitrite's unwillingness to wed Poseidon, and in Triton their son. The latter, whose body above the waist is that of a man and below a dolphin, a fish, is, again, most mysteriously connected with Oannes, the Babylonian Dag, and further also with the (fish) Avatar of Vishnu, Matsya, both teaching mortals Wisdom. The Dolphin, as every mythologist knows, was placed for his service by Poseidon among the constellations, and became with the Greeks, Capricornus, the goat, whose hind part is that of a dolphin, thus shown identical with Makara, whose head is also that of an antelope and the body and tail those of a fish. This is why the sign of the Makara was borne on the banner of Kama deva, the Hindu god of love, identified, in Atharva Veda, with Agni (the fire-god), the son of Lakshmi, as correctly given by Harivansa. For Lakshmi and Venus are one, and Amphitrite is the early form of Venus. Now Kama (the Makara-ketu) is "Aja" (the unborn), and "Atma-bhu" (the self-existent), and Aja is the LOGOS in the Rig-Veda, as he is shown therein to be the first manifestation of the ONE: "Desire first arose in IT, which was the primal

[[Footnote(s)]] -----

* So is Brahma's fifth head, said to be lost, burnt to ashes by Siva's "central eye"; Siva being also panchanana "five faced." Thus the number is preserved and secrecy maintained on the true esoteric meaning.

[[Vol. 2, Page]] 579 THE PUZZLES OF SYMBOLISM.

germ of mind," that "which connects entity with non-entity" (or Manas, the fifth, with Atma, the seventh, esoterically) say the Sages. This is the first stage. The second, on the following plane of manifestation, shows Brahma (whom we select as a representative for all the other first gods of the nations) as causing to issue from his body his mind-born sons, "Sanandana and others," who, in the fifth "creation," and again in the ninth (for purposes of blind) become the Kumara. Let us close by reminding the reader that goats were sacrificed to Amphitrite and the Nereids on the sea-shore, as goats are sacrificed to this day to Durga Kali, who is only the black side of Lakshmi (Venus), the white side of Sakti; and by suggesting what connection these animals may have with Capricornus, in which appear twenty-eight stars in the form of a goat, which goat was transformed by the Greeks into Amalthea -- Jupiter's foster-mother. Pan, the god of Nature, had goat's feet, and changed himself into a goat at the approach of Typhon. But this is a mystery which the writer dares not dwell upon at length, not being sure of being understood. Thus the mystical side of the interpretation must be left to the intuition of the student. Let us note one more thing in relation to the mysterious number five. It symbolizes at one and the same time the Spirit of life eternal and the Spirit of life and love terrestrial -- in the human compound; and, it includes divine and infernal magic, and the universal and the individual quintessence of being. Thus, the five mystic words or vowels (vide infra) uttered by Brahma at "creation," which forthwith became the Panchadasa (certain Vedic hymns,

attributed to that God) are in their creative and magical potentiality, the white side of the black Tantrik five "makaras," or the five m's. "Makara," the constellation, is a seemingly meaningless and absurd name. Yet, even besides its anagrammatical significance in conjunction with the term "Kumara," the numerical value of its first syllable and its esoteric resolution into five has a very great and occult meaning in the mysteries of nature.

Suffice it to say, that as the sign of Makara is connected with the birth of the spiritual "microcosm," and the death or dissolution of the physical Universe (its passage into the realm of the Spiritual)*; so the Dhyana Chohans, called in India Kumara, are connected with both. Moreover, in the exoteric religions, they have become the synonyms of the Angels of Darkness. Mara is the God of Darkness, the Fallen One, and Death**; and yet it is one of the names of Kama, the first god in the Vedas, the Logos, from whom have sprung the Kumaras, and this

[[Footnote(s)]] -----

* "When the Sun passes away behind the 30th degree of Makara and will reach no more the sign of the Meenam (pisces) then the night of Brahma has come." . . .

** Death of every physical thing truly; but Mara is also the unconscious quickener of the birth of the Spiritual.

[[Vol. 2, Page]] 580 THE SECRET DOCTRINE.

connects them still more with our "fabulous" Indian Makara, and the crocodile-headed God in Egypt.* The crocodiles in the Celestial Nile are Five, and the God Toum, the primordial deity creating the heavenly bodies and the living beings, calls forth these crocodiles in his fifth creation. When Osiris, "the defunct Sun," is buried and enters into Amenti, the sacred crocodiles plunge into the abyss of primordial Waters -- "the great Green One." When the Sun of life rises, they re-emerge out of the sacred river. All this is highly symbolical, and shows how primeval esoteric truths found their expression in identical symbols. But, as Mr. T. Subba Row truly declares, "The veil, that was dexterously thrown over certain portions of the mystery connected with the (Zodiacal) signs by the ancient philosophers, will never be fully lifted up for the amusement or edification of the uninitiated public."

Nor was number five less sacred with the Greeks. The five words (Panchadasa) of Brahma have become with the Gnostics the "Five Words" written upon the akasic (shining) garment of Jesus at his glorification: the words [[ZAMA ZAMA OZZA PAXAMA, OZAI]], translated by the Orientalists "the robe, the glorious robe of my strength." These words were, in their turn, the anagrammatic blind of the five mystic powers represented on the robe of the "resurrected" Initiate after his last trial of three days' trance; the five becoming seven only after his death, when the Adept became the full CHRISTOS, the full KRISHNA-VISHNU, i.e., merged in Nirvana. The E Delphicum, a sacred symbol, was the numeral five, again; and how sacred it was is shown by the fact that the Corinthians (according to Plutarch) replaced the wooden numeral in the Delphic Temple by a bronze one; and this one was transmuted by Livia Augusta into a fac-simile of gold.

It is easy to recognize in the two spirits -- the Greek accents or signs ([[diagram]]) spoken of by Ragon (vide supra) -- Atma and Buddhi, or "divine spirit and its vehicle" (spiritual soul).

The six or the "Senary" is dealt with later, while the Septenary will be fully treated in the course of this volume. (Vide the "Mysteries of the Hebdomad.")

The Ogdoad or 8 symbolizes the eternal and spiral motion of cycles, the 8, [[diagram]], and is symbolized in its turn by the Caduceus. It shows the regular breathing of the Kosmos presided over by the eight great gods -- the seven from the primeval Mother, the One and the Triad.

Then comes the number nine or the triple ternary. It is the number which reproduces itself incessantly under all shapes and figures in

[[Footnote(s)]] -----

* Osiris is called in the "Book of the Dead" "Osiris, the double Crocodile." (See Chapter "On the Names of Osiris," cxlii.) "He is the good and the bad Principle; the Day, and the Night Sun, the God, and the mortal man." Thus far the Macrocosm and the Microcosm.

[[Vol. 2, Page]] 581 THE MASTER MASON'S GRIP.

every multiplication. It is the sign of every circumference, since its value in degrees is equal to 9, i.e., to 3 + 6 + 0. It is a bad number under certain conditions, and very unlucky. If number 6 was the symbol of our globe ready to be animated by a divine spirit, 9 symbolized our earth informed by a bad or evil spirit.

Ten, or the Decade, brings all these digits back to unity, and ends the Pythagorean table. Hence this figure -- [[diagram]], unity within zero -- was the symbol of Deity, of the Universe, and of man. Such is the secret meaning of "the strong grip of the Lion's paw, of the tribe of Judah" between two hands (the "master mason's grip"), the joint number of whose fingers is ten.

If we now give our attention to the Egyptian cross, or the Tau, we may discover this letter, so exalted by Egyptians, Greeks, and Jews, to be mysteriously connected with the Decade. The tau is the Alpha and the Omega of secret divine Wisdom, which is symbolized by the initial and the final letter of Thot (Hermes). Thot was the inventor of the Egyptian alphabet, and the letter tau closed the alphabets of the Jews and the Samaritans, who called this character the "end" or "perfection," "culmination" and "security." Thence -- Ragon tells us -- the words terminus (end), and tectum (roof), are symbols of shelter and security, which is rather a prosaic definition. But such is the usual destiny of ideas and things in this world of spiritual decadence, if also of physical progress. PAN was at one time absolute nature, the one and GREAT-ALL; but when history catches a first glimpse of him, Pan has already tumbled down into a godling of the fields, a rural

god; and history will not recognize him, while theology makes of him the devil. Yet his seven-piped flute, the emblem of the seven forces of nature, of the seven planets, the seven musical notes, of all the septenary harmony, in short, shows well his primordial character. So with the Cross. Far earlier than the Jews had devised their golden candlestick of the temple with three sockets on one side and four on the other, and made of number 7 a feminine number of generation,* thus introducing

[[Footnote(s)]] -----

* Reflecting on the Cross, the author of the "Source of Measures" shows that this candlestick in the temple "was so composed that counting on either side there were four candle-sockets; while at the apex, there being one in common to both sides, there were in fact three to be counted on the one side and four on the other, making in all number 7 upon the self-same idea of one in common with the cross display. Take a line of one unit in breadth by three units long, and place it on an incline; take another of four units long, and lean it upon this one, from an opposite incline, making the top unit of the four in length the corner or apex of a triangle. This is the display of the candlestick. Now take away the line of three units in length and cross it on the one of four units in length, and the cross form results. The same idea is conveyed in the six days of the week in Genesis, crowned by the seventh, which was used by itself as a base of circular measure" (p. 51).

[[Vol. 2, Page]] 582 THE SECRET DOCTRINE.

the phallic element into religion, the more spiritually-minded nations had made of the cross (as 3, 4 = 7), their most sacred divine symbol. In fact, Circle, Cross, and Seven -- the latter being made a base of circular measurement -- are the first primordial symbols. Pythagoras, who brought his wisdom from India, left to posterity a glimpse into this truth. His school regarded number 7 as a compound of numbers 3 and 4, which they explained in a dual manner. On the plane of the noumenal world, the triangle was, as the first conception of the manifested Deity, its image: "Father-Mother-Son"; and the Quaternary, the perfect number, was the noumenal, ideal root of all numbers and things on the physical plane. Some students, in view of the sacredness of Tetraktis and the Tetragrammaton, mistake the mystic meaning of the Quaternary. The latter was with the ancients only a secondary "perfection," so to speak, because it related only to the manifested planes. Whereas it is the Triangle, the Greek delta, [[diagram]], which was the "vehicle of the unknown Deity." A good proof of it lies with the name of the Deity beginning with Delta. Zeus was written [[Deus]], by the Boeotians,* thence the Deus of the Latins. This, in relation to the metaphysical conception, with regard to the meaning of the Septenary in the phenomenal world, but for purposes of profane or exoteric interpretation, the symbolism changed. Three became the ideograph of the three material elements -- air, water, earth; and four became the principle of all that which is neither corporeal nor perceptible. But this has never been accepted by the real Pythagoreans. Viewed as a compound of 6 and 1, the senary and the unity, number seven was the invisible centre, the spirit of everything (see further the explanation of 6), as there exists no body with six lines constituting its form without a seventh being found as the central point in it (see crystals and snow-flakes in so-called inanimate nature). Moreover, number seven, they said, has all the perfection of the UNIT -- the number of numbers. For as absolute unity is uncreated, and impartite (hence number-less) and no number can produce it, so is the seven: no digit contained within the decade can beget or produce it. And it is 4, which affords an arithmetical division between unity and seven, as it surpasses the former by the same number (three), as it is itself surpassed by the seven, since four is by as many numbers above one, as seven is above four. (From a MS. supposed to be by "St. Germain.")

"With the Egyptians number 7 was the symbol of life eternal," says Ragon, and adds that this is why the Greek letter Z, which is but a double 7 is the initial letter of Zao, "I live," and of Zeus, "the father of all living."

[[Footnote(s)]] -----

* See Liddell's Greek-English Lexicon.

[[Vol. 2, Page]] 583 THE MYSTERY OF THE NUMBER SIX.

Moreover, figure 6 was the symbol of the Earth during the autumn and winter "sleeping" months, and figure 7 during spring and summer, -- as the Spirit of life animated her at that time -- the seventh or central informing Force. We find the same in the Egyptian mythos and symbol of Osiris and Isis, personifying Fire and Water metaphysically, and the Sun and the Nile physically. The number of the Solar year, 365 in days, is the numerical value of the word Neilos (Nile). This, together with the Bull, with the Crescent and the ansated cross between its horns, and the Earth under its astronomical symbol -- [[diagram]] -- are the most phallic symbols of later antiquity.

"The Nile was the river of time with the number of a year, or year and a day (364 + 1 = 365). It represented the parturient water of Isis, or Mother Earth, the moon, the woman, and the cow, also the workshop of Osiris, representing the T'sod Olaum of the Hebrews. The ancient name of this river was Eridanus, or the Hebrew Iardan, with the Coptic or old Greek suffix. This was the door of the Hebrew word Jared, or 'Source,' or Descent . . . of the river Jordan, which had the same mythical use with the Hebrews that the Nile had with the Egyptians,* it was the source of descent, and held the waters of life" (Unpub. MS.) It was, to put it plainly, the symbol of the personified Earth, or Isis, regarded as the womb of that Earth. This is shown clearly enough; and Jordan -- the river so sacred now to Christians -- held no more sublime or poetical meaning in it than the parturient waters of the moon (Isis, or Jehovah in his female aspect). Now, as shown by the same scholar, Osiris was the sun, and the river Nile, and the tropical year of 365 days; while Isis was the moon, the bed of that river, or the mother earth "for the parturient energies, of which water was a necessity," as also the lunar year of 354 days, "the time-maker of the periods of gestation." All this then is sexual and phallic, and our modern scholars seem to find in these symbols nothing beyond a physiological or phallic meaning. Nevertheless, the three figures 365, or the number of days in a solar year, have but to be read with the Pythagorean Key to find in them a highly philosophical and moral meaning. One instance will be sufficient. It can read:

The Earth -- animated by -- the Spirit of Life.

3. 6. 5.

Simply because 3 is equivalent to the Greek gamma, or [[G]], which letter is the symbol of gaia (the Earth); while the figure 6 is the symbol of the animating or informing principle, and the 5 is the universal quintessence which spreads in every direction and forms all matter. (St. Germain's MS.)

[[Footnote(s)]] -----

* It had no such meaning in the beginnings; nor during the earlier dynasties.

[[Vol. 2, Page]] 584 THE SECRET DOCTRINE.

The few instances and examples brought forward reveal only one small portion of the methods used to read the symbolical ideographs and numerals of antiquity. The system being of an extreme and complex difficulty, very few, even among the Initiates, could master all the seven keys. Is it to be wondered, then, that the metaphysical gradually dwindled down into the physical nature; that the Sun, once upon a time the symbol of DEITY, became, as aeons glided by, that of its creative ardour only; and that thence it fell into a glyph of phallic significance? But surely, it is not those whose method was (like Plato's) to proceed from the universals down to the particulars, who could ever have begun by symbolizing their religions by sexual emblems! It is quite true, though uttered by that incarnated paradox, Eliphaz Levi, that "man is God on Earth, and God is man in Heaven." But this could not, and never did apply to the One Deity, only to the Hosts of ITS incarnated beams, called by us Dhyan Chohans, by the ancients, Gods; and now transformed by the Church into devils on the left, and into the Saviour on the right side!

But all such dogma grew out of the one root, the root of wisdom, which grows and thrives on the Indian soil. There is not an Archangel that could not be traced back to its prototype in the sacred land of Aryavarta. These "prototypes" are all connected with the Kumaras who appear on the scene of action by refusing -- as Sanatkumara and Sananda -- to "create progeny." Yet they are called the "creators" of (thinking) man. More than once they are brought into connection with Narada -- another bundle of apparent incongruities, yet a wealth of philosophical tenets. Narada is the leader of the Gandharvas, the celestial singers and musicians; esoterically, the reason for it is explained by the fact that the latter (the Gandharvas) are "the instructors of men in the secret sciences." It is they, who "loving the women of the Earth," disclosed to them the mysteries of creation; or, as in the Veda -- the "heavenly Gandharva" is a deity who knew and revealed the secrets of heaven and divine truths, in general. If we remember what is said of this class of Angels in Enoch and in the Bible, then the allegory is plain: their leader, Narada, while refusing to procreate, leads men to become gods. Moreover, all of these, as stated in the Vedas, are Chhandaja (will-born) or incarnated (in different Manvantaras) of their own will; -- and they are shown in exoteric literature as existing age after age; some being "cursed to be re-born," others, incarnating as a duty. Finally, as the Sanakadikas, the seven Kumaras who went to visit Vishnu on the "White Island" (Sveta-dwipa) the island inhabited by the Maha Yogins -- they are connected with Sakadwipa and the Lemurians and Atlanteans of the Third and Fourth Races.

[[Vol. 2, Page]] 585 SEEMING CONTRADICTIONS.

In Esoteric Philosophy, the Rudras (Kumaras, Adityas, Gandharvas, Asuras, etc.) are the highest Dhyan Chohans or Devas as regards intellectuality. They are those who, owing to their having acquired by self-development the five-fold nature -- hence the sacredness of number five -- became independent of the pure Arupa devas. This is a mystery very difficult to realize and understand correctly. For, we see that those who were "obedient to law" are, equally with the rebels, doomed to be reborn in every age. Narada, the Rishi, is cursed by Brahma to incessant peripateticism on Earth, i.e., to be constantly reborn. He is a rebel against Brahma, and yet has no worse fate than the Jayas -- the twelve great creative gods produced by Brahma as his assistants in the functions of creation. For the latter, lost in meditation, only forgot to create; and for this, they are equally cursed by Brahma to be born in every manvantara. And still they are termed -- together with the rebels -- Chhandajas, or those born of their own will in human form!

All this is very puzzling to one who is unable to read and understand the Puranas except in their dead letter sense.* Hence we find the Orientalists refusing to be puzzled, and cutting the Gordian knot of perplexity by declaring the whole scheme "figments" "of Brahminical fancy and love of exaggeration." But to the student of occultism, the whole is pregnant with deeply philosophical meaning. We willingly leave the rind to the Western Sanskritist, but claim the essence of the fruit for ourselves. We do more: we concede that in one sense much in these so-called "fables" refers to astronomical allegories about constellations, asterisms, stars, and planets. Yet, while the Gandharva of the Rig-Veda may there be made to personify the fire of the Sun, the Gandharva devas are entities both of a physical and psychic character; while the Apsarasas (with other Rudras) are both qualities and quantities. In short, if ever unravelled, the theogony of the Vedic Gods will reveal fathomless mysteries of Creation and being. Truly says Parasara: "These thirty-three divinities exist age after age, and their appearance and disappearance is in the same manner as the sun sets and rises again." (Book I., xv.)

There was a time, when the Eastern symbol of the Cross and Circle, the Swastica, was universally adopted. With the esoteric (and, for the matter of that, exoteric) Buddhist, the Chinaman and the Mongolian, it means "the 10,000 truths." These truths, they say, belong to the

[[Footnote(s)]] -----

* Yet this sense, if once mastered, will turn out to be the secure casket which holds the keys to the Secret Wisdom. True, a casket so profusely ornamented that its fancy work hides and conceals entirely any spring for opening it, and thus makes the unintuitive believe it has not, and cannot have, any opening in it. Still the Keys are there, deeply buried, yet ever present to him who searches for them.

[[Vol. 2, Page]] 586 THE SECRET DOCTRINE.

mysteries of the unseen Universe and primordial Cosmogony and Theogony. "Since Fohat crossed the Circle like two lines of flame (horizontally and vertically), the hosts of the Blessed Ones have never failed to send their representatives upon the planets they are made to watch over from the beginning." This is why the Swastica is always placed -- as the ansated Cross was in Egypt -- on the breasts of the defunct mystics. It is found on the heart of the images and statues of Buddha, in Tibet and Mongolia. It is the seal placed also on the hearts of the living Initiates, burnt into the flesh, for ever, with some. This, because they have to keep those truths inviolate and intact, in eternal silence and secrecy to the day these are perceived and read by their chosen successors -- new Initiates -- "worthy of being entrusted with the ten thousand perfections." So degraded, however, has it now become, that it is often placed on the headgear of the "gods," the hideous idols of the sacrilegious Bhons, the Duggas (Sorcerers) of the Tibetan borderlands; until found out by a Galukpa and torn off together with the head of the "god;" though it would be better were it that of the worshipper which was severed from the sinful body. Still, it can never lose its mysterious properties. Throw a retrospective glance, and see it used alike by the Initiates and Seers, as by the priests of Troy (found by Schliemann on the site of that old city). One finds it with the old Peruvians, the Assyrians, Chaldeans, as well as on the walls of the old-world cyclopean buildings; in the catacombs of the New world, and in those of the Old (?), at Rome, where, because the first Christians are supposed to have concealed themselves and their religion, it is called Crux Dissimulata.

"According to de Rossi, the Swastica from an early period was a favourite form of the cross employed with an occult signification, which shows the secret was not that of the Christian cross. One Swastica cross in the catacombs is the sign of an inscription which reads [[ZOTIKO ZOTIKE]], 'Vitalis Vitalia,' or 'life of life.' "

But the best evidence to the antiquity of the cross is that which is brought forward by the author of Natural Genesis on page 433.

"The value of the cross," says Mr. Massey, "as a Christian symbol, is supposed to date from the time when Jesus Christ was crucified. And yet in the 'Christian' Iconography of the Catacombs no figure of a man appears upon the Cross during the first six or seven centuries. There are all forms of the cross except that -- the alleged starting-point of the new religion. That was not the initial but the final form of the Crucifix." During some six

[[Footnote(s)]] -----

* Quoted in "The Natural Genesis" (p. 427, Vol. I.).

** With the Christians, most undeniably. With the pre-Christian symbologists it was, as said, the Bed or Couch of Torture during the Initiation Mystery, the "Crucifix" being placed horizontally, on the ground, and not erect, as at the time when it became the Roman gallows.

----- [[Vol. 2, Page]] 587 THE CROSS, A CHRISTIAN AFTER-THOUGHT.

centuries after the Christian era the foundation of the Christian religion in a crucified Redeemer is entirely absent from Christian art! The earliest known form of the human figure on the cross is the crucifix presented by Pope Gregory the Great to Queen Theodolinde of Lombardy, now in the Church of St. John at Monza, whilst no image of the Crucified is found in the Catacombs at Rome earlier than that of San Giulio, belonging to the seventh or eighth century. . . . There is no Christ and no Crucified; the Cross is the Christ even as the Stauros cross was a type and a name of Horus, the Gnostic Christ. The Cross, not the Crucified, is the essential object of representation in its art, and of adoration in its religion. The germ of the whole growth and development can be traced to the cross. And that cross is pre-Christian, is pagan and heathen, in half a dozen different shapes. The cult began with the cross, and Julian was right in saying he waged a 'Warfare with the X'; which he obviously considered had been adopted by the A-Gnostics and Mytholators to convey an impossible significance.* During centuries the cross stood for the Christ, and was addressed as if it were a living being. It was made divine at first, and humanized at last."

Few world-symbols are more pregnant with real occult meaning than the Swastica. It is symbolized by the figure 6; for, like that figure, it points in its concrete imagery, as the ideograph of the number does, to the Zenith and the Nadir, to North, South, West, and East; one finds the unit everywhere, and that unit reflected in all and every unit. It is the emblem of the activity of Fohat, of the continual revolution of the "wheels," and of the Four Elements, the "Sacred Four," in their mystical, and not alone in their cosmical meaning; further, its four arms, bent at right angles, are intimately related, as shown elsewhere, to the Pythagorean and Hermetic scales. One initiated into the mysteries of the meaning of the Swastica, say the Commentaries, "can trace on it, with mathematical precision, the evolution of Kosmos and the whole period of Sandhya." Also "the relation of the Seen to the Unseen," and "the first procreation of man and species."

To the Eastern Occultist the TREE of Knowledge in the Paradise of man's own heart, becomes the Tree of Life eternal, and has nought to do with man's animal senses. It is an absolute mystery that reveals itself only through the efforts of the imprisoned Manas and the Ego to liberate themselves from the thralldom of sensuous perception and see, in the light of the one eternal present Reality. To the Western Kabalist, and now far more to the superficial Symbologist, nursed in the lethal atmosphere of materialistic science, there is but one chief explanation of the mysteries of the Cross -- its sexual element. Even the otherwise spiritualistic modern commentator discerns in the Cross and Swastica, this feature before all others.

[[Footnote(s)]] -----

* So it was, and could not be otherwise. Julian (the Emperor) was an Initiate, and as such knew well the "mystery-meaning," both metaphysical and physical.

----- [[Vol. 2, Page]] 588 THE SECRET DOCTRINE.

"The cross was used in Egypt as a protecting talisman and a symbol of saving power. Typhon, or Satan, is actually found chained and bound to the cross. In the Ritual, the Osirian cries, 'The Apophis is overthrown, their cords bind the South,

North, East, and West, their cords are on him. Har-ru-bah has knotted him.* These were the cords of the four Quarters, or the cross. Thor is said to smite the head of the Serpent with his hammer . . . a form of Swastica or four-footed Cross. . . . In the primitive sepulchres of Egypt the model of the Chamber had the form of a Cross.** The pagoda of Mathura . . . the birth-place of Krishna, was built in the form of a Cross***

This is perfect and no one can discern in this "sexual worship," with which the Orientalists love to break the head of Paganism. But how about the Jews, and the exoteric religions of some Hindu sects, especially the rites of the Vallabacharyas? For, as said, the Lingham and Yoni of Siva-worship stand too high philosophically, its modern degeneration notwithstanding, to be called a simple phallic worship. But the tree or Cross-worship**** of the Jews, as denounced by their own Prophets, can hardly escape the charge. The "Sons of Sorcerers," "the seed of the adulterer," as Isaiah calls them (lvii.), never lost an opportunity of "enflaming themselves with idols under every green tree," which denotes no metaphysical recreation. It is from these monotheistic Jews that the Christian nations have derived their religion, their "God of gods, the One living God," while despising and deriding the worship of the Deity of the ancient philosophers. Let such believe in and worship the physical form of the Cross, by all means.

But to the follower of the true Eastern archaic Wisdom, to him who worships in spirit nought outside the Absolute Unity, that ever-pulsating great Heart that beats throughout, as in every atom of nature, each such atom contains the germ from which he may raise the Tree of Knowledge, whose fruits give life eternal and not physical life alone. For him the Cross and Circle, the Tree or the Tau, are, after every symbol relating to these has been applied to, and read one after another, still a profound mystery in their Past, and it is to that Past alone that he directs his eager gaze. He cares little whether it be the seed from

[[Footnote(s)]] -----

* Apophis or Apap is the Serpent of evil, symbol of human passions. The Sun (Osiris-Horus), destroys him, when Apap is thrown down, bound and chained. The god Aker, "the chief of the gate of the Abyss," of Aker, the realm of the Sun (xv. 39) binds him. Apophis is the enemy of Ra (light), but the "great Apap has fallen!" exclaims the defunct. "The Scorpion has hurt thy mouth," he says to the conquered enemy (xxxix. v. 7). The Scorpion is the "worm that never dies" of the Christians. Apophis is bound on the Tau or Tat, "the emblem of stability." (See the erection of Tat in Tatoo, Ritual xviii.).

** So have the crypts in cis-Himalayan regions where Initiates live, and where their ashes are placed for seven lunar years.

*** The Natural Genesis, Vol. I. p. 432.

**** The Cross and the Tree are identical and synonymous in symbolism.

[[Vol. 2, Page]] 589 MAN, THE REVILER OF GOD.

which grows the genealogical Tree of Being, called the Universe. Nor is it the Three in One, the triple aspect of the seed - its form, colour, and substance -- that interest him, but rather the FORCE which directs its growth, the ever mysterious, as the ever unknown. For this vital Force, that makes the seed germinate, burst open and throw out shoots, then form the trunk and branches, which, in their turn, bend down like the boughs of the Aswattha, the holy Tree of Bodhi, throw their seed out, take root and procreate other trees -- this is the only FORCE that has reality for him, as it is the never-dying breath of life. The pagan philosopher sought for the Cause, the modern is content with only the effects and seeks the former in the latter. What is beyond, he does not know, nor does the modern A-gnostic care: thus rejecting the only knowledge upon which he can with full security base his Science. Yet this manifested Force has an answer for him who seeks to fathom it. He who sees in the cross, the decussated circle of Plato, the Pagan, not the antitype of circumcision, as Christian (St.) Augustine did,* is forthwith regarded by the Church as a heathen: by Science, as a lunatic. This because, while refusing to worship the god of physical generation, he confesses that he can know nothing of the Cause which underlies the so-called First Cause, the causeless Cause of this Vital Cause. Tacitly admitting the All-Presence of the boundless Circle and making of it the universal Postulate upon which the whole of the manifested universe is based, the Sage keeps a reverential silence concerning that upon which no mortal men should dare to speculate. "The Logos of God is the revealer of man, and the logos (the verb) of man is the revealer of God," says Eliphaz Levi in one of his paradoxes. To this, the Eastern Occultist would reply:-- "On this condition, however, that man should be dumb on the CAUSE that produced both God and its logos. Otherwise, he becomes invariably the reviler, not the 'revealers' of the incognizable Deity."

We have now to approach a mystery -- the Hebdomad in nature. Perchance, all that we may say, will be attributed to coincidence. We may be told that this number in nature is quite natural (so we say too), and has no more significance than the illusion of motion which forms the so-called "Strobic circles." No great importance was given to these "singular illusions" when Professor Sylvanus Thompson exhibited them at the meeting of the British Association in 1877. Nevertheless we should like to learn the scientific explanation why seven should ever form itself as a pre-eminent number -- six concentric circles around a seventh, and seven rings within one another round a central point, etc., etc. -- in this illusion, produced by a swaying saucer, or any other vessel. We give the solution refused by science in the section which follows.

[[Footnote(s)]] -----

§ XXV.

THE MYSTERIES OF THE HEBDOMAD.

WE must not close this Part on the Symbolism of Archaic History, without an attempt to explain the perpetual recurrence of this truly mystic number in every scripture known to the Orientalists. As every religion, from the oldest to the latest, claims its presence, and explains it on its own grounds agreeably with its own special dogmas, this is no easy task. We can, therefore, do no better or more explanatory work than to give a bird's-eye view of all. These sacred numbers (3, 4, 7) are the sacred numbers of Light, Life, and Union -- especially in this present manvantara, our Life-cycle; of which number seven is the special representative, or the Factor number. This has now to be demonstrated.

If one happened to ask a Brahmin learned in the Upanishads -- so full of the secret wisdom of old, why "he, of whom seven forefathers have drunk the juice of the moon-plant, is trisuparna," as Bopaveda is credited with saying; and why the Somapa Pitris should be worshipped by the Brahmin trisuparna -- very few could answer the question; or, if they knew, they would still less satisfy one's curiosity. Let us, then, hold to what the old Esoteric doctrine teaches.

"When the first 'Seven' appeared on earth, they threw the seed of everything that grows on the land into the soil. First came three, and four were added to these as soon as stone was transformed into plant. Then came the second 'Seven,' who, guiding the Jivas of the plants, produced the middle (intermediate) natures between plant and moving living animal. The third 'Seven' evolved their Chhayas. . . . The fifth 'Seven' imprisoned their ESSENCE. . . . Thus man became a Saptaparna." (Commentary.)

A.

SAPTAPARNA.

Such is the name given in Occult phraseology to man. It means as shown elsewhere, a seven-leaved plant, and the name has a great significance in the Buddhist legends. So it had, also, under disguise, in the Greek "myths." The T, or [[diagram]] (tau), formed from the figure 7, and the Greek letter [[G]] (gamma), was (see § "Cross and Circle") the symbol of life,

[[Vol. 2, Page]] 591 THE MEANING OF THE DOUBLE TRIANGLE.

and of life eternal: of earthly life, because [[G]] (gamma) is the symbol of the Earth (gaia)*; and of "life eternal," because the figure 7 is the symbol of the same life linked with divine life, the double glyph expressed in geometrical figures being:-

-

[[diagram]]

a triangle and a quaternary, the symbol of septenary MAN.

Now, the number six has been regarded in the ancient mysteries as an emblem of physical nature. For six is the representation of the six dimensions of all bodies: the six lines which compose their form, namely, the four lines extending to the four cardinal points, North, South, East, and West, and the two lines of height and thickness that answer to the Zenith and the Nadir. Therefore, while the senary was applied by the sages to physical man, the septenary was for them the symbol of that man plus his immortal soul.

Ragon gives in his Maconnerie Occulte a very good illustration of the "hieroglyphical senary," as he calls our double equilateral triangle, [[diagram]]. He shows it as the symbol of the commingling of the "philosophical three fires and the three waters, whence results the procreation of the elements of all things. The same idea is found in the Indian equilateral double triangle. For, though it is called in that country the sign of Vishnu, yet in truth it is the symbol of the Triad (or the Trimurti). For, even in the exoteric rendering, the lower triangle [[diagram]] with the apex downward, is the symbol of Vishnu, the god of the moist principle and water ("Nara-yana," or the moving Principle in Nara, water;**) while the triangle, with its apex upward, [[diagram]] is Siva, the Principle of Fire, symbolized by the triple flame in his hand. (See the bronze statue of Tripurantika Siva, "Mahadeva destroying Tripurasura," at the museum of the India House). It is these two interlaced triangles -- wrongly called "Solomon's seal," which also form the emblem of our

[[Footnote(s)]] -----

* Hence the Initiates in Greece called the Tau [[I]], son of gaia, "sprung from earth," like Tityos in Odyssey 7, 324.

** See the Mahabharata, e.g., III., 189, 3, where Vishnu says, "I called the name of water nara in ancient times, and am hence called Narayana, for that was always the abode I moved in" (Ayana). It is into the water (or chaos, the "moist principle" of the Greeks and Hermes), that the first seed of the Universe is thrown. "The 'Spirit of God' moves on the dark waters of Space"; hence Thales makes of it the primordial element and prior to Fire, which was yet latent in that Spirit.

[[Vol. 2, Page]] 592 THE SECRET DOCTRINE.

Society -- that produce the Septenary and the Triad at one and the same time, and are the Decad, whatever way this sign [[diagram]] is examined, as all the ten numbers are contained therein. For with a point in the middle or centre, thus [[diagram]] it is a sevenfold sign; its triangles denote number 3; the two triangles show the presence of the binary; the triangles with the central point common to both yield the quaternary; the six points are the senary; and the central point, the unit; the quinary being traced by combination, as a compound of two triangles, the even number, and of three sides in each triangle, the first odd number. This is the reason why Pythagoras and the ancients made the number six sacred to

Venus, since "the union of the two sexes, and the spagyrisation of matter by triads are necessary to develop the generative force, that prolific virtue and tendency to reproduction which is inherent in all bodies."*

Belief in "Creators," or the personified Powers of Nature, is in truth no polytheism, but a philosophical necessity. Like all the other planets of our system, the Earth has seven Logoi -- the emanating rays of the one "Father-Ray" -- the PROTOGONOS, or the manifested "Logos" -- he who sacrifices his Esse (or flesh, the Universe) that the world may live and every creature therein have conscious being.

Numbers 3 and 4 are respectively male and female, Spirit and Matter, and their union is the emblem of life eternal in spirit on its ascending arc, and in matter as the ever resurrecting element -- by procreation and reproduction. The spiritual male line is vertical ; the differentiated matter-line is horizontal; the two forming the cross or . The former (the 3), is invisible; the latter (the 4), is on the plane of objective perception. This is why all the matter of the Universe, when analyzed by science to its ultimates, can be reduced to four elements only -- carbon, oxygen, nitrogen, and hydrogen: and why the three primaries, the noumenoi of the four, or graduated Spirit or Force, have remained a terra incognita and mere speculations, names, to exact Science. Her servants must believe in and study first the primary causes, before they can hope to fathom the nature and acquaint themselves with the potentialities of the effects. Thus, while the men of Western learning had, and still have, the four, or matter to toy with, the Eastern Occultists and their disciples, the great alchemists the world over, have the whole septenate to study from.** As those Alche-

[[Footnote(s)]] -----

** There are learned Brahmins who have protested against our septenary division. They are right from their own standpoint, as we are right from ours. Leaving the  continued on next page]]

[[Vol. 2, Page]] 593 SPIRITUAL AND PHYSICAL CORRESPONDENCES.

mists have it:-- "When the Three and the Four kiss each other, the Quaternary joins its middle nature with that of the Triangle," (or Triad, i.e., the face of one of its plane surfaces becoming the middle face of the other), "and becomes a cube; then only does it (the cube unfolded) become the vehicle and the number of LIFE, the Father-Mother SEVEN."

The following diagram will perhaps assist the student to grasp these parallelisms.

HUMAN PRINCIPLES.  PRINCIPLES OF PHYSICAL NATURE.

VII. ATMA.

VI. BUDDHI.

V. MANAS.

IV. Kama-rupa, the principle of animal desire, which burns fiercely during life in matter, resulting in satiety: it is inseparable from animal existence.

HYDROGEN

The lightest of all gases: it burns in oxygen giving off the most intense heat of any substance in combustion, and forming Water, the most stable of compounds; Hydrogen enters largely into all organic compounds.

III. Linga-Sarira; the inert vehicle or form on which the body is moulded; the vehicle of Life. It is dissipated very shortly after the disintegration of the body.

NITROGEN

An inert gas; the vehicle with which Oxygen is mixed to adapt the latter for animal respiration; it also enters largely into all organic substances.

II. Prana, LIFE, the active power producing all vital phenomena.

OXYGEN

The supporter of combustion the life-giving gas; the active chemical agent in all organic life.

I. The gross Matter of the body, the substance formed and moulded over the Liga-sarira (Chhaya) by the action of Prana.

CARBON

The fuel par excellence; the basis of all organic substances; the (chemical) element which forms the largest variety of compounds.

Now we are taught that all these earliest forms of organic life also appear in septenary groups of numbers. From minerals or "soft

[[Footnote(s)]] -----

[[Footnote continued from previous page]] three aspects, or adjunct principles out of calculation, they accept only four Upadhis (bases) including the Ego -- the reflected image of the Logos in the "Karana Sarira" -- and even "strictly speaking . . . only three Upadhis." For purely theoretical metaphysical philosophy, or purposes of meditation, these three may be sufficient, as shown by the Taraka Yoga system; but for practical occult teaching our septenary division is the best and easiest. It is, however, a matter of school and choice.

[[Vol. 2, Page]] 594 THE SECRET DOCTRINE.

stones that hardened" (Stanza) followed by the "hard plants that softened," which are the product of the mineral, for "it is from the bosom of the stone that vegetation is born" (Commentary, Book IX., F. 19); and then to man -- all the primitive models in every kingdom of nature begin by being ethereal, transparent, films. This, of course, takes place only in the first beginning of life. With the next period they consolidate, and at the seventh begin to branch off into species, all except men, the first of the mammalian animals* in the Fourth Round.

Virgil, versed as every ancient poet was, more or less, in esoteric philosophy, sang evolution in the following strains:--

Principio coelum ac terras, camposque liquentes
Lucentemque globum lunae, Titaniaque astra*
SPIRITUS intus alit; totamque infusa per artus
MENS agitat molem, et magno se corpore miscet
Inde Hominum pecudumque genus, etc.** (Aeneid VI.)

"First came three, or the triangle." This expression has a profound meaning in Occultism, and the fact is corroborated in mineralogy, botany, and even in geology, as was demonstrated in the section on "Ancient Chronology," by the compound number seven, the three and the four being in it. Salt in solution proves it. For when its molecules, clustering together, begin to deposit themselves as a solid, the first shape they assume is that of triangles, of small pyramids and cones. It is the figure of fire, whence the word "pyramids"; while the second geometrical figure in manifested Nature is a square or a cube, 4 and 6; for, "the particles of earth being cubical, those of fire are pyramidal" truly -- (Enfield). The pyramidal shape is that assumed by the pines -- the most primitive tree after the fern period. Thus the two opposites in cosmic nature -- fire and water, heat and cold -- begin their metrographical manifestations, one by a trimetric, the other by a hexagonal system. For the stellate crystals of snow, viewed under a microscope, are all and each of them a double or a treble six-pointed star, with a central nucleus, like a miniature star within the larger one. Says Mr.

[[Footnote(s)]] -----

* Protista are not animals. The reader is asked to bear in mind that when we speak of "animals," the mammals alone are meant. Crustacea, fishes, and reptiles are contemporary with, and most have preceded physical man in this Round. All were bisexual, however, before the age of mammalia in the closing portion of the secondary or Mesozoic ages, yet nearer to the Palaeozoic than the Cenozoic ages. Smaller marsupial mammalia are contemporary with the huge reptilian monsters of the Secondary.

** "First Divine Spirit within sustains the Heavens, the earth and watery plains, the moon's orb and shining stars and the Eternal Mind diffused through all the parts of nature. actuates the whole stupendous frame and mingles with the vast body of the universe. Thence proceed the race of men and beasts, the vital principles of the flying kind and the monsters which the Ocean breeds under its smooth crystal plane." "All proceeds from Ether and from its seven natures" -- said the alchemists. Science knows these only in their superficial effects.

[[Vol. 2, Page]] 595 NOAH, AN ASPECT OF THE CREATOR.

Darwin, in his "Descent of Man," p. 164. showing that the inhabitants of the sea-shore are greatly affected by the tides:--

"The most ancient progenitors in the Kingdom of the Vertebrata . . . apparently consisted of a group of marine animals. . . . Animals living either about the mean high-water mark, or about the mean low-water mark, pass through a complete cycle of tidal changes in a fortnight. . . . Now it is a mysterious fact that in the higher and now terrestrial Vertebrata . . . many normal and abnormal processes have one or more weeks (septenates) as their periods . . . such as gestation of mammals, the duration of fevers," etc. . . . "The eggs of the pigeon are hatched in two weeks (or 14 days); those of the fowl in three; those of the duck in four: those of the goose in five; and those of the ostrich in seven." (Bartlett's "Land and Water.")

This number is closely connected with the moon, whose occult influence is ever manifesting itself in septenary periods. It is the moon which is the guide of the occult side of terrestrial nature, while the Sun is the regulator and factor of manifested life; (See also Vol. I., Part II.), and this truth was ever evident to the Seers and the adepts. Jacob Boehme, by insisting on the fundamental doctrine of the seven properties of everlasting mother Nature, proved himself thereby a great Occultist.

But to return to the consideration of the septenary in ancient religious symbolism. To the metrological key to the symbolism of the Hebrews, which reveals numerically the geometrical relations of the Circle (All-Deity) to the Square, Cube, Triangle, and all the integral emanations of the divine area, may be added the theogonic Key. This Key explains that Noah, the deluge-Patriarch, is in one aspect the permutation of the Deity (the Universal Creative Law), for the purpose of the formation of our Earth, its population, and the propagation of life on it, in general.

Now bearing in mind the Septenary division in divine Hierarchies, as in Cosmic and human constitutions, the student will readily understand that Jah-Noah is at the head of, and is the synthesis of the lower Cosmic Quaternary. The upper Sephirothal [[diagram]], triad -- of which Jehovah-Binah (Intelligence) is the left, female angle -- emanates the [[diagram]] Quaternary. The latter symbolizing by itself the "Heavenly Man," the sexless Adam-Kadmon viewed as Nature in the abstract, becomes a septenate again by emanating from itself the additional three principles, the lower terrestrial or manifested physical Nature, Matter and our Earth (the seventh being Malkuth, the "Bride of the Heavenly Man"), thus forming, with the higher triad, or Kether, the Crown, the full number of the Sephirothal Tree -- the 10, the Total in Unity, or the Universe. Apart from the higher Triad, the lower creative Sephiroth are seven.

The above is not directly to our point, though it is a necessary

reminder to facilitate the comprehension of what follows. The question at issue is to show that Jah-Noah, or the Jehovah of the Hebrew Bible, the alleged Creator of our Earth, of man and all upon it, is:--

- (a) The lowest Septenary, the Creative Elohim -- in his Cosmic aspect.
- (b) The Tetragrammaton or the Adam-Kadmon, "the Heavenly Man" of the Four letters -- in his theogonic and Kabalistic aspects.
- (c) Noah -- identical with the Hindu Sishta, the human seed, left for the peopling of the Earth from a previous creation or Manvantara, as expressed in the Puranas, or the pre-diluvian period as rendered allegorically in the Bible -- in his Cosmic character.

But whether a Quaternary (Tetragrammaton) or a Triad, the Bible Creative God is not the Universal 10, unless blended with AIN-SOPH (as Brahma with Parabrahm), but a septenary, one of the many Septenaries of the Universal Septenate. In the explanation of the question now in hand, his position and status as Noah may best be shown by placing the 3, [[diagram]], and 4, [[diagram]] on parallel lines with the "Cosmic" and "Human" principles. For the latter, the old familiar classification is made use of. Thus:--

HUMAN ASPECTS, OR PRINCIPLES.

COSMIC ASPECTS, OR PRINCIPLES.

[[diagram]]
Triple aspect of the Deity.

- 1. Universal Spirit (Atma)
- 1. The Unmanifested Logos

- 2. Spiritual Soul (Buddhi)
- 2. Universal (latent) Ideation*

- 3. Human Soul, Mind (Manas)
- 3. Universal (or Cosmic) active** Intelligence

[[diagram]]
Spirit of the Earth.
Jehovah.***

- 4. Animal Soul (Kama-Rupa)
- 4. Cosmic (Chaotic) Energy

Noah.
5. Astral Body (Linga Sarira)- 5. Astral Ideation, reflecting terrestrial things.

Space containing Life -- the Waters of the Deluge.
6. Life Essence (Prana)- 6. Life Essence or Energy

Mount Ararat.****
7. Body (Sthula Sarira)- 7. The Earth.

As an additional demonstration of the statement, let the reader turn to scientific works. "Ararat = the mount of descent = [[hebrew]], Hor-Jared. Hatho mentions it out of composition by Areth = [[hebrew]]. Editor

[[Footnote(s)]] -----

NOTE. -- For footnotes, see next page.

of Moses Cherenensis says: 'By this, they say, is signified the first place of descent (of the ark).' (Bryant's Anal., Vol. IV., pages 5, 6, 15.) Under "Berge" mountain, Nork says of Ararat: [[hebrew]], for [[hebrew]] (i.e., Ararat for Arath) EARTH, Aramaic reduplication.' Here it is seen that Nork and Hatho make use of the same equivalent in Arath, with the meaning of Earth."*****

Noah thus symbolizing both the Root-Manu and the Seed-Manu, or the Power which developed the planetary chain, and our earth, and the Seed Race (the Fifth) which was saved while the last sub-races of the Fourth perished -- Vaivasvata Manu -- the number Seven will be seen to recur at every step. It is he (Noah), who represents, as Jehovah's permutation, the septenary Host of the Elohim, and is thus the Father or Creator (the Preserver) of all animal life. Hence verses 2 and 3 of

[[Footnote(s)]] -----

* The Adwaitee Vedantic philosophy classifies this as the highest trinity, or rather the Trinitarian aspect of Chinmatra (Parabrahmam), explained by them as the "bare potentiality of Pragna" -- the power or the capacity that gives rise to perception; Chidakasam, the infinite field or plane of Universal Consciousness; and Asath (Mulaprakriti), or undifferentiated matter. (See "Personal and Impersonal God" in "Five Years of Theosophy.")

** Differentiated matter existing in the Solar System (let us not touch the whole Kosmos) in seven different conditions, and Pragna, or the capacity of perception, existing likewise in seven different aspects corresponding to the seven conditions of matter, there must necessarily be seven states of consciousness in man; and according to the greater or smaller development of these states, the systems of religions and philosophies were schemed out.

*** Represented as the jealous, angry, turbulent and ever active-god, revengeful, and kind only to his chosen people when propitiated by them.

**** Noah and his three Sons are the collective symbol of this Quaternary in many and various applications, Ham being the Chaotic principle.

***** "Source of Measures," p. 65. The author explains, "Note that in Hebrew, Jared, the father of Enoch, is construed to be 'the mount of descent,' and it is said to be the same with Ararat on which the cubical structure of Noah, or foundation measure rested. Jared, in Hebrew, is [[hebrew]]. The root derivations are the same with those of Ararat, of acre, of earth." As by Hebrew metrology "Jared, [[hebrew]] is, literally in British Y R D; hence in Jared is to be found literally our English word yard (and also [[hebrew]], for Jah, or Jehovah, is rod). It is noteworthy that the son of Jared, viz., Enoch, lived 365 years, and it is said of him by rabbinical commentators, that the year period of 365 days was discovered by him, thus bringing, again, time and distance values together, i.e., year time descended by co-ordination, through the yard, or Jared, who thus was its father, in or through Enoch; and truly enough, $1296 = \text{yard (or Jared)} \times 4 = 5184$, the characteristic value of the solar day, in thirds, which as stated may be styled the parent numerically, of the solar year" (ibid. p. 65). This, however, by the astronomical and numerical Kabalistic methods. Esoterically, Jared is the Third race and Enoch the Fourth -- but as he is taken away alive he symbolizes also the Elect saved in the Fourth, while Noah is the Fifth from the beginning -- the family saved from the waters, eternally and physically.

[[Vol. 2, Page]] 598 THE SECRET DOCTRINE.

chapter vii. of Genesis, "Of every clean beast thou shalt take to thee by sevens, the male (3), and the female (4); of fowls also of the air by sevens," etc., etc., followed by all the sevening of days and the rest.

B.

THE TETRAKTIS IN RELATION TO THE HEPTAGON.

Thus Number Seven, as a compound of 3 and 4, is the factor element in every ancient religion, because it is the factor element in nature. Its adoption must be justified, and it must be shown to be the number par excellence, for, since the appearance of "Esoteric Buddhism," frequent objections have been made, and doubts expressed as to the correctness of these assertions.

And here let the student be told at once, that in all such numerical divisions the ONE universal Principle, -- although referred to as (the) one, because the Only One -- never enters into the calculations. IT stands, in its character of the Absolute, the Infinite, and the universal abstraction, entirely by ITSELF and independent of every other Power whether noumenal or phenomenal. IT "is neither matter nor spirit; IT is neither Ego nor non-Ego; and IT is neither object nor subject," says the author of "Personal and Impersonal God," and adds:--

"In the language of Hindu philosophers it is the original and eternal combination of Purusha (Spirit) and Prakriti (matter). As the Adwaites hold that an external object is merely the product of our mental states, Prakriti is nothing more than an illusion, and Purusha is the only reality; it is the ONE existence which remains in the universe of Ideas. This . . . then, is the Parabrahm of the Adwaites. . . ."

"Even if there were to be a personal God with anything like a material upadhi (physical basis of whatever form), from the standpoint of an Adwaitee there will be as much reason to doubt his noumenal existence, as there would be in the case of any other object. In their opinion, a conscious God cannot be the origin of the Universe, as his Ego would be the effect of a previous cause, if the word conscious conveys but its ordinary meaning. They cannot admit that the grand total of all the states of consciousness in the Universe is their deity, as these states are constantly changing, and as cosmic ideation ceases during Pralaya. There is only one permanent condition in the Universe, which is the state of perfect unconsciousness, bare Chidakasam (the field of consciousness) in fact. When my readers once realize the fact that this grand universe is in reality but a huge aggregation of various states of consciousness, they will not be surprised to find that the ultimate state of unconsciousness is considered as Parabrahmam by the Adwaites."*

Being itself entirely out of human reckoning or calculation, yet this "huge aggregation of various states of consciousness" is a Septenate,

[[Footnote(s)]] -----

* "Five Years of Theosophy," Art. "Personal and Impersonal God."

[[Vol. 2, Page]] 599 THE ROOTS OF THINGS.

in its totality entirely composed of Septenary groups; simply because "the capacity of perception exists in seven different aspects corresponding to the seven conditions of matter" (ibid), or the seven properties, or states, or conditions of matter. And, therefore, number 1 down to number 7 begins in the esoteric calculations with the first manifested principle, which is number one if we commence from above, and the seventh when reckoning from below, or from the lowest Principle.

The Tetrad is esteemed in the Kabala, as it was by Pythagoras, the most perfect, or rather sacred number, because it emanated from the one, the first manifested Unit, or rather the three in one. Yet the latter has been ever impersonal, sexless, incomprehensible, though within the possibility of the higher mental perceptions.

The first manifestation of the eternal monad was never meant to stand as the symbol of another symbol, the UNBORN for the Element-born, or the one LOGOS for the Heavenly man. Tetragrammaton, or the Tetractys of the Greeks, is the Second logos, the Demiurgos. The Tetrad, as Thomas Taylor thought (vide the "Pythagorean Triangle"), "is the animal itself of Plato, who, as Syriacus justly observes, was the best of the Pythagoreans; it subsists at the extremity of the intelligible triad, as is most satisfactorily shown by Proclus in the third book of his treatise on the theology of Plato. And between these two triads (the double triangle), the one intelligible, and the other intellectual, another order of gods exists which partakes of both extremes." "The Pythagorean world," Plutarch tells us (in De anim. procr., 1027) "consisted of a double quaternary." This statement corroborates what is said about the choice, by the exoteric theologies, of the lower Tetraktis. For:-- "The quaternary of the intellectual world (the world of Mahat) is T'Agathon, Nous, Psyche, Hyle; while that of the sensible world (of matter), which is properly what Pythagoras meant by the word Kosmos -- is Fire, Air, Water, and Earth. The four elements are called by the name of rizomata, the roots or principles of all mixed bodies," i.e., the lower Tetraktis is the root of illusion of the world of matter; and this is the tetragrammaton of the Jews, and the "mysterious deity," over which the modern Kabalists make such a fuss!

"Thus number four forms the arithmetical mean between the monad and the heptad, as this contains all powers, both of the productive and produced numbers; for this of all numbers under ten, is made of a certain number; the duad doubled makes a tetrad, and the tetrad doubled or unfolded makes the hebdomad (the septenary). Two multiplied into itself produces four; and retorted into itself makes the first cube. This first cube is a fertile number, the ground of multitude and variety, constituted of two and four (depending on the monad, the seventh). Thus the two principles of temporal things, the pyramid and

[[Vol. 2, Page]] 600 THE SECRET DOCTRINE.

cube, form and matter, flow from one fountain, the tetragon (on earth) the monad (in heaven)" (See Reuchlin, "Cabala" 1, ii.).

Here Reuchlin, the great authority on the Kabala, shows the cube to be matter, whereas the pyramid or the triad is "form." With the Hermesians the number four becomes the symbol of truth only when amplified into a cube, which, unfolded, makes seven, as symbolizing the male and female elements and the element of LIFE.*

Some students have been puzzled to account for the vertical line, which is male, becoming (vide infra) in the cross a four-partitioned line -- four being a female number, while the horizontal (the line of matter) becomes three-divisioned. But this is easy of explanation. Since the middle face of the cube unfolded is common to both the vertical and the horizontal bar, or double-line, it becomes neutral ground so to say, and belongs to neither. The spirit line remains triadic, and the matter line two-fold -- two being an even and therefore a female number also. Moreover, according to Theon, the Pythagoreans who gave the name of Harmony to the Tetraktis, "because it is a diatessaron in sesquitertia" -- were of opinion that "the division of the canon of the monochord was made by the tetraktis in the duad, triad, and tetrad; for it comprehends a sesquitertia, a sesquialtera, a double, a triple, and a quadruple proportion, the section of which is 27." "In the ancient musical notation, the tetrachord consisted of three degrees or intervals, and four terms of sounds called by the Greeks diatessaron, and by us a fourth." Moreover, the quaternary though an even, therefore a female ("infernal") number, varied according to its form. This is shown by Stanley (in Pythag. p. 61). The 4 was called by the

[[Footnote(s)]] -----

* In the "Hebrew Egyptian Mystery, the Source of Measures," the Author shows (on p. 50) that the figure of the cube unfolded in connection with the circle . . . "becomes . . . a cross proper, or of the tau form, and the attachment of the circle to this last gives the ansated cross of the Egyptians . . . while there are but 6 faces to a cube, the representation of the cross as the cube unfolded, as to the cross-bars, displays one face of the cube as common to two bars, counted as belonging to either . . . (i.e., once counted horizontally, and once vertically)

(CUBE UNFOLDED)
[[diagram]]

. . . 4 for the upright and 3 for the cross bar making seven in all," -- 4 for the upright, and 3 for the -- adding -- "Here we have the famous 4, and 3, and 7." Esoteric philosophy explains that four is the symbol of the Universe in its potential state, or chaotic matter, and that it requires Spirit to permeate it actively, i.e., the primordial abstract triangle has to quit its one dimensional quality and spread across that matter, thus forming a manifested basis on the three dimensional space, in order that the Universe should manifest intelligibly. This is achieved by the cube unfolded. Hence the ansated cross [[diagram]] as the symbol of man, generation and life. In Egypt ank signified soul, life and blood. It is the ensouled, living man, the Septenary.

[[Vol. 2, Page]] 601 THE MUSIC OF THE SPHERES.

Pythagoreans the Key-Keeper of Nature; but in union with the 3, which made it seven, it became the most perfect and harmonious number -- nature herself. The four was "the Masculine of Feminine Form," when forming the Cross; and Seven is "the Master of the Moon," for this planet is forced to alter her appearance every seven days. It is on number seven that Pythagoras composed his doctrine on the Harmony and Music of the Spheres, calling "a tone" the distance of

the Moon from the Earth; from the Moon to Mercury half a tone, from thence to Venus the same; from Venus to the Sun 1/2 tones; from the Sun to Mars a tone; from thence to Jupiter 1/2 a tone; from Jupiter to Saturn 1/2 a tone; and thence to the Zodiac a tone; thus making seven tones -- the diapason harmony. All the melody of nature is in those seven tones, and therefore is called "the Voice of Nature."

Plutarch explains (de Plac. Phil., p. 878) that the Achaean Greeks regarded the tetrad as the root and principle of all things, since it was the number of the elements which gave birth to all visible and invisible created things. With the brothers of the Rosy Cross, the figure of the Cross, or Cube unfolded, formed the subject of a disquisition in one of the theosophic degrees of Peuret, and was treated according to the fundamental principles of light and darkness, or good and evil.

"The intelligible world proceeds out of the divine mind (or unit) after this manner. The Tetraktis reflecting upon its own essence, the first unit, productrix of all things, and on its own beginning, saith thus: Once one, twice two, immediately ariseth a tetrad, having on its top the highest unit, and becomes a Pyramis, whose base is a plain tetrad, answerable to a superficies, upon which the radiant light of the divine unity produceth the form of incorporeal fire, by reason of the descent of Juno (matter) to inferior things. Hence ariseth essential light, not burning but illuminating. This is the creation of the middle world, which the Hebrews call the Supreme, the world of the (their) deity. It is termed Olympus, entirely light, and replete with separate forms, where is the seat of the immortal gods, 'deum domus alta,' whose top is UNITY, its wall trinity, and its superficies quaternity." (Reuchlin, Cabala, p. 689).

The "superficies" has thus to remain a meaningless surface, if left by itself. UNITY only "illuminating" quaternity; the famous lower four has to build for itself also a wall from trinity, if it would be manifested. Moreover, the tetragrammaton, or Microprosopus, is "Jehovah" arrogating to himself very improperly the "Was, Is, Will be," now translated into the "I am that I am," and interpreted as referring to the highest abstract Deity, while esoterically and in plain truth, it means only periodically chaotic, turbulent, and eternal MATTER with all its potentialities. For the Tetragrammaton is one with Nature or Isis, and is the exoteric series of androgyne gods such as Osiris-Isis, Jove-Juno, Brahma-Vach, or the Kabalistic Jah-hovah; all male-females. Every anthropomorphic god, in old nations, as Marcelinus Vicinus well observed,

[[Vol. 2, Page]] 602 THE SECRET DOCTRINE.

has his name written with four letters. Thus with the Egyptians, he was Teut; the Arabs, Alla; the Persians, Sire; the Magi, Orsi; the Mohammedans, Abdi; the Greeks, Theos; the ancient Turks, Esar; the Latins, Deus; to which J. Lorenzo Anania adds the German Gott; the Sarmatian, Bouh, etc., etc.

The Monad being one, and an odd number, the ancients therefore called the odd, the only perfect numbers; and -- selfishly, perhaps, yet as a fact -- considered them all as masculine and perfect, being applicable to the celestial gods, while even numbers, such as two, four, six, and especially eight, as being female, were regarded as imperfect, and given only to the terrestrial and infernal deities. In his eighth eclogue, Virgil records the fact by saying, "Numero deus impare gaudet," "Unequal numbers please the gods."

But number seven, or the heptagon, the Pythagoreans considered to be a religious and perfect number. It was called "Telesphoros," because by it all in the Universe and mankind is led to its end, i.e., its culmination (Philo. de Mund. opif.). Being under the rule of seven sacred planets,* the doctrine of the Spheres shows, from Lemuria to Pythagoras, the seven powers of terrestrial and sublunary nature, as well as the seven great Forces of the Universe, proceeding and evolving in seven tones, which are the seven notes of the musical scale. The heptad (our Septenary) was regarded "as the number of a virgin, because it is unborn" (like the Logos or the "Aja" of the Vedantins); "without a father or a mother, but proceeding directly from the Monad, which is the origin and crown of all things." (Pythag. Triangle, p. 174.) And if the heptad is made to proceed from the Monad directly, then it is, as taught in the Secret Doctrine of the oldest schools, the perfect and sacred number of this Maha-Manvantara of ours.

The septenary, or heptad, was sacred indeed to several gods and goddesses; to Mars, with his seven attendants, to Osiris, whose body was divided into seven and twice seven parts; to Apollo (the Sun), between his seven planets, and playing the hymn to the seven-rayed on his seven-stringed harp; to Minerva, the fatherless and the motherless, and others.

Cis-Himalayan Occultism with its sevening, and because of such sevening, must be regarded as the most ancient, the original of all. It is opposed by some fragments left by Neo-Platonists; and the admirers of the latter, who hardly understand what they defend, say to us: "See, your forerunners believed only in triple man, composed of

[[Footnote(s)]] -----

* The seven planets are not limited to this number because the ancients knew of no others, but simply because they were the primitive or primordial houses of the seven Logoi. There may be nine and ninety-nine other planets discovered -- this does not alter the fact of these seven alone being sacred.

[[Vol. 2, Page]] 603 THE SEPTENARY DEMONSTRATED.

Spirit, Soul, and body. Behold, the Taraka Raja Yoga of India limits that division to 3, we, to 4, and the Vedantins to 5 (koshas)." To this, we of the Archaic school, ask:--

Why then does the Greek poet say that "it is not four but SEVEN who sing the praise of the Spiritual Sun," [[HEPTA ME]]? He says--

"Seven sounding letters sing the praise of me,
The immortal God, the Almighty deity." . . .

Why again is the triune IAO (the Mystery God) called the "fourfold," and yet the triad and tetradic symbols come under one unified name with the Christians -- the Jehovah of the seven letters? Why again in the Hebrew Sheba is the Oath (the Pythagorean Tetraktis) identical with number 7; or, as Mr. G. Massey has it, "taking an oath was synonymous with 'to seven,' and the 10 expressed by the letter Yod, was the full number of IAO-SABAOTH, the ten-lettered God"? In Lucian's Auction, Pythagoras asks, "How do you reckon?" The reply is, "One, Two, Three, Four." "Then, do you see," says Pythagoras, "in what you conceive FOUR there are Ten; then, a perfect triangle and our Oath (tetraktis, four!)," or Seven. Why does Proclus say in Timaeus, c. iii. -- "The Father of the golden verses celebrates the Tetractys as the fountain of perennial nature"?

Simply because those Western Kabalists who quote the exoteric proofs against us have no idea of the real esoteric meaning. Because all the ancient Cosmologies -- the oldest Cosmographies of the two most ancient people of the Fifth Root Race, the Hindu Aryans and the Egyptians, adding to them the early Chinese races (the remnants of the Fourth or Atlantean Race) -- based the whole of their mysteries on number 10: the higher triangle standing for the invisible and metaphysical world, the lower three and four, or the Septenate, for the physical realm. It is not the Jewish Bible that brought number seven into prominence. Hesiod used the words "The seventh is the sacred day," before the Sabbath of "Moses" was ever heard of. The use of number seven was never confined to any one nation. This is well testified by the seven vases in the temple of the Sun, near the ruins of Babion in Upper Egypt; the seven fires burning continually for ages before the altars of Mithra; the seven holy fanes of the Arabians; the seven peninsulas, the seven islands, seven seas, mountains, and rivers of India; and of the Zohar (See Ibn Gebirol); the Jewish Sephiroth of the Seven splendours; the seven Gothic deities, the seven worlds of the Chaldeans and their seven Spirits; the seven constellations mentioned by Hesiod and Homer; and all the interminable sevens which the Orientalists find in every MS. they discover.

What we have to say finally is this: Enough has been brought forward to show why the human principles were and are divided in the

[[Vol. 2, Page]] 604 THE SECRET DOCTRINE.

esoteric schools into seven. Make it four and it will either leave man minus his lower terrestrial elements, or, if viewed from a physical stand-point, make of him a soulless animal. The Quaternary must be the higher or the lower -- the celestial or terrestrial Tetraktis: to become comprehensible, according to the teachings of the esoteric ancient school man must be regarded as a Septenary. This was so well understood, that even the so-called Christian Gnostics had adopted this time-honoured system (Vide § on "The Seven Souls"). This remained for a long time secret as, though suspected, no MSS. of that time spoke of it clearly enough to satisfy the sceptic. But there comes to our rescue the literary curiosity of our age -- the oldest and best preserved gospel of the Gnostics, Pistis Sophia [[Pictic Cophia]]. To make the proof absolutely complete, we shall quote from an authority (C. W. King) -- the only archaeologist who had a faint glimmer of this elaborate doctrine, and the best writer of the day on the Gnostics and their gems.

According to this extraordinary piece of religious literature -- a true Gnostic fossil -- the human Entity is the Septenary ray from the One,* just as our school teaches. It is composed of seven elements, four of which are borrowed from the four Kabalistical manifested worlds. Thus "from Asia it gets the Nephesh or seat of the physical appetites (vital breath, also); from Jezirah, the Ruach, or seat of the passions (? !); from Briah, the Neshamah, and from Aziluth it obtains the Chaiah, or principle of spiritual life;" (King). "This looks like an adaptation of the Platonic theory of the Soul's obtaining its respective faculties from the Planets in its downward progress through their Spheres. But the Pistis-Sophia, with its accustomed boldness, puts this theory into a much more poetical shape (§ 282)." The Inner Man is similarly made up of four constituents, but these are supplied by the rebellious AEons of the Spheres, being the Power -- a particle of the Divine light ("Divinae particula aurae") yet left in themselves; the Soul (the fifth) "formed out of the tears of their eyes, and the sweat of their torments; the [[Antimimon Priumatatos]], Counterfeit of the Spirit (seemingly answering to our Conscience), (the sixth); and lastly the [[Moirai]], Fate** (Karmic Ego), whose

[[Footnote(s)]] -----

* The Seven Centres of Energy evolved, or rendered objective by the action of Fohat upon the one element; or, in fact, the "Seventh Principle" of the Seven Elements which exist throughout manifested Kosmos. We may here point out that they are in truth the Sephiroth of the Kabalists; the "Seven gifts of the Holy Ghost" in the Christian system; and in a mystical sense, the seven children or sons of Devaki killed before the birth of Krishna by Kamsa. Our seven principles symbolize all of these. We have to part or separate from them before we reach the Krishna or Christ-state, that of a Jivanmukta, and centre ourselves entirely in the highest, the Seventh or the ONE.

** [[Moirai]] is destiny, not "Fate," in this case, as it is an appellation, not a proper noun. (See Wolf's transl. in Odyssey 22, 413). But Moira, the Goddess of Fate, is a deity [[Footnote continued on next page]]

[[Vol. 2, Page]] 605 THE VEDIC TEACHINGS.

whose business it is to lead the man to the end appointed for him; if he hath to die by the fire, to lead him into the fire, if he hath to die by a wild beast, to lead him unto the wild beast, etc."* -- the SEVENTH!

C.

THE SEPTENARY ELEMENT IN THE VEDAS.

IT CORROBORATES THE OCCULT TEACHING CONCERNING THE SEVEN GLOBES AND THE SEVEN RACES.

We have to go to the very source of historical information, if we would bring our best evidence to testify to the facts enunciated. For, though entirely allegorical, the Rig-Vedic hymns are none the less suggestive. The seven rays of Surya

(the Sun) are made therein parallel to the Seven Worlds (of every planetary chain), to the seven rivers of heaven and earth, the former being the seven creative Hosts, and the latter the Seven men, or primitive human groups. The Seven ancient Rishis -- the progenitors of all that lives and breathes on earth -- are the seven friends of Agni, his seven "horses," or seven "HEADS." The human race has sprung from fire and water, it is allegorically stated; fashioned by the FATHERS, or the ancestor-sacrificers, from Agni; for Agni, the Aswins, the Adityas (Rig-Veda III., 54, 16, II., 29, 3, 4), are all synonymous with that "sacrificer," or the fathers, variously called Pitar (Pitris, fathers), Angirases** (Ibid., 1, 31, 17, 139, et seq.), the Sadhyas, "divine sacrificers," the most occult of all. They are all called deva putra rishayah or "the Sons of God" (X., 62; 1, 4). The "sacrificers," moreover, are collectively the ONE sacrificer, the father of the gods, Visvakarman, who performed the great Sarva-Medha ceremony, and ended by sacrificing himself. (See Rig-Vedic Hymns.)

[[Footnote(s)]] -----

[[Footnote continued from previous page]] "who like [[Aisa]] gives to all their portion of good and evil," and is therefore Karma (Vide Liddell). By this abbreviation, however, the subject to Destiny or Karma is meant, the SELF or Ego, and that which is reborn. Nor is [[Antimimon Pneumatosis]] our conscience, but our Buddhi; nor is it again the "counterfeit of Spirit" but "modelled after," or a counterpart of the Spirit -- which Buddhi is, as the vehicle of Atma (Vide Ar. Theism, 17; and Liddell's definitions).

* C. W. King's Gnostics, p. 38.

** Prof. Roth (in Peter's Lexicon) defines the Angirases as an intermediate race of higher beings between gods and men; while Prof. Weber, according to his invariable custom of modernising and anthropomorphising the divine, sees in them the original priests of the religion which was common to the Aryan Hindus and Persians. Roth is right. "Angirases" was one of the names of the Dhyanis, or Devas instructors ("guru-deva"), of the late Third, the Fourth, and even of the Fifth Race Initiates.

[[Vol. 2, Page]] 606 THE SECRET DOCTRINE.

In these Hymns the "Heavenly Man" is called purusha, "the Man," (X. 90, 1) from whom Viraj was born (X. 90, 5); and from Viraj, the (mortal) man. It is Varuna (now drawn from his sublime position to be the chief of the lords-Dhyanis or Devas) who regulates all natural phenomena, who "makes a path for the Sun, for him to follow." The seven rivers of the sky (the descending creative gods) and the seven rivers of the earth (the seven primitive mankind) are under his control, as will be seen. For he who breaks Varuna's laws (Vratani, "courses of natural action," active laws) is punished by Indra (X. 113, 5), the Vedic powerful god, whose Vrata (law or power) is greater than the Vratani of any other god.

Thus, the Rig Veda, the oldest of all the known ancient records, may be shown to corroborate the occult teachings in almost every respect. Its hymns -- the records written by the earliest Initiates of the Fifth (our race) concerning the primordial teachings -- speak of the Seven Races (two still to come) allegorising them by the "seven streams" (1, 35, 8); and of the Five Races ("panca krishtayah") which have already inhabited this world (ibid) on the five regions "panca pradichah" (IX, 86, 29), as also of the three continents that were.*

It is those scholars only who will master the secret meaning of the Purushasukta (in which the intuition of the modern Orientalist has chosen to see "one of the very latest hymns of the Rig-Veda"), who may hope to understand how harmonious are its teachings and how corroborative of the Esoteric doctrines. One must study in all the abstruseness of their metaphysical meaning the relations in it between the (Heavenly) man "Purusha," SACRIFICED for the production of the Universe and all in it (See Visvakarman), and the terrestrial mortal man (Hymn X. 20, 1, 16), before one realizes the hidden philosophy of this verse:--

"15. He ("Man," purusha, or Visvakarman) had seven enclosing logs of fuel, and thrice seven layers of fuel; when the gods performed the sacrifice, they bound the Man as victim" This relates to the three Septenary primeval Races, and shows the antiquity of the Vedas, who knew of no other, probably in this earliest oral teachings; and also

[[Footnote(s)]] -----

* Three submerged, or otherwise destroyed, continents -- the first "continent" of the First Race prevailing to the last and existing to this day -- are described in the occult Doctrine, the Hyperborean, the Lemurian (adopting the name now known in Science), and the Atlantean. Most of Asia issued from under the waters after the destruction of Atlantis; Africa came still later, while Europe is the fifth and the latest -- portions of the two Americas being far older. But of these, more anon. The Initiates who recorded the Vedas -- or the Rishis of our Fifth Race -- wrote at a time when Atlantis had already gone down. Atlantis is the fourth continent that appeared, but the third that disappeared.

[[Vol. 2, Page]] 607 THE SEVEN EARTHS AND THE SEVEN RACES.

to the seven primeval groups of mankind, as Visvakarman represents divine humanity collectively.*

The same doctrine is found reflected in the other old religions. It may, and must have come down to us disfigured and misinterpreted, as in the case of the Parsis, who read it in their Vendidad and elsewhere, without understanding the allusions they contain any better than the Orientalists do; yet the doctrine is plainly mentioned in their old works. (See the enumeration of the seven spheres --not the "Karshvare of the earth," as believed -- in Fargard XIX., 30). But see further on.

Comparing the esoteric teaching with the interpretations by James Darmesteter (the Vendidad, edited by Prof. Max Muller), one may see at a glance where the mistake is made, and the cause that produced it. The passage runs thus:--

"The Indo-Iranian Asura (Ahura) was often conceived as seven-fold; by the play of certain mythical (?) formulae and the strength of certain mythical (?) numbers, the ancestors of the Indo-Iranians had been led to speak of seven worlds,** and the Supreme God was often made seven-fold, as well as the worlds over which he ruled." (Vide the foot note). "The

seven worlds became in Persia the seven Karshvare of the earth: the earth is divided into seven Karshvare, only one of which is known and accessible to man, the one on which we live, namely, Hvaniratha; which amounts to saying that there are seven earths.*** Parsi mythology knows also of seven heavens. Hvaniratha itself is divided into seven climes. (Orm. Ahr. § 72. "Vendidad Introd. p. Lx.,") and the same division and doctrine is to be found in the oldest and most revered of the Hindu

[[Footnote(s)]] -----

* Nor is this archaic teaching so very unscientific, since one of the greatest naturalists of the age -- the late Professor Agassiz -- admitted the multiplicity of the geographical origins of man, and supported it to the end of his life. The unity of the human species was accepted by the illustrious Professor of Cambridge (U.S.A.) in the same way as the Occultists do -- namely, in the sense of their essential and original homogeneity and their origin from one and the same source:-- e.g., Negroes, Aryans, Mongols, etc., have all originated in the same way and from the same ancestors. The latter were all of one essence, yet differentiated, because belonging to seven planes which differed in degree though not in kind. That original physical difference was but little more accentuated by that of geographical and climatic conditions, later on. This is not the theory of Agassiz, of course, but the esoteric version. It is fully discussed in the Addenda (Part III.).

** The seven worlds are, as said, the seven spheres of the chain, each presided over by one of the "Seven great gods" of every religion. When the latter became degraded and anthropomorphized, and the metaphysical ideas nearly forgotten, the synthesis or the highest, the seventh, was separated from the rest, and that personification became the eighth god, whom monotheism tried to unify but -- failed. In no exoteric religion is God really one, if analyzed metaphysically.

*** The six invisible globes of our chain are both "worlds" and "earths" as is our own, albeit invisible. But where could be the Six invisible earths on this globe?

[[Vol. 2, Page]] 608 THE SECRET DOCTRINE.

scriptures -- the Rig-veda. Mention is made therein of six worlds, besides our earth: the six rajamsi above prithivi -- the earth, -- or "this" (idam) as opposed to that which is yonder (i.e., the six globes on the three other planes or worlds). (See Rig-veda I. 34, III. 56; VII 10, 411, and V., 60. 6).

The italics are ours to point out the identity of the tenets with those of the esoteric doctrine, and the mistake made. The Magi or Mazdeans only believed in what other people believed in; namely, in seven "worlds" or globes of our planetary chain, of which only one is accessible to man (at the present time), our Earth; and in the successive appearance and destruction of seven continents or earths on this our globe, each continent being divided, in commemoration of the seven globes (one visible, six invisible), into seven islands or continents, "seven climes," etc., etc. This was a common belief in those days when the now Secret Doctrine was open to all. It is this multiplicity of localities under Septenary division, that made the Orientalists (led astray, moreover, by the oblivion of both the uninitiated Hindus and Parsis of their primitive doctrines) feel so puzzled by this ever-recurring seven-fold number, as to regard it as "mythical." It is that oblivion of the first principles which has led the Orientalists off the right track and made them commit the greatest blunders. The same failure is found in the definition of the Gods. Those who are ignorant of the esoteric doctrine of the earliest Aryans, can never assimilate or understand correctly the metaphysical meaning contained in these BEINGS.

Ahura Mazda (Ormazd) was the head and synthesis of the seven Amesha Spentas (or Amshaspendes), and, therefore, an Amesha Spenta himself. Just as "Jehovah-Binah Arelim" was the head and synthesis of the Elohim and no more; so Agni-Vishnu-Surya was the synthesis and head, or the focus whence emanated in physics as in metaphysics, from the Spiritual as from the physical Sun, the Seven Rays, the seven fiery tongues, the seven planets or gods. All these became supreme gods and the ONE GOD, but only after the loss of the primeval secrets, the sinking of Atlantis, or "the Flood," and the occupation of India by the Brahmans, who sought safety on the summits of the Himalayas, when even the high table-lands of what is now Tibet became submerged for a time. Ahura Mazda is addressed only as "the Most Blissful Spirit, Creator of the corporeal World" in the Vendidad. "Ahura Mazda" in its literal translation means the "Wise Lord" (Ahura "lord," and Mazda "wise"). Moreover, this name of Ahura, in Sanskrit Asura, connects him with the Manasaputras, the Sons of Wisdom who informed the mindless man, and endowed him with his mind (manas). Ahura (asura) may be derived from the root ah "to be," but in its primal signification it is what the Secret Teaching shows it to be.

[[Vol. 2, Page]] 609 THE ZOROASTRIAN SEPTENARY.

When geology shall have found out how many thousands of years ago the disturbed waters of the Indian Ocean reached the highest plateaux of Central Asia, when the Caspian Sea and the Persian Gulf made one with it, then only will they know the age of the Aryan Brahminical nation, and the time of its descent into the plains of Hindostan, which it did millenniums later.

Yima, the so-called "first man" in the Vendidad, as much as his twin-brother Yama, the Son of Vaivasvata Manu, belongs to two epochs of the Universal History. He is the "Progenitor" of the Second human Race, hence the personification of the shadows of the Pitris, and the father of the postdiluvian Humanity. The Magi said "Yima," as we say "man" when speaking of mankind. The "fair Yima," the first mortal who converses with Ahura Mazda, is the first "man" who dies or disappears, not the first who is born. The "Son of Vixanghat," was, like the Son of Vaivasvata, the symbolical man, who stood in esotericism as the representative of the first three races and the collective Progenitor thereof. Of these races the first two never died* but only vanished, absorbed in their progeny, and the third knew death only towards its close, after the separation of the sexes and its "Fall" into generation. This is plainly alluded to in the II. Fargard of the Vendidad. Yima refuses to become the bearer of the law of Ahura Mazda, saying "I was not born, I was not taught to be the preacher and the bearer of thy law." And then Ahura Mazda asks him to make his men increase and "watch over his world" (3 and 4).

He refuses to become the priest of Ahura Mazda, because he is his own priest and sacrificer, but he accepts the second proposal. He is made to answer:--

"Yes! . . . yes, I will rule and watch over thy world. There shall be, while I am King, neither cold wind nor hot wind, neither disease nor death."

Then Ahura Mazda brings him a golden ring and a poniard, the emblems of sovereignty, and under the sway of Yima --

"Three hundred winters passed away, and the earth was replenished with flocks and herds, with men, and dogs, and birds, and with red blazing fires," etc. (300 winters mean 300 periods or cycles.)

"Replenished," mark well, that is to say, all this had been on it before; and thus is proven the knowledge of the doctrine about the successive destructions of the world and its life cycles. Once the "300 winters" were over, Ahura Mazda warns Yima that the earth is becoming too full, and men have nowhere to live. Then Yima steps forward, and with the help of Spenta Armaita (the female genius, or Spirit of the Earth) makes that earth stretch out and become larger by

[[Footnote(s)]] -----

* Death came only after man had become a physical creature, vide supra. The men of the First Race and also of the Second, dissolved and disappeared in their progeny.

[[Vol. 2, Page]] 610 THE SECRET DOCTRINE.

one-third, after which "new herds and flocks and men" appear upon it. Ahura Mazda warns him again, and Yima makes the earth by the same magic power to become larger by two-thirds. "Nine hundred winters" pass away, and Yima has to perform the ceremony for the third time. The whole of this is allegorical. The three processes of stretching the earth, refer to the three successive continents and races issuing one after and from the other, as explained more fully elsewhere. After the third time, Ahura Mazda warns Yima in an assembly of "celestial gods and excellent mortals" that upon the material world the fatal winters are going to fall, and all life will perish. This is the old Mazdean symbolism for the "flood," and the coming cataclysm to Atlantis, which sweeps away every race in its turn. Like Vaivasvata Manu and Noah, Yima makes a vara (an enclosure, an ark) under the God's direction, and brings thither the seed of every living creature, animals and "fires."

It is of this "earth" or new continent that Zarathustra became the law-giver and ruler. This was the Fourth Race in its beginning, after the men of the Third began to die out. Till then, as said (vide supra, foot note) there had been no regular death, but only a transformation, for men had no personality as yet. They had monads -- breaths of the ONE Breath, and as impersonal as the source from which they proceeded. They had bodies, or rather shadows of bodies, which were sinless, hence Karmaless. Therefore, as there was no Kamaloka -- least of all Nirvana or even Devachan -- for the "souls" of men who had no personal Egos, there could be no intermediate periods between the incarnations. Like the Phoenix, primordial man resurrected out of his old into a new body. Each time, and with each new generation, he became more solid, more physically perfect, agreeably with the evolutionary law, which is the Law of Nature. Death came with the complete physical organism, and with it -- moral decay.

This explanation shows one more old religion agreeing in its symbology with the universal Doctrine.

Elsewhere the oldest Persian traditions, the relics of Mazdeism of the still older Magians, are given, and some of them explained. Mankind did not issue from one solitary couple. Nor was there ever a first man -- whether Adam or Yima -- but a first mankind.

It may, or may not be, "mitigated polygenism." Once that both creation ex-nihilo -- an absurdity -- and a superhuman Creator or creators -- a fact -- are made away with by science, polygenism presents no more difficulties or inconveniences (rather fewer from a scientific point of view) than monogenism does.

Nevertheless, it is as scientific as any other claim. For in his Introduction to Nott's and Gliddon's "Types of Mankind," Agassiz declares

[[Vol. 2, Page]] 611 THE SEPTENATE IN THE PURANAS.

his belief in an indefinite number of "primordial races of men created separately"; and remarks that, "whilst in every zoological province animals are of different species, man, in spite of the diversity of his races, always forms one and the same human being."

Occultism defines and limits the number of primordial races to seven, because of the "seven progenitors," or prajapatis, the evolvers of beings. These are neither gods, nor supernatural Beings, but advanced Spirits from another and lower planet, reborn on this one, and giving birth in their turn in the present Round to present Humanity. This doctrine is again corroborated by one of its echoes -- the Gnostic. In their Anthropology and Genesis of man they taught that "a certain company of Seven angels," formed the first men, who were no better than senseless, gigantic, shadowy forms -- "a mere wriggling worm" (!) writes Irenaeus (I., 24, 1), who takes, as usual, the metaphor for reality.

D.

THE SEPTENARY IN THE EXOTERIC WORKS.

We may now examine other ancient Scriptures and see whether they contain the septenary classification, and, if so, to what degree.

As much, if not much more, even than in the Jewish Bible, scattered about in the thousands of Sanskrit texts, some still unopened, others yet unknown, as well as in all the Puranas, the numbers seven and forty-nine (7 x 7) play a most prominent part. They are found from the Seven creations in Chapter I., down to the seven rays of the Sun at the final Pralaya, which expand into Seven Suns and absorb the material of the whole Universe. Thus the Matsya Purana has: "For the sake of promulgating the Vedas, Vishnu, in the beginning of a Kalpa, related to Manu the story of Narasimha and the events of seven Kalpas." Then again the same Purana shows that "in all the Manvantaras, classes of Rishis* appear by seven and seven, and having established a code of law and morality depart to felicity" -- the Rishis representing many other things besides living Sages.

In Hymn xix., 53, of Atharva Veda (Dr. Muir's translation) one reads:--

[[Footnote(s)]] -----

* "These are the seven persons by whom in the several Manvantaras" -- says Parasara -- "created beings have been protected. Because the whole world has been pervaded by the energy of the deity, he is entitled Vishnu, from the root Vis 'to enter' or 'pervade,' for all the gods, the Manus, the Seven Rishis, the Sons of the Manu, the Indras, all are but the impersonated potencies (Vibhutayah) of Vishnu" (Vish. Purana). Vishnu is the Universe; and the Universe itself is divided in the Rig Veda into seven regions -- which ought to be sufficient authority, for the Brahmins, at all events.

[[Vol. 2, Page]] 612 THE SECRET DOCTRINE.

"1. Time carries (us) forward, a steed, with seven rays, a thousand eyes, undecaying, full of fecundity. On him intelligent sages mount; his wheels are all the worlds."

"2. Thus Time moves on seven wheels; he has seven naves; immortality is his axle. He is at present all these worlds. Time hastens onward the first God."

"3. A full jar is contained in Time. We behold him existing in many forms. He is all these worlds in the future. They call him 'Time in the highest Heaven' ". . . .

Now add to this the following verse from the Esoteric volumes:--

"Space and Time are one. Space and Time are nameless, for they are the incognizable THAT, which can be sensed only through its seven rays -- which are the Seven Creations, the Seven Worlds, the Seven Laws," etc., etc., etc. . . .

Remembering that the Puranas insist on the identity of Vishnu with Time and Space*; and that even the Rabbinical symbol for God is MAQOM, "Space," it becomes clear why, for purposes of a manifesting Deity -- Space, Matter, and Spirit -- the one central point became the Triangle and Quaternary (the perfect Cube), hence Seven. Even the Pravaha wind (the mystic and occult Force that gives the impulse to, and regulates the course of the stars and planets) is septenary. The Kurma and Linga Puranas enumerate seven principal winds of that name, which winds are the principles of Cosmic Space. They are intimately connected with Dhruva** (now Alpha), the Pole-Star, which is connected in its turn with the production of various phenomena through cosmic forces.

Thus, from the Seven Creations, seven Rishis, Zones, Continents, Principles, etc., etc. in the Aryan Scriptures, the number has passed through Indian, Egyptian, Chaldaic, Greek, Jewish, Roman, and finally Christian mystic thought, until it landed in and remained impressed indelibly on every exoteric theology. The seven old books stolen out of Noah's ark by Ham, and given to Cush, his son, and the seven Brazen columns of Ham and Cheiron, are a reflection and a remem-

[[Footnote(s)]] -----

* Vishnu is all -- the worlds, the stars, the seas, etc., etc. "Vishnu is all that is, all that is not . . . but is not Vastubhuta," "a substance" (Vishnu Purana, Book II. ch. xii). "That which people call the highest God is not a substance but the cause of it; not one that is here, there, or elsewhere, not what we see, but that in which all is -- SPACE."

** Therefore it is said in the Puranas that the view of Dhruva (the polar star) at night, and of the celestial porpoise (Sisumara, a constellation) "expiates whatever sin has been committed during the day." The fact is that the rays of the four stars in the circle of perpetual apparition -- the Agni, Mahendra, Kasyapa, and Dhruva, placed in the tail of Ursa Minor (Sisumara) -- focussed in a certain way and on a certain object produce extraordinary results. The astro-magians of India will understand what is meant.

[[Vol. 2, Page]] 613 WHO ARE THE MARUTS?

branch of the Seven primordial mysteries instituted according to the "Seven secret emanations," the "Seven Sounds," and seven rays -- the spiritual and sidereal models of the seven thousand times seven copies of them in later aeons.

The mysterious number is once more prominent in the no less mysterious Maruts. The Vayu Purana shows, and Harivansa corroborates, that the Maruts -- the oldest as the most incomprehensible of all the secondary or lower gods in the Rig Veda -- "are born in every manvantara (Round) seven times seven (or 49); that in each Manvantara, four times seven (or twenty-eight) they obtain emancipation, but their places are filled up by persons reborn in that character." What are the Maruts in their esoteric meaning, and who those persons "reborn in that character"? In the Rig and other Vedas, the Maruts are represented as the storm gods and the friends and allies of Indra; they are the "Sons of heaven and of earth." This led to an allegory that makes them the children of Siva, the great patron of the Yogis, "the MAHA-YOGI, the great ascetic, in whom is centred the highest perfection of austere penance and abstract meditation, by which the most unlimited powers are obtained, marvels and miracles are worked, the highest spiritual knowledge is acquired, and union with the great spirit of the universe is eventually gained." In the Rig Veda the name Siva is unknown, but the god is called Rudra, which is a word used for Agni, the fire god, the Maruts being called therein his sons. In the Ramayana and the

Puranas, their mother, Diti -- the sister, or complement of, and a form of Aditi -- anxious to obtain a son who would destroy Indra, is told by Kasyapa the Sage, that "if, with thoughts wholly pious and person entirely pure, she carries the babe in her womb for a hundred years" she will get such a son. But Indra foils her in the design. With his thunderbolt he divides the embryo in her womb into seven portions, and then divides every such portion into seven pieces again, which become the swift-moving deities, the Maruts.* These deities are only another aspect, or a development of the Kumaras, who are Rudras in their patronymic, like many others.**

Diti, being Aditi, unless the contrary is proven to us, Aditi, we say, or Akasa in her highest form, is the Egyptian seven-fold heaven. Every true Occultist will understand what this means. Diti, we repeat, is the sixth

[[Footnote(s)]] -----

* In the Ramayana it is Bala-Rama, Krishna's elder brother, who does it.

** With regard to the origin of Rudra, it is stated in several Puranas that his (spiritual) progeny, created in him by Brahma, was not confined to either the seven Kumaras or the eleven Rudras, etc., but "comprehends infinite numbers of beings in person and equipments like their (virgin) father. Alarmed at their fierceness, numbers, and immortality, Brahma desires his son Rudra to form creatures of a different and mortal nature." Rudra refusing to create, desists, etc., hence Rudra is the first rebel. (Linga, Vayu, Matsya, and other Puranas.)

[[Vol. 2, Page]] 614 THE SECRET DOCTRINE.

principle of metaphysical nature, the Buddhi of Akasa. Diti, the mother of the Maruts, is one of her terrestrial forms, made to represent, at one and the same time, the divine Soul in the ascetic, and the divine aspirations of mystic Humanity toward deliverance from the webs of Maya, and final bliss in consequence. Indra, now degraded, because of the Kali Yuga, when such aspirations are no more general but have become abnormal through a general spread of Ahamkara (the feeling of Egotism, Self, or I-AM-NESS) and ignorance -- was, in the beginning, one of the greatest gods of the Hindu Pantheon, as the Rig Veda shows. Sura-dhipa, "the chief of the gods," has fallen down from Jishnu, "the leader of the celestial host," -- the Hindu St. Michael -- to an opponent of asceticism, the enemy of every holy aspiration. He is shown married to Aindri (Indrani), the personification of Aindri-yaka, the evolution of the element of senses, whom he married "because of her voluptuous attractions"; after which he began sending celestial female demons to excite the passions of holy men, Yogis, and "to beguile them from the potent penances which he dreaded." Therefore, Indra, now characterized as "the god of the firmament, the personified atmosphere" -- is in reality the cosmic principle Mahat, and the fifth human -- Manas in its dual aspect: as connected with Buddhi; and as allowing himself to be dragged down by his Kama-principle (the body of passions and desires). This is demonstrated by Brahma telling the conquered god that his frequent defeats were due to Karma, and were a punishment for his licentiousness, and the seduction of various nymphs. It is in this latter character that he seeks, to save himself from destruction, to destroy the coming "babe" destined to conquer him:-- the babe, of course, allegorizing the divine and steady will of the Yogi -- determined to resist all such temptations, and thus destroy the passions within his earthly personality. Indra succeeds again, because flesh conquers spirit -- (Diti is shown frustrated in the Dvapara Yuga, during that period when the Fourth Race was flourishing). He divides the "Embryo" (of new divine adeptship, begotten once more by the Ascetics of the Aryan Fifth Race), into seven portions -- a reference not alone to the seven sub-races of the new Root-Race, in each of which there will be a "Manu,"* but also to the seven degrees of adeptship -- and then each

[[Footnote(s)]] -----

* Notwithstanding the terrible, and evidently purposed, confusion of Manus, Rishis, and their progeny in the Puranas, one thing is made clear: there have been and there will be seven Rishis in every Root-Race (called also Manvantara in the sacred books) as there are fourteen Manus in every Round, the "presiding gods, the Rishis and Sons of the Manus" being identical. (See Book III. ch. 1 of Vishnu Purana.) "Six" Manvantaras are given, the Seventh being our own in the Vishnu Purana. The Vayu Purana furnishes the nomenclature of the Sons of the fourteen Manus in every Manvantara, and the Sons of the seven Sages or Rishis. The latter are the progeny [[Footnote continued on next page]]

[[Vol. 2, Page]] 615 THE DOOM OF CONTINUAL REBIRTH.

portion into seven pieces -- alluding to the Manu-Rishis of each Root-Race, and even sub-race.

It does not seem difficult to perceive what is meant by the Maruts obtaining "four times seven" emancipations in every "manvantara," and by those persons who, being reborn in that character (of the Maruts in their esoteric meaning), "fill up their places." The Maruts represent (a) the passions that storm and rage within every candidate's breast, when preparing for an ascetic life -- this mystically; (b) the occult potencies concealed in the manifold aspects of Akasa's lower principles -- her body, or sthula sarira, representing the terrestrial, lower, atmosphere of every inhabited globe -- this mystically and sidereally; (c) actual conscious Existences, Beings of a cosmic and psychic nature.

At the same time "Maruts" is, in occult parlance, one of the names given to those EGOS of great Adepts who have passed away, and who are known also as Nirmanakayas; of those Egos for whom -- since they are beyond illusion -- there is no Devachan, and who, having either voluntarily renounced it for the good of mankind, or not yet reached Nirvana, remain invisible on earth. Therefore are the Maruts* shown firstly -- as the sons of Siva-Rudra -- the "Patron Yogi," whose "third eye," mystically, must be acquired by the ascetic before he becomes an adept; then, in their cosmic character, as the subordinates of Indra and his opponents -- variously. The "four times seven" emancipations have a reference to the four Rounds, and the four Races that preceded ours, in each of which Marut-Jivas (monads) have been re-born, and have obtained final liberation, if they have only availed themselves of it. Instead of which, preferring the good of mankind, which would struggle still more hopelessly in the meshes of ignorance and misery, were it not for this extraneous help -- they are re-born over and over again "in that character," and thus "fill up their own places." Who they are, "on earth" -- every student of Occult science knows. And he also knows that the Maruts are Rudras, among whom

also the family of Twashtri, a synonym of Visvakarman -- the great patron of the Initiates -- is included. This gives us an ample knowledge of their true nature.

[[Footnote(s)]] -----

[[Footnote continued from previous page]] of the Progenitors of mankind. All the Puranas speak of the seven Prajapatis of this period (Round).

* "Chakshuba was the Manu of the sixth period (Third Round and Third Race), in which Indra was Manojava" (Mantradruma in the Bhagavata Purana). As there is a perfect analogy between the "great Round" (Mahakalpa), each of the seven Rounds, and each of the seven great Races in every one of the Rounds -- therefore, Indra of the sixth period, or Third Round, corresponds to the close of the Third Race (at the time of the Fall or the separation of sexes). Rudra, as the father of the Maruts, has many points of contact with Indra, the Marutwan, or "lord of the Maruts." To receive a name Rudra is said to have wept for it. Brahma called him Rudra; but he wept seven times more and so obtained seven other names -- of which he uses one during each "period."

[[Vol. 2, Page]] 616 THE SECRET DOCTRINE.

The same for the Septenary Division of Kosmos and human principles. The Puranas, along with other sacred texts, teem with allusions to this. First of all, the mundane Egg which contained Brahma, or the Universe, "was externally invested with seven natural elements, at first loosely enumerated as Water, Air, Fire, Ether, and three secret elements" (Book I.); then the "World" is said to be "encompassed on every side" by seven elements, also within the egg -- as explained, "the universe is encompassed on every side, above and below by the Andakat'aha -- the shell of the egg of Brahma." . . . Around the shell flows water, which is surrounded with fire; fire by air; air by ether; ether by the origin of the elements (Ahamkara); the latter by Universal Mind ("Intellect" in the Texts) (Book II., ch. VII. Vishnu Purana). It relates to spheres of being as much as to principles. Prithivi is not our Earth, but the World, the Solar system, and means the broad, the Wide. In the Vedas -- the greatest of all authorities, though needing the key to read it correctly -- three terrestrial and three celestial earths are mentioned as having been called into existence simultaneously with Bhumi -- our earth. We have often been told that six, not seven, appears to be the number of spheres, principles, etc. We answer that there are, in fact, only six principles in man; since his body is no principle, but the covering, the shell thereof. So with the planetary chain; speaking of which, esoterically, the Earth (as well as the seventh, or rather fourth plane, one that stands as the seventh if we count from the first triple kingdom of the Elementals that begin the formation) may be left out of consideration, being (to us) the only distinct body of the seven. The language of occultism is varied. But supposing that three earths only, instead of seven, are meant in the Vedas, what are those three, since we still know of but one? Evidently there must be an occult meaning in the statement under consideration. Let us see. The "Earth that floats" on the Universal Ocean (of Space), which Brahma divides in the Puranas into seven zones, is Prithivi, the world divided into seven principles; a cosmic division looking metaphysical enough, but, in reality, physical in its occult effects. Many Kalpas later, our Earth is mentioned, and, in its turn, is divided into seven zones* on that same law of analogy that guided ancient philosophers. After which one finds on it seven continents, seven isles, seven oceans, seven seas and rivers, seven mountains, and seven climates, etc., etc., etc.**

[[Footnote(s)]] -----

* See the Puranas.

** In Vishnu Purana, Book II., chap. iv., it is stated that the EARTH, "with its continents, mountains, oceans, and exterior shell, is fifty crores (500 millions) of yojanas in extent," to which the commentator remarks that "this comprises the planetary spheres; for the diameter of the seven zones and oceans -- each ocean being of the same diameter as the continent it encloses, and each successive continent being twice the [[Footnot continued on next page]]

[[Vol. 2, Page]] 617 PERSIAN SYMBOLOGY.

Furthermore, it is not only in the Hindu Scriptures and philosophy that one finds references to the Seven Earths, but in the Persian, Phoenician, Chaldean, and Egyptian Cosmogonies, and even in Rabbinical literature. The Phoenix* -- called by the Hebrews Onech [Heb char] (from Phenoch, Enoch, symbol of a secret cycle and initiation), and by the Turks, Kerkes - lives a thousand years, after which, kindling a flame, it is self-consumed; and then, reborn from itself -- it lives another thousand years, up to seven times seven: (See "Book of Ali" -- Russian transl.), when comes the day of Judgment. The "seven times seven," 49, are a transparent allegory, and an allusion to the forty-nine "Manus," the Seven Rounds, and the seven times seven human cycles in each Round on each globe. The Kerkes and the Onech stand for a race cycle, and the mystical tree Ababel -- the "Father Tree" in the Kuran -- shoots out new branches and vegetation at every resurrection of the Kerkes or Phoenix; the "Day of judgment" meaning a "minor Pralaya" (See "Esoteric Buddhism"). The author of the "Book of God" and the "Apocalypse" believes that "the Phoenix is very plainly the same as the Simorgh, the Persian roc, and the account which is given us of this last bird, yet more decisively establishes the opinion that the death and revival of the Phoenix exhibit the successive destruction and reproduction of the world, which many believed to be effected by the agency of a fiery deluge" -- (p. 175); and a watery one in turn. "When the Simorgh was asked her age, she informed Caherman that this world is very ancient, for it has been already seven times replenished with beings different from men, and seven times depopulated;** that the age of the human race, in which we now are, is to endure seven thousand numbers, and that she herself had seen twelve of these revolutions, and knew not how many more she had to see." (Oriental Collections, ii., 119.)

The above, however, is no new statement. From Bailly, in the last century, down to Dr. Kenealy, in this one, these facts have been noticed by several writers, but now a connection can be established between

[[Footnote(s)]] -----

[[Footnote continued from previous page]] diameter of that which precedes it -- amounts to but two crores or fifty-four lakhs etc. . . . Whenever any contradictions in different Puranas occur, they have to be ascribed . . . to differences of Kalpas and the like." "The like" ought to read "Occult meaning," which explanation is withheld by the commentator, who wrote for exoteric, sectarian purposes, and was misunderstood by the translator for various other reasons, the least of which is -- ignorance of the esoteric philosophy.

* The Phoenix, connected with the Solar Cycle of 600 years (with ciphers taken out or with more added according to which cycle is meant), the Western cycle of the Greeks and other nations -- is a generic symbol for several kinds of cycles. Fuller details will be given in the section on "Kalpas and Cycles."

** The tense is the "past" because the book is allegorical, and has to veil the truths contained.

[[Vol. 2, Page]] 618 THE SECRET DOCTRINE.

the Persian oracle and the Nazarene prophet. Says the author of the "Book of God":--

"The Simorgh is in reality the same as the winged Singh of the Hindus, and the Sphinx of the Egyptians. It is said that the former will appear at the end of the world . . . as a monstrous lion-bird. From these the Rabbins have borrowed their myths of an enormous Bird, sometimes standing on the Earth, sometimes walking in the ocean . . . while its head props the sky; and with the symbol, they have also adopted the doctrine to which it relates. They teach that there are to be seven successive renewals of the globe, that each reproduced system will last seven thousand years; (?) and that the total duration of the universe will be 49,000 years. This opinion, which involves the doctrine of the pre-existence of each renewed creature, they may either have learned during their Babylonian captivity, or it may have been part of the primeval religion which their priests had preserved from remote times" (p. 176). It shows rather that the initiated Jews borrowed, and their non-initiated successors, the Talmudists, lost the sense, and applied the Seven Rounds, and the forty-nine races, etc., to the wrong end.

Not only "their priests," but those of every other country. The Gnostics, whose various teachings are the many echoes of the one primitive and universal doctrine, put the same numbers, under another form, in the mouth of Jesus in the very occult Pistis Sophia. We say more: even the Christian editor or author of Revelation has preserved this tradition and speaks of the Seven RACES, four of which, with part of the fifth, are gone, and two have to come. It is stated as plainly as could be stated in chapter xvii., verses 9 and 10. Thus saith the angel: "And here is the mind which hath wisdom. The seven heads are seven mountains, on which the woman sitteth. And there are SEVEN Kings, five are fallen, and one is, and the other is not yet come . . ." Who, acquainted in the least with the symbolical language of old, will fail to discern in the five Kings that have fallen, the four Root-Races that were, and part of the fifth, the one that is; and in the other, that "is not yet come," the sixth and seventh coming root races, as also the sub-races of this, our present race? Another still more forcible allusion to the Seven Rounds and the forty-nine root-races in Leviticus, will be found elsewhere in the Addenda, Part III.

E.

SEVEN IN ASTRONOMY, SCIENCE, AND MAGIC.

Again, number seven is closely connected with the occult significance of the Pleiades, those seven daughters of Atlas, "the six present, the

[[Vol. 2, Page]] 619 THE CYCLE OF THE NAROS.

seventh hidden." In India they are connected with their nursling, the war god, Karttikeya. It is the Pleiades (in Sanskrit, Krittika) who gave the god their name, for Karttikeya is the planet Mars, astronomically. As a god he is the son of Rudra, born without the intervention of a woman. He is a Kumara, a "virgin youth" again, generated in the fire from the Seed of Siva -- the holy spirit -- hence called Agni-bhu. The late Dr. Kenealy believed that, in India, Karttikeya is the secret symbol of the cycle of Naros, composed of 600, 666, and 777 years, according to whether it is solar or lunar, divine or mortal, years that are counted; and the six visible, or the seven actual sisters, the Pleiades, are needed for the completion of this most secret and mysterious of all the astronomical and religious symbols. Therefore, when made to commemorate one particular event, Karttikeya appeared, of old, as a Kumara, an ascetic, with six heads -- one for each century of the Naros. When the symbolism was needed for another event, then, in conjunction with the seven sidereal sisters, Karttikeya is seen accompanied by Kaumara (or Sena) his female aspect. He is then riding on a peacock -- the bird of Wisdom and Occult Knowledge, and the Hindu Phoenix, whose Greek relation with the 600 years of Naros is well-known. A six-rayed star (double triangle) a Swastica, a six and occasionally seven-pointed crown is on his brow; the peacock's tail represents the sidereal heavens; and the twelve signs of the Zodiac are hidden on his body; for which he is also called Dwadasa Kara, ("the twelve-handed"), and Dwadasaksha, "twelve-eyed." It is as Sakti-dhara, however, the "Spear-holder," and the conqueror of Taraka, "Taraka-jit," that he is shown most famous.

The years of the Naros, being (in India) counted in two ways -- either "100 years of the gods," (divine years) -- or 100 mortal years -- one can see the tremendous difficulty for the non-initiated in comprehending correctly this cycle, which plays such an important part in St. John's Revelation. It is the truly apocalyptic Cycle; yet in none of the numerous speculations about it have we found anything but a few approximate truths, because of its being of various lengths and relating to various pre-historic events.

It has been urged against the duration claimed by the Babylonians for their divine ages, that Suidas shows the ancients counting, in their chronological computations, days for years. Dr. Sepp in his ingenious plagiarism -- exposed elsewhere - - of the Hindu 432 in thousands and millions of years (the duration of the Yugas) which he dwarfed to 4,320 lunar years before the "birth of Christ" -- as "foreordained" in the sidereal (besides the invisible) heavens, and proved "by the

apparition of the Star of Bethlehem" -- appeals to Suidas and his authority. But Suidas had no other warrant for it than his own speculations, and he

[[Vol. 2, Page]] 620 THE SECRET DOCTRINE.

was no Initiate. He cites, as a proof, Vulcan, in showing him as having, according to chronological claim, reigned 4,477 years, i.e., 4,477 days, as he thinks, or rendered in years, 12 years, 3 months, and 7 days; he has 5 days in his original -- thus committing an error even in such an easy calculation. (See Suidas, art. [[Heelios]].) True, there are other ancient writers guilty of like fallacious speculations -- Calisthenes, for instance, who assigns to the astronomical observations of the Chaldeans only 1,903 years, whereas Epigenes recognises 720,000 years (Pliny. *Histor. Natur. Lib. VII. c. 56.*) The whole of these hypotheses made by profane writers are based upon and due to a misunderstanding. The chronology of all the Western peoples, ancient Greeks and Romans, was borrowed from India. Now, it is said in the Tamil edition of Bagavadam that 15 solar days make a Paccham; two paccham (or 30 days) are a month of the mortals, adding that such a month is only one day of the Pitar Devata (Pitris). Again, two of these months constitute a roodoo, three roodoo make an ayanam, and two ayanams a year -- which year of the mortals is but a day of the gods. It is on such misunderstood teachings that some Greeks have imagined that all the initiated priests had transformed days into years!

This mistake of the ancient Greek and Latin writers became pregnant with results in Europe. At the close of the past and the beginning of this century, relying upon the purposely mutilated accounts of Hindu chronology, brought from India by certain too zealous and as unscrupulous missionaries, Bailly, Dupuis, and others built quite a fantastic theory upon the subject. Because the Hindus had made half a revolution of the moon, a measure of time; and because a month composed of only fifteen days -- of which Quint. Curtius speaks (*Menses in quinos dies descriperunt dies. Quint. Curt. LVIII., c. 9*) -- is found mentioned in Hindu literature, therefore, it is a verified fact that their year was only half a year, when it was not called a day. The Chinese, too, divided their Zodiac into twenty-four parts, hence their year into twenty-four fortnights, but such computation did not, nor does it prevent their having an astronomical year just the same as ours. And they have a period of sixty days -- the Southern Indian Roodoo, to this day in some provinces. Moreover, Diodorus Siculus (*Lib. I. § 26, p. 30*) calls "thirty days an Egyptian year," or that period during which the moon performs a complete revolution. Pliny and Plutarch both speak of it (*Hist. Nat. Lib. VII., c. 48, Vol. III., p. 185, and Life of Numa, § 16*); but does it stand to reason that the Egyptians, who knew astronomy as well as any other people did, made the lunar month consist of thirty days, when it is only twenty-eight days with fractions? This lunar period had an occult meaning surely as much as the Ayanam and the roodoo of the Hindus had. The year of two months' duration, and the period of sixty days also,

[[Vol. 2, Page]] 621 VARIOUS CYCLIC CALCULATIONS.

was a universal measure of time in antiquity, as Bailly himself shows in his *Traite de l'Astronomie Orientale*. The Chinamen, according to their own books, divided their year into two parts, from one equinox to the other (*Mem. Acad. Ins. T. XVI., c. 48, Tom. III., p. 183*); the Arabs anciently divided the year into six seasons, each composed of two months; in the Chinese astronomical work called Kioo-tche, it is said that two moons make a measure of time, and six measures a year; and to this day the aborigines of Kamschatka have their years of six months, as they had when visited by Abbe Chappe (*Voyage to Siberia, Vol. III., p. 19*). But is all this a reason to say that when the Hindu Puranas say "a solar year" they mean one solar day! It is the knowledge of the natural laws that make of seven the root nature-number, so to say, in the manifested world -- at any rate in our present terrestrial life-cycle -- and the wonderful comprehension of its workings, that unveiled to the ancients so many of the mysteries of nature. It is these laws, again, and their processes on the sidereal, terrestrial, and moral planes, which enabled the old astronomers to calculate correctly the duration of the cycles and their respective effects on the march of events; to record beforehand (prophecy, it is called) the influence which they will have on the course and development of the human races. The Sun, Moon, and planets being the never-erring time measurers, whose potency and periodicity were well known, became thus the great Ruler and rulers of our little system in all its seven domains, or "spheres of action."*

This has been so evident and remarkable, that even many of the modern men of Science, Materialists as well as Mystics, had their attention called to this law. Physicians and theologians, mathematicians and psychologists have drawn the attention of the world repeatedly to this fact of periodicity in the behaviour of "Nature." These numbers are explained in the "Commentaries" in these words.

THE CIRCLE IS NOT THE "ONE" BUT THE ALL.

IN THE HIGHER [heaven] THE IMPENETRABLE RAJAH ["ad Mutant," see Atharva-Veda X., 105], IT [the Circle] BECOMES ONE, BECAUSE [it is] THE INDIVISIBLE, AND THERE CAN BE NO TAU IN IT.

IN THE SECOND [of the three "Rajamsi" (tritiya), or the three "Worlds"] THE ONE BECOMES TWO [male and female]; AND THREE [add the Son or logos]; AND THE SACRED FOUR ["tetractis," or the "Tetragrammaton."]

IN THE THIRD [the lower world or our earth] THE NUMBER BECOMES FOUR, AND THREE, AND TWO. TAKE THE FIRST TWO, AND THOU WILT

[[Footnote(s)]] -----

* The spheres of action of the combined Forces of Evolution and Karma are (1) the Super-spiritual or noumenal; (2) the Spiritual; (3) the Psychic; (4) the Astro-ethereal; (5) the Sub-astral; (6) the Vital; and (7) the purely physical spheres.

[[Vol. 2, Page]] 622 THE SECRET DOCTRINE.

OBTAIN SEVEN, THE SACRED NUMBER OF LIFE; BLEND [the latter] WITH THE MIDDLE RAJAH, AND THOU WILT HAVE NINE, THE SACRED NUMBER OF BEING AND BECOMING."*

When the Western Orientalists have mastered the real meaning of the Rig Vedic divisions of the World -- the two-fold, three-fold, six and seven-fold, and especially the nine-fold division, the mystery of the cyclic divisions applied to heaven and earth, gods and men, will become clearer to them than it is now. For --

"THERE IS A HARMONY OF NUMBERS IN ALL NATURE; in the force of gravity, in the planetary movements, in the laws of heat, light, electricity, and chemical affinity, in the forms of animals and plants, in the perception of the mind. The direction, indeed, of modern natural and physical science, is towards a generalization which shall express the fundamental laws of all, by one simple numerical ratio. We would refer to Professor Whewell's 'Philosophy of the Inductive Sciences,' and to Mr. Hay's researches into the laws of harmonious colouring and form. From these it appears that the number seven is distinguished in the laws regulating the harmonious Perception of forms, colours, and sounds, and probably of taste also, if we could analyse our sensations of this kind with mathematical accuracy." ("Medical Review," July, 1844).

So much so, indeed, that more than one physician has stood aghast at the periodical septenary return of the cycles in the rise and fall of various complaints, and naturalists have felt themselves at an utter loss to explain this law. "The birth, growth, maturity, vital functions . . . change, diseases, decay and death, of insects, reptiles, fishes, birds, mammals, and even of man, are more or less controlled by a law of completion in weeks," or seven days.** Dr. Laycock (Lancet, 1842-3), writing on the Periodicity of Vital Phenomena, records a "most remarkable illustration and confirmation of the law in insects."***

[[Footnote(s)]] -----

* In Hinduism, as understood by the Orientalists from the Atharvaveda, the three rajamsi refer to the three strides of Vishnu; his ascending higher step, being taken in the highest world (A. V., VII., 99, 1, cf. I 155, 5). It is the divo rajah, or the "sky," as they take it. But it is something besides this in Occultism. The sentence pareshu, guhyeshu, vrateshu, cf. I, 155, 3, and IX., 75, 2; or again, verse X., 114, in Atharvaveda -- has yet to be explained.

** H. Grattan Guinness, F.R.G.S., in his "Approaching End of the Age."

*** Having given a number of illustrations from natural history, the doctor adds: "The facts I have briefly glanced at are general facts, and cannot happen day after day in so many millions of animals of every kind, FROM THE LARVA OR OVUM OF A MINUTE INSECT UP TO MAN, at definite periods, from a mere chance or coincidence . . . I think it impossible to come to any less general conclusion than this, that in animals, changes occur every three and a half, seven, fourteen, twenty-one, or twenty-eight days, or at some definite number of weeks" or septenary cycles. Again, the same Dr. Laycock states that:-- "Whatever type the fever may exhibit, there will be a paroxysm on the seventh day . . . the fourteenth will be remarkable as a day of amendment . . ." (either cure or death taking place). "If the fourth (paroxysm) be severe, and the fifth less so, the disease will end at the seventh paroxysm, and . . . change for the better . . . will be seen on the fourteenth day, [[Footnote continued on next page]]

[[Vol. 2, Page]] 623 THE SEPTENATE IN PHYSIOLOGY.

To all of which Mr. Grattan Guinness, the author of "The Approaching End of the Age," says very pertinently, as he defends Biblical Chronology, "And man's life . . . is a week, a week of decades. 'The days of our years are threescore years and ten.' Combining the testimony of all these facts, we are bound to admit that there prevails in organic nature a law of septiform periodicity, a law of completion in weeks" (p. 269). Without accepting the conclusions, and especially the premises of the learned Founder of "the East London Institute for Home and Foreign Missions," the writer accepts and welcomes his researches in the occult chronology of the Bible. Just as, while rejecting the theories and hypotheses of modern Science and its generalizations, we bow before its great achievements in the world of the physical, or in all the minor details of material nature.

There is most assuredly an occult "chronological system in Hebrew Scripture" -- the Kabala being its warrant; there is in it "a system of

[[Footnote(s)]] -----

[[Footnote continued from previous page]] namely, about three or four o'clock a.m., when the system is most languid." (See "Approaching End of the Age," by Grattan Guinness, pp. 258 to 269, wherein this is quoted.)

This is pure "sooth-saying" by cyclic calculations, and it is connected with Chaldean astrology and astrology. Thus materialistic Science -- medicine, the most materialistic of all -- applies our occult laws to diseases, studies natural history with its help, recognizes its presence as a fact in nature, and yet must needs pooh-pooh the same archaic knowledge when claimed by the Occultists. For if the mysterious Septenary Cycle is a law in nature, and it is one, as proven; if it is found controlling the evolution and involution (or death) in the realms of entomology, ichthyology and ornithology, as in the Kingdom of the Animal, mammalia and man -- why cannot it be present and acting in Kosmos, in general, in its natural (though occult) divisions of time, races, and mental development? And why, furthermore, should not the most ancient adepts have studied and thoroughly mastered these cyclic laws under all their aspects? Indeed, Dr. Stratton states as a physiological and pathological fact, that "in health the human pulse is more frequent in the morning than in the evening for six days out of seven; and that on the seventh day it is slower." (Ibid. Edinb. Med. and Surg. Journal, Jan. 1843.) Why, then, should not an Occultist show the same in cosmic and terrestrial life in the pulse of the planet and races? Dr. Laycock divides life by three great septenary periods; the first and last, each stretching over 21 years, and the central period or prime of life lasting 28 years, or four times seven. He subdivides the first into seven distinct stages, and the other two into three minor periods, and says that "The fundamental unit of the greater periods is one week of seven days, each day being twelve hours"; and that "single and compound multiples of this unit, determine the length of these periods by the same ratio, as multiples of the unit of twelve hours determine the lesser periods. This law binds all periodic vital phenomena together, and links the periods observed in the lowest annulose animals, with those of man himself, the highest of the vertebrate." If Science does this, why should the latter scorn the Occult information, namely, that (speaking Dr. Laycock's language) "one week of the manvantaric (lunar) fortnight, of fourteen days (or seven manus), that fortnight

of twelve hours in a day representing seven periods or seven races -- is now passed?" This language of science fits our doctrine admirably. We (mankind) have lived over "a week of seven days, each day being twelve hours," since three and a half races are now gone for ever, the fourth is submerged, and we are now in the Fifth Race.

[[Vol. 2, Page]] 624 THE SECRET DOCTRINE.

weeks" -- which is based on the archaic Indian system, which may still be found in the old Jyotisha.* And there are in it cycles of "the week of days," of the "week of months," of years, of centuries, and even of millenniums, decamillenniums, and more, or "the week of years of years."** But all this can be found in the archaic doctrine. And if this common source of the chronology in every Scripture, however veiled, is denied in the case of the Bible, then the six days, and a Sabbath, the seventh, can hardly disconnect Genesis from the Puranic Cosmogonies. For the first "Week of Creation" shows the septiformity of its chronology and thus connects it with Brahma's "Seven Creations." The able volume from the pen of Mr. Grattan Guinness, in which he has collected on some 760 pages every proof of that septiform calculation, is good evidence. For if the Bible chronology is, as he says, "regulated by the law of weeks," and if it is septenary, whatever the measures of the creation week and the length of its days; and if, finally, "the Bible system includes weeks on a great variety of scales," then this system is shown to be identical with all the pagan systems. Moreover, the attempt to show that 4,320 years (in lunar months) elapsed between "Creation" and the Nativity, is a clear and unmistakable connection with the 4,320,000 of the Hindu Yugas. Otherwise, why make such efforts to prove that these figures, which are pre-eminently Chaldean and Indo-Aryan, play such a part in the New Testament? We shall prove it now still more forcibly.

Let the impartial critic compare the two accounts -- the Vishnu Purana and the Bible -- and he will find that the "seven creations" of Brahma are at the foundation of the "week" of creation in Genesis i. The two allegories are different, but the systems are all built on the same foundation-stone. The Bible can be understood only by the light of the Kabala. Take the Zohar, the "Book of Concealed Mystery," however now disfigured, and compare. The seven Rishis and the fourteen Manus of the seven Manvantaras -- issue from Brahma's head; they are his "mind-born sons," and it is with them that begins the division of mankind and its races from the Heavenly man, "the Logos" (the manifested), who is Brahma Prajapati. Says (V. 70 in) the "Ha Idra Rabba Qadisha" (the Greater Holy Assembly) of the skull (head)

[[Footnote(s)]] -----

* See for the length of such cycles or Yugas in Vriddha Garga and other ancient astronomical Sections (Jyotisha). They vary from the cycle of five years -- which Colebrooke calls "the cycle of the Vedas," specified in the institutes of Parasara, "and the basis of calculation for larger cycles" (Miscell. Essays, Vol. I., pp. 106 and 108) -- up to the Mahayuga or the famous cycle of 4,320,000 years.

** The Hebrew word for "week" is Seven; and any length of time divided by Seven would have been a "week" in their day, even 49,000,000 years, as it is seven times seven millions. But their calculation is throughout septiform.

[[Vol. 2, Page]] 625 THE HAIRY SYMBOL.

of Macroprosopus, the ancient One* (Sanat, an appellation of Brahma), that in every one of his hairs is a "hidden fountain issuing from the concealed brain." "And it shineth and goeth forth through that hair unto the hair of Microprosopus, and from it (which is the manifest QUATERNARY, the Tetragrammaton) his brain is formed; and thence that brain goeth into THIRTY and TWO paths" (or the triad and the duad, or again 432). And again: (V. 80) "Thirteen curls of hair exist on the one side and on the other of the skull" -- i.e., six on one and six on the other, the thirteenth being also the fourteenth, as it is male-female, "and through them commenceth the division of the hair" (the division of things, Mankind and Races).

"We six are lights which shine forth from a seventh (light)," saith Rabbi Abba; "thou art the seventh light" (the synthesis of us all, he adds, speaking of Tetragrammaton and his seven "companions," whom he calls "the eyes of Tetragrammaton.")

TETRAGRAMMATON is Brahma Prajapati, who assumed four forms, in order to create four kinds of supernal creatures, i.e., made himself fourfold, or the manifest Quaternary (see Vishnu Purana, Book I. ch. V.); and who, after that, is re-born in the seven Rishis, his Manasaputras, "mind-born sons," who became later, 9, 21 and so on, who are all said to be born from various parts of Brahma**

[[Footnote(s)]] -----

* Brahma creates in the first Kalpa (day one) various "sacrificial animals" pasu -- or the celestial bodies and the Zodiacal signs, and plants which he uses in sacrifices at the opening of Treta Yuga. The esoteric meaning of it shows him proceeding cyclically and creating astral prototypes on the descending spiritual arc and then on the ascending physical arc. The latter is the sub-division of a two-fold creation, subdivided again into seven descending and seven ascending degrees of spirit falling, and of matter ascending -- the inverse of what takes place (as in a mirror which reflects the right on the left side) in this manvantara of ours. It is the same, esoterically, in the Elohist Genesis (chap. i.), and in the Jehovistic copy, as in Hindu cosmogony.

** It is very surprising to see theologians and Oriental scholars express indignation at the "depraved taste of the Hindu mystics" who, not content with having invented the "Mind-born" Sons of Brahma, make the Rishis, Manus, and Prajapatis of every kind spring from various parts of the body of their primal Progenitor -- Brahma (see Wilson's footnote in his Vishnu Purana, Vol. I., p. 102). Because the average public is unacquainted with the Kabala, the key to, and glossary of, the much veiled Mosaic Books, therefore, the clergy imagines the truth will never out. Let any one turn to the English, Hebrew, or Latin texts of the Kabala, now so ably translated by several scholars, and he will find that the Tetragrammaton, which is the Hebrew IHVH, is also both the "Sephiroth Tree" -- i.e., it contains all the Sephiroth except Kether, the crown -- and the united body of the "Heavenly man" (Adam Kadmon) from whose limbs emanate the Universe and everything in it. Furthermore, he will find that the idea in the Kabalistic Books (the chief of which in the Zohar are the "Books of Concealed Mystery," of the "Greater," and the "Lesser Holy Assembly") is entirely phallic and far more crudely

expressed than is the four-fold Brahma in any of the Puranas. (See "Kabala Unveiled," by Mr. S. L. Mathers, Chap. xxii., concerning the remaining members of Microprosopus). [[Footnote continued on next page]]

[[Vol. 2, Page]] 626 THE SECRET DOCTRINE.

There are two Tetragrammatons: the Macro and the Microprosopus. The first is the absolute perfect Square, or the TTRACTIS within the Circle, both abstract conceptions, and is therefore called AIN -- the Non-being, i.e., illimitable or absolute Be-ness. But when viewed as Microprosopus, or the "Heavenly man," the manifested Logos, he is the triangle in the square -- the sevenfold cube not the fourfold, or the plane Square. For it is written in the same "Greater Holy Assembly" -- (83): "And concerning this, the children of Israel wished to know in their minds, like as it is written (Exod. xvii. 7.): 'Is the Tetragrammaton in the midst of us, or the Negatively Existent One?'"* (Where did they distinguish between Microprosopus, who is called Tetragrammaton, and between Macroprosopus, who is called AIN, Ain the negatively existent?)"**

Therefore, Tetragrammaton is the THREE made four and the FOUR made three, and is represented on this Earth by his seven "companions," or "Eyes" -- the "Seven eyes of the Lord." Microprosopus is, at best, only a secondary manifested Deity. For, verse 1,152 of the "Greater Holy Assembly" (Kabala) says --

"We have learned that there were ten (companions) who entered into the Sod, ('mysterious assembly or mystery'), and that seven only came forth"*** (i.e., 10 for the unmanifested, 7 for the manifested Universe.)

1,158. "And when Rabbi Shimeon revealed the Arcana there were found none present there save those (seven companions) . . . 1,159. And Rabbi Shimeon called them the seven eyes of Tetragrammaton, like as it is written, Zach. iii., 9, 'These are the seven eyes (or principles) of Tetragrammaton,' -- i.e., the four-fold Heavenly man, or pure spirit, is resolved into Septenary man, pure matter and Spirit.

Thus the Tetrad is Microprosopus, and the latter is the male-female Chochmah-Binah, the 2d and 3d Sephiroth. The Tetragrammaton is the very essence of number Seven, in its terrestrial significance. Seven stands between four and nine -- the basis and foundation (astrally) of our physical world and man, in the kingdom of Malkuth.

For Christians and believers, this reference to Zaccharias and

[[Footnote(s)]] -----

[[Footnote continued from previous page]] For, this "Tree of Life" is also the "tree of knowledge of good and evil," whose chief mystery is that of human procreation. It is a mistake to regard the Kabala as explaining the mysteries of Kosmos or Nature; it explains and unveils only a few allegories in the Bible, and is more esoteric than is the latter.

* Simplified in the English Bible to: "Is the Lord (! !) among us, or not?" (See Exodus xvii. 7.)

** See Kabala Denudata, by S. Liddell MacGregor Mathers, F.T.S., p. 121.

*** Translators often render the word "companion" (angel, also adept) by "Rabbi," as the Rishis are called gurus. The "Zohar" is, if possible, more occult than the Books of Moses; to read the "Book of Concealed Mystery" one requires the keys furnished by the genuine "Chaldean Book of Numbers," which is not extant.

----- [[Vol. 2, Page]] 627 THE NUMBER SEVEN IN CHEMISTRY.

especially to the Epistle of Peter (I P. ii. 2-5) ought to be conclusive. In the old symbolism, man, chiefly the inner Spiritual man is called "a stone." Christ is the corner-stone, and Peter refers to all men as "lively" (living) stones. Therefore a "stone with seven eyes" on it can only mean what we say, i.e., a man whose constitution or ("principles,") is septenary.

To demonstrate more clearly the seven in Nature, it may be added that not only does the number seven govern the periodicity of the phenomena of life, but that it is also found dominating the series of chemical elements, and equally paramount in the world of sound and in that of colour as revealed to us by the spectroscope. This number is the factor, sine qua non, in the production of occult astral phenomena.

Thus, if the chemical elements are arranged in groups according to their atomic weights, they will be found to constitute a series of groups of seven; the first, second, etc., members of each group bearing a close analogy in all their properties to the corresponding members of the next group. The following table, copied from Hellenbach's *Magie der Zahlen*, exhibits this law and fully warrants the conclusion he draws in the following words: "We thus see that chemical variety, so far as we can grasp its inner nature, depends upon numerical relations, and we have further found in this variety a ruling law for which we can assign no cause; we find a law of periodicity governed by the number seven."

[[diagram]]

The eighth column in this list is, as it were, the octave of the first, containing elements almost identical in chemical and other properties with those in the first; a phenomenon which accentuates the septenary law of periodicity. For further details the reader is referred to Hellenbach's

[[Vol. 2, Page]] 628 THE SECRET DOCTRINE.

work, where it is also shown that this classification is confirmed by the spectroscopic peculiarities of the elements.

It is needless to refer in detail to the number of vibrations constituting the notes of the musical scale; they are strictly analogous to the scale of chemical elements, and also to the scale of colour as unfolded by the spectroscope, although in

the latter case we deal with only one octave, while both in music and chemistry we find a series of seven octaves represented theoretically, of which six are fairly complete and in ordinary use in both sciences. Thus, to quote Hellenbach:--

"It has been established that, from the standpoint of phenomenal law, upon which all our knowledge rests, the vibrations of sound and light increase regularly, that they divide themselves into seven columns, and that the successive numbers in each column are closely allied; i.e., that they exhibit a close relationship which not only is expressed in the figures themselves, but also is practically confirmed in chemistry as in music, in the latter of which the ear confirms the verdict of the figures. . . . The fact that this periodicity and variety is governed by the number seven is undeniable, and it far surpasses the limits of mere chance, and must be assumed to have an adequate cause, which cause must be discovered."

Verily, then, as Rabbi Abbas said: "We are six lights which shine forth from a seventh (light); thou (Tetragrammaton) art the seventh light (the origin) of us all;" (V. 1,160) and -- "For assuredly there is no stability in those six, save what they derive from the seventh. For ALL THINGS DEPEND FROM THE SEVENTH." (V. 1,161. Kabala, "The Greater Holy Assembly.")

The (ancient and modern) Western American Zuni Indians seem to have entertained similar views. Their present-day customs, their traditions and records, all point to the fact that, from time immemorial, their institutions -- political, social and religious -- were (and still are) shaped according to the septenary principle. Thus all their ancient towns and villages were built in clusters of six, around a seventh. It is always a group of seven, or of thirteen, and always the six surround the seventh. Again, their sacerdotal hierarchy is composed of six "Priests of the House" seemingly synthesized in the seventh, who is a woman, the "PRIESTESS MOTHER." Compare this with the "seven great officiating priests" spoken of in Anugita, the name given to the "seven senses," exoterically, and to the seven human principles, esoterically. Whence this identity of symbolism? Shall we still doubt the fact of Arjuna going over to Patala (the Antipodes, America) and there marrying Ulupi, the daughter of the Naga (or rather Nargal) King? But to the Zuni priests.

These receive an annual tribute, to this day, of corn of seven colours. Undistinguished from other Indians during the whole year, on a certain day, they come out (the six priests and one priestess) arrayed in their

[[Vol. 2, Page]] 629 THE SEVEN PRIESTS OF THE ZUNIS.

priestly robes, each of a colour sacred to the particular God whom the priest serves and personifies; each of them representing one of the seven regions, and each receiving corn of the colour corresponding to that region. Thus, the white represents the East, because from the East comes the first Sun-light; the yellow, corresponds to the North, from the colour of the flames produced by the aurora borealis; the red, the South, as from that quarter comes the heat; the blue stands for the West, the colour of the Pacific Ocean, which lies to the West; black is the colour of the nether underground region -- darkness; corn with grains of all colours on one ear represents the colours of the upper region -- of the firmament, with its rosy and yellow clouds, shining stars, etc. The "speckled" corn -- each grain containing all the colours - is that of the "Priestess-Mother": woman containing in herself the seeds of all races past, present and future; Eve being the mother of all living.

Apart from these was the Sun -- the Great Deity -- whose priest was the spiritual head of the nation. These facts were ascertained by Mr. F. Hamilton Cushing, who, as many are aware, became an Indian Zuni, lived with them, was initiated into their religious mysteries, and has learned more about them than any other man now living.

Seven is also the great magic number. In the occult records the weapon mentioned in the Puranas and the Mahabharata -- the Agneyastra or "fiery weapon" bestowed by Aurva upon his chela Sagara -- is said to be built of seven elements. This weapon -- supposed by some ingenious Orientalists to have been a "rocket" (!) -- is one of the many thorns in the side of our modern Sanskritists. Wilson exercises his penetration over it, on several pages in his Specimens of the Hindu Theatre, and finally fails to explain it. He can make nothing out of the Agneyastra.

"These weapons," he argues, "are of a very unintelligible character. Some of them are wielded as missiles; but, in general, they appear to be mystical powers exercised by the individual -- such as those of paralysing an enemy, or locking his senses fast in sleep, or bringing down storm, and rain, and fire, from heaven. (Vide supra, pp. 427 and 428.) . . . They assume celestial shapes, endowed with human faculties. . . . The Ramayana calls them the Sons of Krisaswa" (p. 297).

The Sastra-devatas, "gods of the divine weapons," are no more Agneyastra, the weapon, than the gunners of modern artillery are the cannon they direct. But this simple solution did not seem to strike the eminent Sanskritist. Nevertheless, as he himself says of the armiform progeny of Krisaswa, "the allegorical origin of the (Agneyastra) weapons is, undoubtedly, the more ancient."* It is the fiery javelin of Brahma.

[[Footnote(s)]] -----

* It is. But Agneyastra are fiery "missile weapons," not "edged" weapons, as there is some difference between Sastra and Astra in Sanskrit.

[[Vol. 2, Page]] 630 THE SECRET DOCTRINE.

The seven-fold Agneyastra, like the seven senses and the "seven principles," symbolized by the seven priests, are of untold antiquity. How old is the doctrine believed in by Theosophists, the following section will tell.

F.

THE SEVEN SOULS OF THE EGYPTOLOGISTS.

If one turns to those wells of information, "The Natural Genesis" and the Lectures of Mr. Gerald Massey, the proofs of the antiquity of the doctrine under analysis become positively overwhelming. That the belief of the author differs from ours can hardly invalidate the facts. He views the symbol from a purely natural standpoint, one perhaps a trifle too materialistic, because too much that of an ardent Evolutionist and follower of the modern Darwinian dogmas. Thus he shows that "the student of Bohme's books finds much in them concerning these Seven Fountain Spirits and primary powers, treated as seven properties of nature in the alchemistic and astrological phase of the mediaeval mysteries;"* and adds --

"The followers of Bohme look on such matter as divine revelation of his inspired Seership. They know nothing of the natural genesis, the history and persistence of the Wisdom** of the past (or of the broken links), and are unable to recognise the physical features of the ancient Seven Spirits beneath their modern metaphysical or alchemist mask. A second connecting link between the Theosophy of Bohme and the physical origins of Egyptian thought, is extant in the fragments of Hermes Trismegistus.*** No matter whether these teachings are called Illuminist, Buddhist, Kabalist, Gnostic, Masonic, or Christian, the elemental types can only be truly known in their beginnings.**** When the prophets or visionary showmen of cloudland come to us claiming original inspiration, and utter something new, we judge of its value by what it is in itself. But if we find they bring us the ancient matter which they cannot account for, and we can, it is natural that we should judge it by the primary significations rather than the latest pretensions.***** It is useless for us to read our

[[Footnote(s)]] -----

* The Natural Genesis, Vol. I.. pp, 318-319.

** Yet there are some, who may know something of these, even outside the author's lines, wide as they undeniably are.

*** This connecting link, like others, was pointed out by the present writer nine years before the appearance of the work from which the above is quoted, namely in Isis Unveiled, a work full of such guiding links between ancient, mediaeval, and modern thought, but, unfortunately, too loosely edited.

**** Ay; but how can the learned writer prove that these "beginnings" were precisely in Egypt, and nowhere else; and only 50,000 years ago?

***** Precisely: and this is just what the Theosophists do. They have never claimed, " (original inspiration," not even as mediums, but have always pointed, and do now point to the "primary signification" of the symbols, which they trace to other [[Footnote continued on next page]]

[[Vol. 2, Page]] 631 THE SIDEREAL SEVEN.

later thought into the earliest types of expression, and then say the ancients meant that.* Subtilized interpretations which have become doctrines and dogmas in theosophy have now to be tested by their genesis in physical phenomena, in order that we may explode their false pretensions to supernatural origin or supernatural knowledge.**

But the able author of the "Book of the Beginnings" and of "The Natural Genesis" does -- very fortunately, for us -- quite the reverse. He demonstrates most triumphantly our Esoteric (Buddhist) teachings, by showing them identical with those of Egypt. Let the reader judge from his learned lecture on "The Seven Souls of Man."*** Says the author:--

"The first form of the mystical SEVEN was seen to be figured in heaven by the Seven large stars of the great Bear, the constellation assigned by the Egyptians to the Mother of Time, and of the Seven Elemental Powers."

Just so, for the Hindus place in the great Bear their seven primitive Rishis and call this constellation the abode of the Saptarishi, Riksha and Chitra-Sikhandinas. But whether it is only an astronomical myth or a primordial mystery, having a deeper meaning than it bears on its surface, is what their adepts claim to know. We are also told that "the Egyptians divided the face of the sky by night into seven parts. The primary Heaven was seven-fold." So it was with the Aryans. One has but read the Puranas about the beginnings of Brahma, and his "Egg" to see it. Have the Aryans taken the idea from the Egyptians? -- "The earliest forces," proceeds the lecturer, "recognized in nature were reckoned as seven in number. These became seven elementals, devils (?) or later, divinities. Seven properties were assigned to nature, as

[[Footnote(s)]] -----

[[Footnote continued from previous page]] countries, older even than Egypt; significations, moreover, which emanate from a hierarchy (or hierarchies, if preferred) of living wise men, mortals, notwithstanding that Wisdom, who reject every approach to supernaturalism.

* But where is the proof that the ancients did not mean precisely that which the theosophists claim? Records exist for what they say, just as other records exist for what Mr. G. Massey says. His interpretations are very correct, but equally one-sided. Surely nature has more than one physical aspect; for astronomy, astrology, and so on, are all on the physical, not the spiritual plane.

** It is to be feared that Mr. Massey has not succeeded. We have our followers as he has his followers, and materialistic Science steps in and takes little account of both his and our speculations!

*** The fact that this learned Egyptologist does not recognise in the doctrine of the "Seven Souls," as he terms our principles, or "metaphysical concepts," but "the primitive biology or physiology of the Soul," does not invalidate our argument. The lecturer touches on only two keys, those that unlock the astronomical and the physiological mysteries of

esotericism, and leaves out the other five. Otherwise he would have promptly understood that what he calls the physiological divisions of the living Soul of man, are regarded by theosophists as also psychological and spiritual.

[[Vol. 2, Page]] 632 THE SECRET DOCTRINE.

matter, cohesion, fluxion, coagulation, accumulation, station, and division and seven elements or souls to man."

All this was taught in the esoteric doctrine, but it was interpreted and its mysteries unlocked, as already stated, with seven, not two, or at the utmost, three keys; hence the causes and their effects worked in invisible or mystic as well as psychic nature, and were made referable to metaphysics and psychology as much as to physiology. "The principle of sevening" -- as the author says -- "was introduced, and the number seven supplied a sacred type that could be used for manifold purposes"; and it was so used. For "the seven Souls of the Pharaoh are often mentioned in the Egyptian texts. . . Seven Souls or principles in man were identified by our British Druids. . . . The Rabbins also ran the number of souls up to seven; so, likewise, do the Karens of India. . . ."

And then, the author tabulates the two teachings -- the Esoteric and the Egyptian, -- and shows that the latter had the same series and in the same order.

(Esoteric) Indian. Egyptian.

1. Rupa, body or element of form. 1. Kha, body.
2. Prana, the breath of life. 2. Ba, the Soul of Breath.
3. Astral body. 3. Khaba, the shade.
4. Manas -- or Intelligence.* 4. Akhu, Intelligence or Perception.
5. Kama -- rupa, or animal soul. 5. Seb, ancestral Soul.
6. Buddhi, Spiritual Soul. 6. Putah, the first intellectual father.
7. Atma, pure spirit. . . . 7. Atmu, a divine or eternal soul.

Further on, the lecturer formulates these seven (Egyptian) souls, as (1) The Soul of Blood -- the formative; (2) The Soul of Breath -- "that breathes"; (3) The Shade or Covering Soul -- "that envelopes"; (4) The Soul of Perception -- "that perceives"; (5) The Soul of Pubescence "that procreates"; (6) The Intellectual Soul -- "that reproduces intellectually"; and (7) The Spiritual Soul -- "that is perpetuated permanently."

From the exoteric and physiological standpoint this may be very correct; it becomes less so from the esoteric point of view. To maintain this, does not at all mean that the "Esoteric Buddhists" resolve men into a number of elementary Spirits, as Mr. G. Massey, in the same lecture, accuses them of maintaining. No "Esoteric Buddhist" has ever been guilty of any such absurdity. Nor has it been ever imagined that these shadows "become spiritual beings in another world," or "seven potential spirits or elementaries of another life." What is maintained is simply that every time the immortal Ego incarnates it becomes, as a total, a com-

[[Footnote(s)]] -----

* This is a great mistake made in the Esoteric enumeration. Manas is the fifth, not the fourth; and Manas corresponds precisely with Seb, the Egyptian fifth principle, for that portion of Manas, which follows the two higher principles, is the ancestral soul, indeed, the bright, immortal thread of the higher Ego, to which clings the Spiritual aroma of all the lives or births.

[[Vol. 2, Page]] 633 THE "PRINCIPLES" IN THE EGYPTIAN METAPHYSICS.

pound unit of Matter and Spirit, which together act on seven different planes of being and consciousness. Elsewhere, Mr. G. Massey adds:-- "The seven souls (our "Principles") are often mentioned in the Egyptian texts. The moon god, Taht-Esmun, or the later sun god, expressed the seven nature-powers that were prior to himself, and were summed up in him as his seven souls (we say "principles") The seven stars in the hand of Christ in the Revelation, have the same significance," etc.

And a still greater one, as these stars represent also the seven keys of the Seven Churches or the SODALIAN MYSTERIES, cabalistically. However, we will not stop to discuss, but add that other Egyptologists have also found out that the septenary constitution of man was a cardinal doctrine with the old Egyptians. In a series of remarkable articles in the "Sphinx" (Munich) Herr Franz Lambert gives incontrovertible proof of his conclusions from the "Book of the Dead" and other Egyptian records. For details the reader must be referred to the articles themselves, but the following diagram, summing up the author's conclusions, is demonstrative evidence of the identity of Egyptian psychology with the septenary division in "Esoteric Buddhism."

On the left hand side the Kabalistic names of the corresponding human principles are placed, and on the right the hieroglyphic names with their renderings as in the diagram of F. Lambert.

Kabala. Hieroglyphics.

[[Footnote(s)]] -----

* There seems a confusion -- lasting for many centuries -- in the minds of Western Kabalists. They call Ruach (Spirit) what we call Kama-rupa; whereas, with us Ruach would be the "Spiritual Soul" Buddhi, and Nephesh the 4th principle, the Vital, Animal Soul. Eliphas Levi falls into the same error.

[[Vol. 2, Page]] 634 THE SECRET DOCTRINE.

This is a very fair representation of the number of the "principles" of Occultism, but much confused; and this is what we call the 7 principles in man, and what Mr. Massey calls "Souls," giving the same name to the Ego or the Monad which reincarnates and resurrects, so to speak, at each rebirth, as the Egyptians did, namely -- "the Renewed." But how can Ruach (Spirit) be lodged in Kama-rupa? What does Bohme, the Prince of all the mediaeval Seers, say?

"We find Seven especial properties in nature whereby this only Mother works all things" (which he calls -- fire, light, sound (the upper three) and desire, bitterness, anguish, and substantiality, thus analysing the lower in his own mystic way) . . . "whatever the six forms are spiritually, that the seventh, the body (or substantiality), is essentially." These are the seven forms of the Mother of all Beings from whence all that is in this world is generated,* and again in Aurora xxiv. p. 27 (quoted in Natural Genesis) -- "The Creator hath in the body of this world generated himself as it were creaturely in his qualifying Fountain Spirits, and all the stars are . . . God's powers, and the whole body of the world consisteth in the seven qualifying or Fountain Spirits."

This is rendering in mystical language our theosophical doctrine. . . But how can we agree with Mr. G. Massey when he states that --

"The Seven Races of men that have been sublimated and made Planetary (?) by Esoteric Buddhism,** may be met with in the Bundahish as (1) the earth-men; (2) water-men; (3) breast-eared men; (4) breast-eyed men; (5) one-legged men; (6) bat-winged men; (7) men with tails." . . . Each of these descriptions, allegorical and even perverted in their later form -- is, nevertheless, an echo of the Secret Doctrine teaching. They all refer to the pre-Human evolution of the water-men "terrible and bad" by unaided Nature through millions of years, as previously described. But we deny point blank the assertion made that "these were never real races," and point to the Archaic Stanzas for our answer. It is easy to infer and to say that our "instructors have mistaken these shadows of the Past, for things human and spiritual"; but that "they are neither, and never were either," it is less easy to prove. The assertion must ever remain on a par with the Darwinian claim that man and the ape had a common pithecoïd ancestor. What the Lecturer takes for a "mode of expression" and nothing more, in the Egyptian Ritual, we take as having quite another and an important meaning. Here is one instance. Says the Ritual, the "Book of the Dead" --

[[Footnote(s)]] -----

* Signatura rerum xiv. ps. 10, 15 et seq.

** This is indeed news! It makes us fear that the Lecturer had never read "Esoteric Buddhism" before criticising it, as there are too many such misconceptions in his notices of it.

[[Vol. 2, Page]] 635 MAN, THE PARENT OF ALL THE MAMMALS.

"I am the mouse." "I am the hawk." "I am the ape." . . . "I am the crocodile whose Soul Comes FROM MEN." "I am the Soul of the Gods." Of these last two sentences, one: "whose soul comes from men" -- is explained by the Lecturer, who says parenthetically, "that is, as a type of intelligence," and the other: "I am the Soul of the Gods," as meaning, "the Horus, or Christ, as the outcome of all."

The occult teaching answers: "It means far more." . . .

It gives first of all a corroboration of the teaching that, while the human monad has passed on globe A and others, in the First Round, through all the three kingdoms -- the mineral, the vegetable, and the animal -- in this our Fourth Round, every mammal has sprung from Man if the semi-ethereal, many-shaped creature with the human Monad in it, of the first two races, can be regarded as Man. But it must be so called; for, in the esoteric language, it is not the form of flesh, blood, and bones, now referred to as Man, which is in any way the MAN, but the inner divine MONAD with its manifold principles or aspects.

The lecture referred to, however, much as it opposes "Esoteric Buddhism" and its teachings, is an eloquent answer to those who have tried to represent the whole as a newfangled doctrine. And there are many such, in Europe, America, and even India. Yet, between the esotericism of the old Arhats, and that which has now survived in India among the few Brahmins who have seriously studied their Secret Philosophy, the difference does not appear so very great. It seems centred in, and limited to, the question of the order of the evolution of cosmic and other principles, more than anything else. At all events it is no greater divergence than the everlasting question of the filioque dogma, which since the XIIth. century has separated the Roman Catholic from the older Greek Eastern Church. Yet, whatever the differences in the forms in which the septenary dogma is presented, the substance is there, and its presence and importance in the Brahminical system may be judged by what one of India's learned metaphysicians and Vedantic scholars says of it:--

"The real esoteric seven-fold classification is one of the most important, if not the most important classification, which has received its arrangement from the mysterious constitution of this eternal type. I may also mention in this connection that the four-fold classification claims the same origin. The light of life, as it were, seems to be refracted by the treble-faced prism of Prakriti, having the three Gunams for its three faces, and divided into seven rays, which develop in course of time the seven principles of this classification. The progress of development presents some points of similarity to the gradual development of the rays of the spectrum. While the four-fold classification is amply

[[Vol. 2, Page]] 636 THE SECRET DOCTRINE.

sufficient for all practical purposes, this real seven-fold classification is of great theoretical and scientific importance. It will be necessary to adopt it to explain certain classes of phenomena noticed by occultists; and it is perhaps better fitted to be the basis of a perfect system of psychology. It is not the peculiar property of 'the trans-Himalayan esoteric doctrine.' In fact, it has a closer connection with the Brahminical Logos than with the Buddhist Logos. In order to make my meaning clear I may point out here that the Logos has seven forms. In other words, there are seven kinds of Logoi in the Cosmos. Each of these has become the central figure of one of the seven main branches of the ancient Wisdom-religion. This classification is not the seven-fold classification we have adopted. I make this assertion without the slightest fear of contradiction. The real classification has all the requisites of a scientific classification. It has seven distinct principles, which correspond with seven distinct states of Pragna or consciousness. It bridges the gulf between the objective and subjective, and indicates the mysterious circuit through which ideation passes. The seven principles are allied to seven states of matter, and to seven forms of force. These principles are harmoniously arranged between two poles, which define the limits of human consciousness."*

The above is perfectly correct, save, perhaps, one point. The "sevenfold classification" in the esoteric system has never been claimed (to the writer's knowledge) by any one belonging to it, as "the peculiar property of the Trans-Himalayan esoteric doctrine"; but only as having survived in that old school alone. It is no more the property of the trans, than it is of the cis-Himalayan esoteric doctrine, but is simply the common inheritance of all such schools, left to the sages of the Fifth Root Race by the great Siddhas** of the Fourth. Let us remember that the Atlanteans became the terrible sorcerers, now celebrated in so many of the oldest MSS. of India, only toward their fall, the submersion of their continent having been brought on by it. What is claimed is simply the fact that the wisdom imparted by the "Divine Ones" -- born through the Kriyasakti powers of the Third Race before its Fall and Separation into sexes -- to the adepts of the early Fourth Race, has remained in all its pristine purity in a certain Brotherhood. The said

[[Footnote(s)]] -----

* The Theosophist, 1887 (Madras).

** According to Svetasvatara-Upanishad (357) the Siddhas are those who are possessed from birth of superhuman powers, as also of "knowledge and indifference to the world." According to the Occult teachings, however, Siddhas are the Nirmanakayas or the "spirits" (in the sense of an individual, or conscious spirit) of great sages from spheres on a higher plane than our own, who voluntarily incarnate in mortal bodies in order to help the human race in its upward progress. Hence their innate knowledge, wisdom and powers.

[[Vol. 2, Page]] 637 AN ALLEGORY IN THE ANUGITA.

School or Fraternity being closely connected with a certain island of an inland sea, believed in by both Hindus and Buddhists, but called "mythical" by geographers and Orientalists, the less one talks of it, the wiser he will be. Nor can one accept the said "sevenfold classification" as having "a closer connection with the Brahminical Logos than with the Buddhist Logos," since both are identical, whether the one "Logos" is called Eswara or Avalokiteswara, Brahma or Padmapani. These are, however, very small differences, more fanciful than real, in fact. Brahmanism and Buddhism, both viewed from their orthodox aspects, are as inimical and as irreconcilable as water and oil. Each of these great bodies, however, has a vulnerable place in its constitution. While even in their esoteric interpretation both can agree but to disagree, once that their respective vulnerable points are confronted, every disagreement must fall, for the two will find themselves on common ground. The "heel of Achilles" of orthodox Brahmanism is the Adwaita philosophy, whose followers are called by the pious "Buddhists in disguise"; as that of orthodox Buddhism is Northern mysticism, as represented by the disciples of the philosophies of Aryasanga (the Yogacharya School) and Mahayana, who are twitted in their turn by their correlative as "Vedantins in disguise." The esoteric philosophy of both these can be but one if carefully analysed and compared, as Gautama Buddha and Sankaracharya are most closely connected, if one believes tradition and certain esoteric teachings. Thus every difference between the two will be found one of form rather than of substance.

A most mystic discourse, full of septenary symbology, may be found in the Anugita.* There the Brahmana narrates the bliss of having crossed beyond the regions of illusion, "in which fancies are the gadflies and mosquitoes, in which grief and joy are cold and heat, in which delusion is the blinding darkness, avarice, the beasts of prey and reptiles, and desire and anger are the obstructors." The sage describes the entrance into and exit from the forest (a symbol for man's life-time) and also that forest itself.**

"In that forest are seven large trees (the Senses, Mind and Understanding, or Manas and Buddhi included), seven fruits and seven guests; seven hermitages, seven (forms of) concentration, and seven (forms of) initiation. This is the description of the forest. That forest is filled with trees producing splendid flowers and fruits of five colours."

[[Footnote(s)]] -----

* "The Sacred Books of the East," vol. viii. Anugita, p. 284, et seq.

** I propose to follow here the text and the editor's commentaries, who accepts Arjuna Misra and Nilakantha's dead-letter explanations. Our Orientalists never trouble to think that if a native commentator is a non-initiate, he could not explain correctly, and if an Initiate, would not.

[[Vol. 2, Page]] 638 THE SECRET DOCTRINE.

"The senses," says the commentator, "are called trees, as being producers of the fruits . . . pleasures and pains; the guests are the powers of each sense personified -- they receive the fruits above described; the hermitages are the trees, in which the guests take shelter. The seven forms of concentration are the exclusion from the self of the seven functions of the seven senses, etc., already referred to; the seven forms of initiation refer to the initiation into the higher life . . . by repudiating as not one's own the actions of each member out of the group of seven." (See Khandagya, p. 219, and Com.)

The explanation is harmless, if unsatisfactory.

Says the Brahmana continuing his description:--

"That forest is filled with trees producing flowers and fruits of four colours. That forest is filled with trees producing flowers and fruits of three colours, and mixed. That forest is filled with trees producing flowers and fruits of two colours, and of beautiful colours. That forest is filled with trees producing flowers and fruits of one colour and fragrant. That forest is filled (instead of seven) with two large trees producing numerous flowers and fruits of undistinguished colours (mind and understanding -- the two higher senses, or theosophically, 'Manas-Buddhi'). Here is one Fire (Self) here connected with the Brahman* and having a good mind (or true knowledge, according to Arjuna Misra). And there is fuel here, namely, the five senses (or human passions). The Seven (forms of) emancipation from them are the Seven (forms of) initiation. The qualities are the fruits. . . . There, the great Sages receive hospitality. And when they have been worshipped and have disappeared, another forest shines forth, in which intelligence is the tree, and emancipation the fruit, and which possesses shade (in the form of) tranquillity, which depends on Knowledge, which has contentment for its water, and the KSHETRAGNA (the "Supreme SELF," says Krishna, in the Bhagavad Gita, p. 102 et seq.) within for the Sun."

Now, all the above is very plain, and no theosophist, even among the least learned, could fail to understand the allegory. And yet, we see great Orientalists making a perfect mess of it in their explanations. The "great sages" who "receive hospitality" are explained as meaning the senses, "which, having worked as unconnected with the self are finally absorbed into it." But one fails to understand, if the senses are "unconnected" with the "Higher Self," in what manner can they be

[[Footnote(s)]] -----

* The English editor explains here, saying, "I presume devoted to the Brahman." This would be a very poor devotion, indeed, in the accomplishment of the gradually emancipating process of Yoga. We venture to say that the "Fire" or Self is the higher real SELF "connected with," that is to say one with Brahma, the One Deity. The "Self" separates itself no longer from the universal Spirit.

[[Vol. 2, Page]] 639 THE ALLEGORY EXPLAINED.

"absorbed into it." One would think, on the contrary, that just because the personal senses gravitate and strive to be connected with the impersonal Self, that the latter, which is FIRE, burns the lower five and purifies thereby the higher two, "mind and understanding" or the higher aspects of Manas* and Buddhi. This is quite apparent from the text. The "great sages" disappear after having "been worshipped." Worshipped by whom if they (the presumed senses) are "unconnected with the self"? By MIND, of course; by Manas (in this case merged in the sixth sense) which is not, and cannot be, the Brahman, the SELF, or Kshetragna -- the soul's spiritual sun. Into the latter, in time, Manas itself must be absorbed. It has worshipped "great sages" and given hospitality to terrestrial wisdom: but once that "another forest shone forth" upon it, it is Intelligence (Buddhi, the 7th sense, but 6th principle) which is transformed into the tree -- that tree whose fruit is emancipation -- which finally destroys the very roots of the Aswattha tree, the symbol of life and of its illusive joys and pleasures. And therefore, those who attain to that state of emancipation have, in the words of the above-cited sage, "no fear afterwards." In this state "the end cannot be perceived because it extends on all sides."

"There always dwell seven females there," he goes on to say, carrying out the imagery. These females, who, according to Arjuna Misra, are the Mahat, Ahankara and five Tanmatras, have always their faces turned downwards, as they are obstacles in the way of spiritual ascension.

". . . . In that same (Brahman, the 'Self') the Seven perfect Sages, together with their chiefs, abide and again emerge from the same. Glory, brilliance and greatness, enlightenment, victory, perfection and power -- these seven rays follow after this same Sun (Kshetragna, the Higher Self). . . . Those whose wishes are reduced (unselfish). . . . whose sins (passions) are burnt up by restraint, merging the Self in the Self,** devote themselves to Brahman. Those people who understand the forest of Knowledge (Brahman, or SELF) praise tranquillity. And aspiring to that forest, they are (re-) born so as not to lose courage.

[[Footnote(s)]] -----

* As Mahat (universal intelligence) is first born, or manifests, as Vishnu, and then, when it falls into matter and develops self-consciousness, it becomes Egoism, Selfishness, so Manas is of a dual nature. It is respectively under the sun and moon, for as Sankaracharya says "The moon is the mind, and the sun the understanding." The sun and moon are the deities of our planetary Macrocosmos, and therefore Sankara adds that "the mind and the understanding are the respective deities of the (human) organs" (vide Brihadaranyaka, pp. 521, et seq.) This is perhaps why Arjuna Misra says that the moon and the Fire (the self, the sun) constitute the universe.

** "The body in the Soul," as Arjuna Misra is credited with saying, or rather the "Soul in the Spirit," and on a still higher plane of development: "the SELF or Atman in the Universal Self."

[[Vol. 2, Page]] 640 THE SECRET DOCTRINE.

Such indeed, is this holy forest and understanding it, they (the Sages) act accordingly, being directed by the KSHETRAGNA. . . . "

No translator among the Western Orientalists has yet perceived in the foregoing allegory anything higher than mysteries connected with sacrificial ritualism, penance, or ascetic ceremonies, and Hatha Yoga. But he who understands symbolical imagery, and hears the voice of SELF WITHIN SELF, will see in this something far higher than mere ritualism, however often he may err in minor details of the philosophy.

And here, we must be allowed a last remark. No true theosophist, from the most ignorant up to the most learned, ought to claim infallibility for anything he may say or write upon occult matters. The chief point is to admit that, in many a way, in the classification of either cosmic or human principles, in addition to mistakes in the order of evolution, and especially on metaphysical questions, those of us who pretend to teach others more ignorant than ourselves -- are all liable to err. Thus mistakes have been made in "Isis Unveiled," in "Esoteric Buddhism," in "Man," in "Magic: White and Black," etc., etc.; and more than one mistake is likely to be found in the present work. This cannot be helped. For a large or even a small work on such abstruse subjects to be entirely exempt from error and blunder, it would have to be written from its first to its last page by a great adept, if not by an Avatar. Then only should we say, "This is verily a work without sin or blemish in it!" But, so long as the artist is imperfect, how can his work be perfect? "Endless is the search for truth!" Let us love it and aspire to it for its own sake, and not for the glory or benefit a minute portion of its revelation may confer on us. For who of us can presume to have the whole truth at his fingers' ends, even upon one minor teaching of Occultism?

Our chief point in the present subject, however, was to show that the Septenary doctrine, or division of the constitution of man, was a very ancient one, and was not invented by us. This has been successfully done, for we are supported in this, consciously and unconsciously, by a number of ancient, mediæval, and modern writers. What the former said, was well said; what the latter repeated, was generally distorted. An instance: Read the "Pythagorean Fragments," and compare the Septenary man as given by the Rev. G. Oliver, the learned mason, in his "Pythagorean Triangle" (ch. on "Science of Numbers," p. 179).

He speaks as follows:--

"The Theosophic Philosophy counted SEVEN properties (or principles), in Man, viz.:--

- (1.) The divine golden Man;
- (2.) The inward holy body from fire and light, like pure silver;

[[Vol. 2, Page]] 641 HYPNOTISM IS -- SATANISM.

- (3.) The elemental man;
- (4.) The mercurial paradisiacal man;
- (5.) The martial Soul-like man;
- (6.) The passionate man of desires;
- (7.) The Solar man; a witness to and inspector of the wonders of the Universe. They had also seven fountain Spirits, or Powers of Nature."

Compare this jumbled account and distribution of Western theosophic philosophy with the latest theosophic explanations by the Eastern School of Theosophy, and then decide which is the more correct. Verily:--

"Wisdom hath builded her house,
She hath hewn out her seven pillars." -- (Prov. ix, 1.)

As to the charge that our School has not adopted the Seven-fold classification of the Brahmins, but has confused it, it is quite unjust. To begin with, the "School" is one thing, its exponents (to Europeans) quite another. The latter have first to learn the A B C of practical Eastern Occultism, before they can be made to understand correctly the tremendously abstruse classification based on the seven distinct states of Pragna (consciousness); and, above all, to realize thoroughly what Pragna is, in the Eastern metaphysics. To give a Western student that classification is to try to make him suppose that he can account for the origin of consciousness, by accounting for the process by which a certain knowledge, through only one of the states of that consciousness, came to him; in other words, it is to make him account for something he knows on this plane, by something he knows nothing about on the other planes; i.e., to lead him from the spiritual and the psychological, direct to the ontological. This is why the primary, old, classification was adopted by the Theosophists, of which classifications there are many.

To busy oneself, after such a tremendous number of independent witnesses and proofs have been brought before the public, with an additional enumeration from theological sources, would be quite useless. The seven capital sins and seven virtues of the Christian scheme are far less philosophical than even the Seven Liberal and the Seven Accursed Sciences -- or the Seven Arts of enchantment of the Gnostics. For one of the latter is now before the public, pregnant with danger in the present as for the future. The modern name for it is HYPNOTISM. In the ignorance of the seven principles, and used by scientific and ignorant materialists, it will soon become SATANISM in the full acceptance of the term.

ADDENDA TO BOOK II.

§ I.

ARCHAIC, OR MODERN ANTHROPOLOGY?

WHENEVER the question of the origin of man is offered seriously to an unbiased, honest, and earnest man of science, the answer comes invariably:-- "WE DO NOT KNOW." De Quatrefages, in his agnostic attitude, is one of such anthropologists.

This does not imply that the rest of the men of science are neither fair-minded nor honest, as in such case our remark would be questionably discreet. But, it is estimated that 75 per cent. of European Scientists are Evolutionists. Are these representatives of modern thought all guilty of flagrant misrepresentation of the facts? No one says this -- but there are a few very exceptional cases. However, the Scientists in their anti-clerical enthusiasm and despair of any alternative theory to Darwinism, except that of "special creation," are unconsciously insincere in "forcing" a hypothesis the elasticity of which is inadequate, and which resents the severe strain to which it is now subjected. Insincerity on the same subject is, however, patent in ecclesiastical circles. Bishop Temple has come forward as a thorough-going supporter of Darwinism in his "Religion and Science." This clerical writer goes so far as to regard Matter -- after receiving its "primal impress" -- as the unaided evolver of all cosmic phenomena. This view only differs from that of Haeckel, in postulating a hypothetical deity at "the back of beyond," a deity which stands entirely aloof from the interplay of forces. Such a metaphysical entity is no more the Theological God than that of Kant. Bishop Temple's truce with Materialistic Science is, in our opinion, impolitic -- apart from the fact that it involves a total rejection of the Biblical cosmogony. In the presence of this display of flunkeyism before the materialism of our "learned" age, we Occultists can but smile. But how about loyalty to the Masters such theological truants profess to serve, Christ, and Christendom at large?

However, we have no desire, for the present, to throw down the gauntlet to the clergy, our business being now with materialistic Science alone. The latter answers to our question, in the person of its best representatives "We do not know;" -- yet the majority of these act as though Omniscience was their heirloom, and they knew all things.

For, indeed, this negative reply has not prevented the majority of Scientists from speculating on that question, each seeking to have his

[[Vol. 2, Page]] 646 THE SECRET DOCTRINE.

own special theory accepted to the exclusion of all others. Thus, from Maillet in 1748 down to Haeckel in 1870, theories on the origin of the human Race have differed as much as the personalities of their inventors themselves. Buffon, Bory de St. Vincent, Lamarck, E. G. St. Hilaire, Gaudry, Naudin, Wallace, Darwin, Owen, Haeckel, Filippi, Vogt, Huxley, Agassiz, etc., etc., each evolved a more or less scientific hypothesis of genesis. De Quatrefages arranges them in two principal groups -- one holding to a rapid, and the other to a very gradual transmutation; the former, favouring a new type (man) produced by a being entirely different; the latter teaching the evolution of man by progressive differentiation.

Strangely enough, it is from the most scientific of these authorities that the most unscientific of all the theories upon the subject of the origin of man has hitherto emanated. This is so evident, that the hour is rapidly approaching when the current teaching about the descent of man from an Ape-like mammal will be regarded with less respect than the formation of Adam out of clay, and of Eve out of Adam's rib. For --

"It is evident, especially after the most fundamental principles of Darwinism, that an organized being cannot be a descendant of another whose development is in an inverse order to his own. . . . Consequently, in accordance with these principles man cannot be considered as the descendant of any simian type whatever."*

Lucae's argument versus the Ape-theory, based on the different flexures of the bones constituting the axis of the skull in the cases of Man and the Anthropoids, is fairly discussed by Schmidt ("Doctrine of Descent and Darwinism," p. 290). He admits that "the ape as he grows becomes more bestial; man . . . more human," and seems, indeed, to hesitate a moment before he passes on: e.g., "This flexure of the cranial axis may, therefore, still be emphasized as a human character, in contradistinction to the apes; the peculiar characteristic of an order can scarcely be elicited from it; and especially as to the doctrine of descent, this circumstance seems in no way decisive." The writer evidently is not a little disquieted at the argument. He assures us that it upsets any possibility of the present apes having been the progenitors of mankind. But does it not also negative the bare possibility of the man and anthropoid having had a common -- though, so far, an absolutely theoretical -- ancestor.

[[Footnote(s)]] -----

* "The Human Species," p. 111, by de Quatrefages. The respective developments of the human and Simian brains are referred to. "In the ape the temporo-spheroidal convolutions, which form the middle lobe, make their appearance and are completed before the anterior convolutions which form the frontal lobe. In man, the frontal convolutions are, on the contrary, the first to appear, and those of the middle lobe are formed later." (Ibid.)

[[Vol. 2, Page]] 647 THE FALLACIES OF MODERN SCIENTISTS.

Even "Natural Selection" itself is with every day more threatened. The deserters from the Darwinian camp are many, and those who were at one time its most ardent disciples are, owing to new discoveries, slowly but steadily preparing to turn over a new leaf. In the "Journal of the Royal Microscopical Society" for October, 1886, one can read as follows:--

"PHYSIOLOGICAL SELECTION. -- Mr. G. J. Romanes finds certain difficulties in regarding natural selection as a theory for the origin of adaptive structures. He proposes to replace it by what he calls physiological selection, or the segregation of the fit. His view is based on the extreme sensitiveness of the reproductive system to small changes in the conditions of life, and he thinks that variations in the direction of greater or less sterility must frequently occur in wild species. If the variation be such that the reproductive system, while showing some degree of sterility with the parent form, continues to be fertile within the limits of the varietal form, the variation would neither be swamped by intercrossing nor die out on account of sterility. When a variation of this kind occurs, the physiological barrier must divide the species into two parts. . . . The author, in fine, regards mutual sterility, not as one of the effects of specific differentiation, but as the cause of it."*

An attempt is made to show the above to be a complement of, and sequence to, the Darwinian theory. This is a clumsy attempt at best. The public will soon be made to believe that Mr. C. Dixon's "Evolution without Natural Selection" is also Darwinism -- expanded, as the author certainly claims it to be!

But it is like splitting the body of a man into three pieces or various portions of man, and then maintaining that each portion is the identical man as he was before; only -- expanded. Yet the author states on p. 79:-- "Let it be clearly understood that not one single syllable in the foregoing pages has been written antagonistic to Darwin's theory of Natural Selection. All I have done is to explain certain phenomena . . . the more one studies Darwin's works, the more one is convinced of the truth of his hypothesis." (!!)

And before this, on p. 48, he alludes to:-- "the overwhelming array of facts which Darwin gave in support of his hypothesis, and which triumphantly carried the theory of Natural Selection over all obstacles and objections."

This does not prevent the learned author, however, from upsetting this theory as "triumphantly," and from even openly calling his work

[[Footnote(s)]] -----

* To this an editorial remark adds that an "F.J.B.," in the Athenaeum -- (No. 3069, Aug. 21, 1886, pp. 242-3) points out that naturalists have long recognised that there are "morphological" and "physiological" species. The former have their origin in men's minds, the latter in a series of changes sufficient to affect the internal as well as the external organs of a group of allied individuals. The "physiological selection" of morphological species is a confusion of ideas; that of physiological species "a redundancy of terms."

[[Vol. 2, Page]] 648 THE SECRET DOCTRINE.

"Evolution without a Natural Selection," or, in so many words, with Darwin's fundamental idea knocked to atoms in it.

As to Natural Selection itself, the utmost misconception prevails among many present-day thinkers who tacitly accept the conclusions of Darwinism. It is, for instance, a mere device of rhetoric to credit "Natural Selection" with the power of originating species. "Natural Selection" is no Entity; but a convenient phrase for describing the mode in which the survival of the fit and the elimination of the unfit among organisms is brought about in the struggle for existence. Every group of organisms tends to multiply beyond the means of subsistence, the constant battle for life -- the "struggle to obtain enough to eat and to escape being eaten" added to the environmental conditions -- necessitating a perpetual weeding out of the unfit. The elite of any stock thus sorted out, propagate the species and transmit their organic characteristics to their descendants. All useful variations are thus perpetuated, and a progressive improvement is effected. But Natural Selection, in the writer's humble opinion, "Selection, as a Power," is in reality a pure myth; especially when resorted to as an explanation of the origin of species. It is merely a representative term expressive of the manner in which "useful variations" are stereotyped when produced. Of itself, "it" can produce nothing, and only operates on the rough material presented to "it." The real question at issue is: what CAUSE -- combined with other secondary causes -- produces the "variations" in the organisms themselves. Many of these secondary causes are purely physical, climatic, dietary, etc., etc. Very well. But beyond the secondary aspects of organic evolution, a deeper principle has to be sought for. The materialist's "spontaneous variations," and "accidental divergencies" are self-contradictory terms in a universe of "Matter, Force and NECESSITY." Mere variability of type, apart from the supervisory presence of a quasi-intelligent impulse, is powerless to account for the stupendous complexities and marvels of the human body for instance. The insufficiency of the Darwinists' mechanical theory has been exposed at length by Dr. Von Hartmann among other purely negative thinkers. It is an abuse of the reader's intelligence to write, as does Haeckel, of blind indifferent cells, "arranging themselves into organs." The esoteric solution of the origin of animal species is given elsewhere.

Those purely secondary causes of differentiation, grouped under the head of sexual selection, natural selection, climate, isolation, etc., etc., mislead the Western Evolutionist and offer no real explanation whatever of the "whence" of the "ancestral types" which served as the starting point for physical development. The truth is that the

[[Vol. 2, Page]] 649 THE OCCULT AND THE MODERN DOCTRINES.

differentiating "causes" known to modern science only come into operation after the physicalization of the primeval animal root-types out of the astral. Darwinism only meets Evolution at its midway point -- that is to say when astral evolution has given place to the play of the ordinary physical forces with which our present senses acquaint us. But even here the Darwinian Theory, even with the "expansions" recently attempted, is inadequate to meet the facts of the case. The underlying physiological variation in species -- one to which all other laws are subordinate and secondary -- is a sub-conscious intelligence pervading matter, ultimately traceable to a REFLECTION of the Divine and Dhyana-Chohanian wisdom.* A not altogether dissimilar conclusion has been arrived at by so well known a thinker as Ed. von Hartmann, who, despairing of the efficacy of unaided Natural Selection, regards evolution as intelligently guided by the UNCONSCIOUS (the Cosmic Logos of Occultism). But the latter acts only mediately through FOHAT, or Dhyana-Chohanian energy, and not quite in the direct manner which the great pessimist describes.

It is this divergence among men of Science, their mutual, and often their self-contradictions, that gave the writer of the present volumes the courage to bring to light other and older teachings -- if only as hypotheses for future scientific appreciation. Though not in any way very learned in modern sciences, so evident, even to the humble recorder of this archaic clearing, are the said scientific fallacies and gaps, that she determined to touch upon all these, in order to place the two teachings on parallel lines. For Occultism, it is a question of self-defence, and nothing more.

So far, the "Secret Doctrine" has concerned itself with metaphysics, pure and simple. It has now landed on Earth, and finds itself within the domain of physical science and practical anthropology, or those branches of study which materialistic Naturalists claim as their rightful domain, coolly asserting, furthermore, that the higher and more perfect the working of the Soul, the more amenable it is to the analysis and explanations of the zoologist and the physiologist alone.

(Haeckel on "Cell-Souls and Soul-Cells.") This stupendous pretension comes from one, who, to prove his pithecod descent, has not hesitated to include among the ancestors of man the Lemuridae; which have been promoted by him to the rank of Prosimiae, indeciduate mammals, to which he very incorrectly attributes a decidua

[[Footnote(s)]] -----

* The "principle of perfectibility" of Nageli; von de Baer's "striving towards the purpose"; Braun's "Divine breath as the inward impulse in the evolutionary history of Nature"; Professor Owen's "tendency to perfectibility, etc.," are all veiled manifestations of the universal guiding FOHAT, rich with the Divine and Dhyana-Chohanian thought.

[[Vol. 2, Page]] 650 THE SECRET DOCTRINE.

and a discoidal placenta.* For this Haeckel was taken severely to task by de Quatrefages, and criticised by his own brother materialists and agnostics, as great, if not greater, authorities than himself, namely, by Virchow and du Bois-Reymond.**

Such opposition notwithstanding, Haeckel's wild theories are, to this day, called scientific and logical by some. The mysterious nature of Consciousness, of Soul, Spirit in Man being now explained as a mere advance on the functions of the protoplasmic molecules of the lively Protista, and the gradual evolution and growth of human mind and "social instincts" toward civilization having to be traced back to their origin in the civilization of ants, bees, and other creatures, the chances left for an impartial hearing of the doctrines of archaic Wisdom, are few indeed. The educated profane is told that "the social instincts of the lower animals have, of late, been regarded as being clearly the origin of morals, even of those of man" (!) and that our divine consciousness, our soul, intellect, and aspirations have "worked their way up from the lower stages of the simple cell-soul" of the gelatinous Bathybius -- (See Haeckel's "Present Position of Evolution" Notes), -- and he seems to believe it. For such men, the metaphysics of Occultism must produce the effect that our grandest orchestral and vocal oratorios produce on the Chinaman: a sound that jars upon their nerves.

Yet, are our esoteric teachings about "angels," the first three pre-animal human Races, and the downfall of the Fourth, on a lower level of fiction and self-delusion than the Haeckelian "plastidular," or the inorganic "molecular Souls of the Protista"? Between the evolution of the spiritual nature of man from the above Amoebian Souls, and the alleged development of his physical frame from the protoplasmic dweller in the Ocean slime, there is an abyss which will not be easily crossed by any man in the full possession of his intellectual faculties. Physical evolution, as modern Science teaches it, is a subject for open controversy; spiritual and moral development on the same lines is the insane dream of a crass materialism.

Furthermore, past as well as present daily experience teaches that no truth has ever been accepted by the learned bodies unless it dovetailed

[[Footnote(s)]] -----

* Vide infra, M. de Quatrefages' expose of Haeckel, in § ii., "The Ancestors Mankind is offered by Science."

** Strictly speaking du Bois-Reymond is an agnostic, and not a materialist. He has protested most vehemently against the materialistic doctrine, which affirms mental phenomena to be merely the product of molecular motion. The most accurate physiological knowledge of the structure of the brain leaves us "nothing but matter in motion," he asserts; "we must go further, and admit the utterly incomprehensible nature of the psychical principle which it is impossible to regard as a mere outcome of material causes."

[[Vol. 2, Page]] 651 AN EXCHANGE OF MUTUAL COMPLIMENTS.

with the habitual preconceived ideas of their professors. "The crown of the innovator is a crown of thorns":-- said G. St. Hilaire. It is only that which fits in with popular hobbies and accepted notions that as a general rule gains ground. Hence the triumph of the Haeckelian ideas, notwithstanding their being proclaimed by Virchow, du Bois-Reymond, and others as the "testimonium paupertatis of natural Science."

Diametrically opposed as may be the materialism of the German Evolutionists to the spiritual conceptions of Esoteric philosophy, radically inconsistent as is their accepted anthropological system with the real facts of nature, -- the pseudo-idealistic bias now colouring English thought is almost more pernicious. The pure materialistic doctrine admits of a direct refutation and appeal to the logic of facts. The idealism of the present day, not only contrives to absorb, on the one hand, the basic negations of Atheism, but lands its votaries in a tangle of unreality, which culminates in a practical Nihilism. Argument with such writers is almost out of the question. Idealists, therefore, will be still more antagonistic to the Occult teachings now given than even the Materialists. But as no worse fate can befall the exponents of Esoteric Anthropo-Genesis than being openly called by their foes by their old and time-honoured names of "lunatics" and "ignoramuses," the present archaic theories may be safely added to the many modern speculations, and bide their time for their full or even partial recognition. Only, as the existence itself of these "archaic theories" will probably be denied, we have to give our best proofs and stand by them to the bitter end.

In our race and generation the one "temple in the Universe" is in rare cases -- within us; but our body and mind have been too defiled by both Sin and Science to be outwardly now anything better than a fane of iniquity and error. And here our mutual position -- that of Occultism and Modern Science -- ought to be once for all defined.

We, Theosophists, would willingly bow before such men of learning as the late Prof. Balfour Stewart, Messrs. Crookes, Quatrefages, Wallace, Agassiz, Butlerof, and several others, though we may not agree, from the stand-point of esoteric philosophy, with all they say. But nothing could make us consent to even a show of respect for the opinions of other men of science, such as Haeckel, Carl Vogt, or Ludwig Buchner, in Germany; or even of Mr. Huxley and his co-thinkers in materialism in England -- the colossal erudition of the first named, notwithstanding. Such men are simply the intellectual

and moral murderers of future generations; especially Haeckel, whose crass materialism often rises to the height of idiotic naivetes in his reasonings. One has but to read his "Pedigree of Man, and Other Essays" (Aveling's transl.) to feel a desire, in the words of Job, that his

[[Vol. 2, Page]] 652 THE SECRET DOCTRINE.

remembrance should perish from the earth, and that he "shall have no name in the streets." Hear him deriding the idea of the origin of the human race "as a supernatural (?) phenomenon," as one "that could not result from simple mechanical causes, from physical and chemical forces, but requires the direct intervention of a creative personality. . . "

. . . "Now the central point of Darwin's teaching," . . . goes on the creator of the mythical Sozura, "lies in this, that it demonstrates the simplest mechanical causes, purely physico-chemical phenomena of nature, as wholly sufficient to explain the highest and most difficult problems. Darwin puts in the place of a conscious creative force, building and arranging the organic bodies of animals and plants on a designed plan, a series of natural forces working blindly (or we say) without aim, without design. In place of an arbitrary act of operation, we have a necessary law of Evolution" (So had Manu and Kapila, and, at the same time, guiding, conscious and intelligent Powers). . . "Darwin had very wisely . . . put on one side the question as to the first appearance of life. But very soon that consequence, so full of meaning, so wide reaching, was openly discussed by able and brave scientific men, such as Huxley, Carl Vogt, Ludwig Buchner. A mechanical origin of the earliest living form, was held as the necessary sequence to Darwin's teaching . . . and we are at present concerned with a single consequence of the theory, the natural origin of the human race through ALMIGHTY EVOLUTION" (pp. 34, 37).

To which, unabashed by this scientific farrago, Occultism replies: in the course of Evolution, when the physical triumphed over, and nearly crushed under its weight, spiritual and mental evolutions, the great gift of Kriyasakti* remained the heirloom of only a few elect men in every age Spirit strove vainly to manifest itself in its fulness in purely organic forms (as has been explained in Part I. of this Volume), and the faculty, which had been a natural attribute in the early humanity of the Third Race, became one of the class regarded as simply phenomenal by the Spiritualists and Occultists, and as scientifically impossible by the materialists.

In our modern day the mere assertion that there exists a power which can create human forms -- ready-made sheaths for the "conscious monads" or Nirmanakayas of past Manvantaras to incarnate within -- is, of course, absurd, ridiculous! That which is regarded as quite natural, on the other hand, is the production of a Frankenstein's monster, plus moral consciousness, religious aspirations, genius, and a feeling of one's own immortal nature within one's self -- by "physico-chemical forces, guided by blind Almighty Evolution" ("Pedigree of Man").

[[Footnote(s)]] -----

* For explanation of the term Kriyasakti, see Com. 2 in Stanza 26.

[[Vol. 2, Page]] 653 SCIENCE IS SILENT ON EVERY PROBLEM.

As to the origin of that man, not ex-nihilo, cemented by a little red clay, but from a living divine Entity consolidating the astral body with surrounding materials -- this conception is too absurd even to be mentioned in the opinion of the materialists. Nevertheless, Occultists and Theosophists are ready to have their claims and theories -- however unscientific and superstitious at first glance -- compared as to their intrinsic value and probability, with those of the modern evolutionists. Hence the esoteric teaching is absolutely opposed to the Darwinian evolution, as applied to man, and partially so with regard to other species.

It would be interesting to obtain a glimpse of the mental representation of Evolution in the Scientific brain of a materialist. What is EVOLUTION? If asked to define the full and complete meaning of the term, neither Huxley nor Haeckel will be able to do it any better than Webster does: "the act of unfolding; the process of growth, development; as the evolution of a flower from a bud, or an animal from the egg." Yet the bud must be traced through its parent-plant to the seed, and the egg to the animal or bird that laid it; or at any rate to the speck of protoplasm from which it expanded and grew. And both the seed and the speck must have the latent potentialities in them for the reproduction and gradual development, the unfolding of the thousand and one forms or phases of evolution, through which they must pass before the flower or the animal are fully developed? Hence, the future plan, if not a DESIGN, must be there. Moreover, that seed has to be traced, and its nature ascertained. Have the Darwinists been successful in this? Or will the Moneron be cast in our teeth? But this atom of the Watery Abysses is not homogeneous matter; and there must be something or somebody that had moulded and cast it into being.

Here Science is once more silent. But since there is no Self-consciousness as yet in either speck, seed, or germ, according to both Materialists and Psychologists of the modern school -- Occultists agreeing in this for once with their natural enemies -- what is it that guides the force or forces so unerringly in this process of evolution? Blind force? As well call blind the brain which evolved in Haeckel his "Pedigree of Man" and other lucubrations. We can easily conceive that the said brain lacks an important centre or two. For, whoever knows anything of the anatomy of the human, or even of any animal, body, and is still an atheist and a materialist, must be "hopelessly insane," according to Lord Herbert, who rightly sees in the frame of man's body and the coherence of its parts, something so strange and paradoxical that he holds it "to be the greatest miracle of nature." Blind forces, "and no design" in anything under the Sun; when no sane man of Science would hesitate to say that, even from the little he knows and has hitherto discovered of the forces at work in Kosmos, he sees very plainly

[[Vol. 2, Page]] 654 THE SECRET DOCTRINE.

that every part, every speck and atom are in harmony with their fellow atoms, and these with the whole, each having its distinct mission throughout the life-cycle. But, fortunately, the greatest, the most eminent thinkers and Scientists of the

day are now beginning to rise against this "Pedigree," and even Darwin's natural selection theory, though its author had never, probably, contemplated such widely stretched conclusions. The remarkable work of the Russian Scientist N. T. Danilevsky -- "Darwinism, a Critical Investigation of the Theory" -- upsets it completely and without appeal, and so does de Quatrefages in his last work. Our readers are recommended to examine the learned paper by Dr. Bourges -- read by its author, a member of the Paris Anthropological Society at a recent official meeting of the latter -- called "Evolutionary Psychology; the Evolution of Spirit, etc." in which he reconciles entirely the two teachings -- namely, those of the physical and spiritual evolutions. He explains the origin of the variety of organic forms, made to fit their environments with such evident intelligent design, by the existence and the mutual help and interaction of two principles in (manifest) nature, the inner Conscious Principle adapting itself to physical nature and the innate potentialities in the latter. Thus the French Scientist has to return to our old friend -- Archaeus, or the life-Principle -- without naming it, as Dr. Richardson has done in England in his "Nerve-Force," etc. The same idea was recently developed in Germany by Baron Hellenbach, in his remarkable work, "Individuality in the light of Biology and modern Philosophy."

We find the same conclusions arrived at in still another excellent volume of another Russian deep thinker, N. N. Strachof - who says in his "Fundamental Conceptions of Psychology and Physiology":-- "The most clear, as the most familiar, type of development may be found in our own mental or physical evolution, which has served others as a model to follow If organisms are entities . . . then it is only just to conclude and assert that the organic life strives to beget psychic life; but it would be still more correct and in accordance with the spirit of these two categories of evolution to say, that the true cause of organic life is the tendency of spirit to manifest in substantial forms, to clothe itself in substantial reality. It is the highest form which contains the complete explanation of the lowest, never the reverse." This is admitting, as Bourges does in the Memoire above quoted, the identity of this mysterious, integrally acting and organizing Principle with the Self-Conscious and Inner Subject, which we call the EGO and the world at large -- the Soul. Thus, gradually, all the best Scientists and Thinkers are approaching the Occultists in their general conclusions.

But such metaphysically inclined men of Science are out of court and will hardly be listened to. Schiller, in his magnificent poem on

[[Vol. 2, Page]] 655 THE ONE UNPARDONABLE SIN.

the Veil of Isis, makes the mortal youth who dared to lift the impenetrable covering fall down dead after beholding naked Truth in the face of the stern goddess. Have some of our Darwinians, so tenderly united in natural selection and affinity, also gazed at the Saitic Mother bereft of her veils? One might almost suspect it after reading their theories. Their great intellects must have collapsed while gauging too closely the uncovered face of Nature, leaving only the grey matter and ganglia in their brain, to respond to blind physico-chemical forces. At any rate Shakespeare's lines apply admirably to our modern Evolutionist who symbolizes that "proud man," who --

"Dress'd in a little brief authority;
Most ignorant of what he's most assured,
His glassy essence -- like an angry ape,
Plays such fantastic tricks before high heaven,
As make the Angels weep! "

These have nought to do with the "angels." Their only concern is the human ancestor, the pithecoïd Noah who gave birth to three sons -- the tailed Cynocephalus, the tailless Ape, and the "arboreal" Palaeolithic man. On this point, they will not be contradicted. Every doubt expressed is immediately set down as an attempt to cripple scientific inquiry. The insuperable difficulty at the very foundation of the evolution theory, namely, that no Darwinian is able to give even an approximate definition of the period at which, and the form in which, the first man appeared, is smoothed down to a trifling impediment, which is "really of no account." Every branch of knowledge is in the same predicament, we are informed. The chemist bases his most abstruse calculations simply "upon a hypothesis of atoms and molecules, of which not one has ever been seen isolated, weighed, or defined. The electrician speaks of magnetic fluids which have never tangibly revealed themselves. No definite origin can be assigned either to molecules or magnetism. Science cannot and does not pretend to any knowledge of the beginnings of law, matter or life, . . ." etc., etc. (Knowledge, January, 1882.)

And, withal, to reject a scientific hypothesis, however absurd, is to commit the one unpardonable sin! We risk it.

[[Vol. 2, Page]] 656 THE SECRET DOCTRINE.

§ II.
THE ANCESTORS MANKIND IS OFFERED BY SCIENCE.

"The question of questions for mankind -- the problem which underlies all others, and is more deeply interesting than any other -- is the ascertainment of the place which man occupies in Nature, and of his relations to the Universe of things." -- HUXLEY.

THE world stands divided this day, and hesitates between divine progenitors -- be they Adam and Eve or the lunar Pitris - and Bathybius Haeckelii, the gelatinous hermit of the briny deep. Having explained the occult theory, it may now be compared with that of the modern Materialism. The reader is invited to choose between the two after having judged them on their respective merits.

We may derive some consolation for the rejection of our divine ancestors, in finding that the Haeckelian speculations receive no better treatment at the hands of strictly exact Science than do our own. Haeckel's phylogenesis is no less laughed at by the foes of his fantastic evolution, by other and greater Scientists, than our primeval races will be. As du Bois-Reymond puts it, we may believe him easily when he says that "ancestral trees of our race sketched in the 'Schopfungsgeschichte' are of about as much value as are the pedigrees of the Homeric heroes in the eyes of the historical critic."

This settled, everyone will see that one hypothesis is as good as another. And as we find that German naturalist (Haeckel) himself confessing that neither geology (in its history of the past) nor the ancestral history of organisms will ever "rise to the position of a real exact Science,"* a large margin is thus left to Occult Science to make its annotations and lodge its protests. The world is left to choose between the teachings of Paracelsus, the "Father of Modern Chemistry," and those of Haeckel, the Father of the mythical Sozura. We demand no more.

Without presuming to take part in the quarrel of such very learned naturalists as du Bois-Reymond and Haeckel a propos of our blood relationship to "those ancestors (of ours) which have led up from the unicellular classes, Vermes, Acrania, Pisces, Amphibia, Reptilia to the Aves" -- one may put in a few words, a question or two, for the information of our readers. Availing ourselves of the opportunity, and bearing

[[Footnote(s)]] -----
* "Pedigree of Man." -- "The Proofs of Evolution," p. 273.

[[Vol. 2, Page]] 657 AN UNVERIFIED CHARGE AGAINST THE ANCIENTS.

in mind Darwin's theories of natural selection, etc., we would ask Science -- with regard to the origin of the human and animal species -- which theory of evolution of the two herewith described is the more scientific, or the more unscientific, if so preferred.

(1). Is it that of an Evolution which starts from the beginning with sexual propagation?

(2). Or that teaching which shows the gradual development of organs; their solidification, and the procreation of each species, at first by simple easy separation from one into two or even several individuals. Then follows a fresh development -- the first step to a species of separate distinct sexes -- the hermaphrodite condition; then again, a kind of Parthenogenesis, "virginal reproduction," when the egg-cells are formed within the body, issuing from it in atomic emanations and becoming matured outside of it; until, finally, after a definite separation into sexes, the human beings begin procreating through sexual connection?

Of these two, the former "theory," -- rather, a "revealed fact" -- is enunciated by all the exoteric Bibles (except the Puranas), preeminently by the Jewish Cosmogony. The last one, is that which is taught by the Occult philosophy, as explained all along.

An answer is found to our question in a volume just published by Mr. S. Laing -- the best lay exponent of Modern Science.* In chapter viii. of his latest work, "A Modern Zoroastrian," the author begins by twitting "all ancient religions and philosophies" for "assuming a male and female principle for their gods." At first sight, he says "the distinction of sex appears as fundamental as that of plant and animal." . . . "The Spirit of god brooding over Chaos and producing the world," he goes on to complain, "is only a later edition, revised according to monotheistic ideas, of the far older Chaldean legend which describes the creation of Kosmos out of Chaos by the co-operations of great gods, male and female . . ." Thus, in the orthodox Christian creed we are taught to repeat "begotten, not made," a phrase which is absolute nonsense, an instance of using words like counterfeit notes, which have no solid value of an idea behind them. For "begotten" is a very definite term which "implies the conjunction of two opposite sexes to produce a new individual."

However we may agree with the learned author as to the inadvisability of using wrong words, and the terrible anthropomorphic and phallic element in the old Scriptures -- especially in the orthodox Christian Bible -- nevertheless, there may be two extenuating circumstances in the case. Firstly, all these "ancient philosophies" and "modern

[[Footnote(s)]] -----

* Author of "Modern Science and Modern Thought."

[[Vol. 2, Page]] 658 THE SECRET DOCTRINE.

religions" are -- as sufficiently shown in these two volumes -- an exoteric veil thrown over the face of esoteric truth; and -- as the direct result of this -- they are allegorical, i.e., mythological in form; but still they are immensely more philosophical in essence than any of the new scientific theories, so-called. Secondly, from the Orphic theogony down to Ezra's last remodelling of the Pentateuch, every old Scripture having in its origin borrowed its facts from the East, it has been subjected to constant alterations by friend and foe, until of the original version there remained but the name, a dead shell from which the Spirit had been gradually eliminated.

This alone ought to show that no religious work now extant can be understood without the help of the Archaic wisdom, the primitive foundation on which they were all built.

But to return to the direct answer expected from Science to our direct question. It is given by the same author, when, following his train of thought on the unscientific euhemerization of the powers of Nature in ancient creeds, he pronounces a condemnatory verdict upon them in the following terms:--

"Science, however, makes sad havoc with this impression of sexual generation being the original and only mode of reproduction,* and the microscope and dissecting knife of the naturalist introduce us to new and altogether unsuspected (?) worlds of life. . . ."

So little "unsuspected," indeed, that the original a-sexual "modes of reproduction" must have been known -- to the ancient Hindus, at any rate -- Mr. Laing's assertion to the contrary, notwithstanding. In view of the statement in the Vishnu Purana, quoted by us elsewhere, that Daksha "established sexual intercourse as the means of multiplication," only after a series of other "modes," which are all enumerated therein, (Vol. II., p. 12, Wilson's Transl.), it becomes difficult to deny the fact. This assertion, moreover, is found, note well, in an EXOTERIC work. Then, Mr. S. Laing goes on to tell us that:--

. . . . "By far the larger proportion of living forms, in number have come into existence, without the aid of sexual propagation." He then instances Haeckel's monera "multiplying by self-division." The next stage the author shows in the nucleated cell, "which does exactly the same thing." The following stage is that in "which the organism does not divide into two equal parts, but a small portion of it swells out and finally parts company and starts on separate existence, which grows to the size of the parent by its inherent faculty of manufacturing fresh protoplasm from surrounding inorganic materials."**

[[Footnote(s)]] -----

* Vide Part I. of this volume, page 183, Stanza VIII.

** In this, as shown in Part I., Modern Science was again anticipated, far beyond its own speculations in this direction, by Archaic Science.

[[Vol. 2, Page]] 659 VARIOUS MODES OF REPRODUCTION.

This is followed by a many-celled organism which is formed by "germ-buds reduced to spores, or single cells, which are emitted from the parent". . . . when "we are at the threshold of that system of sexual propagation, which has (now) become the rule in all the higher families of animals" It is when an "organism, having advantages in the struggle for life, established itself permanently" that special organs developed to meet the altered condition when a distinction "would be firmly established of a female organ or ovary containing the egg or primitive cell from which the new being was to be developed." "This is confirmed by a study of embryology, which shows that in the HUMAN and higher animal species the distinction of sex is not developed until a considerable progress has been made in the growth of the embryo" In the great majority of plants, and in some lower families of animals . . . the male and female organs are developed within the same being a hermaphrodite. Moreover, in the "virginal reproduction -- germ-cells apparently similar in all respects to egg-cells, develop themselves into new individuals without any fructifying element," etc., etc. (pp. 103-107).

Of all which we are as perfectly well aware as of this -- that the above was never applied by the very learned English popularizer of Huxleyo-Haeckelian theories to the genus homo. He limits this to specks of protoplasm, plants, bees, snails, and so on. But if he would be true to the theory of descent, he must be as true to ontogenesis, in which the fundamental biogenetic law, we are told, runs as follows: "the development of the embryo (ontogeny) is a condensed and abbreviated repetition of the evolution of the race (phylogeny). This repetition is the more complete, the more the true original order of evolution (palingenesis) has been retained by continual heredity. On the other hand, this repetition is the less complete, the more by varying adaptations the later spurious development (caenogenesis) has obtained." (Anthrop. 3rd edition, p. 11.)

This shows to us that every living creature and thing on earth, including man, evolved from one common primal form. Physical man must have passed through the same stages of the evolutionary process in the various modes of procreation as other animals have: he must have divided himself; then, hermaphrodite, have given birth parthenogenetically (on the immaculate principle) to his young ones; the next stage would be the oviparous -- at first "without any fructifying element," then "with the help of the fertilitary spore"; and only after the final and definite evolution of both sexes, would he become a distinct "male and female," when reproduction through sexual union would grow into universal law. So far, all this is scientifically proven. There remains but one thing to be ascertained: the plain and comprehensively described

[[Vol. 2, Page]] 660 THE SECRET DOCTRINE.

processes of such ante-sexual reproduction. This is done in the Occult books, a slight outline of which was attempted by the writer in Part I. of this Volume.

Either this, or -- man is a distinct being. Occult philosophy may call him that, because of his distinctly dual nature. Science cannot do so, once that it rejects every interference save mechanical laws, and admits of no principle outside matter. The former -- the archaic Science -- allows the human physical frame to have passed through every form, from the lowest to the very highest, its present one, or from the simple to the complex -- to use the accepted terms. But it claims that in this cycle (the fourth), the frame having already existed among the types and models of nature from the preceding Rounds -- that it was quite ready for man from the beginning of this Round.* The Monad had but to step into the astral body of the progenitors, in order that the work of physical consolidation should begin around the shadowy prototype.**

What would Science say to this? It would answer, of course, that as man appeared on earth as the latest of the mammalians, he had no need, no more than those mammals, to pass through the primitive stages of procreation as above described. His mode of procreation was already established on Earth when he appeared. In this case, we may reply: since to this day not the remotest sign of a link between man and the animal has yet been found, then (if the Occultist doctrine is to be repudiated) he must have sprung miraculously in nature, like a fully armed Minerva from Jupiter's brain. And in such case the Bible is right, along with other national "revelations." Hence the scientific scorn, so freely lavished by the author of "A Modern

[[Footnote(s)]] -----

* Theosophists will remember that, according to Occult teaching, Cyclic pralayas so-called are but obscurations, during which periods Nature, i.e., everything visible and invisible on a resting planet -- remains in statu quo. Nature rests and slumbers, no work of destruction going on on the globe even if no active work is done. All forms, as well as their astral types, remain as they were at the last moment of its activity. The "night" of a planet has hardly any twilight preceding it. It is caught like a huge mammoth by an avalanche, and remains slumbering and frozen till the next dawn of its new day -- a very short one indeed in comparison to the "Day of Brahma."

** This will be pooh-poohed, because it will not be understood by our modern men of science; but every Occultist and theosophist will easily realize the process. There can be no objective form on Earth (nor in the Universe either), without its astral prototype being first formed in Space. From Phidias down to the humblest workman in the ceramic art -- a sculptor has had to create first of all a model in his mind, then sketch it in one and two dimensional lines, and then only can he reproduce it in a three dimensional or objective figure. And if human mind is a living demonstration of such successive stages in the process of evolution -- how can it be otherwise when NATURE'S MIND and creative powers are concerned?

[[Vol. 2, Page]] 661 WHERE ARE THE "MISSING LINKS"?

Zoroastrian" upon ancient philosophies and exoteric creeds, becomes premature and uncalled for. Nor would the sudden discovery of a "missing-link" -- like fossil mend matters at all. For neither one such solitary specimen nor the scientific conclusions thereupon, could insure its being the long-sought-for relic, i.e., that of an undeveloped, still a once speaking MAN. Something more would be required as a final proof (vide infra, Note). Besides which, even Genesis takes up man, her Adam of dust, only where the Secret Doctrine leaves her "Sons of God and Wisdom" and picks up the physical man of the THIRD Race. Eve is not "begotten," but is extracted out of Adam on the manner of "Amoeba, A," contracting in the middle and splitting into Amoeba B -- by division. (See p. 103, in "The Modern Zoroastrian.") Nor has human speech developed from the various animal sounds.

Haeckel's theory that "speech arose gradually from a few simple, crude animal sounds . . ." as such "speech still remains amongst a few races of lower rank" (Darwinian theory in "Pedigree of Man," p. 22) is altogether unsound, as argued by Professor Max Muller, among others. He contends that no plausible explanation has yet been given as to how the "roots" of language came into existence. A human brain is necessary for human speech. And figures relating to the size of the respective brains of man and ape show how deep is the gulf which separates the two. Vogt says that the brain of the largest ape, the gorilla, measures no more than 30.51 cubic inches; while the average brains of the flat-headed Australian natives -- the lowest now in the human races -- amount to 99.35 cubic inches! Figures are awkward witnesses and cannot lie. Therefore, as truly observed by Dr. F. Pfaff, whose premises are as sound and correct as his biblical conclusions are silly:-- "The brain of the apes most like man, does not amount to quite a third of the brain of the lowest races of men: it is not half the size of the brain of a new-born child." ("The Age and Origin of Man.") From the foregoing it is thus very easy to perceive that in order to prove the Huxley-Haeckelian theories of the descent of man, it is not one, but a great number of "missing links" -- a true ladder of progressive evolutionary steps -- that would have to be first found and then presented by Science to thinking and reasoning humanity, before it would abandon belief in gods and the immortal Soul for the worship of Quadrumanic ancestors. Mere myths are now greeted as "axiomatic truths." Even Alfred Russel Wallace maintains with Haeckel that primitive man was a speechless ape-creature. To this Joly answers:-- "Man never was, in my opinion, this pithecanthropus alalus whose portrait Haeckel has drawn as if he had seen and known him, whose singular and completely hypothetical genealogy he has even given, from the mere mass of living protoplasm to the man endowed with speech and a civilization analo-

[[Vol. 2, Page]] 662 THE SECRET DOCTRINE.

gous to that of the Australians and Papuans." ("Man before Metals," p. 320, N. Joly. Inter. Scient. Series.)

Haeckel, among other things, often comes into direct conflict with the Science of languages. In the course of his attack on Evolutionism (1873, "Mr. Darwin's Philosophy of Language"), Prof. Max Muller stigmatized the Darwinian theory as "vulnerable at the beginning and at the end." The fact is, that only the partial truth of many of the secondary "laws" of Darwinism is beyond question -- M. de Quatrefages evidently accepting "Natural Selection," the "struggle for existence" and transformation within species, as proven not once and for ever, but pro. tem. But it may not be amiss, perhaps, to condense the linguistic case against the "Ape ancestor" theory:--

Languages have their phases of growth, etc., like all else in nature. It is almost certain that the great linguistic families pass through three stages.

- (1) All words are roots and merely placed in juxtaposition (Radical languages).
- (2) One root defines the other, and becomes merely a determinative element (Agglutinative).
- (3) The determinative element (the determining meaning of which has long lapsed) unites into a whole with the formative element (Inflected).

The problem then is: Whence these ROOTS? Max Muller argues that the existence of these ready-made materials of speech is a proof that man cannot be the crown of a long organic series. This potentiality of forming roots is the great crux which materialists almost invariably avoid.

Von Hartmann explains it as a manifestation of the "Unconscious," and admits its cogency versus mechanical Atheism. Hartmann is a fair representative of the Metaphysician and Idealist of the present age.

The argument has never been met by the non-pantheistic Evolutionists. To say with Schmidt: "Forsooth are we to halt before the origin of language?" is an avowal of dogmatism and of speedy defeat. (Cf. his "Doctrine of Descent and Darwinism," p. 304.)

We respect those men of science who, wise in their generation, say: "Prehistoric Past being utterly beyond our powers of direct observation, we are too honest, too devoted to the truth -- or what we regard as truth -- to speculate upon the unknown, giving out our unproven theories along with facts absolutely established in modern Science." . . . "The borderland of (metaphysical) knowledge is best left to time, which is the best test as to truth" (A Modern Zoroastrian, p. 136).

This is a wise and an honest sentence in the mouth of a materialist. But when a Haeckel, after just saying that "historical events of

[[Vol. 2, Page]] 663 PROOFS OF OUR "NOBLE DESCENT."

past time . . . "having "occurred many millions of years ago,* . . . are for ever removed from direct observation," and that neither geology nor phylogeny** can or will "rise to the position of a real exact science," then insists on the development of all organisms -- "from the lowest vertebrate to the highest, from Amphioxus to man" -- we ask for a weightier proof than he can give. Mere "empirical sources of knowledge," so extolled by the author of "Anthropogeny" -- when he has to be satisfied with the qualification for his own views -- are not competent to settle problems lying beyond their domain; nor is it the province of exact science to place any reliance on them.*** If "empirical" -- and Haeckel declares so himself repeatedly -- then they are no better, nor any more reliable, in the sight of exact research, when extended into the remote past, than our Occult teachings of the East, both having to be placed on quite the same level. Nor are his phylogenetic and paligenetic speculations treated in any better way by the real scientists, than are our cyclic repetitions of the evolution of the Great in the minor races, and the original order of evolutions. For the province of exact, real Science, materialistic though it be, is to carefully avoid anything like guess-work, speculation which cannot be verified; in short, all suppressio veri and all suggestio falsi. The business of the man of exact Science is to observe, each in his chosen department, the phenomena of nature; to record, tabulate, compare and classify the facts, down to the smallest minutiae which are presented to the observation of the senses with the help of all the exquisite mechanism that modern invention supplies, not by the aid of metaphysical flights of fancy. All that he has a legitimate right to do, is to correct by the assistance of physical instruments the

[[Footnote(s)]] -----

* It thus appears that in its anxiety to prove our noble descent from the catarrhine "baboon," Haeckel's school has pushed the times of pre-historic man millions of years back. (See "Pedigree of Man," p. 273.) Occultists, render thanks to science for such corroboration of our claims!

** This seems a poor compliment to pay Geology, which is not a speculative but as exact a science as astronomy -- save, perhaps its too risky chronological speculations. It is mainly a "Descriptive" as opposed to an "Abstract" Science.

*** Such newly-coined words as "perigenesis of plastids," "plastidule Souls" (!), and others less comely, invented by Haeckel, may be very learned and correct in so far as they may express very graphically the ideas in his own vivid fancy. As a fact, however, they remain for his less imaginative colleagues painfully caenogenetic -- to use his own terminology; i.e., for true Science they are spurious speculations so long as they are derived from "empirical sources." Therefore, when he seeks to prove that "the origin of man from other mammals, and most directly from the catarrhine ape, is a deductive law that follows necessarily from the inductive law of the theory of descent" ("Anthropogeny," p. 392) -- his no less learned foes (du Bois-Reymond -- for one) have a right to see in this sentence a mere jugglery of words; a "testimonium paupertatis of natural science" -- as he himself complains, calling them, in return, ignoramuses (see "Pedigree of Man," Notes).

[[Vol. 2, Page]] 664 THE SECRET DOCTRINE.

defects or illusions of his own coarser vision, auditory powers, and other senses. He has no right to trespass on the grounds of metaphysics and psychology. His duty is to verify and to rectify all the facts that fall under his direct observation; to profit by the experiences and mistakes of the Past in endeavouring to trace the working of a certain concatenation of cause and effects, which, but only by its constant and unvarying repetition, may be called A LAW. This it is which a man of science is expected to do, if he would become a teacher of men and remain true to his original programme of natural or physical sciences. Any side-way path from this royal road becomes speculation.

Instead of keeping to this, what does many a so-called man of science do in these days? He rushes into the domains of pure metaphysics, while deriding it. He delights in rash conclusions and calls it "a deductive law from the inductive law" of a theory based upon and drawn out of the depths of his own consciousness: that consciousness being perverted by, and honeycombed with, one-sided materialism. He attempts to explain the "origin" of things, which are yet embosomed only in his own conceptions. He attacks spiritual beliefs and religious traditions millenniums old, and denounces everything, save his own hobbies, as superstition. He suggests theories of the Universe, a Cosmogony developed by blind, mechanical forces of nature alone, far more miraculous and impossible than even one based upon the assumption of fiat lux out of nihil -- and tries to astonish the world by such a wild theory; which, being known to emanate from a scientific brain, is taken on blind faith as very scientific and the outcome of SCIENCE.

Are those the opponents Occultism would dread? Most decidedly not. For such theories are no better treated by real (not empirical) Science than our own. Haeckel, hurt in his vanity by du Bois-Reymond, never tires of complaining publicly of the latter's onslaught on his fantastic theory of descent. Rhapsodizing on "the exceedingly rich storehouse of empirical evidence," he calls those "recognised physiologists" who oppose every speculation of his drawn from the said "storehouse" -- ignorant men. "If many men," he declares -- "and among them even some scientists of repute -- hold that the whole of phylogeny is a castle in the air, and genealogical trees (from monkeys?) are empty plays of phantasy, they

only in speaking thus demonstrate their ignorance of that wealth of empirical sources of knowledge to which reference has already been made" ("Pedigree of Man," p. 273).

We open Webster's Dictionary and read the definitions of the word "empirical": "Depending upon experience or observation alone, without due regard to modern science and theory." This applies to the Occultists, Spiritualists, Mystics, etc., etc. Again, "an Empiric -- One who confines himself to applying the results of his own observations" (only

[[Vol. 2, Page]] 665 MR. HUXLEY APPLIES AN "EXTINGUISHER."

(which is Haeckel's case); "one wanting Science . . . an ignorant and unlicensed practitioner; a quack; a CHARLATAN."

No Occultist or "magician," has ever been treated to any worse epithets. Yet the Occultist remains on his own metaphysical grounds, and does not endeavour to rank his knowledge, the fruits of his personal observation and experience, among the exact sciences of modern learning. He keeps within his legitimate sphere, where he is master. But what is one to think of a rank materialist, whose duty is clearly traced before him, who uses such an expression as this:--

"The origin of man from other mammals, and most directly from the catarrhine ape, is a deductive law, that follows necessarily from the inductive law of the THEORY OF DESCENT." ("Anthropogeny," p. 392).

A "theory" is simply a hypothesis, a speculation, and no law. To say otherwise is only one of the many liberties taken now-a-days by scientists. They enunciate an absurdity, and then hide it behind the shield of Science. Any deduction from theoretical speculation is no better than a speculation on a speculation. Now Sir W. Hamilton has already shown that the word theory is now used "in a very loose and improper sense" . . . "that it is convertible into hypothesis, and hypothesis is commonly used as another term for conjecture, whereas the terms 'theory' and 'theoretical' are properly used in opposition to the term practice and practical."

But modern Science puts an extinguisher on the latter statement, and mocks at the idea. Materialistic philosophers and Idealists of Europe and America may be agreed with the Evolutionists as to the physical origin of man -- yet it will never become a general truth with the true metaphysician, and the latter defies the materialists to make good their arbitrary assumptions. That the ape-theory theme* of Vogt and Darwin, on which the Huxley-Haeckelians have composed of late such extraordinary variations, is far less scientific -- because clashing with the fundamental laws of that theme itself -- than ours can ever be

[[Footnote(s)]] -----

* The mental barrier between man and ape, characterized by Huxley as an "enormous gap, a distance practically immeasurable"! ! is, indeed, in itself conclusive. Certainly it constitutes a standing puzzle to the materialist, who relies on the frail reed of "natural selection." The physiological differences between Man and the Apes are in reality -- despite a curious community of certain features -- equally striking. Says Dr. Schweinfurth, one of the most cautious and experienced of naturalists:--

"In modern times there are no animals in creation that have attracted more attention from the scientific student than the great quadrumana (the anthropoids), bearing such a striking resemblance to the human form as to have justified the epithet of anthropomorphic being conferred on them. . . . But all investigation at present only leads human intelligence to a confession of its insufficiency; and nowhere is caution more to be advocated, nowhere is premature judgment more to be deprecated than in the attempt to bridge over the MYSTERIOUS CHASM which separates man and beast." "Heart of Africa" i., 520.

[[Vol. 2, Page]] 666 THE SECRET DOCTRINE.

shown to be, is very easy of demonstration. Let the reader only turn to the excellent work on "Human Species" by the great French naturalist de Quatrefages, and our statement will at once be verified.

Moreover, between the esoteric teaching concerning the origin of man and Darwin's speculations, no man, unless he is a rank materialist, will hesitate. This is the description given by Mr. Darwin of "the earliest ancestors of man."

"They were without doubt once covered with hair; both sexes having beards; their ears were pointed and capable of movement; and their bodies were provided with a tail, having the proper muscles. Their limbs and bodies were acted on by many muscles which now only occasionally reappear in man, but which are still normally present in the quadrumana. . . The foot, judging from the condition of the great toe in the foetus, was then prehensile, and our progenitors, no doubt, were arboreal in their habits, frequenting some warm forest-clad land, and the males were provided with canine teeth which served as formidable weapons. . . ."

Darwin connects him with the type of the tailed catarrhines, "and consequently removes him a stage backward in the scale of evolution. The English naturalist is not satisfied to take his stand upon the ground of his own doctrines, and, like Haeckel, on this point places himself in direct variance with one of the fundamental laws which constitute the principal charm of Darwinism . . ." And then the learned French naturalist proceeds to show how this fundamental law is broken. "In fact," he says, "in the theory of Darwin, transmutations do not take place, either by chance or in every direction. They are ruled by certain laws which are due to the organization itself. If an organism is once modified in a given direction, it can undergo secondary or tertiary transmutations, but will still preserve the impress of the original. It is the law of permanent characterization, which alone permits Darwin to explain the filiation of groups, their characteristics, and their numerous relations. It is by virtue of this law that all the descendants of the first mollusc have been molluscs; all the descendants of the first vertebrate have been vertebrates. It is clear that this constitutes one of the foundations of the doctrine. . . . It follows that two beings belonging to two distinct types can be referred to a common ancestor, but the one cannot be the descendant of the other"; (p. 106).

"Now man and ape present a very striking contrast in respect to type. Their organs . . . correspond almost exactly term for term: but these

[[Footnote(s)]] -----

* A ridiculous instance of evolutionist contradictions is afforded by Schmidt ("Doctrine of Descent and Darwinism," on page 292). He says, "Man's kinship with the apes is not impugned by the bestial strength of the teeth of the male orang or gorilla." Mr. Darwin, on the contrary, endows this fabulous being with teeth used as weapons!

[[Vol. 2, Page]] 667 A WALKER OR A CLIMBER.

organs are arranged after a very different plan. In man they are so arranged that he is essentially a walker, while in apes they necessitate his being a climber. . . . There is here an anatomical and mechanical distinction. . . . A glance at the page where Huxley has figured side by side a human skeleton and the skeletons of the most highly developed apes is a sufficiently convincing proof."

The consequence of these facts, from the point of view of the logical application of the law of permanent characterizations, is that man cannot be descended from an ancestor who is already characterized as an ape, any more than a catarrhine tailless ape can be descended from a tailed catarrhine. A walking animal cannot be descended from a climbing one.

"Vogt, in placing man among the primates, declares without hesitation that the lowest class of apes have passed the landmark (the common ancestor), from which the different types of this family have originated and diverged." (This ancestor of the apes, occult science sees in the lowest human group during the Atlantean period, as shown before.) . . . "We must, then, place the origin of man beyond the last apes," goes on de Quatrefages, thus corroborating our Doctrine, "if we would adhere to one of the laws most emphatically necessary to the Darwinian theory. We then come to the prosimiae of Haeckel, the loris, indris, etc. But those animals also are climbers; we must go further, therefore, in search of our first direct ancestor. But the genealogy by Haeckel brings us from the latter to the marsupials. . . . From men to the Kangaroo the distance is certainly great. Now neither living nor extinct fauna show the intermediate types which ought to serve as landmarks. This difficulty causes but slight embarrassment to Darwin.* We know that he considers the want of information upon similar questions as a proof in his favour. Haeckel doubtless is as little embarrassed. He admits the existence of an absolutely theoretical pithecoïd man."

"Thus, since it has been proved that, according to Darwinism itself, the origin of man must be placed beyond the eighteenth stage, and since it becomes, in consequence, necessary to fill up the gap between marsupials and man, will Haeckel admit the existence of four unknown intermediate groups instead of one?" asks de Quatrefages. "Will he complete his genealogy in this manner? It is not for me to answer." ("The Human Species," p. 107-108.)

But see Haeckel's famous genealogy, in "The Pedigree of Man," called by him "Ancestral Series of Man." In the "Second Division"

[[Footnote(s)]] -----

* According even to a fellow-thinker, Professor Schmidt, Darwin has evolved "a certainly not flattering, and perhaps in many points an incorrect, portrait of our presumptive ancestors in the dawn of humanity." ("Doctrine of Descent and Darwinism," p. 284.)

[[Vol. 2, Page]] 668 THE SECRET DOCTRINE.

(Eighteenth Stage) he describes "Prosimiae, allied to the Loris (Stenops) and Makis (Lemur) as without marsupial bones and cloaca, but with placenta." And now turn to de Quatrefages' "The Human Species," pp. 109, 110, and see his proofs, based on the latest discoveries, to show that "the prosimiae of Haeckel have no decidua and a diffuse placenta." They cannot be the ancestors of the apes even, let alone man, according to a fundamental law of Darwin himself, as the great French Naturalist shows. But this does not dismay the "animal theorists" in the least, for self-contradiction and paradoxes are the very soul of modern Darwinism. Witness -- Mr. Huxley. Having himself shown, with regard to fossil man and the "missing link," that "neither in quaternary ages nor at the present time does any intermediary being fill the gap which separates man from the Troglodyte"; and that to "deny the existence of this gap would be as reprehensible as absurd," the great man of Science denies his own words in actu by supporting with all the weight of his scientific authority that most "absurd" of all theories -- the descent of man from an ape!

"This genealogy," says de Quatrefages, "is wrong throughout, and is founded on a material error." Indeed, Haeckel bases his descent of man on the 17th and 18th stages (See Aveling's "Pedigree of Man," p. 77), the marsupialia and prosimiae - (genus Haeckelii?). Applying the latter term to the Lemuridae -- hence making of them animals with a placenta -- he commits a zoological blunder. For after having himself divided mammals according to their anatomical differences into two groups: the indeciduala, which have no decidua (or special membrane uniting the placenta), and the decidua, those who possess it: he includes the prosimiae in the latter group. Now we have shown elsewhere what other men of science had to say to this. As de Quatrefages says, "The anatomical investigations of . . . Milne Edwards and Grandidier upon these animals . . . place it beyond all doubt that the prosimiae of Haeckel have no decidua and a diffuse placenta. They are indeciduala. Far from any possibility of their being the ancestors of the apes, according to the principles laid down by Haeckel himself, they cannot be regarded even as the ancestors of the zonoplacental mammals . . . and ought to be connected with the pachydermata, the edentata, and the cetacea"; (p. 110). And yet Haeckel's inventions pass off with some as exact science!

The above mistake, if indeed, one, is not even hinted at in Haeckel's "Pedigree of Man," translated by Aveling. If the excuse may stand good that at the time the famous "genealogies" were made, "the embryogenesis of the prosimiae was

not known," it is familiar now. We shall see whether the next edition of Aveling's translation will have this important error rectified, or if the 17th and 18th stages remain

[[Vol. 2, Page]] 669 A PITHECOID MAN WANTED.

as they are to blind the profane, as one of the real intermediate links. But, as the French naturalist observes -- "their (Darwin's and Haeckel's) process is always the same, considering the unknown as a proof in favour of their theory." (Ibid.)

It comes to this. Grant to man an immortal Spirit and Soul; endow the whole animate and inanimate creation with the monadic principle gradually evolving from the latent and passive into active and positive polarity -- and Haeckel will not have a leg to stand upon, whatever his admirers may say.

But there are important divergences even between Darwin and Haeckel. While the former makes us proceed from the tailed catarrhine, Haeckel traces our hypothetical ancestor to the tailless ape, though, at the same time, he places him in a hypothetical "stage" immediately preceding this: "Menocerca with tails" (19th stage).

Nevertheless, we have one thing in common with the Darwinian school: it is the law of gradual and extremely slow evolution, embracing many million years. The chief quarrel, it appears, is with regard to the nature of the primitive "Ancestor." We shall be told that the Dhyana Chohan, or the "progenitor" of Manu, is a hypothetical being unknown on the physical plane. We reply that it was believed in by the whole of antiquity, and by nine-tenths of the present humanity; whereas not only is the pithecoid man, or "ape-man," a purely hypothetical creature of Haeckel's creation, unknown and untraceable on this earth, but further its genealogy -- as invented by him -- clashes with scientific facts and all the known data of modern discovery in Zoology. It is simply absurd, even as a fiction. As de Quatrefages demonstrates in a few words, Haeckel "admits the existence of an absolutely theoretical pithecoid man" -- a hundred times more difficult to accept than any Deva ancestor. And it is not the only instance in which he proceeds in a similar manner in order to complete his genealogical table; and he admits very naively his inventions himself. Does he not confess the non-existence of his *sozura* (14th stage) -- a creature entirely unknown to science -- by confessing over his own signature, that -- "The proof of its existence arises from the necessity of an intermediate type between the 13th and the 14th stages"!

If so, we might maintain with as much scientific right, that the proof of the existence of our three ethereal races, and the three-eyed men of the Third and Fourth Root-Races "arises also from the necessity of an intermediate type" between the animal and the gods. What reason would the Haeckelians have to protest in this special case?

Of course there is a ready answer: "Because we do not grant the presence of the monadic essence." The manifestation of the Logos as individual consciousness in the animal and human creation is not accepted

[[Vol. 2, Page]] 670 THE SECRET DOCTRINE.

by exact science, nor does it cover the whole ground, of course. But the failures of science and its arbitrary assumptions are far greater on the whole than* any "extravagant" esoteric doctrine can ever furnish. Even thinkers of the school of Von Hartmann have become tainted with the general epidemic. They accept the Darwinian Anthropology (more or less), though they also postulate the individual Ego as a manifestation of the Unconscious (the Western presentation of the Logos or Primeval Divine Thought). They say the evolution of the physical man is from the animal, but that mind in its various phases is altogether a thing apart from material facts, though organism (as an upadhi) is necessary for ITS manifestation.

PLASTIDULAR SOULS, AND CONSCIOUS NERVE-CELLS.

But one can never see the end of such wonders with Haeckel and his school, whom the Occultists and Theosophists have every right to consider as materialistic tramps trespassing on private metaphysical grounds. Not satisfied with the paternity of Bathybius (Haeckelii), "plastidule souls,"** and "atom-souls" are now invented by them, on the basis of purely blind mechanical forces of matter. We are informed that "the study of the evolution of soul-life shows that this has worked its way up from the lower stages of the simple cell-soul, through an astonishing series of gradual stages in evolution, up to the soul of man." ("Present Position of Evolution," p. 266.)

"Astonishing" -- truly, based as this wild speculation is on the Consciousness of the "nerve cells." For as he tells us, "Little as we are in a position, at the present time, to explain fully the nature of consciousness,** yet the comparative and genetic observation of it clearly shows that it is only a higher and more complex function of the nerve cells." (Ibid, note 22.)

[[Footnote(s)]] -----

* Of course the Esoteric system of Fourth Round Evolution is much more complex than the paragraph and quotations referred to categorically assert. It is practically a reversal -- both in embryological inference and succession in time of species -- of the current Western conception.

** According to Haeckel, there are also cell-souls; "an inorganic molecular soul" without, and a "plastidular soul with (or possessing) memory". What are our esoteric teachings to this? The divine and human soul of the seven principles in man must, of course, pale and give away before such a stupendous revelation!

*** A valuable confession, this. Only it makes the attempt to trace the descent of Consciousness in man as well as of his physical body from Bathybius Haeckelii still more humorous and empirical, in the sense of Webster's second definition.

[[Vol. 2, Page]] 671 HAECKEL CREATES SOULS.

Mr. Herbert Spencer's song on Consciousness -- is sung, it seems, and may henceforth be safely stored up in the lumber room of obsolete speculations. Where, however, do Haeckel's "complex functions" of his scientific "nerve-cells" land him? Once more right into the Occult and mystic teachings of the Kabala about the descent of souls as conscious and unconscious atoms; among the Pythagorean MONAD and the monads of Leibnitz -- and the "gods, monads, and atoms" of our esoteric teaching;* into the dead letter of Occult teachings, left to the amateur Kabalists and professors of ceremonial magic. For this is what he says, while explaining his newly-coined terminology:--

"Plastidule-Souls; the plastidules or protoplasmic molecules, the smallest, homogeneous parts of the protoplasm are, on our plastic theory, to be regarded as the active factors of all life-functions. The plastidular soul differs from the inorganic molecular soul in that it possesses memory." ("Pedigree of Man," Note, p. 296.)

This he develops in his mirific lecture on the "Perigenesis of the Plastidule, or the wave-motions of living particles." It is an improvement on Darwin's theory of "Pangenesiis," and a further approach, a cautious move towards "magic." The former is a conjecture that certain of the actual and identical atoms which had belonged to ancestral bodies "are thus transmitted through their descendants for generation after generation, so that we are literally 'flesh of the flesh' of the primeval creature who has developed into man in the later . . . period" -- explains the author of "The Modern Zoroastrian" (in "Primitive Polarities," etc.). The latter (Occultism) teaches that -- (a) the life-atoms of our (Prana) life-principle are never entirely lost when a man dies. That the atoms best impregnated with the life-principle (an independent, eternal, conscious factor) are partially transmitted from father to son by heredity, and partially are drawn once more together and become the animating principle of the new body in every new incarnation of

[[Footnote(s)]] -----

* Those who take the opposite view and look upon the existence of the human soul, -- "as a supernatural, a spiritual phenomenon, conditioned by forces altogether different from ordinary physical forces," . . . "mock," he thinks, "in consequence, all explanation that is simply scientific." They have no right it seems, to assert that "psychology is, in part, or in whole, a spiritual science, not a physical one." . . . The new discovery by Haeckel (one taught for thousands of years in all the Eastern religions, however), that the animals have souls, will, and sensation, hence soul-functions, leads him to make of psychology the science of the zoologists. The archaic teaching that the "Soul" (the animal and human souls, or Kama and Manas) "has its developmental history" -- is claimed by Haeckel as his own discovery and innovation on an "untrodden (?) path"! He (Haeckel) will work out the comparative evolution of the soul in man and in other animals. . . . "The comparative morphology of the soul-organs, and the comparative physiology of the soul-functions, both founded on Evolution, thus become the psychological (really materialistic) problem of the scientific man." (Cell-souls and Soul-cells, p. 137, "Pedigree of Man.")

[[Vol. 2, Page]] 672 THE SECRET DOCTRINE.

the Monads. Because (b), as the individual Soul is ever the same, so are the atoms of the lower principles (body, its astral, or life double, etc.), drawn as they are by affinity and Karmic law always to the same individuality in a series of various bodies, etc., etc.*

To be just, and, to say the least, logical, our modern Haeckelians ought to pass a resolution that henceforth the "Perigenesis of the Plastidule," and like lectures, should be bound up with those on "Esoteric Buddhism," and "The Seven Principles in Man." Thus the public will have a chance, at any rate, of judging after comparison which of the two teachings is the most or the least ABSURD, even from the standpoint of materialistic and exact Science!

Now the Occultists, who trace every atom in the universe, whether an aggregate or single, to One Unity, or Universal Life; who do not recognize that anything in Nature can be inorganic; who know of no such thing as dead matter -- the Occultists are consistent with their doctrine of Spirit and Soul when speaking of memory in every atom, of will and sensation. But what can a materialist mean by the qualification? The law of biogenesis, in the sense applied to it by the Haeckelians -- "is the result of the ignorance on the part of the man of science of occult physics." We know and speak of "life-atoms" -- and of "sleeping-atoms" -- because we regard these two forms of energy -- the kinetic and the potential -- as produced by one and the same force or the ONE LIFE, and regard the latter as the source and mover of all. But what is it that furnished with energy, and especially with memory, the "plastidular souls" of Haeckel? The "wave motion of living particles" becomes comprehensible on the theory of a Spiritual ONE LIFE, of a universal Vital principle independent of our matter, and manifesting as atomic energy only on our plane of consciousness. It is that which, individualized in the human cycle, is transmitted from father to son.

Now Haeckel, modifying Darwin's theory, suggests "most plausibly," as the author of the "Modern Zoroastrian" thinks, "that not the identical atoms, but their peculiar motions and mode of aggregation have been thus transmitted" (by heredity).

If Haeckel, or any other Scientist, knew more than any of them does of the nature of the atom, he would not have improved the occasion in this way. For he only states, in a more metaphysical language than Darwin, one and the same thing. The life-principle, or life energy,

[[Footnote(s)]] -----

* (See "Transmigration of the Life Atoms," "Five years of Theosophy," p. 533-539). The collective aggregation of these atoms forms thus the Anima Mundi of our Solar system, the soul of our little universe, each atom of which is of course a soul, a monad, a little universe endowed with consciousness, hence with memory (Vol. I., Part III., "Gods, Monads and Atoms.")

[[Vol. 2, Page 673]] THE MEANING OF SOUL WITH HAECKEL.

which is omnipresent, eternal, indestructible, is a force and a PRINCIPLE as noumenon, atoms, as phenomenon. It is one and the same thing, and cannot be considered as separate except in materialism.*

Further, Haeckel enunciates concerning the Atom Souls that which, at first sight, appears as occult as a Monad of Leibnitz. "The recent contest as to the nature of atoms, which we must regard as in some form or other the ultimate factors in all physical and chemical processes," he tells us -- "seems to be capable of the easiest settlement, by the conception that these very minute masses possess, as centres of force, a persistent soul, that every atom has sensation and the power of movement."

He does not say a word concerning the fact that this is Leibnitz's theory, and one pre-eminently occult. Nor does he understand the term "Soul" as we do; for, with Haeckel it is simply, along with consciousness, the production of the grey matter of the brain, a thing which, as the "cell-soul, is as indissolubly bound up with the protoplasmic body as is the human soul with the brain and spinal cord." (Ibid.) He rejects the conclusions of Kant, Herbert Spencer, of du Bois-Reymond and Tyndall. The latter expresses the opinion of all the great men of science, as of the greatest thinkers of this and the past ages, in saying that "the passage from the physics of the brain to the corresponding facts of Consciousness is unthinkable. Were our minds and senses so . . . illuminated as to enable us to see and feel the very molecules of the brain; were we capable of following all their motions, all their groupings . . . electric discharges . . . we should be as far as ever from the solution of the problem . . . The chasm between the two classes of Phenomena would still remain intellectually impassable." But the complex function of the nerve-cells of the great German EMPIRIC, or, in other words, his Consciousness, will not permit him to follow the conclusions of the greatest thinkers of our globe. He is greater than they. He asserts this, and protests against all. "No one has the right

[[Footnote(s)]] -----

* In "The Transmigration of the Life-Atoms," we say, to explain better a position which is but too often misunderstood:-- "It is omnipresent . . . though (on this plane of manifestation) often in a dormant state -- as in stone. The definition which states that when this indestructible force is disconnected with one set of atoms (molecules ought to have been said) it becomes immediately attracted by others, does not imply that it entirely abandons the first set (because the atoms themselves would then disappear), but only that it transfers its vis viva, or life power -- the energy of motion, to another set. But because it manifests itself in the next set as what is called Kinetic energy, it does not follow that the first set is deprived of it altogether; for it is still in it, as potential energy or life latent," etc., etc. Now what can Haeckel mean by his "not identical atoms but their peculiar motion and mode of aggregation," if it is not the same Kinetic energy we have been explaining? He must have read Paracelsus and studied "Five Years of Theosophy," without properly digesting the teachings, before evolving such theories.

[[Vol. 2, Page]] 674 THE SECRET DOCTRINE.

to hold that in the future we (Haeckel) shall not be able to pass beyond those limits of our knowledge that to day seem impassable"; and he quotes from Darwin's introduction to the "Descent of Man" these words, which he modestly applies to his scientific opponents and himself: "It is always those who know little, and not those who know much, that positively affirm that this or that problem will never be solved by Science."

The world may rest satisfied. That day is not far off when the "thrice great" Haeckel will have shown (to his own satisfaction) that the consciousness of Sir I. Newton was, physiologically speaking, but the reflex action (or minus consciousness) caused by the peri-genesis of the plastidules of our common ancestor and old friend, the Moneron Haeckelii. The fact that the said "Bathybius" has been found out and exposed as a pretender simulating the organic substance it was not; and since, among the children of men, Lot's wife alone (and even this, only after her disagreeable metamorphosis into a salt pillar) could claim the pinch of salt it is, as her forefather -- will not dismay him at all. He will go on asserting, as coolly as he has always done, that it was no more than the peculiar mode and motion of the ghost of the long-vanished atoms of our "Father Bathybius," which, transmitted across aeons of time into the cell-tissue of the grey matter of the brains of every great man, caused Sophocles and AEschylus, as well as Shakespeare, to write their tragedies, Newton, his "Principia," Humboldt, his "Cosmos," etc. etc. It prompted Haeckel to invent Graeco-Latin names three inches long, pretending to mean a good deal, and meaning -- nothing.

Of course we are quite aware that the true, honest evolutionist agrees with us; and that he is the first to say that not only is the geological record imperfect, but that there are enormous gaps in the series of hitherto discovered fossils, which can never be filled. He will tell us, moreover, that "no evolutionist assumes that man is descended from any existing ape or any extinct ape either," but that man and apes originated probably aeons back, in some common root stock. Still, as de Quatrefages points out, he will claim as an evidence corroborating his (the evolutionist's) claim, even this wealth of absent proofs, saying that "all living forms have not been preserved in the fossil series, the chances of preservation being few and far between," even primitive man "burying or burning his dead" (A. Wilson). This is just what we ourselves claim. It is just as possible that future should have in store for us the discovery of the giant skeleton of an Atlantean, 30ft. high, as the fossil of a pithecoïd "missing link": only the former is more probable.

[[Vol. 2, Page]] 675 DRYOPITHECUS, THE MISSING LINK.

§ III.
THE FOSSIL RELICS OF MAN AND THE ANTHROPOID APE.

A.

GEOLOGICAL FACTS BEARING ON THE QUESTION OF THEIR RELATIONSHIP.

THE data derived from scientific research as to "primeval man" and the ape lend no countenance to theories deriving the former from the latter. "Where, then, must we look for primeval man?" still queries Mr. Huxley, after having vainly searched for him in the very depths of the quaternary strata. "Was the oldest Homo sapiens Pliocene or Miocene, or yet more ancient? In still older strata do the fossilized bones of an ape more anthropoid, or a man more pithecoïd than any yet known, await the researches of some unborn palaeontologist? Time will show" ("Man's Place in Nature," p. 159).

It will -- undeniably -- and thus vindicate the anthropology of the Occultists. Meanwhile, in his eagerness to vindicate Mr. Darwin's Descent of Man, Mr. Boyd Dawkins believes he has all but found the "missing link" -- in theory. It was due to theologians more than to geologists that, till nearly 1860, man had been considered a relic no older than the Adamic orthodox 6,000 years. As Karma would have it though, it was left to a French Abbe -- l'abbe Bourgeois -- to give this easy-going theory even a worse blow than had been given to it by the discoveries of Boucher de Perthes. Everyone knows that the Abbe discovered and brought to light good evidence that man already existed during the Miocene period; for flints of undeniably human making were excavated from Miocene strata. In the words of the author of "Modern Science and Modern Thought":--

"They must either have been chipped by man, or, as Mr. Boyd Dawkins supposes, by the Dryopithecus or some other anthropoid ape which had a dose of intelligence so much superior to the gorilla, or chimpanzee, as to be able to fabricate tools. But in this case the problem would be solved and the missing link discovered, for such an ape might well have been the ancestor of Palaeolithic man."

Or -- the descendant of Eocene Man, which is a variant offered to the theory. Meanwhile, the Dryopithecus with such fine mental endowments is yet to be discovered. On the other hand, Neolithic and even Palaeolithic man having become an absolute certainty, -- and, as the same author justly observes: "If 100,000,000 years have elapsed since

[[Vol. 2, Page]] 676 THE SECRET DOCTRINE.

the earth became sufficiently solidified to support vegetable and animal life, the Tertiary period may have lasted for 5,000,000; or for 10,000,000 years, if the life-sustaining order of things has lasted, as Lyell supposes, for at least 200,000,000 years" -- why should not another theory be tried? Let us carry man, as an hypothesis, to the close of Mesozoic times -- admitting argumenti causa that the (much more recent) higher apes then existed! This would allow ample time to man and the modern apes to have diverged from the mythical "ape more anthropoid," and even for the latter to have degenerated into those that are found mimicking man in using "branches of trees as clubs, and cracking cocoa-nuts with hammer and stones."* Some savage tribes of hillmen in India build their abodes on trees, just as the gorillas build their dens. The question, which of the two, the beast or the man, has become the imitator of the other, is scarcely an open one, even granting Mr. Boyd Dawkins' theory. The fanciful character of his hypothesis, is, however, generally admitted. It is argued that while in the Pliocene and Miocene periods there were true apes and baboons, and man was undeniably contemporaneous with the former of those times -- though as we see orthodox anthropology still hesitates in the teeth of facts to place him in the era of the Dryopithecus, which latter "has been considered by some anatomists as in some respects superior to the chimpanzee or the gorilla" -- yet, in the Eocene there have been no other fossil primates unearthed and no pithecoïd stocks found save a few extinct lemurian forms. And we find it also hinted that the Dryopithecus may have been the "missing link," though the brain of the creature no more warrants the theory than does the brain of the modern gorilla. (Vide also Gaudry's speculations.)

Now we would ask who among the Scientists is ready to prove that there was no man in existence in the early Tertiary period? What is it that prevented his presence? Hardly thirty years ago his existence any farther back than 6, or 7,000 years was indignantly denied. Now he is refused admission into the Eocene age. Next century it may become a question whether man was not contemporary with the "flying Dragons;" the pterodactyl, the plesiosaurus and iguanodon, etc., etc. Let us listen, however, to the echo of Science.

[[Footnote(s)]] -----

* This the way primitive man must have acted? We do not know of men, not even of savages, in our age, who are known to have imitated the apes who live side by side with them in the forests of America and the islands. We do know of large apes who, tamed and living in houses, will mimic men to the length of donning hats and coats. The writer had personally a chimpanzee who, without being taught, opened a newspaper and pretended to read in it. It is the descending generations, the children, who mimic their parents -- not the reverse.

[[Vol. 2, Page]] 677 INSURMOUNTABLE DIFFICULTIES.

"Now wherever anthropoid apes lived, it is clear that, whether as a question of anatomical structure, or of climate and surroundings, man, or some creature which was the ancestor of man, might have lived also. Anatomically speaking, apes and monkeys are as much special variations of the mammalian type as man, whom they resemble, bone for bone, and muscle for muscle, and the physical animal man is simply an instance of the quadrumanous type specialised for erect posture and a larger brain" If he could survive, as we know he did, the adverse conditions and extreme vicissitudes of the Glacial period, there is no reason why he might not have lived in the semi-tropical climate of the Miocene period, when a genial climate extended even to Greenland and Spitzbergen" ("Modern Science and Modern Thought," p. 152.)

While most of the men of Science, who are uncompromising in their belief in the descent of man from an "extinct anthropoid mammal," will not accept even the bare tenability of any other theory than an ancestor common to man and the Dryopithecus, it is refreshing to find in a work of real scientific value such a margin for compromise. Indeed, it is as wide as it can be made under the circumstances, i.e., without immediate danger of getting knocked off one's feet by the

tidal wave of "science-adulation." Believing that the difficulty of accounting "for the development of intellect and morality by evolution is not so great as that presented by the difference as to physical structure** between man and the highest animal," the same author says:--

"But it is not so easy to see how this difference of physical structure arose, and how a being came into existence which had such a brain and hand, and such undeveloped capabilities for an almost unlimited progress. The difficulty is this: the difference in structure between the lowest existing race of man and the highest existing ape is too great to admit of the possibility of one being the direct descendant of the other. The negro in some respects makes a slight approximation towards the Simian type. His skull is narrower, his brain less capacious, his muzzle more projecting, his arm longer than those of the

[[Footnote(s)]] -----

* It is asked, whether it would change one iota of the scientific truth and fact contained in the above sentence if it were to read: "the ape is simply an instance of the biped type specialized for going on all fours, generally, and a smaller brain." Esoterically speaking, this is the real truth, and not the reverse.

** We cannot follow Mr. Laing here. When avowed Darwinists like Huxley point to "the great gulf which intervenes between the lowest ape and the highest man in intellectual power," the "enormous gulf . . . between them," the "immeasurable and practically infinite divergence of the Human from the Simian stirps" (Man's Place in Nature, pp. 102-3); when even the physical basis of mind -- the brain -- so vastly exceeds in size that of the highest existing apes; when men like Wallace are forced to invoke the agency of extra-terrestrial intelligences in order to explain the rise of such a creature as the Pithecanthropus alalus, or speechless savage of Haeckel, to the level of the large-brained and moral man of to-day -- it is idle to dismiss Evolutionist puzzles so lightly. If the structural evidence is so unconvincing and, taken as a whole, so hostile to Darwinism, the difficulties as to the "how" of the Evolution of the human mind by natural selection are tenfold greater.

[[Vol. 2, Page]] 678 THE SECRET DOCTRINE.

average European man. Still he is essentially a man, and separated by a wide gulf from the chimpanzee or the gorilla. Even the idiot or cretin, whose brain is no larger and intelligence no greater than that of the chimpanzee, is an arrested man, not an ape."

"If, therefore, the Darwinian theory holds good in the case of man and ape, we must go back to some common ancestor from whom both may have originated But to establish this as a fact and not a theory we require to find that ancestral form, or, at any rate, some intermediate forms tending towards it in other words the missing link! Now it must be admitted that, hitherto, not only have no such missing links been discovered, but the oldest known human skulls and skeletons which date from the Glacial period, and are probably at least 100,000 years old, show no very decided approximation towards any such pre-human type. On the contrary, one of the oldest types, that of the men of the sepulchral cave of Cro-Magnon,* is that of a fine race, tall in stature, large in brain, and on the whole superior to many of the existing races of mankind. The reply of course is that the time is insufficient, and if man and the ape had a common ancestor, that as a highly developed anthropoid ape, certainly, and man, probably, already existed in the Miocene period, such ancestor must be sought still further back at a distance compared with which the whole Quaternary period sinks into insignificance It may well make us hesitate before we admit that man . . . is alone an exception. . . . This is more difficult to believe, as the ape family which man (?) so closely resembles contains numerous branches which graduate into one another, but the extremes of which differ more widely than man does from the highest of the ape series. If a special creation is required for man, must there not have been special creations for the chimpanzee, the gorilla, the orang, and for at least 100 different species of ape and monkeys which are all built on the same lines?" (p. 182, "Modern Science, etc.")

There was a "special creation" for man, and a "special creation" for the ape, his progeny; only on other lines than ever bargained for by Science. Albert Gaudry and others give some weighty reasons why man cannot be regarded as the crown of an ape-stock. When one finds that not only was the "primeval savage" (?) a reality in the Miocene times, but that, as de Mortillet shows, the flint relics he has left behind him were splintered by fire in that remote epoch; when we learn that the Dryopithecus, alone of the anthropoids, appears in those strata, what is the natural inference? That the Darwinians are in a quandary. The very manlike Gibbon is still in the same low grade of development, as it was when it co-existed with Man at the close of the Glacial Period. It has not appreciably altered since the Pliocene times. Now there is little to choose between the Dryopithecus and the existing anthropoids -- gibbon, gorilla, etc. If, then, the Darwinian theory is all-sufficient, how are we to "explain" the evolution of this

[[Footnote(s)]] -----

* A race which MM. de Quatrefages and Hamy regard as a branch of the same stock whence the Canary Island Guanches sprung -- offshoots of the Atlanteans, in short.

[[Vol. 2, Page]] 679 MATERIALISM IS PUZZLED.

ape into Man during the first half of the Miocene? The time is far too short for such a theoretical transformation. The extreme slowness with which variation in species supervenes renders the thing inconceivable -- more especially on the Natural Selection hypothesis. The enormous mental and structural gulf between a savage acquainted with fire and the mode of kindling it, and a brutal anthropoid, is too much to bridge even in idea, during so contracted a period. Let the Evolutionists push back the process into the preceding Eocene, if they prefer to do so; let them even trace both Man and Dryopithecus to a common ancestor; the unpleasant consideration has, nevertheless, to be faced that in Eocene strata the anthropoid fossils are as conspicuous by their absence, as is the fabulous pithecanthropus of Haeckel. Is an exit out of this cul de sac to be found by an appeal to the "unknown," and a reference with Darwin to the "imperfection of the geological record"? So be it; but the same right of appeal must be accorded equally to the Occultists, instead of remaining

the monopoly of puzzled materialism. Physical man, we say, existed before the first bed of the Cretaceous rocks was deposited. In the early part of the Tertiary Age, the most brilliant civilization the world has ever known flourished at a period when the Haeckelian man-ape is conceived to have roamed through the primeval forests, and Mr. Grant Allen's putative ancestor to have swung himself from bough to bough with his hairy mates, the degenerated Liliths of the Third Race Adam. Yet there were no anthropoid apes in the brighter days of the civilization of the Fourth Race; but Karma is a mysterious law, and no respecter of persons. The monsters bred in sin and shame by the Atlantean giants, "blurred copies" of their bestial sires, and hence of modern man (Huxley), now mislead and overwhelm with error the speculative Anthropologist of European Science.

Where did the first men live? Some Darwinists say in Western Africa, some in Southern Asia, others, again, believe in an independent origin of human stocks in Asia and America from a Simian ancestry (Vogt). Haeckel, however, advances gaily to the charge. Starting from his "prosimiae" . . . "the ancestor common to all other catarrhini, including man" -- a "link" now, however, disposed of for good by recent anatomical discoveries! -- he endeavours to find a habitat for the primeval Pithecanthropus alalus. "In all probability it (the transformation of animal into man) occurred in Southern Asia, in which region many evidences are forthcoming that here was the original home of the different species of men. Probably Southern Asia itself was not the earliest cradle of the human race, but LEMURIA, a continent that lay to the south of Asia, and sank later on beneath the surface of the Indian Ocean. (Vide infra, "Scientific and geological proofs of the former existence of several

[[Vol. 2, Page]] 680 THE SECRET DOCTRINE.

submerged continents.") "The period during which the evolution of the anthropoid apes into apelike men took place was probably the last part of the tertiary period, the Pliocene Age, and perhaps the Miocene, its forerunner." (Pedigree of Man, p. 73.)

Of the above speculations, the only one of any worth is that referring to Lemuria, which was the cradle of mankind -- of the physical sexual creature who materialized through long aeons out of the ethereal hermaphrodites. Only, if it is proved that Easter Island is an actual relic of Lemuria, we must believe that according to Haeckel the "dumb ape-men," just removed from a brutal mammalian monster, built the gigantic portrait-statues, some of which are now in the British Museum. Critics are mistaken in terming Haeckelian doctrines "abominable, revolutionary, immoral" -- though materialism is the legitimate outcome of the ape-ancestor myth -- they are simply too absurd to demand disproof.

B.

WESTERN EVOLUTIONISM: THE COMPARATIVE ANATOMY OF MAN AND THE ANTHROPOID IN NO WAY A CONFIRMATION OF DARWINISM.

We are told that while every other heresy against modern science may be disregarded, this, our denial of the Darwinian theory as applied to Man, will be the one "unpardonable" sin. The Evolutionists stand firm as rock on the evidence of similarity of structure between the ape and the man. The anatomical evidence, it is urged, is quite overpowering in this case; it is bone for bone, and muscle for muscle, even the brain conformation being very much the same.

Well, what of that? All this was known before King Herod; and the writers of the Ramayana, the poets who sang the prowess and valour of Hanuman, the monkey-God, "whose feats were great and Wisdom never rivalled," must have known as much about his anatomy and brain as does any Haeckel or Huxley in our modern day. Volumes upon volumes were written upon this similarity, in antiquity as in more modern times. Therefore, there is nothing new whatever given to the world or to philosophy, in such volumes as Mivart's "Man and Apes," or Messrs. Fiske and Huxley's defence of Darwinism. But what are those crucial proofs of man's descent from a pithecoïd ancestor? If the Darwinian theory is not the true one -- we are told -- if man and ape do not descend from a common ancestor, then we are called upon to explain the reason of:--

(I.) The similarity of structure between the two; the fact that the

[[Vol. 2, Page 681]] HUXLEY CALLS THE DARWINISTS TO ORDER.

higher animal world -- man and beast -- is physically of one type or pattern.

(II.) The presence of rudimentary organs in man, i.e., traces of former organs now atrophied by disuse. Some of these organs, it is asserted, could not have had any scope for employment, except for a semi-animal, semi-arboreal monster. Why, again, do we find in Man those "rudimentary" organs (as useless as its rudimentary wing is to the Apteryx of Australia), the vermiform appendix of the coecum, the ear muscles,* the "rudimentary tail" (with which children are still sometimes born), etc., etc.?

Such is the war cry; and the cackle of the smaller fry among the Darwinians is louder, if possible, than even that of the scientific Evolutionists themselves!

Furthermore, the latter themselves -- with their great leader Mr. Huxley, and such eminent zoologists as Mr. Romanes and others -- while defending the Darwinian theory, are the first to confess the almost insuperable difficulties in the way of its final demonstration. And there are as great men of science as the above-named, who deny, most emphatically, the uncalled-for assumption, and loudly denounce the unwarrantable exaggerations on the question of this supposed similarity. It is sufficient to glance at the works of Broca, Gratiolet, of Owen, Pruner-Bey, and finally, at the last great work of de Quatrefages, "Introduction a l'Etude des Races humaines, Questions generales," to discover the fallacy of the Evolutionists. We may say more: the exaggerations concerning such similarity of structure between man and the anthropomorphous ape have become so glaring and absurd of late, that even Mr. Huxley found himself forced to protest

against the too sanguine expectations. It was that great anatomist personally who called the "smaller fry" to order, by declaring in one of his articles that the differences in the structure of the human body and that of the highest anthropomorphous pithecoïd, were not only far from being trifling and unimportant, but were, on the contrary, very great and suggestive: "each of the bones of the gorilla has its own specific impress on it that distinguishes it from a similar human bone." Among the existing creatures there is not one single intermediate form that could fill the gap between man and the ape. To ignore that gap, he added, "was as uncalled-for as it was absurd."**

[[Footnote(s)]] -----

* Professor Owen believes that these muscles -- the attollens, retrahens, and attrahens aurem -- were actively functioning in men of the Stone Age. This may or may not be the case. The question falls under the ordinary "occult" explanation, and involves no postulate of an "animal progenitor" to solve it.

** Quoted in the Review of the "Introduction a l'Etude des Races Humaines," by de Quatrefages. We have not Mr. Huxley's work at hand to quote from. Or to cite another good authority:-- "We find one of the most man-like apes (gibbon), in the [[Footnote continued on next page]]

[[Vol. 2, Page]] 682 THE SECRET DOCTRINE.

Finally, the absurdity of such an unnatural descent of man is so palpable in the face of all the proofs and evidence of the skull of the pithecoïd as compared to that of man, that even de Quatrefages resorted unconsciously to our esoteric theory by saying that it is rather the apes that can claim descent from man than vice versa. As proven by Gratiolet, with regard to the cavities of the brain of the anthropoids, in which species that organ develops in an inverse ratio to what would be the case were the corresponding organs in man really the product of the development of the said organs in the apes -- the size of the human skull and its brain, as well as the cavities, increase with the individual development of man. His intellect develops and increases with age, while his facial bones and jaws diminish and straighten, thus being more and more spiritualized: whereas with the ape it is the reverse. In its youth the anthropoid is far more intelligent and good-natured, while with age it becomes duller; and, as its skull recedes and seems to diminish as it grows, its facial bones and jaws develop, the brain being finally crushed, and thrown entirely back, to make with every day more room for the animal type. The organ of thought -- the brain -- recedes and diminishes, entirely conquered and replaced by that of the wild beast -- the jaw apparatus.

Thus, as wittily remarked in the French work, a gorilla would have a perfect right to address an Evolutionist, claiming its right of descent from himself. It would say to him, "We, anthropoid apes, form a retrogressive departure from the human type, and therefore our development and evolution are expressed by a transition from a human-like to an animal-like structure of organism; but in what way could you, men, descend from us -- how can you form a continuation of our genus? For, to make this possible, your organization would have to differ still more than ours does from the human structure, it would have to approach still closer to that of the beast than ours does; and in such a case justice demands that you should give up to us your place in nature. You are lower than we are, once that you insist on tracing your genealogy from our kind; for the structure of our organization and its development are such that we are unable to generate forms of a higher organization than our own."

This is where the Occult Sciences agree entirely with de Quatre-

[[Footnote(s)]] -----

[[Footnote continued from previous page]] tertiary period, and this species is still in the same low grade, and side by side with it at the end of the Ice-period, man is found in the same high grade as to-day, the ape not having approximated more nearly to the man, and modern man not having become further removed from the ape than the first (fossil) man . . . these facts contradict a theory of constant progressive development." (Pfaff.) When, according to Vogt, the the average Australian brain = 99.35 cub. inches; that of the gorilla 30.51 cub. in., and that of the chimpanzee only 25.45, the giant gap to be bridged by the advocate of "Natural" Selection becomes apparent.

[[Vol. 2, Page]] 683 THE DARWINISTS AND THEIR OPPONENTS.

fages. Owing to the very type of his development man cannot descend from either an ape or an ancestor common to both, but shows his origin from a type far superior to himself. And this type is the "Heavenly man" -- the Dhyana Chohans, or the Pitris so-called, as shown in the first Part of this volume. On the other hand, the pithecoïds, the orang-outang, the gorilla, and the chimpanzee can, and, as the Occult Sciences teach, do, descend from the animalized Fourth human Root-Race, being the product of man and an extinct species of mammal -- whose remote ancestors were themselves the product of Lemurian bestiality -- which lived in the Miocene age. The ancestry of this semi-human monster is explained in the Stanzas as originating in the sin of the "Mind-less" races of the middle Third Race period.

When it is borne in mind that all forms which now people the earth, are so many variations on basic types originally thrown off by the MAN of the Third and Fourth Round, such an evolutionist argument as that insisting on the "unity of structural plan" characterising all vertebrates, loses its edge. The basic types referred to were very few in number in comparison with the multitude of organisms to which they ultimately gave rise; but a general unity of type has, nevertheless, been preserved throughout the ages. The economy of Nature does not sanction the co-existence of several utterly opposed "ground plans" of organic evolution on one planet. Once, however, that the general drift of the occult explanation is formulated, inference as to detail may well be left to the intuitive reader.

Similarly with the important question of the "rudimentary" organs discovered by anatomists in the human organism. Doubtless this line of argument, when wielded by Darwin and Haeckel against their European adversaries, proved of great weight. Anthropologists, who ventured to dispute the derivation of man from an animal ancestry, were sorely puzzled how to deal with the presence of gill-clefts, with the "tail" problem, and so on. Here again Occultism comes to our assistance with the necessary data.

The fact is that, as previously stated, the human type is the repertory of all potential organic forms, and the central point from which these latter radiate. In this postulate we find a true "Evolution" or "Unfolding" -- a sense which cannot be said to belong to the mechanical theory of natural selection. Criticising Darwin's inference from "rudiments," an able writer remarks: "Why is it not just as probably a true hypothesis to suppose that Man was created with the rudimentary sketches in his organization, and that they became useful appendages in the lower animals into which man degenerated, as to suppose that these parts existed in full development in the lower animals out of which man was generated?" ("Creation or Evolution?" Geo. T. Curtis, p. 76.)

[[Vol. 2, Page]] 684 THE SECRET DOCTRINE.

Read for "into which Man degenerated," "the prototypes which man shed in the course of his astral developments," and an aspect of the true esoteric solution is before us. But a wider generalization is now to be formulated.

So far as our present Fourth Round terrestrial period is concerned, the mammalian fauna are alone to be regarded as traceable to prototypes shed by Man. The amphibia, birds, reptiles, fishes, etc., are the resultants of the Third Round, astral fossil forms stored up in the auric envelope of the Earth and projected into physical objectivity subsequent to the deposition of the first Laurentian rocks. "Evolution" has to deal with the progressive modifications, which palaeontology shows to have affected the lower animal and vegetable kingdoms in the course of geological time. It does not, and from the nature of things cannot, touch on the subject of the pre-physical types which served as the basis for future differentiation. Tabulate the general laws controlling the development of physical organisms it certainly may, and to a certain extent it has acquitted itself ably of the task.

To return to the immediate subject of discussion. The mammalia, whose first traces are discovered in the marsupials of the Triassic rocks of the Secondary Period, were evolved from purely astral progenitors contemporary with the Second Race. They are thus post-Human, and, consequently, it is easy to account for the general resemblance between their embryonic stages and those of Man, who necessarily embraces in himself and epitomizes in his development the features of the group he originated. This explanation disposes of a portion of the Darwinist brief. "But how to account for the presence of the gill-clefts in the human foetus, which represent the stage through which the branchiae of the fish are developed;* for the pulsating vessel corresponding to the heart of the lower fishes, which constitutes the foetal heart; for the entire analogy presented by the segmentation of the human ovum, the formation of the blastoderm, and the appearance of the 'gastrula' stage, with corresponding stages in lower vertebrate life and even among the sponges; for the various types of lower animal life which the form of the future child shadows forth in the cycle of its growth?" "How comes it to pass that stages in the life of fishes, whose ancestors swam" -- aeons before the epoch of the First Root-Race,

[[Footnote(s)]] -----

* "At this period," writes Darwin, "the arteries run in arch-like branches, as if to carry the blood to branchiae which are not present in the higher vertebrata, though the slits on the side of the neck still remain, marking their former (?) position."

It is noteworthy that, though gill-clefts are absolutely useless to all but amphibia and fishes, etc., their appearance is regularly noted in the foetal development of vertebrates. Even children are occasionally born with an opening in the neck corresponding to one of the clefts.

[[Vol. 2, Page]] 685 REVERSION FROM THE WRONG END.

-- "in the seas of the Silurian period, as well as stages in that of the later amphibian, reptilian fauna, are mirrored in the 'epitomized history' of human foetal development?"

This plausible objection is met by the reply that the Third Round terrestrial animal forms were just as much referable to types thrown off by Third Round man, as that new importation into our planet's area -- the mammalian stock -- is to the Fourth Round Humanity of the Second Root-race. The process of human foetal growth epitomizes not only the general characteristics of the Fourth, but of the Third Round terrestrial life. The diapason of type is run through in brief. Occultists are thus at no loss to "account for" the birth of children with an actual caudal appendage, or for the fact that the tail in the human foetus is, at one period, double the length of the nascent legs. The potentiality of every organ useful to animal life is locked up in Man -- the microcosm of the Macrocosm -- and abnormal conditions may not unfrequently result in the strange phenomena which Darwinists regard as "reversion to ancestral features."* Reversion, indeed, but scarcely in the sense contemplated by our present-day empiricists!

C

DARWINISM AND THE ANTIQUITY OF MAN: THE ANTHROPOIDS AND THEIR ANCESTRY.

The public has been notified by more than one eminent modern geologist and man of science, that "all estimate of geological duration is not merely impossible, but necessarily imperfect; for we are ignorant of the causes, though they must have existed, which quickened or retarded the progress of the sedimentary deposits."** And now another man of Science, as well known (Croll), calculating that the tertiary age began either 15 or 2 1/2 million of years ago -- the former being a more correct calculation, according to Esoteric doctrine, than the latter there -- seems in this case, at least, no very great disagreement. Exact Science, refusing to see in man "a special creation" (to a certain degree the Secret Sciences do the same), is at liberty to ignore the first three, or rather two-and-a-half Races -- the Spiritual, the semi-astral, and the

[[Footnote(s)]] -----

* Those who with Haeckel regard the gill-clefts with their attendant phenomena as illustrative of an active function in our amphibian and piscine ancestors (Vide his XII. and XIII. stages), ought to explain why the "Vegetable with leaflets" (Lefevre) represented in foetal growth, does not appear in his 22 stages through which the monera have passed in their ascent to Man. Haeckel does not postulate a vegetable ancestor. The embryological argument is thus a two-edged sword and here cuts its possessor.

** "Physiology," Lefevre, p. 480.

[[Vol. 2, Page]] 686 THE SECRET DOCTRINE.

semi-human -- of our teachings. But it can hardly do the same in the case of the Third at its closing period, the Fourth, and the Fifth Races, since it already divides mankind into Palaeolithic and Neolithic man.* The geologists of France place man in the mid-miocene age (Gabriel de Mortillet), and some even in the Secondary period, as de Quatrefages suggests; while the English savants do not generally accept such antiquity for their species. But they may know better some day. For "If we consider," says Sir Charles Lyell in "Antiquity of Man," p. 246 --

"the absence or extreme scarcity of human bones and works of art in all strata, whether marine or fresh water, even in those formed in the immediate proximity of land inhabited by millions of human beings, we shall be prepared for the general dearth of human memorials in glacial formations, whether recent, Pleistocene, or of more ancient date. If there were a few wanderers over lands covered with glaciers, or over seas infested with icebergs, and if a few of them left their bones or weapons in moraines or in marine drifts, the chances, after the lapse of thousands of years, of a geologist meeting with one of them must be infinitesimally small."

The men of Science avoid pinning themselves down to any definite statement concerning the age of man, as indeed they hardly could, and thus leave enormous latitude to bolder speculations. Nevertheless, while the majority of the Anthropologists carry back the existence of man only into the period of the post-glacial drift, or what is called the Quaternary period, those of them who, as Evolutionists, trace man to a common origin with that of the monkey, do not show great consistency in their speculations. The Darwinian hypothesis demands, in reality, a far greater antiquity for man, than is even dimly suspected by superficial thinkers. This is proven by the greatest authorities on the question -- Mr. Huxley, for instance. Those, therefore, who accept the Darwinian evolution, ipso facto hold very tenaciously to an antiquity

[[Footnote(s)]] -----

* We confess to not being able to see any good reasons for Mr. E. Clodd's certain statement in Knowledge. Speaking of the men of Neolithic times, "concerning whom Mr. Grant Allen has given . . . a vivid and accurate sketch," and who are "the direct ancestors of peoples of whom remnants yet lurk in out-of-the-way corners of Europe, where they have been squeezed or stranded," he adds to this: "but the men of Palaeolithic times can be identified with no existing races; they were savages of a more degraded type than any extant; tall, yet barely erect, with short legs and twisted knees, with prognathous, that is, projecting ape-like jaws, and small brains. Whence they come we cannot tell, and their 'grave knoweth no man to this day.' "

Besides the possibility that there may be men who know whence they came and how they perished -- it is not true to say that the Palaeolithic men, or their fossils, are all found with "small brains." The oldest skull of all those hitherto found, the "Neanderthal skull," is of average capacity, and Mr. Huxley was compelled to confess that it was no real approximation whatever to that of the "missing link." There are aboriginal tribes in India whose brains are far smaller and nearer to that of the ape than any hitherto found among the skulls of Palaeolithic man.

[[Vol. 2, Page]] 687 GRANT ALLEN'S ILLUSIONS.

of man so very great, indeed, that it falls not so far short of the Occultist's estimate.* The modest thousands of years of the Encyclopaedia Britannica and the 100,000 years, to which Anthropology in general limits the age of Humanity, seem quite microscopical when compared with the figures implied in Mr. Huxley's bold speculations. The former, indeed, makes of the original race of men ape-like cave-dwellers. The great English biologist, in his desire to prove man's pithecoïd origin, insists that the transformation of the primordial ape into a human being must have occurred millions of years back. For in criticising the excellent average cranial capacity of the Neanderthal skull, notwithstanding his assertion that it is overlaid with "pithecoïd bony walls," coupled with Mr. Grant Allen's assurances that this skull "possesses large bosses on the forehead, strikingly (?) suggestive of those which give the gorilla its peculiarly fierce appearance,"** (Fortnightly Review, 1882,) still Mr. Huxley is forced to admit that, in the said skull, his theory is once more defeated by the "completely human proportions of the accompanying limb-bones, together with the fair development of the Engis skull." In consequence of all this we are notified that those skulls, "clearly indicate that the first traces of the primordial stock whence man has proceeded, need no longer be sought by those who entertain any form of the doctrine of progressive development in the newest Tertiaries; but that they may be looked for in an epoch more distant from the age of the ELEPHAS PRIMIGENIUS than that is from us"*** (Huxley).

[[Footnote(s)]] -----

* The actual time required for such a theoretical transformation is necessarily enormous. "If," says Professor Pfaff, "in the hundreds of thousands of years which you (the Evolutionists) accept between the rise of palaeolithic man and our own day, a greater distance of man from the brute is not demonstrable, (the most ancient man was just as far removed from the brute as the now living man), what reasonable ground can be advanced for believing that man has been developed from the brute, and has receded further from it by infinitely small gradations." . . . "The longer the interval of time placed between our times and the so-called palaeolithic men, the more ominous and destructive for the theory of the gradual development of man from the animal kingdom is the result stated." Huxley states ("Man's Place in Nature," p. 159) that the most liberal estimates for the antiquity of Man must be still further extended.

** The baselessness of this assertion, as well as that of many other exaggerations of the imaginative Mr. Grant Allen, was ably exposed by the eminent anatomist, Professor R. Owen, in "Longman's Magazine," No. 1. Must it be repeated, moreover, that the Cro-Magnon Palaeolithic type is superior to a very large number of existing races?

*** It thus stands to reason that science would never dream of a pre-tertiary man, and that de Quatrefages' secondary man makes every Academician and "F.R.S." faint with horror because, TO PRESERVE THE APE-THEORY, SCIENCE MUST MAKE MAN POST-SECONDARY. This is just what de Quatrefages has twitted the Darwinists with, adding, that on the whole there were more scientific reasons to trace the ape from man than man from the anthropoid. With this exception science has not one single valid argu- [[Footnote continued on next page]]

[[Vol. 2, Page]] 688 THE SECRET DOCTRINE.

An untold antiquity for man is thus, then, the scientific sine qua non in the question of Darwinian Evolution, since the oldest Palaeolithic man shows as yet no appreciable differentiation from his modern descendant. It is only of late that modern Science began to widen with every year the abyss that now separates her from old Science, that of the Plinies and Hippocrateses, none of whom would have derided the archaic teachings with respect to the evolution of the human races and animal species, as the present day Scientist -- geologist or anthropologist -- is sure to do.

Holding, as we do, that the mammalian type was a post-human Fourth Round product, the following diagram -- as the writer understands the teaching -- may make the process clear:--

[[diagram]]

[[text on diagram:]]
Primeval Astral Man
Second Astral Race
Race Third Semi Astral
Astral Mammals Prototypes
3rd Race Man
Separation into Sexes
4th Race M, physical
5th Race Man
Lower (physical) mammals
Lower Apes.

The unnatural union was invariably fertile, because the then mammalian types were not remote enough from their Root-type* -- Primeval Astral

[[Footnote(s)]] -----

[[Footnote continued from previous page]] ment to offer against the antiquity of man. But in this case modern Evolution demands far more than the fifteen million years of Croll for the Tertiary period, for two very simple but good reasons: (a) No anthropoid ape has been found before the Miocene period: (b) man's flint relics have been traced to the Pliocene and their presence suspected, if not accepted by all, in the Miocene strata. Again, where is the "missing link" in such case? And how could even a Palaeolithic Savage, a "Man of Canstadt," evolve into thinking men from the brute Dryopithecus of the Miocene in so short a time. One sees now the reason why Darwin rejected the theory that only 60,000,000 years had elapsed since the Cambrian period. "He judges from the small amount of organic changes since the glacial epoch, and adds that the previous 140 million years can hardly be considered as sufficient for the development of the varied forms of life which certainly existed toward the close of the Cambrian period." (Ch. Gould.)

* Let us remember in this connection the esoteric teaching which tells us of Man having had in the Third Round a GIGANTIC APE-LIKE FORM on the astral plane. And similarly at the close of the Third Race in this Round. Thus it accounts for the human features of the apes, especially of the later anthropoids -- apart from the fact that these latter preserve by Heredity a resemblance to their Atlanto-Lemurian sires.

[[Vol. 2, Page]] 689 THE INCUBUS OF ETHNOLOGY.

Man -- to develop the necessary barrier. Medical science records such cases of monsters, bred from human and animal parents, even in our own day. The possibility is, therefore, only one of degree, not of fact. Thus it is that Occultism solves one of the strangest problems presented to the consideration of the anthropologist.

The pendulum of thought oscillates between extremes. Having now finally emancipated herself from the shackles of theology, Science has embraced the opposite fallacy; and in the attempt to interpret Nature on purely materialistic lines, she has built up that most extravagant theory of the ages -- the derivation of man from a ferocious and brutal ape. So rooted has this doctrine, in one form or another, now become, that the most Herculean efforts will be needed to bring about its final rejection. The Darwinian anthropology is the incubus of the ethnologist, a sturdy child of modern Materialism, which has grown up and acquired increasing vigour, as the ineptitude of the theological legend of Man's "creation" became more and more apparent. It has thriven on account of the strange delusion that -- as a scientist of repute puts it -- "All hypotheses and theories with respect to the rise of man can be reduced to two (the Evolutionist and the Biblical exoteric account) . . . There is no other hypothesis conceivable . . ." !! The anthropology of the secret volumes is, however, the best possible answer to such a worthless contention.

The anatomical resemblance between Man and the higher Ape, so frequently cited by Darwinists as pointing to some former ancestor common to both, presents an interesting problem, the proper solution of which is to be sought for in the esoteric explanation of the genesis of the pithecoïd stocks. We have given it as far as was useful, by stating that the

bestiality of the primeval mindless races resulted in the production of huge man-like monsters -- the offspring of human and animal parents. As time rolled on, and the still semi-astral forms consolidated into the physical, the descendants of these creatures were modified by external conditions, until the breed, dwindling in size, culminated in the lower apes of the Miocene period. With these the later Atlanteans renewed the sin of the "Mindless" -- this time with full responsibility. The resultants of their crime were the species of apes now known as Anthropoid.

It may be useful to compare this very simple theory -- and we are willing to offer it even as a hypothesis to the unbelievers -- with the Darwinian scheme, so full of insurmountable obstacles, that no sooner is one of these overcome by a more or less ingenious hypothesis, than ten worse difficulties are forthwith discovered behind the one disposed of.

[[Vol. 2, Page]] 690 THE SECRET DOCTRINE.

§ IV.

DURATION OF THE GEOLOGICAL PERIODS, RACE CYCLES, AND THE ANTIQUITY OF MAN.

MILLIONS of years have dropped into Lethe, leaving no more recollection in the memory of the profane than the few millenniums of the orthodox Western chronology as to the origin of Man and the history of the primeval races.

All depends on the proofs found for the antiquity of the Human Race. If the still-debated man of the Pliocene or even the Miocene period was the Homo primigenius, then science may be right (argumenti causa) in basing its present anthropology -- as to the date and mode of origin of "Homo sapiens" -- on the Darwinian theory.* But if the skeletons of man should, at any time, be discovered in the Eocene strata, but no fossil ape, thereby proving the existence of man prior to the anthropoid -- then Darwinians will have to exercise their ingenuity in another direction. And it is said in well-informed quarters that the XXth century will be yet in its earliest teens, when such undeniable proof of Man's priority will be forthcoming.

Even now evidence is brought forward that the dates for the foundations of cities, civilizations and various other historical events have been absurdly curtailed. This was done as a peace-offering to Biblical chronology. "No date," writes the well-known Palaeontologist, Ed. Lartet, "is to be found in Genesis, which assigns a time for the birth of primitive humanity"; but chronologists have for fifteen centuries endeavoured to force the Bible facts into agreement with their systems. Thus, no less than one hundred and forty different opinions have been formed about the single date of "Creation"; "and between the extreme variations there is a discrepancy of 3,194 years, in the reckoning of the period between the beginning of the world and the birth of Christ.** Within the last few years, archaeologists have had to throw back by nearly 3,000 years also the beginnings of Babylonian civilization. On the

[[Footnote(s)]] -----

* It may here be remarked that those Darwinians, who with Mr. Grant Allen, place our "hairy arboreal" ancestors so far back as the Eocene Age, are landed in rather an awkward dilemma. No fossil anthropoid ape -- much less the fabulous common ancestor assigned to Man and the Pithecoïd -- appears in Eocene strata. The first presentment of an anthropoid ape is Miocene.

** Ed. Lartet, "Nouvelles Recherches sur la co-existence de l'homme et des Grands Mammiferes Fossils de la dernière periode Geologique." Annales des Soc. Nat., t. XV., p. 256.

[[Vol. 2, Page]] 691 PROFESSOR SAYCE SKETCHES OUT CHRONOLOGY.

foundation cylinder deposited by Nabonidus, the Babylonian king, conquered by Cyrus -- are found the records of the former, in which he speaks of his discovery of the foundation stone that belonged to the original temple built by Naram-Sin, son of Sargon, of Accadia, the conqueror of Babylonia, who, says Nabonidus, lived 3,200 years before his own time."

We have shown in Isis that those who based history on the Jewish Chronology (a race which had none of its own and rejected the Western till the XIIth century) would lose themselves, for the Jewish account could only be followed through Kabalistic computation, and with a key to it in the hand. . . We had characterised the late George Smith's chronology of the Chaldeans and Assyrians, made by him to fit in with that of Moses, as quite fantastic. And now, in this respect at least, later Assyriologists have corroborated our denial. For, whereas G. Smith makes Sargon I. (the prototype of Moses in his legend) reign in the city of Akkad about 1600 B.C. -- probably out of a latent respect for Moses, whom the Bible makes to flourish 1571 B.C. -- we now learn from the first of the six Hibbert lectures delivered by Professor A. H. Sayce, of Oxford, in 1887, that: "Old views of the early annals of Babylonia and its religions have been much modified by recent discovery. The first Semitic Empire, it is now agreed, was that of Sargon of Accad, who established a great library, patronized literature, and extended his conquests across the sea into Cyprus. It is now known that he reigned as early as B.C. 3750." "The Accadian monuments found by the French at Tel-loh must be even older, reaching back to about B.C. 4,000," in other words, to the fourth year of the World's creation agreeably with Bible chronology, and when Adam was in his swaddling clothes. Perchance, in a few years more, the 4,000 years may be further extended. The well-known Oxford lecturer remarked during his disquisitions upon "The origin and Growth of Religion as illustrated by the Babylonian Religion" that: "The difficulties of systematically tracing the origin and history of the Babylonian Religion were considerable. The sources of our knowledge of the subject were almost wholly monumental, very little help being obtainable from classical or Oriental writers. Indeed, it was an undeniable fact that the Babylonian priesthood intentionally swaddled up the study of the religious texts in coils of almost insuperable difficulty." That they have confused the dates, and especially the order of events "intentionally," is undeniable, and for a very good reason: their writings and records were all esoteric. The Babylonian priests did no more than the Priests of other ancient nations. Their records were meant only for the Initiates and their disciples, and it is only the latter who were furnished with the keys to the true meaning. But Professor

Sayce's remarks are promising. For he explains the difficulty by saying that as -- "the Nineveh library contained mostly copies of older Babylonian texts, and the copyists pitched upon such tablets only as were of special interest to the Assyrian conquerors, belonging to a comparatively late epoch, this added much to the greatest of all our difficulties -- namely, our being so often left in the dark as to the age of our documentary evidence, and the precise worth of our materials for history." Thus one has a right to infer that some still fresher discovery may lead to a new necessity for pushing the Babylonian dates so far beyond the year 4,000 B.C., as to make them pre-Kosmic in the judgment of every Bible worshipper.

How much more would paleontology have learned had not millions of works been destroyed! We talk of the Alexandrian literary lore, which has been thrice destroyed, namely, by Julius Caesar B.C. 48, in A.D. 390, and lastly in the year 640, A.D., by the general of Kaliph Omar. What is this in comparison with the works and records destroyed in the primitive Atlantean Libraries, wherein records are said to have been traced on the tanned skins of gigantic antediluvian monsters? Or again the destruction of the countless Chinese books by command of the founder of the Imperial Tsin dynasty, Tsin Shi Hwang-ti, in 213 B.C.? Surely the brick-clay tablets of the Imperial Babylonian Library, and the priceless treasures of the Chinese collections could have never contained such information as one of the aforesaid "Atlantean" skins would have furnished to the ignorant world.

But even with the extremely meagre data at hand, Science has been able to see the necessity of throwing back nearly every Babylonian date, and has done so quite generously. We learn from Professor Sayce that even the archaic statues at Tel-loh, in Lower Babylonia, have suddenly been assigned a date contemporary with the fourth dynasty in Egypt. Unfortunately, dynasties and Pyramids have the fate of geological periods; their dates are arbitrary, and depend on the respective whims of the men of science. Archaeologists know now, it is said, that the afore-mentioned statues are fashioned out of green diorite, that can only be got in the Peninsula of Sinai; and "they accord in the style of art, and in the standard of measurement employed, with the similar diorite statues of the pyramid builders of the third and fourth Egyptian dynasties. . . . Moreover, the only possible period for a Babylonian occupation of the Sinaitic quarries must be placed shortly after the close of the epoch at which the pyramids were built; and thus only can we understand how the name of Sinai could have been derived from that of Sin, the primitive Babylonian moon-god." This is very logical, but what is the date fixed for these "dynasties"? Sanchoniathon's and Manetho's Synchronistic tables and their figures have been rejected, or whatever

remained of these after holy Eusebius' handling of them; and still we have to remain satisfied with the four or five thousand years B.C. so liberally allotted to Egypt. At all events one point is gained. There is, at last, a city on the face of the earth which is allowed, at least, 6,000 years, and it is Eridu. Geology has found it out. According to Professor Sayce again, --

"They are now also able to obtain time for the silting up of the head of the Persian Gulf, which demands a lapse of between 5,000 and 6,000 years since the period when Eridu, now twenty-five miles inland, was the seaport at the mouth of the Euphrates, and the seat of Babylonian commerce with Southern Arabia and India. More than all, the new chronology gives time for the long series of eclipses recorded in the great astronomical work called 'The Observations of Bel'; and we are also enabled to understand the otherwise perplexing change in the position of the vernal equinox, which has occurred since our present zodiacal signs were named by the Earliest Babylonian astronomers. When the Accadian calendar was arranged and the Accadian months were named, the sun at the vernal equinox was not, as now, in Pisces, or even in Aries, but in Taurus. The rate of the precession of the equinoxes being known, we learn that at the vernal equinox the sun was in Taurus from about 4,700 years B.C., and we thus obtain astronomical limits of date which cannot be impugned."*

It may make our position plainer if we state at once that we use Sir C. Lyell's nomenclature for the ages and periods, and that when we talk of the Secondary and Tertiary age, of the Eocene, Miocene and Pliocene periods -- this is simply to make our facts more comprehensible. Since these ages and periods have not yet been allowed fixed and determined durations, 2 1/2 and 15 million years being assigned at different times to one and the same age (the Tertiary) -- and since no two geologists and naturalists seem to agree on this point -- Esoteric teachings may remain quite indifferent to whether man is shown to appear in the Secondary or the Tertiary age. If the latter age may be allowed even so much as 15 million years' duration -- well and good; for the Occult doctrine, jealously guarding its real and correct figures as far as concerns the First, Second, and two-thirds of the Third Root-Race -- gives clear information upon one point only -- the age of "Vaivasvata Manu's humanity." (Vide Part I., Vol. II., "Chronology of the Brahmins.")

Another definite statement is this: It is during the so-called Eocene period that the continent to which the Fourth Race belonged, and on which it lived and perished, showed the first symptoms of sinking. And it was in the Miocene age, that it was finally destroyed -- save the little island mentioned by Plato. It is these points that have to be checked by the scientific data.

[[Footnote(s)]] -----

A.

MODERN SCIENTIFIC SPECULATIONS ABOUT THE AGES OF THE GLOBE, ANIMAL EVOLUTION, AND MAN.

May we not be permitted to throw a glance at the works of Specialists? The work on "Comparative Geology: the World-Life," by Prof. A. Winchell, furnishes us with curious data. Here we find an opponent of the Nebular theory, a reverend gentleman, smiting with all the force of the hammer of his odium theologicum on the rather contradictory hypothesis of the great stars of Science, in the matter of sidereal and cosmical phenomena based on their respective relations to terrestrial durations. The "too imaginative physicists and naturalists" do not fare very easily under this shower of their own speculative figures when placed side by side, and cut rather a sorry figure. Thus he shows:--

"Sir William Thomson, on the basis of the observed principles of cooling, concludes that no more than ten million years (elsewhere he makes it 100,000,000) can have elapsed since the temperature of the Earth was sufficiently reduced to sustain vegetable life.* Helmholz calculates that twenty million years would suffice for the original nebula to condense to the present dimensions of the sun. Prof. S. Newcomb requires only ten millions to attain a temperature of 212 [[degrees]] Fahr.** Croll estimates seventy million years for the diffusion of the heat, etc.*** Bischof calculates that 350 million years would be required for the earth to cool from a temperature of 2,000 [[degrees]] to 200 [[degrees]] Centigrade. Read, basing his estimate on observed rates of denudation, demands 500 million years since sedimentation began in Europe.**** Lyell ventured a rough guess of 240 million years; Darwin thought 300 million years demanded by the organic transformations which his theory contemplates, and Huxley is disposed to demand a 1,000 millions" (!!).

To this Prof. Winchell observes that "some biologists . . . seem to close their eyes tight and leap at one bound into the abyss of millions of years, of which they have no more adequate estimate than of infinity."***** Then he proceeds to give what he takes to be more correct geological figures: a few will suffice.

According to Sir W. Thomson "the whole incrustated age of the world is 80,000,000 years"; and agreeably with Prof. Houghton's calculations of a minimum limit for the time since the elevation of

[[Vol. 2, Page]] 695 MATERIALISTS AT LOGGER-HEADS.

Europe and Asia, three hypothetical ages for three possible and different modes of upheaval are given: varying from the modest figures of 640,730 years, through 4,170,000 years to the tremendous figures of 27,491,000 years!!

This is enough, as one can see, to cover our claims for the four continents and even the figures of the Brahmins.

Further calculations, the details of which the reader may find in Prof. Winchell's work,* bring Houghton to an approximation of the sedimentary age of the globe -- 11,700,000 years. These figures are found too small by the author, who forthwith extends them to 37,000,000 years.

Again, according to Croll,** 2,500,000 years "represents the time since the beginning of the Tertiary age" in one work; and according to another modification of his view, 15,000,000 only have elapsed since the beginning of the Eocene period;*** which, being the first of the three Tertiary periods, leaves the student suspended between 2 1/2 and 15 millions. But if one has to hold to the former moderate figures, then the whole incrustated age of the world would be 131,600,000 years.****

As the last glacial period extended from 240,000 to 80,000 years ago (Prof. Croll's view), therefore, man must have appeared on earth from 100 to 120,000 years ago. But, as says Prof. Winchell, with reference to the antiquity of the Mediterranean race, "it is generally believed to have made its appearance during the later decline of the continental glaciers." Yet, he adds, this "does not concern, however, the antiquity of the Black and Brown races, since there are numerous evidences of their existence in more southern regions, in times remotely pre-glacial" (p. 379).

As a specimen of geological certainty and agreement, these figures also may be added. Three authorities -- Messrs. T. Belt, F.G.S.; J. Croll, F.R.S.; and Robert Hunt, F.R.S., -- in estimating the time that has elapsed since the Glacial epoch, give absolutely different figures, namely:--

Mr. Belt ... 20,000 years.

Mr. J. Croll ... 240,000 "

Mr. R. Hunt ... 80,000 "

**** According to Bischof, 1,004,177 years -- according to Chevandier's calculations 672,788 years -- were required for the so-called coal formation. "The tertiary strata, about 1,000 feet in thickness, required for their development about 350,000 years." See "Force and Matter," Buchner, J. F. Collingwood's edition.

[[Vol. 2, Page]] 696 THE SECRET DOCTRINE.

(But see "The Ice-Age Climate and Time," Popular Science Review, Vol. xiv., p. 242.)

No wonder if Mr. Pengelly confesses that "it is at present and perhaps always will be IMPOSSIBLE to reduce, even approximately, geological time into years or even into millenniums" (Vide supra, foot-note). A wise word of advice from the Occultists to the gentlemen geologists: they ought to imitate the cautious example of Masons. As chronology, they say, cannot measure the era of the creation, therefore, their "Ancient and Primitive Rite" uses 000,000,000 as the nearest approach to reality.

The same uncertainty, contradictions and disagreement reign on all other subjects.

The scientific authorities on the Descent of Man are again, for all practical purposes, a delusion and a snare. There are many anti-Darwinists in the British Association, and "Natural Selection" begins to lose ground. Though at one time the saviour, which seemed to rescue the learned theorists from a final intellectual collapse into the abyss of fruitless hypothesis, it begins to be distrusted. Even Mr. Huxley is showing signs of truancy to "Selection," and thinks "natural selection not the sole factor":--

"We greatly suspect that she (Nature) does make considerable jumps in the way of variation now and then, and that these saltations give rise to some of the gaps which appear to exist in the series of known forms" (Review of Kolliker's Criticisms).

Again, in "Fallacies of Darwinism," (p. 160), C. R. Bree, M.D., argues in this wise, in considering the fatal gaps in Mr. Darwin's theory:--

"It must be again called to mind that the intermediate forms must have been vast in numbers. . . . Mr. St. George Mivart believes that change in evolution may occur more quickly than is generally believed; but Mr. Darwin sticks manfully to his belief, and again tells us 'natura non facit saltum' " -- wherein the Occultists are at one with Mr. Darwin.

Esoteric teaching fully corroborates the idea of nature's slowness and dignified progression. "Planetary impulses" are all periodical. Yet this Darwinian theory, correct as it is in minor particulars, agrees no more with Occultism than with Mr. Wallace, who, in his "Contributions to the Theory of Natural Selection," shows pretty conclusively that something more than "natural selection" was requisite to produce physical man.

Let us, meanwhile, examine the scientific objections to this scientific theory, and see what they are.

Mr. St. George Mivart is found arguing that --

. . . . " . . . it will be a moderate computation to allow 25,000,000 for the deposition of the strata down to and including the Upper Silurian. If,

[[Vol. 2, Page]] 697 MIVART'S BILLIONS OF YEARS.

then, the evolutionary work done during this deposition only represents a hundredth part of the sum total, we shall require 2,500,000,000 years for the complete development of the whole animal Kingdom to its present state. Even one quarter of this, however, would far exceed the time which physics and astronomy seem able to allow for the completion of this process. Finally, a difficulty exists as to the reason of the absence of rich fossiliferous deposits in the oldest strata -- if life was then as abundant and varied, as on the Darwinian theory it must have been. Mr. Darwin himself admits 'the case at present must remain inexplicable'; and this may be truly urged as a valid argument against the views entertained in his own work. . . .

"Thus, then, we find a wonderful (and on Darwinian principles all but inexplicable) absence of minutely transitional forms. All the most marked groups . . . appear at once upon the scene. Even the horse, the animal whose pedigree has been probably best preserved, affords no conclusive evidence of specific origin by infinitesimal fortuitous variations; while some forms, as the labyrinthodonts and trilobites, which seemed to exhibit gradual change, are shown by further investigation to do nothing of the sort. . . . All these difficulties are avoided if we admit that new forms of animal life of all degrees of complexity appear from time to time with comparative suddenness, being evolved according to laws in part depending on surrounding conditions, in part internal -- similar to the way in which crystals (and perhaps from recent researches the lowest forms of life) build themselves up according to the internal laws of their component substance and in harmony and correspondence with all environing influences and conditions." ("Genesis of Species," p. 142.)

"The internal laws of their component substance." These are wise words, and the admission of the possibility, a prudent one. But how can these internal laws be ever recognized, if Occult teaching is discarded? As a friend writes, while drawing our attention to the above speculations: "In other words, the doctrine of Planetary Life-Impulses must be admitted. Otherwise, why are species now stereotyped, and why do even domesticated breeds of pigeons and many animals relapse into their ancestral types when left to themselves?" But the teaching about planetary life-impulses has to be clearly defined and as clearly understood if present confusion would not be made still more perplexing. All these difficulties would vanish as the shadows of night disappear before the light of the rising Sun, if the following esoteric axioms were admitted: (a) the enormous antiquity (and the existence) of our planetary chain; (b) the actuality of the Seven Rounds; (c) the separation of human races (outside the purely anthropological division) into Seven distinct Root-Races, of which our present European Humanity is the fifth; (d) the antiquity of Man in this (Fourth) Round; and finally (e) that as these Races evolve from ethereality to materiality, and from the latter back again into relative physical tenuity of

texture, so every living (so-called) organic species of animals with vegetation included, changes with every new Root-Race. Were this admitted, if even only

[[Vol. 2, Page]] 698 THE SECRET DOCTRINE.

along with other, and surely, on maturer consideration, no less absurd, suppositions, if Occult theories have to be considered "absurd" at present, then every difficulty would be made away with. Surely, Science ought to try and be more logical than it now is, as it can hardly maintain the theory of man's descent from an anthropoidal ancestor, and deny in the same breath any reasonable antiquity to that man! Once Mr. Huxley talks of "the vast intellectual chasm between the man and ape," and "the present enormous gulf between the two,"* and if he admits the necessity of extending Scientific allowances for the age of man on earth for such slow and progressive development, then all those men of Science, who are of his way of thinking, at any rate, ought to come to some approximate figures, at least, and agree upon the probable duration of those Pliocene, Miocene, and Eocene periods of which so much is said, and about which nothing definite is known -- if they dare not venture beyond. But no two scientists seem to agree. Every period seems to be a mystery in its duration, and a thorn in the side of the geologists; and, as just shown, they are unable to harmonize their conclusions even with regard to the comparatively recent geological formations. Thus, no reliance can be placed on their figures when they do give any, for with them it is all either millions or simply thousands of years!

That which is said may be strengthened by the confessions made by themselves and the synopsis of it, found in that "Circle of Sciences," the Encyclopaedia Britannica, which shows the mean accepted in the geological and anthropological riddles. In that work the cream of the most authoritative opinions is skimmed off; nevertheless, we find in it the refusal to assign any definite chronological date, even to such, comparatively speaking, late epochs as the Neolithic era, though, for a wonder, an age is established for the beginnings of certain geological periods; at any rate of some few, the duration of which could hardly be shortened any more, without an immediate conflict with facts.

Thus, it is surmised in the great Encyclopaedia (Vol. X., art. "Geology," p. 227), that "100 million years have passed since the solidification of our Earth, when the earliest form of life appeared upon it.**"

But it seems quite as hopeless to try to convert the modern Geologists and Ethnologists as it is to make Darwinian Naturalists perceive their mistakes. About the Aryan Root-Race and its origins,

[[Footnote(s)]] -----

* "Man's Place in Nature," p. 102, note.

** "100,000,000 of years is probably amply sufficient for all the requirements of Geology," says the text. In France, some savants do not find it nearly "sufficient." Le Couturier claims for the same 350 million years; Buffon was satisfied with 34 millions -- but there are those in the more modern schools who will not be content under 500 million years.

[[Vol. 2, Page]] 699 THE ADEPT-ASTRONOMER.

Science knows as little as of the men from other planets. With the exception of Flammarion and a few mystics among astronomers, even the habitableness of other planets is mostly denied. Yet such great adept astronomers were the Scientists of the earliest races of the Aryan stock, that they seem to have known far more about the races of Mars and Venus than the modern Anthropologist knows of those of the early stages of the Earth.

Let us leave modern Science aside for a moment and turn to ancient knowledge. As we are assured by Archaic Scientists that all such geological cataclysms -- from the upheaval of oceans, deluges, and shifting of continents, down to the present year's cyclones, hurricanes, earthquakes, volcanic eruptions, tidal waves, and even the extraordinary weather and seeming shifting of seasons which perplexes all European and American meteorologists -- are due to, and depend on the moon and planets; aye, that even modest and neglected constellations have the greatest influence on the meteorological and cosmical changes, over, and within our earth, let us give one moment's attention to our sidereal despots and rulers of our globe and men. Modern Science denies any such influence; archaic Science affirms it. We may see what both say with regard to this question.

B. ON CHAINS OF PLANETS AND THEIR PLURALITY.

Did the Ancients know of worlds besides their own? What are the data of the Occultists in affirming that every globe is a septenary chain of worlds -- of which only one member is visible -- and that these are, were, or will be, "man-bearing," just as every visible star or planet is? What do they mean by "a moral and physical influence" of the sidereal worlds on our globes?

Such are the questions often put to us, and they have to be considered from every aspect. To the first of the two queries the answer is:-- We believe it because the first law in nature is uniformity in diversity, and the second -- analogy. "As above, so below." That time is gone by for ever, when, although our pious ancestors believed that our earth was in the centre of the universe, the church and her arrogant servants could insist that we should regard as a blasphemy the supposition that any other planet could be inhabited. Adam and Eve, the Serpent, and the Original Sin followed by atonement through blood, have been too long in the way, and thus was universal truth sacrificed to the insane conceit of us little men.

[[Vol. 2, Page]] 700 THE SECRET DOCTRINE.

Now what are the proofs thereof? Except inferential evidence and logical reasoning, there are none for the profane. To the Occultists, who believe in the knowledge acquired by countless generations of Seers and Initiates, the data offered in the Secret Books are all-sufficient. The general public needs other proofs, however. There are some Kabalists and even some Eastern Occultists, who, failing to find uniform evidence upon this point in all the mystic works of the nations, hesitate to accept the teaching. Even such "uniform evidence" will be forthcoming presently. Meanwhile, we may approach the subject from its general aspect, and see whether belief in it is so very absurd, as some scientists along with other Nicodemuses would have it. Unconsciously, perhaps, in thinking of a plurality of inhabited "Worlds," we imagine them to be like the globe we inhabit and peopled by beings more or less resembling ourselves. And in so doing we are only following a natural instinct. Indeed, so long as the enquiry is confined to the life-history of this globe we can speculate on this question with some profit, and ask ourselves what were the "Worlds" spoken of in all the ancient scriptures of Humanity, with some hope of at least asking an intelligible question. But how do we know (a) what kind of Beings inhabit the globes in general; and (b) whether those who rule planets superior to our own, do not exercise the same influence on our earth consciously, that we may exercise unconsciously -- say on the small planets (planetoids or asteroids) in the long run, by our cutting the Earth to pieces, opening canals, and thereby entirely changing our climates. Of course, like Caesar's wife, the planetoids cannot be affected by our suspicion. They are too far, etc., etc. Believing in esoteric astronomy, however, we are not so sure of that.

But when, extending our speculations beyond our planetary chain, we try to cross the limits of the solar system, then indeed we act as do presumptuous fools. For -- while accepting the old Hermetic axiom: "As above, so below" -- we may well believe that as Nature on Earth displays the most careful economy, utilizing every vile and waste thing in her marvellous transformations, and withal never repeating herself -- we may justly conclude that there is no other globe in all her infinite systems so closely resembling this earth that the ordinary powers should be able to imagine and reproduce its semblance and containment.*

[[Footnote(s)]] -----

* We are taught that the highest Dhyana Chohans, or Planetary Spirits (beyond the cognizance of the law of analogy), are in ignorance of what lies beyond the visible planetary systems, since their essence cannot assimilate itself to that of worlds beyond our solar system. When they reach a higher stage of evolution these other universes will be open to them; meanwhile they have complete knowledge of all the worlds within and beneath the limits of our solar system.

[[Vol. 2, Page]] 701 STATES OF CONSCIOUSNESS.

And indeed we find in the romances as in all the so-called scientific fictions and spiritistic revelations from moon, stars, and planets, merely fresh combinations or modifications of the men and things, the passions and forms of life with which we are familiar, when even on the other planets of our own system nature and life are entirely different from ours. Swedenborg was pre-eminent in inculcating such an erroneous belief.

But even more. The ordinary man has no experience of any state of consciousness other than that to which the physical senses link him. Men dream; they sleep the profound sleep which is too deep for dreams to impress the physical brain; and in these states there must still be consciousness. How, then, while these mysteries remain unexplored, can we hope to speculate with profit on the nature of globes which, in the economy of nature, must needs belong to states of consciousness other and quite different from any which man experiences here?

And this is true to the letter. For even great adepts (those initiated of course), trained seers though they are, can claim thorough acquaintance with the nature and appearance of planets and their inhabitants belonging to our solar system only. They know that almost all the planetary worlds are inhabited, but can have access to -- even in spirit -- only those of our system; and they are also aware how difficult it is, even for them, to put themselves into full rapport even with the planes of consciousness within our system, but differing from the states of consciousness possible on this globe; i.e., on the three planes of the chain of spheres beyond our earth. Such knowledge and intercourse are possible to them because they have learned how to penetrate to planes of consciousness which are closed to the perceptions of ordinary men; but were they to communicate their knowledge, the world would be no wiser, because it lacks that experience of other forms of perception which alone could enable them to grasp what was told them.

Still the fact remains that most of the planets, as the stars beyond our system, are inhabited, a fact which has been admitted by the men of science themselves. Laplace and Herschell believed it, though they wisely abstained from imprudent speculation; and the same conclusion has been worked out and supported with an array of scientific considerations by C. Flammarion, the well-known French Astronomer. The arguments he brings forward are strictly scientific, and such as to appeal even to a materialistic mind, which would remain unmoved by such thoughts as those of Sir David Brewster, the famous physicist, who writes:--

"Those 'barren spirits' or 'base souls,' as the poet calls them, who might be led to believe that the Earth is the only inhabited body in the universe, would have no difficulty in conceiving the earth also to

[[Vol. 2, Page]] 702 THE SECRET DOCTRINE.

have been destitute of inhabitants. What is more, if such minds were acquainted with the deductions of geology, they would admit that it was uninhabited for myriads of years; and here we come to the impossible conclusion that during these myriads of years there was not a single intelligent creature in the vast domains of the Universal King, and that before the protozoic formations there existed neither plant nor animal in all the infinity of space!"*

Flammarion shows, in addition, that all the conditions of life -- even as we know it -- are present on some at least of the planets, and points to the fact that these conditions must be much more favourable on them than they are on our Earth.

Thus scientific reasoning, as well as observed facts, concur with the statements of the seer and the innate voice in man's own heart in declaring that life -- intelligent, conscious life -- must exist on other worlds than ours.

But this is the limit beyond which the ordinary faculties of man cannot carry him. Many are the romances and tales, some purely fanciful, others bristling with scientific knowledge, which have attempted to imagine and describe life on other globes. But one and all, they give but some distorted copy of the drama of life around us. It is either, with Voltaire, the men of our own race under a microscope, or, with de Bergerac, a graceful play of fancy and satire; but we always find that at bottom the new world is but the one we ourselves live in. So strong is this tendency that even great natural, though non-initiated seers, when untrained, fall a victim to it; witness Swedenborg, who goes so far as to dress the inhabitants of Mercury, whom he meets with in the spirit-world, in clothes such as are worn in Europe.

Commenting on this tendency, Flammarion in his work "Sur la Pluralite des Mondes habites," says:-- "It seems as if in the eyes of those authors who have written on this subject, the Earth were the type of the Universe, and the Man of Earth, the type of the inhabitants of the heavens. It is, on the contrary, much more probable, that, since the nature of other planets is essentially varied, and the surroundings and conditions of existence essentially different, while the forces which preside over the creation of beings and the substances which enter into their mutual constitution are essentially distinct, it would follow that our mode of existence cannot be regarded as in any way applicable to other globes.

[[Footnote(s)]] -----

* Since no single atom in the entire Kosmos is without life and consciousness, how much more then its mighty globes? -- though they remain sealed books to us men who can hardly enter even into the consciousness of the forms of life nearest us?

We do not know ourselves, then how can we, if we have never been trained to it and initiated, fancy that we can penetrate the consciousness of the smallest of the animals around us?

[[Vol. 2, Page]] 703 WORLDS MENTIONED IN THE BIBLE.

Those who have written on this subject have allowed themselves to be dominated by terrestrial ideas, and fell therefore into error." ("Pluralite des Mondes," p. 439.)

But Flammarion himself falls into the very error which he here condemns, for he tacitly takes the conditions of life on earth as the standard by which to determine the degree to which other planets are adapted for habitation by "other Humanities."

Let us, however, leave these profitless and empty speculations, which, though they seem to fill our hearts with a glow of enthusiasm and to enlarge our mental and spiritual grasp, do but in reality cause a factitious stimulation, and blind us more and more to our ignorance not only of the world we inhabit, but even of the infinitude contained within ourselves.

When, therefore, we find in the Bibles of Humanity "other worlds" spoken of, we may safely conclude that they not only refer to other states of our planetary chain and Earth, but also to other inhabited globes -- stars and planets; withal, that the latter were never speculated upon. The whole of antiquity believed in the Universality of life. But no really initiated seer of any civilized nation has ever taught that life on other stars could be judged by the standard of terrestrial life. That which is generally meant by "earths" and worlds, relates (a) to the "rebirths" of our globe after each manvantara and a long period of "obscuration"; and (b) to the periodical and entire changes of the Earth's surface, when Continents disappear, to make room for Oceans, and Oceans and Seas are violently displaced and sent rolling to the poles, to cede their emplacements to new Continents.

We may begin with the Bible -- the youngest of the World-Scriptures. In Ecclesiastes, chap. i., we read these words of the King-Initiate:-- "One generation passeth away and another generation cometh, but the earth abideth for ever," and again, "The thing that hath been, it is that which shall be; and that which is done, is that which shall be done, and there is no new thing under the sun." Under these words it is not easy to see the reference to the successive cataclysms by which the Races of mankind are swept away, or, going further back, to the various transitions of the globe during the process of its formation. But if we are told that this refers only to our world as we now see it, -- then we shall refer the reader to the New Testament, where St. Paul speaks (in Hebrews i.) of the Son (the manifested Power) whom (God) hath appointed heir of all things, by whom also he made the worlds (plural).*

[[Footnote(s)]] -----

* This relates to the Logos of every Cosmogony. The unknown Light -- with which he is said to be co-eternal and coeval -- is reflected in the "First-Born," the Protogonos; [[Footnote continued on next page]]

[[Vol. 2, Page]] 704 THE SECRET DOCTRINE.

This "Power" is Hokhmah or (Chochmah) the Wisdom and the Word. We shall probably be told that by this term "worlds," the stars, heavenly bodies, etc., were meant. But apart from the fact that "stars" were not known as "worlds" to the ignorant editors of the Epistles, if even they must have been known to Paul, who was an Initiate ("a Master-Builder"), we can quote on this point an eminent theologian, Cardinal Wiseman. In Vol. I, p. 309, of his work treating of the indefinite period of the six days -- or shall we say "too definite" -- period of the six days of creation and the 6,000 years, he confesses that we are in total darkness upon the meaning of that statement of St. Paul, unless we are permitted to suppose that allusion is made in it, i.e., the period which elapsed between the first and second verses of chapter i. of Genesis -- to those primitive revolutions, i.e., the destructions and the re-productions (of the world) indicated in chapter i. of Ecclesiastes; or, to accept, with so many others, and in its literal sense, the passage (Hebrews i. 1.) that speaks of the creation of worlds -- in plural. . . . It is very singular, he adds, that all the cosmogonies should agree to suggest the same idea, and preserve the tradition of a first series of revolutions, owing to which the world was destroyed and again renewed.

Had the Cardinal studied the Zohar his doubts would have changed to certitude. Thus saith Idra Suta (in the "Zohar," iii., 292, c.): "There were old worlds which perished as soon as they came into existence; worlds with and without form called Scintillas -- for they were like the sparks under the Smith's hammer, flying in all directions. Some were the primordial worlds which could not continue long, because the 'aged' -- his name be sanctified -- had not as yet assumed his form,* the workman was not yet the 'Heavenly man.' *** Again in the Midrash, written long before the Kabala of Simeon Ben lochai, Rabbi Abahu explains:-- "The Holy One, blessed be his name, has successively formed and destroyed sundry worlds before this one*** . . . Now this refers both to the first races (the "Kings of Edom") and to the worlds destroyed."**** "Destroyed" means here what we call

[[Footnote(s)]] -----

[[Footnote continued from previous page]] and the Demiurgos or the Universal Mind directs his Divine Thought into the Chaos that under the fashioning of minor gods will be divided into the seven oceans -- Sapta samudras. It is Purusha, Ahura Mazda, Osiris, etc., and finally the gnostic Christos, who is in the Kabala, Hokhmah or Wisdom the "Word."

* The form of Tikkun or the Protogonos, the "first-born," i.e., the universal form and idea, had not yet been mirrored in Chaos.

** The "Heavenly man" is Adam Kadmon -- the synthesis of the Sephiroth, as "Manu Swayambhuva" is the synthesis of the Prajapatis.

*** Bereshith Rabba, Parsha IX.

**** This refers to the three Rounds that preceded our fourth Round.

[[Vol. 2, Page]] 705 WHO ARE THE KINGS OF EDOM?

"obscurations." This becomes evident when one reads further on the explanation given:-- "Still when it is said that they (the worlds) perished, it is only meant thereby that they (their humanities) lacked the true form, till the human (our) form came into being, in which all things are comprised and which contains all forms. . . . * -- it does not mean death, but only denotes a sinking down from their status . . ." (that of worlds in activity).**

When, therefore, we read of the destruction of the worlds, this word has many meanings, which are very clear in several of the Commentaries on the Zohar and Kabalistic treatises. As said elsewhere, it means not only the destruction of many worlds which have ended their life-career, but also that of the several continents which have disappeared, as also their decline and geographical change of place.

The mysterious "Kings of Edom" are sometimes referred to as the "Worlds" that had been destroyed; but it is a "cloak." The Kings who reigned in Edom before there reigned a King in Israel, or the "Edomite Kings," could never symbolize the "prior worlds," but only the "attempts at men" on this globe: the "pre-Adomite races," of which the Zohar speaks, and which we explain as the First Root-Race. For, as, speaking of the six Earths (the six "limbs" of Microprosopus) it is said that the Seventh (our Earth) came not into the computation when the Six were created (the six spheres above our globe in the terrestrial chain), so the first seven Kings of Edom are left out of calculation in Genesis. By the law of analogy and permutation, in the "Chaldean Book of Numbers," as also in the "Books of Knowledge" and of "Wisdom," the "seven primordial worlds" mean also the "seven primordial" races (sub-races of the First Root-Race of the Shadows); and, again, the Kings of Edom are the sons of "Esau the father of the Edomites" (Gen. xxxvi. 43); i.e., Esau represents in the Bible the race which stands between the Fourth and the Fifth, the Atlantean and the Aryan. "Two nations are in thy womb," saith the Lord to Rebekah; and Esau was red and hairy. From verse 24 to 34, ch. xxv. of Genesis contains the allegorical history of the birth of the Fifth Race.

"And the Kings of ancient days died and their chiefs (crowns) were found no more," says Siphrah Dzenioutha (3). . . . "The Head of a nation that has not been formed at the beginning in the likeness of the

[[Footnote(s)]] -----

* This sentence contains a dual sense and a profound mystery in the occult sciences the secret of which if, and when, known -- confers tremendous powers on the Adept to change his visible form.

** Idra Suta, Zohar, iii. 136, c. "A sinking down from their status" -- is plain; from active worlds they have fallen into a temporary obscuration -- they rest, and hence are entirely changed.

[[Vol. 2, Page]] 706 THE SECRET DOCTRINE.

White Head: its people is not from this Form," states the Zohar (iii). . . . "Before it (the White Head, the Fifth Race or Ancient of the Ancients) arranged itself in its (own, or present) Form . . . all worlds have been destroyed; therefore it is written: And Bela, the Son of Beor, reigned in Edom" (Gen. xxxvi.). Here the "worlds" stand for races. "And he (such or another King of Edom) died, and another reigned in his stead" (ibid 31 et seq.).

No Kabbalist who has hitherto treated of the symbolism and allegory hidden under these "Kings of Edom" seems to have perceived more than one aspect of it. They are neither the "worlds that were destroyed," nor the "Kings that died" -- alone; but both, and much more, to treat of which there is no space at present. Therefore, leaving the mystic parables of the Zohar, we will return to the hard facts of materialistic science; first, however, citing a few from the long list of great thinkers who have believed in the plurality of inhabited worlds in general, and in worlds that preceded our own. These are, the great mathematicians Leibnitz and Bernouilli, Isaac Newton himself, as can be read in his "Optics"; Buffon, the naturalist; Condillac, the sceptic; Bailly, Lavater, Bernardin de St. Pierre, and, as a contrast to the two last named -- suspected at least of mysticism -- Diderot and most of the writers of the Encyclopaedia. Following these come Kant, the

founder of modern philosophy; the poet philosophers, Goethe, Krause, Schelling; and many astronomers, from Bode, Fergussan and Herschell to Lalande and Laplace, with their many disciples in more recent years.

A brilliant list of honoured names indeed; but the facts of physical astronomy speak even more strongly in favour of the presence of life, even organised life, on other planets. Thus in four meteorites which fell respectively at Alais in France, the Cape of Good Hope, in Hungary, and again in France, there was found, on analysis, graphite, a form of carbon known to be invariably associated with organic life on this earth of ours. And that the presence of this carbon is not due to any action occurring within our atmosphere is shown by the fact that carbon has been found in the very centre of a meteorite; while in one which fell at Argueil, in the south of France, in 1857, there was found water and turf, the latter being always formed by the decomposition of vegetable substances.

And further, examining the astronomical conditions of the other planets, it is easy to show that several are far better adapted for the development of life and intelligence -- even under the conditions with which men are acquainted -- than is our earth. For instance, on the planet Jupiter the seasons, instead of varying between wide limits as do ours, change by almost imperceptible degrees, and last twelve times

[[Vol. 2, Page]] 707 WHAT FLAMMARION TELLS US.

as long as ours. Owing to the inclination of its axis the seasons on Jupiter are due almost entirely to the eccentricity of its orbit, and hence change slowly and regularly. We shall be told, that no life is possible on Jupiter, as it is in an incandescent state. But not all astronomers agree with this. For instance what we say, is said by M. Flammarion: and he ought to know.

On the other hand Venus would be less adapted for human life such as exists on earth, since its seasons are more extreme and its changes of temperature more sudden; though it is curious that the duration of the day is nearly the same on the four inner planets, Mercury, Venus, the Earth and Mars.

On Mercury, the Sun's heat and light are seven times what they are on the Earth, and astronomy teaches that it is enveloped in a very dense atmosphere. And as we see that life appears more active on earth in proportion to the light and heat of the sun, it would seem more than probable that its intensity is far, far greater on Mercury than here.

Venus, like Mercury, has a very dense atmosphere, as also has Mars and the snows which cover their poles, the clouds which hide their surface, the geographical configuration of their seas and continents, the variations of seasons and climates, are all closely analogous -- at least to the eye of the physical astronomer. But such facts and the considerations to which they give rise, have reference only to the possibility of the existence on these planets of human life as known on earth. That some forms of life such as we know are possible on these planets, has been long since abundantly demonstrated, and it seems perfectly useless to go into detailed questions of the physiology, etc., etc., of these hypothetical inhabitants, since after all the reader can arrive only at an imaginary extension of his familiar surroundings. It is better to rest content with the three conclusions which M. C. Flammarion, whom we have so largely quoted, formulates as rigorous and exact deductions from the known facts and laws of science.

I. The various forces which were active in the beginning of evolution gave birth to a great variety of beings on the several worlds; both in the organic and inorganic kingdoms.

II. The animated beings were constituted from the first according to forms and organisms in correlation with the physiological state of each inhabited globe.

III. The humanities of other worlds differ from us, as much in their inner organization as in their external physical type.

Finally the reader who may be disposed to question the validity of these conclusions as being opposed to the Bible, may be referred to an Appendix in M. Flammarion's work dealing in detail with this question; since in a work like the present it seems unnecessary to point out the

[[Vol. 2, Page]] 708 THE SECRET DOCTRINE.

logical absurdity of those churchmen, who deny the plurality of worlds on such grounds.

In this connection we may well recall those days when the burning zeal of the Primitive Church opposed the doctrine of the earth's rotundity, on the ground that the nations at the Antipodes would be outside the pale of salvation; and again how long it took for a nascent science to break down the idea of a solid firmament, in whose grooves the stars moved for the special edification of terrestrial humanity.

The theory of the earth's rotation was met by a like opposition -- even to the martyrdom of its discoverers -- because, besides depriving our orb of its dignified central position in space, this theory produced an appalling confusion of ideas as to the Ascension -- the terms "up" and "down" being proved to be merely relative, thus complicating not a little the question of the precise locality of heaven.*

According to the best modern calculations, there are no less than 500,000,000 of stars of various magnitudes, within the range of the best telescopes. As to the distances between them, they are incalculable. Is, then, our microscopical Earth -- a "grain of sand on an infinite sea-shore" -- the only centre of intelligent life? Our own Sun, itself 1,300 times larger than our planet, sinks into insignificance beside that giant Sun -- Sirius, -- and the latter in its turn is dwarfed by other luminaries in infinite Space. The self-centred conception of Jehovah as the special guardian of a small and obscure semi-nomadic tribe, is tolerable beside that which confines sentient existence to our microscopical globe. The primary reasons were without doubt: (1) Astronomical ignorance on the part of the early Christians, coupled with an exaggerated appreciation of man's own importance -- a crude form of selfishness; and (2) the dread that, if the hypothesis of millions of other inhabited globes was accepted, the crushing rejoinder would ensue -- "Was there then a Revelation to each world?"

involving the idea of the Son of God eternally "going the rounds" as it were. Happily it is now unnecessary to waste time and energy in proving the possibility of the existence of such worlds. All intelligent persons admit it. That which now remains to be demonstrated is, that if it is once proven that there are inhabited worlds besides our own with humanities entirely different from each other as from our own -- as maintained in the Occult

[[Footnote(s)]] -----

* In that learned and witty work, "God and his Book," by the redoubtable "Saladin" of Agnostic repute, the amusing calculation that, if Christ had ascended with the rapidity of a cannon ball, he would not have reached even Sirius yet, reminds one vividly of the past. It raises, perhaps, a not ill-founded suspicion that even our age of scientific enlightenment may be as grossly absurd in its materialistic negations, as the men of the middle ages were absurd and materialistic in their religious affirmations.

[[Vol. 2, Page]] 709 SCIENCE AND OCCULTISM MAY YET AGREE.

Sciences -- then the evolution of the preceding races is half proved. For where is that physicist or geologist who is prepared to maintain that the Earth has not changed scores of times, in the millions of years which have elapsed in the course of its existence; and changing its "skin," as it is called in Occultism, that the Earth has not had each time her special humanities adapted to such atmospheric and climatic conditions as were entailed. And if so, why should not our preceding four and entirely different mankinds have existed and thrived before our Adamic (Fifth Root) Race?

Before closing our debates, however, we have to examine the so-called organic evolution more closely. Let us search well and see whether it is quite impossible to make our Occult data and chronology agree up to a certain point with those of Science.

C.

SUPPLEMENTARY REMARKS ON ESOTERIC GEOLOGICAL CHRONOLOGY.

It seems, however, possible to calculate the approximate duration of the geological periods from the combined data of Science and Occultism now before us. Geology is, of course, able to determine almost with certainty one thing -- the thickness of the several deposits. Now, it also stands to reason that the time required for the deposition of any stratum on a sea-bottom must bear a strict proportion to the thickness of the mass thus formed. Doubtless the rate of erosion of land and the sorting out of matter on to ocean beds has varied from age to age, and cataclysmic changes of various kinds break the "uniformity" of ordinary geological processes. Provided, however, we have some definite numerical basis on which to work, our task is rendered less difficult than it might at first sight appear to be. Making due allowance for variations in the rate of deposit, Professor Lefevre gives us the relative figures which sum up geological time. He does not attempt to calculate the lapse of years since the first bed of the Laurentian rocks was deposited, but postulating that time as = X, he presents us with the relative proportions in which the various periods stand to it. Let us premise our estimate by stating that, roughly speaking, the Primordial rocks are 70,000 ft., the Primary 42,000 ft., the Secondary 15,000 ft., the Tertiary 5,000 ft., and the Quaternary some 500 ft. in thickness:--

"Dividing into an hundred parts the time, whatever its actual length, that has passed since the dawn of life on this earth (lower Laurentian strata), we shall be led to attribute to the primordial age more than half of the whole duration, say 53.5; to the Primary 32.2; to the

[[Vol. 2, Page]] 710 THE SECRET DOCTRINE.

Secondary 11.5; to the Tertiary 2.3; to the Quaternary 0.5 or one-half per cent." ("Philosophy," p. 481.)

Now, as it is certain, on occult data, that the time which has elapsed since the first sedimentary deposits = 320,000,000 years, we are able to infer that the:--

ROUGH APPROXIMATIONS.

Primordial lasted 171,200,000 years.

Laurentian
Cambrian
Silurian

Primary lasted 103,040,000 years

Devonian
Coal
Permian

Secondary lasted 36,800,000 years

Triassic
Jurassic
Cretaceous

Tertiary lasted 7,360,000 years (probably in excess)

Eocene
Miocene
Pliocene

Quaternary lasted 1,600,000 years (probably in excess).

Such estimates harmonise with the statements of Esoteric Ethnology in almost every particular. The Tertiary Atlantean part-cycle, from the "apex of glory" of that Race in the early Eocene to the great mid-Miocene cataclysm, would appear to have lasted some 3 1/2 to four million years. If the duration of the Quaternary is not rather (as seems likely) overestimated, the sinking of Ruta and Daitya would be post-Tertiary. It is probable that the results here given allow somewhat too long a period to both the Tertiary and Quaternary, as the Third Race goes very far back into the Secondary Age. Nevertheless, the figures are most suggestive.

But the argument from geological evidence being only in favour of 100,000,000 years, let us compare our claims and teachings with those of exact science.

Mr. Edward Clodd,* in reviewing M. de Mortillet's work "Materiaux pour l'Histoire de Homme," which places man in the mid-Miocene period,** remarks that "it would be in defiance of all that the doctrine of evolu-

[[Footnote(s)]] -----

* Knowledge, March 31, 1882.

** And who yet, in another work, "La Prehistorique Antiquite de l'Homme," some twenty years ago, generously allowed only 230,000 years to our mankind. Since we learn now that he places man "in the mid-Miocene period," we must say that the much respected Professor of Prehistoric Anthropology (in Paris) is somewhat contradictory and inconsistent, if not naif in his views.

[[Vol. 2, Page]] 711 SECEDERS FROM DARWINISM.

tion teaches, and moreover, win no support from believers in special creation and the fixity of species, to seek for so highly specialized a mammalian as man at an early stage in the life-history of the globe." To this, one could answer: (a) the doctrine of evolution, as inaugurated by Darwin and developed by later evolutionists, is not only the reverse of infallible, but it is repudiated by several great men of science, e.g., de Quatrefages, in France, and Dr. Weismann, an evolutionist in Germany, and many others, the ranks of the anti-Darwinists growing stronger with every year;* and (b) truth to be worthy of its name, and remain truth and fact, hardly needs to beg for support from any class or sect. For were it to win support from believers in special creation, it would never gain the favour of the evolutionists, and vice versa. Truth must rest upon its own firm foundations of facts, and take its chances for recognition, when every prejudice in the way is disposed of. Though the question has been already fully considered in its main aspects, it is, nevertheless, advisable to combat every so-called "scientific" objection as we go along, when making what are regarded as heretical and "anti-scientific" statements.

Let us briefly glance at the divergences between orthodox and esoteric science, on the question of the age of the globe and of man. With the two respective synchronistic tables before him, the reader will be enabled to see at a glance the importance of these divergences; and to perceive, at the same time, that it is not impossible -- nay, it is most likely -- that further discoveries in geology and the finding of fossil remains of man will force science to confess that it is esoteric philosophy which is right after all, or, at any rate, nearer to the truth.

PARALLELISM OF LIFE.

[[First Column]]

SCIENTIFIC HYPOTHESES.

Science divides the period of the globe's history, since the beginning of life on earth (or the Azoic age), into five main divisions or periods, according to Haeckel.**

[[First Column continued on next page]]

[[Second Column]]

ESOTERIC THEORY.

Leaving the classification of the geological periods to Western Science, esoteric philosophy divides only the life-periods on the globe. In the present Manvantara the actual period is separated into seven Kalpas and seven great human races. Its first Kalpa, answering to the "Primordial Epoch," is the age of the --

[[Second Column continued on next page]]

[[Footnote(s)]] -----

* The root and basic idea of the origin and transformation of species -- the heredity (of acquired faculties) seems to have found lately very serious opponents in Germany. Du Bois-Reymond and Dr. Pffuger, the physiologists, besides other men of science as eminent as any, find insuperable difficulties and even impossibilities in the doctrine.

** History of Creation, p. 20.

[[Vol. 2, Page]] 712 THE SECRET DOCTRINE.

[[First Column continued from previous page]]

PRIMORDIAL EPOCH (Laurentian System, Cambrian System, Silurian System)

The Primordial Epoch is, science tells us, by no means devoid of vegetable and animal life. In the Laurentian deposits are found specimens of the Eozoon Canadense -- a chambered shell. In the Silurian are discovered sea-weeds (algae), molluscs, crustacea, and lower marine organisms, also the first trace of fishes. The primordial Epoch shows algae, molluscs, crustacea, polyps, and marine organisms, etc., etc. Science teaches, therefore, that marine life was present from the very beginnings of time, leaving us, however, to speculate for ourselves as to how life appeared on earth. If it rejects the Biblical "Creation" (as we do), why does it not give us another, approximately plausible hypothesis?

PRIMARY (Devonian***, Coal, Permian)

[[First Column continued on next page]]

[[Second Column continued from previous page]]

"PRIMEVAL"* (Deva or Divine men, the "Creators" and Progenitors.**)

The Esoteric Philosophy agrees with the statement made by science (see parallel column), demurring, however, in one particular. The 300,000,000 years of vegetable life (see "Brahminical Chronology") preceded the "Divine Men," or Progenitors. Also, no teaching denies that there were traces of life within the Earth besides the Eozoon Canadense in the Primordial Epoch. Only, whereas the said vegetation belonged to this Round, the zoological relics now found in the Laurentian, Cambrian, and Silurian systems, so called, are the relics of the Third Round. At first astral like the rest, they consolidated and materialized pari passu with the NEW vegetation.

"PRIMARY" -- Divine Progenitors, SECONDARY GROUPS, and the 2 1/2 races. "Fern-forests, Sigillaria, Coniferae, fishes, first trace of reptiles." Thus saith modern science; the esoteric doctrine repeats that which was said above. These are all relics of the preceding Round.**** Once, however, the prototypes are projected out of the astral envelope of the earth, an indefinite amount of modification ensues.

[[Second Column continued on next page]]

[[Footnote(s)]] -----

* The same names are retained as those given by science, to make the parallels clearer. Our terms are quite different.

** Let the student remember that the Doctrine teaches that there are seven degrees of Devas or "Progenitors," or seven classes, from the most perfect to the less exalted.

*** It may be said that we are inconsistent in not introducing into this table a [[Footnote continued on next page]]

[[Vol. 2, Page]] 713 THE TWO SCIENCES CONTRASTED.

[[First Column continued from previous page]]

SECONDARY (Triassic. Jurassic. Chalk or Cretaceous.)

This is the age of Reptiles, of the gigantic Megalosauri, Ichthyosauri, Plesiosauri, etc., etc. Science denies the presence of man in that period. If so, it has to explain how men came to know of these monsters and describe them before the age of Cuvier? The old annals of China, India, Egypt, and even of Judea are full of them, as demonstrated elsewhere. In this period also appear the first (marsupial) mammals***** -- Insectivorous, carnivorous, phytophagous; and (as Prof. Owen thinks) an herbivorous hoofed mammal.

Science does not admit the appearance of man before the close of the

[[First Column continued on next page]]

[[Second Column continued from previous page]]

SECONDARY -- According to every calculation the Third Race had already made its appearance, as during the Triassic there were already a few mammals, and it must have separated.

This, then, is the age of the Third Race, in which the origins of the early Fourth may be perhaps also discoverable. We are, however, here left entirely to conjecture, as no definite data are yet given out by the Initiates.

The analogy is but a poor one, still it may be argued that, as the early Mammalia and pre-mammalia are shown in their evolution merging from one kind into a higher one, anatomically, so are the human races in their procreative processes. A parallel might certainly be found between the Monotremata, the Didelphia (or Marsupialia) and the placental Mammals, divided in their turn into three orders*****

[[Second Column continued on next page]]

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Primary-Age Man. The parallelism of Races and geological periods here adopted, is, so far as the origin of 1st and 2nd are concerned, purely tentative, no direct information being available. Having previously discussed the question of a possible Race in the Carboniferous Age, it is needless to renew the debate.

**** During the interim from one Round to another, the globe and everything on it remains in statu quo. Remember, Vegetation began in its ethereal form before what is called the Primordial, running through the Primary, and condensing in it, and reaching its full physical life in the Secondary.

***** Geologists tell us that "in the secondary epoch, the only mammals which have been (hitherto) discovered in Europe are the fossil remains of a small marsupial or pouch-bearer." (Knowledge, March 31, 1882, p 464.) Surely the marsupial or didelphis (the only surviving animal of the family of those who were on earth during the presence on it of androgyne man) cannot be the only animal that was then on earth? Its presence speaks loudly for that of other (though unknown) mammals, besides the monotremes and marsupials, and thus shows the appellation of "mammalian age" given only to the Tertiary period to be misleading and erroneous; as it allows one to infer that there were no mammals, but reptiles, birds, amphibians, and fishes alone in the Mesozoic times -- the Secondary.

***** These Placentalia of the third sub-class are divided, it appears, into Villiplacentalia (placenta composed of many separate scattered tufts), the Zonoplacentalia (girdle-shaped placenta), and the discoplacentalia (or discoid). Haeckel sees in the Marsupialia Didelphia, one of the connecting links genealogically between man and the Moneron!!

[[Vol. 2, Page]] 714 THE SECRET DOCTRINE.

[[First Column continued from previous page]]

Tertiary period.* Why? Because man has to be shown younger than the higher mammals. But Esoteric philosophy teaches us the reverse. And as science is quite unable to come to anything like an approximate conclusion as to the age of man, or even the geological periods, therefore, even accepted only as a hypothesis, the occult teaching is more logical and reasonable.

No man is yet allowed to have lived during this period:--

***Tertiary -- Eocene. Miocene. Pliocene.

Says Mr. E. Clodd, in Knowledge:-- "Although the placental mammals and the order of Primates to which man is related, appear in Tertiary times and the climate, tropical in the Eocene age, warm in the Miocene and temperate in the Pliocene, was favourable to his presence, the proofs of his existence in Europe before the close of the Tertiary epoch are not generally accepted here."

[[First Column continued on next page]]

[[Second Column continued from previous page]]

like the First, Second, and Third Root-Races of men.** But this would require more space than can be now allotted to the subject.

Tertiary age -- The Third race has now almost utterly disappeared, carried away by the fearful geological cataclysms of the Secondary age, leaving behind it but a few hybrid races.

The Fourth, born millions of years before**** the said cataclysm took place, perishes during the Miocene period,***** when the Fifth (our Aryan race) had one million years of independent existence. (See "Esoteric Buddhism," pp. 53-55. Fourth Ed.) How much older it is from its origin -- who knows? As the "Historical" Period has begun, with the Indian Aryans, with their Vedas, for their multitudes,***** and far earlier in the Esoteric Records, it is useless to establish here any parallels.

[[Second Column continued on next page]]

[[Footnote(s)]] -----

* Those who feel inclined to sneer at that doctrine of Esoteric Ethnology, which pre-supposes the existence of Man in the Secondary Age, will do well to note the fact that one of the most distinguished anthropologists of the day, M. de Quatrefages, seriously argues in that direction. He writes: "There is nothing impossible in the supposition that he (Man) may have appeared on the globe with the first representatives of the type to which he belongs in virtue of his organism." This statement approximates most closely to our fundamental assertion that man preceded the other mammalia.

Professor Lefevre admits that the "labours of Boucher de Perthes, Lartet, Christy, Bourgeois, Desnoyers, Broca, de Mortillet, Hamy, Gaudry, Capellini, and a hundred others, have overcome all doubts and clearly established the progressive development of the human organism and industries from the Miocene epoch of the Tertiary age." ("Philosophy," p. 499, chapter on Organic Evolution.) Why does he reject the possibility of a Secondary-Age man? Simply because he is involved in the meshes of the Darwinian Anthropology!! "The origin of man is bound up with that of the higher mammals;" he appeared "only with the last types of his class"!! This is not [[Footnote continued on next page]]

[[Vol. 2, Page]] 715 THE SUFFICIENCY OF THE "ANIMALISTS."

Geology has now divided the periods and placed man in the --

Yet, mirabile dictu! -- while the non-cannibal Paleolithic man, who must have certainly antedated cannibal Neolithic man by hundreds of thousands of years***** is shown to be a remarkable artist, neolithic

[[Footnote(s)]] -----

[[Footnote continued from previous page]] argument, but dogmatism. Theory can never excommunicate fact! Must everything give place to the mere working-hypotheses of Western Evolutionists? Surely not.

** This inclusion of the First Race in the Secondary is necessarily only a provisional working-hypothesis -- the actual chronology of the First, Second, and Early Third Races being closely veiled by the Initiates. For all that can be said on the subject, the First Root-Race may have been Pre-Secondary, as is, indeed, taught. (Vide supra.)

*** The above parallels stand good only if Professor Croll's earlier calculations are adopted, namely, of 15,000,000 years since the beginning of the Eocene period (see Charles Gould's "Mythical Monsters," p. 84), not those in his "Climate and Time," which allow only 2 1/2 million years', or at the utmost three million years' duration to the Tertiary age. This, however, would make the whole duration of the incrustated age of the world only 131,600,000 years according to Professor Winchell, whereas in the Esoteric doctrine, sedimentation began in this Round approximately over 320 million years ago. Yet his calculations do not clash much with ours with regard to the epochs of glacial periods in the Tertiary age, which is called in our Esoteric books the age of the "Pigmies." With regard to the 320 millions of years assigned to sedimentation, it must be noted that even a greater time elapsed during the preparation of this globe for the Fourth Round previous to stratification.

**** Though we apply the term "truly human," only to the Fourth Atlantean Root-Race, yet the Third Race is almost human in its latest portion, since it is during its fifth sub-race that mankind separated sexually, and that the first man was born according to the now normal process. This "first man" answers in the Bible (Genesis) to Enos or Henoah, son of Seth (ch. iv.).

***** Geology records the former existence of a universal ocean, sheets of marine sediments uniformly present everywhere testifying to it; but, it is not even the epoch referred to in the allegory of Vaivasvata Manu. The latter is a Deva-Man (or Manu) saving in an ark (the female principle) the germs of humanity, and also the seven Rishis -- who stand here as the symbols for the seven human principles -- of which allegory we have spoken elsewhere. The "Universal Deluge" is the watery abyss of the Primordial Principle of Berousus. (See Stanzas from 2 to 8 in Part I.). How, if Croll allowed fifteen million years to have elapsed since the Eocene period (which we state on the authority of a Geologist, Mr. Ch. Gould) only 60 millions are assigned by him "since the beginning of the Cambrian period, in the Primordial Age" -- passes comprehension. The Secondary strata are twice the thickness of the Tertiary, and Geology thus shows the Secondary age alone to be of twice the length of the Tertiary. Shall we then accept only 15 million years for both the Primary and the Primordial? No wonder Darwin rejected the calculation.

***** We hope that we have furnished all the Scientific data for it elsewhere.

***** It is conceded by Geology to be "beyond doubt that a considerable period must have supervened after the departure of Palaeolithic man and before the arrival of his Neolithic successor." (See James Geikie's "Prehistoric Europe," and Ch. Gould's "Mythical Monsters," p. 98).

[[Vol. 2, Page]] 716 THE SECRET DOCTRINE.

man is made out almost an abject savage, his lake dwellings notwithstanding.* For see what a learned geologist, Mr. Charles Gould, tells the reader in his "Mythical Monsters":--

"Palaeolithic men were unacquainted with pottery and the art of weaving, and apparently had no domesticated animals or system of cultivation; but the Neolithic lake-dwellers of Switzerland had looms, pottery, cereals, sheep, horses," etc., etc.

Yet, though "Implements of horn, bone, and wood were in common use among both races . . . those of the older are frequently distinguished by their being sculptured with great ability, or ornamented with life-like engravings of the various animals living at the period; whereas there appears to have been a marked absence of any similar artistic ability** on the part of Neolithic man." Let us give the reasons for it.

(1) The oldest fossil man, the primitive cave-men of the old Palaeolithic period, and of the Pre-glacial period (of whatever length, and however far back), is always the same genus man, and there are no fossil remains proving for him "what the Hipparion and Anchitherium have proved for the genus horse -- that is, gradual progressive specialization from a simple ancestral type to more complex existing forms" ("Modern Science," p. 181).

(2) As to the so-called Palaeolithic hatchet . . . "when placed side by side with the rudest forms of stone hatchets actually used by the Australian and other savages, it is difficult to detect any difference" (Ibid, p. 112). This goes to prove that there have been savages at all times; and the inference would be that there might have been civilized people in those days as well, cultured nations contemporary with those rude savages. We see such a thing in Egypt 7,000 years ago.

[[Footnote(s)]] -----

* Resembling in a manner the pile-villages of Northern Borneo.

** "The most clever sculptor of modern times would probably not succeed very much better, if his graver were a splinter of flint and stone and bone were the materials to be engraved"!! (Prof. Boyd Dawkins' "Cave-Hunting," p. 344.) It is needless after such a concession to further insist on Huxley's, Schmidt's, Laing's, and others' statements to the effect that Palaeolithic man cannot be considered to lead us back in any way to a pithecoïd human race; thus demolishing the fantasies of many superficial evolutionists. The relic of artistic merit here re-appearing in the Chipped-Stone-Age men, is traceable to their Atlantean ancestry. Neolithic man was a fore-runner of the great Aryan invasion, and immigrated from quite another quarter -- Asia, and in a measure Northern Africa. (The tribes peopling the latter towards the North-West, were certainly of an Atlantean origin -- dating back hundreds of thousands of years before the Neolithic Period in Europe, -- but they had so diverged from the parent type as to present no longer any marked characteristic peculiar to it.) As to the contrast between Neolithic and Palaeolithic Man, it is a remarkable fact that, as Carl Vogt remarks, the former was a cannibal, the much earlier man of the Mammoth era not. Human manners and customs do not seem to improve with time, then? Not in this instance at any rate.

[[Vol. 2, Page]] 717 ONE SALVATION FOR SCIENCE.

(3) An obstacle which is the direct consequence of the two preceding: Man, if no older than the Palaeolithic period, could not possibly have had the actual time to get transformed from the "missing link" into what he is known to have been even during that remote geological time, i.e., even a finer specimen than many of the now existing races.

The above lends itself naturally to the following syllogism: (1) The primitive man (known to Science) was, in some respects, even a finer man of his genus than he is now. (2) The earliest monkey known, the lemur, was less anthropoid than the modern pithecoïd species. (3) Conclusion: even though a missing link were found, the balance of evidence would remain more in favour of the ape being a degenerated man made dumb by some fortuitous circumstances,* than tending to show that man descends from a pithecoïd ancestor. The theory cuts both ways.

On the other hand, if the existence of Atlantis is accepted, and the statement is believed that in the Eocene Age "even in its very first part, the great cycle of the fourth race men, the Atlanteans had already reached its highest point" (Esoteric Buddhism, p. 64) then some of the present difficulties of science might be easily made to disappear. The rude workmanship of the Palaeolithic tools proves nothing against the idea that, side by side with their makers, there lived nations highly civilized. We are told that "only a very small portion of the earth's surface has been explored, and of this a very small portion consists of ancient land surfaces or fresh water formations, where alone we can expect to meet with traces of the higher forms of animal life," . . . and that "even these have been so imperfectly explored, that where we now meet with thousands and tens of thousands of undoubted human remains lying almost under our feet, it is only within the last thirty years that their existence has even been suspected" (p. 98). It is very suggestive also that along with the rude haches of the lowest savage, explorers meet with specimens of workmanship of such artistic merit as could hardly be found, or expected, in a modern peasant belonging to any European country -- unless in exceptional cases. The "portrait" of the "Reindeer feeding," from the Thayngin grotto in Switzerland, and those of the man running, with two horse's heads sketched close to him -- a work of the Reindeer period, i.e., at least 50,000 years ago -- are pronounced by Mr. Laing not only exceedingly well done, but, especially the reindeer feeding, as one that "would do credit to any modern animal painter"

[[Footnote(s)]] -----

* On the data furnished by modern science, physiology, and natural selection, and without resorting to any miraculous creation, two negro human specimens of the lowest intelligence -- say idiots born dumb -- might by breeding produce a dumb Pastrana species, which would start a new modified race, and thus produce in the course of geological time the regular anthropoid ape.

[[Vol. 2, Page]] 718 THE SECRET DOCTRINE.

-- by no means exaggerated praise, as anyone may see (Vide infra). Now, since side by side with the modern Esquimaux, who also have a tendency, like their Palaeolithic ancestors of the Reindeer period, the rude and savage human species, to be constantly drawing with the point of their knives sketches of animals, scenes of the chase, etc., we have our greatest painters of Europe, why could not the same have happened in those days? Compared with the specimens of Egyptian drawing and sketching -- "7,000 years ago" -- the "earliest portraits" of men, horses' heads, and reindeer, made 50,000 years ago, are certainly superior. Nevertheless, the Egyptians of those periods are known to have been a highly civilized nation, whereas the Palaeolithic men are called savages of the lower type. This is a small matter seemingly, yet extremely suggestive as showing that every new geological discovery is made to fit in with current theories, instead of the reverse. Yes; Mr. Huxley is right in saying, "Time will show." It will, and must vindicate Occultism.

Meanwhile, the most uncompromising materialists are driven by necessity into the most occult-like admissions. Strange to say, it is the most materialistic -- those of the German school -- who, with regard to physical development, come the nearest to the teachings of the Occultists. Thus, Professor Baumgartner, who believes that "the germs for the higher animals could only be the eggs of the lower animals"; who thinks that "besides the advance of the vegetable and animal world in development, there occurred in that period the formation of new original germs," which formed the basis of new metamorphoses, etc. -- thinks also that "the first men who proceeded from the germs of animals beneath them, lived first in a larva state."

Just so, in a larva state, we say, too; only from no "animal" germ, and that "larva" was the soulless astral form of the pre-physical Races. And we believe, as the German professor does, with several other men of Science in Europe now, that the human races "have not descended from one pair, but appeared immediately in numerous races"; (Anfänge zu einer Physiologischen Schöpfungs-geschichte der Pflanzen und Thierwelt, 1885). Therefore, when we read "Force and Matter,"

and find that Emperor of Materialists, Buchner, repeating after Manu and Hermes, that "the plant passes imperceptibly into the animal, and the animal into man" (p. 85), we need only add "and man into a spirit," to complete the Kabalistic axiom. The more so, since on page 82 of the same work we read the following admission: . . . "Produced in the way of spontaneous generation . . . it is by the aid of intense natural forces and endless periods of time (that) there has progressively arisen that rich and infinitely modified organic world by which we are at present surrounded." . . . And (page 84) "Spontaneous generation played, no doubt,

[[Vol. 2, Page]] 719 BETWEEN TWO VOIDS.

a more important part in the primeval epoch than at present; nor can it be denied that in this way beings of a higher organization were produced than now,"* for this is the claim of Occultism.

The whole difference lies in this: Modern Science places her materialistic theory of primordial germs on earth, and the last germ of life on this globe, of man, and everything else, between two voids. Whence the first germ, if both spontaneous generation and the interference of external forces, are absolutely rejected now? Germs of organic life, we are told, by Sir W. Thomson, came to our earth in some meteor? This helps in no way and only shifts the difficulty from this earth to the supposed meteor.

These are our agreements and disagreements with Science. About the endless periods we are, of course, at one even with materialistic speculation; for we believe in Evolution, though on different lines. Professor Huxley very wisely says: "If any form of progressive development is correct, we must extend by long epochs the most liberal estimate that has yet been made of the antiquity of man." But when we are told that this man is a product of the natural forces inherent in matter, force, according to modern views, being but a quality of matter, a "mode of motion," etc.; and when we find Sir W. Thomson repeating in 1885 what was asserted by Buchner and his school thirty years ago, we fear all our reverence for real Science is vanishing into thin air! One can hardly help thinking that materialism is, in certain cases, a disease. For when men of Science, in the face of the magnetic phenomena and the attraction of iron particles through insulating substances, like glass, maintain that the said attraction is due to "molecular motion," or to the "rotation of the molecules of the magnet," then, whether the teaching comes from a "credulous" Theosophist innocent of any notion of physics, or from an eminent man of Science, it is equally ridiculous. The individual who asserts such a theory in the teeth of fact, is only one more proof that "When people have not a niche in their minds in which to shoot facts, so much the worse for the facts."

As present the dispute between the spontaneous generationists and their opponents is at rest, having ended in the provisional victory of the latter. But even they are forced to admit, as Buchner did, and Messrs. Tyndall and Huxley still do -- that spontaneous generation must have occurred once, under "special thermal conditions." Virchow refuses even to argue the question; it must have taken place sometime in the history of our planet: and there's an end of it. This seems to look more natural than Sir W. Thomson's hypothesis just quoted, that the germs of organic life fell on our earth in some meteor; or that other

[[Footnote(s)]] -----

* "Force and Matter," by Dr. Louis Buchner, translated and edited by J. Frederick Collingwood, F.R.S., F.G.S., 1864.

[[Vol. 2, Page]] 720 THE SECRET DOCTRINE.

scientific hypothesis coupled to the recently adopted belief that there exists no "Vital principle" whatever, but only vital phenomena, which can all be traced to the molecular forces of the original protoplasm. But this does not help Science to solve the still greater problem -- the origin and the descent of Man, for here is a still worse plaint and lamentation.

"While we can trace the skeletons of Eocene mammals through several directions of specialization in succeeding Tertiary times, man presents the phenomenon of an unspecialized skeleton which cannot fairly be connected with any of these lines." ("Origin of the World," p. 39, by Sir W. Dawson, LL.D., F.R.S.)

The secret could be soon told, not only from the esoteric but even from the standpoint of every religion the world over, without mentioning the Occultists. The "specialized skeleton" is sought for in the wrong place, where it can never be found. It is expected to be discovered in the physical remains of man, in some pithecoïd "missing link," with a skull larger than that of the ape's, and with a cranial capacity smaller than in man, instead of looking for that specialization in the super-physical essence of his inner astral constitution, which can hardly be excavated from any geological strata! Such a tenacious, hopeful clinging to a self-degrading theory is the most wonderful feature of the day.

[[diagram]]

REINDEER ENGRAVED ON ANTLER BY PALAEO-LITHIC MAN. (After Geikie.)

Meanwhile, this is a specimen of an engraving made by a Palaeolithic "savage": Palaeolithic meaning the "earlier Stone-age" man, one supposed to have been as savage and brutal as the brutes he lived with.

[[Vol. 2, Page]] 721 THE PALAEO-LITHIC LANDSEER.

Leaving the modern South Sea Islander, or even any Asiatic race, aside, we defy any grown-up schoolboy, or even a European youth, one who has never studied drawing, to execute such an engraving or even a pencil sketch. Here we have the true artistic raccourci, and correct lights and shadows without any plane model before the artist, who copied direct from nature, thus exhibiting a knowledge of anatomy and proportion. The artist who engraved this reindeer belonged, we are asked to believe, to the primitive "semi-animal" savages (contemporaneous with the mammoth and the

woolly rhinoceros), whom some over-zealous Evolutionists once sought to picture to us as distinct approximations to the type of their hypothetical "pithecoïd man"!

This engraved antler proves as eloquently as any fact can that the evolution of the races has ever proceeded in a series of rises and falls, that man, perhaps, is as old as incrustated Earth, and -- if we can call his Divine ancestor "Man" -- far older still.

Even de Mortillet himself seems to experience a vague distrust of the conclusions of modern archaeologists, when he writes:-- "The prehistoric is a new science, far, very far, from having said its last word." ("Prehist. Antiq. of Man," 1883.) According to Lyell, one of the highest authorities on the subject, and the "Father" of Geology:-- "The expectation of always meeting with a lower type of human skull, the older the formation in which it occurs, is based on the theory of progressive development, and it may prove to be sound; nevertheless we must remember that as yet we have no distinct geological evidence that the appearance of what are called the inferior races of mankind has always preceded in chronological order that of the higher races." ("Antiq. of Man," p. 25.) Nor has such evidence been found to this day. Science is thus offering for sale the skin of a bear, which has hitherto never been seen by mortal eye!

This concession of Lyell's reads most suggestively with the subjoined utterance of Professor Max Muller, whose attack on the Darwinian Anthropology from the standpoint of LANGUAGE has, by the way, never been satisfactorily answered:--

"What do we know of savage tribes beyond the last chapter of their history?" (Cf. this with the esoteric view of the Australians, Bushmen, as well as of Palaeolithic European man, the Atlantean offshoots retaining a relic of a lost culture, which thrived when the parent Root-Race was in its prime.) "Do we ever get an insight into their antecedents. . . . How have they come to be what they are? . . . Their language proves, indeed, that these so-called heathens, with their complicated systems of mythology, their artificial customs, their unintelligible whims and savageries, are not the creatures of to-day or yesterday. Unless we admit a special creation for these savages, they must be as old as the Hindus, the Greeks and Romans (far older). . . ."

[[Vol. 2, Page]] 722 THE SECRET DOCTRINE.

They may have passed through ever so many vicissitudes, and what we consider as primitive, may be, for all we know, a RELAPSE INTO SAVAGERY or a corruption of something that was more rational and intelligible in former stages." ("India," 1883, F. Max Muller.)

"The primeval savage is a familiar term in modern literature," remarks Professor Rawlinson, "but there is no evidence that the primeval savage ever existed. Rather all the evidence looks the other way." ("Antiq. of Man Historically Considered.") In his "Origin of Nations," pp. 10-11, he rightly adds: "The mythical traditions of almost all nations place at the beginning of human history a time of happiness and perfection, a 'golden age' which has no features of savagery or barbarism, but many of civilization and refinement." How is the modern evolutionist to meet this consensus of evidence?

We repeat the question asked in "Isis Unveiled": "Does the finding of the remains in the cave of Devon prove that there were no contemporary races then who were highly civilized? When the present population of the earth have disappeared, and some archaeologist belonging to the 'coming race' of the distant future shall excavate the domestic implements of one of our Indian or Andaman Island tribes, will he be justified in concluding that mankind in the nineteenth century was 'just emerging from the Stone Age'?"

Another strange inconsistency in scientific knowledge is that Neolithic man is shown as being far more of a primitive savage than the Palaeolithic one. Either Lubbock's "Pre-historic Man," or Evans' "Ancient Stone Implements" must be at fault, or -- both. For this is what we learn from these works and others:--

(1) As we pass from Neolithic to Palaeolithic Man, the stone implements become, from gracefully shaped and polished instruments, rude lumbering makeshifts. Pottery, etc., disappear as we descend the scale. And yet the latter could engrave such a reindeer!

(2) Palaeolithic Man lived in caves which he shared with hyaenas and lions also,* whereas Neolithic man dwelt in lake-villages and buildings.

Every one who has followed even superficially the geological discoveries of our day, knows that a gradual improvement in workmanship is found, from the clumsy chipping and rude chopping of the early Palaeolithic haches, to the relatively graceful stone celts of that part of the Neolithic period immediately preceding the use of metals. But this is in Europe, a few portions only of which were barely rising from the waters in the days

[[Footnote(s)]] -----

* In such a case Palaeolithic man must have been endowed in his day with thrice Herculean force and magic invulnerability, or else the lion was as weak as a lamb at that period, for both to share the same dwelling. We may as well be asked to believe next that it is that lion or hyaena which has engraved the deer on the antler, as be told that this bit of workmanship was done by a savage of such a kind.

[[Vol. 2, Page]] 723 ENTRAPPED BY THE REINDEER.

of the highest Atlantean civilizations. There were rude savages and highly civilized people then, as there are now. If 50,000 years hence, pigmy Bushmen are exhumed from some African cavern together with far earlier pigmy elephants, such as were found in the cave deposits of Malta by Milne Edwards, will that be a reason to maintain that in our age all men and all elephants were pigmies? Or if the weapons of the Vedddhas of Ceylon are found, will our descendants be justified in setting us all down as Palaeolithic savages? All the articles which geologists now excavate in Europe can certainly never date earlier than from the close of the Eocene age, since the lands of Europe were not even above water

before that period. Nor can what we have said be in the least invalidated by theorists telling us that these quaint sketches of animals and men by Palaeolithic man, were executed only toward the close of the Reindeer period -- for this explanation would be a very lame one indeed, in view of the geologists' ignorance of even the approximate duration of periods.

The Esoteric Doctrine teaches distinctly the dogma of the risings and falls of civilization; and now we learn that: "It is a remarkable fact that cannibalism seems to have become more frequent as man advanced in civilization, and that while its traces are frequent in Neolithic times they . . . altogether disappear in the age of the mammoth and the reindeer." ("Mod. Science and Mod. Thought," p. 164.)

Another evidence of the cyclic law and the truth of our teachings. Esoteric history teaches that idols and their worship died out with the Fourth Race, until the survivors of the hybrid races of the latter (Chinamen, African negroes, &c.) gradually brought the worship back. The Vedas countenance no idols; all the modern Hindu writings do.

"In the early Egyptian tombs, and in the remains of the pre-historic cities excavated by Dr. Schliemann, images of owl and ox-headed goddesses, and other symbolical figures, or idols, are found in abundance. But when we ascend into Neolithic times, such idols are no longer found . . . the only ones which may be said with some certainty to have been idols are one or two discovered by M. de Braye in some artificial caves of the Neolithic period . . . which appear to be intended for female figures of life size" . . . (p. 199 Ibid.)

And these may have been simply statues. Anyhow, all this is one among the many proofs of the cyclic rise and fall of civilization and religion. The fact that no traces of human relics or skeletons are so far found beyond post-tertiary or "Quaternary" times -- though Abbe Bourgeois' flints may serve as a warning* -- seems to point to the truth of another esoteric statement,

[[Footnote(s)]] -----

* More than twenty specimens of fossil monkeys have been found in one locality alone, in Miocene strata (Pikermi, near Athens). If man was not then, the period is [[Footnote continued on next page]]

[[Vol. 2, Page]] 724 THE SECRET DOCTRINE.

which runs thus: "Seek for the remains of thy forefathers in the high places. The vales have grown into mountains and the mountains have crumbled to the bottom of the seas." . . . Fourth Race mankind, thinned after the last cataclysm by two-thirds of its population, instead of settling on the new continents and islands that reappeared while their predecessors formed the floors of new Oceans -- deserted that which is now Europe and parts of Asia and Africa for the summits of gigantic mountains, the seas that surrounded some of the latter having since "retreated" and made room for the table lands of Central Asia.

The most interesting example of this progressive march is perhaps afforded by the celebrated Kent's Cavern at Torquay. In that strange recess, excavated by water out of the Devonian limestone, we find a most curious record preserved for us in the geological memoirs of the earth. Under the blocks of limestone, which heaped the floor of the cavern, were discovered, embedded in a deposit of black earth, many implements of the Neolithic period of fairly excellent workmanship, with a few fragments of pottery -- possibly traceable to the era of the Roman colonization. There is no trace of Palaeolithic man here. No flints or traces of the extinct animals of the Quaternary period. When, however, we penetrate still deeper through the dense layer of stalagmite beneath the mould into the red earth, which, of course, itself once formed the pavement of the retreat, things assume a very different aspect. Not one implement fit to bear comparison with the finely-chipped weapons found in the overlying stratum is to be seen; only a host of the rude and lumbering little hatchets (with which the monstrous giants of the animal world were subdued and killed by little man, we have to think?) and scrapers of the Palaeolithic age, mixed up confusedly with the bones of species now either extinct or emigrated, driven away by change of climate. It is the artificer of these ugly little hatchets, you see, who sculptured the reindeer over the brook, on the antler as shown above. In all cases we meet with the same evidence that, from historic to Neolithic and from Neolithic to Palaeolithic man, things slope downwards on an inclined plane from the rudiments of civilization to the most abject barbarism -- in Europe again. We are made also to face the "mammoth age" -- the extreme or earliest division of the Palaeolithic age -- in which the great rudeness of implements reaches its maximum, and the brutal (?) appearance of contemporary skulls, such as the Neanderthal, point to a very low type of Humanity. But they may sometimes point also to something besides; to a race of men quite distinct from our (Fifth Race) Humanity.

[[Footnote(s)]] -----

[[Footnote continued from previous page]] too short for him to have been transformed -- stretch it as you may. And if he was, and if no monkey is found earlier, what follows?

[[Vol. 2, Page]] 725 STRANGE CONFESSIONS OF SCIENCE.

As said by an anthropologist in "Modern Thought" (art. "The Genesis of Man"): "The theory, scientifically based or not, of Peyrere may be considered to be equivalent to that which divided man in two species. Broca, Virey, and a number of the French anthropologists have recognised that the lower race of man, comprising the Australian, Tasmanian, and Negro race, excluding the Kaffirs and the Northern Africans, should be placed apart. The fact that in this species, or rather sub-species, the third lower molars are usually larger than the second, and the squamosal and frontal bones are generally united by suture, places the Homo Afer on the level of being as good a distinct species as many of the kinds of finches. I shall abstain on the present occasion from mentioning the facts of hybridity, whereon the late Professor Broca has so exhaustively commented. The history, in the past ages of the world, of this race is peculiar. It has never originated a system of architecture or a religion of its own" (Dr. C. Carter Blake). It is peculiar, indeed, as we have shown in the case of the Tasmanians. However it may be, fossil man in Europe can neither prove nor disprove the antiquity of man on this Earth nor the age of his earliest civilizations.

It is time the Occultists should disregard any attempts to laugh at them, scorning the heavy guns of the satire of the men of science as much as the pop-guns of the profane, since it is impossible, so far, to obtain either proof or disproof, while their theories can stand the test better than the hypotheses of the Scientists at any rate. As to the proof for the antiquity which they claim for man, they have, moreover, Darwin himself and Lyell. The latter confesses that they (the naturalists) "have already obtained evidence of the existence of man at so remote a period that there has been time for many conspicuous mammalia, once his contemporaries, to die out, and this even before the era of the earliest historical records."* This is a statement made by one of England's great authorities upon the question. The two sentences that follow are as suggestive, and may well be remembered by the students of Occultism, for with all others he says: "In spite of the long lapse of prehistoric ages during which he (Man) must have flourished on Earth, there is no proof of any perceptible change in his bodily structure. If, therefore, he ever diverged from some unreasoning brute ancestor, we must suppose him to have existed at a far more distant epoch, possibly on some continents or islands now submerged beneath the Ocean."

Thus lost continents are officially suspected. That worlds (also Races) are periodically destroyed by fire (volcanoes and earthquakes) and water, in turn, and renewed, is a doctrine as old as man. Manu, Hermes, the Chaldees, all antiquity believed in this. Twice already

[[Footnote(s)]] -----

* "Antiquity of Man," p. 530.

[[Vol. 2, Page]] 726 THE SECRET DOCTRINE.

has the face of the globe been changed by fire, and twice by water, since man appeared on it. As land needs rest and renovation, new forces, and a change for its soil, so does water. Thence arises a periodical redistribution of land and water, change of climates, etc., all brought on by geological revolution, and ending in a final change in the axis. Astronomers may pooh-pooh the idea of a periodical change in the behaviour of the globe's axis, and smile at the conversation given in the Book of Enoch between Noah and his "grandfather" Enoch; the allegory is, nevertheless, a geological and an astronomical fact: there is a secular change in the inclination of the earth's axis, and its appointed time is recorded in one of the great Secret Cycles. As in many other questions, Science is gradually moving toward our way of thinking. Dr. Henry Woodward, F.R.S., F.G.S., writes in the Popular Science Review (New Series in Vol. I. p. 115), Art.: "Evidences of the Age of Ice." . . . "If it be necessary to call in extramundane causes to explain the great increase of ice at this glacial period, I would prefer the theory propounded by Dr. Robert Hooke in 1688; since, by Sir Richard Phillips and others; and lastly by Mr. Thomas Belt, C.E., F.G.S.; namely, a slight increase in the present obliquity of the ecliptic, a proposal in perfect accord with other known astronomical facts, and the introduction of which is essential to our cosmical condition as a unit in the great solar system."

The following, quoted from a Lecture by W. Pengelly, F.R.S., F.G.S., delivered in March, 1885, on "The extinct Lake of Bovey Tracey" shows the hesitation, in the face of every evidence in favour of Atlantis, to accept the fact. It is a quotation in the body of the Lecture:--

"Evergreen Figs, Laurels, Palms, and Ferns having gigantic rhizomes have their existing congeners in a sub-tropical climate, such, it cannot be doubted, as prevailed in Devonshire in Miocene times, and are thus calculated to suggest caution when the present climate of any district is regarded as normal.

"When, moreover, Miocene plants are found in Disco Island, on the west coast of Greenland, lying between 69[[degrees]] 20' and 70[[degrees]] 30' N. lat.; when we learn that among them were two species found also at Bovey (Sequoia couttsiae, Quercus Lyelli); when, to quote Professor Heer, we find that "the 'splendid evergreen' (Magnolia Ingfieldi) 'ripened its fruits so far north as on the parallel of 70 [[degrees]] ' " (Phil. Trans. clix., 457, 1869); when also the number, variety, and luxuriance of the Greenland Miocene plants are found to have been such that, had land continued so far, some of them would in all probability have flourished at the Pole itself, the problem of changes of climate is brought prominently into view, but only to be dismissed apparently with the feeling that the time for its solution has not yet arrived.

[[Vol. 2, Page]] 727 NO "MISSING LINK" ANYWHERE.

"It seems to be admitted on all hands that the Miocene plants of Europe have their nearest and most numerous existing analogues in North America, and hence arises the question; How was the migration from one area to the other effected? Was there, as some have believed, an Atlantis? -- a continent, or an archipelago of large islands, occupying the area of the North Atlantic. There is perhaps nothing unphilosophical in this hypothesis; for since, as geologists state, 'the Alps have acquired 4,000, and even in some places more than 10,000 feet of their present altitude since the commencement of the Eocene period' (Lyell's Principles, 11th ed., p. 256, 1872), a Post-Miocene (?) depression might have carried the hypothetical Atlantis into almost abysmal depths. But an Atlantis is apparently unnecessary and uncalled for. According to Professor Oliver, 'A close and very peculiar analogy subsists between the Flora of Tertiary Central Europe and the recent Floras of the American States and of the Japanese region; an analogy much closer and more intimate than is to be traced between the Tertiary and Recent Floras of Europe. We find the Tertiary element of the Old World to be intensified towards its extreme eastern margin. . . . This accession of the Tertiary element is rather gradual and not abruptly assumed in the Japan islands only. Although it there attains a maximum, we may trace it from the Mediterranean, Levant, Caucasus, and Persia . . . then along the Himalaya and through China. . . . We learn also that during the Tertiary epoch, counterparts of Central European Miocene genera certainly grew in North-West America. . . . We note further that the present Atlantic Islands' Flora affords no substantial evidence of a former direct communication with the mainland of the New World. . . . The consideration of these facts leads me to the opinion that botanical evidence does not favour the hypothesis of an Atlantis. On the other hand, it strongly favours the view that at some period of the Tertiary epoch North-Eastern Asia was united to North-western America, perhaps by the line where the Aleutian chain of islands now extends.' " (Nat. Hist. Rev. ii. 164, 1862.) See, however, "Scientific and Geological Proofs of the Reality of Several Submerged Continents."

But nothing short of a pithecoïd man, will ever satisfy the luckless searchers after the thrice hypothetical "missing link." Yet, if beneath the vast floors of the Atlantic, from the Teneriffe Pic to Gibraltar, the ancient emplacement of the lost Atlantis, all the submarine strata were to be broken up miles deep, no such skull as would satisfy the Darwinists would be found. As Dr. C. R. Bree remarks ("Fallacies of Darwinism"), no missing links between man and ape having been discovered in various gravels and formations above the tertiaries, if they had gone down with the continents now covered with the sea, they

[[Vol. 2, Page]] 728 THE SECRET DOCTRINE.

might still be found "in those beds of contemporary geological strata which have not gone down to the bottom of the sea." Yet they are as fatally absent from the latter as from the former. Were not preconceptions to fasten vampire-like on man's mind, the author of "Antiquity of Man" would have found a clue to the difficulty in that same work of his, by going ten pages back (530) and reading over a quotation of his own from Professor G. Rolleston's work. This physiologist, he says, suggests that as there is considerable plasticity in the human frame, not only in youth and during growth, but even in the adult, we ought not always to take for granted, as some advocates of the development theory seem to do, that each advance in physical power depends on an improvement in bodily structure, for why may not the soul, or the higher intellectual and moral faculties play the first instead of the second part in a progressive scheme.

This hypothesis is made in relation to Evolution not being entirely due to "natural selection"; but it applies as well to our case in hand. For we, too, claim that it is the "Soul," or the inner man, that descends on Earth first, the psychic astral, the mould on which physical man is gradually built -- his Spirit, intellectual and moral faculties awakening later on as that physical stature grows and develops.

"Thus incorporeal Spirits to smaller forms reduced their shapes immense," . . . and became the men of the Third and the Fourth Races. Still later, ages after, appeared the men of our Fifth Race, reduced from the still gigantic (in our modern sense) stature of their primeval ancestors, to about half of that size at present.

Man is certainly no special creation, and he is the product of Nature's gradual perfective work, like any other living unit on this Earth. But this is only with regard to the human tabernacle. That which lives and thinks in man and survives that frame, the masterpiece of evolution -- is the "Eternal Pilgrim," the Protean differentiation in space and time of the One Absolute "unknowable."

In his "Antiquity of Man," Sir C. Lyell quotes -- perhaps in rather a mocking spirit -- what Hallam says (in Vol. iv., p. 162) in his "Introduction to the Literature of Europe":--

"If man was made in the image of God, he was also made in the image of an ape. The framework of the body of him who has weighed the stars and made the lightning his slave, approaches to that of a speechless brute who wanders in the forest of Sumatra. Thus standing on the frontier land between animal and angelic natures, what wonder that he should partake of both?"

An Occultist would have put it otherwise. He would say that man was indeed made in the image of a type projected by his progenitor, the creating Angel-Force, or Dhyān Chohan; while the wanderer of the forest of Sumatra was made in the image of man, since the frame-

[[Vol. 2, Page]] 729 PALAEO-LITHIC MAN, A CALIGRAPH!

work of the ape, we say again, is the revival, the resuscitation by abnormal means of the actual form of the Third-Round, and of the Fourth-Round Man as well, later on. Nothing is lost in nature, not an atom: this latter is at least certain on scientific data. Analogy would appear to demand that form should be equally endowed with permanency.

And yet what do we find:--

"It is significant," says Sir W. Dawson, F.R.S., "that Professor Huxley in his lectures in New York, while resting his case as to the lower animals, mainly on the supposed genealogy of the horse, which has often been shown to amount to no certain evidence, avoided altogether the discussion of the origin of men from the apes, now obviously complicated with so many difficulties that both Wallace and Mivart are staggered by them. Professor Thomas in his recent lectures ('Nature,' 1876), admits that there is no lower man known than the Australian, and that there is no known link of connection with the monkeys; and that Haeckel has to admit that the penultimate link in his phylogeny, the ape-like man, is absolutely unknown ('History of Creation.') . . . The so-called 'tallies' found with the bones of Palaeo-cosmic men in European caves, and illustrated in the admirable works of Christy and Lartet, show that the rudiments even of writings were already in possession of the oldest race of men known to archaeology or geology." (See Wilson's "Prehistoric Man," op. cit., vol. ii., p. 54. "Origin of the World," p. 393.)

Again in Dr. C. R. Bree's "Fallacies of Darwinism," on page 160, we read:--

"Mr. Darwin justly says that the difference physically and, more especially mentally, between the lowest form of man and the highest anthropomorphous ape, is enormous. Therefore, the time -- which in Darwinian evolution must be almost inconceivably slow -- must have been enormous also during man's development from the monkey.* The chance, therefore, of some of these variations being found in the different gravels or fresh-water formations above the tertiaries, must be very great. And yet not one single variation, not one single specimen of a being between a monkey and a man has ever been found. Neither in the gravel, nor the drift-clay, nor the fresh-water beds, nor in the tertiaries below them has there ever been discovered the remains of any member of the missing families between the monkey and the man, as assumed to have existed by Mr. Darwin. Have they gone down with the depression of the earth's surface and are they now covered with the sea? If so, it is beyond all probability that they should not, also be found in those beds of contemporary geological strata which have not gone down to the bottom of the sea; still more improbable that some

portions should not be dredged from the ocean bed like the remains of the mammoth and the rhinoceros which are also found in fresh-water beds and gravels and drift! the celebrated Neanderthal skull, about which so much has been said, belongs confessedly to this remote epoch (bronze and stone ages), and yet presents, although it may have been the skull of an idiot, immense differences from the highest known anthropomorphous ape."

[[Footnote(s)]] -----

* And how much more "enormous" if we reverse the subjects and say during the monkey's development from the Third Race Man.

[[Vol. 2, Page]] 730 THE SECRET DOCTRINE.

Our globe being convulsed each time that it reawakens for a new period of activity, like a field which has to be ploughed and furrowed before fresh seed for its new crop is thrown into it -- it does seem quite hopeless that fossils belonging to its previous Rounds should be found in the beds of either its oldest or its latest geological strata. Every new Manvantara brings along with it the renovation of forms, types and species; every type of the preceding organic forms -- vegetable, animal and human -- changes and is perfected in the next, even to the mineral, which has received in this Round its final opacity and hardness; its softer portions having formed the present vegetation; the astral relics of previous vegetation and fauna having been utilized in the formation of the lower animals, and determining the structure of the primeval Root-Types of the highest mammalia. And, finally, the form of the gigantic Ape-Man of the former Round has been reproduced in this one by human bestiality and transfigured into the parent form in the modern Anthropoid.

This doctrine, even imperfectly delineated as it is under our inefficient pen, is assuredly more logical, more consistent with facts, and far more probable than many "scientific" theories; that, for instance, of the first organic germ descending on a meteor to our Earth -- like Ain Soph on his Vehicle, Adam Kadmon. Only, the latter descent is allegorical, as every one knows, and the Kabalists have never offered this figure of speech for acceptance in its dead-letter garb. But the germ on the meteor theory, as coming from such high scientific quarters, is an eligible candidate for axiomatic truth and law, a theory people are in honour bound to accept, if they would be on a right level with modern Science. What the next theory necessitated by the materialistic premises will be -- no one can tell. Meanwhile, the present theories, as any one can see, clash together far more discordantly among themselves than even those of the Occultists outside the sacred precincts of learning. For what is there, next in order, now that exact Science has made even of the Life-principle an empty word, a meaningless term; and now insists that life is an effect due to the molecular action of the primordial protoplasm! The new doctrine of the Darwinists may be defined and summarized in a few words, in which Mr. Herbert Spencer has defined "special creation" . . . "it is worthless. Worthless, by its derivation; worthless, in its intrinsic incoherence; worthless, as absolutely without evidence; worthless, as not supplying an intellectual need; worthless, as not satisfying a moral want. We must, therefore, consider it as counting for nothing in opposition to any other hypothesis respecting the origin of organic beings." (Principles of Biology, Vol. I., p. 345.)

[[Vol. 2, Page]] 731 STILL GREATER DIFFICULTIES.

§ V.
ORGANIC EVOLUTION AND CREATIVE CENTRES.

IT is argued that the Universal Evolution, otherwise, the gradual development of species in all the kingdoms of nature, works by uniform laws. This is admitted, and the law enforced far more strictly in Esoteric than in modern Science. But we are told also, that it is equally a law that "development works from the less to the more perfect, and from the simpler to the more complicated, by incessant changes, small in themselves, but constantly accumulating in the required direction." It is from the infinitesimally small that the comparatively gigantic species are produced.

Esoteric Science agrees with it, but adds that this law applies only to what is known to it as the Primary Creation -- the evolution of worlds from primordial atoms, and the pre-primordial ATOM, at the first differentiation of the former; and that during the period of cyclic evolution in space and time, this law is limited and works only in the lower kingdoms. It did so work during the first geological periods, from simple to complex, on the rough material surviving from the relics of the Third Round, which relics are projected into objectivity when terrestrial activity recommences.

No more than Science, does esoteric philosophy admit design or "special creation." It rejects every claim to the "miraculous," and accepts nothing outside the uniform and immutable laws of Nature. But it teaches a cyclic law, a double stream of force (or spirit) and of matter, which, starting from the neutral centre of Being, develops in its cyclic progress and incessant transformations. The primitive germ from which all vertebrate life has developed throughout the ages, being distinct from the primitive germ from which the vegetable and the animal life have evolved, there are side laws whose work is determined by the conditions in which the materials to be worked upon are found by them, and of which Science -- physiology and anthropology especially -- seems to be little aware. Its votaries speak of that "primitive germ," and maintain that it is shown beyond any doubt that the "design" and the "designer," if there be any, in the case of man, with the wonderful structure of his limbs, and his hand especially, "must be placed very much farther back, and (the design) is, in fact, involved in the primitive germ," from which not only all vertebrate life, but, "probably all life, animal and vegetable, have been slowly developed" (p. 94 of "Modern Science and Modern Thought").

[[Vol. 2, Page]] 732 THE SECRET DOCTRINE.

This is as true of the "primitive germ" as it is false that that "germ" is only "very much farther back" than man is; for it is at an immeasurable and inconceivable distance (in time, though not in space) from the origin even of our Solar system. As the Hindu philosophy very justly teaches, the "Aniyamsam Aniyasam," can be known only through false notions. It is the "many" that proceed from the ONE -- the living spiritual germs or centres of forces -- each in a septenary form, which first generate, and then give the PRIMARY IMPULSE to the law of evolution and gradual slow development.

Limiting the teaching strictly to this, our earth, it may be shown that, as the ethereal forms of the first Men are first projected on seven zones by seven Dhyana-Chohanian centres of Force, so there are centres of creative power for every ROOT or parent species of the host of forms of vegetable and animal life. This is, again, no "special creation," nor is there any "Design," except in the general "ground-plan" worked out by the universal law. But there are certainly "designers," though these are neither omnipotent nor omniscient in the absolute sense of the term. They are simply Builders, or Masons, working under the impulse given them by the ever-to-be-unknown (on our plane) Master Mason -- the ONE LIFE and Law. Belonging to this sphere, they have no hand in, or possibility of working on any other, during the present Manvantara, at any rate. That they work in cycles and on a strictly geometrical and mathematical scale of progression, is what the extinct animal species amply demonstrate; that they act by design in the details of minor lives (of side animal issues, etc.) is what natural history has sufficient evidence for. In the creation of new species, departing sometimes very widely from the Parent stock, as in the great variety of the genus Felis -- like the lynx, the tiger, the cat, etc. -- it is the "designers" who direct the new evolution by adding to, or depriving the species of certain appendages, either needed or becoming useless in the new environments. Thus, when we say that Nature provides for every animal and plant, whether large or small, we speak correctly. For, it is those terrestrial spirits of Nature, who form the aggregated Nature; which, if it fails occasionally in its design, is neither to be considered blind, nor to be taxed with the failure; since, belonging to a differentiated sum of qualities and attributes, it is in virtue of that alone conditioned and imperfect.

Were there no such thing as evolutionary cycles, an eternal spiral progress into matter with a proportionate obscuration of spirit -- though the two are one -- followed by an inverse ascent into spirit and the defeat of matter -- active and passive by turn -- how explain the discoveries of zoology and geology? How is it that, on the dictum of authoritative science, one can trace the animal life from the mollusc up

[[Vol. 2, Page]] 733 THE "TO BE OR NOT TO BE" OF SCIENCE.

to the great Sea Dragon, from the smallest land-worm up again to the gigantic animals of the Tertiary Period; and that the latter were once crossed is shown by the fact of all those species decreasing, dwindling down and being dwarfed. If the seeming process of development working from the less to the more perfect, and from the simpler to the more complex, were a universal law indeed, instead of being a very imperfect generalization of a mere secondary nature in the great Cosmic process, and if there were no such cycles as those claimed, then the Mesozoic fauna and flora ought to change places with the latest Neolithic. It is the Plesiosaurs and the Ichthyosaurs that we ought to find developing from the present sea and river reptiles, instead of giving place to their dwarfed modern analogies. It is, again, our old friend, the good-tempered elephant, that would be the fossil antediluvian ancestor, and the mammoth of the Pliocene age who would be in the menagerie; the megalonyx and the gigantic megatherium would be found instead of the lazy sloth in the forests of South America, in which the colossal ferns of the carboniferous periods would take the place of moss and present trees -- dwarfs, even the giants of California, in comparison with the Titan-trees of past geological periods. Surely the organisms of the megasthenian world of the Tertiary and the Mesozoic Ages must have been more complex and perfect than those of the microsthenian plants and animals of the present age? The Dryopithecus, for instance, is found more perfect anatomically, more fit for a greater development of brain power, than the modern gorilla or gibbon? How is this, then? Are we to believe that the constitution of all those colossal land and sea-dragons, of the gigantic flying reptiles, was not far more developed and complex than the anatomy of the lizards, turtles, crocodiles, and even of the whales -- in short, all those animals we are acquainted with?

Let us admit, however, for argument's sake, that all those cycles, races, septenary forms of evolution and the tutti quanti of esoteric teaching, are no better than a delusion and a snare. Let us agree with Science and say that man, instead of being an imprisoned "Spirit," and his vehicle, the shell or body, a gradually perfected and now complete mechanism for material and terrestrial uses, as claimed by the Occultists -- is simply a more developed animal, whose primal form emerged from one and the same primitive germ on this earth, as the flying dragon and the gnat, the whale and the amoeba, the crocodile and the frog, etc., etc. In this case, he must have passed through the identical developments and through the same process of growth as all the other mammals? If man is an animal, and nothing more, a highly intellectual ex-brute, he should be privileged, at least, and allowed to have been a gigantic mammal of his kind, a

[[Vol. 2, Page]] 734 THE SECRET DOCTRINE.

meganthropos in his day. It is just this, that esoteric science shows as having taken place in the first three rounds, and in this, as in most other things, it is more logical and consistent than modern science. It classifies the human body with the brute creation, and maintains it in the path of animal evolution, from first to last, while science leaves man a parentless orphan born of sires unknown, an "unspecialized skeleton" truly! And this mistake is due to a stubborn rejection of the doctrine of cycles.

A.

THE ORIGIN AND EVOLUTION OF THE MAMMALIA: SCIENCE AND THE ESOTERIC PHYLOGENY.

Having dealt almost exclusively with the question of the origin of Man in the foregoing criticism of Western Evolutionism, it may not be amiss to define the position of the Occultists with regard to the differentiation of species. The pre-human fauna and flora have been already generally dealt with in the Commentary on the Stanzas, and the truth of much of modern biological speculation admitted, e.g., the derivation of birds from reptiles, the partial truth of "natural selection," and the transformation theory generally. It now remains to clear up the mystery of the origin of those first mammalian fauna which M. de Quatrefages so brilliantly endeavours to prove as contemporary with the Homo primigenius of the Secondary Age.

The somewhat complicated problem relating to the "Origin of Species," -- more especially of the varied groups of fossil or existing mammalian fauna -- will be rendered less obscure by the aid of a diagram. It will then be apparent to what extent the "Factors of Organic Evolution," relied upon by Western biologists,* are to be considered as

[[Footnote(s)]] -----

* The Darwinian theory has been so strained, that even Huxley was forced at one time to deprecate its occasional degeneration into "fanaticism." Oscar Schmidt presents a good instance of a thinker who unconsciously exaggerates the worth of an hypothesis. He admits ("The Doctrine of Descent and Darwinism," p. 158), that "natural selection" "is in some cases . . . inadequate, . . . in others . . . not requisite, as the solution of the formation of species is found in other natural conditions." He also asserts the "intermediate grades are . . . wanting, which would entitle us to infer with certainty the direct transition from uniplacental to placental mammals" (p. 271); that "we are referred entirely to conjecture and inference for the origin of the mammals" (p. 268); and the repeated failures of the framers of "hypothetical pedigrees," more especially of Haeckel. Nevertheless he asserts on p. 194, that "what we have gained by the Doctrine of Descent based on the theory of selection is the KNOWLEDGE of the connection of organisms as 'consanguineous beings.' " Knowledge in the face of the above-cited concessions, is, then, the synonym for conjecture and theory only?

[[Vol. 2, Page]] 735 CONJECTURES ARE NOT FACTS.

adequate to meet the facts. The line of demarcation between etherspiritual, astral and physical evolution must be drawn. Perhaps, if Darwinians deigned to consider the possibility of the second process, they would no longer have to lament the fact that "we are referred to conjecture and inference for the origin of the Mammals"!! (The Doctrine of Descent and Darwinism, p. 268, by Professor O. Schmidt.) At present the admitted chasm between the systems of reproduction of the oviparous vertebrates and mammalia, constitutes a hopeless crux to those thinkers who, with the Evolutionists, seek to link all existing organic forms in a continuous line of descent.

Let us take -- *exempli gratia* -- the case of the ungulate mammals. "In no other division," it is said, "do we possess such abundant fossil material." So much progress has been made in this direction, that in some instances the intermediate links between the modern and Eocene ungulates have been unearthed; a notable example being that of the complete proof of the derivation of the present one-toed horse from the three-toed *Anchitherium* of the old Tertiary. This standard of comparison between Western Biology and the Eastern doctrine could not, therefore, be improved upon. The pedigree here utilized, as embodying the views of scientists in general, is that of Schmidt based on the exhaustive researches of Rutimeyer. Its approximate accuracy -- from the standpoint of evolutionism -- leaves little to be desired:--

The midway point of evolution. Science comes to a standstill. "The root to which these two families lead back IS UNKNOWN" (Schmidt).

[[diagram]]

[[text in diagram]]

The "ROOT" according to occultism.

II.

ANOPLOTHERIDAE. PALAEOTHERIDAE.

One of the Seven primeveal physico-astral and bi-sexual root-types of the Mammalian Kingdom (animal). These were contemporaries of the early Lemurian races -- the "UNKNOWN ROOTS" of Science.

No. I. represents the realm explored by Western Evolutionists, the area in which climatic influences, "natural selection," and all the other physical causes of organic differentiation are present. Biology and palaeontology find their province here in investigating the many physical agencies which contribute so largely, as shown by Darwin, Spencer and others, to the

segregation of species. But even in this domain the sub-conscious workings of the Dhyān-Chohanīc wisdom are at the root of all the "ceaseless striving towards perfection," though its influence is vastly modified by those purely material causes which de Quatrefages terms the "milieux" and Spencer the "Environment."

The "midway point of evolution" is that stage where the astral prototypes definitely begin to pass into the physical, and thus become subject to the differentiating agencies now operative around us. Physical causation supervenes immediately on the assumption of "coats of skin" -- i.e., the physiological equipment in general. The forms of Men and mammalia previous to the separation of sexes* are woven out of astral matter, and possess a structure utterly unlike that of the physical organisms, which eat, drink, digest, etc., etc., etc. The known physiological contrivances in organisms were almost entirely evolved subsequently to the incipient physicalization of the 7 Root-Types out of the astral -- during the "midway halt" between the two planes of existence. Hardly had the "ground-plan" of evolution been limned out in these ancestral types, than the influence of the accessory terrestrial laws, familiar to us, supervened, resulting in the whole crop of mammalian species. AEons of slow differentiation were, however, required to effect this end.

[[Footnote(s)]] -----

* Bear in mind, please, that though the animals -- mammalians included -- have all been evolved after and partially from man's cast-off tissues, still, as a far lower being, the mammalian animal became placental and separated far earlier than man.

[[Vol. 2, Page]] 737 THE UNITY OF TYPE.

No. II. represents the domain of the purely astral prototypes previous to their descent into (gross) matter. Astral matter, it must be noted, is fourth state matter, having, like our gross matter, its own "protyle." There are several "protyles" in Nature, corresponding to the various planes of matter. The two sub-physical elemental kingdoms, the plane of mind (manas, the fifth state matter), as also that of Buddhi (sixth state matter), are each and all evolved from one of the six "protyles" which constitute the basis of the Object-Universe. The three "states," so-called of our terrestrial matter, known as the "solid," "liquid," and "gaseous," are only, in strict accuracy, SUB-states. As to the former reality of the descent into the physical, which culminated in physiological man and animal, we have a palpable testimony in the fact of the so-called spiritualistic "materializations."

In all these instances a complete temporary mergence of the astral into the physical takes place. The evolution of physiological Man out of the astral races of early Lemurian age -- the Jurassic age of Geology -- is exactly paralleled by the "materialization" of "spirits" (?) in the seance-room. In the case of Professor Crookes' "Katie King," the presence of a physiological mechanism -- heart, lungs, etc. -- was indubitably demonstrated!!

This, in a way, is the ARCHETYPE of Goethe. Listen to his words: "Thus much we should have gained . . . all the nine perfect organic beings . . . (are) formed according to an archetype which merely fluctuates more or less in its very persistent parts and, moreover, day by day, completes and transforms itself by means of reproduction." This is a seemingly imperfect foreshadowing of the occult fact of the differentiation of species from the primal astral root-types. Whatever the whole posse comitatus of "natural selection," etc., etc., may effect, the fundamental unity of structural plan remains practically unaffected by all subsequent modifications. The "Unity of Type" common, in a sense, to all the animal and human kingdoms, is not, as Spencer and others appear to hold, a proof of the consanguinity of all organic forms, but a witness to the essential unity of the "ground-plan" Nature has followed in fashioning her creatures.

To sum up the case, we may again avail ourselves of a tabulation of the actual factors concerned in the differentiation of species. The stages of the process itself need no further comment here, being the basic principles underlying organic development, than to enter on the domain of the biological specialist.

SPECIES.

B.

THE EUROPEAN, PALAEO-LITHIC RACES. -- WHENCE, AND HOW DISTRIBUTED.

IS Science against those who maintain that down to the Quaternary period the distribution of the human races was widely different from what it is now? Is Science against those who, further, maintain that the fossil men found in Europe -- although having almost reached a plane of sameness and unity from the fundamental physiological and anthropological aspects which continues till this day -- still differ, sometimes greatly, from the type of the now existing populations. The late Littré confesses it in an article published by him on the Memoir called Antiquités Celtiques et Antédiluviennes by Boucher de Perthes (1849) -- in the Revue des Deux Mondes (March 1, 1859). He says in it (a) that in these periods when the Mammoths, exhumed with the hatchets in Picardy, lived in the latter region, there must have been an eternal spring reigning over all the terrestrial globe*; nature was the contrary of what it is now -- thus leaving an enormous margin for the antiquity of

[[Footnote(s)]] -----

* Scientists now admit that Europe enjoyed in the Miocene times a warm, in the Pliocene or later Tertiary, a temperate climate. Littré's contention as to the balmy spring of the Quaternary -- to which deposits M. de Perthes' discoveries of flint implements are traceable (since when the Somme has worn down its valley many scores of feet) -- must be accepted with much reservation. The Somme-valley relics are post-glacial, and possibly point to the immigration of savages during one of the more temperate periods intervening between minor ages of Ice.

[[Vol. 2, Page]] 739 AFRICA IN EUROPE.

those "periods" and then adds: (b) "Spring, professor of the Faculty of Medicine at Liege, found in a grotto near Namur, in the mountain of Chauvaux, numerous human bones 'of a race quite distinct from ours.'"

Skulls exhumed in Austria offered a great analogy with those of African negro races, according to Littré, while others, discovered on the shores of the Danube and the Rhine, resembled the skulls of the Caribs and those of the ancient inhabitants of Peru and Chili. Still, the Deluge, whether Biblical or Atlantean, was denied. But further geological discoveries having made Gaudry write conclusively: "Our forefathers were positively contemporaneous with the rhinoceros tichorhinus, the hippopotamus major"; and add that the soil called diluvial in geology "was formed partially at least after man's apparition on earth" -- Littré pronounced himself finally. He then showed the necessity, before "the resurrection of so many old witnesses," of rehandling all the origins, all the durations, and added that there was AN AGE hitherto unknown to study "either at the dawn of the actual epoch or, as I believe, at the beginning of the epoch which preceded it."

The types of the skulls found in Europe are of two kinds, as is well known: the orthognathous and the prognathous, or the Caucasian and the negro types; such as are now found only in the African and the lower savage tribes. Professor Heer -- who argues that the facts of Botany necessitate the hypothesis of an Atlantis -- has shown that the plants of the Neolithic lake-villagers are mainly of African origin. How did the latter come to be in Europe if there was no former point of union between Africa and Europe? How many thousand years ago did the seventeen men live whose skeletons were exhumed in the Department of the Haute Garonne, in a squatting posture near the remains of a coal fire, with some amulets and broken crockery around them, and in company with the bear spelaeus, the Elephas primigenius, the aurochs (regarded by Cuvier as a distinct species), the Megaceros hibernicus -- all antediluvian mammals? Certainly at a most distant epoch, but not one which carries us further back than the Quaternary. A much greater antiquity for Man has yet to be proved. Dr. James Hunt, the late President of the Anthropological Society, makes it 9,000,000 years. This man of science, at any rate, makes some approach to our esoteric computation, if we leave the first two semi-human, ethereal races, and the early Third Race out of the computation.

The question, however, arises -- who were these Palaeolithic men of the European quaternary epoch? Were they aboriginal, or the outcome of some immigration dating back into the unknown past? The latter is the only tenable hypothesis, as all scientists agree in eliminating Europe from the category of possible "cradles of mankind." Whence, then, radiated the various successive streams of "primitive" men?

[[Vol. 2, Page]] 740 THE SECRET DOCTRINE.

The earliest Palaeolithic men in Europe -- about whose origin Ethnology is silent, and whose very characteristics are but imperfectly known, though expatiated on as "ape-like" by imaginative writers such as Mr. Grant Allen -- were of pure Atlantean and "Africo"-Atlantean stocks.* (It must be borne in mind that by this time the Atlantis continent itself was a dream of the past.) Europe in the quaternary epoch was very different from the Europe of to-day, being then only in process of formation. It was united to N. Africa -- or rather what is now N. Africa -- by a neck of land running across the present Straits of Gibraltar -- N. Africa thus constituting a species of extension of Spain, while a broad sea washed the great basin of the Sahara. Of the great Atlantis, the main bulk of which sank in the Miocene, there remained only Ruta and Daitya and a stray island or so. The Atlantean connections of the forefathers** of the Palaeolithic cave-men are evidenced by the upturning of fossil skulls (in Europe) reverting closely to the West Indian Carib and ancient Peruvian type -- a mystery indeed to all those who refuse to sanction the "hypothesis" of a former Atlantic continent to bridge the ocean (Cf. "Scientific and geological proofs of the reality of several submerged continents"). What are we also to make of the fact that while de Quatrefages points to that "magnificent race," the TALL Cro-Magnon cave-men and the Guanches of the Canary Islands as representatives of one type -- Virchow also allies the Basques with the latter in a similar way? Professor Retzius independently proves the relationship of the aboriginal American dolichocephalous tribes and these same Guanches. The several links in the chain of evidence are securely joined together. Legions of similar facts could be adduced. As to the African tribes -- themselves diverging offshoots of Atlanteans modified by climate and conditions -- they crossed into Europe over the peninsula which made the Mediterranean an inland sea. Fine races were many of these European cave-men; the Cro-Magnon, for instance. But, as was to be expected, progress is almost non-existent through the whole of the vast period allotted

[[Footnote(s)]] -----

* "Whence they (the old cave-men) came, we cannot tell" (Grant Allen).

"The palaeolithic hunters of the Somme Valley did not originate in that inhospitable climate, but moved into Europe from some more genial region -- (Dr. Southall "Epoch of the Mammoth" p. 315).

** The pure Atlantean stocks -- of which the tall quaternary cave-men were, in part, the direct descendants -- immigrated into Europe long prior to the Glacial Period; in fact as far back as the Pliocene and Miocene times in the Tertiary. The worked Miocene flints of Thenay, and the traces of Pliocene man discovered by Professor Capellini in Italy, are witnesses to the fact. These colonists were portions of the once glorious race, whose cycle from the Eocene downwards had been running down the scale.

[[Vol. 2, Page]] 741 A TARDY ADMISSION.

by Science to the Chipped Stone-Age.* The cyclic impulse downwards weighs heavily on the stocks thus transplanted -- the incubus of the Atlantean Karma is upon them. Finally, Palaeolithic man makes room for his successor -- and disappears almost entirely from the scene. Professor Lefevre asks in this connection:--

"Has the Polished succeeded the Chipped Stone-Age by an imperceptible transition, or was it due to an invasion of brachycephalous Celts? But whether, again, the deterioration produced in the populations of La Vezere was the result of violent crossings, or of a general retreat northwards in the wake of the reindeer, is of little moment to us." He continues:--

"Meantime the bed of the ocean has been upheaved, Europe is now fully formed, her flora and fauna fixed. With the taming of the dog begins the pastoral life. We enter on those polished stone and bronze periods, which succeed each other at irregular intervals, which even overlap one another in the midst of ethnical fusions and migrations. . . . The primitive European populations are interrupted in their special evolution and, without perishing, become absorbed in other races, engulfed . . . by successive waves of migration overflowing from Africa, possibly from a lost Atlantis [?? far too late by aeons of years] and from prolific Asia . . . all FORERUNNERS OF THE GREAT ARYAN INVASION" (Fifth Race).

[[Footnote(s)]] -----

* The artistic skill displayed by the old cave-men renders the hypothesis which regards them as approximations to the "pithecanthropus alalus" -- that very mythical Haeckelian monster -- an absurdity requiring no Huxley or Schmidt to expose it. We see in their skill in engraving a gleam of Atlantean culture atavistically re-appearing. It will be remembered that Donnelly regards modern European as a renaissance of Atlantean civilization. ("Atlantis," pp. 237-264.)

[[Vol. 2, Page]] 742 THE SECRET DOCTRINE.

§ VI.

GIANTS, CIVILIZATIONS, AND SUBMERGED CONTINENTS TRACED IN HISTORY.

WHEN statements such as are comprised in the above heading are brought forward, the writer is, of course, expected to furnish historical instead of legendary evidence in support of such claims. Is this possible? Yes; for evidence of this nature is plentiful, and has simply to be collected and brought together to become overwhelming in the eyes of the unprejudiced.

Once the sagacious student gets hold of the guiding thread he may find it out for himself. We give facts and show landmarks: let the wayfarer follow them. What is given here is amply sufficient for THIS Century.

In a letter to Voltaire, Bailly finds it quite natural that the sympathies of the "grand old invalid of Ferney" should be attracted to the "representatives of knowledge and wisdom, the Brahmans of India." He then adds a curious statement. "But," he says, "your Brahmans are very young in comparison with their ancient instructors."*

Bailly, who knew nought of the esoteric teachings, nor of Lemuria, believed, nevertheless, unreservedly in the lost Atlantis, and also in several pre-historic and civilized nations which had disappeared without leaving any undeniable trace. He had studied the ancient classics and traditions extensively, and he saw that the arts and sciences known to those we now call the "ancients," were "not the achievements of any of the now or even then existing nations, nor of any of the historical peoples of Asia." And that, notwithstanding the learning of the Hindoos, their undeniable priority in the antiquity of their race had to be referred to a people or a race still more ancient and more learned than were even the Brahmans themselves.**

Voltaire, the greatest sceptic of his day, the materialist par excellence, shared Bailly's belief. He thought it quite likely "that long before the empires of China and India, there had been nations cultured, learned, and powerful, which a deluge of barbarians overpowered and thus replunged into their primitive state of ignorance and savagery, or what they call the state of pure nature." ("Lettres sur l'Atlantide," p. 15).***

[[Footnote(s)]] -----

* Lettres sur l'Atlantide.

** Histoire de l'Astronomie Ancienne, p. 25, et seq.

*** This conjecture is but a half-guess. There were such "deluges of barbarians" in the Fifth Race. With regard to the Fourth, it was a bond fide deluge of water which swept it away. Neither Voltaire nor Bailly, however, knew anything of the Secret Doctrine of the East.

[[Vol. 2, Page]] 743 A MYSTERIOUS NATION.

That which with Voltaire was the shrewd conjecture of a great intellect, was with Bailly "a question of historical facts." For "I make great case of ancient traditions preserved through a long series of generations," he wrote. (Ibid.) It was possible, he thought, that a foreign nation should, after instructing another nation, so disappear that it should leave no traces behind. When asked how it could have happened that this ancient, or rather archaic, nation should not have left at least some recollection in the human mind, he answered that Time was a pitiless devourer of facts and events. But, the history of the Past was never entirely lost, for the Sages of old Egypt had preserved it, and "it is so preserved to this day elsewhere." "You do not know which was the best and most handsome generation of men which has ever lived on this earth," said the priests of Sais to Solon, according to Plato. "Only a weak seed of it, of which you (Greeks) are the descendants,* is all that remains." "Their books," they added, "preserved the records of a great nation, which emerging from the Atlantic sea had invaded Europe and Asia (Timaeus). The Greeks were but the dwarfed and weak remnant of that once glorious nation. . . ."

What was this nation? The secret doctrine teaches that it was the latest, seventh sub-race of the Atlanteans, already swallowed up in one of the early sub-races of the Aryan stock, one that had been gradually spreading over the continent and islands of Europe, as soon as they had begun to emerge from the seas. Descending from the high plateaux of Asia, where the two Races had sought refuge in the days of the agony of Atlantis, it had been slowly settling and colonizing the freshly emerged lands. The emigrant sub-race had rapidly increased and multiplied on that virgin soil; had divided into many families, which in their turn divided into nations. Egypt and Greece, the Phoenicians, and the Northern stocks, had thus proceeded from that one sub-race. Thousands of years later, other races -- the remnants of the Atlanteans -- "yellow and red, brown and black," began to invade the new continent. There were wars in which the new comers were defeated; and they fled, some to Africa, others to remote countries. Some of these lands became in course of time -- owing to new geological convulsions -- islands. Being thus forcibly

[[Footnote(s)]] -----

* For a full discussion of the relations between the old Greeks and Romans, and the Atlantean colonists, cf. "Five Years of Theosophy."

** The story about Atlantis and all the traditions thereon were told, as all know, by Plato in his "Timaeus and Critias." Plato, when a child, had it from his grand-sire Critias, aged ninety, who in his youth had been told of it by Solon, his father Dropidas' friend -- Solon, one of the Grecian Seven Sages. No more reliable source could be found, we believe.

[[Vol. 2, Page]] 744 THE SECRET DOCTRINE.

separated from the continents, the result was that the undeveloped tribes and families of the Atlantean stock fell gradually into a still more abject and savage condition.

Did not the Spaniards in the Cibola expeditions meet with WHITE savage chiefs; and has not the presence of African negro types in Europe in the pre-historic ages been now ascertained? It is this presence of a type associated with that of the negro, and also with that of the Mongolian, which is the stumbling-block of anthropology. The individual who lived at an incalculably distant period at La Naulette, in Belgium (Vide Dr. Carter Blake's paper "On the Naudette Jaw," *Anthrop. Review*, Sept., 1867), is an example. "The caves on the banks of the Lesse, in South-Eastern Belgium," says this Anthropologist, "afford evidence of what is, perhaps, the lowest man, as shown by the Naulette jaw. Such man, however, had amulets of stone, perforated for the purpose of ornament; these are made of a psammite now found in the basin of the Gironde."

Thus Belgian man was extremely ancient. That man who was antecedent to the great flood of waters -- which covered the highlands of Belgium with a deposit of loam or upland gravel 30 metres above the level of the present rivers -- must have combined the characters of the Turanian and the negro. The Canstadt, or La Naulette, man, may have been black, and had nothing to do with the Aryan type whose remains are contemporary with those of the cave bear at Engis. The denizens of the Aquitaine bone-caves belong to a far later period of history, and may not be as ancient as the former.

If the statement is objected to on the ground that Science does not deny the presence of man on earth from an enormous antiquity, though that antiquity cannot be determined, since that presence is conditioned by the duration of geological periods, the age of which is not ascertained; if it is argued that the Scientists object most decidedly to the claim that man preceded the animals, for instance; or that civilization dates from the earliest Eocene period, or, again, that there have ever existed giants, three-eyed and four-armed and four-legged men, androgynes, etc., then the objectors are asked in their turn, "How do you know? What proof have you besides your personal hypotheses, each of which may be upset any day by new discoveries?" And these future discoveries are sure to prove that, whatever this earlier type of man known to Anthropologists was in complexion, he was in no respect apish. The Canstadt man, the Engis man alike possessed essentially human attributes. (Vide de Quatrefages and Hamy. "Cranes des Races Humaines.") People have looked for the missing link at the wrong end of the chain; and the Neander valley man has long since been dismissed to the "limbo of all hasty blunders" (Ibid.). Disraeli divided man into the associates of the

[[Vol. 2, Page]] 745 REMARKABLE "COINCIDENCES."

apes and the angels. Reasons are given in the text in favour of an "angelic theory," -- as Christians would say -- at least as applicable to some of the races of men. At all events, if man exists only since the Miocene period, even then, humanity as a whole could not be composed of the abject savages of the Palaeolithic age, as they are now represented by the

Scientists. All they say is mere arbitrary speculative guess-work, invented by them to answer to and fit in with their own fanciful theories.

We speak of events hundreds of thousands years old, nay, even millions -- if man dates from the geological periods* -- not of any of those events which happened during the few thousand years of the pre-historic margin allowed by timid and ever-cautious history. Yet there are men of science who are almost of our way of thinking. From the brave confession of the Abbe Brasseur de Bourbourg, who says that:-- "Traditions, whose traces recur in Mexico, in Central America, in Peru, and in Bolivia, suggest the idea that man existed in these different countries at the time of the gigantic upheaval of the Andes, and that he has retained the memory of it" -- down to the latest palaeontologists and anthropologists, the majority of scientific men is in favour of just such an antiquity. Apropos of Peru, has any satisfactory attempt been made to determine the ethnological affinities and characteristics of the race which reared those Cyclopean erections, the ruins of which display the relics of a great civilization? At Cuelap, for instance, such are found, consisting "of a wall of wrought stones, 3,600 feet long, 560 broad, and 150 feet high, constituting a solid mass with a level summit. On this mass was another, 600 feet long, 500 broad, and 150 feet high, making an aggregate height of 300 feet. In it were rooms and cells." (Cf., the mass of evidence collected by Donnelly to prove the Peruvian colony an offshoot of the Atlanteans.) A most suggestive fact is the startling resemblance between the architecture of these colossal buildings and that of the archaic European nations. Mr. Fergusson regards the analogies between the ruins of "Inca" civilization and the Cyclopean remains of the Pelasgians in Italy and Greece as a coincidence "the most remarkable in the history of architecture." "It is difficult to resist the conclusion that there may be some relation between them." The "relation" is simply explained by the derivation of the stocks,

[[Footnote(s)]] -----

* Haeckel's "Man-ape" of the Miocene period is the dream of a monomaniac, which de Quatrefages (see his "Human Species," pp. 105-113) has cleverly disposed of. It is not clear why the world should accept the lucubrations of a psychophobic materialist, (to accept whose theory necessitates the acceptance on faith of various animals unknown to Science or Nature -- like the Sozura, for instance, that amphibian which has never existed anywhere outside Haeckel's imagination), rather than the traditions of antiquity.

[[Vol. 2, Page]] 746 THE SECRET DOCTRINE.

who devised these erections, from a common centre in an Atlantic continent. The acceptance of the latter can alone assist us to approach a solution of this and similar problems in almost every branch of modern science.

Dr. Lartet, treating upon the subject, settles the question by declaring that:-- "The truth, so long contested, of the co-existence of man with the great extinct species (Elephas primigenius, Rhinoceros tichorhinus, Hyaena spelaea, Ursus spelaeus, etc., etc.), appears to me to be henceforth unassailable and definitely conquered by science." ("Cavernes de Perigord," p. 35.)

It is shown elsewhere that such is also de Quatrefages' opinion. "Man has in all probability seen Miocene times* and consequently the entire Pliocene epoch," he says, and there are reasons for believing that "his traces will be found further back still, . . ." he adds ("The Human Species," p. 152.)

Egypt is far older than Europe as now traced on the map. Atlanto-Aryan tribes began to settle on it, when the British Islands** and France were not even in existence. It is well known that "the tongue of the AEgyptian Sea," or the Delta of lower Egypt, became firm land very gradually, and followed the highlands of Abyssinia; unlike the latter, which arose suddenly, comparatively speaking, it was very slowly formed, through long ages, from successive layers of sea slime and mud, deposited annually by the soil brought down by a large river, the present Nile. Yet even the Delta as a firm and fertile land, has been inhabited for more than 100,000 years. Later tribes, with still more Aryan blood in them than their predecessors, arrived from the East, and conquered it from a people whose very name is lost to posterity, except in Secret works. It is this natural barrier of slime, which sucked in slowly and surely every boat that approached these inhospitable shores, that was, till within a few thousand of years B.C., the best safeguard of the later Egyptians, who had managed to reach it through Arabia, Abyssinia, and Nubia, led on by Manu Vina in the day of Visvamitra. (See in "Isis Unveiled," vol. 1, p. 627, what Kulluka Bhatta says.)

So evident does the antiquity of man become with every day that even the Church is preparing an honourable surrender and retreat. The learned Abbe Fabre, professor at the Sorbonne, has categorically declared

[[Footnote(s)]] -----

* The ingenious author of "Atlantis, the Ante-diluvian World," in discussing the origin of various Grecian and Roman institutions, expresses his conviction that "the roots of the institutions of to-day reach back to the Miocene Age." Ay, and further yet, as already stated.

** As we know them, however. For not only does Geology prove that the British islands have been four times submerged and re-elevated, but that the straits between them and Europe were dry land at a remote former epoch.

[[Vol. 2, Page]] 747 THE SEVEN SABBATHS.

that pre-historic palaeontology and archaeology may, without any harm to the Scriptures, discover in the tertiary beds . . . the traces of pre-adamite man as much as they like. "Since it disregards all creations anterior to the last deluge but one, (that which produced the diluvium, according to the Abbe), Bible revelation leaves us free to admit the existence of man in the grey diluvium, in Pliocene, and even Eocene strata. On the other hand, however, geologists are not all agreed in regarding the men who inhabited the globe in these primitive ages as our ancestors.*

The day when the Church will find that its only salvation lies in the occult interpretation of the Bible, may not be so far off as some imagine. Already many an abbe and ecclesiastic has become an ardent Kabbalist, and as many appear publicly

in the arena, breaking a lance with Theosophists and Occultists in support of the metaphysical interpretation of the Bible. But they commence, unfortunately for them, from the wrong end. They are advised, before they begin to speculate upon the metaphysical in their Scriptures, to study and master that which relates to the purely physical -- e.g., its geological and ethnological hints. For such allusions to the Septenary constitution of the Earth and Man, to the seven Rounds and Races, abound in the New as in the Old Testaments, and are as visible as the sun in the heavens to him who reads both symbolically. What do the laws in chapter xxiii., v. 15, of Leviticus apply to? What is the philosophy of reason for all such hebdomadic offerings and symbolical calculations as: "ye shall count . . . from the morrow after the Sabbath . . . that ye brought the sheaf of the wave offering; seven Sabbaths shall be completed" (15), "And ye shall offer with the bread seven lambs without blemish" (18), etc. etc. We shall be contradicted, no doubt, when we say that all these "wave" and "peace" offerings were in commemoration of the Seven "Sabbaths" of the mysteries, which Sabbaths are seven pralayas, between seven manvantaras, or what we call Rounds -- for "Sabbath" is an elastic word, meaning a period of Rest of whatever nature, as explained elsewhere (Part II, "Sections on the Septenary.") And if this is not sufficiently conclusive, then we may turn to the verse which follows (16), and which adds, "even unto the morrow after the seventh Sabbath shall ye number fifty days" (forty-nine, 7 x 7, stages of activity, and forty-nine stages of rest, on the seven globes of the chain, and then

[[Footnote(s)]] -----

* "Les origines de la terre et de l'homme," p. 454. To this, Professor N. Joly, of Toulouse, who quotes the Abbe in his "Man before Metals," expresses the hope that M. Fabre will permit him "to differ from him on this last point," p. 186. So do the Occultists; for though they claim a vast difference in the physiology and outward appearance of the five races so far evolved, still they maintain that the present human species has descended from one and the same primitive stock, evolved from the "divine men" -- our common ancestors and progenitors.

[[Vol. 2, Page]] 748 THE SECRET DOCTRINE.

comes the rest of Sabbath, the fiftieth); after which "ye shall offer a new meat offering unto the Lord," i.e., ye shall make an offering of your flesh or "coats of skin," and, divesting yourselves of your bodies, ye shall remain pure spirits. This law of offering, degraded and materialized with ages, was an institution that dated from the earliest Atlanteans; it came to the Hebrews via the "Chaldees," who were the "wise men" of a caste, not of a nation, a community of great adepts come from their "Serpent-holes," and who had settled in Babylonia ages before. And if this interpretation from Leviticus (full of the disfigured laws of Manu) is found too far-fetched, then turn to Revelation. Whatever interpretation profane mystics may give to the famous Chapter xvii., with its riddle of the woman in purple and scarlet; whether Protestants nod at the Roman Catholics, when reading "MYSTERY, BABYLON THE GREAT, THE MOTHER OF HARLOTS AND ABOMINATIONS OF THE EARTH," or Roman Catholics glare at the Protestants, the Occultists pronounce, in their impartiality, that these words have applied from the first to all and every exoteric Churchianity, that which was the "ceremonial magic" of old, with its terrible effects, and is now the harmless (because distorted) farce of ritualistic worship. The "mystery" of the woman and of the beast, are the symbols of soul-killing Churchianity and of SUPERSTITION. "The beast that was, and is not, and yet is." "And here is the Mind which hath wisdom. The seven heads are seven mountains (seven continents and seven races) on which the woman sitteth," the symbol of all the exoteric, barbarous, idolatrous faiths which have covered that symbol "with the blood of the saints and the blood of the martyrs" who protested and do protest. "And there are seven Kings (seven races); five are fallen (our fifth race included), and one is (the fifth continues), and the other (the sixth and the seventh races) is not yet come. . . . And when he (the race "King") cometh, he must continue a short space" (v. 10). There are many such Apocalyptic allusions, but the student has to find them out for himself. These five Kings were mentioned before.

If the Bible combines with archaeology and geology to show that human civilization has passed through three more or less distinct stages, in Europe at least; and if man, both in America and Europe, as much as in Asia, dates from geological epochs -- why should not the statements of the Secret Doctrine be taken into consideration? Is it more philosophical or logical and scientific too, to disbelieve, with Mr. Albert Gaudry, in Miocene man, while believing that the famous Thenay flints* "were carved by the Dryopithecus monkey"; or, with the Occultist, that the anthro-

[[Footnote(s)]] -----

* "The flints of Thenay bear unmistakable trace of the work of human hands." (G. de Mortillet, "Promenades au Musee de St. Germain," p. 76.)

[[Vol. 2, Page]] 749 THE APE LATER THAN MAN.

pomorphic monkey came ages after man? For if it is once conceded, and even scientifically demonstrated, that "there was not in the middle of the Miocene epoch a single species of mammal identical with species now extant" (Albert Gaudry "Les Enchainements du monde animal dans les temps geologiques" p. 240); and that man was then just as he is now; only taller, and more athletic than we are,* -- then where is the difficulty? That they could hardly be the descendants of monkeys, which are themselves not traced before the Miocene epoch,** is, on the other hand, testified to by several eminent naturalists.

"Thus, in the savage of quaternary ages who had to fight against the mammoth with stone weapons, we find all those craniological characters generally considered as the sign of great intellectual development" (de Quatrefages, "The Human Species, p. 312.)

Unless man emerged spontaneously, endowed with all his intellect and wisdom, from his brainless catarrhine ancestor, he could not have acquired such brain within the limits of the Miocene period, if we are to believe the learned Abbe Bourgeois (Vide infra, footnote**).

As to the matter of giants, though the tallest man hitherto found in Europe among fossils is the "Mentone man" (6 ft. 8 in.), others may yet be excavated. Nilsson, quoted by Lubbock, states that "in a tomb of the neolithic age . . . a skeleton of extraordinary size was found in 1807," and that it was attributed to a king of Scotland, Albus McGaldus.

And if in our own day we occasionally find men and women from 7 ft. to even 9 ft. and 11 ft. high, this only proves -- on the law of atavism, or the reappearance of ancestral features of character -- that there was a time when 9 ft. and 10 ft. was the average height of humanity, even in our latest Indo-European race.

But as the subject was sufficiently treated elsewhere, we may pass on to the Lemurians and the Atlanteans, and see what the old Greeks knew of these early races and what the moderns know now.

The great nation mentioned by the Egyptian priests, from which descended the forefathers of the Greeks of the age of Troy, and which, as averred, had been destroyed by the Atlantic race, was then, as we see, assuredly no race of Palaeolithic savages. Nevertheless, already in the days of Plato, with the exception of priests and Initiates, no one seems

[[Footnote(s)]] -----

* Speaking of the reindeer hunters of Perigord, Joly says of them that "they were of great height, athletic, with a strongly built skeleton . . ." etc. ("Man before Metals," p. 353).

** "On the shores of the lake of Beauce," says the Abbe Bourgeois, "man lived in the midst of a fauna which completely disappeared (Aceratherium, Tapir, Mastodon). With the fluviatile sands of Orleanais came the anthropomorphous monkey (Pliopithecus antiquus); therefore, later than man." (See Comptes Rendus of the "Prehistoric Congress" of 1867 at Paris.)

[[Vol. 2, Page]] 750 THE SECRET DOCTRINE.

to have preserved any distinct recollection of the preceding races. The earliest Egyptians had been separated from the latest Atlanteans for ages upon ages; they were themselves descended from an alien race, and had settled in Egypt some 400,000 years before,* but their Initiates had preserved all the records. Even so late as the time of Herodotus, they had still in their possession the statues of 341 kings who had reigned over their little Atlanto-Aryan Sub-race (Vide about the latter "Esoteric Buddhism," p. 66, Fifth Edition.) If one allows only twenty years as an average figure for the reign of each King, the duration of the Egyptian Empire has to be pushed back, from the day of Herodotus, about 17,000 years.

Bunsen allowed the great Pyramid an antiquity of 20,000 years. More modern archaeologists will not give it more than 5,000, or at the utmost 6,000 years; and generously concede to Thebes with its hundred gates, 7,000 years from the date of its foundation. And yet there are records which show Egyptian priests -- Initiates -- journeying in a North-Westerly direction, by land, via what became later the Straits of Gibraltar; turning North and travelling through the future Phoenician settlements of Southern Gaul; then still further North, until reaching Carnac (Morbihan) they turned to the West again and arrived, still travelling by land, on the North-Western promontory of the New Continent.**

What was the object of their long journey? And how far back must we place the date of such visits? The archaic records show the Initiates of the Second Sub-race of the Aryan family moving from one land to the other for the purpose of supervising the building of menhirs and dolmens, of colossal Zodiacs in stone, and places of sepulchre to serve as receptacles for the ashes of generations to come. When was it? The fact of their crossing from France to Great Britain by land may give an idea of the date when such a journey could have been performed on terra firma.

[[Footnote(s)]] -----

* "In making soundings in the stony soil of the Nile Valley two baked bricks were discovered, one at the depth of 20, the other at 25 yards. If we estimate the thickness of the annual deposit formed by the river at 8 inches per century (more careful calculations have shown no more than from three to five per century), we must assign to the first of these bricks 12,000 years, and to the second 14,000 years. By means of analogous calculations, Burmeister supposes 72,000 years to have elapsed since the first appearance of man on the soil of Egypt, and Draper attributes to the European man, who witnessed the last glacial epoch, an antiquity of more than 250,000 years." ("Man before Metals," p. 183.) Egyptian Zodiacs show more than 75,000 years of observation! (See further.) Note well also that Burmeister speaks only of the Delta population.

** Or on what are now the British Islands, which were not yet detached from the main continent in those days. "The ancient inhabitant of Picardy could pass into Great Britain without crossing the Channel. The British Isles were united to Gaul by an isthmus which has since been submerged." ("Man before Metals," p. 184.)

[[Vol. 2, Page]] 751 DARWINIANS REJECT THE TRUTH.

It was --

"When the level of the Baltic and of the North Sea was 400 feet higher than it is now; when the valley of the Somme was not hollowed to the depth it has now attained; when Sicily was joined to Africa, Barbary to Spain," when "Carthage, the Pyramids of Egypt, the palaces of Uxmal and Palenque were not in existence, and the bold navigators of Tyre and Sidon, who at a later date were to undertake their perilous voyages along the coasts of Africa, were yet unborn. What we know with certainty is that European man was contemporaneous with the extinct species of the quaternary epoch . . . that he witnessed the upheaval of the Alps* and the extension of the glaciers, in a word that he lived for thousands of years before the dawn of the remotest historical traditions . . . It is even possible that man was the contemporary of extinct mammalia of species yet more ancient . . . of the *Elephas meridionalis* of the sands of St. Prest . . . and the *Elephas antiquus*, assumed to be prior to the *elephas primigenius*, since their bones are found in company with carved flints in several English caves, associated with those of the *Rhinoceros hemitaechus* and even of the *Machairodus latidens*,

which is of still earlier date . . . M. E. Lartet is of opinion that there is nothing really impossible in the existence of man as early as the Tertiary period.**

If "there is nothing impossible" scientifically in the idea, and it may be admitted that man lived already as early as the Tertiary period, then it is just as well to remind the reader that Mr. Croll places the beginning of that period 2,500,000 years back (See Croll's "Climate and Time"); but there was a time when he assigned to it 15,000,000 years.

And if all this may be said of European man, how great is the antiquity of the Lemuro-Atlantean and of the Atlanto-Aryan man? Every educated person who follows the progress of Science, knows how all vestiges of man during the Tertiary period are received. The calumnies that were poured on Desnoyers in 1863, when he made known to the Institute of France that he had made a discovery "in the undisturbed pliocene sands of St. Prest near Chartres, proving the co-existence of man and the *Elephas meridionalis*" -- were equal to the occasion. The later discovery (in 1867) by the Abbe Bourgeois, that man lived in the Miocene epoch, and the reception it was given at the Pre-historic Con-

[[Footnote(s)]] -----

* He witnessed and remembered it too, as "the final disappearance of the largest continent of Atlantis was an event coincident with the elevation of the Alps," a master writes (See Esoteric Buddhism p. 70). *Pari passu*, as one portion of the dry land of our hemisphere disappeared, some land of the new continent emerged from the seas. It is on this colossal cataclysm, which lasted during a period of 150,000 years, that traditions of all the "Deluges" are built, the Jews building their version on an event which took place later in "Poseidonis."

** The Antiquity of the Human Race in "Men before Metals," by M. Joly, Professor at the Science Faculty of Toulouse, p. 184.

[[Vol. 2, Page]] 752 THE SECRET DOCTRINE.

gress held at Brussels in 1872, proves that the average man of Science will never see but that which he wants to see.*

The modern archeologist, though speculating ad infinitum upon the dolmens and their builders, knows, in fact, nothing of them or their origin. Yet, these weird, and often colossal monuments of unhewn stones -- which consist generally of four or seven gigantic blocks placed together -- are strewn over Asia, Europe, America, and Africa, in groups or rows. Stones of enormous size are found placed horizontally and variously upon two, three, four, and as in Poitou, upon six and seven blocks. People name them "devil's altars," druidic stones, and giant tombs. The stones of Carnac in the Morbihan, Brittany -- nearly a mile in length and numbering 11,000 ranged in eleven rows -- are twin sisters of those at Stonehenge. The Conical menhir of Loch-Maria-ker in Morbihan, measures twenty yards in length and nearly two yards across. The Menhir of Champ Dolent (near St. Malo) rises thirty feet above the ground, and is fifteen feet in depth below. Such dolmens and prehistoric monuments are met with in almost every latitude. They are found in the Mediterranean basin; in Denmark (among the local tumuli from twenty-seven to thirty-five feet in height); in Shetland, and in Sweden, where they are called ganggriften (or tombs with corridors); in Germany, where they are known as the giant tombs (Hunengraben); in Spain (see the dolmen of Antiguera near Malaga), and Africa; in Palestine and Algeria; in Sardinia (see the Nuraghi and Sepulture dei giganti, or tombs of giants); in Malabar, in India, where they are called the tombs of the Daityas (giants) and of the Rakshasas, the men-demons of Lanka; in Russia and Siberia, where they are known as the Koorgan; in Peru and Bolivia, where they are termed the chulpas or burial places, etc., etc., etc.

There is no country from which they are absent. Who built them? Why are they all connected with Serpents and Dragons, with Alligators and Crocodiles? Because remains of "palaeolithic man" were, it is thought, found in some of them, and because in the funeral mounds of America bodies of later races were discovered with the usual paraphernalia of bone necklaces, weapons, stone and copper urns, etc., hence they are declared ancient tombs. But surely the two famous mounds -- one in the Mississippi valley and the other in Ohio -- known respectively as "the Alligator Mound" and "the Great Serpent

[[Footnote(s)]] -----

* The scientific "jury" disagreed, as usual; while de Quatrefages, de Mortillet, Worsaae, Engelhardt, Waldemar, Schmidt, Capellini, Hamy, and Cartailhac, saw upon the flints the traces of human handiwork, Steenstrup, Virchow and Desor refused to do so. Still the majority, if we except some English Scientists, are for Bourgeois.

[[Vol. 2, Page]] 753 STILL MORE ASTOUNDING CONTRADICTIONS.

Mound," were never meant for tombs* (Vide infra). Yet one is told authoritatively that the Mounds, and the Mound or Dolmen Builders, are all "Pelasgic" in Europe, antecedent to the Incas, in America, yet of "not extremely distant times." They are built by "no race of Dolmen Builders," which never existed (opinion of De Mortillet, Bastian, and Westropp) save in the earlier archeological fancy. Finally Virchow's opinion of the giant tombs of Germany is now accepted as an axiom:-- "The tombs alone are gigantic, and not the bones they contain" -- says that German biologist; and archaeology has but to bow and submit to the decision.**

That no gigantic skeletons have been hitherto found in the "tombs" is yet no reason to say there never were the remains of giants in them. Cremation was universal till a comparatively recent period -- some 80, or 100,000 years ago. The real giants, moreover, were nearly all drowned with Atlantis. Nevertheless, the classics, as shown elsewhere, often speak of giant skeletons still excavated in their day. Besides this, human fossils may be counted on the fingers, as yet. No skeleton ever yet found is older than between 50, or 60,000 years,*** and man's size was reduced from 15 to 10 or 12 feet, ever since the third sub-race of the Aryan stock, which sub-race -- born and developed in Europe and Asia Minor under new climates and conditions -- had become European. Since then, as said, it has steadily been decreasing. It is truer therefore to say, that the tombs alone are archaic, and not necessarily the bodies of men occasionally found in them; and that those tombs, since they are gigantic, must have contained giants,**** or rather the ashes of generations of giants.

[[Footnote(s)]] -----

* We take the following description from a scientific work. "The first of these animals (the alligator) designed with considerable skill, is no less than 250 ft. long. . . . The interior is formed of a heap of stones, over which the form has been moulded in fine stiff clay. The great serpent is represented with open mouth, in the act of swallowing an egg of which the diameter is 100 ft. in the thickest part; the body of the animal is wound in graceful curves and the tail is rolled into a spiral. The entire length of the animal is 1,100 ft. This work is unique . . . and there is nothing on the old continent which offers any analogy to it." Except its symbolism, however, of the Serpent -- the cycle of Time -- swallowing Kosmos, the egg.

** It might be better, perhaps, for FACT had we more Specialists in Science and fewer "authorities" on universal questions. One never heard that Humboldt gave authoritative and final decisions in the matter of polyipi, or the nature of an excrescence.

*** 57,000 years is the date assigned by Dr. Dowler to the remains of the human skeleton, found buried beneath four ancient forests at New Orleans on the banks of the Mississippi river.

**** Murray says of the Mediterranean barbarians that they marvelled at the prowess of the Atlanteans. "Their physical strength was extraordinary (witness indeed their cyclopean buildings), the earth shaking sometimes under their tread. Whatever they did, was done speedily. . . . They were wise and communicated their wisdom to men" (Mythology p. 4).

[[Vol. 2, Page]] 754 THE SECRET DOCTRINE

Nor were all such cyclopean structures intended for sepulchres. It is with the so-called Druidical remains, such as Carnac in Brittany and Stonehenge in Great Britain, that the travelling Initiates above alluded to had to do. And these gigantic monuments are all symbolic records of the World's history. They are not Druidical, but universal. Nor did the Druids build them, for they were only the heirs to the cyclopean lore left to them by generations of mighty builders and -- "magicians," both good and bad.

It will always be a subject of regret that history, rejecting a priori the actual existence of giants, has preserved us so little of the records of antiquity concerning them. Yet in nearly every mythology -- which after all is ancient history -- the giants play an important part. In the old Norse mythology, the giants, Skrymir and his brethren, against whom the sons of the gods fought, were potent factors in the histories of deities and men. The modern exegesis, that makes these giants to be the brethren of the dwarfs, and reduces the combats of the gods to the history of the development of the Aryan race, will only receive credence amongst the believers in the Aryan theory, as expounded by Max Muller. Granting that the Turanian races were typified by the dwarfs (Dwergar), and that a dark, round-headed, and dwarfish race was driven northward by the fair-faced Scandinavians, or AEsir, the gods being like unto men, there still exists neither in history nor any other scientific work any anthropological proof whatever of the existence in time or space of a race of giants. Yet that such exist, relatively and de facto side by side with dwarfs, Schweinfurth can testify. The Nyam-Nyam of Africa are regular dwarfs, while their next neighbours (several tribes of comparatively fair-complexioned Africans) are giants when confronted with the Nyam-Nyams, and very tall even among Europeans, for their women are all above 6 1/2 feet high. (Vide Schweinfurth's latest works.)

In Cornwall and in ancient Britain the traditions of these giants are, on the other hand, excessively common; they are said to live even down to the time of King Arthur. All this shows that giants lived to a later date amongst the Celtic than among the Teutonic peoples.

If we turn to the New World, we have traditions of a race of giants at Tarija on the eastern slopes of the Andes and in Ecuador, who combated gods and men. These old beliefs, which term certain localities "Los campos de los gigantes" -- "the fields of giants," are always concomitant with the existence of pliocene mammalia and the occurrence of pliocene raised beaches. "All the giants are not under Mount Ossa," and it would be poor anthropology indeed that would restrict the traditions of giants to Greek and Bible mythologies. Slavonian countries, Russia especially, teem with legends about the bogaterey (mighty giants)

[[Vol. 2, Page]] 755 RACES OF GIANTS.

of old; and their folklore, most of which has served for the foundation of national histories, their oldest songs, and their most archaic traditions, speak of the giants of old. Thus we may safely reject the modern theory that would make of the Titans mere symbols standing for cosmic forces. They were real living men, whether twenty or only twelve feet high. Even the Homeric heroes, who, of course, belonged to a far more recent period in the history of the races, appear to have wielded weapons of a size and weight beyond the strength of the strongest men of modern times.

"Not twice ten men the mighty bulk could raise,
Such men as live in these degenerate days."

If the fossil footprints from Carson, Indiana, U.S.A., are human, they indicate gigantic men. Of their genuineness there can remain no doubt. It is to be deplored that the modern and scientific evidence for gigantic men should rest on footprints alone. Over and over again, the skeletons of hypothetical giants have been identified with those of elephants and mastodons. But all such blunders before the days of geology, and even the traveller's tales of Sir John Mandeville, who says that he saw giants 56 feet high, in India, only show that belief in the existence of giants has never, at any time, died out of the thoughts of men.

That which is known and accepted is, that several races of gigantic men have existed and left distinct traces. In the journal of the Anthropological Institute (Vol. 1871, art. by Dr. C. Carter Blake) such a race is shown as having existed at Palmyra and possibly in Midian, exhibiting cranial forms quite different from those of the Jews. It is not improbable that another such race existed in Samaria, and that the mysterious people who built the stone circles in Galilee, hewed

neolithic flints in the Jordan valley and preserved an ancient Semitic language quite distinct from the square Hebrew character -- was of a very large stature. The English translations of the Bible can never be relied upon, even in their modern revised forms. They tell us of the Nephilim translating the word by "giants," and further adding that they were "hairy" men, probably the large and powerful prototypes of the later satyrs so eloquently described by the patristic fancy; some of the Church Fathers assuring their admirers and followers that they had themselves seen these "Satyrs" -- some alive, others pickled and preserved. The word "giants" being once adopted as a synonym of Nephilim, the commentators have since identified them with the sons of Anak. The filibusters who seized on the Promised Land, found a pre-existing population far exceeding their own in stature, and called it a race of giants. But the races of really gigantic men had disappeared ages before the birth of Moses. This tall people existed in Canaan, and

[[Vol. 2, Page]] 756 THE SECRET DOCTRINE.

even in Bashan, and may have had representatives in the Nabatheans of Midian. They were of far greater stature than the undersized Jews. Four thousand years ago their cranial conformation and large stature separated them from the children of Heber. Forty thousand years ago their ancestors may have been of still more gigantic size, and four hundred thousand years earlier they must have been in proportion to men in our days as the Brobdingnagians were to the Lilliputians. The Atlanteans of the middle period were called the Great Dragons, and the first symbol of their tribal deities, when the "gods" and the Divine Dynasties had forsaken them, was that of a giant Serpent.

The mystery veiling the origin and the religion of the Druids, is as great as that of their supposed fanes is to the modern Symbologist, but not to the initiated Occultists. Their priests were the descendants of the last Atlanteans, and what is known of them is sufficient to allow the inference that they were eastern priests akin to the Chaldeans and Indians, though little more. It may be inferred that they symbolized their deity as the Hindus do their Vishnu, as the Egyptians did their Mystery God, and as the builders of the Ohio Great-Serpent mound worshipped theirs -- namely under the form of the "mighty Serpent," the emblem of the eternal deity TIME (the Hindu Kala). Pliny called them the "Magi of the Gauls and Britons." But they were more than that. The author of "Indian Antiquities" finds much affinity between the Druids and the Brahmins of India. Dr. Borlase points to a close analogy between them and the Magi of Persia*; others will see an identity between them and the Orphic priesthood of Thrace: simply because they were connected, in their esoteric teachings, with the universal Wisdom Religion, and thus presented affinities with the exoteric worship of all.

Like the Hindus, the Greeks and Romans (we speak of the Initiates), the Chaldees and the Egyptians, the Druids believed in the doctrine of a succession of worlds, as also in that of seven "creations" (of new continents) and transformations of the face of the earth, and in a seven-fold night and day for each earth or globe (See "Esoteric Buddhism"). Wherever the Serpent with the egg is found, there this tenet was surely present. Their Dracontia are a proof of it. This belief was so universal that, if we seek for it in the esotericism of various religions, we shall discover it in all. We shall find it among the Aryan Hindus and Mazdeans, the Greeks, the Latins, and even among the old Jews and early Christians, whose modern stocks

[[Footnote(s)]] -----

* But the Magi of Persia were never Persians -- not even Chaldeans. They came from a far-off land, the Orientalists being of opinion that the said land was Media. This may be so, but from what part of Media? To this we receive no answer.

[[Vol. 2, Page]] 757 PAGANISM AND CHRISTIANITY AGREE.

hardly comprehend now that which they read in their Scriptures. See what Seneca says in Epistle 9, and Quaest. Nat. III., c., ult.: "The world being melted and having re-entered the bosom of Jupiter, this god continues for some time to remain absorbed in himself and concealed, wholly immersed in contemplation. After which a new world springs from him. . . . An innocent race of men and animals are produced anew . . . etc." Then again when speaking of periodical mundane dissolution involving universal death, he (Seneca) says that "when the laws of nature shall be buried in ruin, and the last day of the world shall come, the southern pole shall crush, as it falls, all the regions of Africa, and the North pole shall overwhelm all the countries beneath its axis. The affrighted sun shall be deprived of its light; the palace of heaven falling to decay shall produce at once both life and death, and some kind of dissolution shall equally seize upon all deities, who thus shall return into their original chaos" (Quoted in "Book of God," p. 160.)

One might imagine oneself reading the Puranic account by Parasara of the great Pralaya. It is nearly the same thing, idea for idea. Has Christianity nothing of the kind? It has, we say. Let the reader open any English Bible and read chapter iii. of the Second Epistle of Peter, from verse iii. till the xivth, and he will find there the same ideas. . . . "There shall come in the last days scoffers . . . saying, 'where is the promise of his coming? . . . Since the fathers fell asleep all things continue as they were from the beginning of creation.' For, they are ignorant . . . that by the word of God the heavens were of old, and the earth standing out of the water and in the water: whereby the world that then was, being overflowed with water, perished. But the heavens and the earth that are now, are reserved unto the fire . . . wherein the heavens . . . shall be dissolved, and the elements shall melt with fervent heat . . . we nevertheless look for new heavens and new earth, etc., etc." If the interpreters chose to see in this a reference to creation, the deluge, and the promised coming of Christ, when they will live in a new Jerusalem in heaven, this is no fault of "Peter." What the writer of the Epistles meant was the destruction of this Fifth Race of ours by subterranean fires and inundations, and the appearance of new continents for the Sixth Root-Race. For the writers of these Epistles were all learned in symbology if not in the sciences.

It was mentioned elsewhere that the belief in the septenary constitution of our "chain" was the oldest tenet of the early Iranians, who got it from the first Zarathustra. It is time to prove it to those Parsis who have lost the key to the meaning of their Scriptures. In the Avesta the earth is considered septempartite and tripartite at one and the same time. This is regarded by Dr. Geiger, as an incongruity, for the following reasons, which he calls discrepancies: the Avesta speaks

[[Vol. 2, Page]] 758 THE SECRET DOCTRINE.

of the three-thirds of the earth because the Rig-Veda mentions "three earths." . . . "Three strata or layers, one lying above the other, are said to be meant by this."* But he is quite mistaken, as are all exoteric profane translators. The Avesta has not borrowed the idea from the Rig-Veda, but simply repeats the esoteric teaching. The "three strata or layers" do not refer to our globe alone, but to three layers of the globes of our terrestrial chain -- two by two, on each plane, one on the descending, the other on the ascending arc. Thus, with reference to the six spheres or globes above our earth, the seventh and the fourth, it is septempartite, while with regard to the planes over our plane -- it is tripartite. This meaning is carried out and corroborated by the text in the Avesta and Vendidad, and even by the speculations -- a most laborious and unsatisfactory guess-work -- of the translators and commentators. It thus follows that the division of the "earth," or rather the earth's chain, into seven Karshvars is not in contradiction with the three "zones," if this word is read "planes." As Geiger remarks, this septenary division is very old -- the oldest of all -- since the Gathas already speak of the "septempartite earth." (Bumi haptaiti, Yasna, xxxii., 3.) For, "according to the Parsee Scriptures, the seven Karshvars are to be considered as completely disconnected parts of the earth," which they surely are. For, "between them there flows the Ocean, so that it is impossible, as stated in several passages, to pass from one Karshvar to another."** The "Ocean" is space, of course, for the latter was called "Waters of Space" before it was known as Ether. Moreover, the word Karshvar is consistently rendered by Dwipa, and especially Qaniratha by Jambudwipa ("Neriosengh, the translator of the Yasna.")*** But this fact is not taken into account by the Orientalists, and therefore we find even such a learned Zoroastrian and Parsi by birth as the translator of Dr. Geiger's work passing unnoticed and without a word of comment sundry remarks of the former on the "incongruities" of this kind abounding in the Mazdean Scriptures. One of such "incongruities" and "coincidences" concerns the similarity of the Zoroastrian with the Indian tenet with regard to the seven Dwipas (islands, or continents, rather) as met with in the Puranas, namely: "The Dwipas form concentric rings, which, separated by the ocean, surround Jambu Dwipa, which is situated in the centre" (p. 130, vol. I.), and, "according to the Iranian view, the Karshvar Qaniratha is likewise situated in the centre of the rest . . . each of them (the other six Karshvars) is a

[[Vol. 2, Page]] 759 THE MAZDEAN VIEW OF THE SEVEN EARTHS.

peculiar individual space, and so they group themselves round (above) Qaniratha" (Ibid. p. 131). Now Qaniratha is not, as believed by Geiger and his translator, "the country inhabited by the Iranian tribes," and the other names do not mean "the adjacent territories of foreign nations in the North, South, West, and East" (p. 132), but our globe or Earth. For that which is meant by the sentence which follows the last quoted, namely, that "two Vorubarshiti and Voru-Zarshiti lie in the North; two, Vidadhafshu and Tradadhafshu, in the South; Savahi and Arzahi in the East and West," is simply the very graphic and accurate description of the "chain" of our planet, the Earth, represented in the book of Dzyan (11) thus:

[[diagram]]

[[text of diagram]]

N
(North) (North)
(West) Arzahi W E Savahi (East)
(South) Tradadhafshu S Vidadhafshu (South)
Qaniratha.

The Mazdean names given above have only to be replaced by those used in the Secret Doctrine to become an orthodox tenet. The "Earth" (our World), therefore, is "tripartite," because the chain of the worlds is situated on three different planes above our globe; and it is septempartite because of the seven globes or spheres which compose the chain. Hence the further meaning given in Vendidad XIX. 39, showing that "Qaniratha alone is combined with imat, 'this' (earth), while all other Karshvares are combined with the word 'avat,' 'that' or those -- upper earths." Nothing could be plainer.

The same may be said of the modern comprehension of all other ancient beliefs.

The Druids understood the meaning of the Sun in Taurus, therefore, when, while all the fires were extinguished on the 1st of November, their sacred and inextinguishable fires alone remained to illumine the horizon, like those of the Magi and the modern Zoroastrians. And like the early Fifth Race and later Chaldees, the Greeks, and again like the Christians, who do the same to this day, without suspecting the real meaning, they greeted the Morning Star -- the beautiful Venus-Lucifer.*

[[Footnote(s)]] -----

* Dr. Kenealy quotes, in his "Book of God," Vallancey, who says "I had not been a week landed in Ireland from Gibraltar, where I had studied Hebrew and Chaldaic under Jews of various countries, when I heard a peasant girl say to boor standing by her "Teach an Maddin Nag" (Behold the morning star), pointing to the planet Venus, the Maddena Nag of the Chaldeans."

[[Vol. 2, Page]] 760 THE SECRET DOCTRINE.

Strabo speaks of an island near to Britannia, "where Ceres and Persephone were worshipped with the same rites as in Samothrace (lib. iv.) and this island was Sacred Ierna," where a perpetual fire was lit. The Druids believed in the rebirth of man, not as Lucian explains: "that the same spirit shall animate a new body, not here, but in a different world," but in a series of re-incarnations in this same world; for as Diodorus says, they declared that the souls of men, after determinate periods, would pass into other bodies.*

These tenets came to the Fifth Race Aryans from their predecessors of the Fourth Race, the Atlanteans. They had piously preserved the teachings, which told them how their parent Root-Race, becoming with every generation more arrogant, owing to the acquisition of superhuman powers, had been gradually gliding toward its end. Those records reminded them of the giant intellect of the preceding races as well as of their giant size. One finds the repetition of those records in every age of history, in almost every old fragment which has descended to us from antiquity.

Aelian preserved an extract from Theophrastus written during the days of Alexander the Great. It is a dialogue between Midas, the Phrygian, and Silenus. The former is told of a continent that had existed in times of old, so immense, that Asia, Europe and Africa seemed like poor islands compared with it. It was the last to produce animals and plants of gigantic magnitudes. There, said Silenus, men grew to double the size of the tallest man in his (the narrator's) time, and they lived to twice as old an age. They had wealthy cities with temples, and one of such (cities) held more than a million of inhabitants in it, gold and silver being found there in great abundance. . . .

Grote's suggestion that Atlantis was but a myth arisen from a mirage -- clouds on a dazzling sky taking the appearance of islands on a golden sea -- is too disingenuous to be even noticed.

A.

SOME STATEMENTS ABOUT THE SACRED ISLANDS AND CONTINENTS IN THE CLASSICS, EXPLAINED ESOTERICALLY.

All that which precedes was known to Plato, and to many others. But as no Initiate had the right to divulge and declare all he knew, posterity got only hints. Aiming more to instruct as a moralist than as a geographer and ethnologist or historian, the Greek philosopher merged the history of Atlantis, which covered several million years, into one

[[Footnote(s)]] -----

* There was a time when the whole world, the totality of mankind, had one religion, and when they were of "one lip." "All the religions of the Earth were at first One and emanated from one centre," says Faber very truly.

[[Vol. 2, Page]] 761 WHO, OR WHAT WILL BE DENIED NEXT?

event which he located on one comparatively small island 3000 stadia long by 2000 wide; (or about 350 miles by 200, which is about the size of Ireland), whereas the priests spoke of Atlantis as a continent vast as "all Asia and Lybia" put together. But, however altered in its general aspect, Plato's narrative bears the impress of truth upon it.* It was not he who invented it, at any rate, since Homer, who preceded him by many centuries, also speaks of the Atlantes (who are our Atlanteans) and of their island in his *Odyssey*. Therefore the tradition was older than the bard of Ulysses. The Atlantes and the Atlantides of mythology are based upon the Atlantes and the Atlantides of history. Both Sanchoniathon and Diodorus have preserved the histories of those heroes and heroines, however much these accounts may have become mixed up with the mythical element.

In our own day we witness the stupendous fact that such comparatively recent personages as Shakespeare and William Tell are all but denied, an attempt being made to show one to be a *nom de plume*, and the other a person who never existed. What wonder then, that the two powerful races -- the Lemurians and the Atlanteans -- have been merged into and identified, in time, with a few half mythical peoples, who all bore the same patronymic?

Herodotus speaks of the Atlantes -- a people of Western Africa which gave its name to Mount Atlas; who were vegetarians, and "whose sleep was never disturbed by dreams"; and who, moreover, "daily cursed the sun at his rising and at his setting because his excessive heat scorched and tormented them."

These statements are based upon moral and psychic facts and not on physiological disturbance. The story of Atlas (*Vide supra*) gives the key to it. If the Atlanteans never had their sleep disturbed by dreams, it is because that particular tradition is concerned with the earliest Atlanteans, whose physical frame and brain were not yet sufficiently consolidated, in the physiological sense, to permit the nervous centres to act during sleep. With regard to that other statement -- namely, that

[[Footnote(s)]] -----

* Plato's veracity has been so unwarrantably impeached by even such friendly critics as Professor Jowett, when the "story of Atlantis" is discussed, that it seems well to cite the testimony of a specialist on the subject. It is sufficient to place mere literary cavillers in a very ridiculous position:--

"If our knowledge of Atlantis was more thorough, it would no doubt appear that in every instance wherein the people of Europe accord with the people of America, they were both in accord with the people of Atlantis. . . . It will be seen that in every case where Plato gives us information in this respect as to Atlantis, we find this agreement to exist. It existed in architecture, sculpture, navigation, engraving, writing, an established priesthood, the mode of worship, agriculture, and the construction of roads and canals; and it is reasonable to suppose that the same correspondence extended down to all the minor details." (Donnelly, "Atlantis," p. 194.)

[[Vol. 2, Page]] 762 THE SECRET DOCTRINE.

they daily "cursed the Sun" -- this again has nothing to do with the heat, but with the moral degeneration that grew with the race. It is explained in our Commentaries. "They (the sixth sub-race of the Atlanteans) used magic incantations even against the Sun" -- failing in which, they cursed it. The sorcerers of Thessaly were credited with the power of calling down the moon, as Greek history assures us. The Atlanteans of the later period were renowned for their magic powers and wickedness, their ambition and defiance of the gods. Thence the same traditions taking form in the Bible about the antediluvian giants and the Tower of Babel, found also in the "Book of Enoch."

Diodorus records another fact or two: the Atlanteans boasted of possessing the land in which all the gods had received their birth; as also of having had Uranus for their first King, he being also the first to teach them astronomy. Very little more than this has come down to us from Antiquity.

The myth of Atlas is an allegory easily understood. Atlas is the old continents of Lemuria and Atlantis, combined and personified in one symbol. The poets attribute to Atlas, as to Proteus, a superior wisdom and an universal knowledge, and especially a thorough acquaintance with the depths of the ocean: because both continents bore races instructed by divine masters, and because both were transferred to the bottom of the seas, where they now slumber until their next reappearance above the waters. Atlas is the son of an ocean nymph, and his daughter is Calypso -- "the watery deep," (See Hesiod's Theogony, 507-509, and Odyssey 1, 51): Atlantis has been submerged beneath the waters of the ocean, and its progeny is now sleeping its eternal sleep on the ocean floors. The Odyssey makes of him the guardian and the "sustainer" of the huge pillars that separate the heavens from the earth (1, 52-53). He is their "supporter." And as both Lemuria, destroyed by submarine fires, and Atlantis, submerged by the waves, perished in the ocean deeps,* Atlas is said to have been compelled to leave the surface of the earth, and join his brother Iapetus in the depths of Tartarus. Sir Theodore Martin is right in interpreting this allegory as meaning, Atlas "standing on the solid floor of the inferior hemisphere of the universe and thus carrying at the same time the disc of the earth and the celestial vault -- the solid envelope of the superior hemisphere" . . . (Memoires de l'Academie des

[[Footnote(s)]] -----

* Christians ought not to object to this doctrine of the periodical destruction of continents by fire and water; for St. Peter speaks of the earth "standing out of the water, and in the water, which earth, being overflowed, perished, but is now reserved unto fire"; (See also the "Lives of Alchemistical Philosophers," p. 4, London, 1815).

[[Vol. 2, Page]]763 THE HEIRLOOM OF ATLANTIS.

Inscriptions, p. 176). For Atlas is Atlantis which supports the new continents and their horizons on its "shoulders."

Decharme, in his Mythologie de la Grece Antique, expresses a doubt as to the correctness of Pierron's translation of the Homeric word [[echei]] by sustinet, as it is not possible to see "how Atlas can support or bear at once several pillars situated in various localities." If Atlas were an individual it would be an awkward translation. But, as he personifies a continent in the west said to support heaven and earth at once (Aeschylus, "Prometheus Vincit," 351, 429, etc.) -- i.e., the feet of the giant tread the earth while his shoulders support the celestial vault, an allusion to the gigantic peaks of the Lemurian and Atlantean continents -- the epithet "supporter" becomes very correct. The term "conservator" for the Greek word [[echei]], which Decharme, following Sir Theodore Martin, understands as meaning [[phulassei]] and [[epimeleitai]], does not render the same sense.

The conception was certainly due to the gigantic mountain chain running along the terrestrial border (or disc). These mountain peaks plunged their roots into the very bottom of the seas, while they raised their heads heavenward, their summits being lost in the clouds. The ancient continents had more mountains than valleys on them. Atlas, and the Teneriffe Peak, now two of the dwarfed relics of the two lost continents, were thrice as lofty during the day of Lemuria and twice as high in that of Atlantis. Thus, the Lybians called Mount Atlas "the pillar of Heaven," according to Herodotus (IV., 184), and Pindar qualified the later Aetna as "the celestial pillar" (Pyth. 1, 20; Decharme, 315). Atlas was an inaccessible island peak in the days of Lemuria, when the African continent had not yet been raised. It is the sole Western relic which survives, independent, of the continent on which the Third Race was born, developed and fell,* for Australia is now part of the Eastern continent. Proud Atlas, according to esoteric tradition, having sunk one third of its size into the waters, its two parts remained as an heirloom of Atlantis.

This again was known to the priests of Egypt and to Plato himself, the solemn oath of secrecy, which extended even to the mysteries of Neo-Platonism, alone preventing the whole truth from being told.** So

[[Footnote(s)]] -----

* This does not mean that Atlas is the locality where it fell, for this took place in Northern and Central Asia; but that Atlas formed part of the continent.

** Had not Diocletian burned the esoteric works of the Egyptians in 296, together with their books on alchemy -- "[[peri chumeias kai chrusou]]"; Caesar 700,000 rolls at Alexandria, and Leo Isaurus 300,000 at Constantinople (viiiith cent.); and the Mahomedans all they could lay their sacrilegious hands on -- the world might know to-day more of Atlantis than it does. For Alchemy had its birth-place in Atlantis during the Fourth Race, and had only its renaissance in Egypt.

[[Vol. 2, Page]] 764 THE SECRET DOCTRINE.

secret was the knowledge of the last islands of Atlantis, indeed, -- on account of the superhuman powers possessed by its inhabitants, the last direct descendants of the gods or divine Kings, as it was thought -- that to divulge its whereabouts and existence was punished by death. Theopompus says as much in his ever-suspected Meropis, when he speaks of the Phoenicians as being the only navigators in the seas which wash the Western coast of Africa; and who did it with such mystery that very often they sunk their own vessels to make the too inquisitive foreigners lose all trace of them.

There are those Orientalists and historians -- and they form the majority -- who, while feeling quite unmoved at the rather crude language of the Bible, and some of the events narrated in it, show great disgust at the immorality in the pantheons of India and Greece.* We may be told that before them Euripides, Pindar, and even Plato, express the same; that they too felt irritated with the tales invented -- "those miserable stories of the poets," as Euripides expresses it ([[haoidon hoide dustenoi logo]], Hercules furens, 1346, Dindorf's Edition).

But there may have been another reason for this, perhaps. To those who knew that there was more than one key to theogonic symbolism, it was a mistake to have expressed it in a language so crude and misleading. For if the educated and learned philosopher could discern the kernel of wisdom under the coarse rind of the fruit, and knew that the latter concealed the greatest laws and truths of psychic and physical nature, as well as the origin of all things -- not so with the uninitiated profane. For him the dead letter was religion; the interpretation -- sacrilege. And this dead letter could neither edify nor make him more perfect, seeing that such an example was given him by his gods. But

[[Footnote(s)]] -----

* Professor Max Muller's Lectures -- "on the Philosophy of Mythology" -- are before us. We read his citations of Herakleitos (460 B.C.), declaring that Homer deserved "to be ejected from public assemblies and flogged;" and of Xenophanes "holding Homer and Hesiod responsible for the popular superstitions of Greece. . . ." and for ascribing "to the gods whatever is disgraceful and scandalous among men . . . unlawful acts, such as theft, adultery, and fraud." Finally the Oxford Professor quotes from Professor Jowett's translation of Plato, where the latter tells Adaimantos (Republic) that "the young man (in the State) should not be told that in committing the worst of crimes, he is far from doing anything outrageous, and that he may chastise his father (as Zeus did with Kronos) . . . in any manner that he likes, and in this will only be following the example of the first and greatest of the gods. . . . In my opinion, these stories are not fit to be repeated." To this Dr. Max Muller observes that "the Greek religion was clearly a national and traditional religion, and, as such, it shared both the advantages and disadvantages of this form of religious belief"; while the Christian religion is "an historical and, to a great extent, an individual religion, and it possesses the advantage of an authorised codex and of a settled system of faith" (p. 349). So much the worse if it is "historical," for surely Lot's incident with his daughters would only gain, were it "allegorical."

[[Vol. 2, Page]] 765 THE GOD-BEARING LAND.

to the philosopher -- especially the Initiate -- Hesiod's theogony is as historical as any history can be. Plato accepts it as such, and gives out as much of its truths as his pledges permitted him.

The fact that the Atlantes claimed Uranos for their first king, and that Plato commences his story of Atlantis by the division of the great continent by Neptune, the grandson of Uranos, shows that there were continents and kings before Atlantis. For Neptune, to whose lot that continent fell, finds on a small island only one human couple made of clay (i.e., the first physical human man, whose origin began with the last sub-races of the Third Root-Race). It is their daughter Clito that the god marries, and it is his eldest son Atlas who receives for his part the mountain and the continent which was called by his name.

Now all the gods of Olympus, as well as those of the Hindu Pantheon and the Rishis, were the septiform personations (1) of the noumena of the intelligent Powers of nature; (2) of Cosmic Forces; (3) of celestial bodies; (4) of gods or Dhyan Chohans; (5) of psychic and spiritual powers; (6) of divine kings on earth (or the incarnations of the gods); and (7) of terrestrial heroes or men. The knowledge how to discern among these seven forms the one that is meant, belonged at all times to the Initiates, whose earliest predecessors had created this symbolical and allegorical system.

Thus while Uranos (or the host representing this celestial group) reigned and ruled over the Second Race and their (then) Continent; Kronos or Saturn governed the Lemurians; and Jupiter, Neptune* and others fought in the allegory for Atlantis, which was the whole earth in the day of the Fourth Race. Poseidonis, or the (last) island of Atlantis "the third step of Idaspati" (or Vishnu) in the mystic language of the secret books -- lasted till about 12,000 years ago.** The Atlantes of Diodorus were right in claiming that it was their country, the region surrounding Mount Atlas, where "the gods were born" - i.e., "incarnated." But it was after their fourth incarnation that they became, for the first time, human Kings and rulers.

Diodorus speaks of Uranos as the first king of Atlantis, confusing, either consciously or otherwise, the continents; but, as shown, Plato indirectly corrects the statement. The first astronomical teacher of men was Uranos, because he is one of the seven Dhyan Chohans of that second period or Race. Thus also in the second Manvantara

[[Footnote(s)]] -----

* Neptune or Poseidon is the Hindu Idaspati, identical with Narayana (the mover on the waters) or Vishnu, and like this Hindu god he is shown crossing the whole horizon in three steps. Idaspati means also "the master of the waters."

** Bailly's assertion that the 9,000 years mentioned by the Egyptian priests do not represent "solar years" is groundless. Bailly knew nothing of geology and its calculations; otherwise he would have spoken differently.

[[Vol. 2, Page]] 766 THE SECRET DOCTRINE.

(that of Swarochisha), among the seven sons of the Manu, the presiding gods or Rishis of that race, we find Jyotis,* the teacher of astronomy (Jyotisha), one of the names of Brahma. And thus also the Chinese revere Tien (or the sky, Ouranos), and name him as their first teacher of astronomy. Uranos gave birth to the Titans of the Third Race, and it is they who (personified by Saturn-Kronos) mutilated him. For as it is the Titans who fell into generation, when "creation by will was superseded by physical procreation," they needed Uranos no more.

And here a short digression must be permitted and pardoned. In consequence of the last scholarly production of Mr. Gladstone in the Nineteenth Century, "The Greater Gods of Olympos," the ideas of the general public about Greek Mythology have been still further perverted and biased. Homer is credited with an inner thought, which is regarded by Mr. Gladstone as "the true key to the Homeric conception," whereas this "key" was merely a blind. Poseidon "is indeed essentially of the earth earthy . . . strong and self-asserting, sensual and intensely jealous and vindictive," -- but this is because he symbolises the Spirit of the Fourth Root-Race, the ruler of the Seas, that race which lives above the surface of the seas ([limne], ll. xxiv., 79), which is composed of the giants, the children of Eurymedon, the race which is the father of Polyphemus, the Titan and one-eyed Cyclops. Though Zeus reigns over the Fourth Race, it is Poseidon who rules, and who is the true key to the triad of the Kronid Brothers and to our human races. Poseidon and Nereus are one: the former the ruler or spirit of Atlantis before the beginning of its submersion, the latter, after. Neptune is the titanic strength of the living race; Nereus, its spirit reincarnated in the subsequent Fifth or Aryan Race: and this is what the great Greek scholar of England has not yet discovered, or even dimly perceived. And yet he makes many observations upon the "artfulness" of Homer, who never names Nereus, at whose designation we arrive . . . only through the patronymic of the Nereids!

Thus the tendency of even the most erudite Hellenists is to confine their speculations to the exoteric images of mythology and to lose sight of their inner meaning: and it is remarkably illustrated in the case of the Right Hon. W. E. Gladstone, as we have shown. While almost the most conspicuous figure of our age as a statesman, he is at the same time one of the most cultured scholars England has given birth to. Grecian literature has been the loving study of his life, and he has found time amid the bustle of public affairs to enrich contemporary literature with contributions to Greek scholarship which will make his name famous through coming generations. At the same time, as his sincere

[[Footnote(s)]] -----

* See Matsya Purana, which places him among the seven Prajapatis of the period.

[[Vol. 2, Page]] 767 THE POWER OF NAMES.

admirer, the present writer cannot but feel a deep regret that posterity, while acknowledging his profound erudition and splendid culture, will yet, in the greater light which must then shine upon the whole question of symbolism and mythology, judge that he has failed to grasp the spirit of the religious system which he has often criticised from the dogmatic Christian standpoint. In that future day it will be perceived that the esoteric key to the mysteries of the Christian as well as of the Grecian theogonies and Sciences, is the Secret Doctrine of the pre-historic nations, which, along with others, he has denied. It is that Doctrine alone which can trace the kinship of all human religious speculations or even so-called Revelations, and it is this teaching which infuses the Spirit of life into the lay figures on the Mounts of Meru, Olympus, Walhalla, or Sinai. If Mr. Gladstone were a younger man, his admirers might hope that his scholastic studies would be crowned by the discovery of this underlying truth. As it is, he but wastes the golden hours of his declining years in futile disputations with that giant free-thinker, Col. Ingersoll, each fighting with the weapons of exoteric temper, drawn from the arsenals of ignorant LITERALISM. These two great controversialists are equally blind to the true esoteric meaning of the texts which they hurl at each other's head like iron bullets, while the world alone suffers by such controversies: since the one helps to strengthen the ranks of materialism, and the other those of blind Sectarianism and of the dead letter. And now we may return once more to our immediate subject.

Many a time Atlantis is spoken of under another name, one unknown to our commentators. The power of names is great, and was known since the first men were instructed by the divine masters. And as Solon had studied it, he translated the "Atlantean" names into names devised by himself. In connection with the continent of Atlantis, it is desirable to bear in mind that the accounts which have come down to us from the old Greek writers contain a confusion of statements, some referring to the Great Continent and others to the last small island of Poseidonis. It has become customary to take them all as referring to the latter only, but that this is incorrect is evident from the incompatibility of the various statements as to the size, etc., of "Atlantis."

Thus, in the Timaeus and Critias, Plato says, that the plain surrounding the city was itself surrounded by mountain chains. . . . And the plain was smooth and level, and of an oblong shape, lying north and south, three thousand stadia in one direction and two thousand in the other. . . . They surrounded the plain by an enormous canal or dike, 101 feet deep, 606 feet broad, and 1,250 miles in length.

Now in other places the entire size of the island of Poseidonis is given as about the same as that assigned here to the "plain around the

[[Vol. 2, Page]] 768 THE SECRET DOCTRINE.

city" alone. Obviously, one set of statements refers to the great continent, and the other to its last remnant -- Plato's island.

And, again, the standing army of Atlantis is given as upwards of a million men; its navy as 1,200 ships and 240,000 men. Such statements are quite inapplicable to a small island state, of about the size of Ireland!

The Greek allegories give to Atlas, or Atlantis, seven daughters (seven sub-races), whose respective names are Maia, Electra, Taygeta, Asterope, Merope, Alcyone, and Celaeno. This ethnologically, as they are credited with having married gods and with having become the mothers of famous heroes, the founders of many nations and cities. Astronomically, the Atlantides have become the seven Pleiades (?). In occult science the two are connected with the destinies of nations, those destinies being shaped by the past events of their early lives according to Karmic law.

Three great nations claimed in antiquity a direct descent from the kingdom of Saturn or Lemuria (confused already several thousands of years before our era with Atlantis): and these were the Egyptians, the Phoenicians (Vide Sanchoniathon), and the old Greeks (Vide Diodorus, after Plato). But the oldest civilized country of Asia -- India -- can be

shown to claim the same descent likewise. Sub-races guided by Karmic law or destiny repeat unconsciously the first steps of their respective mother-races. As the comparatively fair Brahmins have come -- when invading India with its dark-coloured Dravidians -- from the North, so the Aryan Fifth Race must claim its origin from northern regions. The occult sciences show that the founders (the respective groups of the seven Prajapatis) of the Root Races have all been connected with the Pole Star. In the Commentary we find:--

"He who understands the age of Dhruva* who measures 9090 mortal years, will understand the times of the pralayas, the final destiny of nations, O Lanoo."

Moreover there must have been a good reason why an Asiatic nation should locate its great progenitors and saints in the Ursa Major, a northern constellation. It is 70,000 YEARS, HOWEVER, SINCE THE POLE OF THE EARTH POINTED TO THE FURTHER END OF URSA MINOR'S TAIL; and many more thousand years since the seven Rishis could have been identified with the constellation of Ursa Major.

The Aryan race was born and developed in the far north, though after the sinking of the continent of Atlantis its tribes emigrated further south into Asia. Hence Prometheus is son of Asia, and Deukalion, his son, the Greek Noah -- he who created men out of the stones of mother

[[Footnote(s)]] -----

* The equivalent of this name is given in the original.

[[Vol. 2, Page]] 769 THE SONS OF COELUS AND TERRA.

earth -- is called a northern Scythe, by Lucian, and Prometheus is made the brother of Atlas and is tied down to Mount Caucasus amid the Snows.*

Greece had her Hyperborean as well as her Southern Apollo. Thus nearly all the gods of Egypt, Greece, and Phoenicia, as well as those of other Pantheons, are of a northern origin and originated in Lemuria, towards the close of the Third Race, after its full physical and physiological evolution had been completed.** All the "fables" of Greece were built on historical facts, if that history had only passed unadulterated by myths to posterity. The "one-eyed" Cyclopes, the giants fabled as the sons of Coelus and Terra -- three in number, according to Hesiod -- were the last three sub-races of the Lemurians, the "one-eye" referring to the Wisdom eye***; for the two front eyes were fully developed as physical organs only in the beginning of the Fourth Race. The allegory of Ulysses, whose companions were devoured while the king of Ithaca was saved by putting out with a fire-brand the eye of Polyphemus, is based upon the psycho-physiological atrophy of the "third" eye. Ulysses belongs to the cycle of the heroes of the Fourth Race, and, though a "sage" in the sight of the latter, must have been a profligate in the opinion of the pastoral Cyclopes.**** His adventure with the latter -- a savage gigantic race, the antithesis of cultured civilization in the Odyssey -- is an allegorical record of the gradual passage from the Cyclopean civilization of stone and colossal buildings to the more sensual and physical culture of the Atlantians, which finally caused the last of

[[Footnote(s)]] -----

* Deukalion is said to have brought the worship of Adonis and Osiris into Phoenicia. Now the worship is that of the Sun, lost and found again in its astronomical significance. It is only at the Pole where the Sun dies out for such a length of time as six months, for in latitude 68 [[degrees]] it remains dead only for forty days, as in the festival of Osiris. The two worships were born in the north of Lemuria, or on that continent of which Asia was a kind of broken prolongation, and which stretched up to the Polar regions. This is well shown by de Gebelin's "Allegories d'Orient," p. 246, and by Bailly; though neither Hercules nor Osiris are solar myths, save in one of their seven aspects.

** The Hyperboreans, now regarded as mythical, were described (Herod. IV., 33-35; Pausanias, 1, 31, 2; V., 7, 8; ad X., 5, 7, 8) as the beloved priests and servants of the gods, and of Apollo chiefly.

*** The Cyclopes are not the only "one-eyed" representatives in tradition. The Arimaspes were a Scythian people, and were also credited with but one eye. (Geographie ancienne, Vol. II, p. 321.) It is they whom Apollo destroyed with his shafts. (See supra.)

**** Ulysses was wrecked on the isle of AEaea, where Circe changed all his companions into pigs for their voluptuousness; and after that he was thrown into Ogygia, the island of Calypso, where for some seven years he lived with the nymph in illicit connection (Odyssey and elsewhere). Now Calypso was a daughter of Atlas (Odys. Book XII.), and all the traditional ancient versions, when speaking of the Isle of Ogygia, say that it was very distant from Greece, and right in the middle of the ocean: thus identifying it with Atlantis.

[[Vol. 2, Page]] 770 THE SECRET DOCTRINE.

the Third Race to lose their all-penetrating spiritual eye. That other allegory, which makes Apollo kill the Cyclops to avenge the death of his son Asclepius, does not refer to the three races represented by the three sons of Heaven and Earth, but to the Hyperborean Arimaspean Cyclopes, the last of the race endowed with the "Wisdom-eye." The former have left relics of their buildings everywhere, in the south as much as in the north; the latter, were confined to the north solely. Thus Apollo -- pre-eminently the god of the Seers, whose duty it is to punish desecration -- killed them -- his shafts representing human passions, fiery and lethal -- and hid his shaft behind a mountain in the Hyperborean regions. (Hygin. "Astron. Poetique," Book ii. c. 15). Cosmically and astronomically this Hyperborean god is the Sun personified, which during the course of the sidereal year (25,868 y.) changes the climates on the earth's surface, making of tropical, frigid regions, and vice versa. Psychically and spiritually his significance is far more important. As Mr. Gladstone pertinently remarks in his "Greater Gods of Olympus," "the qualities of Apollo (jointly with Athene) are impossible to be accounted for

without repairing to sources, which lie beyond the limit of the traditions most commonly explored for the elucidation of the Greek mythology" (Nineteenth Century, July, 1887.)

The history of Latona (Leto), Apollo's mother, is most pregnant in various meanings. Astronomically, Latona is the polar region and the night, giving birth to the Sun, Apollo, Phoebus, etc. She is born in the Hyperborean countries wherein all the inhabitants were priests of her son, celebrating his resurrection and descent to their country every nineteen years at the renewal of the lunar cycle (Diod. Sic. II. 307). Latona is the Hyperborean Continent, and its race -- geologically.*

[[Footnote(s)]] -----

* To make a difference between Lemuria and Atlantis, the ancient writers referred to the latter as the northern or Hyperborean Atlantis, and to the former as the southern. Thus Apollodorus says (Mythology, Book II.): "The golden apples carried away by Hercules are not, as some think, in Lybia; they are in the Hyperborean Atlantis." The Greeks naturalised all the gods they borrowed and made Hellenes of them, and the moderns helped them. Thus also the mythologists have tried to make of Eridan the river Po, in Italy. In the myth of Phaeton it is said that at his death his sisters dropped hot tears which fell into Eridan and were changed into amber! Now amber is found only in the northern seas, in the Baltic. Phaeton, meeting with his death while carrying heat to the frozen stars of the boreal regions, awakening at the Pole the Dragon made rigid by cold, and being hurled down into the Eridan, is an allegory referring directly to the changes of climate in those distant times when, from a frigid zone, the polar lands had become a country with a moderate and warm climate. The usurper of the functions of the sun, Phaeton, being hurled into the Eridan by Jupiter's thunderbolt, is an allusion to the second change that took place in those regions when, once more, the land where "the magnolia blossomed" became the desolate forbidding land of the farthest north and eternal ices. This allegory covers then the events of two pralayas; and if well understood ought to be a demonstration of the enormous antiquity of the human races.

[[Vol. 2, Page]] 771 THE CHILDREN OF NIOBE.

When the astronomical meaning cedes its place to the spiritual and divine -- Apollo and Athene transforming themselves into the form of birds, the symbol and glyph of the higher divinities and angels -- then the bright god assumes divine creative powers. Apollo becomes the personification of Seership, when he sends the astral double of Aeneas to the battle field (II. 431-53), and has the gift of appearing to his Seers without being visible to other persons present -- (Iliad, xvii., 322-36) -- a gift, however, shared by every high Adept.

The King of the Hyperboreans, was, therefore, the son of Boreas, the north-wind, and the High Priest of Apollo. The quarrel of Latona with Niobe (the Atlantean race) -- the mother of seven sons and seven daughters personifying the seven sub-races of the Fourth Race and their seven branches (see Apollodorus for this number) -- allegorizes the history of the two continents. The wrath of "the sons of god," or of "Will and Yoga," at seeing the steady degradation of the Atlanteans was great (See "The Sons of God and the Sacred Island"); and the destruction of the "children of Niobe" by the children of Latona -- Apollo and Diana, the deities of light, wisdom and purity, or the Sun and Moon astronomically, whose influence causes changes in the earth's axis, deluges and other cosmic cataclysms -- is thus very clear.* The fable about the

[[Footnote(s)]] -----

* So occult and mystic is one of the aspects of Latona that she is made to reappear even in Revelation (xii.) as the woman clothed with the Sun (Apollo) and the Moon (Diana) under her feet, who being with child "cries, travailing in birth, pained to be delivered." A great red Dragon, etc., stands before the woman ready to devour the child. She brings forth the man child who was to rule all nations with a rod of iron, and who was caught unto the throne of God (the Sun). The woman fled to the wilderness still pursued by the Dragon, who flees again, and casts out of his mouth water as a flood, when the earth helped the woman and swallowed the flood; and the Dragon went to make war with the remnant of her seed who keep the commandment of God, etc. (See xii., 1, 17.) Anyone, who reads the allegory of Latona pursued by the revenge of jealous Juno, will recognise the identity of the two versions. Juno sends Python, the Dragon, to persecute and destroy Latona and devour her babe. The latter is Apollo, the Sun, for "the man-child, who was to rule all nations with a rod of iron" of Revelation, is surely not the meek "Son of God," Jesus, but the physical Sun, "who rules all nations"; the Dragon being the North Pole, gradually chasing the early Lemurians from the lands which became more and more Hyperborean and unfit to be inhabited by those who were fast developing into physical men, for they now had to deal with the climatic variations. The Dragon will not allow Latona "to bring forth" -- (the Sun to appear). "She is driven from heaven, and finds no place where she can bring forth," until Neptune (the ocean), moved with pity, makes immovable the floating isle of Delos (the nymph Asteria, hitherto hiding from Jupiter under the waves of the ocean) on which Latona finds refuge and where the bright god [[Delios]] is born, the god, who no sooner appears than he kills Python, the cold and frost of the Arctic region, in whose deadly coils all life becomes extinct. In other words, Latona-Lemuria is transformed into Niobe-Atlantis, over which her son Apollo, or the Sun, reigns -- with an iron rod, truly, since Herodotus makes the Atlantes curse his too great heat. This allegory is reproduced in its other mystic meaning (another of the seven keys) in the

[[Vol. 2, Page]] 772 THE SECRET DOCTRINE.

never-ceasing tears of Niobe, whose grief causes Zeus to change her into a fountain -- Atlantis covered with water -- is no less graphic as a symbol. Niobe, let it be remembered, is the daughter of one of the Pleiades (or Atlantides) the grand-daughter of Atlas therefore, (See "Metamorphoses of Ovid," Book VI.), because she represents the last generations of the doomed continent.

A true remark, that of Bailly, which says that Atlantis had an enormous influence on antiquity. "If these names," he adds, "are mere allegories, then all that those fables contain of truth comes from Atlantis; if the fable is a real tradition -- however altered -- then the whole of the ancient history is still in it." (Lettres sur l'Atlantide, p. 137.)

So much so, that all ancient writings -- prose and poetry -- are full of the reminiscences of the Lemuro-Atlanteans, the first physical races, though the Third and the Fourth in number. Hesiod records the tradition about the men of the age of Bronze, whom Jupiter had made out of ash-wood and who had hearts harder than diamond. Clad in bronze from head to foot they passed their lives in fighting. Monstrous in size, endowed with a terrible strength, invincible arms and hands descended from their shoulders, says the poet (Hesiod, in oper. and dieb. v. 143). Such were the giants of the first physical races. The Iranians have a reference to the later Atlanteans in Yasna ix. 15. Tradition maintains that the "Sons of God," or the great Initiates of the Sacred Island, took advantage of the Deluge, to rid the earth of all the Sorcerers among the Atlanteans. The said verse addresses Zoroaster as one of the "Sons of God." -- It says: "Thou, O Zarathustra, didst make all demons (i.e., Sorcerers), who before roamed the world in human forms, conceal themselves in the earth" (i.e., helped them to get submerged).

The Lemurians, as also the early Atlanteans, were divided into two distinct classes -- the "Sons of Night" or Darkness, and the "Sons of the Sun," or Light. The old books tell us of terrible battles between the two, when the former, leaving their land of Darkness, from whence the Sun departed for long months, descended from their inhospitable regions and "tried to wrench the lord of light" from their better favoured brothers of the equatorial regions. We may be told that the ancients knew nothing of the long night of six months' duration in the Polar regions. Even Herodotus, more learned

[[Footnote(s)]] -----

[[Footnote continued from previous page]] chapter just cited of the Apocalypse. Latona became a powerful goddess indeed, and saw her son receive worship (solar worship) in almost every fane of antiquity. In his occult aspect Apollo is patron of Number 7. He is born on the seventh of the month, and the swans of Myrica swim seven times around Delos singing that event; he is given seven chords to his Lyre -- the seven rays of the sun and the seven forces of nature. But this only in the astronomical meaning, whereas the above is purely geological.

[[Vol. 2, Page]] 773 THE CYCLES OF TIME.

than the rest, only mentions a people who slept for six months in the year, and remained awake the other half. Yet the Greeks knew well that there was a country in the north where the year was divided into a day and night of six months' duration each, for Pliny says so in his Fourth Book, c. 12. They speak of the Cimmerians and of the Hyperboreans, and draw a distinction between the two. The former inhabited the Palus Maeotis (between 45 [[degrees]] and 50 [[degrees]] latitude). Plutarch explains that they were but a small portion of a great nation driven away by the Scythians, which nation stopped near Tanais, having crossed Asia. "These warlike multitudes lived formerly on the ocean shores, in dense forests, and under a tenebrous sky. There the pole is almost touching the head, there long nights and days divide the year" (in Mario). As to the Hyperboreans, these peoples, as expressed by Solinus Polyhistor (c. 16), "sow in the morning, reap at noon, gather their fruits in the evening, and store them during the night in their caves."

Even the writers of the Zohar knew of the fact (as shown in iii., fol. 10a), as it is written: "In the Book of Hammannunah, the Old, we learn . . . there are some countries of the earth which are lightened, whilst others are in darkness; these have the day, when for the former it is night; and there are countries in which it is constantly day, or in which at least the night continues only some instants." (Isaac Myer's "Qabbalah," p. 139).

The island of Delos, the Asteria of the Greek mythology, was never in Greece, a country which, in its day, was not yet in existence, not even in its molecular form. Several writers have shown that it represented a country or an island, far larger than the small dots of land which became Greece. Both Pliny and Diodorus Siculus place it in the Northern seas. One calls it Basilea or "royal" (Vol. II., p. 225 of Diod.); the other, Pliny, names it Osericta (Book xxxvii, c. 2), a word, according to Rudbeck (Vol. I., p. 462-464), having had "a significance in the northern languages, equivalent to the Island of the divine Kings or god-Kings," or again the "royal island of the gods," because the gods were born there, i.e., the divine dynasties of the kings of Atlantis proceeded from that place. Let geographers and geologists seek for it among that group of islands discovered by Nordenskiöld on his Vega voyage in the arctic regions.* The secret books inform us that the climate has changed in those regions more than once since the first men inhabited those now almost inaccessible latitudes. They were a paradise before they became hell;

[[Footnote(s)]] -----

* These islands were "found strewn with fossils of horses, sheep, oxen, etc., among gigantic bones of elephants, mammoths, rhinoceroses," etc. If there was no man on earth at that period "how came horses and sheep to be found in company with the huge antediluvians?" asks a master in a letter. ("Esoteric Buddhism," 67). The reply is given above in the text.

[[Vol. 2, Page]] 774 THE SECRET DOCTRINE.

the dark Hades of the Greeks and the cold realm of Shades where the Scandinavian Hel, the goddess-Queen of the country of the dead, "holds sway deep down in Helheim and Niflheim." Yet, it was the birth-place of Apollo, who was the brightest of gods, in heaven -- astronomically -- as he was the most enlightened of the divine kings who ruled over the early nations, in his human meaning. The latter fact is borne out in the Iliad IV., 239-62, Vide "The Greater gods" -- wherein Apollo is said to have appeared four times in his own form (as the god of the four races) and six times in human form, i.e., as connected with the divine Dynasties of the earlier unseparated Lemurians.

It is those early mysterious peoples, their countries (which have now become uninhabitable), as well as the name given to man both dead and alive, which have furnished an opportunity to the ignorant Church fathers for inventing a hell, which they have transformed into a burning instead of a freezing locality.*

It is, of course, evident that it is neither the Hyperboreans, nor the Cimmerians, the Arimaspes, nor even the Scyths -- known to and communicating with the Greeks -- who were our Atlanteans. But they were all the descendants of their last sub-races. The Pelasgians were certainly one of the root-races of future Greece, and were a remnant of a sub-race of

Atlantis. Plato hints as much in speaking of the latter, whose name it is averred came from pelagus, the great sea. Noah's Deluge is astronomical and allegorical, but it is not mythical, for the story is based upon the same archaic tradition of men -- or rather of nations -- which were saved during the cataclysms, in canoes, arks, and ships. No one would presume to say that the Chaldean Xisuthrus, the Hindu Vaivasvata, the Chinese Peirun -- the "beloved of the gods," who rescued him from the flood in a canoe -- or the Swedish Belgamer, for whom the gods did the same in the north, are all identical as a personage. But their legends have all sprung from the catastrophe which involved both the continent and the island of Atlantis.

The allegory about the antediluvian giants and their achievements in Sorcery is no myth. Biblical events are revealed indeed. But it is neither by the voice of God amid thunder and lightning on Mount

[[Footnote(s)]] -----

* A good proof that all the gods, and religious beliefs, and myths have come from the north, which was also the cradle of physical man, lies in several suggestive words which have originated and remain to this day among the northern tribes in their primeval significance; but although there was a time when all the nations were "of one lip," these words have received a different meaning with the Greeks and Latins. One such word is Mann, Man, a living being, and Manes, dead men. The Laplanders call their corpses to this day manee. (*Voyage de Renard en Laponie I.*, 184). Mannus is the ancestor of the German race; the Hindu Manu, the thinking being, from man; the Egyptian Menes; and Minos, the King of Crete, judge of the infernal regions after his death -- all proceed from the same root or word.

[[Vol. 2, Page]] 775 WHO WERE THE NEPHILIM?

Sinai, nor by a divine finger tracing the record on tablets of stone, but simply through tradition via pagan sources. It was not surely the Pentateuch that Diodorus was repeating when he wrote upon the Titans -- the giants born of Heaven and Earth, or, rather, born of the Sons of God who took to themselves for wives the daughters of men who were fair. Nor was Pherecydes quoting from Genesis when giving details on those giants which are not to be found in the Jewish Scriptures. He says that the Hyperboreans were of the race of the Titans, which race descended from the earliest giants, and that it was that Hyperborean region which was the birth-place of the first giants. The Commentaries on the sacred books explain that the said region was the far north, the polar lands now, the pre-Lemurian earliest continent, embracing once upon a time the present Greenland, Spitzbergen, Sweden, Norway, etc.

But who were the Nephilim of Genesis vi. 4? There were Palaeolithic and Neolithic men in Palestine ages before the events recorded in the book of the Beginnings. The theological tradition identifies these Nephilim with hairy men or Satyrs, the latter being mythical in the Fifth Race and the former historical in both the Fourth and Fifth Races. We have stated elsewhere what the prototypes of these Satyrs were, and have spoken of the bestiality of the early and later Atlantean race. What is the meaning of Poseidon's amours under such a variety of animal forms? He became a dolphin to win Amphitrite; a horse, to seduce Ceres; a ram, to deceive Theophane, etc., etc. Poseidon is not only the personation of the Spirit and Race of Atlantis, but also of the vices of these giants. Gesenius and others devote an enormous space to the meaning of the word Nephilim and explain very little. But Esoteric records show these hairy creatures to be the last descendants of those Lemuro-Atlantean races, which begot children on female animals, of species now long extinct; thus producing dumb men, "monsters," as the Stanzas have it.

Now mythology, built upon Hesiod's Theogony, which is but a poetised record of actual traditions, or oral history, speaks of three giants, called Briareus, Kottos, and Gyges, living in a dark country where they were imprisoned by Kronos for their rebellion against him. All the three are endowed by myth with an hundred arms and fifty heads, the latter standing for races, the former for sub-races and tribes. Bearing in mind that in mythology every personage almost is a god or demi-god, and also a king or simple mortal in his second aspect,* and

[[Footnote(s)]] -----

* Thus, for instance, Gyges is a hundred-armed and fifty-headed monster, a demi-god in one case, and a Lydian, the successor of Candaules, king of the country, in another version. The same is found in the Indian Pantheon, where Rishis and the Sons of Brahma are reborn as mortals.

[[Vol. 2, Page]] 776 THE SECRET DOCTRINE.

that both stand as symbols for lands, islands, powers of nature, elements, nations, races and sub-races, the esoteric Commentary will become comprehensible. It says that the three giants are three polar lands which have changed form several times, at each new cataclysm, or disappearance of one continent to make room for another. The whole globe is convulsed periodically; and has been so convulsed, since the appearance of the First Race, four times. Yet, though the whole face of the earth was transformed thereby each time, the conformation of the arctic and antarctic poles has but little altered. The polar lands unite and break off from each other into islands and peninsulas, yet remain ever the same. Therefore northern Asia is called the "eternal or perpetual land," and the Antarctic the "ever living" and "the concealed"; while the Mediterranean, Atlantic, Pacific and other regions disappear and reappear in turn, into and above the great waters.

From the first appearance of the great continent of Lemuria, the three polar giants had been imprisoned in their circle by Kronos. Their gaol is surrounded by a wall of bronze, and the exit is through gates fabricated by Poseidon (or Neptune, hence by the seas), which they cannot cross; and it is in that damp region, where eternal darkness reigns, that the three brothers languish. The Iliad (viii., 13) makes of it the Tartaros. When the gods and Titans rebelled in their turn against Zeus -- the deity of the Fourth Race -- the father of the gods bethought himself of the imprisoned giants in order to conquer the gods and Titans, and to precipitate the latter into Hades; or, in clearer words, to have Lemuria hurled amid thunder and lightning to the bottom of the seas, so as to make room for Atlantis, which was to be submerged and perish in its turn.* The geological upheaval and deluge of Thessaly was a repetition on a small scale of the great cataclysm; and, remaining impressed on the memory of the Greeks, was merged by them into, and confused with, the general fate of

Atlantis. So, also, the war between the Rakshasas of Lanka and the Bharateans, the melee of the Atlanteans and Aryans in their supreme struggle, or the conflict between the Daevas and Izeds (or Peris), became, ages later, the struggle of Titans, separated into two inimical camps, and still later the war between the angels of God and the angels of Satan. Historical facts became theological dogmas. Ambitious scholiasts, men of a small sub-race born but yesterday, and one of the latest issues of the Aryan stock, took upon themselves to overturn the religious

[[Footnote(s)]] -----

* The continents perish in turn by fire and water: either through earthquakes and volcanic eruptions, or by sinking and the great displacement of waters. Our continents have to perish owing to the former cataclysmal process. The incessant earthquakes of this and the past years may be a warning.

[[Vol. 2, Page]] 777 MYTHOLOGY BUILT ON HISTORY.

thought of the world, and succeeded. For nearly two thousand years they impressed thinking Humanity with the belief in the existence of Satan.

But as it is now the conviction of more than one Greek scholar -- as it was that of Bailly and Voltaire -- that Hesiod's theogony was based upon historical facts (see Decharme's *Mythol. de la Grece Antique*), it becomes easier for the occult teachings to find their way into the minds of thoughtful men, and therefore are these passages from mythology brought forward in our discussion upon modern learning in this Addendum.

Such symbolisms as are found in all the exoteric creeds, are so many landmarks of prehistoric truths. The sunny, happy land, the primitive cradle of the earliest human races, has become several times since then hyperborean and Saturnine*; thus showing the Golden Age and reign of Saturn from multiform aspects. It was many-sided in its character indeed -- climatically, ethnologically and morally. For, the Third, Lemurian Race must be physiologically divided into the early androgynous and the later bi-sexual race; and the climate of its dwelling places and continents into that of an eternal spring and eternal winter, into life and death, purity and impurity. The Cycle of legends is ever being transformed on its journey by popular fancy. Yet it may be cleansed from the dross it has picked up on its way through many nations and through the countless minds which have added their own exuberant additions to the original facts. Leaving for a while the Greek interpretations we may seek for some more corroborations of the latter in the scientific and geological proofs.

[[Footnote(s)]] -----

* Denis, the geographer, tells us that the great sea North of Asia was called glacial, or Saturnine (v. 35). Orpheus (v. 1077) and Pliny (Book IV., c. 16) corroborate the statement by showing that it is its giant inhabitants who gave it the name. And the Secret Doctrine explains both assertions by telling us that all the continents were formed from North to South; and that as the sudden change of climate dwarfed the race that had been born on it, arresting its growth, so, several degrees southward, various conditions had always produced the tallest men in every new humanity, or race. We see it to this day. The tallest men now found are those in Northern countries, while the smallest are Southern Asiatics, Hindus, Chinamen, Japanese, etc. Compare the tall Sikhs and Punjabees, the Afghans, Norwegians, Russians, Northern Germans, Scotchmen, and the English, with the inhabitants of central India and the average European on the continent. Thus also the giants of Atlantis, and hence the Titans of Hesiod, are all Northerners.

[[Vol. 2, Page]] 778 THE SECRET DOCTRINE.

§ VII.
SCIENTIFIC AND GEOLOGICAL PROOFS OF THE EXISTENCE OF SEVERAL SUBMERGED CONTINENTS.

IT may not be amiss -- for the benefit of those who resolve the tradition of a lost Miocene Atlantis into an "antiquated myth," to append a few scientific admissions on this point. Science, it is true, is largely indifferent to such questions. But there are Scientists ready to admit that, in any case, a cautious agnosticism as to geological problems concerning the remote past is far more philosophical than a priori denial, or even hasty generalizations on insufficient data.

Meanwhile two very interesting instances, that have been lately met with, may be pointed out as "confirming" certain passages in the letter of a Master, published in "Esoteric Buddhism." The eminence of the authorities will not be questioned:--

[[First Column]]

Extract from p. 61 of "Esoteric Buddhism."

No. 1.

"The sinking of the Atlantis (the group of continents and islands) began during the Eocene period . . . and it culminated in the Miocene, first in the final disappearance of the largest, an event coincident with the elevation of the Alps, and second in the sinking of the last of the fair islands mentioned by Plato."

[[First Column continued on next page]]

[[Second Column]]

Extract from a Lecture by W. Pengelly, F.R.S., F.G.S.

No. 1.

"Was there, as some have believed, an Atlantis -- a continent or Archipelago of large islands occupying the area of the North Atlantic? There is, perhaps, nothing unphilosophical in the hypothesis. For since, as geologists state, 'The Alps have acquired 4,000 and even in some places more than 10,000 feet of their present altitude since the commencement of the Eocene epoch' (Lyell's Principles 2nd Ed. p. 256.) -- a post-Miocene depression might have carried the hypothetical Atlantis into almost abysmal depths."*

[[Second Column continued on next page]]

[[Footnote(s)]] -----

* Having already given several instances of the vagaries of Science, it is delightful to find such agreement in this particular case. Read in connection with the scientific admission (cited elsewhere) of the geologists' ignorance of even the approximate duration of periods, the following passage is highly instructive: "We are not yet able to assign an approximate date for the most recent epoch at which our Northern Hemisphere was covered with glaciers. According to Mr. Wallace, this epoch may have occurred seventy thousand years ago, while others would assign to it an antiquity of at least two hundred thousand years, and there are yet others who urge strong arguments on behalf of the opinion that a million of years is barely enough to have produced the changes which have taken place since that event." (Fiske, "Cosmic [[Footnote continued on next page]]

[[Vol. 2, Page]] 779 GEOLOGY CORROBORATES OCCULTISM.

[[First Column continued from previous page]]

No. 2.

"Lemuria cannot any more be confounded with the Atlantis continent than Europe with America. Both sank and were drowned with all their 'gods'; yet, between the two catastrophes a short period of about some 700,000 years elapsed; Lemuria flourishing and ending her career just about that trifling lapse of time before the early Eocene Age, since its Race was the Third. Behold the relics of that once great race in some of the flat-headed aborigines of your AUSTRALIA." ("Esoteric Buddhism," p. 55.)

[[Second Column continued from previous page]]

No. 2.

"It would be premature to say, because no evidence has yet been adduced, that men may not have existed in the Eocene Age, especially as it can be shown that a race of men, the lowest we know of, co-exists with that remnant of the Eocene flora which still survives on the continent and islands of Australia." (Extract from an article in "Popular Science Review," Vol. V. p. 18, by Professor Seemann, Ph.D., F.L.S., P.A.S.)

Haeckel, who fully accepts the reality of a former Lemuria, also regards the Australians as direct descendants of the Lemurians. "Persistent forms (of both his Lemurian stems.) are in all probability still surviving . . . Papuans and Hottentots . . . Australians . . . one division of the Malays."

[[End of Columns]]

With regard to a former civilization, of which a portion of these degraded Australians are the last surviving offshoot, the opinion of Gerland is strongly suggestive. Commenting upon the religion and mythology of the tribes, he writes, "The statement that the Australian civilization (?) indicates a higher grade, is nowhere more clearly proved than here, where everything resounds like the expiring voices of a previous and richer age. The idea that the Australians have no religion or mythology is thoroughly false. But this religion is certainly quite deteriorated." (Cited in Schmidt's "Doctrine of Descent of Darwinism," pp. 301-2.) As to his other statement, namely, that the Australians are a "division of the Malays" (Vide his ethnological theories in the "Pedigree of Man"), Haeckel is in error, if he classes the Australians with the rest. The Malays and Papuans are a mixed stock, resulting from the intermarriages of the low Atlantean sub-races with the Seventh sub-race of the Third Root-Race. Like the Hottentots, they are of indirect Lemuro-Atlantean descent. It is a most suggestive fact -- to those concrete thinkers who demand a physical proof of Karma -- that the lowest races of men are now rapidly dying out; a phenomenon largely due to an extraordinary sterility setting in among the women, from the time that they were first approached by the Europeans. A process of decimation is taking

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Philosophy," Vol. II., p. 304). Prof. Lefevre, again, gives us as his estimate 100,000 years. Clearly, then, if modern Science is unable to estimate the date of so comparatively recent an era as the Glacial Epoch, it can hardly impeach the Esoteric Chronology of Race-Periods and Geological Ages.

[[Vol. 2, Page]] 780 THE SECRET DOCTRINE.

place all over the globe, among those races, whose "time is up" -- among just those stocks, be it remarked, which esoteric philosophy regards as the senile representatives of lost archaic nations. It is inaccurate to maintain that the extinction of a lower race is invariably due to cruelties or abuses perpetrated by colonists. Change of diet, drunkenness, etc., etc., have done much; but those who rely on such data as offering an all-sufficient explanation of the crux, cannot meet the phalanx of facts now so closely arrayed. "Nothing," says even the materialist Lefevre, "can save those that have run their course. . . . It would be necessary to extend their destined cycle. . . . The peoples that have been most spared . . . Hawaiians or Maories, have been no less decimated than the tribes massacred or tainted by European intrusion." ("Philosophy," p. 508.)

True; but is not the phenomenon here confirmed of the operation of CYCLIC LAW difficult to account for on materialist lines? Whence the "destined cycle" and the order here testified to? Why does this (Karmic) sterility attack and root out certain races at their "appointed hour"? The answer that it is due to a "mental disproportion" between the colonizing and aboriginal races is obviously evasive, since it does not explain the sudden "checks to fertility" which so frequently supervene. The dying out of the Hawaiians, for instance, is one of the most mysterious problems of the day. Ethnology will sooner or later have to recognize with Occultists that the true solution has to be sought for in a comprehension of the workings of Karma. As Lefevre remarks, "the time is drawing near when there will remain nothing but three great human types" (before the Sixth Root-Race dawns), the white (Aryan, Fifth Root-Race), the yellow, and the African negro -- with their crossings (Atlanto-European divisions). Redskins, Eskimos, Papuans, Australians, Polynesians, etc., etc. -- all are dying out. Those who realize that every Root-Race runs through a gamut of seven sub-races with seven branchlets, etc., will understand the "why." The tide-wave of incarnating EGOS has rolled past them to harvest experience in more developed and less senile stocks; and their extinction is hence a Karmic necessity. Some extraordinary and unexplained statistics as to Race extinction are given in de Quatrefages' "Human Species," p. 428 et seq. No solution, except on the occult lines, is able to account for these.

But we have digressed from our direct subject. Let us hear now what Professor Huxley has to say on the subject of former Atlantic and Pacific Continents.

He writes in "NATURE," Nov. 4th, 1880: "There is nothing, so far as I am aware, in the biological or geological evidence at present accessible, to render untenable the hypothesis that an area of the mid-

[[Vol. 2, Page]] 781 TRADITION AS TRUE AS HISTORY.

Atlantic or Pacific sea-bed as big as Europe, should have been uplifted as high as Mont Blanc, and have subsided again, any time since the Palaeozoic epoch, if there were any grounds for entertaining it."

That is to say, then, that there is nothing which can militate against positive evidence to the fact; nothing, therefore, against the geological postulates of the Esoteric Philosophy. Dr. Seemann assures us in the "Popular Science Review" (Vol. V., p. 18), article "Australia and Europe formerly one Continent,"* that:--

"The facts which botanists have accumulated for reconstructing these lost maps of the globe are rather comprehensive; and they have not been backward in demonstrating the former existence of large tracts of solid land in parts now occupied by the great oceans. The many striking points of contact between the present flora of the United States and Eastern Asia, induced them to assume that, during the present order of things, there existed a continental connection between South-Eastern Asia and Western America. The singular correspondence of the present flora of the Southern United States with that of the lignite flora of Europe induces them to believe that, in the Miocene period, Europe and America were connected by a land passage, of which Iceland, Madeira, and the other Atlantic islands are remnants; that, in fact, the story of an Atlantis, which an Egyptian priest told to Solon, is not purely fictitious, but rests on a solid historical basis. . . . Europe of the Eocene period received the plants which spread over mountains and plains, valleys and river-banks (from Asia generally), neither exclusively from the South nor from the East. The west also furnished additions, and if at that period these were rather meagre, they show, at all events, that the bridge was already building, which, at a late period, was to facilitate communication between the two continents in such a remarkable manner. At that time some plants of the Western Continent began to reach Europe by means of the island of Atlantis, then probably just rising (?) above the ocean."

And in another number of the same review (Vol. I., p. 143) Mr. Duppa Crotch, M.A., F.L.S., in an article entitled "The Norwegian Lemming and its Migrations," alludes to the same subject.

"Is it probable that land could have existed where now the broad Atlantic rolls? All tradition says so: old Egyptian records speak of Atlantis, as Strabo and others have told us. The Sahara itself is the sand of an ancient sea, and the shells which are found upon its surface

[[Footnote(s)]] -----

* Undoubtedly a fact and a confirmation of the esoteric conception of the Lemuria which originally not only embraced great areas in the Indian and Pacific oceans, but projected round South Africa into the North Atlantic. Its Atlantic portion subsequently became the geological basis of the future home of the Fourth Race Atlanteans.

[[Vol. 2, Page]] 782 THE SECRET DOCTRINE.

prove that, no longer ago than the Miocene period, a sea rolled over what is now desert. The voyage of the 'Challenger' has proved the existence of three long ridges* in the Atlantic Ocean,** one extending for more than three thousand miles, and lateral spurs may, by connecting these ridges, account for the marvellous similarity of the fauna of the Atlantic islands.*** . . . The submerged continent of LEMURIA, in what is now the Indian Ocean, is considered to afford an explanation of many difficulties in the distribution of organic life, and, I think, the existence of a MIOCENE ATLANTIS will be found to have a strong elucidative bearing on subjects of greater interest [Truly So!] than the migration of the lemming. At all events, if it can be shown that land existed in former ages where the North Atlantic now rolls, not only is a motive found for these apparently suicidal migrations, but also a strong collateral proof that what we call instincts are but the blind and sometimes even prejudicial inheritance of previously acquired experiences."

(At certain periods, we learn, multitudes of these animals swim to sea and perish. Coming, as they do, from all parts of Norway, the powerful instinct which survives throughout ages as an inheritance from their progenitors impels them to seek a continent, once existing but now submerged beneath the ocean, and to court a watery grave.)

In an article containing a criticism of Mr. A. R. Wallace's "Island Life" -- a work devoted largely to the question of the distribution of animals, etc. -- Mr. Starkie Gardiner writes ("Subsidence and Elevation," Geological Magazine, June, 1881):--

"By a process of reasoning supported by a large array of facts of different kinds, he arrives at the conclusion that the distribution of life upon the land as we now see it, has been accomplished without the aid of important changes in the relative positions of continents and seas. Yet if we accept his views, we must believe that Asia and Africa, Madagascar and Africa, New Zealand and Australia, Europe and America, have been united at some period not remote geologically, and that seas to the depth of 1,000 fathoms have been bridged over; but we must treat as utterly gratuitous and entirely opposed to

[[Footnote(s)]] -----

* Cf. the published reports of the "Challenger" expedition; also Donnelly's "Atlantis," p. 468 and pp. 46-56, chap. "The Testimony of the Sea."

** Even the cautious Lefevre speaks of the existence of Tertiary men on "upheaved lands, islands and continents then flourishing, but since submerged beneath the waters," and elsewhere introduces a "possible Atlantis" to explain ethnological facts. Cf. his "Philosophy," Eng. Ed., pp. 478 and 504. Mr. Donnelly remarks with rare intuition that "modern civilization is Atlantean . . . the 'inventive' faculty of the present age is taking up the delegated work of Creation where Atlantis left it thousands of years ago" (Atlantis, p. 133). He also refers the origin of culture to the Miocene times. It is, however, to be sought for in the teachings given to the Third Race-men by their Divine Rulers -- at a vastly earlier period.

*** An equally "curious" similarity is traced between some of the West Indian and West African fauna.

[[Vol. 2, Page]] 783 ATLANTIS, NECESSARY TO ETHNOLOGY.

all the evidences at our command (!!), the supposition that temperate Europe and temperate America, Australia, and South America, have ever been connected except by way of the Arctic or Antarctic circles and that lands now separated by seas of more than 1,000 fathoms depth have ever been united. Mr. Wallace, it must be admitted, has succeeded in explaining the chief features of existing life-distribution, without bridging the Atlantic or Pacific, except towards the Poles, yet I cannot help thinking that some of the facts might perhaps be more easily explained by admitting the former existence of the connection between the coast of Chile and Polynesia* and Great Britain and Florida, shadowed by the submarine banks which stretch between them. Nothing is urged that renders the more direct connection impossible, and no physical reason is advanced why the floor of the ocean should not be upheaved from any depth. The route by which (according to the anti-Atlantean and Lemurian hypotheses of Wallace) the floras of South America and Australia are supposed to have mingled, is beset by almost insurmountable obstacles, and the apparently sudden arrival of a number of sub-tropical American plants in our Eocene flora, necessitates a connection more to the south than the present 1,000 fathom line . . . forces are unceasingly acting, and there is no reason why an elevating force once set in action in the centre of an ocean should cease to act until a continent is formed. They have acted and lifted out from the sea, in comparatively recent geological times, the loftiest mountains on earth. Mr. Wallace himself admits repeatedly that sea-beds have been elevated 1,000 fathoms and islands have risen up from the depths of 3,000 fathoms; and to suppose that the upheaving forces are limited in power, is, it seems to me, 'utterly gratuitous and entirely opposed to all the evidences at our command.'

The "Father" of English Geology -- Sir Charles Lyell -- was an Uniformitarian in his views of continental formation. On page 492 of his "Antiquity of Man" we find him saying:--

"Professor Unger (Die versunkene Insel Atlantis) and Heer (Flora Tertiaria Helvetiae) have admitted on botanical grounds the former existence of an Atlantic Continent during some part of the Tertiary Period, as affording the only plausible explanation that can be imagined of the analogy between the Miocene flora of central Europe, and the existing flora of Eastern America. Professor Oliver, on the other hand, after showing how many of the American types found fossil in Europe are common to Japan, inclines to the theory, first advanced by Dr. Asa Gray, that the migration of species, to which the community of types in the Eastern States of North America, and the Miocene flora of Europe is due, took place when there was an overland communication from America to central Asia between the fiftieth and sixtieth parallels of latitude, or south of Behring Straits, following the direction of the Aleutian islands. By this course they may have made their way, at any epoch, Miocene, Pliocene, or Pleistocene, antecedently to the Glacial Epoch, to Amoorland, on the East coast of North Asia."

The unnecessary difficulties and complications here incurred in order to avoid the hypothesis of an Atlantic Continent, are really too

[[Footnote(s)]] -----

* The Pacific portion of the giant Lemurian Continent christened by Dr. Carter Blake, the anthropologist, "Pacifcus."

[[Vol. 2, Page]] 784 THE SECRET DOCTRINE.

apparent to escape notice. If the botanical evidences stood alone, scepticism would be half legitimate; but in this case all branches of science converge to one point. Science has made blunders, and has exposed itself to greater errors than the admission of our two now invisible continents, would lay it open to. It has denied even the undeniable, from the days of the mathematician Laplace down to our own, and that only a few years ago.* We have Professor Huxley's authority for saying that there is no a priori improbability whatever against possible evidences supporting the belief. (Vide supra.) But now that the POSITIVE EVIDENCE is brought forward, will that eminent scientist admit the corollary?

Touching on the problem in another place ("Principles of Geology," pp. 12-13), Sir Charles Lyell tells us: "Respecting the cosmogony of the Egyptian priests, we gather much information from writers of the Grecian sects, who borrowed almost all their tenets from Egypt, and amongst others that of the former successive destruction and renovation of the world. (Continental, not cosmic, catastrophes.) We learn from Plutarch that this was the theme of one of the hymns of Orpheus, so celebrated in the fabulous ages of Greece. It was brought by him from the banks of the Nile; and we even find in his verses, as in the Indian systems, a definite period assigned for the duration of every successive World. The returns of great catastrophes were determined by the present period of the Magnus Annus, or great year -- a cycle composed of the revolutions of the sun, moon, and planets, and terminating when these return together to the sign whence they were supposed at some remote epoch to set out. We learn particularly from the Timaeus of Plato that the Egyptians believed the world to be subject to occasional conflagrations and deluges. The sect of the Stoics adopted most fully the system of catastrophes destined at intervals to destroy the world. These, they taught, were of two kinds -- the cataclysm, or destruction by water, and the Ecpyrosis, or destruction by fire (submarine volcanoes). From the Egyptians they derived the doctrine of the gradual debasement of man from a state of innocence" (nascent simplicity of the first sub-races of each Root-Race). "Towards the

[[Footnote(s)]] -----

* When Howard read, before the Royal Society of London, a paper on the first serious researches that were made on the aerolites, the Geneva naturalist Pictet, who was present, communicated, on his return to Paris, the facts reported to the French Academy of Sciences. But he was forthwith interrupted by Laplace, the great astronomer, who cried: "Stop! we have had enough of such fables, and know all about them," thus making Pictet feel very small. Globular-shaped lightnings or thunderbolts have been admitted by Science only since Arago demonstrated their existence, says de Rochat ("Forces non-definies," p. 4): "Every one remembers Dr. Bouilland's misadventure at the Academy of Medicine when he had declared Edison's phonograph 'a trick of ventriloquism!'"

[[Vol. 2, Page]] 785 ASTRAEA FALLS ON HER HEAD.

termination of each era the gods could no longer bear with the wickedness of man, and a shock of the elements, or a deluge, overwhelmed them; (vide degeneracy into magical practices and gross animality of the Atlanteans) after which calamity, Astraea again descended on the earth to renew the golden age." (Dawn of a new Root-Race.)

Astraea, the goddess of justice, is the last of the deities to forsake the earth, when the gods are said to abandon it and be taken up into heaven by Jupiter again. But, no sooner does Zeus carry away from earth Ganymedes (the object of lust, personified) than the father of the gods throws down Astraea back on the earth again, on which she falls upon her head. Astraea is Virgo, the constellation of the Zodiac. Astronomically it has a very plain significance, and one which gives the Key to the occult meaning. But it is inseparable from Leo, the sign that precedes it, and from the Pleiades and their sisters, the Hyades, of which Aldebaran is the brilliant leader. All of these are connected with the periodical renovations of the earth, with regard to its continents -- even Ganymedes, who in astronomy is Aquarius. It was already shown that while the South Pole is the pit (or the infernal regions figuratively and cosmologically), the North Pole is geographically the first continent; while astronomically and metaphorically the celestial pole, with its pole star in heaven, is Meru, or the seat of Brahma, the throne of Jupiter, etc. For in the age when the gods forsook the earth and were said to ascend into heaven, the ecliptic had become parallel with the meridian, and part of the Zodiac appeared to descend from the north pole to the north horizon. Aldebaran was in conjunction then with the Sun, as it was 40,000 years ago, at the great festival in commemoration of that Magnus Annus, of which Plutarch was speaking. Since that year (40,000 years ago) there has been a retrograde motion of the equator, and about 31,000 years ago Aldebaran was in conjunction with the vernal equinoctial point. The part assigned to Taurus, even in Christian mysticism, is too well known to need repetition. The famous Orphic hymn on the great periodical cataclysm divulges the whole esotericism of the event. Pluto (in the pit) carries off Eurydice, bitten by the (polar) serpent. Then Leo, the lion, is vanquished. Now, when the Lion is in the pit, or below the south pole, then Virgo, as the next sign, follows him, and when her head, down to the waist, is below the South horizon -- she is inverted. On the other hand, the Hyades are the rain or Deluge constellations; and Aldebaran (he who follows, or succeeds the daughters of Atlas, or the Pleiades) looks down from the eye of Taurus. It is from this point of the ecliptic that the calculations of the new cycle were commenced. The student has to remember also, that when Ganymedes (Aquarius) is raised to

[[Vol. 2, Page]] 786 THE SECRET DOCTRINE.

heaven (or above the horizon of the North Pole) Virgo or Astraea, who is Venus-Lucifer, descends head downwards below the horizon of the South Pole, or the pit; which pit, or the pole, is also the Great Dragon, or the Flood. Let the student exercise his intuition by placing these facts together; no more can be said.

"The connection," comments Lyell, "between the doctrine of successive catastrophes and repeated deteriorations in the moral character of the human race, is more intimate and natural than might at first be imagined. For, in a rude state of society, all great calamities are regarded by the people as judgments of God on the wickedness of man. . . . In like manner in the account given to Solon by the Egyptian priests of the submersion of the island of Atlantis under the waters of the ocean, after repeated shocks of an earthquake, we find that the event happened when Jupiter had seen the moral depravity of the inhabitants."

True; but was it not owing to the fact that all esoteric truths were given out to the public by the Initiates of the temples under the guise of allegories? "Jupiter," is merely the personification of that immutable Cyclic Law, which arrests the downward tendency of each Root-Race, after attaining the zenith of its glory.* Unless we hold with Prof. John Fiske's singularly dogmatic opinion** that every myth "is an explanation by the uncivilized mind, of some natural phenomenon; not an allegory, not an esoteric symbol, for the ingenuity is wasted (!!) which strives to detect in myths the remnants of a refined primeval science -- but an explanation. Primitive men had no profound science to perpetuate by means of allegory [How does Mr. Fiske know?], nor were they such sorry pedants as to talk in riddles when plain language would serve their purpose." We venture to say the language of the Initiated few was far more "plain," and their science-philosophy far more com-

[[Footnote(s)]] -----

* The Cyclic Law of Race-Evolution is most unwelcome to scientists. It is sufficient to mention the fact of "primeval civilization" to excite the frenzy of Darwinians; it being obvious that the further culture and science is pushed back, the more precarious becomes the basis of the ape-ancestor theory. But as Jaccoliot says:-- "Whatever there may be in these traditions (submerged continents, etc.), and whatever may have been the place where a civilization more ancient than that of Rome, of Greece, of Egypt, and of India, was developed, it is certain that this civilization did exist, and it is highly important for Science to recover its traces, however feeble and fugitive they be." (Histoire des Vierges; les peuples et les continents disparus, p. 15.) Donnelly has proved the fact from the clearest premises, but the Evolutionists will not listen. A Miocene civilization upsets the "universal stone-age" theory, and that of a continuous ascent of man from animalism! And yet Egypt, at least, runs counter to current hypotheses. There is no stone-age visible there, but a more glorious culture is apparent, the further back we are enabled to carry our retrospect. (Verb. Sap.)

** "Myths and Myth-Makers," p. 21.

[[Vol. 2, Page]] 787 INGENIOUS EXPLANATIONS.

prehensive and satisfying alike to the physical and spiritual wants of man, than even the terminology and system respectively elaborated by Mr. Fiske's Master -- Herbert Spencer. What, however, is Sir Charles Lyell's "explanation" of the "myth"? Certainly, he in no way countenances the idea of its "astronomical" origin, as asserted by some writers.

The two interpreters are entirely at variance with one another. Lyell's solution is as follows. A disbeliever in cataclysmal changes, from the absence (?) of any reliable historical data on the point, as well as from a strong bias to the Uniformitarian conceptions of geologic changes,* he attempts to trace the Atlantis "tradition" to the following sources:--

- (1) Barbarous tribes connect catastrophes with an avenging God, who is assumed in this way to punish immoral races.
- (2) Hence the commencement of a new race is logically a virtuous one.
- (3) The primary source of the geologic basis of the tradition was Asia -- a continent subject to violent earthquakes. Exaggerated accounts would thus be handed down the ages.
- (4) Egypt, being herself free from earthquakes, nevertheless based her not inconsiderable geologic knowledge on these cataclysmal traditions.

An ingenious "explanation," as all such are. But proving a negative is proverbially a difficult task. Students of esoteric science, who know what the resources of the Egyptian priesthood really were, need no such laboured hypothesis. Moreover, while an imaginative theorist is always able to furnish a reasonable solution of problems which, in one branch of science, seem to necessitate the hypothesis of periodical cataclysmic changes on the surface of our planet, the impartial critic, who is not a

[[Footnote(s)]] -----

* Violent minor cataclysms and colossal earthquakes are recorded in the annals of most nations -- if not of all. Elevation and subsidence of continents is always in progress. The whole coast of South America has been raised up 10 to 15 feet and settled down again in an hour. Huxley has shown that the British islands have been four times depressed beneath the ocean and subsequently raised again and peopled. The Alps, Himalayas and Cordilleras were all the result of depositions drifted on to sea-bottoms and upheaved by Titanic forces to their present elevation. The Sahara was the basin of a Miocene sea. Within the last five or six thousand years the shores of Sweden, Denmark and Norway have risen from 200 to 600 feet; in Scotland there are raised beaches with outlying stacks and skerries surmounting the shore now eroded by the hungry wave. The North of Europe is still rising from the sea and South America presents the phenomenon of raised beaches of over 1,000 miles in length, now at a height varying from 100 to 1,300 feet above the sea-level. On the other hand, the coast of Greenland is sinking fast, so much so that the Greenlander will not build by the shore. All these phenomena are certain. Why may not a gradual change have given place to a violent cataclysm in remote epochs? -- such cataclysms occurring on a minor scale even now (e.g., the case of Sunda island with 80,000 Malays).

[[Vol. 2, Page]] 788 THE SECRET DOCTRINE.

specialist, will recognise the immense difficulty of explaining away the cumulative evidences, -- namely, the archaeological, ethnological, geological, traditional, botanical, and even biological -- in favour of former continents now submerged. When each science is fighting for its own hand, the cumulative force of the evidence in its collectivity is almost invariably lost sight of.

In the "Theosophist" (August, 1880), we wrote: "We have as evidences the most ancient traditions of various and wide-separated peoples -- legends in India, in ancient Greece, Madagascar, Sumatra, Java, and all the principal isles of Polynesia, as well as the legends of both Americas. Among savages; and in the traditions of the richest literature in the world -- the Sanskrit literature of India -- there is an agreement in saying, that, ages ago, there existed in the Pacific Ocean, a large Continent, which by a geological cataclysm was engulfed by the sea,* (Lemuria). And it is our firm belief . . . that most, if not all, of the islands from the Malayan archipelago to Polynesia, are fragments of that once immense submerged Continent. Both Malacca and Polynesia, which lie at the two extremities of the ocean, and which, since the memory of man never had, and never could have any intercourse with, or even a knowledge of each other, have yet a tradition common to all the islands and islets, that their respective countries extended far, far into the Sea: that there were in the world but two immense continents, one inhabited by yellow, the other by dark men; and that the Ocean, by command of the gods, and to punish them for their incessant quarrelling, swallowed them up. Notwithstanding the geographical proof that New Zealand, the Sandwich and Easter Islands, are at a distance from each other of between

800 and 1,000 leagues, and that, according to every testimony, neither these nor any other intermediate islands, for instance, the Marquesan, Society, Fiji, Tahitian, Samoan, and other islands, could, since they became islands, ignorant as their people were of the compass, have communicated with each other before the arrival of Europeans; yet they one and all maintain that their respective countries extended far toward the West, on the Asian side. Moreover, with very small differences, they all speak dialects evidently of the same language; and understand each other with little difficulty; have the same religious beliefs and superstitions; and pretty much the same customs. And as few of the Polynesian islands were discovered earlier than a century ago, the Pacific Ocean itself being unknown to Europe till the days of Columbus, and as these islanders have never ceased repeating the same old traditions since the Europeans first set

[[Footnote(s)]] -----

* For the opinions of Jacolliot, after long travels through the Polynesian Islands and his proofs of a former great geological cataclysm in the Pacific Ocean, see his "Histoire des Vierges: Peuples et Continents disparus," p. 308.

[[Vol. 2, Page]] 789 HAECKEL FOR ONCE IS RIGHT.

foot on their shores, it seems to us a logical inference that our theory is nearer to the truth than any other. "Chance would have to change its name and meaning, were all this due but to chance alone."

"A great series of animal-geographical facts," declares Professor Schmidt, writing in defence of the hypothesis of a former Lemuria, "is explicable only on the theory of the former existence of a Southern Continent of which Australia is a remnant. . . . " [the distribution of species] "points to the vanished land of the South where perhaps the home of the progenitors of the Maki of Madagascar may also be looked for."*

Mr. A. R. Wallace, in his "Malay Archipelago," arrives at the following conclusion after a review of the mass of evidence at hand:-- "The inference that we must draw from these facts is undoubtedly that the whole of the islands eastwards beyond Borneo and Sumatra do essentially form part of a former Australian or Pacific Continent . . . This continent must have been broken up before the extreme south-eastern portion of Asia was raised above the waters of the ocean, for a great part of the land of Borneo and Java is known to be geologically of quite recent formation."

According to Haeckel:-- "Southern Asia itself was not the earliest cradle of the human race, but Lemuria, a continent that lay to the South of Asia, and sank later on beneath the surface of the Indian Ocean." ("Pedigree of Man," Eng. Trans. p. 73.) In one sense Haeckel is right as to Lemuria -- the "cradle of the Human race." That continent was the home of the first physical Human Stock -- the later Third-Race Men. Previous to that epoch the Races were far less consolidated and physiologically quite different. (Haeckel makes Lemuria extend from Sunda Island to Africa and Madagascar and eastwards to Upper India.)

Professor Rutimeyer, the eminent Palaeontologist, asks:-- "Need the conjecture that the almost exclusively graminivorous and insectivorous marsupials, sloths, armadilloes, ant-eaters and ostriches, once possessed an actual point of union in a Southern Continent of which the present flora of Terra del Fuego and Australia must be the remains -- need this conjecture raise difficulties at a moment when from their fossil remains, Heer restores to sight the ancient forests of Smith's Sound and Spitzbergen." (Cited in Schmidt's "Doctrine of Descent and Darwinism," p. 237.)

Having now dealt generally with the broad scientific attitude on the two questions, it will, perhaps, conduce to an agreeable brevity, if we sum up the more striking isolated facts in favour of that fundamental contention of Esoteric Ethnologists -- the reality of Atlantis. Lemuria

[[Footnote(s)]] -----

* "Doctrine of Descent and Darwinism," p. 236. (Cf. also his lengthy arguments on the subject, pp. 231-7.)

[[Vol. 2, Page]] 790 THE SECRET DOCTRINE.

is so widely accepted, that further pursuit of the subject is unnecessary. With regard, however, to the former, it is found that:--

(1) The Miocene flora of Europe have their most numerous and striking analogues in the flora of the United States. In the forests of Virginia and Florida are found the magnolias, tulip-trees, evergreen oaks, plane trees, etc., etc., etc., which correspond with European Tertiary flora term for term. How was the migration effected, if we exclude the theory of an Atlantic Continent bridging the ocean between America and Europe? The proposed "explanation" to the effect that the transition was by way of Asia and the Aleutian islands is a mere uncalled-for theory, obviously upset by the fact that a large number of these flora only appear EAST of the Rocky Mountains. This also negatives the idea of a trans-Pacific migration. They are now superseded by European continents and islands to the North.

(2) Skulls exhumed on the banks of the Danube and Rhine bear a striking similarity to those of the Caribs and Old Peruvians (Littre). Monuments have been exhumed in Central America, which bear representations of undoubted negro heads and faces. How are such facts to be accounted for except on the Atlantean hypothesis? What is now N. W. Africa was once connected with Atlantis by a network of islands, few of which now remain.

(3) According to Farrar ("Families of Speech") the "isolated language" of the Basques has no affinities with the other languages* of Europe, but with "the aboriginal languages of the vast opposite continent (America) and those alone." Professor Broca is also of the same opinion.

Palaeolithic European man of the Miocene and Pliocene times was a pure Atlantean, as we have previously stated. The Basques are, of course, of a much later date than this, but their affinities, as here shown, go far to prove the original

extraction of their remote ancestors. The "mysterious" affinity between their tongue and that of the Dravidian races of India will be understood by those who have followed our outline of continental formations and shiftings.

(4) Stones have been found in the Canary Islands bearing sculptured symbols similar to those found on the shore of Lake Superior. Berthollet was induced

[[Footnote(s)]] -----

* For further facts as to the isolation of the Basques in Europe and their ethnological relations, cf. Joly, "Man before Metals," p. 316. B. Davis is disposed to concede, from an examination of the skulls of the Guanches of the Canary Islands and modern Basques, that both belong to a race proper to those ancient islands, of which the Canaries are the remains!! This is a step in advance indeed. De Quatrefages and Hamy also both assign the Cro-Magnon men of South France and the Guanches to one type -- a proposition which involves a certain corollary which both these writers may not care to father.

[[Vol. 2, Page]] 791 FINAL AND IRREFUTABLE EVIDENCE.

by such evidence to postulate the unity of race of the early men of Canary Islands and America (Cf. Benjamin, the "Atlantic Islands," p. 130.)

The Guanches of the Canary Islands were lineal descendants of the Atlanteans. This fact will account for the great stature evidenced by their old skeletons, as well as by those of their European congeners the Cro-Magnon Palaeolithic men.

(5) Any experienced mariner has but to navigate the fathomless ocean along the Canary Islands to ask himself the question when or how that group of volcanic and rocky little islands has been formed, surrounded on every side by that vast watery space. Such frequent questions led finally to the expedition of the famous Leopold von Buch, which took place in the first quarter of the present century. Some geologists maintained that the volcanic islands had been raised right from the bottom of the ocean, the depth of which in the immediate vicinity of the island varies from 6,000 to 18,000 feet. Others were inclined to see in these groups, including Madeira, the Azores, and the islands of Cape de Verdes -- the remnants of a gigantic but submerged continent which had once united Africa with America. The latter men of science supported their hypothesis by a mass of evidence in its favour, drawn from ancient "myths." Hoary "superstitions," such as the fairy-like Atlantis of Plato, the Garden of Hesperides, Atlas supporting the world on his shoulders, all of them mythoi connected with the peak of Teneriffe, did not go far with sceptical Science. The identity of animal and vegetable species -- showing either a previous connection between America and the remaining groups of the islands -- (the hypothesis of their having been drifted from the New to the Old World by the waves was too absurd to stand long) -- found more serious consideration. But it is only quite lately, and after Donnelly's book had been published several years, that the theory has greater chances than ever of becoming an accepted fact. Fossils found on the Eastern Coast of South America have now been proved to belong to the Jurassic formations, and are nearly identical with the Jurassic fossils of Western Europe and Northern Africa. The geological structure of both coasts is also almost identical; the resemblance between the smaller marine animals dwelling in the more shallow waters of South America, the Western African, and the South European coasts, is also very great. All such facts are bound to bring naturalists to the conclusion that there has been, in distant pre-historic ages, a continent which extended from the coast of Venezuela, across the Atlantic Ocean, to the Canarese Islands and North Africa, and from Newfoundland nearly to the coast of France.

(6) The great resemblance between the Jurassic fossils of South

[[Vol. 2, Page]] 792 THE SECRET DOCTRINE.

America, North Africa, and Western Europe is a striking enough fact in itself, and admits of no explanation, unless the ocean is bridged with an Atlantis. But why, also, is there so marked a similarity between the fauna (animal life) of the -- now -- isolated Atlantic islands? Why did the specimens of Brazilian fauna dredged up by Sir C. Wyville Thompson resemble those of Western Europe? Why does a resemblance exist between many of the West African and West Indian animal groups? Again:

"When the animals and plants of the Old and New World are compared, one cannot but be struck with their identity; all, nearly all belong to the same genera, while many, even of the species, are common to both continents . . . indicating that they radiated from a common centre" (Atlantis), ("Westminster Review," Jan., 1872).

The horse, according to Science, originated in America. At least, a large proportion of the once "missing links" connecting it with inferior forms have been exhumed from American strata. How did the horse penetrate into Europe and Asia, if no land communication bridged the oceanic interspaces? Or if it is asserted that the horse originated in the New World, how did such forms as the hipparion, etc., get into America in the first instance on the migration hypothesis?

Again "Buffon had . . . remarked in the repetition of the African in the American fauna, how, for example, the lama is a juvenescent and feeble copy of the camel, and how the puma of the New represented the lion of the Old World" (Schmidt, "Doctrine of Descent and Darwinism," p. 223).

(7) The following quotation runs with No. (2), but its significance is such and the writer cited so authoritative, that it deserves a place to itself:--

"With regard to the primitive dolichocephalae of America, I entertain a hypothesis still more bold, namely, that they are nearly related to the Guanches of the Canary Islands, and to the Atlantic populations of Africa, the Moors, Tuaricks, Copts, which Latham comprises under the name of Egyptian-Atlantidae. We find one and the same form of skull in the Canary Islands, in front of the African coast, and in the Carib islands, on the opposite coast which faces Africa. The colour

of the skin on both sides of the Atlantic is represented in these populations as being of a reddish-brown." (Professor Retzius, "Smithsonian Report," 1859, p. 266.)

If, then, Basques and Cro-Magnon Cave-Men are of the same race as the Canarese Guanches, it follows that the former are also allied to the aborigines of America. This is the conclusion which the independent investigations of Retzius, Virchow, and de Quatrefages necessitate. The Atlantean affinities of these three types become patent.

(8) The sea-soundings undertaken by H.M.S. "Challenger" and the "Dolphin," have established the fact that a huge elevation some 3,000 miles in length, projecting upwards from the abysmal depths of the

[[Vol. 2, Page]] 793 RECENT SUGGESTIVE DISCOVERIES.

Atlantic, extends from a point near the British Islands southwards, curving round near Cape de Verde, and running in a south-easterly direction along the West African Coast. This elevation averages some 9,000 feet in height, and rises above the waves at the Azores, Ascension, and other places. In the ocean depths around the neighbourhood of the former the ribs of a former massive piece of land have been discovered (vide investigations of United States Ship "Dolphin" and others). "The inequalities, the mountains and valleys of its surface could never have been produced in accordance with any known laws for the deposition of sediment, nor by submarine elevation; but, on the contrary, must have been carved by agencies acting above the water-level." -- (Scientific American, July 28th, 1877). It is most probable that necks of land formerly existed knitting Atlantis to South America, somewhere above the mouth of the Amazon; to Africa near Cape de Verde, while a similar point of juncture with Spain is not unlikely, as contended for by Donnelly. (Vide his chart, "Atlantis," p. 47, Eng. Ed., 1884, though he deals with only a fragment of the real continent.) Whether the latter existed or not, is of no consequence, as the fact that (what is now) N. W. Africa was -- before the elevation of the Sahara and the rupture of the Gibraltar connection -- an extension of Spain. Consequently no difficulty can be raised as to how the migration of the European fauna (etc.) took place.

Enough has now been said from the purely scientific standpoint, and it is needless, in view of the manner in which the subject has now been developed on the lines of esoteric knowledge, to swell the mass of testimony further. In conclusion, the words of one of the most intuitive writers of the day may be cited as admirably illustrative of the opinions of the occultist, who awaits in patience the dawn of the coming day:--

"We are but beginning to understand the past; one hundred years ago the world knew nothing of Pompeii or Herculaneum; nothing of the lingual tie that binds together the Indo-European nations; nothing of the significance of the vast volume of inscriptions upon the tombs and temples of Egypt; nothing of the meaning of the arrow-headed inscriptions of Babylon; nothing of the marvellous civilizations revealed in the remains of Yucatan, Mexico, and Peru. We are on the threshold. Scientific investigation is advancing with giant strides. Who shall say that one hundred years from now, the great museums of the world may not be adorned with gems, statues, arms, and implements from Atlantis, while the libraries of the world shall contain translations of its inscriptions, throwing new light upon all the past history of the human race, and all the great problems which now perplex the thinkers of to-day."*

[[Footnote(s)]] -----

* Donnelly, "Atlantis; the Ante-Diluvian World," p. 480.

[[Vol. 2, Page]] 794 THE SECRET DOCTRINE.

And now to conclude.

We have concerned ourselves with the ancient records of the nations, with the doctrine of chronological and psychic cycles, of which these records are the tangible proof; and with many other subjects, which may, at first sight, seem out of place in this volume.

But they were necessary in truth. In dealing with the secret annals and traditions of so many nations, whose very origins have never been ascertained on more secure grounds than inferential suppositions, in giving out the beliefs and philosophy of more than prehistoric races, it is not quite as easy to deal with the subject matter as it would be if only the philosophy of one special race, and its evolution, were concerned. The Secret Doctrine is the common property of the countless millions of men born under various climates, in times with which History refuses to deal, and to which esoteric teachings assign dates incompatible with the theories of Geology and Anthropology. The birth and evolution of the Sacred Science of the Past are lost in the very night of Time; and that, even, which is historic -- i.e., that which is found scattered hither and thither throughout ancient classical literature -- is, in almost every case, attributed by modern criticism to lack of observation in the ancient writers, or to superstition born out of the ignorance of antiquity. It is, therefore, impossible to treat this subject as one would the ordinary evolution of an art or science in some well-known historical nation. It is only by bringing before the reader an abundance of proofs all tending to show that in every age, under every condition of civilization and knowledge, the educated classes of every nation made themselves the more or less faithful echoes of one identical system and its fundamental traditions -- that he can be made to see that so many streams of the same water must have had a common source from which they started. What was this source? If coming events are said to cast their shadows before, past events cannot fail to leave their impress behind them. It is, then, by those shadows of the hoary Past and their fantastic silhouettes on the external screen of every religion and philosophy, that we can, by checking them as we go along, and comparing them, trace out finally the body that produced them. There must be truth and fact in that which every people of antiquity accepted and made the foundation of its religions and its faith. Moreover, as Haliburton said, "Hear one side, and you will be in the dark; hear both sides, and all will be clear." The public has hitherto had access to, and heard but one side -- or rather the two one-sided views of two diametrically opposed classes of men, whose prima facie propositions or respective premises differ widely, but whose final conclusions are the same -- Science and Theology. And now our

readers have an opportunity to hear the other -- the defendants' -- justification on and learn the nature of our arguments.

Were the public to be left to its old opinions: namely, on one side, that Occultism, Magic, the legends of old, etc., were all the outcome of ignorance and superstition; and on the other, that everything outside the orthodox groove was the work of the devil, what would be the result? In other words, had no theosophical and mystic literature obtained a hearing for the few last years, the present work would have had a poor chance of impartial consideration. It would have been proclaimed -- and by many will still be so proclaimed -- a fairy tale woven out of abstruse problems, poised in, and based on the air; built of soap bubbles, bursting at the slightest touch of serious reflection, with no foundation, as it would be alleged, to stand upon. Even "the ancient superstitious and credulous classics" have no word of reference to it in clear and unmistakable terms, and the symbols themselves fail to yield a hint at the existence of such a system. Such would be the verdict of all. But when it becomes undeniably proven that the claim of the modern Asiatic nations to a Secret Science and an esoteric history of the world, is based on fact; that, though hitherto unknown to the masses and a veiled mystery even to the learned, (because they never had the key to a right understanding of the abundant hints thrown out by the ancient classics), it is still no fairy tale, but an actuality -- then the present work will become but the pioneer of many more such books. The statement that hitherto even the keys discovered by some great scholars have proved too rusty for use, and that they were but the silent witnesses that there do exist mysteries behind the veil which are unreachable without a new key -- is borne out by too many proofs to be easily dismissed. An instance may be given as an illustration out of the history of Freemasonry.

In his "Franc-maçonnerie Occulte," rightly or wrongly, Ragon, an illustrious and learned Belgian Mason, reproaches the English Masons with having materialized and dishonoured Masonry, once based upon the Ancient Mysteries, by adopting, owing to a mistaken notion of the origin of the craft, the name of Free Masonry and Free Masons. The mistake is due, he says, to those who connect Masonry with the building of Solomon's Temple, deriving its origin from it. He derides the idea, and says: . . . "The Franc Mason (which is not maçon libre, or free masonry) knew well when adopting the title, that it was no question of building a wall, but that of being initiated into the ancient Mysteries veiled under the name of Francmaçonnerie (Freemasonry); that his work was only to be the continuation or the renovation of the ancient mysteries, and that he was to become a mason after the manner of Apollo or Amphion. And do not we know that the ancient initiated poets, when speaking of the foundation

of a city, meant thereby the establishment of a doctrine? Thus Neptune, the god of reasoning, and Apollo, the god of the hidden things, presented themselves as masons before Laomedon, Priam's father, to help him to build the city of Troy -- that is to say, to establish the Trojan religion." (Maçonnerie Orthodoxe, p. 44.)

Such veiled sentences with double meaning abound in ancient classical writers. Therefore, had an attempt been made to show that, e.g., Laomedon was the founder of a branch of archaic mysteries in which the earth-bound material soul (the fourth principle), was personified in Menelaus' faithless wife (the fair Helen), if Ragon had not come to corroborate what we asserted, we might be told that no classical author speaks of it, and that Homer shows Laomedon building a city, not an esoteric worship or MYSTERIES! And who are those left now, save a few Initiates, who understand the language and correct meaning of such symbolical terms?

But after having pointed to many a misconceived symbol bearing on our thesis, there still remains more than one difficulty to be overcome. Most important among several such obstacles is that of chronology. But this could hardly be helped.

Wedge in between theological chronology and that of the geologists, backed by all the materialistic Anthropologists who assign dates to man and nature which fit in with their own theories alone -- what could the writer do except what is being done? Namely, since theology places the Deluge 2448 B.C., and the World's Creation only 5890 years ago; and since the accurate researches by the methods of exact Science, have led the geologists and physicists to assign to the incrustated age of our Globe between 10 million and 1,000 million of years* (a trifling difference, verily!); and the Anthropologists to vary their divergence of opinion as to the appearance of man -- between 25,000 and 500,000 of years -- what can one who studies the Occult doctrine do, but come out and bravely present the esoteric calculations before the world?

But to do this, corroboration by even a few "historical" proofs was necessary, though all know the real value of the so-called "historical evidence." For, whether man had appeared on earth 18,000 or 18,000,000 years ago, can make no difference to profane History, since it begins hardly a couple of thousand years before our era, and since, even then, it grapples hopelessly with the clash and din of contradictory and mutually-destroying opinions around it. Nevertheless, in view of the respect the average reader has been brought up in for exact science, even that short Past would remain meaningless, unless the esoteric teachings were corroborated and supported on the spot --

[[Footnote(s)]] -----

* Vide Sir W. Thomson and Mr. Huxley.

whenever possible -- by references to historical names of a so-called historical period. This is the only guide that can be given to the beginner before he is permitted to start among the (to him) unfamiliar windings of that dark labyrinth called the pre-historic ages. This necessity has been complied with. It is only hoped that the desire to do so, which has led the writer to be constantly bringing ancient and modern evidence as a corroboration of the Archaic and quite unhistoric Past, will not bring on her the accusation of having sorely jumbled up without order or method the various and widely-separated

periods of history and tradition. But literary form and method had to be sacrificed to the greater clearness of the general exposition.

To accomplish the proposed task, the writer had to resort to the rather unusual means of dividing each volume or Book into three Parts; the first of which only is the consecutive, though very fragmentary, history of the Cosmogony and the Evolution of Man on this globe. But these two volumes had to serve as a PROLOGUE, and prepare the reader's mind for those which shall now follow. In treating of Cosmogony and then of the Anthropogenesis of mankind, it was necessary to show that no religion, since the very earliest, has ever been entirely based on fiction, as none was the object of special revelation; and that it is dogma alone which has ever been killing primeval truth. Finally, that no human-born doctrine, no creed, however sanctified by custom and antiquity, can compare in sacredness with the religion of Nature. The Key of Wisdom that unlocks the massive gates leading to the arcana of the innermost sanctuaries can be found hidden in her bosom only: and that bosom is in the countries pointed to by the great seer of the past century Emanuel Swedenborg. There lies the heart of nature, that shrine whence issued the early races of primeval Humanity, and which is the cradle of physical man.

Thus far have proceeded the rough outlines of the beliefs and tenets of the archaic, earliest Races contained in their hitherto secret Scriptural records. But our explanations are by no means complete, nor do they pretend to give out the full text, or to have been read by the help of more than three or four keys out of the sevenfold bunch of esoteric interpretation, and even this has only been partially accomplished. The work is too gigantic for any one person to undertake, far more to accomplish. Our main concern was simply to prepare the soil. This, we trust we have done. These two volumes only constitute the work of a pioneer who has forced his way into the well-nigh impenetrable jungle of the virgin forests of the Land of the Occult. A commencement has been made to fell and uproot the deadly upas trees of superstition, prejudice, and conceited ignorance, so that these two

[[Vol. 2, Page]] 798 THE SECRET DOCTRINE.

volumes should form for the student a fitting prelude for Volumes III. and IV. Until the rubbish of the ages is cleared away from the minds of the Theosophists to whom these volumes are dedicated, it is impossible that the more practical teaching contained in the Third Volume should be understood. Consequently, it entirely depends upon the reception with which Volumes I. and II. will meet at the hands of Theosophists and Mystics, whether these last two volumes will ever be published, though they are almost completed.

Satyat Nasti paro dharmah.

THERE IS NO RELIGION HIGHER THAN TRUTH.

Practical Occultism

Important to Students

As some of the letters in the CORRESPONDENCE of this month show, there are many people who are looking for practical instruction in Occultism. It becomes necessary, therefore, to state once for all: --

(a) The essential difference between theoretical and practical Occultism; or what is generally known as Theosophy on the one hand, and Occult science on the other, and: --

(b) The nature of the difficulties involved in the study of the latter.

It is easy to become a Theosophist. Any person of average intellectual capacities, and a leaning toward the metaphysical; of pure, unselfish life, who finds more joy in helping his neighbor than in receiving help himself; one who is ever ready to sacrifice his own pleasures for the sake of other people; and who loves Truth, Goodness and Wisdom for their own sake, not for the benefit they may confer -- is a Theosophist.

But it is quite another matter to put oneself upon the path which leads to the knowledge of what is good to do, as to the right discrimination of good from evil; a path which also leads a man to that power through which he can do the good he desires, often without even apparently lifting a finger.

Moreover, there is one important fact with which the student should be made acquainted. Namely, the enormous, almost limitless, responsibility assumed by the teacher for the sake of the pupil. From the Gurus of the East who teach openly or secretly, down to the few Kabalists in Western lands who undertake to teach the rudiments of the Sacred Science to their disciples -- those western Hierophants being often themselves ignorant of the danger they incur -- one and all of these "Teachers" are subject to the same inviolable law. From the moment they begin *really* to teach, from the instant they confer *any* power -- whether psychic, mental or physical -- on their pupils, they take upon themselves *all* the sins of that pupil, in connection with the Occult Sciences, whether of omission or commission, until the moment when initiation makes the pupil a Master and responsible in his turn. There is a weird and mystic religious law, greatly revered and acted upon in the Greek, half-forgotten in the Roman Catholic, and absolutely extinct in the Protestant Church. It dates from the earliest days of Christianity and has its basis in the law just stated, of which it was a symbol and an expression. This is the dogma of the absolute sacredness of the relation between the god-parents who stand sponsors for a child. (1) These tacitly take upon themselves all the sins of the newly baptized child -- (anointed, as at the initiation, a mystery truly!) -- until the day when the child becomes a responsible unit, knowing good and evil. Thus it is clear why the "Teachers" are so reticent, and why "Chelas" are required

to serve a seven years probation to prove their fitness, and develop the qualities necessary to the security of both Master and pupil.

Occultism is not magic. It is *comparatively* easy to learn the trick of spells and the methods of using the subtler, but still material, forces of physical nature; the powers of the animal soul in man are soon awakened; the forces which his love, his hate, his passion, can call into operation, are readily developed. But this is Black Magic -- *Sorcery*. For it is the motive, *and the motive alone*, which makes any exercise of power become black, malignant, or white, beneficent Magic. It is impossible to employ *spiritual* forces if there is the slightest tinge of selfishness remaining in the operator. For, unless the intention is entirely unalloyed, the spiritual will transform itself into the psychic, act on the astral plane, and dire results may be produced by it. The powers and forces of animal nature can equally be used by the selfish and revengeful, as by the unselfish and the all-forgiving; the powers and forces of spirit lend themselves only to the perfectly pure in heart -- and this is DIVINE MAGIC.

What are then the conditions required to become a student of the "Divine Sapiencia"? For let it be known that no such instruction can possibly be given unless these certain conditions are complied with, and rigorously carried out during the years of study. This is a *sine qua non*. No man can swim unless he enters deep water. No bird can fly unless its wings are grown, and it has space before it and courage to trust itself to the air. A man who will wield a two edged sword, must be a thorough master of the blunt weapon, if he would not injure himself -- or what is worse -- others, at the first attempt.

To give an approximate idea of the conditions under which alone the study of Divine Wisdom can be pursued with safety, that is without danger that Divine will give place to Black Magic, a page is given from the "private rules," with which every instructor in the East is furnished. The few passages which follow are chosen from a great number and explained in brackets.

1. The place selected for receiving instruction must be a spot calculated not to distract the mind, and filled with "influence-evolving" (magnetic) objects. The five sacred colors gathered in a circle must be there among other things. The place must be free from any malignant influences hanging about in the air.

[The place must be set apart, and used for no other purpose. The five "sacred colors" are the prismatic hues arranged in a certain way, as these colors are very magnetic. By "malignant influences" are meant any disturbances through strife, quarrels, bad feelings, etc., as these are said to impress themselves immediately on the astral light, i.e., in the atmosphere of the place, and to hang "about in the air." This first condition seems easy enough to accomplish, yet -- on further consideration, it is one of the most difficult ones to obtain.]

2. Before the disciple shall be permitted to study "face to face," he has to acquire preliminary understanding in a select company of other *lay upasaka* (disciples), the number of whom must be odd.

["Face to face," means in this instance a study independent or apart from others, when the disciple gets his instruction *face to face* either with himself (his higher, Divine Self) or -- his guru. It is then only that each receives *his due* of information, according to the use he has made of his knowledge. This can happen only toward the end of the cycle of instruction.]

3. Before thou (the teacher) shalt impart to thy *Lanoo* (disciple) the good (holy) words of LAMRIN, or shall permit him "to make ready" for *Dubjed*, thou shalt take care that his mind is thoroughly purified and at peace with all, especially *with his other Selves*. Other wise the words of Wisdom and of the good Law, shall scatter and be picked up by the winds.

["Lamrin" is a work of practical instructions, by Tson-kha-pa, in two portions, one for ecclesiastical and esoteric purposes, the other for esoteric use. "To make ready" for *Dubjed*, is to prepare the vessels used for seership, such as mirrors and crystals. The "other selves," refers to the fellow students. Unless the greatest harmony reigns among the learners, *no* success is possible. It is the teacher who makes the selections according to the magnetic and electric natures of the students, bringing together and adjusting most carefully the positive and the negative elements.]

4. The *upasaka* while studying must take care to be united as the fingers on one hand. Thou shalt impress upon their minds that whatever hurts one should hurt the others, and if the rejoicing of one finds no echo in the breasts of the others, then the required conditions are absent, and it is useless to proceed.

[This can hardly happen if the preliminary choice made was consistent with the magnetic requirements. It is known that chelas otherwise promising and fit for the reception of truth, had to wait for years on account of their temper and the impossibility they felt to put themselves *in tune* with their companions. For --]

5. The co-disciples must be tuned by the guru as the strings of a lute (*vina*), each different from the others, yet each emitting sounds in harmony with all. Collectively they must form a keyboard answering in all its parts to thy lightest touch (the touch of the Master). Thus their minds shall open for the harmonies of Wisdom, to vibrate as knowledge through each and all, resulting in effects pleasing to the presiding gods (tutelary or patron-angels) and useful to the Lanoo. So shall Wisdom be impressed forever on their hearts and the harmony of the law shall never be broken.

6. Those who desire to acquire the knowledge leading to the *Siddhis* (occult powers) have to renounce all the vanities of life and of the world (here follows enumeration of the Siddhis).

7. None can feel the difference between himself and his fellow-students, such as "I am the wisest," "I am more holy and pleasing to the teacher, or in my community, than my brother," etc., -- and remain an upasaka. His thoughts must be predominantly fixed upon his heart, chasing therefrom every hostile thought to any living being. It (the heart) must be full of the feeling of its non-separateness from the rest of beings as from all in Nature; otherwise no success can follow.

8. A *Lanoo* (disciple) has to dread external living influence alone (magnetic emanations from living creatures). For this reason while at one with all, in his *inner nature*, he must take care to separate his outer (external) body from every foreign influence: none must drink out of, or eat in his cup but himself. He must avoid bodily contact (i.e., being touched or touch) with human, as with animal being.

[No pet animals are permitted and it is forbidden even to touch certain trees and plants. A disciple has to live, so to say, in his own atmosphere in order to individualize it for occult purposes.]

9. The mind must remain blunt to all but the universal truths in nature, lest the "Doctrine of the Heart" should become only the "Doctrine of the Eye," (i.e., empty esoteric ritualism).

10. No animal food of whatever kind, nothing that has life in it, should be taken by the disciple. No wine, no spirits, or opium should be used: for these are like the *Lhamayin* (evil spirits), who fasten upon the unwary, they devour the understanding.

[Wine and Spirits are supposed to contain and preserve the bad magnetism of all the men who helped in their fabrication; the meat of each animal, to preserve the psychic characteristics of its kind.]

11. Meditation, abstinence in all, the observation of moral duties, gentle thoughts, good deeds and kind words, as good will to all and entire oblivion of Self, are the most efficacious means of obtaining knowledge and preparing for the reception of higher wisdom.

12. It is only by virtue of a strict observance of the foregoing rules that a *Lanoo* can hope to acquire in good time the Siddhis of the Arhats, the growth which makes him become gradually One with the UNIVERSAL ALL.

These twelve extracts are taken from amongst some seventy-three rules, to enumerate which would be useless, as they would be meaningless in Europe. But even these few are enough to show the immensity of the difficulties which beset the path of the would-be "Upasaka," who has been born and bred in Western lands. (2)

All Western, and especially English, education is instinct with the principle of emulation and strife; each boy is urged to learn more quickly, to outstrip his companions, and to surpass them in every possible way. What is miscalled "friendly rivalry" is assiduously cultivated, and the same spirit is fostered and strengthened in every detail of life.

With such ideas "educated into" him from his childhood, how can a Westerner bring himself to feel towards his co-students "as the fingers on one hand"? Those co-students, too, are not of his *own selection*, or chosen by himself from personal sympathy and appreciation. They are chosen by his teacher on far other grounds, and he who would be a student must *first* be strong enough

to kill out in his heart all feelings of dislike and antipathy to others. How many Westerners are ready even to attempt this in earnest?

And then the details of daily life, the command not to touch even the hand of one's nearest and dearest. How contrary to Western notions of affection and good feeling! How cold and hard it seems. Egotistical too, people would say, to abstain from giving pleasure to others for the sake of one's own development. Well, let those who think so defer, till another lifetime, the attempt to enter the path in real earnest. But let them not glory in their own fancied unselfishness. For, in reality, it is only the seeming appearances which they allow to deceive them, the conventional notions, based on emotionalism and gush, or so-called courtesy, things of the unreal life, not the dictates of Truth.

But even putting aside these difficulties, which may be considered "external," though their importance is none the less great, how are students in the West to "attune themselves" to harmony as here required of them? So strong has personality grown in Europe and America, that there is no school of artists even whose members do not hate and are not jealous of each other. "Professional" hatred and envy have become proverbial; men seek each to benefit himself at all costs, and even the so-called courtesies of life are but a hollow mask covering these demons of hatred and jealousy.

In the East the spirit of "non-separateness" is inculcated as steadily from childhood up, as in the West the spirit of rivalry. Personal ambition, personal feelings and desires, are not encouraged to grow so rampant there. When the soil is naturally good, it is cultivated in the right way, and the child grows into a man in whom the habit of subordination of one's lower to one's higher Self is strong and powerful. In the West men think that their own likes and dislikes of other men and things are guiding principles for them to act upon, even when they do not make of them the law of their lives and seek to impose them upon others.

Let those who complain that they have learned little in the Theosophical Society lay to heart the words written in an article in the *Path* for last February: "The key in each degree is the *aspirant himself*." It is not "the fear of God" which is "the beginning of Wisdom," but the knowledge of SELF which is WISDOM ITSELF.

How grand and true appears, thus, to the student of Occultism who has commenced to realize some of the foregoing truths, the answer given by the Delphic Oracle to all who came seeking after Occult Wisdom -- words repeated and enforced again and again by the wise Socrates: --
MAN KNOW THYSELF. . . .

Chelaship has nothing *whatever* to do with means of subsistence or anything of the kind, for a man can isolate his mind entirely from his body and its surroundings. Chelaship is a *state of mind*, rather than a life according to hard and fast rules on the physical plane. This applies especially to the earlier, probationary period, while the rules given in *Lucifer* for April last pertain properly to a later stage, that of actual occult training and the development of occult

powers and insight. These rules indicate, however, the mode of life which ought to be followed by all aspirants *so far as practicable*, since it is the most helpful to them in their aspirations.

It should never be forgotten that Occultism is concerned with the *inner man* who must be strengthened and freed from the dominion of the physical body and its surroundings, which must become his servants. Hence the *first* and chief necessity of Chelaship is a spirit of absolute unselfishness and devotion to Truth; then follow self-knowledge and self-mastery. These are all-important; while outward observance of fixed rules of life is a matter of secondary moment. -- H. P. Blavatsky, *Lucifer* IV, 348n

1. So holy is the connection thus formed deemed in the Greek Church, that a marriage between god-parents of the same child is regarded as the worst kind of incest, is considered illegal and is dissolved by law; and this absolute prohibition extends even to the children of one of the sponsors as regards those of the other. ([return to text](#))

2. Be it remembered that *all* "Chelas," even lay disciples, are called Upasaka until after their first initiation, when they become lanoo-Upasaka. To that day, even those who belong to Lamaseries and are *set apart*, are considered as "laymen." ([return to text](#))

Occultism versus the Occult Arts

I oft have heard, but ne'er believed till now,
 There are, who can by potent magic spells,
 Bend to their crooked purpose Nature's laws. -- MILTON

In this month's "Correspondence" several letters testify to the strong impression produced on some minds by our last month's article "Practical Occultism." Such letters go far to prove and strengthen two logical conclusions.

(a) There are more well-educated and thoughtful men who believe in the existence of Occultism and Magic (the two differing vastly) than the modern materialist dreams of; and --

(b) That most of the believers (comprising many theosophists) have no definite idea of the nature of Occultism and confuse it with the Occult sciences in general, the "Black art" included.

Their representations of the powers it confers on upon man, and of the means to be used to acquire them are as varied as they are fanciful. Some imagine that a master in the art, to show the way, is all that is needed to become a Zanoni. Others, that one has but to cross the Canal of Suez

and go to India to bloom forth as Roger Bacon or even a Count St. Germain. Many take for their ideal Margrave with his ever-renewing youth, and care little for the soul as the price paid for it. Not a few, mistaking "Witch-of-Endorism" pure and simple, for Occultism -- "through the yawning Earth from Stygian gloom, call up the meager ghost to walks of light," and want, on the strength of this feat, to be regarded as full-blown Adepts. "Ceremonial Magic" according to the rules mockingly laid down by Eliphas Levi, is another imagined *alter-ego* of the philosophy of the Arhats of old. In short, the prisms through which Occultism appears, to those innocent of the philosophy, are as multicolored and varied as human fancy can make them.

Will these candidates to Wisdom and Power feel very indignant if told the plain truth? It is not only useful, but it has now become *necessary* to disabuse most of them and before it is too late. This truth may be said in a few words: There are not in the West half-a-dozen among the fervent hundreds who call themselves "Occultists," who have even an approximately correct idea of the nature of the Science they seek to master. With a few exceptions, they are all on the highway to Sorcery. Let them restore some order in the chaos that reigns in their minds, before they protest against this statement. Let them first learn the true relation in which the Occult Sciences stand to Occultism, and the difference between the two, and then feel wrathful if they still think themselves right. Meanwhile, let them learn that Occultism differs from Magic and other secret Sciences as the glorious sun does from a rush-light, as the immutable and immortal Spirit of Man -- the reflection of the absolute, causeless and unknowable ALL -- differs from the mortal clay -- the human body.

In our highly civilized West, where modern languages have been formed, and words coined, in the wake of ideas and thoughts -- as happened with every tongue -- the more the latter became materialized in the cold atmosphere of Western selfishness and its incessant chase after the goods of this world, the less was there any need felt for the production of new terms to express that which was tacitly regarded as absolute and exploded "superstition." Such words could answer only to ideas which a cultured man was scarcely supposed to harbor in his mind. "Magic," a synonym for jugglery, "Sorcery," an equivalent for crass ignorance, and "Occultism," the sorry relic of crack-brained, mediaeval Fire-philosophers, of the Jacob Boehmes and the St. Martins, are expressions believed more than amply sufficient to cover the whole field of "thimble-rigging." They are terms of contempt, and used generally only in reference to the dross and residues of the dark ages and the preceding aeons of paganism. Therefore have we no terms in the English tongue to define and shade the difference between such abnormal powers, or the sciences that lead to the acquisition of them, with the nicety possible in the Eastern languages -- pre-eminently the Sanskrit. What do the words "miracle" and "enchantment" (words identical in meaning after all, as both express the idea of producing wonderful things by *breaking the laws of nature* [!!] as explained by the accepted authorities) convey to the minds of those who hear, or pronounce them? A Christian -- *breaking* "of the laws of nature," notwithstanding -- while believing firmly in the *miracles*, because said to have been produced by God through Moses, will either scout the enchantments performed by Pharaoh's magicians, or attribute them to the devil. It is the latter whom our pious enemies connect with Occultism, while their impious foes, the infidels, laugh at Moses, Magicians and Occultists, and would blush to give one serious thought to such "superstitions." This, because there is no term in existence to show the difference; no words to express the lights and shadows and draw the line of demarcation between the sublime and the true, the absurd and the ridiculous. The latter are the theological interpretations which

teach the "breaking of the laws of Nature" by man, God, or devil; the former -- the *scientific* "miracles" and enchantments of Moses and the Magicians *in accordance with natural laws*, both having been learned in all the Wisdom of the Sanctuaries, which were the "Royal Societies" of those days -- and in true OCCULTISM. This last word is certainly misleading, translated as it stands from the compound word *Gupta-Vidya*, "Secret Knowledge." But the knowledge of what? Some of the Sanskrit terms may help us.

There are four (out of the many others) names of the various kinds of Esoteric Knowledge or Sciences given, even in the exoteric Puranas. There is (1) *Yajna-Vidya*,* knowledge of the occult powers awakened in Nature by the performance of certain religious ceremonies and rites. (2) *Mahavidya*, the "great knowledge," the magic of the Kabalists and the *Tantrika* worship, often Sorcery of the worst description. (3) *Guhya-Vidya*, knowledge of the mystic powers residing in Sound (Ether), hence in the Mantras (chanted prayers or incantations) and depending on the rhythm and melody used; in other words, a magical performance based on Knowledge of the forces of Nature and their correlation; and (4) ATMA-VIDYA, a term which is translated simply "Knowledge of the Soul," *true Wisdom* by the Orientalists, but which means far more.

This last is the only kind of Occultism that any theosophist who admires "Light on the Path," and who would be wise and unselfish, ought to strive after. All the rest is some branch of the "Occult Sciences," *i.e.* arts based on the knowledge of the ultimate essence of all things in the Kingdoms of Nature -- such as minerals, plants and animals -- hence of things pertaining to the realm of *material* nature, however invisible that essence may be, and howsoever much it has hitherto eluded the grasp of Science. Alchemy, Astrology, Occult Physiology, Chiromancy, exist in Nature and the *exact* Sciences -- perhaps so called, because they are found in this age of paradoxical philosophies the reverse -- have already discovered not a few of the secrets of the above *arts*. But clairvoyance, symbolized in India as the "Eye of Siva," called in Japan, "Infinite Vision," is *not* Hypnotism, the illegitimate son of Mesmerism, and is not to be acquired by such arts. All the others may be mastered and results obtained, whether good, bad, or indifferent; but *Atma-Vidya* sets small value on them. It includes them all and may even use them occasionally, but it does so after purifying them of their dross, for beneficent purposes, and taking care to deprive them of every element of selfish motive. Let us explain: Any man or woman can set himself or herself to study one or all of the above specified "Occult Arts" without any great previous preparation, and even without adopting any too restraining mode of life. One could even dispense with any lofty standard of morality. In the last case, of course, ten to one the student would blossom into a very decent kind of sorcerer, and tumble down headlong into black magic. But what can this matter? The *Voodoos* and *Dugpas* eat, drink and are merry over hecatombs of victims of their infernal arts. And so do the amiable gentlemen vivisectionists and the *diplomaed* "Hypnotizers" of the Faculties of Medicine; the only difference between the two classes being that the *Voodoos* and *Dugpas* are *conscious*, and the Charcott-Richet crew *unconscious*, Sorcerers. Thus, since both have to reap the fruits of their labors and achievements in the black art, the Western practitioners should not have the punishment and reputation without the profits and enjoyments they may get therefrom. For we say it again, *hypnotism* and *vivisection* as practised in such schools, are *Sorcery* pure and simple, *minus* a knowledge that the *Voodoos* and *Dugpas* enjoy, and which no Charcott-Richet can procure for himself in fifty years of hard study and experimental observation. Let then those who will dabble in magic, whether they understand its nature or not, but who find the rules imposed upon students too hard, and

who, therefore, lay Atma-Vidya or Occultism aside -- go without it. Let them become magicians by all means, even though they do become *Voodoos* and *Dugpas* for the next ten incarnations.

But the interest of our readers will probably center on those who are invincibly attracted towards the "Occult," yet who neither realize the true nature of what they aspire towards, nor have they become passion-proof, far less truly unselfish.

How about these unfortunates, we shall be asked, who are thus rent in twain by conflicting forces? For it has been said too often to need repetition, and the fact itself is patent to any observer, that when once the desire for Occultism has really awakened in a man's heart, there remains for him no hope of peace, no place of rest and comfort in all the world. He is driven out into the wild and desolate spaces of life by an ever-gnawing unrest he cannot quell. His heart is too full of passion and selfish desire to permit him to pass the Golden Gate; he cannot find rest or peace in ordinary life. Must he then inevitably fall into sorcery and black magic, and through many incarnations heap up for himself a terrible Karma? Is there no other road for him?

Indeed there is, we answer. Let him aspire to no higher than he feels able to accomplish. Let him not take a burden upon himself too heavy for him to carry. Without ever becoming a "Mahatma," a Buddha or a Great Saint, let him study the philosophy and the "Science of the Soul," and he can become one of the modest benefactors of humanity, without any "super-human" powers. *Siddhis* (or the Arhat powers) are only for those who are able to "lead the life," to comply with the terrible sacrifices required for such a training, and to comply with them *to the very letter*. Let them know at once and remember always, that true *Occultism or Theosophy* is the "Great Renunciation of SELF," unconditionally and absolutely, in thought as in action. It is ALTRUISM, and it throws him who practices it out of calculation of the ranks of the living altogether. "Not for himself, but for the world, he lives," as soon as he has pledged himself to the work. Much is forgiven during the first years of probation. But, no sooner is he "accepted" than his personality must disappear, and he has to become *a mere beneficent force in Nature*. There are two poles for him after that, two paths, and no midward place of rest. He has either to ascend laboriously, step by step, often through numerous incarnations and *no Devachanic break*, the golden ladder leading to Mahatmaship (the *Arhat* or *Bodhisattva* condition), or -- he will let himself slide down the ladder at the first false step, and roll down into *Dugpaship*. . . .

All this is either unknown or left out of sight altogether. Indeed, one who is able to follow the silent evolution of the preliminary aspirations of the candidates, often finds strange ideas quietly taking possession of their minds. There are those whose reasoning powers have been so distorted by foreign influences that they imagine that animal passions can be so sublimated and elevated that their fury, force, and fire can, so to speak, be turned inwards; that they can be stored and shut up in one's breast, until their energy is, not expended, but turned toward higher and more holy purposes: namely, *until their collective and unexpended strength enables their possessor to enter the true Sanctuary of the Soul* and stand therein in the presence of the *Master* -- the HIGHER SELF! For this purpose they will not struggle with their passions nor slay them. They will simply, by a strong effort of will, put down the fierce flames and keep them at bay within their natures, allowing the fire to smolder under a thin layer of ashes. They submit joyfully to the torture of the Spartan boy who allowed the fox to devour his entrails rather than part with it. Oh, poor blind visionaries!

As well hope that a band of drunken chimney-sweeps, hot and greasy from their work, may be shut up in a Sanctuary hung with pure white linen, and that instead of soiling and turning it by their presence into a heap of dirty shreds, they will become masters in and of the sacred recess, and finally emerge from it as immaculate as that recess. Why not imagine that a dozen of skunks imprisoned in the pure atmosphere of a *Dgon-pa* (a monastery) can issue out of it impregnated with all the perfumes of the incenses used?....Strange aberration of the human mind. Can it be so? Let us argue.

The "Master" in the Sanctuary of our souls is "the Higher Self" -- the divine spirit whose consciousness is based upon and derived solely (at any rate during the mortal life of the man in whom it is captive) from the Mind, which we have agreed to call the *Human Soul* (the "Spiritual Soul" being the vehicle of the Spirit). In its turn the former (the *personal* or human soul) is a compound in its highest form, of spiritual aspirations, volitions, and divine love; and in its lower aspects, of animal desires and terrestrial passions imparted to it by its associations with its vehicle, the seat of all these. It thus stands as a link and a medium between the animal nature of man which its higher reason seeks to subdue, and his divine spiritual nature to which it gravitates, whenever it has the upper hand in its struggle with the *inner animal*. The latter is the instinctual "animal Soul" and is the hotbed of those passions, which, as just shown, are lulled instead of being killed, and locked up in their breasts by some imprudent enthusiasts. Do they still hope to turn thereby the muddy stream of the animal sewer into the crystalline waters of life? And where, on what neutral ground can they be imprisoned so as not to affect man? The fierce passions of love and lust are still alive and they are allowed to still remain in the place of their birth -- *that same animal soul*; for both the higher and the lower portions of the "Human Soul" or Mind reject such inmates, though they cannot avoid being tainted with them as neighbors. The "Higher Self" or Spirit is as unable to assimilate such feelings as water to get mixed with oil or unclean liquid tallow. It is thus the mind alone, the sole link and medium between the man of earth and the Higher Self -- that is the only sufferer, and which is in the incessant danger of being dragged down by those passions that may be re-awakened at any moment, and perish in the abyss of matter. And how can it ever attune itself to the divine harmony of the highest Principle, when that harmony is destroyed by the mere presence, within the Sanctuary in preparation, of such animal passions? How can harmony prevail and conquer, when the soul is stained and distracted with the turmoil of passions and the terrestrial desires of the bodily senses, or even of the "Astral man"?

For this "Astral" -- the shadowy "double" (in the animal as in man) is not the companion of the *divine Ego* but of the *earthly body*. It is the link between the personal SELF, the lower consciousness of *Manas* and the Body, and is the vehicle of *transitory, not of immortal life*. Like the shadow projected by man, it follows the movements and impulses slavishly and mechanically, and leans therefore to matter without ever ascending to Spirit. It is only when the power of the passions is dead altogether, and when they have been crushed and annihilated in the retort of an unflinching will; when not only all the lusts and longings of the flesh are dead, but also the recognition of the personal Self is killed out and the "astral" has been reduced in consequence to a cipher, that the Union with the "Higher Self" can take place. Then when the "Astral" reflects only the conquered man, the still living but no more the longing, selfish personality, then the brilliant *Augoeides*, the divine SELF, can vibrate in conscious harmony with both the poles of the human Entity -- the man of matter purified, and the ever pure Spiritual Soul

-- and stand in the presence of the MASTER SELF, the Christos of the mystic Gnostic, blended, merged into, and one with IT for ever.**

How then can it be thought possible for a man to enter the "straight gate" of occultism when his daily and hourly thoughts are bound up with worldly things, desires of possession and power, with lust, ambition and duties, which, however honorable, are still of the earth earthy? Even the love of wife and family -- the purest as the most unselfish of human affections -- is a barrier to *real* occultism. For whether we take as an example the holy love of a mother for her child, or that of a husband for his wife, even in these feelings, when analyzed to the very bottom, and thoroughly sifted, there is still *selfishness* in the first, and an *egoisme a deux* in the second instance. What mother would not sacrifice without a moment's hesitation hundreds and thousands of lives for that of the child of her heart? and what lover or true husband would not break the happiness of every other man and woman around him to satisfy the desire of one whom he loves? This is but natural, we shall be told. Quite so; in the light of the code of human affections; less so, in that of divine universal love. For, while the heart is full of thoughts for a little group of *selves*, near and dear to us, how shall the rest of mankind fare in our souls? What percentage of love and care will there remain to bestow on the "great orphan"? And how shall the "still small voice" make itself heard in a soul entirely occupied with its own privileged tenants? What room is there left for the seeds of Humanity *en bloc* to impress themselves upon, or even receive a speedy response? And yet, he who would profit by the wisdom of the universal mind, has to reach it through *the whole of Humanity* without distinction of race, complexion, religion or social status. It is *altruism*, not *ego-ism* even in its most legal and noble conception, that can lead the unit to merge its little Self in the Universal Selves. It is to *these* needs and to this work that the true disciple of Occultism has to devote himself, if he would obtain *theo-sophy*, divine Wisdom and Knowledge.

The aspirant has to choose absolutely between the life of the world and the life of Occultism. It is useless and vain to endeavor to unite the two, for no one can serve two masters and satisfy both. No one can serve his body and the higher Soul, and do his family duty and his universal duty, without depriving either one or the other of its rights; for he will either lend his ear to the "still small voice" and fail to hear the cries of his little ones, or, he will listen but to the wants of the latter and remain deaf to the voice of Humanity. It would be a ceaseless, a maddening struggle for almost any married man, who would pursue *true* practical Occultism, instead of its *theoretical* philosophy. For he would find himself ever hesitating between the voice of the impersonal divine love of Humanity, and that of the personal, terrestrial love. And this could only lead him to fail in one or the other, or perhaps in both his duties. Worse than this. For, *whoever indulges after having pledged himself to OCCULTISM in the gratification of a terrestrial love or lust*, must feel an almost immediate result; that of being irresistibly dragged from the impersonal divine state down to the lower plane of matter. Sensual, even mental self-gratification, involves the immediate loss of the powers of spiritual discernment; the voice of the MASTER can no longer be distinguished from that of one's passions *or even that of a Dugpa*; the right from wrong; sound morality from mere casuistry. The Dead Sea fruit assumes the most glorious mystic appearance, only to turn to ashes on their lips, and to gall in the heart resulting in: --

Depth ever deepening, darkness darkening still;
 Folly for wisdom, guilt for innocence;
 Anguish for rapture, and for hope despair.

And once being mistaken and having acted on their mistakes, most men shrink from realizing their error, and thus descend deeper and deeper into the mire. And, although it is the intention that decides primarily whether *white* or *black* magic is exercised, yet the results even of involuntary, unconscious sorcery cannot fail to be productive of bad Karma. Enough has been said to show that *sorcery is any kind of evil influence exercised upon other persons, who suffer, or make other persons to suffer, in consequence*. Karma is a heavy stone splashed in the quiet waters of Life; and it must produce ever widening circles of ripples, carried wider and wider, almost *ad infinitum*. Such causes produced have to call forth effects, and these are evidenced in the just laws of Retribution.

Much of this may be avoided if people will only abstain from rushing into practices neither the nature nor importance of which they understand. No one is expected to carry a burden beyond his strength and powers. There are "natural-born magicians"; Mystic and Occultists by birth, and by right of direct inheritance from a series of incarnations and aeons of suffering and failures. These are passion-proof, so to say. No fires of earthy origin can fan into a flame any of their senses; no human voice can find response in their souls, except the great cry of Humanity. These only may be certain of success. But they can be met only far and wide, and they pass through the narrow gates of Occultism because they carry no personal luggage of human transitory sentiments along with them. They have got rid of the feelings of the lower personality, paralyzed thereby the "astral" animal, and the golden, but narrow gate is thrown open before them. Not so with those who have to carry yet for several incarnations the burden of sins committed in previous lives, and even in their present existence. For such, unless they proceed with great caution, the golden gate of Wisdom may get transformed into the wide gate and the broad way "that leadeth unto destruction," and therefore "many be they that enter in thereby." This is the Gate of the Occult arts, practised for selfish motives and in the absence of the restraining and beneficent influence of ATMA-VIDYA. We are in the Kali Yuga and its fatal influence is a thousandfold more powerful in the West than it is in the East.; hence the easy preys made by the Powers of the Age of Darkness in this cyclic struggle, and the many delusions under which the world is now laboring. One of these is the relative facility with which men fancy they can get at the "Gate" and cross the threshold of Occultism without any great sacrifice. It is the dream of most Theosophists, one inspired by desire for Power and personal selfishness, and it is not such feelings that can ever lead them to the coveted goal. For, as well said by one believed to have sacrificed himself for Humanity -- "narrow is the gate and straitened the way that leadeth unto life" eternal, and therefore "few be they that find it." So straight indeed, that at the bare mention of some of the preliminary difficulties the affrighted Western candidates turn back and retreat with a shudder. . . .

Let them stop here and attempt no more in their great weakness. For if, while turning their backs on the narrow gate, they are dragged by their desire for the Occult one step in the direction of the broad and more inviting Gates of that golden mystery which glitters in the light of illusion, woe to them! It can lead only to Dugpa-ship, and they will be sure to find themselves very soon landed on that *Via Fatale*, over whose portal Dante read the words: --

*Per me si va nella citta dolente
Per me si va nell'eterno dolore
Per me si va tra la perduta gente. . .*

FOOTNOTES:

* "The *Yajna*," say the Brahmans, "exists from eternity, for it proceeded forth from the Supreme One . . . in whom it lay dormant from 'no beginning.' It is the key to the TRIVIDYA, the thrice sacred science contained in the Rig verses, which teaches the Yajus or sacrificial mysteries. 'The Yajna' exists as an invisible thing at all time; it is like the latent power of electricity in an electrifying machine, requiring only the operation of a suitable apparatus in order to be elicited. It is supposed to extend from the *Ahavaniya* or sacrificial fire to the heavens, forming a bridge or ladder by means of which the sacrificer can communicate with the world of gods and spirits, and even ascend when alive to their abodes." -- Martin Haug's *Aitareya Brahmana*.

"This *Yajna* is again one of the forms of the *Akasa*; and the mystic word calling it into existence and pronounced mentally by the initiated Priest is the *Lost Word* receiving impulse through WILL POWER." -- *Isis Unveiled*, Vol. I. Introduction. See *Aitareya Brahmana*, Haug. ([return to text](#))

** Those who would feel inclined to see three *Egos* in one man will show themselves unable to perceive the metaphysical meaning. Man is a trinity composed of Body, Soul and Spirit; but *man* is nevertheless *one* and is surely not his body. It is the latter which is the property, the transitory clothing of the man. The three "Egos" are MAN in his three aspects on the astral, intellectual or psychic, and Spiritual planes, or states. ([return to text](#))

The Blessings of Publicity

A well-known public lecturer, a distinguished Egyptologist, said, in one of his lectures against the teachings of Theosophy, a few suggestive words, which are now quoted and must be answered:

"It is a delusion to suppose there is anything in the experience or wisdom of the past, the ascertained results of which can only be communicated from beneath the cloak and mask of mystery. . . . Explanation is the Soul of Science. They will tell you *we cannot have their knowledge without living their life*. . . . Public experimental research, the printing press, and a free-thought platform, have

abolished the need of mystery. It is no longer necessary for science to take the veil, as she was forced to do for security in times past. . . .

This is a very mistaken view in one aspect. "Secrets of the purer and profounder life" not only *may* but *must* be made universally known. But *there are secrets that kill* in the arcana of Occultism, and unless a man *lives the life* he cannot be entrusted with them.

The late Professor Faraday had very serious doubts whether it was quite wise and reasonable to give out to the public at large certain discoveries of modern science. Chemistry had led to the invention of too terrible means of destruction in our century to allow it to fall into the hands of the profane. What man of sense -- in the face of such fiendish applications of dynamite and other explosive substances as are made by those incarnations of the Destroying Power, who glory in calling themselves Anarchists and Socialists -- would not agree with us in saying: -- Far better for mankind that it should never have blasted a rock by modern perfected means, than that it should have shattered the limbs of one per cent even of those who have been thus destroyed by the pitiless hand of Russian Nihilists, Irish Fenians and Anarchists. That such discoveries, and chiefly their murderous application, ought to have been withheld from public knowledge may be shown on the authority of statistics and commissions appointed to investigate and record the result of the evil done. The following information gathered from public papers will give an insight into what may be in store for wretched mankind.

England alone -- the center of civilization -- has 21,268 firms fabricating and selling explosive substances. (1) But the centers of the dynamite trade, of infernal machines, and other such results of modern civilization, are chiefly at Philadelphia and New York. It is in the former city of "Brotherly Love" that the now most famous manufacturer of explosives flourishes. It is one of the well-known respectable citizens -- the inventor and manufacturer of the most murderous "dynamite toys" -- who, called before the Senate of the United States anxious to adopt means for the repression of a *too free trade* in such implements, found an argument that ought to become immortalized for its cynical sophistry: "My machines," that expert is reported to have said -- "are quite *harmless to look at*; as they may be manufactured in the shape of oranges, hats, boats, and anything one likes. . . . Criminal is he who murders people by means of such machines, not he who manufactures them. The firm refuses to admit that were there no supply there would be no incentive for demand on the market; but insists that every demand should be satisfied by a supply ready at hand."

That "supply" is the fruit of civilization and of the publicity given to the discovery of every murderous property in matter. What is it? As found in the Report of the Commission appointed to investigate the variety and character of the so-called "infernal machines," so far the following implements of instantaneous human destruction are already on hand. The most fashionable of all among the many varieties fabricated by Mr. Holgate, are the "Ticker," the "Eight Day Machine," the "Little Exterminator," and the "Bottle Machine." The "Ticker" is in appearance like a piece of lead, a foot long and four inches thick. It contains an iron or steel tube, full of a kind of gunpowder invented by Holgate himself. That gunpowder, in appearance like any other common stuff of that name, has, however, an explosive power two hundred times stronger than common gunpowder; the "Ticker" containing thus a powder which equals in force two hundred pounds of the common gunpowder. At one end of the machine is fastened an invisible clock-work meant to

regulate the time of the explosion, which time may be fixed from one minute to thirty-six hours. The spark is produced by means of a steel needle which gives a spark at the touch-hole, and communicates thereby the fire to the whole machine.

The "Eight Day Machine" is considered the most powerful, but at the same time the most complicated, of all those invented. One must be familiar with handling it before a full success can be secured. It is owing to this difficulty that the terrible fate intended for London Bridge and its neighborhood was turned aside by the instantaneous killing instead of the two Fenian criminals. The size and appearance of that machine changes, Proteus-like, according to the necessity of smuggling it in, in one or another way, unperceived by the victims. It may be concealed in bread, in a basket of oranges, in a liquid, and so on. The Commission of Experts is said to have declared that its explosive power is such as to reduce to atoms instantly the largest edifice in the world.

The "Little Exterminator" is an innocent-looking plain utensil having the shape of a modest jug. It contains neither dynamite nor powder, but secretes, nevertheless, a deadly gas, and has a hardly perceptible clock-work attached to its edge, the needle of which points to the time when that gas will effect its escape. In a shut-up room this new "vril" of lethal kind, will *smother to death, nearly instantaneously*, every living being within a distance of a hundred feet, the radius of the murderous jug. With these three "latest novelties" in the high season of Christian civilization, the catalogue of the dynamiters is closed; all the rest belongs to the old "fashion" of the past years. It consists of hats, *porte cigars*, bottles of ordinary kind, and even *ladies' smelling bottles*, filled with dynamite, nitro-glycerine, etc., etc. -- weapons, some of which, following unconsciously Karmic law, killed many of the dynamiters in the last Chicago *revolution*. Add to this the forthcoming long-promised Keely's vibratory force, capable of reducing in a few seconds a dead bullock to a heap of ashes, and then ask yourself if the *Inferno* of Dante as a locality can ever rival earth in the production of more hellish engines of destruction!

Thus, if purely material implements are capable of blowing up, from a few corners, the greatest cities of the globe, provided the murderous weapons are guided by expert hands -- what terrible dangers might not arise from magical *occult* secrets being revealed, and allowed to fall into the possession of ill-meaning persons! A thousand times more dangerous and lethal are these, because neither the criminal hand, nor the *immaterial*, invisible weapon used, can ever be detected.

The congenital *black* magicians -- those who, to an innate propensity towards evil, unite highly-developed mediumistic natures -- are but too numerous in our age. It is nigh time then that psychologists and believers, at least, should cease advocating the beauties of publicity and claiming knowledge of the secrets of nature for all. It is not in our age of "suggestion" and "explosives" that Occultism can open wide the doors of its laboratories except to those who *do* live the life.

1. Nitro-glycerine has found its way even into medical compounds. Physicians and druggists are vying with the Anarchists in their endeavors to destroy the surplus of mankind. The famous chocolate tablets against dyspepsia are said to contain nitro-glycerine! They may save, but they can kill still more easily.

Hypnotism, and Its Relations to Other Modes of Fascination

We are asked by "H.C." and other Fellows, to answer the several queries hereafter propounded. We do so, but with a reservation: our replies must be made from the standpoint of Occultism alone, no consideration being given to such hypotheses of modern (another name for "materialistic") Science, as may clash with esoteric teachings.

Q. *What is Hypnotism: how does it differ from Animal Magnetism (or Mesmerism) ?*

ANS. Hypnotism is the new scientific name for the old ignorant "superstition" variously called "fascination" and "enchantment." It is an antiquated *lie* transformed into a modern *truth*. The fact is there, but the scientific explanation of it is still wanting. By some it is believed that *Hypnotism* is the result of an irritation artificially produced on the periphery of the nerves; that this irritation reacting upon, passes into the cells of the brain-substance, causing by exhaustion a condition which is but another mode of sleep (*hypnosis*, or *hupnos*); by others that it is simply a self-induced stupor, produced chiefly by imagination, etc., etc. It differs from animal magnetism where the hypnotic condition is produced by the Braid method, which is a purely mechanical one, *i.e.*, the fixing of the eyes on some bright spot, a metal or a crystal. It becomes "animal magnetism" (or mesmerism), when it is achieved by "mesmeric" passes on the patient, and for these reasons. When the first method is used, no electro-psychic, or even electro-physical currents are at work, but simply the mechanical, molecular vibrations of the metal or crystal gazed at by the subject. It is the *eye* -- *the* most occult organ of all, on the superficies of our body -- which, by serving as a medium between that bit of metal or crystal and the brain, *attunes* the molecular vibrations of the nervous centers of the latter into *unison* (*i.e.*, equality in the number of their respective oscillations) with the vibrations of the bright object held. And, it is this unison which produces the hypnotic state. But in the second case, the right name for hypnotism would certainly be "animal magnetism" or that so much derided term "mesmerism." For, in the hypnotization by preliminary passes, it is the human will -- whether conscious or otherwise -- of the operator himself, that acts upon the nervous system of the patient. And it is again through the vibrations -- only *atomic*, not *molecular* -- produced by that act of energy called WILL in the ether of space (therefore, on quite a different plane) that the *super-hypnotic* state (*i.e.*, "suggestion," etc.) is induced. For those which we call "will-vibrations" and their aura, are absolutely distinct from the vibrations produced by the simply mechanical molecular motion, the two acting on two separate degrees of the cosmo-terrestrial planes. Here, of course, a clear realization of that which is meant by *will* in Occult Sciences, is necessary.

Q. *In both (hypnotism and animal magnetism) there is an act of will in the operator, a transit of something from him to his patient, an effect upon the patient. What is the "something" transmitted in both cases?*

ANS. That which is transmitted has no name in European languages, and if we simply describe it as *will*, it loses all its meaning. The old and very much tabooed words, "enchantment," "fascination," "glamour," and "spell," and especially the verb "to bewitch," expressed far more suggestively the real action that took place during the process of such a *transmission*, than the modern and meaningless terms, "psychologize" and "biologize." Occultism calls the force transmitted, the "auric fluid," to distinguish it from the "auric light"; the "fluid" being a

correlation of *atoms* on a higher plane, and a descent to this lower one, in the shape of impalpable and invisible plastic Substances, generated and directed by the potential Will; the "auric *light*," or that which Reichenbach calls *Od*, a light that surrounds every animate and inanimate object in nature, is, on the other hand, but the astral reflection emanating from objects; its particular color and colors, the combinations and varieties of the latter, denoting the state of the *gunas*, or qualities and characteristics of each special object and subject -- the human being's aura being the strongest of all.

Q. *What is the rationale of "Vampirism"?*

ANS. If by this word is meant the involuntary transmission of a portion of one's vitality, or life-essence, by a kind of occult *osmosis* from one person to another -- the latter being endowed, or *afflicted* rather, with such *vampirizing* faculty, then, the act can become comprehensible only when we study well the nature and essence of the semi-substantial "auric fluid" spoken of just now. Like every other occult form [force?] in Nature, this *end-* and *exosmotic* process may be made beneficent or maleficent, either unconsciously or at will. When a healthy operator mesmerizes a patient with a determined desire to relieve and cure him, the exhaustion felt by the former is proportionate to the relief given: a process of *endosmose* has taken place, the healer having parted with a portion of his vital aura to benefit the sick man. Vampirism, on the other hand, is a blind and mechanical process, generally produced without the knowledge of either the *absorber*, or the vampirized party. It is conscious or unconscious *black* magic, as the case may be. For in the case of trained adepts and sorcerers, the process is produced consciously and with the guidance of the Will. In both cases the agent of transmission is a magnetic and attractive faculty, terrestrial and physiological in its results, yet generated and produced on the four-dimensional plane -- the realm of atoms.

Q. *Under what circumstances is hypnotism "black magic"?*

ANS. Under those just discussed, but to cover the subject fully, even by giving a few instances, demands more space than we can spare for these answers. Sufficient to say that whenever the motive which actuates the operator is selfish, or detrimental to any living being or beings, all such acts are classed by us as black magic. The healthy vital fluid imparted by the physician who mesmerizes his patient, can and does cure; but too much of it will kill.

[This statement receives its explanation in our answer to Question 6, when showing that the vibratory experiment shatters a tumbler to pieces.]

Q. *Is there any difference between hypnosis produced by mechanical means, such as revolving mirrors, and that produced by the direct gaze of the operator (fascination)?*

ANS. This difference is, we believe, already pointed out in the answer to Question 1. The gaze of the operator is more potent, hence more dangerous, than the simple mechanical passes of the Hypnotizer, who, in nine cases out of ten, does not know how, and therefore *cannot* will. The students of Esoteric Science must be aware by the very laws of the occult correspondences that the former action is performed on the first plane of matter (the lowest), while the latter, which

necessitates a well-concentrated will, has to be enacted, if the operator is a profane novice, on the *fourth*, and if he is anything of an occultist on the *fifth* plane.

Q. *Why should a bit of crystal or a bright button, throw one person into the hypnotic state and affect in no way another person? An answer to this would, we think, solve more than one perplexity.*

ANS. Science has offered several varied hypotheses upon the subject, but has not, so far, accepted any one of these as definite. This is because all such speculations revolve in the vicious circle of materio-physical phenomena with their blind forces and mechanical theories. The "auric fluid" is *not* recognized by the men of Science, and therefore, they reject it. But have they not believed for years in the efficacy of *metallo-therapy*, the influence of these metals being due to the action of their electric *fluids* or currents on the nervous system? And this, simply because an analogy was found to exist between the activity of this system and electricity. The theory failed, because it clashed with the most careful observation and experiments. First of all, it was contradicted by a fundamental fact exhibited in the said *metallo-therapy*, whose characteristic peculiarity showed (*a*) that by no means every metal acted on every nervous disease, one patient being sensitive to some one metal, while all others produced no effect upon him; and (*b*) that the patients affected by certain metals were few and exceptional. This showed that "electric fluids" operating on and curing diseases existed only in the imagination of the theorists. Had they had any actual existence, then *all* metals would affect in a greater or lesser degree, *all* patients, and every metal, taken separately, would affect every case of nervous disease, the conditions for generating such fluids being, in the given cases, precisely the same. Thus Dr. Charcot having vindicated Dr. Burke, the *once* discredited discoverer of *metallo-therapy*, Shiff and others discredited all those who believed in electric fluids, and these seem now to be given up in favor of "molecular motion," which now reigns supreme in physiology -- *for the time being*, of course. But now arises a question: "Are the real nature, behavior and conditions of 'motion' known any better than the nature, behavior and conditions of the 'fluids'?" It is to be doubted. Anyhow Occultism is audacious enough to maintain that electric or magnetic fluids (the two being really identical) *are due in their essence and origin to that same molecular motion*, now transformed *into atomic energy*, (1) to which every other phenomenon in nature is also due. Indeed, when the needle of a galvano- or electro-meter fails to show any oscillations denoting the presence of electric or magnetic fluids, this does not prove in the least that there are none such to record; but simply that having passed on to another and higher plane of action, the electrometer can no longer be affected by the energy displayed on a plane with which it is entirely disconnected.

The above had to be explained, in order to show that the nature of the Force transmitted from one man or object to another man or object, whether in hypnotism, electricity, *metallo-therapy* or "fascination," is the same in essence, varying only in degree, and modified according to the sub-plane of matter it is acting on; of which sub-planes, as every Occultist knows, there are seven on our terrestrial plane as there are on every other.

Q. *Is Science entirely wrong in its definition of the hypnotic phenomena?*

ANS. It has no definition, so far. Now if there is one thing upon which Occultism agrees (to a certain degree) with the latest discoveries of physical Science, it is that all the bodies endowed

with the property of inducing and calling metallo-therapeutic and other analogous phenomena, have, their great variety notwithstanding, one feature in common. They are all the fountain heads and the generators of rapid molecular oscillations, which, whether through transmitting agents or direct contact, communicate themselves to the nervous system, changing thereby the rhythm of nervous vibrations -- on the sole condition, however, of being what is called, in *unison*. Now "unison" does not always imply the sameness of nature, or of essence, but simply the sameness of degree, a similarity with regard to gravity and acuteness, and equal potentialities for intensity of sound or motion: a bell may be in unison with a violin, and a flute with an animal or a human organ. Moreover, the rate of the number of vibrations -- especially in an organic animal cell or organ, changes in accordance with the state of health, and general condition. Hence the cerebral nervous centers of a hypnotic subject, while in perfect *unison*, in potential degree and essential original activity, with the object he gazes at, may yet, owing to some organic disturbance, be at the given moment at logger-heads with it, in respect to the number of their respective vibrations. In such case no hypnotic condition ensues; or no unison at all may exist between his nervous cells and the cells of the crystal or metal he is made to gaze at, in which case that particular object can never have any effect upon him. This amounts to saying that to ensure success in a hypnotic experiment, two conditions are requisite; (a) as every organic or "inorganic" body in nature is distinguished by its fixed molecular oscillations, it is necessary to find out which are those bodies which *will* act in unison with one or another human nervous system; and (b) to remember that the molecular oscillations of the former can influence the nervous action of the latter, only when the rhythms of their respective vibrations coincide, *i.e.*, when the number of their oscillations is made identical; which, in the cases of hypnotism induced by mechanical means, is achieved through the medium of the eye.

Therefore, though the difference between hypnosis produced by mechanical means, and that induced by the direct gaze of the operator, *plus* his will, depends on the plane on which the same phenomenon is produced, still the "fascinating" or subduing agent is created by the same force at work. In the physical world and its material planes, it is called MOTION; in the worlds of mentality and metaphysics it is known as WILL -- the many-faced magician throughout all nature.

As the rate of vibrations (molecular motion) in metals, woods, crystals, etc., alters under the effect of heat, cold, etc., so do the cerebral molecules change their rate, in the same way: *i.e.*, their rate is raised or lowered. And this is what really takes place in the phenomenon of hypnotism. In the case of gazing, it is the eye -- the chief agent of the Will of the active operator, but a slave and traitor when this Will is dormant -- that, unconsciously to the patient or *subject*, attunes the oscillations of his cerebral nervous centers to the rate of the vibrations of the object gazed at by catching the rhythm of the latter and passing it on to the brain. But in the case of direct passes, it is the Will of the operator radiating through his eye that produces the required unison between his will and the will of the person operated upon. For, out of two objects attuned in unison -- as two chords, for instance -- one will always be weaker than the other, and thus have mastery over the other and even the potentiality of destroying its weaker "co-respondent." So true is this, that we can call upon physical Science to corroborate this fact. Take the "sensitive flame" as a case in hand. Science tells us that if a note be struck in unison with the ratio of the vibrations of the heat molecules, the flames will respond immediately to the sound (or note struck), that it will dance and sing in rhythm with the sounds. But Occult Science adds, that the

flame *may also be extinguished* if the sound is intensified (*vide Isis Unveiled*, Vol. II, 606 and 607). Another proof. Take a wine-glass or tumbler of very fine and clear glass; produce, by striking it gently with a silver spoon, a well-determined note; after which reproduce the same note by rubbing its rim with a damp finger, and, if you are successful, the glass will immediately crack and be shattered. Indifferent to every other sound, the glass will not resist the great intensity of its own fundamental note, for that particular vibration will cause such a commotion in its particles, that the whole fabric will fall in pieces.

Q. *What becomes of diseases cured by hypnotism; are they really cured or are they postponed, or do they appear in another form? Are diseases Karma; and, if so, is it right to attempt to cure them?*

ANS. Hypnotic suggestion may cure for ever, and it may not. All depends on the degree of magnetic relations between the operator and the patient. *If* Karmic, they will be only postponed, and return in some other form, not necessarily of disease, but as a punitive evil of another sort. It is always "right" to try and alleviate suffering whenever we can, and to do our best for it. Because a man suffers justly imprisonment, and catches cold in his damp cell, is it a reason why the prison-doctor should not try to cure him of it?

Q. *Is it necessary that the hypnotic "suggestions" of the operator should be spoken? Is it not enough for him to think them, and may not even HE be ignorant or unconscious of the bent he is impressing on his subject?*

ANS. Certainly not, if the *rapport* between the two is once for all firmly established. Thought is more powerful than speech in cases of a real subjugation of the will of the patient to that of his operator. But, on the other hand, unless the "suggestion" made is for the good only of the subject, and entirely free from any selfish motive, a suggestion *by thought* is an act of *black magic* still more pregnant with evil consequences than a *spoken* suggestion. It is always wrong and unlawful to deprive a man of his free-will, *unless for his own or Society's good*; and even the former has to be done with great discrimination. Occultism regards all such promiscuous attempts as black magic and sorcery, whether conscious or otherwise.

Q. *Do the motive and character of the operator affect the result, immediate or remote?*

ANS. In so far as the hypnotizing process becomes under his operation either white or black magic, as the last answer shows.

Q. *Is it wise to hypnotize a patient not only out of disease, but out of a habit, such as drinking or lying?*

ANS. It is an act of charity and kindness, and this is next to wisdom. For, although the dropping of his vicious habits will add nothing to his good Karma (which it would, had his efforts to reform been personal, of his own free will, and necessitating a great mental and physical struggle), still a successful "suggestion" prevents him from generating more bad Karma, and adding constantly to the previous record of his transgressions.

Q. *What is it that a faith-healer, when successful, practises upon himself; what tricks is he playing with his principles and with his Karma?*

ANS. Imagination is a potent help in every event of our lives. Imagination acts on Faith, and both are the draughtsmen who prepare the sketches for *Will* to engrave, more or less deeply, on the rocks of obstacles and opposition with which the path of life is strewn. Says Paracelsus: "*Faith* must confirm the imagination, for faith establishes the *will* . . . Determined will is the beginning of all magical operations. . . . It is because men do not perfectly imagine and believe the result, that the arts (of magic) are uncertain, while they might be perfectly certain." This is all the secret. Half, if not two-thirds of our ailments and diseases are the fruit of our imagination and fears. Destroy the latter and give another bent to the former, and nature will do the rest. There is nothing sinful or injurious in the methods *per se*. They turn to harm only when belief in his power becomes too arrogant and marked in the faith-healer, and when he thinks he can *will* away such diseases as need, if they are not to be fatal, the immediate help of expert surgeons and physicians.

FOOTNOTE:

1. In Occultism the word *atom* has a special significance, different from the one given to it by Science. See editorial, *Psychic and Noetic Action*, in the two last numbers. ([return to text](#))

Black Magic in Science

Commence research where modern conjecture closes its faithless wings --
Bulwer's Zanoni.

The flat denial of yesterday has become the scientific axiom of to-day -- *Common Sense Aphorisms.*

Thousands of years ago the Phrygian Dactyls, the initiated priests, spoken of as the "magicians and exorcists of sickness," healed diseases by magnetic processes. It was claimed that they had obtained these curative powers from the powerful breath of Cybele, the many-breasted goddess, the daughter of Coelus and Terra. Indeed, her genealogy and the myths attached to it show Cybele as the personification and type of the vital essence, whose source was located by the ancients between the Earth and the starry sky, and who was regarded as the very *fons vitae* of all that lives and breathes. The mountain air being placed nearer to that fount fortifies health and prolongs man's existence; hence, Cybele's life, as an infant, is shown in her myth as having been preserved on a mountain. This was before that *Magna* and *Bona Dea*, the prolific *Mater*, became transformed into Ceres-Demeter, the patroness of the Eleusinian Mysteries.

Animal magnetism (now called Suggestion and Hypnotism) was the principal agent in theurgic mysteries as also in the *Asclepieia* -- the healing temples of Aesculapius, where the patients once admitted were treated, during the process of "incubation," magnetically, during their sleep.

This creative and life-giving Force -- denied and laughed at when named theurgic magic, accused for the last century of being principally based on superstition and fraud, whenever

referred to as mesmerism -- is now called Hypnotism, Charcotism, Suggestion, "psychology," and what not. But, whatever the expression chosen, it will ever be a loose one if used without a proper qualification. For when epitomized with all its collateral sciences -- which are all sciences within *the* science -- it will be found to contain possibilities the nature of which has never been even dreamt of by the oldest and most learned professors of the orthodox physical science. The latter, "authorities" so-called, are no better, indeed, than innocent bald infants, when brought face to face with the mysteries of antediluvian "mesmerism." As stated repeatedly before, the blossoms of magic, whether white or black, divine or infernal, spring all from one root. The "breath of Cybele" -- *Akasa tattwa*, in India -- is the one chief agent, and it underlay the so-called "miracles" and "supernatural" phenomena in all ages, as in every clime. As the parent-root or essence is universal, so are its effects innumerable. Even the greatest adepts can hardly say where its possibilities must stop.

The key to the very alphabet of these theurgic powers was lost after the last gnostic had been hunted to death by the ferocious persecution of the Church; and as gradually Mysteries, Hierophants, Theophany and Theurgy became obliterated from the minds of men until they remained in them only as a vague tradition, all this was finally forgotten. But at the period of the Renaissance, in Germany, a learned Theosophist, a Philosopher *per ignem*, as they called themselves, rediscovered some of the lost secrets of the Phrygian priests and of the *Asclepieia*. It was the great and unfortunate physician-Occultist, Paracelsus, the greatest Alchemist of the age. That genius it was, who during the Middle Ages was the first to publicly recommend the action of the magnet in the cure of certain diseases. Theophrastus Paracelsus -- the "quack" and "drunken impostor" in the opinion of the said scientific "bald infants" of his day, and of their successors in ours -- inaugurated among other things in the seventeenth century, that which has become a profitable branch in trade in the nineteenth. It is he who invented and used for the cure of various muscular and nervous diseases magnetized bracelets, armlets, belts, rings, collars and leglets; only his magnets cured far more efficaciously than do the electric belts of to-day. Van Helmont, the successor of Paracelsus, and Robert Fludd, the Alchemist and Rosicrucian, also applied magnets in the treatment of their patients. Mesmer in the eighteenth, and the Marquis de Puysegur in the nineteenth century only followed in their footsteps.

In the large curative establishment founded by Mesmer at Vienna, he employed, besides magnetism, electricity, metals and a variety of woods. His fundamental doctrine was that of the Alchemists. He believed that metals, as also woods and plants have all an affinity with and bear a close relation to, the human organism. Everything in the Universe has developed from one homogeneous primordial substance differentiated into incalculable species of matter, and everything is destined to return thereinto. The secret of healing, he maintained, lies in the knowledge of correspondences and affinities between kindred atoms. Find that metal, wood, stone, or plant that has the most correspondential affinity with the body of the sufferer; and, whether through internal or external use, that particular agent imparting to the patient additional strength to fight disease -- (developed generally through the introduction of some foreign element into the constitution) -- and to expel it, will lead invariably to his cure. Many and marvelous were such cures effected by Anton Mesmer. Subjects with heart-disease were made well. A lady of high station, condemned to death, was completely restored to health by the application of certain sympathetic woods. Mesmer himself, suffering from acute rheumatism, cured it completely by using specially-prepared magnets.

In 1774 he too happened to come across the theurgic secret of direct vital transmission; and so highly interested was he, that he abandoned all his old methods to devote himself entirely to the new discovery. Henceforward he *mesmerized* by gaze and passes, the natural magnets being abandoned. The mysterious effects of such manipulations were called by him -- *animal magnetism*. This brought to Mesmer a mass of followers and disciples. The *new* force was experimented with in almost every city and town of Europe and found everywhere an actual fact.

About 1780, Mesmer settled in Paris, and soon the whole metropolis, from the Royal family down to the last hysterical *bourgeoise*, were at his feet. The clergy got frightened and cried -- "the Devil"! The licensed "leeches" felt an ever-growing deficit in their pockets; and the aristocracy and the Court found themselves on the verge of madness from mere excitement. No use repeating too well-known facts, but the memory of the reader may be refreshed with a few details he may have forgotten.

It so happened that just about that time the official Academical Science felt very proud. After centuries of mental stagnation in the realm of medicine and general ignorance, several determined steps in the direction of real knowledge had finally been made. Natural sciences had achieved a decided success, and chemistry and physics were on a fair way to progress. As the *Savants* of a century ago had not yet grown to that height of sublime modesty which characterizes so pre-eminently their modern successors -- they felt very much puffed up with their greatness. The moment for praiseworthy humility, followed by a confession of the relative insignificance of the knowledge of the period -- and even of modern knowledge for the matter of that -- compared to that which the ancients knew, had not yet arrived. Those were days of naive boasting of the peacocks of science displaying in a body their tails, and demanding universal recognition and admiration. The Sir Oracles were not as numerous as they are now, yet their number was considerable. And indeed, had not the Dulcamaras of public fairs been just visited with ostracism? Had not the *leeches* well nigh disappeared to make room for diplomaed physicians with royal licenses to kill and bury a *piacere ad libitum*? Hence, the nodding "Immortal" in his academical chair was regarded as the sole competent authority in the decision of questions he had never studied, and for rendering verdicts about that which he had never heard of. It was the REIGN OF REASON, and of Science -- in its teens; the beginning of the great deadly struggle between Theology and Facts, Spirituality and Materialism. In the educated classes of Society too much faith had been succeeded by no faith at all. The cycle of Science-worship had just set in, with its pilgrimages to the Academy, the Olympus where the "Forty Immortals" are enshrined, and its raids upon every one who refused to manifest a noisy admiration, a kind of juvenile calf's enthusiasm, at the door of the Fane of Science. When Mesmer arrived, Paris divided its allegiance between the Church which attributed all kinds of phenomena except its own *divine miracles* to the Devil, and the Academy, which believed in neither God nor Devil, but only in its own infallible wisdom.

But there were minds which would not be satisfied with either of these beliefs. Therefore, after Mesmer had forced all Paris to crowd to his halls, waiting hours to obtain a place in the chair round the miraculous *baquet*, some people thought that it was time real truth should be found out. They had laid their legitimate desires at the royal feet, and the King forthwith commanded his learned Academy to look into the matter. Then it was, that awakening from their chronic nap, the "Immortals" appointed a committee of investigation, among which was Benjamin Franklin,

and chose some of the oldest, wisest and baldest among their "Infants" to watch over the Committee. This was in 1784. Every one knows what was the report of the latter and the final decision of the Academy. The whole transaction looks now like a general rehearsal of the play, one of the acts of which was performed by the "Dialectical Society" of London and some of England's greatest Scientists, some eighty years later.

Indeed, notwithstanding a counter report by Dr. Jussieu, an Academician of the highest rank, and the Court physician D'Eslon, who, as eye-witnesses to the most striking phenomena, demanded that a careful investigation should be made by the Medical Faculty of the therapeutic effects of the magnetic fluid -- their demand fell through. The Academy disbelieved her most eminent Scientists. Even Sir B. Franklin, so much at home with cosmic electricity, would not recognize its fountain head and primordial source, and along with Bailly, Lavoisier, Magendie, and others, proclaimed Mesmerism a delusion. Nor had the second investigation which followed the first -- namely in 1825 -- any better results. The report was once more squashed (*vide Isis Unveiled*, vol. I, pp. 171-176).

Even now when experiment has amply demonstrated that "Mesmerism" or animal magnetism, now known as hypnotism (a sorry effect, forsooth, of the "Breath of Cybele") is *a fact*, we yet get the majority of scientists denying its actual existence. Small fry as it is in the majestic array of experimental psycho-magnetic phenomena, even hypnotism seems too incredible, *too mysterious*, for our Darwinists and Haeckelians. One needs too much moral courage, you see, to face the suspicion of one's colleagues, the doubt of the public, and the giggling of fools. "Mystery and charlatanism go hand in hand," they say; and "self-respect and the dignity of the profession," as Magendie remarks in his *Physiologie Humaine*, "demand that the well informed physician should remember how readily mystery glides into charlatanism." Pity the "well informed physician" should fail to remember that physiology among the rest is full of mystery -- profound, inexplicable mystery from A to Z -- and ask whether, starting from the above "truism," he should not throw overboard Biology and Physiology as the greatest pieces of charlatanry in modern Science. Nevertheless, a few in the well-meaning minority of our physicians have taken up seriously the investigation of hypnotism. But even they, having been reluctantly compelled to confess the reality of its phenomena, still persist in seeing in such manifestations no higher a factor at work than the purely material and physical forces, and deny these their legitimate name of animal magnetism. But as the Rev. Mr. Haweis (of whom more presently) just said in the *Daily Graphic* . . . "The Charcot phenomena are, for all that, in many ways identical with the mesmeric phenomena, and hypnotism must properly be considered rather as a branch of mesmerism than as something distinct from it. Anyhow, Mesmer's facts, now generally accepted, were at first stoutly denied." And they are still so denied.

But while they deny Mesmerism, they rush into Hypnotism, despite the now scientifically recognized dangers of this science, in which medical practitioners in France are far ahead of the English. And what the former say is, that between the two states of mesmerism (or magnetism as they call it, across the water) and hypnotism "there is an abyss." That one is beneficent, the other maleficent, as it evidently must be; since, according to both Occultism and modern Psychology, *hypnotism is produced by the withdrawal of the nervous fluid from the capillary nerves*, which being, so to say, the sentries that keep the doors of our senses opened, getting *anaesthetized* under hypnotic conditions, allow these to get closed. A. H. Simonin reveals many a wholesome

truth in his excellent work, "*Solution du probleme de la suggestion hypnotique.*" (1) Thus he shows that while "in Magnetism (mesmerism) there occurs in the *subject* a great development of moral faculties"; that his thoughts and feelings "become loftier, and the senses acquire an abnormal acuteness"; in hypnotism, on the contrary, "the subject becomes *a simple mirror.*" It is Suggestion which is the true motor of every action in the hypnotic: and if, occasionally, "seemingly marvelous actions are produced, these are due to the hypnotizer, not to the subject." Again . . . "In hypnotism instinct, i.e., the *animal*, reaches its greatest development; so much so, indeed, that the aphorism 'extremes meet' can never receive a better application than to magnetism and hypnotism." How true these words, also, as to the difference between the mesmerized and the hypnotized subjects. "In one, his ideal nature, his moral self -- the reflection of his divine nature -- are carried to their extreme limits, and the subject becomes almost a celestial being (*un ange*). In the other, it is his *instincts* which develop in a most surprising fashion. The hypnotic lowers himself to the level of the animal. From a physiological standpoint, magnetism (Mesmerism) is comforting and curative, and hypnotism, which is but the result of an unbalanced state, is -- most dangerous."

Thus the adverse Report drawn by Bailly at the end of last century has had dire effects in the present, but it had its *Karma* also. Intended to kill the "Mesmeric" *craze*, it reacted as a death-blow to the public confidence in scientific decrees. In our day the *Non-Possumus* of the Royal Colleges and Academies is quoted on the Stock Exchange of the world's opinion at a price almost as low as the *Non-Possumus* of the Vatican. The days of authority whether human or divine, are fast gliding away; and we see already gleaming on future horizons but one tribunal, supreme and final, before which mankind will bow -- the Tribunal of Fact and Truth.

Aye, to this tribunal without appeal even liberal clergymen and famous preachers make obeisance in our day. The parts have now changed hands, and in many instances it is the successors of those who fought tooth and nail for the reality of the Devil and his direct interference with psychic phenomena, for long centuries, who come out publicly to upbraid science. A remarkable instance of this is found in an excellent letter (just mentioned) by the Rev. Mr. Haweis to the *Graphic*. The learned preacher seems to share our indignation at the unfairness of the modern scientists, at their suppression of truth, and ingratitude to their ancient teachers. His letter is so interesting that its best points must be immortalized in our magazine. Here are some fragments of it. Thus he asks: --

Why can't our scientific men say: "We have blundered about Mesmerism; it's practically true"? Not because they are men of science, but simply because they are human. No doubt it is humiliating when you have dogmatized in the name of science to say, "I was wrong." But is it not more humiliating to be found out; and is it not most humiliating, after shuffling and wriggling hopelessly in the inexorable meshes of serried facts, to collapse suddenly, and call the hated net a "suitable enclosure," in which forsooth, you don't mind being caught? Now this, as it seems to me, is precisely what Messrs. Charcot and the French hypnotists and their medical admirers in England are doing. Ever since Mesmer's death at the age of eighty, in 1815, the French and English "Faculty," with some honorable exceptions, have ridiculed and denied the facts as well as the theories of Mesmer, but now, in 1890, a host of scientists suddenly agree, while wiping out as best

they may the name of Mesmer, to rob him of all his phenomena, which they quietly appropriate under the name of "hypnotism," "suggestion," "Therapeutic Magnetism," "psychopathic Massage," and all the rest of it. Well, "What's in a name?"

I care more for things than names, but I reverence the pioneers of thought who have been cast out, trodden under foot, and crucified by the orthodox of all ages, and I think the least scientists can do for men like Mesmer, Du Potet, Puysegur, or Mayo and Elliotson, now they are gone, is to "build their sepulchers."

But Mr. Haweis might have added instead, the amateur Hypnotists of Science dig with their own hands the graves of many a man and woman's intellect; they enslave and paralyze freewill in their "subjects," turn immortal men into soulless, irresponsible automata, and vivisection *their souls* with as much unconcern as they vivisection the bodies of rabbits and dogs. In short, they are fast blooming into "sorcerers," and are turning science into a vast field of black magic. The reviewer, however, lets the culprits off easily; and, remarking that he accepts "the distinction" [between Mesmerism and Hypnotism] "without pledging himself to any theory," he adds: --

I am mainly concerned with the facts, and what I want to know is why these cures and abnormal states are trumpeted about as modern discoveries, while the "faculty" still deride or ignore their great predecessors without having themselves a theory which they can agree upon or a single fact which can be called new. The truth is we are just blundering back with toil to work over again the old disused mines of the ancients; the rediscovery of these occult sciences is exactly matched by the slow recovery of sculpture and painting in modern Europe. Here is the history of occult science in a nutshell. (1) Once known. (2) Lost. (3) Rediscovered. (4) Denied. (5) Reaffirmed, and by slow degrees, under new names, victorious. The evidence for all this is exhaustive and abundant. Here it may suffice to notice that Diodorus Siculus mentions how the Egyptian priests, ages before Christ, attributed clairvoyance induced for therapeutic purposes to Isis. Strabo ascribes the same to Serapis, while Galen mentions a temple near Memphis famous for these Hypnotic cures. Pythagoras, who won the confidence of the Egyptian priests, is full of it. Aristophanes in "Plutus" describes in some detail a Mesmeric cure -- [*kai prota men de tes kephales ephepsato*], etc., "and first he began to handle the head." Caelius Aurelianus describes manipulations (1569) for disease "conducting the hands from the superior to the inferior parts"; and there was an old Latin proverb -- *Ubi dolor ibi digitus*, "Where pain, there finger." But time would fail me to tell of Paracelsus (1462) (2) and his "deep secret of Magnetism"; of Van Helmont (1644) (3) and his "faith in the power of the hand in disease." Much in the writings of both these men was only made clear to the moderns by *the experiments of Mesmer*, and in view of modern Hypnotists it is clearly with him and his disciples that we have chiefly to do. He claimed, no doubt, to transmit an animal magnetic fluid, which I believe the Hypnotists deny.

They do, they do. But so did the scientists with regard to more than one truth. To deny "an animal magnetic fluid" is surely no more absurd than to deny the circulation of the blood, as they have so energetically done.

A few additional details about Mesmerism given by Mr. Haweis may prove interesting. Thus he reminds us of the answer written by the much wronged Mesmer to the Academicians after their unfavorable Report, and refers to it as "prophetic words."

"You say that Mesmer will never hold up his head again. If such is the destiny of the man it is not the destiny of the truth, which is in its nature imperishable, and will shine forth sooner or later in the same or some other country with more brilliancy than ever, and its triumph will annihilate its miserable detractors." Mesmer left Paris in disgust, and retired to Switzerland to die; but the illustrious Dr. Jussieu became a convert. Lavater carried Mesmer's system to Germany, while Puysegur and Deleuze spread it throughout provincial France, forming innumerable "harmonic societies" devoted to the study of therapeutic magnetism and its allied phenomena of thought-transference, hypnotism, and clairvoyance.

Some twenty years ago I became acquainted with perhaps the most illustrious disciple of Mesmer, the aged Baron du Potet. (4) Round this man's therapeutic and mesmeric exploits raged, between 1830 and 1846, a bitter controversy throughout France. A murderer had been tracked, convicted, and executed solely on evidence supplied by one of Du Potet's clairvoyants. The *Juge de Paix* admitted thus much in open court. This was too much for even sceptical Paris, and the Academy determined to sit again and, if possible, crush out the superstition. They sat, but, strange to say, this time they were converted. Itard, Fouquier, Guersent, Bourdois de la Motte, the cream of the French faculty, pronounced the phenomena of mesmerism to be genuine -- cures, trances, clairvoyance, thought-transference, even reading from closed books; and from that time an elaborate nomenclature was invented, blotting out as far as possible the detested names of the indefatigable men who had compelled the scientific assent, while enrolling the main facts vouched for by Mesmer, Du Potet, and Puysegur among the undoubted phenomena to be accepted, on whatever theory, by medical science. . . .

Then comes the turn of this foggy island and its befogged scientists.

"Meanwhile," [goes on the writer], England was more stubborn. In 1846 the celebrated Dr. Elliot son, a popular practitioner, with a vast *clientele*, pronounced the famous Harveian oration, in which he confessed his belief in Mesmerism. He was denounced by the doctors with such thorough results that he lost his practice, and died well-nigh ruined, if not heart-broken. The Mesmeric Hospital in Marylebone Road has been established by him. Operations were successfully performed under Mesmerism, and all the phenomena which have lately occurred at Leeds and elsewhere to the satisfaction of the doctors were produced in Marylebone fifty-six years ago. Thirty-five years ago Professor Lister did the same -- but the introduction of chloroform being more speedy and certain as an

anaesthetic, killed for a time the mesmeric treatment. The public interest in Mesmerism died down, and the Mesmeric Hospital in the Marylebone Road, which had been under a cloud since the suppression of Elliotson, was at last closed. Lately we know what has been the fate of Mesmer and Mesmerism. Mesmer is spoken of in the same breath with Count Cagliostro, and Mesmerism itself is seldom mentioned at all; but, then, we hear plenty of electro-biology, therapeutic magnetism and hypnotism -- just so. Oh, shades of Mesmer, Puysegur, Du Potet, Elliotson -- *sic vos non vobis!* Still, I say *Palnam qui meruit ferat*. When I knew Baron du Potet he was on the brink of the grave, and nearly eighty years old. He was an ardent admirer of Mesmer; he had devoted his whole life to therapeutic magnetism, and he was absolutely dogmatic on the point that a real magnetic aura passed from the Mesmerist to the patient. "I will show you this," he said one day, as we both stood by the bedside of a patient in so deep a trance that we ran needles into her hands and arms without exciting the least sign or movement. The old Baron continued: "I will, at the distance of a foot or two, determine slight convulsions in any part of her body by simply moving my hand above the part, without any contact." He began at the shoulder, which soon set up a twitching. Quiet being restored, he tried the elbow, then the wrist, then the knee, the convulsions increasing in intensity according to the time employed. "Are you quite satisfied?" I said, "Quite satisfied"; "and," continued he, "any patient that I have tested I will undertake to operate upon through a brick wall at a time and place where the patient shall be ignorant of my presence or my purpose. This," added Du Potet, "was one of the experiences which most puzzled the Academicians at Paris. I repeated the experiment again and again under every test and condition, with almost invariable success, until the most sceptical was forced to give in."

We have accused science of gliding full sail down to the Maelstrom of Black Magic, by practising that which ancient Psychology -- the most important branch of the Occult Sciences -- has always declared as Sorcery in its application to the *inner* man. We are prepared to maintain what we say. We mean to prove it one of these days, in some future articles, basing ourselves on facts published and the actions produced by the Hypnotism of Vivisectionists themselves. That they are unconscious sorcerers does not make away with the fact that they do practice the Black Art *bel et bien*. In short the situation is this. The minority of the learned physicians and other scientists experiment in "hypnotism" because they have come to see something in it; while the majority of the members of the R.C.P.'s still deny the actuality of animal magnetism in its mesmeric form, even under its modern mask -- hypnotism. The former -- entirely ignorant of the fundamental laws of animal magnetism -- experiment at hap-hazard, almost blindly. To remain consistent with their declarations (*a*) that hypnotism is *not* mesmerism, and (*b*) that a magnetic aura or fluid passing from the mesmerizer (or hypnotizer) is pure fallacy -- they have no right, of course, to apply the laws of the older to the younger science. Hence they interfere with, and awaken to action the most dangerous forces of nature, without being aware of it. Instead of healing diseases -- the only use to which animal magnetism under its new name can be *legitimately* applied -- they often inoculate the *subjects* with their own physical as well as mental ills and vices. For this, and the ignorance of their colleagues of the minority, the disbelieving majority of the Sadducees are greatly responsible. For, by opposing them, they impede free

action, and take advantage of the Hypocratic oath, to make them powerless to admit and do much that the believers might and would otherwise do. But as Dr. A. Teste truly says in his work -- "*There are certain unfortunate truths which compromise those who believe in them, and those especially who are so candid as to avow them publicly.*" Thus the reason of hypnotism not being studied on its proper lines is self-evident.

Years ago it was remarked: "It is the duty of the Academy and medical authorities to study Mesmerism (i.e., the occult sciences in its spirit) and to subject it to trials; finally, *to take away the use and practice of it from persons quite strangers to the art, who abuse this means, and make it an object of lucre and speculation.*" He who uttered this great truth was "the voice speaking in the desert." But those having some experience in occult psychology would go further. They would say it is incumbent on every scientific body -- nay, on every government -- to put an end to public exhibitions of this sort. By trying the *magic* effect of the human will on weaker wills, by deriding the existence of *occult* forces in Nature -- forces whose name is legion -- and yet calling out these, under the pretext that they are *no* independent forces at all, not even psychic in their nature, but "connected with known *physical* laws" (Binet and Fere), men in authority are virtually responsible for all the dire effects that are and will be following their dangerous public experiments. Verily Karma -- the terrible but just Retributive Law -- will visit all those who develop the most awful results in the future, generated at those public exhibitions for the amusement of the profane. Let them only think of dangers bred, of new forms of diseases, mental and physical, begotten by such insane handling of psychic will! This is as bad on the moral plane as the artificial introduction of animal matter into the human blood, by the infamous Brown Sequard method, is on the physical. They laugh at the occult sciences and deride Mesmerism? Yet this century will not have passed away before they have undeniable proofs that the idea of a crime suggested for experiment's sake is not removed by a reversed current of the will as easily as it is inspired. They may learn that if the outward expression of the idea of a misdeed "suggested" may fade out at the will of the operator, the *active living germ* artificially implanted does not disappear with it; that once dropped into the seat of the human -- or, rather, the animal -- passions, it may lie dormant there for years sometimes, to become suddenly awakened by some unforeseen circumstance into realization. Crying children frightened into silence by the *suggestion* of a monster, a devil standing in the corner, by a foolish nurse, have been known to become insane twenty or thirty years later on the same subject. There are mysterious, secret drawers, dark nooks and hiding-places in the labyrinth of our memory, still unknown to physiologists, and which open only once, rarely twice, in man's lifetime, and that only under very abnormal and peculiar conditions. But when they do, it is always some heroic deed committed by a person the least calculated for it, or -- a terrible crime perpetrated, the reason for which remains for ever a mystery. . . .

Thus experiments in "suggestion" by persons ignorant of the occult laws, are the most dangerous of pastimes. The action and reaction of ideas on the *inner lower* "Ego," has never been studied so far, because that Ego itself is *terra incognita* (even when not denied) to the men of science. Moreover, such performances before a promiscuous public are a danger in themselves. Men of undeniable scientific education who experiment on Hypnotism in public, lend thereby the sanction of their names to such performances. And then every unworthy speculator acute enough to understand the process may, by developing by practice and perseverance the same force in himself, apply it to his own selfish, often criminal, ends.

Result on Karmic lines: every Hypnotist, every man of Science, however well-meaning and honorable, once he has allowed himself to become the unconscious instructor of one who learns but to abuse the sacred science, becomes, of course, morally the confederate of every crime committed by this means.

Such is the consequence of public "Hypnotic" experiments which thus lead to, and virtually are, BLACK MAGIC.

FOOTNOTES:

1. See the review of his work in the *Journal du Magnetisme*, Mai, Juin, 1890, founded in 1845 by Baron du Potet, and now edited by H. Durville, in Paris. ([return to text](#))
2. This date is an error. Paracelsus was born at Zurich in 1493. ([return to text](#))
3. This is the date of Van Helmont's death; he was born in 1577. ([return to text](#))
4. Baron du Potet was for years Honorary member of the Theosophical Society. Autograph letters were received from him and preserved at Adyar, our Headquarters, in which he deplors the flippant unscientific way in which Mesmerism (then on the eve of becoming the "hypnotism" of science) was handled "*par les charlatans du jour*." Had he lived to see the secret science in its full travesty as hypnotism, his powerful voice might have stopped its terrible present abuses and degradation into a commercial Punch and Judy show. Luckily for him, and unluckily for truth, the greatest adept of Mesmerism in Europe of this century -- is dead. ([return to text](#))

The Signs of the Times

It is intensely interesting to follow season after season the rapid evolution and change of public thought in the direction of the mystical. The educated mind is most undeniably attempting to free itself from the heavy fetters of materialism. The ugly caterpillar is writhing in the agonies of death, under the powerful efforts of the psychic butterfly to escape from its science-built prison, and every day brings some new glad tidings of one or more such mental births to light.

As the New York "Path" truly remarks in its September issue, when "Theosophical and kindred topics . . . are made the texts for novels," and, we may add, scientific essays and *brochures*, "the implication is that interest in them has become diffused through all social ranks." That kind of literature is "paradoxically proof that Occultism has passed beyond the region of careless amusement and entered that of serious enquiry." The reader has but to throw a retrospective glance at the publications of the last few years to find that such topics as Mysticism, Magic, Sorcery, Spiritualism, Theosophy, Mesmerism, or, as it is now called, Hypnotism, all the various branches in short of the *Occult* side of nature, are becoming predominant in every kind of literature. They visibly increase in proportion to the efforts made to discredit the movements in the cause of truth, and strangle enquiry -- whether on the field of theosophy or spiritualism -- by trying to besmear their most prominent heralds, pioneers and defenders, with tar and feathers.

The key-note for mystic and theosophic literature was Marion Crawford's *Mr. Isaacs*. It was followed by his *Zoroaster*. Then followed *The Romance of Two Worlds*, by Marie Corelli; R. Louis Stevenson's *Dr. Jekyll and Mr. Hyde*; *The Fallen Idol*, by Anstey; *King Solomon's Mines* and the thrice famous *She*, by Rider Haggard; *Affinities* and *The Brother of the Shadow*, by Mrs. Campbell Praed; Edmund Downey's *House of Tears*, and many others less noticeable. And now there comes a fresh outburst in Florence Marryat's *Daughter of the Tropics*, and F. C. Philips' *Strange Adventures of Lucy Smith*. It is unnecessary to mention in detail the literature produced by avowed theosophists and occultists, some of whose works are very remarkable, while others are positively scientific, such as S. L. Macgregor Mathers' *Kabbalah Unveiled*, and Dr. F. Hartmann's *Paracelsus, Magic, White and Black*, etc. We have also to note the fact that theosophy has now crossed the Channel, and is making its way into French literature. *La France* publishes a strange romance by Ch. Chincholle, pregnant with theosophy, occultism and mesmerism, and called *La Grande Pretresse*, while *La Revue politique et litteraire* (19 Feb. 1887, *et seq.*) contained over the signature of Th. Bentzon, a novel called *Emancipee*, wherein esoteric doctrines and adepts are mentioned in conjunction with the names of well known theosophists. A sign of the times!

Literature -- especially in countries free from government censorship -- is the public heart and pulse. Besides the glaring fact that were there no demand there would be no supply, current literature is produced only to please, and is therefore evidently the mirror which faithfully reflects the state of the public mind. True, Conservative editors, and their submissive correspondents and reporters, still go on slashing occasionally in print the fair faces of mystic spiritualism and theosophy, and some of them are still found, from time to time, indulging in a *brutal* personal attack. But they do no harm on the whole, except perhaps to their own editorial reputations, as such editors can never be suspected of an exuberance of culture and good taste after certain ungentlemanly personal attacks. They do good on the contrary. For, while the theosophists and spiritualists so attacked, may view the Billingsgate poured upon them in a true Socratean spirit, and console themselves with the knowledge that none of the epithets used can possibly apply to them, on the other hand, *too much* abuse and vilification generally ends by awakening the public sympathy for the victim, in the right-minded and the impartial, at any rate.

In England people seem to like fair play on the whole. It is not *bashi-boozook*-like actions, the doughty deeds of those who delight in mutilating the slain and the wounded, that can find sympathy for any great length of time with the public. If -- as maintained by our lay enemies and repeated by some *naïf* and too sanguine missionary organs -- Spiritualism and Theosophy are "dead as a doornail" (*sic!* -- *vide* American Christian periodicals), -- aye, "dead and buried," why, in such case, good Christian fathers, not leave the dead at rest till "Judgment Day"? And if they are not, then editors -- the profane as well as the clerical -- why should you still fear? Do not show yourselves such cowards if you have the truth on your side. *Magna est veritas et prevalebit*, and "murder will out," as it always has, sooner or later. Open your columns to *free* and fearless discussion, and do as the theosophical periodicals have ever done, and as LUCIFER is now preparing to do. The "bright Son of the morning" fears no light. He courts it, and is prepared to publish any inimical contributions (couched, of course, in decent language), however much at variance with his theosophical views. He is determined to give a fair hearing in any and every case, to both contending parties and allow things and thoughts to be judged on their respective merits. For why, or what should one dread when fact and truth are one's only aim? *Du*

choc des opinions jaillit la verite was said by a French philosopher. If Theosophy and Spiritualism are no better than "gigantic frauds and will-o'-the-wisps of the age" why such *expensive* crusades against both? And if they are not, why should Agnostics and searchers after truth in general, help bigoted and narrow-minded materialists, sectarians and dogmatists to hide our light under a bushel by mere brutal force and usurped authority? It is easy to surprise the good faith of the fair-minded. Still easier to discredit that, which by its intrinsic strangeness, is already unpopular and could hardly be credited in its palmiest days. "We welcome no supposition so eagerly as one which accords with and intensifies our own prejudices" says, in *Don Jesualdo*, a popular author. Therefore, *facts* become often cunningly concocted "frauds"; and self-evident, glaring lies are accepted as gospel truths at the first breeze of Don Basilio's *Calumnia*, by those to whose hard-cruised pre-conceptions such slander is like heavenly dew.

But, beloved enemies, "the light of Lucifer" may, after all, dispel some of the surrounding darkness. The mighty roaring voice of denunciation, so welcome to those whose little spite and hates and mental stagnation in the grasp of the social respectability it panders to, may yet be silenced by the voice of truth -- "the still small voice" -- whose destiny it ever was to first preach in the desert. That cold and artificial light which still seems to shine so dazzlingly over the alleged iniquities of professional mediums and the supposed sins of commission and omission of *non-professional* experimentalists, of free and independent theosophists, may yet be extinguished at the height of all its glory. For it is not quite the perpetual lamp of the alchemist philosopher. Still less is it that "light which never shone on sea or land," that ray of divine intuition, the spark which glimmers latent in the spiritual, never-erring perceptions of man and woman, and which is now awakening -- for its time is at hand. A few years more, and the Aladdin's lamp, which called forth the ministering genius thereof, who, making three salutes to the public, proceeded forthwith to devour mediums and theosophists, like a juggler who swallows swords at a village fair, will get out of order. Its light, over which the anti-theosophists are crowing victory to this day, shall get dim. And then, perhaps, it will be discovered that what was claimed as a direct ray from the source of eternal truth was no better than a penny rush-light, in whose deceitful smoke and soot people got hypnotized, and saw everything upside down. It will be found that the hideous monsters of fraud and imposture had no existence outside the murky and dizzied brains of the Aladdins on their journey of discovery. And that, finally, the good people who listened to them, had been all the time seeing sights and hearing things under unconscious and mutual *suggestion*.

This is a scientific explanation, and requires no black magicians or *dugpas* at work; for "suggestion" as now practised by the sorcerers of science is -- *dugpaship* itself, *pur sang*. No Eastern "adept of the *left hand*" can do more mischief by his infernal art than a grave hypnotizer of the Faculty of Medicine, a disciple of Charcot, or of any other scientific *light* of the first magnitude. In Paris, as in St. Petersburg, crimes have been committed under "suggestion." Divorces have occurred, and husbands have nearly killed their wives and their supposed correspondents, owing to tricks played on innocent and respectable women, who have thus had their fair name and all their future life blasted for ever. A son, under such influence, broke open the desk of an avaricious father, who caught him in the act, and nearly shot him in a fit of rage. One of the keys of Occultism is in the hands of science -- cold, heartless, materialistic, and crassly ignorant of the other truly psychic side of the phenomenon: hence, powerless to draw a line of demarcation between the physiological and the purely spiritual effects of the disease

inoculated, and unable to prevent future results and consequences of which it has no knowledge, and over which it has, therefore, no control.

We find in the "Lotus" of September, 1887, the following:

A French paper, the *Paris*, for August 12th, contains a long and excellent article by G. Montorgueil, entitled, *The Accursed Sciences*, from which we extract the following passage, since we are, unfortunately, unable to quote the whole:

"Some months ago, already, in I forget what case, the question of 'suggestion' was raised and taken account of by the judges. We shall certainly see people in the dock accused of occult malpractices. But how will the prosecution go to work? What arguments will it bring to bear? The crime by 'suggestion' is the ideal of a crime without proof. In such a case the gravest charges will never be more than presumptions, and fugitive presumptions. On what fragile scaffolding of suspicions will the charge rest? No examination, but a moral one, will be possible. We shall have to resign ourselves to hearing the Solicitor-general say to the accused: 'Accused, it appears from a perquisition made into your brain, etc.'

"Ah, the poor jurymen! it is they who are to be pitied. Taking their task to heart, they already have the greatest difficulty in separating the true from the false, even in rough and ready cases, the facts of which are obvious, all the details of which are tangible and the responsibilities clear. And we are going to ask them on their soul and conscience to decide questions of black magic! Verily their reason will not hold out through the fortnight; it will give way before that and sink into thaumaturgy.

"We move fast. The strange trials for sorcery will blossom anew; somnambules who were merely grotesque will appear in a tragic light; the coffee grounds, which so far only risked the police court, will hear their sentence at the assizes. The evil eye will figure among criminal offences. These last years of the XIXth century will have seen us step from progress to progress, till we reach at last this judicial enormity: a second Laubardemont prosecuting another Urbain Grandier."

Serious, scientific, and political papers are full of earnest discussions on the subject. A St. Petersburg "Daily" has a long *feuilleton* on the "Bearing of *Hypnotic Suggestions* upon Criminal Law." "Cases of Hypnotism with criminal motives have of late begun to increase in an ever progressing ratio," it tells its readers. And it is not the only newspaper, nor is Russia the only country where the same tale is told. Careful investigations and researches have been made by distinguished lawyers and medical authorities. Data have been assiduously collected and have revealed that the curious phenomenon -- which sceptics have hitherto derided, and young people have included among their evening *petits jeux innocents* -- is a new and terrible danger to state and society.

Two facts have now become patent to law and science:

(I) *That, in the perceptions of the hypnotized subject, the visionary representations called forth by "suggestion," become real existing actualities, the subject being, for the moment, the automatic executor of the will of the hypnotizer; and --*

(II) *That the great majority of persons experimented upon, is subject to hypnotic suggestion.*

Thus Liebeault found only *sixty* subjects intractable out of the *seven hundred* he experimented upon; and Bernheim, out of 1,014 subjects, failed with only *twenty-six*. The field for the natural-born *jadoo-wala* (sorcery-mongers), is vast indeed! Evil has acquired a play-ground on which it may now exercise its sway upon many a generation of unconscious victims. For crimes undreamt of in the waking state, and felonies of the blackest dye, are now invited and encouraged by the new "accursed science." The real perpetrators of these deeds of darkness may now remain for ever hidden from the vengeance of human justice. The hand which executes the criminal suggestion is only that of an irresponsible automaton, whose memory preserves no trace of it, and who, moreover, is a witness who can easily be disposed of by compulsory suicide -- again under "suggestion." What better means than these could be offered to the fiends of lust and revenge, to those dark Powers -- called human passions -- ever on the look out to break the universal commandment: "Thou shalt not steal, nor murder, nor lust after thy neighbor's wife?" Liebeault *suggested* to a young girl that she should poison herself with prussic acid, and she swallowed the supposed drug without one moment's hesitation; Dr. Liegois *suggested* to a young woman that she owed him 5,000 francs, and the subject forthwith signed a check for the amount. Bernheim *suggested* to another hysterical girl a long and complicated vision with regard to a criminal case. Two days after, although the hypnotizer had not exercised any new pressure upon her in the interim, she repeated distinctly the whole suggested story to a lawyer sent to her for the purpose. Had her evidence been seriously accepted, it would have brought the accused to the guillotine.

These cases present two dark and terrible aspects. From the moral stand point, such processes and *suggestions* leave an indelible stain upon the purity of the subject's nature. Even the innocent mind of a ten year old child can thus be inoculated with vice, the poison-germ of which will develop in his subsequent life.

On the judicial aspect it is needless to enter in great detail. Suffice to say that it is this characteristic feature of the hypnotic state -- the absolute surrender of will and self-consciousness to the hypnotizer -- which possesses such importance, from its bearing upon crime, in the eyes of legal authorities. For if the hypnotizer has the subject entirely at his beck and call, so that he can cause him to commit any crime, acting, so to say, invisibly within him, then what are not the terrible "judicial mistakes" to be expected? What wonder then, that the jurisprudence of one country after the other has taken alarm, and is devising, one after the other, measures for repressing the exercise of hypnotism! In Denmark it has just been forbidden. Scientists have experimented upon sensitives with so much success that a hypnotized victim has been jeered and hooted through the streets on his way to commit a crime, which he would have completed unconsciously, had not the victim been warned beforehand by the hypnotizer.

In Brussels a recent and sad case is well-known to all. A young girl of good family was seduced while in a hypnotized state by a man who had first subjected her to his influence at a social

gathering. She only realized her condition a few months later, when her relatives, who divined the criminal, forced her seducer to make the only possible reparation -- that of marrying his victim.

The French Academy has just been debating the question: how far a hypnotized subject, from a mere victim, can become a regular tool of crime. Of course, no jurist or legislator can remain indifferent to this question; and it was averred that the crimes committed under *suggestion* are so unprecedented that some of them can hardly be brought within the scope of the law. Hence the prudent legal prohibition, just adopted in France, which enacts that no person, save those legally qualified to exercise the medical profession, shall hypnotize any other person. Even the physician who enjoys such legal right is permitted to hypnotize a person only in the presence of another qualified medical man, and with the written permission of the subject. Public *séances* of hypnotism are forbidden, and they are strictly confined to medical *cliniques* and laboratories. Those who break this law are liable to a heavy fine and imprisonment.

But the keynote has been struck, and many are the ways in which this *black art* may be used -- laws notwithstanding. That it will be so used, the vile passions inherent in human nature are sufficient guarantee.

Many and strange will be the romances yet enacted; for truth is often stranger than fiction, and what is thought fiction is still more often truth.

No wonder then that occult literature is growing with every day. Occultism and sorcery are in the air, with no true philosophical knowledge to guide the experimenters and thus check evil results. "Works of *fiction*," the various novels and romances are called. "Fiction" in the arrangement of their characters and the adventures of their heroes and heroines -- admitted. Not so, as to the *facts* presented. These are *no fictions*, but true *presentiments* of what lies in the bosom of the future, and much of which is already born -- nay corroborated by *scientific* experiments. Sign of the times! Close of a psychic cycle! The time for phenomena with, or through mediums, whether professional or otherwise, is gone by. It was the early season of the blossoming, of the era mentioned even in the Bible (1); the tree of Occultism is now preparing for "fruiting," and the Spirit of the Occult is awakening in the blood of the new generations. If the old men only "dream dreams," the young ones see already visions (2), and -- record them in novels and works of fiction. Woe to the ignorant and the unprepared, and those who listen to the sirens of materialistic science! For indeed, indeed, many will be the unconscious crimes committed, and many will be the victims who will innocently suffer death by hanging and decapitation at the hands of the righteous judges and the *too innocent* jurymen, both alike ignorant of the fiendish power of "SUGGESTION."

FOOTNOTES:

1. "It shall come to pass that I will pour out my Spirit upon all flesh; your sons and your daughters shall prophesy, your old men shall dream dreams your young men shall see visions" (Joel ii. 28). ([return to text](#))

2. It is curious to note that Mr. Louis Stevenson, one of the most powerful of our imaginative writers, stated recently to a reporter that he is in the habit of constructing the plots of his tales in *dreams*, and among others that of Dr. Jekyll. "I dreamed," he continued, "the story of *Olalla* . . . and I have at the present moment two unwritten stories which I have likewise dreamed. . . . Even when fast asleep I know that it is I who am inventing." . . . But who knows whether the idea of "invention" is not also "a dream"! ([return to text](#))

Psychic and Noetic Action

. . . I made man just and right,
Sufficient to have stood, though free to fall,
Such I created all th' ethereal powers
And spirits, both them who stood and them who fail'd,
Truly, they stood who stood, and fell who fell . . . -- *Milton*

. . . The assumption that the mind is a real being, which can be acted upon by the brain, and which can act on the body through the brain, is the only one compatible with all the facts of experience. -- George T. Ladd, in the *Elements of Physiological Psychology*

I

A new influence, a breath, a sound -- "as of a rushing mighty wind" -- has suddenly swept over a few Theosophical heads. An idea, vague at first, grew in time into a very definite form, and now seems to be working very busily in the minds of some of our members. It is this: if we would make converts the few *ex-occult* teachings, which are destined to see the light of publicity, should be made, henceforward, *more subservient to, if not entirely at one with modern science*. It is urged that the so-called *esoteric* (1) (or *late esoteric*) cosmogony, anthropology, ethnology, geology -- psychology and, foremost of all, metaphysics -- having been *adapted into* making obeisance to modern (hence *materialistic*) thought, should never henceforth be allowed to contradict (not *openly*, at all events) "scientific philosophy." The latter, we suppose, means the fundamental and accepted views of the great German schools, or of Mr. Herbert Spencer and some other English stars of lesser magnitude; and not only these, but also the deductions that may be drawn from them by their more or less instructed disciples.

A large undertaking this, truly; and one, moreover, in perfect conformity with the policy of the mediaeval Casuists, who distorted truth and even suppressed it, if it clashed with *divine Revelation*. Useless to say that we decline the compromise. It is quite possible -- nay, probable and almost unavoidable -- that "the mistakes made" in the rendering of such abstruse metaphysical tenets as those contained in Eastern Occultism, should be "frequent and often important." But then all such have to be traced back to the interpreters, not to the system itself. They have to be corrected on the authority of the same Doctrine, checked by the teachings grown on the rich and steady soil of *Gupta Vidya*, not by the speculations that blossom forth today, to die tomorrow -- on the shifting sands of modern scientific guesswork, especially in all that

relates to psychology and mental phenomena. Holding to our motto, "There is no religion higher than truth," we refuse most decidedly to pander to *physical* science. Yet, we may say this: If the so-called *exact* sciences limited their activity only to the physical realm of nature: if they concerned themselves strictly with surgery, chemistry -- up to its legitimate boundaries, and with physiology -- so far as the latter relates to the structure of our corporeal frame, then the Occultists would be the first to seek help in modern sciences, however many their blunders and mistakes. But once that over-stepping material Nature the physiologists of "animalistic" (2) school pretend to meddle with, and deliver *ex cathedra dicta* on, the higher functions and phenomena of the mind, saying that a careful analysis brings them to a firm conviction that no more than the animal is man a *free-agent*, far less a responsible one -- then the Occultist has a far greater right than the average modern "Idealist" to protest. And the Occultist asserts that no materialist -- a prejudiced and one-sided witness at best -- can claim any authority in the question of mental physiology, or that which is now called by him the *physiology of the soul*. No such noun can be applied to the word "soul," unless, indeed, by soul only the lower, *psychic* mind is meant, or that which develops in man (proportionally with the perfection of his brain) into *intellect*, and in the animal into a *higher* instinct. But since the great Charles Darwin taught that "our *ideas* are animal motions of the organ of sense" everything becomes possible to the modern physiologist.

Thus, to the great distress of our scientifically inclined Fellows, it is once more *Lucifer's* duty to show how far we are at loggerheads with exact science, or shall we say, how far the conclusions of that science are drifting away from truth and fact. By "science" we mean, of course, the majority of the men of science; the best minority, we are happy to say, is on our side, at least as far as free will in man and the immateriality of the mind are concerned. The study of the "Physiology" of the Soul, of the Will in man and of his *higher Consciousness* from the standpoint of genius and its manifesting faculties, can never be summarized into a system of general ideas represented by brief formulae; no more than the *psychology of material nature* can have its manifold mysteries solved by the mere analysis of its physical phenomena. *There is no special organ of will*, any more than there is a *physical basis* for the activities of self-consciousness.

"If the question is pressed as to the *physical basis* for the activities of self-consciousness, no answer can be given or suggested. . . . From its very nature, that marvelous verifying *actus* of mind in which it recognizes the states as its own, can have no analogous or corresponding material substratum. It is impossible to specify any physiological process representing this unifying actus; it is even impossible to imagine how the description of any such process could be brought into intelligible relation with this unique mental power." (3)

Thus, the whole conclave of psycho-physiologists may be challenged to correctly define Consciousness, and they are sure to fail, because Self-consciousness belongs alone to man and proceeds from the SELF, the higher Manas. Only, whereas the psychic element (or *Kama-manas*) (4) is common to both the animal and the human being -- the far higher degree of its development in the latter resting merely on the greater perfection and sensitiveness of his cerebral cells -- no physiologist, not even the cleverest, will ever be able to solve the mystery of the human mind, in its highest spiritual manifestation, or in its dual aspect of the *psychic* and the

noetic (or the *manasic*), (5) or even to comprehend the intricacies of the former on the purely material plane -- unless he knows something of, and is prepared to admit the presence of this dual element. This means that he would have to admit a lower (animal), and a higher (or divine) mind in man, or what is known in Occultism as the "personal" and the "impersonal" *Egos*. For, between the *psychic* and the *noetic*, between the *personality* and the *individuality*, there exists the same abyss as between a "Jack the Ripper," and a holy Buddha. Unless the physiologist accepts all this, we say, he will ever be led into a quagmire. We intend to prove it.

As all know, the great majority of our learned "Didymi" reject the idea of free will. Now this question is a problem that has occupied the minds of thinkers for ages; every school of thought having taken it up in turn and left it as far from solution as ever. And yet, placed as it is in the foremost ranks of philosophical quandaries, the modern "psycho-physiologists" claim in the coolest and most bumptious way to have cut the Gordian knot for ever. For them the feeling of personal free agency is an error, an illusion, "the collective hallucination of mankind." This conviction starts from the principle that no mental activity is possible without a brain, and that there can be no brain without a body. As the latter is, moreover, subject to the general laws of a material world where all is based on necessity, and where there is no spontaneity, our modern psycho-physiologist has *nolens volens* to repudiate any self-spontaneity in human action. Here we have, for instance, a Lausanne professor of physiology, A. A. Herzen, to whom the claim of free will in man appears as the most *unscientific* absurdity. Says this oracle: --

"In the boundless physical and chemical laboratory that surrounds man, organic life represents quite an unimportant group of phenomena; and amongst the latter, the place occupied by life having reached to the stage of consciousness, is so minute that it is absurd to exclude man from the sphere of action of a general law, in order to allow in him the existence of a subjective spontaneity or a free will standing outside of that law" -- *Psychophysiologie Generale*

For the Occultist who knows the difference between the psychic and the noetic elements in man, this is pure trash, notwithstanding its sound scientific basis. For when the author puts the question -- if psychic phenomena do not represent the results of an action of a molecular character whither then does motion disappear after reaching the sensory centers? -- we answer that we never denied the fact. But what has this to do with a free will? That every phenomenon in the visible Universe has its genesis in motion, is an old axiom in Occultism; nor do we doubt that the psycho-physiologist would place himself at loggerheads with the whole conclave of exact scientists were he to allow the idea that at a given moment a whole series of physical phenomena may disappear in the vacuum. Therefore, when the author of the work cited maintains that the said force does not disappear upon reaching the highest nervous centers, but that it is forthwith transformed into another series, viz., that of psychic manifestations, into thought, feeling, and consciousness, just as this same psychic force when applied to produce some work of a physical (e.g., muscular) character gets transformed into the latter -- Occultism supports him, for it is the first to say that all psychic activity, from its lowest to its highest manifestations, is "nothing but - - motion."

Yes; it *is* MOTION; but not all "molecular" motion, as the writer means us to infer. Motion as the GREAT BREATH (*vide Secret Doctrine*, vol. I, *sub voce*) -- ergo "sound" at the same time --

is the substratum of Kosmic-Motion. It is beginningless and endless, the one *eternal life*, the basis and genesis of the subjective and the objective universe; for LIFE (or Be-ness) is the *fons et origo* of existence or being. But molecular motion is the lowest and most material of its finite manifestations. And if the general law of the conservation of energy leads modern science to the conclusion that psychic activity only represents a special form of motion, this same law, guiding the Occultists, leads them also to the same conviction -- and to something else besides, which psycho-physiology leaves entirely out of all consideration. If the latter has discovered only in this century that psychic (we say even spiritual) action is subject to the same general and immutable laws of motion as any other phenomenon manifested in the objective realm of Kosmos, and that in both the organic and the *inorganic* (?) worlds every manifestation, whether conscious or unconscious, represents but the result of a collectivity of causes, then in Occult philosophy this represents merely the A, B, C, of its science. "All the world is the *Svara*; *Svara* is the Spirit itself" -- the ONE LIFE or *motion*, say the old books of Hindu Occult philosophy. "The proper translation of the word *Svara* is the *current of the life wave*," says the author of *Nature's Finer Forces*, (6) and he goes on to explain: --

It is that wavy motion which is the cause of the evolution of cosmic undifferentiated matter into the differentiated universe. . . . From whence does this motion come? This motion is the spirit itself. The word *atma* (universal soul) used in the book (*vide infra*), itself carries the idea of eternal motion, coming as it does from the root, AT, or eternal motion; and it may be significantly remarked, that the root AT is connected with, is in fact simply another form of, the roots AH, breath, and AS, being. All these roots have for their origin the sound produced by the breath of animals (living beings). . . . The primeval current of the life-wave is then the same which assumes in man the form of inspiratory and expiratory motion of the lungs, and this is the all-pervading source of the evolution and involution of the universe. . . .

So much about *motion* and the "conservation of energy" from old *books on magic* written and taught ages before the birth of inductive and exact modern science. For what does the latter say more than these books in speaking, for instance, about animal *mechanism*, when it says: --

From the visible atom to the celestial body lost in space, *everything* is subject to motion . . . kept at a definite distance one from the other, in proportion to the motion which animates them, the molecules present constant relations, which they lose only by the addition or the subtraction of a certain quantity of motion. (7)

But Occultism says more than this. While making of motion *on the material plane* and of the conservation of energy, two fundamental laws, or rather two aspects of the same omnipresent law -- *Svara*, it denies point blank that these have anything to do with the *free will* of man which belongs to quite a different plane. The author of *Psychophysiologie Generale*, treating of his *discovery* that psychic action is but motion, and the result of a collectivity of causes -- remarks that as it is so, there cannot be any further discussion upon spontaneity -- in the sense of any native internal proneness created by the human organism; and adds that the above puts an end to all claim for *free will!* The Occultist denies the conclusion. The actual fact of man's psychic (we say *manasic* or noetic) *individuality* is a sufficient warrant against the assumption; for in the case

of this conclusion being correct, or being indeed, as the author expresses it, the *collective hallucination of the whole mankind throughout the ages*, there would be an end also to psychic individuality.

Now by "psychic" individuality we mean that self-determining power which enables man to override circumstances. Place half a dozen animals of the same species under the same circumstances, and their actions while not identical, will be closely similar; place half a dozen men under the same circumstances and their actions will be as different as their characters, i.e., their *psychic individuality*.

But if instead of "psychic" we call it the higher Self-conscious Will, then having been shown by the science of psycho-physiology itself that will *has no special organ*, how will the materialists connect it with "molecular" motion at all? As Professor George T. Ladd says: --

"The phenomena of human consciousness must be regarded as activities of some other form of Real Being than the moving molecules of the brain. They require a subject or ground which is in its nature unlike the phosphorized fats of the central masses, the aggregated nerve-fibers of nerve-cells of the cerebral cortex. This Real Being thus manifested immediately to itself in the phenomena of consciousness, and indirectly to others through the bodily changes, is the Mind [manas]. To it the mental phenomena are to be attributed as showing what it is by what it does. The so-called mental 'faculties' are only the modes of the behavior in consciousness of this real being. We actually find, by the only method available, that this real being called Mind believes in certain perpetually recurring modes: therefore, we attribute to it certain faculties. . . . Mental faculties are not entities that have an existence of themselves. . . . They are the modes of the behavior in consciousness of the mind. And the very nature of the classifying acts which lead to their being distinguished, is explicable only upon the assumption that a Real being called Mind exists, and is to be distinguished from the real being known as the physical molecules of the brain's nervous mass." (8)

And having shown that we have to regard consciousness *as a unit* (another occult proposition) the author adds: --

We conclude, then, from the previous considerations: the subject of all the states of consciousness is a real unit-being, called Mind; which is of non-material nature, and acts and develops according to laws of its own, but is specially correlated with certain material molecules and masses forming the substance of the Brain." (9)

This "Mind" is *manas*, or rather its lower reflection, which whenever it disconnects itself, for the time being, with *kama*, becomes the guide of the highest mental faculties, and is the organ of the free will in physical man. Therefore, this assumption of the newest psycho-physiology is uncalled for, and the apparent impossibility of reconciling the existence of free will with the law of the conservation of energy is -- a pure fallacy. This was well shown in the "Scientific Letters" of "Elpay" in a criticism of the work. But to prove it finally and set the whole question definitely

at rest, does not even require so high an interference (high for us, at any rate) as the Occult laws, but simply a little common sense. Let us analyze the question dispassionately.

It is postulated by one man, presumably a scientist, that because "psychic action is found subject to the general and immutable laws of motion, there is, therefore, *no free will in man.*" The "analytical method of exact sciences" has demonstrated it, and materialistic scientists have decreed to "pass the resolution" that the fact should be so accepted by their followers. But there are other and far greater scientists who thought differently. For instance, Sir William Lawrence, the eminent surgeon, declared in his lectures (10) that:

The philosophical doctrine of the soul, and its separate existence, has nothing to do with this physiological question, but rests on a species of proof altogether different. These sublime dogmas could never have been brought to light by the labors of the anatomist and physiologist. An immaterial and spiritual being could not have been discovered amid the blood and filth of the dissecting room.

Now, let us examine on the testimony of the materialist how this universal solvent called the "analytical method" is applied in this special case. The author of the *Psychophysiologie* decomposes psychic activity into its compound elements, traces them back to motion, and, failing to find in them the slightest trace of free will or spontaneity, jumps at the conclusion that the latter have no existence in general; nor are they to be found in that psychic activity which he has just decomposed. "Are not the fallacy and error of such an unscientific proceeding self-evident?" asks his critic; and then argues very correctly that: --

At this rate, and starting from the standpoint of this analytical method, one would have an equal right to deny every phenomenon in nature from first to last. For, do not sound and light, heat and electricity, like all other chemical processes, once decomposed into their respective elements, lead the experimenter back to the same motion, wherein all the peculiarities of the given elements disappear leaving behind them only 'the vibrations of molecules'? But does it necessarily follow that for all that, heat, light, electricity -- are but illusions instead of the actual manifestations of the peculiarities of our real world? Such peculiarities are not, of course, to be found in compound elements, simply because we cannot expect that a part should contain, from first to last, the properties of the whole. What should we say of a chemist, who, having decomposed water into its compounds, hydrogen and oxygen, without finding in them the special characteristics of water would maintain that such did not exist at all nor could they be found in water? What of an antiquary who upon examining distributed type and finding no sense in every separate letter, should assert that there was no such thing as sense to be found in any printed document? And does not the author of 'Psychophysiologie' act just in this way when he denies the existence of free will or self-spontaneity in man, on the grounds that this distinctive faculty of the highest psychic activity is absent from those compound elements which he has analyzed?

Most undeniably no separate piece of brick, of wood, or iron, each of which has once been a part of a building now in ruins, can be expected to preserve the smallest trace of the architecture of

that building -- in the hands of the chemist, at any rate; though it would in those of a *psychometer*, a faculty by the bye, which demonstrates far more powerfully the law of the conservation of energy than any physical science does, and shows it acting as much in the subjective or psychic worlds as in the objective and material planes. The genesis of sound, on this plane, has to be traced back to the same motion, and the same correlation of forces is at play during the phenomenon as in the case of every other manifestation. Shall the physicist, then, who decomposes sound into its compound element of vibrations and fails to find in them any harmony or special melody, deny the existence of the latter, And does not this prove that the analytical method having to deal exclusively with the elements, and nothing to do with their *combinations*, leads the physicist to talk very glibly about motion, vibration, and what not, and to make him entirely lose sight of the *harmony produced by certain combinations of that motion* or the "harmony of vibrations"? Criticism, then, is right in accusing Materialistic psycho-physiology of neglecting these all-important distinctions; in maintaining that if a careful observation of facts is a duty in the simplest physical phenomena, how much more should it be so when applied to such complex and important questions as psychic force and faculties? And yet in most cases all such essential differences are overlooked, and the analytical method is applied in a most arbitrary and prejudiced way. What wonder, then, if, in carrying back psychic action to its basic elements of motion, the psycho-physiologist depriving it during the process of all its essential characteristics, should destroy it, and having destroyed it, it only stands to reason that he is unable to find that which exists in it no longer. He forgets, in short, or rather purposely ignores the fact, that though, like all other phenomena on the material plane, psychic manifestations *must* be related in their final analysis to the world of vibration ("*sound*" being the *substratum of universal Akasa*), yet, in their origin, they belong to a *different and a higher World of HARMONY*. Elpay has a few severe sentences against the assumptions of those he calls "physico-biologists" which are worthy of note.

Unconscious of their error, the psycho-physiologists identify the compound elements of psychic activity with that activity itself: hence the conclusion from the standpoint of the analytical method, that the highest, distinctive speciality of the human soul -- free will, spontaneity -- is an illusion, and no psychic reality. But as we have just shown, such identification not only has nothing in common with exact science, but is simply impermissible, as it clashes with all the fundamental laws of logic, in consequence of which all these so-called physico-biological deductions emanating from the said identification vanish into thin air. Thus to trace psychic action primarily to motion, means in no way to prove the 'illusion of free will.' And, as in the case of water, whose specific qualities cannot be deprived of their reality although they are not to be found in its compound gases, so with regard to the specific property of psychic action: its spontaneity cannot be refused to psychic reality, though this property is not contained in those finite elements into which the psycho-physiologist dismembers the activity in question under his mental scalpel.

This method is "a distinctive feature of modern science in its endeavor to satisfy inquiry into the *nature* of the objects of its investigation by a detailed description of their *development*," says G. T. Ladd. And the author of *The Elements of Physiological Psychology* adds: --

The universal process of 'Becoming' has been almost personified and deified so as to make it the true ground of all finite and concrete existence. . . . The attempt is made to refer all the so-called development of the mind to the evolution of the substance of the brain, under purely physical and mechanical causes. This attempt, then, denies that any real unit-being called the Mind needs to be assumed as undergoing a process of development according to laws of its own. . . . On the other hand, all attempts to account for the orderly increase in complexity and comprehensiveness of the mental phenomena by tracing the physical evolution of the brain are wholly unsatisfactory to many minds. We have no hesitation in classing ourselves among this number. Those facts of experience which show a correspondence in the order of the development of the body and the mind, and even a certain necessary dependence of the latter upon the former, are, of course, to be admitted; but they are equally compatible with another view of the mind's development. This other view has the additional advantage that it makes room for many other facts of experience which are very difficult of reconciliation with any materialistic theory. On the whole, *the history of each individual's experiences is such as requires the assumption that a real unit-being (a Mind) is undergoing a process of development, in relation to the changing condition or evolution of the brain, and yet in accordance with a nature and laws of its own* (p. 616).

How closely this last "assumption" of science approaches the teachings of the Occult philosophy will be shown in Part II of this article. Meanwhile, we may close with an answer to the latest materialistic fallacy, which may be summarized in a few words. As every psychic action has for its substratum the nervous elements whose existence it postulates, and outside which it cannot act; as the activity of the nervous elements is only molecular motion, there is therefore no need to invent a special and psychic Force for the explanation of our brain work. *Free-Will would force Science to postulate an invisible Free-Willer, a creator of that special Force.*

We agree: "not the slightest need," of a creator of "that special" or any other Force. Nor has anyone ever claimed such an absurdity. But between *creating* and *guiding*, there is a difference and the latter implies in no way any creation of the energy of motion, or, indeed, of any special energy. *Psychic* mind (in contradistinction to maniac or noetic mind) only transforms this energy of the "unit-being" according to "a nature and laws of its own" -- to use Ladd's felicitous expression. The "unit-being" creates nothing but only causes a natural correlation in accordance with both the psychical laws and *laws of its own*; having to use the Force, it guides its direction, choosing the paths along which it will proceed, and stimulating it to action. And, as its activity is *sui generis*, and independent, it carries this energy from this world of disharmony into its own sphere of harmony. Were it not *independent* it could not do so. As it is, the freedom of man's will is beyond doubt or cavil. Therefore, as already observed, there is no question of creation, but simply of *guidance*. Because the sailor at the wheel does not create the steam in the engine, shall we say that he does not direct the vessel?

And, because we refuse to accept the fallacies of some psycho-physiologists as the *last* word of science, do we furnish thereby a new proof that free will is an *hallucination*? We deride the *animalistic* idea. How far more scientific and logical, besides being as poetical as it is grand, is the teaching in the *Kathopanishad*, which, in a beautiful and descriptive metaphor, says that:

"The senses are the horses, body is the chariot, mind (*kama-manas*) is the reins, and intellect (or *free will*) the charioteer." Verily, there is more exact science in the less important of the *Upanishads*, composed thousands of years ago, than in all the materialistic ravings of modern "physico-biology" and "psychophysiology" put together!

II

The knowledge of the past, present, and future, is embodied in Kshetrajna (the "Self"). -- *Occult Axioms*

Having explained in what particulars, and why, as Occultists, we disagree with materialistic physiological psychology, we may now proceed to point out the difference between psychic and noetic mental functions, the noetic not being recognized by official science.

Moreover, we, Theosophists, understand the terms "psychic" and "psychism" somewhat differently from the average public, science, and even theology, the latter giving it a significance which both science and Theosophy reject, and the public in general remaining with a very hazy conception of what is really meant by the terms. For many, there is little, if any, difference between "psychic" and "psychological," both words relating in some way to the *human* soul. Some modern metaphysicians have wisely agreed to disconnect the word Mind (*pneuma*) from Soul (*psyche*), the one being the rational, spiritual part, the other -- *psyche* -- the living principle in man, the breath that *animates* him (from *anima*, soul). Yet, if this is so, how in this case refuse a soul to *animals*? These are, no less than man, informed with the same principle of sentient life, the *nephesh* of the 2nd chapter of *Genesis*. The Soul is by no means the Mind, nor can an idiot, bereft of the latter, be called a "soul-less" being. To describe, as the physiologists do, the human Soul in its relations to senses and appetites, desires and passions, common to man and the brute, and then endow it with God-Like intellect, with spiritual and rational faculties which can take their source but in a *supersensible* world -- is to throw for ever the veil of an impenetrable mystery over the subject. Yet in modern science, "psychology" and "psychism" relate only to conditions of the nervous system, mental phenomena being traced solely to molecular action. The higher *noetic* character of the Mind-Principle is entirely ignored, and even rejected, as a "superstition" by both physiologists and psychologists. Psychology, in fact, has become a synonym in many cases for the science of psychiatry. Therefore, students of Theosophy being compelled to differ from all these, have adopted the doctrine that underlies the time-honored philosophies of the East. What it is, may be found further on.

To better understand the foregoing arguments and those which follow, the reader is asked to turn to the editorial in the September *Lucifer* ("The Dual Aspect of Wisdom," p. 3), and acquaint himself with the *double aspect* of that which is termed by St. James in his Third Epistle at once -- the *devilish, terrestrial* wisdom and the "wisdom from above." In another editorial, "Kosmic Mind" (April, 1890), it is also stated, that the ancient Hindus endowed every cell in the human body with consciousness, giving each the name of a God or Goddess. Speaking of atoms in the name of science and philosophy, Professor Ladd calls them in his work "*supersensible* beings." Occultism regards every atom ([11](#)) as an "independent entity" and every cell as a "conscious

unit." It explains that no sooner do such atoms group to form cells, than the latter become endowed with consciousness, each of its own kind, and with *free will to act within* the limits of law. Nor are we entirely deprived of scientific evidence for such statements as the two above named editorials well prove. More than one learned physiologist of the golden minority, in our own day, moreover, is rapidly coming to the conviction, that memory has no seat, no special organ of its own in the human brain, but that it has *seats* in every organ of the body.

"No good ground exists for speaking of any special organ, or seat of memory," writes Professor G. T. Ladd. (12) "Every organ, indeed, every area, and every limit of the nervous system has its own memory" (*Elements of Physiological Psychology*, p. 553).

The seat of memory, then, is assuredly neither here nor there, but everywhere throughout the human body. To locate its organ in the brain is to limit and dwarf the Universal Mind and its countless Rays (the *Manasaputra*) which inform every rational mortal. As we write for Theosophists, first of all, we care little for the psychophobic prejudices of the Materialists who may read this and sniff contemptuously at the mention of "Universal Mind" and the Higher *noetic* souls of men. But, what *is* memory, -- we ask. "Both presentation of sense and image of memory, are transitory phases of consciousness," we are answered. But what is Consciousness itself? -- we ask again. *We cannot define Consciousness*, Professor Ladd tells us. (Ibid.) Thus, that which we are asked to do by physiological psychology is, to content ourselves with controverting the various states of Consciousness by other people's private and unverifiable hypotheses; and this, on "questions of cerebral physiology *where experts and novices are alike ignorant*," to use the pointed remark of the said author. Hypothesis for hypothesis, then, we may as well hold to the teachings of our Seers, as to the conjectures of those who deny both such Seers and their wisdom. The more so, as we are told by the same honest man of science, that "if metaphysics and ethics cannot properly dictate their facts and conclusions to the science of physiological psychology . . . in turn this science cannot properly dictate to metaphysics and ethics the conclusions which they shall draw from facts of Consciousness, by giving out its myths and fables in the garb of well ascertained history of the cerebral processes" (p.544).

Now, since the metaphysics of Occult physiology and psychology postulate within mortal man an immortal entity, "divine Mind," or *Nous*, whose pale and too often distorted reflection is that which we call "Mind" and intellect in men -- virtually an entity apart from the former during the period of incarnation -- we say that the two sources of "memory" are in these *two* "principles." These two we distinguish as the Higher *Manas* (Mind or Ego), and the *Kama-Manas*, i.e., the rational, but earthly or physical intellect of man, incased in, and bound by, matter, therefore subject to the influence of the latter: the all-conscious SELF, that which reincarnates periodically -- verily the WORD made flesh! -- and which is always the same, while its reflected "Double," changing with every new incarnation and personality, is, therefore, conscious but for a life-period. The latter "principle" is the *Lower Self*, or that, which manifesting through our *organic* system, acting on this plane of illusion, imagines itself the *Ego Sum*, and thus falls into what Buddhist philosophy brands as the "heresy of separateness." The former, we term INDIVIDUALITY, the latter *Personality*. From the first proceeds all the noetic element, from the second, the *psychic*, i.e., "terrestrial wisdom" at best, as it is influenced by all the chaotic stimuli of the human or rather *animal passions* of the living body.

The "Higher EGO" cannot act directly on the body, as its consciousness belongs to quite another plane and planes of ideation: the "lower" *Self* does: and its action and behavior *depend on its free will and choice* as to whether it will gravitate more towards its parent ("the Father in Heaven") or the "animal" which it informs, the man of flesh. The "Higher Ego," as part of the essence of the UNIVERSAL MIND, is unconditionally omniscient on its own plane, and only potentially so in our terrestrial sphere, as it has to act solely through its *alter ego* -- the Personal Self. Now, although the former is the vehicle of all knowledge of the past, the present, and the future, and although it is from this fountain-head that its "double" catches occasional glimpses of that which is beyond the senses of man, and transmits them to certain brain cells (unknown to science in their function), thus making of man a *Seer*, a soothsayer, and a prophet; yet the memory of bygone events -- especially of the earth earthy -- has its seat in the Personal Ego alone. No memory of a purely daily-life function, of a physical, egotistical, or of a lower mental nature -- such as, e.g., eating and drinking, enjoying personal sensual pleasures, transacting business to the detriment of one's neighbor, etc., etc., has aught to do with the "Higher" Mind or EGO. Nor has it any direct dealings on this physical plane with either our brain or our heart -- for these two are the organs of a power higher than the *Personality* -- but only with our passional organs, such as the liver, the stomach, the spleen, etc. Thus it only stands to reason that the memory of such-like events must be first awakened in that organ which was the first to induce the action remembered afterwards, and conveyed it to our "sense-thought," which is entirely *distinct from the "supersensuous" thought*. It is only the higher forms of the latter, the *superconscious* mental experience, that can correlate with the cerebral and cardiac centers. The memories of physical and *selfish* (or personal) deeds, on the other hand, together with the mental experiences of a terrestrial nature, and of earthly biological functions, can, of necessity, only be correlated with the molecular constitution of various *Kamic* organs, and the "dynamical associations" of the elements of the nervous system in each particular organ.

Therefore, when Professor Ladd, after showing that every element of the nervous system has a memory of its own, adds: -- "This view belongs to the very essence of every theory which considers conscious mental reproduction as only one form or phase of the biological fact of organic memory" -- he must include among such theories the Occult teaching. For no Occultist could express such teaching more correctly than the Professor, who says, in winding up his argument: "We might properly speak, then, of the memory of the end-organ of vision or of hearing, of the memory of the spinal cord and of the different so-called 'centers' of reflex action belonging to the chords of the memory of the medulla oblongata, the cerebellum, etc." This is the essence of Occult teaching -- even in the Tantra works. Indeed, every organ in our body *has its own memory*. For if it is endowed with a consciousness "of its own kind," every cell must of necessity have also a memory of its own kind, as likewise its own *psychic* and *noetic* action. Responding to the touch of both a physical and a *metaphysical* Force, (12) the impulse given by the *psychic* (or psycho-molecular) Force will act from *without within*; while that of the noetic (shall we call it Spiritual-dynamical?) Force works from *within without*. For, as our body is the covering of the inner "principles," soul, mind, life, etc., so the molecule or the cell is the body in which dwell its "principles," the (to our sense and comprehension) immaterial atoms which compose that cell. The cell's activity and behavior are determined by its being propelled either inwardly or outwardly, by the noetic or the psychic Force, the former having no relation to the *physical* cells proper. Therefore, while the latter act under the unavoidable law of the conservation and correlation of physical energy, the atoms -- being psycho-spiritual, *not physical*

units -- act under laws of their own, just as Professor Ladd's "Unit-Being," which is our "Mind-Ego," does, in his very philosophical and scientific hypothesis. Every human organ and each cell in the latter has a key-board of its own, like that of a piano, only that it registers and emits sensations instead of sounds. Every key contains the potentiality of good or bad, of producing harmony or disharmony. This depends on the impulse given and the combinations produced; and the force of the touch of the artist at work, a "double-faced Unity," indeed. And it is the action of this or the other "Face" of the Unity that determines the nature and the dynamical character of the manifested phenomena as a resulting action, and this whether they be physical or mental. For the whole life of man is guided by this double-faced Entity. If the impulse comes from the "Wisdom above," the Force applied being noetic or spiritual, the results will be actions worthy of the divine propeller; if from the "terrestrial, devilish wisdom" (psychic power), man's activities will be selfish, based solely on the exigencies of his physical, hence animal, nature. The above may sound to the average reader as pure nonsense; but every Theosophist must understand when told that there are *Manasic* as well as *Kamic* organs in him, although the cells of his body answer to both physical and spiritual impulses.

Verily that body, so desecrated by Materialism and man himself, is the temple of the Holy Grail, the *Adytum* of the grandest, nay, of all, the mysteries of nature in our solar universe. That body is an Aeolian harp, chorded with two sets of strings, one made of pure silver, the other of catgut. When the breath from the divine Fiat brushes softly over the former, man becomes like unto *his* God -- but the other set feels it not. It needs the breeze of a strong terrestrial wind, impregnated with animal effluvia, to set its animal chords vibrating. It is the function of the physical, lower mind to act upon the physical organs and their cells; but, it is the higher mind *alone* which can influence the atoms interacting in these cells, which interaction is alone capable of exciting the brain, *via the spinal "center" cord*, to a mental representation of spiritual ideas far beyond any objects on this material plane. The phenomena of divine consciousness have to be regarded as activities of our mind on another and a higher plane, working through something less substantial than the moving molecules of the brain. They cannot be explained as the simple resultant of the cerebral physiological processes, as indeed the latter only condition them or give them a final form for purposes of concrete manifestation. Occultism teaches that the liver and the spleen-cells are the most subservient to the action of our "personal" mind, the heart being the organ *par excellence* through which the "Higher" Ego acts -- through the Lower Self.

Nor can the visions or memory of purely terrestrial events be transmitted directly through the mental perceptions in the brain -- the direct recipient of the impressions of the heart. All such recollections have to be first stimulated by and awakened in the organs which were the originators, as already stated, of the various causes that led to the results, or, the direct recipients and participators of the latter. In other words, if what is called "association of *ideas*" has much to do with the awakening of memory, the mutual interaction and consistent inter-relation between the personal "Mind-Entity" and the organ of the human body have far more so. A hungry stomach evokes the vision of a past banquet, because its action is reflected and repeated in the *personal* mind. But even before the memory of the personal Self radiates the vision from the tablets wherein are stored the experiences of one's daily life -- even to the minutest details -- the memory of the stomach has already evoked the same. And so with all the organs of the body. It is they which originate according to their animal needs and desires the electro-vital sparks that illuminate the field of consciousness in the Lower Ego; and it is these sparks which in their turn

awaken to function the reminiscences in it. The whole human body is, as said, a vast sounding board, in which each cell bears a long record of impressions connected with its parent organ, and each cell has a memory and a consciousness of its kind, or call it instinct if you will. These impressions are, according to the nature of the organ, physical, psychic, or mental, as they relate to this or another plane. They may be called "states of consciousness" only for the want of a better expression -- as there are states of instinctual, mental, and purely abstract, or spiritual consciousness. If we trace all such "psychic" actions to brain-work, it is only because in that mansion called the human body the brain is the front-door, and the only one which opens out into Space. All the others are inner doors, openings in the private building, through which travel incessantly the transmitting agents of memory and sensation. The clearness, the vividness, and intensity of these depend on the state of health and the organic soundness of the transmitters. But their reality, in the sense of trueness or correctness, is due to the "principle" they originate from, and the preponderance in the Lower *Manas* of the *noetic* or the *phrenic* ("Kamic," terrestrial) element.

For, as Occultism teaches, if the Higher Mind-Entity -- the permanent and the immortal -- is of the divine homogeneous essence of "Alaya-Akasa," (13) or Mahat -- its reflection, the Personal Mind, is, as a temporary "Principle," of the Substance of the Astral Light. As a pure ray of the "Son of the Universal Mind," it could perform no functions in the body, and would remain powerless over the turbulent organs of Matter. Thus, while its inner constitution is Manasic, its "body," or rather functioning essence, is heterogeneous, and leavened with the Astral Light, the lowest element of Ether. It is a part of the mission of the Manasic Ray, to get gradually rid of the blind, deceptive element which though it makes of it an active spiritual entity on this plane, still brings it into so close contact with matter as to entirely becloud its divine nature and stultify its intuitions.

This leads us to see the difference between the pure noetic and the terrestrial psychic visions of seership and mediumship. The former can be obtained by one of two means: (a) on the condition of paralyzing at will the *memory* and the instinctual, independent action of all the material organs and even cells in the body of flesh, an act which, once that the light of the Higher Ego has consumed and subjected for ever the passional nature of the personal, lower Ego, is easy, but requires an adept; and (b) of being a reincarnation of one, who, in a previous birth, had attained through extreme purity of life and efforts in the right direction almost to a *Yogi*-state of holiness and saintship. There is also a third possibility of reaching in mystic visions the plane of the higher *Manas*; but it is only occasional and does not depend on the will of the Seer, but on the extreme weakness and exhaustion of the material body through illness and suffering. The Seeress of Prevorst was an instance of the latter case; and Jacob Boehme of our second category. In all other cases of abnormal seership, of so-called clairaudience, clairvoyance and trances, it is simply -- *mediumship*.

Now what is a medium? The term medium, when not applied simply to things and objects, is supposed to be a person through whom the action of another person or being is either manifested or transmitted. Spiritualists believing in communications with disembodied spirits, and that these can manifest through, or impress sensitives to transmit "messages" from them, regard mediumship as a blessing and a great privilege. We Theosophists, on the other hand, who do not believe in the "communion of spirits" as Spiritualists do, regard the gift as one of the most

dangerous of abnormal nervous diseases. A medium is simply one in whose personal Ego, or terrestrial mind (*psyche*), the percentage of "astral" light so preponderates as to impregnate with it their whole physical constitution. Every organ and cell thereby is attuned, so to speak, and subjected to an enormous and abnormal tension. The mind is ever on the plane of, and quite immersed in, that deceptive light whose *soul* is divine, but whose body -- the light waves on the lower planes, infernal; for they are but the black and disfigured reflections of the earth's memories. The untrained eye of the poor sensitive cannot pierce the dark mist, the dense fog of the terrestrial emanations, to see beyond in the radiant field of the eternal truths. His vision is out of focus. His senses, accustomed from his birth, like those of a native of the London slums, to stench and filth, to the unnatural distortions of sights and images tossed on the kaleidoscopic waves of the astral plane -- are unable to discern the true from the false. And thus, the pale soulless corpses moving in the trackless fields of "Kama loka," appear to him the living images of the "dear departed" ones; the broken echoes of once human voices, passing through his mind, suggest to him well coordinated phrases, which he repeats, in ignorance that their final form and polish were received in the innermost depths of his own brain-factory. And hence the sight and the hearing of that which if seen in its true nature would have struck the medium's heart cold with horror, now fills him with a sense of beatitude and confidence. He really believes that the immeasurable vistas displayed before him are the real spiritual world, the abode of the blessed disembodied angels.

We describe the broad main features and facts of mediumship, there being no room in such an article for exceptional cases. We maintain -- having unfortunately passed at one period of life *personally* through such experiences -- that on the whole, mediumship is most dangerous; and *psychic* experiences when accepted indiscriminately lead only to honestly deceiving others, because the medium is the first self-deceived victim. Moreover, a too close association with the "Old Terrestrial Serpent" is infectious. The odic and magnetic currents of the Astral Light often incite to murder, drunkenness, immorality, and, as Eliphas Levi expresses it, the not altogether pure natures "can be driven headlong by the blind forces set in motion in the *Light*" -- by the errors and sins imposed on its waves.

And this is how the great Mage of the XIXth century corroborates the foregoing when speaking of the Astral Light: --

We have said that to acquire magical power, two things are necessary: to disengage the will from all servitude, and to exercise it in control.

The sovereign will [of the adept] is represented in our symbols by the woman who crushes the serpent's head, and by the resplendent angel who represses the dragon, and holds him under his foot and spear; the great magical agent, the dual current of light, the living and astral *fire* of the earth, has been represented in the ancient theogonies by the serpent with the head of a bull, a ram, or a dog. It is the double serpent of the *caduceus*, it is the Old Serpent of *Genesis*, but it is also the *brazen serpent of Moses* entwined around the tau, that is to say, the generative *lingam*. It is also the goat of the witch-sabbath, and the Baphomet of the Templars; it is the *Hyle* of the Gnostics; it is the double-tailed serpent which forms the legs of the solar cock of die Abraxas; finally, it is the Devil of M. Eudes de Mirville. But in

very fact it is the blind force which souls [i.e., the lower Manas or Nephesh] have to conquer to liberate themselves from the bonds of the earth; for if their will does not free 'them from this *fatal attraction*, they will be absorbed in the current by the force which has produced them, and *will return to the central and eternal fire*.
(14)

The "central and eternal fire" is that disintegrating Force, that gradually consumes and burns out the *Kama-rupa*, or "personality," in the Kama-loka, whither it goes after death. And verily, the Mediums are attracted by the astral light, it is the direct cause of their personal "souls" being absorbed "by the force which has produced" their terrestrial elements. And, therefore, as the same Occultist tells us:

All the magical operations consist in *freeing* one's self from the coils of the Ancient Serpent; then to place the foot on its head, and lead it according to the operator's will. 'I will give unto thee,' says the Serpent, in the Gospel myth, 'all the kingdoms of the earth, if thou wilt fall down and worship me.' The initiated should reply to him, 'I will not fall down, but thou shalt crouch at my feet; thou wilt give me nothing, but I will make use of thee and take whatever I wish. For *I am thy Lord and Master!*'

And as such, the *Personal Ego*, becoming at one with its divine parent, shares in the immortality of the latter. Otherwise . . .

Enough, however. Blessed is he who has acquainted himself with the dual powers at work in the ASTRAL Light; thrice blessed he who has learned to discern the noetic from the *Psychic* action of the "Double-Faced" God in him, and who knows the potency of his own Spirit -- or "Soul Dynamics."

FOOTNOTES:

1. We say "so-called," because nothing of what has been given out publicly or in print can any longer be termed *esoteric*. ([return to text](#))
2. "Animalism" is quite an appropriate word to use (whoever invented it) as a contrast to Mr. Tylor's term "animism," which he applied to all the "*Lower Races*" of mankind who believe the soul a distinct entity. He finds that the words *psyche*, *pneuma*, *animus*, *spiritus*, etc., all belong to the same cycle of superstition in "the lower stages of culture," Professor A. Bain dubbing all these distinctions, moreover, as a "plurality of souls" and a "double materialism." This is the more curious as the learned author of *Mind and Body* speaks as disparagingly of Darwin's "materialism" in *Zoonomia*, wherein the founder of modern Evolution defines the word *idea* as "contracting a motion, or configuration of the fibers which constitute the immediate organ of Sense" (*Mind and Body*, p. 190, Note). Kosmic Mind

Whatsoever quits the *Laya* (homogeneous) state, becomes active conscious life. Individual consciousness emanates from, and returns into Absolute consciousness, which is eternal MOTION. -- *Esoteric Axioms*.

Whatever that be which thinks, which understands, which wills, which acts, it is something celestial and divine, and upon that account must necessarily be eternal.
-- CICERO

Edison's conception of matter was quoted in our March editorial article. The great American electrician is reported by Mr. G. Parsons Lathrop in *Harper's Magazine* as giving out his personal belief about the atoms being "possessed by a certain amount of intelligence," and shown indulging in other reveries of this kind. For this flight of fancy the February *Review of Reviews* takes the inventor of the phonograph to task and critically remarks that "Edison is much given to dreaming," his "scientific imagination" being constantly at work.

Would to goodness the men of science exercised their "scientific imagination" a little more and their dogmatic and cold negations a little less. Dreams differ. In that strange state of being which, as Byron has it, puts us in a position "with seal'd eyes to see," one often perceives more real facts than when awake. Imagination is, again, one of the strongest elements in human nature, or in the words of Dugald Stewart it "is the great spring of human activity, and the principal source of human improvement. . . . Destroy the faculty, and the condition of men will become as stationary as that of brutes." It is the best guide of our blind senses, without which the latter could never lead us beyond matter and its illusions. The greatest discoveries of modern science are due to the imaginative faculty of the discoverers. But when has anything new been postulated, when a theory clashing with and contradicting a comfortably settled predecessor put forth, without orthodox science first sitting on it, and trying to crush it out of existence? Harvey was also regarded at first as a "dreamer" and a madman to boot. Finally, the whole of modern science is formed of "working hypotheses," the fruits of "scientific imagination" as Mr. Tyndall felicitously called it.

Is it then, because consciousness in every universal atom and the possibility of a complete control over the cells and atoms of his body by man, have not been honored so far with the *imprimatur* of the Popes of exact science, that the idea is to be dismissed as a dream? Occultism gives the same teaching. Occultism tells us that every atom, like the monad of Leibnitz, is a little universe in itself; and that every organ and cell in the human body is endowed with a brain of its own, with memory, therefore, experience and discriminative powers. The idea of Universal Life composed of individual atomic lives is one of the oldest teachings of esoteric philosophy, and the very modern hypothesis of modern science, that of *crystalline life*, is the first ray from the ancient luminary of knowledge that has reached our scholars. If plants can be shown to have nerves and sensations and instinct (but another word for consciousness), why not allow the same in the cells of the human body? Science divides matter into organic and inorganic bodies, only because it rejects the idea of *absolute life* and a life-principle as an entity: otherwise it would be the first to see that *absolute life* cannot produce even a geometrical point, or an atom inorganic in its essence. But Occultism, you see, "teaches mysteries" they say; and mystery is the *negation of*

common sense, just as again metaphysics is but a kind of poetry, according to Mr. Tyndall. There is no such thing for science as mystery; and therefore, as a Life Principle is, and must remain for the intellects of our civilized races for ever a mystery *on physical lines* -- they who deal in this question have to be of necessity either fools or knaves.

Dixit. Nevertheless, we may repeat with a French preacher: "mystery is the fatality of science." Official science is surrounded on every side and hedged in by unapproachable, for ever impenetrable mysteries. And why? Simply because physical science is self-doomed to a squirrel-like progress around a wheel of matter limited by our five senses. And though it is as confessedly ignorant of the formation of matter, as of the generation of a simple cell; though it is as powerless to explain what is this, that, or the other, it will yet dogmatize and insist on what life, matter and the rest are not. It comes to this: the words of Father Felix addressed fifty years ago to the French academicians have nearly become immortal as a truism. "Gentlemen," he said, "you throw into our teeth the reproach that we teach mysteries. But imagine whatever science you will; follow the magnificent sweep of its deductions. . . . and when you arrive at its parent source you come face to face with the unknown!"

Now to lay at rest once for all in the minds of Theosophists this vexed question, we intend to prove that modern science, owing to physiology, is itself on the eve of discovering that consciousness is universal -- thus justifying Edison's "dreams." But before we do this, we mean also to show that though many a man of science is soaked through and through with such belief, very few are brave enough to openly admit it, as the late Dr. Pirogoff of St. Petersburg has done in his posthumous *Memoirs*. Indeed that great surgeon and pathologist raised by their publication quite a howl of indignation among his colleagues. How then? the public asked: He, Dr. Pirogoff, whom we regarded as almost the embodiment of European learning, believing in the superstitions of crazy alchemists? He, who in the words of a contemporary: --

was the very incarnation of exact science and methods of thought; who had dissected hundreds and thousands of human organs, making himself as acquainted with all the mysteries of surgery and anatomy as we are with our familiar furniture; the savant for whom physiology had no secrets and who, above all men was one to whom Voltaire might have ironically asked whether he had not found immortal soul between the bladder and the blind gut, -- that same Pirogoff is found after his death devoting whole chapters in his literary Will to the scientific demonstration. . . . (*Novoye Vremya* of 1887)

-- of what? Why, of the existence in every organism *of a distinct "VITAL FORCE"* independent of any physical or chemical process. Like Liebig he accepted the derided and tabooed homogeneity of nature -- a Life Principle -- that persecuted and hapless teleology, or the science of the final causes of things, which is as philosophical as it is *unscientific*, if we have to believe imperial and royal academies. His unpardonable sin in the eyes of dogmatic modern science, however, was this: The great anatomist and surgeon, had the "hardihood" to declare in his *Memoirs*, that:

We have no cause to reject the possibility of the existence of organisms endowed with such properties that would make of them -- *the direct embodiment of the*

universal mind -- a perfection inaccessible to our own (human) mind. . . .
Because, we have no right to maintain that man is the last expression of the divine creative thought.

Such are the chief features of the heresy of one, who ranked high among the men of exact science of this age. His *Memoirs* show plainly that not only he believed in Universal Deity, divine Ideation, or the Hermetic "Thought divine," and a Vital Principle, but taught all this, and tried to demonstrate it scientifically. Thus he argues that Universal Mind needs no physico-chemical, or mechanical brain as an organ of transmission. He even goes so far as to admit it in these suggestive words: --

Our reason must accept *in all necessity* an infinite and eternal Mind which rules and governs the ocean of life. . . . *Thought and creative ideation, in full agreement with the laws of unity and causation, manifest themselves plainly enough in universal life without the participation of brain-slush. . . .* Directing the forces and elements toward the formation of organisms, this *organizing life-principle* becomes *self-sentient, self-conscious, racial or individual*. Substance, ruled and directed by the *life-principle*, is organized according to a general defined plan into certain types. . . .

He explains this belief by confessing that never, during his long life so full of study, observation, and experiments, could he --

acquire the conviction, that our brain could be the only organ of thought in the whole universe, that everything in this world, save *that* organ, should be unconditioned and senseless, and that human thought alone should impart to the universe a meaning and a reasonable harmony in its integrity.

And he adds a propos of Moleschott's materialism:

Howsoever much fish and peas I may eat, never shall I consent to give away my *Ego* into durance vile of a product casually extracted by modern *alchemy* from the urine. If, in our conceptions of the Universe it be our fate to fall into illusions, then my "illusion" has, at least, the advantage of being very consoling. For, it shows to me an intelligent Universe and the activity of Forces working in it harmoniously and intelligently; and that my "I" is not the product of chemical and histological elements but *an embodiment of a common universal Mind*. The latter, I sense and represent to myself as acting in free will and consciousness in accordance with the same laws which are traced for the guidance of my own mind, but only exempt from that restraint which trammels our human conscious individuality.

For, as remarks elsewhere this great and philosophic man of Science:

The limitless and the eternal, is not only a postulate of our mind and reason, but also a gigantic fact, in itself. What would become of our ethical or moral principle were not the everlasting and integral truth to serve it as a foundation!

The above selections translated *verbatim* from the confessions of one who was during his long life a star of the first magnitude in the fields of pathology and surgery, show him imbued and soaked through with the philosophy of a reasoned and scientific mysticism. In reading the *Memoirs* of that man of scientific fame, we feel proud of finding him accepting, almost wholesale, the fundamental doctrines and beliefs of Theosophy. With such an exceptionally scientific mind in the ranks of mystics, the idiotic grins, the cheap satires and flings at our great Philosophy by some European and American "Freethinkers," become almost a compliment. More than ever do they appear to us like the frightened discordant cry of the night-owl hurrying to hide in its dark ruins before the light of the morning Sun.

The progress of physiology itself, as we have just said, is a sure warrant that the dawn of that day when a full recognition of a universally diffused mind will be an accomplished fact, is not far off. It is *only* a question of time.

For, notwithstanding the boast of physiology, that the aim of its researches is only the summing up of every vital function in order to bring them into a definite order by showing their mutual relations to, and connection with, the laws of physics and chemistry, hence, in their final form with mechanical laws -- we fear there is a good deal of contradiction between the confessed object and the speculations of some of the best of our modern physiologists. While few of them would dare to return as openly as did Dr. Pirogoff to the "exploded superstition" of *vitalism* and the severely exiled life principle, the *principium vite* of Paracelsus -- yet physiology stands sorely perplexed in the face of its ablest representatives before certain facts. Unfortunately for us, this age of ours is not conducive to the development of moral courage. The time for most to act on the noble idea of "*principia non homines*," has not yet come. And yet there are exceptions to the general rule, and physiology -- whose destiny it is to become the hand-maiden of Occult truths -- has not let the latter remain without their witnesses. There are those who are already stoutly protesting against certain hitherto favorite propositions. For instance, some physiologists are already denying that it is the forces and substances of so-called "inanimate" nature, which are acting exclusively in living beings. For, as they well argue:

The fact that we reject the interference of other forces in living things, *depends entirely on the limitations of our senses.* We use, indeed, the same organs for our observations of both animate and inanimate nature; and these organs can receive manifestations of only a limited realm of motion. Vibrations passed along the fibers of our optic nerves to the brain reach our perceptions through our consciousness as sensations of light and color; vibrations affecting our consciousness through our auditory organs strike us as sounds; all our feelings, through whichever of our senses, are due to nothing but motions.

Such are the teachings of physical Science, and such were in their roughest outlines those of Occultism, aeons and millenniums back. The difference, however, and most vital distinction between the two teachings, is this: official science sees in motion simply a blind, unreasoning

force or law; Occultism, tracing motion to its origin, identifies it with the Universal Deity, and calls this eternal ceaseless motion -- the "Great Breath." (1)

Nevertheless, however limited the conception of Modern Science about the said Force, still it is suggestive enough to have forced the following remark from a great Scientist, the present professor of physiology at the University of Basle, (2) who speaks like an Occultist.

It would be folly in us to expect to be ever able to discover, with the assistance only of our external senses, in animate nature that something which we are unable to find in the inanimate.

And forthwith the lecturer adds that man being endowed "in addition to his physical senses with an *inner sense*," a perception which gives him the possibility of observing the states and phenomena of his own consciousness, "he has to use *that* in dealing with animate nature" -- a profession of faith verging suspiciously on the borders of Occultism. He denies, moreover, the assumption, that the states and phenomena of consciousness represent in substance the same manifestations of motion as in the external world, and bases his denial by the reminder that not all of such states and manifestations have necessarily a spatial extension. According to him that only is connected with our conception of space which has reached our consciousness through sight, touch, and the muscular sense, while all the other senses, all the *effects*, tendencies, as all the interminable series of representations, have no extension in space but only in time.

Thus he asks: --

Where then is there room in this for a mechanical theory? Objectors might argue that this is so only in appearance, while in reality all these have a spatial extension. But such an argument would be entirely erroneous. Our sole reason for believing that objects perceived by the senses have such extension in the external world, rests on the idea that they seem to do so, as far as they can be watched and observed through the senses of sight and touch. With regard, however, to the realm of our *inner* senses even that supposed foundation loses its force and there is no ground for admitting it.

The winding up argument of the lecturer is most interesting to Theosophists. Says this physiologist of the modern school of Materialism --

Thus, a deeper and more direct acquaintance with *our inner nature* unveils to us a world *entirely unlike the world represented to us by our external senses*, and reveals the most heterogeneous faculties, shows objects having nought to do with spatial extension, and phenomena absolutely disconnected with those that fall under mechanical laws.

Hitherto the opponents of vitalism and "life-principle," as well as the followers of the mechanical theory of life, based their views on the supposed fact, that, as physiology was progressing forward, its students succeeded more and more in connecting its functions with the laws of *blind matter*. All those manifestations that used to be attributed to a "mystical life-force," they said,

may be brought now under physical and chemical laws. And they were, and still are loudly clamoring for the recognition of the fact that it is only a question of time when it will be triumphantly demonstrated that the whole vital process, in its grand totality, represents nothing more mysterious than a very complicated phenomenon of motion, exclusively governed by the forces of inanimate nature.

But here we have a professor of physiology who asserts that the history of physiology proves, unfortunately for them, quite the contrary; and he pronounces these ominous words:

I maintain that the more our experiments and observations are exact and many-sided, the deeper we penetrate into facts, the more we try to fathom and speculate on the phenomena of life, the more we acquire the conviction, that even those phenomena that we had hoped to be already able to explain by physical and chemical laws, *are in reality unfathomable*. They are vastly more complicated, in fact; and as we stand at present, *they will not yield to any mechanical explanation*.

This is a terrible blow at the puffed-up bladder known as Materialism, which is as empty as it is dilated. A Judas in the camp of the apostles of negation -- the "animalists"! But the Basle professor is no solitary exception, as we have just shown; and there are several physiologists who are of his way of thinking; indeed some of them going so far as to almost accept *free-will* and *consciousness*, in the simplest monadic protoplasm!

One discovery after the other tends in this direction. The works of some German physiologists are especially interesting with regard to cases of consciousness and positive discrimination -- one is almost inclined to say *thought* -- in the Amoebas. Now the *Amoebas* or animalculae are, as all know, microscopical protoplasm -- as the *Vampyrella Sirogyra* for instance, a most simple elementary cell, a protoplasmic drop, formless and almost structureless. And yet it shows in its behavior something for which zoologists, if they do not call it mind and power of reasoning, will have to find some other qualification, and coin a new term. For see what Cienkowsky (3) says of it. Speaking of this microscopical, bare, reddish cell he describes the way in which it hunts for and finds among a number of other aquatic plants one called *Spirogyra*, rejecting every other food. Examining its peregrinations under a powerful microscope, he found it when moved by hunger, first projecting its *pseudopodiae* (false feet) by the help of which it crawls. Then it commences moving about until among a great variety of plants it comes across a *Spirogyra*, after which it proceeds toward the cellululated portion of one of the cells of the latter, and placing itself on it, it bursts the tissue, sucks the contents of one cell and then passes on to another, repeating the same process. This naturalist never saw it take any other food, and it never touched any of the numerous plants placed by Cienkowsky in its way. Mentioning another Amoeba -- the *Colpadella Pugnax* -- he says that he found it showing the same predilection for the *Chlamydomonas* on which it feeds exclusively; "having made a puncture in the body of the *Chlamydomonas* it sucks its chlorophyl and then goes away," he writes, adding these significant words: "The way of acting of these monads during their search for and reception of food, is so amazing that one is almost inclined to see in them *consciously acting beings!*"

Not less suggestive are the observations of Th. W. Engelmann (*Beitraege zur Physiologie des Protoplasm*), on the *Arcella*, another unicellular organism only a trifle more complex than the

Vampyrella. He shows them in a drop of water under a microscope on a piece of glass, lying so to speak, on their backs, i.e., on their convex side, so that the *pseudopodiae*, projected from the edge of the shell, find no hold in space and leave the Amoeba helpless. Under these circumstances the following curious fact is observed. Under the very edge of one of the sides of the protoplasm gas-bubbles begin immediately to form, which, making that side lighter, allow it to be raised, bringing at the same time the opposite side of the creature into contact with the glass, thus furnishing its *pseudo* or false feet means to get hold of the surface and thereby turning over its body to raise itself on all its *pseudopodiae*. After this, the Amoeba proceeds to suck back into itself the gas-bubbles and begins to move. If a like drop of water is placed on the lower extremity of the glass, then, following the law of gravity the Amoeba will find themselves at first at the lower end of the drop of water. Failing to find there a point of support, they proceed to generate large bubbles of gas, when, becoming lighter than the water, they are raised up to the surface of the drop.

In the words of Engelman: --

If having reached the surface of the glass they find no more support for their feet than before, forthwith one sees the gas-globules diminishing on one side and increasing in size and number on the other, or both, until the creatures touch with the edge of their shell the surface of the glass, and are enabled to turn over. No sooner is this done than the gas-globules disappear and the *Arcellae* begin crawling. Detach them carefully by means of a fine needle from the surface of the glass and thus bring them down once more to the lower surface of the drop of water; and forthwith they will repeat the same process, varying its details according to necessity and devising new means to reach their desired aim. Try as much as you will to place them in uncomfortable positions, and they find means to extricate themselves from them, each time, by one device or the other; and no sooner have they succeeded than the gas-bubbles disappear! It is impossible not to admit that such facts as these *point to the presence of some PSYCHIC process in the protoplasm.* (4)

Among hundreds of accusations against Asiatic nations of degrading *superstitions*, based on "crass ignorance," there exists no more serious denunciation than that which accuses and convicts them of personifying and *even deifying* the chief organs of, and in, the human body. Indeed, do not we hear these "benighted fools" of Hindus speaking of the small-pox as a goddess -- thus personifying the microbes of the variolic virus? Do we not read about *Tantrikas*, a sect of mystics, giving proper names to nerves, cells and arteries, connecting and identifying various parts of the body with deities, endowing functions and physiological processes with intelligence, and what not? The vertebrae, fibers, ganglia, the cord, etc., of the spinal column; the heart, its four chambers, auricle and ventricle, valves and the rest; stomach, liver, lungs and spleen, everything has its special deific name, is believed to *act consciously and* to act under the potent will of the Yogi, whose head and heart are the seats of Brahma and the various parts of whose body are all the pleasure grounds of this or another deity!

This is indeed *ignorance*. Especially when we think that the said organs, and the whole body of man are composed of cells, and these cells are now being recognized as individual organisms and

-- *quien sabe* -- will come perhaps to be recognized some day as *an independent race of thinkers* inhabiting the globe, called man! It really looks like it. For was it not hitherto believed that all the phenomena of assimilation and sucking in of food by the intestinal canal, could be explained by the laws of diffusion and endosmosis? And now, alas, physiologists have come to learn that the action of the intestinal canal during the act of absorbing, is not identical with the action of the non-living membrane in the dialyser. It is now well demonstrated that --

this wall is covered with epithelium cells, each of which is an organism *per se*, a living being, and with very complex functions. We know further, that such a cell assimilates food -- by means of active contractions of its protoplasmic body -- in a manner as mysterious as that which we notice in the independent Amoeba and animalcules. We can observe on the intestinal epithelium of the cold-blooded animals how these cells project shoots -- *pseudopodiae* -- out of their contractive, bare, protoplasmic bodies -- which *pseudopodiae*, or false feet, fish out of the food drops of fat, suck them into their protoplasm and send it further, toward the lymph-duct. . . . The lymphatic cells issuing from the nests of the adipose tissue, and squeezing themselves through the epithelium cells up to the surface of the intestines, absorb therein the drops of fat and loaded with their prey, travel homeward to the lymphatic canals. So long as this active work of the cells remained unknown to us, the fact that while the globules of fat penetrated through the walls of the intestines into lymphatic channels, the smallest of pigmental grains introduced into the intestines did not do so, -- remained unexplained. But to-day we know, that this faculty of selecting their special food -- of assimilating the useful and rejecting the useless and the harmful -- is common to all the unicellular organisms. (5)

And the lecturer queries, why, if this *discrimination* in the selection of food exists in the simplest and most elementary of the cells, in the formless and structureless protoplasmic *drops* -- why it should not exist also in the epithelium cells of our intestinal canal. Indeed, if the *Vampyrella* recognizes its much beloved *Spirogyra*, among hundreds of other plants as shown above, why should not the epithelium cell, *sense, choose* and *select* its favorite drop of fat from a pigmental grain? But we will be told that "sensing, choosing, and selecting" pertain only to reasoning beings, at least to the *instinct* of more structural animals than is the protoplasmic cell outside or inside man. Agreed; but as we translate from the lecture of a learned physiologist and the works of other learned naturalists, we can only say, that these learned gentlemen must know what they are talking about; though they are probably ignorant of the fact that their *scientific* prose is but one degree removed from the *ignorant, superstitious*, but rather poetical "twaddle" of the Hindu Yogis and Tantrikas.

Anyhow, our professor of physiology falls foul of the materialistic theories of diffusion and endosmosis. Armed with the facts of the evident discrimination and *a mind* in the cells, he demonstrates by numerous instances the fallacy of trying to explain certain physiological processes by mechanical theories; such for instance as the passing of sugar from the liver (where it is transformed into glucose) into the blood. Physiologists find great difficulty in explaining this process, and regard it as *an impossibility to bring it under the endosmotic laws*. In all probability the lymphatic cells play just as active a part during the absorption of alimentary substances

dissolved in water, as the peptics do, a process well demonstrated by F. Hofmeister. (6) Generally speaking, poor convenient endosmose is dethroned and exiled from among the active functionaries of the human body as a useless sinecurist. It has lost its voice in the matter of glands and other agents of secretion, in the action of which the same epithelium cells have replaced it. The mysterious faculties of selection, of extracting from the blood one kind of substance and rejecting another, of transforming the former by means of decomposition and synthesis, of directing some of the products into passages which will throw them out of the body and redirecting others into lymphatic and blood vessels -- such is the work of the cells. "*It is evident that in all this there is not the slightest hint at diffusion or endosmose,*" says the Basle physiologist. "*It becomes entirely useless to try and explain these phenomena by chemical laws.*"

But perhaps physiology is luckier in some other department? Failing in the laws of alimentation, it may have found some consolation for its mechanical theories in the question of the activity of muscles and nerves, which it sought to explain by electric laws? Alas, save in a few fishes -- in no other living organisms, least of all in the human body, could it find any possibility of pointing out electric currents as the chief ruling agency. Electro-biology on the lines of pure dynamic electricity has egregiously failed. Ignorant of "Fohat" no electrical currents suffice to explain to it either muscular or nervous activity!

But there is such a thing as the physiology of external sensations. Here we are no longer on *terra incognita*, and all such phenomena have already found purely *physical* explanations. No doubt, there is the phenomenon of sight, the eye with its optical apparatus, its camera obscura. But the fact of the sameness of the reproduction of things in the eye, according to the same laws of refraction as on the plate of a photographic machine, is *no vital phenomenon*. The same may be reproduced *on a dead eye*. The phenomenon of life consists *in the evolution and development of the eye itself*. How is this marvelous and complicated work produced? To this physiology replies, "We do not know"; for, toward the solution of this great problem --

Physiology has not yet made one single step. True, we can follow the sequence of the stages of the development and formation of the eye, but *why* it is so and *what* is the causal connection, we have absolutely no idea. The second vital phenomenon of the eye is its accommodating activity. And here we are again face to face with the functions of nerves and muscles -- our old insoluble riddles. The same may be said of all the organs of sense. The same also relates to other departments of physiology. We had hoped to explain the phenomena of the circulation of the blood by the laws of hydrostatics or hydrodynamics. Of course the blood moves in accordance with the hydrodynamical laws: but its relation to them remains utterly *passive*. As to the *active* functions of the heart and the muscles of its vessels, *no one, so far, has ever been able to explain them by physical laws*.

The underlined words in the concluding portion of the able Professor's lecture are worthy of an Occultist. Indeed, he seems to be repeating an aphorism from the "Elementary Instructions" of the esoteric physiology of *practical* Occultism: --

*The riddle of life is found in the active functions of a living organism (1), the real perception of which activity we can get only through self-observation, and not owing to our external senses; by observations on our will, so far as it penetrates our consciousness, thus revealing itself to our inner sense. Therefore, when the same phenomenon acts only on our external senses, we recognize it no longer. We see everything that takes place around and near the phenomenon of motion, but the essence of that phenomenon we do not see at all, because we lack for it a special organ of receptivity. We can accept that *esse* in a mere hypothetical way, and do so, in fact, when we speak of "active functions." Thus does every physiologist, for he cannot go on without such hypothesis; and this is a first experiment of a *psychological explanation* of all vital phenomena. . . . And if it is demonstrated to us that we are unable with the help only of physics and chemistry to explain the phenomena of life, what may we expect from other adjuncts of physiology, from the sciences of morphology, anatomy, and histology? I maintain that these can never help us to unriddle the problem of any of the mysterious phenomena of life. For, after we have succeeded with the help of scalpel and microscope in dividing the organisms into their most elementary compounds, and reached the simplest of cells, it is just here that we find ourselves face to face with the greatest problem of all. The simplest monad, a microscopical point of protoplasm, form less and structureless, exhibits yet all the essential vital functions, alimentation, growth, breeding, motion, feeling and sensuous perception, and even such functions which replace "consciousness" -- the soul of the higher animals!*

The problem -- for Materialism -- is a terrible one, indeed! Shall our cells, and infinitesimal monads in nature, do for us that which the arguments of the greatest Pantheistic philosophers have hitherto failed to do? Let us hope so. And if they do, then the "superstitious and ignorant" Eastern Yogis, and even their exoteric followers, will find themselves vindicated. For we hear from the same physiologist that --

A large number of poisons are prevented by the epithelium *cells* from penetrating into lymphatic spaces, though we know that they are easily decomposed in the abdominal and intestinal juices. More than this. Physiology is aware that by injecting these poisons directly into the blood, they will separate from, and reappear through the intestinal walls, and that in this process the *lymphatic cells* take a most active part.

If the reader turns to Webster's *Dictionary* he will find therein a curious explanation at the words "lymphatic" and "Lymph." Etymologists think that the Latin word *lympa* is derived from the Greek *nymphē*, "a nymph or *inferior Goddess*," they say. "The Muses were sometimes called *nymphs* by the poets. Hence (according to Webster) all persons in a state of rapture, as seers, poets, madmen, etc., were said to be caught by the nymphs."

The Goddess of Moisture (the Greek and Latin *nymph* or *lymph*, then) is fabled in India as being born from the *pores* of one of the Gods, whether the Ocean God, Varuna, or a minor "River God" is left to the particular sect and fancy of the believers. But the main question is, that the

ancient Greeks and Latins are thus admittedly known to have shared in the same "superstitions" as the Hindus. This superstition is shown in their maintaining to this day that every atom of matter in the four (or five) Elements is an emanation from an inferior God or Goddess, himself or herself an earlier emanation from a superior deity; and, moreover, that each of these atoms -- being Brahma, one of whose names is *Anu*, or atom -- no sooner is it emanated than it *becomes endowed with consciousness*, each of its kind, and free-will, acting within the limits of law. Now, he who knows that the *kosmic trimurti* (trinity) composed of Brahma, the Creator; Vishnu, the Preserver; and Siva, the Destroyer, is a most magnificent and scientific symbol of the *material Universe* and its gradual evolution; and who finds a proof of this, in the etymology of the names of these deities (8), plus the doctrines of *Gupta Vidya*, or esoteric knowledge -- knows also how to correctly understand this "superstition." The five fundamental titles of Vishnu -- added to that of *Anu* (atom) common to all the trimurtic personages -- which are, *Bhutatman*, one with the created or emanated materials of the world; *Pradhanatman*, "one with the senses;" *Paramatman*, "Supreme Soul"; and *Atman*, Kosmic Soul, or the Universal Mind -- show sufficiently what the ancient Hindus meant by endowing with mind and consciousness every atom and giving it a distinct name of a God or a Goddess. Place their Pantheon, composed of 30 crores (or 300 millions) of deities within the macrocosm (the Universe), or inside the microcosm (man), and the number will not be found overrated, since they relate to the atoms, cells, and molecules of everything that is.

This, no doubt, is too poetical and abstruse for our generation, but it seems decidedly as scientific, if not more so, than the teachings derived from the latest discoveries of *Physiology and Natural History*.

7. *Life* and *activity* are but two different names for the same idea, or, what is still more correct, they are two words with which the men of science connect no definite idea whatever. Nevertheless, and perhaps just for that, they are obliged to use them, for they contain the point of contact between the most difficult problems over which, in fact, the greatest thinkers of the materialistic school have ever tripped. ([return to text](#))
8. *Brahma* comes from the root *brih*, "to expand," to "scatter"; *Vishnu* from the root *vis* or *vish* (phonetically) "to enter into," "to pervade" the universe, of matter. As to Siva -- the patron of the

Yogis, the etymology of his name would remain *incomprehensible* to the casual reader. ([return to text](#))

The Dual Aspect of Wisdom

No doubt but ye are the people and wisdom shall die with you. -- *Job* xii, 2

But wisdom is justified of her children. -- *Matthew* xi, 19

It is the privilege -- as also occasionally the curse -- of editors to receive numerous letters of advice, and the conductors of *Lucifer* have not escaped the common lot. Reared in the aphorisms of the ages they are aware that "he who can take advice is superior to him who gives it," and are therefore ready to accept with gratitude any sound and practical suggestions offered by friends; but the last letter received does not fulfill the condition. It is not even his own wisdom, but that of the age we live in, which is asserted by our adviser, who thus seriously risks his reputation for keen observation by such acts of devotion on the altar of modern pretensions. It is in defense of the "wisdom" of our century that we are taken to task, and charged with "preferring barbarous antiquity to our modern civilization and its inestimable boons," with forgetting that "our own-day wisdom compared with the awakening instincts of the Past is in no way inferior in *philosophic wisdom* even to the age of Plato." We are lastly told that we, Theosophists, are "too fond of the dim yesterday, and as unjust to our glorious (?) present-day, the bright noon-hour of the highest civilization and culture"! !

Well, all this is a question of taste. Our correspondent is welcome to his own views, but so are we to ours. Let him imagine that the Eiffel Tower dwarfs the Pyramid of Ghizeh into a mole-hill, and the Crystal Palace grounds transform the hanging gardens of Semiramis into a kitchen-garden -- if he likes. But if we are seriously "challenged" by him to show "in what respect our age of hourly progress and gigantic thought" -- a progress a trifle marred, however, by our Huxleys being denounced by our Surgeons, and the University ladies, senior classics and wranglers, by the "hallelujah lasses" -- is inferior to the ages of, say, a hen-pecked "Socrates and a cross-legged Buddha," then we will answer him, giving him, of course, our own personal opinion.

Our age, we say, is inferior in Wisdom to any other, because it professes, more visibly every day, *contempt for truth and justice, without which there can be no Wisdom*. Because our civilization, built up of shams and appearances, is at best like a beautiful green morass, a bog, spread over a deadly quagmire. Because this century of culture and worship of matter, while offering prizes and premiums for every "best thing" under the Sun, from the biggest baby and the largest orchid down to the strongest pugilist and the fattest pig, has no encouragement to offer to morality; no prize to give for any moral virtue. Because it has Societies for the prevention of physical cruelty to animals, and none with the object of preventing the moral cruelty practiced on human beings. Because it encourages, legally and tacitly, vice under every form, from the sale of whiskey down to forced prostitution and theft brought on by starvation wages, Shylock-like exaction, rents and other comforts of our cultured period. Because, finally, this is the age which, although proclaimed as one of physical and moral freedom, is in truth the age of the most ferocious moral and mental slavery, the like of which was never known before. Slavery to State and *men* has

disappeared only to make room for slavery to *things* and *Self*, to one's own vices and idiotic social customs and ways. Rapid civilization, adapted to the needs of the higher and middle classes, has doomed by contrast to only greater wretchedness the starving masses. Having leveled the two former it has made them the more to disregard the substance in favor of form and appearance, thus forcing modern man into duress vile, a slavish dependence on things inanimate, to use and to serve which is the first bounded duty of every *cultured* man.

Where then is the Wisdom of our modern age?

In truth, it requires but a very few lines to show why we bow before ancient Wisdom, while refusing absolutely to see any in our modern civilization. But to begin with, what does our critic mean by the word "wisdom"? Though we have never too unreasonably admired Lactantius, yet we must recognize that even that innocent Church Father, with all his cutting insults anent the heliocentric system, defined the term very correctly when saying that "the first point of Wisdom is to discern that which is false, and the second, to know that which is true." And if so what chance is there for our century of falsification, from the revised Bible texts down to natural butter, to put forth a claim to "Wisdom"? But before we cross lances on this subject we may do well, perchance, to define the term ourselves.

Let us premise by saying that Wisdom is, at best, an elastic word -- at any rate as used in European tongues. That it yields no clear idea of its meaning, unless preceded or followed by some qualifying adjective. In the Bible, indeed, the Hebrew equivalent *Chockmah* (in Greek, *Sophia*) is applied to the most dissimilar things -- abstract and concrete. Thus we find "Wisdom" as the characteristic both of divine inspiration and also of terrestrial cunning and craft; as meaning the Secret Knowledge of the Esoteric Sciences, and also blind faith; the "fear of the Lord," and Pharaoh's magicians. The noun is indifferently applied to Christ and to sorcery, for the witch Sedecla is also referred to as the "*wise woman* of En-Dor." From the earliest Christian antiquity, beginning with St. James (iii, 13-17), down to the last Calvinist preacher, who sees in hell and eternal damnation a proof of "the Almighty's *wisdom*," the term has been used with the most varied meanings. But St. James teaches two kinds of wisdom; a teaching with which we fully concur. He draws a strong line of separation between the divine or *noetic* "Sophia" -- the Wisdom from above -- and the terrestrial, psychic, and devilish wisdom (iii, 15). For the true Theosophist there is no wisdom save the former. Would that such an one could declare with Paul, that he speaks that wisdom exclusively only among them "that are perfect," i.e., those initiated into its mysteries, or familiar, at least, with the A B C of the sacred sciences. But, however great was his mistake, however premature his attempt to sow the seeds of *the true and eternal gnosis* on unprepared soil, his motives were yet good and his intention unselfish, and *therefore* has he been stoned. For had he only attempted to preach some particular fiction of his own, or done it for gain, who would have ever singled him out or tried to crush him, amid the hundreds of other false sects, daily "collections" and crazy "societies"? But his case was different. However cautiously, still he spoke "not the wisdom of this world" but *truth* or the "hidden wisdom . . . which none of the Princes of this World know (I *Corinth.* ii.) least of all the *archons* of our modern science. With regard to "psychic" wisdom, however, which James defines as terrestrial and devilish, it has existed in all ages, from the days of Pythagoras and Plato, when for one *philosophus* there were nine *sophistae*, down to our modern era. To such wisdom our century is welcome, and indeed fully entitled, to lay a claim. Moreover, it is an attire easy to put

on; there never was a period when crows refused to array themselves in peacock's feathers, if the opportunity was offered.

But now as then, we have a right to analyze the terms used and inquire in the words of the book of Job, that suggestive allegory of Karmic purification and initiation rites: "Where shall (true) wisdom be found? Where is the place of understanding?" and to answer again in his words: "With the ancient *is* wisdom and in the length of days understanding." (*Job* xxviii, 12 and xii, 12)

Here we have to qualify once more a dubious term, viz: the word "ancient," and to explain it. As interpreted by the orthodox churches, it has in the mouth of Job one meaning; but with the Kabalist, quite another; while in the Gnosis of the Occultist and Theosophist it has distinctly a third signification, the same which it had in the original *Book of Job*, a pre-Mosaic work and a recognized treatise on Initiation. Thus, the Kabalist applies the adjective "ancient" to the Manifested WORD or LOGOS (*Dabar*) of the forever concealed and uncognizable deity. Daniel, in one of his visions, also uses it when speaking of Jahve -- the androgynous Adam Kadmon. The Church man connects it with his anthropomorphic Jehovah, the "Lord God" of the *translated* Bible. But the Eastern Occultist employs the mystic term only when referring to the reincarnating higher Ego. For, divine Wisdom being diffused throughout the infinite Universe, and our impersonal HIGHER SELF being an integral part of it, the *atmic* light of the latter can be centered only in that which though eternal is still individualized -- i.e., the noetic Principle, the manifested God within each rational being, or our Higher *Manas* at one with *Buddhi*. It is this collective light which is the "Wisdom that is from above," and which whenever it descends on the personal Ego, is found "pure, peaceable, gentle." Hence, Job's assertion that "Wisdom is with the Ancient," or *Buddhi-Manas*. For the Divine Spiritual "I," is alone eternal, and the same throughout all births; whereas the "personalities" it informs in succession are evanescent, changing like the shadows of a kaleidoscopic series of forms in a magic lantern. It is the "Ancient," because, whether it be called Sophia, Krishna, *Buddhi-Manas* or Christos, it is ever the "first-born" of *Alaya-Mahat*, the Universal Soul and the Intelligence of the Universe. Esoterically then, Job's statement must read: "With the Ancient (man's Higher Ego) is Wisdom, and in the length of days (or number of its re-incarnations) is understanding." No man can learn true and final Wisdom in one birth; and every new rebirth, whether we be reincarnated for weal or for woe, is one more lesson we receive at the hands of the stern yet ever just schoolmaster -- KARMIC LIFE.

But the world -- the Western world, at any rate -- knows nothing of this, and refuses to learn anything. For it, any notion of the Divine Ego or the plurality of its births is "heathen foolishness." The Western world rejects these truths, and will recognize no *wise* men except those of its own making, created in its own image, born within its own Christian era and teachings. The only "wisdom" it understands and practices is the psychic, the "terrestrial and devilish" wisdom spoken of by James, thus making of the *real* Wisdom a misnomer and a degradation. Yet, without considering her multiplied varieties, there are two kinds of even "terrestrial" wisdom on our globe of mud -- the real and the apparent. Between the two, there is even for the superficial observer of this busy wicked world, a wide chasm, and yet how very few people will consent to see it! The reason for this is quite natural. So strong is human selfishness, that wherever there is the smallest personal interest at stake, there men become deaf and blind to the truth, as often consciously as not. Nor are many people capable of recognizing as speedily as

is advisable the difference between men who are wise and those who only *seem* wise, the latter being chiefly regarded as such because they are very clever at blowing their own trumpet. So much for "wisdom" in the profane world.

As to the world of the students in mystic lore, it is almost worse. Things have strangely altered since the days of antiquity, when the truly wise made it their first duty to conceal their knowledge, deeming it too sacred to even mention before the *hoi polloi*. While the mediaeval *Rosecroix*, the true philosopher, keeping old Socrates in mind, repeated daily that all he knew was that he knew nothing, his modern self-styled successor announces in our day, through press and public, that those mysteries in Nature and her Occult laws of which he knows nothing, have never existed at all. There was a time when the acquirement of Divine Wisdom (*Sapientia*) required the sacrifice and devotion of a man's whole life. It depended on such things as the purity of the candidate's motives, on his fearlessness and independence of spirit; but now, to receive a patent for wisdom and adept-ship requires only unblushing impudence. A certificate of divine wisdom is now decreed, and delivered to a self-styled "*Adeptus*" by a regular majority of votes of profane and easily caught gulls, while a host of magpies driven away from the roof of the Temple of Science will herald it to the world in every marketplace and fair. Tell the public that now, even as of old, the genuine and sincere observer of life and its underlying phenomena, the intelligent co-worker with nature, may, by becoming an expert in her mysteries thereby become a "wise" man, in the terrestrial sense of the word, but that never will a *materialist* wrench from nature any secret on a higher plane -- and you will be laughed to scorn. Add, that no "wisdom from above" descends on any one save on the *sine qua non* condition of leaving at the threshold of the Occult every atom of selfishness, or desire for personal ends and benefit -- and you will be speedily declared by your audience a candidate for the lunatic asylum. Nevertheless, this is an old, very old truism. Nature gives up her innermost secrets and imparts *true wisdom* only to him, who seeks truth for its own sake, and who craves for knowledge in order to confer benefits on others, not on his own unimportant personality. And, as it is precisely to this *personal benefit* that nearly every candidate for adept-ship and magic looks, and that few are they, who consent to learn at such a heavy price and so small a benefit for themselves in prospect -- the really wise Occultists become with every century fewer and rarer. How many are there, indeed, who would not prefer the will-o'-the-wisp of even passing fame to the steady and ever-growing light of eternal, *divine* knowledge, if the latter has to remain, for all but oneself -- a light under the bushel?

The same is the case in the world of materialistic science, where we see a great paucity of really learned men and a host of skin-deep scientists, who yet demand each and all to be regarded as Archimedes and Newtons. As above so below. Scholars who pursue knowledge for the sake of truth and fact, and give these out, however unpalatable, and not for the dubious glory of enforcing on the world their respective personal hobbies -- may be counted on the fingers of one hand: while legion is the name of the pretenders. In our day, reputations for learning seem to be built by suggestion on the hypnotic principle, rather than by real merit. The masses cower before him who imposes himself upon them: hence such a galaxy of men regarded as eminent in science, arts and literature; and if they are so easily accepted, it is precisely because of the gigantic self-opinionated and self-assertion of, at any rate, the majority of them. Once thoroughly analyzed, however, how many of such would remain who truly deserve the appellation of "wise" even in terrestrial wisdom? How many, we ask, of the so-called "authorities" and "leaders of

men" would prove much better than those of whom it was said -- by one "wise" indeed -- "they be blind leaders of the blind"? That the teachings of neither our modern teachers nor preachers are "wisdom from above" is fully demonstrated. It is proved not by any personal incorrectness in their statements or mistakes in life, for "to err is but human," but by incontrovertible facts.

Wisdom and *Truth* are synonymous terms, and that which is false or well-known representative of the Church of England, that the *Sermon of the Mount* would, in its practical application, mean utter ruin for his country less than three weeks; and if it is no less true, as asserted by a literary critic of science, that "the knell of Charles Darwinism is rung in Mr. A. R. Wallace's present book," (1) an event already predicted by Quatrefages -- then we are left to choose between two courses. We have either to take both Theology and Science on blind faith and trust; or, to proclaim both untrue and untrustworthy. There is however, a third course open: *to pretend that we believe in both at the same time*, and say nothing, as many do; but this would be sinning against Theosophy and pandering to the prejudices of Society -- and that we refuse to do. More than this: we declare openly, *quand meme*, that not one of the two, neither Theologist nor Scientist, has the right in the face of this to claim, the one that he preaches that which is divine inspiration, and the other -- exact science; since the former enforces that, which is on his own recognition, pernicious to men and states -- i.e. the ethics of Christ; and the other (in the person of the eminent naturalist, Mr. A. R. Wallace, as shown by Mr. Samuel Butler) teaches Darwinian evolution, in which he believes no longer; a scheme, moreover, *which has never existed in nature*, if the opponents of Darwinism are correct.

Nevertheless, if anyone would presume to call "unwise" or "false" the world-chosen authorities, or declare their respective policies dishonest, he would find himself promptly reduced to silence. To doubt the exalted wisdom of the religion of the late Cardinal Newman, of the Church of England, or again of our great modern scientists, is to sin against the Holy Ghost and Culture. Woe unto him who refuses to recognize the World's "Elect." He has to bow before one or the other, though, if one *is* true, the other *must* be false; and if the "wisdom" of neither Bishop nor Scientist is "from above" -- which is pretty fairly demonstrated by this time -- then their "wisdom" is at best -- "terrestrial, psychic, devilish."

Now our readers have to bear in mind that naught of the above is meant as a sign of disrespect for the *true* teachings of Christ, or *true* science: nor do we judge personalities but only the systems of our civilized world. Valuing freedom of thought above all things as the only way of reaching at some future time that Wisdom, of which every Theosophist ought to be enamored, we recognize the right to the same freedom in our foes as in our friends. All we contend for is their claim to Wisdom -- as we understand this term. Nor do we blame, but rather pity, in our innermost heart, the "wise men" of our age for trying to carry out the only policy that will keep them on the pinnacle of their "authority"; as they could not, if even they would, act otherwise and preserve their *prestige* with the masses, or escape from being speedily outcast by their colleagues. The party spirit is so strong with regard to the old tracks and ruts, that to turn on a side path means deliberate treachery to it. Thus, to be regarded now-a-days as an authority in some particular subject, the scientist has to reject *nolens volens* the metaphysical, and the theologian to show contempt for the materialistic teachings. All this is worldly policy and practical common sense, but it is not the *Wisdom* of either Job or James.

Shall it be then regarded as too far fetched, if, basing our words on a life-long observation and experience, we venture to offer our ideas as to the quickest and most efficient means of obtaining our present World's universal respect and becoming an "authority"? Show the tender regard for the corns of every party's hobbies, and offer yourself as the chief executioner, the hangman, of the reputations of men and things regarded as unpopular. Learn, that the great secret of power consists in the art of pandering to popular prejudices, to the World's likes and dislikes. Once this principal condition complied with, he who practices it is certain of attracting to himself the educated and their satellites -- the less educated -- they whose rule it is to place themselves invariably on the safe side of public opinion. This will lead to a perfect harmony or simultaneous action. For, while the favorite attitude of the cultured is to hide behind the intellectual bulwarks of the favorite leaders of scientific thought, and *jurare in verba magistri*, that of the less cultured is to transform themselves into the faithful, mechanical telephones of their superiors, and to repeat like well-trained parrots the *dicta* of their immediate leaders. The now aphoristical precept of Mr. Artemus Ward, the showman of famous memory -- "Scratch my back, Mr. Editor, and I will scratch yours" -- proves immortally true. The "rising Star," whether he be a theologian, a politician, an author, a scientist, or a journalist -- has to begin scratching the back of public tastes and prejudices -- a hypnotic method as old as human vanity. Gradually the hypnotized masses begin to purr, they are ready for "suggestion." Suggest whatever you want them to believe, and forthwith they will begin to return your caresses, and purr now to your hobbies, and pander in their turn to anything suggested by theologian, politician, author, scientist, or journalist. Such is the simple secret of blossoming into an "authority" or a "leader of men"; and such is the secret of our modern-day wisdom.

And this is also the "secret" and the true reason of the *unpopularity* of *Lucifer* and of the ostracism practiced by this same modern world on the Theosophical Society: for neither *Lucifer*, nor the Society it belongs to, has ever followed Mr. Artemus Ward's golden precept. No true Theosophist, in fact, would consent to become the fetish of a fashionable doctrine, any more than he would make himself the slave of a decaying dead-letter system, the spirit from which has disappeared for ever. Neither would he pander to anyone or anything, and therefore would always decline to show belief in that in which he does not, nor can he believe, which is lying to his own soul. Therefore there, where others see "the beauty and graces of modern culture," the Theosophist sees only moral ugliness and the somersaults of the clowns of the so-called cultured centers. For him nothing applies better to modern fashionable society than Sydney Smith's description of Popish ritualism: "Posture and imposture, flections and genuflections, bowing to the right, curtsying to the left, and an immense amount of male (and especially female) millinery." There may be, no doubt, for some worldly minds, a great charm in modern civilization; but for the Theosophist all its bounties can hardly repay for the evils it has brought on the world. These are so many, that it is not within the limits of this article to enumerate these offspring of culture and of the progress of physical science, whose latest achievements begin with vivisection and end in improved murder by electricity.

Our answer, we have no doubt, is not calculated to make us more friends than enemies, but this can be hardly helped. Our magazine may be looked upon as "pessimistic," but no one can charge it with publishing slanders or lies, or, in fact, anything but that which we honestly believe to be true. Be it as it may, however, we hope never to lack moral courage in the expression of our opinions or in defense of Theosophy and its Society. Let then nine-tenths of every population

arise in arms against the Theosophical Society wherever it appears -- they will never be able to suppress the truths it utters. Let the masses of growing Materialism, the hosts of Spiritualism, all the Church-going congregations, bigots and iconoclasts, Grundy-worshippers, aping-followers and blind disciples, let them slander, abuse, lie, denounce, and publish every falsehood about us under the sun -- they will not uproot Theosophy, nor even upset her Society, if only its members hold together. Let even such friends and *advisers* as he who is now answered, turn away in disgust from those whom he addresses in vain -- it matters not, for our two paths in life run diametrically opposite. Let him keep to his "terrestrial" wisdom: we will keep to that pure ray "that comes from above," from the light of the "Ancient."

What indeed, has WISDOM, *Theosophia* -- the Wisdom "full of mercy and good fruits, without wrangling or partiality and without hypocrisy" (*James* iii, 17) -- to do with our cruel, selfish, crafty, and hypocritical world? What is there in common between divine Sophia and the improvements of modern civilization and science; between spirit and the letter that killeth? The more so as at this stage of evolution the wisest man on earth, according to the wise Carlyle, is but a clever infant spelling letters from a hieroglyphical, prophetic book, the lexicon of which lies in *eternity*."

The Esoteric Character of the Gospels

Part I

". . . . Tell us, when shall these things be? And what shall be the sign *of thy presence*, and *of the consummation of the age*?" (1) asked the Disciples of the MASTER, on the Mount of Olives.

The reply given by the "Man of Sorrow," the *Chrestos*, on his trial, but also on his way to triumph, as *Christos*, or Christ (2), is prophetic, and very suggestive. It is a warning indeed. The answer must be quoted in full. Jesus said unto them: --

Take heed that *no man* lead you astray. For many shall come in my name saying, I am the Christ; and shall lead many astray. And ye shall hear of wars but the end is not yet. *For nation shall rise against nation, and kingdom against kingdom; and there shall be famines and earthquakes in divers places.* But all these things are the beginning of travail. . . . Many false prophets shall arise, and shall lead many astray then shall the end come. . . . when ye see the abomination of desolation which was spoken through Daniel. . . . Then if any man shall say unto you, *Lo, here is the Christ*, or there; believe him not. . . . If they shall say unto you, Behold, he is in the wilderness, go not forth; behold, he is in the inner chambers, believe them not. For as the lightning cometh forth from the

East, and is seen even in the West, so shall be the *presence* of the Son of Man, etc., etc.

Two things become evident *to all* in the above passages, now that their false rendering is corrected in the revision text: (a) "the coming of Christ," means *the presence of CHRISTOS* in a regenerated world, and not at all the actual coming in body of "Christ" Jesus; (b) this Christ is to be sought neither in the wilderness nor "in the inner chambers," nor in the sanctuary of any temple or church built by man; for Christ -- the true esoteric SAVIOR -- is no man, but the DIVINE PRINCIPLE in every human being. He who strives to resurrect the Spirit *crucified in him by his own terrestrial passions*, and buried deep in the "sepulcher" of his sinful flesh; he who has the strength to roll back *the stone of matter* from the door of his own *inner* sanctuary, he *has the risen Christ in him*. (3) The "Son of Man" is no child of the bond-woman -- *flesh*, but verily of the free-woman -- *Spirit* (4), the child of man's own deeds, and the fruit of his own spiritual labor.

On the other hand, at no time since the Christian era, have the precursor signs described in *Matthew* applied so graphically and forcibly to any epoch as they do to our own times. When has nation arisen against nation more than at this time? When have "famines" -- another name for destitute pauperism, and the famished multitudes of the proletariat -- been more cruel, earthquakes more frequent, or covered such an area simultaneously, as for the last few years? Millenarians and Adventists of robust faith, may go on saying that "the coming of (the canalized) Christ" is near at hand, and prepare themselves for "the end of the world." Theosophists -- at any rate, some of them -- who understand the hidden meaning of the universally-expected Avatars, Messiahs, Sosioshes and Christs -- know that it is no "end of the world," but "the consummation of the age," i.e., the close of a cycle, which is now fast approaching. (5) If our readers have forgotten the concluding passages of the article, "The Signs of the Times," (6) in LUCIFER for October last, let them read them over, and they will plainly see the meaning of this particular cycle.

Many and many a time the warning about the "false Christs" and prophets who shall lead people astray has been interpreted by charitable Christians, the worshippers of the dead-letter of their scripture, as applying to mystics generally, and Theosophists most especially. The recent work by Mr. Pember, *Earth's Earliest Ages*, is a proof of it. Nevertheless, it seems very evident that the words in Matthew's Gospel and others can hardly apply to Theosophists. For these were never found saying that Christ is "Here" or "There," in wilderness or city, and least of all in the "inner chamber" behind the altar of any modern church. Whether Heathen or Christian by birth, they refuse to materialize and thus degrade that which is the purest and grandest ideal -- the symbol of symbols -- namely, the immortal Divine Spirit in man, whether it be called Horus, Krishna, Buddha, or Christ. None of them has ever yet said: "I am the Christ"; for those born in the West feel themselves, so far, only *Chrestians* (7), however much they may strive to become *Christians* in Spirit. It is to those, who in their great conceit and pride refuse to win the right of such appellation by first leading the life of *Chrestos* (8); to those who haughtily proclaim themselves *Christians* (the glorified, the anointed) by sole virtue of baptism when but a few days old -- that the above-quoted words of Jesus apply most forcibly. Can the prophetic insight of him who uttered this remarkable warning be doubted by any one who sees the numerous "false prophets" and pseudo-apostles (*of Christ*), now roaming over the world? These have split the one

divine Truth into fragments, and broken, in the camp of the Protestants alone, the rock of the Eternal Verity into three hundred and fifty odd pieces, which now represent the bulk of their Dissenting sects. Accepting the number in round figures as 350, and admitting, for argument's sake, that, at least, one of these may have the approximate truth, still 349 *must be necessarily false*. (9) Each of these claims to have Christ exclusively in its "inner chamber," and denies him to all others, while, in truth, the great majority of their respective followers daily put Christ to death on the cruciform tree of matter -- the "tree of infamy" of the old Romans -- indeed!

The worship of the dead-letter in the Bible is but one more form of *idolatry*, nothing better. A fundamental dogma of faith cannot exist under a double-faced Janus form. "Justification" by *Christ* cannot be achieved at one's choice and fancy, *either* by "faith" or by "works" and James, therefore (ii., 25), contradicting Paul (*Heb.* xi., 31), and *vice versa* (10), one of them must be wrong. Hence, the Bible is *not* the "Word of God," but contains at best the words of fallible men and *imperfect* teachers. Yet read *esoterically*, it does contain, if not the *whole* truth, still, "*nothing but the truth*," under whatever allegorical garb. Only: *Quot homines tot sententiae*.

The "Christ principle," the awakened and glorified Spirit of Truth, being universal and eternal, the true *Christos* cannot be monopolized by any one person, even though that person has chosen to arrogate to himself the title of the "Vicar of Christ," or of the "Head" of that or another State-religion. The spirits of "Chrest" and "Christ" cannot be confined to any creed or sect, only because that sect chooses to exalt itself above the heads of all other religions or sects. The name has been used in a manner so intolerant and dogmatic, especially in our day, that Christianity is now the religion of arrogance *par excellence*, a stepping-stone for ambition, a sinecure for wealth, sham and power; a convenient screen for hypocrisy. The noble epithet of old, the one that made Justin Martyr say that "*from the mere name*, which is imputed to us as a crime, *we are the most excellent*," (11) is now degraded. The missionary prides himself with the so-called *conversion* of a heathen, who makes of Christianity ever a *profession*, but rarely a religion, a source of income from the missionary fund, and a pretext, since the blood of Jesus has washed them all by anticipation, for every petty crime, from drunkenness and lying up to theft. That same missionary, however, would not hesitate to publicly condemn the greatest saint to eternal perdition and hell fires if that holy man has only neglected to pass through the fruitless and meaningless form of baptism by water with accompaniment of *lip* prayers and vain ritualism.

We say "lip prayer" and "vain ritualism" knowingly. Few Christians among the laymen are aware even of the true meaning of the word *Christ*; and those of the clergy who happen to know it (for they are brought up in the idea that to study such subjects is *sinful*) keep the information secret from their parishioners. They demand blind, implicit faith, and *forbid inquiry as the one unpardonable sin*, though nothing of that which leads to the knowledge of the truth can be aught else than holy. For what is "Divine Wisdom," or *Gnosis*, but the essential reality behind the evanescent appearances of objects in nature -- the very soul of the manifested LOGOS? Why should men who strive to accomplish union with the one eternal and absolute Deity shudder at the idea of prying into its mysteries -- however awful? Why, above all, should they use names and words the very meaning of which is a sealed mystery to them a mere sound? Is it because an unscrupulous, power-seeking Establishment called a Church has cried "wolf" at every such attempt, and, denouncing-it as "blasphemous," has ever tried to kill the spirit of inquiry? But Theosophy, the "divine Wisdom," has never heeded that cry, and has the courage of its opinions.

The world of sceptics and fanatics may call it, one -- an empty "ism" -- the other "Satanism": they can never crush it. Theosophists have been called Atheists, haters of Christianity, the enemies of God and the gods. They are none of these. Therefore, they have agreed this day to publish a clear statement of their ideas, and a profession of their faith -- with regard to monotheism and Christianity, at any rate -- and to place it before the impartial reader to judge them and their detractors on the merits of their respective faiths. No truth-loving mind would object to such honest and sincere dealing, nor will it be dazzled by any amount of new light thrown upon the subject, howsoever much startled otherwise. On the contrary, such minds will thank LUCIFER, perhaps, while those of whom it was said "*qui vult decipi decipiatur*" -- let them be deceived by all means!

The editors of this magazine propose to give a series of essays upon the hidden meaning or esotericism of the "New Testament." No more than any other scripture of the great world-religions can the Bible be excluded from that class of allegorical and symbolical writings which have been, from the pre-historic ages, the receptacle of the secret teachings of the Mysteries of Initiation, under a more or less veiled form. The primitive writers of the *Logia* (now the Gospels) knew certainly *the* truth, and the *whole* truth; but their successors had, as certainly, only dogma and form, which lead to hierarchical power at heart, rather than the spirit of the so-called Christ's teachings. Hence the gradual perversion. As Higgins truly said, in the *Christologia* of St. Paul and Justin Martyr, we have the esoteric religion of the Vatican, a refined Gnosticism for the cardinals, a more gross one for the people. It is the latter, only still more materialized and disfigured, which has reached us in our age.

The idea of writing this series was suggested to us by a certain letter published in our October issue, under the heading of "Are the Teachings ascribed to Jesus contradictory?" Nevertheless, this is no attempt to contradict or weaken, in any one instance, that which is said by Mr. Gerald Massey in his criticism. The contradictions pointed out by the learned lecturer and author are too patent to be explained by any "Preacher" or Bible champion; for what he has said -- only in more terse and vigorous language -- is what was said of the descendant of Joseph Pandira (or Panthera) in *Isis Unveiled* (vol. II., p. 201), from the Talmudic *Sepher Toldos Jeshu*. His belief with regard to the spurious character of the Bible and New Testament, *as now edited*, is therefore, also the belief of the present writer. In view of the recent revision of the Bible, and its many thousands of mistakes, mistranslations, and interpolations (some confessed to, and others withheld), it would ill become an opponent to take any one to task for refusing to believe in the authorized texts.

But the editors would object to one short sentence in the criticism under notice. Mr. Gerald Massey writes: --

"What is the use of taking your 'Bible oath' that the thing is true, if the book you are sworn upon is a magazine of falsehoods already exploded, or just going off?"

Surely it is not a symbolologist of Mr. Massey's powers and learning who would call the *Book of the Dead*, or the Vedas, or any other ancient Scripture, "a magazine of falsehoods." (12) Why not regard in the same light as all the others, the Old, and, *in a still greater measure*, the New Testament?

All of these are "magazines of falsehoods," if accepted in the exoteric dead-letter interpretations of their ancient, and especially their modern, theological glossarists. Each of these records has served in its turn as a means for securing power and of supporting the ambitious policy of an unscrupulous priesthood. All have promoted superstition, all made of their gods bloodthirsty and ever-damning Molochs and fiends, as all have made nations to serve the latter more than the God of Truth. But while cunningly-devised dogmas and intentional misinterpretations by scholiasts are beyond any doubt, "falsehoods already exploded," the texts themselves are mines of universal truths. But for the world of the profane and sinners, at any rate -- they were and still are like the mysterious characters traced by "the fingers of a man's hand" on the wall of the Palace of Belshazzar: *they need a Daniel to read and understand them.*

Nevertheless, TRUTH has not allowed herself to remain without witnesses. There are, besides great Initiates into scriptural symbology, a number of quiet students of the mysteries or archaic esotericism, of scholars proficient in Hebrew and other dead tongues, who have devoted their lives to unriddle the speeches of the Sphinx of the world-religions. And these students, though none of them has yet mastered all the "seven keys" that open the great problem, have discovered enough to be able to say: There *was* a universal mystery-language, in which all the World Scriptures were written, from Vedas to *Revelation*, from the *Book of the Dead* to the *Acts*. One of the keys, at any rate -- the numerical and geometrical key (13) to the Mystery Speech is now rescued; an ancient language, truly, which up to this time remained hidden, but the evidences of which abundantly exist, as may be proven by undeniable mathematical demonstrations. If, indeed, the Bible is forced on the acceptance of the world in its dead-letter meaning, in the face of the modern discoveries by Orientalists and the efforts of independent students and kabalists, it is easy to prophesy that even the present new generations of Europe and America will repudiate it, as all the materialists and logicians have done. For, the more one studies ancient religious texts, the more one finds that the ground-work of the New Testament is the same as the ground-work of the Vedas, of the Egyptian theogony, and the Mazdean allegories. The atonements by blood -- blood-covenants and blood-transferences from gods to men, and by men, as sacrifices to the gods -- are the first keynote struck in every cosmogony and theogony; soul, life and blood were synonymous words in every language, pre-eminently with the Jews; and that blood-giving was life-giving. "Many a legend among (geographically) alien nations ascribes soul and consciousness in newly-created mankind to the blood of the god-creators." Berosus records a Chaldean legend ascribing the creation of a new race of mankind to the admixture of dust with the blood that flowed from the severed head of the god Belus. "On this account it is that men are rational and partake of divine knowledge," explains Berosus. (14) And Lenormant has shown (*Beginnings of History*, p. 52, note) that "the Orphics . . . said that the *immaterial part of man, his soul* (his life) sprang from the blood of Dionysius Zagreus, whom . . . Titans tore to pieces." Blood "revivifies the dead" -- i.e., interpreted metaphysically, it gives *conscious* life and a soul to the man of matter or clay -- such as the modern materialist is now. The mystic meaning of the injunction, "Verily I say unto you, except *ye eat the flesh* of the Son of man and *drink his blood*, ye have not life in yourselves," etc., can never be understood or appreciated at its true *occult* value, except by those who hold some of the *seven keys*, and yet care little for St. Peter. (15) These words, whether said by Jesus of Nazareth, or Jeshua Ben-Panthera, are the words of an INITIATE. They have to be interpreted with the help of *three* keys -- one opening the *psychic* door, the second that of physiology, and the third that which unlocks the mystery of terrestrial being, by unveiling the inseparable blending of theogony with anthropology. It is for revealing a

few of these truths, with the *sole view of saving intellectual mankind from the insanities of materialism and pessimism*, that mystics have often been denounced as the servants of Antichrist, even by those Christians who are most worthy, sincerely pious and respectable men.

The first key that one has to use to unravel the dark secrets involved in the mystic name of Christ, is the key which unlocked the door to the ancient mysteries of the primitive Aryans, Sabaeans and Egyptians. The Gnosis supplanted by the Christian scheme was universal. It was the echo of the primordial wisdom-religion which had once been the heirloom of the whole of mankind; and, therefore, one may truly say that, in its purely metaphysical aspect, the Spirit of Christ (the divine *logos*) was present in humanity from the beginning of it. The author of the *Clementine Homilies* is right; the mystery of Christos -- now supposed to have been taught by Jesus of Nazareth -- "was identical" with that which *from the first* had been communicated "to those who were worthy," as quoted in another lecture. (16) We may learn from the Gospel according to Luke, that the "worthy" were those who had been initiated into the mysteries of the Gnosis, and who were "accounted worthy" to attain that "resurrection from the dead" *in this life*. . . . "those who knew that they could die no more, being equal to the angels as sons of God and sons of the Resurrection." In other words, they were the great adepts of *whatever religion*; and the words apply to all those who, without being Initiates, strive and succeed, through personal efforts to *live the life* and to attain the naturally ensuing spiritual illumination in blending their personality -- (the "Son") with (the "Father,") their individual divine Spirit, *the God within* them. This "resurrection" can never be monopolized by the Christians, but is the spiritual birth-right of every human being endowed with soul and spirit, whatever his religion may be. Such individual is a *Christ-man*. On the other hand, those who choose to ignore the Christ (principle) within themselves, must die *unregenerate heathens* -- baptism, sacraments, lip-prayers, and belief in dogmas notwithstanding.

In order to follow this explanation, the reader must bear in mind the real archaic meaning of the paronomasia involved in the two terms *Chrestos* and *Christos*. The former means certainly more than merely "a good," and "excellent man," while the latter was never applied to any one living man, but to every Initiate at the moment of *his second birth and resurrection*. (17) He who finds Christos within himself and recognizes the latter as his only "way," becomes a follower and an *Apostle of Christ*, though he may have never been baptized, nor even have met a "Christian," still less call himself one.

FOOTNOTES:

1. *Matthew* xxiv, 3, *et seq.* The sentences italicized are those which stand corrected in the New Testament after the recent revision in 1881 of the version of 1611; which version is full of errors, voluntary and involuntary. The word "presence," for "coming," and "the consummation of the age," now standing for "the end of the world," have altered, of late, the whole meaning, even for the most sincere Christians, if we exempt the Adventists. ([return to text](#))
2. He who will not ponder over and master the great difference between the meaning of the two

Greek words -- [*chrestos*] and [*christos*] must remain blind for ever to the true esoteric meaning of the Gospels; that is to say, to the living Spirit entombed in the sterile dead-letter of the texts, the very Dead Sea fruit of *lip*-Christianity. ([return to text](#))

3. For ye are the temple ("sanctuary" in the *revised* N. T.) of the living God. (2 *Cor.* vi., 16.) ([return to text](#))

4. Spirit, or the Holy Ghost, was feminine with the Jews, as with most ancient peoples, and it was so with the early Christians. *Sophia* of the Gnostics and the third Sephiroth *Binah* (the *female* Jehovah of the Kabalists), are feminine principles -- "Divine Spirit," or *Ruach*. "*Achath Ruach Elohim Chiim*." "One is *She*, the Spirit of the Elohim of Life," is said in *Sepher Yezirah*. ([return to text](#))

5. There are several remarkable cycles that come to a close at the end of this century. First, the 5,000 years of the Kaliyug cycle; again the Messianic cycle of the Samaritan (also Kabalistic) Jews of the man connected with *Pisces* (Ichthys or "Fish-man" *Dag*). It is a cycle, historic and not very long, but very occult, lasting about 2,155 solar years, but having a true significance only when computed by lunar months. It occurred 2410 and 255 B.C., or when the equinox entered into the sign of the *Ram*, and again into that of *Pisces*. When it enters, in a few years, the sign of *Aquarius*, psychologists will have some extra work to do, and the psychic idiosyncrasies of humanity will enter on a great change. ([return to text](#))

6. See Volume II. p. 381. ([return to text](#))

7. The earliest Christian author, Justin Martyr, calls, in his first *Apology*, his co-religionists *Chrestians*, [*Chrestianoï*] -- not Christians. ([return to text](#))

8. "Clemens Alexandrinus, in the second century, founds a serious argument on this paranomasia (lib. iii., cap. xvii., *53 et circa*), that all who believed in *Chrest* (i.e., "a good man") both are, and are called Chrestians, that is, good men," (*Strommata*, lib. ii. "Higgins' *Anacalypsis*"). And Lactantius (lib. iv., cap. vii.) says that it is only through *ignorance* that people call themselves Christians, instead of Chrestians: "*qui proper ignorantium errorem cum immutata litera Chrestum solent dicere*." ([return to text](#))

9. In England alone, there are over 239 various sects. (See Whitaker's Almanac.) In 1883, there were 186 denominations only, and now they steadily increase with every year, an additional 53 sects having sprung up in only four years! ([return to text](#))

10. It is but fair to St. Paul to remark that this contradiction is surely due to later tampering with his Epistles. Paul was a Gnostic himself, i.e., a "Son of Wisdom," and an Initiate into the true *mysteries of Christos*, though he may have thundered (or was made to appear to do so) against some Gnostic sects, of which, in his day, there were many. But his Christos was not Jesus of Nazareth, nor any living man, as shown so ably in Mr. Gerald Massey's lecture, "Paul, the Gnostic Opponent of Peter." He was an Initiate, a true "Master-Builder" or adept, as described in *Isis Unveiled*, Vol. II., pp. 90-91. ([return to text](#))

11. [*hoson te ek tou kategoreumenou hemon onomatos chrestotatoi huparchomen*] (*First Apology*). ([return to text](#))

12. The extraordinary amount of information collated by that able Egyptologist shows that he has thoroughly mastered the secret of the production of the *New Testament*. Mr. Massey knows the difference between the spiritual, divine and purely metaphysical Christos, and the made-up "lay figure" of the canalized Jesus. He knows also that the Christian canon, especially the *Gospels*, *Acts* and *Epistles*, are made up of fragments of gnostic wisdom, the ground-work of which is *pre-Christian* and built on the MYSTERIES of Initiation. It is the mode of theological presentation

and the interpolated passages -- such as in *Mark* xvi. from verse 9 to the end -- which make of the Gospels a "magazine of (*wicked*) falsehoods," and throw a slur on CHRISTOS. But the Occultist who discerns between the two currents (the true gnostic and the *pseudo* Christian) knows that the passages free from theological tampering belong to archaic wisdom, and so does Mr. Gerald Massey, though his views differ from ours. ([return to text](#))

13. "The key to the recovery of the language, so far as the writer's efforts have been concerned, was found in the use, strange to say, of the discovered integral ratio in numbers of diameter to circumference of a circle," by a geometrician. "This ratio is 6,561 for diameter and 20,612 for circumference." (Cabalistic MSS.) In one of the future numbers of "LUCIFER" more details will be given, with the permission of the discoverer. -- ED. (See *The Secret Doctrine*, I, 313 et seq.) ([return to text](#))

14. Cory's *Anc. Frag.*, p. 59, f. So do Sanchoniaton and Hesiod, who both ascribe the *vivifying* of mankind to the spilt blood of the gods. But blood and *soul* are one (*nephesh*), and the blood of the gods means here the informing soul. ([return to text](#))

15. The existence of these *seven* keys is virtually admitted, owing to deep research in the Egyptological lore, by Mr. G. Massey again. While opposing the teachings of "Esoteric Buddhism" -- unfortunately misunderstood by him in almost every respect -- in his Lecture on "The Seven Souls of Man," he writes (p. 21): --

"This system of thought, this mode of representation, this septenary of powers, in various aspects, had been established in Egypt, at least, seven thousand years ago, as we learn from certain allusions to Atum (the god 'in whom the fatherhood was individualized as the *begetter of an eternal soul*,' the *seventh* principle of the Theosophists), found in the inscriptions lately discovered at Saqqarah. I say in various aspects, *because the gnosis of the Mysteries was, at least, sevenfold in its nature* -- it was Elemental, Biological, Elementary (human), Stellar, Lunar, Solar and Spiritual -- and *nothing short of a grasp of the whole system can possibly enable us to discriminate the various parts, distinguish one from the other, and determinate the which and the what, as we try to follow the symbolical Seven through their several phases of character.*" ([return to text](#))

16. "Gnostic and Historic Christianity." ([return to text](#))

17. "Verily, verily, I say unto thee, except a man *be born again* he cannot see the Kingdom of God." (*John* iii. 4.) Here the birth *from above*, the spiritual birth, is meant, achieved at the supreme and last initiation. ([return to text](#))

The Esoteric Character of the Gospels

Part II

The word *Chrestos* existed ages before Christianity was heard of. It is found used, from the fifth century B.C., by Herodotus, by Aeschylus and other classical Greek writers, the meaning of it being applied to both things and persons.

Thus in Aeschylus (*Cho.* 901) we read of *pythochresta* the "oracles delivered by a Pythian God" (*Greek-English Lexicon*) through a pythoness; and *Pythochrestos* is the nominative singular of an

adjective derived from *chrao* (Eurip. *Ion*, 1218). The later meanings coined freely from this primitive application, are numerous and varied. Pagan classics expressed more than one idea by the verb [*chraomai*] "consulting an oracle"; for it also means "fated," *doomed* by an oracle, in the sense of a *sacrificial victim to its decree*, or -- "to the WORD"; as *chresterion* is not only "the seat of an oracle" but also "an offering to, or for, the oracle." (18) *Chrestes* is one who expounds or explains oracles, "a prophet, a soothsayer;" (19) and *chresterios* is one who belongs to, or is in the service of, an oracle, a god, or a "Master" (20); this Canon Farrar's efforts notwithstanding.(21)

All this is evidence that the terms Christ and Christians, spelt originally *Chrest* and *Chrestians* [*chrestianoï*] (22) were directly borrowed from the Temple terminology of the Pagans, and meant the same thing. The God of the Jews was now substituted for the Oracle and the other gods; the generic designation "Chrestos" became a noun applied to one special personage; and new terms such as *Chrestianoï* and *Chrestodoulos* "a follower or servant of Chrestos" -- were coined out of the old material. This is shown by Philo Judaeus, a monotheist, assuredly, using already the same term for monotheistic purposes. For he speaks of *theochrestos* "God-declared," or one who is declared by god, and of *logia theochresta* "sayings delivered by God" -- which proves that he wrote at a time (between the first century B. C., and the first A. D.) when neither Christians nor Chrestians were yet known under these names, but still called themselves the Nazarenes. The notable difference between the two words [*chrao*] -- "consulting or obtaining response from a god or oracle" (*chreo* being the Ionic earlier form of it), and *chrio* "to rub, to anoint" (from which the name Christos), has not prevented the ecclesiastical adoption and coinage from Philo's expression [*Theochrestos*] of that other term [*Theochristos*] "anointed by God." Thus the quiet substitution of the letter, [*i*] for [*e*] for dogmatic purposes, was achieved in the easiest way, as we now see.

The secular meaning of *Chrestos* runs throughout the classical Greek literature *pari passu* with that given to it in the mysteries. Demosthenes' saying [*o Chreste*] (330, 27), means by it simply "you nice fellow"; Plato (in *Phaed.* 264 B) has [*chrestos ei hoti hegei*] -- "you are an excellent fellow to think . . ." But in the esoteric phraseology of the temples "chrestos," (23) a word which, like the participle *chrestheis*, is formed under the same rule, and conveys the same sense -- from the verb [*chraomai*] ("to consult a god") -- answers to what we would call an adept, also a high *chela*, a disciple. It is in this sense that it is used by Euripides (*Ion*. 1320) and by Aeschylus (l. c.). This qualification was applied to those whom the god, oracle, or any superior had proclaimed this, that, or anything else. An instance may be given in this case.

The words [*chresen oikistera*] used by Pindar (pp. 4-10) mean "the oracle proclaimed him the colonizer." In this case the genius of the Greek language permits that the man so proclaimed should be called *Chrestos*. Hence this term was applied to every Disciple recognized by a Master, as also to every good man. Now, the Greek language affords strange etymologies. Christian theology has chosen and decreed that the name Christos should be taken as derived from [*chrio, chriso*], "anointed with scented unguents or oil." But this word has several significances. It is used by Homer, certainly, as applied to the rubbing with oil of the body after bathing (*Il.* 23, 186; also in *Od.*, 4, 252) as other ancient writers do. Yet the word *Christes* means rather a *white-washer*, while the word *Chrestes* means priest and prophet, a term far more applicable to Jesus, than that of the "Anointed," since, as Nork shows on the authority of the

Gospels, he never was anointed, either as king or priest. In short, there is a deep mystery underlying all this scheme, which, as I maintain, only a thorough knowledge of the *Pagan* mysteries is capable of unveiling. (24) It is not what the early Fathers, who had an object to achieve, may affirm or deny, that is the important point, but rather what is now the evidence for the real significance given to the two terms *Chrestos* and *Christos* by the ancients in the pre-Christian ages. For the latter had no object to achieve, therefore nothing to conceal or disfigure, and their evidence is naturally the more reliable of the two. This evidence can be obtained by first studying the meaning given to these words by the classics, and then their correct significance searched for in mystic symbology.

Now *Chrestos*, as already said, is a term applied in various senses. It qualifies both Deity and Man. It is used in the former sense in the Gospels, and in *Luke* (vi., 35), where it means "kind," and "merciful." [*chrestos estin epi tous*] . . .; in *I Peter* (ii., 3), where it is said, "Kind is the Lord," [*Chrestos o Kurios*]. On the other hand, it is explained by Clemens Alexandrinus as simply meaning a good man; i.e., "All who believe in *Chrest* (a good man) both *are*, and *are called Chrestians*, that is good men." (*Strom.* lib. ii.) The reticence of Clemens, whose Christianity, as King truly remarks in his *Gnostics*, was no more than a graft upon the congenial stock of his original Platonism, is quite natural. He was an Initiate, a new Platonist, before he became a Christian, which fact, however much he may have fallen off from his earlier views, could not exonerate him from his pledge of secrecy. And as a Theosophist and a *Gnostic*, one who *knew*, Clemens must have known that *Christos* was "the WAY," while *Chrestos* was the lonely traveler journeying on to reach the ultimate goal through that "Path," which goal was *Christos*, the glorified Spirit of "TRUTH," the reunion with which makes the soul (the Son) ONE with the (Father) Spirit. That Paul knew it, is certain, for his own expressions prove it. For what do the words [*palin odino, achris ou morphothei Christos*], or as given in the authorized translations, "I am again in travail until *Christ be formed in you*" mean, but what we give in its esoteric rendering, i.e., "until you find *the Christos* within yourselves as your only 'way'." (*Vide Galatians* iv., 19 and 20.)

Thus Jesus, whether of Nazareth or Lud (25), was a *Chrestos*, as undeniably as that he never was entitled to the appellation of *Christos*, during his life-time and before his last trial. It may have been as Higgins thinks, who surmises that the first name of Jesus was, perhaps, [*chreistos*], the second, [*chrestos*], and the third [*christos*]. "The word [*chreistos*] was in use before the H (cap. *eta*) was in the language." But Taylor (in his answer to Pye Smith, p. 113) is quoted saying "The complimentary epithet *Chrest* . . . signified nothing more than a good man."

Here again a number of ancient writers may be brought forward to testify that *Christos* (or *Chreistos*, rather) was, along with [*chrestos*] = *Chrestos*, an adjective applied to Gentiles before the Christian era. In *Philopatris* it is said [*ei tuchoi chrestos kai en ethnesin*], i.e., "if *chrestos* chance to be even among the Gentiles," etc.

Tertullian denounces in the 3rd chapter of his *Apologia* the word "*Christianus*" as derived by "crafty interpretation" (26); Dr. Jones, on the other hand, letting out the information, corroborated by good sources, that "*Chrestos* ([*chrestos*]) was the name given to Christ by the Gnostics, and even by unbelievers," assures us that the real name ought to be [*christos*] or *Christos* -- thus repeating and supporting the original "pious fraud" of the early Fathers, a fraud

which led to the carnalizing of the whole Christian system. (27) But I propose to show as much of the real meaning of all these terms as lies within my humble powers and knowledge. *Christos*, or the "Christ condition," was ever the synonym of the "Mahatmic-condition," i.e., the union of the man with the divine principle in him. As Paul says (*Ephes.* iii. 17) "[*katoikesai ton Christon dia tes pisteos en tais kardiais humon*]." "That you may find *Christos* in your *inner* man through *knowledge*" not faith, as translated; for *Pistis* is "knowledge," as will be shown further on.

There is still another and far more weighty proof that the name *Christos* is pre-Christian. The evidence for it is found in the prophecy of the Erythrean Sybil. We read it in [*IESOUS CHREISTOS THEOU HUIOS SOTER STAUROS*]. Read esoterically, this string of meaningless detached nouns, which has no sense to the profane, contains a real prophecy -- only not referring to Jesus -- and a verse from the mystic catechism of the Initiate. The prophecy relates to the coming down upon the Earth of the Spirit of Truth (*Christos*), after which advent -- that has once more nought to do with Jesus -- will begin the Golden Age; the verse refers to the necessity before reaching that blessed condition of inner (or subjective) theophany and theopneusty, to pass through the crucifixion of flesh or matter. Read exoterically, the words "*Iesous Chreistos theou yios soter stauros*," meaning literally "Jesus, *Christos*, God, Son, Savior, Cross," are most excellent handles to hang a Christian prophecy on, but they are *pagan*, not Christian.

If called upon to explain the names IESOUS CHREISTOS, the answer is: study mythology, the so-called "fictions" of the ancients, and they will give you the key. Ponder over Apollo, the solar god, and the "Healer," and the allegory about his son Janus (or Ion), his priest at Delphos, through whom alone could prayers reach the immortal gods, and his other son Asclepios, called the *Soter*, or Savior. Here is a leaflet from esoteric history written in symbolical phraseology by the old Grecian poets.

The city of Chrisea (28) (now spelt Crisea), was built in memory of Kreusa (or Creusa), daughter of King Erechtheus and mother of Janus (or Ion) by Apollo, in memory of the danger which Janus escaped. (29) We learn that Janus, abandoned by his mother in a grotto "to hide the shame of the virgin who bore a son," was found by Hermes, who brought the infant to Delphi, nurtured him by his father's sanctuary and oracle, where, under the name of Chresis Janus became first a *Chrestis* (a priest, soothsayer, or Initiate), and then very nearly a *Chresterion*, "a sacrificial victim," (30) ready to be poisoned by his own mother who knew him not, and who, in her jealousy, mistook him, on the hazy intimation of the oracle, for a son of her husband. He pursued her to the very altar with the intention of killing her -- when she was saved through the pythoness, who divulged to both the secret of their relationship. In memory of this narrow escape, Creusa, the mother, built the city of Chrisea, or Krisa. Such is the allegory, and it symbolizes simply the trials of Initiation. (31)

Finding then that Janus, the solar God, and son of Apollo, the Sun, means the "Initiator" and the "Opener of the Gate of Light," or secret wisdom of the mysteries; that he is born from Krisa (esoterically *Chris*), and that he was a *Chrestos* through whom spoke the God; that he was finally Ion, the father of the Ionians, and, some say, an *aspect* of Asclepios, another son of Apollo, it is easy to get hold of the thread of Ariadne in this labyrinth of allegories. It is not the place here to prove side issues in mythology, however. It suffices to show the connection between the mythical characters of hoary antiquity and the later fables that marked the beginning of our era of

civilization. Asclepius (Esculapius) was the divine physician, the "Healer," the "Savior," [*Soter*] as he was called, a title also given to Janus of Delphi; and IASO, the daughter of Asclepius, was the goddess of healing, under whose patronage were all the candidates for initiation in her father's temple, the novices or *chrestoi*, called "the sons of Iaso." (*Vide* for name, *Plutus*, by Aristoph. 701).

Now, if we remember, firstly, that the names of IESUS in their different forms, such as Iasius, Iasion, Jason and Iasus, were very common in ancient Greece, especially among the descendants of Jasius (the Jasides), as also the number of the "sons of Iaso," the *Mystoi* and future Epopotai (Initiates), why should not the enigmatical words in the Sibylline Book be read in their legitimate light, one that had nought to do with a Christian prophecy? The secret doctrine teaches that the first two words [*IESOUS CHREISTOS*] mean simply "son of Iaso, a Chrestos," or servant of the oracular God. Indeed IASO *is in the Ionic dialect IESO* and the expression *Iesous* -- in its archaic form, [*IESOUS*] -- simply means "the son of Iaso or *Ieso*, the "healer," i.e., [*ho Iesous*] ([*uios*]). No objection, assuredly, can be taken to such rendering, or to the name being written *Ieso* instead of *Iaso*, since the first form is *attic*, therefore incorrect, for the name is Ionic. "Ieso" from which "Ho Iesous" (son of Ieso) -- i.e., a genitive, not a nominative -- *is Ionic and cannot* be anything else, if the age of the Sibylline book is taken into consideration. Nor could the Sibyl of Erythrea have spelt it originally otherwise, as Erythrea, her very residence, was a town in Ionia (from Ion or Janus) opposite Chios; and that the *Ionic* preceded the *attic* form.

Leaving aside in this case the mystical signification of the now famous Sibylline sentence, and giving its literal interpretation only, on the authority of all that has been said, the hitherto mysterious words would stand; "Son of IASO, CHRESTOS (the priest or servant) (of the) SON of (the) GOD (Apollo) the SAVIOR from the CROSS" -- (of flesh or matter). (32) Truly, Christianity can never hope to be understood until every trace of dogmatism is swept away from it, and the dead letter sacrificed to the eternal Spirit of Truth, which is Horus, which is Crishna, which is Buddha, as much as it is the Gnostic Christos and the true Christ of Paul.

In the *Travels* of Dr. Clarke, the author describes a heathen monument found by him.

Within the sanctuary, behind the altar, we saw the fragments of a *marble cathedra*, upon the back of which we found the following inscription, exactly as it is here written, no part of it having been injured or obliterated, affording perhaps the only instance known of a sepulchral inscription upon a monument of this remarkable form.

The inscription ran thus: [*CHRESTOS PROTOS THESSALOS LARISSAIOS PELASGIOTES ETON IH*]; or, "Chrestos, the first, a Thessalonian from Larissa, Pelasgiot 18 years old Hero." Chrestos the *first* (*protos*), why? Read literally the inscription has little sense; interpreted esoterically, it is pregnant with meaning. As Dr. Clarke shows, the word Chrestos is found on the epitaphs of almost all the ancient Larissians; but it is preceded always by a proper name. Had the adjective Chrestos stood after a name, it would only mean "a good man," a posthumous compliment paid to the defunct, the same being often found on our modern tumular epitaphs. But the word Chrestos, standing alone and the other word, "protos," following it, gives it quite another meaning, especially when the deceased is specified as a "hero." To the mind of an

Occultist, the defunct was a neophyte, who had died in his 18th year *of neophytism* (33), and stood in the first or highest class of discipleship, having passed his preliminary trials as a "hero"; but had died before the last mystery, which would have made of him a "Christos," an *anointed*, one with the spirit of Christos or Truth in him. He had not reached the end of the "Way," though he had heroically conquered the horrors of the preliminary theurgic trials.

We are quite warranted in reading it in this manner, after learning the place where Dr. Clarke discovered the tablet, which was, as Godfrey Higgins remarks, there, where "I should expect to find it, at Delphi, in the temple of the God IE," who, with the Christians became Jah, or Jehovah, one with Christ Jesus. It was at the foot of Parnassus, in a gymnasium, "adjoining the Castalian fountain, which flowed by the ruins of Crisa, probably the town called Crestona," etc. And again: "In the first part of its course from the (Castalian) fountain, it (the river) separates the remains of the gymnasium . . . from the valley of Castro," as it probably did from the old city of Delphi -- the seat of the great oracle of Apollo, of the town of Krisa (or Kreusa) the great center of initiations and of the *Chrestoi* of the decrees of the oracles, where the candidates for the last *labor* were anointed with sacred oils (34) before being plunged into their last trance of forty-nine hours' duration (as to this day, in the East), from which they arose as glorified adepts or *Christoi*."

In the *Clementine Recognitions* it is announced that the father anointed his son with "oil that was taken from the wood of the Tree of Life, and from this anointing he is called the Christ": whence the Christian name. This again is Egyptian. Horus was the anointed son of the father. The mode of anointing him from the Tree of Life, portrayed on the monuments, is very primitive indeed; and the Horus of Egypt was continued in the Gnostic Christ, who is reproduced upon the Gnostic stones as the intermediate link betwixt the *Karest* and the Christ, also as the Horus of both sexes. ("The name and nature of the Christ." -- Gerald Massey)

Mr. G. Massey connects the Greek Christos or Christ with the Egyptian *Karest*, the "mummy type of immortality," and proves it very thoroughly. He begins by saying that in Egyptian the "Word of Truth" is *Ma-Kheru*, and that it is the title of Horus. Thus as he shows, Horus preceded Christ as the Messenger of the Word of Truth, the Logos or the manifestor of the divine nature in humanity. In the same paper he writes as follows:

The Gnosis had three phases -- astronomical, spiritual, and doctrinal, and all three can be identified with the Christ of Egypt. In the astronomical phase the constellation Orion is called the *Sahu* or *mummy*. The soul of Horus was represented as rising from the dead and ascending to heaven in the stars of Orion. The mummy-image was the preserved one, the saved, therefore a portrait of the Savior, as a type of immortality. This was the figure of a dead man, which, as Plutarch and Herodotus tell us, was carried round at an Egyptian banquet, when the guests were invited to look on it and eat and drink and be happy, because, when they died, they would become what the image symbolized -- that is, they also would be immortal! This type of immortality was called the *Karest*, or *Karust*, and it was the Egyptian Christ. To *Kares* means to embalm, anoint, to

make the Mummy as a type of the eternal; and, when made, it was called the *Karest*; so that this is not merely a matter of name for name, the *Karest* for the *Christ*.

This image of the *Karest* was bound up in a woof without a seam, the proper vesture of the Christ! No matter what the length of the bandage might be, and some of the mummy-swathes have been unwound that were 1,000 yards in length, the woof was from beginning to end without a seam. . . . Now, this seamless robe of the Egyptian *Karest* is a very tell-tale type of the mystical Christ, who becomes historic in the Gospels as the wearer of a coat or chiton, made without a seam, which neither the Greek nor the Hebrew fully explains, but which is explained by the Egyptian *Ketu* for the woof, and by the seamless robe or swathing without seam that was made for eternal wear, and worn by the Mummy-Christ, the image of immortality in the tombs of Egypt.

Further, Jesus is put to death in accordance with the instructions given for making the *Karest*. Not a bone must be broken. The true *Karest* must be perfect in every member. "This is he who comes out sound; whom men know not is his name."

In the Gospels Jesus rises again with every member sound, like the perfectly-preserved *Karest*, to demonstrate the physical resurrection of the mummy. But, in the Egyptian original, the mummy transforms. The deceased says: "I am spiritualized. I am become a soul. I rise as a God." This transformation into the spiritual image, the *Ka*, has been omitted in the Gospel.

This spelling of the name as Chrest or Chrest in Latin is supremely important, because it enables me to prove the identity with the Egyptian *Karest* or *Karust*, the name of the Christ as the embalmed mummy, which was the image of the resurrection in Egyptian tombs, the type of immortality, the likeness of the Horus, who rose again and made the pathway out of the sepulcher for those who were his disciples or followers. *Moreover, this type of the Karest or Mummy-Christ is reproduced in the Catacombs of Rome.* No representation of the supposed historic resurrection of Jesus has been found on any of the early Christian monuments. But, instead of the missing fact, we find the scene of Lazarus being raised from the dead. This is depicted over and over again as the typical resurrection where there is no real one! The scene is not exactly in accordance with the rising from the grave in the Gospel. It is purely Egyptian, and Lazarus is an Egyptian mummy! Thus Lazarus, in each representation, is the mummy-type of the resurrection; Lazarus *is* the *Karest*, who was the Egyptian Christ, and who is reproduced by Gnostic art in the Catacombs of Rome as a form of the Gnostic Christ, who *was not and could not become an historical character.*

Further, as the thing is Egyptian, it is probable that the name is derived from Egyptian. If so, Laz (equal to Ras) means to be raised up, while *aru* is the mummy by name. With the Greek terminal *s* this becomes Lazarus. In the course of humanizing the mythos the typical representation of the resurrection found in

the tombs of Rome and Egypt would become the story of Lazarus being raised from the dead. This *Karest* type of the Christ in the Catacombs is not limited to Lazarus.

By means of the *Karest* type the Christ and the Christians can both be traced in the ancient tombs of Egypt. The mummy was made in this likeness of the Christ. It was the Christ by name, identical with the *Chrestoi* of the Greek Inscriptions. Thus the honored dead, who rose again as the followers of Horus-Makheru, the Word of Truth, are found to be the Christians, on the Egyptian monuments. *Ma-Kheru* is the term that is always applied to the faithful ones who win the crown of life and wear it at the festival which is designated 'Come thou to me' -- an invitation by Horus the Justifier to those who are the 'Blessed ones of his father, Osiris' -- they who, having made the Word of Truth the law of their lives, were the Justified -- [*hoi chrestoi*], the Christians, on earth.

In a fifth century representation of the Madonna and child from the cemetery of St. Valentinus, the new-born babe lying in a box or crib is also the *Karest*, or mummy-type, further identified as the divine babe of the solar mythos by the disk of the sun and the cross of the equinox at the back of the infant's head. Thus the child-Christ of the historic faith is born, and visibly begins in the *Karest* image of the dead Christ, which was the mummy-type of the resurrection in Egypt for thousands of years before the Christian era. This doubles the proof that the Christ of the Christian Catacombs was a survival of the *Karest* of Egypt.

Moreover, as Didron shows, there was a portrait of the Christ who had his body *painted red!* (35) It was a popular tradition that the Christ was of a red complexion. This, too, may be explained as a survival of the Mummy-Christ. It was an aboriginal mode of rendering things *tapu* by coloring them red. The dead corpse was coated with red ochre -- a very primitive mode of making the mummy, or the anointed one. Thus the God Ptah tells Rameses II that he has "*re-fashioned his flesh in vermilion.*" This anointing with red ochre is called *Kura* by the Maori, who likewise made the *Karest* or Christ.

We see the mummy-image continued on another line of descent when we learn that among other pernicious heresies and deadly sins with which the Knights Templars were charged, was the impious custom of adoring a Mummy that had red eyes. Their Idol, called Baphomet, is also thought to have been a mummy. . . . The Mummy was the earliest human image of the Christ.

I do not doubt that the ancient Roman festivals called the *Charistia* were connected in their origin with the *Karest* and the *Eucharist* as a celebration in honor of the manes of their departed kith and kin, for whose sakes they became reconciled at the friendly gathering once a year. It is here, then, we have to seek the essential connection between the Egyptian Christ, the Christians, and the Roman Catacombs. These Christian Mysteries, ignorantly explained to be inexplicable, can be explained by Gnosticism and Mythology, but in no other

way. It is not that they are insoluble by human reason, as their incompetent, howsoever highly paid, expounders now-a-days pretend. That is but the puerile apology of the unqualified for their own helpless ignorance -- they who have never been in possession of the gnosis or science of the Mysteries by which alone these things can be explained in accordance with their natural genesis. In Egypt only can we read the matter to the root, or identify the origin of the Christ by nature and by name, to find at last that the Christ was the Mummy-type, and that our Christology is mummified mythology." -- *Agnostic Annual*

The above is an explanation on purely scientific evidence, but, perhaps, a little too *materialistic*, just because of that science, notwithstanding that the author is a well-known Spiritualist.

Occultism pure and simple finds the same mystic elements in the Christian as in other faiths, though it rejects as emphatically its dogmatic and *historic* character. It is a fact that in the terms [*Iesus ho Christos*] (See *Acts* v. 42, ix. 34; *I Corinth.* iii. 11, etc.), the article [*ho*] designating "Christos," proves it simply a surname, like that of Phocion, who is referred to as [*Phokion ho chrestos*] (*Plut.* v.). Still, the personage (Jesus) so addressed -- whenever he lived -- was a great Initiate and a "Son of God."

For, we say it again, the surname Christos is based on, and the story of the Crucifixion derived from, events that preceded it. Everywhere, in India as in Egypt, in Chaldea as in Greece, all these legends were built upon one and the same primitive type; the voluntary sacrifice of the *logoi* -- the rays of the one LOGOS, the direct manifested emanation from the One ever-concealed Infinite and Unknown -- whose *rays* incarnated in mankind. They consented *to fall into matter*, and are, therefore, called the "Fallen Ones." This is one of those great mysteries which can hardly be touched upon in a magazine article, but shall be noticed in a separate work of mine, *The Secret Doctrine*, very fully.

Having said so much, a few more facts may be added to the etymology of the two terms. [*Christos*] being the verbal adjective in Greek of [*chrío*] "to be rubbed on," as *ointment* or salve, and the word being finally brought to mean "the Anointed One," in Christian theology; and *Kri*, in Sanskrit, the first syllable in the name of Krishna, meaning "to pour out, or rub over, to cover with," (36) among many other things, this may lead one as easily to make of Krishna, "the anointed one." Christian philologists try to limit the meaning of Krishna's name to its derivation from *Krish*, "black"; but if the analogy and comparison of the Sanskrit with the Greek roots contained in the names of Chrestos, Christos, and *Chrishna*, are analyzed more carefully, it will be found that they are all of the same origin. (37)

"In Bockh's *Christian Inscriptions*, numbering 1287, there is no single instance of an earlier date than the third century, wherein the name is not written *Chrest* or *Chreist*." "The Name and Nature of the Christ," by G. Massey, *The Agnostic Annual*.)

Yet none of these names can be unriddled, as some Orientalists imagine, merely with the help of astronomy and the knowledge of zodiacal signs in conjunction with phallic symbols. Because, while the sidereal symbols of the mystic characters or personifications in Puranas or Bible, fulfill astronomical functions, their spiritual anti-types rule invisibly, but very effectively, the world. They exist as abstractions on the higher plane, as manifested ideas on the astral, and become

males, females and androgyne powers on this lower plane of ours. *Scorpio*, as *Chrestos-Meshiac*, and *Leo*, as *Christos-Messiah* antedated by far the Christian era in the trials and triumphs of Initiation during the Mysteries, *Scorpio* standing as symbol for the latter, *Leo* for the glorified triumph of the "sun" of truth. The mystic philosophy of the allegory is well understood by the author of the *Source of Measures*; who writes:

One (Chrestos) causing himself to go down into the pit (of *Scorpio*, or incarnation in the womb) for the salvation of the world; this was the Sun, shorn of his *golden rays*, and *crowned with blackened (38) ones* (symbolizing this loss) as the thorns; *the other* was the triumphant *Messiah*, mounted up to the *summit of the arch of heaven*, personated as the *Lion of the tribe of Judah*. In both instances he had the Cross; once in humiliation (as the son of copulation), and once holding it in his control, as the law of creation, he being *Jehovah* --

in the scheme of the authors of dogmatic Christianity. For, as the same author shows further, John, Jesus and even Apollonius of Tyana were but epitomizers of the history of the Sun "under differences of aspect or condition." (39) The explanation, he says,

is simple enough, when it is considered that the names *Jesus*, Hebrew [*JSH*] and Apollonius, or Apollo, are alike names of the *Sun in the heavens*, and, necessarily, the history of the one, as to his travels through *the signs*, with the personifications of his sufferings, triumphs and miracles, could be but the *history of the other*, where there was a wide-spread, common method of describing those travels by personification.

The fact that the Secular Church was founded by Constantine, and that it was a part of his decree "that the venerable day of the *Sun* should be the day set apart for the worship of Jesus Christ as *Sun-day*," shows that they knew well in that "Secular Church" "that the allegory rested upon an astronomical basis," as the author affirms. Yet, again, the circumstance that both Puranas and Bible are full of solar and astronomical allegories, does not militate against that other fact that all such scriptures in addition to these two are *closed* books to the scholars "having authority." (!) Nor does it affect that other truth, that all those systems are *not the work of mortal man*, nor are they his invention in their origin and basis.

Thus "Christos," under whatever name, means more than *Karest*, a mummy, or even the "anointed" and the *elect* of theology. Both of the latter apply to *Chrestos*, the man of sorrow and tribulation, in his physical, mental, and psychic conditions, and both relate to the Hebrew *Mashiac* (from whence *Messiah*) condition, as the word is etymologized (40) by Fuerst, and the author of *The Source of Measures*, p. 255. Christos is the crown of glory of the suffering *Chrestos* of the mysteries, as of the candidate to the final UNION, of whatever race and creed. To the true follower of the SPIRIT OF TRUTH, it matters little, therefore, whether Jesus, as man and *Chrestos*, lived during the era called Christian, or before, or never lived at all. The Adepts, who lived and died for humanity, have existed in many and all the ages, and many were the good and holy men in antiquity who bore the surname or title of *Chrestos* before Jesus of Nazareth, otherwise Jesus (or Jehoshua) Ben Pandira was born. (41) Therefore, one may be permitted to conclude, with good reason, that Jesus, or Jehoshua, was like Socrates, like Phocian, like

Theodorus, and so many others surnamed *Chrestos*, i.e., the "good, the excellent," the gentle, and the holy Initiate, who showed the "way" to the Christos condition, and thus became himself "the Way" in the hearts of his enthusiastic admirers. The Christians, as all the "Hero-worshippers" have tried to throw into the background all the other *Chrestoi*, who have appeared to them as rivals of *their* Man-God. But if the voice of the MYSTERIES has become silent for many ages in the West, if Eleusis, Memphis, Antium, Delphi, and Cresa have long ago been made the tombs of a Science once as colossal in the West as it is yet in the East, there are successors now being prepared for them. We are in 1887 and the nineteenth century is close to its death. The twentieth century has strange developments in store for humanity, and may even be the last of its name.

FOOTNOTES:

18. The word [*chreon*] is explained by Herodotus (7,11,7,) as that which an oracle declares, and [*to chreon*] is given by Plutarch (*Nich.* 14.) as "fate," "necessity." *Vide* Herodotus, 7, 215; 5, 108; and Sophocles, *Phil.* 437. ([return to text](#))

19. See Liddell and Scott's Greek-English Lexicon. ([return to text](#))

20. Hence of a *Guru*, "a teacher," and *chela*, a "disciple," in their mutual relations. ([return to text](#))

21. In his recent work -- *The Early Days of Christianity*, Canon Farrar remarks: -- "Some have supposed a pleasant play of words founded on it, as . . . between *Chrestos* ('sweet' Ps. xxx., iv., 8) and Christos (Christ)," (I. p. 158, *footnote*). But there is nothing to suppose, since it began by a "play of words," indeed. The name *Christus* was *not* "distorted into Chrestus," as the learned author would make his readers believe (p. 19), but it was the adjective and noun *Chrestos* which became distorted into *Christus*, and applied to Jesus. In a footnote on the word "Chrestian," occurring in the *First Epistle* of Peter (chap. iv., 16), in which in the *revised* later MSS. the word was changed into *Christian*, Canon Farrar remarks again, "Perhaps we should read the ignorant heathen distortion, *Chrestian*." Most decidedly we should; for the eloquent writer should remember his Master's command to render unto Caesar that which is Caesar's. His dislike notwithstanding, Mr. Farrar is obliged to admit that the name *Christian* was first INVENTED, by the sneering, mocking Antiochians, as early as A.D. 44, but had not come into general use before the persecution by Nero. "Tacitus," he says, "uses the word Christians with something of apology. It is well known that in the N. T. it only occurs three times, and always involves a hostile sense (*Acts* xi. 26, xxvi. 28 as it does in iv. 16)." It was not Claudius alone who looked with alarm and suspicion on the Christians, so nicknamed in derision for their carnalizing a subjective principle or attribute, but all the pagan nations. For Tacitus, speaking of those whom the masses called "Christians," describes them as a set of men *detested for their enormities* and crimes. No wonder, for history repeats itself. There are, no doubt, thousands of noble, sincere, and virtuous *Christian-born* men and women now. But we have only to look at the viciousness of Christian "heathen" converts; at the *morality* of those proselytes in India, whom the missionaries themselves decline to take into their service, to draw a parallel between the converts of 1800 years ago, and the modern heathens "touched by *grace*." ([return to text](#))

22. Justin Martyr, Tertullian, Lactantius, Clemens Alexandrinus, and others spelt it in this way. ([return to text](#))

23. *Vide* Liddell and Scott's Greek and English Lexicon. *Chrestos* is really one who is continually warned, advised, guided, whether by oracle or prophet. Mr. G. Massey is not correct in saying that ". . . . The Gnostic form of the name Chrest, or Chrestos, denotes the *Good God*, not a human original," for it denoted the latter, i.e., a good, holy man; but he is quite right when he adds that "*Chrestianus* signifies 'Sweetness and Light'." The *Chrestoi*, as the *Good People*, were pre-extant. Numerous Greek inscriptions show that the departed, the hero, the saintly one -- that is, the 'Good' -- was styled *Chrestos*, or the Christ; and from this meaning of the 'Good' does Justin, the primal apologist, derive the Christian name. This identifies it with the Gnostic source, and with the 'Good God' who revealed himself according to Marcion -- that is, the Un-Nefer or Good-opener of the Egyptian theology." -- (*Agnostic Annual*.) ([return to text](#))

24. Again I must bring forward what Mr. G. Massey says (whom I quote repeatedly because he has studied this subject so thoroughly and so conscientiously).

"My contention, or rather explanation," he says, "is that the author of the Christian name is the Mummy-Christ of Egypt, called the *Karest*, which was a type of the immortal spirit in man, the Christ within (as Paul has it), the divine offspring incarnated, the Logos, the Word of Truth, the *Makheru* of Egypt. It did not originate as a mere type! The preserved mummy was the *dead body of any one* that was *Karest*, or mummified, to be kept by the living; and, through constant repetition, this became a type of the resurrection from (not of!) the dead." See the explanation of this further on. ([return to text](#))

25. Or Lydda. Reference is made here to the Rabbinical tradition in the Babylonian Gemara, called *Sepher Toledoth Jeshu*, about Jesus being the son of one named Pandira, and having lived a century earlier than the era called Christian, namely, during the reign of the Jewish king Alexander Jannaeus and his wife Salome, who reigned from the year 106 to 79 B.C. Accused by the Jews of having learned the magic art in Egypt, and of having stolen from the Holy of Holies the Incommunicable Name, Jehoshua (Jesus) was put to death by the Sanhedrin at Lud. He was stoned and then crucified on a tree, on the eve of Passover. The narrative is ascribed to the Talmudistic authors of *Sota* and *Sanhedrin*, p. 19, Book of Zechariah. See *Isis Unveiled*, II. 201; Arnobius, *Adv. Gentes*, I, 43; Eliphaz Levi's *Science des Esprits*, and "The Historical Jesus and Mythical Christ," a lecture by G. Massey. ([return to text](#))

26. "Christianus quantum interpretatione de unctione deducitas. Sed ut cum preferam Chrestianus pronunciat a vobis (nam nec nominis certa est notitia penes vos) de suavitate vel benignitate compositum est." Canon Farrar makes a great effort to show such *lapsus calami* by various Fathers as the results of disgust and fear. "There can be little doubt," he says (in *the Early Days of Christianity*) "that the name Christian was a nick-name due to the wit of the Antiochians It is clear that the sacred writers avoided the name (Christians) because it was employed by their enemies (Tac. *Ann.* xv. 44). It only became familiar when the virtues of Christians had shed luster upon it " This is a very lame excuse, and a poor explanation to give for so eminent a thinker as Canon Farrar. As to the "virtues of Christians" ever shedding *luster* upon the name, let us hope that the writer had in his mind's eye neither Bishop Cyril, of Alexandria, nor Eusebius, nor the Emperor Constantine, of murderous fame, nor yet the Popes Borgia and the Holy Inquisition. ([return to text](#))

27. Quoted by G. Higgins. (See Vol. I., pp. 569-573.) ([return to text](#))

28. In the days of Homer, we find this city, once celebrated for its mysteries, the chief seat of Initiation and the name of *Chrestos* used as a title during the mysteries. It is mentioned in the *Iliad*. ii., 520 as "Krisa." Dr. Clarke suspected its ruins under the present site of *Krestona*, a small

town, or village rather, in Phocis, near the Crissaeon Bay. (See E. D. Clarke, 4th ed., Vol. viii, p. 239, "Delphi.") ([return to text](#))

29. The root of *Chrestos* and *Chrestos* is one and the same; [*chrao*] which means "consulting the oracle," in one sense, but in another one "consecrated," *set apart*, belonging to some temple, or oracle, or devoted to oracular services. On the other hand, the word [*chre (chreo)*] means "obligation," a "bond, duty," or one who is under the obligation of pledges, or vows taken. ([return to text](#))

30. The adjective [*chrestos*] was also used as an adjective before proper names as a compliment, as in Plat. Theaet, p. 166A, "[*Houtos ho Sokrates ho chrestos*]" (*here Socrates is the Chrestos*), and also as a surname, as shown by Plutarch (V. Phocion), who wonders how such a rough and dull fellow as Phocion could be surnamed *Chrestos*. ([return to text](#))

31. There are strange features, quite suggestive, for an Occultist, in the myth (if one) of Janus. Some make of him the personification of *Kosmos*, others, of *Coelus* (heaven), hence he is "two-faced" because of his two characters of spirit and matter; and he is not only "Janus *Bifrons*" (two-faced), but also *Quadrifrons* -- the perfect square, the emblem of the Kabbalistic Deity. His temples were built with *four* equal sides, with a door and *three* windows on each side. Mythologists explain it as an emblem of the *four* seasons of the year, and *three* months in each season, and in all of the twelve months of the year. During the mysteries of Initiation, however, he became the Day-Sun and the Night-Sun. Hence he is often represented with the number 300 in one hand, and in the other 65, or the number of days of the Solar year. Now *Chanoch* (Kanoch and *Enosh* in the Bible) is, as may be shown on Kabbalistic authority, whether son of Cain, son of Seth, or the son of Methuselah, one and the same personage. As *Chanoch* (according to Fuerst), "he is the *Initiator, Instructor* -- of the astronomical circle and solar year," as son of Methuselah, who is said to have lived 365 years and been taken to heaven alive, as the representative of the Sun (or God). (See *Book of Enoch*.) This patriarch has many features in common with Janus, who, exoterically, is Ion but IAO kabbalistically, or Jehovah, the "Lord God of Generations," the mysterious Yod, or ONE (a phallic number). For Janus or Ion is also *Consivius, a conserendo*, because he presided over generations. He is shown giving hospitality to Saturn (*Kronos* "time"), and is the *Initiator* of the year, or time divided into 365. ([return to text](#))

32. *Stauros* became the cross, the instrument of crucifixion, far later, when it began to be represented as a Christian symbol and with the Greek letter T, the Tau. (*Luc. Jud. Voc.*) Its primitive meaning was phallic, a symbol for the male and female elements; the great serpent of temptation, the body which had to be killed or subdued by the dragon of wisdom, the seven-voweled solar chnoughis or Spirit of Christos of the Gnostics, or, again, Apollo killing Python. ([return to text](#))

33. Even to this day in India, the candidate loses his name and as also in Masonry, his age (monks and nuns also changing their Christian names at their taking the order or veil), and begins counting his years from the day he is accepted a chela and enters upon the cycle of initiations. Thus Saul was "a child of one year," when he began to reign, though a grown-up adult. See 1 Samuel ch. xiii. 1, and Hebrew scrolls, about his initiation by Samuel. ([return to text](#))

34. Demosthenes, *De Corona*, 313, declares that the candidates for initiation into the Greek mysteries were anointed with oil. So they are now in India, even in the initiation the *Yogi* mysteries -- various ointments or unguents being used. ([return to text](#))

35. *Because he is kabbalistically the new Adam, the celestial man, and Adam was made of red earth.* ([return to text](#))

36. Hence the memorializing of the doctrine during the MYSTERIES. The pure monad, the "god" incarnating and becoming *Chrestos*, or man, on his trial of life, a series of those trials led him to the *crucifixion of flesh*, and finally into the *Christos* condition. ([return to text](#))

37. On the best authority the derivation of the Greek *Christos* is shown from the Sanskrit root *ghrish* = "rub"; thus: *ghrish-a-mi-to*, "to rub," and *ghrish-ta-s* "flayed, sore." Moreover, *Krish*, which means in one sense to plough and make furrows, means also to cause pain, "to torture to torment," and *ghrsh-ta-s* "rubbing"-- all these terms relating to *Chrestos* and *Christos* conditions. One has *to die in Chrestos*, i.e., kill one's personality and its passions, to blot out every idea of separateness from one's "Father," the Divine Spirit in man; to become one with the eternal and absolute *Life* and *Light* (SAT) before one can reach the glorious state of *Christos*, the regenerated man, the man in spiritual freedom. ([return to text](#))

38. The Orientalists and Theologians are invited to read over and study the allegory of *Visvakarman*, the "Omnificent," the Vedic God, the architect of the world, who sacrificed himself *to himself* or the world, after having offered up all worlds, *which are himself*, in a "Sarva Madha" (general sacrifice) -- and ponder over it. In the Puranic allegory, his daughter *Yoga-siddha* "Spiritual consciousness," the wife of *Surya*, the Sun, complains to him of the too great effulgence of her husband; and *Visvakarma*, in his character of *Takshaka*, "wood cutter and carpenter," placing the Sun upon his lathe cuts away a part of his brightness. *Surya* looks, after this, crowned with dark thorns instead of rays, and becomes *Vikartana* ("shorn of his rays"). All these names are terms which were used by the candidates when going through the trials of Initiation. The Hierophant-Initiator personated *Visvakarman*; the father, and the general *artificer* of the gods (the adepts on earth), and the candidate -- *Surya*, the Sun, who had to kill all his fiery passions and wear the crown of thorns *while crucifying his body* before he could rise and be re-born into a new life as the glorified "Light of the World"--*Christos*. No Orientalist seems to have ever perceived the suggestive analogy, let alone to apply it! ([return to text](#))

39. The author of the *Source of Measures* thinks that this "serves to explain why it has been that the *Life of Apollonius of Tyana*, by *Philostratus*, has been so carefully kept back from translation and popular reading." Those who have studied it in the original have been forced to the comment that either the *Life of Apollonius* has been taken from the New Testament, or that New Testament narratives have been taken from the *Life of Apollonius*, because of the manifest sameness of the *means of construction* of the narrative." (p. 260). ([return to text](#))

40. "The word *shiach*, is in Hebrew the same word as a verbal, signifying *to go down into the pit*. As a noun, *place of thorns, pit*. The *hifil* participle of this word is *Messiach*, or the Greek *Messias, Christ*, and means "he who causes to go down into the pit" (or hell, in dogmatism). In esoteric philosophy, this going down *into the pit* has the most mysterious significance. The Spirit "Christos" or rather the "Logos" (read *Logoi*), is said to "go down into the pit," when it incarnates in flesh, *is born as a man*. After having robbed the *Elohim* (or gods) of their secret, the *pro-creating* "fire of life," the Angels of Light are shown cast down into the pit or abyss of matter, called *Hell*, or the bottomless pit, by the kind theologians. This, in *Cosmogony* and *Anthropology*. During the *Mysteries*, however, it is the *Chrestos, neophyte*, (as man), etc., who had to descend into the crypts of Initiation and trials; and finally, during the "Sleep of Siloam" or the final *trance* condition, during the hours of which the new Initiate has the last and final mysteries of being divulged to him. *Hades, Scheol, or Patala*, are all one. The same takes place in the East now, as took place 2,000 years ago in the West, during the MYSTERIES. ([return to text](#))

41. Several classics bear testimony to this fact. *Lucian*, c. 16 says [*Phokion ho chrestos*], and

[*Phokion ho epiklen*] ([*legomenos*], surnamed) [*chrestos*]. In Phaedr. p. 226 E; it is written, "you mean Theodorus the Chrestos." "[*Ton chreston legeis Theodoron*]." Plutarch shows the same; and [*Chrestos*] -- Chrestus, is the proper name (see the word in *Thesaur.* Steph.) of an orator and disciple of Herodes Atticus. ([return to text](#))

The Esoteric Character of the Gospels

Part III

No one can be regarded as a Christian unless he professes, or is supposed to profess, belief in Jesus, by baptism, and in salvation, "through the blood of Christ." To be considered a good Christian, one has, as a *conditio sine qua non*, to show faith in the dogmas expounded by the Church and to profess them; after which a man is at liberty to lead a private and public life on principles diametrically opposite to those expressed in the Sermon on the Mount. The chief point and that which is demanded of him is, that he should have -- or *pretend to have* -- a blind faith in, and veneration for, the ecclesiastical teachings of his special Church.

"Faith is the key of Christendom,"

saith Chaucer, and the penalty for lacking it is as clearly stated as words can make it, in St. Mark's Gospel, Chapter xvi., verse 16th:

"He that believeth and is baptized shall be saved; but he that believeth not shall be damned."

It troubles the Church very little that the most careful search for these words in the oldest texts during the last centuries remained fruitless; or, that the recent revision of the Bible led to a unanimous conviction in the truth-seeking and truth-loving scholars employed in that task, that no such *un-Christ*-like sentence was to be found, except in some of the latest, fraudulent texts. The good Christian people had assimilated the consoling words, and they had become the very pith and marrow of their charitable souls. To take away the hope of eternal damnation, for all others except themselves, from these chosen vessels of the God of Israel, was like taking their very life. The truth-loving and God-fearing revisers got scared; they left the forged passage (an interpolation of eleven verses, from the 9th to the 20th), and satisfied their consciences with a foot-note remark of a very equivocal character, one that would grace the work and do honor to the diplomatic faculties of the craftiest Jesuits. It tells the "believer" that: --

The two oldest Greek MSS. and some other authorities OMIT from verse 9 to the end. Some authorities *have a different ending* to the Gospel, ([42](#))

-- and explains no further.

But the two "oldest Greek MSS." *omit* the verses *nolens volens*, as these *have never existed*. And the learned and truth-loving revisers know this better than any of us do; yet the wicked falsehood is printed at the very seat of Protestant Divinity, and it is allowed to go on, glaring into the faces of coming generations of students of theology and, hence, into those of their future parishioners. Neither can be, nor are they deceived by it, yet both *pretend* belief in the authenticity of the cruel

words worthy of a *theological Satan*. And this Satan-Moloch is their own *God of infinite mercy and justice* in Heaven, and the incarnate symbol of love and charity on Earth -- blended in one!

Truly mysterious are your paradoxical ways, Oh -- Churches of Christ!

I have no intention of repeating here stale arguments and logical *exposés* of the whole theological scheme; for all this has been done, over and over again, and in a most excellent way, by the ablest "Infidels" of England and America. But I may briefly repeat a prophecy which is a self-evident result of the present state of men's minds in Christendom. Belief in the Bible *literally*, and in a *canalized* Christ, will not last a quarter of a century longer. The Churches will have to part with their cherished dogmas, or the 20th century will witness the downfall and ruin of all Christendom, and with it, belief even in a Christos, as pure Spirit. The very name has now become obnoxious, and theological Christianity must die out, *never to resurrect again* in its present form. This, in itself, would be the happiest solution of all, were there no danger from the natural reaction which is sure to follow: crass materialism will be the consequence and the result of centuries of blind faith, unless the loss of old ideals is replaced by other ideals, unassailable, because *universal*, and built on the rock of eternal truths, instead of the shifting sands of human fancy. Pure immateriality must replace, in the end, the terrible anthropomorphism of those ideals in the conceptions of our modern dogmatists. Otherwise, why should Christian dogmas -- the perfect counterpart of those belonging to other exoteric and pagan religions -- claim any superiority? The bodies of all these were built upon the same astronomical and physiological (or phallic) symbols. Astrologically, every religious dogma the world over, may be traced to, and located in, the Zodiacal signs and the Sun. And so long as the science of comparative symbology or any theology has only two keys to open the mysteries of religious dogmas -- and these two only very partially mastered, how can a line of demarcation be drawn, or any difference made between the religions of say, Chrishna and Christ, between salvation through the blood of the "first-born primeval male" of one faith, and that of the "only *begotten* Son" of the other, far younger, religion?

Study the Vedas; read even the superficial, often disfigured writings of our great Orientalists, and think over what you will have learnt. Behold Brahmans, Egyptian Hierophants, and Chaldean Magi, teaching several thousand years before our era that the gods themselves had been only mortals (in previous births) until they won their immortality by *offering their blood to their Supreme God* or chief. *The Book of the Dead*, teaches that mortal man "became one with the gods through an interflow of a common life in the common blood of the two." Mortals gave the blood of their first-born sons in sacrifice to the Gods. In his *Hinduism*, p. 35, Professor Monier Williams, translating from the *Taitiriya Brahmana*, writes: -- "By means of the sacrifice the gods obtained heaven." And in the *Tandya Brahmana*: -- "The lord of creatures offered himself a sacrifice for the gods." . . . And again in the *Satapatha Brahmana*: -- "He who, knowing this, sacrifices with the *Purusha-medha* or the sacrifice of the primeval male, becomes everything."

Whenever I hear the Vedic rites discussed and called "disgusting human sacrifices," and cannibalism (*sic.*), I feel always inclined to ask, where's the difference? Yet there is one, in fact; for while Christians are compelled to accept the allegorical (though, when understood, highly philosophical) drama of the New Testament Crucifixion, as that of Abraham and Isaac literally (43), Brahmanism -- its philosophical schools at any rate -- teaches its adherents, that this

(*pagan*) sacrifice of the "primeval male" is a purely allegorical and philosophical symbol. Read in their dead-letter meaning, the four gospels are simply slightly altered versions of what the Church proclaims as Satanic plagiarisms (by anticipation) of Christian dogmas in Pagan religions. Materialism has a perfect right to find in all of them the same sensual worship and "solar" myths as anywhere else. Analyzed and criticized superficially and on its dead-letter face, Professor Joly ("Man before Metals," pp. 189-190) finding in the *Svastika*, the *crux ansata*, and the cross pure and simple, mere sexual symbols -- is justified in speaking as he does. Seeing that "the father of the sacred fire (in India) bore the name of *Twashtri*, that is the divine carpenter who made the *Swastika* and the *Pramantha*, whose friction produced the divine child *Agni*, in Latin *Ignis*; that his mother was named *Maya*; he himself, styled *Akta* (*anointed*, or *Christos*) after the priests had poured upon his head the spirituous *soma* and on his body butter purified by sacrifice"; seeing all this he has a full right to remark that:

The close resemblance which exists between certain ceremonies of the worship of *Agni* and certain rites of the Catholic religion may be explained by their common origin. *Agni* in the condition of *Akta*, or anointed, is suggestive of Christ; *Maya*, Mary, his mother; *Twashtri*, St. Joseph, the carpenter of the Bible.

Has the professor of the Science Faculty of Toulouse explained anything by drawing attention to that which anyone can see? Of course not. But if, in his ignorance of the esoteric meaning of the allegory he has added nothing to human knowledge, he has on the other hand destroyed faith in many of his pupils in both the "divine origin" or Christianity and its Church and helped to increase the number of Materialists. For surely, no man, once he devotes himself to such comparative studies, can regard the religion of the West in any light but that of a pale and enfeebled copy of older and nobler philosophies.

The origin of all religions -- Judaeo-Christianity included -- is to be found in a few primeval truths, not one of which can be explained apart from all the others, as each is a complement of the rest in some one detail. And they are all, more or less, broken rays of the same Sun of truth, and their beginnings have to be sought in the archaic records of the Wisdom-religion. Without the light of the latter, the greatest scholars can see but the skeletons thereof covered with masks of fancy, and based mostly on personified Zodiacal signs.

A thick film of allegory and *blinds*, the "dark sayings" of fiction and parable, thus covers the original esoteric texts from which the New Testament -- *as now known* -- was compiled. Whence, then, the Gospels, the life of Jesus of Nazareth? Has it not been repeatedly stated that no human, *mortal* brain could have invented the life of the Jewish Reformer, followed by the awful drama on Calvary? We say, on the authority of the esoteric Eastern School, that all this came from the Gnostics, as far as the name Christos and the astronomico-mystical allegories are concerned, and from the writings of the ancient *Tanaim* as regards the Kabalistic connection of Jesus or Joshua, with the Biblical personifications. One of these is the mystic esoteric name of Jehovah -- not the present fanciful God of the profane Jews ignorant of their own mysteries, the God accepted by the still more ignorant Christians -- but the compound Jehovah of the pagan Initiation. This is proven very plainly by the glyphs or mystic combinations of various signs which have survived to this day in the Roman Catholic hieroglyphics.

The Gnostic Records contained the epitome of the chief scenes enacted during the mysteries of initiation, since the memory of man; though even that was given out invariably under the garb of semi-allegory, whenever entrusted to parchment or paper. But the ancient Tanaim, the Initiates from whom the wisdom of the Kabala (*oral tradition*) was obtained by the later Talmudists, had in their possession the secrets of the mystery language, and it is *in this language that the Gospels* were written. (44) He alone who has mastered the esoteric cipher of antiquity -- the secret meaning of the numerals, a common property at one time of all nations -- has the full proof of the genius which was displayed in the blending of the purely Egypto-Jewish, Old Testament allegories and names, and those of the pagan-Greek Gnostics, the most refined of all the mystics of that day. Bishop Newton proves it himself quite innocently, by showing that "St. Barnabas, the companion of St. Paul, in his epistle (ch. ix.) discovers . . . the name of Jesus crucified in the number 318," namely, Barnabas finds it in the mystic Greek I H T -- the *tau* being the glyph of the cross. On this, a Kabbalist, the author of an unpublished MS. on the Key of Formation of the Mystery Language, observes: --

But this is but a play upon the Hebrew letters *Jodh*, *Cheth*, and *Shin*, from whence the I H S as the monogram of Christ coming down to our day, and this reads as [*J Ch Sh*] or 381, and sum of the letters being 318 or the number of Abraham and his Satan, and of Joshua and his Amalek . . . also the number of Jacob and his antagonist . . . (Godfrey Higgins gives the authority for the number 608) . . . It is the number of Melchizedek's name, for the value of the last is 304 and Melchizedek was the priest of the most high God, without beginning or ending of days.

The solution and secret of Melchizedek are found in the fact that: --

in the ancient Pantheons the two planets which had existed from eternity (*aeonic* eternity) and were eternal, were the Sun and the Moon, or Osiris and Isis, hence the terms of *without beginning or ending of days*. 304 multiplied by two is 608. So also the numbers in the word Seth, who was a type of the year. There are a number of authorities for the number 888 as applying to the name of Jesus Christ, and as said this is in antagonism to the 666 of the Anti-Christ. . . . The staple value in the name of Joshua was the number 365, the indication of the Solar year, while Jehovah delighted in being the indication of the Lunar year -- and Jesus Christ was both Joshua and Jehovah in the Christian Pantheon.

This is but an illustration to our point to prove that the Christian application of the compound name Jesus-Christ is all based on Gnostic and Eastern mysticism. It was only right and natural that Chroniclers like the initiated Gnostics, pledged to secrecy, should veil or *cloak* the final meaning of their oldest and most sacred teachings. The right of the Church fathers to cover the whole with an epitheme of euhemerized fancy is rather more dubious. (45) The Gnostic Scribe and Chronicler deceived no one. Every Initiate into the Archaic gnosis -- whether of the pre-Christian or post-Christian period -- knew well the value of every word of the "mystery-language." For these Gnostics -- the inspirers of primitive Christianity -- were "the most cultured, the most learned and most wealthy of the Christian name," as Gibbon has it. Neither they, nor their humbler followers, were in danger of accepting the dead letter of their own texts. But it was

different with the victims of the fabricators of what is now called *orthodox* and *historic* Christianity. Their successors have all been made to fall into the mistakes of the "foolish Galatians" reproved by Paul, who, as he tells them (*Galat.* iii. 1-5), having begun (by believing) in the Spirit (of Christos), "ended by believing in the *flesh*," -- i.e., a *corporeal* Christ. For such is the true meaning of the Greek sentence (46), "[*enarzamenoï Pneumati, nun sarki epiteleisthe.*]" That Paul was a gnostic, a founder of a new sect of *gnosis* which recognized, as all other gnostic sects did, a "Christ-Spirit," though it went against its opponents, the rival sects, is sufficiently clear to all but dogmatists and theologians. Nor is it less clear that the primitive teachings of Jesus, whenever he may have lived, could be discovered only in Gnostic teachings; against which discovery, the falsifiers who dragged down Spirit into matter, thus degrading the noble philosophy of primeval Wisdom-Religion, have taken ample precautions from the first. The works of Basilides alone -- "The philosopher devoted to the contemplation of Divine things," as Clement describes him -- the 24 volumes of his *interpretations upon the Gospels* -- were all burned by order of the Church, Eusebius tells us (*Hist. Eccl.*, iv. 7).

As these *Interpretations* were written at a time when the Gospels we have now, were not yet in existence (47), here is a good proof that the Evangel, the doctrines of which were delivered to Basilides by the Apostle Matthew, and Glaucus, the disciple of Peter (Clemens Al. *Strom.* vii. 7, §106), must have differed widely from the present New Testament. Nor can these doctrines be judged by the distorted accounts of them left to posterity by Tertullian. Yet even the little this partisan fanatic gives, shows the chief gnostic doctrines to be identical, under their own peculiar terminology and personations, with those of the *Secret Doctrine* of the East. For, discussing Basilides, the "pious, god-like, theosophic philosopher," as Clement of Alexandria thought him, Tertullian exclaims:

After this, Basilides, the *Heretic*, broke loose. (48) He asserted that there is a Supreme God, by name Abraxas, by whom Mind [*Mahat*] was created which the Greeks call *Nous*. From this emanated the Word; from the Word, Providence; from Providence, Virtue and Wisdom; from these two again, Virtues, *Principalities* (49), and *Powers* were made; thence infinite productions and emissions of angels. Among the lowest angels, indeed, and those that made this world, he sets *last of all* the god of the Jews, whom he denies to be God himself, affirming that he is but one of the angels. (50) (*Isis Unveiled*, II, 289)

Another proof of the claim that the Gospel of Matthew in the usual Greek texts is not the original gospel written in Hebrew, is given by no less an authority than St. Jerome (or Hieronymus). The suspicion of a conscious and gradual *euhemerization* of the Christ principle ever since the beginning, grows into a conviction, once that one becomes acquainted with a certain confession contained in book ii. of the *Comment. to Matthew* by Hieronymus. For we find in it the proofs of a deliberate substitution of the whole gospel, the one now in the Canon having been evidently rewritten by this too zealous Church Father. (51) He says that he was sent toward the close of the fourth century by "their Felicities," the Bishops Chromatius and Heliodorus to Caesarea, with the mission to compare the Greek text (the only one they ever had) with the Hebrew original version preserved by the Nazarenes in their library, and to translate it. He translated it, but under protest; for, as he says, the *Evangel* "exhibited matter *not for edification, but for destruction.*" (52) The "destruction" of what? Of the dogma that Jesus of Nazareth and the *Christos* are one -- evidently;

hence for the "destruction" of the newly planned religion. (53) In this same letter the Saint (who advised his converts to kill their fathers, trample on the bosom that fed them, by walking over the bodies of their mothers, if the parents stood as an obstacle between their sons and Christ) -- admits that Matthew did not wish his gospel to be *openly written*, hence that the MS. *was a secret* one. But while admitting also that this gospel "was written in Hebrew characters and *by the hand of himself*" (*Matthew*), yet in another place he contradicts himself and assures posterity that *as it was tampered with and re-written by a disciple of Manicheus, named Seleucus . . .* "the ears of the Church properly refused to listen to it." (Hieronymus, *Comment. to Matthew*, book ii. chapter xii., 13.)

No wonder that the very meaning of the terms *Chrestos* and *Christos*, and the bearing of both on "Jesus of Nazareth," a name coined out of Joshua the *Nazar*, has now become a dead letter for all with the exception of non-Christian Occultists. For even the Kabalists have no original data now to rely upon. The *Zohar* and the *Kabala* have been remodeled by Christian hands out of recognition; and were it not for a copy of the Chaldean *Book of Numbers* there would remain no better than garbled accounts. Let not our Brothers, the so-called Christian Kabalists of England and France, many of whom are Theosophists, protest too vehemently; for *this is history* (See Munk). It is as foolish to maintain, as some German Orientalists and modern critics still do, that the *Kabala* has never existed before the day of the Spanish Jew, Moses de Leon, accused of having forged this pseudograph in the 13th century, as to claim that any of the Kabalistical works now in our possession are as original as they were when Rabbi Simeon Ben Jochai delivered the "traditions to his sons and followers. Not a single of these books is immaculate, none has escaped mutilation by Christian hands. Munk, one of the most learned and able critics of his day on this subject, proves it, while protesting as we do, against the assumption that it is a post-Christian forgery, for he says:

It appears evident to us that the author made use of ancient documents, and among these of certain *Midraschim* or collections of traditions and Biblical expositions, which we do not now possess.

After which, quoting from Tholuck (1. c. pp. 24 and 31), he adds:

"Haya Gaon, who died in 1038, is to our knowledge the first author who developed the theory of the Sephiroth and he gave to them the names which we find again to be among the Kabalists (Tellenik, Moses ben Schem Tob di Leon, p. 13, note 5); this doctor, *who had intimate intercourse with the Syrian and Chaldean Christian savans*, was enabled by these last to acquire a knowledge of some of the Gnostic writings."

Which "Gnostic writings" and esoteric tenets passed part and parcel into the Kabalistic works, with many more modern interpolations that we now find in the *Zohar*, as Munk well proves. The *Kabala* is Christian now, not Jewish.

Thus, what with several generations of most active Church Fathers ever working at the destruction of old documents and the preparation of new passages to be interpolated in those which happened to survive, there remains of the *Gnostics* -- the legitimate offspring of the

Archaic Wisdom-religion -- but a few unrecognizable shreds. But a particle of genuine gold will glitter for ever; and, however garbled the accounts left by Tertullian and Epiphanius of the Doctrines of the "Heretics," an occultist can yet find even in them traces of those primeval truths which were once universally imparted during the mysteries of Initiation. Among other works with most suggestive allegories in them, we have still the so-called *Apocryphal Gospels*, and the last discovered as the most precious relic of Gnostic literature, a fragment called *Pistis-Sophia*, "Knowledge-Wisdom."

In my next article upon the Esoteric character of the Gospels, I hope to be able to demonstrate that those who translate *Pistis* by "Faith," are utterly wrong. The word "faith" as *grace* or something to be believed in through unreasoned or blind faith, is a word that dates only since Christianity. Nor has Paul ever used this term in this sense in his Epistles; and Paul was undeniably an INITIATE.

(This series was never completed by H. P. B.)

FOOTNOTES:

42. *Vide* "Gospel according to St. Mark," in the *revised* edition printed for the Universities of Oxford and Cambridge, 1881. ([return to text](#))
43. *Vide* "The Soldier's Daughter," *Lucifer*, vol. I, No. 6, by the Rev. T. G. Headley, and notice the desperate protest of this *true* Christian, against the *literal* acceptance of the "blood sacrifices," "Atonement by blood," etc., in the Church of England. The reaction begins: another *sign of the times*. ([return to text](#))
44. Thus while the three Synoptics display a combination of the pagan Greek and Jewish symbologies the *Revelation* is written in the mystery language of the Tanaim -- the relic of Egyptian and Chaldean wisdom -- and St. John's Gospel is purely Gnostic. ([return to text](#))
45. "The claim of Christianity to possess Divine authority rests on the ignorant belief that the mystical Christ could and did become a Person, whereas the gnosis proves the corporeal Christ to be only a counterfeit Presentment of the trans-corporeal man; consequently, historical portraiture is, and ever must be, a fatal mode of falsifying and discrediting the Spiritual Reality." (G. Massey, "Gnostic and Historic Christianity.") ([return to text](#))
46. This sentence analyzed means "Shall you, who in the beginning looked to the *Christ-Spirit*, now *end* by believing in a Christ of flesh," or it means nothing. The verb [*epiteloumai*] has not the meaning of "becoming perfect," but of "ending by," becoming so. Paul's lifelong struggle with Peter and others, and what he himself tells of his vision of a Spiritual Christ and not of Jesus of Nazareth, as in the *Acts* -- are so many proofs of this. ([return to text](#))
47. See *Supernatural Religion*, vol. ii., chap. "Basilides." ([return to text](#))
48. It was asked in *Isis Unveiled*, were not the views of the Phrygian Bishop Montanus, also deemed a HERESY by the Church of Rome? It is quite extraordinary to see how easily that Church encourages the abuse of one *heretic*, Tertullian, against another *heretic*, Basilides, when the abuse happens to further her own object. ([return to text](#))
49. Does not Paul himself speak of "*Principalities and Powers* in heavenly places" (*Ephesians*)

iii. 10; i. 21), and confesses that there be *gods* many and *Lords* many (Kurioi)? And angels, powers (Dunameis), and *Principalities*? (See I *Corinthians* viii. 5; and *Epistle to Romans*, viii. 38.) ([return to text](#))

50. Tertullian: *Praescript*. It is undeniably owing only to a remarkably casuistical, sleight-of-hand-like argument that Jehovah, who in the *Kabala* is simply a Sephiroth, the third, left-hand power among the Emanations (Binah), has been elevated to the dignity of the *One* absolute God. Even in the Bible he is but one of the *Elohim* (See *Genesis*, chapter iii. v. 22, "The Lord God" making no difference between himself and others.) ([return to text](#))

51. This is *history*. How far that *re-writing* of, and tampering with, the primitive gnostic fragments which are now become the New Testament, went, may be inferred by reading "Supernatural Religion," which went through over twenty-three editions, if I mistake not. The host of authorities for it given by the author, is simply appalling. The list of the English and German Bible critics alone seems endless. ([return to text](#))

52. The chief details are given in *Isis Unveiled*, Vol II, pp. 180-183, *et seq.* Truly faith in the infallibility of the Church must be *stone-blind* -- or it could not have failed being killed and -- dying. ([return to text](#))

53. See Hieronymus: *De Viros, illust.* cap. 3; Olshausen: "Neuen Text.," p. 32. The Greek text of Matthew's Gospel is the only one used or ever possessed by the Church. ([return to text](#))

Astral Bodies, or Doppelgangers

M. C. Great confusion exists in the minds of people about the various kinds of apparitions, wraiths, ghosts, or spirits. Ought we not to explain once for all the meaning of these terms? You say there are various kinds of "doubles" what are they?

H. P. B. Our occult philosophy teaches us that there are three kinds of "doubles," to use the word in its widest sense. First, man has his "double" or *shadow*, properly so called, around which the physical body of the *fetus* -- the future man -- is built. The imagination of the mother, or an accident which affects the child, will affect also the astral body. The astral and the physical both exist before the mind is developed into action, and before the *Atma* awakes. This occurs when the child is seven years old, and with it comes the responsibility attaching to a conscious sentient being. This "double" is born with man, dies with him, and can never separate itself far from the body during life, and though surviving him, it disintegrates, *pari passu*, with the corpse. It is this which is sometimes seen over the graves like a luminous figure of the man that was, during certain atmospheric conditions. From its physical aspect it is, during life, *man's vital* double, and after death, only the gases given off from the decaying body. But, as regards its origin and essence, it is something more. This double is what we have agreed to call *Linga-sarira*, but which I would propose to call, for greater convenience, "Protean" or "Plastic Body."

M. C. Why Protean or Plastic?

H. P. B. Protean, because it can assume all forms; e.g., the "shepherd magicians" whom popular rumor accuses, perhaps not without some reason, of being "were-wolves," and "mediums in

cabinets," whose own "Plastic Bodies" play the part of materialized grandmothers and "John Kings." Otherwise, why the invariable custom of the "dear departed angels" to come out but little further than arm's length from the medium, whether entranced or not? Mind, I do not at all deny foreign influences in this kind of phenomena. But I do affirm that foreign interference is rare, and that the materialized form is always that of the medium's *Astral*, or Protean body.

M. C. How is this astral body created?

H. P. B. It is not created; it grows, as I told you, with the man and exists in the rudimentary condition even before the child is born.

M. C. And what about the second?

H. P. B. The second is the "Thought" body, or Dream body, rather; known among Occultists as the *Mayavi-rupa*, or "Illusion-body." During life this image is the vehicle both of thought and of the animal passions and desires, drawing at one and the same time from the lowest terrestrial *manas* (mind) and *Kama*, the element of desire. It is *dual* in its potentiality, and after death forms what is called in the East *Bhut*, or *Kama-rupa*, but which is better known to Theosophists as the "Spook."

M. C. And the third?

H. P. B. The third is the true *Ego*, called in the East by a name meaning "causal-body," but which in the *trans*-Himalayan schools is always called the "Karmic body," which is the same. For *Karma*, or action, is the cause which produces incessant rebirths or "reincarnations." It is *not* the *Monad*, nor is it *Manas* proper; but is, in a way, indissolubly connected with and a compound of the *Monad* and *Manas* in *Devachan*.

M. C. Then there are three doubles?

H. P. B. If you call the Christian and other Trinities "three Gods," then there are three doubles. But in truth there is only one under three aspects or phases: the most material portion disappearing with the body; the middle one surviving both as an independent but temporary entity in the land of shadows; the third, immortal throughout the *Manvantara*, unless *Nirvana* puts an end to it before.

M. C. But shall not we be asked what difference there is between the *Mayavi* and *Kama-rupa*, or as you propose to call them the "Dream body" and the "Spook"?

H. P. B. Most likely, and we shall answer, in addition to what has been said, that the "thought-power" or aspect of the *Mayavi* or "Illusion-body," merges after death entirely into the causal body or the conscious, *thinking* Ego. The animal elements, or power of desire of the "Dream body," absorbing after death that which it has collected (through its insatiable desire *to live*) during life; i.e., all the astral vitality as well as all the impressions of its *material* acts and thoughts while it lived in possession of the body, forms the "Spook" or *Kama-rupa*. Our Theosophists know well enough that after death the *higher* *Manas* unites with the *Monad* and

passes into Devachan, while the dregs of the *lower* Manas or animal mind go to form this Spook. This has life in it, but hardly any consciousness, except, as it were, by proxy; when it is drawn into the current of a medium.

M. C. Is it all that can be said upon the subject?

H. P. B. For the present this is enough metaphysics, I guess. Let us hold to the "Double" in its earthly phase. What would you know?

M. C. Every country in the world believes more or less in the "double" or doppelganger. The simplest form of this is the appearance of a man's phantom the moment after his death, or at the instant of death, to his dearest friend. Is this appearance the *mayavi-rupa*?

H. P. B. It is; because produced by the thought of the dying man.

M. C. Is it unconscious?

H. P. B. It is unconscious to the extent that the dying man does not generally do it knowingly; nor is he aware that he so appears. What happens is this. If he thinks very intently at the moment of death of the person he either is very anxious to see, or loves best, he may appear to that person. The thought becomes objective; the double, or shadow of a man, being nothing but the faithful reproduction of him, like a reflection in a mirror: that which the man does, even in thought, that the double repeats. This is why the phantoms are often seen in such cases in the clothes they wear at the particular moment, and the *image* reproduces even the expression on the dying man's face. If the double of a man bathing were seen it would seem to be immersed in water; so when a man who has been drowned appears to his friend, the image will be seen to be dripping with water. The cause for the apparition may also be reversed; i.e., the dying man may or may not be thinking at all of the particular person his image appears to, but it is that person who is sensitive. Or perhaps his sympathy or his hatred for the individual whose wraith is thus evoked is very intense physically or psychically; and in this case the apparition is created by, and depends upon the intensity of the thought. What then happens is this. Let us call the dying man A, and him who sees the double B. The latter, owing to love, hate, or fear, has the image of A so deeply impressed on his psychic memory, that actual magnetic attraction and repulsion are established between the two, whether one knows of it and feels it, or not. When A dies, the sixth sense or psychic spiritual intelligence of the *inner man* in B becomes cognizant of the change in A, and forthwith apprizes the physical senses of the man by projecting before his eye the form of A as it is at the instant of the great change. The same when the dying man longs to see some one; *his* thought telegraphs to his friend, consciously or unconsciously along the wire of sympathy, and becomes objective. This is what the "Spookical" Research Society would pompously, but none the less muddily, call *telepathic impact*.

M. C. This applies to the simplest form of the appearance of the double. What about cases in which the double does that which is contrary to the feeling and wish of the man?

H. P. B. This is impossible. The "Double" cannot act unless the key-note of this action was struck in the brain of the man to whom the "Double" belongs, be that man just dead, or alive, in

good or in bad health. If he paused on the thought a second, long enough to give it form, before he passed on to other mental pictures, this one second is as sufficient for the *objectivization* of his personality on the astral waves, as for your face to impress itself on the sensitized plate of a photographic apparatus. Nothing prevents your form then being seized upon by the surrounding Forces -- as a dry leaf fallen from a tree is taken up and carried away by the wind -- being made to caricature or distort your thought.

M. C. Supposing the double expresses in actual words a thought uncongenial to the man, and expresses it -- let us say to a friend far away, perhaps on another continent? I have known instances of this occurring.

H. P. B. Because it then so happens that the created image is taken up and used by a "Shell." Just as in seance-rooms when "images" of the dead -- which may perhaps be lingering unconsciously in the memory or even the auras of those present -- are seized upon by the Elementals or Elementary Shadows and made objective to the audience, and even caused to act at the bidding of the strongest of the many different wills in the room. In your case, moreover, there must exist a connecting link -- a telegraph wire -- between the two persons, a point of psychic sympathy, and on this the thought travels instantly. Of course there must be, in every case, some strong reason why that particular thought takes that direction; it must be connected in some way with the other person. Otherwise such apparitions would be of common and daily occurrence.

M. C. This seems very simple; why then does it only occur with exceptional persons?

H. P. B. Because the plastic power of the imagination is much stronger in some persons than in others. The mind is dual in its potentiality: it is physical and metaphysical. The higher part of the mind is connected with the spiritual soul or Buddhi, the lower with the animal soul, the Kama principle. There are persons who never think with the higher faculties of their minds at all; those who do so are the minority and are thus, in a way, *beyond*, if not above, the average of human kind. These will think even upon ordinary matters on that *higher* plane. The idiosyncrasy of the person determines in which "principle" of the mind the thinking is done, as also the faculties of a preceding life, and sometimes the heredity of the physical. This is why it is so very difficult for a materialist -- the metaphysical portion of whose brain is almost atrophied -- to raise himself, or for one who is naturally spiritually-minded to descend to the level of the matter-of-fact vulgar thought. Optimism and pessimism depend on it also in a great measure.

M. C. But the habit of thinking in the higher mind can be developed -- else there would be no hope for persons who wish to alter their lives and raise themselves? And that this is possible must be true, or there would be no hope for the world.

H. P. B. Certainly it can be developed, but only with great difficulty, a firm determination, and through much self-sacrifice. But it is comparatively easy for those who are born with the gift. Why is it that one person sees poetry in a cabbage or a pig with her little ones, while another will perceive in the loftiest things only their lowest and most material aspect, will laugh at the "music of the spheres," and ridicule the most sublime conceptions and philosophies? This difference depends simply on the innate power of the mind to think on the higher or on the lower plane, with the *astral* (in the sense given to the word by St. Martin), or with the physical brain. Great

intellectual powers are often no proof of, but are impediments to spiritual and right conceptions; witness most of the great men of science. We must rather pity than blame them.

M. C. But how is it that the person who thinks on the higher plane produces more perfect and more potential images and objective forms by his thought?

H. P. B. Not necessarily that "person" alone, but all those who are generally sensitives. The person who is endowed with this faculty of thinking about even the most trifling things from the higher plane of thought has, by virtue of that gift which he possesses, a plastic power of formation, so to say, in his very imagination. Whatever such a person may think about, his thought will be so far more intense than the thought of an ordinary person, that by this very intensity it obtains the power of creation. Science has established the fact that thought is an energy. This energy in its action disturbs the atoms of the astral atmosphere around us. I already told you; the rays of thought have the same potentiality for producing forms in the astral atmosphere as the sunrays have with regard to a lens. Every thought so evolved with energy from the brain, creates, *nolens volens* a shape.

M. C. Is that shape absolutely unconscious?

H. P. B. Perfectly unconscious unless it is the creation of an adept, who has a preconceived object in giving it consciousness, or rather in sending along with it enough of his will and intelligence to cause it to appear conscious. This ought to make us more cautious about our thoughts.

But the wide distinction that obtains between the adept in this matter and the ordinary man must be borne in mind. The adept may at his will use his *Mayavi-rupa*, but the ordinary man does not, except in very rare cases. It is called *Mayavi-rupa* because it is a form of illusion created for use in the particular instance, and it has quite enough of the adept's mind in it to accomplish its purpose. The ordinary man merely creates a thought-image, whose properties and powers are at the time wholly unknown to him.

M. C. Then one may say that the form of an adept appearing at a distance from his body, as for instance Ram Lal in *Mr. Isaacs*, is simply an image?

H. P. B. Exactly. It is a walking thought.

M. C. In which case an adept can appear in several places almost simultaneously.

H. P. B. He can. Just as Apollonius of Tyana, who was seen in two places at once, while his body was at Rome. But it must be understood that not *all* of even the *astral* adept is present in each appearance.

M. C. Then it is very necessary for a person of any amount of imagination and psychic powers to attend to their thoughts?

H. P. B. Certainly, for each thought has a shape which borrows the appearance of the man engaged in the action of which he thought. Otherwise how can clairvoyants see in your *aura* your past and present? What they see is a passing panorama of yourself represented in successive actions by your thoughts. You asked me if we are punished for our thoughts. Not for all, for some are still-born; but for the others, those which we call "silent" but potential thoughts yes. Take an extreme case, such as that of a person who is so wicked as to wish the death of another. Unless the evil-wisher is a *Dugpa*, a high adept in black magic, in which case Karma is delayed, such a wish only comes back to roost.

M. C. But supposing the evil-wisher to have a very strong will, without being a *dugpa*, could the death of the other be accomplished?

H. P. B. Only if the malicious person has the evil eye, which simply means possessing enormous plastic power of imagination working involuntarily, and thus turned unconsciously to bad uses. For what is the power of the "evil eye"? Simply a great plastic power of thought, so great as to produce a current impregnated with the potentiality of every kind of misfortune and accident, which inoculates, or attaches itself to any person who comes within it. A *jettatore* (one with the evil eye) need not be even imaginative, or have evil intentions or wishes. He may be simply a person who is naturally fond of witnessing or reading about sensational scenes, such as murder, executions, accidents, etc., etc. He may be not even thinking of any of these at the moment his eye meets his future victim. But the currents have been produced and exist in his visual ray ready to spring into activity the instant they find suitable soil, like a seed fallen by the way and ready to sprout at the first opportunity.

M. C. But how about the thoughts you call "silent"? Do such wishes or thoughts come home to roost?

H. P. B. They do; just as a ball which fails to penetrate an object rebounds upon the thrower. This happens even to some *dugpas* or sorcerers who are not strong enough, or do not comply with the rules -- for even they have *rules* they have to abide by -- but not with those who are regular, fully developed "black magicians"; for such have the power to accomplish what they wish.

M. C. When you speak of rules it makes me want to wind up this talk by asking you what everybody wants to know who takes any interest in occultism. What is a principal or important suggestion for those who have these powers and wish to control them rightly -- in fact to enter occultism?

H. P. B. The first and most important step in occultism is to learn how to adapt your thoughts and ideas to your plastic potency.

M. C. Why is this so important?

H. P. B. Because otherwise you are creating things by which you may be making bad Karma. No one should go into occultism or even touch it before he is perfectly acquainted with his own powers, and that he knows how to commensurate it with his actions. And this he can do only by

deeply studying the philosophy of Occultism before entering upon the *practical* training. Otherwise, as sure as fate -- HE WILL FALL INTO BLACK MAGIC.

Constitution of the Inner Man

Of course it is most difficult, and, as you say, "puzzling" to understand correctly and distinguish between the various *aspects*, called by us the "principles" of the real EGO. It is the more so as there exists a notable difference in the numbering of those principles by various Eastern schools, though at the bottom there is the same identical substratum of teaching in all of them.

X. Are you thinking of the Vedantins? They divide our seven "principles" into five only, I believe?

M. They do; but though I would not presume to dispute the point with a learned Vedantin, I may yet state as my private opinion that they have an obvious reason for it. With them it is only that compound spiritual aggregate which consists of various mental aspects that is called *Man* at all, the physical body being in their view something beneath contempt, and merely an *illusion*. Nor is the Vedanta the only philosophy to reckon in this manner. Lao-Tze in his *Tao-te-King*, mentions only five principles, because he, like the Vedantins, omits to include two principles, namely, the spirit (Atma) and the physical body, the latter of which, moreover, he calls "the cadaver." Then there is the *Taraka Raja Yoga* School. Its teaching recognizes only three "principles" in fact; but then, in reality, their *Sthulopadhi*, or the physical body in its *jagrata* or waking conscious state, their *Sukshmopadki*, the same body in *svapna* or the dreaming state, and their *Karanopadhi* or "causal body," or that which passes from one incarnation to another, are all dual in their aspects, and thus make six. Add to this Atma, the impersonal divine principle or the immortal element in Man, undistinguished from the Universal Spirit, and you have the same seven, again, as in the esoteric division. (1)

X. Then it seems almost the same as the division made by mystic Christians: body, soul, and spirit?

M. Just the same. We could easily make of the body the vehicle of the "vital Double"; of the latter the vehicle of Life or *Prana*; of *Kama-rupa* or (animal) soul, the vehicle of the *higher* and the *lower* mind, and make of this six principles, crowning the whole with the one immortal spirit. In Occultism, every qualificative change in the state of our consciousness gives to man a new aspect, and if it prevails and becomes part of the living and acting EGO, it must be (and is) given a special name, to distinguish the man in that particular state from the man he is when he places himself in another state.

X. It is just that which is so difficult to understand.

M. It seems to me very easy, on the contrary, once that you have seized the main idea, i.e., that man acts on this, or another plane of consciousness, in strict accordance with his mental and

spiritual condition. But such is the materialism of the age that the more we explain, the less people seem capable of understanding what we say. Divide the terrestrial being called man into three chief aspects, if you like; but, unless you make of him a pure animal, you cannot do less. Take his objective *body*; the feeling principle in him -- which is only a little higher than the *instinctual* element in the animal -- or the vital elementary soul; and that which places him so immeasurably beyond and higher than the animal -- i.e., his *reasoning* soul or "spirit." Well, if we take these three groups or representative entities, and subdivide them, according to the occult teaching, what do we get?

First of all Spirit (in the sense of the Absolute, and therefore invisible ALL) or Atma. As this can neither be located nor conditioned in philosophy, being simply that which is, in Eternity, and as the ALL cannot be absent from even the tiniest geometrical or mathematical point of the universe of matter or substance, it ought not to be called, in truth, a "human" principle at all. Rather, and at best, it is that point in metaphysical Space which the human Monad and its vehicle man, occupy for the period of every life. Now that point is as imaginary as man himself, and in reality is an illusion, a *maya*; but then for ourselves as for other personal Egos, we are a reality during that fit of illusion called life, and we have to take ourselves into account -- in our own fancy at any rate, if no one else does. To make it more conceivable to the human intellect, when first attempting the study of Occultism, and to solve the A B C of the mystery of man, Occultism calls it the *seventh* principle, the synthesis of the six, and gives it for vehicle the *Spiritual Soul*, *Buddhi*. Now the latter conceals a mystery, which is never given to any one with the exception of irrevocably pledged *chelas*, those at any rate, who can be safely trusted. Of course there would be less confusion, could it only be told; but, as this is directly concerned with the power of projecting one's double consciously and at will, and as this gift like the "ring of Gyges" might prove very fatal to men at large and to the possessor of that faculty in particular, it is carefully guarded. Alone the adepts, who have been tried and can never be found wanting, have the key of the mystery fully divulged to them. . . . Let us avoid side issues, however, and hold to the "principles." This divine soul or *Buddhi*, then, is the Vehicle of the Spirit. In conjunction, these two are one, impersonal, and without any attributes (on this plane, of course), and make two spiritual "principles." If we pass on to the *Human Soul* (*manas*, the *mens*) every one will agree that the intelligence of man is *dual* to say the least: e.g., the high-minded man can hardly become low-minded; the very intellectual and spiritual-minded man is separated by an abyss from the obtuse, dull and material, if not animal-minded man. Why then should not these men be represented by two "principles" or two aspects rather? Every man has these two principles in him, one more active than the other, and in rare cases, one of these is entirely stunted in its growth: so to say paralyzed by the strength and predominance of the other *aspect*, during the life of man. These, then, are what we call the two principles or aspects of *Manas*, the higher and the lower; the former, the higher *Manas*, or the thinking, conscious EGO gravitating toward the *Spiritual Soul* (*Buddhi*); and the latter, or its instinctual principle attracted to *Kama*, the seat of animal desires and passions in man. Thus, we have *four* "principles" justified; the last three being (1) the "Double" which we have agreed to call Protean, or Plastic Soul; the vehicle of (2) the life *principle*; and (3) the physical body. Of course no Physiologist or Biologist will accept these principles, nor can he make head or tail of them. And this is why, perhaps, none of them understand to this day either the functions of the spleen, the physical vehicle of the Protean Double, or those of a certain organ on the right side of man, the seat of the above mentioned desires, nor yet does he know anything of the pineal gland, which he describes as a horny gland

with a little sand in it, and which is the very key to the highest and divinest consciousness in man -- his omniscient, spiritual and all embracing mind. This seemingly useless appendage is the pendulum which, once the clock-work of the *inner* man is wound up, carries the spiritual vision of the EGO to the highest planes of perception, where the horizon open before it becomes almost infinite. . . .

X. But the scientific materialists assert that after the death of man nothing remains; that the human body simply disintegrates into its component elements, and that what we call soul is merely a temporary self-consciousness produced as a by-product of organic action, which will evaporate like steam. Is not theirs a strange state of mind?

M. Not strange at all, that I see. If they say that self-consciousness ceases with the body, then in *their* case they simply utter an unconscious prophecy. For once that they are firmly convinced of what they assert, no conscious afterlife is possible for them.

X. But if human self-consciousness survives death as a rule, why should there be exceptions?

M. In the fundamental laws of the spiritual world which are immutable, no exception is possible. But there are rules for those who see, and rules for those who prefer to remain blind.

X. Quite so, I understand. It is an aberration of a blind man, who denies the existence of the sun because he does not see it. But after death his spiritual eyes will certainly compel him to see.

M. They will not compel him, nor will he see anything. Having persistently denied an after-life during this life, he will be unable to sense it. His spiritual senses having been stunted, they cannot develop after death, and he will remain blind. By insisting that he *must* see it, you evidently mean one thing and I another. You speak of the spirit from the Spirit, or the flame from the Flame -- of Atma in short -- and you confuse it with the human soul -- Manas. . . . You do not understand me, let me try to make it clear. The whole gist of your question is to know whether, in the case of a downright materialist, the complete loss of self-consciousness and self-perception after death is possible? Isn't it so? I say: It is possible. Because, believing firmly in our Esoteric Doctrine, which refers to the *post-mortem* period, or the interval between two lives or births as merely a transitory state, I say: -- Whether that interval between two acts of the illusionary drama of life lasts one year or a million, that *post-mortem* state may, without any breach of the fundamental law, prove to be just the same state as that of a man who is in a dead swoon.

X. But since you have just said that the fundamental laws of the after-death state admit of no exceptions, how can this be?

M. Nor do I say now that they admit of exceptions. But the spiritual law of continuity applies only to things which are truly real. To one who has read and understood *Mandukya Upanishad* and *Vedanta-Sara*, all this becomes very clear. I will say more: it is sufficient to understand what we mean by Buddhi and the duality of Manas to have a very clear perception why the materialist may not have a self-conscious survival after death: because Manas, in its lower aspect, is the seat of the terrestrial mind, and, therefore, can give only that perception of the Universe which is based on the evidence of that mind, and not on our spiritual vision. It is said in our Esoteric

school that between Buddhi and Manas, or Isvara and Prajna (2), there is in reality no more difference than *between a forest and its trees, a lake and its waters*, just as *Mandukya* teaches. One or hundreds of trees dead from loss of vitality, or uprooted, are yet incapable of preventing the forest from being still a forest. The destruction or *post-mortem* death of one personality dropped out of the long series, will not cause the smallest change in the Spiritual *Ego*, and it will ever remain the same EGO. Only, instead of experiencing *Devachan* it will have to immediately reincarnate.

X. But as I understand it, Ego-Buddhi represents in this simile the forest and the personal minds the trees. And if Buddhi is immortal, how can that which is similar to it, i.e., Manas-taijasi (3), lose entirely its consciousness till the day of its new incarnation? I cannot understand it.

M. You cannot, because you will mix up an abstract representation of the whole with its casual changes of form; and because you confuse *Manas-taijasi*, the *Buddhi*-lit human soul, with the latter, animalized. Remember that if it can be said of Buddhi that it is unconditionally immortal, the same cannot be said of *Manas*, still less of *taijasi*, which is an attribute. No *post-mortem* consciousness or *Manastajasi*, can exist apart from Buddhi, the divine soul, because the first (*Manas*) is, in its lower aspect, a qualificative attribute of the terrestrial personality, and the second (*taijasi*) is identical with the first, and that it is the same *Manas* only with the light of Buddhi reflected on it. In its turn, Buddhi would remain only an impersonal spirit without this element which it borrows from the human soul, which conditions and makes of it, in this illusive Universe, *as it were something separate* from the universal soul for the whole period of the cycle of incarnation. Say rather that *Buddhi-Manas* can neither die nor lose its compound self-consciousness in Eternity, nor the recollection of its previous incarnations in which the two -- i.e., the spiritual and the human soul, had been closely linked together. But it is not so in the case of a materialist, whose human soul not only receives nothing from the divine soul, but even refuses to recognize its existence. You can hardly apply this axiom to the attributes and qualifications of the human soul; for it would be like saying that because your divine soul is immortal, therefore the bloom on your cheek must also be immortal; whereas this bloom, like *taijasi*, or spiritual radiance, is simply a transitory phenomenon.

X. Do I understand you to say that we must not mix in our minds the noumenon with the phenomenon, the cause with its effect?

M. I do say so, and repeat that, limited to *Manas* or the human soul alone, the radiance of *Taijasi* itself becomes a mere question of time; because both immortality and consciousness after death become for the terrestrial personality of man simply conditioned attributes, as they depend entirely on conditions and beliefs created by the human soul itself during the life of its body. Karma acts incessantly: we reap *in our after-life* only the fruit of that which we have ourselves sown, or rather created in our terrestrial existence.

X. But if my Ego can, after the destruction of my body, become plunged in a state of entire unconsciousness, then where can be the punishment for the sins of my past life?

M. Our philosophy teaches that Karmic punishment reaches the Ego only in its next incarnation. After death it receives only the reward for the unmerited sufferings endured during its just past

existence. (4) The whole punishment after death, even for the materialist, consists therefore in the absence of any reward and the utter loss of the consciousness of one's bliss and rest. Karma -- is the child of the terrestrial Ego, the fruit of the actions of the tree which is the objective personality visible to all, as much as the fruit of all the thoughts and even motives of the spiritual "I"; but Karma is also the tender mother, who heals the wounds inflicted by her during the preceding life, before she will begin to torture this Ego by inflicting upon him new ones. If it may be said that there is not a mental or physical suffering in the life of a mortal, which is not the fruit and consequence of some sin in this, or a preceding existence on the other hand, since he does not preserve the slightest recollection of it in his actual life and feels himself not deserving of such punishment, but believes sincerely he suffers for no guilt of his own, this alone is quite sufficient to entitle the human soul to the fullest consolation, rest and bliss in his *post-mortem* existence. Death comes to our spiritual selves ever as a deliverer and friend. For the materialist, who, notwithstanding his materialism, was not a bad man, the interval between the two lives will be like the unbroken and placid sleep of a child; either entirely dreamless, or with pictures of which he will have no definite perception. For the believer it will be a dream as vivid as life and full of realistic bliss and visions. As for the bad and cruel man, whether materialist or otherwise, he will be immediately reborn and suffer his hell on earth. To enter *Avichi* is an exceptional and rare occurrence.

X. As far as I remember, the periodical incarnations of Sutratma (5) are likened in some Upanishad to the life of a mortal which oscillates periodically between sleep and waking. This does not seem to me very clear, and I will tell you why. For the man who awakes, another day commences, but that man is the same in soul and body as he was the day before; whereas at every new incarnation a full change takes place not only in his external envelope, sex and personality, but even in his mental and psychic capacities. Thus the simile does not seem to me quite correct. The man who arises from sleep remembers quite clearly what he has done yesterday, the day before, and even months and years ago. But none of us has the slightest recollection of a preceding life or any fact or event concerning it. . . . I may forget in the morning what I have dreamed during the night, still I know that I have slept and have the certainty that I lived during sleep; but what recollection have I of my past incarnation? How do you reconcile this?

M. Yet some people do recollect their past incarnations. This is what the Arhats call Samma-Sambuddha -- or the knowledge of the whole series of one's past incarnations.

X. But we ordinary mortals who have not reached Samma-Sambuddha, how can we be expected to realize this simile?

M. By studying it and trying to understand more correctly the characteristics of the three states of sleep. Sleep is a general and immutable law for man as for beast, but there are different kinds of sleep and still more different dreams and visions.

X. Just so. But this takes us from our subject. Let us return to the materialist, who, while not denying dreams, which he could hardly do, yet denies immortality in general and the survival of his own individuality especially.

M. And the materialist is right for once, at least; since for one who has no inner perception and faith, there is no immortality possible. In order to live in the world to come a conscious life, one has to believe first of all in that life during one's terrestrial existence. On these two aphorisms of the Secret Science all the philosophy about the *post-mortem* consciousness and the immortality of the soul is built. The Ego receives always according to its deserts. After the dissolution of the body, there commences for it either a period of full clear consciousness, a state of chaotic dreams, or an utterly dreamless sleep indistinguishable from annihilation; and these are the three states of consciousness. Our physiologists find the cause of dreams and visions in an unconscious preparation for them during the waking hours; why cannot the same be admitted for the *post-mortem* dreams? I repeat it, *death is sleep*. After death begins, before the spiritual eyes of the soul, a performance according to a program learned and very often composed unconsciously by ourselves; the practical carrying out of *correct* beliefs or of illusions which have been created by ourselves. A Methodist will be a Methodist, a Mussulman a Mussulman of course, just for a time -- in a perfect fool's paradise of each man's creation and making. These are the *post-mortem* fruits of the tree of life. Naturally, our belief or unbelief in the fact of conscious immortality is unable to influence the unconditioned reality of the fact itself, once that it exists; but the belief or unbelief in that immortality, as the continuation or annihilation of separate entities cannot fail to give color to that fact in its application to each of these entities. Now do you begin to understand it?

X. I think I do. The materialist, disbelieving in everything that cannot be proven to him by his five senses or by scientific reasoning, and rejecting every spiritual manifestation, accepts life as the only conscious existence. Therefore, according to their beliefs so will it be unto them. They will lose their personal Ego, and will plunge into a dreamless sleep until a new awakening. Is it so?

M. Almost so. Remember the universal esoteric teaching of the two kinds of conscious existence: the terrestrial and the spiritual. The latter must be considered real from the very fact that it is the region of the eternal, changeless, immortal cause of all; whereas the incarnating Ego dresses itself up in new garments entirely different from those of its previous incarnations, and in which all except its spiritual prototype is doomed to a change so radical as to leave no trace behind.

X. Stop! . . . Can the consciousness of my terrestrial *Egos* perish not only for a time, like the consciousness of the materialist, but in any case so entirely as to leave no trace behind?

M. According to the teaching, it must so perish and in its fulness, all except that principle which, having united itself with the Monad, has thereby become a purely spiritual and indestructible essence, one with it in the Eternity. But in the case of an out and out materialist, in whose personal "I" no Buddhi has ever reflected itself, how can the latter carry away into the infinitudes one particle of that terrestrial personality? Your spiritual "I" is immortal; but from your present Self it can carry away into after-life but that which has become worthy of immortality, namely, the aroma alone of the flower that has been mown by death.

X. Well, and the flower, the terrestrial "I"?

M. The flower, as all past and future flowers which blossomed and died, and will blossom again on the mother bough, the *Sutratma*, all children of one root or Buddhi, will return to dust. Your present "I," as you yourself know, is not the body now sitting before me, nor yet is it what I would call Manas-Sutratma -- but Sutratma-Buddhi.

X. But this does not explain to me at all, why you call life after death immortal, infinite, and real, and the terrestrial life a simple phantom or illusion; since even that *post-mortem* life has limits, however much wider they may be than those of terrestrial life.

M. No doubt. The spiritual Ego of man moves in Eternity like a pendulum between the hours of life and death. But if these hours marking the periods of terrestrial and spiritual life are limited in their duration, and if the very number of such stages in Eternity between sleep and awakening, illusion and reality, has its beginning and its end, on the other hand the spiritual "Pilgrim" is eternal. Therefore are the hours of his *post-mortem* life -- when, disembodied he stands face to face with truth and not the mirages of his transitory earthly existences during the period of that pilgrimage which we call "the cycle of rebirths" -- the only reality in our conception. Such intervals, their limitation notwithstanding, do not prevent the Ego, while ever perfecting itself, to be following undeviatingly, though gradually and slowly, the path to its last transformation, when that Ego having reached its goal becomes the divine ALL. These intervals and stages help towards this final result instead of hindering it; and without such limited intervals the divine Ego could never reach its ultimate goal. This Ego is the actor and its numerous and various incarnations the parts it plays. Shall you call these parts with their costumes the individuality of the actor himself? Like that actor, the Ego is forced to play during the Cycle of Necessity up to the very threshold of *Para-nirvana* many parts such as may be unpleasant to it. But as the bee collects its honey from every flower, leaving the rest as food for the earthly worms, so does our spiritual individuality, whether we call it Sutratma or Ego. It collects from every terrestrial personality into which Karma forces it to incarnate, the nectar alone of the Spiritual qualities and self-consciousness, and uniting all these into one whole it emerges from its chrysalis as the glorified Dhyani Chohan. So much the worse for those terrestrial personalities from which it could collect nothing. Such personalities cannot assuredly outlive consciously their terrestrial existence.

X. Thus then it seems, that for the terrestrial personality, immortality is still conditional. Is then immortality itself not unconditional?

M. Not at all. But it cannot touch the *non-existent*. For all that which exists as SAT, ever aspiring SAT, immortality and Eternity are absolute. Matter is the opposite pole of spirit and yet the two are one. The essence of all this, i.e., Spirit, Force and Matter, or the three in one, is as endless as it is beginningless; but the form acquired by the triple unity during incarnations, the externality, is certainly only the illusion of our personal conceptions. Therefore do we call the after-life alone a reality, while relegating the terrestrial life, its terrestrial personality included, to the phantom realm of illusion.

X. But why in such a case not call sleep the reality, and waking the illusion, instead of the reverse?

M. Because we use an expression made to facilitate the grasping of the subject, and from the standpoint of terrestrial conceptions, it is a very correct one.

X. Nevertheless, I cannot understand. If the life to come is based on justice and the merited retribution for all our terrestrial suffering, how, in the case of materialists many of whom are ideally honest and charitable men, should there remain of their personality nothing but the refuse of a faded flower!

M. No one ever said such a thing. No materialist, if a good man, however unbelieving, can die forever in the fulness of his spiritual individuality. What was said is, that the consciousness of one life can disappear either fully or partially; in the case of a thorough materialist, no vestige of that personality which disbelieved remains in the series of lives.

X. But is this not annihilation to the Ego?

M. Certainly not. One can sleep a dead sleep during a long railway journey, miss one or several stations without the slightest recollection or consciousness of it, awake at another station and continue the journey recollecting other halting places, till the end of that journey, when the goal is reached. Three kinds of sleep were mentioned to you: the dreamless, the chaotic, and the one so real, that to the sleeping man his dreams become full realities. If you believe in the latter why can't you believe in the former? According to what one has believed in and expected after death, such is the state one will have. He who expected no life to come will have an absolute blank amounting to annihilation in the interval between the two rebirths. This is just the carrying out of the program we spoke of, and which is created by the materialist himself. But there are various kinds of materialists, as you say. A selfish wicked Egoist, one who never shed a tear for anyone but himself, thus adding entire indifference to the whole world to his unbelief, must drop at the threshold of death his personality for ever. This personality having no tendrils of sympathy for the world around, and hence nothing to hook on to the string of the Sutratma, every connection between the two is broken with the last breath. There being no Devachan for such a materialist, the Sutratma will reincarnate almost immediately. But those materialists who erred in nothing but their disbelief, will oversleep but one station. Moreover, the time will come when the ex-materialist will perceive himself in the Eternity and perhaps repent that he lost even one day, or station, from the life eternal.

X. Still, would it not be more correct to say that death is birth into a new life, or a return once more to the threshold of eternity?

M. You may if you like. Only remember that births differ, and that there are births of "still-born" beings, which are *failures*. Moreover, with your fixed Western ideas about material life, the words "living" and "being" are quite inapplicable to the pure subjective state of *post-mortem* existence. It is just because of such ideas -- save in a few philosophers who are not read by the many and who themselves are too confused to present a distinct picture of it -- that all your conceptions of life and death have finally become so narrow. On the one hand, they have led to crass materialism, and on the other, to the still more material conception of the other life which the Spiritualists have formulated in their Summerland. There the souls of men eat, drink, and marry, and live in a Paradise quite as sensual as that of Mohammed, but even less philosophical.

Nor are the average conceptions of the uneducated Christians any better, but are still more material, if possible. What between truncated Angels, brass trumpets, golden harps, streets in paradisaical cities paved with jewels, and hell-fires, it seems like a scene at a Christmas pantomime. It is because of these narrow conceptions that you find such difficulty in understanding. And, it is also just because the life of the disembodied soul, while possessing all the vividness of reality, as in certain dreams, is devoid of every grossly objective form of terrestrial life, that the Eastern philosophers have compared it with visions during sleep.

FOOTNOTES:

1. See *The Secret Doctrine* for a clearer explanation. ([return to text](#))
2. Isvara is the collective consciousness of the manifested deity, Brahma, i.e., the collective consciousness of the Host of Dhyani Chohans; and Prajna is their individual wisdom. ([return to text](#))
3. *Taijasi* means the radiant in consequence of the union with Buddhi of Manas, the human, illuminated by the radiance of the divine soul. Therefore Manas-taijasi may be described as radiant mind; the human reason lit by the light of the spirit; and Buddhi-Manas is the representation of the divine plus the human intellect and self-consciousness. ([return to text](#))
4. Some Theosophists have taken exception to this phrase, but the words are those of the Masters, and the meaning attached to the word "unmerited" is that given above. In the T. P. S. pamphlet No. 6 a phrase, criticized subsequently in *Lucifer*, was used, which was intended to convey the same idea. In form, however it was awkward and open to the criticism directed against it; but the essential idea was that men often suffer from the effects of the actions done by others, effects which thus do not strictly belong to their own Karma, but to that of other people -- and for these sufferings they of course deserve compensation. If it is true to say that nothing that happens to us can be anything else than Karma -- or the direct or indirect effect of a cause -- it would be a great error to think that every evil or good which befalls us is due *only* to *our* own personal Karma. (*Vide* further on.) ([return to text](#))
5. Our immortal and reincarnating principle in conjunction with the Manasic recollections of the preceding lives is called Sutratma, which means literally the Thread-Soul; because like the pearls on a thread so is the long series of human lives strung together on that one thread. Manas must become *taijasi*, the radiant, before it can hang on the Sutratma as a pearl on its thread, and so have full and absolute perception of itself in the Eternity. As said before, too close association with the terrestrial mind of the human soul alone causes this radiance to be entirely lost. ([return to text](#))

CAN THE DOUBLE MURDER?

By H. P. Blavatsky

To the Editor of The Sun.

Sir, — One morning in 1867 Eastern Europe was startled by news of the most horrifying description. Michael Obrenovitch, reigning Prince of Serbia, his aunt, the Princess Catherine or Katinka, and her daughter had been murdered in broad daylight, near Belgrade, in their own garden, assassin or assassins remaining unknown. The Prince had received several bullet-shots, and stabs, and his body was actually butchered; the Princess was killed on the spot, her head smashed, and her young daughter, though still alive, was not expected to survive. The circumstances are too recent to have been forgotten, but in that part of the world, at the time, the case created a delirium of excitement.

In the Austrian dominions and in those under the doubtful protectorate of Turkey, from Bucharest down to Trieste, no high family felt secure. In those half Oriental countries every Montecchi has its Capuletti, and it was rumoured that the bloody deed was perpetrated by the Prince Kara-Gueorguevitch, or "Tzerno-Gueorgey," as he is usually called in those parts. Several persons innocent of the act were, as is usual in such cases imprisoned, and the real murderers escaped justice. A young relative of the victim, greatly beloved by his people, a mere child, taken for the purpose from a school in Paris, was brought over in ceremony to Belgrade and proclaimed Hospodar of Serbia. In the turmoil of political excitement the tragedy of Belgrade was forgotten by all but an old Serbian matron who had been attached to the Obrenovitch family, and who, like Rachel, would not be comforted for the death of her children. After the proclamation of the young Obrenovitch, nephew of the murdered man, she had sold out her property and disappeared; but not before taking a solemn vow on the tombs of the victims to avenge their deaths.

The writer of this truthful narrative had passed a few days at Belgrade, about three months before the horrid deed was perpetrated, and knew the Princess Katinka. She was a kind, gentle, and lazy creature at home; abroad she seemed a Parisienne in manners and education. As nearly all the personages who will figure in this true story are still living, it is but decent that I should withhold their names, and give only initials.

The old Serbian lady seldom left her house, going but to see the Princess occasionally. Crouched on a pile of pillows and carpeting, clad in the picturesque national dress, she looked like the Cumaean sibyl in her days of calm repose. Strange stories were whispered about her Occult knowledge, and thrilling accounts circulated sometimes among the guests assembled round the fireside of the modest inn. Our fat landlord's maiden aunt's cousin had been troubled for some time past by a wandering vampire, and had been bled nearly to death by the nocturnal visitor, and while the efforts and exorcisms of the parish pope had been of no avail, the victim was luckily delivered by Gospoja P——, who had put to flight the disturbing ghost by merely shaking her fist at him, and shaming him in his own language. It was in Belgrade that I learned for the first time this highly interesting fact in philology, namely, that spooks have a language of their own. The old lady, whom I will call Gospoja P——, was generally attended by another personage destined to be the principal actress in our tale of horror. It was a young gipsy girl from some part of Roumania, about fourteen years of age. Where she was born, and who she was, she seemed to know as little as anyone else. I was told she had been brought one day by a party of strolling gipsies, and left in the yard of the old lady, from which moment she became an inmate of the house. She was nicknamed "the sleeping girl," as she was said to be gifted with the faculty of apparently dropping asleep wherever she stood, and speaking her dreams aloud. The girl's heathen name was Frosva.

About eighteen months after the news of the murder had reached Italy, where I was at the time, I travelled over the Banat in a small waggon of my own, hiring a horse whenever I needed one. I met on my way an old

Nightmare Tales

Frenchman, a scientist, travelling alone after my own fashion, but with the difference that while he was a pedestrian, I dominated the road from the eminence of a throne of dry hay in a jolting waggon. I discovered him one fine morning slumbering in a wilderness of shrubs and flowers, and had nearly passed over him, absorbed as I was in the contemplation of the surrounding glorious scenery. The acquaintance was soon made, no great ceremony of mutual introduction being needed. I had heard his name mentioned in circles interested in mesmerism, and knew him to be a powerful adept of the school of Dupotet.

"I have found," he remarked, in the course of the conversation after I had made him share my seat of hay, "one of the most wonderful subjects in this lovely Thebaide. I have an appointment to-night with the family. They are seeking to unravel the mystery of a murder by means of the clairvoyance of the girl . . . she is wonderful!"

"Who is she?" I asked.

"A Roumanian gipsy. She was brought up, it appears, in the family of the Serbian reigning Prince, who reigns no more, for he was very mysteriously murdered—Holloo, take care! *Diable*, you will upset us over the precipice!" he hurriedly exclaimed, unceremoniously snatching from me the reins, and giving the horse a violent pull.

"You do not mean Prince Obrenovitch?" I asked aghast.

"Yes, I do; and him precisely. To-night I have to be there, hoping to close a series of *seances* by finally developing a most marvellous manifestation of the hidden power of the human spirit; and you may come with me. I will introduce you; and besides, you can help me as an interpreter, for they do not speak French."

As I was pretty sure that if the somnambule was Frosya, the rest of the family must be Gospoja P——, I readily accepted. At sunset we were at the foot of the mountain, leading to the old castle, as the Frenchman called the place. It fully deserved the poetical name given it. There was a rough bench in the depths of one of the shadowy retreats, and as we stopped at the entrance of this poetical place, and the Frenchman was gallantly busying himself with my horse on the suspicious-looking bridge which led across the water to the entrance gate, I saw a tall figure slowly rise from the bench and come towards us.

It was my old friend Gospoja P——, looking more pale and more mysterious than ever. She exhibited no surprise at seeing me, but simply greeting me after the Serbian fashion, with a triple kiss on both cheeks, she took hold of my hand and led me straight to the nest of ivy. Half reclining on a small carpet spread on the tall grass, with her back leaning against the wall, I recognized our Frosya.

She was dressed in the national costume of the Wallachian women, a sort of gauze turban intermingled with various gilt medals and bands on her head, white shirt with opened sleeves, and petticoats of variegated colours. Her face looked deadly pale, her eyes were closed, and her countenance presented that stony, sphinx-like look which characterizes in such a peculiar way the entranced clairvoyant somnambule. If it were not for the heaving motion of her chest and bosom, ornamented by rows of medals and bead necklaces which feebly tinkled at every breath, one might have thought her dead, so, lifeless and corpse-like was her face. The Frenchman informed me that he had sent her to sleep just as we were approaching the house, and that she now was as he had left her the previous night; he then began busying himself with the *sujet*, as he called Frosya. Paying no further attention to us, he shook her by the hand, and then making a few rapid passes stretched out her arm and stiffened it. The arm as rigid as iron, remained in that position. He then closed all her fingers but one — the middle finger — which he caused to point at the evening star, which twinkled in the deep blue sky. Then he turned round and went over from right to left, throwing on some of his fluids here, again discharging them at another place; busying himself with his invisible but potent fluids, like a painter with his brush when giving the last touches to a picture.

Nightmare Tales

The old lady, who had silently watched him, with her chin in her hand the while, put her thin, skeleton-looking hands on his arm and arrested it, as he was preparing himself to begin the regular mesmeric passes.

"Wait," she whispered, "till the star is set and the ninth hour completed. The Vourdalaki are hovering round; they may spoil the influence."

"What does she say?" enquired the mesmerizer, annoyed at her interference.

I explained to him that the old lady feared the pernicious influences of the Vourdalaki.

"Vourdalaki! What's that — the Vourdalaki?" exclaimed the Frenchman. "Let us be satisfied with Christian spirits, if they honour us to-night with a visit, and lose no time for the Vourdalaki!"

I glanced at the Gospoja. She had become deathly pale and her brow was sternly knitted over her flashing black eyes.

"Tell him not to jest at this hour of the night!" she cried. "He does not know the country. Even this holy church may fail to protect us once the Vourdalaki are roused. What's this?" pushing with her foot a bundle of herbs the botanizing mesmerizer had laid near on the grass. She bent over the collection and anxiously examined the contents of the bundle, after which she flung the whole into the water.

"It must not be left here," she firmly added; "these are the St. John's plants, and they might attract the wandering ones."

Meanwhile the night had come, and the moon illuminated the landscape with a pale, ghostly light. The nights in the Banat are nearly as beautiful as in the East, and the Frenchman had to go on with his experiments in the open air, as the priest of the church had prohibited such in the tower, which was used as the parsonage, for fear of filling the holy precincts with the heretical devils of the mesmerizer, which, the priest remarked, he would be unable to exorcise on account of their being foreigners.

The old gentleman had thrown off his travelling blouse, rolled up his shirt sleeves, and now, striking a theatrical attitude, began a regular process of mesmerization.

Under his quivering fingers the odile fluid actually seemed to flash in the twilight. Frosya was placed with her figure facing the moon, and every motion of the entranced girl was discernible as in daylight. In a few minutes large drops of perspiration appeared on her brow, and slowly rolled down her pale face, glittering in the moonbeams. Then she moved uneasily about and began chanting a low melody, to the words of which the Gospoja, anxiously bent over the unconscious girl, was listening with avidity and trying to catch every syllable. With her thin finger on her lips, her eyes nearly starting from their sockets, her frame motionless, the old lady seemed herself transfixed into a statue of attention. The group was a remarkable one, and I regretted that I was not a painter. What followed was a scene worthy to figure in *Macbeth*. At one side she, the slender girl, pale and corpse-like, writhing under the invisible fluid of him who for the hour was her omnipotent master; at the other the old matron, who, burning with her unquenched fire of revenge, stood waiting for the long-expected name of the Prince's murderer to be at last pronounced. The Frenchman himself seemed transfigured, his grey hair standing on end; his bulky clumsy form seemed to have grown in a few minutes. All theatrical pretence was now gone; there remained but the mesmerizer, aware of his responsibility, unconscious himself of the possible results, studying and anxiously expecting. Suddenly Frosya, as if lifted by some supernatural force, rose from her reclining posture and stood erect before us, again motionless and still, waiting for the magnetic fluid to direct her. The Frenchman, silently taking the old lady's hand, placed it in that of the somnambulist, and ordered her to put herself *en rapport* with the Gospoja.

Nightmare Tales

"What seest thou, my daughter?" softly murmured the Serbian Lady. "Can your spirit seek out the murderers?"

"Search and behold!" sternly commanded the mesmerizer, fixing his gaze upon the face of the subject.

"I am on my way — I go," faintly whispered Frosya, her voice seeming not to come from herself, but from the surrounding atmosphere.

At this moment something so strange took place that I doubt my ability to describe it. A luminous vapour appeared, closely surrounding the girl's body. At first about an inch in thickness, it gradually expanded, and, gathering itself, suddenly seemed to break off from the body altogether and condense itself into a kind of semisolid vapour, which very soon assumed the likeness of the somnambule herself. Flickering about the surface of the earth the form vacillated for two or three seconds, then glided noiselessly toward the river. It disappeared like a mist, dissolved in the moonbeams, which seemed to absorb it altogether.

I had followed the scene with an intense attention. The mysterious operation, known in the East as the evocation of the scin-lecca, was taking place before my own eyes. To doubt was impossible, and Dupotet was right in saying that mesmerism is the conscious Magic of the ancients, and Spiritualism the unconscious effect of the same Magic upon certain organisms.

As soon as the vaporous double had smoked itself through the pores of the girl, Gospoja had, by a rapid motion of the hand which was left free, drawn from under her pelisse something which looked to us suspiciously like a small stiletto, and placed it as rapidly in the girl's bosom. The action was so quick that the mesmerizer, absorbed in his work, had not remarked it, as he afterwards told me. A few minutes elapsed in a dead silence. We seemed a group of petrified persons. Suddenly a thrilling and transpiercing cry burst from the entranced girl's lips, she bent forward, and snatching the stiletto from her bosom, plunged it furiously round her, in the air, as if pursuing imaginary foes. Her mouth foamed, and incoherent, wild exclamations broke from her lips, among which discordant sounds I discerned, several times two familiar Christian names of men. The mesmerizer was so terrified that he lost all control over himself, and instead of withdrawing the fluid he loaded the girl with it still more.

"Take care," exclaimed I. "Stop! You will kill her, or she will kill you!"

But the Frenchman had unwittingly raised subtle potencies of Nature over which he had no control. Furiously turning round, the girl struck at him a blow which would have killed him had he not avoided it by jumping aside, receiving but a severe scratch on the right arm. The poor man was panic-stricken; climbing with an extraordinary agility, for a man of his bulky form, on the wall over her, he fixed himself on it astride, and gathering the remnants of his will power, sent in her direction a series of passes. At the second, the girl dropped the weapon and remained motionless.

"What are you about?" hoarsely shouted the mesmerizer in French, seated like some monstrous night-goblin on the wall. "Answer me, I command you!"

"I did . . . but what she . . . whom you ordered me to obey . . . commanded me to do," answered the girl in French, to my amazement.

"What did the old witch command you?" irreverently asked he.

"To find them . . . who murdered . . . kill them . . . I did so . . . and they are no more . . . Avenged! . . . Avenged! They are . . ."

An exclamation of triumph, a loud shout of infernal joy, rang loud in the air, and awakening the dogs of the neighbouring villages a responsive howl of barking began from that moment, like a ceaseless echo of the Gospoja's cry:

"I am avenged! I feel it; I know it. My warning heart tells me that the fiends are no more." She fell panting on the ground, dragging down, in her fall, the girl, who allowed herself to be pulled down as if she were a bag of wool.

"I hope my subject did no further mischief to-night. She is a dangerous as well as a very wonderful subject," said the Frenchman.

We parted. Three days after that I was at T——, and as I was sitting in the dining-room of a restaurant, waiting for my lunch, I happened to pick up a newspaper, and the first lines I read ran thus:

VIENNA, 186—. Two Mysterious Deaths.

Last evening, at 9:45, as P—— was about to retire, two of the gentlemen-in-waiting suddenly exhibited great terror, as though they had seen a dreadful apparition. They screamed, staggered, and ran about the room, holding up their hands as if to ward off the blows of an unseen weapon. They paid no attention to the eager questions of the prince and suite, but presently fell writhing upon the floor, and expired in great agony. Their bodies exhibited no appearance of apoplexy, nor any external marks of wounds, but, wonderful to relate, there were numerous dark spots and long marks upon the skin, as though they were stabs and slashes made without puncturing the cuticle. The autopsy revealed the fact that beneath each of these mysterious discolourations there was a deposit of coagulated blood. The greatest excitement prevails, and the faculty are unable to solve the mystery.

AN UNSOLVED MYSTERY

The circumstances attending the sudden death of M. Delessert, inspector of the *Police de Surete*, seem to have made such an impression upon the Parisian authorities that they were recorded in unusual detail. Omitting all particulars except what are necessary to explain matters, we produce here the undoubtedly strange history.

In the fall of 1861 there came to Paris a man who called himself Vic de Lassa, and was so inscribed upon his passports. He came from Vienna, and said he was a Hungarian, who owned estates on the borders of the Banat, not far from Zenta. He was a small man, aged thirty-five, with pale and mysterious face, long blonde hair, a vague, wandering blue eye, and a mouth of singular firmness. He dressed carelessly and unaffectedly, and spoke and talked without much *empressement*. His companion, presumably his wife, on the other hand, ten years younger than himself, was a strikingly beautiful woman, of that dark, rich, velvety, luscious, pure Hungarian type which is so nigh akin to the gipsy blood. At the theatres, on the Bois, at the cafes, on the boulevards, and everywhere that idle Paris disports itself, Madame Aimee de Lassa attracted great attention and made a sensation.

They lodged in luxurious apartments on the Rue Richelieu, frequented the best places, received good company, entertained handsomely, and acted in every way as if possessed of considerable wealth. Lassa had always a good balance *chez* Schneider, Ruter et Cie, the Austrian bankers in Rue Rivoli, and wore diamonds of conspicuous lustre.

Nightmare Tales

How did it happen then, that the Prefect of Police saw fit to suspect Monsieur and Madame de Lassa, and detailed Paul Delessert, one of the most *ruse* inspectors of the force, to "pipe" him? The fact is, the insignificant man with the splendid wife was a very mysterious personage, and it is the habit of the police to imagine that mystery always hides either the conspirator, the adventurer, or the charlatan. The conclusion to which the Prefect had come in regard to M. de Lassa was that he was an adventurer and charlatan too. Certainly a successful one, then, for he was singularly unobtrusive and had in no way trumpeted the wonders which it was his mission to perform, yet in a few weeks after he had established himself in Paris the *salon* of M. de Lassa was the rage, and the number of persons who paid the fee of 100 francs for a single peep into his magic crystal, and a single message by his spiritual telegraph, was really astonishing. The secret of this was that M. de Lassa was a conjurer and deceiver, whose pretensions were omniscient and whose predictions always came true.

Delessert did not find it very difficult to get an introduction and admission to De Lassa's *salon*. The receptions occurred every other day — two hours in the forenoon, three hours in the evening. It was evening when Inspector Delessert called in his assumed character of M. Flabry, *virtuoso* in jewels and a convert to Spiritualism. He found the handsome parlours brilliantly lighted, and a charming assemblage gathered of well-pleased guests, who did not at all seem to have come to learn their fortunes or fates, while contributing to the income of their host, but rather to be there out of complaisance to his virtues and gifts.

Mme. de Lassa performed upon the piano or conversed from group to group in a way that seemed to be delightful, while M. de Lassa walked about or sat in his insignificant, unconcerned way, saying a word now and then, but seeming to shun everything that was conspicuous. Servants handed about refreshments, ices, cordials, wines, etc., and Delessert could have fancied himself to have dropped in upon a quite modest evening entertainment, altogether *en regle*, but for one or two noticeable circumstances which his observant eyes quickly took in.

Except when their host or hostess was within hearing the guests conversed together in low tones, rather mysteriously, and with not quite so much laughter as is usual on such occasions. At intervals a very tall and dignified footman would come to a guest, and, with a profound bow, present him a card on a silver salver. The guest would then go out, preceded by the solemn servant, but when he or she returned to the *salon* — some did not return at all — they invariably wore a dazed or puzzled look, were confused, astonished, frightened, or amused. All this was so unmistakably genuine, and De Lassa and his wife seemed so unconcerned amidst it all, not to say distinct from it all, that Delessert could not avoid being forcibly struck and considerably puzzled.

Two or three little incidents, which came under Delessert's own immediate observation, will suffice to make plain the character of the impressions made upon those present. A couple of gentlemen, both young, both of good social condition, and evidently very intimate friends, were conversing together and *tutoying* one another at a great rate, when the dignified footman summoned Alphonse. He laughed gaily, "Tarry a moment, *cher* Auguste," said he, "and thou shalt know all the particulars of this wonderful fortune!" "*Eh bien!*" A minute had scarcely elapsed when Alphonse returned to the *salon*. His face was white and bore an appearance of concentrated rage that was frightful to witness. He came straight to Auguste, his eyes flashing, and bending his face toward his friend, who changed colour and recoiled, he hissed out "Monsieur Lefebure, *vous etes un lache!*" "Very well, Monsieur Meunier," responded Auguste, in the same low tone, "tomorrow morning at six o'clock!" "It is settled, false friend, execrable traitor!" "*A la mort!*" rejoined Alphonse, walking off. "*Cela va sans dire!*" muttered Auguste, going towards the hat-room.

A diplomatist of distinction, representative at Paris of a neighbouring state, an elderly gentleman of superb *aplomb* and most commanding appearance, was summoned to the oracle by the bowing footman. After being absent about five minutes he returned, and immediately made his way through the press to M. de Lassa, who was standing not far from the fireplace, with his hands in his pockets and a look of utmost indifference upon

his face.

Delessert standing near, watched the interview with eager interest.

"I am exceedingly sorry," said General Von —, "to have to absent myself so soon from your interesting *salon*, M. de Lassa, but the result of my seance convinces me that my dispatches have been tampered with." "I am sorry," responded M. de Lassa, with an air of languid but courteous interest; "I hope you may be able to discover which of your servants has been unfaithful." "I am going to do that now," said the General, adding, in significant tones, "I shall see that both he and his accomplices do not escape severe punishment." "That is the only course to pursue, Monsieur le Comte." The ambassador stared, bowed, and took his leave with a bewilderment in his face that was beyond the power of his tact to control.

In the course of the evening M. de Lassa went carelessly to the piano, and, after some indifferent vague preluding, played a remarkably effective piece of music, in which the turbulent life and buoyancy of bacchanalian strains melted gently, almost imperceptibly away, into a sobbing wail of regret, and languor, and weariness, and despair. It was beautifully rendered, and made a great impression upon the guests, one of whom, a lady, cried, "How lovely, how sad! Did you compose that yourself, M. de Lassa?" He looked towards her absently for an instant, then replied: "I? Oh, no! That is merely a reminiscence, madame." "Do you know who did compose it, M. de Lassa?" enquired a *virtuoso* present. "I believe it was originally written by Ptolemy Auletes, the father of Cleopatra," said M. de Lassa, in his indifferent musing way; "but not in its present form. It has been twice re-written to my knowledge; still, the air is substantially the same." "From whom did you get it, M. de Lassa, if I may ask?" persisted the gentleman. "Certainly, certainly! The last time I heard it played was by Sebastian Bach; but that was Palestrina's — the present — version. I think I prefer that of Guido of Arezzo — it is ruder, but has more force. I got the air from Guido himself." "You — from — Guido!" cried the astonished gentleman. "Yes, monsieur," answered De Lassa, rising from the piano with his usual indifferent air. "*Mon Dieu* cried the *virtuoso*, putting his hand to his head after the manner of Mr. Twemlow, "*Mon Dieu!* that was in Anno Domini 1022." "A little later than that — July, 1031, if I remember rightly," courteously corrected M. de Lassa.

At this moment the tall footman bowed before M. Delessert, and presented the salver containing the card. Delessert took it and read: "On vous accorde trente-cing *secondes*, M. Flabry, *tout au plus* !" Delessert followed; the footman opened the door of another room and bowed again, signifying that Delessert was to enter. "Ask no questions," he said briefly; "Sidi is mute." Delessert entered the room and the door closed behind him. It was a small room, with a strong smell of frankincense pervading it; the walls were covered completely with red hangings that concealed the windows, and the floor was felted with a thick carpet. Opposite the door, at the upper end of the room near the ceiling was the face of a large clock, under it, each lighted by tall wax candles, were two small tables, containing, the one an apparatus very like the common registering telegraph instrument, the other a crystal globe about twenty inches in diameter, set upon an exquisitely wrought tripod of gold and bronze intermingled. By the side of the door stood a man jet black in colour, wearing a white turban and burnous, and having a sort of wand of silver in one hand. With the other he took Delessert by the right arm above the elbow, and led him quickly up the room. He pointed to the clock, and it struck an alarum; he pointed to the crystal. Delessert bent over, looked into it, and saw — a facsimile of his own sleeping-room, everything photographed exactly. Sidi did not give him time to exclaim, but still holding him by the arm, took him to the other table. The telegraph-like instrument began to click-click. Sidi opened the drawer, drew out a slip of paper, crammed it into Delessert's hand, and pointed to the clock, which struck again, The thirty-five seconds were expired. Sidi, still retaining hold of Delessert's arm, pointed to the door and led him towards it. The door opened, Sidi pushed him out, the door closed, the tall footman stood there bowing — the interview with the oracle is over. Delessert glanced at the piece of paper in his hand. It was a printed scrap, capital letters, and read simply: "To M. Paul Delessert: The policeman is always welcome, the spy is always in danger!"

Nightmare Tales

Delessert was dumbfounded a moment to find his disguise detected, but the words of the tall footman, "This way if you please, M. Flabry," brought him to his senses. Setting his lips, he returned to the *salon*, and without delay sought M. de Lassa. "Do you know the contents of this?" asked he, showing the message. "I know everything, M. Delessert," answered De Lassa, in his careless way. "Then perhaps you are aware that I mean to expose a charlatan, and unmask a hypocrite, or perish in the attempt?" said Delessert. "*Cela m'est egal, monsieur*," replied De Lassa. "You accept my challenge then?" "Oh! it is a defiance, then?" replied De Lassa, letting his eye rest a moment upon Delessert, "*mais oui, je l'accepte!*" And thereupon Delessert departed.

Delessert now set to work aided by all the forces the Prefect of Police could bring to bear, to detect and expose this consummate sorcerer, who the ruder processes of our ancestors would easily have disposed of — by combustion. Persistent enquiry satisfied Delessert that the man was neither a Hungarian nor was named De Lassa; that no matter how far back his power of "reminiscence" might extend, in his present and immediate form he had been born in this unregenerate world in the toy-making city of Nuremburg; that he was noted in boyhood for his great turn for ingenious manufactures, but was very wild, and a *mauvais sujet*. In his sixteenth year he escaped to Geneva and apprenticed himself to a maker of watches and instruments. Here he had been seen by the celebrated Robert Houdin, the *prestidigitateur*. Houdin recognizing the lad's talents, and being himself a maker of ingenious automata, had taken him off to Paris and employed him in his own workshops, as well as for an assistant in the public performances of his amusing and curious *diablerie*. After staying with Houdin some years, Plock Haslich (which was De Lassa's right name) had gone East in the suite of a Turkish Pasha, and after many years' roving, in lands where he could not be traced under a cloud of pseudonyms, had finally turned up in Venice, and come thence to Paris.

Delessert next turned his attention to Mme. de Lassa. It was more difficult to get a clue by means of which to know her past life; but it was necessary in order to understand enough about Haslich. At last, through an accident, it became probable that Mme. Aimee was identical with a certain Mme. Schlaff, who had been rather conspicuous among the demi-monde of Buda. Delessert posted off to that ancient city, and thence went into the wilds of Transylvania to Mengyco. On his return, as soon as he reached the telegraph and civilization, he telegraphed the Prefect from Kardszag: "Don't lose sight of my man, nor let him leave Paris. I will run him in for you two days after I get back."

It happened that on the day of Delessert's return to Paris the Prefect was absent, being with the Emperor at Cherbourg. He came back on the fourth day, just twenty-four hours after the announcement of Delessert's death. That happened, as near as could be gathered, in this wise: The night after Delessert's return he was present at De Lassa's *salon* with a ticket of admittance to a *seance*. He was very completely disguised as a decrepit old man, and fancied that it was impossible for any one to detect him. Nevertheless, when he was taken into the room, and looked into the crystal, he was utterly horror-stricken to see there a picture of himself, lying face down and senseless upon the side-walk of a street; and the message he received read thus: "What you have seen will be, Delessert, in three days. Prepare!" The detective, unspeakably shocked, retired from the house at once and sought his own lodgings.

In the morning he came to the office in a state of extreme dejection. He was completely unnerved. In relating to a brother inspector what had occurred, he said "That man can do what he promises, I am doomed!"

He said that he thought he could make a complete case out against Haslich *alias* De Lassa, but could not do so without seeing the Prefect and getting instructions. He would tell nothing in regard to his discoveries in Buda and in Transylvania — said he was not at liberty to do so — and repeatedly exclaimed: "Oh! if M. le Prefect were only here!" He was told to go to the Prefect at Cherbourg, but refused upon the ground that his presence was needed in Paris. He time and again averred his conviction that he was a doomed man, and showed himself both vacillating and irresolute in his conduct, and extremely nervous. He was told that he was perfectly safe, since De Lassa and all his household were under constant surveillance; to which he replied,

Nightmare Tales

"You do not know the man." An inspector was detailed to accompany Delessert, never to lose sight of him night and day, and guard him carefully; and proper precautions were taken in regard to his food and drink, while the guards watching De Lassa were doubled.

On the morning of the third day, Delessert, who had been staying chiefly indoors, avowed his determination to go at once and telegraph to M. le Prefect to return immediately. With this intention he and his brother officer started out. Just as they got to the corner of the Rue de Lanery and the Boulevard, Delessert stopped suddenly and put his hand to his forehead.

"My God!" he cried, "the crystal! the picture!" and fell prone upon his face, insensible. He was taken at once to a hospital, but only lingered a few hours, never regaining his consciousness. Under express instruction from the authorities, a most careful, minute, and thorough autopsy was made of Delessert's body by several distinguished surgeons, whose unanimous opinion was, that the cause of his death was apoplexy, due to fatigue and nervous excitement.

As soon as Delessert was sent to the hospital, his brother inspector hurried to the Central Office, and De Lassa, together with his wife and everyone connected with the establishment, were at once arrested. De Lassa smiled contemptuously as they took him away. "I knew you were coming; I prepared for it; you will be glad to release me again."

It was quite true that De Lassa had prepared for them. When the house was searched it was found that every paper had been burned, the crystal globe was destroyed, and in the room of the *seances* was a great heap of delicate machinery broken into indistinguishable bits. "That cost me 200,000 francs," said De Lassa, pointing to the pile, "but it has been a good investment." The walls and floors were ripped out in several places, and the damage to the property was considerable. In prison neither De Lassa nor his associates made any revelations. The notion that they had something to do with Delessert's death was quickly dispelled, in a legal point of view, and all the party but De Lassa were released. He was still detained in prison, upon one pretext, or another, when one morning he was found hanging by a silk sash to the cornice of the room where he was confined — dead. The night before, it was afterwards discovered, Madame de Lassa had eloped with a tall footman, taking the Nubian Sidi with them. De Lassa's secrets died with him.

"It is an interesting story, that article of yours in to-day's *Scientist*. But is it a record of facts, or a tissue of the imagination? If true, why not state the source of it, in other words, specify your authority for it."

The above is not signed, but we would take the opportunity to say that the story, "An Unsolved Mystery," was published because we considered the main points of the narrative — the prophecies, and the singular death of the officer — to be psychic phenomena, that have been, and can be, again produced. Why quote "authorities"? The Scriptures tell us of the death of Ananias, under the stern rebuke from Peter; here we have a phenomenon of a similar nature. Ananias is supposed to have suffered instant death from fear. Few can realize this power governed by spiritual laws, but those who have trod the boundary line and know some few of the things that can be done, will see no great mystery in this, nor in the story published last week. We are not speaking in mystical tones. Ask the powerful mesmerist if there is danger that the subject may pass out of his control? — if he could will the spirit out, never to return? It is capable of demonstration that the mesmerist can act on a subject at a distance of many miles; and it is no less certain that, the majority of mesmerists know little or nothing of the laws that govern their powers.

It may be a pleasant dream to attempt to conceive of the beauties of the spirit-world; but the time can be spent more profitably in a study of the spirit itself, and it is not necessary that the subject for study should be in the spirit-world.

KARMIC VISIONS

By H. P. Blavatsky, under the pen name "Sanjna"

Oh, sad no more! Oh, sweet *No more!*
Oh, strange *No more!*
By a mossed brook bank on a stone
I smelt a wild weed—flower alone;
There was a ringing in my ears,
And both my eyes gushed out with tears,
Surely all pleasant things had gone before,
Low buried fathom deep beneath with three, NO MORE. — Tennyson "*The Gem*" 1831.

I

A camp filled with war—chariots, neighing horses and legions of long—haired soldiers . . .

A regal tent, gaudy in its barbaric splendour. Its linen walls are weighed down under the burden of arms. In its centre a raised seat covered with skins, and on it a stalwart, savage—looking warrior. He passes in review prisoners of war brought in turn before him, who are disposed of according to the whim of the heartless despot.

A new captive is now before him, and is addressing him with passionate earnestness . . . As he listens to her with suppressed passion in his manly, but fierce, cruel face, the balls of his eyes become bloodshot and roll with fury. And as he bends forward with fierce stare, his whole appearance — his matted locks hanging over the frowning brow, his big—boned body with strong sinews, and the two large hands resting on the shield placed upon the right knee — justifies the remark made in hardly audible whisper by a grey—headed soldier to his neighbour:

"Little mercy shall the holy prophetess receive at the hands of Clovis!"

The captive, who stands between two Burgundian warriors, facing the ex—prince of the Salians, now king of all the Franks, is an old woman with silver—white dishevelled hair, hanging over her skeleton—like shoulders. In spite of her great age, her tall figure is erect; and the inspired black eyes look proudly and fearlessly into the cruel face of the treacherous son of Gilderich.

"Aye, King," she says, in a loud, ringing voice. "Aye, thou art great and mighty now, but thy days are numbered, and thou shalt reign but three summers longer. Wicked thou wert born . . . perfidious thou art to thy friends and allies, robbing more than one of his lawful crown. Murderer of thy next—of—kin, thou who addest to the knife and spear in open warfare, dagger, poison and treason, beware how thou dearest with the servant of Nerthus!"*

* "*The Nourishing*" (Tacit. Germ. XI) — the Earth, a Mother—Goddess, the most beneficent deity of the ancient Germans.

"Ha, ha, ha! . . . old hag of Hell!" chuckles the King, with an evil, ominous sneer. "Thou hast crawled out of the entrails of thy mother—goddess truly. Thou fearest not my wrath? It is well. But little need I fear thine empty imprecations . . . I, a baptized Christian!"

Nightmare Tales

"So, so," replies the Sybil. "All know that Clovis has abandoned the gods of his fathers; that he has lost all faith in the warning voice of the white horse of the Sun, and that out of fear of the Allimani he went serving on his knees Remigius, the servant of the Nazarene, at Rheims. But hast thou become any truer in thy new faith? Hast thou not murdered in cold blood all thy brethren who trusted in thee, after, as well as before, thy apostasy? Hast thou not plighted troth to Alaric, the King of the West Goths, and hast thou not killed him by stealth, running thy spear into his back while he was bravely fighting an enemy? And is it thy new faith and thy new gods that teach thee to be devising in thy black soul even now foul means against Theodoric, who put thee down? . . . Beware, Clovis, beware! For now the gods of thy fathers have risen against thee! Beware, I say, for . . ."

"Woman!" fiercely cries the King — "Woman, cease thy insane talk and answer my question. Where is the treasure of the grove amassed by thy priests of Satan, and hidden after they had been driven away by the Holy Cross? . . . Thou alone knowest. Answer, or by Heaven and Hell I shall thrust thy evil tongue down thy throat for ever!" . . .

She heeds not the threat, but goes on calmly and fearlessly as before, as if she had not heard.

The gods say, Clovis, thou art accursed Clovis, thou shalt be reborn among thy present enemies, and suffer the tortures thou hast inflicted upon thy victims. All the combined power and glory thou hast deprived them of shall be thine in prospect, yet thou shalt never reach it! . . . Thou shalt . . ."

The prophetess never finishes her sentence.

With a terrible oath the King, crouching like a wild beast on his skin-covered seat, pounces upon her with the leap of a jaguar, and with one blow fells her to the ground. And as he lifts his sharp murderous spear the "Holy One" of the Sun-worshipping tribe makes the air ring with a last imprecation.

"I curse thee, enemy of Nerthus! May my agony be tenfold thine! . . . May the Great Law avenge. . . .

The heavy spear falls, and, running through the victim's throat, nails the head to the ground. A stream of hot crimson blood gushes from the gaping wound and covers king and soldiers with indelible gore . . .

II

Time — the landmark of gods and men in the boundless field of Eternity, the murderer of its offspring and of memory in mankind — time moves on with noiseless, incessant step through aeons and ages . . . Among millions of other Souls, a Soul-Ego is reborn: for weal or for woe, who knoweth! Captive in its new human Form, it grows with it, and together they become, at last, conscious of their existence.

Happy are the years of their blooming youth, unclouded with want or sorrow. Neither knows aught of the Past nor of the Future. For them all is the joyful Present: for the Soul-Ego is unaware that it had ever lived in other human tabernacles, it knows not that it shall be again reborn, and it takes no thought of the morrow.

Its Form is calm and content. It has hitherto given its Soul-Ego no heavy troubles. Its happiness is due to the continuous mild serenity of its temper, to the affection it spreads wherever it goes. For it is a noble Form, and its heart is full of benevolence. Never has the Form startled its Soul-Ego with a too-violent shock, or otherwise disturbed the calm placidity of its tenant.

Two score of years glide by like one short pilgrimage; a long walk through the sun-lit paths of life, hedged by ever-blooming roses with no thorns. The rare sorrows that befall the twin pair, Form and Soul, appear to

Nightmare Tales

them rather like the pale light of the cold northern moon, whose beams throw into a deeper shadow all around the moon-lit objects, than as the blackness of the night, the night of hopeless sorrow and despair.

Son of a Prince, born to rule himself one day his father's kingdom; surrounded from his cradle by reverence and honours; deserving of the universal respect and sure of the love of all -- what could the Soul-Ego desire more for the Form it dwelt in.

And so the Soul-Ego goes on enjoying existence in its tower of strength, gazing quietly at the panorama of life ever changing before its two windows -- the two kind blue eyes of a loving and good man.

III

One day an arrogant and boisterous enemy threatens the father's kingdom, and the savage instincts of the warrior of old awaken in the Soul-Ego. It leaves its dreamland amid the blossoms of life and causes its Ego of clay to draw the soldier's blade, assuring him it is in defence of his country.

Prompting each other to action, they defeat the enemy and cover themselves with glory and pride. They make the haughty foe bite the dust at their feet in supreme humiliation. For this they are crowned by history with the unfading laurels of valour, which are those of success. They make a footstool of the fallen enemy and transform their sire's little kingdom into a great empire. Satisfied they could achieve no more for the present, they return to seclusion and to the dreamland of their sweet home.

For three lustra more the Soul-Ego sits at its usual post, beaming out of its windows on the world around. Over its head the sky is blue and the vast horizons are covered with those seemingly unfading flowers that grow in the sunlight of health and strength. All looks fair as a verdant mead in spring . . .

IV

But an evil day comes to all in the drama of being. It waits through the life of king and of beggar. It leaves traces on the history of every mortal born from woman, and it can neither be seared away, entreated, nor propitiated. Health is a dewdrop that falls from the heavens to vivify the blossoms on earth, only during the morn'. of life, its spring and summer . . . It has but a short duration and returns from whence it came -- the invisible realms.

How oft'neath the bud that is brightest and fairest,
The seeds of the canker in embryo lurk!
How oft at the root of the flower that is rarest --
Secure in its ambush the worm is at work."

The running sand which moves downward in the glass, wherein the hours of human life are numbered, runs swifter. The worm has gnawed the blossom of health through its heart. The strong body is found stretched one day on the thorny bed of pain.

The Soul-Ego beams no longer. It sits still and looks sadly out of what has become its dungeon windows, on the world which is now rapidly being shrouded for it in the funeral palls of suffering. Is it the eve of night eternal which is nearing?

V

Beautiful are the resorts on the midland sea. An endless line of surf-beaten, black, rugged rocks stretches, hemmed in between the golden sands of the coast and the deep blue waters of the gulf. They offer their granite breast to the fierce blows of the north-west wind and thus protect the dwellings of the rich that nestle at their foot on the inland side. The half-ruined cottages on the open shore are the insufficient shelter of the poor. Their squalid bodies are often crushed under the walls torn and washed down by wind and angry wave. But they only follow the great law of the survival of the fittest. Why should *they* be protected?

Lovely is the morning when the sun dawns with golden amber tints and its first rays kiss the cliffs of the beautiful shore. Glad is the song of the lark, as, emerging from its warm nest of herbs, it drinks the morning dew from the deep flower-cups; when the tip of the rosebud thrills under the caress of the first sunbeam, and earth and heaven smile in mutual greeting. Sad is the Soul-Ego alone as it gazes on awakening nature from the high couch opposite the large bay-window.

How calm is the approaching noon as the shadow creeps steadily on the sundial towards the hour of rest! Now the hot sun begins to melt the clouds in the limpid air and the last shreds of the morning mist that lingers on the tops of the distant hills vanish in it. All nature is prepared to rest at the hot and lazy hour of midday. The feathered tribes cease their song; their soft, gaudy wings droop and they hang their drowsy heads, seeking refuge from the burning heat. A morning lark is busy nestling in the bordering bushes under the clustering flowers of the pomegranate and the sweet bay of the Mediterranean. The active songster has become voiceless.

"Its voice will resound as joyfully again tomorrow!" sighs the Soul-Ego, as it listens to the dying buzzing of the insects on the verdant turf. "Shall ever mine?"

And now the flower-scented breeze hardly stirs the languid heads of the luxuriant plants. A solitary palm-tree, growing out of the cleft of a moss-covered rock, next catches the eye of the Soul-Ego. Its once upright, cylindrical trunk has been twisted out of shape and half-broken by the nightly blasts of the north-west winds. And as it stretches wearily its drooping feathery arms, swayed to and fro in the blue pellucid air, its body trembles and threatens to break in two at the first new gust that may arise.

"And then, the severed part will fall into the sea, and the once stately palm will be no more," soliloquizes the Soul-Ego as it gazes sadly out of its windows.

Everything returns to life, in the cool, old bower at the hour of sunset. The shadows on the sun-dial become with every moment thicker, and animate nature awakens busier than ever in the cooler hours of approaching night. Birds and insects chirrup and buzz their last evening hymns around the tall and still powerful Form, as it paces slowly and wearily along the gravel walk. And now its heavy gaze falls wistfully on the azure bosom of the tranquil sea. The gulf sparkles like a gem-studded carpet of blue-velvet in the farewell dancing sunbeams, and smiles like a thoughtless, drowsy child, weary of tossing about. Further on, calm and serene in its perfidious beauty, the open sea stretches far and wide the smooth mirror of its cool waters — salt and bitter as human tears. It lies in its treacherous repose like a gorgeous, sleeping monster, watching over the unfathomed mystery of its dark abysses. Truly the monumentless cemetery of the millions sunk in its depths . . .

"Without a grave,
Unknell'd, uncoffined and unknown . . ."

while the sorry relic of the once noble Form pacing yonder, once that its hour strikes and the deep-voiced

Nightmare Tales

bells toll the knell for the departed soul, shall be laid out in state and pomp. Its dissolution will be announced by millions of trumpet voices. Kings, princes and the mighty ones of the earth will be present at its obsequies, or will send their representatives with sorrowful faces and condoling messages to those left behind . . .

"One point gained, over those 'uncoffined and unknown'," is the bitter reflection of the Soul-Ego.

Thus glides past one day after the other; and as swift-winged Time urges his flight, every vanishing hour destroying some thread in the tissue of life, the Soul-Ego is gradually transformed in its views of things and men. Flitting between two eternities, far away from its birthplace, solitary among its crowd of physicians, and attendants, the Form is drawn with every day nearer to its Spirit-Soul. Another light unapproached and unapproachable in days of joy, softly descends upon the weary prisoner. It sees now that which it had never perceived before. . . .

VI

How grand, how mysterious are the spring nights on the seashore when the winds are chained and the elements lulled! A solemn silence reigns in nature. Alone the silvery, scarcely audible ripple of the wave, as it runs caressingly over the moist sand, kissing shells and pebbles on its up and down journey, reaches the ear like the regular soft breathing of a sleeping bosom. How small, how insignificant and helpless feels man, during these quiet hours, as he stands between the two gigantic magnitudes, the star-hung dome above, and the slumbering earth below. Heaven and earth are plunged in sleep, but their souls are awake, and they confabulate, whispering one to the other mysteries unspeakable. It is then that the occult side of Nature lifts her dark veils for us, and reveals secrets we would vainly seek to extort from her during the day. The firmament, so distant, so far away from earth, now seems to approach and bend over her. The sidereal meadows exchange embraces with their more humble sisters of the earth — the daisy-decked valleys and the green slumbering fields. The heavenly dome falls prostrate into the arms of the great quiet sea; and the millions of stars that stud the former peep into and bathe in every lakelet and pool. To the grief-furrowed soul those twinkling orbs are the eyes of angels. They look down with ineffable pity on the suffering of mankind. It is not the night dew that falls on the sleeping flowers, but sympathetic tears that drop from those orbs, at the sight of the GREAT HUMAN SORROW . . .

Yes; sweet and beautiful is a southern night. But —

"When silently we watch the bed, by the taper is flickering light,
When all we love is fading fast — how terrible is night. . . ."

VII

Another day is added to the series of buried days. The far green hills, and the fragrant boughs of the pomegranate blossom have melted in the mellow shadows of the night, and both sorrow and joy are plunged in the lethargy of soul-resting sleep. Every noise has died out in the royal gardens, and no voice or sound is heard in that overpowering stillness.

Swift-winged dreams descend from the laughing stars in motley crowds, and landing upon the earth disperse among mortals and immortals, amid animals and men. They hover over the sleepers, each attracted by its affinity and kind; dreams of joy and hope, balmy and innocent visions, terrible and awesome sights seen with sealed eyes, sensed by the soul; some instilling happiness and consolation, others causing sobs to heave the sleeping bosoms, tears and mental torture, all and one preparing unconsciously to the sleepers their waking thoughts of the morrow.

Nightmare Tales

Even in sleep the Soul–Ego finds no rest.

Hot and feverish its body tosses about in restless agony. For it, the time of happy dreams is now a vanished shadow, a long bygone recollection. Through the mental agony of the soul, there lies a transformed man. Through the physical agony of the frame, there flutters in it a fully awakened Soul. The veil of illusion has fallen off from the cold idols of the world, and the vanities and emptiness of fame and wealth stand bare, often hideous, before its eyes. The thoughts of the Soul fall like dark shadows on the cogitative faculties of the fast disorganizing body, haunting the thinker daily, nightly, hourly . . .

The sight of his snorting steed pleases him no longer. The recollections of guns and banners wrested from the enemy; of cities razed, of trenches, cannons and tents, of an array of conquered spoils now stirs but little his national pride. Such thoughts move him no more, and ambition has become powerless to awaken in his aching heart the haughty recognition of any valorous deed of chivalry. Visions of another kind now haunt his weary days and long sleepless nights . . .

What he now sees is a throng of bayonets clashing against each other in a mist of smoke and blood; thousands of mangled corpses covering the ground, torn and cut to shreds by the murderous weapons devised by science and civilization, blessed to success by the servants of his God. What he now dreams of are bleeding, wounded and dying men, with missing limbs and matted locks, wet and soaked through with gore . . .

VIII

A hideous dream detaches itself from a group of passing visions, and alights heavily on his aching chest. The nightmare shows him men expiring on the battlefield with a curse on those who led them to their destruction. Every pang in his own wasting body brings to him in dream the recollection of pangs still worse, of pangs suffered through and for him. He sees and *feels* the torture of the fallen millions, who die after long hours of terrible mental and physical agony; who expire in forest and plain, in stagnant ditches by the road–side, in pools of blood under a sky made black with smoke. His eyes are once more rivetted to the torrents of blood, every drop of which represents a tear of despair, a heart–rent cry, a lifelong sorrow. He hears again the thrilling sighs of desolation, and the shrill cries ringing through mount, forest and valley. He sees the old mothers who have lost the light of their souls; families, the hand that fed them. He beholds widowed young wives thrown on the wide, cold world, and beggared orphans wailing in the streets by the thousands. He finds the young daughters of his bravest old soldiers exchanging their mourning garments for the gaudy frippery of prostitution, and the Soul–Ego shudders in the sleeping Form. . . His heart is rent by the groans of the famished; his eyes blinded by the smoke of burning hamlets, of homes destroyed, of towns and cities in smouldering ruins. . . .

And in his terrible dream, he remembers that moment of insanity in his soldier's life, when standing over a heap of the dead and the dying, waving in his right hand a naked sword red to its hilt with smoking blood, and in his left, the colours rent from the hand of the warrior expiring at his feet, he had sent in a stentorian voice praises to the throne of the Almighty, thanksgiving for the victory just obtained! . . .

He starts in his sleep and awakes in horror. A great shudder shakes his frame like an aspen leaf, and sinking back on his pillows, sick at the recollection, he hears a voice — the voice of the Soul–Ego — saying in him:

"Fame and victory are vainglorious words . . . Thanksgiving and prayers for lives destroyed — wicked lies and blasphemy!" . . .

"What have they brought thee or to thy fatherland, those bloody victories!" . . . whispers the Soul in him. "A

Nightmare Tales

population clad in iron armour," it replies. "Two score millions of men dead now to all spiritual aspiration and Soul-life. A people, henceforth deaf to the peaceful voice of the honest citizen's duty, averse to a life of peace, blind to the arts and literature, indifferent to all but lucre and ambition. What is thy future Kingdom, now? A legion of war-puppets as units, a great wild beast in their collectivity. A beast that, like the sea yonder, slumbers gloomily now, but to fall with the more fury on the first enemy that is indicated to it. Indicated, by whom? It is as though a heartless, proud Fiend, assuming sudden authority, incarnate Ambition and Power, had clutched with iron hand the minds of a whole country. By what wicked enchantment has he brought the people back to those primeval days of the nation when their ancestors, the yellow-haired Suevi, and the treacherous Franks roamed about in their warlike spirit, thirsting to kill, to decimate and subject each other. By what infernal powers has this been accomplished? Yet the transformation has been produced and it is as undeniable as the fact that alone the Fiend rejoices and boasts of the transformation effected. The whole world is hushed in breathless expectation. Not a wife or mother, but is haunted in her dreams by the black and ominous storm-cloud that overhangs the whole of Europe. The cloud is approaching. It comes nearer and nearer. . . . Oh woe and horror! . . . I foresee once more for earth the suffering I have already witnessed. I read the fatal destiny upon the brow of the flower of Europe's youth! But if I live and have the power, never, oh never shall my country take part in it again! No, no, I will not see —

'The glutton death gorged with devouring lives. . . .'

"I will not hear —

'robb'd mother's shrieks
While from men's piteous wounds and horrid gashes
The lab'ring life flows faster than the blood!'"

IX

Firmer and firmer grows in the Soul-Ego the feeling of intense hatred for the terrible butchery called war; deeper and deeper does it impress its thoughts upon the Form that holds it captive. Hope awakens at times in the aching breast and colours the long hours of solitude and meditation; like the morning ray that dispels the dusky shades of shadowy despondency, it lightens the long hours of lonely thought. But as the rainbow is not always the dispeller of the storm-clouds but often only a refraction of the setting sun on a passing cloud, so the moments of dreamy hope are generally followed by hours of still blacker despair. Why, oh why, thou mocking Nemesis, hast thou thus purified and enlightened, among all the sovereigns on this earth, him, whom thou hast made helpless, speechless and powerless? Why hast thou kindled the flame of holy brotherly love for man in the breast of one whose heart already feels the approach of the icy hand of death and decay, whose strength is steadily deserting him and whose very life is melting away like foam on the crest of a breaking wave?

And now the hand of Fate is upon the couch of pain. The hour for the fulfilment of nature's law has struck at last. The old Sire is no more; the younger man is henceforth a monarch. Voiceless and helpless, he is nevertheless a potentate, the autocratic master of millions of subjects. Cruel Fate has erected a throne for him over an open grave, and beckons him to glory and to power. Devoured by suffering, he finds himself suddenly crowned. The wasted Form is snatched from its warm nest amid the palm groves and the roses; it is whirled from balmy south to the frozen north, where waters harden into crystal groves and "waves on waves in solid mountains rise"; whither he now speeds to reign and — speeds to die.

X

Onward, onward rushes the black, fire–vomiting monster, devised by man to partially conquer Space and Time. Onward, and further with every moment from the health–giving, balmy South flies the train. Like the Dragon of the Fiery Head, it devours distance and leaves behind it a long trail of smoke, sparks and stench. And as its long, tortuous, flexible body, wriggling and hissing like a gigantic dark reptile, glides swiftly, crossing mountain and moor, forest, tunnel and plain, its swinging monotonous motion lulls the worn–out occupant, the weary and heartsore Form, to sleep . . .

In the moving palace the air is warm and balmy. The luxurious vehicle is full of exotic plants; and from a large cluster of sweet–smelling flowers arises together with its scent the fairy Queen of dreams, followed by her band of joyous elves. The Dryads laugh in their leafy bowers as the train glides by, and send floating upon the breeze dreams of green solitudes and fairy visions. The rumbling noise of wheels is gradually transformed into the roar of a distant waterfall, to subside into the silvery trills of a crystalline brook. The Soul–Ego takes its flight into Dreamland. . . .

It travels through aeons of time, and lives, and feels, and breathes under the most contrasted forms and personages. It is now a giant, a Yotun, who rushes into Muspelheim, where Surtur rules with his flaming sword.

It battles fearlessly against a host of monstrous animals, and puts them to fight with a single wave of its mighty hand. Then it sees itself in the Northern Mistworld, it penetrates under the guise of a brave Bowman into Helheim, the Kingdom of the Dead, where a Black–Elf reveals to him a series of its lives and their mysterious concatenation. "Why does man suffer?" enquires the Soul–Ego. "Because he would become one," is the mocking answer. Forthwith, the Soul–Ego stands in the presence of the holy goddess, Saga. She sings to it of the valorous deeds of the Germanic heroes, of their virtues and their vices. She shows the Soul the mighty warriors fallen by the hands of many of its past Forms, on battlefield, as also in the sacred security of home. It sees itself under the personages of maidens, and of women, of young and old men, and of children. . . . It feels itself dying more than once in those Forms. It expires as a hero — Spirit, and is led by the pitying Walkyries from the bloody battlefield back to the abode of Bliss under the shining foliage of Walhalla. It heaves its last sigh in another form, and is hurled on to the cold, hopeless plane of remorse. It closes its innocent eyes in its last sleep, as an infant, and is forthwith carried along by the beautiful Elves of Light into another body — the doomed generator of Pain and Suffering. In each case the mists of death are dispersed, and pass from the eyes of the Soul–Ego, no sooner does it cross the Black Abyss that separates the Kingdom of the Living from the Realm of the Dead. Thus "Death" becomes but a meaningless word for it, a vain sound. In every instance the beliefs of the Mortal take objective life and shape for the Immortal, as soon as it spans the Bridge. Then they begin to fade, and disappear. . . .

"What is my Past?" enquires the Soul–Ego of Urd, the eldest of the Norn sisters. "Why do I suffer?"

A long parchment is unrolled in her hand, and reveals a long series of mortal beings, in each of whom the Soul–Ego recognizes one of its dwellings. When it comes to the last but one, it sees a blood–stained hand doing endless deeds of cruelty and treachery, and it shudders. Guileless victims arise around it, and cry to Orlog for vengeance.

"What is my immediate Present?" asks the dismayed Soul of Werdandi, the second sister.

"The decree of Orlog is on thyself!" is the answer. "But Orlog does not pronounce them blindly, as foolish mortals have it."

Nightmare Tales

"What is my Future?" asks despairingly of Skuld, the third Norn sister, the Soul-Ego. "Is it to be for ever dark with tears, and bereaved of Hope?" . . .

No answer is received. But the Dreamer feels whirled through space, and suddenly the scene changes. The Soul-Ego finds itself on a, to it, long familiar spot, the royal bower, and the seat opposite the broken palm-tree. Before it stretches, as formerly, the vast blue expanse of waters, glassing the rocks and cliffs; there, too, is the lonely palm, doomed to quick disappearance.

The soft mellow voice of the incessant ripple of the light waves now assumes human speech, and reminds the Soul-Ego of the vows formed more than once on that spot. And the Dreamer repeats with enthusiasm the words pronounced before.

"Never, oh, never shall I, henceforth, sacrifice vainglorious fame or ambition a single son of my motherland! Our world is so full of unavoidable misery, so poor with joys and bliss, and shall I add to its cup of bitterness the fathomless ocean of woe and blood, called WAR? Avaunt, such thought! . . . Oh, never more. . . ."

XI

Strange sight and change. . . . The broken palm which stands before the mental sight of the Soul-Ego suddenly lifts up its drooping trunk and becomes erect and verdant as before. Still greater bliss, the Soul-Ego finds himself as strong and as healthy as he ever was. In a stentorian voice he sings to the four winds a loud and a joyous song. He feels a wave of joy and bliss in him, and seems to know why he is happy.

He is suddenly transported into what looks a fairy-like Hall, lit with most glowing lights and built of materials, the like of which he had never seen before. He perceives the heirs and descendants of all the monarchs of the globe gathered in that Hall in one happy family. They wear no longer the insignia of royalty, but, *as he seems to know*, those who are the reigning Princes, reign by virtue of their personal merits. It is the greatness of heart, the nobility of character, their superior qualities of observation, wisdom, love of Truth and Justice, that have raised them to the dignity of heirs to the Thrones, of Kings and Queens. The crowns, by authority and the grace of God, have been thrown off, and they now rule by "the grace of divine humanity," chosen unanimously by recognition of their fitness to rule, and the reverential love of their voluntary subjects.

All around seems strangely changed. Ambition, grasping greediness or envy — miscalled Patriotism — exist no longer. Cruel selfishness has made room for just altruism and cold indifference to the wants of the millions no longer finds favour in the sight of the favoured few. Useless luxury, sham pretences — social and religious — all has disappeared. No more wars are possible, for the armies are abolished. Soldiers have turned into diligent, hard-working tillers of the ground, and the whole globe echoes his song in rapturous joy. Kingdoms and countries around him live like brothers. The great, the glorious hour has come at last! That which he hardly dared to hope and think about in the stillness of his long, suffering nights, is now realized. The great curse is taken off, and the world stands absolved and redeemed in its regeneration! . . .

Trembling with rapturous feelings, his heart overflowing with love and philanthropy, he rises to pour out a fiery speech that would become historic, when suddenly he finds his body gone, or, rather, it is replaced by another body . . . Yes, it is no longer the tall, noble Form with which he is familiar, but the body of somebody else, of whom he as yet knows nothing. . . . Something dark comes between him and a great dazzling light, and he sees the shadow of the face of a gigantic timepiece on the ethereal waves. On its ominous dial he reads:

"NEW ERA: 970,995 YEARS SINCE THE INSTANTANEOUS DESTRUCTION BY PNEUMO-DYNO-VRIL OF THE LAST 2,000,000 OF SOLDIERS IN THE FIELD, ON THE WESTERN

PORTION OF THE GLOBE. 971,000 SOLAR YEARS SINCE THE SUBMERSION OF THE EUROPEAN CONTINENTS AND ISLES. SUCH ARE THE DECREE OF ORLOG AND THE ANSWER OF SKULD . . . "

He makes a strong effort and — is himself again. Prompted by the Soul–Ego to REMEMBER and ACT in conformity, he lifts his arms to Heaven and swears in the face of all nature to preserve peace to the end of his days — in his own country, at least.

* * * * *

A distant beating of drums and long cries of what he fancies in his dream are the rapturous thanksgivings, for the pledge just taken. An abrupt shock, loud clatter, and, as the eyes open, the Soul–Ego looks out through them in amazement. The heavy gaze meets the respectful and solemn face of the physician offering the usual draught. The train stops. He rises from his couch weaker and wearier than ever, to see around him endless lines of troops armed with a new and yet more murderous weapon of destruction — ready for the battlefield.

THE LEGEND OF THE BLUE LOTUS

The title of every magazine or book should have some meaning, and especially should this be the case with a Theosophical publication. A title is supposed to express the object in view, symbolising, as it were, the content of the paper. Since allegory is the soul of Eastern philosophy, it may be objected that nothing can be seen in the name "Le Lotus Bleu," save that of a water plant — the *Nymphaea Cerulea* or *Nelumbo*. Furthermore a reader of this calibre would see but the blue colour of the list of contents of our journal.

To avoid a like misunderstanding, we shall attempt to initiate our readers into the general symbolism of the lotus and the particular symbolism of the Blue Lotus. This mysterious and sacred plant has been considered through the ages, both in Egypt and in India, as a symbol of the Universe. Not a monument in the valley of the Nile, not a papyrus, without this plant in an honoured place. On the capitals of the Egyptian pillars, on the thrones and even the head–dresses of the Divine Kings, the lotus is everywhere found as a symbol of the Universe. It inevitably became an indispensable attribute of every creative god, as of every creative goddess, the latter being, philosophically considered, only the feminine aspect of the god, at first androgynous, afterwards male.

It is from *Padma–Yoni*, "the bosom of the Lotus," from Absolute Space, or from the Universe outside time and space, that emanates the Cosmos, conditioned and limited by time and space. The *Hiranya Garbha*, "the egg" (or the womb) of gold, from which Brahma emerges, is often called the Heavenly Lotus. The God, Vishnu, — the synthesis of the Trimurti or Hindu Trinity — during the "nights of Brahma" floats asleep on the primordial waters, stretched on the blossom of a lotus. His Goddess, the lovely Lakshmi, rising from the bosom of the waters, like Venus–Aphrodite, has a white lotus beneath her feet. It was at the churning of the Ocean of Milk — symbol of space and of the Milky Way — by the Gods assembled together, that Lakshmi, Goddess of Beauty and Mother of Love (Kama) formed of the froth of the foaming waves, appeared before the astonished Gods, borne on a lotus, and holding another lotus in her hand.

Thus have arisen the two chief titles of Lakshmi; Padma the Lotus, and Kshirabdi—tanaya daughter of the Ocean of Milk. Gautama the Buddha has never been degraded to the level of a god, notwithstanding the fact that he was the first mortal within historical times fearless enough to interrogate that dumb Sphinx, which we call the Universe, and to wrest completely therefrom the secrets of Life and Death. Though he has never been deified, we repeat, yet he has nevertheless been recognised by generations in Asia as Lord of the Universe. This is why the conqueror and master of the world of thought and philosophy is represented as seated on a

lotus in full bloom, emblem of the Universe thought out by him. In India and Ceylon the lotus is generally of a golden hue; amongst the Buddhists of the North, it is blue.

But there exists in one part of the world a third kind of lotus — the Zizyphus. He who eats of it forgets of his fatherland and those who are dear to him, so say the ancients. Let us not follow this example. Let us not forget our spiritual home, the cradle of the human race, and the birthplace of the Blue Lotus.

Let us then raise the veil of oblivion which covers one of the most ancient allegories — a Vedic legend which, however, the Brahman chroniclers have preserved. Only as the chroniclers have recounted the legend each after his own manner, aided by variations* of his own, we have given the story here — not according to the incomplete renderings and translations of these Eastern gentlemen but according to the popular version. (* Cf. the history of Sunahsepha in the *Bhagavata*, IX, XVI, 35 and of the *Ramayana*, Bk. I. Cap. 60; Manu, X, 105; Koulouka Bhatta [the Historian]; Bahwruba and the Aitareya Brahmanas; Vishnu Purana, etc., etc. Each book gives its own version.) Thus is it that the old bards of Rajasthan sing it, when they come and seat themselves in the verandah of the traveller's bungalow in the wet evenings of the rainy season. Let us leave then the Orientalists to their fantastic speculations. How does it concern us whether the father of the selfish and cowardly prince, who was the cause of the transformation of the white lotus into the blue lotus, be called Harischandra or Ambarisha? Names have nothing to do with the naive poetry of the legend, nor with its moral — for there is a moral to be found if looked for well. We shall soon see that the chief episode in the story is curiously reminiscent of another legend — that of the story of Abraham and the sacrifice of Isaac in the Bible. Is not this one more proof that the Secret Doctrine of the East may have good reason to maintain that the name of the Patriarch was neither a Chaldean or a Hebrew name, but rather an epithet and a Sanskrit surname, signifying *abram*, i.e., one is non-Brahman,* a debrahmanised Brahman, one who is degraded or who has lost his caste? After this how can we avoid suspecting that we may find, among the modern Jews, the Chaldeans of the time of the Rishi Agastya — these makers of bricks whose persecution began from eight hundred to a thousand years ago, but who emigrated to Chaldea four thousand years before the Christian era — when so many of the popular legends of Southern India resemble the Bible stories. Louis Jacolliot speaks in several of his twenty-one volumes on Brahmanical India of this matter, and for once he is right.

* The particle *a* in the Sanskrit word shews this clearly. Placed before a substantive this particle always means the negation or the opposite of the meaning of the expression that follows. Thus *Sura* (god) written *a-Sura*, becomes *non-God*, or the devil, *Vidya* is knowledge, and *a-Vidya*, ignorance or the opposite of knowledge, etc., etc.

We will speak of it another time. Meanwhile here is the Legend of

THE BLUE LOTUS

Century after century has passed away since Ambarisha, King of Ayodhya, reigned in the city founded by the holy Manu, Vaivasvata, the offspring of the Sun. The King was a Suryavansi (a descendant of the Solar Race), and he avowed himself a most faithful servant of the God, Varuna, the greatest and most powerful deity in the *Rig-Veda*.* But the god had denied male heirs to his worshipper, and this made the king very unhappy.

* It is only much later in the orthodox Pantheon and the symbolical polytheism of the Brahmins that Varuna became Poseidon or Neptune — which he is now. In the *Vedas* he is the most ancient of the Gods, identical with Ouranos of the Greek, that is to say a personification of the celestial space and the infinite gods, the creator and ruler of heaven and earth, the King, the Father and the Master of the world, of gods and of men. Hesiod's Uranus and the Greek Zeus are one.

"Alas!" he wailed, every morning while performing his *pūja* to the lesser gods, "alas! What avails it to be the greatest king on earth when God denies me an heir of my blood. When I am dead and placed on the funeral pyre, who will fulfil the pious duties of a son, and shatter my lifeless skull to liberate my soul from its earthly trammels? What strange hand will at the full moon-tide place the rice of the *Shraddha* ceremony to do reverence to my shade? Will not the very birds of death [Rooks and ravens] themselves turn from the funeral feast? For, surely, my shade earthbound in its great despair will not permit them to partake of it."

* The *Shraddha* is a ceremony observed by the nearest relatives of the deceased for the nine days following the death. Once upon a time it was a magical ceremony. Now, however, in addition to other practices, it mainly consists of scattering balls of cooked rice before the door of the dead man's house. If the crows promptly eat the rice it is a sign that the soul is liberated and at rest. If these birds which are so greedy did not touch the food, it was a proof that the *pisacha* or *bhut* (shade) is present and is preventing them. Undoubtedly the *Shraddha* is a superstition, but certainly not more so than Novenas or masses for the Dead.

The King was thus bewailing, when his family priest inspired him with the idea of making a vow. If God should send him two or more sons, he would promise God to sacrifice to Him at a public ceremony the eldest born when he should have attained the age of puberty.

Attracted by this promise of a burnt-offering of flesh — a savory odour very agreeable to the Great Gods — Varuna accepted the promise of the King, and the happy Ambarisha had a son, followed by several others. The eldest son, the heir to the throne for the time being, was called Rohita (the red) and was surnamed Devarata — which, literally translated, means God-given. Devarata grew up and soon became a veritable Prince Charming, but if we are to believe the legends he was as selfish and deceitful as he was beautiful.

When the Prince had attained the appointed age, the God speaking through the mouth of the same Court Priest, charged the King to keep his promise; but when each time Ambarisha invented some excuse to postpone the hour of sacrifice, the God at last grew annoyed. Being a jealous and angry God, he threatened the King with all His Divine wrath.

For a long time, neither commands nor threats produced the desired effect. As long as there were sacred cows to be transferred from the royal cowsheds to those of the Brahmans, as long as there was money in the Treasury to fill the Temple crypts, the Brahmans succeeded in keeping Varuna quiet. But when there were no more cows, when there was no more money, the God threatened to overthrow the King, his palace and his heirs, and if they escaped, to burn them alive. The poor King, finding himself at the end of his resources, summoned his first-born and informed him of the fate which awaited him. But Devarata lent a deaf ear to these tidings. He refused to submit to the double weight of the paternal and divine will.

So, when the sacrificial fires had been lighted and all the good towns-folk of Ayodhya had gathered together, full of emotion, the heir-apparent was absent from the festival.

He had concealed himself in the forests of the Yogis.

Now, these forests had been inhabited by holy hermits, and Devarata knew that there would be unassailable and impregnable. He might be seen there, but no one could do him violence — not even the God Varuna Himself. It was a simple solution. The religious austerities of the Aranyakas (the holy men of the forests) several of whom were Daityas (Titans, a race of giants and demons), gave them such dominance that all the Gods trembled before their sway and their supernatural powers — even Varuna, himself.

These antediluvian Yogis, it seems, had the power to destroy even the God Himself, at will — possibly because they had invented Him themselves.

Nightmare Tales

Devarata spent several years in the forests; at last he grew tired of the life. Allowing it to be understood that he could satisfy Varuna by finding a substitute, who would sacrifice himself in his place, provided that the sacrificial victim was the son of a Rishi, he started on his journey and finally discovered that he sought.

In the country which lies around the flower-covered shores of the renowned Pushkara, there was once a famine, and a very holy man, named Ajigarta,* was at the point of death from starvation, likewise all his family. He had several sons of whom the second, Sunahsepha, a virtuous young man, was himself also preparing to become a Rishi. Taking advantage of his poverty and thinking with good reason that a hungry stomach would be a more ready listener than a satisfied one, the crafty Devarata made the father acquainted with his history. After this he offered him a hundred cows in exchange for Sunahsepha, a substitute burnt-offering on the altar of the Gods.

* Others call him Rishika and call King Ambarisha, Harischandra, the famous sovereign who was a paragon of all the virtues.

The virtuous father refused at first point-blank, but the gentle Sunahsepha offered himself of his own accord, and thus addressed his father: "Of what importance is the life of one man, when it can save that of many others. This God is a great god and His pity is infinite; but He is also a very jealous god and His wrath is swift and vengeful. Varuna is the Lord of Terror, and Death is obedient to His command. His spirit will not for ever strive with one who is disobedient to Him. He will repent Him that He has created man, and then will burn alive a hundred thousand lakhs* of innocent people (*A lakh is a measure of 100,000, whether men or pieces of money be in question.), because of one man who is guilty. If His victim should escape Him, He will surely dry up our rivers, set fire to our lands and destroy our women who are with child — in His infinite kindness. Let me then sacrifice myself, oh! my father, in place of this stranger who offers us a hundred cows. That sum would prevent thee and my brothers from dying of hunger and will save thousands of others from a terrible death. At this price the giving up of life is a pleasant thing."

The aged Rishi shed some tears, but he ended by giving his consent and began to prepare the sacrificial pyre.*

*Manu (Book X, 105) alluding to this story remarks that Ajigarta, the holy Rishi, committed no sin in selling the life of his son, since the sacrifice preserved his life and that of all the family. This reminds us of another legend, more modern, that might serve as a parallel to the older one. Did not the Count Ugolino, condemned to die of starvation in his dungeon, eat his own children "to preserve for them a father"? The popular legend of Sunahsepha is more beautiful than the commentary of Manu — evidently an interpolation of some Brahmans in falsified manuscripts.

The Pushkara lake* was one of the spots of this earth favoured by the Goddess, Lakshmi-Padma (White Lotus); she often plunged into the fresh waters that she might visit her eldest sister, Varuni, the consort of the God Varuna.** Lakshmi-Padma heard the proposal of Devarata, witnessed the despair of the father, and admired the filial devotion of Sunahsepha. Filled with pity, the Mother of Love and Compassion sent for the Rishi Visvamitra, one of the seven primordial Manus and a son of Brahma, and succeeded in interesting him in the lot of her protege. The great Rishi promised her his aid. Appearing to Sunahsepha, but unseen by all others, he taught him two sacred verses (mantras) of the *Rig-Veda*, making him promise to recite these on the pyre. Now, he who utters these two mantras (invocations) forces the whole assembly of the Gods, with Indra at their head, to come to his rescue, and because of this becomes a Rishi himself in this life or in his next incarnation.

* This lake is sometimes called in our day *Pokker*. It is a place famous for a yearly pilgrimage, and is charmingly situated five English miles from Ajmeer in Rajisthan.

Nightmare Tales

Pushkara means "the Blue Lotus", the surface of the lake being covered as with a carpet with these beautiful plants. But the legend avers that they were at first white. Pushkara is also the proper name of a man, and the name of one of the seven sacred islands" in the Geography of the Hindus, the *septa dwipa*.

** Varuni, Goddess of Heat (later Goddess of Wine) was also born of the Ocean of Milk. Of the "fourteen precious objects" produced by the churning, she appeared the second and Lakshmi the last, preceded by the Chalice of Anmita, the nectar which gives immortality.

The altar was set up on the shore of the lake, the pyre was prepared and the crowd had assembled. After he had laid his son on the perfumed sandal wood and bound him, Ajigarta equipped himself with the knife of sacrifice. He was just raising his trembling arm above the heart of his well-beloved son, when the boy began to chant the sacred verses. There was again a moment of hesitation and supreme grief, and as the boy finished his mantram, the aged Rishi plunged his knife into the breast of Sunahsepha.

But, oh! the miracle of it! At that very moment Indra, the God of the Blue Vault (the Universe) issued from the heavens and descended right into the midst of the ceremony. Enveloping the pyre and the victim in a thick blue mist, he loosed the ropes which held the youth captive. It seemed as if a corner of the azure heavens had lowered itself over the spot, illuminating the whole country and colouring with a golden blue the whole scene. Filled with terror, the crowd, and even the Rishi himself, fell on their faces, half dead with fear.

When they came to themselves, the mist had disappeared and a complete change of scene had been wrought.

The fires of the funeral pyre had rekindled of themselves, and stretched thereon was seen a hind (Rohit)* which was none else than the Prince Rohita, Devarata, who, pierced to the heart with the knife he had directed against another, was burning as a sacrifice for his sin.

* A play upon words. *Rohit* in Sanskrit is the name of the female of the deer, the hind, and *Rohita* means "red". It was because of his cowardice and fear of death that he was changed, according to the legend, into a hind by the Gods.

Some little way apart from the altar, also lying stretched out, but on a bed of Lotuses, peacefully slept Sunahsepha; and in the place on his breast where the knife had descended was seen to bloom a beautiful blue lotus. The Pushkara lake, itself, covered a moment before with white lotuses, whose petals shone in the sun like silver cups full of Amrita's waters [The Elixir which confers Immortality.], now reflected the azure of the heavens — the white lotuses had become blue.

Then like to the sound of the Vina [A species of the Lute. An instrument, the invention of which is attributed to Shiva.] rising to the air from the depth of the waters, was heard a melodious voice which uttered these words and this curse:

"A prince who does not know how to die for his subjects is not worthy to reign over the children of the Sun. He will be reborn in a race of red haired peoples, a barbarous and selfish race, and the nations which descend from him will have a heritage ever on the decline. It is the younger son of a mendicant ascetic who will become the King and reign in his stead."

A murmur of approbation set in movement the flowery carpet that overspread the lake. Opening to the golden sunlight their hearts of blue, the lotuses smiled with joy and wafted a hymn of perfume to Surya, their Sun and Master. All nature rejoiced, save Devarata, who was but a handful of ashes.

Nightmare Tales

Then Visvamisra, the great Rishi, although he was already the father of a hundred sons, adopted Sunahsepha as his eldest son and as a precautionary measure cursed in advance anyone who should refuse to recognise, in the last born of the Rishi, the eldest of his children and the legitimate heir of the throne of Ambarisha.

Because of this decree, Sunahsepha was born in his next incarnation in the royal family of Ayodha and reigned over the Solar race for 84,000 years.

With regard to Rohita — Devarata or God-given as he was — he fulfilled the lot which Lakshmi Padma had vowed. He reincarnated in the family of a foreigner without caste (Mleccha-Yavana) and became the ancestor of the barbarous and red-haired races which dwell in the West.

* * * * *

It is for the conversion of these races that the *Lotus Bleu* has been established.

If any of our readers should allow themselves to doubt the historical truth of this adventure of our ancestor; Rohita, and of the transformation of the white lotus into the blue lotus, they are invited to make a journey to Ajmeer.

Once there, they need only to go to the shores of the lake thrice blessed, named Pushkara, where every pilgrim who bathes during the full moon time of the month of Karktika (October–November) attains to the highest sanctity, without other effort. There the sceptics would see with their own eyes the site where was built the pyre of Rohita, and also the waters visited by Lakshmi in days of yore.

They might even have seen the blue lotuses, if most of these had not since been changed, thanks to a new transformation decreed by the Gods, into sacred crocodiles which no one has the right to disturb. It is this transformation which gives to nine out of every ten pilgrims who plunge into the waters of the lake, the opportunity of entering into Nirvana almost immediately, and also causes the holy crocodiles to be the most bulky of their kind.

A BEWITCHED LIFE

As Narrated by a Quill Pen

By H. P. Blavatsky

INTRODUCTION

It was a dark, chilly night in September, 1884. A heavy gloom had descended over the streets of A---, a small town on the Rhine, and was hanging like a black funeral-pall over the dull factory burgh. The greater number of its inhabitants, wearied by their long day's work, had hours before retired to stretch their tired limbs, and lay their aching heads upon their pillows. All was quiet in the large house; all was quiet in the deserted streets.

I too was lying in my bed; alas, not one of rest, but of pain and sickness, to which I had been confined for some days. So still was everything in the house, that, as Longfellow has it, its stillness seemed almost audible. I could plainly hear the murmur of the blood as it rushed through my aching body, producing that monotonous singing so familiar to one who lends a watchful ear to silence. I had listened to it until, in my nervous imagination, it had grown into the sound of a distant cataract, the fall of mighty waters . . . when, suddenly changing its character, the evergrowing "singing" merged into other and far more welcome sounds.

Nightmare Tales

It was the low, and at first scarce audible, whisper of a human voice. It approached, and gradually strengthening seemed to speak in my very ear. Thus sounds a voice speaking across a blue quiescent lake, in one of those wondrously acoustic gorges of the snow-capped mountains, where the air is so pure that a word pronounced half a mile off seems almost at the elbow. Yes; it was the voice of one whom to know is to reverence; of one, to me, owing to many mystic associations, most dear and holy; a voice familiar for long years and ever welcome; doubly so in hours of mental or physical suffering, for it always brings with it a ray of hope and consolation.

"Courage," it whispered in gentle, mellow tones. "Think of the days passed by you in sweet associations; of the great lessons received of Nature's truths; of the many errors of men concerning these truths; and try to add to them the experience of a night in this city. Let the narrative of a strange life, that will interest you, help to shorten the hours of suffering. . . . Give your attention. Look yonder before you!"

"Yonder" meant the clear, large windows of an empty house on the other side of the narrow street of the German town. They faced my own in almost a straight line across the street, and my bed faced the windows of my sleeping room. Obedient to the suggestion, I directed my gaze towards them, and what I saw made me for the time being forget the agony of the pain that racked my swollen arm and rheumatal body.

Over the windows was creeping a mist; a dense, heavy, serpentine, whitish mist, that looked like the huge shadow of a gigantic boa slowly uncoiling its body. Gradually it disappeared, to leave a lustrous light, soft and silvery, as though the window-panes behind reflected a thousand moonbeams, a tropical star-lit sky — first from outside, then from within the empty rooms. Next I saw the mist elongating itself and throwing, as it were, a fairy bridge across the street from the bewitched windows to my own balcony, nay, to my very own bed. As I continued gazing, the wall and windows and the opposite house itself, suddenly vanished. The space occupied by the empty rooms had changed into the interior of another smaller room, in what I knew to be a Swiss chalet — into a study, whose old, dark walls were covered from floor to ceiling with book shelves on which were many antiquated folios, as well as works of a more recent date. In the centre stood a large old-fashioned table, littered over with manuscripts and writing materials. Before it, quill-pen in hand, sat an old man; a grim-looking, skeleton-like personage, with a face so thin, so pale, yellow and emaciated, that the light of the solitary little student's lamp was reflected in two shining spots on his high cheekbones, as though they were carved out of ivory.

As I tried to get a better view of him by slowly raising myself upon my pillows, the whole vision, chalet and study, desk, books and scribe, seemed to flicker and move. Once set in motion, they approached nearer and nearer, until, gliding noiselessly along the fleecy bridge of clouds across the street, they floated through the closed windows into my room and finally seemed to settle beside my bed.

"Listen to what he thinks and is going to write" — said in soothing tones the same familiar, far off, and yet near voice." Thus you will hear a narrative, the telling of which may help to shorten the long sleepless hours, and even make you forget for a while your pain . . . Try!" — it added, using the well-known Rosicrucian and Kabalistic formula.

I tried, doing as I was bid. I centred all my attention on the solitary laborious figure that I saw before me, but which did not see me. At first, the noise of the quill-pen with which the old man was writing, suggested to my mind nothing more than a low whispered murmur of a nondescript nature. Then, gradually, my ear caught the indistinct words of a faint and distant voice, and I thought the figure before me, bending over its manuscript, was reading its tale aloud instead of writing it. But I soon found out my error. For casting my gaze at the old scribe's face, I saw at a glance that his lips were compressed and motionless, and the voice too thin and shrill to be his voice. Stranger still at every word traced by the feeble, aged hand, I noticed a light flashing from under his pen, a bright coloured spark that became instantaneously a sound, or — what is the same thing — it seemed to do so to my inner perceptions. It was indeed the small voice of the quill that I

heard though scribe and pen were at the time, perchance, hundreds of miles away from Germany. Such things will happen occasionally, especially at night, beneath whose starry shade, as Byron tells us,

" . . . we learn the language of another world . . ."

However it may be, the words uttered by the quill remained in my memory for days after. Nor had I any great difficulty in retaining them, for when I sat down to record the story, I found it, as usual, indelibly impressed on the astral tablets before my inner eye.

Thus, I had but to copy it and so give it as I received it. I failed to learn the name of the unknown nocturnal writer. Nevertheless, though the reader may prefer to regard the whole story as one made up for the occasion, a dream, perhaps, still its incidents will, I hope, prove none the less interesting.

I -- THE STRANGER'S STORY

My birth-place is a small mountain hamlet, a cluster of Swiss cottages, hidden deep in a sunny nook, between two tumble-down glaciers and a peak covered with eternal snows. Thither, thirty-seven years ago, I returned -- crippled mentally and physically -- to die, if death would only have me. The pure, invigorating air of my birth-place decided otherwise. I am still alive; perhaps for the purpose of giving evidence to facts I have kept profoundly secret from all -- a tale of horror I would rather hide than reveal. The reason for this unwillingness on my part is due to my early education, and to subsequent events that gave the lie to my most cherished prejudices. Some people might be inclined to regard these events as providential: I, however, believe in no Providence, and yet am unable to attribute them to mere chance. I connect them as the ceaseless evolution of effects, engendered by certain direct causes, with one primary and fundamental cause, from which ensued all that followed. A feeble old man am I now, yet physical weakness has in no way impaired my mental faculties. I remember the smallest details of that terrible cause, which engendered such fatal results. It is these which furnish me with an additional proof of the actual existence of one whom I fain would regard -- oh, that I could do so! -- as a creature born of my fancy, the evanescent production of a feverish, horrid dream! Oh that terrible, mild and all-forgiving, that saintly and respected Being! It was that paragon of all the virtues who embittered my whole existence. It is he, who, pushing me violently out of the monotonous but secure groove of daily life, was the first to force upon me the certitude of a life hereafter, thus adding an additional horror to one already great enough.

With a view to a clearer comprehension of the situation, I must interrupt these recollections with a few words about myself. Oh how, if I could, would I obliterate that hated *Self!*

Born in Switzerland, of French parents, who centred the whole world-wisdom in the literary trinity of Voltaire, J. J. Rousseau and D'Holbach, and educated in a German university, I grew up a thorough materialist, a confirmed atheist. I could never have even pictured to myself any beings -- least of all a Being -- above or even outside visible nature, as distinguished from her. Hence I regarded everything that could not be brought under the strictest analysis of the physical senses as a mere chimera. A soul, I argued, even supposing man has one, must be material. According to Origen's definition, *incorporeus* -- the epithet he gave to his God -- signifies a substance only more subtle than that of physical bodies, of which, at best, we can form no definite idea. How then can that, of which our senses cannot enable us to obtain any clear knowledge, how can that make itself visible or produce any tangible manifestations?

Accordingly, I received the tales of nascent Spiritualism with a feeling of utter contempt, and regarded the overtures made by certain priests with derision, often akin to anger. And indeed the latter feeling has never entirely abandoned me.

Nightmare Tales

Pascal, in the eighth Act of his "Thoughts," confesses to a most complete incertitude upon the existence of God. Throughout my life, I too professed a complete certitude as to the non-existence of any such extra-cosmic being, and repeated with that great thinker the memorable words in which he tells us: "I have examined if this God of whom all the world speaks might not have left some marks of himself. I look everywhere, and everywhere I see nothing but obscurity. Nature offers me nothing that may not be a matter of doubt and inquietude." Nor have I found to this day anything that might unsettle me in precisely similar and even stronger feelings. I have never believed, nor shall I ever believe, in a Supreme Being. But at the potentialities of man, proclaimed far and wide in the East, powers so developed in some persons as to make them virtually Gods, at them I laugh no more. My whole broken life is a protest against such negation. I believe in such phenomena, and — I curse them, whenever they come, and by whatsoever means generated.

On the death of my parents, owing to an unfortunate lawsuit, I lost the greater part of my fortune, and resolved — for the sake of those I loved best, rather than for my own — to make another for myself. My elder sister, whom I adored, had married a poor man. I accepted the offer of a rich Hamburg firm and sailed for Japan as its junior partner.

For several years my business went on successfully. I got into the confidence of many influential Japanese, through whose protection I was enabled to travel and transact business in many localities, which, in those days especially, were not easily accessible to foreigners. Indifferent to every religion, I became interested in the philosophy of Buddhism, the only religious system I thought worthy of being called philosophical. Thus, in my moments of leisure, I visited the most remarkable temples of Japan, the most important and curious of the ninety-six Buddhist monasteries of Kioto. I have examined in turn Day — Bootzoo, with its gigantic bell; Tzeonene, Enarino—Yassero, Kie—Missoo, Higadzi—Hong—Vonsi, and many other famous temples.

Several years passed away, and during that whole period I was not cured of my scepticism, nor did I ever contemplate having my opinions on this subject altered. I derided the pretensions of the Japanese bonzes and ascetics, as I had those of Christian priests and European Spiritualists. I could not believe in the acquisition of powers unknown to, and never studied by, men of science; hence I scoffed at all such ideas. The superstitious and atrabilious Buddhist, teaching us to shun the pleasures of life, to put to rout one's passions, to render oneself insensible alike to happiness and suffering, in order to acquire such chimerical powers — seemed supremely ridiculous in my eyes.

On a day ever memorable to me — a fatal day — I made the acquaintance of a venerable and learned Bonze, a Japanese priest, named Tamooro Hideyeri. I met him at the foot of the golden Kwon—On, and from that moment he became my best and most trusted friend. Notwithstanding my great and genuine regard for him, however, whenever a good opportunity was offered I never failed to mock his religious convictions, thereby very often hurting his feelings.

But my old friend was as meek and forgiving as any true Buddhist's heart might desire. He never resented my impatient sarcasms, even when they were, to say the least, of equivocal propriety, and generally limited his replies to the "wait and see" kind of protest. Nor could he be brought to seriously believe in the sincerity of my denial of the existence of any God or Gods. The full meaning of the terms "atheism" and "scepticism" was beyond the comprehension of his otherwise extremely intellectual and acute mind. Like certain reverential Christians, he seemed incapable of realizing that any man of sense should prefer the wise conclusions arrived at by philosophy and modern science to a ridiculous belief in an invisible world full of Gods and spirits, dzins and demons. "Man is a spiritual being," he insisted, "who returns to earth more than once, and is rewarded or punished in the between times." The proposition that man is nothing else but a heap of organized dust, was beyond him. Like Jeremy Collier, he refused to admit that he was no better than "a stalking machine, a speaking head without a soul in it," whose "thoughts" are all bound by the laws of motion." "For," he argued, "if my actions were, as you say, prescribed beforehand, and I had no more liberty or free will to change the course of my action than the running waters of the river yonder, then the glorious

doctrine of Karma, of merit and demerit, would be a foolishness indeed."

Thus the whole of my hyper-metaphysical friend's ontology rested on the shaky superstructure of metempsychosis, of a fancied "just" Law of Retribution, and other such equally absurd dreams.

"We cannot," said he paradoxically one day, "hope to live hereafter in the full enjoyment of our consciousness, unless we have built for it beforehand a firm and solid foundation of spirituality. . . . Nay, laugh not, friend of no faith," he meekly pleaded, "but rather think and reflect on this. One who has never taught himself to live in Spirit during his conscious and responsible life on earth, can hardly hope to enjoy a sentient existence after death, when, deprived of his body, he is limited to that Spirit alone."

"What can you mean by life in Spirit?" — I enquired.

"Life on a spiritual plane; that which the Buddhists call *Tushita Devaloka* (Paradise). Man can create such a blissful existence for himself between two births, by the gradual transference on to that plane of all the faculties which during his sojourn on earth manifest through his organic body and, as you call it, animal brain."

"How absurd! And how can man do this?"

"Contemplation and a strong desire to assimilate the blessed Gods, will enable him to do so."

"And if man refuses this intellectual occupation, by which you mean, I suppose, the fixing of the eyes on the tip of his nose, what becomes of him after the death of his body?" was my mocking question.

"He will be dealt with according to the prevailing state of his consciousness, of which there are many grades. At best — immediate rebirth; at worst — the state of *avitchi*, a mental hell. Yet one need not be an ascetic to assimilate spiritual life which will extend to the hereafter. All that is required is to try and approach Spirit."

"How so? Even when disbelieving in it?" — I rejoined.

"Even so! One may disbelieve and yet harbour in one's nature room for doubt, however small that room may be, and thus try one day, were it but for one moment, to open the door of the inner temple; and this will prove sufficient for the purpose."

"You are decidedly poetical, and paradoxical to boot, reverend sir. Will you kindly explain to me a little more of the mystery?"

"There is none; still I am willing. Suppose for a moment that some unknown temple to which you have never been before, and the existence of which you think you have reasons to deny, is the 'spiritual plane' of which I am speaking. Some one takes you by the hand and leads you towards its entrance, curiosity makes you open its door and look within. By this simple act, by entering it for one second, you have established an everlasting connection between your consciousness and the temple. You cannot deny its existence any longer, nor obliterate the fact of your having entered it. And according to the character and the variety of your work, within its holy precincts, so will you live in it after your consciousness is severed from its dwelling of flesh."

"What do you mean? And what has my after-death consciousness — if such a thing exists — to do with the temple?"

"It has everything to do with it," solemnly rejoined the old man. "There can be no self-consciousness after death outside the temple of spirit. That which you will have done within its plane will alone survive. All the

Nightmare Tales

rest is false and an illusion. It is doomed to perish in the Ocean of Maya."

Amused at the idea of living outside one's body, I urged on my old friend to tell me more. Mistaking my meaning the venerable man willingly consented.

Tamoorā Hideyeri belonged to the great temple of Tzionene, a Buddhist monastery, famous not only in all Japan, but also throughout Tibet and China. No other is so venerated in Kioto. Its monks belong to the sect of Dzeno-doo, and are considered as the most learned among the many erudite fraternities. They are, moreover, closely connected and allied with the Yamabooshi (the ascetics, or hermits), who follow the doctrines of Lao-tze. No wonder, that at the slightest provocation on my part the priest flew into the highest metaphysics, hoping thereby to cure me of my infidelity.

No use repeating here the long rigmarole of the most hopelessly involved and incomprehensible of all doctrines. According to his ideas, we have to train ourselves for spirituality in another world -- as for gymnastics. Carrying on the analogy between the temple and the "spiritual plane" he tried to illustrate his idea. He had himself worked in the temple of Spirit two-thirds of his life, and given several hours daily to "contemplation." Thus *he knew* (!?) that after he had laid aside his mortal casket, "a mere illusion," he explained -- he would in his spiritual consciousness live over again every feeling of ennobling joy and divine bliss he had ever had, or *ought to have had* -- only a hundredfold intensified. His work on the spirit-plane had been considerable, he said, and he hoped, therefore that the wages of the labourer would prove proportionate.

"But suppose the labourer, as in the example you have just brought forward in my case, should have no more, than opened the temple door out of mere curiosity; had only peeped into the sanctuary never to set his foot therein again. What then?"

"Then," he answered, "you would have only this short minute to record in your future self-consciousness and no more. Our life hereafter records and repeats but the impressions and feelings we have had in our spiritual experiences and nothing else. Thus, if instead of reverence at the moment of entering the abode of Spirit, you had been harbouring in your heart anger, jealousy or grief, then your future spiritual life would be a sad one, in truth. There would be nothing to record, save the opening of a door, in a fit of bad temper."

"How then could it be repeated?" -- I insisted, highly amused. "What do you suppose I would be doing before incarnating again?"

"In that case," he said speaking slowly and weighing every word -- "*in that case, you would have I fear, only to open and shut the temple door, over and over again, during a period which, however short, would seem to you an eternity.*"

This kind of after-death occupation appeared to me, at that time, so grotesque in its sublime absurdity, that I was seized with an almost inextinguishable fit of laughter.

My venerable friend looked considerably dismayed at such a result of his metaphysical instruction. He had evidently not expected such hilarity. However, he said nothing, but only sighed and gazed at me with increased benevolence and pity shining in his small black eyes.

"Pray excuse my laughter," I apologized. "But really, now, you cannot seriously mean to tell me that the 'spiritual state' you advocate and so firmly believe in, consists only in aping certain things we do in life?"

"Nay, nay; not aping, but only intensifying their repetition; filling the gaps that were unjustly left unfilled during life in the fruition of our acts and deeds, and of everything performed on the spiritual plane of the one

real state. What I said was an illustration, and no doubt for you, who seem entirely ignorant of the mysteries of *Soul-Vision*, not a very intelligible one. It is myself who am to be blamed. . . . What I sought to impress upon you was that, as the spiritual state of our consciousness liberated from its body is but the fruition of every spiritual act performed during life, where an act had been barren, there could be no results expected — save the repetition of that act itself. This is all. I pray you may be spared such fruitless deeds and finally made to see certain truths." And passing through the usual Japanese courtesies of taking leave the excellent man departed.

Alas, alas! had I but known at the time what I have learnt since, how little would I have laughed, and how much more would I have learned!

But as the matter stood, the more personal affection and respect I felt for him, the less could I become reconciled to his wild ideas about an after-life, and especially as to the acquisition by some men of supernatural powers. I felt particularly disgusted with his reverence for the Yamabooshi, the allies of every Buddhist sect in the land. Their claims to the "miraculous" were simply odious to my notions. To hear every Jap I knew at Kioto, even to my own partner, the shrewdest of all the business men I had come across in the East — mentioning these followers of Lao-tze with downcast eyes, reverentially folded hands, and affirmations of their possessing "great" and "wonderful" gifts, was more than I was prepared to patiently tolerate in those days. And who were they, after all, these great magicians with their ridiculous pretensions to super-mundane knowledge; these "holy beggars" who, as I then thought, purposely dwell in the recesses of unfrequented mountains and an unapproachable craggy steep, so as the better to afford no chance to curious intruders of finding them out and watching them in their own dens? Simply, impudent fortune-tellers, Japanese gypsies who sell charms and talismans, and no better. In answer to those who sought to assure me that though the Yamabooshi lead a mysterious life, admitting none of the profane to their secrets, they still do accept pupils, however difficult it is for one to become their disciple, and that thus they have living witnesses to the great purity and sanctity of their lives, in answer to such affirmations I opposed the strongest negation and stood firmly by it. I insulted both masters and pupils, classing them under the same category of fools, when not knaves, and I went so far as to include in this number the Sintos. Now Sintoism or *Sin-Syu*, "faith in the Gods, and in the way to the Gods," that is, belief in the communication between these creatures and men, is a kind of worship of nature-spirits, than which nothing can be more miserably absurd. And by placing the Sintos among the fools and knaves of other sects, I gained many enemies. For the Sinto Kanusi (spiritual teachers) are looked upon as the highest in the upper classes of Society, the Mikado himself being at the head of their hierarchy and the members of the sect belonging to the most cultured and educated men in Japan. These Kanusi of the Sinto form no caste or class apart, nor do they pass any ordination — at any rate none known to outsiders. And as they claim publicly no special privilege or powers, even their dress being in no wise different from that of the laity, but are simply in the world's opinion professors and students of occult and spiritual sciences, I very often came in contact with them without in the least suspecting that I was in the presence of such personages.

II -- THE MYSTERIOUS VISITOR

Years passed; and as time went by, my ineradicable scepticism grew stronger and waxed fiercer every day. I have already mentioned an elder and much-beloved sister, my only surviving relative. She had married and had lately gone to live at Nuremberg. I regarded her with feelings more filial than fraternal, and her children were as dear to me as might have been my own. At the time of the great catastrophe that in the course of a few days had made my father lose his large fortune, and my mother break her heart, she it was, that sweet big sister of mine, who had made herself of her own accord the guardian angel of our ruined family. Out of her great love for me, her younger brother, for whom she attempted to replace the professors that could no longer be afforded, she had renounced her own happiness. She sacrificed herself and the man she loved, by indefinitely postponing their marriage, in order to help our father and chiefly myself by her undivided

devotion. And, oh, how I loved and revered her, time but strengthening this earliest family affection! They who maintain that no atheist, as such, can be a true friend, an affectionate relative, or a loyal subject, utter — whether consciously or unconsciously — the greatest calumny and lie. To say that a materialist grows hard-hearted as he grows older, that he cannot love as a believer does, is simply the greatest fallacy.

There may be such exceptional cases, it is true, but these are found only occasionally in men who are even more selfish than they are sceptical, or vulgarly worldly. But when a man who is kindly disposed in his nature, for no selfish motives but because of reason and love of truth, becomes what is called atheistical, he is only strengthened in his family affections, and in his sympathies with his fellow men. All his emotions, all the ardent aspirations towards the unseen and unreachable, all the love which he would otherwise have uselessly bestowed on a suppositional heaven and its God, become now centred with tenfold force upon his loved ones and mankind. Indeed, the atheist's heart alone —

. . . can know,

What secret tides of still enjoyment flow When brothers love. . . .

It was such holy fraternal love that led me also to sacrifice my comfort and personal welfare to secure her happiness, the felicity of her who had been more than a mother to me. I was a mere youth when I left home for Hamburg. There, working with all the desperate earnestness of a man who has but one noble object in view — to relieve suffering, and help those whom he loves — I very soon secured the confidence of my employers, who raised me in consequence to the high post of trust I always enjoyed. My first real pleasure and reward in life was to see my sister married to the man she had sacrificed for my sake, and to help them in their struggle for existence.

So purifying and unselfish was this affection of mine for her that, when it came to be shared among her children, instead of losing in intensity by such division, it seemed to only grow the stronger. Born with the potentiality of the warmest family affection in me, the devotion for my sister was so great, that the thought of burning that sacred fire of love before any idol, save that of herself and family, never entered my head. This was the only church I recognized, the only church wherein I worshipped at the altar of holy family affection. In fact this large family of eleven persons, including her husband, was the only tie that attached me to Europe. Twice, during a period of nine years, had I crossed the ocean with the sole object of seeing and pressing these dear ones to my heart. I had no other business in the West; and having performed this pleasant duty, I returned each time to Japan to work and toil for them. For their sake I remained a bachelor, that the wealth I might acquire should go undivided to them alone.

We had always corresponded as regularly as the long transit of the then very irregular service of the mail-boats would permit. But suddenly there came a break in my letters from home. For nearly a year I received no intelligence; and day by day, I became more restless, more apprehensive of some great misfortune. Vainly I looked for a letter, a simple message; and my efforts to account for so unusual a silence were fruitless.

"Friend," said to me one day Tamooro Hideyeri, my only confidant, "Friend, consult a holy Yamabooshi — and you will feel at rest."

Of course the offer was rejected with as much moderation as I could command under the provocation. But, as steamer after steamer came in without a word of news, I felt a despair which daily increased in depth and fixity. This finally degenerated into an irrepressible craving, a morbid desire to learn — the worst, as I then thought. I struggled hard with the feeling, but it had the best of me. Only a few months before a complete master of myself — I now became an abject slave to fear. A fatalist of the school of D'Holbach, I, who had always regarded belief in the system of necessity as being the only promoter of philosophical happiness, and as having the most advantageous influence over human weaknesses, I felt a craving for something akin to

fortune-telling! I had gone so far as to forget the first principle of my doctrine — the only one calculated to calm our sorrows, to inspire us with a useful submission, namely a rational resignation to the decrees of blind destiny, with which foolish sensibility causes us so often to be overwhelmed — the doctrine that *all is necessary*. Yes; forgetting this, I was drawn into a shameful, superstitious longing, a stupid, disgraceful desire to learn — if not futurity, at any rate that which was taking place at the other side of the globe. My conduct seemed utterly modified, my temperament and aspirations wholly changed; and like a weak, nervous girl, I caught myself straining my mind to the very verge of lunacy in an attempt to look — as I had been told one could sometimes do — beyond the oceans, and learn, at last, the real cause of this long, inexplicable silence!

One evening, at sunset, my old friend, the venerable Bonze, Tamoorā, appeared on the verandah of my low wooden house. I had not visited him for many days, and he had come to know how I was. I took the opportunity to once more sneer at one, whom, in reality, I regarded with most affectionate respect. With equivocal taste for which I repented almost before the words had been pronounced — I enquired of him why he had taken the trouble to walk all that distance when he might have learned anything he liked about me by simply interrogating a Yamabooshi? He seemed a little hurt, at first; but after keenly scrutinizing my dejected face, he mildly remarked that he could only insist upon what he had advised before. Only one of that holy order could give me consolation in my present state.

From that instant, an insane desire possessed me to challenge him to prove his assertions. I defied — I said to him — any and every one of his alleged magicians to tell me the name of the person I was thinking of, and what he was doing at that moment. He quietly answered that my desire could be easily satisfied. There was a Yamabooshi two doors from me, visiting a sick Sinto. He would fetch him — if I only said the word.

I said it and *from the moment of its utterance my doom was sealed.*

How shall I find words to describe the scene that followed! Twenty minutes after the desire had been so incautiously expressed, an old Japanese, uncommonly tall and majestic for one of that race, pale, thin and emaciated, was standing before me. There, where I had expected to find servile obsequiousness, I only discerned an air of calm and dignified composure, the attitude of one who knows his moral superiority, and therefore scorns to notice the mistakes of those who fail to recognize it. To the somewhat irreverent and mocking questions, which I put to him one after another, with feverish eagerness, he made no reply; but gazed on me in silence as a physician would look at a delirious patient. From the moment he fixed — his eyes on mine, I felt — or shall I say, saw — as though it were a sharp ray of light, a thin silvery thread, shoot out from the intensely black and narrow eyes so deeply sunk in the yellow old face. It seemed to penetrate into my brain and heart like an arrow, and set to work to dig out therefrom every thought and feeling. Yes; I both saw and felt it, and very soon the double sensation became intolerable.

To break the spell I defied him to tell me what he had found in my thoughts. Calmly came the correct answer — Extreme anxiety for a female relative, her husband and children, who were inhabiting a house the correct description of which he gave as though he knew it as well as myself. I turned a suspicious eye upon my friend, the Bonze, to whose indiscretions, I thought, I was indebted for the quick reply. Remembering however that Tamoorā could know nothing of the appearance of my sister's house, that the Japanese are proverbially truthful and, as friends, faithful to death — I felt ashamed of my suspicion. To atone for it before my own conscience I asked the hermit whether he could tell me anything of the present state of that beloved sister of mine. The foreigner — was the reply — would never believe in the words, or trust to the knowledge of any person but himself. Were the Yamabooshi to tell him, the impression would wear out hardly a few hours later, and the inquirer find himself as miserable as before. There was but one means; and that was to make the foreigner (myself) see with his own eyes, and thus learn the truth for himself. Was the enquirer ready to be placed by a Yamabooshi, a stranger to him, in the required state?

I had heard in Europe of mesmerized somnambules and pretenders to clairvoyance, and having no faith in them, I had, therefore, nothing against the process itself. Even in the midst of my never-ceasing mental agony, I could not help smiling at the ridiculous nature of the operation I was willingly submitting to. Nevertheless I silently bowed consent.

III -- PSYCHIC MAGIC

The old Yamabooshi lost no time. He looked at the setting sun, and finding, probably, the Lord Ten-Dzio-Dai-Dzio (the Spirit who darts his Rays) propitious for the coming ceremony, he speedily drew out a little bundle. It contained a small lacquered box, a piece of vegetable paper, made from the bark of the mulberry tree, and a pen, with which he traced upon the paper a few sentences in the *Naiden* character — a peculiar style of written language used only for religious and mystical purposes. Having finished, he exhibited from under his clothes a small round mirror of steel of extraordinary brilliancy, and placing it before my eyes asked me to look into it.

I had not only heard before of these mirrors, which are frequently used in the temples, but I had often seen them. It is claimed that under the direction and will of instructed priests, there appear in them the Daij-Dzin, the great spirits who notify the enquiring devotees of their fate. I first imagined that his intention was to evoke such a spirit, who would answer my queries. What happened, however, was something of quite a different character.

No sooner had I, not without a last pang of mental squeamishness, produced by a deep sense of my own absurd position, touched the mirror, than I suddenly felt a strange sensation in the arm of the hand that held it. For a brief moment I forgot to "sit in the seat of the scorner" and failed to look at the matter from a ludicrous point of view. Was it fear that suddenly clutched my brain, for an instant paralyzing its activity —

. . . that fear when the heart longs to know,
what it is death to hear?

No; for I still had consciousness enough left to go on persuading myself that nothing would come out of an experiment, in the nature of which no sane man could ever believe. What was it then, that crept across my brain like a living thing of ice, producing therein a sensation of horror, and then clutched at my heart as if a deadly serpent had fastened its fangs into it? With a convulsive jerk of the hand I dropped the — I blush to write the adjective — "magic" mirror, and could not force myself to pick it up from the settee on which I was reclining. For one short moment there was a terrible struggle between some undefined, and to me utterly inexplicable, longing to look into the depths of the polished surface of the mirror and my pride, the ferocity of which nothing seemed capable of taming. It was finally so tamed, however, its revolt being conquered by its own defiant intensity. There was an opened novel lying on a lacquer table near the settee, and as my eyes happened to fall upon its pages, I read the words, "The veil which covers futurity is woven by the hand of mercy." This was enough. That same pride which had hitherto held me back from what I regarded as a degrading, superstitious experiment, caused me to challenge my fate. I picked up the ominously shining disk and prepared to look into it.

While I was examining the mirror, the Yamabooshi hastily spoke a few words to the Bonze, Tamoora, at which I threw a furtive and suspicious glance at both. I was wrong once more.

"The holy man desires me to put you a question and give you at the same time a warning," remarked the Bonze. "If you are willing to see for yourself now, you will have — under the penalty of *seeing for ever, in the hereafter, all that is taking place, at whatever distance, and that against your will or inclination* — to submit to a regular course of purification, after you have learnt what you want through the mirror."

Nightmare Tales

"What is this course, and what have I to promise?" I asked defiantly.

"It is for your own good. You must promise him to submit to the process, lest, for the rest of his life, he should have to hold himself responsible, before his own conscience, for having made an *irresponsible* seer of you. Will you do so, friend?"

"There will be time enough to think of it, if I see anything" — I sneeringly replied, adding under my breath — "something I doubt a good deal, so far."

"Well you are warned, friend. The consequences will now remain with yourself," was the solemn answer.

I glanced at the clock, and made a gesture of impatience, which was remarked and understood by the Yamabooshi. It was just *seven minutes after five*.

"Define well in your mind *what* you would see and learn," said the "conjuror," placing the mirror and paper in my hands, and instructing me how to use them.

His instructions were received by me with more impatience than gratitude; and for one short instant, I hesitated again. Nevertheless, I replied, while fixing the mirror.

"I desire but one thing -- to learn the reason or reasons why my sister has so suddenly ceased writing to me." . . .

Had I pronounced these words in reality, and in the hearing of the two witnesses, or had I only thought them? To this day I cannot decide the point. I now remember but one thing distinctly: while I sat gazing in the mirror, the Yamabooshi kept gazing at me. But whether this process lasted half a second or three hours, I have never since been able to settle in my mind with any degree of satisfaction. I can recall every detail of the scene up to that moment when I took up the mirror with the left hand, holding the paper inscribed with the mystic characters between the thumb and finger of the right, when all of a sudden I seemed to quite lose consciousness of the surrounding objects. The passage from the active waking state to one that I could compare with nothing I had ever experienced before, was so rapid, that while my eyes had ceased to perceive external objects and had completely lost sight of the Bonze, the Yamabooshi, and even of my room, I could nevertheless distinctly see the whole of my head and my back, as I sat leaning forward with the mirror in my hand. Then came a strong sensation or an involuntary rush forward, of *snapping* off, so to say, from my place — I had almost said from my body. And, then, while every one of my other senses had become totally paralyzed, my eyes, as I thought, unexpectedly caught a clearer and far more vivid glimpse than they had ever had in reality, of my sister's new house at Nuremberg, which I had never visited and knew only from a sketch, and other scenery with which I had never been very familiar. Together with this, and while feeling in my brain what seemed like flashes of a departing consciousness — dying persons must feel so, no doubt — the very last, vague thought, so weak as to have been hardly perceptible, was that I must look very, *very* ridiculous . . . This *feeling* — for such it was rather than a thought — was interrupted, suddenly extinguished, so to say, by a clear *mental vision* (I cannot characterize it otherwise) of myself, of that which I regarded as, and knew to be my body, lying with ashy cheeks on a settee, dead to all intents and purposes, but still staring with the cold and glassy eyes of a corpse into the mirror. Bending over it, with his two emaciated hands cutting the air in every direction over its white face, stood the tall figure of the Yamabooshi, for whom I felt at that instant an inextinguishable, murderous hatred. As I was going, in thought, to pounce upon the vile charlatan, my corpse, the two old men, the room itself, and every object in it, trembled and danced in a reddish glowing light, and seemed to float rapidly away from "me." A few more grotesque, distorted shadows before "my" sight; and, with a last feeling of terror and a supreme effort to realize *who then was I now, since I was not that corpse* — a great veil of darkness fell over me, like a funeral pall, and every thought in me was dead.

IV -- A VISION OF HORROR

How strange! . . . Where was I now? It was evident to me that I had once more returned to my senses. For there I was, vividly realizing that I was rapidly moving forward, while experiencing a queer, strange sensation as though I were swimming, without impulse or effort on my part, and in total darkness. The idea that first presented itself to me was that of a long subterranean passage of water, of earth, and stifling air, though bodily I had no perception, no sensation, of the presence or contact of any of these. I tried to utter a few words, to repeat my last sentence, "I desire but one thing: to learn the reason or reasons why my sister has so suddenly ceased writing to me" — but the only words I heard out of the twenty-one, were the two, "*to learn*," and these, instead of their coming out of my own larynx, came back to me in my own voice, but entirely outside myself, near, but not in me. In short, they were pronounced by my voice, not by my lips. . . .

One more rapid, involuntary motion, one more plunge into the Cymmerian darkness of a (to me) unknown element, and I saw myself standing — actually standing underground, as it seemed. I was compactly and thickly surrounded on all sides, above and below, right and left, with earth, and *in* the mould, and yet it weighed not, and seemed quite immaterial and transparent *to my senses*. I did not realize for one second the utter absurdity, nay, impossibility of that *seeming* fact! One second more, one short instant, and I perceived — oh, inexpressible horror, when I think of it now; for then, although I perceived, realized, and recorded facts and events far more clearly than ever I had done before, I did not seem to be touched in any other way by what I saw. Yes — I perceived a coffin at my feet. It was a plain, unpretentious shell, made of deal, the last couch of the pauper, in which, notwithstanding its closed lid, I plainly saw a hideous, grinning skull, a man's skeleton, mutilated and broken in many of its parts, as though it had been taken out of some hidden chamber of the defunct Inquisition, where it had been subjected to torture. "Who can it be?" — I thought.

At this moment I heard again proceeding from afar the same voice — *my voice*. . . . "*the reason or reasons why*" . . . it said; as though these words were the unbroken continuation of the same sentence of which it had just repeated the two words "to learn." It sounded near, and yet as from some incalculable distance; giving me then the idea that the long subterranean journey, the subsequent mental reflexions and discoveries, had occupied no time; had been performed during the short, almost instantaneous interval between the first and the middle words of the sentence, begun, at any rate, if not actually pronounced by myself in my room at Kyoto, and which it was now finishing, in interrupted, broken phrases, like a faithful echo of my own words and voice. . . .

Forthwith, the hideous, mangled remains began assuming a form, and, to me, but too familiar appearance. The broken parts joined together one to the other, the bones became covered once more with flesh, and I recognized in these disfigured remains — with some surprise, but not a trace of feeling at the sight — my sister's dead husband, my own brother-in-law, whom I had for her sake loved so truly. "How was it, and how did he come to die such a terrible death?" — I asked myself. To put oneself a query seemed, in the state in which I was, to instantly solve it. Hardly had I asked myself the question, when as if in a panorama, I saw the retrospective picture of poor Karl's death, in all its horrid vividness, and with every thrilling detail, every one of which, however, left me then entirely and brutally indifferent. Here he is, the dear old fellow, full of life and joy at the prospect of more lucrative employment from his principal, examining and trying in a wood-sawing factory a monster steam engine just arrived from America. He bends over, to examine more closely an inner arrangement, to tighten a screw. His clothes are caught by the teeth of the revolving wheel in full motion, and suddenly he is dragged down, doubled up, and his limbs half severed, torn off, before the workmen, unacquainted with the mechanism, can stop it. He is taken out, or what remains of him, dead, mangled, a thing of horror, an unrecognisable mass of palpitating flesh and blood! I follow the remains, wheeled as an unrecognizable heap to the hospital, hear the brutally given order that the messengers of death should stop on their way at the house of the widow and orphans. I follow them, and find the unconscious family quietly assembled together. I see my sister, the dear and beloved, and remain indifferent at the sight,

Nightmare Tales

only feeling highly interested in the coming scene. My heart, my feelings, even my personality, seem to have disappeared, to have been left behind, to belong to somebody else.

There "I" stand, and witness her unprepared reception of the ghastly news. I realize clearly, without one moment's hesitation or mistake, the effect of the shock upon her, I perceive clearly, following and recording, to the minutest detail, her sensations and the inner process that takes place in her. I watch and remember, missing not one single point.

As the corpse is brought into the house for identification I hear the long agonizing cry, my own name pronounced, and the dull thud of the living body falling upon the remains of the dead one. I followed with curiosity the sudden thrill and the instantaneous perturbation in her brain that follow it, and watch with attention the worm-like, precipitate, and immensely intensified motion of the tubular fibres, the instantaneous change of colour in the cephalic extremity of the nervous system, the fibrous nervous matter passing from white to bright red and then to a dark red, bluish hue. I notice the sudden flash of a phosphorous-like, brilliant Radiance, its tremor and its sudden extinction followed by darkness — complete darkness in the region of memory — as the Radiance, comparable in its form only to a human shape, oozes out suddenly from the top of the head, expands, loses its form and scatters. And I say to myself: "This is insanity; life-long, incurable insanity, for the principle of intelligence is not paralyzed or extinguished temporarily, but has just deserted the tabernacle for ever, ejected from it by the terrible force of the sudden blow The link between the animal and the divine essence is broken" And as the unfamiliar term "divine" is mentally uttered *my* "THOUGHT" — laughs.

Suddenly I hear again my far-off yet near voice pronouncing emphatically and close by me the words. . . . "*why my sister has so suddenly ceased writing*". . . . And before the two final words "*to me*" have completed the sentence, I see a long series of sad events, immediately following the catastrophe.

I behold the mother, now a helpless, grovelling idiot, in the lunatic asylum attached to the city hospital, the seven younger children admitted into a refuge for paupers. Finally I see the two elder, a boy of fifteen and a girl a year younger, my favourites, both taken by strangers into their service. A captain of a sailing vessel carries away my nephew, an old Jewess adopts the tender girl. I see the events with all their horrors and thrilling details, and record each, to the smallest detail, with the utmost coolness.

For, mark well: when I use such expressions as horrors " etc., they are to be understood as an afterthought. During the whole time of the events described I experienced no sensation of either pain or pity. My feelings seemed to be paralyzed as well as my external senses; it was only after "coming back" that I realized my irretrievable losses to their full extent.

Much of that which I had so vehemently denied in those days, owing to sad personal experience I have to admit now. Had I been told by any one at that time, that man could act and think and feel, irrespective of his brain and senses; nay, that by some mysterious, and to this day, for me, incomprehensible power, *he* could be transported *mentally*, thousands of miles away from his body, there to witness not only present but also past events, and remember these by storing them in his memory — I would have proclaimed that man as a madman. Alas, I can do so no longer, for I have become myself that "madman." Ten, twenty, forty, a hundred times during the course of this wretched life of mine, have I experienced and lived over such moments of existence, *outside of my body*. Accursed be that hour when this terrible power was first awakened in me! I have not even the consolation left of attributing such glimpses of events at a distance to insanity. Madmen rave and see that which exists not in the realm they belong to. My visions have proved *invariably correct*. But to my narrative of woe.

I had hardly had time to see my unfortunate young niece in her new Israelitish home, when I felt a shock of the same nature as the one that had sent me "swimming" through the bowels of the earth, as I had thought. I

opened my eyes in my own room, and the first thing I fixed upon, by accident, was the clock. The hands of the dial showed seven minutes and a half past five! . . . I had thus passed through these most terrible experiences which it takes me hours to narrate, *in precisely half a minute of time!*

But this, too, was an afterthought. For one brief instant I recollected nothing of what I had seen. The interval between the time I had glanced at the clock when taking the mirror from the Yamabooshi's hand and this second glance, seemed to me merged in one. I was just opening my lips to hurry on the Yamabooshi with his experiment, when the full remembrance of what I had just seen flashed lightning — like into my brain. Uttering a cry of horror and despair, I felt as though the whole creation were crushing me under its weight. For one moment I remained speechless, the picture of human ruin amid a world of death and desolation. My heart sank down in anguish: my doom was closed; and a hopeless gloom seemed to settle over the rest of my life for ever.

V -- RETURN OF DOUBTS

Then came a reaction as sudden as my grief itself. A doubt arose in my mind, which forthwith grew into a fierce desire of denying the truth of what I had seen. A stubborn resolution of treating the whole thing as an empty, meaningless dream, the effect of my overstrained mind, took possession of me. Yes; it was but a lying vision, an idiotic cheating of my own senses, suggesting pictures of death and misery which had been evoked by weeks of incertitude and mental depression.

"How could I see all that I have seen in less than half a minute?" — I exclaimed. "The theory of dreams, the rapidity with which the material changes on which our ideas in vision depend, are excited in the hemispherical ganglia, is sufficient to account for the long series of events I have seemed to experience. In dream alone can the relations of space and time be so completely annihilated. The Yamabooshi is for nothing in this disagreeable nightmare. He is only reaping that which has been sown by myself, and, by using some infernal drug, of which his tribe have the secret, he has contrived to make me lose consciousness for a few seconds and see that vision — as lying as it is horrid. Avaunt all such thoughts, I believe them not. In a few days there will be a steamer sailing for Europe . . . I shall leave to-morrow!

This disjointed monologue was pronounced by me aloud, regardless of the presence of my respected friend the Bonze, Tamoor, and the Yamabooshi. The latter was standing before me in the same position as when he placed the mirror in my hands, and kept looking at me calmly, I should perhaps say looking through me, and in dignified silence. The Bonze, whose kind countenance was beaming with sympathy, approached me as he would a sick child, and gently laying his hand on mine, and with tears in his eyes, said: "Friend, you must not leave this city before you have been completely purified of your contact with the lower Daij-Dzins (spirits), who had to be used to guide your inexperienced soul to the places it craved to see. The entrance to your Inner Self must be closed against their dangerous intrusion. Lose no time, therefore, my Son, and allow the holy Master, yonder, to purify you at once."

But nothing can be more deaf than anger once aroused. "The sap of reason" could no longer "quench the fire of passion," and at that moment I was not fit to listen to his friendly voice. His is a face I can never recall to my memory without genuine feeling; his, a name I will ever pronounce with a sigh of emotion; but at that ever memorable hour when my passions were inflamed to white heat, I felt almost a hatred for the kind, good old man, I could not forgive him his interference in the present event. Hence, for all answer, therefore, he received from me a stern rebuke, a violent protest on my part against the idea that I could ever regard the vision I had had, in any other light save that of an empty dream, and his Yamabooshi as anything better than an imposter. "I will leave to-morrow, had I to forfeit my whole fortune as a penalty" — I exclaimed, pale with rage and despair.

Nightmare Tales

"You will repent it the whole of your life, if you do so before the holy man has shut every entrance in you against intruders ever on the watch and ready to enter the open door," was the answer. "The Daij-Dzins will have the best of you."

I interrupted him with a brutal laugh, and a still more brutally phrased enquiry about the *fees* I was expected to give the Yamabooshi, for his experiment with me.

"He needs no reward," was the reply. "The order he belongs to is the richest in the world, since its adherents need nothing, for they are above all terrestrial and venal desires. Insult him not, the good man who came to help you out of pure sympathy for your suffering, and to relieve you of mental agony."

But I would listen to no words of reason and wisdom. The spirit of rebellion and pride had taken possession of me, and made me disregard every feeling of personal friendship, or even of simple propriety. Luckily for me, on turning round to order the medican monk out of my presence, I found he had gone.

I had not seen him move, and attributed his stealthy departure to fear at having been detected and understood.

Fool! blind, conceited idiot that I was! Why did I fail to recognize the Yamabooshi's power, and that the peace of my whole life was departing with him, from that moment for ever? But I did so fail. Even the fell demon of my long fears — uncertainty — was now entirely overpowered by that fiend scepticism — the silliest of all. A dull, morbid unbelief, a stubborn denial of the evidence of my own senses, and a determined will to regard the whole vision as a fancy of my overwrought mind, had taken firm hold of me.

"My mind," I argued, "what is it? Shall I believe with the superstitious and the weak that this production of phosphorus and grey matter is indeed the superior part of me; that it can act and see independently of my physical senses? Never! As well believe in the planetary 'intelligences' of the astrologer, as in the 'Daij-Dzins' of my credulous though well-meaning friend, the priest. As well confess one's belief in Jupiter and Sol, Saturn and Mercury, and that these worthies guide their spheres and concern themselves with mortals, as to give one serious thought to the airy nonentities supposed to have guided my 'soul' in its unpleasant dream! I loathe and laugh at the absurd idea. I regard it as a personal insult to the intellect and rational reasoning powers of a man, to speak of invisible creatures, 'subjective intelligences,' and all that kind of insane superstition." In short, I begged my friend the Bonze to spare me his protests, and thus the unpleasantness of breaking with him for ever.

Thus I raved and argued before the venerable Japanese gentleman, doing all in my power to leave on his mind the indelible conviction of my having gone suddenly mad. But his admirable forbearance proved more than equal to my idiotic passion; and he implored me once more, for the sake of my whole future, to submit to certain "necessary purificatory rites."

"Never! Far rather dwell in air, rarified to nothing by the air-pump or wholesome unbelief, than in the dim fog of silly superstition," I argued, paraphrasing Richter's remark. "I will not believe," I repeated; "but as I can no longer bear such uncertainty about my sister and her family, I will return by the first steamer to Europe."

This final determination upset my old acquaintance altogether. His earnest prayer not to depart before I had seen the Yamabooshi once more, received no attention from me.

"Friend of a foreign land!" — he cried, "I pray that you may not repent of your unbelief and rashness. May the 'Holy One' [Kwan-On, the Goddess of Mercy] protect you from the Dzins! For, since you refuse to submit to the process of purification at the hands of the holy Yamabooshi, he is powerless to defend you from the evil influences evoked by your unbelief and defiance of truth. But let me, at this parting hour, I beseech

Nightmare Tales

you, let me, an older man who wishes you well, warn you once more and persuade you of things you are still ignorant of. May I speak?"

"Go on and have your say," was the ungracious assent. "But let me warn you, in my turn, that nothing you can say can make of me a believer in your disgraceful superstitions." This was added with a cruel feeling of pleasure in bestowing one more needless insult.

But the excellent man disregarded this new sneer as he had all others. Never shall I forget the solemn earnestness of his parting words, the pitying, remorseful look on his face when he found that it was, indeed, all to no purpose, that by his kindly meant interference he had only led me to my destruction.

"Lend me your ear, good sir, for the last time," he began, "learn that unless the holy and venerable man; who, to relieve your distress, opened your 'soul vision,' is permitted to complete his work, your future life will, indeed, be little worth living. He has to safeguard you against involuntary repetitions of visions of the same character. Unless you consent to it of your own free will, however, you will have to be left in the power of *Forces* which will harass and persecute you to the verge of insanity. Know that the development of 'Long Vision' [clairvoyance] — which is accomplished *at will* only by those for whom the Mother of Mercy, the great Kwan-On, has no secrets — must, in the case of the beginner, be pursued with help of the air Dzens (elemental spirits) whose nature is soulless, and hence wicked. Know also that, while the Arihat, 'the destroyer of the enemy,' who has subjected and made of these creatures his servants, has nothing to fear; he who has no power over them becomes their slave. Nay, laugh not in your great pride and ignorance, but listen further. During the time of the vision and while the inner perceptions are directed toward the events they seek, the Daij-Dzin has the seer — when, like yourself, he is an inexperienced tyro — entirely in its power; and for the time being *that seer is no longer himself*. He partakes of the nature of his 'guide.' The Dali-Dzin, which directs his inner sight, keeps his soul in durance vile, making of him, while the state lasts, a creature like itself. Bereft of his divine light, man is but a soulless being; hence during the time of such connection, he will feel no human emotions, neither pity nor fear, love nor mercy."

"Hold!" I involuntarily exclaimed, as the words vividly brought back to my recollections the indifference with which I had witnessed my sister's despair and sudden loss of reason in my "hallucination," "Hold! . . . But no; it is still worse madness in me to heed or find any sense in your ridiculous tale! But if you knew it to be so dangerous why have advised the experiment at all?" — I added mockingly.

"It had to last but a few seconds, and no evil could have resulted from it, had you kept your promise to submit to purification," was the sad and humble reply. "I wished you well, my friend, and my heart was nigh breaking to see you suffering day by day. The experiment is harmless enough when directed by *one who knows*, and becomes dangerous only when the final precaution is neglected. It is the 'Master of Visions,' he who has opened an entrance into your soul, who has to close it by using the Seal of Purification against any further and deliberate ingress of. . . ."

"The 'Master of Visions' forsooth!" I cried, brutally interrupting him, "say rather the Master of Imposture!"

The look of sorrow on his kind old face was so intense and painful to behold that I perceived I had gone too far; but it was too late.

"Farewell, then!" said the old Bonze, rising; and after performing the usual ceremonials of politeness, Tamoorā left the house in dignified silence.

VI -- I DEPART -- BUT NOT ALONE

Several days later I sailed, but during my stay I saw my venerable friend, the Bonze, no more. Evidently on that last, and to me for ever memorable evening, he had been seriously offended with my more than irreverent, my downright insulting remark about one whom he so justly respected. I felt sorry for him, but the wheel of passion and pride was too incessantly at work to permit me to feel a single moment of remorse. What was it that made me so relish the pleasure of wrath, that when, for one instant, I happened to lose sight of my supposed grievance toward the Yamabooshi, I forthwith lashed myself back into a kind of artificial fury against him. He had only accomplished what he had been expected to do, and what he had tacitly promised; not only so, but it was I myself who had deprived him of the possibility of doing more, even for my own protection if I might believe the Bonze -- a man whom I knew to be thoroughly honourable and reliable. Was it regret at having been forced by my pride to refuse the proffered precaution, or was it the fear of remorse that made me rake together, in my heart, during those evil hours, the smallest details of the supposed insult to that same suicidal pride? Remorse, as an old poet has aptly remarked, "is like the heart in which it grows: . . .

". . . if proud and gloomy,
It is a poison-tree, that pierced to the utmost,
Weeps only tears of blood" . . .

Perchance, it was the indefinite fear of something of that sort which caused me to remain so obdurate, and led me to excuse, under the plea of terrible provocation, even the unprovoked insults that I had heaped upon the head of my kind and all-forgiving friend, the priest. However, it was now too late in the day to recall the words of offence I had uttered; and all I could do was to promise myself the satisfaction of writing him a friendly letter, as soon as I reached home. Fool, blind fool, elated with insolent self-conceit, that I was! So sure did I feel, that my vision was due merely to some trick of the Yamabooshi, that I actually gloated over my coming triumph in writing to the Bonze that I had been right in answering his sad words of parting with an incredulous smile, as my sister and family were all in good health -- happy!

I had not been at sea for a week, before I had cause to remember his words of warning!

From the day of my experience with the magic mirror, I perceived a great change in my whole state, and I attributed it, at first, to the mental depression I had struggled against for so many months. During the day I very often found myself absent from the surroundings scenes, losing sight for several minutes of things and persons. My nights were disturbed, my dreams oppressive, and at times horrible. Good sailor I certainly was; and besides, the weather was unusually fine, the ocean as smooth as a pond. Notwithstanding this, I often felt a strange giddiness, and the familiar faces of my fellow-passengers assumed at such times the most grotesque appearances. Thus, a young German I used to know well was once suddenly transformed before my eyes into his old father, whom we had laid in the little burial place of the European colony some three years before. We were talking on deck of the defunct and of a certain business arrangement of his, when Max Grunner's head appeared to me as though it were covered with a strange film. A thick greyish mist surrounded him, and gradually condensing around and upon his healthy countenance, settled suddenly into the grim old head I had myself seen covered with six feet of soil. On another occasion, as the captain was talking of a Malay thief whom he had helped to secure and lodge in goal, I saw near him the yellow, villainous face of a man answering to his description. I kept silence about such hallucinations; but as they became more and more frequent, I felt very much disturbed, though still attributing them to natural causes, such as I had read about in medical books.

One night I was abruptly awakened by a long and loud cry of distress. It was a woman's voice, plaintive like that of a child, full of terror and of helpless despair. I awoke with a start to find myself on land, in a strange

room. A young girl, almost a child, was desperately struggling against a powerful middle-aged man, who had surprised her in her own room, and during her sleep. Behind the closed and locked door, I saw listening an old woman, whose face, notwithstanding the fiendish expression upon it, seemed familiar to me, and I immediately recognized it: it was the face of the Jewess who had adopted my niece in the dream I had at Kioto. She had received gold to pay for her share in the foul crime, and was now keeping her part of the covenant But who was the victim? O horror unutterable! Unspeakable horror! When I realized the situation after coming back to my normal state, I found it was my own child-niece.

But, as in my first vision, I felt in me nothing of the nature of that despair born of affection that fills one's heart, at the sight of a wrong done to, or a misfortune befalling, those one loves; nothing but a manly indignation in the presence of suffering inflicted upon the weak and the helpless. I rushed, of course, to her rescue, and seized the wanton, brutal beast by the neck. I fastened upon him with powerful grasp, but, the man heeded it not, he seemed not even to feel my hand. The coward, seeing himself resisted by the girl, lifted his powerful arm and the thick fist, coming down like a heavy hammer upon the sunny locks, felled the child to the ground. It was with a loud cry of the indignation of a stranger, not with that of a tigress defending her cub, that I sprang upon the lewd beast and sought to throttle him. I then remarked, for the first time, that, a shadow myself, I was grasping but another shadow!

My loud shrieks and imprecations had awakened the whole steamer. They were attributed to a nightmare. I did not seek to take anyone into my confidence; but, from that day forward, my life became a long series of mental tortures, I could hardly shut my eyes without becoming witness of some horrible deed, some scene of misery, death or crime, whether past, present or even future — as I ascertained later on. It was as though some mocking fiend had taken upon himself the task of making me go through the vision of everything that was bestial, malignant and hopeless, in this world of misery. No radiant vision of beauty or virtue ever lit with the faintest ray these pictures of awe and wretchedness that I seemed doomed to witness. Scenes of wickedness, of murder, of treachery and of lust fell dismally upon my sight, and I was brought face to face with the vilest results of man's passions, the most terrible outcome of his material earthly cravings.

Had the Bonze foreseen, indeed, the dreary results, when he spoke of Daij-Dzins to whom I left "an ingress" "a door open" in me? Nonsense! There must be some physiological, abnormal change in me. Once at Nuremberg, when I have ascertained how false was the direction taken by my fears — I dared not hope for no misfortune at all — these meaningless visions will disappear as they came. The very fact that my fancy follows but one direction, that of pictures of misery, of human passions in their worst, material shape, is a proof, to me, of their unreality.

"If, as you say, man consists of one substance, matter, the object of the physical senses; and if perception with its modes is only the result of the organization of the brain, then should we be naturally attracted but to the material, the earthly" . . . I thought I heard the familiar voice of the Bonze interrupting my reflections, and repeating an often used argument of his in his discussions with me.

"There are two planes of visions before men," I again heard him say, "the plane of undying love and spiritual aspirations, the efflux from the eternal light; and the plane of restless, ever changing matter, the light in which the misguided Daij-Dzins bathe."

VII -- ETERNITY IN A SHORT DREAM

In those days I could hardly bring myself to realize, even for a moment, the absurdity of a belief in any kind of spirits, whether good or bad. I now understood, if I did not believe, what was meant by the term, though I still persisted in hoping that it would finally prove some physical derangement or nervous hallucination. To fortify my unbelief the more, I tried to bring back to my memory all the arguments used against faith in such

superstitions, that I had ever read or heard. I recalled the biting sarcasms of Voltaire, the calm reasoning of Hume, and I repeated to myself *ad nauseam* the words of Rousseau, who said that superstition, "the disturber of Society," could never be too strongly attacked. "Why should the sight, the phantasmagoria, rather" — I argued — "of that which we know in a waking sense to be false, come to affect us at all?" Why should —

"Names, whose sense we see not

Fray us with things that be not?"

One day the old captain was narrating to us the various superstitions to which sailors were addicted; a pompous English missionary remarked that Fielding had declared long ago that "superstition renders a man a fool," — after which he hesitated for an instant, and abruptly stopped. I had not taken any part in the general conversation; but no sooner had the reverend speaker relieved himself of the quotation than I saw in that halo of vibrating light, which I now noticed almost constantly over every human head on the steamer, the words of Fielding's next proposition — "*scepticism makes him mad.*"

I had heard and read of the claims of those who pretend to seership, that they often see the thoughts of people traced in the aura of those present. Whatever "aura" may mean with others, I had now a personal experience of the truth of the claim, and felt sufficiently disgusted with the discovery! I — a *clairvoyant*! a new horror added to my life, an absurd and ridiculous gift developed, which I shall have to conceal from all, feeling ashamed of it as if it were a case of leprosy. At this moment my hatred to the Yamabooshi, and even to my venerable old friend, the Bonze, knew no bounds. The former had evidently by his manipulations over me while I was lying unconscious, touched some unknown physiological spring in my brain, and by loosing it had called forth a faculty generally hidden in the human constitution; and it was the Japanese priest who had introduced the wretch into my house!

But my anger and my curses were alike useless, and could be of no avail. Moreover, we were already in European waters, and in a few more days we should be at Hamburg. Then would my doubts and fears be set at rest, and I should find, to my intense relief, that although clairvoyance, as regards the reading of human thoughts on the spot, may have some truth in it, the discernment of such events at a distance, as I had *dreamed of*, was an impossibility for human faculties. Notwithstanding all my reasoning, however, my heart was sick with fear, and full of the blackest presentiments; I *felt* that my doom was closing. I suffered terribly, my nervous and mental prostration becoming intensified day by day.

The night before we entered port I had a dream.

I fancied I was dead. My body lay cold and stiff in its last sleep, whilst its dying consciousness, which still regarded itself as "I," realizing the event, was preparing to meet in a few seconds its own extinction. It had been always my belief that as the brain preserved heat longer than any of the other organs, and was the last to cease its activity, the thought in it survived bodily death by several minutes. Therefore, I was not in the least surprised to find in my dream that while the frame had already crossed that awful gulf "no mortal e'er re-passed," its consciousness was still in the gray twilight, the first shadows of the great Mystery. Thus my THOUGHT wrapped, as I believed, in the remnants, of its now fast retiring vitality, was watching with intense and eager curiosity the approaches of its own dissolution, *i.e.*, of its *annihilation*. "I" was hastening to record my last impressions, lest the dark mantle of eternal oblivion should envelope me, before I had time to feel and *enjoy*, the great, the supreme triumph of learning that my life-long convictions were true, that death is a complete and absolute cessation of conscious being. Everything around me was getting darker with every moment. Huge grey shadows were moving before my vision, slowly at first, then with accelerated motion, until they commenced whirling around with an almost vertiginous rapidity. Then, as though that motion had taken place for the purposes of brewing darkness, the object once reached, it slackened its speed, and the darkness became gradually transformed into intense blackness, it ceased altogether. There was nothing now

within my immediate perceptions, but that fathomless black Space, as dark as pitch; to me it appeared as limitless and as silent as the shoreless Ocean of Eternity upon which Time, the progeny of man's brain, is forever gliding, but which it can never cross.

Dream is defined by Cato as "but the image of our hopes and fears." Having never feared death when awake, I felt, in this dream of mine, calm and serene at the idea of my speedy end. In truth, I felt rather relieved at the thought — probably owing to my recent mental suffering — that the end of all, of doubt, of fear for those I loved, of suffering, and of every anxiety, was close at hand. The constant anguish that had been gnawing ceaselessly at my heavy, aching heart for many a long and weary month, had now become unbearable; and if as Seneca thinks, death is but "the ceasing to be what we were before," it was better that I should die. The body is dead; "I," its consciousness — that which is all that remains of me now, for a few moments longer — am preparing to follow. Mental perceptions will get weaker, more dim and hazy with every second of time, until the longed for oblivion envelopes me completely in its cold shroud. Sweet is the magic hand of Death, the great World-Comforter; profound and dreamless is sleep in its unyielding arms. Yea, verily, it is a welcome guest. . . . A calm and peaceful haven amidst the roaring billows of the Ocean of life, whose breakers lash in vain the rock-bound shores of Death. Happy the lonely bark that drifts into the still waters of its black gulf, after having been so long, so cruelly tossed about by the angry waves of sentient life. Moored in it for evermore, needing no longer either sail or rudder, my bark will now find rest. Welcome then, O Death, at this tempting price; and fare thee well, poor body, which, having neither sought it nor derived pleasure from it, I now readily give up!

While uttering this death-chant to the prostrate form before me, I bent over, and examined it with curiosity. I felt the surrounding darkness oppressing me, weighing on me almost tangibly, and I fancied I found in it the approach of the Liberator I was welcoming. And yet how very strange! If real, final Death takes place in our consciousness; if after the bodily death, "I" and my conscious perceptions are one — how is it that these perceptions do not become weaker, why does my *brain*-action seem as vigorous as ever now . . . that I am *de facto* dead? . . . Nor does the usual feeling of anxiety, the "heavy heart" so-called, decrease in intensity; nay, it even seems to become worse . . . unspeakably so! . . . How long it takes for full oblivion to arrive! . . . Ah, here's my body again! . . . Vanished out of sight for a second or two, it reappears before me once more . . . How white and ghastly it looks! Yet . . . its brain cannot be quite dead, since "I," its consciousness, am still acting, since we two fancy that we still are, that we live and think, disconnected from our creator and its ideating cells.

Suddenly I felt a strong desire to see how much longer the progress of dissolution was likely to last, before it placed its last seal on the brain and rendered it inactive. I examined my brain in its cranial cavity, through the (to me) entirely transparent walls and roof of the skull, and even *touched the brain-matter* . . . How or with *whose hands*, I am now unable to say; but the impression of the slimy, intensely cold matter produced a very strong impression on me, in that dream. To my great dismay, I found that the blood having entirely congealed and the brain-tissues having themselves undergone a change that would no longer permit any molecular action, it became impossible for me to account for the phenomena now taking place with myself. Here was I, — or my consciousness which is all one — standing apparently entirely disconnected from my brain which could no longer function . . . But I had no time left for reflection. A new and most extraordinary change in my perceptions had taken place and now engrossed my whole attention . . . What does this signify? . . .

The same darkness was around me as before, a black, impenetrable space, extending in every direction. Only now, right before me, in whatever direction I was looking, moving with me which way soever I moved, there was a gigantic round clock; a disc, whose large white face shone ominously on the ebony-black background. As I looked at its huge dial, and at the pendulum moving to and fro regularly and slowly in Space, as if its swinging meant to divide eternity, I saw its needles pointing to *seven minutes past five*. "The hour at which my torture had commenced at Kioto!" I had barely found time to think of the coincidence, when to my unutterable horror, I felt myself going through the same, the identical, process that I had been made to

experience on that memorable and fatal day. I swam underground, dashing swiftly through the earth; I found myself once more in the pauper's grave and recognized my brother-in-law in the mangled remains; I witnessed his terrible death; entered my sister's house; followed her agony, and saw her go mad. I went over the same scenes without missing a single detail of them. But, alas! I was no longer iron-bound in the calm indifference that had then been mine, and which in that first vision had left me as unfeeling to my great misfortune as if I had been a heartless thing of rock. My mental tortures were now becoming beyond description and well-nigh unbearable. Even the settled despair, the never-ceasing anxiety I was constantly experiencing when awake, had become now, in my dream and in the face of this repetition of vision and events, as an hour of darkened sunlight compared to a deadly cyclone. Oh! how I suffered in this wealth and pomp of infernal horrors, to which the conviction of the survival of man's consciousness after death — for in that dream I firmly believed that my body was dead — added the most terrifying of all!

The relative relief I felt, when, after going over the last scene, I saw once more the great white face of the dial before me was not of long duration. The long, arrow-shaped needle was pointing on the colossal disk at — *seven minutes and a half—past five* o'clock. But, before I had time to well realize the change, the needle moved slowly backwards, stopped at precisely the seventh minute, and — O cursed fate! . . . I found myself driven into a repetition of the same series over again! Once more I swam underground, and saw, and heard, and suffered every torture that hell can provide; I passed through every mental anguish known to man or fiend. I returned to see the fatal dial and its needle — after what appeared to me an eternity — moved, as before, only half a minute forward. I beheld it, with renewed terror, moving back again, and felt myself propelled forward anew. And so it went on, and on, and on, time after time, in what seemed to me an endless succession, a series which never had any beginning, nor would it ever have an end . . .

Worst of all; my consciousness, my "I," had apparently acquired the phenomenal capacity of trebling, quadrupling, and even of decuplating itself. I lived, felt and suffered, in the same space of time, in half-a-dozen different places at once, passing over various events of my life, at different epochs and under the most dissimilar circumstances; though predominant over all was my *spiritual* experience at Kioto. Thus as in the famous *fugue* in *Don Giovanni*, the heart-rending notes of Elvira's *aria* of despair ring high above, but interfere in no way with the melody of the minuet, the song of seduction, and the chorus, so I went over and over my travailed woes, the feelings of agony unspeakable at the awful sights of my vision, the repetition of which blunted in no wise even a single pang of my despair and horror; nor did these feelings weaken in the least scenes and events entirely disconnected with the first one, that I was living through again, or interfere in any way the one with the other. It was a maddening experience! A series of contrapuntal, mental phantasmagoria from real life. Here was I, during the same half-a-minute of time, examining with cold curiosity the mangled remains of my sister's husband; following with the same indifference the effects of the news on her brain, as in my first Kioto vision, and feeling *at the same time* hell-torture for these very events, as when I returned to consciousness. I was listening to the philosophical discourses of the Bonze, every word of which I heard and understood, and was trying to laugh him to scorn. I was again a child, then a youth, hearing my mother's and my sweet sister's voices, admonishing me and teaching duty to all men. I was saving a friend from drowning, and was sneering at his aged father who thanks me for saving a "soul" yet unprepared to meet his Maker.

"Speak of *dual* consciousness, you psycho-physiologists!" — I cried, in one of the moments when agony, mental and as it seemed to me physical also, had arrived at a degree of intensity which would have killed a dozen living men; "speak of your psychological and physiological experiments, you schoolmen, puffed up with pride and book-learning! Here am I to give you the lie. . . ." And now I was reading the works and holding converse with learned professors and lecturers, who had led me to my fatal scepticism. And, while arguing the impossibility of consciousness divorced from its brain, I was shedding tears of blood over the supposed fate of my nieces and nephews. More terrible than all: I knew, *as only a liberated consciousness can know*, that all I had seen in my vision at Japan, and all that I was seeing and hearing over and over again now, was true in every point and detail, that it was a long string of ghastly and terrible, still of real, actual,

facts.

For, perhaps, the hundredth time, I had rivetted my attention on the needle of the clock, I had lost the number of my gyrations and was fast coming to the conclusion that they would never stop, that consciousness is, after all, indestructible, and that this was to be my punishment in Eternity. I was beginning to realize from personal experience how the condemned sinners would feel — "were not eternal damnation a logical and mathematical impossibility in an ever-progressing Universe" — I still found the force to argue. Yea indeed; at this hour of my ever-increasing agony, my consciousness — now my synonym for "I" — had still the power of revolting at certain theological claims, of denying all their propositions, all — save ITSELF No; I denied the independent nature of my consciousness no longer, for I knew it now to be such. But is it *eternal* withal? O thou incomprehensible and terrible Reality! But if thou art eternal, who then art thou? — since there is no diety, no God. Whence dost thou come, and when didst thou first appear, if thou art not a part of the cold body lying yonder? And whither dost thou lead me, who am thyself, and shall our thought and fancy have an end? What is thy real name, thou unfathomable REALITY, and impenetrable MYSTERY! Oh, I would fain annihilate thee "Soul — Vision"! — who speaks of Soul, and whose voice is this? It says that I see now for myself, that there is a Soul in man, after all. . . . I deny this. My Soul, my vital Soul, or the Spirit of life, has expired with my body, with the gray matter of my brain, This "I" of mine, this consciousness, is not yet proven to me as eternal. Reincarnation, in which the Bonze felt so anxious I should believe, may be true Why not? Is not the flower born year after year from the same root? Hence this "I" once separated from, its brain, losing its balance and calling forth such a host of visions before reincarnating.

I was again face to face with the inexorable, fatal clock. And as I was watching its needle, I heard the voice of the Bonze, coming out of the depths of its white face, saying: "*In this case, I fear you would have only to open and to shut the temple door, over and over again, during a period which, however short, would seem to you an eternity*"

The clock had vanished, darkness made room for light, the voice of my old friend was drowned by a multitude of voices overhead on deck; and I awoke in my berth, covered with a cold perspiration, and faint with terror.

VIII -- A TALE OF WOE

We were at Hamburg, and no sooner had I seen my partners, who could hardly recognise me, than with their consent and good wishes I started for Nuremberg.

Half-an-hour after my arrival, the last doubt with regard to the correctness of my vision had disappeared. The reality was worse than any expectations could have made it, and I was henceforward doomed to the most desolate life. I ascertained that I had seen the terrible tragedy, with all its heartrending details. My brother-in-law, killed under the wheels of a machine; my sister, insane, and now rapidly sinking toward her end; my niece — the sweet flower of nature's fairest work — dishonoured, in a den of infamy; the little children dead of a contagious disease in an orphanage; my last surviving nephew at sea, no one knew where. A whole house, a home of love and peace, scattered; and I, left alone, a witness of this world of death, of desolation and dishonour. The news filled me with infinite despair, and I sank helpless before the wholesale, dire disaster, which rose before me all at once. The shock proved too much, and I fainted. The last thing I heard before entirely losing my consciousness was a remark of the Burgmeister: "Had you, before leaving Kyoto, telegraphed to the city authorities of your whereabouts, and of your intention of coming home to take charge of your young relatives, we might have placed them elsewhere, and thus have saved them from their fate. No one knew that the children had a well-to-do relative. They were left paupers and had to be dealt with as such. They were comparatively strangers in Nuremberg, and under the unfortunate circumstances you

could have hardly expected anything else I can only express my sincere sorrow."

It was this terrible knowledge that I might, at any rate, have saved my young niece from her unmerited fate, but that through my neglect I had not done so, that was killing me. Had I but followed the friendly advice of the Bonze, Tamoor, and telegraphed to the authorities some weeks previous to my return much might have been avoided. It was all this, coupled with the fact that I could no longer doubt clairvoyance and clairaudience — the possibility of which I had so long denied — that brought me so heavily down upon my knees. I could avoid the censure of my fellow-creatures but I could never escape the stings of my conscience, the reproaches of my own aching heart — no, not as long as I lived! I cursed my stubborn scepticism, my denial of facts, my early education, I cursed myself and the whole world. . . .

For several days I contrived not to sink beneath my load, for I had a duty to perform to, the dead and to the living. But my sister once rescued from the pauper's asylum, placed under the care of the best physicians, with her daughter to attend to her last moments, and the Jewess, whom I had brought to confess her crime, safely lodged in goal — my fortitude and strength suddenly abandoned me. Hardly a week after my arrival I was myself no better than a raving maniac, helpless in the strong grip of a brain fever. For several weeks I lay between life and death, the terrible disease defying the skill of the best physicians. At last my strong constitution prevailed, and — to my lifelong sorrow — they proclaimed me saved.

I heard the news with a bleeding heart. Doomed to drag the loathsome burden of life henceforth alone, and in constant remorse; hoping for no help or remedy on earth, and still refusing to believe in the possibility of anything better than a short survival of consciousness beyond the grave, this unexpected return to life added only one more drop of gall to my bitter feelings. They were hardly soothed by the immediate return, during the first days of my convalescence, of those unwelcome and unsought for visions, whose correctness and reality I could deny no more. Alas the day! they were no longer in my sceptical, blind mind.

"The children of an idle brain,

Begot of nothing but vain Fantasy";

but always the faithful photographs of the real woes and sufferings of my fellow creatures, of my best friends. . . . Thus I found myself doomed, whenever I was left for a moment alone, to the helpless torture of a chained Prometheus. During the still hours of night, as though held by some pitiless iron hand, I found myself led to my sister's bedside, forced to watch there hour after hour, and see the silent disintegration of her wasted organism; to witness and feel the sufferings that her own tenantless brain could no longer reflect or convey to her perceptions. But there was something still more horrible to barb the dart that could never be extricated. I had to look, by day, at the childish innocent face of my young niece, so sublimely simple and guileless in her pollution; and to witness, by night, how the full knowledge and recollection of her dishonour, of her young life now for ever blasted, came to her in her dreams, as soon as she was asleep. The dreams took an objective form to me, as they had done on the steamer; I had to live them over again, night after night, and feel the same terrible despair. For now, since I believed in the reality of seership, and had come to the conclusion that in our bodies lies hidden, as in the caterpillar, the chrysalis which may contain in its turn the butterfly — the symbol of the soul — I no longer remained indifferent, as of yore, to what I witnessed in my Soul-life. Something had suddenly developed in me, had broken loose from its icy cocoon. Evidently I no longer saw only in consequence of the identification of my inner nature with a Daij-Dzin; my visions arose in, consequence of a direct personal psychic development, the fiendish creatures only taking care that I should see nothing of an agreeable or elevating nature. Thus, now, not an unconscious pang in my dying sister's emaciated body, not a thrill of horror in my niece's restless sleep at the recollection of the crime perpetrated upon her, an innocent child, but found a responsive echo in my bleeding heart. The deep fountain of sympathetic love and sorrow had gushed out from the physical heart, and was now loudly echoed by the awakened soul separated from the body. Thus had I to drain the cup of misery to the very dregs! Woe is me,

it was a daily and nightly torture! Oh, how I mourned over my proud folly; how I was punished for having neglected to avail myself at Moto of the proffered purification, for now I had come to believe even in the efficacy of the latter. The Daij-Dzin had indeed obtained control over me; and the fiend had let loose all the dogs of hell upon his victim. . . .

At last the awful gulf was reached and crossed. The poor insane martyr dropped into her dark, and now welcome grave, leaving behind her, but for a few short months, her young, her first-born, daughter. Consumption made short work of that tender girlish frame. Hardly a year after my arrival, I was left alone in the whole wide world, my only surviving nephew having expressed a desire to follow his sea-faring career.

And now, the sequel of my sad story is soon told. A wreck, a prematurely old man, looking at thirty as though sixty winters had passed over my doomed head, and owing to the never-ceasing visions, myself daily on the verge of insanity, I suddenly formed a desperate resolution. I would return to Kioto and seek out the Yamabooshi. I would prostrate myself at the feet of the holy man, and would not leave him until he had recalled the Frankenstein he had raised, the Frankenstein with whom at the time, it was I, myself, who would, not part, through my insolent pride and unbelief.

Three months later I was in my Japanese home again, and I at-once sought out my old, venerable Bonze, Tamooro Hideyeri, I now implored him to take me without an hour's delay to the Yamabooshi, the innocent cause of my daily tortures. His answer but placed the last, the supreme seal on my doom and tenfold intensified my despair. The Yamabooshi had left the country for lands unknown! He had departed one fine morning into the interior, on a pilgrimage, and according to custom, would be absent, unless natural death shortened the period, for no less than seven years! . . .

In this mischance, I applied for help and protection to other learned Yamabooshis; and though well aware how useless it was in my case to seek efficient cure from any other "adept," my excellent old friend did everything he could to help me in my misfortune. But it was to no purpose, and the canker-worm of my life's despair could not be thoroughly extricated. I found from them that not one of these learned men could promise to relieve me entirely from the demon of clairvoyant obsession. It was he who raised certain Daij-Dzins, calling on them to show futurity, or things that had already come to pass, who alone had full control over them. With kind sympathy, which I had now learned to appreciate, the holy men invited me to join the group of their disciples, and learn from them what I could do for myself. "Will alone, faith in your own soul-powers, can help you now," they said. "But it may take several years to undo even a part of the great mischief," they added. "A Daij-Dzin is easily dislodged in the beginning; if left alone, he takes possession of a man's nature and it becomes almost impossible to uproot the fiend without killing his victim."

Persuaded that there was nothing but this left for me to do, I gratefully assented, doing my best to believe in all that these holy men believed in, and yet ever failing to do so in my heart. The demon of unbelief and all-denial seemed rooted in me more firmly ever than the Daij-Dzin. Still I did all I could do, decided as I was not to lose my last chance of salvation. Therefore, I proceeded without delay to, free myself from the world and my commercial obligations, in order to live for several years an independent life. I settled my accounts with my Hamburg partners and severed my connection with the firm. Notwithstanding considerable financial losses resulting from such a precipitate liquidation, I found myself, after closing the accounts, a far richer man than I had thought I was. But wealth had no longer any attraction for me, now that I had no one to share it with, no one to work for. Life had become a burden; and such was my indifference to my future, that while giving away all my fortune to my nephew — in case he should return alive from his sea voyager — should have neglected entirely even a small provision for myself, had not my native partner interfered and insisted upon my making it. I now recognized, with Lao-tze, that Knowledge was the only firm hold for a man to trust to, as it is the only one that cannot be shaken by any tempest. Wealth is a weak anchor in the days of sorrow, and self-conceit the most fatal counsellor. Hence I followed the advice of my friends, and laid aside for myself a modest sum, which would be sufficient to assure me a small income for life, or if I

ever left my new friends and instructors. Having settled my earthly accounts and disposed of my belongings at Kyoto, I joined the "Masters of the Long Vision," who took me to their mysterious abode. There I remained for several years, studying very earnestly and in the most complete solitude, seeing no one but a few of the members of our religious community.

Many are the mysteries of nature that I have fathomed since then, and many secret folio from the library of Tzionene have I devoured, obtaining thereby mastery over several kinds of invisible beings of a lower order. But the great secret of power over the terrible Daij–Dzin I could not get. It remains in the possession of a very limited number of the highest Initiates of Lao–tze, the great majority of the Yamabooshis themselves being ignorant how to obtain such mastery over the dangerous Elemental. One who would reach such power of control would have to become entirely identified with the Yamabooshis, to accept their views and beliefs, and to attain the highest degree of Initiation. Very naturally, I was found unfit to join the Fraternity, owing to many insurmountable reasons besides my congenital and ineradicable scepticism, though I tried hard to believe. Thus, partially relieved of my affliction and taught how to conjure the unwelcome visions away, I still remained, and do remain to this day, helpless to prevent their forced appearance before me now and then.

It was after assuring myself of my unfitness for the exalted position of an independent Seer and Adept that I reluctantly gave up any further trial. Nothing had been heard of the holy man, the first innocent cause of my misfortune; and the old Bonze himself, who occasionally visited me in my retreat, either could not, or would not, inform me of the whereabouts of the Yamabooshi. When, therefore, I had to give up all hope of his ever relieving me entirely from my fatal gift, I resolved to return to Europe, to settle in solitude for the rest of my life. With this object in view, I purchased through my late partners the Swiss chalet in which my hapless sister and I were born, where I had grown up under her care, and selected it for my future hermitage.

When bidding me farewell for ever on the steamer which took me back to my fatherland, the good old Bonze tried to console me for my disappointments. "My son," he said, "regard all that happened to you as your Karma — a just retribution. No one who had subjected himself willingly to the power of a Daij–Dzin can ever hope to become a Rahat (an Adept), a high–souled Yamabooshi — unless immediately purified. At best, as in your case, he may become fitted to oppose and to successfully fight off the fiend. *Like a scar left after a poisonous wound the race of a Daij–Dzin can never be effaced from the Soul until purified by a new rebirth* Withal, feel not dejected, but be of good cheer in your affliction, since it has led you to acquire true knowledge, and to accept many a truth you would have otherwise rejected with contempt. And of this priceless knowledge, acquired through suffering and personal efforts — no Daij–Dzin can ever deprive you. Fare thee well, then, and may the Mother of Mercy, the great Queen of Heaven, afford you comfort and protection."

We parted, and since then I have led the life of an anchorite, in constant solitude and study. Though still occasionally afflicted, I do not regret the years I have passed under the instruction of the Yamabooshis, but feel gratified for the knowledge received. Of the priest Tamoora Hideyeri I think always with sincere affection and respect. I corresponded regularly with him to the day of his death; an event which, with all its to me painful details, I had the unthanked–for privilege of witnessing across the seas, at the very hour in which it occurred.

THE LUMINOUS SHIELD

We were a small and select party of lighthearted travellers. We had arrived at Constantinople a week before from Greece, and had devoted fourteen hours a day ever since to toiling up and down the steep heights of Pera, visiting bazaars, climbing to the tops of minarets and fighting our way through armies of hungry dogs, the traditional masters of the streets of Stamboul. Nomadic life is infectious, they say, and no civilization is

strong enough to destroy the charm of unrestrained freedom when it has once been tasted. The gipsy cannot be tempted from his tent, and even the common tramp finds a fascination in his comfortless and precarious existence, that prevents him taking to any fixed abode and occupation. To guard my spaniel Ralph from falling a victim to this infection, and joining the canine Bedouins that, infested the streets, was my chief care during our stay in Constantinople. He was a fine fellow, my constant companion and cherished friend. Afraid of losing him, I kept a strict watch over his movements; for the first three days, however, he behaved like a tolerably well-educated quadruped, and remained faithfully at my heels. At every impudent attack from his Mahomedan cousins, whether intended as a hostile demonstration or an overture of friendship, his only reply would be to draw in his tail between his legs, and with an air of dignified modesty seek protection under the wing of one or other of our party.

As he had thus from the first shown so decided an aversion to bad company, I began to feel assured of his discretion and by the end of the third day I had considerably relaxed my vigilance. This carelessness on my part, however, was soon punished, and I was made to regret my misplaced confidence. In an unguarded moment he listened to the voice of some four-footed syren, and the last I saw of him was the end of his bushy tail, vanishing round the corner of a dirty, winding little back street.

Greatly annoyed, I passed the remainder of the day in a vain search after my dumb companion, I offered twenty, thirty, forty francs reward for him. About as many vagabond Maltese began a regular chase, and towards evening we were invaded in our hotel by the whole troop, every man of them with a more or less mangy cur in his arms, which he tried to persuade me was my lost dog. The more I denied, the more solemnly they insisted, one of them actually going down on his knees, snatching from his bosom an old corroded metal image of the Virgin, and swearing a solemn oath that the Queen of Heaven herself had kindly appeared to him to point out the right animal. The tumult had increased to such an extent that it looked as if Ralph's disappearance was going to be the cause of a small riot, and finally our landlord had to send for a couple of Kavasses from the nearest police station, and have this regiment of bipeds and quadrupeds expelled by main force. I began to be convinced that I should never see my dog again, and I was the more despondent since the porter of the hotel, a semi-respectable old brigand, who, to judge by appearances, had not passed more than half-a-dozen years at the galleys, gravely assured me that all my pains were useless, as my spaniel was undoubtedly dead and devoured too by this time, the Turkish dogs being very fond of their more toothsome English brothers.

All this discussion had taken place in the street at the door of the hotel, and I was about to give up the search for that night at least, and enter the hotel, when an old Greek lady, a Phanariote who had been hearing the fracas from the steps of a door close by, approached our disconsolate group and suggested to Miss H—, one of our party, that we should enquire of the dervishes concerning the fate of Ralph.

And what can the dervishes know about my dog? said I, in no mood to joke, ridiculous as the proposition appeared.

"The holy men know all, Kyrea (Madam)," said she, somewhat mysteriously. "Last week I was robbed of my new satin pelisse, that my son had just brought me from Broussa, and, as you all see, I have recovered it and have it on my back now."

"Indeed? Then the holy men have also managed to metamorphose your new pelisse into an old one by all appearances," said one of the gentlemen who accompanied us, pointing as he spoke to a large rent in the back, which had been clumsily repaired with pins.

"And that is just the most wonderful part of the whole story," quietly answered the Phanariote, not in the least disconcerted. "They showed me in the shining circle the quarter of the town, the house, and even the room in which the Jew who had stolen my pelisse was just about to rip it up and cut it into pieces. My son and I had

Nightmare Tales

barely time to run over to the Kalindjikoulosek quarter, and to save my property. We caught the thief in the very act, and we both recognized him as the man shown to us by the dervishes in the magic moon. He confessed the theft and is now in prison."

Although none of us had the least comprehension of what she meant by the magic moon and the shining circle, and were all thoroughly mystified by her account of the divining powers of the "holy men," we still felt somehow satisfied from her manner that the story was not altogether a fabrication, and since she had at all events apparently succeeded in recovering her property through being somehow assisted by the dervishes, we determined to go the following morning and see for ourselves, for what had helped her might help us likewise.

The monotonous cry of the Muezzins from the tops of the minarets had just proclaimed the hour of noon as we, descending from the heights of Pera to the port of Galata, with difficulty managed to elbow our way through the unsavoury crowds of the commercial quarter of the town. Before we reached the docks, we had been half deafened by the shouts and incessant ear-piercing cries and the Babel-like confusion of tongues. In this part of the city it is useless to expect to be guided by either house numbers, or names of streets. The location of any desired place is indicated by its proximity to some other more conspicuous building such as a mosque, bath, or European shop; for the rest, one has to trust to Allah and his prophet.

It was with the greatest difficulty, therefore, that we finally discovered the British ship-chandler's store, at the rear of which we were to find the place of our destination. Our hotel guide was as ignorant of the dervishes' abode as we were ourselves; but at last a small Greek, in all the simplicity of primitive undress, consented for a modest copper backsheesh to lead us to the dancers.

When we arrived we were shown into a vast and gloomy hall that looked like a deserted stable. It was long and narrow, the floor was thickly strewn with sand as in a riding school, and it was lighted only by small windows placed at some height from the ground. The dervishes had finished their morning performances, and were evidently resting from their exhausting labours. They looked completely prostrated, some lying about in corners, others sitting on their heels staring vacantly into space, engaged, as we were informed, in meditation on their invisible deity. They appeared to have lost all power of sight and hearing, for none of them responded to our questions until a great gaunt figure, wearing a tall cap that made him look at least seven feet high, emerged from an obscure corner. Informing us that he was their chief, the giant gave us to understand that the saintly brethren, being in the habit of receiving orders for additional ceremonies from Allah himself, must on no account be disturbed. But when our interpreter had explained to him the object of our visit, which concerned himself alone, as he was the sole custodian of the "divining rod," his objections vanished and he extended his hand for alms. Upon being gratified, he intimated that only two of our party could be admitted at one time into the confidence of the future, and led the way, followed by Miss H — and myself.

Plunging after him into what seemed to be a half subterranean passage, we were led to the foot of a tall ladder leading to a chamber under the roof. We scrambled up after our guide, and at the top we found ourselves in a wretched garret of moderate size, with bare walls and destitute of furniture. The floor was carpeted with a thick layer of dust, and cobwebs festooned the walls in neglected confusion. In the corner we saw something that I at first mistook for a bundle of old rags; but the heap presently moved and got on its legs, advanced to the middle of the room and stood before us, the most extraordinary looking creature that I ever beheld. Its sex was female, but whether she was a woman or child it was impossible to decide. She was a hideous-looking dwarf, with an enormous head, the shoulders of a grenadier, with a waist in proportion; the whole supported by two short, lean, spider-like legs that seemed unequal to the task of bearing the weight of the monstrous body. She had a grinning countenance like the face of a satyr, and it was ornamented with letters and signs from the Koran painted in bright yellow. On her forehead was a blood-red crescent; her head was crowned with a dusty tarbouche, or fez; her legs were arrayed in large Turkish trousers, and some dirty white muslin wrapped round her body barely sufficed to conceal its hideous deformities. This creature rather let herself

drop than sat down in the middle of the floor, and as her weight descended on the rickety boards it sent up a cloud of dust that set us coughing and sneezing. This was the famous Tatmos known as the Damascus oracle!

Without losing time in idle talk, the dervish produced a piece of chalk, and traced around the girl a circle about six feet in diameter. Fetching from behind the door twelve small copper lamps which he filled with some dark liquid from a small bottle which he drew from his bosom, he placed them symmetrically around the magic circle. He then broke a chip of wood from a panel of the half ruined door, which bore the marks of many a similar depredation, and, holding the chip between his thumb and finger he began blowing on it at regular intervals, alternating the blowing with mutterings of some kind of weird incantation, till suddenly, and without any apparent cause for its ignition, there appeared a spark on the chip and it blazed up like a dry match. The dervish then lit the twelve lamps at this self-generated flame.

During this process, Tatmos, who had sat till then altogether unconcerned and motionless, removed her yellow slippers from her naked feet, and throwing them into a corner, disclosed as an additional beauty, a sixth toe on each deformed foot. The dervish now reached over into the circle and seizing the dwarf's ankles gave her a jerk, as if he had been lifting a bag of corn, and raised her clear off the ground, then, stepping back a pace, held her head downward. He shook her as one might a sack to pack its contents, the motion being regular and easy. He then swung her to and fro like a pendulum until the necessary momentum was acquired, when letting go one foot and seizing the other with both hands, he made a powerful muscular effort and whirled her round in the air as if she had been an Indian club.

My companion had shrunk back in alarm to the farthest corner. Round and round the dervish swung his living burden, she remained perfectly passive. The motion increased in rapidity until the eye could hardly follow the body in its circuit. This continued for perhaps two or three minutes, until, gradually slackening the motion he at length stopped it altogether, and in an instant had landed the girl on her knees in the middle of the lamp-lit circle. Such was the Eastern mode of mesmerization as practised among the dervishes.

And now the dwarf seemed entirely oblivious of external objects and in a deep trance. Her head and jaw dropped on her chest, her eyes were glazed and staring, and altogether her appearance was even more hideous than before. The dervish then carefully closed the shutters of the only window, and we should have been in total obscurity but that there was a hole bored in it, through which entered a bright ray of sunlight that shot through the darkened room and shone upon the girl. He arranged her drooping head so that the ray should fall upon the crown, after which, motioning us to remain silent, he folded his arms upon his bosom, and, fixing his gaze upon the bright spot, became as motionless as a stone image. I, too, riveted my eyes on the same spot, wondering what was to happen next, and how all this strange ceremony was to help me to find Ralph.

By degrees, the bright patch, as if it had drawn through the sunbeam a greater splendour from without and condensed it within its own area, shaped itself into a brilliant star, sending out rays in every direction as from a focus.

A curious optical effect then occurred: the room, which had been previously partially lighted by the sunbeam, grew darker and darker as the star increased in radiance, until we found ourselves in an Egyptian gloom. The star twinkled, trembled and turned, at first with a slow gyratory motion, then faster and faster, increasing its circumference at every rotation until it formed a brilliant disk, and we no longer saw the dwarf, who seemed absorbed into its light. Having gradually attained an extremely rapid velocity, as the girl had done when whirled by the dervish, the motion began to decrease and finally merged into a feeble vibration, like the shimmer of moonbeams on rippling water. Then it flickered for a moment longer, emitted a few last flashes, and assuming the density and iridescence of an immense opal, it remained motionless. The disk now radiated a moon-like lustre, soft and silvery, but instead of illuminating the garret, it seemed only to intensify the darkness. The edge of the circle was not penumbrous, but on the contrary sharply defined like that of a silver shield.

All being now ready, the dervish without uttering a word, or removing his gaze from the disk, stretched out a hand, and taking hold of mine, he drew me to his side and pointed to the luminous shield. Looking at the place indicated, we saw large patches appear like those on the moon. These gradually formed themselves into figures that began moving about in high relief in their natural colours. They neither appeared like a photograph nor an engraving; still less like the reflection of images on a mirror, but as if the disk were a cameo, and they were raised above its surface and then endowed with life and motion. To my astonishment and my friend's consternation, we recognized the bridge leading from Galata to Stamboul spanning the Golden Horn from the new to the old city. There were the people hurrying to and fro, steamers and gay caiques gliding on the blue Bosphorus, the many coloured buildings, villas and palaces reflected in the water; and the whole picture illuminated by the noonday sun. It passed like a panorama, but so vivid was the impression that we could not tell whether it or ourselves were in motion. All was bustle and life, but not a sound broke the oppressive stillness. It was noiseless as a dream. It was a phantom picture. Street after street and quarter after quarter succeeded one another; there was the bazaar, with its narrow, roofed passages, the small shops on either side, the coffee houses with gravely smoking Turks; and as either they glided past us or we past them, one of the smokers upset the narghile and coffee of another, and a volley of soundless invectives caused us great amusement. So we travelled with the picture until we came to a large building that I recognized as the palace of the Minister of Finance. In a ditch behind the house, and close to a mosque, lying in a pool of mud with his silken coat all bedraggled, lay my poor Ralph! Panting and crouching down as if exhausted, he seemed to be in a dying condition; and near him were gathered some sorry-looking curs who lay blinking in the sun and snapping at the flies!

I had seen all that I desired, although I had not breathed a word about the dog to the dervish, and had come more out of curiosity than with the idea of any success. I was impatient to leave at once and recover Ralph, but as my companion besought me to remain a little while longer, I reluctantly consented. The scene faded away and Miss H— placed herself in turn by the side of the dervish.

"I will think of *him*," she whispered in my ear with the eager tone that young ladies generally assume when talking of the worshipped *him*.

There is a long stretch of sand and a blue sea with white waves dancing in the sun, and a great steamer is ploughing her way along past a desolate shore, leaving a milky track behind her. The deck is full of life, the men are busy forward, the cook with white cap and apron is coming out of the galley, uniformed officers are moving about, passengers fill the quarter-deck, lounging, flirting or reading, and a young man we both recognize comes forward and leans over the taffrail. It is — *him*.

Miss H— gives a little gasp, blushes and smiles, and concentrates her thoughts again. The picture of the steamer vanishes; the magic moon remains for a few moments blank. But new spots appear on its luminous face, we see a library slowly emerging from its depths — a library with green carpet and hangings, and book-shelves round the sides of the room. Seated in an arm-chair at a table under a hanging lamp, is an old gentleman writing. His gray hair is brushed back from his forehead, his face is smooth-shaven and his countenance has an expression of benignity.

The dervish made a hasty motion to enjoin silence; the light on the disk quivers, but resumes its steady brilliancy, and again its surface is imageless for a second.

We are back in Constantinople now and out of the pearly depths of the shield forms our own apartment in the hotel. There are our papers and books on the bureau, my friend's travelling hat in a corner, her ribbons hanging on the glass, and lying on the bed the very dress she had changed when starting out on our expedition. No detail was lacking to make the identification complete; and as if to prove that we were not seeing something conjured up in our imagination, there lay upon the dressing-table two unopened letters, the handwriting on which was clearly recognized by my friend. They were from a very dear relative of hers, from

whom she had expected to hear when in Athens, but had been disappointed. The scene faded away and we now saw her brother's room with himself lying upon the lounge, and a servant bathing his head, whence to our horror, blood was trickling. We had left the boy in perfect health but an hour before; and upon seeing this picture my companion uttered a cry of alarm, and seizing me by the hand dragged me to the door. We rejoined our guide and friends in the long hall and hurried back to the hotel.

Young H—— had fallen downstairs and cut his forehead rather badly; in our room, on the dressing-table were the two letters which had arrived in our absence. They had been forwarded from Athens. Ordering a carriage I at once drove to the Ministry of Finance, and alighting with the guide, hurriedly made for the ditch I had seen for the first time in the shining disk! In the middle of the pool, badly mangled, half-famished, but still alive, lay my beautiful spaniel Ralph, and near him were the blinking curs, unconcernedly snapping at the flies.

THE CAVE OF THE ECHOES

A Strange but True Story*

* This story is given from the narrative of an eye-witness, a Russian gentleman, very pious, and fully trustworthy. Moreover, the facts are copied from the police records of P——. The eye-witness in question attributes it, of course, partly to divine interference and partly to the Evil One. — H. P. B.

In one of the distant governments of the Russian empire, in a small town on the borders of Siberia, a mysterious tragedy occurred more than thirty years ago. About six versts from the little town of P——, famous for the wild beauty of its scenery, and for the wealth of its inhabitants — generally proprietors of mines and of iron foundries — stood an aristocratic mansion. Its household consisted of the master, a rich old bachelor and his brother, who was a widower and the father of two sons and three daughters.

It was known that the proprietor, Mr. Izvertzoff, had adopted his brother's children, and, having formed an especial attachment for his eldest nephew, Nicolas, he made him the sole heir of his numerous estates.

Time rolled on. The uncle was getting old, the nephew was coming of age. Days and years had passed in monotonous serenity, when, on the hitherto clear horizon of the quiet family, appeared a cloud. On an unlucky day one of the nieces took it into her head to study the zither. The instrument being of purely Teutonic origin, and no teacher of it residing in the neighbourhood, the indulgent uncle sent to St. Petersburg for both. After diligent search only one Professor could be found willing to trust himself in such close proximity to Siberia. It was an old German artist, who, sharing his affections equally between his instrument and a pretty blonde daughter, would part with neither. And thus it came to pass that, one fine morning, the old Professor arrived at the mansion, with his music box under one arm and his fair Munchen leaning on the other.

From that day the little cloud began growing rapidly; for every vibration of the melodious instrument found a responsive echo in the old bachelor's heart. Music awakens love, they say, and the work begun by the zither was completed by Munchen's blue eyes. At the expiration of six months the niece had become an expert zither player, and the uncle was desperately in love.

One morning, gathering his adopted family around him, he embraced them all very tenderly, promised to remember them in his will, and wound up by declaring his unalterable resolution to marry the blue-eyed Munchen. After this he fell upon their necks, and wept in silent rapture. The family, understanding that they

were cheated out of the inheritance, also wept; but it was for another cause. Having thus wept, they consoled themselves and tried to rejoice, for the old gentleman was sincerely beloved by all. Not all of them rejoiced, though. Nicolas, who had himself been smitten to the heart by the pretty German, and who found himself defrauded at once of his belle and of his uncle's money, neither rejoiced nor consoled himself, but disappeared for a whole day.

Meanwhile, Mr. Izvertzoff had given orders to prepare his traveling carriage on the following day, and it was whispered that he was going to the chief town of the district, at some distance from his home, with the intention of altering his will. Though very wealthy, he had no superintendent on his estate, but kept his books himself. The same evening after supper, he was heard in his room, angrily scolding his servant, who had been in his service for over thirty years. This man, Ivan, was a native of northern Asia, from Kamschatka; he had been brought up by the family in the Christian religion, and was thought to be very much attached to his master. A few days later, when the first tragic circumstance I am about to relate had brought all the police force to the spot, it was remembered that on that night Ivan was drunk; that his master, who had a horror of this vice, had paternally thrashed him, and turned him out of his room, and that Ivan had been seen reeling out of the door, and had been heard to mutter threats.

On the vast domain of Mr. Izvertzoff there was a curious cavern, which excited the curiosity of all who visited it. It exists to this day, and is well known to every inhabitant of P---. A pine forest, commencing a few feet from the garden gate, climbs in steep terraces up a long range of rocky hills, which it covers with a broad belt of impenetrable vegetation. The grotto leading into the cavern, which is known as the "Cave of the Echoes," is situated about half a mile from the site of the mansion, from which it appears as a small excavation in the hillside, almost hidden by luxuriant plants, but not so completely as to prevent any person entering it from being readily seen from the terrace in front of the house. Entering the grotto, the explorer finds at the rear a narrow cleft; having passed through which he emerges into a lofty cavern, feebly lighted through fissures in the vaulted roof, fifty feet from the ground. The cavern itself is immense, and would easily hold between two and three thousand people. A part of it, in the days of Mr. Izvertzoff, was paved with flagstones, and was often used in the summer as a ball-room by picnic parties. Of an irregular oval, it gradually narrows into a broad corridor, which runs for several miles underground, opening here and there into other chambers, as large and lofty as the ball-room, but, unlike this, impassable otherwise than in a boat, as they are always full of water. These natural basins have the reputation of being unfathomable.

On the margin of the first of these is a small platform, with several mossy rustic seats arranged on it, and it is from this spot that the phenomenal echoes, which give the cavern its name, are heard in all their weirdness. A word pronounced in a whisper, or even a sigh, is caught up by endless mocking voices, and instead of diminishing in volume, as honest echoes do, the sound grows louder and louder at every successive repetition, until at last it bursts forth like the repercussion of a pistol shot, and recedes in a plaintive wail down the corridor.

On the day in question, Mr. Izvertzoff had mentioned his intention of having a dancing party in this cave on his wedding day, which he had fixed for an early date. On the following morning, while preparing for his drive, he was seen by his family entering the grotto, accompanied only by his Siberian servant. Half-an-hour later, Ivan returned to the mansion for a snuff-box which his master had forgotten in his room, and went back with it to the cave. An hour later the whole house was startled by his loud cries. Pale and dripping with water, Ivan rushed in like a madman, and declared that Mr. Izvertzoff was nowhere to be found in the cave. Thinking he had fallen into the lake, he had dived into the first basin in search of him and was nearly drowned himself.

The day passed in vain attempts to find the body. The police filled the house, and louder than the rest in his despair was Nicolas, the nephew, who had returned home only to meet the sad tidings.

Nightmare Tales

A dark suspicion fell upon Ivan, the Siberian. He had been struck by his master the night before, and had been heard to swear revenge. He had accompanied him alone to the cave, and when his room was searched a box full of rich family jewellery, known to have been carefully kept in Mr. Izvertzoff's apartment, was found under Ivan's bedding. Vainly did the serf call God to witness that the box had been given to him in charge by his master himself, just before they proceeded to the cave; that it was the latter's purpose to have the jewellery reset, as he intended it for a wedding present to his bride; and that he, Ivan, would willingly give his own life to recall that of his master, if he knew him to be dead. No heed was paid to him, however, and he was arrested and thrown into prison, upon a charge of murder. There he was left, for under the Russian law a criminal cannot — at any rate, he could not in those days — be sentenced for a crime, however conclusive the circumstantial evidence, unless he confessed his guilt.

After a week had passed in useless search, the family arrayed themselves in deep mourning; and as the will as originally drawn remained without a codicil, the whole of the property passed into the hands of the nephew. The old teacher and his daughter bore this sudden reverse of fortune with true Germanic phlegm, and prepared to depart. Taking again his zither under one arm, the old man was about to lead away his Munchen by the other, when the nephew stopped him by offering himself as the fair damsel's husband in the place of his departed uncle. The change was found to be an agreeable one, and, without much ado, the young people were married.

Ten years rolled away, and we meet the happy family once more at the beginning of 1859. The fair Munchen had grown fat and vulgar. From the day of the old man's disappearance, Nicolas had become morose and retired in his habits, and many wondered at the change in him, for now he was never seen to smile. It seemed as if his only aim in life were to find out his uncle's murderer, or rather to bring Ivan to confess his guilt. But the man still persisted that he was innocent.

An only son had been born to the young couple, and a strange child it was. Small, delicate, and ever ailing, his frail life seemed to hang by a thread. When his features were in repose, his resemblance to his uncle was so striking that the members of the family often shrank from him in terror. It was the pale shrivelled face of a man of sixty upon the shoulders of a child nine years old. He was never seen either to laugh or to play, but, perched in his high chair, would gravely sit there, folding his arms in a way peculiar to the late Mr. Izvertzoff; and thus he would remain for hours, drowsy and motionless. His nurses were often seen furtively crossing themselves at night, upon approaching him, and not one of them would consent to sleep alone with him in the nursery. His father's behaviour towards him was still more strange. He seemed to love him passionately, and at the same time to hate him bitterly. He seldom embraced or caressed the child, but with livid cheek and staring eye, he would pass long hours watching him, as the child sat quietly in his corner, in his goblin-like, old-fashioned way.

The child had never left the estate, and few outside the family knew of his existence.

About the middle of July, a tall Hungarian traveller, preceded by a great reputation for eccentricity, wealth and mysterious powers, arrived at the town of P—— from the North, where, it was said, he had resided for many years. He settled in the little town, in company with a Shaman or South Siberian magician, on whom he was said to make mesmeric experiments. He gave dinners and parties, and invariably exhibited his Shaman, of whom he felt very proud, for the amusement of his guests. One day the notables of P—— made an unexpected invasion of the domains of Nicolas Izvertzoff, and requested the loan of his cave for an evening entertainment. Nicolas consented with great reluctance, and only after still greater hesitancy was he prevailed upon to join the party.

The first cavern and the platform beside the bottomless lake glittered with lights. Hundreds of flickering candles and torches, stuck in the clefts of the rocks, illuminated the place and drove the shadows from the mossy nooks and corners, where they had crouched undisturbed for many years. The stalactites on the walls

Nightmare Tales

sparkled brightly, and the sleeping echoes were suddenly awakened by a joyous confusion of laughter and conversation. The Shaman, who was never lost sight of by his friend and patron, sat in a corner, entranced as usual. Crouched on a projecting rock, about midway between the entrance and the water, with his lemon-yellow, wrinkled face, flat nose, and thin beard, he looked more like an ugly stone idol than a human being. Many of the company pressed around him and received correct answers to their questions, the Hungarian cheerfully submitting his mesmerized "subject" to cross-examination.

Suddenly one of the party, a lady, remarked that it was in that very cave that old Mr. Izvertzoff had so unaccountably disappeared ten years before. The foreigner appeared interested, and desired to learn more of the circumstances, so Nicolas was sought amid the crowd and led before the eager group. He was the host and he found it impossible to refuse the demanded narrative. He repeated the sad tale in a trembling voice, with a pallid cheek, and tears were seen glittering in his feverish eyes. The company were greatly affected, and encomiums upon the behaviour of the loving nephew in honouring the memory of his uncle and benefactor were freely circulating in whispers, when suddenly the voice of Nicolas became choked, his eyes started from their sockets, and, with a suppressed groan, he staggered back. Every eye in the crowd followed with curiosity his haggard look, as it fell and remained riveted upon a weakened little face, that peeped from behind the back of the Hungarian.

"Where do you come from? Who brought you here, child?" gasped out Nicolas, as pale as death.

"I was in bed, papa; this man came to me, and brought me here in his arms," answered the boy simply, pointing to the Shaman, beside whom he stood upon the rock, and who, with his eyes closed, kept swaying himself to and fro like a living pendulum.

"That is very strange," remarked one of the guests, "for the man has never moved from his place."

"Good God! what an extraordinary resemblance!" muttered an old resident of the town, a friend of the lost man.

"You lie, child!" fiercely exclaimed the father. "Go to bed; this is no place for you."

"Come, come," interposed the Hungarian, with a strange expression on his face, and encircling with his arm the slender childish figure; "the little fellow has seen the double of my Shaman, which roams sometimes far away from his body, and has mistaken the phantom for the man himself. Let him remain with us for a while."

At these strange words the guests stared at each other in mute surprise, while some piously made the sign of the cross, spitting aside, presumably at the devil and all his works.

"By-the-bye," continued the Hungarian with a peculiar firmness of accent, and addressing the company rather than any one in particular; "why should we not try, with the help of my Shaman, to unravel the mystery hanging over the tragedy? Is the suspected party still lying in prison? What? he has not confessed up to now? This is surely very strange. But now we will learn the truth in a few minutes! Let all keep silent!"

He then approached the Tehuktchene, and immediately began his performance without so much as asking the consent of the master of the place. The latter stood rooted to the spot, as if petrified with horror, and unable to articulate a word. The suggestion met with general approbation, save from him; and the police inspector, Col. S——, especially approved of the idea.

"Ladies and gentlemen," said the mesmerizer in soft tones, "allow me for this once to proceed otherwise than in my general fashion. I will employ the method of native magic. It is more appropriate to this wild place, and far more effective as you will find, than our European method of mesmerization."

Without waiting for an answer, he drew from a bag that never left his person, first a small drum, and then two little phials — one full of fluid, the other empty. With the contents of the former he sprinkled the Shaman, who fell to trembling and nodding more violently than ever. The air was filled with the perfume of spicy odours, and the atmosphere itself seemed to become clearer. Then, to the horror of those present, he approached the Tibetan, and taking a miniature stiletto from his pocket, he plunged the sharp steel into the man's forearm, and drew blood from it, which he caught in the empty phial. When it was half filled, he pressed the orifice of the wound with his thumb, and stopped the flow of blood as easily as if he had corked a bottle, after which he sprinkled the blood over the little boy's head. He then suspended the drum from his neck, and, with two ivory drum-sticks, which were covered with magic signs and letters, he began beating a sort of *reveille*, to drum up the spirits, as he said.

The bystanders, half-shocked and half-terrified by these extraordinary proceedings, eagerly crowded round him, and for a few moments a dead silence reigned throughout the lofty cavern. Nicolas, with his face livid and corpse-like, stood speechless as before. The mesmerizer had placed himself between the Shaman and the platform, when he began slowly drumming. The first notes were muffled, and vibrated so softly in the air that they awakened no echo, but the Shaman quickened his pendulum-like motion and the child became restless. The drummer then began a slow chant, low, impressive and solemn.

As the unknown words issued from his lips, the flames of the candles and torches wavered and flickered, until they began dancing in rhythm with the chant. A cold wind came wheezing from the dark corridors beyond the water, leaving a plaintive echo in its trail. Then a sort of nebulous vapour, seeming to ooze from the rocky ground and walls, gathered about the Shaman and the boy. Around the latter the aura was silvery and transparent, but the cloud which enveloped the former was red and sinister. Approaching nearer to the platform the magician beat a louder roll upon the drum, and this time the echo caught it up with terrific effect! It reverberated near and far in incessant peals; one wail followed another louder and louder, until the thundering roar seemed the chorus of a thousand demon voices rising from the fathomless depths of the lake. The water itself, whose surface, illuminated by many lights, had previously been smooth as a sheet of glass, became suddenly agitated, as if a powerful gust of wind had swept over its unruffled face. Another chant, and a roll of the drum, and the mountain trembled to its foundation with the cannon-like peals which rolled through the dark and distant corridors. The Shaman's body rose two yards in the air, and nodding and swaying, sat, self-suspended like an apparition. But the transformation which now occurred in the boy chilled everyone, as they speechlessly watched the scene. The silvery cloud about the boy now seemed to lift him, too, into the air; but, unlike the Shaman, his feet never left the ground. The child began to grow, as though the work of years was miraculously accomplished in a few seconds. He became tall and large, and his senile features grew older with the ageing of his body. A few more seconds, and the youthful form had entirely disappeared. It was totally absorbed in another individuality, and, to the horror of those present who had been familiar with his appearance, this individuality was that of old Mr. Izvertzoff, and on his temple was a large gaping wound, from which trickled great drops of blood.

This phantom moved towards Nicolas, till it stood directly in front of him, while he, with his hair standing erect, with the look of a madman gazed at his own son, transformed into his uncle. The sepulchral silence was broken by the Hungarian, who, addressing the child phantom, asked him, in solemn voice:

"In the name of the great Master, of Him who has all power, answer the truth, and nothing but the truth. Restless spirit, hast thou been lost by accident, or foully murdered?"

The spectre's lips moved, but it was the echo which answered for them in lugubrious shouts: "Murdered! mur-der-ed!! murdered!!!!"

"Where? How? By whom?" asked the conjuror.

Nightmare Tales

The apparition pointed a finger at Nicolas and, without removing its gaze or lowering its arms, retreated backwards slowly towards the lake. At every step it took, the younger Izvertzoff, as if compelled by some irresistible fascination, advanced a step towards it, until the phantom reached the lake, and the next moment was seen gliding on its surface. It was a fearful, ghostly scene!

When he had come within two steps of the brink of the watery abyss, a violent convulsion ran through the frame of the guilty man. Flinging himself upon his knees, he clung to one of the rustic seats with a desperate clutch, and staring wildly, uttered a long piercing cry of agony. The phantom now remained motionless on the water, and bending his extended finger, slowly beckoned him to come. Crouched in abject terror, the wretched man shrieked until the cavern rang again and again: "I did not . . . No, I did not murder you!"

Then came a splash, and now it was the boy who was in the dark water, struggling for his life, in the middle of the lake, with the same motionless stern apparition brooding over him.

"Papa! papa! Save me . . . I am drowning!" . . . cried a piteous little voice amid the uproar of the mocking echoes.

"My boy!" shrieked Nicolas, in the accents of a maniac, springing to his feet. "My boy! Save him! Oh, save him! . . . Yes I confess . . . I am the murderer . . . It is I who killed him!"

Another splash, and the phantom disappeared. With a cry of horror the company rushed towards the platform; but their feet were suddenly rooted to the ground, as they saw amid the swirling eddies a whitish shapeless mass holding the murderer and the boy in tight embrace, and slowly sinking into the bottomless lake . . .

On the morning after these occurrences, when, after a sleepless night, some of the party visited the residence of the Hungarian gentleman, they found it closed and deserted. He and the Shaman had disappeared. Many are among the old inhabitants of P—— who remember him; the Police Inspector, Col. S——, dying a few years ago in the full assurance that the noble traveller was the devil. To add to the general consternation the Izvertzoff mansion took fire on that same night and was completely destroyed. The Archbishop performed the ceremony of exorcism, but the locality is considered accursed to this day. The Government investigated the facts, and ordered silence.

FROM THE POLAR LANDS

A Christmas Story

Just a year ago, during the Christmas holidays, a numerous society had gathered in the country house, or rather the old hereditary castle, of a wealthy landowner in Finland. Many were the remains in it of our forefathers' hospitable way of living; and many the mediaeval customs preserved, founded on traditions and superstitions, semi-kinnish and semi-Russian, the latter imported into it by its female proprietors from the shores of the Neva. Christmas trees were being prepared and implements for divination were being made ready. For, in that old castle there were grim worm-eaten portraits of famous ancestors and knights and ladies, old deserted turrets, with bastions and Gothic windows; mysterious sombre alleys, and dark and endless cellars, easily transformed into subterranean passages and caves, ghostly prison cells, haunted by the restless phantoms of the heroes of local legends. In short, the old Manor offered every commodity for romantic horrors. But alas! this once they serve for nought; in the present narrative these dear old horrors play no such part as they otherwise might.

Its chief hero is a very commonplace, prosaic man — let us call him Erkler. Yes; Dr. Erkler, professor of

medicine, half-German through his father, a full-blown Russian on his mother's side and by education; and one who looked a rather heavily built, and ordinary mortal. Nevertheless, very extraordinary things happened with him.

Erkler, as it turned out, was a great traveller, who by his own choice had accompanied one of the most famous explorers on his journeys round the world. More than once they had both seen death face to face from sunstrokes under the Tropics, from cold in the Polar Regions. All this notwithstanding, the doctor spoke with a never-abating enthusiasm about their "winterings" in Greenland and Novaya Zemla, and about the desert plains in Australia, where he lunched off a kangaroo and dined off an emu, and almost perished of thirst during the passage through a waterless track, which it took them forty hours to cross.

"Yes," he used to remark, "I have experienced almost everything, save what you would describe as *supernatural*. . . . This, of course, if we throw out of account a certain extraordinary event in my life -- a man I met, of whom I will tell you just now -- and its . . . indeed, rather strange, I may add quite *inexplicable*, results."

There was a loud demand that he should explain himself; and the doctor, forced to yield, began his narrative.

"In 1878 we were compelled to winter on the northwestern coast of Spitzbergen. We had been attempting to find our way during the short summer to the pole; but, as usual, the attempt had proved a failure, owing to the icebergs, and, after several such fruitless endeavours, we had to give it up. No sooner had we settled than the polar night descended upon us, our steamers got wedged in and frozen between the blocks of ice in the Gulf of Mussel, and we found ourselves cut off for eight long months from the rest of the living world. I confess I, for one, felt it terribly at first. We became especially discouraged when one stormy night the snow hurricane scattered a mass of materials prepared for our winter buildings, and deprived us of over forty deer from our herd. Starvation in prospect is no incentive to good humour; and with the deer we had lost the best *plat de resistance* against polar frosts, human organisms demanding in that climate an increase of heating and solid food. However, we were finally reconciled to our loss, and even got accustomed to the local and in reality more nutritious food -- seals, and seal-grease. Our men from the remnants of our lumber built a house neatly divided into two compartments, one for our three professors and myself, and the other for themselves; and, a few wooden sheds being constructed for meteorological, astronomical and magnetic purposes, we even added a protecting stable for the few remaining deer. And then began the monotonous series of dawnless nights and days, hardly distinguishable one from the other, except through dark-grey shadows. At times, the "blues" we got into, were fearful! We had contemplated sending two of our three steamers home, in September, but the premature, and unforeseen formation of ice walls round them had thwarted our plans; and now, with the entire crews on our hands, we had to economise still more with our meagre provisions, fuel and light. Lamps were used only for scientific purposes: the rest of the time we had to content ourselves with God's light -- the moon and the Aurora Borealis But how describe these glorious, incomparable northern lights! Rings, arrows, gigantic conflagrations of accurately divided rays of the most vivid and varied colours. The November moonlight nights were as gorgeous. The play of moonbeams on the snow and the frozen rocks was most striking. These were fairy nights.

"Well, one such night -- it may have been one such day, for all I know, as from the end of November to about the middle of March we had no twilights at all, to distinguish the one from the other -- we suddenly espied in the play of coloured beams, which were then throwing a golden rosy hue on the snow plains, a dark moving spot. . . . It grew, and seemed to scatter as it approached nearer to us. What did this mean? It looked like a herd of cattle, or a group of living men, trotting over the snowy wilderness But animals there were white like everything else. What then was this? human beings?

"We could not believe our eyes. Yes, a group of men was approaching our dwelling. It turned out to be about fifty seal-hunters, guided by Matiliss, a well-known veteran mariner from Norway. They had been caught by

the icebergs, just as we had been.

"How did you know that we were here?' we asked.

"Old Johan, this very same old party, showed us the way' — they answered, pointing to a venerable-looking old man with snow-white locks.

"In sober truth, it would have beseemed their guide far better to have sat at home over his fire than to have been seal-hunting in polar lands with younger men. And we told them so, still wondering how he came to learn of our presence in this kingdom of white bears. At this Matiliss and his companions smiled, assuring us that 'old Johan' knew all. They remarked that we must be novices in polar borderlands, since we were ignorant of Johan's personality and could still wonder at anything said of him.

"It is nigh forty-five years,' said the chief hunter, that I have been catching seals in the Polar Seas, and as far as my personal remembrance goes, I have always known him, and just as he is now, an old, white-bearded man. And, so far back as in the days when I used to go to sea, as a small boy with my father, my dad used to tell me the same of old Johan, and he added that his own father and grandfather too, had known Johan in their days of boyhood, none of them having ever seen him otherwise than white as our snows. And, as our fore-fathers nicknamed him "the white-haired all-knower," thus do we, the seal-hunters, call him, to this day.'

"Would you make us believe he is two hundred years old?' — we laughed.

"Some of our sailors crowding round the white-haired phenomenon, plied him with questions.

"Grandfather! answer us, how old are you?'

"I really do not know it myself, sonnies. I live as long as God has decreed me to. As to my years, I never counted them.'

"And how did you know, grandfather, that we were wintering in this place?'

"God guided me. How I learned it I do not know; save that I knew — I knew it."

THE ENSOULED VIOLIN

By H. P. Blavatsky

I

In the year 1828, an old German, a music teacher, came to Paris with his pupil and settled unostentatiously in one of the quiet faubourgs of the metropolis. The first rejoiced in the name of Samuel Klaus; the second answered to the more poetical appellation of Franz Stenio. The younger man was a violinist, gifted, as rumour went, with extraordinary, almost miraculous talent. Yet as he was poor and had not hitherto made a name for himself in Europe, he remained for several years in the capital of France — the heart and pulse of capricious continental fashion — unknown and unappreciated. Franz was a Styrian by birth, and, at the time of the event to be presently described, he was a young man considerably under thirty. A philosopher and a dreamer by nature, imbued with all the mystic oddities of true genius, he reminded one of some of the heroes in Hoffmann's *Contes Fantastiques*. His earlier existence had been a very unusual, in fact, quite an eccentric

Nightmare Tales

one, and its history must be briefly told — for the better understanding of the present story.

Born of very pious country people, in a quiet burg among the Styrian Alps; nursed "by the native gnomes who watched over his cradle"; growing up in the weird atmosphere of the ghouls and vampires who play such a prominent part in the household of every Styrian and Slavonian in Southern Austria; educated later, as a student in the shadow of the old Rhenish castles of Germany; Franz from his childhood had passed through every emotional stage on the plane of the so-called "supernatural." He had also studied at one time the "occult arts" with an enthusiastic disciple of Paracelsus and Kunrath; alchemy had few theoretical secrets for him; and he had dabbled in "ceremonial magic" and "sorcery" with some Hungarian Tziganes. Yet he loved above all else music, and above music — his violin.

At the age of twenty-two he suddenly gave up his practical studies in the occult, and from that day, though as devoted as ever in thought to the beautiful Grecian Gods, he surrendered himself entirely to his art. Of his classic studies he had retained only that which related to the muses — Euterpe especially, at whose altar he worshipped — and Orpheus whose magic lyre he tried to emulate with his violin. Except his dreamy belief in the nymphs and the sirens, on account probably of the double relationship of the latter to the muses, through Calliope and Orpheus, he was interested but little in the matters of this sublunary world. All his aspirations mounted, like incense, with the wave of the heavenly harmony that he drew from his instrument, to a higher and a nobler sphere. He dreamed awake, and lived a real though an enchanted life only during those hours when his magic bow carried him along the wave of sound to the Pagan Olympus, to the feet of Euterpe. A strange child he had ever been in his own home, where tales of magic and witchcraft grow out of every inch of the soil; a still stranger boy he had become, until finally he had blossomed into manhood, without one single characteristic of youth. Never had a fair face attracted his attention; not for one moment had his thoughts turned from his solitary studies to a life beyond that of a mystic Bohemian. Content with his own company, he had thus passed the best years of his youth and manhood with his violin for his chief idol, and with the Gods and Goddesses of old Greece for his audience, in perfect ignorance of practical life. His whole existence had been one long day of dreams, of melody and sunlight, and he had never felt any other aspirations.

How useless, but oh, how glorious those dreams! how vivid! and why should he desire any better fate? Was he not all that he wanted to be, transformed in a second of thought into one or another hero; from Orpheus, who held all nature breathless, to the urchin who piped away under the plane tree to the naiads of Calirrhoe's crystal fountain? Did not the swift-footed nymphs frolic at his beck and call to the sound of the magic flute of the Arcadian shepherd — who was himself? Behold, the Goddess of Love and Beauty herself descending from on high, attracted by the sweet-voiced notes of his violin! . . . Yet there came a time when he preferred Syrinx to Aphrodite — not as the fair nymph pursued by Pan, but after her transformation by the merciful Gods into the reed out of which the frustrated God of the Shepherds had made his magic pipe. For also, with time, ambition grows and is rarely satisfied. When he tried to emulate on his violin the enchanting sounds that resounded in his mind, the whole of Parnassus kept silent under the spell, or joined in heavenly chorus; but the audience he finally craved was composed of more than the Gods sung by Hesiod, verily of the most appreciative *melomanes* of European capitals. He felt jealous of the magic pipe, and would fain have had it at his command.

"Oh! that I could allure a nymph into my beloved violin!" — he often cried, after awakening from one of his day-dreams. "Oh, that I could only span in spirit flight the abyss of Time! Oh, that I could find myself for one short day a partaker of the secret arts of the Gods, a God myself, in the sight and hearing of enraptured humanity; and, having learned the mystery of the lyre of Orpheus, or secured within my violin a siren, thereby benefit mortals to my own glory!"

Thus, having for long years dreamed in the company of the Gods of his fancy, he now took to dreaming of the transitory glories of fame upon this earth. But at this time he was suddenly called home by his widowed

mother from one of the German universities where he had lived for the last year or two. This was an event which brought his plans to an end, at least so far as the immediate future was concerned, for he had hitherto drawn upon her alone for his meagre pittance, and his means were not sufficient for an independent life outside his native place.

His return had a very unexpected result. His mother, whose only love he was on earth, died soon after she had welcomed her Benjamin back; and the good wives of the burg exercised their swift tongues for many a month after as to the real causes of that death.

Frau Stenio, before Franz's return, was a healthy, buxom, middle-aged body, strong and hearty. She was a pious and a God-fearing soul too, who had never failed in saying her prayers, nor had missed an early mass for years during his absence. On the first Sunday after her son had settled at home — a day that she had been longing for and had anticipated for months in joyous visions, in which she saw him kneeling by her side in the little church on the hill — she called him from the foot of the stairs. The hour had come when her pious dream was to be realized, and she was waiting for him, carefully wiping the dust from the prayer-book he had used in his boyhood. But instead of Franz, it was his violin that responded to her call, mixing its sonorous voice with the rather cracked tones of the peal of the merry Sunday bells. The fond mother was somewhat shocked at hearing the prayer-inspiring sounds drowned by the weird, fantastic notes of the "Dance of the Witches"; they seemed to her so unearthly and mocking. But she almost fainted upon hearing the definite refusal of her well-beloved son to go to church. He never went to church, he coolly remarked. It was loss of time; besides which, the loud peals of the old church organ jarred on his nerves. Nothing should induce him to submit to the torture of listening to that cracked organ. He was firm, and nothing could move him. To her supplications and remonstrances he put an end by offering to play for her a "Hymn to the Sun" he had just composed.

From that — memorable Sunday morning, Frau Stenio lost her usual serenity of mind. She hastened to lay her sorrows and seek for consolation at the foot of the confessional; but that which she heard in response from the stem priest filled her gentle and unsophisticated soul with dismay and almost with despair. A feeling of fear, a sense of profound terror, which soon became a chronic state with her, pursued her from that moment; her nights became disturbed and sleepless, her days passed in prayer and lamentations. In her maternal anxiety for the salvation of her beloved son's soul, and for his *post mortem* welfare, she made a series of rash vows. Finding that neither the Latin petition to the Mother of God written for her by her spiritual adviser, nor yet the humble supplications in German, addressed by herself to every saint she had reason to believe was residing in Paradise, worked the desired effect, she took to pilgrimages to distant shrines. During one of these journeys to a holy chapel situated high up in the mountains, she caught cold, amidst the glaciers of the Tyrol, and redescended only to take to a sick bed, from which she arose no more. Frau Stenio's vow had led her, in one sense, to the desired result. The poor woman was now given an opportunity of seeking out in *propria persona* the saints she had believed in so well, and of pleading face to face for the recreant son, who refused adherence to them and to the Church, scoffed at monk and confessional, and held the organ in such horror.

Franz sincerely lamented his mother's death. Unaware of being the indirect cause of it, he felt no remorse; but selling the modest household goods and chattels, light in purse and heart, he resolved to travel on foot for a year or two, before settling down to any definite profession.

A hazy desire to see the great cities of Europe, and to try his luck in France, lurked at the bottom of this travelling project, but his Bohemian habits of life were too strong to be abruptly abandoned. He placed his small capital with a banker for a rainy day, and started on his pedestrian journey *via* Germany and Austria. His violin paid for his board and lodging in the inns and farms on his way, and he passed his days in the green fields and in the solemn silent woods, face to face with Nature, dreaming all the time as usual with his eyes open. During the three months of his pleasant travels to and fro, he never descended for one moment

from Parnassus; but, as an alchemist transmutes lead into gold, so he transformed everything on his way into a song of Hesiod or Anacreon. Every evening, while fiddling for his supper and bed, whether on a green lawn or in the hall of a rustic inn, his fancy changed the whole scene for him. Village swains and maidens became transfigured into Arcadian shepherds and nymphs. The sand-covered floor was now a green sward; the uncouth couples spinning round in a measured waltz with the wild grace of tamed bears became priests and priestesses of Terpsichore; the bulky, cherry-cheeked and blue-eyed daughters of rural Germany were the Hesperides circling round the trees laden with the golden apples. Nor did the melodious strains of the Arcadian demigods piping on their syrinxes, and audible but to his own enchanted ear, vanish with the dawn. For no sooner was the curtain of sleep raised from his eyes than he would sally forth into a new magic realm of day-dreams. On his way to some dark and solemn pine-forest, he played incessantly, to himself and to everything else. He fiddled to the green hill, and forthwith the mountain and the moss-covered rocks moved forward to hear him the better, as they had done at the sound of the Orphean lyre. He fiddled to the merry-voiced brook, to the hurrying river, and both slakened their speed and stopped their waves, and, becoming silent seemed to listen to him in an entranced rapture. Even the long-legged stork who stood meditatively on one leg on the thatched top of the rustic mill, gravely resolving unto himself the problem of his too-long existence, sent out after him a long and strident cry, screeching, "Art thou Orpheus himself, O Stenio?"

It was a period of full bliss, of a daily and almost hourly exaltation. The last words of his dying mother, whispering to him of the horrors of eternal condemnation, had left him unaffected, and the only vision her warning evoked in him was that of Pluto. By a ready association of ideas, he saw the lord of the dark nether kingdom greeting him as he had greeted the husband of Eurydice before him. Charmed with the magic sounds of his violin, the wheel of Ixion was at a standstill once more, thus affording relief to the wretched seducer of Juno, and giving the lie to those who claim eternity for the duration of the punishment of condemned sinners. He perceived Tantalus forgetting his never-ceasing thirst, and smacking his lips as he drank in the heaven-born melody; the stone of Sisyphus becoming motionless, the Furies themselves smiling on him, and the sovereign of the gloomy regions delighted, and awarding preference to his violin over the lyre of Orpheus. Taken *au serieux*, mythology thus seems a decided antidote to fear, in the face of theological threats, especially when strengthened with an insane and passionate love of music, with Franz, Euterpe proved always victorious in every contest, aye, even with Hell itself!

But there is an end to everything, and very soon Franz had to give up uninterrupted dreaming. He had reached the university town where dwelt his old violin teacher, Samuel Klaus. When this antiquated musician found that his beloved and favourite pupil, Franz, had been left poor in purse and still poorer in earthly affections, he felt his strong attachment to the boy awaken with tenfold force. He took Franz to his heart, and forthwith adopted him as his son.

The old teacher reminded people of one of those grotesque figures which look as if they had just stepped out of some mediaeval panel. And yet Klaus, with his fantastic *allures* of a night-goblin, had the most loving heart, as tender as that of a woman, and the self-sacrificing nature of an old Christian martyr. When Franz had briefly narrated to him the history of his last few years, the professor took him by the hand, and leading him into his study simply said:

"Stop with me, and put an end to your Bohemian life. Make yourself famous. I am old and childless and will be your father. Let us live together and forget all save fame."

And forthwith he offered to proceed with Franz to Paris, *via* several large German cities, where they would stop to give concerts.

In a few days Klaus succeeded in making Franz forget his vagrant life and its artistic independence, and reawakened in his pupil his now dormant ambition and desire for worldly fame. Hitherto, since his mother's

death, he had been content to receive applause only from the Gods and Goddesses who inhabited his vivid fancy; now he began to crave once more for the admiration of mortals. Under the clever and careful training of old Klaus his remarkable talent gained in strength and powerful charm with every day, and his reputation grew and expanded with every city and town wherein he made himself heard. His ambition was being rapidly realized; the presiding genii of various musical centres to whose patronage his talent was submitted soon proclaimed him *the one* violinist of the day, and the public declared loudly that he stood unrivalled by any one whom they had ever heard. These laudations very soon made both master and pupil completely lose their heads.

But Paris was less ready with such appreciation. Paris makes reputations for itself, and will take none on faith. They had been living in it for almost three years, and were still climbing with difficulty the artist's Calvary, when an event occurred which put an end even to their most modest expectations. The first arrival of Niccolò Paganini was suddenly heralded, and threw Lutetia into a convulsion of expectation. The unparalleled artist arrived, and — all Paris fell at once at his feet.

II

Now it is a well-known fact that a superstition born in the dark days of mediaeval superstition, and surviving almost to the middle of the present century, attributed all such abnormal, out-of-the-way talent as that of Paganini to "supernatural" agency. Every great and marvellous artist had been accused in his day of dealings with the devil. A few instances will suffice to refresh the reader's memory.

Tartini, the great composer and violinist of the XVIIth century, was denounced as one who got his best inspirations from the Evil One, with whom he was, it was said, in regular league. This accusation was of course due to the almost magical impression he produced upon his audiences. His inspired performance on the violin secured for him in his native country the title of "Master of Nations." The *Sonate du Diable*, also called "Tartini's Dream" — as every one who has heard it will be ready to testify — is the most weird melody ever heard or invented: hence, the marvellous composition has become the source of endless legends. Nor were they entirely baseless, since it was he, himself, who was shown to have originated them. Tartini confessed to having written it on awakening from a dream, in which he had heard his sonata performed by Satan, for his benefit, and in consequence of a bargain made with his infernal majesty.

Several famous singers, even, whose exceptional voices struck the hearers with superstitious admiration, have not escaped a like accusation. Pasta's splendid voice was attributed in her day to the fact that, three months before her birth, the diva's mother was carried during a trance to heaven, and there treated to a vocal concert of seraphs. Malibran was indebted for her voice to St. Cecilia while others said she owed it to a demon who watched over her cradle and sung the baby to sleep. Finally Paganini — the unrivalled performer, the mean Italian, who like Dryden's Jubal striking on the "chorded shell" forced the throngs that followed him to worship the divine sounds produced, and made people say that "less than a God could not dwell within the hollow of his violin" — Paganini left a legend too.

The almost supernatural art of the greatest violin-player that the world has ever known was often speculated upon, never understood. The effect produced by him on his audience was literally marvellous, overpowering. The great Rossini is said to have wept like a sentimental German maiden on hearing him play for the first time. The Princess Elisa of Lucca, a sister of the great Napoleon, in whose service Paganini was, as director of her private orchestra, for a long time was unable to hear him play without fainting. In women he produced nervous fits and hysterics at his will; stouthearted men he drove to frenzy. He changed cowards into heroes and made the bravest soldiers feel like so many nervous school-girls. Is it to be wondered at, then, that hundreds of weird tales circulated for long years about and around the mysterious Genoese, that modern Orpheus of Europe. One of these was especially ghastly. It was rumoured, and was believed by more people

Nightmare Tales

than would probably like to confess it, that the strings of his violin were made of *human intestines, according to all the rules and requirements of the Black Art.*

Exaggerated as this idea may seem to some, it has nothing impossible in it; and it is more than probable that it was this legend that led to the extraordinary events which we are about to narrate. Human organs are often used by the Eastern Black Magicians, so-called, and it is an averred fact that some Bengali Tantrikas (reciters of *tantras*, or "invocations to the demon," as a reverend writer has described them) use human corpses, and certain internal and external organs pertaining to them, as powerful magical agents for bad purposes.

However this may be, now that the magnetic and mesmeric potencies of hypnotism are recognized as facts by most physicians, it may be suggested with less danger than heretofore that the extraordinary effects of Paganini's violin-playing were not, perhaps, entirely due to his talent and genius. The wonder and awe he so easily excited were as much caused by his external appearance, "which had something weird and demoniacal in it," according to certain of his biographers, as by the inexpressible charm of his execution and his remarkable mechanical skill. The latter is demonstrated by his perfect imitation of the flageolet, and his performance of long and magnificent melodies on the G string alone. In this performance, which many an artist has tried to copy without success, he remains unrivalled to this day.

It is owing to this remarkable appearance of his — termed by his friends eccentric, and by his too nervous victims, diabolical — that he experienced great difficulties in refuting certain ugly rumours. These were credited far more easily in his day than they would be now. It was whispered throughout Italy, and even in his own native town, that Paganini had murdered his wife, and, later on, a mistress, both of whom he had loved passionately, and both of whom he had not hesitated to sacrifice to his fiendish ambition. He had made himself proficient in magic arts, it was asserted, and had succeeded thereby in imprisoning the souls of his two victims in his violin — his famous Cremona.

It is maintained by the immediate friends of Ernst T. W. Hoffmann, the celebrated author of *Die Elixire des Teufels, Meister Martin*, and other charming and mysterious tales, that Councillor Crespel, in the *Violin of Cremona*, was taken from the legend about Paganini. It is as all who have read it know, the history of a celebrated violin, into which the voice and the soul of a famous diva, a woman whom Crespel had loved and killed, had passed, and to which was added the voice of his beloved daughter, Antonia.

Nor was this superstition utterly ungrounded, nor was Hoffmann to be blamed for adopting it, after he had heard Paganini's playing. The extraordinary facility with which the artist drew out of his instrument, not only the most unearthly sounds, but positively human voices, justified the suspicion. Such effects might well have startled an audience and thrown terror into many a nervous heart. Add to this the impenetrable mystery connected with a certain period of Paganini's youth, and the most wild tales about him must be found in a measure justifiable, and even excusable; especially among a nation whose ancestors knew the Borgias and the Medicis of Black Art fame.

III

In those pre-telegraphic days, newspapers were limited, and the wings of fame had a heavier flight than they have now.

Franz had hardly heard of Paganini; and when he did, he swore he would rival, if not eclipse, the Geonese magician. Yes, he would either become the most famous of all living violinists, or he would break his instrument and put an end to his life at the same time.

Nightmare Tales

Old Klaus rejoiced at such a determination. He rubbed his hands in glee, and jumping about on his lame leg like a crippled satyr, he flattered and incensed his pupil, believing himself all the while to be performing a sacred duty to the holy and majestic cause of art.

Upon first setting foot in Paris, three years before, Franz had all but failed. Musical critics pronounced him a rising star, but had all agreed that he required a few more, years' practice, before he could hope to carry his audiences by storm. Therefore, after a desperate study of over two years and uninterrupted preparations, the Styrian artist had finally made himself ready for his first serious appearance in the great Opera House where a public concert before the most exacting critics of the old world was to be held; at this critical moment Paganini's arrival in the European metropolis placed an obstacle in the way of the realization of his hopes, and the old German professor wisely postponed his pupil's *debut*. At first he had simply smiled at the wild enthusiasm, the laudatory hymns sung about the Genoese violinist, and the almost superstitious awe with which his name was pronounced, But very soon Paganini's name became a burning iron in the hearts of both the artists, and a threatening phantom in the mind of Klaus. A few days more, and they shuddered at the very mention of their great rival, whose success became with every night more unprecedented.

The first series of concerts was over, but neither Klaus nor Franz had as yet had an opportunity of hearing him and of judging for themselves. So great and so beyond their means was the charge for admission, and so small the hope of getting a free pass from a brother artist justly regarded as the meanest of men in monetary transactions, that they had to wait for a chance, as did so many others. But the day came when neither master nor pupil could control their impatience any longer; so they pawned their watches, and with the proceeds bought two modest seats.

Who can describe the enthusiasm, the triumphs, of this famous, and at the same time fatal night! The audience was frantic; men wept and women screamed and fainted; while both Klaus and Stenio, sat looking paler than two ghosts. At the first touch of Paganini's magic bow, both Franz and Samuel felt as if the icy hand of death had touched them. Carried away by an irresistible enthusiasm, which turned into a violent, unearthly mental torture, they dared neither look into each other's faces, nor exchange one word during the whole performance.

At midnight, while the chosen delegates of the Musical Societies and the Conservatory of Paris unhitched the horses, and dragged the carriage of the grand artist home in triumph, the two Germans returned to their modest lodging, and it was a pitiful sight to see them. Mournful and desperate, they placed themselves in their usual seats at the fire-corner, and neither for a while opened his mouth.

"Samuel!" at last exclaimed Franz, pale as death itself. "Samuel — it remains for us now but to die! . . . Do you hear me? . . . We are worthless! We were two madmen to have ever hoped that any one in this world would ever rival . . . him!"

The name of Paganini stuck in his throat, as in utter despair he fell into his arm chair.

The old professor's wrinkles suddenly became purple. His little greenish eyes gleamed phosphorescently as, bending towards his pupil, he whispered to him in hoarse and broken tones:

"*Nein, nein!* Thou art wrong, my Franz! I have taught thee, and thou hast learned all of the great art that a simple mortal, and a Christian by baptism, can learn from another simple mortal. Am I to blame because these accursed Italians, in order to reign unequalled in the domain of art, have recourse to Satan and the diabolical effects of Black Magic?"

Franz turned his eyes upon his old master. There was a sinister light burning in those glittering orbs; a light telling plainly, that, to secure such a power, he, too, would not scruple to sell himself, body and soul, to the

Nightmare Tales

Evil One.

But he said not a word, and, turning his eyes from his old master's face, gazed dreamily at the dying embers.

The same long-forgotten incoherent dreams, which, after seeming such realities to him in his younger days, had been given up entirely, and had gradually faded from his mind, now crowded back into it with the same force and vividness as of old. The grimacing shades of Ixion, Sisyphus and Tantalus resurrected and stood before him, saying:

"What matters hell --- in which thou believest not. And even if hell there be, it is the hell described by the old Greeks, not that of the modern bigots --- a locality full of conscious shadows, to whom thou canst be a second Orpheus."

Franz felt that he was going mad, and, turning instinctively, he looked his old master once more right in the face. Then his bloodshot eye evaded the gaze of Klaus.

Whether Samuel understood the terrible state of mind of his pupil, or whether he wanted to draw him out, to make him speak, and thus to divert his thoughts, must remain as hypothetical to the reader as it is to the writer. Whatever may have been in his mind, the German enthusiast went on, speaking with a feigned calmness:

"Franz, my dear boy, I tell you that the art of the accursed Italian is not natural; that it is due neither to study nor to genius. It never was acquired in the usual, natural way. You need not stare at me in that wild manner, for what I say is in the mouth of millions of people. Listen to what I now tell you, and try to understand. You have heard the strange tale whispered about the famous Tartini? He died one fine Sabbath night, strangled by his familiar demon, who had taught him how to endow his violin with a human voice, by shutting up in it, by means of incantations, the soul of a young virgin. Paganini --- did more. In order to endow his instrument with the faculty of emitting human sounds, such as sobs, despairing cries, supplications, moans of love and fury --- in short, the most heart-rending notes of the human voice --- Paganini became, the murderer not only of his wife and his mistress, but also of a friend, who was more tenderly attached to him than any other being on this earth. He then made the four chords of his magic violin out of the intestines of his last victim. This is the secret of his enchanting talent, of that overpowering melody, that combination of sounds, which you will never be able to master unless . . ."

The old man could not finish the sentence. He staggered back before the fiendish look of his pupil, and covered his face with his hands.

Franz was breathing heavily, and his eyes had an expression which reminded Klaus of those of a hyena. His pallor was cadaverous. For some time he could not speak, but only gasped for breath. At last he slowly muttered

"Are you in earnest?"

"I am, as I hope to help you."

"And . . . and do you really believe that had I only the means of obtaining human intestines for strings, I could rival Paganini?" asked Franz, after a moment's pause, and casting down his eyes.

The old German unveiled his face, and, with a strange look of determination upon it, softly answered:

Nightmare Tales

"Human intestines alone are not sufficient for our purpose; they must have belonged to some one who had loved us well, with an unselfish, holy love. Tartini endowed his violin with the life of a virgin; but that virgin had died of unrequited love for him. The fiendish artist, had prepared beforehand a tube, in which he managed to catch her last breath as she expired, pronouncing his beloved name, and he then transferred this breath to his violin. As to Paganini, I have just told you his tale. It was with the consent of his victim, though, that he murdered him to get possession of his intestines.

"Oh, for the power of the human voice!" Samuel went on, after a brief pause. "What can equal the eloquence, the magic spell of the human voice? Do you think, my poor boy, I would not have taught you this great, this final secret, were it not that it throws one right into the clutches of him . . . who must remain unnamed at night?" he added, with a sudden return to the superstitions of his youth.

Franz did not answer; but with a calmness awful to behold, he left his place, took down his violin from the wall where it was hanging, and, with one powerful grasp of the chords, he tore them out and flung them into the fire.

Samuel suppressed a cry of horror. The chords were hissing upon the coals, where, among the blazing logs, they wriggled and curled like so many living snakes.

"By the witches of Thessaly and the dark arts of Circe!" he exclaimed, with foaming mouth and his eyes burning like coals; "by the Furies of Hell and Pluto himself, I now swear, in thy presence, O Samuel, my master, never to touch a violin again until I can string it with four human chords. May I be accursed for ever and ever if I do!" He fell senseless on the floor, with a deep sob, that ended like a funeral wail; old Samuel lifted him up as he would have lifted a child, and carried him to his bed. Then he sallied forth in search of a physician.

IV

For several days after this painful scene Franz was very ill, ill almost beyond recovery. The physician declared him to be suffering from brain fever and said that the worst was to be feared. For nine long days the patient remained delirious; and Klaus, who was nursing him night and day with the solicitude of the tenderest mother, was horrified at the work of his own hands. For the first time since their acquaintance began, the old teacher, owing to the wild ravings of his pupil, was able to penetrate into the darkest corners of that weird, superstitious, cold, and, at the same time, passionate nature; and — he trembled at what he discovered. For he saw that which he had failed to perceive before — Franz as he was in reality, and not as he seemed to superficial observers. Music was the life of the young man, and adulation was the air he breathed, without which that life became a burden; from the chords of his violin alone, Stenio, drew his life and being, but the applause of men and even of Gods was necessary to its support. He saw unveiled before his eyes a genuine, artistic, *earthly* soul, with its divine counterpart totally absent, a son of the Muses, all fancy and brain poetry, but without a heart. While listening to the ravings of that delirious and unhinged fancy Klaus felt as if he were for the first time in his long life exploring a marvellous and untravelled region, a human nature not of this world but of some incomplete planet. He saw all this, and shuddered. More than once he asked himself whether it would not be doing a kindness to his "boy" to let him die before he returned to consciousness.

But he loved his pupil too well to dwell for long on such an idea. Franz had bewitched his truly artistic nature, and now old Klaus felt as though their two lives were inseparably linked together. That he could thus feel was a revelation to the old man; so he decided to save Franz, even at the expense of his own old and, as he thought, useless life.

The seventh day of the illness brought on a most terrible crisis. For twenty-four hours the patient never

closed his eyes, nor remained for a moment silent; he raved continuously during the whole time. His visions were peculiar, and he minutely described each. Fantastic, ghastly figures kept slowly swimming out of the penumbra of his small, dark room, in regular and uninterrupted procession, and he greeted each by name as he might greet old acquaintances. He referred to himself as Prometheus, bound to the rock by four bands made of human intestines. At the foot of the Caucasian Mount the black waters of the river Styx were running. . . . They had deserted Arcadia, and were now endeavouring to encircle within a seven-fold embrace the rock upon which he was suffering

"Wouldst thou know the name of the Promethean rock, old man?" he roared into his adopted father's ear. . . . "Listen then, its name is called Samuel Klaus

"Yes, yes!" the German murmured disconsolately. "It is I who killed him, while seeking to console. The news of Paganini's magic arts struck his fancy too vividly. . . . Oh, my poor, poor boy!"

"Ha, ha, ha, ha!" The patient broke into a loud and discordant laugh. "Aye, poor old man, sayest thou? So, so, thou art of poor stuff, anyhow, and wouldst look well only when stretched upon a fine Cremona violin! . . ."

Klaus shuddered, but said nothing. He only bent over the poor maniac, and with a kiss upon his brow, a caress as tender and as gentle as that of a doting mother, he left the sick-room for a few instants to seek relief in his own garret. When he returned, the ravings were following another channel. Franz was singing, trying to imitate the sounds of a violin.

Toward the evening of that day, the delirium of the sick man became perfectly ghastly. He saw spirits of fire clutching at his violin. Their skeleton hands, from each finger of which grew a flaming claw, beckoned to old Samuel They approached and surrounded the old master, and were preparing to rip him open him, "the only man on this earth who loves me with an unselfish, holy love, and . . . whose intestines can be of any good at all!" he went on whispering, with glaring eyes and demon laugh

By the next morning, however, the fever had disappeared, and by the end of the ninth day Stenio had left his bed, having no recollection of his illness, and no suspicion that he had allowed Klaus to read his inner thought. Nay; had he himself any knowledge that such a horrible idea as the sacrifice of his old master to his ambition had ever entered his mind? Hardly. The only immediate result of his fatal illness was, that as, by reason of his vow, his artistic passion could find no issue, another passion awoke, which might avail to feed his ambition and his insatiable fancy. He plunged headlong into the study of the Occult Arts, of Alchemy and of Magic. In the practice of Magic the young dreamer sought to stifle the voice of his passionate longing for his, as he thought, for ever lost violin

Weeks and months passed away, and the conversation about Paganini was never resumed between the master and the pupil. But a profound melancholy had taken possession of Franz, the two hardly exchanged a word, the violin hung mute, chordless, full of dust, in its habitual place. It was as the presence of a soulless corpse between them.

The young man had become gloomy and sarcastic, even avoiding the mention of music. Once, as his old professor, after long hesitation, took out his own violin from its dust-covered case and prepared to play, Franz gave a convulsive shudder, but said nothing. At the first notes of the bow, however, he glared like a madman, and rushing out of the house, remained for hours, wandering in the streets. Then old Samuel in his turn threw his instrument down, and locked himself up in his room till the following morning.

One night as Franz sat, looking particularly pale and gloomy, old Samuel suddenly jumped from his seat, and after hopping about the room in a magpie fashion, approached his pupil, imprinted a fond kiss upon the

young man's brow, and squeaked at the top of his shrill voice:

"Is it not time to put an end to all this?" . . .

Whereupon, starting from his usual lethargy, Franz echoed, as in a dream:

"Yes, it is time to put an end to this."

Upon which the two separated, and went to bed.

On the following morning, when Franz awoke, he was astonished not to see his old teacher in his usual place to greet him. But he had greatly altered during the last few months, and he at first paid no attention to his absence, unusual as it was. He dressed and went into the adjoining-room, a little parlour where they had their meals, and which separated their two bedrooms. The fire had not been lighted since the embers had died out on the previous night, and no sign was anywhere visible of the professor's busy hand in his usual housekeeping duties. Greatly puzzled, but in no way dismayed, Franz took his usual place at the corner of the now cold fire-place, and fell into an aimless reverie. As he stretched himself in his old armchair, raising both his hands to clasp them behind his head in a favourite posture of his, his hand came into contact with something on a shelf at his back; he knocked against a case, and brought it violently on the ground.

It was old Klaus' violin-case that came down to the floor with such a sudden crash that the case opened and the violin fell out of it, rolling to the feet of Franz. And then the chords striking against the brass fender emitted a sound, prolonged, sad and mournful as the sigh of an unrestful soul; it seemed to fill the whole room, and reverberated in the head and the very heart of the young man. The effect of that broken violin-string was magical.

"Samuel!" cried Stenio, with his eyes starting from their sockets, and an unknown terror suddenly taking possession of his whole being. "Samuel! what has happened? . . . My good, my dear old master!" he called out, hastening to the professor's little room, and throwing the door violently open. No one answered, all was silent within.

He staggered back, frightened at the sound of his own voice, so changed and hoarse it seemed to him at this moment. No reply came in response to his call. Naught followed but a dead silence . . . that stillness which in the domain of sounds, usually denotes death. In the presence of a corpse, as in the lugubrious stillness of a tomb, such silence acquires a mysterious power, which strikes the sensitive soul with a nameless terror The little room was dark, and Franz hastened to open the shutters.

* * * * *

Samuel was lying on his bed, cold, stiff, and lifeless. . . . At the sight of the corpse of him who had loved him so well, and had been to him more than a father, Franz experienced a dreadful revulsion of feeling a terrible shock. But the ambition of the fanatical artist got the better of the despair of the man, and smothered the feelings of the latter in a few seconds.

A note bearing his own name was conspicuously placed upon a table near the corpse. With trembling hand, the violinist tore open the envelope, and read the following:

MY BELOVED SON, FRANZ,

When you read this, I shall have made the greatest sacrifice, that your best and only friend and teacher could have accomplished for your fame. He, who loved you most, is now but an

Nightmare Tales

inanimate lump of clay. Of your old teacher there now remains but a clod of cold organic matter. I need not prompt you as to what you have to do with it. Fear not stupid prejudices. It is for your future fame that I have made an offering of my body, and you would be guilty of the blackest ingratitude were you now to render useless this sacrifice. When you shall have replaced the chords upon your violin, and these chords a portion of my own self, under your touch it will acquire the power of that accursed sorcerer, all the magic voices of Paganini's instrument. You will find therein my voice, my sighs and groans, my song of welcome, the prayerful sobs of my infinite and sorrowful sympathy, my love for you. And now, my Franz, fear nobody! Take your instrument with you, and dog the steps of him who filled our lives with bitterness and despair! Appear in every arena, where, hitherto, he has reigned without a rival, and bravely throw the gauntlet of defiance in his face. O Franz! then only wilt thou hear with what a magic power the full notes of unselfish love will issue forth from thy violin. Perchance, with a last caressing touch of its chords, thou wilt remember that they once formed a portion of thine old teacher, who now embraces and blesses thee for the last time.

SAMUEL.

Two burning tears sparkled in the eyes of Franz, but they dried up instantly. Under the fiery rush of passionate hope and pride, the two orbs of the future magician—artist, riveted to the ghastly face of the dead man, shone like the eyes of a demon.

Our pen refuses to describe that which took place on that day, after the legal inquiry was over. As another note, written with a view of satisfying the authorities, had been prudently provided by the loving care of the old teacher, the verdict was, "Suicide from causes unknown"; after this the coroner and the police retired, leaving the bereaved heir alone in the death—room, with the remains of that which had once been a living man.

* * * * *

Scarcely a fortnight had elapsed from that day, ere the violin had been dusted, and four new, stout strings had been stretched upon it. Franz dared not look at them. He tried to play, but the bow trembled in his hand like a dagger in the grasp of a novice—brigand. He then determined not to try again, until the portentous night should arrive, when he should have a chance of rivalling, nay, of surpassing, Paganini.

The famous violinist had meanwhile left Paris, and was giving a series of triumphant concerts at an old Flemish town in Belgium.

V

One night, as Paganini, surrounded by a crowd of admirers, was sitting in the dining—room of the hotel at which he was staying, a visiting card, with a few words written on it in pencil, was handed to him by a young man with wild and staring eyes.

Fixing upon the intruder a look, which few persons could bear, but receiving back a glance as calm and determined as his own, Paganini slightly bowed, and then dryly said:

"Sir, it shall be as you desire. Name the night. I am at your service."

On the following morning the whole town was startled by the appearance of bills posted at the corner of

Nightmare Tales

every street, and bearing the strange notice:

On the night of, at the Grand Theatre of and for the first time, will appear before the public, Franz Stenio, a German violinist, arrived purposely to throw down the gauntlet to, the world-famous Paganini and to challenge him to a duel — upon their violins. He purposes to compete with the great "virtuoso" in the execution of the most difficult of his compositions. The famous Paganini has accepted the challenge. Franz Stenio will play, in competition with the unrivalled violinist, the celebrated "Frantaisie Caprice" of the latter, known as "The Witches."

The effect of the notice was magical. Paganini, who, amid his greatest triumphs, never lost sight of a profitable speculation, doubled the usual price of admission, but still the theatre could not hold the crowds that flocked to secure tickets for that memorable performance.

* * * * *

At last the morning of the concert day dawned, and the "duel" was in every one's mouth. Franz Stenio, who, instead of sleeping, had passed the whole long hours of the preceding midnight in walking up and down his room like an engaged panther, had, toward morning, fallen on his bed from mere physical exhaustion. Gradually he passed into a death-like and dreamless slumber. At the gloomy winter dawn he awoke, but finding it too early to rise he fell asleep again. And then he had a vivid dream — so vivid indeed, so life-like, that from its terrible realism he felt sure that it was a vision rather than a dream.

He had left his violin on a table by his bedside, locked in its case, the key of which never left him. Since he had strung it with those terrible chords he never let it out of his sight for a moment. In accordance with his resolution he had not touched it since his first trial, and his bow had never but once touched the human strings, for he had since always practised on another instrument. But now in his sleep he saw himself looking at the locked case. Something in it was attracting his attention, and he found himself incapable of detaching his eyes from it. Suddenly he saw the upper part of the case slowly rising, and, within the chink thus produced, he perceived two small, phosphorescent green eyes — eyes but too familiar to him — fixing themselves on his, lovingly, almost beseechingly. Then a thin, shrill voice, as if issuing from these ghastly orbs — the voice and orbs of Samuel Klaus himself — resounded in Stenio's horrified ear, and he heard it say:

"Franz, my beloved boy Franz, I cannot, no *I cannot* separate myself from . . . *them!*"

And "they" twanged piteously inside the case.

Franz stood speechless, horror-bound. He felt his blood actually freezing, and his hair moving and standing erect on his head.

"It's but a dream, an empty dream!" he attempted to formulate in his mind.

"I have tried my best, Franzchen I have tried my best to sever myself from these accursed strings, without pulling them to pieces. . . ." pleaded the same shrill, familiar voice. "Wilt thou help me to do so?"

Another twang, still more prolonged and dismal, resounded within the case, now dragged about the table in every direction, by some interior power, like some living, wriggling thing, the twangs becoming sharper and more jerky with every new pull.

Nightmare Tales

It was not for the first time that Stenio heard those sounds. He had often remarked them before — indeed, ever since he had used his master's viscera as a foot-stool for his own ambition. But on every occasion a feeling of creeping horror had prevented him from investigating their cause, and he had tried to assure himself that the sounds were only a hallucination.

But now he stood face to face with the terrible fact, whether in dream or in reality he knew not, nor did he care, since the hallucination — if hallucination it were — was far more real and vivid than any reality. He tried to speak, to take a step forward; but as often happens in nightmares, he could neither utter a word nor move a finger He felt hopelessly paralyzed.

The pulls and jerks were becoming more desperate with each moment, and at last something inside the case snapped violently. The vision of his Stradivarius, devoid of its magical strings, flashed before his eyes, throwing him into a cold sweat of mute and unspeakable terror.

He made a superhuman effort to rid himself of the incubus that held him spell-bound. But as the last supplicating whisper of the invisible Presence repeated:

"Do, oh, do . . . help me to cut myself off — "

Franz sprang to the case with one bound, like an enraged tiger defending its prey, and with one frantic effort breaking the spell.

"Leave the violin alone, you old fiend from hell!" he cried, in hoarse and trembling tones.

He violently shut down the self-raising lid, and while firmly pressing his left hand on it, he seized with the right a piece of rosin from the table and drew on the leather-covered top the sign of the six pointed star — the seal used by King Solomon to bottle up the rebellious djins inside their prisons.

A wail, like the howl of a she-wolf moaning over her dead little ones, came out of the violin-case:

"Thou art ungrateful . . . very ungrateful, my Franz!" sobbed the blubbing "spirit-voice." "But I forgive . . . for I still love thee well. Yet thou canst not shut me in . . . boy. Behold!"

And instantly a greyish mist spread over and covered case and table, and rising upward formed itself into an indistinct shape. Then it began growing, and as it grew, Franz felt himself gradually enfolded in cold and damp coils, slimy as those of a huge snake. He gave a terrible cry and awoke; but, strangely enough, not on his bed, but near the table, just as he had dreamed, pressing the violin case desperately with both his hands.

"It was but a dream, . . . after all," he muttered, still terrified, but relieved of the load on his heaving breast.

With a tremendous effort he composed himself, and unlocked the case to inspect the violin. He found it covered with dust, but otherwise sound and in order, and he suddenly felt himself as cool and determined as ever. Having dusted the instrument he carefully rosined the bow, tightened the strings and tuned them. He even went so far as to try upon it the first notes of the "Witches"; first cautiously and timidly, then using his bow boldly and with full force.

The sound of that loud, solitary note — defiant as the war trumpet of a conquerer, sweet and majestic as the touch of a seraph on his golden harp in the fancy of the faithful — thrilled through the very soul of Franz it revealed to him a hitherto unsuspected potency in his bow, which ran on in strains that filled the room with the richest swell of melody, unheard by the artist until that night. Commencing in uninterrupted *legato* tones, his bow sang to him of sun-bright hope and beauty, of moonlit nights, when the soft and balmy stillness

endowed every blade of grass and all things animate and inanimate with a voice and a song of love. For a few brief moments it was a torrent of melody, the harmony of which, "tuned to soft woe," was calculated to make mountains weep, had there been any in the room, and to soothe.

. even th'inexorable powers of hell,

the presence of which was undeniably felt in this modest hotel room. Suddenly, the solemn *legato* chant, contrary to all laws of harmony, quivered, became *arpeggios*, and ended in shrill *staccatos*, like the notes of a hyena laugh. The same creeping sensation of terror, as he had before felt, came over him, and Franz threw the bow away. He had recognized the familiar laugh, and would have no more of it. Dressing, he locked the be-devilled violin securely in its case, and taking it with him to the dining-room, determined to await quietly the hour of trial.

VI

The terrible hour of the struggle had come, and Stenio was at his post — calm, resolute, almost smiling.

The theatre was crowded to suffocation, and there was not even standing room to be got for any amount of hard cash or favouritism. The singular challenge had reached every quarter to which the post could carry it, and gold flowed freely into Paganini's unfathomable pockets, to an extent almost satisfying even to his insatiate and venal soul.

It was arranged that Paganini should begin. When he appeared upon the stage, the thick walls of the theatre shook to their foundations with the applause that greeted him. He began and ended his famous composition "The Witches" amid a storm of cheers. The shouts of public enthusiasm lasted so long that Franz began to think his turn would never come. When, at last, Paganini, amid the roaring applause of a frantic public, was allowed to retire behind the scenes, his eye fell upon Stenio, who was tuning his violin, and he felt amazed at the serene calmness, the air of assurance, of the unknown German artist.

When Franz approached the footlights, he was received with icy coldness. But for all that, he did not feel in the least disconcerted. He looked very pale, but his thin white lips wore a scornful smile as response to this dumb unwelcome. He was sure of his triumph.

At the first notes of the prelude of "The Witches" a thrill of astonishment passed over the audience. It was Paganini's touch, and it was something more. Some — and they were the majority — thought that never in his best moments of inspiration, had the Italian artist himself, in executing that diabolical composition of his, exhibited such an extraordinary diabolical power. Under the pressure of the long muscular fingers of Franz, the chords shivered like the palpitating intestines of a disembowelled victim under the vivisector's knife. They moaned melodiously, like a dying child. The large blue eye of the artist, fixed with a satanic expression upon the sounding-board, seemed to summon forth Orpheus himself from the infernal regions, rather than the musical notes supposed to be generated in the depths of the violin. Sounds seemed to transform themselves into objective shapes, thickly and precipitately gathering as at the evocation of a mighty magician, and to be whirling around him, like a host of fantastic, infernal figures, dancing the witches' "goat dance." In the empty depths of the shadowy background of the stage, behind the artist, a nameless phantasmagoria, produced by the concussion of unearthly vibrations, seemed to form pictures of shameless orgies, of the voluptuous hymens of a real witches' Sabbath . . . A collective hallucination took hold of the public. Panting for breath, ghastly, and trickling with the icy perspiration of an inexpressible horror, they sat spell-bound, and unable to break the spell of the music by the slightest motion. They experienced all the illicit enervating delights of the paradise of Mahommed, that come into the disordered fancy of an opium-eating Mussulman, and felt at the same time the abject terror, the agony of one who struggles against an attack of *delirium*

Nightmare Tales

tremens Many ladies shrieked aloud, others fainted, and strong men gnashed their teeth, in a state of utter helplessness. . . .

Then came the *finale*. Thundering uninterrupted applause delayed its beginning, expanding the momentary pause to a duration of almost a quarter of an hour. The bravos were furious, almost hysterical. At last, when after a profound and last bow, Stenio, whose smile was as sardonic as it was triumphant, lifted his bow to attack the famous finale, his eye fell upon Paganini, who, calmly seated in the manager's box, had been behind none in zealous applause. The small and piercing black eyes of the Genoese artist were riveted to the Stradivarius in the hands of Franz, but otherwise he seemed quite cool and unconcerned. His rival's face troubled him for one short instant, but he regained his self-possession and, lifting once more his bow, drew the first note.

Then the public enthusiasm reached its acme, and soon knew no bounds. The listeners heard and saw indeed. The witches' voices resounded in the air, and beyond all the other voices one voice was heard —

Discordant, and unlike to human sounds
It seem'd of dogs the bark, of wolves the howl;
The doleful screechings of the midnight owl;
The hiss of snakes, the hungry lion's roar;
The sounds of billows beating on the shore;
The groan of winds among the leafy wood,
And burst of thunder from the rending cloud; —
'Twas these, all these in one

The magic bow was drawing forth its last quivering sounds — famous among prodigious musical feats — imitating the precipitate flight of the witches before bright dawn; of the unholy women saturated with the fumes of their nocturnal Saturnalia, when — a strange thing came to pass on the stage. Without the slightest transition, the notes suddenly changed. In their aerial flight of ascension and descent, their melody was unexpectedly altered in character. The sounds became confused, scattered, disconnected . . . and then — it seemed from the sounding-board of the violin — came out swearing, jarring tones, like those of a street Punch, screaming at the top of a senile voice:

"Art thou satisfied, Franz, my boy? Have not I gloriously kept my promise, eh?"

The spell was broken. Though still unable to realize the whole situation, those who heard the voice and the *Punchinello*-like tones, were freed, as by enchantment, from the terrible charm under which they had been held. Loud roars of laughter, mocking exclamations of half-anger and half-irritation were now heard from every corner of the vast theatre. The musicians in the orchestra, with faces still blanched from weird emotion, were now seen shaking with laughter, and the whole audience rose, like one man, from their seats, unable yet to solve the enigma; they felt, nevertheless, too disgusted, too disposed to laugh to remain one moment longer in the building.

But suddenly the sea of moving heads in the stalls and the pit became once more motionless, and stood petrified, as though struck by lightning. What all saw was terrible enough — the handsome though wild face of the young artist suddenly aged, and his graceful, erect figure bent down, as though under the weight of years; but this was nothing to that which some of the most sensitive clearly perceived. Franz Stenio's person was now entirely enveloped in a semi-transparent mist, cloud-like, creeping with serpentine motion, and gradually tightening round the living form, as though ready to engulf him. And there were those also who discerned in this tall and ominous pillar of smoke a clearly-defined figure, a form showing the unmistakable outlines of a grotesque and grinning, but terribly awful-looking old man, whose viscera were protruding and the ends of the intestines stretched on the violin.

Nightmare Tales

Within this hazy, quivering veil, the violinist was then seen, driving his bow furiously across the human chords, with the contortions of a demoniac, as we see them represented on mediaeval cathedral paintings!

An indescribable panic swept over the audience, and breaking now, for the last time, through the spell which had again bound them motionless, every living creature in the theatre made one mad rush towards the door. It was like the sudden outburst of a dam, a human torrent, roaring amid a shower of discordant notes, idiotic squeakings, prolonged and whining moans, cacophonous cries of frenzy, above which, like the detonations of pistol shots, was heard the consecutive bursting of the four strings stretched upon the sound-board of that bewitched violin.

* * * * *

When the theatre was emptied of the last man of the audience, the terrified manager rushed on the stage in search of the unfortunate performer. He was found dead and already stiff, behind the footlights, twisted up into the most unnatural of postures, with the "catguts" wound curiously round his neck and his violin shattered into a thousand fragments. . . .

When it became publicly known that the unfortunate would-be rival of Niccolo Paganini had not left a cent to pay for his funeral or his hotel-bill, the Genoese, his proverbial meanness notwithstanding, settled the hotel-bill and had poor Stenio buried at his own expense.

He claimed, however, in exchange, the fragments of the Stradivarius — as a memento of the strange event.
