[[Vol. 1, Page]] 485 THE METAPHYSICS OF PHYSICAL SCIENCE.

logical metaphysics especially. But we see, whenever the Occultists are bold enough to raise their diminished heads, that materialistic, physical science is honey-combed with metaphysics;* that its most fundamental principles, while inseparably wedded to transcendentalism, are nevertheless, in order to show modern science divorced from such "dreams," tortured and often ignored in the maze of contradictory theories and hypotheses. A very good corroboration of this charge lies in the fact that Science finds itself absolutely compelled to accept the "hypothetical" Ether and to try to explain it on the materialistic grounds of atomo-mechanical laws. This attempt has led directly to the most fatal discrepancies and radical inconsistencies between the assumed nature of Ether

and its physical actions. A second proof is found in the many contradictory statements about the atom -- the most metaphysical object in creation.

Now, what does the modern science of physics know of AEther, the first concept of which belongs undeniably to ancient philosophers, the Greeks having borrowed it from the Aryans, and the origin of modern AEther being found in, and disfigured from, AKASA? This disfigurement

[[Footnote(s)]] -----

* Stallo's above-cited work, "Concepts of Modern Physics," a volume which has called forth the liveliest protests and criticisms, is recommended to anyone inclined to doubt this statement. "The professed antagonism of Science to metaphysics," he writes, "has led the majority of scientific specialists to assume that the methods and results of empirical research are wholly independent of the control of the laws of thought. They either silently ignore, or openly repudiate, the simplest canons of logic, including the laws of non-contradiction and . . . resent with the utmost vehemence, every application of the rule of consistency to their hypotheses and theories . . . and they regard an examination (of these) . . . in the light of these laws as an impertinent intrusion of 'a priori principles and methods' into the domains of empirical science. Persons of this cast of mind find no difficulty in holding that atoms are absolutely inert, and at the same time asserting that these atoms are perfectly elastic; or in maintaining that the physical universe, in its last analysis, resolves itself into 'dead' matter and motion, and yet denying that all physical energy is in reality kinetic; or in proclaiming that all phenomenal differences in the objective world are ultimately due to the various motions of absolutely simple material units, and, nevertheless, repudiating the proposition that these units are equal" . . . (p. xix.) "The blindness of eminent physicists to some of the most obvious consequences of their own theories is marvellous . . . When Prof. Tait, in conjunction with Prof. Stewart, announces that 'matter is simply passive' (The Unseen Universe, sec. 104), and then, in connection with Sir W. Thomson, declares that 'matter has an innate power of resisting external influences' (Treat. on Nat. Phil., Vol. I., sec. 216), it is hardly impertinent to inquire how these statements are to be reconciled. When Prof. Du Bois Reymond . . . insists upon the necessity of reducing all the processes of nature to motions of a substantial, indifferent substratum, wholly destitute of quality ('Ueber die Grenzen des Naturerkennens,' p. 5), having declared shortly before in the same lecture that 'resolution of all changes in the material world into motions of atoms caused by their constant central forces would be the completion of natural science,' we are in a perplexity from which we have to be relieved." (Pref. xliii.)

[[Vol. 1, Page]] 486 THE SECRET DOCTRINE.

is claimed to be a modification and refinement of the idea of Lucretius. Let us then examine the modern concept from several scientific volumes containing the admissions of the physicists themselves.

The existence of Ether is accepted by physical astronomy, in ordinary physics, and in chemistry. Astronomers, who first began by regarding it as a fluid of extreme tenuity and mobility, offering no sensible resistance to the motions of celestial bodies, never gave a thought to its continuity or discontinuity. "Its main function in modern astronomy has been to serve as a basis for hydrodynamical theories of gravitation. In physics this fluid appeared for some time in several roles in connection with the 'imponderables' -- so cruelly put to death by Sir W. Grove. Some physicists have even identified the ether of space with those "imponderables." Then came their Kinetic theories; and from the date of the dynamical theory of heat, it was chosen in optics as a substratum for luminous undulations. Then, in order to explain the dispersion and polarization of light, physicists had to resort once more to their "scientific imagination" and forthwith endowed the Ether with (a) atomic or molecular structure, and (b) with an enormous elasticity, "so that its resistance to deformation far exceeded that of the most rigid elastic bodies" (Stallo). This necessitated the theory of the essential discontinuity of matter, hence of Ether. After having accepted this discontinuity, in order to account for dispersion and polarization, theoretical impossibilities were discovered with regard to such dispersions. Cauchy's "scientific imagination" saw in atoms "material points without extension," and he proposed, in order to obviate the most formidable obstacles to the undulatory theory (namely, some well-known mechanical theorems which stood in the way), to assume that the ethereal medium of propagation, instead of being continuous, should consist of particles separated by sensible distances. Fresnel rendered the same service to the phenomena of polarization. E. B. Hunt upset the theories of both (Silliman's Journal, vol. viii., p. 364 et seq.) There are now men of Science who proclaim them "materially fallacious," while others -- the "atomo-mechanicalists" -- cling to them with desperate tenacity. The supposition of an atomic or molecular constitution of ether is upset, moreover, by thermodynamics, for Clerk Maxwell showed that such a medium would be simply gas.* The hypothesis of "finite intervals" is thus proven of no avail as a supplement to the undulatory theory. Besides, eclipses fail to reveal any such variation of colour as supposed by Cauchy (on the assumption that the chromatic rays are propagated with different velocities).

[[Footnote(s)]] -----

* See Clerk Maxwell's "Treatise on Electricity of Magnetism" and compare with Cauchy's "Memoire sur la Dispersion de la lumiere."

[[Vol. 1, Page]] 487 SCIENTIFIC IMAGINATION.

Astronomy has pointed out more than one phenomenon absolutely at variance with this doctrine.

Thus, while in one department of physics the atomo-molecular constitution of the ether is accepted in order to account for one set of special phenomena, in another department such a constitution is found quite subversive of a number of well-ascertained facts, Hirn's charges being thus justified (vide supra). Chemistry deemed it impossible to concede enormous elasticity to the ether without

depriving it of other properties, upon the assumption of which the construction of its modern theories depended. This ended in a final transformation of ether. The exigencies of the atomo-mechanical theory have led distinguished mathematicians and physicists to attempt to substitute for the traditional atoms of matter, peculiar forms of vortical motion in a "universal homogeneous, incompressible, and continuous material medium," or AEther. (See Stallo.)

The present writer, claiming no great scientific education, but only a tolerable acquaintance with modern theories, and a better one with Occult Sciences, picks up weapons against the detractors of the esoteric teaching in the very arsenal of modern Science. The glaring contradictions, the mutually-destructive hypotheses of world-renowned Scientists, their mutual accusations, denunciations and disputes, show plainly that, whether accepted or not, the Occult theories have as much right to a hearing as any of the so-called learned and academical hypotheses. Thus whether the followers of the Royal Society choose to accept ether as a continuous or a discontinuous fluid matters little, and is indifferent to the present purpose. It simply points to one certainty: Official Science knows nothing to this day of the constitution of ether. Let Science call it matter, if it likes; only neither as akasa nor as the one sacred AEther of the Greeks, is it to be found in any of the states of matter known to modern physics. It is MATTER on quite another plane of perception and being, and it can neither be analyzed by scientific apparatus, appreciated, nor even conceived by "scientific imagination," unless the possessors thereof study the Occult Sciences. That which follows proves this statement.

It is clearly demonstrated by Stallo as regards the crucial problems of modern physics (as was done by De Quatrefages and several others in those of anthropology, biology, etc., etc.) that, in their efforts to support their individual hypotheses and systems, the majority of the eminent and learned materialists very often utter the greatest fallacies. Let us take the following case. Most of them reject actio in distans (one of the fundamental principles in the question of AEther or Akasa in Occultism), while, as Stallo justly observes, there is no physical action,

[[Vol. 1, Page]] 488 THE SECRET DOCTRINE.

"which, on close examination, does not resolve itself into actio in distans"; and he proves it.

Now, metaphysical arguments, according to Professor Lodge (Nature, vol. xxvii., p. 304), are "unconscious appeals to experience." And he adds that if such an experience is not conceivable, then it does not exist, etc. In his own words:-- ". . . If a highly-developed mind or set of minds, find a doctrine about some comparatively simple and fundamental matter absolutely unthinkable, it is an evidence . . . that the unthinkable state of things has no existence, etc."

And thereupon, toward the end of his lecture, Professor Lodge indicates that the explanation of cohesion, as well as of gravity, "is to be looked for in the vortex-atom theory of Sir William Thomson" (Stallo).

It is needless to stop to inquire whether it is to this vortex-theory, also, that we have to look for the dropping down on earth of the first life-germ by a passing meteor or comet (Sir W. Thomson's hypothesis). But Mr. Lodge might be reminded of the wise criticism on his lecture in the same "Concepts of Modern Physics." Noticing the above-quoted declaration by the London Professor, the author asks "whether . . . the elements of the vortex-theory are familiar, or even possible, facts of experience? For, if they are not, clearly that theory is obnoxious to the same criticism which is said to invalidate the assumption of ACTIO IN DISTANS" (p. xxiv). And then the able critic shows clearly what the Ether is not, nor can ever be, notwithstanding all scientific claims to the contrary. And thus he opens widely, if unconsciously, the entrance door to our occult teachings. For, as he says:--

"The medium in which the vortex-movements arise is, according to Professor Lodge's own express statement (NATURE, vol. xxvii., p. 305), 'a perfectly homogeneous, incompressible, continuous body, incapable of being resolved into simple elements or atoms: it is, in fact, continuous, not molecular.' And after making this statement Professor Lodge adds: 'There is no other body of which we can say this, and hence the Properties of the aether must be somewhat DIFFERENT from those of ordinary matter.' It appears, then, that the whole vortex-atom theory, which is offered to us as a substitute for the 'metaphysical theory' of actio in distans, rests upon the hypothesis of the existence of a material medium which is utterly unknown to experience, and which has properties somewhat different* from those of ordinary matter. Hence this theory, instead of being, as is claimed, a reduction of an unfamiliar fact of experience to a familiar fact, is,

[[Footnote(s)]] -----

* "Somewhat different!" exclaims Stallo. "The real import of this 'somewhat' is, that the medium in question is not, in any intelligible sense, material at all, having none of the properties of matter." All the properties of matter depend upon differences and changes, and the "hypothetical" aether here defined is not only destitute of differences, but incapable of difference and change -- (in the physical sense let us add). This proves that if aether is "matter" it is so only as something visible, tangible and existing, for spiritual senses alone; that it is a Being indeed -- but not of our plane: Pater AEther, or Akasa.

[[Vol. 1, Page]] 489 THE PHYSICAL "PHANTOM."

on the contrary, a reduction of a fact which is perfectly familiar, to a fact which is not only unfamiliar, but wholly unknown, unobserved and unobservable. Furthermore, the alleged vortical motion of, or rather in, the assumed ethereal medium is . . . impossible, because "motion in a perfectly homogeneous, incompressible, and therefore continuous fluid, is not sensible motion." . . . It is manifest, therefore, that wherever the vortex-atom theory may lead us, it certainly does not lead us anywhere in the region of physics, or in the domain of verae causae.* And I may add that, inasmuch as the hypothetical undifferentiated** and undifferentiable medium is clearly

an involuntary re-ification of the old ontological concept pure being, the theory under discussion has all the attributes of an inapprehensible metaphysical phantom."

A "phantom" indeed, which can be made apprehensible only by Occultism. From such scientific metaphysics to Occultism there is hardly one step. Those physicists who hold the view that the atomic constitution of matter is consistent with its penetrability, need not go far out of their way to be able to account for the greatest phenomena of Occultism, now so derided by physical scientists and materialists. Cauchy's "material points without extension" are Leibnitz's monads, and at the same time the materials out of which the "Gods" and other invisible powers clothe themselves in bodies (vide infra, "Gods, Monads and Atoms"). The disintegration and reintegration of "material" particles without extension as a chief factor in phenomenal manifestations ought to suggest themselves very easily as a clear possibility, at any rate to those few scientific minds which accept M. Cauchy's views. For, disposing of that property of matter which they call impenetrability by simply regarding the atoms as "material points exerting on each other attractions and repulsions which vary with the distances that separate them" -- the French theorist explains that: "From this it follows that, if it pleased the author of nature*** simply to modify the laws according to which the atoms attract or repel each other, we might instantly see the hardest bodies penetrating each other, the smallest particles of matter occupying immense spaces, or the largest masses reducing themselves to the smallest volumes, the entire universe concentrating itself, as it were, in a single point." (Sept lecons de physique Generale, p. 38 et seq., ed. Moigno.)

And that "point," invisible on our plane of perception and matter, is quite visible to the eye of the adept who can follow and see it present on other planes.

[[Footnote(s)]] -----

* Veræ causæ for physical science are mayavic or illusionary causes to the Occultist, and vice versa.

** Very much "differentiated," on the contrary, since the day it left its laya condition.

*** For the Occultists who say that the author of nature is nature itself, something indistinct and inseparable from the Deity, it follows that those who are conversant with the occult laws of nature, and know how to change and provoke new conditions in ether, may -- not modify the laws, but work and do the same in accordance with those immutable laws.

[[Vol. 1, Page]] 490 THE SECRET DOCTRINE.

IV. IS GRAVITATION A LAW?

THE corpuscular theory has been unceremoniously put aside; but gravitation -- the principle that all bodies attract each other with a force proportional directly to their masses, and inversely to the squares of the distances between them -- survives to this day and reigns, supreme as ever, in the alleged ethereal waves of Space. As a hypothesis, it had been threatened with death for its inadequacy to embrace all the facts presented to it; as a physical law, it is the King of the late and once all-potent "Imponderables." "It is little short of blasphemy . . . an insult to Newton's grand memory to doubt it, . . ." is the exclamation of an American reviewer of "Isis Unveiled." Well; what is finally that invisible and intangible God in whom we should believe on blind faith? Astronomers who see in gravitation an easy-going solution for many things, and an universal force which allows them to calculate thereby planetary motions, care little about the Cause of Attraction. They call Gravity a law, a cause in itself. We call the forces acting under that name effects, and very secondary effects, too. One day it will be found that the scientific hypothesis does not answer after all; and then it will follow the corpuscular theory of light and be consigned to rest for many scientific aeons in the archives of all exploded speculations. Has not Newton himself expressed grave doubts about the Nature of Force and the corporeality of the "Agents," as they were then called? So has Cuvier, another scientific light shining in the night of research. He warns his readers, in the Revolution du Globe, about the doubtful nature of the so-called Forces, saying that "it is not so sure whether those agents were not Spiritual Powers after all (des agents spirituels). At the outset of his "Principia," Sir Isaac Newton took the greatest care to impress upon his school that he did not use the word "attraction" with regard to the mutual action of bodies in a physical sense. To him it was, he said, a purely mathematical conception involving no consideration of real and primary physical causes. In one of the passages of his "Principia" (Defin. 8, B. I. Prop. 69, "Scholium"), he tells us plainly that, physically considered, attractions are rather impulses. In section XI. (Introduction) he expresses the opinion that "there is some subtle spirit by the force and action of which all movements of matter are determined" (see Mod. Mater., by Rev. W. F. Wilkinson); and in his third Letter to Bentley he says: "It is inconceivable that inanimate brute matter should, without the mediation of something else which is not material, operate upon and affect other matter, without mutual contact, as it must do if gravi-

[[Vol. 1, Page]] 491 GRAVITY OR WHAT?

tation, in the sense of Epicurus, be essential and inherent in it. . . . That gravity should be innate, inherent and essential to matter, so that one body may act upon another at a distance, through a vacuum, without the mediation of anything else by and through which their action may be conveyed from one to another, is to me so great an absurdity that I believe no man, who has in philosophical matters a competent faculty of thinking, can ever fall into it. Gravity must be caused by an agent acting constantly according to certain laws; but whether this agent be material or immaterial I have left to the consideration of my readers."

At this, even Newton's contemporaries got frightened -- at the apparent return of occult causes into the domain of physics. Leibnitz called his principle of attraction "an incorporeal and inexplicable power." The supposition of an attractive faculty and a perfect void was characterized by Bernoulli as "revolting," the principle of actio in distans finding thus no more favour than it does now. Euler, on the other hand, thought the action of gravity was due to either a Spirit or some subtle medium. And yet Newton knew of, if he did not accept, the Ether of the Ancients. He regarded the intermediate space between the sidereal bodies as vacuum. Therefore he believed in "subtle spirit" and Spirits as we do, guiding the so-called attraction. The above-quoted words of the great man have produced poor results. The "absurdity" has now become a dogma in the case of pure materialism, which repeats, "No matter without force, no force without matter; matter and force are inseparable, eternal and indestructible (true); there can be no independent force, since all force is an inherent and necessary property of matter (false); consequently, there is no immaterial creative power." Oh, poor Sir Isaac!

If, leaving aside all the other eminent men of Science who shared in the same opinion as Euler and Leibnitz, the Occultists claim as their authorities and supporters only Sir Isaac Newton and Cuvier, as above cited, they need fear little from modern Science, and may loudly and proudly proclaim their beliefs. But, the hesitation and doubts of the two before cited authorities, and of many others, too, whom we could name, did not in the least prevent scientific speculation from wool-gathering on the fields of brute matter just as before. First it was matter and an imponderable fluid distinct from it; then came the imponderable fluid so much criticised by Grove; and Aether, which was at first discontinuous and then became continuous; after which came the "mechanical" Forces. These have now settled in life as "modes of motion" and the aether has become more mysterious and problematical than ever. More than one man of Science objects to such crude materialistic views. But then since the days of Plato, who repeatedly asks his readers not to confuse incorporeal Elements with

[[Vol. 1, Page]] 492 THE SECRET DOCTRINE.

their PRINCIPLES -- transcendental or spiritual Elements; from those of the great Alchemists, who, like Paracelsus, made a great difference between phenomenon and its cause, or the Noumenon; and Grove, who, though he sees "no reason to divest universally diffused matter of the functions common to all matter," yet uses the term Forces where his critics, "who do not attach to the word any idea of a specific action," say Force -- from those days to this nothing has proved competent to stem the tide of brutal materialism. Gravitation is the sole cause, the acting God, and matter is its prophet, said the men of science only a few years ago.

They have changed their views several times since then. But do the men of Science understand the innermost thought of Newton, one of the most spiritual-minded and religious men of his day, any better now than they did then? It is certainly to be doubted. Newton is credited with having given the death-blow to the Elemental Vortices of Descartes (the idea of Anaxagoras, resurrected, by-the-bye), though the last modern "vortical atoms" of Sir W. Thomson do not, in truth, differ much from the former. Nevertheless, when his disciple Forbes wrote in the Preface to the chief work of his Master a sentence declaring that "attraction was the cause of the System," Newton was the first to solemnly protest. That which in the mind of the great mathematician assumed the shadowy, but firmly rooted image of God, as the noumenon of all,* was called more philosophically by the ancient (and modern) philosophers and Occultists -- "Gods," or the creative fashioning Powers. The modes of expression may have been different, and the ideas more or less philosophically enunciated by all sacred and profane Antiquity; but the fundamental thought was the same.** For Pythagoras the Forces were Spiritual Entities, Gods inde-

[[Footnote(s)]] -----

* "Attraction," Le Couturier, a materialist, writes, "has now become for the public that which it was for Newton himself -- a simple word, an idea" (Panorama des Mondes), since its cause is unknown. Herschell virtually says the same, when remarking, that whenever studying the motion of the heavenly bodies, and the phenomena of attraction, he feels penetrated at every moment with the idea of "the existence of causes that act for us under a veil, disguising their direct action." (Musee des Sciences, August, 1856.)

** If we are taken to task for believing in operating "Gods" and "Spirits" while rejecting a personal God, we answer to the Theists and Monotheists: "Admit that your Jehovah is one of the Elohim, and we are ready to recognise him. Make of him, as you do, the Infinite, the ONE and the Eternal God, and we will never accept him in this character." Of tribal Gods there were many; the One Universal Deity is a principle, an abstract Root-Idea which has nought to do with the unclean work of finite Form. We do not worship the Gods, we only honour Them, as beings superior to ourselves. In this we obey the Mosaic injunction, while Christians disobey their Bible -- Missionaries foremost of all. "Thou shalt not revile the gods," says one of them -- (Jehovah) -- in Exodus xxii. 28; but at the same time in verse 20 it is commanded, "He that sacrificeth to any God, save unto the Lord, he shall be utterly destroyed." Now in the [[Footnote continued on next page]]

[[Vol. 1, Page]] 493 THE TRIPLE SIDEREAL FORCE.

pendent of planets and Matter as we see and know them on Earth, who are the rulers of the Sidereal Heaven. Plato represented the planets as moved by an intrinsic Rector, one with his dwelling, like "A boatman in his boat." As for Aristotle, he called those rulers "immaterial substances;"* though as one who had never been initiated, he rejected the gods as Entities (See Vossius, Vol. II., p. 528). But this did not prevent him from recognising the fact that the stars and planets "were not inanimate masses but acting and living bodies indeed." As if "sidereal spirits were the divine portion of their phenomena, [[ta theoitera pon phaneron]]" (De Caelo. I. 9).

If we look for corroboration in more modern and Scientific times, we find Tycho Brahe recognising in the stars a triple force, divine, spiritual and vital. Kepler, putting together the Pythagorean sentence, "The Sun, guardian of Jupiter," and the verses of David, "He placed his throne in the Sun," and "The Lord is the Sun," etc., said that he understood perfectly how the Pythagoreans could believe that all the globes disseminated through Space were rational Intelligences, facultates ratiocinativae, circulating around the Sun, "in which resides a pure Spirit of fire; the source of the general harmony" (De Motibus planetarum harmonicis, p. 248).

When an Occultist speaks of Fohat -- the energising and guiding intelligence in the Universal Electric or Vital Fluid, -- he is laughed at. Withal, as now shown, neither the nature of electricity, nor of Life nor even of Light, are to this day understood. The Occultist sees in the manifestation of every force in Nature, the action of the quality, or the special characteristic of its noumenon; which noumenon is a distinct and intelligent Individuality on the other side of the manifested mechanical Universe. Now the Occultist does not deny -- on the contrary he will support the claim -- that light, heat, electricity and so on are affections (not properties or qualities) of matter. To put it more clearly: matter is the condition -- the necessary basis or vehicle, a sine qua non -- for the manifestation of these forces, or agents, on this plane.

But in order to gain the point the Occultists have to examine the credentials of the law of gravity, first of all, of "Gravitation, the King

[[Footnote(s)]] -----

[[Footnote continued from previous page]] original texts it is not "god" but Elohim, -- and we challenge contradiction -- and Jehovah is one of the Elohim, as proved by his own words in Genesis iii. 22, when "the Lord God said: Behold the Man has become as one of us," etc. Hence both those who worship and sacrifice to the Elohim, the angels, and to Jehovah, those who revile the gods of their fellow-men, are far greater transgressors than the Occultists or any Theosophist. Meanwhile many of the latter prefer believing in some one "Lord" or other, and are quite welcome to do as they like.

* To liken the "immaterial species to wooden iron," and laugh at Spiller referring to them as "incorporeal matter" does not solve the mystery (See "Concepts of Modern Physics," p. 165 et infra).

[[Vol. 1, Page]] 494 THE SECRET DOCTRINE.

and Ruler of Matter," under every form. To do so effectually, the hypothesis in its earliest appearance has to be recalled to mind. To begin with, is it Newton who was the first to discover it? The Athenaeum of Jan. 26, 1867, has some curious information upon this subject. It says that "positive evidence can be adduced that Newton derived all his knowledge of gravitation and its laws from Boehme, with whom gravitation or ATTRACTION is the first property of Nature." . . . For with him "his (Boehme's) system, shows us the inside of things, while modern physical science is content with looking at the outside." Then again, "the science of electricity, which was not yet in existence when he (Boehme) wrote, is there anticipated (in his writings); and not only does Boehme describe all the now known phenomena of that force, but he even gives us the origin, generation, and birth of electricity, itself, etc."

Thus Newton, whose profound mind read easily between the lines, and fathomed the spiritual thought of the great Seer in its mystic rendering, owes his great discovery to Jacob Boehme, the nursling of the genii (Nirmanakayas) who watched over and guided him, of whom the author of the article in question so truly remarks, that "every new scientific discovery goes to prove his profound and intuitive insight into the most secret workings of nature." And having discovered gravity, Newton, in order to render possible the action of attraction in space, had, so to speak, to annihilate every physical obstacle capable of impeding its free action; ether among others, though he had more than a presentiment of its existence. Advocating the corpuscular theory, he made an absolute vacuum between the heavenly bodies. . . . Whatever may have been his suspicions and inner convictions about Ether; however many friends he may have unbosomed himself to -- as in the case of his correspondence with Bentley -- his teachings never showed that he had any such belief. If he was "persuaded that the power of attraction could not be exerted by matter across a vacuum,"* how is it that so late as 1860, French astronomers (Le Couturier, for instance), combated "the disastrous results of the theory of vacuum established by the great man?"** Professor Winchell writes, "These passages (letter to Bentley) show what were his views respecting the nature of the interplanetary medium of communication. Though declaring that the heavens 'are void of sensible matter,' he elsewhere excepted 'perhaps

[[Footnote(s)]] -----

* World-Life. Prof. Winchell, LL.D (pp. 49 and 50).

** "Il n'est plus possible aujourd'hui, de soutenir comme Newton, que les corps celestes se meuvent au milieu du VIDE immense des espaces. . . . Parmi les consequences de la theorie du vide etablie par ce grand homme, il ne reste plus debout que le mot 'attraction,' et nous verrons le jour ou ce dernier mot disparaîtra du vocabulaire scientifique." ("Panorama des mondes," pp. 47 and 53.)

[[Vol. 1, Page]] 495 NEWTON THEN AND NEWTON NOW.

some very thin vapours, streams, and effluvia, arising from the atmospheres of the earth, planets, and comets, and from such an exceedingly rare ethereal medium as we have elsewhere described." (Newton, Optics, III., query 28, 1704; quoted in "World-Life.")

This only shows that even such great men as Newton have not always the courage of their opinions. Dr. T. S. Hunt "called attention to some long-neglected passages in Newton's works, from which it appears that a belief in such universal, intercosmical medium gradually took root in his mind." (Ibid.) But such attention was never called to the said passages before Nov. 28, 1881, when Dr. Hunt read his "Celestial Chemistry, from the time of Newton." "Till then the idea was universal, even among the men of Science, that Newton had, while advocating the corpuscular theory, preached a void," as Le Couturier says. The passages had been "long neglected," no doubt because they contradicted and clashed with the preconceived pet theories of the day, till finally the undulatory theory imperiously required the presence of an "ethereal medium" to explain it. This is the whole secret.

Anyhow, it is from that theory of Newton's of a universal void -- taught, if not believed in by himself, -- that dates the immense scorn now shown by modern for ancient physics. The old sages had maintained that "Nature abhorred vacuum," and the greatest mathematicians of the world (read of the Western races) had discovered the antiquated "fallacy" and exposed it. And now modern science vindicates, however ungracefully, archaic knowledge, having, moreover, to vindicate Newton's character and powers of observation at this late hour, after having neglected for one century and a half to pay any attention to such very important passages -- perchance, because it was wiser not to attract any notice to them. Better late than never.

And now Father AEther is re-welcomed with open arms; and wedded to gravitation; linked to it for weal or woe, until the day when it, or both, shall be replaced by something else. Three hundred years ago it was plenum everywhere, then it became one dismal vacuity; later still the sidereal ocean-beds, dried up by science, rolled onward once more their ethereal waves. Recede ut procedes must become the motto of exact Science -- "exact," chiefly, in finding itself inexact every leap-year.

But we will not quarrel with the great men. They had to go back to the earliest "Gods of Pythagoras and old Kanada" for the very backbone and marrow of their correlations and "newest" discoveries, and this may well afford good hope to the Occultists, for their minor gods. For we believe in Le Couturier's prophecy about gravitation. We know the day is approaching when an absolute reform will be demanded in the present modes of Science by the scientists themselves -- as was done by Sir W. Grove, F.R.S. Till that day there is nothing to be done. For if gravitation

[[Vol. 1, Page]] 496 THE SECRET DOCTRINE.

were dethroned to-morrow, the day after the Scientists would discover some other new mode of mechanical motion.* Rough and uphill is the path of true Science, and its days are full of vexation of Spirit. But in the face of its "thousand" contradictory hypotheses to explain physical phenomena, there never was yet a better one than that of "motion" -- however paradoxically interpreted by materialism. As may be found on the first pages of Book I., Occultists have nothing surely against motion** the GREAT BREATH of Mr. Herbert Spencer's "UNKNOWN." But, believing that everything on Earth is the shadow of something in space -- they believe in smaller "Breaths," which, living, intelligent and independent of all but Law, blow in every direction during Manvantaric periods. These Science will reject. But whatever replaces attraction, alias gravitation, the result will be the same. Science will be as far from the solution of its difficulties as it is now, unless it comes to some compromise with Occultism and even with Alchemy -- which supposition will be regarded as an impertinence, but remains a fact, nevertheless. As Faye says: "Il manque quelque chose aux geologues pour faire la geologie de la Lune, c'est d'etre astronomes. A la verite il manque aussi quelquechose aux astronomes pour aborder avec fruit cette etude, c'est d'etre geologues." But he might have added, with still more pointedness, "Ce qui manque a tous les deux, c'est l'intuition du mystique."

Let us remember Sir William Grove's wise "concluding remarks," on the ultimate structure of matter, or the minutiae of molecular actions, which, he thought, man will never know.

"Much harm has already been done by attempting hypothetically to dissect matter and to discuss the shapes, sizes, and numbers of atoms, and their atmospheres of heat, ether, or electricity. . . . Whether the regarding electricity, light, magnetism, etc., as simply motions of ordinary matter, be or be not admissible, certain it is that all past theories have resolved, and all existing theories do resolve, the action of these forces into motion. Whether it be that, on account of our familiarity with motion, we refer other affections to it, as to a language which is most easily construed, and most capable of

[[Footnote(s)]] -----

* When read in a fair and unprejudiced spirit, Sir Isaac Newton's works are an ever ready witness to show how he must have hesitated between gravitation and attraction, impulse and some other unknown cause to explain the regular course of the planetary motion. But see Treatise on Colour (Vol. III., question 31.) We are told by Herschell that Newton left with his successors the duty of drawing all the scientific conclusions from his discovery. How modern Science abused the privilege of building its newest theories upon the law of gravitation, may be realised when one remembers how profoundly religious was that great man.

** The materialistic notion that because, in physics real or sensible motion is impossible in pure space or vacuum, therefore, the eternal MOTION of and in Cosmos (regarded as infinite Space) is a fiction -- only shows once more that such words as "pure space," "pure Being," "the Absolute," etc., of Eastern metaphysics have never been understood in the West.

[[Vol. 1, Page]] 497 NEW BOTTLES FOR OLD WINE.

explaining them, or whether it be that it is in reality the only mode in which our minds as contra-distinguished from our senses, are able to conceive material agencies, certain it is that since the period at which the mystic notions of spiritual or preternatural powers were applied to account for physical phenomena, all hypotheses framed to explain them have resolved them into MOTION."

And then the learned gentleman states a purely occult tenet:--

"The term perpetual motion, which I have not infrequently used in these pages, is itself equivocal. If the doctrines here advanced be well founded, all motion is, in one sense, perpetual. In masses, whose motion is stopped by mutual concussion, heat or motion of the particles is generated; and thus the motion continues, so that if we could venture to extend such thoughts to the universe, we should assume the same amount of motion affecting the same amount of matter for ever."*

Thus, supposing attraction or gravitation should be given up in favour of the Sun being a huge magnet -- which is a theory already accepted by some physicists -- a magnet that acts on the planets as attraction is now supposed to do, whereto, or how much farther would it lead the astronomers from where they are now? Not an inch farther. Kepler came to this "curious hypothesis" nearly 300 years ago. He had not discovered the theory of attraction and repulsion in Kosmos, for it was known from the days of Empedocles, the two opposite forces being called by him "hate" and "love" -- which comes to the same thing. But Kepler gave a pretty fair description of cosmic magnetism. That such magnetism exists in nature, is as certain as that gravitation does not; not at any rate, in the way in which it is taught by Science, which never took into consideration the different modes in which the dual Force -- that Occultism calls attraction and repulsion -- may act within our solar system, the earth's atmosphere, and beyond in the Kosmos.** This was proven by Newton himself; for there are many phenomena in our

[[Footnote(s)]] -----

* "Correl. Phys. Forces," p. 173. This is precisely what Occultism maintains, and on the same principle that "where force is made to oppose force, and produce static equilibrium, the balance of pre-existing equilibrium is affected, and fresh motion is started equivalent to that which is withdrawn into a state of abeyance." This process finds intervals in the pralaya, but is eternal and ceaseless as the "Breath," even when the manifested Kosmos rests.

** "Trans-solar space," writes the great Humboldt, "does not hitherto show any phenomenon analogous to our solar system. It is a peculiarity of our System, that matter should have condensed within it in nebulous rings, the nuclei of which condense into earths and moons. I say again, heretofore, nothing of the kind has ever been observed beyond our planetary system." (See Revue Germanique of the 31st Dec. 1860, art. "Lettres et conversations d'Alexandre Humboldt.") True, that since 1860 the nebular theory has sprung up, and being better known, a few identical phenomena were supposed to be observed beyond the solar system. Yet the great man is quite right; and no earths or moons can be found -- except in appearance -- beyond, or of the same order of matter as found in our system. Such is the Occult teaching.

[[Vol. 1, Page]] 498 THE SECRET DOCTRINE.

Solar system, which he confessed his inability to explain by the law of gravitation. "Such were the uniformity in the directions of planetary movements, the nearly circular forms of the orbits, and their remarkable conformity to one plane" (Prof. Winchell). And if there is one single exception, then the law of gravitation has no right to be referred to as an universal law. "These adjustments," we are told, "Newton, in his general Scholium, pronounces to be 'the work of an intelligent and all-powerful Being.' " Intelligent that "Being" may be; as to "all-powerful" there would be every reason to doubt the claim. A poor "God" he, who would work upon minor details and leave the most important to secondary forces! The poverty of the argument and logic in this case, is surpassed only by that of Laplace, who, seeking very correctly to substitute motion for Newton's "all-powerful Being," and ignorant of the true nature of that eternal motion, saw in it a blind physical law. "Might not those arrangements be an effect of the laws of motion?" he asks, forgetting, as all our modern Scientists do, that this law and this motion are a vicious circle, so long as the nature of both remains unexplained. His famous answer to Napoleon: "Dieu est devenu une hypothese inutile," would be correctly stated only by one who adhered to the philosophy of the Vedantins. It becomes a pure fallacy, if we exclude the interference of operating, intelligent, powerful (never "all-powerful") Beings, who are called "gods."

But we would ask the critics of the mediaeval astronomers why should Kepler be denounced as most unscientific, for offering just the same solution as Newton did -- only showing himself more sincere, more consistent and even more logical. Where may be the difference between Newton's "all-powerful Being" and Kepler's Rectores, his sidereal and Cosmic Forces, or Angels? Kepler is again criticised for his "curious hypothesis which made use of a vortical movement within the solar system;" for his theories in general, for his favouring Empedocles' idea of attraction and repulsion, and "Solar magnetism" in particular. Yet several modern men of Science, as will be shown -- Hunt (if Metcalfe is to be excluded), Dr. Richardson, etc. -- favour the idea very seriously. He is half excused, however, on the plea that "to the time of Kepler no interaction between masses of matter had been distinctly recognized which was generically different from magnetism" (World-Life). Is it distinctly recognised now? Does Prof. Winchell claim for Science any serious knowledge whatever of the natures of either electricity or magnetism -- except that both seem to be the effects of some result arising from an undetermined cause.

The ideas of Kepler, weeded from their theological tendencies, are purely occult. He saw that:

[[Vol. 1, Page]] 499 CHRONIC NEGATION.

(I.) The Sun is a great Magnet.* This is what some eminent modern scientists and also the Occultists believe in.

(II.) The Solar substance is immaterial.** (See "Isis Unveiled," Vol. I. pp. 270 to 271.)

(III.) He provided, for the constant motion and restoration of the Sun's energy and planetary motion, the perpetual care of a spirit, or spirits. The whole of Antiquity believed in this idea. The Occultists do not use the word Spirit, but say Creative Forces, which they endow with intelligence. But we may call them spirits also.

This theory is tabooed a great deal more on account of the "Spirit" that is given room in it, than of anything else. Herschell, the elder, believed in it likewise, and so do several modern scientists also. Nevertheless Professor Winchell declares that "a hypothesis more fanciful, and less in accord with the requirements of physical principles, has not been offered in ancient or modern times." (World-Life, p. 554.)

The same was said, once upon a time, of the universal Ether, and now it is not only accepted perforce but advocated as the only possible theory to explain away certain mysteries.

Grove's ideas, when he first enunciated them in London about 1840, were called as unscientific as the above; nevertheless, his views on the correlation of forces are now universally accepted. It would, very likely, require one more conversant with science than is the writer, to combat with any success some of the now prevailing ideas about gravitation and other similar "solutions" of Cosmic Mysteries. But, let us recall a few objections that came from recognized men of Science; from astronomers and physicists of eminence, who rejected the theory of rotation, as well as that of gravitation. Thus one reads in the French Encyclopaedia that "Science agrees, in the face of all its representatives, that it is impossible to explain the physical origin of the rotatory motion of the solar system."

If the question is asked, "what causes rotation?" we are answered: "It is the centrifugal Force." "And this force, what is it that produces it?" "The force of rotation," is the grave answer. (Godefroy, Cosmogonie de la Revelation.***) It will be well, perhaps, to examine both these theories as being directly or indirectly connected.

[[Footnote(s)]] -----

* But see Astronomie du Moyen Age, by Delambre.

** In the sense, of course, of matter existing in states unknown to Science.

*** We shall be taken to task for contradiction. It will be said that while we deny God, we admit Souls and operative Spirits, and quote from Roman Catholic bigoted writers in support of our argument. To this we reply: "We deny the anthropomorphic god of the Monotheists, but never the Divine Principle in nature. We combat Protestants and Roman Catholics on a number of dogmatic theological beliefs of human and sectarian origin. We agree with them in their belief in Spirits and intelligent operative powers, though we do not worship "Angels" as the Roman Latinists do."

[[Vol. 1, Page]] 500 THE SECRET DOCTRINE.

V. THE THEORIES OF ROTATION IN SCIENCE.

CONSIDERING that "final cause is pronounced a chimera, and the first Great Cause is remanded to the Sphere of the Unknown," as a reverend gentleman justly complains, the number of hypotheses put forward, a nebula in itself, is most remarkable. The profane student is perplexed, and does not know in which of the theories of exact science he has to believe. Here we have hypotheses enough for every taste and power of brain. They are all extracted from a number of scientific volumes.

CURRENT HYPOTHESES EXPLAINING THE ORIGIN OF ROTATION.

Rotation has originated either --

(a) By the collision of nebular masses wandering aimlessly in space; or by attraction, "in cases where no actual impact takes place."

(b) "By the tangential action of currents of nebulous matter (in the case of an amorphous nebula) descending from higher to lower levels,* or simply by the action of the central gravity of the mass."***

"It is a fundamental principle in physics that no rotation could be generated in such a mass by the action of its own parts. As well attempt to change the course of a steamer by pulling at the deck railing," remarks to this Prof. Winchell in "World-Life."

HYPOTHESES OF THE ORIGIN OF THE SEVEN PLANETS AND COMETS.

(a) We owe the birth of the Planets (1) to an explosion of the Sun -- a parturition of its central mass;*** or (2) to some kind of disruption of the nebular rings.

(b) "The Comets are strangers to our planetary system" (La Place). "The Comets are undeniably generated in our Solar system" (Faye).

(c) The "fixed stars are motionless" says one authority. . . . "All the stars are actually in motion" answers another authority. . . .
"Undoubtedly every star is in motion" (Wolf).

(d) "For over 350,000,000 years, the slow and majestic movement of the Sun around its axis has never for a moment ceased"
(Panorama des Mondes, Le Couturier.)

[[Footnote(s)]] -----

* The terms "high" and "low" being only relative to the position of the observer in Space, any use of those terms tending to convey the impression that they stand for abstract realities, is necessarily fallacious.

** Jacob Ennis, "The Origin of the Stars," p. 221 et seq.

*** If such is the case, how does Science explain the comparatively small size of the planets nearest the Sun? The theory of meteoric aggregation is only a step farther from truth than the nebular conception, and has not even the quality of the latter -- its metaphysical element.

[[Vol. 1, Page]] 501 CONTRADICTIONARY HYPOTHESES.

(e) And "the Sun having Alcyone in the Pleiades for the centre of its orbit, consumes 180,000,000 of years in completing its revolution" (Maedler). And also,

(f) That, "the Sun has existed no more than 15,000,000 of years, and will emit heat for no longer than 10,000,000 years more" (Sir W. Thomson's lecture on "the latent dynamical theory regarding the probable origin, total amount of heat, and duration of the Sun," 1887).

A few years ago this eminent Scientist was telling the world that the time required for the earth to cool from incipient incrustation to its present state, could not exceed 80,000,000 years"; (Thomson and Tait, Natural Philosophy.) If the encrusted age of the world is only 40 millions, or the half of the duration once allowed, and the Sun's age only 15 millions, have we to understand that the earth was at one time independent of the Sun?

Since the ages of the Sun, planets, and the Earth, as stated in the many scientific hypotheses of the astronomers and physicists, are given elsewhere (infra), we have said enough to show the disagreement between the ministers of modern Science. Whether we accept the fifteen million years of Sir W. Thomson or the thousand millions of Mr. Huxley, for the rotational evolution of our solar system, it will always come to this; by accepting self-generated rotation for the heavenly bodies composed of inert matter and yet moved by their own internal motion, for millions of years, this teaching of Science amounts to --

(a) An evident denial of that fundamental physical law, which states that "a body in motion tends constantly to inertia, (i.e., to continue in the same state of motion or rest), unless it is stimulated into further action by a superior active force."

(b.) To an original impulse, which culminates in an unalterable motion, within a resisting ether that NEWTON had declared incompatible with that motion.

(c.) Universal gravity, which, we are taught, always tends to a centre in rectilinear descent -- alone the cause of the revolution of the whole solar system, which is performing an eternal double gyration, each body around its axis and orbit. Another occasional version is:--

(d.) A magnet in the Sun; or, the said revolution due to a magnetic force, which acts, just as gravitation does, in a straight line -- varying inversely as the square of the distance. (Coulomb's Law.)

(e.) The whole acting under invariable and changeless laws, which are, nevertheless, often shown variable, as during some well-known freaks

[[Footnote(s)]] -----

* And even on these figures Bischof disagrees with Thomson, and calculates that 350 million years would be required for the earth to cool from a temperature of 20,000 degrees to 200 degrees centigrade. This is, also, the opinion of Helmholtz.

[[Vol. 1, Page]] 502 THE SECRET DOCTRINE.

of planets and other bodies, as also when the Comets approach to or recede from the Sun.

(f.) A MOTOR FORCE always proportionate to the mass it is acting upon; but independent of the specific nature of that mass, to which it is proportionate; which amounts to saying, as Le Couturier does, that, "without that Force independent from and of quite another

nature than the said mass, the latter, were it as huge as Saturn, or as tiny as Ceres, would always fall with the same rapidity" (Musée des Sciences, 15 August, 1857). A mass, furthermore, which derives its weight from the body on which it weighs.

Thus neither Laplace's perceptions of a solar atmospheric fluid, which would extend beyond the orbits of the planets, nor Le Couturier's electricity, nor Foucault's heat (Panorama des Mondes, p. 55), nor this, nor the other, can ever help any of the numerous hypotheses about the origin and permanency of rotation to escape from this squirrel's wheel, any more than the theory of gravity itself. This mystery is the Procrustean bed of physical Science. If matter is, as now taught, passive, the simplest movement cannot be said to be an essential property of matter -- if the latter is simply an inert mass. How, then, can such a complicated movement, compound and multiple, harmonious and equilibrated, lasting in the eternities for millions and millions of years, be attributed simply to its own inherent Force, unless the latter is an intelligence? A physical will is something new -- a conception that the ancients would have never entertained, indeed!*

"We talk of the weight of the heavenly bodies," says an astronomer; "but since it is recognised that weight decreases in proportion to the distance from the centre, it becomes evident that, at a certain distance, that weight must be forcibly reduced to Zero? Were there any attraction there would be equilibrium And since the modern school recognizes neither a beneath nor an above in universal space, it is not clear what should cause the Earth to fall, were there even no gravitation, nor attraction." (Cosmographie.)

Methinks the Count de Maistre was right in solving the question in his own theological way. He cuts the Gordian knot by saying:-- "The

[[Footnote(s)]] -----

* For over a century all distinction between body and force is made away with. "Force is but the property of a body in motion," say the physicists; and "life -- the property of our animal organs -- is but the result of their molecular arrangement," answer the physiologists. "In the bosom of that aggregate which is named planet," teaches Littré, "are developed all the forces immanent to matter . . . i.e., that matter possesses in itself and through itself the forces that are proper to it . . . and which are primary, not secondary. Such forces are the property of weight, the property of electricity, of terrestrial magnetism, the property of life. . . . Every planet can develop life . . . as earth, for instance, which had not always mankind on it, and now bears (produit) men" . . . (Revue des Deux Mondes, July 15, 1860.)

[[Vol. 1, Page]] 503 SCIENTIFIC ABERRATIONS.

planets rotate because they are made to rotate and the modern physical system of the universe is a physical impossibility." (Soirees.) For did not Herschell say the same thing when he remarked that there is a will needed to impart a circular motion, and another will to restrain it? (Discours, 165.) This shows and explains how a retarded planet is cunning enough to calculate so well its time as to hit off its arrival at the fixed minute. For, if Science sometimes succeeds with its great ingenuity in explaining some of such stoppages, retrograde motions, angles outside the orbits, &c., &c., by appearances resulting from the inequality of their progress and ours in the course of our mutual and respective orbits, we still know that there are others, and "very real and considerable deviations," according to Herschell, "which cannot be explained except by the mutual and irregular action of those planets and by the perturbing influence of the Sun."

We understand, however, that there are, besides those little and accidental perturbations, continuous perturbations called "secular" -- because of the extreme slowness with which the irregularity increases and affects the relations of the elliptic movement -- and that these perturbations can be corrected. From Newton, who found that this world needed repairing very often, down to Reynaud, all say the same. In his Ciel et Terre (p. 28), the latter speaks of --

". . . . The orbits described by the planets as being very far from immutable; on the contrary, subject to a perpetual mutation in their position and form," -- all prove gravitation and the peripatetic laws to be as negligent as they are quick to repair their mistakes. The charge as it stands seems to be that "they (the orbits) are alternately widening and narrowing, their great axis lengthens and diminishes, or oscillates at the same time from right to left around the Sun, the plane itself, in which they are situated, raising and lowering itself periodically while pivoting around itself with a kind of tremor. . . ."

To this, De Mirville, who believes in intelligent "workmen" ruling invisibly the solar system -- as we do -- observes very wittily* "Voilà certes, a voyage which has little in it of mechanical rigour; at the utmost, one could compare it to a steamer, pulled to and fro and tossed on the waves, retarded or accelerated, all and each of which impediments might put off its arrival indefinitely, were there not the intelligences of a pilot and engineers to catch up the time lost, and to repair the damages. . . ."

The law of gravity, however, seems to be becoming an obsolete law in starry heaven. At any rate those long-haired sidereal radicals, called comets, appear to be very poor respecters of the majesty of that law,

[[Footnote(s)]] -----

* Deuxieme memoire, "Manifestations Historiques," p. 272.

[[Vol. 1, Page]] 504 THE SECRET DOCTRINE.

and to beard it quite impudently. Nevertheless, and though presenting in nearly every respect "phenomena not yet fully understood," comets and meteors are credited by the believers in modern Science with obeying the same laws and consisting of the same matter, "as the Suns, stars and nebulae," and even "the earth and its inhabitants." (Laing's "Modern Science and Modern Thought.")

This is what one might call taking things on trust, aye, even to blind faith. But exact Science is not to be questioned, and he who rejects the hypotheses imagined by her students -- gravitation, for instance -- would be regarded as an ignorant fool for it; yet we are told by the just cited author a queer legend from the scientific annals. "The comet of 1811 had a tail 120 millions of miles in length and 25 millions of miles in diameter at the widest part, while the diameter of the nucleus was about 127,000 miles, more than ten times that of the earth." He tells us, "in order that bodies of this magnitude, passing near the earth, should not affect its motion or change the length of the year by even a single second, their actual substance must be inconceivably rare. . . ." It must be so indeed, yet:--

". . . . The extreme tenuity of a comet's mass is also proved by the phenomenon of the tail, which, as the comet approaches the sun, is thrown out sometimes to a length of 90 millions of miles in a few hours. And what is remarkable, THIS TAIL IS THROWN OUT AGAINST THE FORCE OF GRAVITY by some repulsive force, probably electrical, so that it always points away from the Sun (!!!) And yet, thin as the matter of comets must be, IT OBEYS THE COMMON LAW OF GRAVITY (!?), and whether the comet revolves in an orbit within that of the outer planets, or shoots off into the abysses of Space, and returns only after hundreds of years, its path is, at each instant, regulated by the same force as that which causes an apple to fall to the ground." (Ibid, p. 17.)

Science is like Caesar's wife, and must not be suspected -- this is evident. But it can be respectfully criticised, nevertheless. At all events, it may be reminded that "the apple" is a dangerous fruit. For the second time in the history of mankind, it may become the cause of the FALL -- this time, of "exact" Science. A comet whose tail defies the law of gravity right in the Sun's face can hardly be credited with obeying that law.

In a series of scientific works on Astronomy and the nebular theory, written between 1865 and 1866, the present writer, a poor tyro in Science, has counted in a few hours, no less than thirty-nine contradictory hypotheses offered as explanations for the self-generated, primitive rotatory motion of the heavenly bodies. The writer is no astronomer, no mathematician, no scientist; but was obliged to examine these errors in defence of Occultism, in general, and what is still more

[[Vol. 1, Page]] 505 THE PARADOXES OF SCIENCE.

important, in order to support the occult teachings concerning astronomy and Cosmology. Occultists were threatened with terrible penalties for questioning scientific truths. But now they feel braver -- Science is less secure in its "impregnable" position than they were led to expect, and many of its strongholds are built on very shifting sands.

Thus, even this poor and unscientific examination of it was useful, and it was certainly very instructive. We have learned a good many things, in fact, having studied with particular care especially those astronomical data that would be the most likely to clash with our heterodox and "superstitious" beliefs.

So, for instance, we have found there, concerning gravitation, the axial and orbital motions, that synchronous movement having been once overcome, in the early stage -- it was enough to originate a rotatory motion till the end of Manvantara. We have also come to know in all the aforesaid combinations of possibilities with regard to incipient rotation -- most complicated in every case, -- some of the causes to which it may have been due, as well as some others to which it ought and should have been due, but, in some way or other, was not. Among other things, we were informed that incipient rotation may be provoked with equal ease in a mass in igneous fusion, and in one that is characterised by glacial opacity ("Heaven and Earth"). That gravitation is a law which nothing can overcome, but which, nevertheless, is overcome in and out of season by the most ordinary celestial or terrestrial bodies -- the tails of impudent comets, for instance. That we owe the universe to the holy creative Trinity, called Inert Matter, Senseless Force and Blind Chance. Of the real essence and nature of any of these three, Science knows nothing, but this is a trifling detail. Ergo, we are told that, when a mass of cosmic or nebular matter -- whose nature is unknown (entirely so), and which may be in a state of fusion (Laplace), or dark and cold (Thomson), for "this intervention of heat is itself a pure hypothesis" (Faye) -- decides to exhibit its mechanical energy under the form of rotation, it acts in this wise. It (the mass) either bursts into spontaneous conflagration, or it remains inert, tenebrous, and frigid, both states being equally capable of sending it, without any adequate cause, spinning through space for millions of years. Its movements may be retrograde and they may be direct, about a hundred various reasons being offered for both motions, in about as many hypotheses. Anyhow, joining the maze of stars, whose origin belongs to the same miraculous and spontaneous order -- for "the nebular theory does not profess to discover the origin of things, but only a stadium in material history" (Winchell: World-Life) -- those millions of suns, planets, and satellites, composed of inert matter, will whirl on in most impressive and majestic symmetry around the firmament, moved

[[Vol. 1, Page]] 506 THE SECRET DOCTRINE.

and guided only, their inertia notwithstanding, "by their own internal motion."

Shall we wonder after this if learned mystics, pious Roman Catholics, and even such learned astronomers as were Chaubard and Godefroy,* have preferred the Kabala and the ancient systems to the modern dreary and contradictory exposition of the Universe? The Zohar makes a distinction, at any rate, between "the hajaschar ("the light Forces"), the hachoser ("Reflected Lights"), and the simple phenomenal exteriority of their spiritual types." (See Kabala Denudata, II, 67.)

The question of "gravity" may now be dismissed, and other hypotheses examined. That physical Science knows nothing of "Forces" is clear. We may close the argument, however, by calling to our help one more man of Science -- Professor Jaumes, Member of the Academy of Medicine at Montpellier. Says this learned man, speaking of Forces:--

"A cause is that which is essentially acting in the genealogy of phenomena, in every production as in every modification. I said that activity (or Force) was invisible. . . . To suppose it corporeal and residing in the properties of matter would be a gratuitous hypothesis. . . . To reduce all the causes to God. . . . would amount to embarrassing oneself with a hypothesis hostile to many verities. But to speak of a plurality of forces proceeding from the Deity and possessing inherent powers of their own, is not unreasonable. . . . and I am disposed to admit phenomena produced by intermediate agents called Forces or Secondary Agents. The distinction of Forces is the principle of the division of Sciences; so many real and separate forces, so many mother-Sciences. . . . No: Forces are not suppositions and abstractions, but realities, and the only acting realities whose attributes can be determined with the help of direct observation and induction." ("Sur la distinction des Forces," published in the Memoires de l'Academie des Sciences de Montpellier, Vol. II., fasc. I., 1854.)

VI.
THE MASKS OF SCIENCE.

PHYSICS OR METAPHYSICS?

IF there is anything on earth like progress, Science will some day have to give up, nolens volens, such monstrous ideas as her physical, self-guiding laws -- void of soul and Spirit, -- and then turn to the occult teachings.

[[Footnote(s)]] -----

* L'Univers explique par la Revelation, and Cosmogonie de la Revelation. But see De Mirville's Deuxieme Memoire. The author, a terrible enemy of Occultism, was yet one who wrote great truths.

[[Vol. 1, Page]] 507 ACADEMICAL MISNOMERS.

It has done so already, however altered are the title-page and revised editions of the Scientific Catechism. It is now over half a century since, in comparing modern with ancient thought, it has been found that, however different our philosophy may appear from that of our ancestors, it is, nevertheless, composed only of additions and subtractions taken from the old philosophy and transmitted drop by drop through the filter of antecedents.

This fact was well known to Faraday, and other eminent men of Science. Atoms, Ether, evolution itself -- all comes to modern Science from ancient notions, all is based on the conceptions of the archaic nations. "Conceptions" for the profane, under the shape of allegories; plain truths taught during the Initiations to the elect, which truths have been partially divulged through Greek writers and have descended to us. This does not mean that Occultism has ever had the same views on matter, atoms and ether as found in the exotericism of the classical Greek writers. Yet, if we believe Mr. Tyndall, even Faraday was an Aristotelean, and an Agnostic more than a materialist. In his "Faraday, as a Discoverer" (p. 123) the author shows the great physicist using "old reflections of Aristotle" which are "concisely found in some of his works." Faraday, Boscovitch, and all others, however, who see, in the atoms and molecules, "centres of force," and in the corresponding element force, an ENTITY BY ITSELF, are far nearer the truth, perchance, than those, who, denouncing them, denounce at the same time the "old corpuscular Pythagorean theory" (one, by the way, which has never passed to posterity as the great philosopher really taught it), on the ground of its "delusion that the conceptual elements of matter can be grasped as separate and real entities."

The chief and most fatal mistake and fallacy made by Science, in the view of the Occultists, lies in the idea of the possibility of such a thing as inorganic, or dead matter, in nature. Is anything dead or inorganic capable of transformation or change? Occultism asks. And is there anything under the sun which remains immutable or changeless?

This fallacy is nowhere better illustrated than in the scientific work of a German savant, Professor Philip Spiller (Der Weltaether als Kosmische Kraft). In this cosmological treatise, the author attempts to prove that "no material constituent of a body, no atom, is in itself originally endowed with force, but that every such atom is absolutely dead,* and without any power to act at a distance" (p. 4).

[[Footnote(s)]] -----

* Something dead implies that it had been at some time living. When, at what period of cosmogony? Occultism says that in all cases when matter appears inert, it is the most active. A wooden or a stone block is motionless and impenetrable to all intents and purposes. Nevertheless, and de facto, its particles are in ceaseless eternal vibration which is so rapid that to the physical eye the body seems absolutely devoid of motion; [[Footnote continued on next page]]

[[Vol. 1, Page]] 508 THE SECRET DOCTRINE.

This statement, however, does not prevent Spiller from enunciating an occult doctrine and principle. He asserts the independent substantiality of force, and shows it as an "incorporeal stuff" (unkoerperlicher stoff) or substance. Now substance is not matter in metaphysics, and for argument's sake it may be granted that it is a wrong expression to use. But this is due to the poverty of European languages, and especially to that of scientific terms. Then this "stuff" is identified and connected by Spiller with the aether. Expressed in occult language it might be said with more correctness that this "force-substance" is the ever-active phenomenal positive aether -- prakriti; while the omnipresent all pervading ether is the noumenon of the former, the substratum of all, or Akasa. Nevertheless, Stallo falls foul of Spiller, as he does of the materialists. He is accused of "utter disregard of the fundamental correlation of force and matter" (of neither of which Science knows anything certain). For this "hypositized half-concept" is, in the view of all other physicists, not only imponderable, but destitute of cohesive, chemical, thermal, electric, and magnetic forces -- of all of which forces -- according to occultism -- aether is the source and cause.

Therefore Spiller, with all his mistakes, exhibits more intuition than any other modern Scientist, with the exception of Dr. Richardson, perhaps, the theorist on the "nerve force," or Nervous Ether, also on "Sun Force and Earth Force."* For AETHER, in Esotericism, is the very quintessence of all possible energy, and it is certainly to this universal agent (composed of many agents) that all the manifestations of energy in the material, psychic and spiritual worlds are due.

What are Electricity and Light, in fact? How can Science know that one is a fluid and the other a "mode of motion"? Why is it not made clear why a difference should be made between them, since both are considered force-correlations. Electricity is a fluid, we are told, immaterial and non-molecular (though Helmholtz thinks otherwise), and the proof of it is that we can bottle it up, accumulate and store it away. Then, it must be simply matter, and no peculiar "fluid." Nor is it only "a mode of motion," for motion could hardly be stored in a Leyden jar. As for light, it is a still more extraordinary "mode of motion," since, "marvellous as it may appear, light (also) can actually be stored up for use," as demonstrated by Professor Grove nearly half a century ago.

"Take an engraving which has been kept for some days in the dark, expose it to full sunshine -- that is, insulate it for 15 minutes; lay it on

[[Footnote(s)]] -----

[[Footnote continued from previous page]] and the spacial distance between those particles in their vibratory motion is -- considered from another plane of being and perception -- as great as that which separates snow flakes or drops of rain. But to physical science this will be an absurdity.

* See "Popular Science Review," Vol. V., pp. 329-34.

[[Vol. 1, Page]] 509 THE FIXING OF LIGHT.

sensitive paper in a dark place, and at the end of 24 hours it will have left an impression of itself on the sensitive paper, the whites coming out as blacks. . . . There seems to be no limit for the reproduction of engravings, etc., etc. . . ."

What is it that remains fixed, nailed, so to say, on the paper? It is a Force certainly, that fixed the thing, but what is that thing, the residue of which remains on the paper?

Our learned men will get out of this through some scientific technicality; but what is it that is intercepted, so as to imprison a certain quantity of it on glass, paper, or wood? Is it "Motion" or is it "Force"? Or shall we be told that what remains behind is the effect only of the force or Motion? Then what is this Force? Force or energy is a quality; but every quality must belong to a something, or a somebody. In Physics, Force is defined as "that which changes or tends to change any physical relation between bodies, whether mechanical, thermal, chemical, electrical, magnetic, etc." But it is not that "Force" or that "Motion" which remains behind on the paper, when the Force or Motion has ceased to act; and yet something, which our physical senses cannot perceive, has been left there to become a cause in its turn and produce effects. What is it? It is not matter, as defined by Science -- i.e., matter in any of its known states. An Alchemist would say it was a spiritual secretion -- and would be laughed at. But yet, when the physicist said that Electricity, stored up, was a fluid, or that light fixed on paper is still Sunlight -- this is Science.* In the opinion of an experienced Occultist, one who has verified the whole series of Nidanas, of causes and effects that finally project their last effect on to this our plane of manifestations; one who has traced matter back to its noumenon, the explanation of the physicist is like calling anger, or its effects -- the exclamation provoked by it -- a secretion or a fluid, and man, the cause of it -- its material conductor. But, as Grove prophetically remarked, that day is fast approaching when it will be confessed that the "forces" we know of are but the phenomenal manifestations of realities we know nothing about, -- but which were known to the ancients and -- by them worshipped.

He made one still more suggestive remark, however, which ought to have become the motto of Science, but has not. Sir W. Grove said that "SCIENCE SHOULD HAVE NEITHER DESIRES NOR PREJUDICES. TRUTH SHOULD BE HER SOLE AIM."

Meanwhile, in our days, Scientists are more self-opinionated and bigoted than even the clergy. For they minister to, if they do not actually worship,

[[Footnote(s)]] -----

* The newest Authorities have rejected these explanations as "exploded theories," and have now deified "Motion" as their sole Idol. But, surely, they and their idol will one day share the fate of their predecessors.

"Force-Matter," which is their Unknown God. And how unknown it is may be inferred from the many confessions of the most eminent physicists and biologists, with Faraday at their head. Not only, he said, could he never presume to pronounce whether Force was a property or function of Matter, but he actually did not know what was meant by the word matter.

There was a time, he added, when he believed he knew something of matter. But the more he lived, and the more carefully he studied it, the more he became convinced of his utter ignorance of the nature of matter.* (See Buckwell's "Electric Science.")

The Occultists are often misunderstood because, for lack of better terms, they apply to the essence of Force under certain aspects the descriptive epithet of substance. Now the names for the varieties of "substance" on different planes of perception and being are legion. Eastern Occultism has a special appellation for each kind; but Science -- like England, in the recollection of a witty Frenchman, blessed with thirty-six religions and only one fish-sauce -- has but one name for all, namely, "Substance." Moreover, neither the orthodox physicists nor their critics seem to be very certain of their premises, and are as apt to confuse the effects as they do the causes. It is incorrect, for instance, to say, as Stallo does, that "matter can no more be realized or conceived as mere spacial presence than as a concretion of forces," or that "force is nothing without mass, and mass is nothing without force" -- for one is the noumenon and the other the phenomenon. Again; Schelling, when saying that "It is a mere delusion of the phantasy that something, we know not what, remains after we have denuded an object of all the predicates belonging to it"*** -- could never have applied the remark to the realm of transcendental metaphysics. It is true that pure force is nothing in the world of physics; it is ALL in the domain of Spirit. Says Stallo: "If we reduce the mass upon which a given force, however small, acts to its limit zero -- or, mathematically expressed, until it becomes infinitely small -- the consequence is that the velocity of the resulting motion is infinitely great, and that the 'thing' . . . is at any given moment neither here nor there, but everywhere -- that there is no

[[Footnote(s)]] -----

* This ominous confession was made, we believe, at a Scientific Congress at Swansea. Faraday held a similar opinion, however, as stated by Tyndall: "What do we know of the atom apart from its force? You imagine a nucleus which may be called a and surround it by forces which may be called m; to my mind the a or nucleus vanishes and the substance consists of the powers m. And, indeed, what notion can we form of the nucleus independent of its powers? What thought remains on which to hang the imagination of an a independent of the acknowledged forces?"

** Schelling, "Ideen," etc., p. 18.

[[Vol. 1, Page]] 511 WHAT IS FORCE?

real presence; it is impossible, therefore, to construct matter by a synthesis of forces" (p. 161).

This may be true in the phenomenal world, inasmuch as the illusive reflection of the one reality of the supersensual world may appear true to the dwarfed conceptions of a materialist. It is absolutely incorrect when the argument is applied to things, in what the Kabalists call the supermundane spheres. Inertia, so called, "is force" according to Newton (Princ. Def. iii.), and for the student of Esoteric Sciences the greatest of the occult forces. A body may be considered divorced from its relations with other bodies -- which, according to physical and mechanical sciences, give rise to its attributes -- only conceptually, only on this plane of illusion. In fact, it can never be so detached: death itself being unable to detach it from its relation with the Universal forces, of which the one FORCE or LIFE is the synthesis: but simply continues such inter-relation on another plane. But what, if Stallo is right, can Dr. James Croll mean when, in speaking "On the Transformation of Gravity" (Philosophical Magazine, Vol. II., p. 252), he brings forward the views advocated by Faraday, Waterston, and others? For he says very plainly that gravity --

". . . . is a force pervading Space external to bodies, and that, on the mutual approach of the bodies, the force is not increased, as is generally supposed, but the bodies merely pass into a place where the force exists with greater intensity. . . ."

No one will deny that a force (whether gravity, electricity, or any other force) which exists outside of the bodies and in open space -- be it ether or vacuum -- must be something, and not a pure nothing, when conceived apart from a mass? Otherwise it could hardly exist in one place with a greater and in another with reduced "intensity." G. A. Hirn declares the same in his *Theorie Mecanique de l'Univers*. He tries to demonstrate that the atom of the chemists is not an entity of pure convention, or simply an explicative device, but that it exists really, that its volume is unalterable, and that consequently it is not elastic (!). "Force, therefore, is not in the atom; it is in the space which separates the atoms from each other."

The above-cited views, expressed by two men of Science of great eminence in their respective countries, show that it is not in the least unscientific to speak of the substantiality of the so-called Forces. Subject to some future specific name, this force is substance of some kind, and can be nothing else; and perhaps one day Science will be the first to re-adopt the derided name of phlogiston. Whatever may be the future name given to it, to maintain that force does not reside in the atoms, but only in "space between them," may be scientific enough; nevertheless it is not true. To the mind of an Occultist it is like saying

that water does not reside in the drops of which the ocean is composed, but only in the space between those drops!

The objection made that there are two distinct schools of physicists, by one of which "the force is assumed to be an independent substantial entity, which is NOT a property of matter nor is it essentially related to matter,"* is hardly likely to help the profane to any clearer understanding. It is, on the contrary, still more calculated to throw the question into greater confusion than ever. For Force is, then, neither this nor the other. By viewing it as "an independent substantial entity," the theory extends the right hand of fellowship to Occultism, while the strange contradictory idea that it is not related to matter "otherwise than by its power to act upon it,"** leads physical science to the most absurd contradictory hypotheses. Whether "force" or "motion," (Occultism, seeing no difference between the two, never attempts to separate them) it cannot act for the adherents of the atomo-mechanical theory one way, and for those of the rival school in another way. Nor can the atoms be, in one case, absolutely uniform in size and weight, and in another, vary in their weight (Avogadro's law). For, in the words of the same able critic,

. . . "While the absolute equality of the primordial units of mass is thus an essential part of the very foundations of the mechanical theory, the whole modern Science of chemistry is based upon a principle directly subversive of it -- a principle of which it has recently been said that 'it holds the same place in chemistry that the law of gravitation does in astronomy.'*** This principle is known as the law of Avogadro or Ampere."****

This shows that either modern chemistry or modern physics is entirely wrong in its respective fundamental principles. For if the assumption of atoms of different specific gravities on the basis of the atomic theory in physics is deemed absurd, and chemistry meets, nevertheless, on its opposite basis (in the question of the formation and transformation of chemical compounds) with "unfailing experimental verification,"

[[Footnote(s)]] -----

* "Concepts of Modern Physics," xxxi., Introductory to the 2nd edition.

** Loc. cit.

*** J. P. Cooke, The New Chemistry, p. 13.

**** "It imports that equal volumes of all substances, when in the gaseous state, and under like conditions of pressure and temperature, contain the same number of molecules -- whence it follows that the weights of the molecules are proportional to the specific gravities of the gases; that therefore, these being different, the weights of the molecules are different also; and inasmuch as the molecules of certain elementary substances are monatomic (consist of but one atom each) while the molecules of various other substances contain the same number of atoms, that the ultimate atoms of such substances are of different weights" (Concepts of Modern Physics, p. 34). As shown further on in the same volume, this cardinal principle of modern theoretical chemistry is in utter and irreconcilable conflict with the first proposition of the atomo-mechanical theory -- namely, the absolute equality of the primordial units of mass.

[[Vol. 1, Page]] 513 THEY AGREE TO DISAGREE.

then it becomes apparent that it is the atomo-mechanical theory which is untenable. The explanations of the latter, that "the differences of weight are only differences of density, and differences of density are differences of distance between the particles contained in a given space," are not really valid, because, before a physicist can argue in his defence that, "as in the atom there is no multiplicity of particles and no void space: hence differences of density or weight are impossible in the case of atoms," he must first know what an atom is, in reality, and that he cannot know. He must bring it under the observation of at least one of his physical senses -- and that he cannot do: for the simple reason that no one has ever seen, smelt, heard, touched or tasted an "atom." The atom belongs wholly to the domain of metaphysics. It is an entified abstraction -- at any rate for physical Science -- and has nought to do with physics, strictly speaking, as it can never be brought to the test of retort or balance. The mechanical conception, therefore, becomes a jumble of the most conflicting theories and dilemmas, in the minds of the many Scientists who disagree on this, as on other subjects; the evolution of which the Eastern Occultist, who follows this scientific strife, beholds in the greatest bewilderment.

To conclude on the question of gravity. How can Science presume to know anything certain of it? How can it maintain its position and its hypotheses against those of the Occultists, who see in gravity only sympathy and antipathy, or attraction and repulsion, caused by physical polarity on our terrestrial plane, and by spiritual causes outside of its influence? How can they disagree with the Occultists before they agree among themselves? Indeed one hears of the conservation of energy, and in the same breath of the perfect hardness and inelasticity of the atoms; of the Kinetic theory of gases being identical with "potential energy," so called; and, at the same time, of the elementary units of mass being absolutely hard and inelastic! An Occultist opens a scientific work and reads as follows:--

"Physical atomism derives all the qualitative properties of matter from the forms of atomic motion. The atoms themselves remain as elements utterly devoid of property." (Wundt, "Die Theorie der Materie," p. 381.)

And further:

"Chemistry in its ultimate form must be atomic mechanics." (Nazesmann, "Thermochemie," p. 150.)

And a moment after he is told that:

"Gases consist of atoms which behave like solid, perfectly elastic spheres." (Kroenig, Clausius, Maxwell, etc., Philosophical Magazine, Vol. XIX., p. 18.)

Finally, to crown all, Sir W. Thomson is found declaring that:

"We are forbidden by the modern theory of the conservation of

[[Vol. 1, Page]] 514 THE SECRET DOCTRINE.

energy to assume inelasticity, or anything short of perfect elasticity of the ultimate molecules whether of ultra mundane or mundane matter." (!!!) ("Philosophical Magazine," p. 321, loc. cit.)

But what do the men of true Science say to all this? By the "men of true Science" we mean those who care too much for truth and too little for their personal vanity to dogmatise on anything, as the majority do. There are several among them -- perhaps more than dare publish openly their secret conclusions for fear of the cry "Stone him to death!" -- men, whose intuitions have made them span the abyss that lies between the terrestrial aspect of matter, and the -- to us, on our plane of illusion -- subjective, i.e., TRANSCENDENTALLY OBJECTIVE SUBSTANCE, and led them to proclaim the existence of the latter. Matter, to the Occultist, it must be remembered, is that totality of existences in the Kosmos, which falls within any of the planes of possible perception. We are but too well aware that the orthodox theories of sound, heat and light, are against the occult doctrines. But, it is not enough for the men of Science, or their defenders, to say that they do not deny dynamic power to light and heat; and urge as a proof the fact that Mr. Crookes' radiometer has unsettled no views. If they would fathom the ultimate nature of these Forces, they have first to admit their substantial nature, however supersensuous. Neither do the Occultists deny the correctness of the vibratory theory.* Only they limit its functions to our Earth -- declaring its inadequacy on other planes than ours, since "Masters" in the Occult Sciences perceive the CAUSES that produce ethereal vibrations. Were all these only the fictions of the alchemists, or dreams of the Mystics, such men as Paracelsus, Philalethes, Van Helmont, and so many others, would have to be regarded as worse than visionaries: they would become impostors and deliberate mystificators.

The Occultists are taken to task for calling the Cause of light, heat, sound, cohesion, magnetism, etc., etc., a substance.** Mr. Clerk Maxwell has stated that the pressure of strong sunlight on a square mile is about 3 1/4 lbs. It is, they are told, "the energy of the myriad ether waves," and when they call it a "substance" impinging on that area, their explanation is proclaimed unscientific.

There is no justification for such an accusation. In no way -- as stated

[[Footnote(s)]] -----

* Referring to the Aura, one of the Masters says in the "Occult World," "How could you make yourself understood by, command in fact, those semi-intelligent forces, whose means of communication with us are not through spoken words but through sounds and colours in correlation between the vibrations of the two." It is this "correlation" that is unknown to modern Science, yet was many times explained by the Alchemists.

** The "substance" of the Occultist, however, is to the most refined substance of the physicist, what radiant matter is to the leather of the Chemist's boots.

[[Vol. 1, Page]] 515 THE MYSTIC RAYS.

more than once before now -- do the Occultists dispute the explanations of Science, as affording a solution of the immediate objective agencies at work. Science only errs in believing that, because it has detected in vibratory waves the proximate cause of these phenomena, it has, therefore, revealed ALL that lies beyond the threshold of Sense. It merely traces the sequence of phenomena on a plane of effects, illusory projections from the region that Occultism has long since penetrated. And the latter maintains that those etheric tremors, are not, as asserted by Science, set up by the vibrations of the molecules of known bodies -- the matter of our terrestrial objective consciousness, -- but that we must seek for the ultimate causes of light, heat, etc., etc., in MATTER existing in super-sensuous states -- states, however, as fully objective to the spiritual eye of man, as a horse or a tree is to the ordinary mortal. Light and heat are the ghost or shadow of matter in motion. Such states can be perceived by the SEER or the Adept during the hours of trance, under the Sushumna ray -- the first of the Seven Mystic rays of the Sun.*

Thus, we put forward the Occult teaching which maintains the reality of a supersubstantial and supersensible essence of that Akasa (not ether, which is only an aspect of the latter), the nature of which cannot be inferred from its remoter manifestations -- its merely phenomenal phalanx of effects -- on this terrene plane. Science, on the contrary, informs us that heat can never be regarded as matter in any conceivable state.** We are also told that the two great obstacles to the fluid (?) theory of heat undoubtedly are:--

[[Footnote(s)]] -----

* The names of the Seven Rays -- which are, Sushumna, Harikesa, Viswakarman, Viswatyarchas, Sannaddha, Sarvasu and Swaraj -- are all mystical, and each has its distinct application in a distinct state of consciousness, for occult purposes. The Sushumna, which, as

said in the Nirukta (11, 6), is only to light up the moon, is the ray nevertheless cherished by the initiated Yogis. The totality of the Seven Rays spread through the Solar system constitute, so to say, the physical Upadhi (basis) of the Ether of Science; in which Upadhi, light, heat, electricity, etc., etc., -- the forces of orthodox science -- correlate to produce their terrestrial effects. As psychic and spiritual effects, they emanate from, and have their origin in, the supra-solar Upadhi, in the ether of the Occultist -- or Akasa.

** To cite a most impartial critic, one whose authority no one can call in question, as a reminder to Western Dogmatists, that the question cannot be in any way considered as settled: "There is no fundamental difference between light and heat . . . each is merely a metamorphosis of the other. . . . Heat is light in complete repose. Light is heat in rapid motion. Directly light is combined with a body, it becomes heat; but when it is thrown off from that body it again becomes light." (Leslie's Fluid Theory of Light and Heat.) "Whether this is true or false we cannot tell, and many years, perhaps many generations, will have to elapse before we shall be able to tell." (Buckle's History of Civilization, Vol. III., p. 384.)

[[Vol. 1, Page]] 516 THE SECRET DOCTRINE.

(1.) The production of heat by friction -- excitation of molecular motions.

(2.) The conversion of heat into mechanical motion.

The answer given is: There are fluids of various kinds. Electricity is called a fluid, and so was heat quite recently, but it was on the supposition that heat was some imponderable substance. This was during the supreme and autocratic reign of matter. When the latter was dethroned, and MOTION was proclaimed the sole sovereign ruler of the Universe, heat became "a mode of motion." We need not despair: it may become something else to-morrow. Like the Universe itself, Science is ever becoming, and can never say, "I am that I am." On the other hand, Occult Science has its changeless traditions from prehistoric times. It may err in particulars; it can never become guilty of a mistake in questions of Universal laws, simply because that Science, justly referred to by philosophy as the "divine," was born on higher planes, and was brought on Earth by beings who were wiser than man will be, even in the seventh Race of his Seventh Round. And that Science maintains that Forces are not what modern learning would have them; e.g., Magnetism is not a "mode of motion"; and, in this particular case, at least, exact "modern Science" is sure to come to grief some day. Nothing, at the first blush, can appear more ridiculous, more outrageously absurd than to say, for instance: "the Hindu initiated Yogi knows really ten times more than the greatest European physicist of the ultimate nature and constitution of light -- both solar and lunar." Yet why is the Sushumna ray believed to be that ray which furnishes the moon with its borrowed light? Why is it "the ray cherished by the initiated Yogi?" Why is the moon held as the deity of the mind, by those Yogis? We say, because light, or rather all its occult properties, every combination and correlation of it with other forces, mental, psychic, and spiritual, were perfectly known to the old adepts.

Therefore, although, in its knowledge of the ultimate constitution of matter, or in the so-called ultimate analysis as opposed to the proximate in chemistry, occult science may be less well-informed as to the behaviour of compound elements in various cases of physical correlations: still, it is immeasurably higher in its knowledge of the ultimate occult states of matter, and of the true nature of matter, than all the physicists and chemists of our modern day put together.

Now, if we state the truth openly and in full sincerity, namely, that the ancient Initiates had a far wider knowledge of physics -- as a Science of Nature -- than our Academies of Science, all taken together, possess, the statement will be characterized as an impertinence and an absurdity; for physical sciences are considered to have been carried in our age to the apex of perfection. Hence, the twitting query -- "Can

[[Vol. 1, Page]] 517 THE CAUSES AND THE EFFECTS.

the Occultists meet successfully the two points, namely (a) the production of heat by friction -- excitation of molecular motions; and (b) the conversion of heat into mechanical force, if they hold to the old "exploded" theory of heat being a substance or a fluid?"

To answer the question, it must first be observed that the Occult Sciences do not regard either electricity or any of the forces supposed to be generated by it, as matter, in any of the states known to physical Science; to put it more clearly, none of these "forces," so-called, are either solids, gases, or fluids. If it did not look pedantic, an Occultist would even object to electricity being called a fluid -- as it is an effect and not a cause. But its noumenon, he would say, is a conscious cause. The same in the cases of "Force" and the "Atom." Let us see what an eminent Academician, Butlerof, the chemist, had to say about these two abstractions.

"What is Force?" argues this great man of Science, "what is it from a strictly scientific stand-point, and as warranted by the law of conservation of energy? Conceptions of Force are resumed by our conceptions of this, that, or another mode of motion." Force is thus simply the passage of one state of motion into another state of the same: of electricity, into heat and light, of heat into sound or some mechanical function, and so on.* The first time electric fluid was produced by man on earth it must have been by friction; hence, as well-known, it is heat that produces it by disturbing its laya state,** and electricity exists no more on earth per se than heat or light, or any other force. They are all correlations, as science says. "When a given quantity of heat, assisted by a steam engine, is transformed into mechanical work, we speak of steam power (or force). When a falling body strikes an obstacle in its way, thereby generating heat and sound -- we call it the power of collision. When electricity decomposes water or heats a platinum wire, we speak of the force of the electric fluid. When the rays of the sun are intercepted by the thermometer bulb and its quicksilver expands, we speak of the calorific energy of the sun. In short, when one state of a determined quantity of motion ceases, another state of motion equivalent to the

preceding takes its place, and the result of such a transformation or correlation is -- force. In all cases where such a transformation, or the passage of one state of motion into another, is entirely absent, there no force is possible. Let us admit for a moment an absolutely homogeneous state of the Universe, and our conception of force falls down to naught."

[[Footnote(s)]] -----

* On the plane of manifestation and illusionary matter it may be so; not that it is nothing more, for it is vastly more.

** Neutral, or zero.

[[Vol. 1, Page]] 518 THE SECRET DOCTRINE.

"Therefore it becomes evident that the force, which materialism considers as the cause of the diversity that surrounds us, is in sober reality only an effect, a result of that diversity. From such point of view force is not the cause of motion, but a result, while the cause of that force, or forces, is not the substance or matter, but motion itself. Matter thus must be laid aside and with it the basic principle of materialism, which has become unnecessary, as force brought down to a state of motion can give no idea of the substance. If force is the result of motion, then it becomes incomprehensible why that motion should become witness to matter and not to Spirit or a Spiritual essence. True, our reason cannot conceive of a motion minus something moving (and our reason is right); but the nature or esse of that something moving remains to Science entirely unknown; and the Spiritualist, in such case, has as much right to attribute it to a "Spirit," as a Materialist to creative and all-potential matter. A Materialist has no special privileges in this instance, nor can he claim any. The law of the conservation of energy, as thus seen, is shown to be illegitimate in its pretensions and claims in this case. The "great dogma" -- no force without matter and no matter without force -- falls to the ground, and loses entirely the solemn significance with which materialism has tried to invest it. The conception of force still gives no idea of matter and compels us in no way to see in it "the origin of all origins." ("Scientific Letters," Professor Butlerof.)

We are assured that real science is not materialistic; and our own conviction tells us that it cannot be so, when its learning is real. There is a good reason for it, well defined by some physicists and chemists themselves. Natural sciences cannot go hand in hand with materialism. To be at the height of their calling, men of science have to reject the very possibility of materialistic doctrines having aught to do with the atomic theory; and we find that Lange, Butlerof, Du Bois Reymond, -- the latter probably unconsciously -- and several others, have proved it. And it is, furthermore, demonstrated by the fact, that Kanada in India, and Leucippus, Democritus, and after them Epicurus -- the earliest atomists in Europe -- while propagating their doctrine of definite proportions, believed in Gods or supersensuous entities, at the same time. Their ideas upon matter thus differed from those now prevalent. We must be allowed to make our statement clearer in a short synopsis of the ancient and modern views of philosophy upon atoms, and thus prove that the atomic theory kills Materialism.

From the standpoint of Materialism, which reduces the beginnings of all to matter, the Universe consists, in its fullness, of atoms and vacuity. Even leaving aside the axiom -- now absolutely demonstrated by telescope and microscope -- taught by the ancients, that nature abhors

[[Vol. 1, Page]] 519 THE VICIOUS CIRCLE.

vacuum, what is an atom? "It is, we are answered by Science," writes Professor Butlerof, "the limited division of substance, the indivisible particle of matter. To admit the divisibility of the atom, amounts to an admission of an infinite divisibility of substance, which is equivalent to reducing substance to nihil, a nothingness. Owing to a feeling of self-preservation alone, materialism cannot admit infinite divisibility; otherwise, it would have to bid farewell for ever to its basic principle and thus sign its own death-warrant." Buchner, for instance, like a true dogmatist in materialism, declares that "to accept infinite divisibility is absurd, and amounts to doubting the very existence of matter." The Atom is indivisible then, saith Materialism? Very well.

"See now what a curious contradiction this fundamental principle of the materialists is leading them into," writes Butlerof. "The atom is indivisible, and at the same time we know it to be elastic. An attempt to deprive it of elasticity is unthinkable; it would amount to an absurdity. Absolutely non-elastic atoms could never exhibit a single one of those numerous phenomena that are attributed to their correlations. Without any elasticity, the atoms could not manifest their energy, and the substance of the materialists would remain weeded of every force. Therefore, if the Universe is composed of atoms, then those atoms must be elastic. It is here that we meet with an insuperable obstacle. For, what are the conditions requisite for the manifestation of elasticity? An elastic ball, when striking against an obstacle, is flattened and contracts, which it would be impossible for it to do, were not that ball to consist of particles, the relative position of which experiences at the time of the blow a temporary change. This may be said of elasticity in general; no elasticity is possible without change with respect to the position of the compound particles of an elastic body. This means that the elastic body is changeful and consists of particles, or, in other words, that elasticity can pertain only to those bodies that are divisible. And the atom is elastic."

This is sufficient to show how absurd are the simultaneous admissions of the non-divisibility and elasticity of the atom. The atom is elastic, ergo, the atom is divisible, and must consist of particles, or of sub-atoms. And these sub-atoms? They are either non-elastic, and in such case they represent no dynamic importance, or, they are elastic also; and in that case, they, too, are subject to divisibility. And thus ad infinitum. But infinite divisibility of atoms resolves matter into simple centres of force, i.e., precludes the possibility of conceiving matter as an objective substance.

This vicious circle is fatal to materialism. It finds itself caught in its own nets, and no issue is possible for it out of the dilemma. If it says that the atom is indivisible, then it will have mechanics asking it the awkward question: "How does the Universe move in this case, and how do its forces correlate? A world built on absolutely non-elastic atoms, is like an engine without steam, it is doomed to eternal inertia."*

[[Footnote(s)]] -----

* "Scientific Letters," Butlerof.

[[Vol. 1, Page]] 520 THE SECRET DOCTRINE.

Accept the explanations and teachings of Occultism, and, the blind inertia of physical Science being replaced by the intelligent active Powers behind the veil of matter, motion and inertia become subservient to those Powers. It is on the doctrine of the illusive nature of matter, and the infinite divisibility of the atom, that the whole science of Occultism is built. It opens limitless horizons to substance informed by the divine breath of its soul in every possible state of tenuity, states still undreamt of by the most spiritually disposed chemists and physicists.

The above views were enunciated by an Academician, the greatest chemist in Russia, and a recognised authority even in Europe -- the late Professor Butlerof. True, he was defending the phenomena of the Spiritualists, the materializations, so called, in which he believed as Professors Zollner, and Hare did, as Mr. A. Russell Wallace, Mr. W. Crookes, and many another Fellow of the Royal Society, do still, whether openly or secretly. But his argument with regard to the nature of the essence that acts behind the physical phenomena of light, heat, electricity, etc., is no less scientific and authoritative for all that, and apply admirably to the case in hand. Science has no right to deny to the Occultists their claim to a more profound knowledge of the so-called Forces; which, they say, are only the effects of causes generated by Powers, substantial, yet supersensuous, and beyond any kind of matter with which they (the Scientists) have hitherto become acquainted. The most science can do is to assume the attitude of agnosticism and to maintain it. Then it can say: "Your case is no more proven than is ours; but we confess to knowing nothing in reality either about Force or matter, or that which lies at the bottom of the so-called correlations of Forces. Therefore, time alone can prove who is right and who is wrong. Let us wait patiently, and meanwhile show courtesy instead of scoffing at each other."

But to do this requires a boundless love of truth and the surrender of that prestige -- however false -- of infallibility, which the men of Science have acquired among the ignorant and flippant, though cultured, masses of the profane. To blend the two sciences, the archaic and the modern, requires first of all the abandonment of the actual materialistic lines. It necessitates a kind of religious mysticism and even the study of old magic, which our Academicians will never take up. The necessity is easily explained. Just as in old alchemical works the real meaning of the substances and elements meant are concealed under the most ridiculous metaphors, so are the physical, psychic, and spiritual natures of the Elements (say of fire) concealed in the Vedas, and especially in the Puranas, under allegories comprehensible only to the Initiates. Had they no meaning, then indeed all those long legends and allegories about the sacredness of the three types of fire, and the forty-nine original fires --

[[Vol. 1, Page]] 521 CHEMICAL GODS.

personified by the Sons of Daksha's daughters and the Rishis, their husbands, "who with the first son of Brahma and his three descendants constitute the forty-nine fires" -- would be idiotic verbiage and no more. But it is not so. Every fire has a distinct function and meaning in the worlds of the physical and the spiritual. It has, moreover, in its essential nature a corresponding relation to one of the human psychic faculties, besides its well determined chemical and physical potencies when coming in contact with the terrestrially differentiated matter. Science has no speculations to offer upon fire per se; Occultism and ancient religious science have. This is shown even in the meagre and purposely veiled phraseology of the Puranas, where (as in the Vayu Purana) many of the qualities of the personified fires are explained. Thus, Pavaka is electric, or Vaidyuta, fire; Pavamana, the fire produced by friction, (or Nirmathya); and Suchi is solar (or Saura) fire* -- all these three being the sons of Abhimanin, the Agni (fire), eldest son of Brahma and of Swaha. Pavaka, moreover, is made parent to Kavyavahana, the fire of the Pitris: Suchi to Havyavahana -- the fire of the gods; and Pavamana, to Saharaksha, the fire of the Asuras. Now all this shows that the writers of the Puranas were perfectly conversant with the "Forces" of Science and their correlations; moreover, with the various qualities of the latter in their bearing upon those psychic and physical phenomena which receive no credit and are unknown to physical science now. Very naturally, when an Orientalist, -- especially one with materialistic tendencies -- reads that these are only appellations of fire employed in the invocations and rituals, he calls this "Tantrika superstition and mystification"; and he becomes more careful to avoid errors in spelling, than to give attention to the secret meaning attached to the personifications, or to seek their explanation in the physical correlations of forces, so far as known. So little credit, indeed, is given to the ancient Aryans for knowledge, that even such glaring passages as in Book I. chap. ii, Vishnu Purana, are left without any notice. Nevertheless, what can this sentence mean? -- "Then Ether, air, light, water, and earth, severally united with the properties of sound and other qualities, existed as distinguishable according to their properties, . . . but possessing many and various energies and being unconnected, they could not, without combination, create living beings, not having blended with each other. . . . Having combined . . . they assumed through mutual association, the character of one mass of entire unity; and directed by Spirit . . ." etc. This means, of course, that the writers were perfectly acquainted with correlation and were well posted about the origin of Kosmos from the "undiscrete Principle" -- Avyaktanugrahena, as applied

[[Footnote(s)]] -----

* Called the "drinker of waters," solar heat causing water to evaporate.

to Parabrahmam and Mulaprakriti conjointly, and not to "Avyakta, either First Cause, or matter," as Wilson gives it. The old Initiates knew of no "miraculous creation," but taught the evolution of atoms (on our physical plane), and their first differentiation from laya into the protyle, as Mr. Crookes has suggestively named matter, or primordial substance beyond the zero-line:-- there where we place Mulaprakriti, the "root-Principle" of the world stuff and of all in the world.

This can be easily demonstrated. Take, for instance, the newly-published catechism of the Visishtadwaita Vedantins, an orthodox and exoteric system, yet fully enunciated and taught in the XIth century (its founder, Ramanujacharya, being born in A.D. 1017), at a time when European "Science" still believed in the squareness and flatness of the Earth, of Cosmas-Indicopleustes of the VIth century. It teaches that before evolution began, Prakriti (Nature) was in a condition of laya or absolute homogeneity, as "matter exists in two conditions, the sukshma, or latent and undifferentiated, and the sthula or differentiated condition." Then it became anu, atomic. It teaches of Sudda-satwa -- "a substance not subject to the qualities of matter, from which it is quite different," and adds that out of that substance the bodies of the inhabitants of Vaikuntaloka (the heaven of Vishnu), the gods, are formed. That every particle or atom of Prakriti contains Jiva (divine life), and is the sarira (body) of that Jiva which it contains, while every Jiva is in its turn the sarira of the supreme spirit, as "Parabrahm pervades every Jiva, as well as every particle of matter." Dualistic and anthropomorphic as may be the philosophy of the Visishtadwaita, when compared with that of the Adwaita -- the non-dualists, -- it is yet supremely higher in logic and philosophy than the cosmogony accepted by either Christianity, or its great opponent, modern Science. The followers of one of the greatest minds that ever appeared on Earth, the Adwaita Vedantins are called Atheists, because they regard all save Parabrahm, the secondless, or Absolute Reality -- as an illusion. Yet the wisest Initiates came from their ranks, as also the greatest Yogis. The Upanishads show that they most assuredly knew not only what is the causal substance in the effects of friction, and that their forefathers were acquainted with the conversion of heat into mechanical force, but that they were acquainted with the noumena of every spiritual as well as of every cosmic phenomenon.

Truly the young Brahmin who graduates in the universities and colleges of India with the highest honours; who starts in life as an M.A. and an LL.B., with a tail initialed from Alpha to Omega after his name, and a contempt for his national gods proportioned to the honours received in his education in physical sciences; truly he has but to read in the light of the latter, and with an eye to the correlation of

physical Forces, certain passages in his Puranas, if he would learn how much more his ancestors knew than he will ever know -- unless he becomes an occultist. Let him turn to the allegory of Pururavas and the celestial Gandharva,* who furnished the former with a vessel full of heavenly fire. The primeval mode of obtaining fire by friction has its scientific explanation in the Vedas, and is pregnant with meaning for him who reads between the lines. The Tretagni (sacred triad of fires) obtained by the attrition of sticks made of the wood of the Aswattha tree (the Bo-tree, of Wisdom and Knowledge) -- sticks "as many finger-breaths long as there are syllables in the gayatri" must have a secret meaning, or else the writers of the Vedas and Puranas were no sacred writers but mystificators. That it has such a meaning, the Hindu Occultists are a proof, and they alone are able to enlighten Science, as to why and how, "the fire, that was primevally one, was made threefold (treta) in our present Manvantara, by the Son of Ila (Vach), the primeval woman after the Deluge, the wife and daughter of Vaivasvata Manu. The allegory is suggestive, in whatever Purana it may be read and studied.

VII.
AN ATTACK ON THE SCIENTIFIC THEORY OF FORCE BY A MAN OF SCIENCE.

THE wise words of several (English) men of Science have now to be quoted in our favour. Ostracised for "principle's sake" by the few, they are tacitly approved of by the many. That one of them preaches almost Occult doctrines, in some things identical with, and often amounting to a public recognition of our "Fohat and his seven Sons" --

[[Footnote(s)]] -----

* The Gandharva of the Veda is the deity who knows and reveals the secrets of heaven and divine truths to mortals. Cosmically -- the Gandharvas are the aggregate powers of the solar-fire, and constitute its Forces; psychically -- the intelligence residing in the Sushumna, Solar ray, the highest of the seven rays; mystically -- the occult force in the Soma (the moon, or lunar plant) and the drink made of it; physically -- the phenomenal, and spiritually -- the noumenal causes of Sound and the "Voice of Nature." Hence, they are called the 6,333 "heavenly Singers" and musicians of Indra's loka who personify (even in number) the various and manifold sounds in Nature, both above and below. In the latter allegories they are said to have mystic power over women, and to be fond of them. The esoteric meaning is plain. They are one of the forms, if not the prototypes, of Enoch's angels, the Sons of God, who saw that the daughters of men were fair (Gen. vi.) who married them, and taught the daughters of the Earth the secrets of Heaven.

the Occult Gandharva of the Vedas -- will be recognised by every Occultist, and even by some profane readers.

If the latter open Volume V. of the Popular Science Review (pp. 329-334), they will find in it an article on "Sun Force and Earth Force," by Dr. B. W. Richardson, F.R.S., which reads as follows:--

"At this moment, when the theory of mere motion as the origin of all varieties of force is again becoming the prevailing thought, it were almost heresy to re-open a debate, which for a period appears, by general consent, to be virtually closed; but I accept the risk, and shall state, therefore, what were the precise views of the immortal heretic, whose name I have whispered to the readers, (Samuel Metcalfe), respecting Sun Force. Starting with the argument on which nearly all physicists are agreed, that there exist in nature two agencies -- matter which is ponderable, visible, and tangible, and a something which is imponderable, invisible, and appreciable only by its influence on matter -- Metcalfe maintains that the imponderable and active agency which he calls 'caloric' is not a mere form of motion, not a vibration amongst the particles of ponderable matter, but itself a material substance flowing from the Sun through Space,* filling the voids between the particles of solid bodies, and conveying by sensation the property called heat. The nature of caloric, or Sun-Force, is contended for by him on the following grounds:--

"(i.) That it may be added to, and abstracted from other bodies and measured with mathematical precision.

"(ii.) That it augments the volume of bodies, which are again reduced in size by its abstraction.

"(iii.) That it modifies the forms, properties, and conditions of all other bodies.

"(iv.) That it passes by radiation through the most perfect vacuum** that can be formed, in which it produces the same effects on the thermometer as in the atmosphere.

"(v.) That it exerts mechanical and chemical forces which nothing can restrain, as in volcanoes, the explosion of gunpowder, and other fulminating compounds.

"(vi.) That it operates in a sensible manner on the nervous system, producing intense pain; and when in excess, disorganization of the tissues.

"As against the vibratory theory, Metcalfe further argues that if caloric were a mere property or quality, it could not augment the volume of other bodies; for this purpose it must itself have volume, it must occupy space, and it must, therefore, be a material agent. If caloric were only the effect of vibratory motion amongst the particles of ponderable matter, it could not radiate from hot bodies without the simultaneous transition of the vibrating particles; but the fact stands out that heat can radiate from material ponderable substance without

[[Footnote(s)]] -----

* Not only "through space," but filling every point of our solar system, for it is the physical residue, so to say, of Ether, its lining on our plane; Ether having to serve other cosmic and terrestrial purposes besides being the "agent" for transmitting light. It is the astral fluid or "Light" of the Kabalists, and the "Seven rays" of Sun-Vishnu.

** What need, then, of etheric waves for the transmission of light, heat, etc., if this substance can pass through vacuum?

[[Vol. 1, Page]] 525 DR. RICHARDSON'S HERESY.

loss of weight of such substance. . . . With this view as to the material nature of caloric or sun-force; with the impression firmly fixed on his mind that 'everything in Nature is composed of two descriptions of matter, the one essentially active and ethereal, the other passive and motionless,'* Metcalfe based the hypothesis that the Sun-force, or caloric, is a Self-active principle. For its own particles, he holds, it has repulsion; for the particles of all ponderable matter it has affinity; it attracts the particles of ponderable matter with forces which vary inversely as the squares of the distance. It thus acts through ponderable matter. If universal space were filled with caloric, sun-force, alone (without ponderable matter), caloric would also be inactive and would constitute a boundless Ocean of powerless or quiescent ether, because it would then have nothing on which to act, while ponderable matter, however inactive of itself, has 'certain properties by which it modifies and controls the actions of caloric, both of which are governed by immutable laws that have their origin in the mutual relations and specific properties of each.'

"And he lays down a law which he believes is absolute, and which is thus expressed:--

" 'By the attraction of caloric for ponderable matter, it unites and holds together all things; by its self-repulsive energy it separates and expands all things.' "

This, of course, is almost the occult explanation of cohesion. Dr. Richardson continues:--

"As I have already said, the tendency of modern teaching is to rest upon the hypothesis . . . that heat is motion, or, as it would, perhaps, be better stated, a specific force or form of motion.**

"But this hypothesis, popular as it is, is not one that ought to be accepted to the exclusion of the simpler views of the material nature of sun-force, and of its influence in modifying the conditions of matter. We do not yet know sufficient to be dogmatic."****

. . . "The hypothesis of Metcalfe respecting sun-force and earth-force is not only very simple, but most fascinating. . . . Here are two elements in the Universe, the one is ponderable matter . . . The second element is the all-pervading Ether, solar-fire. It is without weight, substance, form, or colour; it is matter infinitely divisible, and its particles repel each other; its rarity

[[Footnote(s)]] -----

* And how can it be otherwise? Gross ponderable matter is the body, the Shell of matter or Substance, the female passive principle; and this Fohatic force is the second principle, prana -- the male and the active? On our globe this Substance is the second principle of the septenary Element -- Earth; in the atmosphere, it is that of air, which is the cosmic gross body; in the Sun it becomes the Solar body and that of the Seven rays; in sidereal space it corresponds with another principle, and so on. The whole is a homogeneous Unity alone, the parts are all differentiations.

** Or the reverberation, and for sound, repercussion on our plane of that which is a perpetual motion of that Substance on higher planes. Our world and senses are victims of Maya, ceaselessly.

*** An honest admission, that.

[[Vol. 1, Page]] 526 THE SECRET DOCTRINE.

is such that we have no word, except ether,* by which to express it. It pervades and fills space, but alone it too is quiescent -- dead.** We bring together the two elements, the inert matter, the self-repulsive Ether (?) and thereupon dead (?) ponderable matter is vivified"; [Ponderable matter may be inert but never dead -- this is Occult Law. -- H.P.B.] . . . "through the particles of the ponderable substance the ether [Ether's second principle. -- H.P.B.] penetrates, and, so penetrating, it combines with the ponderable particles and holds them in mass, holds them together in bond of union; they are dissolved in the Ether."

"This distribution of solid ponderable matter through ether extends, according to the theory before us, to everything that exists at this moment. The ether is all-pervading. The human body itself is charged with the ether [Say astral light. -- H.P.B.]; its minute particles are held together by it; the plant is in the same condition; the most solid earth, rock, adamant, crystal, metal, all are the same. But there are differences in the capacities of different kinds of ponderable matter to receive sun-force, and upon this depends the various changing conditions of matter; the solid, the liquid, the gaseous condition. Solid bodies have attracted caloric in excess over fluid bodies, and hence their firm cohesion; when a portion of molten zinc is poured upon a plate of solid zinc, the molten zinc becomes as solid because there is a rush of caloric from the liquid to the solid, and in the equalization the particles, previously loose or liquid, are more closely brought together. . . . Metcalfe himself, dwelling on the above-named phenomena, and accounting for them by the unity of principle of action, which has already been explained, sums up his argument in very clear terms, in a comment on the densities of various bodies. 'Hardness and softness' (he says), 'solidity and liquidity, are not essential conditions of bodies, but depend on the relative proportions of ethereal and ponderable matter of which they are composed. The most elastic gas may be reduced to the liquid form by the abstraction of caloric, and again converted into a firm solid, the particles of which would cling together with a force proportional to their augmented affinity for caloric. On the other hand, by adding a sufficient quantity of the same principle to the densest metals, their attraction for it is diminished when they are expanded into the gaseous state, and their cohesion is destroyed.' "

Having thus quoted at length the heterodox views of the great "heretic" -- views that need only a little alteration of terms here and there, the same eminent scientist -- an original and liberal thinker, undeniably -- proceeds to sum up those views, and continues:--

[[Footnote(s)]] -----

* Yet it is not Ether, but only one of the principles of Ether, the latter being itself one of the principles of Akasa.

** And so does prana (Jiva) pervade the whole living body of man; but alone, without having an atom to act upon, it would be quiescent -- dead; i.e., would be in laya, or as Mr. Crookes has it, "locked in protyle." It is the action of Fohat upon a compound or even a simple body that produces life. When a body dies it passes into the same polarity as its male energy and repels therefore the active agent, which, losing hold of the whole, fastens on the parts or molecules, this action being called chemical. Vishnu, the Preserver, transforms himself into Rudra-Siva, the Destroyer -- a correlation seemingly unknown to Science.

[[Vol. 1, Page]] 527 WE DISAGREE.

"I shall not dwell at great length on this unity of sun-force and earth, which this theory implies. But I may add that out of it, or out of the hypothesis of mere motion as force, and of virtue without substance, we may gather, as the nearest possible approach to the truth on this, the most complex and profound of all subjects, the following inferences:--

"(a) Space, inter-stellary, inter-planetary, inter-material, inter-organic, is not a vacuum, but is filled with a subtle fluid or gas, which for want of a better term* we may still call, as the ancients did, Aith-ur -- Solar fire, AETHER. This fluid, unchangeable in composition, indestructible, invisible,** pervades everything and all [ponderable. -- H. P. B.] matter,*** the pebble in the running brook, the tree overhanging, the man looking on, is charged with the ether in various degree; the pebble less than the tree, the tree less than man. All in the planet is in like manner so charged! A world is built up in ethereal fluid, and moving through a sea of it.

"(b) The Ether, whatever its nature is, is from the sun and from the suns**** the suns are the generators of it, the store-houses of it, the diffusers of it.*****

"(c.) Without the ether there could be no motion; without it particles of ponderable matter could not glide over each other; without it there could be no impulse to excite those particles into action.

"(d.) Ether determines the constitution of bodies. Were there no ether there could be no change of constitution in substance; water, for instance, could only exist as a substance, compact and insoluble beyond any conception we could form of it. It could never even be ice, never flint, never vapour, except for ether.

"(e.) Ether connects sun with planet, planet with planet, man with planet, man with man. Without ether there could be no communication in the Universe; no light, no heat, no phenomenon of motion."

Thus we find that Ether and elastic atoms are, in the alleged mechanical conception of the Universe, the Spirit and Soul of Kosmos, and that the theory -- put it any way and under whatever disguise -- always leaves a more widely opened issue for men of

[[Footnote(s)]] -----

* Verily, unless the occult terms of the Kabalists are adopted!

** "Unchangeable" only during Manvantaric periods, after which it merges once more into Mulaprakriti; "invisible" for ever, in its own essence, but seen in its reflected coruscations, called the Astral light by the modern Kabalists. Yet, conscious and grand Beings clothed in that same Essence move in it.

*** One has to add (ponderable), to distinguish it from that Ether which is matter still, though a substratum.

**** The Occult Sciences reverse the statement, and say that it is the sun, and all the suns that are from it, which emanate at the Manvantaric dawn from the Central Sun.

***** Here, we decidedly beg to differ with the learned gentleman. Let us remember that this Aether, whether Akasa is meant by the term, or its lower principle, Ether -- is septenary. Akasa is Aditi in the allegory, and the mother of Martanda (the sun), the Deva-matri -- "Mother of the gods." In the solar system, the sun is her Buddhi and Vahan, the Vehicle, hence the 6th principle; in Kosmos all the suns are the Kama rupa of Akasa and so is ours. It is only when regarded as an individual Entity in his own Kingdom that Surya (the sun) is the 7th principle of the great body of matter.

[[Vol. 1, Page]] 528 THE SECRET DOCTRINE.

Science to speculate beyond the line drawn by modern materialism -- or call it agnosticism rather, to be more correct* -- than the majority avails itself of. Atoms, Ether, or both, modern speculation cannot get out of the circle of ancient thought; and the latter was soaked through with archaic occultism. Undulatory or corpuscular theory -- it is all one. It is speculation from the aspects of phenomena, not from the knowledge of the essential nature of the cause and causes. When modern Science has explained to its audience the late achievements of Bunsen and Kirchoff, and shown the seven colours, the "primary" of a ray which is decomposed in a fixed order on a screen; and described the respective lengths of luminous waves, what has it proved? It has justified its reputation for exactness in mathematical achievement by measuring even the length of a luminous wave -- "varying from about seven hundred and sixty millionths of a millimetre at the red end of the spectrum to about three hundred and ninety-three millionths of a millimetre at the violet end." But when the exactness of the calculation with regard to the effect on the light-wave is thus vindicated, Science is forced to admit that the force (which is the supposed cause) is believed to produce "inconceivably minute undulations" in some medium -- "generally regarded as identical with the ethereal medium"*** -- and that medium itself is still only -- a "hypothetical agent!"

Auguste Comte's pessimism with respect to the impossibility of knowing some day the chemical composition of the sun, has not been belied thirty years later by Kirchoff, as claimed. The spectroscope has helped us to see that the elements, with which the modern chemist is familiar, must in all probability be present in the sun's outward robes -- not in the sun itself; and, taking these "robes," the solar cosmic veil, for the sun itself, the physicists have declared its luminosity to be due to combustion and flame, and have mistaken the vital principle of that luminary for a purely material thing, and called it "chromosphere."**** We have hypotheses and theories only so far, not law -- by any means.

[[Footnote(s)]] -----

* Brutal but frank materialism is more honest than Janus-faced agnosticism in our days. Monism is the Pecksniff of modern philosophy, turning a pharisaical face to psychology and idealism, and its natural face of a Roman Augur, swelling his cheek with his tongue -- to Materialism. The Monists are worse than the Materialists; because, while looking at the Universe and psycho-spiritual man from the same negative stand-point, the latter put their case far less plausibly than sceptics of Mr. Tyndall's or even Mr. Huxley's stamp. Herbert Spencer, Bain and Lewes are more dangerous to universal truths than Buchner.

** "Geology," by Professor A. Winchell.

*** See Five Years of Theosophy -- Articles: "Do the Adepts deny the nebular theory?" and "Is the Sun merely a cooling mass?" -- for the true Occult teaching.

[[Vol. 1, Page]] 529 MYSTERIOUS SUN FLUID.

VIII.
LIFE, FORCE, OR GRAVITY.

THE imponderable fluids have had their day; "mechanical Forces" are less talked about; Science has put on a new face for this last quarter of a century; but gravitation has remained, owing its life to new combinations after the old ones had nearly killed it. It may answer scientific hypotheses very well, but the question is whether it answers as well to truth, and represents a fact in nature. Attraction by itself is not sufficient to explain merely planetary motion; how can it presume to explain the rotatory motion in the infinitudes of Space? Attraction alone will never fill all the gaps, unless a special impulse is admitted for every sidereal body, and the rotation of every planet with its satellites is shown to be due to some one cause combined with attraction. And even then, says an astronomer ("Philosophie Naturelle," art. 142), Science would have to name that cause.

Occultism has named it for ages, and so have all the ancient philosophers; but then all such beliefs are now proclaimed exploded superstitions. The "extra cosmic" God has killed every possibility of belief in intra cosmic intelligent Forces, yet who, or what is the original pusher in that motion? "When we have learned the cause, unique et speciale, that pushes, we will be ready to combine it with the one which attracts," says Francoeur ("Astronomie," p. 342). And again -- "Attraction between the celestial bodies is only repulsion: it is the Sun that drives them incessantly onward; for otherwise, their motion would stop."

If ever this theory of the Sun-Force being the primal cause of all life on earth and motion in heaven is accepted, and if that other far bolder one of Herschell -- about certain organisms in the Sun -- is accepted even as a provisional hypothesis, then will our teachings be vindicated, and esoteric allegory shown to have anticipated Modern Science by millions of years, probably, for these are the Archaic teachings. Martanda (the Sun) watches and threatens -- without abandoning the central position to which his Mother, Aditi, relegated him -- his seven brothers, the planets; "he pursues them, turning slowly around himself . . . and follows them from afar, moving in the same direction that they do, on the path that encircles their houses" -- or the orbit. (See Comment to Stanza IV., Book I.) It is the Sun-fluids or Emanations that impart all motion and awaken all into life, in the Solar System. It is attraction and repulsion, but not as understood by modern physics and according to the law of gravity; but in harmony with the laws of Manvantaric motion de-

[[Vol. 1, Page]] 530 THE SECRET DOCTRINE.

signed from the early Sandhya, the Dawn of the rebuilding and higher reformation of the System. These laws are immutable; but the motion of all the bodies, which motion is diverse and alters with every minor Kalpa -- is regulated by the Movers, the Intelligences within the Cosmic Soul. Are we so very wrong in believing all this? Well, here is a modern and a great man of Science who, speaking of vital electricity, uses language far more akin to Occultism than to modern materialistic thought. We refer the sceptical reader to an article on "The Source of Heat in the Sun," by Robert Hunt, F.R.S., (in "Popular Science Review," Vol. IV., p. 148), who, speaking of the luminous envelope of the Sun and its "peculiar curdy appearance," says:--

"Arago proposed that this envelope should be called the Photosphere, a name now generally adopted. By the elder Herschell, the surface of this photosphere was compared to mother-of-pearl. . . . It resembles the Ocean on a tranquil summer-day, when its surface is slightly crisped by a gentle breeze. . . . Mr. Nasmyth has discovered a more remarkable condition than any that had previously been suspected . . . objects which are peculiarly lens-shaped . . . like 'willow leaves' . . . different in size . . . not arranged in any order crossing each other in all directions . . . with an irregular motion among themselves They are seen approaching to and receding from each other, and sometimes assuming new angular positions, so that the appearance has been compared to a dense shoal of fish, which, indeed, they resemble in shape. . . . The size of these objects gives a grand idea of the gigantic scale upon which physical (?) operations are carried out in the Sun. They cannot be less than 1,000 miles in length, and from two to three hundred miles in breadth. The most probable conjecture which has been offered respecting those leaf or lens-like objects, is that the photosphere* is an immense ocean of gaseous matter (what kind of "matter?") . . . in a state of intense (apparent) incandescence, and that they are perspective projections of the sheets of flame. . . ."

Solar "flames" seen through telescopes are reflections, says Occultism. But see what Occultists have to say to this in Book I.

"Whatever they may be (those sheets of flame), it is evident they are the immediate sources of solar heat and light. Here we have a surrounding envelope of photogenic matter,** which pendulates with mighty energies, and by communicating its motion to the ethereal medium in stellar space, produces heat and light in far distant worlds. We have said that those forms have been compared to certain organisms, and Herschell says, 'Though it would be too daring to speak of such organizations as partaking of life [why not?],*** yet we do not know that vital action is competent to develop heat, light, and electricity.' . . . Can it be that there is truth in this fine thought? May the pulsing of vital matter

[[Footnote(s)]] -----

* And the central mass, too, as will be found, or rather the centre of the reflection.

** That "matter" is just like the reflection in a mirror of the flame from a "photogenic" lamp-wick.

*** See "Five Years of Theosophy," p. 258 -- answer to this speculation of Herschell's.

[[Vol. 1, Page]] 531 SUN-FORCE AND EARTH-FORCE.

in the central Sun of our System be the source of all that life which crowds the earth, and without doubt overspreads the other planets, to which the Sun is the mighty Minister?" . . .

Occultism answers these queries in the affirmative; and Science will find this to be the case, one day.

Again, on p. 156, Mr. Hunt writes:--

"But regarding Life -- Vital Force -- as a power far more exalted than either light, heat, or electricity, and indeed capable of exerting a controlling power over them all" (this is absolutely occult). . . . "we are certainly disposed to view with satisfaction that speculation which supposes the photosphere to be the primary seat of vital power, and to regard with a poetic pleasure that hypothesis which refers the Solar energies to Life."

Thus, we have an important scientific corroboration for one of our fundamental dogmas -- namely, that (a) the Sun is the store-house of Vital Force, which is the Noumenon of Electricity; and (b) that it is from its mysterious, never-to-be-fathomed depths, that issue those life currents which thrill through Space, as through the organisms of every living thing on Earth. For see what another eminent physician says, who calls this (our life-fluid) "nervous Ether." Change a few sentences in the article, extracts from which now follow, and you have another quasi-Occult treatise on Life Force. This once, it is again Dr. B. W. Richardson, F.R.S., who gives his views in the "Popular Science Review," Vol. X., p. 380-3, on "Nervous Ether," as he has on "Sun-Force" and "Earth-Force":--

"The idea attempted to be conveyed by the theory is, that between the molecules of the matter, solid or fluid, of which the nervous organisms, and, indeed, of which all the organic parts of a body are composed, there exists a refined subtle medium, vaporous or gaseous, which holds the molecules in a condition for motion upon each other, and for arrangement and rearrangement of form; a medium by and through which all motion is conveyed; by and through which the one organ or part of the body is held in communion with the other parts, by which and through which the outer living world communicates with the living man: a medium, which, being present, enables the phenomena of life to be demonstrated, and which, being universally absent, leaves the body actually dead. . . ."

And the whole Solar System falls into Pralaya -- the author might have added. But let us read further:

. . . "I use the word Ether in its general sense as meaning a very light, vaporous or gaseous matter; I use it, in short, as the astronomer uses it when he speaks of the Ether of Space, by which he means a subtle but material medium. . . . When I speak of a nervous Ether, I do not convey that the ether is existent in nervous structure only; I believe truly that it is a special part of the nervous organization; but, as nerves pass into all structures that have capacities for movement and sensibilities, so the nervous ether passes into all such parts; and as the nervous ether is, according to my view, a direct product from blood, so we may look upon it as a part of the atmosphere of the blood.

[[Vol. 1, Page]] 532 THE SECRET DOCTRINE.

. . . The evidence in favour of the existence of an elastic medium pervading the nervous matter and capable of being influenced by simple pressure is all-convincing. . . . In nervous structure there is, unquestionably, a true nervous fluid, as our predecessors taught* The precise chemical (** composition of this fluid is not yet well known; the physical characters of it have been little studied. Whether it moves in currents, we do not know; whether it circulates, we do not know; whether it is formed in the centres and passes from them to the nerves, or whether it is formed everywhere where blood enters nerve, we do not know. The exact uses of the fluid we do not consequently know. It occurs to my mind, however, that the veritable fluid of nervous matter is not of itself sufficient to act as the subtle medium that connects the outer with the inner universe of man and animal. I think -- and this is the modification I suggest to the older theory -- there must be another form of matter present during life; a matter which exists in the condition of vapour or gas, which pervades the whole nervous organism, surrounds as an enveloping atmosphere*** each molecule of nervous structure, and is the medium of all motion, communicated to and from the nervous centres. . . . When it is once fairly presented to the mind that during life there is in the animal body a finely diffused form of matter, a vapour filling every part -- and even stored in some parts; a matter constantly renewed by the vital chemistry; a matter as easily disposed of as the breath, after it has served its purpose -- a new flood of light breaks on the Intelligence." . . .

A new flood of light is certainly thrown on the wisdom of ancient and mediaeval Occultism and its votaries. For Paracelsus wrote the same thing more than three hundred years ago, namely, in the sixteenth century, as follows:--

"The whole of the Microcosm is potentially contained in the Liquor Vitae, a nerve fluid . . . in which is contained the nature, quality, character, and essence of beings." . . . (De Generatione Hominis). . . . "The Archaeus or Liquor Vitae is an essence that is equally distributed in all parts of the human body. . . . The Spiritus Vitae takes its origin from the Spiritus Mundi. Being an emanation of the latter, it contains the elements of all cosmic influences, and is therefore the cause by which the action of the stars (cosmic forces) upon the invisible body of man (his vital lingasharira) may be explained." (De Viribus Membrorum. See "Life of Paracelsus" by Franz Hartmann, M.D., F.T.S.)

Had Dr. Richardson studied all the secret works of Paracelsus, he would not have been obliged to confess so often -- "we do not know" . . . "it is not known to us" . . . etc., etc. Nor would he have ever pronounced the following sentence, recanting the best portions of his independent rediscovery, in which he says (p. 384):--

[[Footnote(s)]] -----

* Paracelsus for one, who called it liquor vitae, and Archaeus.

** Rather alchemical -- "composition."

*** "This vital force . . . radiates around man like a luminous sphere" . . . says Paracelsus in Paragranum.

[[Vol. 1, Page]] 533 PANTHEISM OR MONOTHEISM.

"It may be urged that in this line of thought is included no more than the theory of the existence of the ether . . . supposed to pervade space. . . . It may be said that this universal ether pervades all the organism of the animal body as from without, and as part of every organization. This view would be Pantheism physically discovered if it were true (!) It fails to be true because it would destroy the individuality of every individual sense. . . ."

We fail to see it, and we know it is not so. Pantheism may be "physically rediscovered." It was known, seen, and felt by the whole of antiquity. Pantheism manifests itself in the vast expanse of the starry heavens, in the breathing of the seas and oceans and the quiver of life of the smallest blade of grass. Philosophy rejects one finite and imperfect God in the universe, as the anthropomorphic deity of the monotheist is represented by his followers. It repudiates in its name of Philo-Theo-Sophia the grotesque idea that Infinite, Absolute Deity should, or rather could, have any, whether direct or indirect, relation to finite illusive evolutions of matter, and therefore cannot imagine a universe outside that Deity, or the latter absent from the smallest speck of animate or inanimate substance.* Why either the Ether of Space, or "nervous Ether" should "destroy the individuality of every sense" seems incomprehensible for one acquainted with the real nature of that "nervous ether" under its Sanskrit, or rather esoteric and Kabalistic name. Dr. Richardson agrees that --

"If we did not individually produce the medium of communication between ourselves and the outer world, if it were produced from without and adapted to one kind of vibration alone, there were fewer senses required than we possess: for, taking two illustrations only -- ether of light is not adapted for sound, and yet we hear as well as see; while air, the medium of motion of sound, is not the medium of light, and yet we see and hear."

This is not so. The opinion that "Pantheism fails to be true because it would destroy the individuality of every individual sense" shows that all the conclusions of the learned doctor are based on the modern physical theories, though he would fain reform them. But he will find it impossible to do this unless he allows the existence of spiritual senses to replace the gradual atrophy of the physical. "We see and hear," in accordance (of course in Dr. Richardson's mind) with the explanations of the phenomena of sight and hearing, by that same materialistic

[[Footnote(s)]] -----

* This does not mean that every bush, tree or stone is God or a god; but only that every speck of the manifested material of Kosmos belongs to and is the substance of "God," however low it may have fallen in its cyclic gyration through the Eternities of the ever becoming; and also that every such speck individually, and Kosmos collectively, is an aspect and a reminder of that universal One Soul -- which philosophy refuses to call God, thus limiting the eternal and ever-present root and essence.

[[Vol. 1, Page]] 534 THE SECRET DOCTRINE.

science which postulates that we cannot see and hear otherwise. The Occultists and mystics know better. The Vedic Aryans were as familiar with the mysteries of sound and colour as our physiologists are on the physical plane, but they had mastered the secrets of both on planes inaccessible to the materialist. They knew of a double set of senses; spiritual and material. In a man who is deprived of one or more senses, the remaining become the more developed: e.g., the blind man will recover his sight through the senses of touch, of hearing, etc., and he who is deaf will be able to hear through sight, by seeing audibly the words uttered by the lips and mouth of the speaker. But these are cases that belong to the world of matter still. The spiritual senses, those that act on a higher plane of consciousness are rejected a priori by physiology because the latter is ignorant of the sacred science. It limits the action of ether to vibrations, and, dividing it from air -- though air is simply differentiated and compound ether -- makes it assume functions to fit in with the special theories of the physiologist. But there is more real science in the teachings of the Upanishads when these are correctly understood, than the Orientalists, who do not understand them at all, are ready to admit. Mental as well as physical correlations of the seven senses (seven on the physical and seven on the mental planes) are clearly explained and defined in the Vedas, and especially in the Upanishad called Anugita: "The indestructible and the destructible, such is the double manifestation of the Self. Of these the indestructible is the existent (the true essence or nature of Self, the underlying principles). The manifestation as an individual (or entity) is called the destructible." Thus speaks the ASCETIC in Anugita; and also: "Every one who is twice-born (initiated) knows such is the teaching of the ancients. . . . Space is the first entity. . . . Now Space (Akasa, or the noumenon of Ether) has one quality . . . and that is sound only . . . and the qualities of sound are Shadga, Rishabha, Gandhara, Madhyama, Panchama, and beyond these

five Nishada and Dhaivata"; (the Hindu gamut). These seven notes of the scale are the principles of sound. (Vide ch. xxxvi. of Anugita.) The qualities of every Element, as of every sense, are septenary, and to judge and dogmatize on them from their manifestation (likewise sevenfold in itself) on the material or objective plane above is quite arbitrary. For it is only by the SELF emancipating itself from these (seven) causes of illusion that one acquires the knowledge (secret wisdom) of the qualities of objects of sense on their dual plane of manifestation -- the visible and the invisible. Thus it is said:--

"State this wonderful mystery Hear the assignment of causes exhaustively. The nose, and the tongue, and the eye, and the

[[Vol. 1, Page]] 535 THE SEVEN PHYSICAL SENSES.

skin, and the ear as the fifth (organ of sense) Mind and Understanding,* these seven (senses) should be understood to be the causes of (the knowledge of their) qualities. Smell, and taste, and colour, sound, and touch as the fifth, the object of the mental operation, and the object of the Understanding (the highest spiritual sense or perception), these seven are causes of action. He who smells, he who eats, he who sees, he who speaks, and he who hears as the fifth, he who thinks, and he who understands, these seven should be regarded as the causes of the agents.** These (the agents) being possessed of qualities (sattwa, rajas, tamas), enjoy their own qualities, agreeable and disagreeable" (Anugita).

Then one reads in the Bhagavadgita (chap. vii.) the Deity (or Krishna) saying:--

". . . . Only some know me truly. Earth, Water, Fire, Air, Space (or Akasa, AEther), Mind, Understanding and Egoism (or the perception of all the former on the illusive plane). . . This is a lower form of my nature. Know (that there is) another (form of my) nature, and higher than this, which is animate, O you of mighty arms! and by which this Universe is upheld. . . . All this is woven upon me, like numbers of pearls upon a thread (Mundakopanishad, p. 298). . . . I am the taste in the

[[Footnote(s)]] -----

* The division of the physical senses into five, comes to us from great antiquity. But while adopting the number, no modern philosopher has asked himself how these senses could exist, i.e., be perceived and used in a self-conscious way, unless there was the sixth sense, mental perception to register and record them; and (this for the Metaphysicians and Occultists) the SEVENTH to preserve the spiritual fruition and remembrance thereof, as in a Book of Life which belongs to Karma. The ancients divided the senses into five, simply because their teachers (the Initiates) stopped at the hearing, as being that sense which developed in the physical plane (got dwarfed rather, limited to this plane) only at the beginning of the Fifth Race. (The Fourth Race already had begun to lose the spiritual condition, so pre-eminently developed in the Third Race.)

** The modern commentators, failing to comprehend the subtle meaning of the ancient Scholiasts, take this sentence, "causes of the agents," to mean "that the powers of smelling, etc., when attributed to the Self, make him appear as an agent, as an active principle (!), which is entirely fanciful. These "seven" are understood to be the causes of the Agents, because "the objects are causes, as their enjoyment causes an impression." It means esoterically that they, these seven senses, are caused by the AGENTS, which are the "deities," for what does, or can, the sentence which follows this one mean? "Thus," it is said, "these seven (senses) are the causes of emancipation" (i.e., when these causes are made ineffectual). "And among the learned (the wise Initiates) who understand the qualities which are in the position (in the nature, rather) of the deities, each in its place," means simply that the "learned" understand the nature of the noumenoi of the various phenomena; and that "qualities," in this instance, mean the qualities of the high planetary or Elementary gods or Intelligences, which rule the elements and their products, and not at all "the senses," as the modern commentator thinks. For the "learned do not suppose their senses to have aught to do with them, any more than with their SELF." (Vide pp. 278 and 279 of the VIII. Vol. of "The Sacred Books of the East." Anugita.)

[[Vol. 1, Page]] 536 THE SECRET DOCTRINE.

water, O son of Kunti! I am the light of the sun and moon. I am . . . sound ('i.e., the Occult essence which underlies all these and the other qualities of the various things mentioned,' Transl.), in space . . . the fragrant smell in the earth, refulgence in the fire . . . etc., etc."

Truly, then, one should study Occult philosophy before one begins to verify and seek the mysteries of nature on its surface alone, as he alone "who knows the truth about the qualities of nature, who understands the creation of all entities . . . is emancipated" from error. Says the "preceptor": "Accurately understanding the great tree of which the unperceived (Occult nature, the root of all) is the sprout from the seed (Parabrahmam) which consists of the understanding (Mahat, or the universal intelligent Soul) as its trunk, the branches of which are the great egoism,* in the holes of which are the sprouts, namely, the senses, of which the great (Occult, or invisible) elements are the flower-bunches,** the gross elements (the gross objective matter), the smaller boughs, which are always possessed of leaves, always possessed of flowers . . . which is eternal and the seed of which is the Brahman (the deity); and cutting it with that excellent sword -- knowledge (secret wisdom) -- one attains immortality and casts off birth and death."

This is the Tree of Life, the Asvattha tree, only after the cutting of which the slave of life and death, MAN, can be emancipated.

But the men of Science know nought, nor will they hear of the "Sword of Knowledge" used by the adepts and ascetics. Hence the one-sided remarks of the most liberal among them, based on and flowing from undue importance given to the arbitrary divisions and classification of physical science. Occultism heeds them very little, and nature still less. The whole range of physical phenomena

proceed from the Primary of Ether -- Akasa, as dual-natured Akasa proceeds from undifferentiated Chaos, so-called, the latter being the primary aspect of Mulaprakriti, the root-matter and the first abstract Idea one can form of Parabrahmam. Modern Science may divide its hypothetically conceived ether in as many ways as it likes; the real AETHER of Space will remain as it is throughout. It has its seven principles, as all the rest of nature has, and where there was no Ether there would be no sound, as it is the vibrating sound-board in nature in all of its seven differentiations. This is the first mystery the Initiates of old have learned. Our present normal physical senses were (from our present point of view) abnormal in those days of slow and progressive downward evolution and fall into matter. And there was a day when all that which in our modern times is regarded as phenomena, so puzzling to the

[[Footnote(s)]] -----

* Ahamkara, I suppose, that Egoship (or Ahamship) which leads to every error.

** The elements are the five tanmatras of earth, water, fire, air and ether, the producers of the grosser elements.

[[Vol. 1, Page]] 537 WHAT IS NERVOUS ETHER?

physiologists now compelled to believe in them -- such as thought transference, clairvoyance, clairaudience, etc.; in short, all that which is called now "wonderful and abnormal" -- all that and much more belonged to the senses and faculties common to all humanity. We are, however, cycling back and cycling forward; i.e., having lost in spirituality that which we acquired in physical development until almost the end of the Fourth Race, we (mankind) are as gradually and imperceptibly losing now in the physical all that we regain once more in the spiritual re-evolution. This process must go on until the period which will bring the Sixth Root-Race on a parallel line with the spirituality of the Second, long extinct mankind.

But this will hardly be understood at present. We must return to Dr. Richardson's hopeful though somewhat incorrect hypothesis about "nervous ether." Under the misleading translation of the word as "Space" (Akasa), it has just been shown in the ancient Hindu system as the "first born" of the One, having but one quality, SOUND (which is septenary). In esoteric language this "One" is the "Father" Deity, and "Sound" is synonymous with Logos (Verbum, or the Son). Whether consciously or otherwise, it must be the latter; and Dr. Richardson, while preaching an Occult doctrine -- chooses the lowest form of the septenary nature of that "SOUND" and speculates upon it, adding:--

"The theory, I offer, is that the nervous Ether is an animal product. In different classes of animals it may differ in physical quality so as to be adapted to the special wants of the animal, but essentially it plays one part in all animals, and is produced, in all, in the same way. . . ."

Herein lies the nucleus of error leading to all the resultant mistaken views. This "Nervous Ether" is the lowest principle of the Primordial Essence which is Life. It is animal vitality diffused in all nature and acting according to the conditions it finds for its activity. It is not an "animal product," but the living animal, the living flower or plant are its products. The animal tissues only absorb it according to their more or less morbid or healthy state -- as do physical materials and structures (in their primogonial State -- nota bene) -- and henceforward, from the moment of the birth of the Entity, are regulated, strengthened, and fed by it. It descends in a larger supply to vegetation in the Sushumna sun-ray which lights and feeds the moon, and it is through her beams that it pours its light upon, and penetrates man and animal, more during their sleep and rest, than when they are in full activity. Therefore Dr. Richardson errs again in stating that:--

"The nervous ether is not, according to my idea of it, in itself active, nor an excitant of animal motion in the sense of a force; but it is essential as supplying the conditions by which the motion is rendered possible." (It is just the reverse.) . . . "It is the conductor of all vibrations of heat, of light, of sound, of electrical action, of mechanical

[[Vol. 1, Page]] 538 THE SECRET DOCTRINE.

friction.* It holds the nervous system throughout in perfect tension, during states of life (true). By exercise it is disposed of (rather generated) . . . and when demand for it is greater than the supply, its deficiency is indicated by nervous collapse or exhaustion.** It accumulates in the nervous centres during sleep, bringing them, if I may so speak, to their due tone, and therewith raising the muscles to awakening and renewed life. . . ."

Just so; this is quite correct, and as comprehensible. Therefore, "The body fully renewed by it, presents capacity for motion, fullness of form, life. The body bereft of it presents inertia, the configuration of shrunken death, the evidence of having lost something physical that was in it when it lived."

Modern Science denies the existence of a "vital principle." This extract is a clear proof of its grand mistake. But this "physical something," that we call life-fluid -- the Liquor Vitae of Paracelsus -- has not deserted the body, as Dr. Richardson thinks. It has only changed its state from activity to passivity, and become latent owing to the too morbid state of the tissues, on which it has no more hold. Once the rigor mortis absolute, the "Liquor Vitae" will re-awaken into action, and begin its work on the atoms chemically. Brahma-Vishnu -- the creator and the Preserver of Life -- will have transformed himself into Siva the Destroyer.

Lastly he writes on p. 387:--

"The nervous Ether may be poisoned; it may, I mean, have diffused through it, by simple gaseous diffusion, other gases or vapours derived from without; it may derive from within products of substances swallowed and ingested, or gases of decomposition produced during disease in the body itself."

And the learned gentleman might have added on the same Occult principle: "That the 'nervous Ether' of one person can be poisoned by the 'nervous Ether' of another person or his auric emanations. But see what Paracelsus said of 'Nervous Ether':--

"The Archaeus is of a magnetic nature, and attracts or repels other sympathetic or antipathetic forces belonging to the same plane. The less power of resistance for astral influences a person possesses, the more will he be subject to such influences. The vital force is not enclosed in man, but radiates (within) and around him like a luminous sphere (aura) and it may be made to act at a distance. . . . It may poison the essence of life (blood) and cause diseases, or it may purify it after

[[Footnote(s)]] -----

* The conductor in the sense of Upadhi -- a material or physical basis; but, as the second principle of the universal Soul and Vital Force in Nature, it is intelligently guided by the fifth principle thereof.

** And too great an exuberance of it in the nervous system leads as often to disease and death. If it were the animal system which generated it, such would not be the case, surely. Hence, the latter emergency shows its independence of the system, and connection with the Sun-Force, as Metcalfe and Professor Hunt explain it.

[[Vol. 1, Page]] 539 THE LIFE-PRINCIPLE.

it has been made impure, and restore the health" (Paragranum; "Life of Paracelsus," by Dr. F. Hartmann.)

That the two, Archaeus and "nervous Ether," are identical, is shown by the English Scientist, who says that the tension of it generally may be too high or too low; that it may be so "owing to local changes in the nervous matter it invests." . . . "Under sharp excitation it may vibrate as if in a storm and plunge every muscle under cerebral or spinal control into uncontrolled motion --unconscious convulsions."

This is called nervous excitation, but no one, except Occultists, knows the reason of such nervous perturbation or explains the primary causes of it. The "principle of Life" may kill when too exuberant, as also when there is too little of it. But this principle on the manifested (or our) plane is but the effect and the result of the intelligent action of the "Host" -- collectively, Principle -- the manifesting LIFE and LIGHT. It is itself subordinate to, and emanates from the ever-invisible, eternal and Absolute ONE LIFE in a descending and a re-ascending scale of hierarchic degrees -- a true septenary ladder, with SOUND (or the Logos) at the upper end and the Vidyadharas* (the inferior Pitris) at the lower.

[[Footnote(s)]] -----

* In a recent work on the Symbolism in Buddhism and Christianity (in Buddhism and Roman Catholicism, rather, many later rituals and dogmas in Northern Buddhism in its popular exoteric form, being identical with those of the Latin Church) some curious facts are to be found. The author of this volume, with more pretensions than erudition, has indiscriminately crammed into his work ancient and modern Buddhist teachings, and sorely confused Lamaism with Buddhism. On page 404 of this volume, called "Buddhism in Christendom, or Jesus the Essene," our pseudo-Orientalist devotes himself to criticizing the "Seven Principles" of the Esoteric Buddhists, and attempts to ridicule them. On page 405, the closing page, he speaks enthusiastically of the Vidyadharas, "the seven great legions of dead men made wise." Now, these "Vidyadharas," whom some Orientalists call "demi-gods," are in fact, exoterically, a kind of Siddhas, "affluent in devotion," and, esoterically, they are identical with the seven classes of Pitris, one class of which endow man in the Third Race with Self-Consciousness by incarnating in the human shells. The "Hymn to the Sun," at the end of his queer volume of mosaic, which endows Buddhism with a personal god (!), is an unfortunate thrust at the very proofs so elaborately collected by the unlucky author.

Theosophists are fully aware that Mr. Rhys Davids has expressed his opinion on their beliefs likewise. He said that the theories propounded by the author of Esoteric Buddhism "were not Buddhism, and were not Esoteric." The remark is the result of (a) the unfortunate mistake of writing "Buddhism" instead of "Budhaim," or Budhism, i.e., of connecting the system with Gautama's religion instead of with the Secret Wisdom taught by Krishna, Sankaracharya, and by many others, as much as by Buddha; and (b) of the impossibility of Mr. Rhys Davids knowing anything of true esoteric teachings. But he is, at all events, the greatest Pali and Buddhist scholar of the day, and whatever he may say is entitled to respectful hearing. But when one who knows no more of exoteric Buddhism on scientific and materialistic lines, than he knows of esoteric philosophy, defames those whom he honours with his spite, and assumes with the Theosophists the airs of a profound scholar, one can only smile and -- heartily laugh at him.

[[Vol. 1, Page]] 540 THE SECRET DOCTRINE.

Of course, the Occultists are fully aware of the fact that the Vitalist "fallacy," so derided by Vogt and Huxley, is, nevertheless, still countenanced in very high scientific quarters, and, therefore, they are happy to feel that they do not stand alone. Thus, Professor de Quatrefages writes:--

"It is very true we do not know what life is; but no more do we know what the force is that set the stars in motion. . . . Living beings are heavy, and therefore subject to gravitation; they are the seat of numerous and various physico-chemical phenomena which are indispensable to their existence, and which must be referred to the action of etherodnamy (electricity, heat, etc.). But these phenomena are here manifested under the influence of another force. . . . Life is not antagonistic to the inanimate forces, but it governs and rules their action by its laws."*

IX.
THE SOLAR THEORY.

A SHORT ANALYSIS OF THE COMPOUND AND SINGLE ELEMENTS OF SCIENCE AS AGAINST THE OCCULT TEACHINGS. HOW FAR SCIENTIFIC IS THIS THEORY, AS GENERALLY ACCEPTED.

IN his reply to Dr. Gull's attack on the theory of vitality (connected inseparably with the Elements of the ancients in the Occult philosophy), Professor Beale, the great physiologist, has a few words as suggestive as they are beautiful:--

"There is a mystery in life -- a mystery which has never been fathomed, and which appears greater, the more deeply the phenomena of life are studied and contemplated. In living centres -- far more central than the centres seen by the highest magnifying powers, in centres of living matter, where the eye cannot penetrate, but towards which the understanding may tend -- proceed changes of the nature of which the most advanced physicists and chemists fail to afford us the conception: nor is there the slightest reason to think that the nature of these changes will ever be ascertained by physical investigation, inasmuch as they are certainly of an order or nature totally distinct from that to which any other phenomenon known to us can be relegated."

This "mystery," or the origin of the LIFE ESSENCE, Occultism locates in the same centre as the nucleus of prima materia (for they are one) of our Solar system.

[[Footnote(s)]] -----

* "The Human Species," p. 11.

[[Vol. 1, Page]] 541 THE HEART OF THE SOLAR SYSTEM.

"The Sun is the heart of the Solar World (System) and its brain is hidden behind the (visible) Sun. From thence, sensation is radiated into every nerve-centre of the great body, and the waves of the life-essence flow into each artery and vein. . . . The planets are its limbs and pulses. . . ." (Commentary.)

It was stated elsewhere (in the Theosophist) that Occult philosophy denies that the Sun is a globe in combustion, but defines it simply as a world, a glowing sphere, the real Sun being hidden behind, and the visible being only its reflection, its shell. The Nasmyth willow leaves, mistaken by Sir J. Herschell for "Solar inhabitants," are the reservoirs of solar vital energy, "the vital electricity that feeds the whole system. . . . The Sun in abscondito being thus the storehouse of our little Kosmos, self-generating its vital fluid, and ever receiving as much as it gives out," and the visible Sun only a window cut into the real Solar palace and presence, which reflects, however, faithfully the interior work.

Thus, there is a regular circulation of the vital fluid throughout our system, of which the Sun is the heart -- the same as the circulation of the blood in the human body -- during the manvantaric solar period, or life; the Sun contracting as rhythmically at every return of it, as the human heart does. Only, instead of performing the round in a second or so, it takes the solar blood ten of its years, and a whole year to pass through its auricles and ventricles before it washes the lungs and passes thence to the great veins and arteries of the system.

This, Science will not deny, since Astronomy knows of the fixed cycle of eleven years when the number of solar spots increases,* which is due to the contraction of the Solar HEART. The universe (our world in this case) breathes, just as man and every living creature, plant, and even mineral does upon the earth; and as our globe itself breathes every twenty-four hours. The dark region is not due "to the absorption exerted by the vapours issuing from the bosom of the sun and interposed between the observer and the photosphere," as Father Secchi would have it ("Le Soleil" II., 184), nor are the spots formed "by the matter (heated gaseous matter) which the irruption projects upon the solar disc" (ibid). It is similar to the regular and healthy pulsation of the heart, as the life fluid passes through its hollow muscles. Could the human heart be made luminous, and the living and throbbing organ be made visible, so as to have it reflected upon a screen, such as

[[Footnote(s)]] -----

* Not only does it not deny the occurrence, though attributing it to a wrong cause, as always, each theory contradicting every other, (see the theories of Secchi, of Faye, and of Young), the spots depending on the superficial accumulation of vapours cooler than the photosphere (?), etc., etc., but we have men of science who astrologize upon the spots. Professor Jevons attributes all the great periodical commercial crises to the influence of the Sun spots every eleventh cyclic year. (See his "Investigations into Currency and Finance.") This is worthy of praise and encouragement surely.

used by the astronomers in their lectures -- say for the moon -- then every one would see the Sun-spot phenomenon repeated every second -- due to its contraction and the rushing of the blood.

It is said in a work on Geology that it is the dream of Science that "all the recognized chemical elements will one day be found but modifications of a single material element." ("World-Life," p. 48.)

Occult philosophy has taught this since the existence of human speech and languages, adding only, on the principle of the immutable law of analogy -- "as it is above, so it is below" -- that other axiom, that there is neither Spirit nor matter, in reality, but only numberless aspects of the One ever-hidden IS (or Sat). The homogeneous primordial Element is simple and single only on the terrestrial plane of consciousness and sensation, since matter, after all, is nothing else than the sequence of our own states of consciousness, and Spirit an idea of psychic intuition. Even on the next higher plane, that single element which is defined on our earth by current science, as the ultimate undecomposable constituent of some kind of matter, would be pronounced in the world of a higher spiritual perception as something very complex indeed. Our purest water would be found to yield, instead of its two declared simple elements of oxygen and hydrogen, many other constituents, undreamt of by our terrestrial modern chemistry. As in the realm of matter, so in the realm of Spirit, the shadow of that which is cognized on the plane of objectivity exists on that of pure subjectivity. The speck of the perfectly homogeneous substance, the sarcode of the Haeckelian monera, is now viewed as the archebiosis of terrestrial existence (Mr. Huxley's "protoplasm"); and Bathybius Haeckelii has to be traced to its pre-terrestrial archebiosis. This is first perceived by the astronomers at its third stage of evolution, and in the "secondary creation," so-called. But the students of Esoteric philosophy understand too well the secret meaning of the stanza: "Brahma has essentially the aspect of prakriti, both evolved and unevolved . . . Spirit, O twice-born, (Initiate) is the leading aspect of Brahma. The next is a two-fold aspect -- of Prakriti and Purusha, both evolved and unevolved; and time is the last! Anu is one of the names of Brahma (as distinct from Brahma neuter), and it means "atom": Aniyamsam aniyasam, "the most atomic of the atomic," the "immutable and imperishable (achyuta) Purushottama."

Surely, then, the elements now known to us -- be their number whatever it may -- as they are understood and defined at present, are not,

[[Footnote(s)]] -----

* Unfortunately, as these pages are being written the "archebiosis of terrestrial existence" has turned, under a somewhat stricter chemical analysis, into a simple precipitate of sulphate of lime -- hence from the scientific standpoint not even an organic substance!!! Sic transit gloria mundi!

nor can they be, the primordial elements. Those were formed from "the curds of the cold radiant mother" and "the fire-seed of the hot Father" who "are one," or, to express it in the plainer language of modern science, those elements had their genesis in the depths of the primordial fire-mist -- the masses of incandescent vapour of the irresolvable nebulae; for as Professor Newcomb shows (in his "Popular Astronomy," on page 444), resolvable nebulae are not a class of proper nebulae.

More than half of those which were at first mistaken for nebulae -- he thinks -- are what he calls "starry clusters." The elements now known, have arrived at their state of permanency in this 4th Round and 5th Race. They have a short period of rest before they are propelled once more on their upward spiritual evolution; when the "living fire of Orcus" will dissociate the most irresolvable and scatter them into the primordial ONE -- again.

Meanwhile the Occultist goes further, as has been shown in the Commentaries on the Seven Stanzas. Hence he can hardly hope for any help or recognition from science, which will reject both his "aniyamsam aniyasam" (the absolutely spiritual atom) and his Manasaputras -- "mind-born men." By resolving the "single material element" into one absolute irresolvable element -- Spirit, or "Root-matter," thus placing it at once outside the reach and province of physical philosophy -- he has, of course but little in common with the orthodox men of science. He maintains that Spirit and Matter are two FACETS of the unknowable UNITY, their apparently contrasted aspects depending, (a) on the various degrees of differentiation of the latter, and (b) on the grades of consciousness attained by man himself. This is, however, metaphysics, and has little to do with physics -- however great in its own terrestrial limitation that physical philosophy may now be.

Nevertheless, once that Science admits, if not the actual existence, at any rate, the possibility of the existence, of a Universe with its numberless forms, conditions, and aspects built out of a "single Substance,"* it has

[[Footnote(s)]] -----

* In his "World-Life" -- page 48 -- in the appended foot notes, Professor Winchell says:-- "It is generally admitted that at excessively high temperatures matter exists in a state of dissociation -- that is, no chemical combination can exist;" and would appeal, to prove the unity of matter, to the spectrum, which in every case of homogeneity will show a bright line, whereas in the case of several molecular arrangements existing -- in the nebulae say, or a star -- "the spectrum should consist of two or three bright lines!" This would be no proof either way to the physicist-Occultist, who maintains that beyond a certain limit of visible matter, no spectrum, no telescope and no microscope are of any use. The unity of matter, of that which is real cosmic matter to the Alchemist, or "Adam's

Earth" as the Kabalists call it, can hardly be proved or disproved, by either the French savant Dumas, who suggests "the composite nature of the "elements" on certain relations of atomic weights," or even by Mr. Crookes's "radiant matter," though his experiments may seem [[Footnote continued on next page]]

[[Vol. 1, Page]] 544 THE SECRET DOCTRINE.

to go further. Unless it also admits the possibility of One Element, or the ONE LIFE of the Occultists. It will have to hang up that "single substance," especially if limited to only the solar nebulae, like the coffin of Mahomet, in mid air, though minus the attractive magnet that sustains that coffin. Fortunately for the speculative physicists, if unable to state with any degree of precision what the nebular theory does imply, we have, thanks to Professor Winchell, and several disagreeing astronomers, been able to learn what it does not imply.* (Vide Supra.)

Unfortunately, this is far from clearing even the most simple of the problems that have vexed, and still do vex, the men of learning in their research after truth. We have to proceed with our inquiries, starting with the earliest hypotheses of modern science, if we would discover where and why it sins. Perchance it may be found that Stallo is right, after all. That the blunders, contradictions, and fallacies made by the most eminent men of learning are simply due to their abnormal attitude. They are, and want to remain materialistic quand meme, and yet "the general principles of the atomo-mechanical theory -- the basis of modern physics -- are substantially identical with the cardinal doctrines of ontological metaphysics." Thus, "the fundamental errors of ontology become apparent in proportion to the advance of physical Science." (Int. p. VI., "Concepts of Modern Physics.") Science is honeycombed with metaphysical conceptions, but the Scientists will not admit the charge and fight desperately to put atomo-mechanical masks on purely incorporeal and spiritual laws in nature, on our plane -- refusing to admit their substantiality even on other planes, the bare existence of which they reject a priori.

It is easy to show, however, how Scientists, wedded to their materialistic views, have endeavoured, ever since the day of Newton, to put false masks on fact and truth. But their task is becoming with every year more difficult; and with every year also, Chemistry, above all the other sciences, approaches nearer and nearer the realm of the Occult in nature. It is assimilating the very truths taught by the Occult Sciences

[[Footnote(s)]] -----

[[Footnote continued from previous page]] "to be best understood on the hypothesis of the homogeneity of the elements of matter, and the continuity of the states of matter." For all this does not go beyond MATERIAL matter, so to say, even in what is shown by the spectrum, that modern "eye of Siva" of physical experiments. It is of this matter only, that H. St. Claire Deville could say that "when bodies, deemed to be simple, combine with one another, they vanish, they are individually annihilated"; simply because he could not follow those bodies in their further transformation in the world of spiritual cosmic matter. Verily modern science will never be able to dig deep enough into the cosmological formations to find the roots of the world-stuff or matter, unless she works on the same lines of thought as the medieval alchemist did.

* "World-Life," Ibid.

[[Vol. 1, Page]] 545 THE ORIGINAL BASE.

for ages, but hitherto bitterly derided. "Matter is eternal," says the Esoteric Doctrine. But the matter the Occultists conceive of in its laya, or zero state, is not the matter of modern science; not even in its most rarefied gaseous state. Mr. Crookes' "radiant matter" would appear matter of the grossest kind in the realm of the beginnings, as it becomes pure spirit before it has returned back even to its first point of differentiation. Therefore, when the adept or alchemist adds that, though matter is eternal, for it is PRADHANA, yet atoms are born at every new manvantara, or reconstruction of the universe, it is no such contradiction as a materialist, who believes in nothing beyond the atom, might think. There is a difference between manifested and unmanifested matter, between pradhana, the beginningless and endless cause, and prakriti, or the manifested effect. Says the sloka; --

"That which is the unevolved cause is emphatically called by the most eminent sages, pradhana, original base, which is subtle prakriti, viz., that which is eternal, and which at once is, and is not, a mere process."*

That which in modern phraseology is respectively referred to as Spirit and Matter, is ONE in eternity as the perpetual cause, and it is neither Spirit nor matter, but IT -- rendered in Sanskrit TAD ("that"), -- all that is, was, or will be, all that the imagination of man is capable of conceiving. Even the exoteric Pantheism of Hinduism renders it as no monotheistic philosophy ever did, for in superb phraseology its cosmogony begins with the well-known words:--

"There was neither day nor night, neither heaven nor earth, neither darkness nor light. And there was not ought else apprehensible by the senses or by the mental faculties. There was then one Brahma, essentially prakriti (Nature) and Spirit. For the two aspects of Vishnu which are other than his supreme essential aspect are prakriti and Spirit, and Brahman. When these two other ASPECTS of his no longer subsist, but are dissolved, then that aspect whence form and the rest, i.e., creation, proceed anew, is denominated time, O twice-born."

It is that which is dissolved, or the illusionary dual aspect of That, the essence of which is eternally ONE, that we call eternal matter or Substance (Vide in Part II., "Primordial Substance and Divine Thought"), formless, sexless, inconceivable, even to our sixth sense or mind,** in which, therefore, we refuse to see that which Monotheists call a personal, anthropomorphic God.

How are these two propositions -- "that matter is eternal," and "the atom periodical, and not eternal" -- viewed by modern exact Science? The materialistic physicist will criticize and laugh them to scorn. The

[[Footnote(s)]] -----

[[Vol. 1, Page]] 546 THE SECRET DOCTRINE.

liberal and progressive man of Science, however, the true and earnest scientific searcher after truth -- e.g., the eminent chemist, Mr. Crookes, will corroborate the probability of the two statements. For, hardly has the echo of his lecture on the "Genesis of the Elements" died away -- the lecture which, delivered by him before the Chemical Section of the British Association, at the last Birmingham meeting, so startled every evolutionist who heard or read it -- than there came another one in March last, 1888. Once more the President of the Chemical Society brings before the world of Science and the public the fruits of some new discoveries in the realm of atoms, and these discoveries justify the occult teachings in every way. They are more startling even than the statements made by him in the first lecture (quoted later) and deserve well the attention of every Occultist, Theosophist, and Metaphysician. This is what he says in his "Elements and Meta-Elements," thus justifying Stallo's charges and prevision with the fearlessness of a scientific mind which loves science for truth's sake, regardless of any consequences to his own glory and reputation. We quote his own words:

Permit me, gentlemen, now to draw your attention for a short time to a subject which concerns the fundamental principles of chemistry, a subject which may lead us to admit the possible existence of bodies which, though neither compounds nor mixtures, are not elements in the strictest sense of the word -- bodies which I venture to call "meta-elements." To explain my meaning it is necessary for me to revert to our conception of an element. What is the criterion of an element? Where are we to draw the line between distinct existence and identity? No one doubts that oxygen, sodium, chlorine, sulphur are separate elements; and when we come to such groups as chlorine, bromine, iodine, &c., we still feel no doubt, although were degrees of "elementicity" admissible -- and to that we may ultimately have to come -- it might be allowed that chlorine approximates much more closely to bromine than to oxygen, sodium, or sulphur. Again, nickel and cobalt are near to each other, very near, though no one questions their claim to rank as distinct elements. Still I cannot help asking what would have been the prevalent opinion among chemists had the respective solutions of these bodies and their compounds presented identical colours, instead of colours which, approximately speaking, are mutually complementary. Would their distinct nature have even now been recognised? When we pass further and come to the so-called rare earths the ground is less secure under our feet. Perhaps we may admit scandium, ytterbium, and others of the like sort to elemental rank; but what are we to say in the case of praseo- and neo-dymium, between which there may be said to exist no well-marked chemical difference, their chief claim to separate individuality being slight differences in basicity and crystallizing powers, though their physical distinctions, as shown by spectrum observations, are very strongly marked? Even here we may imagine the disposition of the majority of chemists would incline toward the side of leniency, so that they would admit these two bodies within the charmed circle. Whether in so doing they would be able to appeal to any broad principle is an open question. If we admit these candidates

[[Vol. 1, Page]] 547 OCCULT CHEMISTRY.

how in justice are we to exclude the series of elemental bodies or meta-elements made known to us by Kruss and Nilson? Here the spectral differences are well marked, while my own researches on didymium show also a slight difference in basicity between some at least of these doubtful bodies. In the same category must be included the numerous separate bodies into which it is probable that yttrium, erbium, samarium, and other "elements" -- commonly so-called -- have been and are being split up. Where then are we to draw the line? The different groupings shade off so imperceptibly the one into the other that it is impossible to erect a definite boundary between any two adjacent bodies and to say that the body on this side of the line is an element, while the one on the other side is non-elementary, or merely something which simulates or approximates to an element. Wherever an apparently reasonable line might be drawn it would no doubt be easy at once to assign most bodies to their proper side, as in all cases of classification the real difficulty comes in when the border-line is approached. Slight chemical differences, of course, are admitted, and, up to a certain point, so are well-marked physical differences. What are we to say, however, when the only chemical difference is an almost imperceptible tendency for the one body -- of a couple or of a group -- to precipitate before the other? Again, there are cases where the chemical differences reach the vanishing point, although well-marked physical differences still remain. Here we stumble on a new difficulty: in such obscurities what is chemical and what is physical? Are we not entitled to call a slight tendency of a nascent amorphous precipitate to fall down in advance of another a "physical difference?" And may we not call coloured reactions depending on the amount of some particular acid present and varying, according to the concentration of the solution and to the solvent employed, "chemical differences?" I do not see how we can deny elementary character to a body which differs from another by well-marked colour, or spectrum-reactions, while we accord it to another body whose only claim is a very minute difference in basic powers. Having once opened the door wide enough to admit some spectrum differences, we have to inquire how minute a difference qualifies the candidate to pass? I will give instances from my own experience of some of these doubtful candidates.

And here the great chemist gives several cases of the very extraordinary behaviour of molecules and earths, apparently the same, and which yet, when examined very closely, were found to exhibit differences which, however imperceptible, still show that none of them are simple bodies, and that the 60 or 70 elements accepted in chemistry, can no longer cover the ground. Their name, apparently, is legion, but as the so-called "periodic theory" stands in the way of an unlimited multiplication of elements, Mr. Crookes is obliged to find some means of reconciling the new discovery with the old theory. "That theory," he says:--

"Has received such abundant verification that we cannot lightly accept any interpretation of phenomena which fails to be in accordance with it. But if we suppose the elements reinforced by a vast number of bodies slightly differing from each other in their properties, and forming, if I may use the expression,

[[Vol. 1, Page]] 548 THE SECRET DOCTRINE.

aggregations of nebulae where we formerly saw, or believed we saw, separate stars, the periodic arrangement can no longer be definitely grasped. No longer, that is, if we retain our usual conception of an element. Let us, then, modify this conception. For "element" read "elementary group" -- such elementary groups taking the place of the old elements in the periodic scheme -- and the difficulty falls away. In defining an element, let us take not an external boundary, but an internal type. Let us say, e.g., the smallest ponderable quantity of yttrium is an assemblage of ultimate atoms almost infinitely more like each other than they are to the atoms of any other approximating element. It does not necessarily follow that the atoms shall all be absolutely alike among themselves. The atomic weight which we ascribed to yttrium, therefore, merely represents a mean value around which the actual weights of the individual atoms of the "element" range within certain limits. But if my conjecture is tenable, could we separate atom from atom, we should find them varying within narrow limits on each side of the mean. The very process of fractionation implies the existence of such differences in certain bodies."

Thus fact and truth have once more forced the hand of "exact" Science, and compelled it to enlarge its views and change its terms which, masking the multitude, reduced them to one body -- like the Septenary Elohim and their hosts transformed by the materialistic religionists into one Jehovah. Replace the chemical terms "Molecule," "atom," "particle," etc., by the words "Hosts," "Monads," "Devas," etc., and one might think the genesis of gods, the primeval evolution of manvantaric intelligent Forces, was being described. But the learned lecturer adds something still more suggestive to his descriptive remarks; whether consciously or unconsciously, who knoweth? For he says the following:--

"Until lately such bodies passed muster as elements. They had definite properties, chemical and physical; they had recognised atomic weights. If we take a pure dilute solution of such a body, yttrium for instance, and if we add to it an excess of strong ammonia, we obtain a precipitate which appears perfectly homogeneous. But if instead we add very dilute ammonia in quantity sufficient only to precipitate one-half of the base present, we obtain no immediate precipitate. If we stir up the whole thoroughly so as to insure a uniform mixture of the solution and the ammonia, and set the vessel aside for an hour, carefully excluding dust, we may still find the liquid clear and bright, without any vestige of turbidity. After three or four hours, however, an opalescence will declare itself, and the next morning a precipitate will have appeared. Now let us ask ourselves, What can be the meaning of this phenomenon? The quantity of precipitant added was insufficient to throw down more than half the yttria present, therefore a process akin to selection has been going on for several hours. The precipitation has evidently not been effected at random, those molecules of the base being decomposed which happened to come in contact with a corresponding molecule of ammonia, for we have taken care that the liquids should be uniformly mixed, so that one molecule of the original salt would not be more exposed to decomposition

[[Vol. 1, Page]] 549 MONADS AND ATOMS.

than any other. If, further, we consider the time which elapses before the appearance of a precipitate, we cannot avoid coming to the conclusion that the action which has been going on for the first few hours is of a selective character. The problem is not why a precipitate is produced, but what determines or directs some atoms to fall down and others to remain in solution. Out of the multitude of atoms present, what power is it that directs each atom to choose the proper path? We may picture to ourselves some directive force passing the atoms one by one in review, selecting one for precipitation and another for solution till all have been adjusted."

The italics in the above passage are ours. Well may a man of science ask himself, "What power is it that directs each atom," and what is it that its character should be selective? Theists would solve the question by answering "God"; and would solve nothing philosophically. Occultism answers on its own pantheistic grounds, and refers the reader to a subsequent section, "Gods, Monads, and Atoms." The learned lecturer sees in it that which is his chief concern: the finger-posts and the traces of a path which may lead to the discovery, and the full and complete demonstration of an homogeneous element in nature. He remarks:--

"In order that such a selection can be effected there evidently must be some slight differences between which it is possible to select, and this difference almost certainly must be one of basicity, so slight as to be imperceptible by any test at present known, but susceptible of being nursed and encouraged to a point when the difference can be appreciated by ordinary tests."

Occultism, which knows of the existence and presence in Nature of the One eternal element at the first differentiation of which the roots of the tree of life are periodically struck, needs no scientific proofs. It says:-- Ancient Wisdom has solved the problem ages ago. Aye; earnest, as well as mocking reader, Science is slowly but as surely approaching our domains of the Occult. It is forced by its own discoveries to adopt nolens volens our phraseology and symbols. Chemical Science is now compelled, by the very force of things, to accept even our illustration of the evolution of the gods and atoms, so suggestively and undeniably figured in the caduceus of Mercury, the God of Wisdom, and in the allegorical language of the Archaic Sages. Says a commentary in the esoteric doctrine:--

. . . . The trunk of the ASVATTHA (the tree of Life and Being, the ROD of the caduceus) grows from and descends at every Beginning (every new manvantara) from the two dark wings of the Swan (HANSA) of Life. The two Serpents, the ever-living and its illusion (Spirit and matter) whose two heads grow from the one head between the wings, descend along the trunk, interlaced in close embrace. The two tails join on earth (the manifested Universe) into one, and this is the great illusion, O Lanoo!"

[[Vol. 1, Page]] 550 THE SECRET DOCTRINE

Every one knows what the caduceus is, already modified by the Greeks. The original symbol -- with the triple head of the serpent -- became altered into a rod with a knob, and the two lower heads were separated, thus disfiguring somewhat the original meaning. Yet it is as good an illustration as can be for our purpose, this laya rod entwined by two serpents. Verily the wonderful powers of the magic caduceus were sung by all the ancient poets, with a very good reason for those who understood the secret meaning.

[[diagram]]

Now what says the learned President of the Chemical Society of Great Britain, in that same lecture, which has any reference to, or bearing upon, our above-mentioned doctrine. Very little; only this -- and nothing more:--

"In the Birmingham address already referred to I asked my audience to picture the action of two forces on the original protyle --- one being time, accompanied by a lowering of temperature; the other, swinging to and fro like a mighty pendulum, having periodic cycles of ebb and swell, rest and activity, being intimately connected with the imponderable matter, essence, or source of energy we call electricity. Now, a simile like this effects its object if it fixes in the mind the particular fact it is intended to emphasize, but it must not be expected necessarily to run parallel with all the facts. Besides the lowering of temperature with the periodic ebb and flow of electricity, positive or negative, requisite to confer on the newly-born elements their particular atomicity, it is evident that a third factor must be taken into account. Nature does not act on a flat plane; she demands space for her cosmogenic operations, and if we introduce space as the third factor, all appears clear. Instead of a pendulum, which, though to a certain extent a good illustration, is impossible as a fact, let us seek some more satisfactory way of representing what I conceive may have taken place. Let us suppose the zigzag diagram not drawn upon a plane, but projected in space of three dimensions. What figure can we best select to meet all the conditions involved? Many of the facts can be well explained by supposing the projection in space of Professor Emerson Reynolds' zigzag curve to be a spiral. This figure is, however, inadmissible, inasmuch as the curve has to pass through a point neutral as to electricity and chemical energy twice in each cycle. We must, therefore, adopt some other figure. A figure of eight (8), or lemniscate, will foreshorten into a zigzag just as well as a spiral, and it fulfils every condition of the problem."

A lemniscate for the evolution downward, from Spirit into matter;

[[Vol. 1, Page]] 551 THE CADUCEUS OF LIFE.

another form of a spiral, perhaps, in its reinvolutionary path onward, from matter into Spirit, and the necessary gradual and final reabsorption into the laya state, that which Science calls in her own way "the point neutral as to electricity" etc., or the zero point. Such are the Occult facts and statement. They may be left with the greatest security and confidence to Science, to be justified some day. Let us hear some more, however, about this primordial genetic type of the symbolical caduceus.

"Such a figure will result from three very simple simultaneous motions. First, a simple oscillation backwards and forwards (suppose east and west); secondly, a simple oscillation at right angles to the former (suppose north and south) of half the periodic time -- i.e., twice as fast; and thirdly, a motion at right angles to these two (suppose downwards), which, in its simplest form, would be with unvarying velocity. If we project this figure in space we find on examination that the points of the curves, where chlorine, bromine, and iodine are formed, come close under each other; so also will sulphur, selenium, and tellurium; again, phosphorus, arsenic, and antimony; and in like manner other series of analogous bodies. It may be asked whether this scheme explains how and why the elements appear in this order? Let us imagine a cyclical translation in space, each evolution witnessing the genesis of the group of elements which I previously represented as produced during one complete vibration of the pendulum. Let us suppose that one cycle has thus been completed, the centre of the unknown creative force in its mighty journey through space having scattered along its track the primitive atoms -- the seeds, if I may use the expression -- which presently are to coalesce and develop into the groupings now known as lithium, beryllium, boron, carbon, nitrogen, oxygen, fluorine, sodium, magnesium, aluminium, silicon, phosphorus, sulphur, and chlorine. What is most probably the form of track now pursued? Were it strictly confined to the same plane of temperature and time, the next elementary groupings to appear would again have been those of lithium, and the original cycle would have been eternally repeated, producing again and again the same 14 elements. The conditions, however, are not quite the same. Space and electricity are as at first, but temperature has altered, and thus, instead of the atoms of lithium being supplemented with atoms in all respects analogous with themselves, the atomic groupings which come into being when the second cycle commences form, not lithium, but its lineal descendant, potassium. Suppose, therefore, the vis generatrix travelling to and fro in cycles along a lemniscate path, as above suggested, while simultaneously temperature is declining and time is flowing on -- variations which I have endeavoured to represent by the downward sink -- each coil of the lemniscate track crosses the same vertical line at lower and lower points. Projected in space, the curve shows a central line neutral as far as electricity is concerned, and neutral in chemical properties -- positive electricity on the north, negative on the south. Dominant atomicities are governed by the distance east and west from the neutral centre line, monatomic elements being one remove from it, diatomic two removes, and so on. In every successive coil the same law holds good."

And, as if to prove the postulate of Occult Science and Hindu philos-

[[Vol. 1, Page]] 552 THE SECRET DOCTRINE.

ophy, that, at the hour of the Pralaya, the two aspects of the unknowable deity, "the Swan in darkness" -- Prakriti and Purusha, nature or matter in all its forms and Spirit -- "no longer subsist but are (absolutely) dissolved," we learn the conclusive scientific opinion of the great English chemist, who caps his proofs by saying:-- "We have now traced the formation of the chemical elements from knots and voids in a primitive, formless fluid. We have shown the possibility, nay, the probability that the atoms are not eternal in existence, but share with all other created beings the attributes of decay and death."

Occultism says amen to this, as the Scientific "possibility" and "probability" are for it facts demonstrated beyond the necessity of further proof or any extraneous physical evidence. Nevertheless, it repeats with as much assurance as ever: "MATTER IS ETERNAL, becoming atomic (its aspect) only periodically." This is as sure as that the other proposition, which is almost unanimously accepted by astronomers and physicists -- namely, that the wear and tear of the body of the Universe is steadily going on, and that it will finally lead to the extinction of the Solar fires and the destruction of the Universe -- is quite erroneous on the lines traced by Men of Science. There will be, as there ever were in time and eternity, periodical dissolutions of the manifested Universe, but (a) a partial pralaya after every "Day of Brahma;" and (b) an Universal pralaya -- the MAHA-PRALAYA -- only after the lapse of every Brahma's age. But the scientific causes for such dissolution, as brought forward by exact Science, have nothing to do with the true causes. However that may be, Occultism is once more justified by Science, for Mr. Crookes said:--

"We have shown, from arguments drawn from the chemical laboratory, that in matter which has responded to every test of an element, there are minute shades of difference which may admit of selection. We have seen that the time-honoured distinction between elements and compounds no longer keeps pace with the developments of chemical science, but must be modified to include a vast array of intermediate bodies -- "meta-elements." We have shown how the objections of Clerk-Maxwell, weighty as they are, may be met; and finally, we have adduced reasons for believing that primitive matter was formed by the act of a generative force, throwing off at intervals of time atoms endowed with varying quantities of primitive forms of energy. If we may hazard any conjectures as to the source of energy embodied in a chemical atom, we may, I think, premise that the heat radiations propagated outwards through the ether from the ponderable matter of the universe, by some process of nature not yet known to us, are transformed at the confines of the universe into the primary -- the essential -- motions of chemical atoms, which, the instant they are formed, gravitate inwards, and thus restore to the universe the energy which otherwise would be lost to it through radiant heat. If this conjecture be well founded, Sir William Thomson's startling prediction of the final decrepitude of the universe through the dissipation of its energy falls to the ground. In this

[[Vol. 1, Page]] 553 TRUE SIGNS OF THE TIMES.

fashion, gentlemen, it seems to me that the question of the elements may be provisionally treated. Our slender knowledge of these first mysteries is extending steadily, surely, though slowly."

By a strong and curious coincidence even our "septenary" doctrine seems to force the hand of Science. If we understand rightly, Chemistry speaks of fourteen groupings of primitive atoms -- lithium, beryllium, boron, carbon, nitrogen, oxygen, fluorine, sodium, magnesium, aluminium, silicon, phosphorus, sulphur and chlorine; and Mr. Crookes, speaking of the "dominant atomicities," enumerates seven groups of these, for he says:--

"As the mighty focus of creative energy goes round, we see it in successive cycles sowing in one tract of space seeds of lithium, potassium, rubidium, and caesium; in another tract, chlorine, bromine, and iodine; in a third, sodium, copper, silver, and gold; in a fourth, sulphur, selenium, and tellurium; in a fifth, beryllium, calcium, strontium, and barium; in a sixth, magnesium, zinc, cadmium, and mercury; in a seventh, phosphorus, arsenic, antimony, and bismuth" -- which makes seven groupings on the one hand. And after showing "in other tracts the other elements -- namely, aluminium, gallium, indium, and thallium; silicon, germanium, and tin; carbon, titanium, and zirconium."

He adds: "While a natural position near the neutral axis is found for the three groups of elements relegated by Professor Mendeleeff to a sort of Hospital for Incurables -- his eighth family." It might be interesting to compare these "seven of the eighth family of 'incurables'" with the allegories concerning the seven primitive sons of "Mother, Infinite Space," or Aditi, and the eighth son rejected by her. Many a strange coincidence may thus be found between "those intermediate links . . . named 'meta-elements or elementoids and those whom occult science names their noumenoi,' the intelligent minds and rulers of those groupings of Monads and Atoms. But this would lead us too far. Let us be content with finding the confession of the fact that "this deviation from absolute homogeneity should mark the constitution of these molecules or aggregations of matter which we designate elements and will perhaps be clearer if we return in imagination to the earliest dawn of our material universe, and, face to face with the Great Secret, try to consider the processes of elemental evolution." Thus finally Science, in the person of its highest representatives, in order to make itself clearer to the profane, adopts the phraseology of such old adepts as Roger Bacon, and returns to the "protyle." All this is hopeful and suggestive of the "signs of the times."

Indeed these "signs" are many and multiply daily; but none are more important than those just quoted. For now the chasm between the occult "superstitious and unscientific" teachings and "exact" science is completely bridged, and one, at least, of the few eminent chemists of the day is in the realm of the infinite possibilities of occultism. Every new

step he will take will bring him nearer and nearer to that mysterious centre, from which radiate the innumerable paths that lead down Spirit into matter, and which transform the gods and the living monads into man and sentient nature.

But we have something more to say on this subject in the following section.

X.
THE COMING FORCE.

ITS POSSIBILITIES AND IMPOSSIBILITIES.

Shall we say that Force is "moving matter," or "matter in motion," and a manifestation of energy; or that matter and force are the phenomenal differentiated aspects of the one primary, undifferentiated Cosmic Substance?

This query is made with regard to that Stanza which treats of FOHAT and his "Seven brothers or Sons," in other words, of the cause and the effects of Cosmic Electricity, the latter called, in Occult parlance, the seven primary forces of Electricity, whose purely phenomenal, and hence grossest effects are alone cognizable by physicists on the cosmic and especially on the terrestrial plane. These include, among other things, Sound, Light, Colour, etc., etc. Now what does physical Science tell us of these "Forces"? SOUND, it says, is a sensation produced by the impact of atmospheric molecules on the tympanum, which, by setting up delicate tremors in the auditory apparatus, thus communicate themselves to the brain. LIGHT is the sensation caused by the impact of inconceivably minute vibrations of ether on the retina of the eye.

So, too, we say. But this is simply the effect produced in our atmosphere and its immediate surroundings, all, in fact, which falls within the range of our terrestrial consciousness. Jupiter Pluvius sent his symbol in drops of rain, of water composed, as is believed, of two "elements," which chemistry dissociates and recombines. The compound molecules are in its power, but their atoms still elude its grasp. Occultism sees in all these Forces and manifestations a ladder, the lower rungs of which belong to exoteric physics, and the higher are traced to a living, intelligent, invisible Power, which is, as a rule, the unconcerned, and exceptionally, the conscious cause of the sense-born phenomenon designated as this or another natural law.

[[Vol. 1, Page]] 555 DIVINE, INFERNAL, OR TERRESTRIAL FORCE?

We say and maintain that SOUND, for one thing, is a tremendous Occult power; that it is a stupendous force, of which the electricity generated by a million of Niagaras could never counteract the smallest potentiality when directed with occult knowledge. Sound may be produced of such a nature that the pyramid of Cheops would be raised in the air, or that a dying man, nay, one at his last breath, would be revived and filled with new energy and vigour.

For Sound generates, or rather attracts together, the elements that produce an ozone, the fabrication of which is beyond chemistry, but within the limits of Alchemy. It may even resurrect a man or an animal whose astral "vital body" has not been irreparably separated from the physical body by the severance of the magnetic or odic chord. As one saved thrice from death by that power, the writer ought to be credited with knowing personally something about it.

And if all this appears too unscientific to be even noticed, let Science explain to what mechanical and physical laws known to it, is due the recently produced phenomena of the so-called "Keely motor?" What is it that acts as the formidable generator of invisible but tremendous force, of that power which is not only capable of driving an engine of 25 horse-power, but has even been employed to lift the machinery bodily? Yet this is done simply by drawing a fiddle-bow across a tuning fork, as has been repeatedly proven. For the etheric Force, discovered by the well-known (in America and now in Europe) John Worrell Keely, of Philadelphia, is no hallucination. Notwithstanding his failure to utilize it, a failure prognosticated and maintained by some Occultists from the first, the phenomena exhibited by the discoverer during the last few years have been wonderful, almost miraculous, not in the sense of the supernatural* but of the superhuman. Had Keely been permitted to succeed, he might have reduced a whole army to atoms in the space of a few seconds as easily as he reduced a dead ox to the same condition.

The reader is now asked to give a serious attention to that newly-discovered potency which the discoverer has named "Inter-Etheric Force and Forces."

In the humble opinion of the Occultists, as of his immediate friends,

[[Footnote(s)]] -----

* The word "supernatural" implies above or outside of nature. Nature and Space are one. Now Space for the metaphysician exists outside of any act of sensation, and is a purely subjective representation; materialism, which would connect it forcibly with one or the other datum of sensation, notwithstanding. For our senses, it is fairly subjective when independent of anything within it. How then can any phenomenon, or anything else, step outside of or be performed beyond that which has no limits? But when spacial extension becomes simply conceptual, and is thought of in an idea connected with certain actions, as by the materialists and the physicists, then

again they have hardly a right to define and claim that which can or cannot be produced by Forces generated within even limited spaces, as they have not even an approximate idea of what those forces are.

[[Vol. 1, Page]] 556 THE SECRET DOCTRINE.

Mr. Keely, of Philadelphia, was, and still is, at the threshold of some of the greatest secrets of the Universe; of that chiefly on which is built the whole mystery of physical Forces, and the esoteric significance of the "Mundane Egg" symbolism. Occult philosophy, viewing the manifested and the unmanifested Kosmos as a UNITY, symbolizes the ideal conception of the former by that "Golden Egg" with two poles in it. It is the positive pole that acts in the manifested world of matter, while the negative is lost in the unknowable absoluteness of SAT -- "Be-ness." Whether this agrees with the philosophy of Mr. Keely, we cannot tell, nor does it really much matter. Nevertheless, his ideas about the ethero-material construction of the Universe look strangely like our own, being in this respect nearly identical. This is what we find him saying in an able pamphlet compiled by Mrs. Bloomfield-Moore, an American lady of wealth and position, whose incessant efforts in the pursuit of truth can never be too highly appreciated:-- "Mr. Keely, in explanation of the working of his engine, says: 'In the conception of any machine heretofore constructed, the medium for inducing a neutral centre has never been found. If it had, the difficulties of perpetual-motion seekers would have ended, and this problem would have become an established and operating fact. It would only require an introductory impulse of a few pounds, on such a device, to cause it to run for centuries. In the conception of my vibratory engine, I did not seek to attain perpetual motion; but a circuit is formed that actually has a neutral centre, which is in a condition to be vivified by my vibratory ether, and, while under operation by said substance, is really a machine that is virtually independent of the mass (or globe),** and it is the wonderful velocity of the vibratory circuit which makes it so. Still, with all its perfection, it requires to be fed with the vibratory ether to make it an independent motor"

"All structures require a foundation in strength according to the weight of the mass they have to carry, but the foundations of the universe rest on a vacuous point far more minute than a molecule; in fact, to express this truth properly, on an inter-etheric point, which requires an infinite mind to understand it. To look down into the depths of an etheric centre is precisely the same as it would be to search into the broad space of heaven's ether to find the end, with this difference: that one is the positive field, while the other is the negative field"

[[Footnote(s)]] -----

* It is not correct, when speaking of idealism, to show it based upon "the old ontological assumptions that things or entities exist independently of each other, and otherwise than as terms of relations" (Stallo). At any rate, it is incorrect to say so of idealism in Eastern philosophy and its cognition, for it is just the reverse.

** Independent, in a certain sense, but not disconnected with it.

[[Vol. 1, Page]] 557 AN UNCONSCIOUS OCCULTIST.

This, as easily seen, is precisely the Eastern doctrine. His inter-etheric point is the laya-point of the Occultists, which, however, does not require "an infinite mind to understand it," but only a specific intuition and ability to trace its hiding-place in this world of matter. Of course, the laya centre cannot be produced, but an inter-etheric vacuum can -- as proved in the production of bell-sounds in space. Mr. Keely speaks as an unconscious Occultist, nevertheless, when he remarks in his theory of planetary suspension:--

"As regards planetary volume, we would ask in a scientific point of view, How can the immense difference of volume in the planets exist without disorganising the harmonious action that has always characterised them? I can only answer this question properly by entering into a progressive analysis, starting on the rotating etheric centres that were fixed by the Creator* with their attractive or accumulative power. If you ask what power it is that gives to each etheric atom its inconceivable velocity of rotation (or introductory impulse), I must answer that no finite mind will ever be able to conceive what it is. The philosophy of accumulation is the only proof that such a power has been given. The area, if we can so speak, of such an atom, presents to the attractive or magnetic, the elective or propulsive, all the receptive force and all the antagonistic force that characterises a planet of the largest magnitude; consequently, as the accumulation goes on, the perfect equation remains the same. When this minute centre has once been fixed, the power to rend it from its position would necessarily have to be so great as to displace the most immense planet that exists. When this atomic neutral centre is displaced, the planet must go with it. The neutral centre carries the full load of any accumulation from the start, and remains the same, for ever balanced in the eternal space."

Mr. Keely illustrates his idea of "a neutral centre" in this way:--

"We will imagine that, after an accumulation of a planet of any diameter, say, 20,000 miles, more or less, for the size has nothing to do with the problem; there should be a displacement of all the material, with the exception of a crust 5,000 miles thick, leaving an intervening void between this crust and a centre of the size of an ordinary billiard ball, it would then require a force as great to move this small central mass as it would to move the shell of 5,000 miles thickness. Moreover, this small central mass would carry the load of this crust for ever, keeping it equidistant; and there could be no opposing power, however great, that could bring them together. The imagination staggers in contemplating the immense load which bears upon this point of centre, where weight ceases. . . . This is what we understand by a neutral centre."

And what Occultists understand by a "laya centre."

The above is pronounced "unscientific" by many. But so is everything that is not sanctioned and kept on strictly orthodox lines by physical science. Unless the explanation given by the inventor himself is accepted -- and his explanations, being, as observed, quite orthodox from

[[Footnote(s)]] -----

* "By Fohat, more likely," would be an Occultist's reply.

[[Vol. 1, Page]] 558 THE SECRET DOCTRINE.

the spiritual and the Occult stand-points, if not from that of materialistic speculative (called exact) Science, are therefore ours in this particular -- what can science answer to facts already seen which it is no longer possible for anyone to deny? Occult philosophy divulges few of its most important vital mysteries. It drops them like precious pearls, one by one, far and wide apart, and only when forced to do so by the evolutionary tidal wave that carries on humanity slowly, silently, but steadily toward the dawn of the Sixth-Race mankind. For once out of the safe custody of their legitimate heirs and keepers, those mysteries cease to be occult: they fall into the public domain and have to run the risk of becoming in the hands of the selfish -- of the Cains of the human race -- curses more often than blessings. Nevertheless, whenever such individuals as the discoverer of Etheric Force -- John Worrell Keely -- men with peculiar psychic and mental capacities* are born, they are generally and more frequently helped than allowed to go unassisted; groping on their way, though, if left to their own resources, falling very soon victims to martyrdom and unscrupulous speculators. Only they are helped on the condition that they should not become, whether consciously or unconsciously, an additional peril to their age: a danger to the poor, now offered in daily holocaust by the less wealthy to the very wealthy.** This necessitates a short digression and an explanation.

Some twelve years back, during the Philadelphia Centennial Exhibition, the writer, in answering the earnest queries of a theosophist, one of the earliest admirers of Mr. Keely, repeated to him what she had heard in quarters, information from which she could never doubt.

It had been stated that the inventor of the "Self-Motor" was what is called, in the jargon of the Kabalists, a "natural-born magician." That he was and would remain unconscious of the full range of his powers, and would work out merely those which he had found out and ascertained in his own nature -- firstly, because, attributing them to a wrong source, he could never give them full sway; and

[[Footnote(s)]] -----

* The reason for such psychic capacities is given farther on.

** The above was written two years ago, at a time when hopes of success for the "Keely Motor" were at their highest. What was then said by the writer proved true, in every word, and now only a few remarks are added to it with regard to the failure of his expectations, so far, which has now been admitted by the discoverer himself. Though, however, the word failure is here used the reader should understand it in a relative sense, for as Mrs. Bloomfield-Moore explains: "What Mr. Keely does admit is that, baffled in applying vibratory force to mechanics, upon his first and second lines of experimental research, he was obliged either to confess a commercial failure, or to try a third departure from his base or principle; seeking success through another channel."
. . And this "channel" is on the physical plane.

[[Vol. 1, Page]] 559 THE FIRST-BORN OF ETHER.

secondly, because it was beyond his power to pass to others that which was a capacity inherent in his special nature. Hence the whole secret could not be made over permanently to anyone for practical purposes or use.*

Individuals born with such a capacity are not very rare. That they are not heard of more frequently is due to the fact that they live and die, in almost every case, in utter ignorance of being possessed of abnormal powers at all. Mr. Keely possesses powers which are called "abnormal" just because they happen in our day to be as little known as blood circulation was before Harvey's time. Blood existed, and it behaved as it does at present in the first man born from woman; and so does that principle in man which can control and guide etheric vibratory force. At any rate it exists in all those mortals whose inner selves are primordially connected, by reason of their direct descent, with that group of Dhyani-Chohans who are called "the first-born of Ether." Mankind, psychically considered, is divided into various groups, each of which is connected with one of the Dhyanic groups that first formed psychic man; (see paragraphs 1, 2, 3, 4, 5 in the Commentary to Stanza VII.) Mr. Keely being greatly favoured in this respect, and moreover, besides his psychic temperament, being intellectually a genius in mechanics, may thus achieve most wonderful results. He has achieved some already -- more than any mortal man, not initiated into the final mysteries, has achieved in this age up to the present day. What he has done is certainly quite sufficient "to demolish with the hammer of Science the idols of Science" -- the idols of matter with the feet of clay -- as his friends justly predict and say of him. Nor would the writer for a moment think of contradicting Mrs. Bloomfield-Moore, when in her paper on "Psychic Force and Etheric Force," she states that Mr. Keely, as a philosopher, "is great enough in soul, wise enough in mind, and sublime enough in courage to overcome all difficulties, and to stand at last before the world as the greatest discoverer and inventor in the world."

And again she writes:-- "Should Keely do no more than lead scientists from the dreary realms where they are groping into the open field of elemental force, where gravity and cohesion are disturbed in their haunts and diverted to use; where, from unity of origin,

emanates infinite energy in diversified forms, he will achieve immortal fame. Should he demonstrate, to the destruction of materialism, that the universe is animated by a mysterious principle to which matter, however perfectly organized, is absolutely subservient, he will be a greater spiritual benefactor to our race than the modern world has yet found in any man. Should he be able to substitute, in the treatment of disease,

[[Footnote(s)]] -----

* We learn that these remarks are not applicable to Mr. Keely's latest discovery; time alone can show the exact limit of his achievements.

[[Vol. 1, Page]] 560 THE SECRET DOCTRINE.

the finer forces of nature for the grossly material agencies which have sent more human beings to their graves than war, pestilence and famine combined, he will merit and receive the gratitude of mankind. All this and more will he do, if he and those who have watched his progress, day by day for years, are not too sanguine in their expectations."

Writing in the T. P. S. ("Theosophical Publication Society") series (No. 9), the same lady, in her pamphlet, "Keely's Secrets," brings forward a passage from an article, written a few years ago by the writer of the present volume, in her journal, the Theosophist, in these words:--

"The author of No. 5 of the pamphlets issued by the Theosophical Publication Society, 'What is Matter and What is Force,' says therein, 'The men of science have just found out "a fourth state of matter," whereas the Occultists have penetrated years ago beyond the sixth, and therefore do not infer, but know of, the existence of the seventh, the last.' This knowledge comprises one of the secrets of Keely's so-called 'compound secret.' It is already known to many that his secret includes 'the augmentation of energy,' the insulation of the ether, and the adaptation of dynaspheric force to machinery."

It is just because Keely's discovery would lead to a knowledge of one of the most occult secrets, a secret which can never be allowed to fall into the hands of the masses, that his failure to push his discoveries to their logical end seems certain to Occultists. But of this more presently. Even in its limitations this discovery may prove of the greatest benefit. For:--

"Step by step, with a patient perseverance which some day the world will honour, this man of genius has made his researches, overcoming the colossal difficulties which again and again raised up in his path what seemed to be (to all but himself) insurmountable barriers to further progress: but never has the world's index finger so pointed to an hour when all is making ready for the advent of the new form of force that mankind is waiting for. Nature, always reluctant to yield her secrets, is listening to the demands made upon her by her master, necessity. The coal mines of the world cannot long afford the increasing drain made upon them. Steam has reached its utmost limits of power, and does not fulfil the requirements of the age. It knows that its days are numbered. Electricity holds back, with bated breath, dependent upon the approach of her sister colleague. Air ships are riding at anchor, as it were, waiting for the force which is to make aerial navigation something more than a dream. As easily as men communicate with their offices from their homes by means of the telephone, so will the inhabitants of separate continents talk across the ocean. Imagination is palsied when seeking to foresee the grand results of this marvellous discovery, when once it is applied to art and mechanics. In taking the throne which it will force steam to abdicate, dynaspheric force will rule the world with a power so mighty in the interests of civilization, that no finite mind can conjecture the results. Laurence Oliphant, in his preface to 'Scientific Religion,' says: 'A new moral future is dawning upon the human race -- one, certainly, of which it stands much in need.' In no way could this

[[Vol. 1, Page]] 561 ETHERIC WAVES.

new moral future be so widely, so universally, commenced as by the utilizing of dynaspheric force to beneficial purposes in life. . . ."

The Occultists are ready to admit all this with the eloquent writer. Molecular vibration is, undeniably, "Keely's legitimate field of research," and the discoveries made by him will prove wonderful -- yet only in his hands and through himself. The world so far will get but that with which it can be safely entrusted. The truth of this assertion has, perhaps, not yet quite dawned upon the discoverer himself, since he writes that he is absolutely certain that he will accomplish all that he has promised, and will then give it out to the world; but it must dawn upon him, and at no very far distant date. And what he says in reference to his work is a good proof of it:--

"In considering the operation of my engine, the visitor, in order to have even an approximate conception of its modus operandi, must discard all thought of engines that are operated upon the principle of pressure and exhaustion, by the expansion of steam or other analogous gas which impinges upon an abutment, such as the piston of a steam-engine. My engine has neither piston nor eccentrics, nor is there one grain of pressure exerted in the engine, whatever may be the size or capacity of it.

"My system, in every part and detail, both in the developing of my power and in every branch of its utilization, is based and founded on sympathetic vibration. In no other way would it be possible to awaken or develop my force, and equally impossible would it be to operate my engine upon any other principle. . . . This, however, is the true system; and henceforth all my operations will be conducted in this manner -- that is to say, my power will be generated, my engines run, my cannon operated, through a wire.

"It has been only after years of incessant labour, and the making of almost innumerable experiments, involving not only the construction of a great many most peculiar mechanical structures, and the closest investigation and study of the phenomenal

properties of the substance 'ether,' per se, produced, that I have been able to dispense with complicated mechanism, and to obtain, as I claim, mastery over the subtle and strange force with which I am dealing."

The passages underlined by us, are those which bear directly on the occult side of the application of the vibratory force, or what Mr. Keely calls "sympathetic vibration." The "wire" is already a step below, or downward from the pure etheric plane into the terrestrial. The discoverer has produced marvels -- the word "miracle" is not too strong -- when acting through the inter-etheric Force alone, the fifth and sixth principles of Akasa. From a "generator" six feet long, he has come down to one "no larger than an old-fashioned silver watch;" and this by itself is a miracle of mechanical (but not spiritual) genius. But, as well expressed by his great patroness and defender, Mrs. Bloomfield-Moore, "the two forms of force which he has been experimenting with, and the phenomena attending them, are the very antithesis of each other." One was generated and acted upon by and

[[Vol. 1, Page]] 562 THE SECRET DOCTRINE.

through himself. No one, who should have repeated the thing done by himself, could have produced the same results. It was "Keely's ether" that acted truly, while "Smith's or Brown's" ether would have remained for ever barren of results. For Keely's difficulty has hitherto been to produce a machine which would develop and regulate the "force" without the intervention of any "will power" or personal influence, whether conscious or unconscious of the operator. In this he has failed, so far as others were concerned, for no one but himself could operate on his "machines." Occultly this was a far more advanced achievement than the "success" which he anticipates from his "wire," but the results obtained from the fifth and sixth planes of the etheric (or Astral) Force, will never be permitted to serve for purposes of commerce and traffic. That Keely's organism is directly connected with the production of the marvellous results is proven by the following statement emanating from one who knows the great discoverer intimately.

At one time the shareholders of the "Keely Motor Co." put a man in his workshop for the express purpose of discovering his secret. After six months of close watching, he said to J. W. Keely one day: "I know how it is done, now." They had been setting up a machine together, and Keely was manipulating the stop-cock which turned the force on and off. "Try it, then," was the answer. The man turned the cock, and nothing came. "Let me see you do it again," the man said to Keely. The latter complied, and the machinery operated at once. Again the other tried, but without success. Then Keely put his hand on his shoulder and told him to try once more. He did so, with the result of an instantaneous production of the current. This fact, if true, settles the question.

We are told that Mr. Keely defines electricity "as a certain form of atomic vibration." In this he is quite right; but this is electricity on the terrestrial plane, and through terrestrial correlations. He estimates --

Molecular vibrations at 100,000,000 per second.
Inter-molecular vibrations at 300,000,000 per second
Atomic vibrations at 900,000,000 per second
Inter-atomic vibrations at 2,700,000,000 per second
AEtheric vibrations at 8,100,000,000 per second
Inter-AEtheric vibrations at 24,300,000,000 per second

This proves our point. There are no vibrations that could be counted or even estimated at an approximate rate beyond "the realm of the fourth son of Fohat," using an occult phraseology, or that motion which corresponds to the formation of Mr. Crookes' radiant matter, or lightly called some years ago the "fourth state of matter" -- on this our plane.

[[Vol. 1, Page]] 563 A PREMATURE DISCOVERY.

If the question is asked why Mr. Keely was not allowed to pass a certain limit, the answer is easy; because that which he has unconsciously discovered, is the terrible sidereal Force, known to, and named by the Atlanteans MASH-MAK, and by the Aryan Rishis in their Ashtar Vidya by a name that we do not like to give. It is the vril of Bulwer Lytton's "Coming Race," and of the coming races of our mankind. The name vril may be a fiction; the Force itself is a fact doubted as little in India as the existence itself of their Rishis, since it is mentioned in all the secret works.

It is this vibratory Force, which, when aimed at an army from an Agni Rath fixed on a flying vessel, a balloon, according to the instructions found in Ashtar Vidya, reduced to ashes 100,000 men and elephants, as easily as it would a dead rat. It is allegorised in the Vishnu Purana, in the Ramayana and other works, in the fable about the sage Kapila whose glance made a mountain of ashes of King Sagara's 60,000 sons, and which is explained in the esoteric works, and referred to as the Kapilaksha -- "Kapila's Eye."

And is it this Satanic Force that our generations were to be allowed to add to their stock of Anarchist's baby-toys, known as melenite, dynamite clock-works, explosive oranges, "flower baskets," and such other innocent names? Is it this destructive agency, which, once in the hands of some modern Attila, e.g., a blood-thirsty anarchist, would reduce Europe in a few days to its primitive chaotic state with no man left alive to tell the tale -- is this force to become the common property of all men alike?

What Mr. Keely has already done is grand and wonderful in the extreme; there is enough work before him in the demonstration of his new system to "humble the pride of those scientists who are materialistic, by revealing those mysteries which lie behind the world of matter," without revealing it nolens volens to all. For surely Psychists and Spiritualists -- of whom there are a good number in the European armies -- would be the first to experience personally the fruits of such mysteries revealed. Thousands of them would find themselves (and perhaps with the populations of whole countries to keep them company) in blue Ether very soon, were such a Force

to be even entirely discovered, let alone made publicly known. The discovery in its completeness is by several thousand -- or shall we say hundred thousand? -- years too premature. It will be at its appointed place and time only when the great roaring flood of starvation, misery, and underpaid labour ebbs back again -- as it will when happily at last the just demands of the many are attended to; when the proletariat exists but in name, and the pitiful cry for bread, that rings throughout the world unheeded, has died away. This may be hastened by the spread of learning,

[[Vol. 1, Page]] 564 THE SECRET DOCTRINE.

and by new openings for work and emigration, with better prospects than exist now, and on some new continent that may appear. Then only will "Keely's Motor and Force," as originally contemplated by himself and friends, be in demand, because it will be more needed by the poor than by the wealthy.

Meanwhile the force discovered by him will work through wires, and this, if he succeeds, will be quite sufficient in the present generation to make of him the greatest discoverer of this age.

What Mr. Keely says of Sound and Colour is also correct from the Occult stand-point. Hear him talk as though he were the nursling of the "Gods-revealers," and had gazed all his life into the depths of Father-Mother AEther.

In comparing the tenuity of the atmosphere with that of the etheric flows, obtained by him from his invention for breaking up the molecules of air by vibration, Keely says that:--

. . . "It is as platina to hydrogen gas. Molecular separation of air brings us to the first sub-division only; inter-molecular, to the second; atomic, to the third; inter-atomic, to the fourth; etheric, to the fifth; and inter-etheric, to the sixth sub-division, or positive association with luminiferous ether.* In my introductory argument I have contended that this is the vibratory envelope of all atoms. In my definition of atom I do not confine myself to the sixth sub-division where this luminiferous ether is developed in its crude form as far as my researches prove.** I think this idea will be pronounced by the physicists of the present day, a wild freak of the imagination. Possibly, in time, a light may fall upon this theory that will bring its simplicity forward for scientific research. At present I can only compare it to some planet in a dark space, where the light of the sun of science has not yet reached it. . ."

"I assume that sound, like odour, is a real substance of unknown and wonderful tenuity, emanating from a body where it has been induced by percussion and throwing out absolute corpuscles of matter, inter-atomic particles, with velocity of 1,120 feet per second; in vacuo 20,000. The substance which is thus disseminated is a part and parcel of the mass agitated, and, if kept under this agitation continuously, would, in the course of a certain cycle of time, become thoroughly absorbed by the atmosphere; or, more truly, would pass through the atmosphere to an elevated point of tenuity corresponding to the condition of sub-division that governs its liberation from its parent body." . . .

"The sounds from vibratory forks, set so as to produce etheric chords, while disseminating their tones (compound), permeate most thoroughly all substances that come under the range of their atomic bombardment. The clapping of a bell in vacuo liberates these atoms with the same velocity and volume as one in the open air; and were the agitation of the bell kept up continuously for a few millions of centuries it would

[[Footnote(s)]] -----

* This also is the division, made by the Occultists, under other names.

** Quite so, since there is the seventh beyond, which begins the same enumeration, from the first to the last, on another and higher plane.

[[Vol. 1, Page]] 565 THE SECRETS OF SOUND AND ODOUR.

thoroughly return to its primitive element; and, if the chamber were hermetically sealed, and strong enough, the vacuous volume surrounding the bell would be brought to a pressure of many thousands of pounds to the square inch, by the tenuous substance evolved. In my estimation, sound truly defined is the disturbance of atomic equilibrium, rupturing actual atomic corpuscles; and the substance thus liberated must certainly be a certain order of etheric flow. Under these conditions, is it unreasonable to suppose that, if this flow were kept up, and the body thus robbed of its element, it would in time disappear entirely? All bodies are formed primitively from this highly tenuous ether, animal, vegetable, and mineral, and they are only returned to their high gaseous condition when brought under a state of differential equilibrium." . . .

"As regards odour, we can only get some definite idea of its extreme and wondrous tenuity by taking into consideration that a large area of atmosphere can be impregnated for a long series of years from a single grain of musk; which, if weighed after that long interval, will be found to be not appreciably diminished. The great paradox attending the flow of odorous particles is that they can be held under confinement in a glass vessel! Here is a substance of much higher tenuity than the glass that holds it, and yet it cannot escape. It is as a sieve with its meshes large enough to pass marbles, and yet holding fine sand which cannot pass through; in fact, a molecular vessel holding an atomic substance. This is a problem that would confound those who stop to recognize it. But infinitely tenuous as odour is, it holds a very crude relation to the substance of sub-division that governs a magnetic flow (a flow of sympathy, if you please to call it so). This sub-division comes next to sound, but is above sound. The action of the flow of a magnet coincides

somewhat to the receiving and distributing portion of the human brain, giving off at all times a depreciating ratio of the amount received. It is a grand illustration of the control of mind over matter, which gradually depreciates the physical till dissolution takes place. The magnet on the same ratio gradually loses its power and becomes inert. If the relations that exist between mind and matter could be equated and so held, we would live on in our physical state eternally, as there would be no physical depreciation. But this physical depreciation leads, at its terminus, to the source of a much higher development -- viz., the liberation of the pure ether from the crude molecular; which, in my estimation, is to be much desired." -- (From Mrs. Bloomfield-Moore's paper, "The New Philosophy.")

It may be remarked that, save a few small divergencies, no Adept nor Alchemist could have explained the above any better, in the light of modern Science, however much the latter may protest against the novel views. This is, in all its fundamental principles, if not details, Occultism pure and simple, yet withal, modern natural philosophy as well.

This "New Force," or whatever Science may call it, the effects of which are undeniable -- admitted by more than one naturalist and physicist who has visited Mr. Keely's laboratory and witnessed personally its tremendous effects -- what is it? Is it a "mode of motion," also, "in Vacuo," since there is no matter to generate it except Sound -- another "mode of motion," no doubt, a sensation caused like

[[Vol. 1, Page]] 566 THE SECRET DOCTRINE.

colour by vibrations? Fully as we believe in these vibrations as the proximate -- the immediate -- cause of such sensations, we as absolutely reject the one-sided scientific theory that there is no factor to be considered as external to us, other than etheric or atmospheric vibrations.*

There is a transcendental set of causes put in motion -- so to speak -- in the occurrence of these phenomena, which, not being in relation to our narrow range of cognition, can only be traced to their source and their nature, and understood by the Spiritual faculties of the Adept. They are, as Asclepios puts it to the King, "incorporeal corporealities" -- such as "appear in the mirror," and "abstract forms" that we see, hear, and smell, in our dreams, and visions. What have the "modes of motion," light, and ether to do with these? Yet we see, hear, and smell, and touch them, ergo they are as much realities to us in our dreams, as any other thing on this plane of Maya.

XI.
ON THE ELEMENTS AND ATOMS.

FROM THE STAND-POINT OF SCIENCE AND THAT OF OCCULTISM.

WHEN the Occultist speaks of "Elements," and of human Beings who lived during those geological ages, the duration of which it is found as impossible to determine, according to the opinion of one of the best

[[Footnote(s)]] -----

* In this case the American "Substantialists" are not wrong (though too anthropomorphic and material in their views to be accepted by the Occultists) when arguing through Mrs. M. S. Organ, M.D., that "there must be positive entitative properties in objects which have a constitutional relation to the nerves of animal sensations, or there can be no perception. No impression of any kind can be made upon brain, nerve, or mind -- no stimulus to action -- unless there is an actual and direct communication of a substantial force." ("Substantial" as far as it appears in the usual sense of the word in this universe of illusion and MAYA, of course; not so in reality.) "That force may be the most refined and sublimated immaterial Entity (?). Yet it must exist; for no sense, element, or faculty of the human being can have a perception, or be stimulated into action, without some substantial force coming in contact with it. This is the fundamental law pervading the whole organic and mental world. In the true philosophical sense there is no such thing as independent action: for every force or substance is correlated to some other force or substance. We can with just as much truth and reason assert that no substance possesses any inherent gustatory property or any olfactory property -- that taste and odour are simply sensations caused by vibrations; and hence mere illusions of animal perceptions. . . ."

[[Vol. 1, Page]] 567 METAPHYSICAL CHEMISTRY.

English geologists*, as the nature of matter, it is because he knows what he is talking about. When he says "Man" and Elements, he neither means "man" in his present physiological and anthropological form, nor the elemental atoms, those hypothetical conceptions, the entitative abstractions of matter in its highly attenuated state, as existing at present in scientific minds; nor, again, the compound Elements of antiquity. In Occultism the word Element means "rudiment" in every case. When we say "Elementary Man," we mean either the proemial, incipient sketch of man, in its unfinished and undeveloped condition, hence in that form which now lies latent in physical man during his life-time, and takes shape only occasionally and under certain conditions; or that form which for a time survives the material body, and which is better known as an "Elementary."** With regard to "Element," when the term is used metaphysically, it means, in distinction to the mortal, the incipient divine man; and, in its physical usage, inchoate matter in its first undifferentiated condition, or in the laya state, which is the eternal and the normal condition of substance, differentiating only periodically, and is during that differentiation in an abnormal state -- in other words, a transitory illusion of the senses.

As to the "elemental atoms," so called, the Occultists refer to them by that name with a meaning analogous to that which is given by the Hindu to Brahma when he calls him ANU, the "Atom." Every elemental atom, in search of which more than one Chemist has followed the path indicated by the Alchemists, is, in their firm belief (when not knowledge), a SOUL; not necessarily a disembodied soul, but a jiva, as the Hindus call it, a centre of POTENTIAL VITALITY, with latent intelligence in it, and, in the case of compound Souls -- an intelligent active EXISTENCE, from the highest to the lowest order, a form composed of more or less differentiations. It requires a metaphysician -- and an Eastern metaphysician -- to understand our meaning. All those atom-Souls are differentiations from the ONE, and in the same relation to it as the divine Soul -- the Buddhi -- to its informing and inseparable Spirit, or Atman.

Modern physics, while borrowing from the ancients their atomic theory, forgot one point, the most important of the doctrine; hence they got only the husks and will never be able to get at the kernel. They left behind, in the adoption of physical atoms, the suggestive fact that

[[Footnote(s)]] -----

* In answer to a friend, that eminent geologist writes: . . . "I can only say, in reply to your letter, that it is at present, and perhaps always will be, IMPOSSIBLE to reduce, even approximately, geological time into years, or even into millenniums." (Signed William Pengelly, F.R.S.)

** Plato speaking of the irrational, turbulent Elements "composed of fire, air, water, and earth," means Elementary Daemons. (See Timaeus.)

[[Vol. 1, Page]] 568 THE SECRET DOCTRINE.

from Anaxagoras down to Epicurus, the Roman Lucretius, and finally even to Galileo, all those Philosophers believed more or less in ANIMATED atoms, not in invisible specks of so-called "brute" matter. Rotatory motion was generated in their views, by larger (read, more divine and pure) atoms forcing downwards other atoms; the lighter ones being thrust simultaneously upward. The esoteric meaning of this is the ever cyclic curve downward and upward of differentiated elements through inter-cyclic phases of existence, until each reaches again its starting point or birthplace. The idea was metaphysical as well as physical; the hidden interpretation embracing "gods" or souls, in the shape of atoms, as the causes of all the effects produced on Earth by the secretions from the divine bodies.* No ancient philosopher, not even the Jewish Kabalists, ever dissociated Spirit from matter or vice versa. Everything originated in the ONE, and, proceeding from the one, must finally return to the One. "Light becomes heat, and consolidates into fiery particles; which, from being ignited, become cold, hard particles, round and smooth. And this is called Soul, imprisoned in its robe of matter;*** Atoms and Souls having been synonymous in the language of the Initiates. The "whirling Souls," Gilgoolah, a doctrine in which so many learned Jews have believed (See Mackenzie's Royal Masonic Cyclopaedia), had no other meaning esoterically. The learned Jewish Initiates never meant by the "Promised land" Palestine alone, but the same Nirvana as the learned Buddhist and Brahmin do -- the bosom of the ETERNAL ONE, symbolized by that of Abraham, and by Palestine as its substitute on Earth.*** The passage of the SOUL-ATOM "through the Seven Planetary Chambers" had the same metaphysical and also physical meaning. It had the latter when it was said to dissolve into Ether (See Isis Unveiled, Vol. I., p. 297.) Even Epicurus, the model Atheist and materialist, knew and believed so much in the ancient Wisdom, that he taught that the

[[Footnote(s)]] -----

* Plato uses the words "secretions" of turbulent Elements (Timaeus).

** Valentinus' Esoteric Treatise on the Doctrine of Gilgul.

*** Surely no educated Jew ever believed the literal sense of this allegory -- namely, that "the bodies of Jews deposited in foreign lands contain within them a principle of Soul which cannot rest, until by a process called the "whirling of the Soul" the immortal particle reaches once more the sacred Soil of the "Promised land." The meaning is evident to an occultist. The process was supposed to be accomplished by a kind of metempsychosis, the psychic spark being conveyed through bird, beast, fish, and the most minute insect. (See Royal Masonic Cyclo. Mackenzie.) The Allegory relates to the atoms of the body, which have each to pass through every form before all reach the final state, which is the first starting point of the departure of every atom -- its primitive Laya State. But the primitive meaning of Gilgoolah, or "Revolution of Souls," was the idea of the re-incarnating Souls or Egos. "All the Souls go into the gilgoolah," into a cyclic or revolving process; i.e., they all proceed on the cyclic path of re-births. Some Kabalists interpret this doctrine to mean only a kind of purgatory for the souls of the wicked. But this is not so.

[[Vol. 1, Page]] 569 PANTHEISM VERSUS MATERIALISM.

Soul (entirely distinct from immortal Spirit when the former is enshrined latent in it, as it is in every atomic speck), was composed of a fine, tender essence, formed from the smoothest, roundest, and finest atoms.

And this shows that the ancient Initiates, who were followed more or less closely by all profane antiquity, meant by the term "ATOM," a Soul, a Genius or Angel, the first-born of the ever-concealed CAUSE of all causes; and in this sense their teachings become comprehensible. They claimed, as do their successors, the existence of Gods and Genii, angels or "demons," not outside, or independent of, the Universal Plenum, but within it. Only this Plenum, during the life-cycles, is infinite. They admitted and taught a good deal of that which modern Science teaches now --namely, the existence of a primordial "World-stuff or Cosmic Substance," from

which worlds are formed, ever and eternally homogeneous, except during its periodic existence, when it differentiates its universal diffusion throughout infinite space; and the gradual formation of sidereal bodies from it. They taught the revolution of the Heavens, the Earth's rotation, the Heliocentric System, and the Atomic Vortices -- Atoms -- in reality Souls and intelligences. But those "Atomists" were spiritual, most transcendental, and philosophical Pantheists. It is not they who would have ever conceived, or dreamt that monstrous contrasted progeny, the nightmare of our modern civilized Race; namely -- inanimate material, self-guiding atoms, on the one hand, and an extra-Cosmic God on the other.

It may be useful to show what, in the teachings of the old Initiates, the Monad was, and what its origin.

Modern exact Science, as soon as it began to grow out of its teens, perceived the great, and, to it, hitherto esoteric axiom, that nothing -- whether in the spiritual, psychic, or physical realm of being -- could come into existence out of nothing. There is no cause in the manifested universe without its adequate effects, whether in space or time; nor can there be an effect without its primal cause, which itself owes its existence to a still higher one -- the final and absolute cause having to remain to man for ever an incomprehensible CAUSELESS CAUSE. But even this is no solution, and must be viewed, if at all, from the highest philosophical and metaphysical standpoints, otherwise the problem had better be left unapproached. It is an abstraction, on the verge of which human reason -- however trained to metaphysical subtleties -- trembles, threatening to collapse. This may be demonstrated to any European who would undertake to solve the problem of existence by the articles of faith of the true Vedantin, for instance. Let him read and study the sublime teachings on the subject of Soul and Spirit, of

[[Vol. 1, Page]] 570 THE SECRET DOCTRINE.

Sankaracharya (Viveka Chudamani)*, and the reader will realize what is now said.

While the Christian is taught that the human soul is a breath of God -- being created by him for sempiternal existence, i.e., having a beginning, but no end (and therefore never to be called eternal) -- the Occult teaching says, "Nothing is created, but is only transformed. Nothing can manifest itself in this universe -- from a globe down to a vague, rapid thought -- that was not in the universe already; everything on the subjective plane is an eternal IS; as everything on the objective plane is an ever becoming -- because transitory."

The monad -- a truly "indivisible thing," as defined by Good, who did not give it the sense we now do -- is here rendered as the Atma in conjunction with Buddhi and the higher Manas. This trinity is one and eternal, the latter being absorbed in the former at the termination of all conditioned and illusive life. The monad, then, can be traced through the course of its pilgrimage and its changes of transitory vehicles only from the incipient stage of the manifested Universe. In Pralaya, or the intermediate period between two manvantaras, it loses its name, as it loses it when the real ONE self of man merges into Brahm in cases of high Samadhi (the Turiya state) or final Nirvana; "when the disciple" in the words of Sankara, "having attained that primeval consciousness, absolute bliss, of which the nature is truth, which is without form and action, abandons this illusive body that has been assumed by the atma just as an actor (abandons) the dress (put on)." For Buddhi (the Anandamaya sheath) is but a mirror which reflects absolute bliss; and, moreover, that reflection itself is yet not free from ignorance, and is not the Supreme Spirit, being subject to conditions, being a spiritual modification of Prakriti, and an effect; Atma alone is the one real and eternal substratum of all -- the essence and absolute knowledge -- the Kshetragna.** It is called in the Esoteric philosophy "the One Witness,"

[[Footnote(s)]] -----

* Translated for the Theosophist, by Mohini M. Chatterji as "Crest Jewel of Wisdom," 1886. (See Theosophist, July and August numbers).

** Now that the revised version of the gospels has been published and the most glaring mistranslations of the old versions are corrected, one will understand better the words in St. John v., vi., and vii.: "It is the Spirit that beareth witness because the Spirit is the truth." The words that follow in the mistranslated version about the "three witnesses," -- hitherto supposed to stand for "the Father, the Word, and the Holy Ghost" -- show the real meaning of the writer (St. John) very clearly, thus still more forcibly identifying his teaching in this respect with that of Sankaracharya. For what can the sentence, "there are three who bear witness: the Spirit and the Water and the Blood" -- mean, if they bear no relation to, or connection with, the more philosophical statement of the great Vedanta teacher, who, speaking of the sheaths (the principles in man) Jiva, Vignanamaya, etc., which are, in their physical manifestation, "water and blood" or life, adds that atma (spirit) alone is what remains after the [[Footnote continued on next page]]

[[Vol. 1, Page]] 571 THE DIAMOND HEART.

and, while it rests in Devachan, is referred to as "the Three Witnesses to Karma."

Atma (our seventh principle) being identical with the universal Spirit, and man being one with it in his essence, what is then the Monad proper? It is that homogeneous spark which radiates in millions of rays from the primeval "Seven;" -- of which seven further on. It is the EMANATING spark from the UNCREATED Ray -- a mystery. In the esoteric, and even exoteric Buddhism of the North, Adi Buddha (Chogi dangpoi sangye), the One unknown, without beginning or end, identical with Parabrahm and Ain-Soph, emits a bright ray from its darkness.

This is the Logos (the first), or Vajradhara, the Supreme Buddha (also called Dorjechang). As the Lord of all Mysteries he cannot manifest, but sends into the world of manifestation his heart -- the "diamond heart," Vajrasattva (Dorjesempa). This is the second logos of creation, from whom emanate the seven (in the exoteric blind the five) Dhyani Buddhas, called the Anupadaka, "the parentless." These Buddhas are the primeval monads from the world of incorporeal being, the Arupa world, wherein the Intelligences (on that plane only) have neither shape nor name, in the exoteric system, but have their distinct seven names in esoteric philosophy. These Dhyani Buddhas emanate, or create from themselves, by virtue of Dhyana, celestial Selves -- the super-human Bodhisattvas. These incarnating at the beginning of every human cycle on earth as mortal men, become occasionally, owing to their personal merit, Bodhisattvas among the Sons of Humanity, after which they may re-appear as Manushi (human) Buddhas. The Anupadaka (or Dhyani-Buddhas) are thus identical with the Brahminical Manasaputra, "mind-born sons" -- whether of Brahma or either of the other two Trimurtian Hypostases, hence identical also with the Rishis and Prajapatis. Thus, a passage is found in Anugita, which, read esoterically, shows plainly, though under another imagery, the same idea and system. It says: "Whatever entities there are in this world, moveable or immoveable, they are the very first to be dissolved (at pralaya); and next the developments produced from the elements (from which the visible Universe is fashioned); and, after these developments (evolved entities), all the elements. Such is the upward gradation among entities. Gods, Men, Gandharvas, Pisachas, Asuras, Rakshasas, all have been created by Svabhava (Prakriti, or plastic nature), not by actions, nor by a cause" -- i.e., not by any physical cause.

"These Brahmanas (the Rishi Prajapati?), the creators of the world, are born here (on earth) again and again. Whatever is produced from

[[Footnote(s)]] -----

[[Footnote continued from previous page]] subtraction of the sheaths and that it is the ONLY witness, or synthesized unity. The less spiritual and philosophical school, solely with an eye to a trinity made three witnesses out of "one," thus connecting it more with earth than with heaven.

[[Vol. 1, Page]] 572 THE SECRET DOCTRINE.

them is dissolved in due time in those very five great elements (the five, or rather seven, Dhyani Buddhas, also called "Elements" of Mankind), like billows in the ocean. These great elements are in every way beyond the elements that make up the world (the gross elements). And he who is released even from these five elements (the tanmatras)* goes to the highest goal." "The Lord Prajapati (Brahma) created all this by the mind only," i.e., by Dhyana, or abstract meditation and mystic powers like the Dhyani Buddhas (vide supra). Evidently then, these "Brahmanas" are identical with the Bodhisattvas (the terrestrial) of the heavenly Dhyani Buddhas. Both, as primordial, intelligent "Elements," become the creators or the emanators of the monads destined to become human in that cycle; after which they evolve themselves, or, so to say, expand into their own selves as Bodhisattvas or Brahmanas, in heaven and earth, to become at last simple men -- "the creators of the world are born here, on earth again and again" -- truly. In the Northern Buddhist system, or the popular exoteric religion, it is taught that every Buddha, while preaching the good law on earth, manifests himself simultaneously in three worlds: in the formless, as Dhyani Buddha, in the World of forms, as a Bodhisattva, and in the world of desire, the lowest (or our world) as a man. Esoterically the teaching differs: The divine, purely Adi-Buddhic monad manifests as the universal Buddhi (the Maha-buddhi or Mahat in Hindu philosophies) the spiritual, omniscient and omnipotent root of divine intelligence, the highest anima mundi or the Logos. This descends "like a flame spreading from the eternal Fire, immoveable, without increase or decrease, ever the same to the end" of the cycle of existence, and becomes universal life on the Mundane Plane. From this Plane of conscious Life shoot out, like seven fiery tongues, the Sons of Light (the logoi of Life); then the Dhyani-Buddhas of contemplation: the concrete forms of their formless Fathers -- the Seven Sons of Light, still themselves, to whom may be applied the Brahminical mystic phrase: "Thou art 'THAT' -- Brahm." It is from these Dhyani-Buddhas that emanate their chhayas (Shadows) the Bodhisattvas of the celestial realms, the prototypes of the super-terrestrial Bodhisattvas, and of the terrestrial Buddhas, and finally of men. The "Seven Sons of Light" are also called "Stars."

The star under which a human Entity is born, says the Occult teaching, will remain for ever its star, throughout the whole cycle of its incarnations in one Manvantara. But this is not his astrological star. The latter is concerned and connected with the personality, the former with

[[Footnote(s)]] -----

* The Tanmatras are literally the type or rudiment of an element devoid of qualities; but esoterically, they are the primeval noumenoi of that which becomes in the progress of evolution a Cosmic element in the sense given to the term in antiquity, not in that of physics. They are the logoi, the seven emanations or rays of the logos.

[[Vol. 1, Page]] 573 THE CREST-JEWEL OF WISDOM.

the INDIVIDUALITY. The "Angel" of that Star, or the Dhyani-Buddha will be either the guiding or simply the presiding "Angel," so to say, in every new rebirth of the monad, which is part of his own essence, though his vehicle, man, may remain for ever ignorant of this fact. The adepts have each their Dhyani-Buddha, their elder "twin Soul," and they know it, calling it "Father-Soul," and "Father-Fire." It is only at the last and supreme initiation, however, that they learn it when placed face to face with the bright "Image." How much has Bulwer Lytton known of this mystic fact when describing, in one of his highest inspirational moods, Zanoni face to face with his Augoeides?

The Logos, or both the unmanifested and the manifested WORD, is called by the Hindus, Iswara, "the Lord," though the Occultists give it another name. Iswara, say the Vedantins, is the highest consciousness in nature. "This highest consciousness," answer the Occultists, "is only a synthetic unit in the world of the manifested Logos -- or on the plane of illusion; for it is the sum total of Dhyani-Chohan consciousnesses." "Oh, wise man, remove the conception that not-Spirit is Spirit," says Sankaracharya. Atma is not-Spirit in its final Parabrahmic state, Iswara or Logos is Spirit; or, as Occultism explains, it is a compound unity of manifested living Spirits, the parent-source and nursery of all the mundane and terrestrial monads, plus their divine reflection, which emanate from, and return into, the Logos, each in the culmination of its time. There are seven chief groups of such Dhyani Chohans, which groups will be found and recognised in every religion, for they are the primeval SEVEN Rays. Humanity, occultism teaches us, is divided into seven distinct groups and their sub-divisions, mental, spiritual, and physical.* The monad, then, viewed as ONE, is above the seventh principle (in Kosmos and man), and as a triad, it is the direct radiant progeny of the said compound UNIT, not the breath (and special creation out of nihil) of "God," as that unit is called; for such an idea is quite unphilosophical, and degrades Deity, dragging it down to a finite, attributive condition. As well expressed by the translator of the "Crest-Jewel of Wisdom" -- though Iswara is "God" "unchanged in the profoundest depths of pralayas and in the intensest activity of the manvantaras" . . . , still "beyond (him) is

[[Footnote(s)]] -----

* Hence the seven chief planets, the spheres of the indwelling seven spirits, under each of which is born one of the human groups which is guided and influenced thereby. There are only seven planets (specially connected with earth), and twelve houses, but the possible combinations of their aspects are countless. As each planet can stand to each of the others in twelve different aspects, their combinations must, therefore, be almost infinite; as infinite, in fact, as the spiritual, psychic, mental, and physical capacities in the numberless varieties of the genus homo, each of which varieties is born under one of the seven planets and one of the said countless planetary combinations. See Theosophist, for August, 1886.

[[Vol. 1, Page]] 574 THE SECRET DOCTRINE.

'ATMA,' round whose pavilion is the darkness of eternal MAYA.** The "triads" born under the same Parent-planet, or rather the radiations of one and the same Planetary Spirit (Dhyani Buddha) are, in all their after lives and rebirths, sister, or "twin-souls," on this Earth.**

This was known to every high Initiate in every age and in every country: "I and my Father are one," said Jesus (John x. 30).*** When He is made to say, elsewhere (xx. 17): "I ascend to my Father and your Father," it meant that which has just been stated. It was simply to show that the group of his disciples and followers attracted to Him belonged to the same Dhyani Buddha, "Star," or "Father," again of the same planetary realm and division as He did. It is the knowledge of this occult doctrine that found expression in the review of "The Idyll of the White Lotus," when Mr. T. Subba Row wrote: "Every Buddha meets at his last initiation all the great adepts who reached Buddhahood during the preceding ages . . . every class of adepts has its own bond of spiritual communion which knits them together. . . . The only possible and effectual way of entering into such brotherhood . . . is by bringing oneself within the influence of the Spiritual light which radiates from one's own Logos. I may further point out here . . . that such communion is only possible between persons whose souls derive their life and sustenance from the same divine RAY, and that, as seven distinct rays radiate from the 'Central Spiritual Sun,' all adepts and Dhyani Chohans are divisible into seven classes, each of which is guided, controlled, and overshadowed by one of the seven forms or manifestations of the divine Wisdom." ("Theosophist," Aug., 1886.)

[[Footnote(s)]] -----

* The now universal error of attributing to the ancients the knowledge of only seven planets, simply because they mentioned no others, is based on the same general ignorance of their occult doctrines. The question is not whether they were, or were not, aware of the existence of the later discovered planets; but whether the reverence paid by them to the four exoteric and three secret great gods - the star-angels, had not some special reason. The writer ventures to say there was such a reason, and it is this. Had they known of as many planets as we do now (and this question can hardly be decided at present, either way), they would have still connected with their religious worship only the seven, because these seven are directly and specially connected with our earth, or, using esoteric phraseology, with our septenary ring of spheres. (See supra.)

** It is the same, only still more metaphysical idea, as that of the Christian Trinity -- "Three in One" -- i.e., the Universal "over-Spirit," manifesting on the two higher planes, those of Buddhi and Mahat; and these are the three hypostases, metaphysical, but never personal.

*** The identity, and at the same time the illusive differentiation of the Angel-Monad and the Human-Monad is shown by the following sentences: "My Father is greater than I" (John xiv. 26); "Glorify your Father who is in Heaven" (Matt. v. 16); "The righteous will shine in the kingdom of their Father" (not our Father) (Matt. xiii. 43) "Know ye not ye are a temple of God, and that the Spirit of God dwelleth in you?" (I Cor. iii. 16); "I ascend to my Father," etc., etc.

[[Vol. 1, Page]] 575 WHAT ARE THE SEVEN PLANETS?

It is then the "Seven Sons of Light" -- called after their planets and (by the rabble) often identified with them -- namely Saturn, Jupiter, Mercury, Mars, Venus, and -- presumably for the modern critic, who goes no deeper than the surface of old religions* -- the Sun and Moon, which are, according to the Occult teachings, our heavenly Parents, or "Father," synthetically. Hence, as already remarked, polytheism is really more philosophical and correct, as to fact and nature, than anthropomorphic monotheism. Saturn,

Jupiter, Mercury, and Venus, the four exoteric planets, and the three others, which must remain unnamed, were the heavenly bodies in direct astral and psychic communication with the Earth, its Guides, and Watchers -- morally and physically; the visible orbs furnishing our Humanity with its outward and inward characteristics, and their "Regents" or Rectors with our Monads and spiritual faculties. In order to avoid creating new misconceptions, let it be stated that among the three secret orbs (or star-angels) neither Uranus nor Neptune entered; not only because they were unknown under these names to the ancient Sages, but because they, as all other planets, however many there may be, are the gods and guardians of other septenary chains of globes within our systems.

Nor do the two last discovered great planets depend entirely on the Sun like the rest of the planets. Otherwise, how explain the fact that Neptune receives 900 times less light than our Earth, and Uranus 390 times less, and that their satellites show a peculiarity of inverse rotation found in no other planets of the Solar System. At any rate, what we say applies to Uranus, though recently the fact begins again to be disputed.

This subject will, of course, be considered mere vagary by all those who confuse the universal order of being with their own systems of classification. Here, however, simple facts from Occult teachings are stated, to be either accepted or rejected, as the case may be. There are details which, on account of their great metaphysical abstractions, cannot be entered upon. Hence, we merely state that only seven of our planets are as intimately related to our globe, as the Sun is to all

[[Footnote(s)]] -----

* These are planets accepted for purposes of judicial astrology only. The astrotheogonical division differed from this one. The Sun, being a central star and no planet, stands in more occult and mysterious relations with its seven planets of our globe than is generally known. The Sun was, therefore, considered the great Father of all the Seven "Fathers," which accounts for the variations found between seven and eight great gods of the Chaldean and other countries. Neither the earth nor the moon -- its satellite -- nor yet stars, for another reason -- were anything else than substitutes for esoteric purposes. Yet, even with the Sun and the Moon thrown out of the calculation, the ancients seem to have known of seven planets. How many more are known to us, so far, if we throw out the Earth and Moon? Seven, and no more: Seven primary or principal planets, the rest planetoids rather than planets.

[[Vol. 1, Page]] 576 THE SECRET DOCTRINE.

the bodies subject to him in his system. Of these bodies the poor little number of primary and secondary planets known to astronomy, looks wretched enough, in truth.* Therefore, it stands to reason that there are a great number of planets, small and large, that have not been discovered yet, but of the existence of which ancient astronomers -- all of them initiated adepts -- must have certainly been aware. But, as their relation to the gods was sacred, it had to remain arcane, as also the names of various other planets and stars.

Besides which, even the Roman Catholic theology speaks of "seventy planets that preside over the destinies of the nations of this globe"; and, save the erroneous application, there is more truth in this tradition than in exact modern astronomy. The seventy planets are connected with the seventy elders of the people of Israel (Numb. 11, 16) because the regents of these planets are meant, not the orbs themselves; and the word seventy is a play and a blind upon the 7 x 7 of the subdivisions. Each people and nation, as said already, has its direct Watcher, Guardian and Father in Heaven -- a Planetary Spirit. We are willing to leave their own national God, Jehovah, to the descendants of Israel, the worshippers of Sabaoth or SATURN; for, indeed, the monads of the people chosen by him are his own, and the Bible has never made a secret of it. Only the text of the English (Protestant) Bible is, in disagreement, as usual, with those of the Septuagint and the Vulgate. Thus, while in the former one reads (in Deuter. xxxii., 8 and 9) "When the MOST HIGH (not Jehovah) divided to the nations their inheritance . . . he set the bounds of the people according to the number of the children of Israel," in the Septuagint the text reads "according to the number of the Angels" (Planet-Angels), which is more concordant with truth and fact. Moreover, all the texts agree that "the Lord's (Jehovah) portion is his people; Jacob is the lot of his inheritance" (Deut. xxxii. 9); and this settles the question. The "Lord" Jehovah took for his portion Israel -- what have other nations to do with that particular national Deity? Let then, the "angel Gabriel" watch over Iran and "Mikael-Jehovah" over the Hebrews. These are not the gods of other nations, and it is difficult to see why Christians

[[Footnote(s)]] -----

* When one remembers that under the powerful telescope of Sir W. Herschell, that eminent astronomer, gauging merely that portion of heaven in the equatorial plane, the approximate centre of which is occupied by our Earth -- saw pass in one quarter of an hour, 16,000 stars; and applying this calculation to the totality of the "Milky Way" he found in it no less than 18 (eighteen) millions of SUNS -- one wonders no longer that Laplace, in conversation with Napoleon I. should have called God a HYPOTHESIS -- perfectly useless to speculate upon for exact physical Science, at any rate. Occult metaphysics and transcendental philosophy will alone be able to lift the smallest corner of the impenetrable veil in this direction.

[[Vol. 1, Page]] 577 CYCLIC FALL OF THE GODS.

should have selected a god against whose commandments Jesus was the first one to rise in rebellion.

The Planetary origin of the Monad (Soul) and of its faculties was taught by the Gnostics. On its way to the Earth, as on its way back from the Earth, each soul born in, and from, the "Boundless Light," had to pass through the seven planetary regions both ways. The pure Dhyani and Devas of the oldest religions had become, in course of time, with the Zoroastrians, the Seven Devs, the ministers of Ahriman, "each chained to his planet" (see Origen's Copy of the Chart); with the Brahmins, the Asuras and some of its Rishis -- good,

bad and indifferent; and among the Egyptian Gnostics it was Thoth or (Hermes) who was the chief of the seven whose names are given by Origen as Adonai, genius of the Sun; Tao, of the Moon; Eloi, of Jupiter; Sabao, of Mars; Orai, of Venus; Astaphai, of Mercury; and Ildabaoth (Jehovah), of Saturn. Finally, the Pistis-Sophia, which the greatest modern authority on exoteric Gnostic beliefs, the late Mr. C. W. King, refers to as "that precious monument of Gnosticism," -- this old document echoes, while distorting it to sectarian purposes, the archaic belief of the ages. The Astral Rulers of the Spheres (the planets) create the monads (the Souls) from their own substance out of the "tears of their eyes, and the sweat of their torments," endowing the monads with a spark of the Divine Light, which is their substance. It will be shown in Book II. why these "Lords of the Zodiac and Spheres" have been transformed by sectarian theology into the rebellious angels of the Christians, who took them from the Seven Devs of the Magi, without understanding the significance of the allegory. (Vide Part II., "On the Seven Souls," and Section xv. in this Part, "GODS, MONADS AND ATOMS").

As usual, that which is and was from its beginning divine, pure, and spiritual in its earliest unity, became, by reason of its differentiation by the distorted prism of man's conceptions, human and impure, as reflecting man's own sinful nature. Thus, in time, the planet Saturn became reviled by the worshippers of other "gods." The nations born under Saturn -- the Jewish, for instance -- with whom he had become Jehovah, after having been held as a son of Saturn, or Ilda-Baoth, by the Ophites, and in the book of Jasher -- were eternally fighting with those born under Jupiter, Mercury, or any other planet, except Saturn-Jehovah; genealogies and prophecies notwithstanding, Jesus the initiate (or Jehoshua) -- the type from whom the "historical" Jesus was

[[Footnote(s)]] -----

* C. W. King, identifies it with "that summum bonum of Oriental aspiration, the Buddhist Nirvana," perfect repose, the Epicurean Indolentia, which looks flippant enough in its expression, though not quite untrue.

[[Vol. 1, Page]] 578 THE SECRET DOCTRINE.

copied -- was not of pure Jewish blood, and thus recognised no Jehovah; nor did he worship any planetary god beside his own "Father," whom he knew, and with whom he communed as every high initiate does, "Spirit to Spirit and Soul to Soul." This can hardly be taken exception to, unless the critic explains to every one's satisfaction the strange sentences put in the mouth of Jesus by the author of the Fourth Gospel (chapter viii.) during his disputes with the Pharisees.

"I know ye are Abraham's seed" . . . I speak the things which I have seen with my Father; and ye do the things which ye heard from your Father. . . . Ye do the works of your Father. . . . Ye are of your Father, the Devil. . . . He was a murderer from the beginning, and stood not in the truth, because there is no truth in him. When one speaketh a lie he speaketh of his own; for his father also is a liar and the father thereof," etc., etc.

That "Father" of the Pharisees was Jehovah, because identical with Cain, Saturn, Vulcan, etc. -- the planet under which they were born, and the God whom they worshipped. Evidently there must be an occult meaning sought in these words and admonitions, however mistranslated, since they are pronounced by one who threatened with hell-fire anyone who says simply raca (fool) to his brother (Matthew v., 22). And evidently, again, the planets are not merely spheres, twinkling in Space, and made to shine for no purpose, but the domains of various beings with whom the profane are so far unacquainted; nevertheless, having a mysterious, unbroken, and powerful connection with men and globes. Every heavenly body is the temple of a god, and these gods themselves are the temples of GOD, the Unknown "Not Spirit." There is nothing profane in the Universe. All Nature is a consecrated place, as Young says:--

"Each of these Stars is a religious house." . . .

Thus can all exoteric religions be shown the falsified copies of the esoteric teaching. It is the priesthood which has to be held responsible for the reaction in favour of materialism of our day. It is by worshiping and enforcing on the masses the worship of the shells -- personified for purposes of allegory -- of pagan ideals, that the latest exoteric religion has made of Western lands a Pandemonium, in which the higher classes worship the golden calf, and the lower and ignorant masses are made to worship an idol with feet of clay.

[[Footnote(s)]] -----

* Abraham and Saturn are identical in astro-symbology, and he is the forefather of the Jehovistic Jews.

[[Vol. 1, Page]] 579 ANTIQUITY OUR GREAT MASTER.

XII. ANCIENT THOUGHT IN MODERN DRESS.

MODERN SCIENCE IS ANCIENT THOUGHT DISTORTED, and no more. We have seen, however, WHAT INTUITIONAL SCIENTISTS THINK, and are busy about; and now the reader may be given a few more proofs of the fact that more than one F.R.S. is unconsciously approaching the derided Secret Sciences.

With regard to cosmogony and primeval matter, modern speculations are undeniably ancient thought, improved by contradictory theories of recent origin. But the whole foundation belongs to Grecian and Indian Archaic astronomy and physics, in those days

always called philosophy. In all the Aryan and Greek speculations, one meets with the conception of an all-pervading, unorganized, and homogeneous matter, or Chaos, re-named by modern scientists "Nebular condition of the world-stuff." What Anaxagoras called "Chaos" in his Homoiomeria is now called "primitive fluid" by Sir W. Thomson. The Hindu and Greek Atomists -- Kanada, Leucippus, Democritus, Epicurus, Lucretius, etc., etc., are now reflected as in a clear mirror, in the supporters of the atomic theory of our modern days, beginning with Leibnitz's Monads, and ending with the "Vortical Atoms" of Sir W. Thomson. * True, the corpuscular theory of old is rejected, and the undulatory theory has taken its place. But the question is, whether the latter is so firmly established as not to be liable to be dethroned as was its predecessor? Light from its metaphysical aspect was fully treated of in "Isis Unveiled":--

"Light is the first begotten, and the first emanation of the Supreme, and Light is Life, says the Evangelist and the Kabbalist. Both are electricity -- the life principle, the anima mundi, pervading the universe, the electric vivifier of all things. Light is the great Protean magician, and under the divine will of the architect,** or rather the architects, the "Builders" (called One collectively), its multifarious, omnipotent waves gave birth to every form as well as to every living being. From its swelling electric bosom, spring matter and spirit. Within its beams lie the beginnings of all physical and chemical action, and of all cosmic and spiritual phenomena; it vitalizes and disorganizes; it gives life and produces death, and from its primordial point gradually emerged into existence the myriads of worlds, visible and invisible celestial bodies. It was at the ray of this First mother, one in three, that "God," according to

[[Footnote(s)]] -----

* The Elemental Vortices inaugurated by the Mind have not been improved by their modern transformation.

** I have been often taken to task for using expressions in Isis denoting belief in a personal and anthropomorphic God. This is not my idea. Kabbalistically speaking, the "Architect" is the generic name for the Sephiroth, the Builders of the Universe, as the "Universal Mind" represents the collectivity of the Dhyan Chohanics Minds.

[[Vol. 1, Page]] 580 THE SECRET DOCTRINE.

Plato, lighted a fire which we now call the sun,** and which is not the cause of either light or heat, but merely the focus, or, as we might say, the lens, by which the rays of the primordial light become materialised, are concentrate upon our Solar System, and produce all the correlations of forces."

This is the Ether, as just explained in the views of Metcalfe, repeated by Dr. Richardson, save the submission of the former to some details of the modern undulatory theory. We do not say that we deny the theory, but assert only that it needs completion and re-arrangement. But the Occultists are by no means the only heretics in this respect; for Mr. Robert Hunt, F.R.S., remarks, in his Researches on Light in its Chemical Relations, that:--

. . . . "the undulatory theory does not account for the results of his experiments. Sir David Brewster, in his Treatise on Optics, showing 'that the colours of vegetable life arise from a specific attraction which the particles of these bodies exercise over the differently-coloured rays of light,' and that 'it is by the light of the sun that the coloured juices of plants are elaborated, that the colours of bodies are changed, etc.' remarks that it is not easy to allow 'that such effects can be produced by the mere vibration of an ethereal medium.' And he is forced, he says, 'by this class of facts, to reason as if light was material (?).' Professor Josiah P. Cooke, of Harvard University, says that he 'cannot agree with those who regard the wave-theory of light as an established principle of science.'** Herschell's doctrine, that the intensity of light, in effect of each undulation, 'is inversely as the square of the distance from the luminous body,' if correct, damages a good deal, if it does not kill the undulatory theory. That he is right, was proved repeatedly by experiments with photometers; and though it begins to be much doubted, the undulatory theory is still alive." ("Isis Unveiled.")

To this remark of Sir W. Brewster -- "forced to reason as if light was material" -- there is a good deal to reply. Light, in one sense, is certainly as material as electricity itself is. And if electricity is not material, if it is only "a mode of motion," how is it that it can be stored up in Faure's accumulators? Helmholtz says that electricity must be as atomic as matter; and Mr. W. Crookes, F.R.S., supported the view in his address to the Chemical Section of the British Association, of which he was President (at Birmingham, 1886). This is what Helmholtz says (in his Faraday Lectures, 1881):--

"If we accept the hypothesis that the elementary substances are composed of atoms, we cannot avoid concluding that electricity also, positive as well as negative, is divided into definite elementary portions, which behave like atoms of electricity."

Here we have to repeat that which was already said in Section IX: there is but one science that can henceforth direct modern research into the one path which will lead to the discovery of the whole, hitherto

[[Footnote(s)]] -----

* "Timaeus."

** Modern Chemistry.

[[Vol. 1, Page]] 581 A CHASE AFTER THE PRIMAL MATTER.

occult, truth, and it is the youngest of all -- chemistry, as it now stands reformed. There is no other, not excluding astronomy, that can so unerringly guide scientific intuition, as chemistry can. Two proofs of it are to be found in the world of Science -- two great chemists, each among the greatest in his own country, and these are Mr. Crookes and the late Professor Butlerof: one, a thorough believer in abnormal phenomena; the other, as fervid a Spiritualist as he was great in natural Sciences. It becomes evident that while pondering over the ultimate divisibility of matter, and in the hitherto fruitless chase after the element of negative atomic weight, the scientifically trained mind of the chemist must feel irresistibly drawn towards those ever-shrouded worlds, to the mysterious beyond, whose measureless depths seem to close against the approach of the too materialistic hand that would fain draw aside its veil. "It is the unknown and the ever unknowable," warns the Monist-Agnostic. Not so; answers the persevering chemist:-- "We are on the track and are not daunted, and fain would we enter the mysterious region which ignorance tickets unknown."*

A few lines at the very close of his lecture on the Genesis of the Elements -- two or three sentences -- showed the eminent Scientist to be on the royal road to the greatest discoveries. He has been overshadowing for some time "the original protyle," and came to the conclusion that "he who grasps the Key will be permitted to unlock some of the deepest mysteries of creation." The protyle, as that great chemist explains:--

". . . is a word analogous to protoplasm, to express the idea of the original primal matter existing before the evolution of the chemical elements. The word I have ventured to use for this purpose is compounded of [[pro]] (earlier than) and [[hyle]] (the stuff of which things are made). The word is scarcely a new coinage, for 600 years ago Roger Bacon wrote in his Arte Chymiae, "The elements are made out of [[hyle]] and every element is converted into the nature of another element."

The Knowledge of Roger Bacon did not come to this wonderful old magician** by inspiration, but because he studied ancient works on

[[Footnote(s)]] -----

* Mr. Crookes' "Presidential Address" at Birmingham. "There is but one unknown -- the ultimate substratum of Spirit (Space). That which is not the Absolute and the One is, in virtue of that very differentiation, however far removed from the physical senses, always accessible to the spiritual human mind, which is a coruscation of the undifferentiable Integral." -- (Practical Lessons on the Occult.)

** Thus, what the writer of the present work said ten years ago in "Isis Unveiled" (Vol. I.) was prophetic, it seems. These are the words: "Many of these mystics, by following what they were taught by some treatises, secretly preserved from one generation to another, achieved discoveries which would not be despised even in our modern days of exact sciences. Roger Bacon, the friar, was laughed at as a quack, and is now generally numbered among 'pretenders' to magic art; but his discoveries were nevertheless accepted, and are now used by those who ridicule him the most. Roger Bacon belonged by right, if not by fact, to that Brotherhood which includes all those who [[Footnote continued on next page]]

[[Vol. 1, Page]] 582 THE SECRET DOCTRINE.

magic and alchemy, having a key to the real meaning of words. But see what Mr. Crookes says of protyle, next neighbour to the unconscious Mulaprakriti of the Occultists:--

. . . . "Let us start at the moment when the first element came into existence. Before this time, matter, as we know it, was not. It is equally impossible to conceive of matter without energy, as of energy without matter; from one point of view both are convertible terms. Before the birth of atoms, all those forms of energy, which become evident when matter acts upon matter, could not have existed* -- they were locked up in the protyle as latent potentialities only. Coincident with the creation of atoms, all those attributes and properties, which form the means of discriminating one chemical element from another, start into existence fully endowed with energy." (Presidential Address, p. 16.)

With every respect due to the great knowledge of the lecturer, the Occultist would put it otherwise. They would say that no atom is ever "created," for the atoms are eternal within the bosom of the One Atom, -- "the atom of atoms" -- viewed during Manvantara as the Jagad-Yoni the material causative womb of the world. Pradhana (unmodified matter), that which is the first form of Prakriti, or material visible, as well as invisible nature, and Purusha, spirit, are eternally one; and they are Nirupadhi, (without adventitious qualities or attributes) only during Pralaya, and when beyond any of the planes of consciousness of existence. The atom, as known to modern science, is inseparable from Purusha, which is spirit, but is now called "Energy" in Science. The protyle atom has not been comminuted or subtilized: it has simply passed into that plane, which is no plane, but the eternal state of everything beyond the planes of illusion. Both Purusha and Pradhana are immutable and unconsumable, or Aparinamin and Avyaya, in eternity; and both during the Mayavic periods may be referred to as Vyaya and Parinamin, or that which can expand, pass away and disappear, and is "modifiable." In this sense Purusha, must of course, be held distinct in our conceptions from Parabrahmam. Nevertheless that, which is called "energy" or "force" in Science and has been explained as a dual Force by Metcalfe, is never, in fact, and cannot be energy alone; for it is the substance of the world, its soul, the all-permeant "Sarvaga," in conjunction with Kala "time." The three are the trinity in one, during Manvantara, the all-potential Unity, which acts on the plane of illusion (Maya) as three distinct things. In Orphic

[[Footnote(s)]] -----

[[Footnote continued from previous page]] study the occult sciences. Living in the thirteenth century, almost a contemporary, therefore, of Albertus Magnus and Thomas Aquinas, his discoveries -- such as gunpowder and optical glasses, and his mechanical achievements -- were considered by everyone as so many miracles. He was accused of having made a compact with the Evil One."

* Just so; "those forms of energy . . . which become evident . . ." in the laboratory of the chemist and physicist; but there are other forms of energy wedded to other forms of matter, -- which are supersensuous, yet known to the adepts.

[[Vol. 1, Page]] 583 ALL-POTENTIAL UNITY.

philosophy in Greece they were called Phanes, Chaos, and Chronos -- the triad of the Occult philosophers of that period.

But see how closely Mr. Crookes brushes by the "Unknowable," and what "potentialities" there are for the acceptance of Occult truths in his discoveries. He continues, speaking of the evolution of atoms:--

". . . Let us pause at the end of the first complete vibration and examine the result. We have already found the elements of water, ammonia, carbonic acid, the atmosphere, plant and animal life, phosphorus for the brain, salt for the seas, clay for the solid earth . . . phosphates and silicates sufficient for a world and inhabitants not so very different from what we enjoy at the present day. True the human inhabitants would have to live in a state of more than Arcadian simplicity, and the absence of calcic phosphate would be awkward as far as the bone is concerned" . . . At the lower end of our curve . . . we see a great hiatus . . . This oasis, and the blanks which precede and follow it, may be referred with much probability to the particular way in which our Earth developed into a member of our solar system. If this be so, it may be that on our Earth only these blanks occur, and not generally throughout the universe."

This justifies several assertions in the Occult works.

Firstly, "that neither stars nor the sun can be said to be constituted of those terrestrial elements with which the chemist is familiar, though they are all present in the sun's outward robes -- and a host more of elements so far unknown to science."

Secondly, that our globe has its own special laboratory on the far-away outskirts of its atmosphere, crossing which, every atom and molecule change and differentiate from their primordial nature.

And Thirdly, that though no element present on our earth could ever be possibly found wanting in the sun, there are many others which have either not reached, or not as yet been discovered on, our globe. "Some may be missing in certain stars and heavenly bodies in the process of formation; or, though present in them, these elements, on account of their present state, may not respond as yet to the usual scientific tests."** Mr. Crookes speaks of an element of still lower atomic weight than hydrogen, an element purely hypothetical as far as our earth is concerned . . . though existing in abundance in the chromosphere of the Sun -- the helium. Occult Science adds that not one of the elements regarded by chemistry as such really deserves the name.

Again we find Mr. Crookes speaking with approbation of "Dr. Carnelly's weighty argument in favour of the compound nature of the so-called elements, from their analogy to the compound radicles!" Hitherto,

[[Footnote(s)]] -----

* It is just the existence of such worlds in other planes of consciousness that is claimed by the Occultist. The secret science teaches that the primitive race was boneless. (See Book II.); and that there are (to us) invisible worlds, peopled as our own, besides the populations of Dhyana Chohans.

** "Five Years of Theosophy," p. 258 et seq.

[[Vol. 1, Page]] 584 THE SECRET DOCTRINE.

alchemy alone succeeded within the historical periods, and in the so-called civilized countries, in obtaining a real element, or a particle of homogeneous matter, the Mysterium Magnum of Paracelsus. But then it was before Lord Bacon's day.*

". . . Let us now turn to the upper portion of the scheme. With hydrogen of atomic weight = 1, there is little room for other elements, save, perhaps, for hypothetical Helium. But what if we get 'through the looking-glass,' and cross the zero line in search of new principles -- what shall we find on the other side of zero? Dr. Carnelly asks for an element of negative atomic weight; here is ample room and verge enough for a shadow series of such unsubstantialities. Helmholtz says that electricity is probably as atomic as matter; is electricity one of the negative elements, and the luminiferous ether another? Matter, as we now know it, does not here exist; the forms of energy which are apparent in the motions of matter are as yet only latent possibilities. A substance of negative weight is not inconceivable.** But can we form a clear conception of a body which combines with other bodies in proportions expressible by negative qualities?****

"A genesis of the elements such as is here sketched out would not be confined to our little solar system, but would probably follow the same general sequence of events in every centre of energy now visible as a star."

"Before the birth of atoms to gravitate towards one another, no pressure could be exercised; but at the outskirts of the fire-mist sphere, within which all is protyle -- at the shell on which the tremendous forces involved in the birth of a chemical element exert full sway -- the fierce heat would be accompanied by gravitation sufficient to keep the newly-born elements from flying off into space. As temperature increases, expansion and molecular motion increase, molecules tend to fly asunder, and their chemical affinities

become deadened; but the enormous pressure of the gravitation of the mass of atomic matter, outside what I may for brevity call the birth-shell, would counteract the action of heat."

"Beyond the birth-shell would be a space in which no chemical action could take place, owing to the temperature there being above what is called the dissociation-point for compounds. In this space the lion and the lamb would lie down together; phosphorus and oxygen would mix without union; hydrogen and chlorine would show no tendency to closer bonds; and even fluorine, that

[[Footnote(s)]] -----

* Says Mr. Crookes in the same address: "The first riddle which we encounter in chemistry is: 'What are the elements?' Of the attempts hitherto made to define or explain an element, none satisfy the demands of the human intellect. The text books tell us that an element is 'a body which has not been decomposed' that it is 'a something to which we can add, but from which we can take nothing,' or 'a body which increases in weight with every chemical change.' Such definitions are doubly unsatisfactory: they are provisional, and may cease to-morrow to be applicable in any given case. They take their stand, not on any attribute of the things to be defined, but on the limitations of human power: they are confessions of intellectual impotence."

** And the lecturer quotes Sir George Airy, who says (in Faraday's Life and Letters Vol. II., p. 354), "I can easily conceive that there are plenty of bodies about us not subject to this intermutual action, and therefore not subject to the law of gravitation."

*** The Vedantic philosophy conceives of such; but then it is not physics, but metaphysics, called by Mr. Tyndall "poetry" and "fiction."

[[Vol. 1, Page]] 585 THE "SEVENTH" IN CHEMISTRY.

energetic gas which chemists have only isolated within the last month or two, would float about free and uncombined."

"Outside this space of free atomic matter would be another shell, in which the formed chemical elements would have cooled down to the combination point, and the sequence of events so graphically described by Mr. Mattieu Williams in "The Fuel of the Sun" would now take place, culminating in the solid earth and the commencement of geological time" (p. 19).

This is, in a strictly scientific, but beautiful language, the description of the evolution of the differentiated Universe in the secret teachings. The learned gentleman closes his address in words, every sentence of which is like a flash of light from beyond the dark veil of materiality, hitherto thrown upon the exact sciences, and a step forward towards the Sanctum Sanctorum of the Occult. (Vide § XV., "Gods, Monads, and Atoms.") Thus he says:--

"We have glanced at the difficulty of defining an element; we have noticed, too, the revolt of many leading physicists and chemists against the ordinary acceptation of the term element; we have weighed the improbability of their eternal existence,* or their origination by chance. As a remaining alternative, we have suggested their origin by a process of evolution like that of the heavenly bodies according to Laplace, and the plants and animals of our globe according to Lamarck, Darwin, and Wallace.** In the general array of the elements, as known to us, we have seen a striking approximation to that of the organic world.*** In lack of direct evidence of the decomposition of any element, we have sought and found indirect evidence . . . We have next glanced at the view of the genesis of the elements; and lastly we have reviewed a scheme of their origin suggested by Professor Reynold's method of illustrating the periodic classification**** . . . Summing up all the above considerations we cannot,

[[Footnote(s)]] -----

* In the form they are now, we conceive?

** And to Kapila and Manu -- especially and originally.

*** Here is a scientific corroboration of the eternal law of correspondences and analogy.

**** This method of illustrating the periodic law in the classification of elements is, in the words of Mr. Crookes, proposed by Professor Emerson Reynolds, of Dublin University, who . . . "points out that in each period, the general properties of the elements vary from one to another, with approximate regularity until we reach the seventh member, which is in more or less striking contrast with the first element of the same period, as well as with the first of the next. Thus chlorine, the seventh member of Mendeleef's third period, contrasts sharply with both sodium, the first member of the same series, and with potassium, the first member of the next series; whilst on the other hand, sodium and potassium are closely analogous. The six elements, whose atomic weights intervene between sodium and potassium, vary in properties, step by step, until chlorine, the contrast to sodium, is reached. But from chlorine to potassium, the analogue of sodium, there is a change in properties per saltum. . . . If we thus recognise a contrast in properties -- more or less decided -- between the first and the last members of each series, we can scarcely help admitting the existence of a point of mean variation within each system. In general the fourth element of each series possesses the property we might expect a transition-element to exhibit. . . . Thus for the purpose of graphic translation, Professor Reynolds considers that the fourth member of a period -- silicon, for example -- may be placed at the apex of a symmetrical [[Footnote continued on next page]]

[[Vol. 1, Page]] 586 THE SECRET DOCTRINE.

indeed, venture to assert positively that our so-called elements have been evolved from one primordial matter; but we may contend that the balance of evidence, I think, fairly weighs in favour of this speculation."

Thus inductive Science, in its Branches of Astronomy, Physics, and Chemistry, while advancing timidly towards the conquest of Nature's secrets in her final effects on our terrestrial plane, recedes to the days of Anaxagoras and the Chaldees in its discoveries of (a) the origin of our phenomenal world, and (b) the modes of formation of the bodies that compose the universe. And having to turn back for their cosmogonical hypotheses to the beliefs of the earliest philosophers, and the systems of the latter -- systems that were all based on the teachings of a universal secret doctrine with regard to the primeval matter with its properties, functions, and laws, -- have we not the right to hope that the day is not far off when Science will show a better appreciation of the wisdom of the ancients than it has hitherto done?

No doubt Occult philosophy could learn a good deal from exact modern science; but the latter, on the other hand, might profit by ancient learning in more than one way, and chiefly in Cosmogony. For

[[Footnote(s)]] -----

[[Footnote continued from previous page]] curve, which shall represent for that particular period, the direction in which the properties of the series of elements vary with rising atomic weights.

Now, the writer humbly confesses complete ignorance of modern chemistry and its mysteries. But she is pretty well acquainted with the Occult doctrine with regard to correspondences of types and antitypes in nature, and perfect analogy as a fundamental law in Occultism. Hence she ventures a remark which will strike every Occultist, however it may be derided by orthodox Science. This method of illustrating the periodic law in the behaviour of elements, whether or not still a hypothesis in chemistry, is a law in Occult Sciences. Every well-read Occultist knows that the seventh and fourth members -- whether in a septenary chain of worlds, the septenary hierarchy of angels, or in the constitution of man, animal, plant, or mineral atom -- that the seventh and fourth members, we say, in the geometrically and mathematically uniform workings of the immutable laws of Nature, always play a distinct and specific part in the septenary system. From the stars twinkling high in heaven, to the sparks flying asunder from the rude fire built by the savage in his forest; from the hierarchies and the essential constitution of the Dhyan Chohans -- organized for diviner apprehensions and a loftier range of perception than the greatest Western psychologist ever dreamed of, down to Nature's classification of species among the humblest insects; finally from worlds to atoms, everything in the universe, from great to small, proceeds in its spiritual and physical evolution, cyclically and septennially, showing its seventh and fourth number (the latter the turning point) behaving in the same way as shown in that periodic law of atoms. Nature never proceeds per saltum. Therefore, when Mr. Crookes remarks to this that he does not "wish to infer that the gaps in Mendeleef's table, and in this graphic representation of it (the diagram showing the evolution of atoms) necessarily mean that there are elements actually existing to fill up the gaps; these gaps may only mean that at the birth of the elements there was an easy potentiality of the formation of an element which would fit into the place" -- an Occultist would respectfully remark to him that the latter hypothesis can only hold good, if the septenary arrangement of atoms is not interfered with. This is the one law, and an infallible method that must always lead to success, one who follows it.

[[Vol. 1, Page]] 587 PURANAS VERSUS ROYAL SOCIETY.

instance, the mystical signification, alchemical and transcendental, of the many imponderable substances that fill interplanetary space, and which, interpenetrating each, are the direct cause, at the lower end, of the production of natural phenomena manifesting through vibration (so-called). The knowledge of the real (not the hypothetical) nature of Ether, or rather of the Akasa, and other mysteries, in short, can alone lead to the knowledge of Forces. It is that substance against which the materialistic school of the physicists rebels with such fury, especially in France,* and which exact Science has to advocate notwithstanding. They cannot make away with it without incurring the risk, like a modern Samson, of pulling down the pillars of the Temple of Science, and getting buried under its roof.

The theories built upon the rejection of Force outside and independent of Matter pure and simple, have been all shown fallacious. They do not, and cannot, cover the ground, and many of the scientific data are thus proved unscientific. "Ether produced Sound" is said in the Puranas, and the statement is laughed at. It is the vibrations in the air, we are corrected. And what is air? Could it exist if there were no etheric medium in Space to buoy up its molecules? The case stands simply thus. Materialism cannot admit the existence of anything outside matter, because with the acceptance of an imponderable Force -- the source and head of all the physical Forces -- other intelligent Forces would have to be admitted virtually, and that would lead Science very far. For it would have to accept as a sequel the presence in Man of a still more spiritual power -- entirely independent, for once, of any kind of matter physicists know anything about. Hence, apart from an hypothetical ether of Space and gross physical bodies, the whole Sidereal and unseen Space is, in the sight of the materialists, one boundless void in nature -- blind, unintelligent, useless.

And now the next question is: What is that Cosmic Substance, and how far can one go to suspect its nature or to wrench from it its secrets, and thus feel justified in giving it a NAME? How far, especially, has modern Science gone in the direction of those secrets, and what it is doing to solve them. The latest hobby of Science, the "Nebular Theory," may afford us some answer to this question. Let us then examine the credentials of the NEBULAR THEORY.

[[Footnote(s)]] -----

* A group of electricians has just protested against the new theory of Clausius, the famous professor of the University of Bonn. The character of the protest is shown in the signature, which has "Jules Bourdin, in the name of the group of Electricians, which had the

honour of being introduced to Professor Clausius in 1881, and whose war-cry (cri de ralliement) is A bas l'Ether" -- down with ether, even; they want Universal Void, you see!

[[Vol. 1, Page]] 588 THE SECRET DOCTRINE.

XIII.

SCIENTIFIC AND ESOTERIC EVIDENCE FOR, AND OBJECTIONS TO, THE MODERN NEBULAR THEORY.

OF late Esoteric Cosmogony has been frequently opposed by the phantom of this theory and its ensuing hypotheses. "Can this most scientific teaching be denied by your adepts?" it is asked. "Not entirely," is the reply, "but the admissions of the men of Science themselves kill it; and there remains nothing for the adepts to deny."

To make of Science an integral whole necessitates, indeed, the study of spiritual and psychic, as well as physical Nature. Otherwise it will ever be like the anatomy of man, discussed of old by the profane from the point of view of his shell-side and in ignorance of the interior work. Even Plato, the greatest philosopher of his country, became guilty, before his initiation, of such statements as that liquids pass into the stomach through the lungs. Without metaphysics, as Mr. H. J. Slack says, real science is inadmissible.

The nebulae exist; yet the nebular theory is wrong. A nebula exists in a state of entire elemental dissociation. It is gaseous and -- something else besides, which can hardly be connected with gases, as known to physical science; and it is self-luminous. But that is all. The sixty-two "coincidences" enumerated by Professor Stephen Alexander,* confirming the nebular theory, may all be explained by esoteric science; though, as this is not an astronomical work, the refutations are not attempted at present. Laplace and Faye come nearer to the correct theory than any; but of the speculations of Laplace there remains little in the present theory except its general features. Nevertheless, "there is in Laplace's theory," says John Stuart Mill, "nothing hypothetical; it is an example of legitimate reasoning from present effect to its past cause; it assumes nothing more than that objects which really exist, obey the laws which are known to be obeyed by all terrestrial objects resembling them." (System of Logic, p. 229).

This from such an eminent logician as Mill was, would be valuable, if it could only be proved that "terrestrial objects resembling . . ." celestial objects at such a distance as the nebulae are -- resemble those objects in reality, not alone in appearance.

Another of the fallacies from the Occult stand-point, which are embodied in the modern theory as it now stands, is the hypothesis that the planets were all detached from the Sun; that they are bone of

[[Footnote(s)]] -----

* "Smithsonian Contributions," xxi., Art. 1, pp. 79-97.

[[Vol. 1, Page]] 589 "SO FAR SHALT THOU GO"

his bone, and flesh of his flesh; whereas, the Sun and planets are only co-uterine brothers, having had the same nebular origin, only in a different mode from that postulated by modern astronomy.

The many objections raised against the homogeneity of original diffuse matter, on the ground of the uniformity in the composition of the fixed stars, by some opponents of the modern nebular theory, do not affect the question of that homogeneity at all, but only the said theory. Our solar nebula may not be completely homogeneous, or, rather, it may fail to reveal itself as such to the astronomers, and yet be de facto homogeneous. The stars do differ in their constituent materials and even exhibit elements quite unknown on earth; nevertheless, this does not affect the point that primeval matter -- i.e., as it appeared even in its first differentiation from its laya condition* -- is yet to this day homogeneous, at immense distances, in the depths of infinitude, and likewise at points not far removed from the outskirts of our solar system.

Finally, there does not exist one single fact brought forward by the learned objectors against the "nebular theory," (false as it is, and hence, illogically enough, fatal to the hypothesis of the homogeneity of matter,) that can withstand criticism. One error leads into another. A false premise will naturally lead to a false conclusion, although an inadmissible inference does not necessarily affect the validity of the major proposition of the syllogism. Thus, one may leave every side-issue and inference from the evidence of spectra, and lines, as simply provisional for the present, and abandon all matters of detail to physical science. The duty of the Occultist lies with the Soul and Spirit of Cosmic Space, not merely with its illusive appearance and behaviour. That of official physical science is to analyze and study its shell -- the Ultima Thule of the Universe and man, in the opinion of Materialism.

With the latter, Occultism has nought to do. It is only with the theories of such men of learning as Kepler, Kant, Oersted, and Sir W. Herschell, who believed in a Spiritual world, that Occult Cosmogony might treat, and attempt a satisfactory compromise. But the views of those physicists differed vastly from the latest modern speculations. Kant and Herschell had in their mind's eye speculations upon the origin and the final destiny, as well as the present aspect, of the Universe, from a far more philosophical and psychic standpoint; whereas modern Cosmology and Astronomy now repudiate anything like research into the mysteries of being. The result is what might be expected: complete failure and inextricable contradictions in the thousand and one varieties of so-called scientific theories, and in this theory as in all others.

The nebular hypothesis, involving the theory of the existence of a

[[Footnote(s)]] -----

* Beyond the zero-line of action.

[[Vol. 1, Page]] 590 THE SECRET DOCTRINE.

primeval matter, diffused in a nebulous condition, is of no modern date in astronomy as everyone knows. Anaximenes, of the Ionian school, had already taught that the sidereal bodies were formed through the progressive condensation of a primordial pregenetic matter, which had almost a negative weight, and was spread out through Space in an extremely sublimated condition.

Tycho Brahe, who viewed the Milky Way as an ethereal substance, thought the new star that appeared in Cassiopoeia, in 1572, had been formed out of that matter. ("Progymnasmata" p. 795.) Kepler believed the star of 1606 had been likewise formed out of the ethereal substance that fills the universe ("De stella nova in pede Serpentarii," p. 115). He attributed to that same ether the apparition of a luminous ring around the moon, during the total eclipse of the sun observed at Naples in 1605. ("Hypotheses Cosmogoniques," C. Wolf.) Still later, in 1714, -- the existence of a self-luminous matter was recognised by Halley ("Philosophical Transactions"). Finally, the journal of this name published in 1811 the famous hypothesis on the transformation of the nebulae into stars, by the eminent astronomer, Sir W. Herschell (See "Philosophical Transactions," of 1811, p. 269, et seq.), after which the nebular theory was accepted by the Royal Academies.

In "Five years of Theosophy," on p. 245, an article headed "Do the Adepts deny the Nebular Theory?" may be read. The answer there given is "No; they do not deny its general propositions, nor the approximative truth of the scientific hypotheses. They only deny the completeness of the present, as well as the entire error of the many so-called "exploded" old theories, which, during the last century, have followed each other in such rapid succession."

This was proclaimed at the time "an evasive answer." Such disrespect to official science, it was argued, must be justified by the presentation, to replace the orthodox speculation, of another theory more complete than theirs, and having a firmer ground to stand upon. To this there is but one reply; it is useless to give out isolated theories with regard to things embodied in a whole and consecutive system, which, when separated from the main body of the teaching, would necessarily lose their vital coherence and thus do no good when studied independently. To be able to appreciate and accept the occult views on the nebular theory, one has to study the whole esoteric cosmogonical system. And the time has hardly arrived for the astronomers to be asked to accept Fohat and the divine Builders. Even the undeniably correct surmises of Sir W. Herschell, that had nothing "supernatural" in them, about the sun being called "globe of fire" (perhaps) metaphorically, and his early speculations about the nature of that which is now called the Nasmyth willow-leaf theory -- caused that most eminent of all astro-

[[Vol. 1, Page]] 591 FORCES ARE EMANATIONS.

nomers to be smiled at by other, far less eminent colleagues, who saw and now see in his ideas only "imaginative and fanciful theories." Before the whole esoteric system could be given out and appreciated by the astronomers, they would have to return to some of those "antiquated ideas," not only to those of Herschell, but to the dreams of the oldest Hindu astronomers, and to abandon their own theories, none the less "fanciful" because they have appeared in one case nearly 80 years and in the other many thousands of years later. Foremost of all they would have to repudiate the ideas on the Sun's solidity and incandescence; the sun "glowing" most undeniably, but not "burning." Then it is stated, with regard to Sir W. Herschell's view that those "objects," as he called the "willow leaves," are the immediate sources of the solar light and heat. And though the esoteric teaching does not regard these as he did -- namely, organisms as partaking of the nature of life," for the Solar "Beings" will hardly place themselves within telescopic focus -- yet it asserts that the whole Universe is full of such "organisms," conscious and active according to the proximity or distance of their planes to, or from, our plane of consciousness; and that finally the great astronomer was right in saying that "we do not know that vital action is competent to develop at once heat, light, and electricity" while speculating on those supposed "organisms." For, at the risk of being laughed at by the whole world of physicists, the Occultists maintain that all the "Forces" of the Scientists have their origin in the Vital Principle, the ONE LIFE collectively of our Solar system -- that "life" being a portion, or rather one of the aspects of the One Universal LIFE.

We may, therefore, as in the article under consideration, wherein, on the authority of the Adepts, it was maintained that it is "sufficient to make a resume of what the solar physicists do not know," -- we may, we maintain, define our position with regard to the modern nebular theory and its evident incorrectness, by simply pointing out facts diametrically opposed to it in its present form. And to begin with, what does it teach?

Summarizing the aforesaid hypotheses, it becomes plain that Laplace's theory -- now made quite unrecognisable, moreover -- was an unfortunate one. He postulates in the first place Cosmic matter, existing in a state of diffuse nebulosity "so fine that its presence could hardly have been suspected." No attempt is made by him to penetrate into the arcana of being, except as regards the immediate evolution of our small solar system.

Consequently, whether one accepts or rejects his theory in its bearing upon the immediate cosmological problems presented for solution, he can only be said to have thrown back the mystery a little further. To the eternal query -- "Whence matter itself; whence the evolutionary impetus

determining its cyclic aggregations and dissolutions; whence the exquisite symmetry and order into which the primeval atoms arrange and group themselves?" -- no answer is attempted by Laplace. All we are confronted with, is a sketch of the probable broad principles on which the actual process is assumed to be based. Well, and what is this now celebrated note on the said process? What has he given so wonderfully new and original, that its ground-work, at any rate, should have served as a basis for the modern nebular theory? This is what one gathers from various astronomical works.

Laplace thought that, consequent on the condensation of the atoms of the primeval nebula, according to the "Law" of gravity, the now gaseous, or perhaps, partially liquid mass, acquired a rotatory motion. As the velocity of this rotation increased, it assumed the form of a thin disc; finally, the centrifugal force overpowering that of cohesion, huge rings were detached from the edge of the whirling incandescent masses, contracting necessarily by gravitation (as accepted) into spheroidal bodies, which would necessarily still continue to preserve the same orbit occupied previously by the outer zone from which they were separated. ("Laplace conceived that the external and internal zones of the ring would rotate with the same angular velocity, which would be the case with a solid ring; but the principle of equal areas requires the inner zones to rotate more rapidly than the outer.")* The velocity of the outer edge of each nascent planet, he said, exceeding that of the inner, there results a rotation on its axis. The more dense bodies would be thrown off last; and finally, during the preliminary state of their formation, the newly-segregated orbs in their turn throw off one or more satellites . . . In formulating the history of the rupture and planetation of rings, Laplace says:

"Almost always each ring of vapours must have broken up into numerous masses, which, moving with a nearly uniform velocity, must have continued to circulate at the same distance around the Sun. These masses must have taken a spheroidal form with a motion of rotation in the same direction as their revolution, since the inner molecules (those nearer to the Sun) would have less actual velocity than the exterior ones. They must then have formed as many planets in a state of vapour. But, if one of them was sufficiently powerful to unite successively, by its attraction, all the others around its centre, the ring of vapours must have been thus transformed into a single spheroidal mass of vapours circulating around the Sun with a rotation in the same direction as its revolution. The latter case has been the more common, but the solar system presents us the first case, in the four small planets which move between Jupiter and Mars."

While few will be found to deny "the magnificent audacity of this

[[Footnote(s)]] -----

* "World-Life." Prof. Winchell points to a good many mistakes of Laplace in his work; but as a geologist he is not infallible himself in his "astronomical speculations."

hypothesis," it is impossible not to recognise the insurmountable difficulties with which it is attended. Why, for instance, do we find that the satellites of Neptune and Uranus display a retrograde motion; that, in spite of its closer proximity to the Sun, Venus is less dense than the Earth? Similarly, the more distant Uranus is more dense than Saturn? How is it that so many variations in the inclination of their axes and orbits are present in the supposed progeny of the central orb; that such startling variations in the size of the planets is noticeable; that the Satellites of Jupiter are more dense by .288 than their primary -- that the phenomena of meteoric and cometic systems still remain unaccounted for? To quote the words of a Master: "They (the Occultists) find that the centrifugal theory of Western birth is unable to cover all the ground. That, unaided, it can neither account for every oblate spheroid, nor explain away such evident difficulties as are presented by the relative density of some planets. How, indeed, can any calculation of centrifugal force explain to us, for instance, why Mercury, whose rotation is, we are told, only about one-third that of the Earth, and its density only about one-fourth greater than the Earth, should have a polar compression more than ten times as great as the latter? And again, why Jupiter, whose equatorial rotation is said to be 'twenty-seven times greater, and its density only about one-fifth that of the earth' should have its polar compression seventeen times greater than that of the earth? Or why Saturn, with an equatorial velocity fifty-five times greater than Mercury for centripetal force to contend with, should have its polar compression only three times greater than Mercury's? To crown the above contradictions, we are asked to believe in the Central Forces, as taught by Modern Science, even when told that the equatorial matter of the Sun, with more than four times the centrifugal velocity of the Earth's equatorial surface, and only about one-fourth part of the gravitation of the equatorial matter, has not manifested any tendency to bulge at the Solar equator, nor shown the least flattening of the poles of the Solar axis. In other and clearer words, the Sun, with only one fourth of our Earth's density for the centrifugal force to work upon, has no polar compression at all! We find this objection made by more than one astronomer, yet never explained away satisfactorily so far as the 'Adepts' are aware."

"Therefore, do they (the Adepts) say, that the great men of science of the West, knowing . . . next to nothing either about cometary matter, centrifugal and centripetal forces, the nature of the nebulae, or the physical constitution of the Sun, the Stars, or even the Moon, are imprudent to speak as confidently as they do about the 'central mass of the Sun' whirling out into space planets, comets, and what not . . ." "We maintain that it (the Sun) evolves out only the life-principle, the

Soul of those bodies, giving and receiving it back, in our solar system, as the 'Universal Life-Giver' . . . in infinitude and Eternity; that the solar system is as much the microcosm of the ONE Macrocosm as man is the former when compared with his own little Solar Cosmos.**

The essential faculty possessed by all the cosmic and terrestrial elements, of generating within themselves a regular and harmonious series of results, a concatenation of causes and effects, is an irrefutable proof that they are either animated by an extra or intra INTELLIGENCE, or conceal such within or behind the manifested veil. Occultism does not deny the certainty of the mechanical origin of the Universe; it only claims the absolute necessity of mechanicians of some sort behind those Elements (or within) -- a dogma with us. It is not the fortuitous assistance of the atoms of Lucretius, who himself knew better, that built the Kosmos and all in it. Nature herself contradicts such a theory. Celestial space, containing matter so attenuated as is Ether, cannot be called on, with or without attraction, to explain the common motion of the sidereal hosts. Although the perfect accord of their mutual revolution indicates clearly the presence of a mechanical cause in Nature, Newton, who of all men had best right to trust to his deductions and views, was nevertheless forced to abandon the idea of ever explaining, by the laws of known Nature and its Material forces, the original impulse given to the millions of orbs. He recognised fully the limits that separate the action of natural Forces from that of the INTELLIGENCES that set the immutable laws into order and action. And if a NEWTON had to renounce such hope, which of the modern materialistic pigmies has the right of saying: "I know better"?

To become complete and comprehensible, a cosmogonical theory has to start with a primordial Substance diffused throughout boundless Space, of an intellectual and divine Nature. That substance must be the Soul and Spirit, the Synthesis and Seventh Principle of the manifested Kosmos, and, to serve as a spiritual Upadhi to this, there must be the sixth, its vehicle -- primordial physical matter, so to speak, though its nature must escape for ever our limited normal senses. It is easy for an astronomer, if endowed with an imaginative faculty, to build a theory of the emergence of the universe out of chaos, by simply applying to it the principles of mechanics. But such a universe will always prove, with respect to its scientific human creator, a Frankenstein's monster; it will lead him into endless perplexities. The application of the mechanical laws only can never carry the speculator beyond the objective world; nor will it unveil to men the origin and final destiny of Kosmos. This is

[[Footnote(s)]] -----

* "Five Years of Theosophy," pp. 249-50. Art. "Do the Adepts deny the Nebular Theory?"

[[Vol. 1, Page]] 595 WHAT ARE THE NEBULAE?

whither the nebular theory has led Science. In sober fact and truth this theory is twin sister to that of Ether, and both are the offsprings of necessity; one as indispensable to account for the transmission of light, as the other to explain the problem of the origin of the solar systems. The question with them is, how the same homogeneous matter* could, obeying the laws of Newton, give birth to bodies -- sun, planets, and their satellites -- subject to conditions of identity of motion and formed of such heterogeneous elements.

Has the nebular theory helped to solve the problem, even if applied solely to bodies considered as inanimate and material? We say most decidedly not. What progress has it made since 1811, when Sir W. Herschell's paper, first presenting facts based on observation and showing the existence of nebular matter, made the "Sons" of the Royal Society "shout for joy"? Since then a still greater discovery has permitted, through spectrum analysis, the verification and corroboration of Sir W. Herschell's conjecture. Laplace demanded some kind of primitive "world stuff " to prove the idea of progressive world-evolution and growth. Here it is, as offered two millenniums ago.

The "world stuff," now nebulae, was known from the highest antiquity. Anaxagoras taught that, having differentiated, the subsequent commixture of heterogeneous substances remained motionless and unorganized, until finally "the Mind" -- the collective body of Dhyān Chohans, we say -- began to work upon and communicated to it motion and order (Aristotle's "Physica," viii, 1.) The theory is now taken up in its first portion, that of any "Mind" interfering with it being rejected. Spectrum analysis reveals the existence of nebulae formed entirely of gases and luminous vapours. Is this the primitive nebular matter? The spectra reveal, it is said, the physical conditions of the matter which emits cosmic light. The spectra of the resolvable and the irresolvable nebulae are shown to be entirely different, the spectra of the latter showing their physical state to be that of glowing gas or vapour. The bright lines of one nebula reveal the existence of hydrogen in it, and of other material substances known and unknown. The same in the atmospheres of the Sun and stars. This leads to the direct inference that a star is formed by the condensation of a nebula; hence that even the metals themselves on earth are

[[Footnote(s)]] -----

* Had astronomers held simply, in their present state of knowledge, to the hypothesis of Laplace, which was simply the formation of the planetary system, it might in time have resulted in something like an approximate truth. But the two parts of the general problem, that of the formation of the universe, or the formation of the suns and stars from the primitive matter, and then the development of the planets around their sun, rest on quite different facts in nature and are even so viewed by Science itself. They are at the opposite poles of being.

[[Vol. 1, Page]] 596 THE SECRET DOCTRINE.

formed owing to the condensation of hydrogen or some other primitive matter, some ancestral cousin to "helium," perhaps, or some yet unknown stuff? This does not clash with the occult teachings. And this is the problem that chemistry is trying to solve; and it must succeed sooner or later in the task, accepting nolens volens, when it does, the esoteric teaching. But when this does happen, it will kill the nebular theory as it now stands.

Meanwhile Astronomy cannot accept in any way, if it is to be regarded as an exact science, the present theory of the filiation of stars -- even if occultism does so in its own way, as it explains this filiation differently -- because astronomy has not one single physical datum to show for it. Astronomy could anticipate Chemistry in proving the existence of the fact, if it could show a planetary nebula exhibiting a spectrum of three or four bright lines, gradually condensing and transforming into a star, with a spectrum all covered with a number of dark lines. But "the question of the variability of the nebula, even as to their form, is yet one of the mysteries of Astronomy. The data of observation possessed so far are of too recent an origin, too uncertain to permit us to affirm anything." (Cosmogonical Hypotheses of Wolf.)

Since the discovery of the spectroscope, its magic power has revealed to its adepts only one single transformation of a star of this kind; and even that one showed directly the reverse of what is needed as proof in favour of the nebular theory; namely -- a star transforming itself into a planetary nebula. As told in *The Observatory* (Vol. I., p. 185), the temporary star which appeared in the constellation Cygnus, in November, 1876, discovered by J. F. J. Schmidt, exhibited a spectrum broken by very brilliant lines. Gradually, the continuous spectrum and most of the lines disappeared, leaving finally one single brilliant line, which appeared to coincide with the green line of the nebula.

Though this metamorphosis is not irreconcilable with the hypothesis of the nebular origin of the stars, nevertheless this single solitary case rests on no observation whatever, least of all on direct observation. The occurrence may have been due to several other causes. Since astronomers are inclined to think our planets are tending toward precipitation on the Sun, why should not that star have blazed out owing to a collision of such precipitated planets, or, as many suggest, the appulse of a comet? Anyhow, the only known instance of a star transformation since 1811 is not favourable to the nebular theory. Moreover, on the question of this theory, as in all others, astronomers disagree.

In our own age, it was Buffon, before Laplace ever thought of it, who, very much struck by the identity of motion in the planets, was the first to propose the hypothesis of the planets and their satellites originating in

[[Vol. 1, Page]] 597 THE META-ELEMENTS OF PHYSICAL SCIENCE.

the bosom of the Sun. Forthwith, and for the purpose, he invented a special comet, supposed to have torn out, by a powerful oblique blow, the quantity of matter necessary to their formation. Laplace gave its dues to the "comet" in his "Exposition du Systeme du Monde." (Note VII.) But the idea was seized and even improved upon by a conception of the alternate evolution from the Sun's central mass of planets apparently without weight or influence on the motion of the visible planets -- and as evidently without any more existence than the likeness of Moses in the moon.

But the modern theory is also a variation on the systems elaborated by Kant and Laplace. The idea of both was that, at the origin of things, all that matter which now enters into the composition of the planetary bodies was spread over all the space comprised in the solar system -- and even beyond. It was a nebula of extremely small density, whose condensation gradually gave birth, by a mechanism that has hitherto never been explained, to the various bodies of our systems. This is the original nebular theory, an incomplete yet faithful repetition -- a short chapter out of the large volume of universal esoteric cosmogony -- of the teachings in the Secret Doctrine. And both systems, Kant's and Laplace's, differ greatly from the modern theory, redundant with conflicting sub-theories and fanciful hypotheses.

"The essence of cometary matter and of that which composes the stars is totally different from any of the chemical or physical characteristics with which Western Science is now acquainted. While the spectroscope has shown the probable similarity (owing to the chemical action of terrestrial light upon the intercepted rays) of earthly and sidereal substance, the chemical actions, peculiar to the variously progressed orbs of space, have not been detected, nor proven to be identical with those observed on our own planet" -- say the Teachers (op. cit.). Mr. Crookes says almost the same in the fragment quoted from his lecture, "Elements and Meta-Elements."

"At the utmost," observes C. Wolf, * "could the nebular hypothesis show in its favour, with W. Herschell, the existence of planetary nebulae in various degrees of condensation, and of spiral nebulae, with nuclei of condensation on the branches and centre.** But, in fact, the knowledge of the bond that unites the nebulae to the stars is yet denied to us; and lacking as we do direct observation, we are even debarred from establishing it even on the analogy of chemical composition."

It is evident that, even if the men of science, leaving aside the

[[Footnote(s)]] -----

* Member of the Institute, Astronomer of the Observatory, Paris, "Cosmogonical Hypotheses."

** But the spectra of these nebulae have never yet been ascertained. When they are found with bright lines, then only may they be cited.

difficulty arising for them out of such undeniable variety and heterogeneity of matter in the constitution of nebulae, did admit, with the ancients, that the origin of all the visible and invisible heavenly bodies must be sought for in one primordial homogeneous world-stuff, in a kind of PRE-protyle,* -- it is evident that this would not put an end to their perplexities. Unless they admit also that our actual visible Universe is merely the Sthula-Sharira, the gross body, of the sevenfold Kosmos, they will have to face another problem; especially if they risk maintaining that its now visible bodies are the result of the condensation of that one and single primordial matter. For mere observation shows them that the actions which produced the actual Universe are far more complex than could ever be embraced in that theory.

First of all, there are two distinct classes of irresolvable nebulae, -- as Science itself teaches.

The telescope is unable to distinguish between the two, but the spectroscope can, and notices, therefore, an essential difference between their physical constitutions.**

"Some of these," Wolf tells us, "have a spectrum of three or four bright lines, others a continuous spectrum. The first are gaseous, the others formed of a pulverulent matter. The former must constitute a veritable atmosphere: it is among these that the solar nebula of Laplace has to be placed. The latter form an ensemble of particles that may be considered as independent, and the rotation of which obeys the laws of

[[Footnote(s)]] -----

* Mr. Crookes' "Protyle" must not be regarded as the primary stuff, out of which the Dhyān Chohans, in accordance with the immutable laws of nature, wove our solar system. This protyle cannot even be the first prima-materia of Kant, which that great mind saw used up in the formation of the worlds, and thus existing no longer in a diffused state. It is a MEDIATE phase in the progressive differentiation of cosmic substance from its normal undifferentiated state. Protyle is then the aspect assumed by matter in its middle passage into full objectivity.

** "The question of the resolvability of the nebulae has been often presented in too affirmative a manner and quite contrary to the ideas expressed by the illustrious experimenter with the spectra of these constellations -- Mr. Huggins. Every nebula whose spectrum contains only bright lines is gaseous, it is said, and hence is irresolvable; every nebula with a continuous spectrum must end by resolving into stars with an instrument of sufficient power. This assumption is contrary at once to the results obtained, and to spectroscopic theory. The Lyra nebula, the Dumb-bell nebula, the central region of the nebula of Orion, appear resolvable, and show a spectrum of bright lines; the nebula of Canis Venatici is not resolvable, and gives a continuous spectrum. Because, indeed, the spectroscope informs us of the physical state of the constituent matter of the stars, but affords us no notions of their modes of aggregation. A nebula formed of gaseous globes (or even of nuclei, faintly luminous, surrounded by a powerful atmosphere) would give a spectrum of lines and be still resolvable; such seems to be the state of Huggins' region in the Orion nebula. A nebula formed of solid or fluidic particles in a state of incandescence, a true cloud, will give a continuous spectrum but will be irresolvable." (C. Wolf, Cosmogonical Hypotheses.)

internal weight: such are the nebulae adopted by Kant and Faye. Observation allows us to place the one as the other at the very origin of the planetary world. But when we try to go beyond and ascend to the primitive chaos which has produced the totality of the heavenly bodies, we have first to account for the actual existence of these two classes of nebulae. If the primitive chaos were a cold luminous gas,* one could understand how the contraction resulting from attraction could have heated it and made it luminous. We have to explain the condensation of this gas to the state of incandescent particles, the presence of which is revealed to us in certain nebulae by the spectroscope. If the original chaos was composed of such particles, how did certain of their portions pass into the gaseous state, while others have preserved their primitive condition?"

Such is the synopsis of the objections and difficulties to the acceptance of the nebular theory brought forward by the French savant, who concludes his interesting chapter by declaring that:--

"The first part of the Cosmogonical problem, -- what is the primitive matter of chaos; and how did that matter give birth to the sun and stars? -- thus remains to this day in THE DOMAIN OF ROMANCE AND OF MERE IMAGINATION."**

If this is the last word of Science upon that subject, whither then should one turn in order to learn what the nebular theory is supposed to teach? What, in fact, is this theory? What it is, no one seems to know for a certainty. What it is not -- we learn from the erudite author of the "World-Life." He tells us that:--

(I.) It "is not a theory of the evolution of the Universe . . . but only and primarily a genetic explanation of the phenomena of the solar system, and accessorially a co-ordination of the principal phenomena in the stellar and nebular firmament, as far as human vision has been able to penetrate."

(II.) "That it does not regard the Comets as involved in that particular evolution which has produced the solar system." (Esoteric doctrine does.)

(It does, because it, too, recognises the comets as forms of cosmic existence co-ordinated with earlier stages of nebular evolution; and it actually assigns to them chiefly the formation of all worlds.)

(III.) "That it does not deny an antecedent history of the luminous fire mist" -- (the secondary stage of evolution in the Secret Doctrine) "and makes no claim to having reached an absolute beginning." And even

[[Footnote(s)]] -----

* See Stanza III. about "Light, or the cold Flame," and Commentary Number 8, where it is explained that the "mother" (Chaos) is a cold Fire, a cool Radiance, colourless, formless, devoid of every quality. "Motion is the One Eternal is, and contains the potentialities of every quality in the Manvantaric Worlds," it is said.

** Hypotheses Cosmogoniques, C. Wolf, 1886.

[[Vol. 1, Page]] 600 THE SECRET DOCTRINE.

it allows that this "fire mist may have previously existed in a cold, nonluminous and invisible condition"

(IV.) "And that finally: it does not profess to discover the ORIGIN of things, but only a stadium in material history" leaving "the philosopher and theologian as free as they ever were to seek for the origin of the modes of being."*

But this is not all. Even the greatest philosopher of England -- Mr. Herbert Spencer -- arrayed himself against the fantastic theory by saying that (a) "The problem of existence is not resolved" by it; (b) the nebular hypothesis "throws no light upon the origin of diffused matter," and (c) that "the nebular hypothesis (as it now stands) implies a First Cause."**

The latter, we are afraid, is more than our modern physicists have bargained for. Thus, it seems that the poor "hypothesis" can hardly expect to find help or corroboration even in the world of the metaphysicians.

Considering all this, the Occultists believe they have a right to present their philosophy, however misunderstood and ostracised it may be at present. And they maintain that this failure of the scientists to discover the truth is entirely due to their materialism and contempt for transcendental sciences. Yet although the scientific minds in our century are as far from the true and correct doctrine of Evolution as ever, there may be still some hope left for the future, as we find another great scientist giving us a faint glimmer of it.

In an article in Popular Science Review (Vol. XIV., p. 252) on "Recent Researches in Minute Life," we find Mr. H. J. Slack, F.C.S., Sec. R.M.S., saying: "There is an evident convergence of all sciences, from physics to chemistry and physiology, toward some doctrine of evolution and development, of which the facts of Darwinism will form part, but what ultimate aspect this doctrine will take, there is little, if any, evidence to show, and perhaps it will not be shaped by the human mind until metaphysical as well as physical inquiries are much more advanced."

This is a happy forecast indeed. The day may come, then, when the "Natural Selection," as taught by Mr. Darwin and Mr. Herbert Spencer, will form only a part, in its ultimate modification, of our Eastern doctrine of Evolution, which will be Manu and Kapila esoterically explained.

[[Vol. 1, Page]] 601 HERMES AND KANT.

XIV. FORCES -- MODES OF MOTION OR INTELLIGENCES?

THIS is, then, the last word of physical science up to the present year, 1888. Mechanical laws will never be able to prove the homogeneity of primeval matter, except inferentially and as a desperate necessity, when there will remain no other issue -- as in the case of Ether. Modern Science is secure only in its own domain and region; within the physical boundaries of our solar system, beyond which everything, every particle of matter, is different from the matter it knows: which matter exists in states of which Science can form no idea. That matter, which is truly homogeneous, is beyond human perceptions, if perception is tied down merely to the five senses. We feel its effects through those INTELLIGENCES which are the results of its primeval differentiation, whom we name Dhyān-Chohans; called in the Hermetic works the "Seven Governors," those to whom Pymander, the "Thought Divine," refers as the Building Powers, and whom Asklepios calls the "Supernal Gods." That matter -- the real primordial substance, the noumenon of all the "matter" we know of, -- even some of the astronomers have been led to believe in, and to despair of the possibility of ever accounting for rotation, gravitation, and the origin of any mechanical physical laws -- unless these Intelligences be admitted by Science. In the abovequoted work upon astronomy, by Wolf,* the author endorses fully the theory of Kant, and the latter, if not in its general aspect, at any rate in some of its features, reminds one strongly of certain esoteric teachings. Here we have the world's system

reborn from its ashes, through a nebula; the emanation from the bodies, dead and dissolved in Space -- resultant of the incandescence of the solar centre reanimated by the combustible matter of the planets. In this theory, generated and developed in the brain of a young man hardly twenty-five years of age, who had never left his native place, a small town of Northern Prussia (Königsberg) one can hardly fail to recognise either an inspiring external power, or the reincarnation which the Occultists see in it. It fills a gap which Newton, with all his genius, failed to bridge. And surely it is our primeval matter, Akasa, that Kant had in view, when proposing to solve Newton's difficulty and his failure to explain, by the natural forces, the primitive impulse imparted to the planets, by the postulation of a universally pervading primordial substance. For, as he remarks in chapter viii., if it is once admitted that the perfect harmony of the stars and planets and

[[Footnote(s)]] -----

* "LES HYPOTHESES COSMOGONIQUES. Examen des Theories Scientifiques modernes sur l'Origine des Mondes, suivi de la Traduction de la Theorie du Ciel de Kant."

[[Vol. 1, Page]] 602 THE SECRET DOCTRINE.

the coincidence of their orbital planes prove the existence of a natural cause, which would thus be the primal cause, "that cause cannot really be the matter which fills to-day the heavenly spaces." It must be that which filled space -- was space -- originally, whose motion in differentiated matter was the origin of the actual movements of the sidereal bodies; and which, "in condensing itself in those very bodies, thus abandoned the space that is found void to-day." In other words, it is that same matter of which are now composed the planets, comets, and the Sun himself, which, having in the origin formed itself into those bodies, has preserved its inherent quality of motion; which quality, now centred in their nuclei, directs all motion. A very slight alteration of words is needed, and a few additions, to make of this our Esoteric Doctrine.

The latter teaches that it is this original, primordial prima materia, divine and intelligent, the direct emanation of the Universal Mind - the Daiviprakriti (the divine light emanating from the Logos*) -- which formed the nuclei of all the "self-moving" orbs in Kosmos. It is the informing, ever-present moving-power and life-principle, the vital soul of the suns, moons, planets, and even of our Earth. The former latent: the last one active -- the invisible Ruler and guide of the gross body attached to, and connected with, its Soul, which is the spiritual emanation, after all, of these respective planetary Spirits.

Another quite occult doctrine is the theory of Kant, that the matter of which the inhabitants and the animals of other planets are formed is of a lighter and more subtle nature and of a more perfect conformation in proportion to their distance from the Sun. The latter is too full of Vital Electricity, of the physical, life-giving principle. Therefore, the men on Mars are more ethereal than we are, while those of Venus are more gross, though far more intelligent, if less spiritual.

The last doctrine is not quite ours -- yet those Kantian theories are as metaphysical, and as transcendental as any occult doctrines; and more than one man of Science would, if he but dared speak his mind, accept them as Wolf does. From this Kantian mind and soul of the Suns and Stars to the MAHAT (mind) and Prakriti of the Puranas, there is but a step. After all, the admission of this by Science would be only the admission of a natural cause, whether it would or would not stretch its belief to such metaphysical heights. But then Mahat, the MIND, is a "God," and physiology admits "mind" only as a temporary function of the material brain, and no more.

The Satan of Materialism now laughs at all alike, and denies the visible as well as the invisible. Seeing in light, heat, electricity, and even in the phenomenon of life, only properties inherent in matter, it

[[Footnote(s)]] -----

* Which "Light" we call Fohat.

[[Vol. 1, Page]] 603 THE VITAL PRINCIPLE.

laughs whenever life is called VITAL PRINCIPLE, and derides the idea of its being independent of and distinct from the organism.

But here again scientific opinions differ as in everything else, and there are several men of science who accept views very similar to ours. Consider, for instance, what Dr. Richardson, F.R.S. (elsewhere quoted at length) says of that "Vital principle," which he calls "nervous ether" ("Popular Science Review," Vol. 10):--

"I speak only of a veritable material agent, refined, it may be, to the world at large, but actual and substantial: an agent having quality of weight and of volume, an agent susceptible of chemical combination, and thereby of change of physical state and condition, an agent passive in its action, moved always, that is to say, by influences apart from itself,* obeying other influences, an agent possessing no initiative power, no vis or energia naturae,** but still playing a most important, if not a primary part in the production of the phenomena resulting from the action of the energiea upon visible matter" (p. 379).

As Biology and Physiology now deny, in toto, the existence of a "vital principle," this extract, together with de Quatrefages' admission, is a clear confirmation that there are men of science who take the same views about "things occult" as theosophists and occultists do. These recognise a distinct vital principle independent of the organism -- material, of course, as physical force cannot be divorced from matter, but of a substance existing in a state unknown to Science. Life for them is something more than the mere interaction of

molecules and atoms. There is a vital principle without which no molecular combinations could ever have resulted in a living organism, least of all in the so-called "inorganic" matter of our plane of consciousness.

By "molecular combinations" is meant, of course, those of the matter of our present illusive perceptions, which matter energises only on this, our plane. And this is the chief point at issue.***

[[Footnote(s)]] -----

* This is a mistake, which implies a material agent, distinct from the influences which move it, i.e. blind matter and perhaps "God" again, whereas this ONE Life is the very God and Gods "Itself."

** The same error.

*** "Is the Jiva a myth, as science says, or is it not?" ask some Theosophists, wavering between materialistic and idealistic Science. The difficulty of really grasping esoteric problems concerning the "ultimate state of matter" is again the old crux of the objective and the subjective. What is matter? Is the matter of our present objective consciousness anything but our SENSATIONS? True, the sensations we receive come from without, but can we really (except in terms of phenomena) speak of the "gross matter" of this plane as an entity apart from and independent of us? To all such arguments Occultism answers: True, in reality matter is not independent of, or existent outside, our perceptions. Man is an illusion: granted. But the existence and actuality of other, still more illusive, but not less actual, entities than we are, is not a claim which is lessened, but rather strengthened by this doctrine of Vedantic and even Kantian Idealism.

[[Vol. 1, Page]] 604 THE SECRET DOCTRINE.

Thus the Occultists are not alone in their beliefs. Nor are they so foolish, after all, in rejecting even the "gravity" of modern Science along with other physical laws, and in accepting instead attraction and repulsion. They see, moreover, in these two opposite Forces only the two aspects of the universal unit, called "MANIFESTING MIND"; in which aspects, Occultism, through its great Seers, perceives an innumerable Host of operative Beings: Cosmic Dhyan-Chohans, Entities, whose essence, in its dual nature, is the Cause of all terrestrial phenomena. For that essence is co-substantial with the universal Electric Ocean, which is LIFE; and being dual, as said -- positive and negative -- it is the emanations of that duality that act now on earth under the name of "modes of motion"; even Force having now become objectionable as a word, for fear it should lead someone, even in thought, to separate it from matter! It is, as Occultism says, the dual effects of that dual essence, which have now been called centripetal and centrifugal forces, negative and positive poles, or polarity, heat and cold, light and darkness, etc., etc.

And it is maintained that even the Greek and Roman Catholic Christians, are wiser in believing, as they do -- even if blindly connecting and tracing them all to an anthropomorphic god -- in Angels, Archangels, Archons, Seraphs, and Morning Stars: in all those theological Deliciae humani generis, in short, that rule the cosmic elements, than Science is, in disbelieving in them altogether, and advocating its mechanical Forces. For these act very often with more than human intelligence and pertinency. Nevertheless, that intelligence is denied and attributed to blind chance. But, as De Maistre was right in calling the law of gravitation merely a word which replaced "the thing unknown" (Soirees), so are we right in applying the same remark to all the other Forces of Science. And if it is objected that the Count was an ardent Roman Catholic, then we may cite Le Couturier, as ardent a materialist, who said the same thing, as also did Herschell and many others. (Vide Musee des Sciences, August, 1856.)

From Gods to men, from Worlds to atoms, from a star to a rush-light, from the Sun to the vital heat of the meanest organic being -- the world of Form and Existence is an immense chain, whose links are all connected. The law of Analogy is the first key to the world-problem, and these links have to be studied coordinately in their occult relations to each other.

When, therefore, the Secret Doctrine -- postulating that conditioned or limited space (location) has no real being except in this world of illusion, or, in other words, in our perceptive faculties -- teaches that every one of the higher, as of the lower worlds, is interblended with our own objective world; that millions of things and beings are, in point of

[[Vol. 1, Page]] 605 OCCULT AND PHYSICAL SCIENCES.

localization, around and in us, as we are around, with, and in them; it is no metaphysical figure of speech, but a sober fact in Nature, however incomprehensible to our senses.

But one has to understand the phraseology of Occultism before criticising what it asserts. For example, the Doctrine refuses (as Science does, in one sense) to use the words "above" and "below," "higher" and "lower," in reference to invisible spheres, as being without meaning. Even the terms "East" and "West" are merely conventional, necessary only to aid our human perceptions. For, though the Earth has its two fixed points in the poles, North and South, yet both East and West are variable relatively to our own position on the Earth's surface, and in consequence of its rotation from West to East. Hence, when "other worlds" are mentioned -- whether better or worse, more spiritual or still more material, though both invisible -- the Occultist does not locate these spheres either outside or inside our Earth, as the theologians and the poets do; for their location is nowhere in the space known to, and conceived by, the profane. They are, as it were, blended with our world interpenetrating it and interpenetrated by it. There are millions and millions of worlds and firmaments visible to us; there still greater numbers beyond those visible to the telescopes, and many of the latter kind do not belong to our objective sphere of existence. Although as invisible as if they were millions of miles beyond our solar

system, they are yet with us, near us, within our own world, as objective and material to their respective inhabitants as ours is to us. But, again, the relation of these worlds to ours is not that of a series of egg-shaped boxes enclosed one within the other, like the toys called Chinese nests; each is entirely under its own special laws and conditions, having no direct relation to our sphere. The inhabitants of these, as already said, may be, for all we know, or feel, passing through and around us as if through empty space, their very habitations and countries being interblended with ours, though not disturbing our vision, because we have not yet the faculties necessary for discerning them. Yet by their spiritual sight the Adepts, and even some seers and sensitives, are always able to discern, whether in a greater or smaller degree, the presence and close proximity to us of Beings pertaining to other spheres of life. Those of the (spiritually) higher worlds, communicate only with those terrestrial mortals who ascend to them, through individual efforts, on to the higher plane they are occupying. . . .

"THE SONS OF Bhumi (EARTH) REGARD THE SONS OF Deva-lokas (ANGEL-SPHERES) AS THEIR GODS; AND THE SONS OF LOWER KINGDOMS LOOK UP TO THE MEN OF Bhumi, AS TO THEIR devas (GODS); MEN REMAINING UNAWARE OF IT IN THEIR BLINDNESS. . . . THEY (men) TREMBLE

[[Vol. 1, Page]] 606 THE SECRET DOCTRINE.

BEFORE THEM WHILE USING THEM (for magical purposes). . . . THE FIRST RACE OF MEN WERE THE "Mind-born sons" OF THE FORMER. THEY (the pitris and devas) ARE OUR PROGENITORS. . . . (Book II. of Commentary on the Book of DZYAN.)

"Educated people," so-called, deride the idea of Sylphs, Salamanders, Undines, and Gnomes; the men of science regard as an insult any mention of such superstitions; and with a contempt of logic and common good sense, that is often the prerogative of "accepted authority," they allow those, whom it is their duty to instruct, to labour under the absurd impression that in the whole Kosmos, or at any rate in our own atmosphere, there are no other conscious, intelligent beings, save ourselves.* Any other humanity (composed of distinct human beings) than a mankind with two legs, two arms, and a head with man's features on it, would not be called human; though the etymology of the word would seem to have little to do with the general appearance of a creature. Thus, while Science sternly rejects even the possibility of there being such (to us, generally) invisible creatures, Society, while believing in it all secretly, is made to deride the idea openly. It hails with mirth such works as the Count de Gabalis, and fails to understand that open satire is the securest mask.

Nevertheless, such invisible worlds do exist. Inhabited as thickly as our own is, they are scattered throughout apparent Space in immense number; some far more material than our own world, others gradually etherealizing until they become formless and are as "Breaths." That our physical eye does not see them, is no reason to disbelieve in them; physicists can see neither their ether, atoms, nor "modes of motion," or Forces. Yet they accept and teach them.

If we find, even in the natural world with which we are acquainted, matter affording a partial analogy in the difficult conception of such invisible worlds, there seems little difficulty in recognizing the possibility of such a presence. The tail of a comet, which, though attracting our attention by virtue of its luminosity, yet does not disturb or impede our vision of objects, which we perceive through and beyond it, affords the first stepping-stone toward a proof of the same. The tail of a comet passes rapidly across our horizon, and we should neither feel it, nor be cognizant of its passage, but for the brilliant coruscation, often perceived only by a few interested in the phenomenon, while everyone else remains ignorant of its presence and passage through, or across, a portion of our globe. This tail may, or may not, be an integral portion of the being of the comet, but its tenuity sub-

[[Footnote(s)]] -----

* Even the question of the plurality of worlds inhabited by sentient creatures is rejected or approached with the greatest caution! And yet see what the great astronomer, Camille Flammarion, says in his "Pluralite des Mondes."

[[Vol. 1, Page]] 607 PLURALITY OF WORLDS.

serves our purpose as an illustration. Indeed, it is no question of superstition, but simply a result of transcendental science, and of logic still more, to admit the existence of worlds formed of even far more attenuated matter than the tail of a comet. By denying such a possibility, Science has played for the last century into the hands of neither philosophy nor true religion, but simply into those of theology. To be able to dispute the better the plurality of even material worlds, a belief thought by many churchmen incompatible with the teachings and doctrines of the Bible,* Maxwell had to calumniate the memory of Newton, and try to convince his public that the principles contained in the Newtonian philosophy are those "which lie at the foundation of all atheistical systems." (Vide Vol. II., "Plurality of Worlds.")

"Dr. Whewell disputed the plurality of worlds by appeal to scientific evidence," writes Professor Winchell.** And if even the habitability of physical worlds, of planets, and distant stars which shine in myriads over our heads is so disputed, how little chance is there for the acceptance of invisible worlds within the apparently transparent space of our own!

But, if we can conceive of a world composed (for our senses) of matter still more attenuated than the tail of a comet, hence of inhabitants in it who are as ethereal, in proportion to their globe, as we are in comparison with our rocky, hard-crusted earth, no wonder if we do not perceive them, nor sense their presence or even existence. Only, in what is the idea contrary to science? Cannot men and animals, plants and rocks, be supposed to be endowed with quite a different set of senses from those we possess? Cannot their organisms be born, developed, and exist, under other laws of being than those that rule our little world? Is it absolutely necessary

that every corporeal being should be clothed in "coats of skin" like those that Adam and Eve were provided with in the legend of Genesis? Corporeality, we are told, however, by more than one man of science, "may exist under very divergent conditions."**** Do not we know through the

[[Footnote(s)]] -----

* Nevertheless, it will be shown on the testimony of the Bible itself, and of such good Christian theologians as Cardinal Wiseman, that this plurality is taught in both the Old and the New Testaments.

** See "The Plurality of the Worlds," wherein the list of many men of Science, who wrote to prove the theory, is given.

*** Professor A. Winchell -- arguing upon the plurality of the worlds -- makes the following remarks: "It is not at all improbable that substances of a refractory nature might be so mixed with other substances, known or unknown to us, as to be capable of enduring vastly greater vicissitudes of heat and cold than is possible with terrestrial organisms. The tissues of terrestrial animals are simply suited to terrestrial conditions. Yet even here we find different types and species of animals adapted to the trials of extremely dissimilar situations. . . . That an animal should be a quadruped or a [[Footnote continued on next page]]

[[Vol. 1, Page]] 608 THE SECRET DOCTRINE.

discoveries of that very all-denying science that we are surrounded by myriads of invisible lives? If these microbes, bacteria and the tutti quanti of the infinitesimally small, are invisible to us by virtue of their minuteness, cannot there be, at the other pole of it, beings as invisible owing to the quality of their texture or matter -- to its tenuity, in fact? Conversely, as to the effects of cometary matter, have we not another example of a half visible form of life and matter? The ray of sunlight entering our apartment, reveals in its passage myriads of tiny beings living their little life and ceasing to be, independent and heedless of whether they are perceived or not by our grosser materiality. And so again, of the microbes and bacteria and such-like unseen beings in other elements. We passed them by, during those long centuries of dreary ignorance, after the lamp of knowledge in the heathen and highly philosophical systems had ceased to throw its bright light on the ages of intolerance and bigotry during early Christianity; and we would fain pass them by again now.

And yet these lives surrounded us then as they do now. They have worked on, obedient to their own laws, and it is only as they were gradually revealed by Science that we have begun to take cognisance of them, as of the effects produced by them.

[[Footnote(s)]] -----

[[Footnote continued from previous page]] biped is something not depending on the necessities of organization, or instinct, or intelligence. That an animal should possess just five senses is not a necessity of percipient existence. There may be animals on the earth with neither smell nor taste. There may be beings on other worlds, and even on this, who possess more numerous senses than we. The possibility of this is apparent when we consider the high probability that other properties and other modes of existence lie among the resources of the Kosmos, and even of terrestrial matter. There are animals which subsist where rational man would perish -- in the soil, in the river, and the sea" . . . (and why not human beings of different organizations, in such case?) . . . "Nor is incorporated rational existence conditioned on warm blood, nor on any temperature which does not change the forms of matter of which the organism may be composed. There may be intelligences corporealized after some concept not involving the processes of injection, assimilation, and reproduction. Such bodies would not require daily food and warmth. They might be lost in the abysses of the ocean, or laid up on a stormy cliff through the tempests of an Arctic winter, or plunged in a volcano for a hundred years, and yet retain consciousness and thought. It is conceivable. Why might not psychic natures be enshrined in indestructible flint and platinum? These substances are no further from the nature of intelligence than carbon, hydrogen, oxygen, and lime. But, not to carry the thought to such an extreme (?), might not high intelligences be embodied in frames as indifferent to external conditions as the sage of the western plains, or the lichens of Labrador, the rotifers that remain dried for years, or the spores of bacteria which pass living through boiling water. . . . These suggestions are made simply to remind the reader how little can be argued respecting the necessary conditions of intelligent, organized existence, from the standard of corporeal existence found upon the earth. Intelligence is, from its nature, as universal and as uniform as the laws of the Universe. Bodies are merely the local fitting of intelligence to particular modifications of universal matter or Force." (World-Life, or Comparative Geology, pp. 496-498 et seq.)

[[Vol. 1, Page]] 609 THE GEOLOGY OF ENOCH.

How long has it taken the world, as it is now, to become what it is? If it can be said of cosmic dust that some of it comes to the present day "which had never belonged to the earth before" ("World-Life"), how much more logical to believe -- as the Occultists do -- that through the countless ages and millions of years that have rolled away, since that dust aggregated and formed the globe we live in around its nucleus of intelligent primeval substance -- many humanities, differing from our present mankind, as greatly as the one which will evolve millions of years hence will differ from our races, appeared but to disappear from the face of the earth, as our own will. Those primitive and far-distant humanities, having, as geologists think, left no tangible relics of themselves, are denied. All trace of them is swept away, and therefore they have never existed. Yet their relics -- a very few of them, truly -- are to be found, and they have to be discovered by geological research. Though, even if they were never to be met with, there is no reason to say that no men could have ever lived in those geological times, to which the period of their presence on earth is assigned. For their organisms needed no warm blood, no atmosphere, no feeding; the author of "World-Life" is right, and it is no such great extreme to believe even

as we do, that as there may be, on scientific hypotheses, "psychic natures enshrined in indestructible flint and platinum" to this day, so there were psychic natures enshrined in forms of equal indestructible primeval matter the real forefathers of our fifth race.

When we speak, therefore, as in Book II., of men who inhabited this globe 18,000,000 years back, we have in the mind neither the men of our present races, nor the present atmospheric laws, thermal conditions, etc. The Earth and mankind, like the Sun, Moon, and planets, have all their growth, changes, developments, and gradual evolution in their life-periods; they are born, become infants, then children, adolescents, grown-up bodies, grow old, and finally die. Why should not Mankind be also under this universal law? Says Uriel to Enoch: "Behold, I have showed thee all things. Thou seest the Sun, Moon, and those which conduct the stars of heaven, which cause all their operations, seasons, and arrivals to return. . . . In the days of sinners the years shall be shortened . . . everything done on Earth shall be subverted . . . the moon shall change its laws" . . . etc. (Ch. lxxix.)

The "days of Sinners" meant the days when matter would be in its full sway on Earth, and man would have reached the apex of physical development in stature and animality. That came to pass during the period of the Atlanteans, about the middle point of their Race (the 4th), which was drowned as prophesied by Uriel. Since then man began decreasing in physical stature, strength, and years, as will be shown in

[[Vol. 1, Page]] 610 THE SECRET DOCTRINE.

Book II. But as we are in the mid-point of our sub-race of the Fifth Root Race -- the acme of materiality in each -- therefore the animal propensities, though more refined, are not the less developed for that: and they are so chiefly in civilized countries.

§ XV.
GODS, MONADS, AND ATOMS.

SOME years ago we remarked* that "the Esoteric Doctrine may well be called the 'thread-doctrine,' since, like Sutratman, in the Vedanta philosophy,** it passes through and strings together all the ancient philosophical religious systems, and reconciles and explains them all." We say now it does more. It not only reconciles the various and apparently conflicting systems, but it checks the discoveries of modern exact science, and shows some of them to be necessarily correct, since they are found corroborated in the ancient records. All this will, no doubt, be regarded as terribly impertinent and disrespectful, a veritable crime of lese-Science; nevertheless, it is a fact.

Science is, undeniably, ultra-materialistic in our days; but it finds, in one sense, its justification. Nature behaving in actu ever esoterically, and being, as the Kabalists say, in abscondito, can only be judged by the profane through her appearance, and that appearance is always deceitful on the physical plane. On the other hand, the naturalists refuse to blend physics with metaphysics, the body with its informing soul and spirit, which they prefer ignoring. This is a matter of choice with some, while the minority strive very sensibly to enlarge the domain of physical science by trespassing on the forbidden grounds of metaphysics, so distasteful to some materialists. These scientists are wise in their generation. For all their wonderful discoveries would go for nothing, and remain for ever headless bodies, unless they lift the veil of matter and strain their eyes to see beyond. Now that they have studied nature in the length, breadth, and thickness of her physical frame, it is time to remove the skeleton to the second plane and search within the unknown depths for the living and real entity, for its SUB-stance -- the noumenon of evanescent matter.

[[Footnote(s)]] -----

* "The Septenary Principle," art. in "Five Years of Theosophy," p. 197.

** The Atman or Spirit (the Spiritual SELF) passing like a thread through the five subtle bodies (or principles, Koshas) is called "thread-soul," or Sutratman in Vedantic philosophy.

[[Vol. 1, Page]] 611 WHICH OF THE TWO IS BLIND?

It is only by acting on such lines that some of the truths, now called "exploded superstitions," will be discovered to be facts and the relics of ancient knowledge and wisdom.

One of such "degrading" beliefs -- in the opinion of the all-denying sceptic -- is found in the idea that Kosmos, besides its objective planetary inhabitants, its humanities in other inhabited worlds, is full of invisible, intelligent Existences. The so-called Arch-Angels, Angels and Spirits, of the West, copies of their prototypes, the Dhyana-Chohans, the Devas and Pitris, of the East, are no real Beings but fictions. On this point Materialistic Science is inexorable. To support its position, it upsets its own axiomatic law of uniformity in the laws of nature, that of continuity, and all the logical sequence of analogies in the evolution of being. The masses of the profane are asked, and made, to believe that the accumulated testimony of History, which shows even the Atheists of old -- such as Epicurus and Democritus -- believing in gods, was false; and that philosophers like Socrates and Plato, asserting their existence, were mistaken enthusiasts and fools. If we hold our opinions merely on historical grounds, on the authority of legions of the most eminent Sages, Neo-Platonists, Mystics of all the ages, from Pythagoras down to the eminent Scientists and Professors of the present century, who, if they reject "gods," believe in "spirits," shall we consider such authorities as weak-minded and foolish as any Roman Catholic peasant, who believes in and prays to his once human Saint, or the Archangel, St. Michael? But is there no difference between the belief of

the peasant and that of the Western heirs to the Rosicrucians and Alchemists of the Middle Ages? Is it the Van Helmonts, the Khunraths, the Paracelsuses and Agrippas, from Roger Bacon down to St. Germain, who were all blind enthusiasts, hysteriacs or cheats, or is it the handful of modern sceptics -- the "leaders of thought" -- who are struck with the cecity of negation? The latter, we opine. It would be a miracle indeed, quite an abnormal fact in the realm of probabilities and logic, were that handful of negators to be the sole custodians of truth, while the million-strong hosts of believers in gods, angels, and spirits -- in Europe and America alone -- namely, Greek and Latin Christians, Theosophists, Spiritualists, Mystics, etc., etc., should be no better than deluded fanatics and hallucinated mediums, and often no higher than the victims of deceivers and impostors! However varying in their external presentations and dogmas, beliefs in the Hosts of invisible Intelligences of various grades have all the same foundation. Truth and error are mixed in all. The exact extent, depth, breadth, and length of the mysteries of Nature are to be found only in Eastern esoteric sciences. So vast and so profound are these that hardly a few, a very few of the highest Initiates -- those whose very existence is known but to a small number of

[[Vol. 1, Page]] 612 THE SECRET DOCTRINE.

Adepts -- are capable of assimilating the knowledge. Yet it is all there, and one by one facts and processes in Nature's workshops are permitted to find their way into the exact Sciences, while mysterious help is given to rare individuals in unravelling its arcana. It is at the close of great Cycles, in connection with racial development, that such events generally take place. We are at the very close of the cycle of 5,000 years of the present Aryan Kaliyuga; and between this time and 1897 there will be a large rent made in the Veil of Nature, and materialistic science will receive a death-blow.

Without throwing any discredit upon time-honoured beliefs, in whatever direction, we are forced to draw a marked line between blind faith, evolved by theologies, and knowledge due to the independent researches of long generations of adepts; between, in short, faith and philosophy. There have been -- in all ages -- undeniably learned and good men who, having been reared in sectarian beliefs, died in their crystallized convictions. For Protestants, the garden of Eden is the primeval point of departure in the drama of Humanity, and the solemn tragedy on the summit of Calvary, the prelude to the hoped-for Millennium. For Roman Catholics, Satan is at the foundation of Kosmos, Christ in its centre, and Antichrist at its apex. For both, the Hierarchy of Being begins and ends within the narrow frames of their respective theologies: one self-created personal God and an Empyrean ringing with the Hallelujas of created angels; the rest, false gods, Satan and fiends.

Theophilosophy proceeds on broader lines. From the very beginning of AEons -- in time and space in our Round and Globe -- the Mysteries of Nature (at any rate, those which it is lawful for our races to know) were recorded by the pupils of those same now invisible "heavenly men," in geometrical figures and symbols. The keys thereto passed from one generation of "wise men" to the other. Some of the symbols, thus passed from the east to the west, were brought therefrom by Pythagoras, who was not the inventor of his famous "Triangle." The latter figure, along with the plane cube and circle, are more eloquent and scientific descriptions of the order of the evolution of the Universe, spiritual and psychic, as well as physical, than volumes of descriptive Cosmogonies and revealed "Geneses." The ten points inscribed within that "Pythagorean triangle" are worth all the theogonies and angelologies ever emanated from the theological brain. For he who interprets them -- on their very face, and in the order given -- will find in these seventeen points (the seven Mathematical Points hidden) the uninterrupted series of the genealogies from the first Heavenly to terrestrial man. And, as they give the order of Beings, so they reveal the order in which were evolved the Kosmos, our earth, and the primordial elements by

[[Vol. 1, Page]] 613 THE MATHEMATICAL POINT.

which the latter was generated. Begotten in the invisible Depths, and in the womb of the same "Mother" as its fellow-globes -- he who will master the mysteries of our Earth, will have mastered those of all others.

Whatever ignorance, pride or fanaticism may suggest to the contrary, Esoteric Cosmology can be shown inseparably connected with both philosophy and modern science. The gods of the ancients, the monads -- from Pythagoras down to Leibnitz -- and the atoms of the present materialistic schools (as borrowed by them from the theories of the old Greek Atomists) are only a compound unit, or a graduated unity like the human frame, which begins with body and ends with spirit. In the occult sciences they can be studied separately, but never mastered unless viewed in their mutual correlations during their life-cycle, and as a Universal Unity during Pralayas.

La Pluche shows sincerity, but gives a poor idea of his philosophical capacities when declaring his personal views on the Monad or the Mathematical Point. "A point," he says, "is enough to put all the schools in the world in a combustion. But what need has man to know that point, since the creation of such a small being is beyond his power? A fortiori, philosophy acts against probability when, from that point which absorbs and disconcerts all her meditations, she presumes to pass on to the generation of the world. . . ."

Philosophy, however, could never have formed its conception of a logical, universal, and absolute Deity if it had no Mathematical Point within the Circle to base its speculations upon. It is only the manifested Point, lost to our senses after its pregenetic appearance in the infinitude and incognizability of the Circle, that made a reconciliation between philosophy and theology possible -- on condition that the latter should abandon its crude materialistic dogmas. And it is because it has so unwisely rejected the Pythagorean Monad and geometrical figures, that Christian theology has evolved its self-created human and personal God, the monstrous Head from whence flow in two streams the dogmas of Salvation and Damnation. This is so true that even those clergymen who would be philosophers and who were masons, have, in their arbitrary interpretations, fathered upon the ancient sages the queer idea that "the Monad represented (with them) the throne of the Omnipotent Deity, placed in the centre of the Empyrean to indicate T.G.A.O.T.U.":* - read "the Great Architect of the Universe." A curious explanation this, more Masonic than strictly Pythagorean.

Nor did the "hierogram within a Circle, or equilateral Triangle,"

[[Footnote(s)]] -----

* "Science of Numbers," by the Rev. G. Oliver (p. 36).

[[Vol. 1, Page]] 614 THE SECRET DOCTRINE.

ever mean "the exemplification of the unity of the divine Essence"; for this was exemplified by the plane of the boundless Circle. What it really meant was the triune co-equal Nature of the first differentiated Substance, or the con-substantiality of the (manifested) Spirit, matter and the Universe -- their "Son," who proceeds from the Point (the real, esoteric LOGOS) or the Pythagorean MONAD. For the Greek Monas signifies "Unity" in its primary sense. Those unable to seize the difference between the monad -- the Universal Unit -- and the Monads or the manifested Unity, as also between the ever-hidden and the revealed LOGOS or the Word, ought never to meddle in philosophy, let alone the Esoteric Sciences. It is needless to remind the educated reader of Kant's Thesis to demonstrate his second Antinomy.* Those who have read and understood it will see clearly the line we draw between the absolutely Ideal Universe and the invisible though manifested Kosmos. Our Gods and Monads are not the Elements of extension itself, but only those of the invisible reality which is the basis of the manifested Kosmos. Neither esoteric philosophy, nor Kant, nor Leibnitz would ever admit that extension can be composed of simple or unextended parts. But theologian-philosophers will not grasp this. The Circle and the Point, which latter retires into and merges with the former, after having emanated the first three points and connected them with lines, thus forming the first noumenal basis of the Second Triangle in the Manifested World, have ever been an insuperable obstacle to theological flights into dogmatic Empyreans. On the authority of this Archaic Symbol, a male, personal god, the Creator and Father of all, becomes a third-rate emanation, the Sephiroth standing fourth in descent, and on the left hand of En-Soph (see the Kabalistic Tree of Life). Hence, the Monad is degraded into a Vehicle -- a "throne"!

The Monad -- only the emanation and reflection of the Point (Logos) in the phenomenal World -- becomes, as the apex of the manifested equilateral triangle, the "Father." The left side or line is the Duad, the "Mother," regarded as the evil, counteracting principle (Plutarch, De Placitis Placitorum); the right side represents the Son ("his Mother's husband" in every Cosmogony, as one with the apex); at the basic line is the Universal plane of productive Nature, unifying on the phenomenal plane Father-Mother-Son, as these were unified in the apex, in the supersensuous World.** By mystic transmutation they became the Quaternary -- the triangle became the TETRAKTIS.

[[Footnote(s)]] -----

* See Kant's Critique de la Raison pure (Barni's transl., Vol. II., p. 54).

** In the Greek and Latin churches -- which regard marriage as one of the sacraments -- the officiating priest during the marriage ceremony represents the apex of the triangle; the bride its left feminine side and the bridegroom the right one, while the horizontal line is symbolised by the row of witness, the bridesmaids and best-men. But behind [[Footnote continued on next page]]

[[Vol. 1, Page]] 615 SPACE, FORCE AND MATTER.

This transcendental application of geometry to Cosmic and divine theogony -- the Alpha and the Omega of mystical conception -- became dwarfed after Pythagoras by Aristotle. By omitting the Point and the Circle, and taking no account of the apex, he reduced the metaphysical value of the idea, and thus limited the doctrine of magnitude to a simple TRIAD -- the line, the surface, and the body. His modern heirs, who play at Idealism, have interpreted these three geometrical figures as Space, Force, and Matter -- "the potencies of an interacting Unity."* Materialistic Science, perceiving but the basic line of the manifested "triangle" -- the plane of matter -- translates it practically as (Father)-MATTER, (Mother)-MATTER, and (Son)-MATTER, and theoretically as Matter, Force, and Correlation.

But to the average physicist, as remarked by a Kabalist, "Space, Force, Matter, are, what signs in algebra are to the mathematician, merely conventional symbols;" or "Force as force, and Matter as matter, are as absolutely unknowable as is the assumed empty space in which they are held to interact." As symbols representing abstractions, "the physicist bases reasoned hypotheses of the origin of things . . . and sees three needs in what he terms creation: (a) a place wherein to create; (b) a medium by which to create; (c) a material from which to create. And in giving a logical expression to this hypothesis through the terms space, force, matter, he believes he has proved the existence of that which each of these represents as he conceives it to be."**

The physicist who regards Space merely as a representation of our mind, or extension unrelated to things in it, which Locke defined as capable of neither resistance nor motion; the paradoxical materialist, who would have a void there, where he can see no matter, would reject with the utmost contempt the proposition that "Space is a substantial though (apparently) an absolutely unknowable living Entity." (New Aspects, p. 9.) Such is, nevertheless, the Kabalistic teaching, and it is that of Archaic philosophy. Space is the real world, while our world is an artificial one. It is the One Unity throughout its infinitude: in its bottomless depths as on its illusive surface; a surface studded with countless phenomenal Universes, systems and mirage-like worlds. Nevertheless, to the Eastern Occultist, who is an objective Idealist at the bottom, in the real world, which is a Unity of Forces, there is "a connection of all matter in the plenum," as Leibnitz would say. This is symbolized in the Pythagorean Triangle.

[[Footnote(s)]] -----

[[Footnote continued from previous page]] the priest there is the altar with its mysterious containments and symbolic meaning, inside of which no one but the consecrated priests ought to enter. In the early days of Christianity the marriage ceremony was a mystery and a true symbol. Now, however, even the churches have lost the true meaning of this symbolism.

** "New Aspects of Life," by Henry Pratt, M.D.

[[Vol. 1, Page]] 616 THE SECRET DOCTRINE.

It consists of ten points inscribed pyramid-like (from one to the last four) within its three lines, and it symbolizes the Universe in the famous Pythagorean Decad. The upper single dot is a Monad, and represents a Unit-Point, which is the Unity from whence all proceeds, and all is of the same essence with it. While the ten dots within the triangle represent the phenomenal world, the three sides of the equilateral triangle which enclose the pyramid of dots are the barriers of noumenal Matter, or Substance, that separate it from the world of Thought. "Pythagoras considered a point to correspond in proportion to unity; a line to 2; a superficies to 3; a solid to 4; and he defined a point as a Monad having position, and the beginning of all things; a line was thought to correspond with duality, because it was produced by the first motion from indivisible nature, and formed the junction of two points. A superficies was compared to the number three because it is the first of all causes that are found in figures; for a circle, which is the principal of all round figures, comprises a triad, in centre -- space -- circumference. But a triangle, which is the first of all rectilineal figures, is included in a ternary, and receives its form according to that number; and was considered by the Pythagoreans to be the creator of all sublunary things. The four points at the base of the Pythagorean triangle correspond with a solid or cube, which combines the principles of length, breadth, and thickness, for no solid can have less than four extreme boundary points." (Pythag. Triangle, p. 19.)

It is argued that "the human mind cannot conceive an indivisible unit short of the annihilation of the idea with its subject." This is an error, as the Pythagoreans have proved, and a number of Seers before them, although there is a special training for it, and although the profane mind can hardly grasp it. But there are such things as metamathematics and metageometry. Even mathematics pure and simple proceed from the Universal to the particular, from the mathematical, hence indivisible Point, to solid figures. The teaching originated in India, and was taught in Europe by Pythagoras, who, throwing a veil over the Circle and the Point -- which no living man can define except as incomprehensible abstractions -- laid the origin of the differentiated Cosmic matter in the basic or horizontal line of the Triangle. Thus the latter became the earliest of geometrical figures. The author of "New Aspects of Life" and of the Kabalistic Mysteries -- objects to the objectivization, so to speak, of the Pythagorean conception and use of the equilateral triangle, and calls it a misnomer. His argument that a solid equilateral body -- "one whose base, and each of its sides, form equal triangles -- must have four co-equal sides or surfaces, while a triangular plane will as necessarily possess five," demonstrates on the contrary the grandeur of the conception in all its esoteric application to the idea of

[[Vol. 1, Page]] 617 PHANTOMS OF THE MIND.

the pregenesis, and the genesis of Kosmos. Granted, that an ideal triangle, depicted by mathematical, imaginary lines "can have no sides at all, being simply a phantom of the mind (if sides be imputed to which, they must be the sides of the object it constructively represents)." But in such case most of the scientific hypotheses are no better than "phantoms of the mind"; they are unverifiable, except on inference, and have been adopted merely to answer scientific necessities. Furthermore, the ideal triangle -- "as the abstract idea of a triangular body, and, therefore, as the type of an abstract idea" -- accomplished and carried out to perfection the double symbolism intended. As an emblem applicable to the objective idea, the simple triangle became a solid. When repeated in stone on the four cardinal points, it assumed the shape of the Pyramid -- the symbol of the phenomenal merging into the noumenal Universe of thought -- at the apex of the four triangles; and, as an "imaginary figure constructed of three mathematical lines," it symbolized the subjective spheres -- those lines "enclosing a mathematical space -- which is equal to nothing enclosing nothing." Because, to the senses and the untrained consciousness of profane and scientist, everything beyond the line of differentiated matter -- i.e., outside of, and beyond the realm of even the most spiritual substance -- has to remain for ever equal to nothing. It is the AIN-SOPH -- the No-THING.

Yet these "phantoms of the mind" are in truth no greater abstractions than the abstract ideas in general upon evolution and physical development -- e.g., Gravity, Matter, Force, etc. -- on which the exact sciences are based. Our most eminent chemists and physicists are earnestly pursuing the not hopeless attempt of finally tracing to its hiding-place the protyle, or the basic line of the Pythagorean triangle. The latter is, as said, the grandest conception imaginable, as it symbolizes both the ideal and the visible universes.* For if "the possible unit is only a possibility as an actuality of nature, as an individual of any kind," and as every individual natural object is capable of division, and by division loses its unity, or ceases to be a unit,** it is so only in the realm of exact sciences in a world as deceptive as it is illusive. In the realm of the Esoteric sciences the unit divided ad infinitum, instead of losing its unity, approaches with every division the planes of the only eternal REALITY. The eye of the SEER can follow and behold it in all its pregenetic glory. This same idea of the reality of the subjective, and the unreality of the objective universes, is found at the bottom of the Pythagorean and Platonic teachings -- limited to the Elect alone; for

[[Footnote(s)]] -----

* In the world of Form, having found its expression in the Pyramids, Symbolism has in them both a triangle and a square, with their four co-equal triangles or surfaces, the four basic points, and the fifth -- the apex.

** "New Aspects of Life."

[[Vol. 1, Page]] 618 THE SECRET DOCTRINE.

Porphyry, speaking of the Monad and the Duad, says that the former only was considered substantial and real, "that most simple Being, the cause of all unity and the measure of all things."

But the Duad, although the origin of Evil, or Matter -- thence unreal in philosophy -- is still Substance during Manvantara, and is often called the third monad, in Occultism, and the connecting line as between two Points, . . . or Numbers which proceeded from THAT, "which was before all Numbers," as expressed by Rabbi Barahiel. And from this Duad proceeded all the Scintillas of the three upper and the four lower worlds or planes -- which are in constant interaction and correspondence. This is a teaching which the Kabala has in common with Eastern Occultism. For in the occult philosophy there are the "ONE Cause" and the "Primal Cause," which latter thus becomes, paradoxically, the second, as clearly expressed by the author of the "Qabbalah, from the philosophical writings of Ibn Gabirol," -- "in the treatment of the Primal cause, two things must be considered, the Primal Cause per se, and the relation and connection of the Primal Cause with the visible and unseen universe." Thus he shows the early Hebrews following in the steps of the Oriental philosophy -- Chaldean, Persian, Hindu, Arabic, etc. Their Primal Cause was designated at first "by the triadic Shaddai, the (triune) Almighty, subsequently by the Tetragrammaton, YHVH, symbol of the Past, Present, and Future," and, let us add, of the eternal IS, or the I AM. Moreover, in the Kabala the name YHVH (or Jehovah) expresses a He and a She, male and female, two in one, or Hokhmah and Binah, and his, or rather their Shekinah or synthesizing spirit (grace), which makes again of the Duad a Triad. This is demonstrated in the Jewish Liturgy for Pentecost, and the prayer, "In the name of Unity, of the Holy and Blessed Hu (He), and His Shekinah, the Hidden and Concealed Hu, blessed be YHVH (the Quaternary) for ever." "Ha is said to be masculine and YAH feminine, together they make the [[hebrew]] i.e., one YHVH. One, but of a male-female nature. The Shekinah is always considered in the Qabbalah as feminine" (p. 175). And so it is considered in the exoteric Puranas, for Shekinah is no more than Sakti -- the female double or lining of any god, in such case. And so it was with the early Christians whose Holy Spirit was feminine, as Sophia was with the Gnostics. But in the transcendental Chaldean Kabala or "Book of Numbers," "Shekinah" is sexless, and the purest abstraction, a State, like Nirvana, not subject or object or anything except an absolute PRESENCE.

Thus it is only in the anthropomorphised systems (such as the Kabala has now greatly become) that Shekinah-Sakti is feminine. As such she becomes the Duad of Pythagoras, the two straight lines of the symbol that can never meet, which therefore form no geometrical figure and are

[[Vol. 1, Page]] 619 THE MONAD OF LEIBNITZ.

the symbol of matter. Out of this Duad, when united in one basic line of the triangle on the lower plane (the upper Triangle of the Sephirothal Tree), emerge the Elohim, or Deity in Cosmic Nature, with the true Kabbalists the lowest designation, translated in the Bible "God" (see the same work and page).* Out of these issue the Scintillas.

The Scintillas are the "Souls," and these Souls appear in the three-fold form of Monads (units), atoms and gods -- according to our teaching. "Every atom becomes a visible complex unit (a molecule), and once attracted into the sphere of terrestrial activity, the Monadic Essence, passing through the mineral, vegetable, and animal kingdoms, becomes man." (Esot. Catechism.) Again, "God, Monad, and Atom are the correspondences of Spirit, Mind, and Body (Atma, Manas and Sthula Sarira) in man." In their septenary aggregation they are the "Heavenly Man" (see Kabala for the latter term); thus, terrestrial man is the provisional reflection of the Heavenly. . . . "The Monads (Jivas) are the Souls of the Atoms, both are the fabric in which the Chohans (Dhyanis, gods) cloth themselves when a form is needed." (Esot. Cat.)

This relates to Cosmic and sub-planetary Monads, not to the Super-Cosmic Monas (the Pythagorean Monad) as called, in its synthetic character, by the Pantheistical Peripatetics. The Monads of the present dissertation are treated from the standpoint of their individuality, as atomic Souls, before these atoms descend into pure terrestrial form. For this descent into concrete matter marks the medial point of their own individual pilgrimage. Here, losing in the mineral kingdom their individuality, they begin to ascend through the seven states of terrestrial evolution to that point where a correspondence is firmly established between the human and Deva (divine) consciousness. At present, however, we are not concerned with their terrestrial metamorphoses and tribulations, but with their life and behaviour in Space, on planes wherein the eye of the most intuitional chemist and physicist cannot reach them -- unless, indeed, he develops in himself highly clairvoyant faculties.

It is well known that Leibnitz came several times very near the truth, but defined monadic evolution incorrectly, which is not to be wondered at, since he was not an INITIATE, nor even a Mystic, only a

[[Footnote(s)]] -----

* Such recent works as the Qabbalah of Mr. Isaac Myer and of Mr. S. L. MacGregor Mathers, fully justify our attitude towards the Jehovistic Deity. It is not the transcendental, philosophical, and highly metaphysical abstraction of the original Kabbalistic thought -- Ain-Soph-Shekinah-Adam-Kadmon, and all that follows -- that we oppose, but the crystallization of all these into the highly

unphilosophical, repulsive, and anthropomorphic Jehovah, the androgynous and finite deity for which eternity, omnipotence, and omniscience are claimed. We do not war against the IDEAL REALITY, but the hideous theological Shadow.

[[Vol. 1, Page]] 620 THE SECRET DOCTRINE.

very intuitional philosopher. Yet no psycho-physicist ever came nearer than he has to the esoteric general outline of evolution. This evolution -- viewed from its several standpoints -- i.e., as the universal and the individualized Monad; and the chief aspects of the Evolving Energy, after differentiation -- the purely Spiritual, the Intellectual, the Psychic and the Physical -- may be thus formulated as an invariable law; a descent of Spirit into Matter, equivalent to an ascent in physical evolution; a re-ascent from the depths of materiality towards its status quo ante, with a corresponding dissipation of concrete form and substance up to the LAYA state, or what Science calls "the zero-point," and beyond.

These states -- once the spirit of Esoteric philosophy is grasped -- become absolutely necessary from simple logical and analogical considerations. Physical Science having now ascertained, through its department of Chemistry, the invariable law of this evolution of atoms -- from their "protylean" state down to that of a physical and then a chemical particle (or molecule) -- cannot well reject the same as a general law. And once it is forced by its enemies -- Metaphysics and Psychology* -- out of its alleged impregnable strongholds, it will find it more difficult than it now appears to refuse room in the Spaces of SPACE to Planetary Spirits (gods), Elementals, and even the Elementary Spooks or Ghosts, and others. Already Figuiet and Paul D'Assier, two Positivists and Materialists, have succumbed before this logical necessity. Other and still greater Scientists will follow in that "intellectual FALL." They will be driven out of their position not by spiritual, theosophical, or any other physical or even mental phenomena, but simply by the enormous gaps and chasms that open daily and will still be opening before them, as one discovery follows the other, until they are finally knocked off their feet by the ninth wave of simple common sense.

Here is an example: Prof. W. Crookes' latest discovery of what he has named protyle. In the "Notes on the Bhagavat Gita," by one of the best metaphysicians and Vedantic scholars in India,** the lecturer, referring cautiously to "things occult" in that great Indian esoteric work, makes a remark as suggestive as it is strictly correct. ". . . Into the details of the evolution of the solar system itself," he says, "it is not necessary for me to enter. You may gather some idea as to the way in which the various elements start into existence from these THREE principles into which MULAPRAKRITI is differentiated (the Pythagorean triangle), by

[[Footnote(s)]] -----

* Let not the word "psychology" cause the reader to carry his thought by an association of ideas to modern "Psychologists," so-called, whose idealism is another name for uncompromising materialism, and whose pretended Monism is no better than a mask to conceal the void of final annihilation -- even of consciousness. Here Spiritual psychology is meant.

** T. Subba Row, see Theosophist for Feb., 1887.

[[Vol. 1, Page]] 621 THE CHEMISTRY OF THE FUTURE.

examining the lecture delivered by Professor Crookes a short time ago upon the so-called elements of modern chemistry. This lecture will give you some idea of the way in which these Elements spring from Vishwanara,* the most objective of these three principles, which seems to stand in the place of the protyle mentioned in that lecture. Except in a few particulars, this lecture seems to give the outlines of the theory of physical evolution on the plane of Vishwanara, and is, so far as I know, the nearest approach made by modern investigators TO THE REAL OCCULT THEORY on the subject."

These words will be re-echoed and approved by every Eastern Occultist. Much from the lectures by Prof. Crookes has already been quoted in § XII. of these Addenda. Since then, there has been another lecture delivered, as remarkable as the first one, on the "Genesis of the Elements,"** and also a third one. Here we have almost a corroboration of the teachings of Esoteric philosophy concerning the mode of primeval evolution. It is, indeed, as near an approach, made by a great scholar and specialist in chemistry,*** to the Secret Doctrine, as could be made apart from the application of the monads and atoms to the dogmas of pure transcendental metaphysics, and their connection and correlation with "Gods and intelligent Conscious Monads." But Chemistry is now on its ascending plane, thanks to one of its highest European representatives. It is impossible for it to go back to that day when materialism regarded its sub-elements as absolutely simple and homogeneous bodies, which it had raised, in its blindness, to the rank of elements. The mask has been snatched off by too clever a hand for there to be any fear of a new disguise. And after years of pseudology, of bastard molecules parading under the name of elements, behind and beyond which there could be nought but void, a great professor of chemistry asks once more: "What are these elements, whence do they come, what is their signification? These elements perplex us in our researches, baffle us in our speculations, and haunt us in our very dreams. They stretch like an unknown sea before us mocking -- mystifying, and murmuring strange revelations and possibilities." (Gen. of Elem., p. 1.)

[[Footnote(s)]] -----

* "Vishwanara is not merely the manifested objective world, but the one physical basis (the horizontal line of the triangle) from which the whole objective world starts into existence." And this is the Cosmic Duad, the androgynous Substance. Beyond only, is the true Protyle.

** By W. Crookes, F.R.S., V.P.C.S., delivered at the Royal Institution, London, on Friday, February 18th, 1887.

*** How true it is will be fully demonstrated only on that day when his discovery of radiant matter will have resulted in a further elucidation with regard to the true source of light, and revolutionized all the present speculations. Further familiarity with the northern streamers of the aurora borealis may help the recognition of this truth.

[[Vol. 1, Page]] 622 THE SECRET DOCTRINE.

Those who are heirs to primeval revelations have taught these "possibilities" in every century, but have never found a fair hearing. The truths inspired to Kepler, Leibnitz, Gassendi, Swedenborg, etc., were ever alloyed with their own speculations in one or another predetermined direction --hence distorted. But now one of the great truths has dawned upon an eminent professor of modern exact science, and he fearlessly proclaims as a fundamental axiom that Science has not made itself acquainted, so far, with real simple elements. For Prof. Crookes tells his audience:

"If I venture to say that our commonly received elements are NOT simple and primordial, that they have not arisen by chance or have not been created in a desultory and mechanical manner, but have been evolved from simpler matters -- or perhaps, indeed, from one sole kind of matter -- I do but give formal utterance to an idea which has been, so to speak, for some time 'in the air' of science. Chemists, physicists, philosophers of the highest merit, declare explicitly their belief that the seventy (or thereabouts) elements of our text-books are not the pillars of Hercules which we must never hope to pass." . . . "Philosophers in the present as in the past -- men who certainly have not worked in the laboratory -- have reached the same view from another side." Thus Mr. Herbert Spencer records his conviction that 'the chemical atoms are produced from the true or physical atoms by processes of evolution under conditions which chemistry has not yet been able to produce.' . . . "And the poet has forestalled the philosopher. Milton ('Paradise Lost,' Book V.) makes the Archangel Raphael say to Adam, instinct with the evolutionary idea, that the Almighty had created

. . . 'One first matter, all
Indued with various forms, various degrees
Of substance.' "

Nevertheless, the idea would have remained crystallized "in the air of Science," and never have descended into the thick atmosphere of materialism and profane mortals for years to come, perhaps, had not Professor Crookes bravely and fearlessly reduced it to its simple elements, and thus publicly forced it on Scientific notice. "An idea," says Plutarch, "is a being incorporeal, which has no subsistence by itself, but gives figure and form unto shapeless matter, and becomes the cause of the manifestation." (De Placit. Philos.) The revolution produced in old chemistry by Avogadro was the first page in the Volume of New Chemistry. Mr. Crookes has now turned the second page, and is boldly pointing to what may be the last. For once protyle accepted and recognized -- as invisible Ether was, both being logical and scientific necessities -- Chemistry will have virtually ceased to live: it will reappear in its reincarnation as New Alchemy, or METACHEMISTRY. The discoverer of

[[Vol. 1, Page]] 623 THE GENESIS OF ATOMS.

radiant matter will have vindicated in time the Archaic Aryan works on Occultism and even the Vedas and Puranas. For what are the manifested "Mother," the "Father-Son-Husband" (Aditi and Daksha, a form of Brahma, as Creators) and the "Son," -- the three "First-born" -- but simply Hydrogen, Oxygen, and that which in its terrestrial manifestation is called nitrogen. Even the exoteric descriptions of the "First Born" triad give all the characteristics of these three gases. Priestley, the "discoverer" of Oxygen, or that which was known in the highest antiquity!

Yet all the ancient, mediaeval, and modern poets and philosophers have been anticipated even in the exoteric Hindu books. Descartes' plenum of matter differentiated into particles; Leibnitz's Ethereal Fluid and Kant's "primitive fluid" dissolved into its elements; Kepler's Solar Vortex and Systemic Vortices; in short, from the Elemental Vortices inaugurated by the universal mind -- through Anaxagoras, down to Galileo, Torricelli, and Swedenborg, and after them to the latest speculations by European mystics -- all this is found in the Hindu hymns and Mantras to the "Gods, Monads, and Atoms," in their fulness, for they are inseparable. In esoteric teachings, the most transcendental conceptions of the universe and its mysteries, as the most (seemingly) materialistic speculations are found reconciled, because those sciences embrace the whole scope of evolution from Spirit to matter. As declared by an American Theosophist, "The Monads (of Leibnitz) may from one point of view be called force, from another matter. To occult Science, force and matter are only two sides of the same SUBSTANCE." ("Path," No. 10, p. 297.)

Let the reader remember these "Monads" of Leibnitz, every one of which is a living mirror of the universe, every monad reflecting every other, and compare this view and definition with certain Sanskrit stanzas (Slokas) translated by Sir William Jones, in which it is said that the creative source of the Divine Mind, . . . "Hidden in a veil of thick darkness, formed mirrors of the atoms of the world, and cast reflection from its own face on every atom. . . ."

When, therefore, Professor Crookes declares that "If we can show how the so-called chemical elements might have been generated we shall be able to fill up a formidable gap in our knowledge of the universe, . . ." the answer is ready. The theoretical knowledge is contained in the esoteric meaning of every Hindu cosmogony in the Puranas; the practical demonstration thereof -- is in the hands of those who will not be recognised in this century, save by the very few. The scientific possibilities of various discoveries, that must inexorably lead exact Science into the acceptance of Eastern Occult views, which contain all the requisite material for the filling of those "gaps," are, so far, at the mercy of modern materialism. It is only by working in the direction

[[Vol. 1, Page]] 624 THE SECRET DOCTRINE.

taken by Professor Crookes that there is any hope for the recognition of a few, hitherto Occult, truths.

Meanwhile, one thirsting to have a glimpse at a practical diagram of the evolution of primordial matter, which, separating and differentiating under the impulse of cyclic law, divides itself into a septenary gradation of SUBSTANCE (from a general view), can do no better than examine the plates attached to Mr. Crookes' lecture: "Genesis of the Elements," and ponder well over some passages of the text. In one place (p. 11) he says:--

". . . Our notions of a chemical element have expanded. Hitherto the molecule has been regarded as an aggregate of two or more atoms, and no account has been taken of the architectural design on which these atoms have been joined. We may consider that the structure of a chemical element is more complicated than has hitherto been supposed. Between the molecules we are accustomed to deal with in chemical reactions and ultimate atoms as first created, come smaller molecules or aggregates of physical atoms; then sub-molecules differ one from the other, according to the position they occupied in the yttrium edifice."

"Perhaps this hypothesis can be simplified if we imagine yttrium to be represented by a five-shilling piece. By chemical fractionation I have divided it into five separate shillings, and find that these shillings are not counterparts, but like the carbon atoms in the benzol ring, have the impress of their position, 1, 2, 3, 4, 5, stamped on them. . . . If I throw my shillings into the melting-pot or dissolve them chemically, the mint stamp disappears and they all turn out to be silver." . . .

This will be the case with all the atoms and molecules when they have separated from their compound forms and bodies -- when pralaya sets in. Reverse the case, and imagine the dawn of a new manvantara. The pure "silver" of the absorbed material will once more separate into SUBSTANCE, which will generate "Divine Essences" whose "principles"* are the primary elements, the sub-elements, the physical energies and subjective and objective matter; or, as these are epitomised -- GODS, MONADS, and ATOMS. If leaving for one moment the metaphysical or transcendental side of the question, -- dropping out of the present consideration the supersensuous and intelligent beings and entities believed in by the Kabalists and Christians -- we turn to the atomical theory of evolution, the occult teachings are still found corroborated by exact Science and its confessions, as far, at least, as regards the supposed "simple" elements, now suddenly

[[Footnote(s)]] -----

[[Vol. 1, Page]] 625 HERMES OR HUXLEY?

degraded into poor and distant relatives -- not even second cousins to the latter. For we are told by Prof. Crookes that:

"Hitherto, it has been considered that if the atomic weight of a metal, determined by different observers, setting out from different compounds, was always found to be constant . . . then such metal must rightly take rank among the simple or elementary bodies. We learn . . . that this is no longer the case. Again, we have here wheels within wheels. Gadolinium is not an element but a compound. . . We have shown that yttrium is a complex of five or more new constituents. And who shall venture to gainsay that each of these constituents, if attacked in some different manner, and if the result were submitted to a test more delicate and searching than the radiant-matter test, might not be still further divisible? Where, then, is the actual ultimate element? As we advance it recedes like the tantalizing mirage lakes and groves seen by the tired and thirsty traveller in the desert. Are we in our quest for truth to be thus deluded and balked? The very idea of an element, as something absolutely primary and ultimate, seems to be growing less and less distinct. . ." (p. 16).

On page 429 of Isis Unveiled, Vol. I., we said that "the mystery of first creation, which was ever the despair of Science, is unfathomable unless they (the Scientists) accept the doctrine of Hermes. They will have to follow in the footsteps of the Hermetists." Our prophecy begins to assert itself.

But between Hermes and Huxley there is a middle course and point. Let the men of Science only throw a bridge half-way, and think seriously over the theories of Leibnitz. We have shown our theories with regard to atomic evolution -- their last formation into compound chemical molecules being produced within our terrestrial workshops in the earth's atmosphere and not elsewhere -- as strangely agreeing with the evolution of atoms shown on Mr. Crookes' plates. Several times already it was stated in this volume that Martanda (the Sun) had evolved and aggregated, together with his smaller seven Brothers, from his Mother's (Aditi's) bosom, that bosom being prima MATER-ia -- the lecturer's primordial protyle. Esoteric doctrines teach the existence of "an antecedent form of energy having periodic cycles of ebb and swell, rest and activity" (p. 21) -- and behold a great scholar in Science now asking the world to accept this as one of the postulates. We have shown the "Mother," fiery and hot, becoming gradually cool and radiant, and that same Scientist claims as his second postulate, a scientific necessity, it would seem -- "an internal action akin to cooling, operating slowly in the protyle." Occult Science teaches that "Mother" lies stretched in infinity (during Pralaya) as the great Deep, the "dry Waters of Space," according to the quaint expression in the Catechism, and becomes wet

[[Vol. 1, Page]] 626 THE SECRET DOCTRINE.

only after the separation and the moving over its face of Narayana, the "Spirit which is invisible Flame, which never burns, but sets on fire all that it touches, and gives it life and generation."* And now Science tells us that "the first-born element . . . most nearly allied to protyle" . . . would be "hydrogen . . . which for some time would be the only existing form of matter" in the Universe. What says Old Science? It answers: just so; but we would call hydrogen and oxygen (which instils the fire of life into the "Mother" by incubation) in the pre-genetic and even pre-geological ages -- the Spirit, the noumenon of that which becomes in its grossest form oxygen and hydrogen and nitrogen on Earth -- nitrogen being of no divine origin, but merely an earth-born cement to unite other gases and fluids, and serve as a sponge to carry in itself the breath of LIFE -- pure air.** Before these gases and fluids become what they are in our atmosphere, they are interstellar Ether; still earlier and on a deeper plane -- something else, and so on in infinitum. The eminent and learned gentleman must pardon an Occultist for quoting him at such length; but such is the penalty of a Fellow of the Royal Society who approaches so near the precincts of the Sacred Adytum of Occult mysteries as virtually to overstep the forbidden boundaries.

But it is time to leave modern physical science and turn to the psychological and metaphysical side of the question. We would only remark that to the "two very reasonable postulates" required by the eminent lecturer, "to get a glimpse of some few of the secrets so darkly hidden" behind "the door of the Unknown" -- a third should be added*** -- lest no battering at it should avail; the postulate that Leibnitz, in his speculations, stood on a firm groundwork of fact and truth. The admirable and thoughtful synopsis of these speculations -- as given by John Theodore Merz in his "Leibnitz" -- shows how nearly he has brushed the hidden secrets of esoteric Theogony in his *Monadologie*. And yet that philosopher has hardly risen in his speculations above the first planes, the lower principles of the Cosmic Great Body. His theory soars to no loftier heights than those of the manifested life, self-consciousness and intelligence, leaving the regions of the earlier post-genetic mysteries untouched, as his ethereal fluid is post-planetary.

But this third postulate will hardly be accepted by the modern men

[[Footnote(s)]] -----

* "The Lord is a consuming fire." . . . "In him was life, and the life was the light of men."

** Which if separated ALCHEMICALLY would yield the Spirit of Life, and its Elixir.

*** Foremost of all, the postulate that there is no such thing in Nature as inorganic substances or bodies. Stones, minerals, rocks, and even chemical "atoms" are simply organic units in profound lethargy. Their coma has an end and their inertia becomes activity.

[[Vol. 1, Page]] 627 LEIBNITZ AND OCCULTISM.

of Science; and, like Descartes, they will prefer keeping to the properties of external things, which, like extension, are incapable of explaining the phenomenon of motion, rather than accept the latter as an independent Force. They will never become anti-Cartesian in this generation; nor will they admit that "this property of inertia is not a purely geometrical property, that it points to the existence of something in external bodies which is not extension merely." This is Leibnitz's idea as analyzed by Mertz, who adds that he called this something Force, and maintained that external things were endowed with Force, and that in order to be the bearers of this force they must have a substance, for they are not lifeless and inert masses, but the centres and bearers of form, a purely esoteric claim, since force was with Leibnitz an active principle, the division between mind and matter disappearing by this conclusion. But --

"The mathematical and dynamical inquiries of Leibnitz would not have led to the same result in the mind of a purely scientific inquirer. But Leibnitz was not a scientific man in the modern sense of the word. Had he been so, he might have worked out the conception of energy, defined mathematically the ideas of force and mechanical work, and arrived at the conclusion that even for purely scientific purposes it is desirable to look upon force, not as a primary quantity, but as a quantity derived from some other value."

But, luckily for truth --

"Leibnitz was a philosopher; and as such he had certain primary principles, which biassed him in favour of certain conclusions, and his discovery that external things were substances endowed with force was at once used for the purpose of applying these principles. One of these principles was the law of continuity, the conviction that all the world was connected, that there were no gaps and chasms which could not be bridged over. The contrast of extended thinking substances was unbearable to him. The definition of the extended substances had already become untenable: it was natural that a similar inquiry was made into the definition of mind, the thinking substance. . ."

The divisions made by Leibnitz, however incomplete and faulty from the standpoint of Occultism, show a spirit of metaphysical intuition to which no man of science, not Descartes -- not even Kant -- has ever reached. With him there existed ever an infinite gradation of thought. Only a small portion of the contents of our thoughts, he said, rises into the clearness of apperception, "into the light of perfect consciousness." Many remain in a confused or obscure state, in the state of "perceptions;" but they are there; . . . Descartes denied soul to the animal, Leibnitz endowed, as the Occultists do, "the whole creation with mental life, this being, according to him, capable of infinite gradations." And

[[Vol. 1, Page]] 628 THE SECRET DOCTRINE.

this, as Mertz justly observes, "at once widened the realm of mental life, destroying the contrast of animate and inanimate matter; it did yet more -- it reacted on the conception of matter, of the extended substance. For it became evident that external or material things presented the property of extension to our senses only, not to our thinking faculties. The mathematician, in order to calculate geometrical figures, had been obliged to divide them into an infinite number of infinitely small parts, and the physicist saw no limit to the divisibility of matter into atoms. The bulk through which external things seemed to fill space was a property which they acquired only through the coarseness of our senses. . . . Leibnitz followed these arguments to some extent, but he could not rest content in assuming that matter was composed of a finite number of very small parts. His mathematical mind forced him to carry out the argument in infinitum. And what became of the atoms then? They lost their extension and they retained only their property of resistance; they were the centres of force. They were reduced to mathematical points . . . but if their extension in space was nothing, so much fuller was their inner life. Assuming that inner existence, such as that of the human mind, is a new dimension, not a geometrical but a metaphysical dimension . . . having reduced the geometrical extension of the atoms to nothing, Leibnitz endowed them with an infinite extension in the direction of their metaphysical dimension. After having lost sight of them in the world of space, the mind has, as it were, to dive into a metaphysical world to find and grasp the real essence of what appears in space merely as a mathematical point. . . . As a cone stands on its point, or a perpendicular straight line cuts a horizontal plane only in one mathematical point, but may extend infinitely in height and depth, so the essences of things real have only a punctual existence in this physical world of space; but have an infinite depth of inner life in the metaphysical world of thought . . ." (p. 144).

This is the spirit, the very root of occult doctrine and thought. The "Spirit-Matter" and "Matter-Spirit" extend infinitely in depth, and like "the essence of things" of Leibnitz, our essence of things real is at the seventh depth; while the unreal and gross matter of Science and the external world, is at the lowest end of our perceptive senses. The Occultist knows the worth or worthlessness of the latter.

The student must now be shown the fundamental distinction between the system of Leibnitz* and that of occult philosophy, on the question of the Monads, and this may be done with his Monadology before us. It may be correctly stated that were Leibnitz' and Spinoza's systems

[[Footnote(s)]] -----

* The real spelling of the name -- as spelt by himself -- is Leibniz. He was of Slavonian descent though a German by birth.

[[Vol. 1, Page]] 629 SPINOZA AND LEIBNITZ.

reconciled, the essence and Spirit of esoteric philosophy would be made to appear. From the shock of the two -- as opposed to the Cartesian system -- emerge the truths of the Archaic doctrine. Both opposed the metaphysics of Descartes. His idea of the contrast of two substances -- Extension and Thought -- radically differing from each other and mutually irreducible, was too arbitrary and too unphilosophical for them. Thus Leibnitz made of the two Cartesian substances two attributes of one universal unity, in which he saw God. Spinoza recognised but one universal indivisible substance and absolute ALL, like Parabrahmam. Leibnitz, on the contrary perceived the existence of a plurality of substances. There was but ONE for Spinoza; for Leibnitz an infinitude of Beings, from, and in, the One. Hence, though both admitted but one real Entity, while Spinoza made it impersonal and indivisible, Leibnitz divided his personal Deity into a number of divine and semi-divine Beings. Spinoza was a subjective, Leibnitz an objective Pantheist, yet both were great philosophers in their intuitive perceptions.

Now, if these two teachings were blended together and each corrected by the other, -- and foremost of all the One Reality weeded of its personality -- there would remain as sum total a true spirit of esoteric philosophy in them; the impersonal, attributeless, absolute divine essence which is no "Being," but the root of all being. Draw a deep line in your thought between that ever-incognizable essence, and the, as invisible, yet comprehensible Presence (Mulaprakriti), or Schekinah, from beyond and through which vibrates the Sound of the Verbum, and from which evolve the numberless hierarchies of intelligent Egos, of conscious as of semi-conscious, perceptive and apperceptive Beings, whose essence is spiritual Force, whose Substance is the Elements and whose Bodies (when needed) are the atoms -- and our doctrine is there. For, says Leibnitz, "the primitive Element of every material body being Force, which has none of the characteristics of (objective) matter -- it can be conceived but can never be the object of any imaginative representation." That which was for him the primordial and ultimate element in every body and object was thus not the material atoms, or molecules, necessarily more or less extended, as those of Epicurus and Gassendi, but, as Mertz shows, immaterial and metaphysical atoms, 'mathematical points'; or real souls, -- as explained by Henri Lachelier (Professeur agrege de Philosophie), his French biographer. "That which exists outside of us in an absolute manner, are Souls whose essence is force," (Monadologie, Introd.).

Thus, reality in the manifested world is composed of a unity of units, so to say, immaterial (from our stand-point) and infinite. This Leibnitz calls "Monads," Eastern philosophy "Jivas" -- and Occultism gives it, with the Kabalists and all the Christians, a variety of names.

[[Vol. 1, Page]] 630 THE SECRET DOCTRINE.

They are with us, as with Leibnitz -- "the expression of the universe,"* and every physical point is but the phenomenal expression of the noumenal, metaphysical point. His distinction between perception and apperception, is the philosophical though dim expression of the Esoteric teachings. His "reduced universes," of which "there are as many as there are Monads" -- is the chaotic representation of our Septenary System with its divisions and sub-divisions.

As to the relation his Monads bear to our Dhyān-Chohans, Cosmic Spirits, Devas and Elementals, we may reproduce briefly the opinion of a learned and thoughtful theosophist, Mr. H. A. Bjerregaard, on the subject. In an excellent paper "On the Elementals, the Elementary Spirits, and the relationship between them and Human Beings," read by him before the "Aryan Theosophical Society of New York" (see PATH, Nos. 10 and 11, of Jan. and Feb. 1887), Mr. Bjerregaard formulates distinctly his opinion. . . . "To Spinoza, substance is dead and inactive, but to Leibnitz's penetrating mind everything is living activity and active energy. In holding this view, he comes infinitely nearer the Orient than any other thinker of his day, or after him. His discovery that an active energy forms the essence of Substance is a principle that places him in direct relationship to the Seers of the East."

And the lecturer proceeds to show that to Leibnitz atoms and elements are centres of force, or rather "spiritual beings whose very nature is to act," for the elementary particles are not acting mechanically, but from an internal principle. They are incorporeal spiritual units ("substantial," however, but not immaterial in our sense) inaccessible to all changes from without, and indestructible by any external force. Leibnitz's monads, adds the lecturer, "differ from atoms in the following particulars, which are very important for us to remember, otherwise we shall not be able to see the difference between elementals and mere matter." . . . "Atoms are not distinguished from each other, they are qualitatively alike; but one monad differs from every other monad qualitatively; and every one is a peculiar world to itself. Not so with atoms; they are absolutely alike quantitatively and qualitatively, and possess no individuality of their own." Again, the atoms (molecules,

[[Footnote(s)]] -----

* "Leibnitz's Dynamism," says Professor Lachelier, "would offer but little difficulty if, with him, the Monad had remained a simple atom of blind force. But . . ." One perfectly understands the perplexity of modern materialism!

** Leibnitz was an absolute Idealist in maintaining that "material atoms are contrary to reason" (Système nouveau, Erdmann, p. 126. col. 2). For him matter was a simple representation of the monad, whether human or atomic. Monads, he thought (as we do), are everywhere. Thus the human soul is a monad, and every cell in the human body has its monad, as every cell in animal, vegetable, and even in the (so-called) inorganic bodies. His atoms are the molecules of modern Science, and his monads those simple
[[Footnote continued on next page]]

[[Vol. 1, Page]] 631 MAYA AND MAHAMAYA.

rather) of materialistic philosophy can be considered as extended and divisible, while the monads are mere mathematical points and indivisible. Finally, and this is a point where these monads of Leibnitz closely resemble the elementals of mystic philosophy -- these monads are representative Beings. Every monad reflects every other. Every monad is a living mirror of the Universe within its own sphere. And mark this, for upon it depends the power possessed by these monads, and upon this depends the work they can do for us; in mirroring the world, the monads are not mere passive reflective agents, but spontaneously self-active; they produce the images spontaneously, as the soul does a dream. In every monad, therefore, the adept may read everything, even the future. Every monad or Elemental is a looking-glass that can speak. . .

It is at this point that Leibnitz's philosophy breaks down. There is no provision made, nor any distinction established, between the "Elemental" monad and that of a high Planetary Spirit, or even the human monad or Soul. He even goes so far as to sometimes doubt whether "God has ever made anything but Monads or substances without extension." (Examen des Principes du P. Malebranche.) He draws a distinction between Monads and Atoms,* because, as he repeatedly states, "bodies with all their qualities are only phenomenal, like the rainbow. . . Corpora omnia cum omnibus qualitibus suis non sunt aliud quam phenomena bene fundata, ut Iris" (Letter to Father Desbosses, Correspondence, letter xviii.) -- but soon after he finds a provision for this in a substantial correspondence, a certain metaphysical bond between the monads -- vinculum substantiale. Esoteric philosophy, teaching an objective Idealism -- though it regards the objective Universe and all in it as Maya, temporary illusion -- draws a practical distinction between collective illusion, Mahamaya, from the purely metaphysical stand-point, and the objective relations in it between various conscious Egos so long as this illusion lasts. The adept, therefore, may read the future in an Elemental Monad, but he has to draw for this object a great number of them, as each monad represents only a portion of the Kingdom it belongs to. "It is not in the object, but in the modification of the cognition of the object that the Monads are limited. They all go confusedly to the infinite, to the all, but they are all limited and distinguished by the

[[Footnote(s)]] -----

[[Footnote continued from previous page]] atoms that materialistic Science takes on faith, though it will never succeed in interviewing them -- except in imagination. But Leibnitz is rather contradictory in his views about Monads. He speaks of his Metaphysical Points and Formal Atoms, at one time as realities, occupying space; at another as pure Spiritual ideas; then again endows them with objectivity and aggregates and positions in their co-relations.

* The atoms of Leibnitz have, in truth, nothing but the name in common with the atoms of the Greek Materialists, or even the molecules of modern Science. He calls them formal atoms, and compares them to the substantial forms of Aristotle. (See Système Nouveau, § 3.)

[[Vol. 1, Page]] 632 THE SECRET DOCTRINE.

degrees of distinct perceptions." (§ 60, Monadologie.)* And as Leibnitz explains, "All the portions of the Universe are distinctly represented in the Monads, but some are reflected in one monad, some in another;" but a number of monads could represent simultaneously the thoughts of the two millions of inhabitants of Paris.

But what say the Occult Sciences to this, and what do they add?

They say that what is called collectively Monads by Leibnitz -- roughly viewed, and leaving every subdivision out of calculation, for the present** -- may be separated into three distinct Hosts, which, counted from the highest planes, are, firstly, "gods," or conscious, spiritual Egos; the intelligent architects, who work after the plan in the Divine Mind. Then come the Elementals, or Monads, who form collectively and unconsciously the grand Universal Mirrors of everything connected with their respective realms. Lastly, the atoms, or material molecules, which are informed in their turn by their apperceptive monads, just as every cell in a human body is so informed. (See the closing pages of Book I.) There are shoals of such informed atoms which, in their turn, inform the molecules; an infinitude of monads, or Elementals proper, and countless spiritual Forces -- Monadless, for they are pure incorporealities,*** except under certain laws, when they assume a form -- not necessarily human. Whence the substance that clothes them -- the apparent organism they evolve around their centres? The Formless ("Arupa") Radiations, existing in the harmony of Universal Will, and being what we term the collective or the aggregate of Cosmic Will on the plane of the subjective Universe, unite together an infinitude of monads -- each the mirror of its own Universe -- and thus individualize

[[Footnote(s)]] -----

* Leibnitz, like Aristotle, calls the created or emanated monads (the Elementals issued from Cosmic Spirits or Gods) -- Entelechies, [[Entelecheia]] -- and "incorporeal automata." (§ 18, Monadologie.)

** These three "rough divisions" correspond to spirit, mind (or soul), and body, in the human constitution.

*** Brother C. H. A. Bjerregaard, in his lecture (already mentioned), warns his audience not to regard the Sephiroth too much as individualities, but to avoid at the same time seeing in them abstractions. "We shall never arrive at the truth," he says, "much less the power of associating with those celestials, until we return to the simplicity and fearlessness of the primitive ages, when men mixed freely with the gods, and the gods descended among men and guided them in truth and holiness" (No. 10, Path) . . . "There are several designations for 'angels' in the Bible which clearly show that beings like the Elementals of the Kabala and the monads of Leibnitz, must be understood by that term rather than that which is commonly understood. They are called 'morning stars,' 'flaming fires,' 'the mighty ones,' and St. Paul sees them in his cosmogonic vision as 'Principalities and Powers.' Such names as these preclude the idea of personality, and we find ourselves compelled to think of them as impersonal Existences . . . as an influence, a spiritual substance, or conscious Force." (Path, No. 11, p. 322.)

[[Vol. 1, Page]] 633 THE WHEELS OF LIFE.

for the time being an independent mind, omniscient and universal; and by the same process of magnetic aggregation they create for themselves objective, visible bodies, out of the interstellar atoms. For atoms and Monads, associated or dissociated, simple or complex, are, from the moment of the first differentiation, but the principles, corporeal, psychic and Spiritual, of the "Gods," -- themselves the Radiations of primordial nature. Thus, to the eye of the Seer, the higher Planetary Powers appear under two aspects: the subjective -- as influences, and the objective -- as mystic FORMS, which, under Karmic law, become a Presence, Spirit and Matter being One, as repeatedly stated. Spirit is matter on the seventh plane; matter is Spirit -- on the lowest point of its cyclic activity; and both -- are MAYA.

Atoms are called "Vibrations" in Occultism; also "Sound" -- collectively. This does not interfere with Mr. Tyndall's scientific discovery. He traced, on the lower rung of the ladder of monadic being, the whole course of the atmospheric vibrations -- and this constitutes the objective part of the process in nature. He has traced and recorded the rapidity of their motion and transmission; the force of their impact; their setting up vibrations in the tympanum and their transmission of these to the stolithes, etc., etc., till the vibration of the auditory nerve commences -- and a new phenomenon now takes place: the subjective side of the process or the sensation of Sound. Does he perceive or see it? No; for his speciality is to discover the behaviour of matter. But why should not a psychic see it, a spiritual seer, whose inner Eye is opened, and who can see through the veil of matter? The waves and undulations of Science are all produced by atoms propelling their molecules into activity from within. Atoms fill the immensity of Space, and by their continuous vibration are that MOTION which keeps the wheels of Life perpetually going. It is that inner work that produces the natural phenomena called the correlation of Forces. Only, at the origin of every such "force," there stands the conscious guiding noumenon thereof -- Angel or God, Spirit or Demon -- ruling powers, yet the same.

As described by Seers -- those who can see the motion of the interstellar shoals, and follow them in their evolution clairvoyantly -- they are dazzling, like specks of virgin snow in radiant sunlight. Their velocity is swifter than thought, quicker than any mortal physical eye could follow, and, as well as can be judged from the tremendous rapidity of their course, the motion is circular. . . . Standing on an open plain, on a mountain summit especially, and gazing into the vast vault above and the spacial infinitudes around, the whole atmosphere seems ablaze with them, the air soaked through with these dazzling coruscations. At times, the intensity of their motion produces flashes

[[Vol. 1, Page]] 634 THE SECRET DOCTRINE.

like the Northern lights during the Aurora Borealis. The sight is so marvellous, that, as the Seer gazes into this inner world, and feels the scintillating points shoot past him, he is filled with awe at the thought of other, still greater mysteries, that lie beyond, and within, this radiant ocean. . . .

However imperfect and incomplete this explanation on "Gods, Monads and Atoms," it is hoped that some students and theosophists, at least, will feel that there may be indeed a close relation between materialistic Science, and Occultism, which is the complement and missing soul of the former.

XVI.

CYCLIC EVOLUTION AND KARMA.

IT is the Spiritual evolution of the inner, immortal man that forms the fundamental tenet in the Occult Sciences. To realize even distantly such a process, the student has to believe (a) in the ONE Universal Life, independent of matter (or what Science regards as matter); and (b) in the individual intelligences that animate the various manifestations of this Principle. Mr. Huxley does not believe in "Vital Force," others do. Dr. J. H. Hutchinson Sterling's work "Concerning Protoplasm" has made no small havoc of this dogmatic negation. Professor Beale's decision is also in favour of a Vital Principle; and Dr. B. W. Richardson's lectures on the "Nervous Ether," have been sufficiently quoted from. Thus, opinions are divided.

The ONE LIFE is closely related to the one law which governs the World of Being -- KARMA. Exoterically, this is simply and literally "action," or rather an "effect-producing cause." Esoterically it is quite a different thing in its far-fetching moral effects. It is the unerring LAW OF RETRIBUTION. To say to those ignorant of the real significance, characteristics and awful importance of this eternal immutable law, that no theological definition of a personal deity can give an idea of this impersonal, yet ever present and active Principle, is to speak in vain. Nor can it be called Providence. For Providence, with the Theists (the Christian Protestants, at any rate), rejoices in a personal male gender, while with the Roman Catholics it is a female potency, "Divine Providence tempers His blessings to secure their better effects," Wogan tells us. Indeed "He" tempers them, which Karma -- a sexless principle -- does not.

Throughout the first two Parts, it was shown that, at the first flutter

[[Vol. 1, Page]] 635 THE ROOTS AND CAUSES.

of renascent life, Svabhavat, "the mutable radiance of the Immutable Darkness unconscious in Eternity," passes, at every new rebirth of Kosmos, from an inactive state into one of intense activity; that it differentiates, and then begins its work through that differentiation. This work is KARMA.

The Cycles are also subservient to the effects produced by this activity. "The one Cosmic atom becomes seven atoms on the plane of matter, and each is transformed into a centre of energy; that same atom becomes seven rays on the plane of spirit, and the seven creative forces of nature, radiating from the root-essence . . . follow, one the right, the other the left path, separate till the end of the Kalpa, and yet are in close embrace. What unites them? KARMA." The atoms emanated from the Central Point emanate in their turn new centres of energy, which, under the potential breath of Fohat, begin their work from within without, and multiply other minor centres. These, in the course of evolution and involution, form in their turn the roots or developing causes of new effects, from worlds and "man-bearing" globes, down to the genera, species, and classes of all the seven kingdoms* (of which we know only four). For "the blessed workers have received the Thyan-kam, in the eternity" (Book of "The Aphorisms of Tson-ka-pa").

"Thyan-kam" is the power or knowledge of guiding the impulses of cosmic energy in the right direction.

The true Buddhist, recognising no "personal god," nor any "Father" and "Creator of Heaven and Earth," still believes in an absolute consciousness, "Adi-Buddhi"; and the Buddhist philosopher knows that there are Planetary Spirits, the "Dhyan Chohans." But though he admits of "spiritual lives," yet, as they are temporary in eternity, even they, according to his philosophy, are "the maya of the day," the illusion of a "day of Brahma," a short manvantara of 4,320,000,000 years. The "Yin-Sin" is not for the speculations of men, for the Lord Buddha has strongly prohibited all such inquiry. If the Dhyan Chohans and all the invisible Beings -- the Seven Centres and their direct Emanations, the minor centres of Energy -- are the direct reflex of the ONE Light, yet men are far removed from these, since the whole of the visible Kosmos consists of "self-produced beings, the creatures of Karma." Thus regarding a personal God "as only a gigantic shadow thrown upon the void of space by the imagination of ignorant men,"** they teach that only "two things are (objectively) eternal, namely Akasa and Nirvana"; and that these are ONE in reality, and but a maya when divided. "Buddhists deny creation and cannot conceive of a Creator." "Everything has come out of Akasa (or Svabhavat

[[Footnote(s)]] -----

[[Vol. 1, Page]] 636 THE SECRET DOCTRINE.

on our earth) in obedience to a law of motion inherent in it, and after a certain existence passes away. Nothing ever came out of nothing." (Buddhist Catechism.)

If a Vedantic Brahmin of the Adwaita Sect, when asked whether he believes in the existence of God, is always likely to answer, as Jacolliot was answered -- "I am myself 'God';" a Buddhist (a Sinhalese especially) would simply laugh, and say in reply, "There is no God; no Creation." Yet the root philosophy of both Adwaita and Buddhist scholars is identical, and both have the same respect for animal life, for both believe that every creature on earth, however small and humble, "is an immortal portion of the immortal matter" - for matter with them has quite another significance than it has with either Christian or materialist -- and that every creature is subject to Karma.

The answer of the Brahmin is one which would suggest itself to every ancient philosopher, Kabalist, and Gnostic of the early days. It contains the very spirit of the Delphic and Kabalistic commandments, for esoteric philosophy solved, ages ago, the problem of what man was, is, and will be; of man's origin, life-cycle -- interminable in its duration of successive incarnations or rebirths -- and finally of his absorption into the source from which he started.

But it is not physical Science that we can ever ask to read man for us, as the riddle of the Past, or that of the Future; since no philosopher is able to tell us even what man is, as he is known both to physiology and psychology. In doubt whether man was "a god or beast," he is now connected with the latter and derived from an animal. No doubt that the care of analyzing and classifying the human being as a terrestrial animal may be left to Science, which occultists -- of all men -- regard with veneration and respect. They recognize its ground and the wonderful work done by it, the progress achieved in physiology, and even -- to a degree -- in biology. But man's inner, spiritual, psychic, or even moral, nature cannot be left to the tender mercies of an ingrained materialism; for not even the higher psychological philosophy of the West is able, in its present incompleteness and tendency towards a decided agnosticism, to do justice to the inner; especially to his higher capacities and perceptions, and those states of consciousness, across the road to which such authorities as Mill draw a strong line, saying "So far, and no farther shalt thou go."

No Occultist would deny that man -- no less than the elephant and the microbe, the crocodile and the lizard, the blade of grass or the crystal -- is, in his physical formation, the simple product of the evolutionary forces of nature through a numberless series of transformations; but he puts the case differently.

It is not against zoological and anthropological discoveries, based on

[[Vol. 1, Page]] 637 THE SWING OF KARMA.

the fossils of man and animal, that every mystic and believer in a divine soul inwardly revolts, but only against the uncalled-for conclusions built on preconceived theories and made to fit in with certain prejudices. Their premises may or may not be always true; and as some of these theories live but a short life, the deductions therefrom must ever be one-sided with materialistic evolutionists. Yet it is on the strength of such very ephemeral authority, that most of the men of science frequently receive undue honours where they deserve them the least.*

To make the working of Karma, in the periodical renovations of the Universe, more evident and intelligible to the student when he arrives at the origin and evolution of man, he has now to examine with us the esoteric bearing of the Karmic Cycles upon Universal Ethics. The question is, do those mysterious divisions of time, called Yugas and Kalpas by the Hindus, and so very graphically -- [[Kuklos]] -- "cycle," ring or circle, by the Greeks, have any bearing upon, or any direct connection with, human life? Even exoteric philosophy explains that these perpetual circles of time are ever returning on themselves, periodically, and

[[Footnote(s)]] -----

* We refer those who would regard the statement as an impertinence or irreverence against accepted Science, to Mr. James Hutchinson Stirling's work concerning "Protoplasm," which is a defence of a vital Principle versus the Molecularists -- Huxley, Tyndall, Vogt, and Co. -- and request them to examine whether it is true or not to say that the scientific premises may not be always correct, but that they are accepted, nevertheless, to fill up a gap or a hole in some beloved materialistic hobby. Speaking of protoplasm and the organs of man, as "viewed by Mr. Huxley," the author says: "Probably then, in regard to any continuity in protoplasm of power, of form, or of substance, we have seen lacunae enow. Nay, Mr. Huxley himself can be adduced in evidence on the same side. Not rarely do we find in his essay admissions of PROBABILITY, where it is CERTAINTY that is alone in place. He says, for example: 'It is more than probable that when the vegetable world is thoroughly explored we shall find all plants in possession of the same powers.' When a conclusion is decidedly announced, it is rather disappointing to be told, as here, that the premisses are still to collect' (!!)) Again, here is a passage in which he is seen to cut his own 'basis' from beneath his own feet. After telling us that all forms of protoplasm consist of carbon, hydrogen, oxygen and nitrogen 'in very complex union,' he continues: 'To this complex combination, the nature of which has never been determined with exactness (!!)), the name of protein has been applied.' This, plainly, is an identification, on Mr. Huxley's own part, of protoplasm and protein; and what is said of one, being necessarily true of the other, it follows that he admits the nature of protoplasm never to have been determined with exactness, and that even in his eyes the lis is still sub judice. This admission is strengthened by the words, too, 'If we use this term -- protein -- with such caution as may properly arise out of our comparative ignorance of the things for which it stands . . . etc., etc. (p. 33 and 34, in reply to Mr. Huxley in "Yeast").

This is the eminent Huxley, the king of physiology and biology, who is proven playing at blind man's buff with premisses and facts. What may not the "smaller fry" of science do after this!

intelligently in Space and Eternity. There are "Cycles of matter"* and there are "Cycles of Spiritual evolution." Racial, national, and individual cycles. May not esoteric speculation allow us a still deeper insight into the workings of these?

This idea is beautifully expressed in a very clever scientific work:--

"The possibility of rising to a comprehension of a system of co-ordination so far outreaching in time and space all reach of human observations, is a circumstance which signalizes the power of man to transcend the limitations of changing and inconsistent matter, and assert his superiority over all unstable and perishable forms of being. There is a method in the succession of events, and in the relation of co-existent things, which the mind of man seizes hold of; and by means of this as a clue, he runs back or forward over aeons of material history of which human experience can never testify. Events germinate and unfold. They have a past which is connected with their present, and we feel a well-justified confidence that a future is appointed which will be similarly connected with the present and the past. This continuity and unity of history repeat themselves before our eyes in all conceivable stages of progress. The phenomena furnish us the grounds for the generalization of two laws which are truly principles of scientific divination, by which alone the human mind penetrates the sealed records of the past and the unopened pages of the future. The first of these is the law of evolution, or, to phrase it for our purpose, the law of correlated successiveness or organized history in the individual, illustrated in the changing phases of every single maturing system of results. . . . These thoughts summon into our immediate presence the measureless past and the measureless future of material history. They seem almost to open vistas through infinity, and to endow the human intellect with an existence and a vision exempt from the limitations of time and space and finite causation, and lift it up toward a sublime apprehension of the Supreme Intelligence whose dwelling place is Eternity." ("World-Life," p. 535 and 548.)

According to the teachings, Maya, or the illusive appearance of the marshalling of events and actions on this earth, changes, varying with nations and places. But the chief features of one's life are always in accordance with the "Constellation" one is born under, or, we should say, with the characteristics of its animating principle or the deity that presides over it, whether we call it a Dhyana Chohan, as in Asia, or an Archangel, as with the Greek and Latin churches. In ancient Symbolism it was always the SUN (though the Spiritual, not the visible, Sun was meant), that was supposed to send forth the chief Saviours and Avatars. Hence the connecting link between the Buddhas, the Avatars, and so many other incarnations of the highest SEVEN. The closer the approach to one's Prototype, "in Heaven," the better for the mortal whose personality was chosen, by his own personal deity (the seventh principle), as its terrestrial abode. For, with every effort of will toward purification and unity

[[Footnote(s)]] -----

* "The Cycles of Matter," a name given by Professor Winchell to an Essay of his written in 1860.

with that "Self-god," one of the lower rays breaks and the spiritual entity of man is drawn higher and ever higher to the ray that supersedes the first, until, from ray to ray, the inner man is drawn into the one and highest beam of the Parent-SUN. Thus, "the events of humanity do run coordinately with the number forms," since the single units of that humanity proceed one and all from the same source -- the central and its shadow, the visible SUN. For the equinoxes and solstices, the periods and various phases of the Solar course, astronomically and numerically expressed, are only the concrete symbols of the eternally living verity, though they do seem abstract ideas to uninitiated mortals. And this explains the extraordinary numerical coincidences with geometrical relations, as shown by several authors.

Yes; "our destiny is written in the stars!" Only, the closer the union between the mortal reflection MAN and his celestial PROTOTYPE, the less dangerous the external conditions and subsequent reincarnations -- which neither Buddhas nor Christs can escape. This is not superstition, least of all is it Fatalism. The latter implies a blind course of some still blinder power, and man is a free agent during his stay on earth. He cannot escape his ruling Destiny, but he has the choice of two paths that lead him in that direction, and he can reach the goal of misery -- if such is decreed to him, either in the snowy white robes of the Martyr, or in the soiled garments of a volunteer in the iniquitous course; for, there are external and internal conditions which affect the determination of our will upon our actions, and it is in our power to follow either of the two. Those who believe in Karma have to believe in destiny, which, from birth to death, every man is weaving thread by thread around himself, as a spider does his cobweb; and this destiny is guided either by the heavenly voice of the invisible prototype outside of us, or by our more intimate astral, or inner man, who is but too often the evil genius of the embodied entity called man. Both these lead on the outward man, but one of them must prevail; and from the very beginning of the invisible affray the stern and implacable law of compensation steps in and takes its course, faithfully following the fluctuations. When the last strand is woven, and man is seemingly enwrapped in the net-work of his own doing, then he finds himself completely under the empire of this self-made destiny. It then either fixes him like the inert shell against the immovable rock, or carries him away like a feather in a whirlwind raised by his own actions, and this is -- KARMA.

A materialist, treating upon the periodical creations of our globe, has expressed it in one sentence. "The whole past of the Earth is nothing but an unfolded present." This was Buchner, who little suspected that he was repeating an axiom of the Occultists. It is quite true also, as Burmeister (quoted in "Force and matter") remarks, that

"the historical investigation of the development of the Earth has proved that now and then rest upon the same base; that the past has been developed in the same manner as the present rolls on; and that the Forces which were in action ever remained the same."

The "Forces" -- their noumena rather -- are the same, of course; therefore, the phenomenal Forces must be the same also. But how can any one feel so sure that the attributes of matter have not altered under the hand of Protean Evolution? How can any materialist assert with such confidence, as is done by Rossmassler, that "this eternal conformity in the essence of phenomena renders it certain that fire and water possessed at all times the same powers and ever will possess them?" Who are they "that darken counsel with words without knowledge," and where were the Huxleys and Buchners when the foundations of the earth were laid by the great Law? It is a fundamental principle of the Occult philosophy, this same homogeneity of matter and immutability of natural laws, which are so much insisted upon by materialism; but that unity rests upon the inseparability of Spirit from matter, and, if the two are once divorced, the whole Kosmos would fall back into chaos and non-being. Therefore, it is absolutely false, and but an additional demonstration of the great conceit of our age, to assert (as men of science do) that all the great geological changes and terrible convulsions have been produced by ordinary and known physical forces. For these forces were but the tools and final means for the accomplishment of certain purposes, acting periodically, and apparently mechanically, through an inward impulse mixed up with, but beyond their material nature. There is a purpose in every important act of Nature, whose acts are all cyclic and periodical. But spiritual Forces having been usually confused with the purely physical, the former are denied by, and therefore, have to remain unknown to Science, because left unexamined.*

"The history of the World begins with its general aim," says Hegel; "the realization of the Idea of Spirit -- only in an implicit form (an sich), that is, as Nature; a hidden, most profoundly hidden unconscious instinct, and the whole process of History . . . is directed to rendering this unconscious impulse a conscious one. Thus appearing in the form of merely natural existence, natural will -- that which has been called the subjective side -- physical craving, instinct, passion, private interest, as also opinion and subjective conception -- spontaneously present themselves at the very commencement. This vast congeries of volitions, interests and activities constitute the instruments and means of the WORLD

[[Footnote(s)]] -----

* Men of science will say: We deny, because nothing of the kind has ever come within the scope of our experience. But, as argued by Charles Richet, the physiologist: "So be it, but have you at least demonstrated the contrary? . . . Do not, at any rate, deny a priori. Actual Science is not sufficiently advanced to give you such right." ("La suggestion mentale et le calcul des probabilités.")

[[Vol. 1, Page]] 641 CYCLIC WHEELS WITHIN WHEELS.

SPIRIT for attaining its object; bringing it to consciousness and realising it. And this aim is none other than finding itself -- coming to itself -- and contemplating itself in concrete actuality. But that those manifestations of vitality on the part of individuals and peoples, in which they seek and satisfy their own purposes, are at the same time the means and instruments of a higher power, of a higher and broader purpose of which they know nothing -- which they realise unconsciously -- might be made a matter of question; rather has been questioned . . . on this point I announced my view at the very outset, and asserted our hypothesis . . . and our belief that Reason governs the World and has consequently governed its history. In relation to this independently universal and substantial existence -- all else is subordinate, subservient to it, and the means for its development.**

No metaphysician or theosophist could demur to these truths, which are all embodied in esoteric teachings. There is a predestination in the geological life of our globe, as in the history, past and future, of races and nations. This is closely connected with what we call Karma and Western Pantheists, "Nemesis" and "Cycles." The law of evolution is now carrying us along the ascending arc of our cycle, when the effects will be once more re-merged into, and re-become the (now neutralized) causes, and all things affected by the former will have regained their original harmony. This will be the cycle of our special "Round," a moment in the duration of the great cycle, or the Mahayuga.

The fine philosophical remarks of Hegel are found to have their application in the teachings of Occult Science, which shows nature ever acting with a given purpose, whose results are always dual. This was stated in our first Occult volumes, in *Isis Unveiled*, p. 268, Vol. II., in the following words:--

As our planet revolves once every year around the sun, and at the same time turns once in every twenty-four hours upon its own axis, thus traversing minor circles within a larger one, so is the work of the smaller cyclic periods accomplished and recommenced, within the Great Saros.

The revolution of the physical world, according to the ancient doctrine, is attended by a like revolution in the world of intellect -- the spiritual evolution of the world proceeding in cycles, like the physical one.

Thus we see in history a regular alternation of ebb and flow in the tide of human progress. The great kingdoms and empires of the world, after reaching the culmination of their greatness, descend again, in accordance with the same law by which they ascended; till, having reached the lowest point, humanity reasserts itself and mounts up once more, the height of its attainment being, by this law of ascending progression by cycles, somewhat higher than the point from which it had before descended.

But these cycles -- wheels within wheels, so comprehensively and ingeniously symbolized by the various Manus and Rishis in India, and by the Kabiri in the West** -- do not affect all mankind at one and the same

[[Footnote(s)]] -----

** This symbolism does not prevent these now seemingly mythic personages from [[Footnote continued on next page]]

[[Vol. 1, Page]] 642 THE SECRET DOCTRINE.

time -- as explained in the Racial division of Cycles (See sub-section 6.) Hence, as we see, the difficulty of comprehending, and discriminating between them, with regard to their physical and spiritual effects, without having thoroughly mastered their relations with, and action upon the respective positions of nations and races, in their destiny and evolution. This system cannot be comprehended if the spiritual action of these periods -- pre-ordained, so to say, by Karmic law -- is separated from their physical course. The calculations of the best astrologers would fail, or at any rate remain imperfect, unless this dual action is thoroughly taken into consideration and dealt with upon these lines. And this mastery can be achieved only through INITIATION.

The Grand Cycle includes the progress of mankind from the appearance of primordial man of ethereal form. It runs through the inner cycles of his (man's) progressive evolution from the ethereal down to the semi-ethereal and purely physical: down to the redemption of man from his coat of skin and matter, after which it continues running its course downward and then upward again, to meet at the culmination of a Round, when the manvantaric "Serpent swallows its tail" and seven minor cycles are passed. These are the great Racial Cycles which affect equally all the nations and tribes included in that special Race; but there are minor and national as well as tribal cycles within those, which run independently of each other. They are called in the Eastern esotericism the Karmic cycles. In the West, since Pagan Wisdom has been repudiated as having grown from and been developed by the dark powers supposed to be at constant war and in opposition to the little tribal Jehovah -- the full and awful significance of the Greek NEMESIS (or Karma) has been entirely forgotten. Otherwise Christians would have better realized the profound truth that Nemesis is without attributes; that while the dreaded goddess is absolute and immutable as a Principle, it is we ourselves -- nations and individuals -- who propel her to action and give the impulse to its direction. KARMA-NEMESIS is the creator of nations and mortals, but once created, it is they who make of her either a fury or a rewarding Angel. Yea --

"Wise are they who worship Nemesis"

[[Footnote(s)]] -----

[[Footnote continued from previous page]] having ruled the earth once upon a time under the human form of actual living, though truly divine and god-like man. The opinion of Colonel Vallancey (and also of Count de Gobelin) that the names of the Kabiri appear to be all allegorical, and to have signified no more (?) than an almanac of the vicissitudes of the seasons -- calculated for the operations of agriculture" (Collect. de Reb. Hibern., No. 13, Praef. Sect. 5) is as absurd as his assertion that OEon, Kronos, Saturn and Dagon are all one, namely, the "patriarch Adam." The Kabiri were the instructors of mankind in agriculture, because they were the regents over the seasons and Cosmic cycles. Hence it was they who regulated, as planetary Spirits or "Angels" (messengers), the mysteries of the art of agriculture.

* Who dread Karma-Nemesis would be better.

[[Vol. 1, Page]] 643 KARMA-NEMESIS.

-- as the chorus tells Prometheus. And as unwise they, who believe that the goddess may be propitiated by whatever sacrifices and prayers, or have her wheel diverted from the path it has once taken. "The triform Fates and ever mindful Furies" are her attributes only on earth, and begotten by ourselves. There is no return from the paths she cycles over; yet those paths are of our own making, for it is we, collectively or individually, who prepare them. Karma-Nemesis is the synonym of PROVIDENCE, minus design, goodness, and every other finite attribute and qualification, so unphilosophically attributed to the latter. An Occultist or a philosopher will not speak of the goodness or cruelty of Providence; but, identifying it with Karma-Nemesis, he will teach that nevertheless it guards the good and watches over them in this, as in future lives; and that it punishes the evil-doer -- aye, even to his seventh rebirth. So long, in short, as the effect of his having thrown into perturbation even the smallest atom in the Infinite World of harmony, has not been finally readjusted. For the only decree of Karma -- an eternal and immutable decree -- is absolute Harmony in the world of matter as it is in the world of Spirit. It is not, therefore, Karma that rewards or punishes, but it is we, who reward or punish ourselves according to whether we work with, through and along with nature, abiding by the laws on which that Harmony depends, or -- break them.

Nor would the ways of Karma be inscrutable were men to work in union and harmony, instead of disunion and strife. For our ignorance of those ways -- which one portion of mankind calls the ways of Providence, dark and intricate; while another sees in them the action of blind Fatalism; and a third, simple chance, with neither gods nor devils to guide them -- would surely disappear, if we would but attribute all these to their correct cause. With right knowledge, or at any rate with a confident conviction that our neighbours will no more work to hurt us than we would think of harming them, the two-thirds of the World's evil would vanish into thin air. Were no man to hurt his brother, Karma-Nemesis would have neither cause to work for, nor weapons to act through. It is the constant presence in our midst of every element of strife and opposition, and the division of races, nations, tribes, societies and individuals into Cains and Abels, wolves and lambs, that is the chief cause of the "ways of Providence." We cut these numerous windings in our destinies daily with our own hands, while we imagine that we are pursuing a track on the royal high road of respectability and duty, and then

complain of those ways being so intricate and so dark. We stand bewildered before the mystery of our own making, and the riddles of life that we will not solve, and then accuse the great Sphinx of devouring us. But verily there is not an accident in our lives,

[[Vol. 1, Page]] 644 THE SECRET DOCTRINE.

not a misshapen day, or a misfortune, that could not be traced back to our own doings in this or in another life. If one breaks the laws of Harmony, or, as a theosophical writer expresses it, "the laws of life," one must be prepared to fall into the chaos one has oneself produced. For, according to the same writer, "the only conclusion one can come to is that these laws of life are their own avengers; and consequently that every avenging Angel is only a typified representation of their re-action."

Therefore, if any one is helpless before these immutable laws, it is not ourselves, the artificers of our destinies, but rather those angels, the guardians of harmony. Karma-Nemesis is no more than the (spiritual) dynamical effect of causes produced and forces awakened into activity by our own actions. It is a law of occult dynamics that "a given amount of energy expended on the spiritual or astral plane is productive of far greater results than the same amount expended on the physical objective plane of existence."

This state will last till man's spiritual intuitions are fully opened, which will not happen before we fairly cast off our thick coats of matter; until we begin acting from within, instead of ever following impulses from without; namely, those produced by our physical senses and gross selfish body. Until then the only palliative to the evils of life is union and harmony -- a Brotherhood IN ACTU, and altruism not simply in name. The suppression of one single bad cause will suppress not one, but a variety of bad effects. And if a Brotherhood or even a number of Brotherhoods may not be able to prevent nations from occasionally cutting each other's throats -- still unity in thought and action, and philosophical research into the mysteries of being, will always prevent some, while trying to comprehend that which has hitherto remained to them a riddle, from creating additional causes in a world already so full of woe and evil. Knowledge of Karma gives the conviction that if --

". . . . virtue in distress, and vice in triumph
Make atheists of mankind,"*

it is only because that mankind has ever shut its eyes to the great truth that man is himself his own saviour as his own destroyer. That he need not accuse Heaven and the gods, Fates and Providence, of the apparent injustice that reigns in the midst of humanity. But let him rather remember and repeat this bit of Grecian wisdom, which warns man to forbear accusing That which --

.....
"Just, though mysterious, leads us on unerring
Through ways unmark'd from guilt to punishment . . ."

-- which are now the ways and the high road on which move onward the great European nations. The Western Aryans had, every nation

[[Footnote(s)]] -----

* Dryden.

[[Vol. 1, Page]] 645 ANCIENT AND MODERN PROPHECIES.

and tribe, like their Eastern brethren of the Fifth Race, their Golden and their Iron ages, their period of comparative irresponsibility, or the Satya age of purity, while now, several of them have reached their Iron Age, the Kali-Yuga, an age BLACK WITH HORRORS. . . .

It is true, on the other hand, that the exoteric cycles of every nation have been correctly made to be derived from, and depend on, sidereal motions. The latter are inseparably blended with the destinies of nations and men. But in their purely physical sense, Europe knows of no other cycles than the astronomical, and makes its computations accordingly. Nor will it hear of any other than imaginary circles or circuits in the starry heavens that gird them --

"With centric and eccentric scribbled o'er
Cycle and epicycle, orb in orb . . ."

But with the pagans, with whom, as Coleridge has it -- ". . . . Time, cyclical time, was their abstraction of the Deity . . ." that "Deity" manifesting co-ordinately with, and only through Karma, and being that KARMA-NEMESIS itself, the cycles meant something more than a mere succession of events, or a periodical space of time of more or less prolonged duration. For they were generally marked with recurrences of a more varied and intellectual character than are exhibited in the periodical return of seasons or of certain constellations. Modern wisdom is satisfied with astronomical computations and prophecies based on unerring mathematical laws. Ancient Wisdom added to the cold shell of astronomy the vivifying elements of its soul and spirit -- ASTROLOGY. And, as the sidereal motions do regulate and determine other events on Earth -- besides potatoes and the periodical disease of that useful vegetable -- (a statement which, not being amenable to scientific explanation, is merely derided, while accepted) -- those events have to be allowed to find themselves predetermined by even simple astronomical computations. Believers in astrology will understand our meaning, sceptics will laugh at the belief and mock the idea. Thus they shut their eyes, ostrich-like, to their own fate.*

[[Footnote(s)]] -----

* Not all, however, for there are men of Science awakening to truth. This is what we read: "Whatever way we turn our eyes we encounter a mystery . . . all in Nature for us is the unknown. . . Yet they are numerous, those superficial minds for whom nothing can be produced by natural forces outside of facts observed long ago, consecrated in books and grouped more or less skilfully with the help of theories whose ephemeral duration ought, by this time, to have demonstrated their insufficiency, . . . I do not pretend to contest the possibility of invisible Beings, of a nature different from ours and susceptible of moving matter to action. Profound philosophers have admitted it in all epochs as a consequence of the great law of continuity which rules the Universe. That intellectual life, which we see starting in some way from non-being (neant) and gradually reaching man, can it stop abruptly at man to reappear only in the infinite, in the sovereign regulator of the world? This is little probable." Therefore . . . "I [[Footnote continued on next page]]

[[Vol. 1, Page]] 646 THE SECRET DOCTRINE.

This because their little historical period, so called, allows them no margin for comparison. Sidereal heaven is before them; and though their spiritual vision is still unopened and the atmospheric dust of terrestrial origin seals their sight and chains it to the limits of physical systems, still they do not fail to perceive the movements and note the behaviour of meteors and comets. They record the periodical advents of those wanderers and "flaming messengers," and prophesy, in consequence, earthquakes, meteoric showers, the apparition of certain stars, comets, etc., etc. Are they soothsayers for all that? No, they are learned astronomers.

Why, then, should occultists and astrologers, as learned, be disbelieved, when they prophesy the return of some cyclic event on the same mathematical principle? Why should the claim that they know it be ridiculed? Their forefathers and predecessors, having recorded the recurrence of such events in their time and day, throughout a period embracing hundreds of thousands of years, the conjunction of the same constellations must necessarily produce, if not quite the same, at any rate, similar effects. Are the prophecies derided, because of the claim of the hundreds of thousands of years of observation, and the millions of years of the human races? In its turn modern Science is laughed at for its far more modest geological and anthropological figures, by those who hold to Biblical chronology. Thus Karma adjusts even human laughter at the mutual expense of sects, learned societies, and individuals. Yet in the prognostication of such future events, at any rate, all foretold on the authority of cyclic recurrences, there is no psychic phenomenon involved. It is neither prevision, nor prophecy; no more than is the signalling of a comet or star, several years before its appearance. It is simply knowledge and mathematically correct computations which enable the WISE MEN OF THE EAST to foretell, for instance, that England is on the eve of such or another catastrophe; France, nearing such a point of her cycle, and Europe in general threatened with, or rather, on the eve of, a cataclysm, which her own cycle of racial Karma has led her to. The reliability of the information depends, of course, on the acceptance or rejection of the claim for a tremendous period of historical observation. Eastern Initiates maintain that they have preserved records of the racial development and of events of universal import ever since the beginning of the Fourth Race -- that which preceded being traditional. Moreover, those who believe in Seership and Occult

[[Footnote(s)]] -----

[[Footnote continued from previous page]] no more deny the existence of Spirits than I deny soul while trying to explain certain facts without their hypothesis . . . "The Non-Defined Forces," Historical and Experimental Researches, p. 3. The above is written by A. de Rochas, a well-known man of science in France, his work being one of the signs of the time. (Paris: Masson, Boulevard St. Germain, 1887.)

[[Vol. 1, Page]] 647 ASTROLOGY A SCIENCE.

powers will have no difficulty in crediting the general character, at least, of the information given, even if traditional, once the latter is checked and corrected by the corroboration of clairvoyance and esoteric knowledge. But in the present case no such metaphysical belief is claimed as our chief dependence, but a proof is given on what, to every Occultist, is quite scientific evidence -- the records preserved through the Zodiac for incalculable ages.

It is now amply proved that even horoscopes and judiciary astrology are not quite based on a fiction, and that stars and constellations, consequently, have an occult and mysterious influence on, and connection with, individuals. And if with the latter, why not with nations, races, and mankind in bulk? This, again, is a claim made on the authority of the Zodiacal records. We shall examine then, if you please, how far the Zodiac was known to the ancients, and how far it is forgotten by the moderns.

XVII.
"THE ZODIAC AND ITS ANTIQUITY."

"ALL men are apt to have a high conceit of their own understanding, and to be tenacious of the opinions they profess," said Jordan, justly adding to this -- "and yet almost all men are guided by the understandings of others, not by their own; and may be said more truly to adopt, than to beget, their opinions."

This becomes doubly true in the matter of scientific opinions upon hypotheses offered for consideration -- the prejudice and preconceptions of "authorities," so called, often deciding upon questions of the most vital importance for history. There are several such predetermined opinions among our learned Orientalists, yet few are more unjust or illogical than the general error with regard to the antiquity of the Zodiac. Thanks to the hobby of some German Orientalists, English and American Sanskritists have accepted Professor Weber's opinion that the peoples of India had no idea or knowledge of the Zodiac prior to the Macedonian invasion, and that it is from the Greeks that the ancient Hindus imported it into their country. We are further told, by several other "authorities," that no Eastern nation knew of the Zodiac before the Hellenes kindly acquainted their neighbours with their invention. This, in the face of the Book of Job, declared, even by themselves, to be the oldest in the Hebrew canon, certainly prior to Moses, and which speaks of the making "of Arcturus, Orion, and Pleiades (Ash, Kesil, and

[[Vol. 1, Page]] 648 THE SECRET DOCTRINE.

Cimah) and the chambers of the South" (ix. 9); of Scorpio and the Mazzaroths -- the TWELVE SIGNS (xxxviii., 31, 32), which words, if they mean anything, imply knowledge of the Zodiac even among the nomadic Arabic tribes. The Book of Job, they say, precedes Homer and Hesiod by at least one thousand years -- the two Greek poets having themselves flourished some eight centuries before the Christian era (!!). One who prefers, by the bye, to believe Plato, who shows Homer flourishing far earlier, could point to a number of Zodiacal signs mentioned in the Iliad and the Odyssey, in the Orphic poems, and elsewhere. But since the cock-and-bull hypothesis of some modern critics to the effect that neither Orpheus, nor yet Homer and Hesiod, ever existed, it would seem time lost to mention these Archaic authors at all. The Arabian Job will suffice; unless, indeed, his volume of lamentations, along with the poems of the two Greeks, adding to them those of Linus, should now be also declared to be the patriotic forgery of the Jew Aristobulus. But if the Zodiac was known in the days of Job, how could the civilized and philosophical Hindus have remained ignorant of it?

Risking the arrows of modern criticism -- rather blunted by misuse -- the reader may be made acquainted with Bailly's learned opinion upon the subject. Inferred speculations may be shown to be erroneous. Mathematical calculations stand on more secure grounds. Taking as a starting point several astronomical references in Job, Bailly devised a very ingenious means of proving that the earliest founders of the science of the Zodiac belonged to an antediluvian, primitive people. The fact that he seems willing to see in Thoth, Seth, and in Fohi (of China), some of the Biblical patriarchs, does not interfere with the validity of his proof as to the antiquity of the Zodiac.* Even accepting, for argument's sake, his cautious 3700 years B.C. as the correct age of the science, this date proves in the most irrefutable way that it was not the Greeks who invented the Zodiac, for the simple reason that they did not yet exist as a nation thirty-seven centuries B.C. -- not as an historical race admitted by the critics, at any rate. Bailly then calculated the period at which the constellations manifested the atmospheric influence called by Job "sweet influences of the Pleiades"*** (in Hebrew, Chimah, see Job xxxviii. 31); of the Cesil (Orion); and that of the desert rains with reference to Scorpio, the eighth constellation; and found that in presence the eternal conformity of those divisions of the zodiac and names of the planets applied in the same order everywhere and always; and in presence of the impossibility of attributing it all to chance and coincidence,

[[Footnote(s)]] -----

* Astronomie Antique.

** The Pleiades, as all know, are the seven stars beyond the Bull, which appear at the beginning of spring. They have a very occult meaning in the Hindu esoteric philosophy, and are connected with sound and other mystic principles in Nature.

[[Vol. 1, Page]] 649 THE ZODIAC IN THE BIBLE.

"which never creates such similarities," there must be allowed for the zodiac a great antiquity indeed. (See Astronomie Antique, pp. 63 to 74.)

Again, if the Bible is supposed to be an authority on any matter (and there are some who still believe so, whether from Christian or Kabalistical considerations), then the zodiac is clearly mentioned in II Kings, xxiii. 5. Before the "book of the law" was "found" by Hilkiah, the high priest (xxii.), the signs of the zodiac were known and worshipped. They were held in the same adoration as the sun and moon, since the "priests, whom the kings of Judah had ordained to burn incense . . . unto Baal, to the sun, moon, and to the planets, and to all the host of heaven," or the twelve signs or constellations, as the marginal note in the English Bible explains (see II Kings xxiii. 5), had followed the injunction for centuries. They were stopped in their idolatry only by King Josiah, 624 years B.C.

The Old Testament is full of allusions to the twelve zodiacal signs, and the whole scheme is built upon it -- heroes, personages, and events. Thus in the dream of Joseph, who saw eleven "stars" bowing to the twelfth, which was his "star," the zodiac is meant. The Roman Catholics have discovered in it, moreover, a prophecy of Christ, who is that twelfth star, they say, and the eleven apostles; the absence of the twelfth being also regarded as a prophetic allusion to the treachery of Judas. The twelve sons of Jacob are again a reference to the same, as justly pointed out by Villapandus (Temple de Jerusalem, Vol. II., p. 2nd part, chap. xxx). Sir James Malcolm, in his History of Persia (ch. vii.), shows the Dabistan echoing all such traditions about the Zodiac. He traces the invention of it to the palmy days of the golden age of Iran, remarking that one of the said traditions maintains that the genii of the planets are represented under the same shapes and figures they had assumed, when they showed themselves to several holy prophets, and have thus led to the establishment of the rites based on the Zodiac.

Pythagoras, and after him Philo Judaeus, held the number 12 as very sacred. "The dodecahedron is a PERFECT number." It is the one among the signs of the Zodiac, Philo adds, that the sun visits in twelve months, and it is to honour that sign that Moses divided

his nation into twelve tribes, established the twelve cakes (Levit. xxiv., 5) of the shewbread, and placed twelve precious stones around the ephod of the pontiffs. (See De Profugis.)

According to Seneca, Berossus taught prophecy of every future event and cataclysm by the Zodiac; and the time fixed by him for the conflagration of the world (pralaya), and another for a deluge, is found to answer to the time given in an ancient Egyptian papyrus. It comes at every renewal of the cycle of the sidereal year of 25,868 years. The names of the Akkadian months were called by, and derived from, the

[[Vol. 1, Page]] 650 THE SECRET DOCTRINE.

names of the signs of the Zodiac, and the Akkadians themselves are far earlier than the Chaldaeans. Mr. Proctor shows, in his *Myths and Marvels of Astronomy*, that the ancient astronomers had acquired a system of the most accurate astronomy 2,400 years B.C.; the Hindus date their Kali Yug from a great periodical conjunction of the planets thirty-one centuries B.C.; and, withal, it is the Greeks belonging to the expedition of Alexander the Great, who were the instructors of the Aryan Hindus in astronomy!

Whether the origin of the Zodiac is Aryan or Egyptian, it is still of an immense antiquity. Simplicius (VIth cent. A.D.) writes that he had always heard that the Egyptians had kept astronomical observations and records for the last 630,000 years. This statement appears to frighten Mr. G. Massey, who remarks on this in his *Natural Genesis* (318) that "if we read this number of years by the month which Euxodus said the Egyptians termed a year, that would still yield the length of two cycles of precession (or 51,736 years)." Diogenes Laertius carried back the astronomical calculations of the Egyptians to 48,863 years before Alexander the Great (Proem, 2). Martianus Capella corroborates the same by telling posterity that the Egyptians had secretly studied astronomy for over 40,000 years, before they imparted their knowledge to the world (*Astronomy of the Ancients*, Lewis, p. 264).

Several valuable quotations are made in the *Natural Genesis* with the view of supporting the author's theories, but they justify the teaching of the Secret Doctrine far more. For instance, Plutarch is quoted from his *Life of Sulla*, saying: "One day when the sky was serene . . . a sound was heard in it . . . of a trumpet, so loud, shrill and mournful, that it affrighted . . . the world. The Tuscan sages said that it portended a new race of men, and a renovation of the world; for they affirmed that there were eight several kinds of men, all being different in life and manners, and that Heaven had allotted each its time, which was limited by the circuit of the great year" (25,868 years).

This reminds one strongly of our seven races of men, and of the eighth -- the "animal man" -- descended from the later Third Race; as also of the successive submersions and destruction of the continents which finally disposed of almost the entire bulk of that race.

"The Assyrians," says Iamblichus, "have not only preserved the memorials of seven and twenty myriads of years (270,000 years) as Hipparchus says they have, but likewise of the whole apocatastases and periods of the seven rulers of the world." (Proclus, in *Timaeus*, b. I.) This is the calculation of the Esoteric Doctrine, as approximately as it can be. For 1,000,000 of years are allowed for our present Root-race (the Fifth), and about 850,000 years since the submersion of the last large island (part of the Continent), the Ruta of the Fourth Race, or the Atlanteans;

[[Vol. 1, Page]] 651 THE JEWISH PATRIARCHS ZODIACAL SIGNS.

while Daitya, a small island inhabited by a mixed race, was destroyed about 270,000 years ago, during the glacial period or thereabouts (vide Book II.). But the Seven Rulers, or the seven great Dynasties of the divine kings belong to the traditions of every great people of antiquity. Wherever twelve are mentioned, these are invariably the 12 signs of the zodiac.

So patent is the fact, that the Roman Catholic writers -- especially among the French Ultramontanes -- have tacitly agreed to connect the twelve Jewish Patriarchs with the signs of the Zodiac. This is done in a kind of prophetic-mystic way, which would sound to pious and ignorant ears like a portentous sign, a tacit divine recognition of the "chosen people of God," whose finger has purposely traced in heaven, from the beginning of creation, the numbers of these patriarchs. For instance, these writers (De Mirville among others) recognise curiously enough all the characteristics of the 12 signs of the Zodiac, in the words addressed by the dying Jacob to his Sons, and in his definitions of the future of each Tribe. (Vide *Genesis*, ch. xlix.) Moreover, the respective banners of the same tribes are claimed to have exhibited the same symbols and the same names as the signs, repeated in the 12 stones of the Urim and Thummim, and on the 12 wings of the cherub. Leaving the proof of exactitude in the alleged correspondence to the said mystics, it is as follows: Man, or the Aquarius, is in the sphere of Reuben, who is declared as "unstable as water" (the Vulgate has it, to be "rushing like water"; Gemini, in the strong fraternal association of Simeon and Levi; Leo, in that of Judah, "the strong Lion" of his tribe, "the lion's whelp"; the Pisces, in Zabulon, who "shall dwell at the haven of the sea"; Taurus, in Issachar, because he is "a strong ass couching down," etc., and therefore associated with the stables; Virgo-Scorpio, in Dan, who is described as "a serpent, an adder in the path that biteth," etc.; Capricornus in Naphtali, who is "a hind (a deer) let loose"; Cancer, in Benjamin, for he is "ravenous"; Libra, the "Balance," in Asher, whose "bread shall be fat"; Sagittarius in Joseph, because "his bow abode in strength." To make up for the twelfth sign, Virgo, made independent of Scorpio, is Dina, the only daughter of Jacob. (See *Genesis* xlix.) Tradition shows the alleged tribes carrying the 12 signs on their banners. But the Bible is, besides these, full of theo-cosmological and astronomical symbols and personifications.

It remains to wonder, and query -- if the actual, living Patriarch's destiny was so indissolubly wound up with the Zodiac -- how it is that after the loss of the ten tribes, ten signs out of the twelve have not also miraculously disappeared from the sidereal fields? But this is of no great concern. Let us rather busy ourselves with the history of the Zodiac itself.

[[Vol. 1, Page]] 652 THE SECRET DOCTRINE.

Now the reader may be reminded of some opinions expressed on the subject by several of the highest authorities in Science.

Newton believed the invention of the Zodiac could be traced as far back as the expedition of the Argonauts; and Dulaure fixed its origin at 6,500 years B.C., just 2,496 years before the creation of the World according to the Bible chronology.

Creuzer believes it very easy to show that most of the theogonies are intimately connected with religious calendars, and point to the Zodiac as their prime origin -- if not identical with the Zodiac known to us now, then something very analogous to it. He feels certain that the Zodiac and its mystic relations are at the bottom of all the mythologies, under one form or the other, and that it had existed in the old form for ages before; owing to some singular co-ordination of events, it was brought out in the present defined astronomical garb. (Creuzer, Book III., page 930.)

Whether "the genii of the planets" (our Dhyān Chohans of supra-mundane spheres) showed themselves to "holy prophets" or not, as claimed in the Dabistan, it would seem that great laymen and warriors were favoured in the same way in days of old, when astrological magic and theophania went hand in hand in Chaldea. For Xenophon, no ordinary man, narrates of Cyrus, that at the moment of his death that king was giving ardent thanks to gods and heroes, for having so often instructed him themselves about the signs in heaven, [[ev ouraniois semeiois]] (Cyropedie, "Ant. du Zodiaque.")

Unless the science of the zodiac is supposed to be of the highest antiquity and universality, how account for its signs being traced in the oldest theogonies? Laplace is said to have felt struck with amazement at the idea of the days of Mercury (Wednesday), Venus (Friday), Jupiter (Thursday), Saturn (Saturday), and others being related to the days of the week in the same order and with the same names in India as in Northern Europe. "Try, if you can, with the present system of autochthonous civilizations, so much in fashion in our day, to explain how nations with no ancestry, no traditions or birthplace in common, could have succeeded in inventing a kind of celestial phantasmagoria, a veritable imbroglia of sidereal denominations, without sequence or object, having no figurative relation with the constellations they represent, and still less, apparently, with the phases of our terrestrial life they are made to signify," had there not been a general intention and a universal cause and belief, at the root of all this? (Pneumatologie, Vol. IV., p. 61.) Most truly has Dupuis asserted the same: "Il est impossible de decouvrir le moindre trait de ressemblance entre les parties du ciel et les figures que les astronomes y ont arbitrairement tracees, et de l'autre cote; le hazard est impossible," he says. (Origine des Cultes, "Zodiaque.")

[[Vol. 1, Page]] 653 THE SIGN OF JONAS.

Most certainly chance is "impossible." There is no "chance" in Nature, wherein everything is mathematically co-ordinate and mutually related in its units. "Chance," says Coleridge, "is but the pseudonym of God (or Nature), for those particular cases which He does not choose to subscribe openly with His sign manual." Replace the word "God" by that of Karma and it will become an Eastern axiom. Therefore, the sidereal "prophecies" of the zodiac, as they are called by Christian mystics, never point to any one particular event, however solemn and sacred it may be for some one portion of humanity, but to ever-recurrent, periodical laws in nature, understood but by the Initiates of the sidereal gods themselves.

No occultist, no astrologer of Eastern birth, will ever agree with Christian mystics, or even with Kepler's mystical astronomy, his great science and erudition notwithstanding; simply because, if his premises are quite correct, his deductions therefrom are one-sided and biased by Christian preconceptions. Where the latter finds a prophecy directly pointing at the Saviour, other nations see a symbol of an eternal law decreed for the actual manvantara. Why see in the Pisces a direct reference to Christ -- one of the several world-reformers, a Saviour but for his direct followers, but only a great and glorious Initiate for all the rest -- when that constellation shines as a symbol of all the past, present, and future Spiritual Saviours who dispense light and dispel mental darkness? Christian symbologists have tried to prove that it was that of Ephraim (Joseph's son), the elect of Jacob, that therefore, it was at the moment of the Sun entering into the sign of the Fish (Pisces) that "the Elect Messiah, the [[Ichthus]] of the first Christians, had to be born. But, if Jesus of Nazareth was that Messiah -- was he really born at that "moment," or was he made to be so born by the adaptation of the theologians, who sought only to make their preconceived ideas fit in with sidereal facts and popular belief? Everyone knows that the real time and year of the birth of Jesus are totally unknown. And it is the Jews, whose forefathers have made the word Dag signify both "fish" and "Messiah," who, during the forced development of their rabbinical language, are the first to deny this Christian claim. And what of the further facts that Brahmins also connect their "Messiah," the eternal Avatar Vishnu, with a fish and the Deluge, and that the Babylonians made of their Dag-On, equally a fish and a Messiah, the Man-Fish and Prophet?

There are those learned iconoclasts among Egyptologists, who say that "when the Pharisees sought a 'sign from heaven' Jesus said, 'there shall no sign be given but the sign of Jonas' (Mat. xvi. 4). . . . The sign of Jonas is that of the Oan or fishman of Nineveh. . . . Assuredly there was no other sign than that of the Sun reborn in Pisces. The

[[Vol. 1, Page]] 654 THE SECRET DOCTRINE.

voice of the Secret Wisdom says those who are looking for signs can have no other than that of the returning fish-man Ichthys, Oannes, or Jonas -- who could not be made flesh."

It would appear that Kepler maintained it as a positive fact that, at the moment of the "incarnation," all the planets were in conjunction in the sign of Pisces, called by the Jews (the Kabalists) the "constellation of the Messiah." "It is in this constellation," he averred, "that was placed the star of the Magi." This statement, quoted by Dr. Sepp (*Vie de notre Seigneur Jesus Christ*, Vol. I. p. 9), emboldened him to remark that "all the Jewish traditions while announcing that star, that many nations have seen," (!)* added that "it would absorb the seventy planets that preside over the destinies of various nations on this globe."** "In virtue of those natural prophecies," explains Dr. Sepp, "it was written in the stars of the firmament that the Messiah would be born in the lunar year of the world 4320, in that memorable year when the entire choir of the planets would be feasting its jubilee."

There was indeed a rage, at the beginning of the present century, for claiming from the Hindus restoration of an alleged robbery from the Jews of their "gods," patriarchs, and chronology. It was Wilford who had recognized Noah in Prithee and in Satyavrata, Enos in Dhruva, and even Assur in Iswara. Yet, after being residents for so many years in India, some Orientalists, at least, ought to have known that it was not the Hindus alone who had these figures, or who had divided their great age into four minor ages. Nevertheless writers in the Asiatic Researches indulged in the most extravagant speculations.

"Christian theologians think it their duty to write against the long periods of Hindu chronology," argues very pertinently S. A. Mackey, the Norwich "philosopher, astronomer, and shoemaker." "But when a man of learning crucifies the names and numbers of the ancients, and wrings and twists them into a form which means something quite foreign to the intention of the ancient authors; but which, so mutilated, fits in with the birth of some maggot pre-existing in his own brain with so much exactness that he pretends to be amazed at the discovery, I cannot think him quite so pardonable" (*Key of Urania*).

This is intended to apply to Captain (later Colonel) Wilford, but the

[[Footnote(s)]] -----

* Whether many nations have seen that identical star, or not, we all know that the sepulchres of "the three Magi," who rejoice in the quite Teutonic names of Kaspar and Melchior, Balthazar being the only exception, and the two having little of the Chaldean ring in them -- are shown by the priests in the famous cathedral of Cologne, where the Magian bodies are not only supposed, but firmly believed to have been buried.

** This tradition about the seventy planets that preside over the destinies of nations, is based on the occult cosmogonical teaching that besides our own septenary chain of world-planets, there are many more in the solar system.

[[Vol. 1, Page]] 655 CHALDEO-JUDEAN GODS.

words may fit more than one of our modern Orientalists. The former was the first to crown his unlucky speculations in Hindu chronology and the Puranas by connecting the 4,320,000 years with biblical chronology, simply dwarfing the figures to 4,320 years (the supposed lunar year of the Nativity), and Dr. Sepp has simply plagiarized the idea from this gallant officer. Moreover, he persisted in seeing in them Jewish property, as well as a Christian prophecy, thus accusing the Aryans of having helped themselves to Semitic revelation, whereas it was the reverse. The Jews, moreover, need not be accused of despoiling the Hindus, of whose figures Ezra probably knew nothing. They had evidently and undeniably borrowed them from the Chaldeans, along with their gods. Of the 432,000 years of the Chaldean divine Dynasties* they made 4,320 lunar years from the world's creation to the Christian era; as to the Babylonian and Egyptian Gods, they transformed them as quietly and modestly into Patriarchs. Every nation was more or less guilty of such refashioning and adaptation of a Pantheon (common once to all) of universal, into national, tribal gods and Heroes. It was their property in its new Pentateuchal garb, and no one of the Israelites has ever forced it upon any other nation -- least of all upon Europeans.

Without stopping to notice this very unscientific chronology more than is necessary, we may make a few remarks that may be found to the point. These figures of 4,320 lunar years of the world (in the Bible the solar years are used) are not fanciful, as such, even if their application is quite erroneous; for they are only the distorted echo of the primitive esoteric, and later on Brahminical doctrine concerning the Yugas. A "Day" of Brahma equals 4,320,000,000 years, as also a "Night" of Brahma, or the duration of Pralaya, after which a new SUN rises trium-

[[Footnote(s)]] -----

* Every scholar is aware, of course, that the Chaldeans claimed the same figures (432) or (432,000) for their divine dynasties as the Hindus do for their Mahayuga, namely, 4,320,000. Therefore has Dr. Sepp, of Munich, undertaken to support Kepler and Wilford in their charge that the Hindus had borrowed them from the Christians, and the Chaldeans from the Jews, who, as claimed, expected their Messiah in the lunar year of the world 4,320!!! As these figures, according to ancient writers, were based by Berosus on the 120 Saroses -- each of the divisions meaning six neroses of 600 years each, making a sum total of 432,000 years -- they do not thus appear peremptory. But the pious professor of Munich undertook to explain them in the correct way. He claims to have solved the riddle by showing that "the saros being composed according to Pliny of 222 synodial months, to wit, 18 years 6/10," the calculator naturally fell back into the figures "given by Suidas," who affirmed that the 120 saroses made 2,222 sacerdotal and cyclic years, which equalled 1,656 solar years." (*Vie de Notre Seigneur Jesus Christ*, Vol. II., p. 417.)

Suidas said nothing of the kind, and, if he had, he would prove little, if anything, by it. The neroses and saroses were the same thorn in the side of uninitiated ancient writers, as the apocalyptic 666 of the "great Beast" is in that of the modern, and they have found their unlucky Newtons as the latter figures have.

phantly over a new manvantara, for the septenary chain it illuminates. The teaching had penetrated into Palestine and Europe centuries before the Christian era (see Isis Unveiled II. 132), and was present in the minds of the Mosaic Jews, who based upon it their small cycle, though it received full expression only through the Christian chronologers of the Bible, who adopted it, as also the 25th of December, the day on which all the solar gods were said to have been incarnated. What wonder, then, that the Messiah was made to be born "the lunar year of the world 4,320?" The "Son of Righteousness and Salvation" had once more arisen and had dispelled pralaya darkness of chaos and non-being on the plane of our objective little globe and chain. Once the subject of the adoration was settled upon, it was easy to make the supposed events of his birth, life, and death, fit in with the Zodiacal exigencies and old traditions, though they had to be somewhat remodelled for the occasion.

Thus what Kepler said, as a great astronomer, becomes comprehensible. He recognised the grand and universal importance of all such planetary conjunctions, "each of which" -- as he has well said -- "is a climacteric year of Humanity."* The rare conjunction of Saturn, Jupiter, and Mars has its significance and importance on account of its certain great results -- in India and China as much as it has in Europe for the respective mystics of all those countries. And it is certainly no better now than a mere assumption to maintain that nature had only Christ in view, when building her (to the profane) fantastic and meaningless constellations. If it is claimed that it was no hazard that could lead the archaic architects of the Zodiac, thousands of years ago, to mark with the asterisk (a) the figure of Taurus, with no better or more valid proof of it being prophetic of the Verbum or Christ than that the aleph of Taurus means "the ONE" and the FIRST, and that Christ was also the alpha or the ONE, then this "proof" may be shown strangely invalidated in more than one way. To begin with, the Zodiac existed before the Christian era, at all events; further, all the Sun-gods had been mystically connected with that constellation (Taurus) -- Osiris, for instance -- and were all called by their respective votaries "the First." Then the compilers of the mystical epithets given to the Christian Saviour, were all more or less acquainted with

[[Footnote(s)]] -----

* The reader has to bear in mind that the phrase "climacteric year" has more than the usual significance, when used by Occultists and Mystics. It is not only a critical period, during which some great change is periodically expected, whether in human or cosmic constitution, but it likewise pertains to spiritual universal changes. The Europeans called every 63rd year "the grand climacteric," and perhaps justly supposed those years to be the years produced by multiplying 7 into the odd numbers 3, 5, 7 and 9. But seven is the real scale of nature, in Occultism, and 7 has to be multiplied in quite a different way and method, unknown as yet to European nations.

the significance of the Zodiacal signs; and it is easier to suppose that they should have arranged their claims so as to answer the mystic signs, than that the latter should have shone as a prophecy for one portion of humanity, for millions of years, taking no heed of the numberless generations that had gone before, and those to be born hereafter.

"It is not simple chance," we are told, "that has placed in certain spheres, on a throne, the head of that bull (Taurus), trying to push away with the ansated cross on its horns, a Dragon; the more so, since this constellation of Taurus was called 'the great city of God and the mother of revelations,' and also 'the interpreter of the divine voice,' the Apis pacis of Hermoutis, in Egypt, which (as the patristic fathers would assure the world) preferred oracles that related to the birth of the Saviour" (Pneumatologie, iv., 71).

To this theological assumption there are several answers. Firstly, the ansated Egyptian cross, or tau, the Jaina cross, or Swastica, and the Christian cross have all the same meaning. Secondly, no peoples or nations except the Christians gave the significance to the Dragon that is given to it now. The serpent was the symbol of WISDOM; and the Bull (Taurus) the symbol of physical or terrestrial generation. Thus the latter, pushing off the Dragon, or spiritual, Divine Wisdom, with the Tau, or Cross -- which is esoterically "the foundation and framework of all construction" -- would have an entirely phallic, physiological meaning, had it not still another significance unknown to our Biblical scholars and symbologists. At any rate, it shows no special reference to the Verbum of St. John, except, perhaps, in a general sense. The taurus (which, by the way, is no lamb, but a bull) was sacred in every Cosmogony, with the Hindus as with the Zoroastrians, with the Chaldees as with the Egyptians. So much, every schoolboy knows.

It may perhaps help to refresh the memory of our Theosophists by referring them to what was said of the Virgin and the Dragon, and the universality of periodical births and re-births of World-Saviours -- solar gods -- in Isis, II., 490, with reference to certain passages in Revelations.

In 1853, the savant known as Erard-Mollien read before the Institute of France a paper tending to prove the antiquity of the Indian Zodiac, in the signs of which were found the root and philosophy of all the most important religious festivals of that country, the origin of which religious ceremonies goes back into the night of time at least 3,000 B.C., as the lecturer tried to demonstrate. The Zodiac of the Hindus, he thought, was far anterior to the Zodiac of the Greeks, and differed from it in some particulars vastly. In it one sees the Dragon on a tree, at the foot of which the "Virgin," Kanya-Durga, one of the most ancient goddesses, is placed on a lion dragging after him the solar car. "This is the reason why," he added, "this Virgin Durga is not the simple memento of

an astronomical fact, but verily the most ancient divinity of the Indian Olympus. She is evidently the same of whom all the Sibylline books spoke, those works that have been the source of the inspiration of Virgil; the virgin whose return was prophesied as a sign of universal renovation. . . . And why," he added, "when we see to this day, the months named after the deity-names of this solar Zodiac by the Malayalim-speaking people of southern India -- why should that people have abandoned their ancestral Zodiac to burden themselves with that of the Greeks? Everything proves, on the contrary, that these zodiacal figures have been transmitted to the Greeks by the Chaldees, who got them from the Brahmans." (See Recueil de l'Academie des Inscriptions, 1853.)

But all this is very poor testimony. Let us remember, however, also that which was said and accepted by the contemporaries of Volney, who, in his "Ruins of Empires," p. 360, remarks that as Aries was in its fifteenth degree 1447 B.C., it follows that the first degree of "Libra" could not have coincided with the Vernal equinox more lately than 15,194 years B.C., to which, if you add 1,790 years since Christ, it appears that 16,984 years have elapsed since the origin of the Zodiac.

Dr. Schlegel, moreover, in his Uranographie Chinoise assigns to the Chinese Astronomical Sphere an antiquity of 18,000 years. (Vide pp. 54, 196, et seq.)

Nevertheless, as opinions quoted without adequate proofs are of little avail, it may be more useful to turn to scientific evidence. M. Bailly, the famous French astronomer of the last century, Member of the Academy, etc., etc., asserts that the Hindu systems of astronomy are by far the oldest, and that from them the Egyptians, Greeks, Romans, and even the Jews derived their knowledge. In support of these views he says --

"The astronomers who preceded the epoch 1,491 are, first, the Alexandrian Greeks; Hipparchus, who flourished 125 years before our era, and Ptolemy, 260 years after Hipparchus. Following these were the Arabs, who revived the study of astronomy in the ninth century. These were succeeded by the Persians and the Tartars, to whom we owe the tables of Massireddin in 1269, and those of Ulug-beg in 1437. Such is the succession of events in Asia as known prior to the Indian epoch 1491. What, then, is an epoch? It is the observation of the longitude of a star at a given moment, the place in the sky where it was seen, and which serves as a point of reference, a starting-point from which to calculate both the past and future positions of the star from its observed motion. But an epoch is useless unless the motion of the star has been determined. A people, new to science and obliged to borrow a foreign astronomy, finds no difficulty in fixing an epoch, since

[[Vol. 1, Page]] 659 BAILLY'S CONCLUSIONS.

the only observation needed is one which can be made at any moment. But what it needs above all, what it is obliged to borrow, are those elements which depend on accurate determination, and which require continuous observation; above all, those motions which depend on time, and which can only be accurately determined by centuries of observation. These motions, then, must be borrowed from a nation which has made such observations, and has behind it the labours of centuries. We conclude, therefore, that a new people will not borrow the epochs of an ancient one, without also borrowing from them the 'average motions.' Starting from this principle we shall find that the Hindu epochs 1491 and 3102 could not have been derived from those of either Ptolemy or Ulug-beg."

There remains the supposition that the Hindus, comparing their observations in 1491 with those previously made by Ulug-beg and Ptolemy, used the intervals between these observations to determine the "average motions." The date of Ulug-beg is too recent for such a determination; while those of Ptolemy and Hipparchus were barely remote enough. But if the Hindu motions had been determined from these comparisons, the epochs would be connected together. Starting from the epochs of Ulug-beg and Ptolemy we should arrive at all those of the Hindus. But this is not the case. Hence foreign epochs were either unknown or useless to the Hindus.*

We may add to this another important consideration. When a nation is obliged to borrow from its neighbours the methods or the average motions of its astronomical tables, it has even greater need to borrow, besides these, the knowledge of the inequalities of the motions of the heavenly bodies, the motions of the apogee, of the nodes, and of the inclination of the ecliptic; in short, all those elements the determination of which requires the art of observing, some instrumental appliances, and great industry. All these astronomical elements, differing more or less with the Greeks of Alexandria, the Arabs, the Persians and the Tartars, exhibit no resemblance whatever with those of the Hindus. The latter, therefore, borrowed nothing from their neighbours.

Condensing Bailly's remarks, he comes to the following conclusions:--

If the Hindus did not borrow their epoch, they must have possessed a real one of their own, based on their own observations; and this must be either the epoch of the year 1491 after, or that of the year 3102 before our era, the latter preceding by 4592 years the epoch 1491. We have to choose between these two epochs and to decide which of them is based on observation. But before stating the arguments which can and must

[[Footnote(s)]] -----

* For a detailed scientific proof of this conclusion, see page 121 of Mr. Bailly's work, where the subject is discussed technically.

[[Vol. 1, Page]] 660 THE SECRET DOCTRINE.

decide the question, we may be permitted to make a few remarks to those who may be inclined to believe that it is modern observations and calculations which have enabled the Hindus to determine the past positions of the heavenly bodies. It is far from easy to determine the celestial movements with sufficient accuracy to ascend the stream of time for 4592 years, and to describe the phenomena which must have occurred at that period.

We possess to-day excellent instruments; exact observations have been made for some two or three centuries, which already permit us to calculate with considerable accuracy the average motions of the planets; we have the observations of the Chaldeans, of Hipparchus and of Ptolemy, which, owing to their remoteness from the present time, permit us to fix these motions with greater certainty. Still we cannot undertake to represent with invariable accuracy the observations throughout the long period intervening between the Chaldeans and ourselves; and still less can we undertake to determine with exactitude events occurring 4592 years before our day. Cassini and Maier have each determined the secular motion of the moon, and they differ by 3m. 43s. This difference would give rise in forty-six centuries to an uncertainty of nearly three degrees in the moon's place. Doubtless one of these determinations is more accurate than the other; and it is for observations of very great antiquity to decide between them. But in very remote periods, where observations are lacking, it follows that we are uncertain as to the phenomena. How, then, could the Hindus have calculated back from the year 1491 A.D. to the year 3102 before our era, if they were only recent students of astronomy?

The Orientals have never been what we are. However high an opinion of their knowledge we may form from the examination of their Astronomy, we cannot suppose them ever to have possessed that great array of instruments which distinguishes our modern observatories, and which is the product of simultaneous progress in various arts, nor could they have possessed that genius for discovery, which has hitherto seemed to belong exclusively to Europe, and which, supplying the place of time, causes the rapid progress of science and of human intelligence. If the Asiatics have been powerful, learned and wise, it is power and time which have produced their merit and success of all kinds. Power has founded or destroyed their empires; now it has erected edifices imposing by their bulk, now it has reduced them to venerable ruins; and while these vicissitudes alternated with each other, patience accumulated knowledge; and prolonged experience produced wisdom. It is the antiquity of the nations of the East which has erected their scientific fame.

If the Hindus possessed in 1491 a knowledge of the heavenly motions

[[Vol. 1, Page]] 661 THE BEGINNING OF KALI-YUG.

sufficiently accurate to enable them to calculate backwards for 4,592 years, it follows that they could only have obtained this knowledge from very ancient observations. To grant them such knowledge, while refusing them the observations from which it is derived, is to suppose an impossibility; it would be equivalent to assuming that at the outset of their career they had already reaped the harvest of time and experience. While on the other hand, if their epoch of 3102 is assumed to be real, it would follow that the Hindus had simply kept pace with successive centuries down to the year 1491 of our era. Thus, time itself was their teacher; they knew the motions of the heavenly bodies during these periods, because they had seen them; and the duration of the Hindu people on earth is the cause of the fidelity of its records and the accuracy of its calculations.

It would seem that the problem as to which of the two epochs of 3102 and 1491 is the real one ought to be solved by one consideration, viz., that the ancients in general, and particularly the Hindus, calculated, and therefore observed, eclipses only. Says Bailly:--

Now, there was no eclipse of the sun at the moment of the epoch 1492; and no eclipse of the moon either 14 days before or after that moment. Therefore the epoch 1491 is not based on an observation. As regards the epoch 3102, the Brahmins of Tirvalour place it at sunrise on February 18th. The sun was then in the first point of the Zodiac according to its true longitude. The other tables show that at the preceding midnight the moon was in the same place, but according to its average longitude. The Brahmins tell us also that this first point, the origin of their Zodiac, was, in the year 3102, 54 degrees behind the equinox. It follows that the origin -- the first point of their Zodiac -- was therefore in the sixth degree of Libra.

There occurred, therefore, about this time and place an average conjunction; "and indeed this conjunction is given in our best tables: La Caille's for the sun and Maier's for the moon." There was no eclipse of the sun, the moon being too distant from her node; but fourteen days later, the moon having approached the node, must have been eclipsed. Maier's tables, used without correction for acceleration, give this eclipse; but they place it during the day when it could not have been observed in India. Cassini's tables give it as occurring at night, which shows that Maier's motions are too rapid for distant centuries, when the acceleration is not allowed for; and which also proves that in spite of the improvement of our knowledge we can still be uncertain as to the actual aspect of the heavens in past times.

Therefore we believe that as between the two Hindu epochs, the real one is the year 3102, because it was accompanied by an eclipse which could be observed, and which must have served to determine it. This

[[Vol. 1, Page]] 662 THE SECRET DOCTRINE.

is a first proof of the truth of the longitude assigned by the Hindus to the sun and the moon at this instant; and this proof would perhaps be sufficient, were it not that this ancient determination becomes of the greatest importance for the verification of the motions of these bodies, and must therefore be borne out by every possible proof of its authenticity.

We notice, first, that the Hindus seem to have combined two epochs together into the year 3102. The Tirvalour Brahmins reckon primarily from the first moment of the Kali-Yug; but they have a second epoch placed 2d. 3h. 32m. 30s. later. The latter is the true astronomical epoch, while the former seems to be a civil era. But if this epoch of the Kali-Yug had no reality, and was the mere result of a calculation, why should it be thus divided? Their calculated astronomical epoch would have become that of the Kali-Yug, which would have been placed at the conjunction of the sun and the moon, as is the case with the epochs of the three other tables. They must have had some reason for distinguishing between the two; and this reason can only be due to the circumstances and the time of the epoch; which therefore could not be the result of calculation. This is not all; starting from the solar epoch determined by the rising of the sun on February 18th, 3102, and tracing back events 2d. 3h. 32m. 30s., we come to 2h. 27m. 30s. a.m. of February 16th, which is the instant of the beginning of Kali-Yuga. It is curious that this age has not been made to commence at one of the four great divisions of the day. It might be suspected that the epoch should be midnight, and that the 2h. 27m. 30s. are a meridian correction. But whatever may have been the reason for fixing on this moment, it is plain that were this epoch the result of calculation, it would have been just as easy to carry it back to midnight, so as to make the epoch correspond to one of the chief divisions of the day, instead of placing it at a moment fixed by the fraction of a day.

2nd. The Hindus assert that at the first moment of Kali-Yug there was a conjunction of all the planets; and their tables show this conjunction while ours indicate that it might actually have occurred. Jupiter and Mercury were in exactly the same degree of the ecliptic; Mars being 8 [[degrees]] and Saturn 17 [[degrees]] distant from it. It follows that about this time, or some fourteen days after the commencement of Kali-Yug, the Hindus saw four planets emerge successively from the Sun's rays; first Saturn, then Mars, then Jupiter and Mercury, and these planets appeared united in a somewhat small space. Although Venus was not among them, the taste for the marvellous caused it to be called a general conjunction of all the planets. The testimony of the Brahmins here coincides with that of our tables; and this evidence, the result of a tradition, must be founded on actual observation.

[[Vol. 1, Page]] 663 THE EYE OF TAURUS.

3rd. We may remark that this phenomenon was visible about a fortnight after the epoch, and exactly at the time when the eclipse of the moon must have been observed, which served to fix the epoch. The two observations mutually confirm each other; and whoever made the one must have made the other also.

4th. We may believe also that the Hindus made at the same time a determination of the place of the moon's node; this seems indicated by their calculation. They give the longitude of this point of the lunar orbit for the time of their epoch, and to this they add as a constant 40m., which is the node's motion in 12d. 14h. It is as if they stated that this determination was made 13 days after their epoch, and that to make it correspond to that epoch, we must add the 40m. through which the node has retrograded in the interval.

This observation is, therefore, of the same date as that of the lunar eclipse; thus giving three observations, which are mutually confirmatory.

5th. It appears from the description of the Hindu Zodiac given by M. C. Gentil, that on it the places of the stars named "The Eye of Taurus" and the "Wheat-ear of Virgo," can be determined for the commencement of the Kali-Yug.

Now, comparing these places with the actual positions, reduced by our precession of the equinoxes to the moment in question, we see that the point of origin of the Hindu Zodiac must lie between the fifth and sixth degree of Libra. The Brahmins, therefore, were right in placing it in the sixth degree of that sign, the more so since this small difference may be due to the proper motion of the stars which is unknown.

Thus it was yet another observation which guided the Hindus in this fairly accurate determination of the first point of their movable zodiac.

It does not seem possible to doubt the existence in antiquity of observations of this date. The Persians say that four beautiful stars were placed as guardians at the four corners of the world. Now it so happens that at the commencement of Kali Yug, 3000 or 3100 years before our era, the "Eye of the Bull" and the "Heart of the Scorpion" were exactly at the equinoctial points, while the "Heart of the Lion" and the "Southern Fish" were pretty near the solstitial points. An observation of the rising of the Pleiades in the evening, seven days before the autumnal equinox, also belongs to the year 3000 before our era. This and similar observations collected in Ptolemy's calendars, though he does not give their authors, these observations, which are older than those of the Chaldeans, may well be the work of the Hindus. They are well acquainted with the constellation of the Pleiades, and while we call it vulgarly the "Poussiniere" they name it: Pillaloo-codi -- the "Hen and chickens." This name has therefore, passed from people to

[[Vol. 1, Page]] 664 THE SECRET DOCTRINE.

people, and comes to us from the most ancient nations of Asia. We see that the Hindus must have observed the rising of the Pleiades, and have made use of it to regulate their years and their months; for this constellation is also called Krittika. Now they have a month of the same name, and this coincidence can only be due to the fact that this month was announced by the rising or setting of the constellation in question. But what is even more decisive as showing that the Hindus observed the stars, and in the same way that we do, marking their position by their longitude, is a fact mentioned by Augustinus Riccius that, according to observations attributed to Hermes, and made 1,985 years before Ptolemy, the brilliant star in the Lyre and that in the Heart of the Hydra were each seven degrees in advance of their respective positions as determined by Ptolemy.

This determination seems very extraordinary. The stars advance regularly with respect to the equinox; and Ptolemy ought to have found the longitudes 28 degrees in excess of what they were 1985 years before his time. Besides, there is a remarkable peculiarity about this fact; the same error or difference being found in the positions of both stars; therefore the error was due to some cause affecting both stars equally. It was to explain this peculiarity that the Arab Thebith imagined the stars to have an oscillatory movement, causing them to advance and recede alternately.

This hypothesis was easily disproved; but the observations attributed to Hermes remained unexplained. Their explanation, however, is found in Hindu Astronomy. At the date fixed for these observations, 1985 years before Ptolemy, the first point of the Hindu Zodiac was 35 degrees in advance of the equinox; therefore the longitudes reckoned for this point are 35 degrees in excess of those reckoned from the equinox. But after the lapse of 1985 years the stars would have advanced 28 degrees, and there would remain a difference of only 7 degrees between the longitudes of Hermes and those of Ptolemy, and the difference would be the same for the two stars, since it is due to the difference between the starting-points of the Hindu Zodiac and that of Ptolemy, which reckons from the equinox. This explanation is so simple and natural that it must be true. We do not know whether Hermes, so celebrated in antiquity, was a Hindu, but we see that the observations attributed to him are reckoned in the Hindu manner, and we conclude that they were made by the Hindus, who, therefore, were able to make all the observations we have enumerated, and which we find noted in their tables.

6th. The observation of the year 3102, which seems to have fixed their epoch, was not a difficult one. We see that the Hindus, having once determined the moon's daily motion of 13deg. 10m. 35sec., made

[[Vol. 1, Page]] 665 HINDU ASTRONOMICAL METHODS.

use of it to divide the Zodiac into 27 constellations, related to the period of the moon, which takes about 27 days to describe it.

It was by this method that they determined the positions of the stars in this Zodiac; it was thus they found that a certain star of the Lyre was in 8h. 24m., the Heart of the Hydra in 4d. 7h., longitudes which are ascribed to Hermes, but which are calculated on the Hindu Zodiac. Similarly, they discovered that the "Wheatear of Virgo" forms the commencement of their fifteenth constellation, and the "Eye of Taurus" the end of the fourth; these stars being the one in 6d. 6h. 40m., the other in 1d. 23h. 20min. of the Hindu Zodiac. This being so, the eclipse of Moon which occurred 14 days after the Kali Yug epoch, took place at a point between the "Wheat Ear" of Virgo and the star [[]] of the same constellation. These stars are very approximately a constellation apart, the one beginning the fifteenth, the other the sixteenth. Thus it would not be difficult to determine the moon's place by measuring her distance from one of these stars; from this they deduced the position of the sun, which is opposite to the moon, and then, knowing their average motions, they calculated that the moon was at the first point of the Zodiac according to her average longitude at midnight on the 17th-18th February of the year 3,102 before our era, and that the sun occupied the same place six hours later according to his true longitude; an event which fixes the commencement of the Hindu year.

7th. The Hindus state that 20,400 years before the age of Kali Yug, the first point of their Zodiac coincided with the vernal equinox, and that the sun and moon were in conjunction there. This epoch is obviously fictitious;* but we may inquire from what point, from what epoch, the Hindus set out in establishing it. Taking the Hindu values for the revolution of the sun and moon, viz., 365d. 6h. 12m. 30s., and 27d. 7h. 43m. 13s., we have --

20,400 revolutions of the sun = 7,451,277d. 2h.
272,724 revolutions of the moon = 7,451,277d. 7h.

Such is the result obtained by starting from the Kali Yuga epoch; and the assertion of the Hindus, that there was a conjunction at the time stated, is founded on their tables; but if, using the same elements, we start from the era of the year 1491, or from another placed in the year 1282, of which we shall speak later, there will always be a difference of almost one or two days. It is both just and natural, in verifying the Hindu calculations, to take those among their elements which give the same result as they had themselves arrived at, and to set out from that one among their epochs which enables us to arrive at

[[Footnote(s)]] -----

* Why it should be "fictitious" can never be made plain by European scientists.

[[Vol. 1, Page]] 666 THE SECRET DOCTRINE.

the fictitious epoch in question. Hence, since to make this calculation they must have set out from their real epoch, the one which was founded on an observation and not from any of those which were derived by this very calculation from the former, it follows that their real epoch was that of the year 3102 before our era.

8th. The Tiravalore Brahmins give the Moon's motion as 7d. 2h. 8m. on the movable Zodiac, and as 9d. 7h. 45m. 1s. as referred to the equinox in a great period of 1,600,984 days, or 4,386 years and 94 days. We believe this motion to have been determined by observation; and we must state at the outset that this period is of an extent which renders it but ill suited to the calculation of the mean motions.

In their astronomical calculations the Hindus make use of periods of 248, 3,031, and 12,372 days; but, apart from the fact that these periods, though much too short, do not present the inconvenience of the former, they contain an exact number of revolutions of the

moon referred to its apogee. They are in reality mean motions. The great period of 1,600,984 is not a sum of accumulated revolutions; there is no reason why it should contain 1,600,984 rather than 1,600,985 days. It would seem that observation alone must have fixed the number of days and marked the beginning and end of the period. This period ends on the 21st of May, 1282, of our era at 5h. 15m. 30s. at Benares. The moon was then in apogee, according to the Hindus, and her longitude was ... 7d. 13h. 45m. 1s.

Maier gives the longitude as ... 7d. 13h. 53m. 48s.

And places the apogee at ... 7d. 14h. 6m. 54s.

The determination of the moon's place by the Brahmins thus differs only by nine minutes from ours, and that of the apogee by twenty-two minutes, and it is very evident that they could only have obtained this agreement with our best tables and this exactitude in the celestial positions by observation. If then, observation fixed the end of this period, there is every reason to believe that it determined its commencement. But then this motion, determined directly, and from nature, would of necessity be in close agreement with the true motions of the heavenly bodies.

And in fact the Hindu motion during this long period of 4,883 years, does not differ by a minute from that of Cassini, and agrees equally with that of Maier. Thus two peoples, the Hindus and the Europeans, placed at the two extremities of the world, and perhaps as distant by their institutions, have obtained precisely the same results as regards the moon's motions; and an agreement which would be inconceivable, if it were not based on the observation and mutual imitation of nature. We must remark that the four tables of the Hindus are all copies of the same Astronomy. It cannot be denied that the Siamese tables existed

[[Vol. 1, Page]] 667 THE ARYAN HINDUS VINDICATED.

in 1687, when they were brought from India by M. de la Loubere. At that time the tables of Cassini and Maier were not in existence, and thus the Hindus were already in possession of the exact motion contained in these tables, while we did not yet possess it.* It must, therefore, be admitted that the accuracy of this Hindu motion is the point of observation. It is exact throughout this period of 4,383 years, because it was taken from the sky itself -- and if observation determined its close, it fixed its commencement also. It is the longest period which has been observed and of which the recollection is preserved in the annals of Astronomy. It has its origin in the epoch of the year 3102, B.C., and it is a demonstrative proof of the reality of that epoch.

Bailly is referred to at such length, as he is one of the few scientific men who have tried to do full justice to the Astronomy of the Aryans. From John Bentley down to Burgess' "Surya-Siddhanta," not one astronomer has been fair enough to the most learned people of Antiquity. However distorted and misunderstood the Hindu Symbology, no Occultist can fail to do it justice once that he knows something of the Secret Sciences; nor will he turn away from their metaphysical and mystical

[[Footnote(s)]] -----

* The following is an answer to those men of science who might suspect that our Astronomy was carried to India and communicated to the Hindus by our Missionaries. 1st. Hindu astronomy has its own peculiar forms, characterized by their originality; if it had been our astronomy translated, great skill and knowledge would have been needed to disguise the theft. 2nd. When adopting the mean movement of the moon, they would have adopted also the inclination of the ecliptic, the equation of the sun's centre, the length of the year; these elements differ completely from ours, and are remarkably accurate as applying to the epoch of 3102; while they would be exceedingly erroneous if they had been calculated for last century. 3rd, finally, our missionaries could not have communicated to the Hindus in 1687 the tables of Cassini, which were not then in existence; they could have known only the mean motions of Tycho, Riccioli, Copernicus, Bouilland, Kepler, Longomontanus, and those of the tables of Alphonso. I will now give a tabular view of these mean motions for 4383 years and 94 days:--

Table. ----- Mean Motion. --- Difference from Hindu.

Alphonso	9d 7h 2m 47s ...	- 0h 42m 14s
Copernicus	9d 6h 2m 13s ...	- 1h 42m 48s
Tycho	9d 7h 54m 40s ..	+ 0h 9m 39s
Kepler	9d 6h 57m 35s ..	- 0h 47m 26s
Longomontanus	9d 7h 2m 13s ...	- 0h 42m 48s
Bouilland	9d 6h 48m 8s ...	- 0h 58m 53s
Riccioli	9d 7h 53m 57s ..	+ 0h 8m 56s
Cassini	9d 7h 44m 11s ..	- 0h 0m 50s
Indian	9d 7h 45m 1s	

None of these mean motions, except Cassini's, agrees with that of the Hindus, who therefore, did not borrow their mean motions, since their figures agree only with those of Cassini, whose tables were not in existence in 1687. This mean motion of the moon belongs, therefore, to the Hindus, who could only have obtained it by observation." -- Bailly's "Traite de l'Astronomie Indienne et Orientale."

[[Vol. 1, Page]] 668 THE SECRET DOCTRINE.

interpretation of the Zodiac, even though the whole Pleiades of Royal Astronomical Societies rise in arms against their mathematical rendering of it. The descent and re-ascent of the Monad or Soul cannot be disconnected from the Zodiacal signs, and it looks more natural, in the sense of the fitness of things, to believe in a mysterious sympathy between the metaphysical soul and the bright constellations, and in the influence of the latter on the former, than in the absurd notion that the creators of Heaven and Earth have placed in heaven the types of twelve vicious Jews. And if, as the author of The Gnostics asserts, the aim of all the Gnostic schools and the later Platonists "was to accommodate the old faith to the influence of Buddhistic theosophy, the very essence of which was that the innumerable gods of the Hindu mythology were but names for the ENERGIES of the First Triad in its successive AVATARS or manifestations unto man," whither can we turn to trace these theosophic ideas to their very root -- better than to old Indian wisdom? We say it again: archaic Occultism would remain incomprehensible to all, if it were rendered otherwise than through the more familiar channels of Buddhism and Hinduism. For the former is the emanation of the latter; and both are children of one mother -- ancient Lemuro-Atlantean Wisdom.

XVIII.
SUMMARY OF THE MUTUAL POSITION.

THE reader has had the whole case presented to him from both sides, and it remains with him to decide whether its summary stands in our favour or not. If there were such a thing as void, a vacuum in Nature, one would find it produced, according to a physical law, in the minds of helpless admirers of the "lights" of science, who pass their time in mutually destroying their teachings. If ever the theory that "two lights make darkness" found its application it is in this case, when one half of the "lights" imposes its Forces and "modes of motion" on the belief of the faithful, and the other half opposes the very existence of the same. "Ether, Matter, Energy" -- the sacred hypostatical trinity, the three principles of the truly unknown God of Science, called by them PHYSICAL NATURE!

Theology is taken to task and ridiculed for believing in the union of three persons in one Godhead -- one God as to substance, three persons as to individuality; and we are laughed at for our belief in unproved and unprovable doctrines, in Angels and Devils, Gods and Spirits. And,

[[Vol. 1, Page]] 669 THE EXACT SCIENCES OF -- NEGATION.

indeed, that which made the Scientists win the day over Theology in the Great "Conflict between Religion and Science," was precisely the argument that neither the identity of that substance, nor the triple individuality claimed, after having been conceived, invented, and worked out in the depths of Theological Consciousness, could be proved by any Scientific inductive process of reasoning, least of all on the evidence of our senses. Religion must perish, it is said, because it teaches mysteries. Mystery is the negation of Common Sense, and Science repels it. According to Mr. Tyndall, metaphysics is fiction, like poetry. The man of Science takes nothing on trust; rejects everything that is not proven to him, while the Theologian accepts everything on blind faith. The Theosophist and the Occultist, who take nothing on trust, not even exact Science, the Spiritualist who denies dogma but believes in Spirits and in invisible but potential influences, all share in the same contempt. Very well, then; what we have to do now, is to examine for the last time whether exact Science does not act precisely in the same way as Theosophy, Spiritualism, and Theology do.

In a work by Mr. S. Laing, considered a standard book on Science, "Modern Science and Modern Thought," the author of which, according to the laudatory review of the Times, "exhibits with much power and effect the immense discoveries of Science, and its numerous victories over old opinions, whenever THEY HAVE THE RASHNESS TO CHALLENGE CONCLUSIONS WITH IT," one reads in chapter III., "On Matter," as follows:

"WHAT IS THE MATERIAL UNIVERSE COMPOSED OF? ETHER, MATTER, ENERGY" is the answer.

We stop to ask, "What is Ether?" And Mr. Laing answers in the name of Science:--

"Ether is not actually known to us BY ANY TEST OF WHICH THE SENSES CAN TAKE COGNIZANCE, but is a sort of mathematical substance which WE ARE COMPELLED TO ASSUME in order to account for the phenomena of light and heat."

And what is matter? Do you know more about it than you do about the "hypothetical" agent, Ether?

"In perfect strictness, it is true that chemical investigations can tell us NOTHING DIRECTLY of the composition of living matter, and it is also in strictness true, THAT WE KNOW NOTHING about the composition of ANY (material) BODY WHATEVER AS IT IS." (Lecture on Protoplasm by Mr. Huxley.)

And Energy? Surely you can define the third person of the Trinity of your Material universe?

"THE ENERGY IS THAT WHICH IS ONLY KNOWN TO US BY ITS EFFECTS." (Books on Physics.)

Pray explain, for this is rather hazy.

"IN MECHANICS THERE IS ACTUAL AND POTENTIAL ENERGY: WORK

ACTUALLY PERFORMED, AND THE CAPACITY FOR PERFORMING IT. AS TO THE NATURE OF MOLECULAR ENERGY OR FORCES, THE VARIOUS PHENOMENA WHICH BODIES PRESENT SHOW THAT THEIR MOLECULES ARE UNDER THE INFLUENCE OF TWO CONTRARY FORCES -- ONE WHICH TENDS TO BRING THEM TOGETHER, THE OTHER TO SEPARATE THEM. . . . THE FIRST IS MOLECULAR ATTRACTION, THE SECOND FORCE IS DUE TO vis viva, OR MOVING FORCE." . . . (Ganot's Physics.)

Just so: it is the nature of this moving force, the vis viva that we want to know. What is it?

"WE DO NOT KNOW!" IS THE INVARIABLE ANSWER. "IT IS AN EMPTY SHADOW OF MY IMAGINATION," explains Mr. Huxley in his Physical Basis of Life.

Thus the whole structure of Modern Science is built on a kind of "mathematical abstraction," on a Protean "Substance which eludes the senses," (Dubois Reymond,) and on effects, the shadowy and illusive will-o'-the-wisps of a something entirely unknown to and beyond the reach of Science, "Self-moving" atoms! Self-moving Suns, planets, and stars! But who, then, or what are they all, if they are self-endowed with motion? Why then should you, physicists, laugh and deride our "Self-moving ARCHAEUS"? Mystery is rejected and scorned by Science, and "MYSTERY is the fatality of Science," as Father Felix has truly said. . . . Science cannot escape it!" The language of the French preacher is ours, and we quote it in "Isis Unveiled" (Vide Vol. I. 338-9). Who -- he asks -- who of you, men of Science:

". . . has been able to penetrate the secret of the formation of a body, the generation of a single atom? What is there, I will not say at the centre of a sun, but at the centre of an atom? Who has sounded to the bottom the abyss in a grain of sand? The grain of sand, gentlemen, has been studied four thousand years by science, she has turned and returned it; she divides it and subdivides it; she torments it with her experiments; she vexes it with her questions to snatch from it the final word as to its secret constitution; she asks it, with an insatiable curiosity: 'Shall I divide thee infinitesimally?' Then suspended over this abyss, science hesitates, she stumbles, she feels dazzled, she becomes dizzy, and in despair says: I DO NOT KNOW."

"But if you are so fatally ignorant of the genesis and hidden nature of a grain of sand, how should you have an intuition as to the generation of a single living being? Whence in the living being does life come? Where does it commence? What is the life principle?"*

Do the men of science deny all these charges? Not at all, for here is a confession of Tyndall, which shows how powerless is science, even over the world of matter.

"The first marshalling of the atoms, on which all subsequent action depends,

[[Footnote(s)]] -----

* "Le Mystere et la Science," Conferences, Pere Felix de Notre Dame; des Mousseaux: "Hauts Phen. Magiques."

baffles a keener power than that of the microscope." "Through pure excess of complexity, and long before observation can have any voice in the matter, the most highly trained intellect, the most refined and disciplined imagination, retires in bewilderment from the contemplation of the problem. We are struck dumb by an astonishment which no microscope can relieve, doubting not only the power of our instrument, but even whether we ourselves possess the intellectual elements which will ever enable us to grapple with the ultimate structural energies of nature."

How little is known of the material universe, indeed, has now been suspected for years, on the very admissions of these men of science themselves. And now there are some materialists who would even make away with Ether -- or whatever Science calls the infinite Substance, the noumenon of which the Buddhists call Swabhavat -- as well as with atoms, too dangerous both on account of their ancient philosophical and their present Christian and theological associations. From the earliest philosophers whose records passed to posterity, down to our present age, which, if it denies "invisible Beings" in Space, can never be so insane as to deny a plenum of some sort -- the fulness of the universe was an accepted belief. And what it was said to contain, one learns from Hermes Trismegistus (in Mrs. Kingsford's able rendering) -- who is made to say:--

"Concerning the void . . . my judgment is that it does not exist, that it never existed, and that it never will exist, for all the various parts of the universe are filled, as the earth also is complete and full of bodies, differing in quality and in form, having their species and their magnitude, one larger, one smaller, one solid, one tenuous. The larger . . . are easily perceived; the smaller . . . are difficult to apprehend, or altogether invisible. We know only of their existence by the sensation of feeling, wherefore many persons deny such entities to be bodies, and regard them as simply spaces,* but it is impossible there should be such spaces. For if indeed there should be anything outside the universe . . . then it would be a space occupied by intelligent beings analogous to its (the universe's) divinity I speak of the genii, for I hold they dwell with us, and of the heroes who dwell above us, between the earth and the highest airs; wherein are neither clouds nor any tempest" (p. 84).

And we "hold" it too. Only, as already remarked, no Eastern Initiate would speak of spheres "above us, between the earth and the

[[Footnote(s)]] -----

* Behold the work of Cycles and their periodical return! Those who denied such "Entities" (Forces) to be bodies, and called them "Spaces," were the prototypes of our modern "Science-struck" public, and their official teachers, who speak of the Forces of nature as the imponderable energy of matter and modes of motion, and yet bold electricity (for one) as being as atomic as matter itself -- (Helmholtz). Inconsistency and contradiction reign as much in official as in heterodox Science.

[[Vol. 1, Page]] 672 THE SECRET DOCTRINE.

airs," even the highest, as there is no such division or measurement in occult speech, no "above" as no "below," but an eternal "within," within two other withins, or the planes of subjectivity merging gradually into that of terrestrial objectivity -- this being for man the last one, his own plane. This necessary explanation may be closed here by giving, in the words of Hermes, the belief on this particular point of the whole world of mystics:--

"There are many orders of the gods; and in all there is an intelligent part. It is not to be supposed they do not come within the range of our senses; on the contrary, we perceive them, better even than those which are called visible. . . There are then gods, superior to all appearances; after them come the gods whose principle is spiritual; these gods being sensible, in conformity with their double origin, manifest all things by a sensible nature, each of them illuminating his works one by another.* The Supreme Being of Heaven, or of all that is comprehended under this name, is Zeus, for it is by Heaven that Zeus gives life to all things. The Supreme Being of the Sun is Light, for it is by the disk of the Sun that we receive the benefit of the light. The thirty-six horoscopes of the fixed stars have for supreme Being or Prince, him whose name is Pantomorphos, or having all forms, because he gives divine forms to divers types. The seven planets, or wandering spheres, have for Supreme Spirits Fortune and Destiny, who uphold the eternal stability of the laws of nature throughout incessant transformation and perpetual agitation. The ether is the instrument or medium by which all is produced."

This is quite philosophical and in accordance with the spirit of Eastern esotericism: for all the Forces, such as Light, Heat, Electricity, etc., etc., are called the "Gods" -- esoterically.

It must be so, since the esoteric teachings in Egypt and India were identical. And, therefore, the personification of Fohat synthesizing all the manifesting forces in nature is a legitimate result. Moreover, as will be shown in the division that follows this one, the real and Occult forces in nature only now begin to be known -- and even in this case, by heterodox, not orthodox, Science (See also § X., THE COMING FORCE), though their existence, in one instance at any rate, is corroborated, and certified to by an immense number of educated people and even by some official men of science.

This sentence, moreover, in Stanza VI., "Fohat sets in motion the primordial World-germs, or the aggregation of Cosmic atoms and matter, some one way, some another, in the opposite direction" -- looks orthodox and Scientific enough. For there is, at all events, one fact in support of this position fully recognized by Science, and it is this. The meteoric showers (periodical in November and August) belong to

[[Footnote(s)]] -----

* "Hermes here includes as gods the sensible Forces of nature, the elements and the phenomena of the Universe," remarks Mrs. A. Kingsford in a foot-note explaining it very correctly. So does Eastern philosophy.

[[Vol. 1, Page]] 673 THE ALIASES OF FOHAT.

a system moving in an elliptical orbit around the Sun. The aphelion of this ring is 1,732 millions of miles beyond the orbit of Neptune, its plane is inclined to the Earth's orbit at an angle of 64 [[degrees]] 3', and the direction of the meteoric swarm moving round this orbit is contrary to that of the Earth's revolution.

This fact, recognized only in 1833, shows it to be the modern rediscovery of what was very anciently known. Fohat turns with his two hands in contrary directions the "seed" and "the curds," or Cosmic matter; is turning, in clearer language, particles in a highly attenuated condition, and nebulae.

Outside the boundaries of the solar system, it is other Suns, and especially the mysterious "central Sun" (the "Abode of the invisible deity" as some reverend gentlemen have called it) that determines the motion of bodies and their direction. That motion serves also to differentiate the homogeneous matter, round and between the several bodies, into elements and sub-elements unknown to our earth, which are regarded by modern Science as distinct individual elements, whereas they are merely temporary appearances, changing with every small cycle within the Manvantara, some Esoteric works calling them "Kalpic Masks."

Fohat is the key in Occultism which opens and unriddles the multiform symbols and respective allegories in the so-called mythology of every nation; demonstrating the wonderful philosophy and the deep insight into the mysteries of nature, in the Egyptian and Chaldean as well as in the Aryan religions. Fohat, shown in his true character, proves how deeply versed were all those prehistoric nations in every science of nature, now called physical and chemical branches of natural philosophy. In India, Fohat is the scientific

aspect of both Vishnu and Indra, the latter older and more important in the Rig Veda than his sectarian successor; while in Egypt Fohat was known as Toum issued of Noot,* or Osiris in his character of a primordial god, creator of heaven and of beings (see chapter xvii., "Book of the Dead"). For Toum is spoken of as the Protean god who generates other gods and gives himself the form he likes; the "master of life" "giving their vigour to the gods" (chapter lxxix.) He is the overseer of the gods, and he "who creates spirits and gives them shape and life"; he is "the north wind and the spirit of the west;" and finally the "Setting Sun of Life," or the vital electric force that leaves the body at death, wherefore the defunct begs that Toum should give him the breath from his right nostril (positive elec-

[[Footnote(s)]] -----

* "Oh Toum, Toum! issued from the great (female) which is in the bosom of the waters" (the great Deep or Space) . . . "Thou, luminous through the two Lions" (the dual Force or power of the two solar eyes, or the electro-positive and the electro-negative forces. (See Book of the Dead, III., and Egyptian Pantheon, chapter ii.)

[[Vol. 1, Page]] 674 THE SECRET DOCTRINE.

tricity) that he might live in his second form. Both the hieroglyph, and the text of chapter lxii. in the "Book of the Dead," show the identity of Toum with Fohat. The former represents a man standing erect with the hieroglyph of the breaths in his hands. The latter says:--

"I open to the chief of An (Heliopolis), I am Toum. I cross the water spilt by Thot-Hapi, the lord of the horizon, and am the divider of the earth" (Fohat divides Space and, with his Sons, the earth into seven zones) . . .

. . . "I cross the heavens, and am the two Lions. I am Ra, I am Aam, I ate my heir.* . . . I glide on the soil of the field of Aanroo,** given me by the master of limitless eternity. I am the germ of eternity. I am Toum, to whom eternity is accorded. . . ."

The very words used by Fohat in the XIth Book, and the very titles given him. In the Egyptian Papyri the whole Cosmogony of the Secret Doctrine is found scattered about in isolated sentences, even in the "Book of Dead." Number seven is quite as much insisted upon and emphasized therein as in the Book of Dzyan. "The Great Water (the Deep or Chaos) is said to be seven cubits deep" -- "cubits" standing here of course for divisions, zones, and principles. Therein, "in the great mother, all the Gods, and the seven great ones are born." (See chapter cviii., 4, Book of the Dead and Egyptian Pantheon). Both Fohat and Toum are addressed as the "Great ones of the Seven Magic Forces," who, "conquer the Serpent Apap" or Matter.

No student of occultism, however, ought to be betrayed, by the usual phraseology used in the translations of Hermetic Works, into believing that the ancient Egyptians or Greeks spoke of, and referred, monk-like, at every moment in conversation, to a Supreme Being, God, the "One Father and Creator of all," etc., as found on every page of such translations. No such thing indeed; and those texts are not the original Egyptian texts. They are Greek compilations, the earliest of which does not go beyond the early period of Neo-Platonism. No Hermetic

[[Footnote(s)]] -----

* An image expressing the succession of divine functions, the substitution from one form into another, or the correlation of forces. Aam is the electro-positive force, devouring all others as Saturn devoured his progeny.

** Aanroo is in the domain of Osiris, a field divided into fourteen sections "surrounded with an iron enclosure, within which grows the corn of life seven cubits high," the Kama-loka of the Egyptians. Those only of the dead, who know the names of the janitors of the "seven halls," will be admitted into Amenti for ever; i.e., those who have passed through the seven races of each round -- otherwise they will rest in the lower fields; "and it represents also the seven successive Devachans, or lokas. In Amenti, one becomes pure spirit for the eternity (xxx. 4.); while in Aanroo "the soul of the spirit," or the defunct, is devoured each time by Uraeus -- the Serpent, Son of the earth (in another sense the primordial vital principles in the Sun), i.e., the Astral body of the deceased or the "Elementary" fades out and disappears in the "Son of the earth," limited time. The soul quits the fields of Aanroo and goes on earth under any shape it likes to assume. (See chapter xcix., Book of the Dead.)

[[Vol. 1, Page]] 675 THE GODS OF EGYPT.

work written by Egyptians (vide "Book of the Dead") would speak of the one universal God of the Monotheistic systems -- the one Absolute cause of all, was as unnameable and unpronounceable in the mind of the ancient philosopher of Egypt, as it is for ever Unknowable in the conception of Mr. Herbert Spencer. As for the Egyptian in general, as M. Maspero well remarks, whenever he "arrived at the notion of divine Unity, the God One was never 'God,' simply." And Lepage Renouf very justly observed that the word Nouter, nouti, "god" had never ceased being a generic name with the Egyptians, nor has it ever become a personal pronoun. Every God was the "one living and unique God" with them. Their "monotheism was purely geographical. If the Egyptian of Memphis proclaimed the unity of Phtah to the exclusion of Ammon, the Thebeian Egyptian proclaimed the unity of Ammon to the exclusion of Phtah," as we now see done in India in the case of the Saivas and the Vaishnavas. "Ra, the 'One God' at Heliopolis is not the same as Osiris, the 'One God' at Abydos, and can be worshipped side by side with him, without being absorbed by his neighbour. The one god is but the god of the nome or the city, noutir, noutti, and does not exclude the existence of the one god of that town or of the neighbouring nome. In short, whenever speaking of Egyptian Monotheism, one ought to speak of the Gods 'One' of Egypt, and not of the one god" (Maspero, in the Guide au Musee de Boulak.) It is by this feature, pre-eminently Egyptian, that the authenticity of the

various so-called Hermetic Books, ought to be tested; and it is totally absent from the Greek fragments known as such. This proves that a Greek Neo-Platonic, or even a Christian hand, had no small share in the editing of such works. Of course the fundamental philosophy is there, and in many a place -- intact. But the style has been altered and smoothed in a monotheistic direction, as much, if not more than that of the Hebrew Genesis in its Greek and Latin translations. They may be Hermetic works, but not works written by either of the two Hermes -- or rather, by Thot (Hermes) the directing intelligence of the Universe (See ch. xciv., Book of the Dead), or by Thot, his terrestrial incarnation called Trismegistus, of the Rosetta stone.

But all is doubt, negation, iconoclasm and brutal indifference, in our age of the hundred "isms" and no religion. Every idol is broken save the Golden Calf.

Unfortunately, no nation or nations can escape their Karmic fate any more than units and individuals do. History itself is dealt with by the so-called historians as unscrupulously as legendary lore. For this, Augustin Thierry has made the amende honorable, if one may believe his biographers. He deplored the erroneous principle that made them all (the would-be historiographers) lose their way, and each presume to

[[Vol. 1, Page]] 676 THE SECRET DOCTRINE.

correct tradition, "that vox populi which nine times out of ten is vox Dei;" and he finally admitted that in legend alone rests real history; for "legend," he adds, "is living tradition, and three times out of four it is truer than what we call History."*

While Materialists deny everything in the universe, save matter, Archaeologists are trying to dwarf antiquity, and seek to destroy every claim to ancient Wisdom by tampering with Chronology. Our present-day Orientalists and Historical writers are to ancient History that which the white ants are to the buildings in India. More dangerous even than those Termites, the modern Archaeologists -- the "authorities" of the future in the matter of Universal History -- are preparing for the History of past nations the fate of certain edifices in tropical countries: "History will tumble down and break into atoms in the lap of the twentieth century, devoured to its foundations by her annalists," said Michelet. Very soon, indeed, under their combined efforts, it will share the fate of those ruined cities in both Americas, which lie deeply buried under impassable virgin forests. Historical facts will remain as concealed from view by the inextricable jungles of modern hypotheses, denials and scepticism. But very happily actual History repeats herself, for she proceeds, like everything else, in cycles; and dead facts and events deliberately drowned in the sea of modern scepticism will ascend once more and reappear on the surface. . . .

In our Book II. the very fact that a work with pretensions to philosophy, and which is an exposition of the most abstruse problems, has to be commenced by tracing the evolution of mankind from what are regarded as supernatural beings -- Spirits -- will arouse the most malevolent criticism. Believers in, and the defenders of, the Secret Doctrine, however, will have to bear the accusation of madness and worse, as philosophically as for long years already the writer has done. Whenever a Theosophist is taxed with insanity, he ought to reply by quoting from Montesquieu's "Lettres Persanes." "By opening so freely their lunatic asylums to their supposed madmen, men only seek to assure each other that they are not themselves mad."

INDEX. [[Not included in ASCII version.]]

[[Vol. 2, Page xv]]

[[Eh eme didache ouk estin eme, alla tou pemphantos me.]]

"My doctrine is not mine, but his that sent me."
-- John vii. 16.

[[Vol. 2, Page xvi]]

MODERN science insists upon the doctrine of evolution; so do human reason and the "Secret Doctrine," and the idea is corroborated by the ancient legends and myths, and even by the Bible itself when it is read between the lines. We see a flower slowly developing from a bud, and the bud from its seed. But whence the latter, with all its predetermined programme of physical transformation, and its invisible, therefore spiritual forces which gradually develop its form, colour, and odour? The word evolution speaks for itself. The germ of the present human race must have preexisted in the parent of this race, as the seed, in which lies hidden the flower of next summer, was developed in the capsule of its parent flower; the parent may be but slightly different, but it still differs from its future progeny. The antediluvian ancestors of the present elephant and lizard were, perhaps, the mammoth and the plesiosaurus; why should not the progenitors of our human race have been the "giants" of the Vedas, the Voluspa, and the Book of Genesis? While it is positively absurd to believe the "transformation of species" to have taken place according to some of the more materialistic views of the evolutionists, it is but natural to think that each genus, beginning with the molluscs and ending with man, had modified its own primordial and distinctive forms. -- "Isis Unveiled," Vol. I., p. 153.

PRELIMINARY NOTES.

ON THE ARCHAIC STANZAS, AND THE FOUR PRE-HISTORIC CONTINENTS.

"Facies totius Universi, quamvis infinitis modis variet,
Manet tamen semper eadem." -- SPINOZA.

THE Stanzas, with the Commentaries thereon, in this Book, the second, are drawn from the same Archaic Records as the Stanzas on Cosmogony in Book I. As far as possible a verbatim translation is given; but some of the Stanzas were too obscure to be understood without explanation. Hence, as was done in Book I., while they are first given in full as they stand, when taken verse by verse with their Commentaries an attempt is made to make them clearer, by words added in brackets, in anticipation of the fuller explanation of the Commentary.

As regards the evolution of mankind, the Secret Doctrine postulates three new propositions, which stand in direct antagonism to modern science as well as to current religious dogmas: it teaches (a) the simultaneous evolution of seven

human groups on seven different portions of our globe; (b) the birth of the astral, before the physical body: the former being a model for the latter; and (c) that man, in this Round, preceded every mammalian -- the anthropoids included -- in the animal kingdom.*

[[Footnote(s)]] -----

* See Genesis ch. ii., v. 19. Adam is formed in verse 7, and in verse 19 it is said: "Out of the ground the Lord God formed every beast of the field, and every fowl of the air; and brought them unto Adam to see what he would call them." Thus man was created before the animals; for the animals mentioned in chapter i. are the signs of the Zodiac, while the man, "male and female," is not man, but the Host of the Sephiroth; FORCES, or Angels, "made in his (God's) image and after his likeness." The Adam, man, is not made in that likeness, nor is it so asserted in the Bible. Moreover, the Second Adam
[[Footnote continued on next page]]

[[Vol. 2, Page]] 2 THE SECRET DOCTRINE.

The Secret Doctrine is not alone in speaking of primeval MEN born simultaneously on the seven divisions of our Globe. In the Divine "Pymander" of Hermes we find the same Seven primeval men* evolving from Nature and "Heavenly Man," in the collective sense of the word, namely, from the Creative Spirits; and in the fragments (collected by George Smith) of Chaldean tablets on which is inscribed the Babylonian Legend of Creation, in the first column of the Cutha tablet, seven human beings with the faces of ravens (black, swarthy complexions), whom "the (Seven) great gods created," are mentioned. Or, as explained in lines 16 and 18 -- "In the midst of the Earth they grew up and became great . . . Seven kings, brothers of the same family." These are the Seven Kings of Edom to whom reference is made in the Kabala; the first race, which was imperfect, i.e., was born before the "balance" (sexes) existed, and which was therefore destroyed. (Zohar, Siphrah Dzeniouta, Idrah Suta, 2928, La Kabbale, p. 205.) "Seven Kings, brethren, appeared and begat children, 6,000 in number were their peoples" (Hibbert Lectures, p. 372). The god Nergas (death) destroyed them. "How did he destroy them?" "By bringing into equilibrium (or balance) those who did not yet exist" (Siphrah Dzeniouta). They were "destroyed," as a race, by being merged in their own progeny (by exudation); that is to say, the sexless race reincarnated in the bisexual

[[Footnote(s)]] -----

[[Footnote continued from previous page]] is esoterically a septenary which represents seven men, or rather groups of men. For the first Adam -- the Kadmon -- is the synthesis of the ten Sephiroth. Of these, the upper triad remains in the Archetypal World as the future "Trinity," while the seven lower Sephiroth create the manifested material world; and this septenate is the second Adam. Genesis, and the mysteries upon which it was fabricated, came from Egypt. The "God" of the 1st chapter of Genesis is the Logos, and the "Lord God" of the 2nd chapter the Creative Elohim -- the lower powers.

* Thus saith Pymander -- "This is the mystery that to this day was hidden. Nature being mingled with the Heavenly man (Elohim, or Dhyanis), brought forth a wonder . . . Seven men, all males and females (Hermaphrodite) . . . according to the nature of the seven Governors" -- Book II. v. 29) -- or the seven Hosts of the Pitris or Elohim, who projected or created him. This is very clear, but yet, see the interpretations of even our modern theologians, men supposed to be intellectual and learned! In the "Theological and philosophical works of Hermes Trismegistus, Christian (?) Neoplatonist," a work compiled by John David Chambers, of Oriel College, Oxford, the translator wonders "for whom these seven men are intended?" He solves the difficulty by concluding that, as "the original pattern man (Adam Kadmon of ch. i. Genesis) was masculine-feminine, the seven may signify the succeeding patriarchs named in Genesis" (p. 9) . . . A truly theological way of cutting the Gordian knot.

[[Vol. 2, Page]] 3 THE LEMNOS-BORN KABIRI.

(potentially); the latter in the Androgynes; these again in the sexual, the later third Race; (for further explanation, vide infra). Were the tablets less mutilated, they would be found to contain word for word the same account as given in the archaic records and in Hermes, at least as regards the fundamental facts, if not as regards minute details; for Hermes is a good deal disfigured by mistranslations.

It is quite certain that the seeming supernaturalism of these teachings, although allegorical, is so diametrically opposed to the dead-letter statements of the Bible* as well as to the latest hypotheses of science, that it will evoke passionate denial. The Occultists, however, know that the traditions of Esoteric Philosophy must be the right ones, simply because they are the most logical, and reconcile every difficulty. Besides, we have the Egyptian "Books of Thoth," and "Book of the Dead," and the Hindu Puranas with the seven Manus, as well as the Chaldeo-Assyrian accounts, whose tiles mention seven primitive men, or Adams, the real meaning of which name may be ascertained through the Kabala. Those who know anything of the Samothracian mysteries will also remember that the generic name of the Kabiri was the "Holy Fires," which created on seven localities of the island of Electria (or Samothrace) the "Kabir born of the Holy Lemnos" (the island sacred to Vulcan).

According to Pindar (See "Philosophumena," Miller's edition, p. 98), this Kabir, whose name was Adamas, was, in the traditions of Lemnos, the type of the primitive man born from the bosom of the Earth. He was the Archetype of the first males in the order of generation, and was one of the seven autochthonous ancestors or progenitors of mankind (ibid, p. 108). If, while coupling with this the fact that Samothrace was colonised by the Phoenicians, and before them by the mysterious Pelasgians who came from the East, one remembers also the identity of the mystery gods of the Phoenicians, Chaldeans, and Israelites, it will be easy to discover whence came also the confused account of the Noachian deluge. It has become undeniable of late that the Jews, who obtained their primitive ideas about creation from Moses, who had them from

[[Footnote(s)]] -----

* As it is now asserted that the Chaldean tablets, which give the allegorical description of Creation, the Fall, and the Flood, even to the legend of the Tower of Babel, were written "before the time of Moses" (See G. Smith's "Chaldean Account of Genesis," p. 86), how can the Pentateuch be called a revelation? It is simply another version of the same story.

[[Vol. 2, Page]] 4 THE SECRET DOCTRINE.

the Egyptians, compiled their Genesis and first Cosmogonic traditions -- when these were rewritten by Ezra and others -- from the Chaldeo-Akkadian account. It is, therefore, sufficient to examine the Babylonian and Assyrian cuneiform and other inscriptions to find also therein, scattered here and there, not only the original meaning of the name Adam, Admi, or Adami,* but also the creation of seven Adams or roots of men, born of Mother Earth, physically, and of the divine fire of the progenitors, spiritually or astrally. The Assyriologists, ignorant of the esoteric teachings, could hardly be expected to pay any greater attention to the mysterious and ever-recurring number seven on the Babylonian cylinders, than they paid to it on finding the same in Genesis and the Bible. Yet the number of the ancestral spirits and their seven groups of human progeny are there, notwithstanding the dilapidated condition of the fragments, as plainly as they are to be found in "Pyramider" and in the "Book of the Concealed Mystery" of the Kabala. In the latter Adam Kadmon is the Sephirothal TREE, as also the "Tree of the Knowledge of Good and Evil." And that "Tree," says verse 32, "hath around it seven columns," or palaces, of the seven creative Angels operating in the spheres of the seven planets on our Globe. As Adam Kadmon is a collective name, so also is the name of the man Adam. Says George Smith in his "Chaldean Account of Genesis:" --

"The word Adam used in these legends for the first human being is evidently not a proper name, but is only used as a term for mankind. Adam appears as a proper name in Genesis, but certainly in some passages is only used in the same sense as the Assyrian word" (p. 86).

Moreover, neither the Chaldean nor the Biblical deluge (the stories of Xisuthrus and Noah) is based on the universal or even on the Atlantean deluges, recorded in the Indian allegory of Vaivaswata Manu. They are the exoteric allegories based on the esoteric mysteries of Samothrace. If the older Chaldees knew the esoteric truth concealed in the Puranic legends, the other nations were aware only of the Samothracian mystery, and allegorised it. They adapted it to their astronomical and anthropological, or rather phallic, notions. Samothrace is known historically to have been famous in antiquity for a deluge, which submerged the country and reached the top of the highest mountains; an event which happened before the age of the Argonauts. It was overflowed very

[[Footnote(s)]] -----

* Vide § "Adam-Adami," in Part II. of this volume.

[[Vol. 2, Page]] 5 THE SECRETS OF KOUYUNJIK.

suddenly by the waters of the Euxine, regarded up to that time as a lake.* But the Israelites had, moreover, another legend upon which to base their allegory: the "deluge," that transformed the present Gobi Desert into a sea for the last time, some 10 or 12,000 years ago, and which drove many Noahs and their families on to the surrounding mountains. As the Babylonian accounts are now only restored from hundreds of thousands of broken fragments (the mound of Kouyunjik alone having yielded to Layard's excavations over twenty thousand fragments of inscriptions), the proofs here cited are comparatively scanty; yet such as they are, they corroborate almost every one of our teachings, certainly three, at least. These are:--

(1.) That the race which was the first to fall into generation was a dark Race (Zalmat Gaguadi), which they call the Adami or dark Race, and that Sarku, or the light Race, remained pure for a long while subsequently.

(2.) That the Babylonians recognised two principal Races at the time of the Fall, the Race of the Gods (the Ethereal doubles of the Pitris), having preceded these two. This is Sir H. Rawlinson's opinion. These "Races" are our second and third Root-races.

(3) That these seven Gods, each of whom created a man, or group of men, were "the gods imprisoned or incarnated." These gods were: the god Zi; the god Ziku (noble life, Director of purity); the god Mirku (noble crown) "Saviour from death of the gods" (later on) imprisoned, and the creator of "the dark Race which his hand has made;" the god Libzu "wise among the gods"; the god Nissi . . . and the god Suhhab; and Hea or Sa, their synthesis, the god of wisdom and of the Deep, identified with Oannes-Dagon, at the time of the fall, and called (collectively) the Demiurge, or Creator. (See Chaldean Account Genesis, p. 82.)

There are two "Creations" so called, in the Babylonian fragments, and Genesis having adhered to this, one finds its first two chapters distinguished as the EloHITE and the Jehovite creations. Their proper order, however, is not preserved in these or in any other exoteric accounts. Now these "Creations," according to the occult teachings, refer respectively to the formation of the primordial seven men by the progenitors (the Pitris, or Elohim): and to that of the human groups after the fall.

[[Footnote(s)]] -----

* See Pliny, 4, c. 12; Strabo, 10; Herodotus, 7, c. 108; Pausanias, 7, c. 4, etc.

[[Vol. 2, Page]] 6 THE SECRET DOCTRINE.

All this will be examined in the light of science and comparisons drawn from the scriptures of all the ancient nations, the Bible included, as we proceed. Meanwhile, before we turn to the Anthropogenesis of the prehistoric Races, it may be

useful to agree upon the names to be given to the Continents on which the four great Races, which preceded our Adamic Race, were born, lived, and died. Their archaic and esoteric names were many, and varied with the language of the nationality which mentioned them in its annals and scriptures. That which in the Vendidad, for instance, is referred to as Airyanem Vaego (see Bund. 79, 12) wherein was born the original Zoroaster,* is called in the Puranic literature "Sveta-Dwipa," "Mount Meru," the abode of Vishnu, etc., etc.; and in the Secret Doctrine is simply named the land of the "Gods" under their chiefs the "Spirits of this Planet."

Therefore, in view of the possible, and even very probable confusion, that may arise, it is considered more convenient to adopt, for each of the four Continents constantly referred to, a name more familiar to the cultured reader. It is proposed, then, to call the first continent, or rather the first terra firma on which the first Race was evolved by the divine progenitors:-

I. "The Imperishable Sacred Land."

The reasons for this name are explained as follows: This "Sacred Land" -- of which more later on -- is stated never to have shared the fate of the other continents; because it is the only one whose destiny it is to last from the beginning to the end of the Manvantara throughout each Round. It is the cradle of the first man and the dwelling of the last divine mortal, chosen as a Sishta for the future seed of humanity. Of this mysterious and sacred land very little can be said, except, perhaps, according to a poetical expression in one of the Commentaries, that the "pole-star has its watchful eye upon it, from the dawn to the close of the twilight of 'a day' of the GREAT BREATH."**

[[Footnote(s)]] -----

* By "original" we mean the "Amshaspend," called "Zarathustra, the lord and ruler of the Vara made by Yima in that land." There were several Zarathustra or Zertusts, the Dabistan alone enumerating thirteen; but these were all the reincarnations of the first one. The last Zoroaster was the founder of the Fire temple of Azareksh and the writer of the works on the primeval sacred Magian religion destroyed by Alexander.

** In India called "The Day of Brahma."

[[Vol. 2, Page]] 7 HYPERBOREAS AND LEMURIA.

II. The "HYPERBOREAN" will be the name chosen for the Second Continent, the land which stretched out its promontories southward and westward from the North Pole to receive the Second Race, and comprised the whole of what is now known as Northern Asia. Such was the name given by the oldest Greeks to the far-off and mysterious region, whither their tradition made Apollo the "Hyperborean" travel every year. Astronomically, Apollo is of course the Sun, who, abandoning his Hellenic sanctuaries, loved to visit annually his far-away country, where the Sun was said never to set for one half of the year. [[Eggus gar nuktos te kai ematos eisi keleuthoi]], says a verse in the Odyssey (x. 86).

But historically, or better, perhaps, ethnologically and geologically, the meaning is different. The land of the Hyperboreans, the country that extended beyond Boreas, the frozen-hearted god of snows and hurricanes, who loved to slumber heavily on the chain of Mount Rhiphaeus, was neither an ideal country, as surmised by the mythologists, nor yet a land in the neighbourhood of Scythia and the Danube.* It was a real Continent, a bona-fide land which knew no winter in those early days, nor have its sorry remains more than one night and day during the year, even now. The nocturnal shadows never fall upon it, said the Greeks; for it is the land of the Gods, the favourite abode of Apollo, the god of light, and its inhabitants are his beloved priests and servants. This may be regarded as poetised fiction now; but it was poetised truth then.

III. The third Continent, we propose to call "Lemuria." The name is an invention, or an idea, of Mr. P. L. Sclater, who asserted, between 1850 and 1860, on zoological grounds the actual existence, in prehistoric times, of a Continent which he showed to have extended from Madagascar to Ceylon and Sumatra. It included some portions of what is now Africa; but otherwise this gigantic Continent, which stretched from the Indian ocean to Australia, has now wholly disappeared beneath the waters of the Pacific, leaving here and there only some of its highland tops which are now islands. Mr. A. R. Wallace, the naturalist, "extends the Australia of tertiary periods to New Guinea and the Solomon Islands, and perhaps to Fiji;" and from its Marsupial types he infers "a connection with the Northern Continent during the

[[Footnote(s)]] -----

* See Volcker, "Mythological Geography," pp. 145 to 170.

[[Vol. 2, Page]] 8 THE SECRET DOCTRINE.

Secondary period," writes Mr. C. Gould in "Mythical Monsters," p. 47. The subject is treated at length elsewhere.*

IV. "Atlantis" is the Fourth Continent. It would be the first historical land, were the traditions of the ancients to receive more attention than they have hitherto. The famous island of Plato of that name was but a fragment of this great Continent. (See "Esoteric Buddhism.")

V. The Fifth Continent was America; but, as it is situated at the Antipodes, it is Europe and Asia Minor, almost coeval with it, which are generally referred to by the Indo-Aryan Occultists as the fifth. If their teaching followed the appearance of the Continents in their geological and geographical order, then this classification would have to be altered. But as the sequence of the Continents is made to follow the order of evolution of the Races, from the first to the fifth, our Aryan Root-race, Europe must be called the fifth great Continent. The Secret Doctrine takes no account of islands and peninsulas, nor does it follow the modern geographical distribution of land and sea. Since the day of its earliest teachings and the destruction of the great Atlantis, the face of the earth has changed more than once. There was a time when the delta of Egypt and Northern Africa belonged to Europe, before the formation of the Straits of Gibraltar, and a further

upheaval of the continent, changed entirely the face of the map of Europe. The last serious change occurred some 12,000 years ago,**

[[Footnote(s)]] -----

* It is to be remarked, however, that Mr. Wallace does not accept Mr. Sclater's idea, and even opposes it. Mr. Sclater supposes a land or continent formerly uniting Africa, Madagascar, and India (but not Australia and India); and Mr. A. R. Wallace shows, in his "Geographical Distribution of Animals" and "Island Life," that the hypothesis of such a land is quite uncalled for on the alleged zoological grounds. But he admits that a much closer proximity of India and Australia did certainly exist, and at a time so very remote that it was "certainly pre-tertiary," and he adds in a private letter that "no name has been given to this supposed land." Yet the land did exist, and was of course pre-tertiary, for "Lemuria" (accepting this name for the third Continent) had perished before Atlantis had fully developed; and the latter sunk and its chief portions had disappeared before the end of the Miocene period.

** One more "coincidence" --

"Now it is proved that in geologically recent times, this region of North Africa was in fact a peninsula of Spain, and that its union with Africa (proper) was effected on the North by the rupture of Gibraltar, and on the South by an upheaval to which the Sahara owes its existence. The shores of this former sea of Sahara are still marked by the shells [[Footnote continued on next page]]

[[Vol. 2, Page]] 9 PRE-TERTIARY GIANTS.

and was followed by the submersion of Plato's little Atlantic island, which he calls Atlantis after its parent continent. Geography was part of the mysteries, in days of old. Says the Zohar (iii., fol. 10a): "These secrets (of land and sea) were divulged to the men of the secret science, but not to the geographers."

The claim that physical man was originally a colossal pre-tertiary giant, and that he existed 18,000,000 years ago, must of course appear preposterous to admirers of, and believers in, modern learning. The whole posse comitatis of biologists will turn away from the conception of this third race Titan of the Secondary age, a being fit to fight as successfully with the then gigantic monsters of the air, sea, and land, as his forefathers -- the ethereal prototype of the Atlantean -- had little need to fear that which could not hurt him. The modern anthropologist is quite welcome to laugh at our Titans, as he laughs at the Biblical Adam, and as the theologian laughs at his pithecoïd ancestor. The Occultists and their severe critics may feel that they have pretty well mutually squared their accounts by this time. Occult sciences claim less and give more, at all events, than either Darwinian Anthropology or Biblical Theology.

Nor ought the Esoteric Chronology to frighten any one; for, with regard to figures, the greatest authorities of the day are as fickle and as uncertain as the Mediterranean wave. As regards the duration of the geological periods alone, the learned men of the Royal Society are all hopelessly at sea, and jump from one million to five hundred millions of years with the utmost ease, as will be seen more than once during this comparison.

Take one instance for our present purpose -- the calculations of Mr. Croll. Whether, according to this authority, 2,500,000 years represent the time since the beginning of the tertiary age, or the Eocene period, as an American geologist makes him say;* or whether again Mr. Croll "allows fifteen millions since the beginning of the Eocene period," as quoted by an English geologist,** both sets of figures cover the claims

[[Footnote(s)]] -----

* A. Winchell, Professor of Geology, "World-Life," p. 369.

** Mr. Charles Gould, late Geological surveyor of Tasmania, in "Mythical Monsters," p. 84.

[[Vol. 2, Page]] 10 THE SECRET DOCTRINE.

made by the Secret Doctrine.* For assigning as the latter does from four to five million years between the incipient and the final evolution of the Fourth Root-Race, on the Lemuro-Atlantean Continents; one million years for the Fifth, or Aryan Race, to the present date; and about 850,000 since the submersion of the last large peninsula of the great Atlantis -- all this may have easily taken place within the 15,000,000 years conceded by Mr. Croll to the Tertiary Age. But, chronologically speaking, the duration of the period is of secondary importance, as we have, after all, certain American scientists to fall back upon. These gentlemen, unmoved by the fact that their assertions are called not only dubious but absurd, yet maintain that man existed so far back as in the Secondary Age. They have found human footprints on rocks of that formation; and furthermore, M. de Quatrefages finds no valid scientific reason why man should not have existed during the Secondary Age.

The "Ages" and periods in geology are, in sober truth, purely conventional terms, as they are still hardly delineated, and, moreover,

[[Footnote(s)]] -----

* Sir Charles Lyell, who is credited with having "happily invented the terms Eocene, Miocene, and Pliocene," to mark the three divisions of the Tertiary age, ought really to have settled upon some approximate age for his "Mind-offspring." Having left the duration of these periods, however, to the speculations of specialists, the greatest confusion and perplexity are the result of that happy thought. It seems like a hopeless task to quote one set of figures from one work, without the risk of finding it contradicted by the same Author in an earlier or a subsequent volume. Sir W. Thomson, one

of the most eminent among the modern authorities, has changed, about half-a-dozen times, his opinion upon the age of the Sun and the date of the consolidation of the Earth's crust. In Thomson and Tait's "Natural Philosophy," one finds only ten million years allowed, since the time when the temperature of the Earth permitted vegetable life to appear on it; (App. D et seq. also Trans. Roy. Soc. Edin. xxiii, Pt. 1, 157, 1862, where 847 is cancelled). Mr. Darwin gives Sir W. Thomson's estimate as "a minimum of 98 and a maximum of 200 millions of years since the consolidation of the crust" (See Ch. Gould). In the same work (Nat. Phil.) 80 millions are given from the time of incipient incrustation to the present state of the world. And in his last lecture, as shown elsewhere, Sir W. Thomson declares (1887) that the Sun is not older than 15 millions of years! Meanwhile, basing his arguments as to the limits to the age of the Sun's heat, on figures previously established by Sir W. Thomson, Mr. Croll allows 60 millions of years since the beginning of the Cambrian period. This is hopeful for the lovers of exact knowledge. Thus, whatever figures are given by Occult Science, they are sure to be corroborated by those of some one among the modern men of Science who are considered as authorities.

[[Vol. 2, Page]] 11 THE TROPICS AT THE POLE.

no two geologists or naturalists agree as to the figures. Thus, there is a wide margin for choice offered to the Occultist by the learned fraternity. Shall we take for one of our supports Mr. T. Mellard Reade? This gentleman, in a paper on "Limestone as an Index of Geological Time," read by him in 1878 before the Royal Society, claims that the minimum time required for the formation of the sedimentary strata and the elimination of the calcareous matter is in round numbers 600 million years (See "Proceedings of Royal Society," London, Vol. XXVIII., p. 281); or shall we ask support for our chronology from Mr. Darwin's works, wherein he demands for the organic transformations according to his theory from 300 to 500 million years? Sir C. Lyell and Prof. Houghton were satisfied with placing the beginning of the Cambrian Age at 200 and 240 millions of years back respectively. Geologists and zoologists claim the maximum time, though Mr. Huxley, at one time, placed the beginning of the incrustation of the earth 1,000 million years ago, and would not surrender a millennium of it.

But the main point for us lies not in the agreement or disagreement of the Naturalists as to the duration of geological periods, but rather in their perfect accord on one point, for a wonder, and this a very important one. They all agree that during "The Miocene Age" -- whether one or ten million years ago -- Greenland and even Spitzbergen, the remnants of our Second or Hyperborean Continent, "had almost a tropical climate." Now the pre-Homeric Greeks had preserved a vivid tradition of this "Land of the Eternal Sun," whither their Apollo journeyed yearly. "During the Miocene Age, Greenland (in N. Lat. 70 degrees) developed an abundance of trees, such as the Yew, the Redwood, the Sequoia, allied to the Californian species, Beeches, Planes, Willows, Oaks, Poplars and Walnuts, as well as a Magnolia and a Zamia," says Science; in short Greenland had Southern plants unknown to Northern regions.

And now this natural question rises. If the Greeks knew, in the days of Homer, of a Hyperborean land, i.e., a blessed land beyond the reach of Boreas, the god of winter and of the hurricane, an ideal region which the later Greeks and their classics have vainly tried to locate by searching for it beyond Scythia, a country where nights were short and days long, and beyond that land a country where the sun never set and the palm grew freely -- if they knew of all this, who then told them of it? In

[[Vol. 2, Page]] 12 THE SECRET DOCTRINE.

their day, and for ages previously, Greenland must certainly have been already covered with perpetual snows, with never-thawing ice, just as it is now. Everything tends to show that the land of the short nights and the long days was Norway or Scandinavia, beyond which was the blessed land of eternal light and summer; and to know of this, their tradition must have descended to the Greeks from some people more ancient than themselves, who were acquainted with those climatic details of which the Greeks themselves could know nothing. Even in our day, science suspects beyond the Polar seas, at the very circle of the Arctic Pole, the existence of a sea which never freezes and a continent which is ever green. The archaic teachings, and likewise the Puranas -- for one who understands the allegories of the latter -- contain the same statements. Suffice, then, to us the strong probability that a people, now unknown to history, lived during the Miocene period of modern science, at a time when Greenland was an almost tropical land.

NOTE. The reader is requested to bear in mind that the first and the following sections are not strictly consecutive in order of time. In the first Section the Stanzas which form the skeleton of the exposition are given, and certain important points commented upon and explained. In the subsequent sections various additional details are gathered, and a fuller explanation of the subject is attempted.

BOOK II. -- PART I.

ANTHROPOGENESIS.

STANZAS TRANSLATED WITH COMMENTARIES
FROM THE
SECRET BOOK OF DZYAN.

[[Vol. 2, Page 14]]

In primeval times, a maiden,

Beauteous Daughter of the Ether,
Passed for ages her existence
In the great expanse of Heaven,

.....

Seven hundred years she wandered,
Seven hundred years she laboured,
Ere her first-born was delivered.

.....

Ere a beauteous duck descending,
Hastens toward the water-mother.

.....

Lightly on the knee she settles,
Finds a nesting-place befitting,
Where to lay her eggs in safety,
Lays her eggs within, at pleasure,
Six, the golden eggs she lays them,
Then a Seventh, an egg of iron"

(Kalevala, Rune I.)

ANTHROPOGENESIS IN THE SECRET VOLUME.
(VERBATIM EXTRACTS.*)

I.

1. THE LHA WHICH TURNS THE FOURTH IS SUBSERVIENT TO THE LHA OF THE SEVEN, THEY WHO REVOLVE DRIVING THEIR CHARIOTS AROUND THEIR LORD, THE ONE EYE. HIS BREATH GAVE LIFE TO THE SEVEN; IT GAVE LIFE TO THE FIRST.

2. SAID THE EARTH:-- "LORD OF THE SHINING FACE; MY HOUSE IS EMPTY SEND THY SONS TO PEOPLE THIS WHEEL. THOU HAST SENT THY SEVEN SONS TO THE LORD OF WISDOM. SEVEN TIMES DOTHE HE SEE THEE NEARER TO HIMSELF, SEVEN TIMES MORE DOTHE HE FEEL THEE. THOU HAST FORBIDDEN THY SERVANTS, THE SMALL RINGS, TO CATCH THY LIGHT AND HEAT, THY GREAT BOUNTY TO INTERCEPT ON ITS PASSAGE. SEND NOW TO THY SERVANT THE SAME."

3. SAID THE "LORD OF THE SHINING FACE":-- "I SHALL SEND THEE A FIRE WHEN THY WORK IS COMMENCED. RAISE THY VOICE TO OTHER LOKAS; APPLY TO THY FATHER, THE LORD OF THE LOTUS, FOR HIS SONS THY PEOPLE SHALL BE UNDER THE RULE OF THE FATHERS. THY MEN SHALL BE MORTALS. THE MEN OF THE LORD OF WISDOM, NOT THE LUNAR SONS, ARE IMMORTAL. CEASE THY COMPLAINTS. THY SEVEN SKINS ARE YET ON THEE THOU ART NOT READY. THY MEN ARE NOT READY."

4. AFTER GREAT THROES SHE CAST OFF HER OLD THREE AND PUT ON HER NEW SEVEN SKINS, AND STOOD IN HER FIRST ONE.

II.

5. THE WHEEL WHIRLED FOR THIRTY CRORES MORE. IT CONSTRUCTED RUPAS: SOFT STONES THAT HARDENED; HARD PLANTS THAT SOFTENED. VISIBLE FROM INVISIBLE, INSECTS AND SMALL LIVES. SHE SHOOK THEM OFF HER BACK WHENEVER THEY OVERRAN THE MOTHER.

[[Footnote(s) -----]]

* Only forty-nine Slokas out of several hundred are here given. Not every verse is translated verbatim. A periphrasis is sometimes used for the sake of clearness and intelligibility, where a literal translation would be quite unintelligible.

[[Vol. 2, Page]] 16 THE SECRET DOCTRINE.

. . . . AFTER THIRTY CRORES SHE TURNED ROUND. SHE LAY ON HER BACK; ON HER SIDE . . . SHE WOULD CALL NO SONS OF HEAVEN, SHE WOULD ASK NO SONS OF WISDOM. SHE CREATED FROM HER OWN BOSOM. SHE EVOLVED WATER-MEN, TERRIBLE AND BAD.

6. THE WATER-MEN TERRIBLE AND BAD SHE HERSELF CREATED FROM THE REMAINS OF OTHERS, FROM THE DROSS AND SLIME OF HER FIRST, SECOND, AND THIRD, SHE FORMED THEM. THE DHYANI CAME AND LOOKED -- THE DHYANI FROM THE BRIGHT FATHER-MOTHER, FROM THE WHITE REGIONS THEY CAME, FROM THE ABODES OF THE IMMORTAL MORTALS.

7. DISPLEASED THEY WERE. OUR FLESH IS NOT THERE. NO FIT RUPAS FOR OUR BROTHERS OF THE FIFTH. NO DWELLINGS FOR THE LIVES. PURE WATERS, NOT TURBID, THEY MUST DRINK. LET US DRY THEM.

8. THE FLAMES CAME. THE FIRES WITH THE SPARKS; THE NIGHT FIRES AND THE DAY FIRES. THEY DRIED OUT THE TURBID DARK WATERS. WITH THEIR HEAT THEY QUENCHED THEM. THE LHAS OF THE HIGH, THE LHAMAYIN OF BELOW, CAME. THEY SLEW THE FORMS WHICH WERE TWO- AND FOUR-FACED. THEY FOUGHT THE GOAT-MEN, AND THE DOG-HEADED MEN, AND THE MEN WITH FISHES' BODIES.

9. MOTHER-WATER, THE GREAT SEA, WEPT. SHE AROSE, SHE DISAPPEARED IN THE MOON WHICH HAD LIFTED HER, WHICH HAD GIVEN HER BIRTH.

10. WHEN THEY WERE DESTROYED, MOTHER-EARTH REMAINED BARE. SHE ASKED TO BE DRIED.

III.

11. THE LORD OF THE LORDS CAME. FROM HER BODY HE SEPARATED THE WATERS, AND THAT WAS HEAVEN ABOVE, THE FIRST HEAVEN.

12. THE GREAT CHOHANS CALLED THE LORDS OF THE MOON, OF THE AIRY BODIES. "BRING FORTH MEN, MEN OF YOUR NATURE. GIVE THEM THEIR FORMS WITHIN. SHE WILL BUILD COVERINGS WITHOUT. MALES- FEMALES WILL THEY BE. LORDS OF THE FLAME ALSO "

13. THEY WENT EACH ON HIS ALLOTTED LAND: SEVEN OF THEM EACH ON HIS LOT. THE LORDS OF THE FLAME REMAIN BEHIND. THEY WOULD NOT GO, THEY WOULD NOT CREATE.

[[Vol. 2, Page]] 17 THE SLOKAS OF "DZYAN."

IV.

14. THE SEVEN HOSTS, THE "WILL-BORN LORDS," PROPELLED BY THE SPIRIT OF LIFE-GIVING, SEPARATE MEN FROM THEMSELVES, EACH ON HIS OWN ZONE.

15. SEVEN TIMES SEVEN SHADOWS OF FUTURE MEN WERE BORN, EACH OF HIS OWN COLOUR AND KIND. EACH INFERIOR TO HIS FATHER. THE FATHERS, THE BONELESS, COULD GIVE NO LIFE TO BEINGS WITH BONES. THEIR PROGENY WERE BHUTA, WITH NEITHER FORM NOR MIND. THEREFORE THEY ARE CALLED THE CHHAYA.

16. HOW ARE THE MANUSHYA BORN? THE MANUS WITH MINDS, HOW ARE THEY MADE? THE FATHERS CALLED TO THEIR HELP THEIR OWN FIRE; WHICH IS THE FIRE THAT BURNS IN EARTH. THE SPIRIT OF THE EARTH CALLED TO HIS HELP THE SOLAR FIRE. THESE THREE PRODUCED IN THEIR JOINT EFFORTS A GOOD RUPA. IT COULD STAND, WALK, RUN, RECLINE, OR FLY. YET IT WAS STILL BUT A CHHAYA, A SHADOW WITH NO SENSE

17. THE BREATH NEEDED A FORM; THE FATHERS GAVE IT. THE BREATH NEEDED A GROSS BODY; THE EARTH MOULDED IT. THE BREATH NEEDED THE SPIRIT OF LIFE; THE SOLAR LHAS BREATHED IT INTO ITS FORM. THE BREATH NEEDED A MIRROR OF ITS BODY; "WE GAVE IT OUR OWN," SAID THE DHYANIS. THE BREATH NEEDED A VEHICLE OF DESIRES; "IT HAS IT," SAID THE DRAINER OF WATERS. BUT BREATH NEEDS A MIND TO EMBRACE THE UNIVERSE; "WE CANNOT GIVE THAT," SAID THE FATHERS. "I NEVER HAD IT," SAID THE SPIRIT OF THE EARTH. "THE FORM WOULD BE CONSUMED WERE I TO GIVE IT MINE," SAID THE GREAT FIRE MAN REMAINED AN EMPTY SENSELESS BHUTA THUS HAVE THE BONELESS GIVEN LIFE TO THOSE WHO BECAME MEN WITH BONES IN THE THIRD.

V.

18. THE FIRST WERE THE SONS OF YOGA. THEIR SONS THE CHILDREN OF THE YELLOW FATHER AND THE WHITE MOTHER.

19. THE SECOND RACE WAS THE PRODUCT BY BUDDING AND

[[Vol. 2, Page]] 18 THE SECRET DOCTRINE.

EXPANSION, THE A-SEXUAL FROM THE SEXLESS* -- THUS WAS, O LANOO, THE SECOND RACE PRODUCED.

20. THEIR FATHERS WERE THE SELF-BORN. THE SELF-BORN, THE CHHAYA FROM THE BRILLIANT BODIES OF THE LORDS, THE FATHERS, THE SONS OF TWILIGHT.

21. WHEN THE RACE BECAME OLD, THE OLD WATERS MIXED WITH THE FRESHER WATERS. WHEN ITS DROPS BECAME TURBID, THEY VANISHED AND DISAPPEARED IN THE NEW STREAM, IN THE HOT STREAM OF LIFE. THE OUTER OF THE FIRST BECAME THE INNER OF THE SECOND. THE OLD WING BECAME THE NEW SHADOW, AND THE SHADOW OF THE WING.

VI.

22. THEN THE SECOND EVOLVED THE EGG-BORN, THE THIRD. THE SWEAT GREW, ITS DROPS GREW, AND THE DROPS BECAME HARD AND ROUND. THE SUN WARMED IT; THE MOON COOLED AND SHAPED IT; THE WIND FED IT UNTIL ITS RIPENESS. THE WHITE SWAN FROM THE STARRY VAULT OVERSHADOWED THE BIG DROP. THE EGG OF THE FUTURE RACE, THE MAN-SWAN OF THE LATER THIRD. FIRST MALE-FEMALE, THEN MAN AND WOMAN.

23. THE SELF-BORN WERE THE CHHAYAS: THE SHADOWS FROM THE BODIES OF THE SONS OF TWILIGHT.

VII.

24. THE SONS OF WISDOM, THE SONS OF NIGHT, READY FOR REBIRTH, CAME DOWN, THEY SAW THE VILE FORMS OF THE FIRST THIRD, "WE CAN CHOOSE," SAID THE LORDS, "WE HAVE WISDOM." SOME ENTERED THE CHHAYA. SOME PROJECTED THE SPARK. SOME DEFERRED TILL THE FOURTH. FROM THEIR OWN RUPA THEY FILLED THE KAMA. THOSE WHO ENTERED BECAME ARHATS. THOSE WHO RECEIVED BUT A SPARK, REMAINED DESTITUTE OF KNOWLEDGE; THE SPARK BURNED LOW. THE THIRD REMAINED MIND-LESS. THEIR JIVAS WERE NOT

[[Footnote(s) -----]]

* The idea and the spirit of the sentence is here given, as a verbal translation would convey very little to the reader.

[[Vol. 2, Page]] 19 THE SLOKAS OF "DZYAN."

READY. THESE WERE SET APART AMONG THE SEVEN. THEY BECAME NARROW-HEADED. THE THIRD WERE READY. "IN THESE SHALL WE DWELL," SAID THE LORDS OF THE FLAME.

25. HOW DID THE MANASA, THE SONS OF WISDOM, ACT? THEY REJECTED THE SELF-BORN. THEY ARE NOT READY. THEY SPURNED THE SWEAT-BORN. THEY ARE NOT QUITE READY. THEY WOULD NOT ENTER THE FIRST EGG-BORN.

26. WHEN THE SWEAT-BORN PRODUCED THE EGG-BORN, THE TWOFOLD AND THE MIGHTY, THE POWERFUL WITH BONES, THE LORDS OF WISDOM SAID: "NOW SHALL WE CREATE."

27. THE THIRD RACE BECAME THE VAHAN OF THE LORDS OF WISDOM. IT CREATED "SONS OF WILL AND YOGA," BY KRIYASAKTI IT CREATED THEM, THE HOLY FATHERS, ANCESTORS OF THE ARHATS. .

VIII.

28. FROM THE DROPS OF SWEAT; FROM THE RESIDUE OF THE SUBSTANCE; MATTER FROM DEAD BODIES OF MEN AND ANIMALS OF THE WHEEL BEFORE; AND FROM CAST-OFF DUST, THE FIRST ANIMALS WERE PRODUCED.

29. ANIMALS WITH BONES, DRAGONS OF THE DEEP, AND FLYING SARPAS WERE ADDED TO THE CREEPING THINGS. THEY THAT CREEP ON THE GROUND GOT WINGS. THEY OF THE LONG NECKS IN THE WATER BECAME THE PROGENITORS OF THE FOWLS OF THE AIR.

30. DURING THE THIRD RACE THE BONELESS ANIMALS GREW AND CHANGED: THEY BECAME ANIMALS WITH BONES, THEIR CHHAYAS BECAME SOLID.

31. THE ANIMALS SEPARATED THE FIRST. THEY BEGAN TO BREED. THE TWO-FOLD MAN SEPARATED ALSO. HE SAID: "LET US AS THEY; LET US UNITE AND MAKE CREATURES." THEY DID.

32. AND THOSE WHICH HAD NO SPARK TOOK HUGE SHE-ANIMALS UNTO THEM. THEY BEGAT UPON THEM DUMB RACES. DUMB THEY WERE THEMSELVES. BUT THEIR TONGUES UNTIED. THE TONGUES OF THEIR PROGENY REMAINED STILL. MONSTERS THEY BRED. A RACE OF CROOKED RED-HAIR-COVERED MONSTERS GOING ON ALL FOURS. A DUMB RACE TO KEEP THE SHAME UNTOLD.

[[Vol. 2, Page]] 20 THE SECRET DOCTRINE.

IX.

33. SEEING WHICH, THE LHAS WHO HAD NOT BUILT MEN, WEPT, SAYING:--

34. "THE AMANASA HAVE DEFILED OUR FUTURE ABODES. THIS IS KARMA. LET US DWELL IN THE OTHERS. LET US TEACH THEM BETTER, LEST WORSE SHOULD HAPPEN. THEY DID

35. THEN ALL MEN BECAME ENDOWED WITH MANAS. THEY SAW THE SIN OF THE MINDLESS.

36. THE FOURTH RACE DEVELOPED SPEECH.

37. THE ONE BECAME TWO; ALSO ALL THE LIVING AND CREEPING THINGS THAT WERE STILL ONE, GIANT FISH-BIRDS AND SERPENTS WITH SHELL-HEADS.

X.

38. THUS TWO BY TWO ON THE SEVEN ZONES, THE THIRD RACE GAVE BIRTH TO THE FOURTH-RACE MEN; THE GODS BECAME NO-GODS; THE SURA BECAME A-SURA.

39. THE FIRST, ON EVERY ZONE, WAS MOON-COLOURED; THE SECOND YELLOW LIKE GOLD; THE THIRD RED; THE FOURTH BROWN, WHICH BECAME BLACK WITH SIN. THE FIRST SEVEN HUMAN SHOOTERS WERE ALL OF ONE COMPLEXION. THE NEXT SEVEN BEGAN MIXING.

40. THEN THE FOURTH BECAME TALL WITH PRIDE. WE ARE THE KINGS, IT WAS SAID; WE ARE THE GODS.

41. THEY TOOK WIVES FAIR TO LOOK UPON. WIVES FROM THE MINDLESS, THE NARROW-HEADED. THEY BRED MONSTERS. WICKED DEMONS, MALE AND FEMALE, ALSO KHADO (DAKINI), WITH LITTLE MINDS.

42. THEY BUILT TEMPLES FOR THE HUMAN BODY. MALE AND FEMALE THEY WORSHIPPED. THEN THE THIRD EYE ACTED NO LONGER.

XI.

43. THEY BUILT HUGE CITIES. OF RARE EARTHS AND METALS THEY BUILT, AND OUT OF THE FIRES VOMITED, OUT OF THE WHITE STONE OF

[[Vol. 2, Page]] 21 THE SLOKAS OF "DZYAN."

THE MOUNTAINS AND OF THE BLACK STONE, THEY CUT THEIR OWN IMAGES IN THEIR SIZE AND LIKENESS, AND WORSHIPPED THEM.

44. THEY BUILT GREAT IMAGES NINE YATIS HIGH, THE SIZE OF THEIR BODIES. INNER FIRES HAD DESTROYED THE LAND OF THEIR FATHERS. THE WATER THREATENED THE FOURTH.

45. THE FIRST GREAT WATERS CAME. THEY SWALLOWED THE SEVEN GREAT ISLANDS.

46. ALL HOLY SAVED, THE UNHOLY DESTROYED. WITH THEM MOST OF THE HUGE ANIMALS, PRODUCED FROM THE SWEAT OF THE EARTH.

XII.

47. FEW MEN REMAINED: SOME YELLOW, SOME BROWN AND BLACK, AND SOME RED REMAINED. THE MOON-COLOURED WERE GONE FOREVER.

48. THE FIFTH PRODUCED FROM THE HOLY STOCK REMAINED; IT WAS RULED OVER BY THE FIRST DIVINE KINGS.

49. . . . WHO RE-DESCENDED, WHO MADE PEACE WITH THE FIFTH, WHO TAUGHT AND INSTRUCTED IT.

[[Vol. 2, Page]] 22 THE SECRET DOCTRINE.

STANZA I.*
BEGINNINGS OF SENTIENT LIFE.

§§ (1) THE LHA, or Spirit of the Earth. (2) Invocation of the Earth to the Sun.
(3) What the Sun answers. (4) Transformation of the Earth.

1. THE LHA (a) WHICH TURNS THE FOURTH (Globe, or our Earth) IS SERVANT TO THE LHA(S) OF THE SEVEN (the planetary Spirits) (b), THEY WHO REVOLVE, DRIVING THEIR CHARIOTS AROUND THEIR LORD, THE ONE EYE (Loka-Chakshub) OF OUR WORLD. HIS BREATH GIVES LIFE TO THE SEVEN (gives light to the planets). IT GAVE LIFE TO THE FIRST (c). "THEY ARE ALL DRAGONS OF WISDOM," adds the Commentary (d).

(a) Lha is the ancient word in trans-Himalayan regions for "Spirit," any celestial or superhuman Being, and it covers the whole series of heavenly hierarchies, from Archangel, or Dhyani, down to an angel of darkness, or terrestrial Spirit.

(b) This expression shows in plain language that the Spirit-Guardian of our globe, which is the fourth in the chain, is subordinate to the chief Spirit (or God) of the Seven Planetary Genii or Spirits. As already explained, the ancients had, in their Kyriel of gods, seven chief Mystery-gods, whose chief was, exoterically, the visible Sun, or the eighth, and, esoterically, the second Logos, the Demiurge. The seven (who have now become the "Seven Eyes of the Lord" in the Christian religion) were the regents of the seven chief planets; but these were not

[[Footnote(s)]] -----

* All the words and sentences placed in brackets in the Stanzas and Commentaries are the writer's. In some places they may be incomplete and even inadequate from the Hindu standpoint; but in the meaning attached to them in Trans-Himalayan Esotericism they are correct. In every case the writer takes any blame upon herself. Having never claimed personal infallibility, that which is given on her own authority may leave much to be desired, in the very abstruse cases where too deep metaphysics is involved. The teaching is offered as it is understood; and as there are seven keys of interpretation to every symbol and allegory, that which may not fit a meaning, say from the psychological or astronomical aspect, will be found quite correct from the physical or metaphysical.

[[Vol. 2, Page]] 23 THE ACTION OF THE GREAT BREATH.

reckoned according to the enumeration devised later by people who had forgotten, or who had an inadequate notion of, the real Mysteries, and included neither the sun, the moon, nor the earth. The sun was the chief, exoterically, of the twelve great gods, or zodiacal constellations; and, esoterically, the Messiah, the Christos (the subject anointed by the Great BREATH, or the ONE) surrounded by his twelve subordinate powers, also subordinate, in turn, to each of the seven "Mystery-gods" of the planets.

"The seven higher make the Seven Lhas create the world," states a Commentary; which means that our Earth, leaving aside the rest, was created or fashioned by terrestrial spirits, the "Regents" being simply the supervisors. This is the first germ, the seed of that which grew later into the Tree of Astrology and Astrolatry. The Higher ones were the Kosmocrotadores, the fabricators of our solar system. This is borne out by all the ancient Cosmogonies: that of Hermes, of the Chaldees, of the Aryans, of the Egyptians, and even of the Jews. Heaven's belt, the signs of the Zodiac (the Sacred animals), are as much the Bne' Alhim (Sons of the Gods or the Elohim) as the Spirits of the Earth; but they are prior to them. Soma and Sin, Isis and Diana, are all lunar gods or goddesses, called the fathers and mothers of our Earth, which is subordinate to them. But these, in their turn, are subordinate to their "Fathers" and "Mothers" -- the latter interchangeable and varying with each nation -- the gods and their planets, such as Jupiter, Saturn Bel, Brihaspati, etc.

(c) "His breath gave life to the seven," refers as much to the sun, who gives life to the Planets, as to the "High One," the Spiritual Sun, who gives life to the whole Kosmos. The astronomical and astrological keys opening the gate leading to the mysteries of Theogony can be found only in the later glossaries, which accompany the Stanzas.

In the apocalyptic Slokas of the Archaic Records, the language is as symbolical, if less mythical, than in the Puranas. Without the help of the later commentaries, compiled by generations of adepts, it would be impossible to understand the meaning correctly. In the ancient Cosmogonies, the visible and the invisible worlds are the double links of one and the same chain. As the invisible Logos, with its seven hierarchies (represented or personified each by its chief angel or rector), form one POWER, the inner and the invisible; so, in the world of Forms, the Sun and the seven chief Planets constitute the visible and active potency; the latter "Hierarchy" being, so to speak, the visible and objective Logos of the invisible and (except in the lowest grades) ever-subjective angels.

Thus -- to anticipate a little by way of illustration -- every Race in its

[[Vol. 2, Page]] 24 THE SECRET DOCTRINE.

evolution is said to be born under the direct influence of one of the Planets: Race the first receiving its breath of life from the Sun, as will be seen later on; while the third humanity -- those who fell into generation, or from androgynes became separate entities, one male and the other female -- are said to be under the direct influence of Venus, "the little sun in which the solar orb stores his light."

The summation of the Stanzas in Book I. showed the genesis* of Gods and men taking rise in, and from, one and the same Point, which is the One Universal, Immutable, Eternal, and absolute UNITY. In its primary manifested aspect we have seen it become: (1) in the sphere of objectivity and Physics, Primordial Substance and Force (centripetal and centrifugal, positive and negative, male and female, etc., etc.); (2) in the world of Metaphysics, the SPIRIT OF THE UNIVERSE, or Cosmic Ideation, called by some the LOGOS.

This LOGOS is the apex of the Pythagorean triangle. When the triangle is complete it becomes the Tetraktis, or the Triangle in the Square, and is the dual symbol of the four-lettered Tetragrammaton in the manifested Kosmos, and of its radical triple RAY in the unmanifested, or its noumenon.

Put more metaphysically, the classification given here of Cosmic Ultimates, is more one of convenience than of absolute philosophical accuracy. At the commencement of a great Manvantara, Parabrahm manifests as Mulaprakriti and then as the Logos. This Logos is equivalent to the "Unconscious Universal Mind," etc., of Western Pantheists. It constitutes the Basis of the SUBJECT-side of manifested Being, and is the source of all manifestations of individual consciousness. Mulaprakriti or Primordial Cosmic Substance, is the foundation of the OBJECT-side of things -- the basis of all objective evolution and Cosmogogenesis. Force, then, does not emerge with Primordial Substance from Parabrahmic Latency. It is the transformation into energy of the supra-conscious thought of the Logos, infused, so to speak, into the objectivation of the latter out of potential latency in the One Reality. Hence spring the wondrous laws of matter: hence the "primal impress" so vainly discussed by Bishop Temple. Force thus is not synchronous with the first objectivation of Mulaprakriti. But as, apart from it, the latter is absolutely and necessarily inert -- a mere abstraction -- it is unnecessary to weave too fine a cobweb of subtleties as to the order of succession of

[[Footnote(s)]] -----

* According to Dr. A. Wilder's learned definition, Genesis, [[genesis]], is not generation, but "a coming out of the eternal into the Kosmos and Time": "a coming from esse into existere," or "from BE-NESS into 'being' " -- as a Theosophist would say.

[[Vol. 2, Page]] 25 MAN, THE THIRD LOGOS.

the Cosmic Ultimates. Force succeeds Mulaprakriti; but, minus Force, Mulaprakriti is for all practical intents and purposes non-existent.*

The "Heavenly Man" (Tetragrammaton) who is the Protogonos, Tikkoun, the firstborn from the passive deity and the first manifestation of that deity's shadow, is the universal form and idea, which engenders the manifested Logos, Adam Kadmon, or the four-lettered symbol, in the Kabala, of the Universe itself, also called the second Logos. The second springs from the first and develops the third triangle (see the Sephirothal Tree); from the last of which (the lower host of Angels) MEN are generated. It is with this third aspect that we shall deal at present.

The reader must bear in mind that there is a great difference between the LOGOS and the Demiurgos, for one is Spirit and the other is Soul; or as Dr. Wilder has it: "Dianoia and Logos are synonymous, Nous being superior and closely in affinity with [[To agathon]], one being the superior apprehending, the other the comprehending -- one noetic and the other phrenic."

Moreover, Man was regarded in several systems as the third Logos. The esoteric meaning of the word Logos (speech or word, Verbum) is the rendering in objective expression, as in a photograph, of the concealed thought. The Logos is the mirror reflecting DIVINE MIND, and the Universe is the mirror of the Logos, though the latter is the esse of that Universe. As the Logos reflects all in the Universe of Pleroma, so man reflects in himself all that he sees and finds in his Universe, the Earth. It is the three Heads of the Kabala: "Unum intra alterum, et alterum super alterum" (Zohar, Idra Suta, sec. VII). "Every Universe (world or planet) has its own Logos," says the doctrine. The Sun was always called by the Egyptians "the eye of Osiris," and was himself the Logos, the first-begotten, or light made manifest to the world, "which is the Mind and divine intellect of the Concealed." It is only by the sevenfold Ray of this light that we can become cognizant of the Logos through the Demi-urge, regarding the latter as the creator of our planet and everything pertaining to it, and the former as the guiding Force of that "Creator" -- good and bad at the same time, the origin of good and the origin of evil. This "Creator" is neither good nor bad per se, but its differentiated aspects in nature make it assume one or the other character. With the invisible and the unknown Universes disseminated through space, none of the sun-gods had anything to do. The idea is expressed very clearly in the "Books of Hermes," and in every ancient folk lore. It is symbolised generally by the Dragon and the Serpent -- the Dragon of Good and the Serpent of Evil, represented on Earth by

[[Footnote(s)]] -----

* For a clearer explanation of the origins, as contained in the esotericism of the Bhagavad Gita, see the Notes thereon published in the "Theosophist" for February, March and June, 1887, Madras.

[[Vol. 2, Page]] 26 THE SECRET DOCTRINE.

the right and the left-hand Magic. In the epic poem of Finland, the Kalewala,* the origin of the Serpent of Evil is given: it is born from the "spittle of Suoyatar . . . and endowed with a living Soul by the Principle of Evil," Hisi. A strife is described between the two, the "thing of Evil" (the Serpent or Sorcerer), and Ahti, the Dragon; "Magic Lemminkainen." The latter is one of the seven sons of Ilmatar, the virgin "daughter of the air," she "who fell from heaven into the sea," before Creation, i.e., Spirit transformed into the matter of sensuous life. There is a world of meaning and Occult thought in these few lines, admirably rendered by Dr. J. M. Crawford, of Cincinnati. The hero Lemminkainen, the good magician,

"Hews the wall with might of magic,
Breaks the palisade in pieces,
Hews to atoms seven pickets,
Chops the Serpent wall to fragments.

.....
When the monster little heeding,

.....
Pounces with his mouth of venom
At the head of Lemminkainen.
But the hero, quick recalling,
Speaks the Master words of Knowledge,
Words that came from distant ages,
Words his ancestors had taught him"

(d) In China the men of Fohi (or the "Heavenly Man") are called the twelve Tien-Hoang, the twelve hierarchies of Dhyanis or Angels, with human Faces, and Dragon bodies; the dragon standing for divine Wisdom or Spirit**; and they create men by incarnating themselves in

[[Footnote(s)]] -----

* J. W. Alden, New York.

** It has been repeatedly stated that the Serpent is the symbol of wisdom and of Occult knowledge. "The Serpent has been connected with the god of wisdom from the earliest times of which we have any historical notice," writes Staniland

Wake. "This animal was the especial symbol of Thot or Taut . . . and of all those gods, such as Hermes (?) and Seth who can be connected with him. This is also the primitive Chaldean triad Hea or Hoa." According to Sir Henry Rawlinson, the most important titles of this deity refer to "his functions as the source of all knowledge and science." Not only is he "the intelligent fish," but his name may be read as signifying both "life" and a serpent (an initiated adept), and he may be considered as "figured by the great serpent which occupies so conspicuous a place among the symbols of the gods on the black stones recording Babylonian benefactions." Esculapius, Serapis, Pluto, Knoum and Kneph, are all deities with the attributes of the serpent. Says Dupuis, "They are all healers, givers of health, spiritual and physical, and of enlightenment." The crown formed of an asp, the Thermuthis, belongs to Isis, goddess of Life and Healing. The Upanishads have a treatise on the Science of Serpents -- in other words, the Science of Occult knowledge; and the Nagas of the exoteric Buddhist are not "the fabulous creatures of the nature of serpents . . . beings superior to men and the protectors of the [[Footnote continued on next page]]

[[Vol. 2, Page]] 27 MAN'S DUAL AND TRIPLE NATURE.

seven figures of clay -- earth and water -- made in the shape of those Tien-hoang, a third allegory; (compare the "Symbols of the Bonzes"). The twelve AESERS of the Scandinavian Eddas do the same. In the Secret Catechism of the Druses of Syria -- a legend which is repeated word for word by the oldest tribes about and around the Euphrates -- men were created by the "Sons of God" descending on Earth, where, after culling seven Mandragoras, they animated these roots, which became forthwith men.*

All these allegories point to one and the same origin -- to the dual and the triple nature of man; dual, as male and female; triple -- as being of spiritual and psychic essence within, and of a material fabric without.

2. SAID THE EARTH, "LORD OF THE SHINING FACE (the Sun) MY HOUSE IS EMPTY. . . . SEND THY SONS TO PEOPLE THIS WHEEL (Earth). THOU HAST SENT THY SEVEN SONS TO THE LORD OF WISDOM (a). SEVEN TIMES DOTHE HE SEE THEE NEARER TO HIMSELF; SEVEN TIMES MORE DOTHE HE FEEL THEE. THOU HAST FORBIDDEN THY SERVANTS, THE SMALL RINGS, TO CATCH THY LIGHT AND HEAT, THY GREAT BOUNTY TO INTERCEPT ON ITS PASSAGE (b). SEND NOW TO THY SERVANT THE SAME!" (c).

(a) The "Lord of Wisdom" is Mercury, or Budha.

(b) The modern Commentary explains the words as a reference to a well-known astronomical fact, "that Mercury receives seven times more

[[Footnote(s)]] -----

[[Footnote continued from previous page]] law of Buddha," as Schlagintweit believes, but real living men, some superior to men by virtue of their Occult knowledge, and the protectors of Buddha's law, inasmuch as they interpret his metaphysical tenets correctly, others inferior morally as being black magicians. Therefore it is truly declared that Gautama Buddha "is said to have taught them a more philosophical religious system than to men, who were not sufficiently advanced to understand it at the time of his appearance." (Schlagintweit's "Tibetan Buddhism.")

* The Mandragora is the mandrake of the Bible, of Rachel and Leah. They are the roots of a plant, fleshy, hairy, and forked below, representing roughly the limbs of a man, the body and even a head. Its magical and mysterious properties have been proclaimed in fable and play from the most archaic ages. From Rachel and Leah, who indulged in witchcraft with them, down to Shakespeare, who speaks of shrieking --

. . . "Like mandrakes torn out of the earth
That living mortals, hearing them, run mad"

-- the mandragora was the magic plant par excellence.

These roots, without any stalk, and with large leaves growing out of the head of the root, like a gigantic crop of hair, present little similitude to man when found in Spain, Italy, Asia Minor, or Syria. But on the Isle of Candia, and in Karamania near the city of Adan, they have a wonderfully human form; being very highly prized as amulets. They are also worn by women as a charm against sterility, and for other purposes. They are especially effective in Black Magic.

[[Vol. 2, Page]] 28 THE SECRET DOCTRINE.

light and heat from the Sun than Earth, or even the beautiful Venus, which receives but twice that amount more than our insignificant Globe." Whether the fact was known in antiquity may be inferred from the prayer of the "Earth Spirit" to the Sun as given in the text.* The Sun however, refuses to people the globe, as it is not ready to receive life as yet.

Mercury is, as an astrological planet, still more occult and mysterious than Venus. It is identical with the Mazdean Mithra, the genius, or god, "established between the Sun and the Moon, the perpetual companion of 'Sun' of Wisdom." Pausanias shows him as having an altar in common with Jupiter (Book V). He had wings to express his attendance upon the Sun in its course; and he was called the Nuntis, or Sun-wolf, "solaris luminis particeps." He was the leader of and the evocator of Souls, the "great Magician" and the Hierophant. Virgil depicts him as taking "his wand to evoke from Orcus the souls plunged therein" -- tum virgam capit, hac animas ille evocat Orco. (See also the 21st Fargard of the Vendidad on the celestial militia.) He is the golden-coloured Mercury, the [[chrusophaes Hermes]] whom the Hierophants forbade to name. He is symbolised in Grecian mythology by one of the dogs (vigilance), which watch over the celestial flock (occult wisdom), or Hermes Anubis, or again Agathodaemon. He is the Argus watching over the Earth, and which the latter mistakes for the Sun itself. It is through the intercession of Mercury that the Emperor Julian prayed to the Occult Sun every night; for, as says Vossius: "All the theologians agree to say that Mercury and the Sun are one. . . . He was the

most eloquent and the most wise of all the gods, which is not to be wondered at, since Mercury is in such close proximity to the Wisdom and the Word of God (the Sun) that he was confused with both." (Idolatry, Vol. II., p. 373.) Vossius utters here a greater occult truth than he suspected. The Hermes-Sarameyas of the Greeks is closely related to the Hindu Saram and Sarameya, the divine watchman, "who watches over the golden flock of stars and solar rays."

In the clearer words of the Commentary:

"The Globe, propelled onward by the Spirit of the Earth and his six assistants,

[[Footnote(s)]] -----

* Copernicus wrote his theories on the "Revolution of the Heavenly Bodies" in the XVIth century, and the Zohar, even if compiled by Moses de Leon in the XIIIth century, states that: "In the book of Hammannunah, the Old, we learn . . . that the earth turns upon itself in the form of a circle; that some are on top, the others below, . . . that there are some countries which are lightened, whilst others are in darkness; these have the day, when for the former it is night; and there are countries in which it is constantly day, or in which at least the night continues only some instants." (Zohar iii., fol. 10a "Qabbalah," p. 139.)

[[Vol. 2, Page]] 29 THE CELESTIAL GOVERNORS OF HUMANITY.

gets all its vital forces, life, and powers through the medium of the seven planetary Dhyanis from the Spirit of the Sun. They are his messengers of Light and Life."

"Like each of the seven regions of the Earth, each of the seven* Firstborn (the primordial human groups) receives its light and life from its own especial Dhyani -- spiritually, and from the palace (house, the planet) of that Dhyani physically; so with the seven great Races to be born on it. The first is born under the Sun; the second under Brihaspati (Jupiter); the third under Lohitanga (the "fiery-bodied," Venus, or Sukra); the fourth, under Soma (the Moon, our Globe also, the Fourth Sphere being born under and from the Moon) and Sani, Saturn** the Krura-lochana (evil-eyed) and the Asita (the dark); the fifth, under Budha (Mercury)."

"So also with man and every 'man' in man (every principle). Each gets its specific quality from its primary (the planetary spirit), therefore every man is a septenate (or a combination of principles, each having its origin in a quality of that special Dhyani). Every active power or force of the earth comes to her from one of the seven Lords. Light comes through Sukra (Venus), who receives a triple supply, and gives one-third of it to the Earth. Therefore the two are called 'Twin-sisters,' but the Spirit of the Earth is subservient to the 'Lord' of Sukra. Our wise men represent the two Globes, one over, the other under the double Sign (the primeval Svastica bereft of its four arms, or the cross [[diagram]]).****

The "double sign" is, as every student of Occultism knows, the symbol of the male and the female principles in Nature, of the positive and the negative, for the Svastica or [[diagram]] is all that and much more. All antiquity, ever since the birth of Astronomy -- imparted to the Fourth Race by one of its divine kings of the Divine Dynasty -- and

[[Footnote(s)]] -----

* Science teaches that Venus receives from the sun twice as much light and heat as the earth. Thus the planet, precursor of the dawn and the twilight, the most radiant of all the planets, said to give the earth one-third of the supply she receives, has two parts left for herself. This has an occult as well as an astronomical meaning.

** "As it is above so it is below" is the fundamental axiom of occult philosophy. As the logos is seven-fold, i.e., throughout Kosmos it appears as seven logoi under seven different forms, or, as taught by learned Brahmins, "each of these is the central figure of one of the seven main branches of the ancient wisdom religion;" and, as the seven principles which correspond to the seven distinct states of Pragna, or consciousness, are allied to seven states of matter and the seven forms of force, the division must be the same in all that concerns the earth.

*** Venus is thus [[diagram]] the Earth [[diagram]].

[[Vol. 2, Page]] 30 THE SECRET DOCTRINE.

also of Astrology, represented Venus in its astronomical tables as a Globe poised over a Cross, and the Earth, as a Globe under a Cross. The esoteric meaning of this is: "Earth fallen into generation, or into the production of its species through sexual union." But the later Western nations did not fail to give quite a different interpretation. They explained this sign through their mystics -- guided by the light of the Latin Church -- as meaning that our Earth and all on it were redeemed by the Cross, while Venus (otherwise Lucifer or Satan) was trampling upon it. Venus is the most occult, powerful, and mysterious of all the planets; the one whose influence upon, and relation to the Earth is most prominent. In exoteric Brahmanism, Venus or Sukra -- a male deity* -- is the son of Bhrigu, one of the Prajapati and a Vedic sage, and is Daitya-Guru, or the priest-instructor of the primeval giants. The whole history of "Sukra" in the Puranas, refers to the Third and to the Fourth Races.

"It is through Sukra that the 'double ones' (the Hermaphrodites) of the Third (Root-Race) descended from the first 'Sweat-born,'" says the Commentary. Therefore it is represented under the symbol of [[diagram]] (the circle and diameter) during the Third (Race) and of [[diagram]] during the Fourth.

This needs explanation. The diameter, when found isolated in a circle, stands for female nature, for the first ideal World, self-generated and self-impregnated by the universally diffused Spirit of Life -- referring thus to the primitive Root-Race also. It becomes androgynous as the Races and all on Earth develop into their physical forms, and the symbol is transformed into a circle with a diameter from which runs a vertical line: expressive of male and female, not separated as yet -- the first and earliest Egyptian Tau [[diagram]]; after which it becomes [[diagram]] or male-female separated** (See

first pp. of Book I) and fallen into generation. Venus (the planet) is symbolised by the sign of a globe over the cross, which shows it as presiding over the natural generation of man. The Egyptians symbolised Ank, "life," by the ansated cross, or [[diagram]], which is only another form of Venus (Isis) [[diagram]], and meant, esoterically, that mankind and all animal life had stepped out of the divine spiritual circle and fallen into physical male and female generation. This sign, from the end of the Third Race, has the same phallic significance as the "tree

[[Footnote(s)]] -----

* In the esoteric philosophy it is male and female, or hermaphrodite; hence the bearded Venus in mythology.

** Therefore, putting aside its religio-metaphysical aspect, the Cross of the Christians is symbolically far more phallic than the pagan Svastica.

[[Vol. 2, Page]] 31 THE HORSES OF SUKRA'S CAR.

of life" in Eden Anouki, a form of Isis, is the goddess of life; and Ank was taken by the Hebrews from the Egyptians and introduced by Moses, one learned in the Wisdom of the priests of Egypt, with many other mystical words. The word Ank in Hebrew, with the personal suffix, means "my life," "my being," which "is the personal pronoun Anochi," from the name of the Egyptian goddess Anouki.*

In one of the most ancient Catechisms of Southern India, Madras Presidency, the hermaphrodite goddess Adanari (see also "Indian Pantheon") has the ansated cross, the Svastica, the "male and female sign," right in the central part, to denote the pre-sexual state of the Third Race. Vishnu, who is now represented with a lotus growing out of his navel -- or the Universe of Brahma evolving out of the central point Nara -- is shown in one of the oldest carvings as double-sexed (Vishnu and Lakshmi) standing on a lotus-leaf floating on the water; which water rises in a semicircle and pours through the Svastica, "the source of generation" or of the descent of man.

Pythagoras calls Sukra-Venus the Sol alter, "the other Sun." Of the "seven palaces of the Sun," that of Lucifer Venus is the third one in Christian and Jewish Kabala, the Zohar making of it the abode of Samael. According to the Occult Doctrine, this planet is our Earth's primary, and its spiritual prototype. Hence, Sukra's car (Venus-Lucifer's) is said to be drawn by an ogdoad of "earth-born horses," while the steeds of the chariots of the other planets are different.

"Every sin committed on Earth is felt by Usanas-Sukra. The Guru of the Daityas is the Guardian Spirit of the Earth and Men. Every change on Sukra is felt on, and reflected by, the Earth."

Sukra, or Venus, is thus represented as the preceptor of the Daityas, the giants of the Fourth Race, who, in the Hindu allegory, obtained at one time the sovereignty of all the Earth, and defeated the minor gods. The Titans of the Western allegory are as closely connected with Venus-Lucifer, identified by later Christians with Satan. Therefore, as Venus, equally with Isis, was represented with Cow's horns on her head, the symbol of mystic Nature, and one that is convertible with, and significant of, the moon, since all these were lunar goddesses, the configuration of this planet is now placed by theologians between the horns of the mystic Lucifer.** It is owing to the fanciful interpretation of the

[[Footnote(s)]] -----

* The ansated Cross is the astronomical planetary sign of Venus, "signifying the existence of parturient energy in the sexual sense, and this was one of the attributes of Isis, the Mother, of Eve, Havvah, or Mother-Earth, and was so recognised among all the ancient peoples in one or another mode of expression." (From a modern Kabalistic MS.)

** Athenaeus shows that the first letter of Satan's name was represented in days of old by an arc and crescent; and some Roman Catholics, good and kind men, would persuade the public that it is in honour of Lucifer's crescent-like horns that Mussulmen [[Footnote continued on next page]]

[[Vol. 2, Page]] 32 THE SECRET DOCTRINE.

archaic tradition, which states that Venus changes simultaneously (geologically) with the Earth; that whatever takes place on the one takes place on the other; and that many and great were their common changes -- it is for these reasons that St. Augustine repeats it, applying the several changes of configuration, colour, and even of the orbital paths, to that theologically-woven character of Venus-Lucifer. He even goes so far in his pious fancy as to connect the last changes of the planet with the Noachian and mythical Deluge alleged to have taken place 1796 years B.C. (See "City of God" lxxi., ch. viii.).

As Venus has no satellites, it is stated allegorically, that "Asphujit" (this "planet") adopted the Earth, the progeny of the Moon, "who overgrew its parent and gave much trouble," a reference to the occult connection between the two. The Regent (of the planet) Sukra* loved his adopted child so well that he incarnated as Usanas and gave it perfect laws, which were disregarded and rejected in later ages. Another allegory, in Harivansa, is that Sukra went to Siva asking him to protect his pupils, the Daityas and Asuras, from the fighting gods; and that to further his object he performed a Yoga rite "imbibing the smoke of chaff with his head downwards for 1,000 years." This refers to the great inclination of the axis of Venus (amounting to 50 degrees), and to its being enveloped in eternal clouds. But it relates only to the physical constitution of the planet. It is with its Regent, the informing Dhyana Chohan,

[[Footnote(s)]] -----

[[Footnote continued from previous page]] have chosen the Crescent for their national arms. Venus has always been identified, since the establishment of Roman Catholic dogmatism, with Satan and Lucifer, or the great Dragon, contrary to all reason and logic. As shown by the symbologists and astronomers, the association between the serpent and the idea of darkness had an astronomical foundation. The position which the constellation of Draco at one time occupied showed

that the great serpent was the ruler of the night. This constellation was formerly at the very centre of the heavens, and is so extensive that it was called the Great Dragon. Its body spreads over seven signs of the Zodiac; and Dupuis, "who," says Staniland Wake, "sees in the Dragon of the Apocalypse a reference to the celestial serpent," remarks that "it is not astonishing that a constellation so extended should be represented by the author of that book as a Great Dragon with seven heads, who drew the third part of the stars from heaven and cast them to Earth"; (Dupuis, tome III., p. 255). Only Dupuis never knew why Draco, once the pole-star -- the symbol of "Guide," Guru and director -- had been thus degraded by posterity. "The gods of our fathers are our devils," says an Asiatic proverb. When Draco ceased to be the lode-star, the guiding sidereal divinity, it shared the fate of all the fallen gods. Seth and Typhon was at one time, Bunsen tells us, "a great god universally adored throughout Egypt, who conferred on the sovereigns of the 18th and 19th Dynasties the symbols of life and power. But subsequently, in the course of the 20th Dynasty, he is suddenly treated as an evil Demon, insomuch that his effigies and name are obliterated on all the monuments and inscriptions that could be reached." The real occult reason will be given in these pages.

* Sukra is the son of Bhrigu the great Rishi, and one of the Seven Prajapati, the founder of the Race of Bhargavas, in which Parasu Rama is born.

[[Vol. 2, Page]] 33 PARENT STARS AND SISTER PLANETS.

that Occult mysticism has to deal. The allegory which states that for killing Sukra's mother, Vishnu was cursed by him to be reborn seven times on the Earth, is full of occult philosophical meaning. It does not refer to Vishnu's Avatars, since these number nine, the tenth being still to come, but to the Races on Earth. Venus, or Lucifer (also Sukra and Usanas) the planet, is the light-bearer of our Earth, in both its physical and mystic sense. The Christians knew it well in early times, since one of the earliest popes of Rome is known by his Pontiff name as Lucifer.

"Every world has its parent star and sister planet. Thus Earth is the adopted child and younger brother of Venus, but its inhabitants are of their own kind. . . . All sentient complete beings (full septenary men or higher beings) are furnished, in their beginnings, with forms and organisms in full harmony with the nature and state of the sphere they inhabit."*

"The Spheres of Being, or centres of life, which are isolated nuclei breeding their men and their animals, are numberless; not one has any resemblance to its sister-companion or to any other in its own special progeny."**

"All have a double physical and spiritual nature."

"The nucleoles are eternal and everlasting; the nuclei periodical and finite. The nucleoles form part of the absolute. They are the embrasures of that black impenetrable fortress, which is for ever concealed from human or even Dhyanic sight. The nuclei are the light of eternity escaping therefrom."

"It is that LIGHT which condenses into the forms of the 'Lords of Being' -- the first and the highest of which are, collectively, JIVATMA, or Pratyagatma (said figuratively to issue from Paramatma. It is the Logos of the Greek philosophers -- appearing at the beginning of every new Manvantara). From these downwards -- formed from the ever-consolidating waves of that light, which becomes on the objective plane gross matter -- proceed the numerous hierarchies of the Creative Forces, some formless, others having their

[[Footnote(s)]] -----

* This is a flat contradiction of Swedenborg, who saw, in "the first Earth of the astral world," inhabitants dressed as are the peasants in Europe; and on the Fourth Earth women clad as are the shepherdesses in a bal masque. Even the famous astronomer Huygens laboured under the mistaken idea that other worlds and planets have the same identical beings as those who live on our Earth, possessing the same figures, senses, brain-power, arts, sciences, dwellings and even to the same fabric for their wearing apparel! (Theorie du Monde). For the clearer comprehension of the statement that the Earth "is the progeny of the Moon," see Book I., stanza VI.

** This is a modern gloss. It is added to the old Commentaries for the clearer comprehension of those disciples who study esoteric Cosmogony after having passed through Western learning. The earlier Glosses are too redundant with adjectives and figures of speech to be easily assimilated.

[[Vol. 2, Page]] 34 THE SECRET DOCTRINE.

own distinctive form, others, again, the lowest (Elementals), having no form of their own, but assuming every form according to the surrounding conditions."

"Thus there is but one Absolute Upadhi (basis) in the spiritual sense, from, on, and in which, are built for Manvantaric purposes the countless basic centres on which proceed the Universal, cyclic, and individual Evolutions during the active period."

"The informing Intelligences, which animate these various centres of Being, are referred to indiscriminately by men beyond the Great Range* as the Manus, the Rishis, the Pitris**, the Prajapati, and so on; and as Dhyani Buddhas, the Chohans, Melhas (fire-gods), Bodhisattvas,*** and others, on this side. The truly ignorant call them gods; the learned profane, the one God; and the wise, the Initiates, honour in them only the Manvantaric manifestations of THAT which neither our Creators (the Dhyani Chohans) nor their creatures can ever discuss or know anything about. The ABSOLUTE is not to be defined, and no mortal or immortal has ever seen or comprehended it during the periods of Existence. The mutable cannot know the Immutable, nor can that which lives perceive Absolute Life."

Therefore, man cannot know higher beings than his own "progenitors." "Nor shall he worship them," but he ought to learn how he came into the world.

(c) Number Seven, the fundamental figure among all other figures in every national religious system, from Cosmogony down to man, must have its *raison d'être*. It is found among the ancient Americans, as prominently as among the archaic Aryans and Egyptians. The question will be fully dealt with in the second part of this Book; meanwhile a few facts may be given here. Says the author of the "Sacred Mysteries among the Mayas and Quiches, 11,500 years ago"****:--

[[Footnote(s)]] -----

* "Beyond" the Great Range, means, in our case, India, as being the Trans-Himalayan region for the Cis-Himalayan region.

** The term Pitris is used by us in these Slokas to facilitate their comprehension, but it is not so used in the original Stanzas, where they have distinct appellations of their own, besides being called "Fathers" and "Progenitors."

*** It is erroneous to take literally the worship of the human Bodhisattvas, or Manjusri. It is true that, exoterically, the Mahayana school teaches adoration of these without distinction, and that Huien-Tsang speaks of some disciples of Buddha as being worshipped. But esoterically it is not the disciple or the learned Manjusri personally that received honours, but the divine Bodhisattvas and Dhyani Buddhas that animated (Amilakha, as the Mongolians say) the human forms.

**** The author of this work is Augustus Le Plongeon. He and his wife are well known in the United States for their untiring labours in Central America. It is they who discovered the sepulchre of the royal Kan Coh, at Cichen-Itza. The author [[Footnote continued on next page]]

[[Vol. 2, Page]] 35 THE "SEVEN" MYSTERY.

"Seven seems to have been the sacred number par excellence among all civilised nations of antiquity. Why? Each separate people has given a different explanation, according to the peculiar tenets of their (exoteric) religion. That it was the number of numbers for those initiated into the sacred mysteries, there can be no doubt. Pythagoras . . . calls it the 'Vehicle of Life' containing body and soul, since it is formed of a Quaternary, that is Wisdom and intellect, and of a Trinity or action and matter. The Emperor Julian, 'In matrem, etc.,' expresses himself thus: 'Were I to touch upon the initiation into our Sacred Mysteries, which the Chaldees Bacchized, respecting the seven-rayed god, lighting up the soul through him, I should say things unknown to the rabble, very unknown, but well known to the blessed Theurgists.' " (p. 141).

And who, acquainted with the Puranas, the Book of the Dead, the Zendavesta, the Assyrian tiles, and finally the Bible, and who has observed the constant occurrence of the number seven, in these records of people living from the remotest times unconnected and so far apart, can regard as a coincidence the following fact, given by the same explorer of ancient Mysteries? Speaking of the prevalence of seven as a mystic number, among the inhabitants of the "Western continent" (of America), he adds that it is not less remarkable. For:--

"It frequently occurs in the Popul-vuh . . . we find it besides in the seven families said by Sahagun and Clavigero to have accompanied the mystical personage named Votan, the reputed founder of the great city of Nachan, identified by some with Palenque. In the seven caves* from which the ancestors of the Nahuatl are reported to have emerged. In the seven cities of Cibola, described by Coronado and Niza. . . . In the seven Antilles; in the seven heroes who, we are told, escaped the Deluge"

"Heroes," moreover, whose number is found the same in every "Deluge" story -- from the seven Rishis who were saved with Vaivasvata Manu, down to Noah's ark, into which beasts, fowls, and living creatures were taken by "Sevens." Thus we see the figures 1, 3, 5, 7, as perfect, because thoroughly mystic, numbers playing a prominent part in every Cosmogony and evolution of living Beings. In China, 1, 3, 5, 7, are called "celestial numbers" in the canonical "Book of Changes." (Yi King, or transformation, as in "Evolution").

The explanation of it becomes evident when one examines the ancient

[[Footnote(s)]] -----

[[Footnote continued from previous page]] seems to believe and to seek to prove that the esoteric learning of the Aryans and the Egyptians was derived from the Mayas. But, although certainly coeval with Plato's Atlantis, the Mayas belonged to the Fifth Continent, which was preceded by Atlantis and Lemuria.

* These seven caves, seven cities, etc., etc., stand in every case for the seven centres, or zones, upon which the seven primitive groups of the first Root-race were born.

[[Vol. 2, Page]] 36 THE SECRET DOCTRINE.

Symbols: all these are based upon and start from the figures given from the Archaic Manuscript in the proem of Book I. [[diagram]], the symbol of evolution and fall into generation or matter, is reflected in the old Mexican sculptures or paintings, as it is in the Kabalistic Sephiroth, and the Egyptian Tau. Examine the Mexican MSS (Add. MSS. Brit. Mus. 9789)*; you will find in it a tree whose trunk is covered with ten fruits ready to be plucked by a male and female, one on each side of it, while from the top of the trunk two branches shoot horizontally to the right and left, thus forming a perfect [[diagram]] (tau), the ends of the two branches, moreover, each bearing a triple bunch, with a bird -- the bird of immortality, Atman or the divine Spirit -- sitting between the two, and thus making the seventh. This represents the same idea as the Sephirothal Tree, ten in all, yet, when separated from its upper triad, leaving Seven. These are the celestial fruits, the ten or [[diagram]] 10, born out of the two invisible male and female seeds, making up the 12, or the Dodecahedron of the Universe. The mystic system contains the [[diagram]], the central point; the 3 or [[diagram]]; the five, [[diagram]], and the seven or [[diagram]], or again [[diagram]]; the triangle in the square and the synthesizing point in the interlaced double triangles. This for the world of the archetypes. The phenomenal world receives its culmination and the

reflex of all in MAN. Therefore he is the mystic square -- in his metaphysical aspect -- the Tetraktis; and becomes the Cube on the creative plain. His symbol is the cube unfolded** and 6 becoming 7, or the [[diagram]] three crossways (the female) and four vertically; and this is man, the culmination of the deity on Earth, whose body is the cross of flesh, on, through, and in which he is ever crucifying and putting to death the divine Logos or his HIGHER SELF.

"The universe," says every Philosophy and Cosmogony, "hath a Ruler (Rulers collectively) set over it, which is called the WORD (Logos); the fabricating Spirit is its Queen: which two are the First Power after the ONE."

These are the Spirit and Nature, which two form our illusory universe. The two inseparables remain in the Universe of Ideas so long as it lasts, and then merge back into Parabrahm, the One ever changeless. "The Spirit, whose essence is eternal, one and self-existent," emanates a pure ethereal LIGHT -- a dual light not perceptible to the elementary senses -- in the Puranas, in the Bible, in the Sepher

[[Footnote(s)]] -----

* The engraving is reproduced in the "Sacred Mysteries of the Mayas and Quiches" on p. 134.

** See "Source of Measures" p. 50 to 53 and also Book II. Part 2.

[[Vol. 2, Page]] 37 THE THREE KINDS OF LIGHT.

Jezirah, the Greek and Latin hymns, in the Book of Hermes, in the Chaldean Book of Numbers, in the esotericism of Lao-tse, everywhere. In the Kabala, which explains the secret meaning of Genesis, this light is the DUAL-MAN, or the Androgyne (rather the sexless) angels, whose generic name is ADAM KADMON. It is they who complete man, whose ethereal form is emanated by other divine, but far lower beings, who solidify the body with clay, or the "dust of the ground" -- an allegory indeed, but as scientific as any Darwinian evolution and more true.

The author of the "Source of Measures" says that the foundation of the Kabala and all its mystic books is made to rest upon the ten Sephiroth; which is a fundamental truth.* He shows these ten Sephiroth or the ten numbers in the following diagram:--

[[diagram]]

wherein the circle is the naught, its vertical diameter line is the first or primal ONE (the Word or Logos), from which springs the series of the other numbers up to 9, the limit of the digits. The 10 is the first Divine Manifestation** containing "every possible power of exact expression of proportion." By this Kabalistic speculation we are taught that the Sephiroth "were the numbers or emanations of the Heavenly Light (figures 20612 to 6561), they were the 10 'Words,' DBRIM, 41224, the light, of which they were the flux, was the Heavenly Man, the Adam KDM (the 144- 144); and the Light, by the New Testament or Covenant (or 41224) created God; just as, by the Old Testament God (Alhim, 31415) creates light (20612 to 6561)."

Now there are three kinds of light in Occultism, as in the Kabala. (1) The Abstract and Absolute Light, which is Darkness; (2) The Light of the Manifested-Unmanifested, called by some the Logos; and (3) The latter light reflected in the Dhyana Chohans, the minor logoi (the Elohim, collectively), who, in their turn, shed it on the objective Universe. But in the Kabala -- re-edited and carefully adjusted to fit the Christian tenets by the Kabalists of the XIII. century -- the three lights are described as:-- (1) The clear and penetrating, that of Jehovah; (2) reflected light; and (3) light in the abstract." This light abstractly taken (in a metaphysical or symbolical sense) is Alhim (Elohim God),

[[Footnote(s)]] -----

* See "Masonic Review," Cincinnati, June 1886, Art. Kabala No. 6.

** See "Isis Unveiled," Vol. II., pp. 300 et seq., for a proof of the antiquity of the decimal system of figures.

[[Vol. 2, Page]] 38 THE SECRET DOCTRINE.

while the clear penetrating light is Jehovah. The light of Alhim belongs to the world in general, in its allness and general fulness, but the light of Jehovah is that pertaining to the chiefest production, man, whom this light penetrated and made." The author of the "Source of Measures" pertinently refers the reader to Inman's "Ancient Faiths embodied in Ancient Names," vol. ii., p. 648. There, an engraving of "the vesica piscis, Mary and the female emblem, copied from a rosary of the blessed Virgin . . . printed at Venice, 1542," and therefore, as Inman remarks, "with a license from the Inquisition, consequently orthodox," will show the reader what the Latin Church understood by this "penetrating power of light and its effects " How sadly disfigured -- applied as they were to the grossest anthropomorphic conceptions -- have become, under Christian interpretation, the noblest and grandest, as the most exalted, ideas of deity of the Eastern philosophy!

The Occultists call this light Daiviprakriti in the East, and light of Christos in the West. It is the light of the LOGOS, the direct reflection of the ever Unknowable on the plane of Universal manifestation. But here is the interpretation thereof given by the modern Christians from the Kabala. As declared by the author just cited:--

"To the fulness of the world in general with its chiefest content, man, the term Elohim-Jehovah applies. In extracts from the Zohar, the Rev. Dr. Cassell (a Kabalist), to prove that the Cabbalah sets forth the doctrine of the Trinity, among other things says: 'Jehovah is Elohim (Alhim) . . . by three steps God (Alhim), and Jehovah become the same, and though separated each and together, they are of the same one.'" Similarly, Vishnu becomes the Sun, the visible symbol of the impersonal deity. Vishnu is described as "striding through the seven regions of the Universe in three steps." But with the Hindus this is an exoteric account, a surface tenet and an allegory, while the Kabalists give it out as the esoteric and final meaning. But to proceed:--

"Now light," explains the author, "as shown, is 20612 to 6561, as the proper enunciation of the integral and numerical relation of diameter to circumference of a circle. God (Alhim, i.e., 3.1415 to one, a modified form of the above) is the reduction of this, so as to obtain a standard unitone, as the basis, in general, of all calculation and all mensuration. But, for the production of animal life, and for especial time measure or the lunar year, that influence which causes conception and embryotic development, the numbers of the Jehovah measure ('man even Jehovah' measure), viz. 113 to 355, have to be specialised.* But this last ratio is but a modified form of light or 20612 to 6561, as a "[[pi]]" value, being only a variation of the same (that is 20612 to 6561 is 31415 to one, or Alhim or God) -- and in such a manner that one can be made

[[Footnote(s)]] -----

* See "Source of Measures," pp. 276, et seq. App. VII.

[[Vol. 2, Page]] 39 THE NUMBERS OF CREATION.

to flow into and be derived from the other, and these are the three steps by which the Unity and sameness can be shown of the divine names. That is, the two are but variations of the same ratio, viz., that of '[[pi]].' The object of this comment is to show the same measuring use for the Cabbalah as was employed in the three Covenants of the Bible, and in the symbols of Masonry, as just noticed."

"First then, the Sephiroth are described as Light, that is, they themselves are a function of, indeed, the same as, the manifestation of Ain Soph; and they are so from the fact that Light represents the ratio of 20612 to 6561, as part of the 'Words,' DBRIM, 41224, or as to the Word, Debar, 206 (= 10 cubits). Light is so much the burden of the Kabbalah, in explaining the Sephiroth, that the most famous book on the Kabbalah is called Zohar or Light. In this we find expressions of this kind:-- 'The Infinite was entirely unknown and diffused no light before the luminous point violently broke through into vision' 'When he first assumed the form (of the Crown, or the first Sephira), he caused 9 splendid lights to emanate from it, which, shining through it, diffused a bright light in all directions': that is, these 9 with his one (which was the origin, as above, of the nine), together made the 10, that is [[diagram]] or [[diagram]], or the sacred Ten (numbers or Sephiroth), or Jod -- and these numbers were 'the Light.' Just as in the Gospel of St. John, God (Alhim, 31415 to one) was that light (20612 to 6561) by which (Light) all things were made."

In Sepher Jezirah, or Numbers of Creation, the whole process of evolution is given out in Numbers. In its "32 paths of Wisdom" the number 3 is repeated four times, and the number 4 five times. Therefore, the Wisdom of God is contained in numbers (Sephirim or Sephiroth), for Sepher (or S-ph-ra when unvowelled) means "to cipher." And therefore, also, we find Plato stating that the deity geometrizes in fabricating the Universe.

The Kabalistic book, the Sepher Jezirah, opens with a statement of the hidden wisdom of Alhi in Sephirim, i.e, the Elohim in the Sephiroth.

"In thirty and two paths, hidden wisdom, established Jah, JHVH, Tzabaoth, Elohi of Israel, Alhim of Life, El of Grace and Mercy -- exalted, uplifted Dweller on high, and King of Everlasting, and his name -- Holy! in three Sephirim: viz:-- B-S'ph-r, V-S'ph-r, V-Siph-o-r."

"This Comment sets forth 'the Hidden Wisdom' of the original text by hidden Wisdom, that is, by the use of words carrying a special set of Numbers and a special phraseology, which will set forth the very explanatory system which we find to fit so accurately in the Hebrew Bible. . . . In setting forth his scheme, to enforce it, and to finish out his detailed exposition in a general postulate, viz., the one word

[[Vol. 2, Page]] 40 THE SECRET DOCTRINE.

Sephirim (Sephiroth) of the Number Jezirah, the author explains the separation of this word in the three subordinate ones, a play upon a common word s-ph-r, or number."

The prince Al-Chazari says to the Rabbi:-- "I wish now that thou wouldst impart to me some of the chiefest or leading principles of Natural Philosophy, which as thou sayest were in former times worked out by them (the Ancient Wise Ones)"; to which the Rabbi makes answer:-- "To such principles appertains the Number of Creation of our Race-father Abraham" (that is Abram and Abraham, or numbers 41224 and 41252). He then says that this book of Number treats of teaching the Alhim-ness and One-ness through, "DBRIM," viz., the numbers of the Word "Words." That is, it teaches the use of the ratio 31415 to one, through 41224, which last, in the description of the Ark of the Covenant, was divided into two parts by two tables of stone, on which these, DBRIM or 41224, were written or engraved -- or 20612 by 2. He then comments on these three subordinately used words, and takes care as to one of them to make the comment:-- "And Alhim (31415 to 1) said: Let there be Light (20612 to 6561)."

The three words as given in the text are: [[hebrew]]. And the Rabbi in commenting upon them says: "It teaches the Alhim-ness (31415) and One-ness (the diameter to Alhim) through Words (DBRIM, 41224), by which on the one side there is infinite expression in heterogeneous creations, and on the other a final harmonic tendency to One-ness" (which as everyone knows is the mathematical function of "[[pi]]" of the schools, which measures, and weighs and numbers the stars of heaven, and yet resolves them back into the final Oneness of the Universe through Words). "Their final accord perfects itself in that Oneness that ordains them and which consists in [[hebrew]] (Book of Al-Chazari), that is the Rabbi, in his first comment, leaves the jod, or i, out of one of the words, whereas afterwards he restores it again. If we take the values of those subordinate words, we find them to be 340, 340, 346; together these are 1026, and the division of the general word into these has been to produce these numbers, which by Temurah may be changed in various ways for various purposes." (Kabala.)

The reader is asked to turn to Stanza IV. of Book I. and its fourth commentary to find that the 3, 4 -- (7), and the thrice seven, or 1065, the number of Jehovah, is the number of the 21 Prajapati mentioned in the Mahabharata, or the three Sephrim (words in cipher or figures). And this comparison between the Creative Powers of Archaic philosophy and the anthropomorphic Creator of exoteric Judaism (since their esotericism shows its identity with the Secret Doctrine) will lead the student to perceive and discover that, in truth, Jehovah is but a lunar and

[[Footnote(s)]] -----

[[Vol. 2, Page]] 41 THE EMANATIONS OF AIN-SOPH.

"generation" god. (See Book I, Part 2, "Deus Lunus.") It is a fact well known to every conscientious student of the Kabala, that the deeper he dives into it, the more he feels convinced that unless the Kabala -- or what is left of it -- is read by the light of the Eastern esoteric philosophy, its study leads only to the discovery that, on the lines traced by exoteric Judaism and Christianity, the monotheism of both is nothing more exalted than ancient Astrolatry, now vindicated by modern Astronomy. The Kabalists never cease to repeat that primal intelligence can never be understood. It cannot be comprehended, nor can it be located, therefore it has to remain nameless and negative. Hence the Ain-Soph -- the "UNKNOWABLE" and the "UNNAMEABLE" -- which, as it could not be made manifest, was conceived to emanate manifesting Powers. It is then with its emanations alone that human intellect has to, and can deal. Christian theology, having rejected the doctrine of emanations and replaced them with direct, conscious creations of angels and the rest out of nothing, now finds itself hopelessly stranded between Supernaturalism, or miracle, and materialism. An extra-cosmic god is fatal to philosophy, an intra-cosmic Deity -- i.e. Spirit and matter inseparable from each other -- is a philosophical necessity. Separate them and that which is left is a gross superstition under a mask of emotionalism. But why "geometrize," as Plato has it, why represent these emanations under the form of an immense arithmetical table? The question is well answered by the author just cited. His remarks are quoted in Part II., § "The Theogony of the Creative Gods."

"Mental perception," he says, "to become physical perception, must have the Cosmic principle of light: and by this, our mental circle must become visible through light; or, for its complete manifestation, the Circle must be that of physical visibility, or Light itself. Such conceptions, thus formulated, became the groundwork of the philosophy of the divine manifesting in the Universe."

This is philosophy. It is otherwise when we find the Rabbi in Al-Chazari saying that "under s'ph-r is to be understood calculation and weighing of created bodies. For the calculation, by means of which a body must be constructed in harmony or symmetry, by which it must be in construction rightly arranged and made to correspond to the object in design, consists at last in number, extension, mass, weight; co-ordinate relation of movements, then harmony of music, must consist altogether by number, that is (S'ph-r). . . By Sippor (s'phor) is to be understood the words of Alhim whereunto joins or adapts itself the design of the frame or form of construction; for example, it was said 'Let Light be.' The work became as the WORDS were spoken, that is, as the numbers of the work came forth. . . ."

This is materialising the Spiritual without scruple. But the Kabala

[[Vol. 2, Page]] 42 THE SECRET DOCTRINE.

was not always so well adapted to anthropo-monotheistic conceptions. Compare this with any of the six schools of India. For instance, in Kapila's "Sankhya" Philosophy, unless, allegorically speaking, Purusha mounts on the shoulders of Prakriti, the latter remains irrational, while the former remains inactive without her. Therefore Nature (in man) must become a compound of Spirit and Matter before he becomes what he is; and the Spirit latent in Matter must be awakened to life and consciousness gradually. The Monad has to pass through its mineral, vegetable and animal forms, before the Light of the Logos is awakened in the animal man. Therefore, till then, the latter cannot be referred to as "MAN," but has to be regarded as a Monad imprisoned in ever changing forms. Evolution, not creation, by means of WORDS is recognized in the philosophies of the East, even in their exoteric records. Ex oriente lux. Even the name of the first man in the Mosaic Bible had its origin in India, Professor Max Muller's negation notwithstanding. The Jews got their Adam from Chaldea; and Adam-Adami is a compound word and therefore a manifold symbol, and proves the occult dogmas.

This is no place for philological disquisitions. But the reader may be reminded that the words Ad and Adi mean in Sanskrit "the first"; in Aramaean, "One" (Ad-ad, "the only one"); in Assyrian, "father" whence Ak-Ad or "father-creator."* And once the statement is found correct it becomes rather difficult to confine Adam to the Mosaic Bible alone, and to see therein simply a Jewish name. Vide Part II. of this Volume, § "Adam-Adami."

There is frequent confusion in the attributes and genealogies of the gods in their theogonies, as given to the world by the half-initiated writers, Brahmanical and Biblical, the Alpha and the Omega of the records of that symbolical science. Yet there could be no such confusion made by the earliest nations, the descendants and pupils of the divine instructors: for both the attributes and the genealogies were inseparably linked with cosmogonical symbols, the "gods" being the life and animating "soul-principle" of the various regions of the Universe. Nowhere and by no people was speculation allowed to range beyond those manifested gods. The boundless and infinite UNITY remained with every nation a virgin forbidden soil, untrodden by man's thought,

[[Footnote(s)]] -----

* The appellation Ak-ad (or Akkadians) is of the same class as Ad-m, Ha-va (Eve), AEd-en (Eden); Ak-Ad meaning "Son of Ad" (like the sons of Ad in Ancient Arabia). Ad-ad, the "Only One" and the First, was the Ad-on or "Lord" of Syria and consort of Ad-ar-gat or Aster't, the Syrian goddess. And Gan-AEden (Eden) or Gandunia was Babylonia and Mesopotamia. In Assyrian Ak meant Creator, the letter K pronounced Kh (Ah) gutturally. According to Swedenborg's

mysticism Adam was not a man but a church (?) of primitive light. In the Vedas Ad-iti is the primitive light, the Akasa of the phenomenal world.

[[Vol. 2, Page]] 43 ADAM-ADAMI.

untouched by fruitless speculation. The only reference made to it was the brief conception of its diastolic and systolic property, of its periodical expansion or dilatation, and contraction. In the Universe with all its incalculable myriads of systems and worlds disappearing and re-appearing in eternity, the anthropomorphised powers, or gods, their Souls, had to disappear from view with their bodies:-- "The breath returning to the eternal bosom which exhales and inhales them," says our Catechism.

"Ideal nature," the abstract Space in which everything in the Universe is mysteriously and invisibly generated, is the same female side of procreative power in Nature in the Vedic as in every other Cosmogony. Aditi is Sephira, and the Sophia-Achamoth of the Gnostics, and Isis, the virgin Mother of Horus. In every Cosmogony, behind and higher than the creative deity, there is a superior deity, a planner, an Architect, of whom the Creator is but the executive agent. And still higher, over and around, within and without, there is the UNKNOWABLE and the unknown, the Source and Cause of all these Emanations. . . .

It thus becomes easy to account for the reason why "Adam-Adami" is found in the Chaldean scripture, certainly earlier than the Mosaic Books. In Assyrian Ad is the father, and in Aramaean Ad is "One," and Ad-ad the "only one," while Ak is in Assyrian "creator." Thus Ad-am-ak-ad-mon became Adam Kadmon in the Kabala (Zohar), meaning as it did, the "One (Son) of the divine Father, or the creator," for the words "am" and "om" meant at one time in nearly every language the divine, or the deity. Thus Adam Kadmon and Adam-Adami came to mean:-- "The first emanation of the Father-Mother or divine nature," and literally "the first divine one." And it is easy to see that Ad-Argat (or Aster't, the Syrian goddess, the consort of Ad-on, the lord god of Syria or the Jewish Adonai), and Venus, Isis, Ishtar, Mylitta, Eve, etc., etc., are identical with the Aditi and Vach of the Hindus. They are all the "Mothers of all living" and "of the gods." On the other hand -- cosmically and astronomically -- all the male gods became at first "Sun-gods," then, theologically, the "Suns of Righteousness" and the Logoi, all symbolised by the Sun.* They are all Protogonoi (the first-born) and

[[Footnote(s)]] -----

* Adam-Jehovah, Brahma and Mars are, in one sense, identical; they are all symbols for primitive or initial generative powers for the purposes of human procreation. Adam is red, and so also are Brahma-Viraj and Mars -- god and planet. Water is the blood of the Earth; therefore, all these names are connected with Earth and Water. "It takes earth and water to create a human soul," says Moses. Mars is identical with Kartikeya God of War (in one sense) -- which god is born of the Sweat of Siva, Siva Gharmaja and the Earth. In the Mahabharata he is shown as born without the intervention of a woman. And he is also called "Lohita," the red, like Adam, and the other "first men." Hence, the author of "The Source of Measures" is quite right in thinking that Mars (and all the other gods of like attributes), "being the god of war and of

[[Footnote continued on next page]]

[[Vol. 2, Page]] 44 THE SECRET DOCTRINE.

Mikroprosopoi. With the Jews Adam Kadmon was the same as Athamaz, Tamaz, or the Adonis of the Greeks -- "the One with, and of his father" -- the "Father" becoming during the later Races Helios, the Sun, as Apollo Karneios,* for instance, who was the "Sun born"; Osiris, Ormazd, and so on, were all followed by, and found themselves transformed later on into still more earthly types: such as Prometheus, the crucified of Mount Kajbee, Hercules, and so many others, sun-gods and heroes, until all of them came to have no better significance than phallic symbols.

In the Zohar is it said "Man was created by the Sephiroth (Elohim-Javeh, also) and they engendered by common power the earthly Adam." Therefore in Genesis the Elohim say:-- "Behold Man is become as one of us." But in Hindu Cosmogony or "Creation," Brahma-Prajapati creates Viraj and the Rishis, spiritually; therefore the latter are distinctly called "the Mind-born Sons of Brahma"; and this specified mode of engendering precluded every idea of Phallicism, at any rate in the earlier human nations. This instance well illustrates the respective spirituality of the two nations.

3. SAID THE "LORD OF THE SHINING FACE." "I SHALL SEND THEE A FIRE WHEN THY WORK IS COMMENCED. RAISE THY VOICE TO OTHER LOKAS, APPLY TO THY FATHER THE LORD OF THE LOTUS (Kumuda-Pati) (a) FOR HIS SONS . . . THY PEOPLE SHALL BE UNDER THE RULE OF THE FATHERS (Pitri-pati). THY MEN SHALL BE MORTALS. THE MEN OF THE LORD OF WISDOM (Budha, Mercury) NOT THE SONS OF SOMA (the Moon) ARE IMMORTAL. CEASE THY COMPLAINTS (b). THY SEVEN SKINS ARE YET ON THEE. . . THOU ART NOT READY. THY MEN ARE NOT READY (c).

(a) Kumuda-Pati is the Moon, the Earth's parent, in his region of Soma-loka. Though the Pitris (Pitar or "Fathers") are sons of the Gods, elsewhere sons of Brahma and even Rishis, they are generally known as the "lunar" ancestors.

(b) Pitri-pati is the lord or king of the Pitris, Yama, the god of Death and the Judge of mortals. The men of Budha (Mercury) are

[[Footnote(s)]] -----

[[Footnote continued from previous page]] bloodshed, was but a secondary idea flowing out of the primary one of shedding of blood in conception for the first time." Hence Jehovah became later a fighting god, "Lord of Hosts," and one who commands war. He is the aggressive Zodh -- or Cain by permutation who slew his (female) "brother," whose "blood crieth from the ground," the Earth having opened her mouth to receive the blood. (Genesis iii.)

* Apollo Karneios is certainly a Greek transformation from the Hindu Krishna Karna. "Karna" means radiant from "carne," "a ray," and Karneios, which was a title of Apollo with the Celts as with the Greeks, meant "Sun born."

[[Vol. 2, Page]] 45 THE FIRST WAR IN HEAVEN.

metaphorically immortal through their Wisdom. Such is the common belief of those who credit every star or planet with being inhabited. (And there are men of science -- M. Flammarion among others -- who believe in this fervently, on logical as well as on astronomical data). The Moon being an inferior body to the Earth even, to say nothing of other planets, the terrestrial men produced by her sons -- the lunar men or "ancestors" -- from her shell or body, cannot be immortal. They cannot hope to become real, self-conscious and intelligent men, unless they are finished, so to say, by other creators. Thus in the Puranic legend, the son of the Moon (Soma) is Budha (Mercury), "the intelligent" and the Wise, because he is the offspring of Soma, the "regent" of the visible Moon, not of Indu, the physical Moon. Thus Mercury is the elder brother of the Earth, metaphorically -- his step-brother, so to say, the offspring of Spirit -- while she (the Earth) is the progeny of the body. These allegories have a deeper and more scientific meaning (astronomically and geologically) than our modern physicists are willing to admit. The whole cycle of the "first War in Heaven," the Taraka-maya, is as full of philosophical as of Cosmogonical and astronomical truths. One can trace therein the biographies of all the planets by the history of their gods and rulers. Usanas (Sukra, or Venus), the bosom-friend of Soma and the foe of Brihaspati (Jupiter) the instructor of the gods, whose wife Tara (or Taraka) had been carried away by the Moon, Soma -- "of whom he begat Budha" -- took also an active part in this war against "the gods" and forthwith was degraded into a demon (Asura) deity, and so he remains to this day.*

Here the word "men" refers to the celestial men, or what are called in India the PITAR or pitris, the Fathers, the progenitors of men. This

[[Footnote(s)]] -----

* Usanas-Sukra or Venus is our "Lucifer," the morning star, of course. The ingenuity of this allegory in its manifold meanings is great indeed. Thus Brihaspati (the planet Jupiter) or Brahmanaspati is, in the Rig Veda, a deity who is the symbol and the prototype of the exoteric or ritualistic worship. He is priest sacrificer, suppliant, and the medium through which the prayers of mortals reach the gods. He is the Purohita (family priest, or Court Chaplain) of the Hindu Olympus and the spiritual Guru of the Gods. Soma is the mystery god and presides over the mystic and occult nature in man and the Universe. Tara, the priest's wife, who symbolizes the worshipper, prefers esoteric truths to their mere shell, exotericism; hence she is shown as carried off by Soma. Now Soma is the sacred juice of that name, giving mystic visions and trance revelations, the result of which union is Budha (Wisdom), Mercury, Hermes, etc., etc.; that science in short which to this day is proclaimed by the Brihaspatis of Theology as devilish and Satanic. What wonder that by expanding the cycle of this allegory we find Christian theology espousing the quarrel of the Hindu gods, and regarding Usanas (Lucifer), who helped Soma against that ancient personification of ritualistic worship (Brahmanaspati, the lord of the Brahmans, now become "Jupiter-Jehovah") as SATAN, the "enemy of God"!

[[Vol. 2, Page]] 46 THE SECRET DOCTRINE.

does not remove the seeming difficulty, in view of modern hypotheses, of the teaching, which shows these progenitors or ancestors creating the first human Adams out of their sides: as astral shadows. And though it is an improvement on Adam's rib, still geological and climatic difficulties will be brought forward. Such, however, is the teaching of Occultism.

(c) Man's organism was adapted in every race to its surroundings. The first Root-Race was as ethereal as ours is material. The progeny of the seven Creators, who evolved the seven primordial Adams,* surely required no purified gases to breathe and live upon (see Part III. of this Volume). Therefore, however strongly the impossibility of this teaching may be urged by the devotees of modern science, the Occultist maintains that the case was as stated aeons of years before even the evolution of the Lemurian, the first physical man, which itself took place 18,000,000 years ago.**

Preliminary evolution is described in one of the BOOKS OF DZYAN and the Commentaries thereon in this wise:--

Archaic Scripture teaches that at the commencement of every local Kalpa, or Round, the earth is reborn; "as the human Jiva (monad), when passing into a new womb, gets re-covered with a new body, so does the Jiva of the Earth; it gets a more perfect and solid covering with each Round after re-emerging once more from the matrix of space into objectivity" (Comment). This process is attended, of course, by the throes of the new birth or geological convulsions.

Thus the only reference to it is contained in one verse of the volume of the Book of Dzyan before us, where it says:

4. AND AFTER GREAT THROES SHE (the Earth) CAST OFF HER OLD THREE AND PUT ON HER NEW SEVEN SKINS, AND STOOD IN HER FIRST ONE (a).

(a) This refers to the growth of the Earth, whereas in the Stanza treating of the First Round it is said (given in the Commentary):--

"After the changeless (avikara) immutable nature (Essence, sadaikarupa) had awakened and changed (differentiated) into (a state of) causality (avayakta), and from cause (Karana) had become its own discrete effect (vyakta), from invisible it became visible. The smallest of the small (the most atomic of

[[Footnote(s)]] -----

* As shown elsewhere, it is only the "Heavenly Man," Adam Kadmon, of the first chapter of Genesis, who is made "in the image and likeness of God." Adam, of chapter ii., is not said to be made in that image nor in the divine likeness, before he

ate of the forbidden fruit. The former Adam is the Sephirothal Host; the second Adam is the Mindless first human Root-race; the third Adam is the race that separated, whose eyes are opened.

** For a discussion of the scientific objections to the views and figures here enunciated, the reader is referred to the Addenda, which form Part III. of this book.

[[Vol. 2, Page]] 47 NARADA AND ASURAMAYA.

atoms, or aniyamsam aniyasam) became one and the many (ekanekarupa); and producing the Universe produced also the Fourth Loka (our Earth) in the garland of the seven lotuses. The Achyuta then became the Chyuta.*

The Earth is said to cast off her old three skins, because this refers to the three preceding Rounds she has already passed through; the present being the fourth Round out of the seven. At the beginning of every new ROUND, after a period of "obscuration," the earth (as do also the other six "earths") casts off, or is supposed to cast off, her old skins as the Serpent does: therefore she is called in the Aitareya-Brahmana the Sarpa Rajni, "the Queen of the Serpents," and "the mother of all that moves." The "Seven Skins," in the first of which she now stands, refer to the seven geological changes which accompany and correspond to the evolution of the Seven Root-Races of Humanity.

Stanza II., which speaks of this Round, begins with a few words of information concerning the age of our Earth. The chronology will be given in its place. In the Commentary appended to the Stanza, two personages are mentioned: Narada and Asura Maya, especially the latter. All the calculations are attributed to this archaic celebrity; and what follows will make the reader superficially acquainted with some of these figures.

TWO ANTEDILUVIAN ASTRONOMERS.

To the mind of the Eastern student of Occultism, two figures are indissolubly connected with mystic astronomy, chronology, and their cycles. Two grand and mysterious figures, towering like two giants in the Archaic Past, emerge before him, whenever he has to refer to Yugas and Kalpas. When, at what period of pre-history they lived, none save a few men in the world know, or ever can know with that certainty which is required by exact chronology. It may have been 100,000 years ago, it may have been 1,000,000, for all that the outside world will ever know. The mystic West and Freemasonry talk loudly of Enoch and Hermes. The mystic East speaks of NARADA, the old Vedic Rishi, and of ASURAMAYA, the Atlantean.

It has already been hinted that of all the incomprehensible characters in the Mahabharata and the Puranas, Narada, the son of Brahma in Matsya Purana, the progeny of Kasyapa and the daughter of Daksha

[[Footnote(s)]] -----

* Achyuta is an almost untranslatable term. It means that which is not subject to fall or change for the worse: the Unfalling; and it is the reverse of chyuta, "the Fallen." The Dhyanis who incarnate in the human forms of the Third Root-Race and endow them with intellect (Manas) are called the chyuta, for they fall into generation.

[[Vol. 2, Page]] 48 THE SECRET DOCTRINE.

in the Vishnu Purana, is the most mysterious. He is referred to by the honourable title of Deva Rishi (divine Rishi, more than a demi-god) by Parasara, and yet he is cursed by Daksha and even by Brahma. He informs Kansa that Bhagavat (or Vishnu in exotericism) would incarnate in the eighth child of Devaki, and thus brings the wrath of the Indian Herod upon Krishna's mother; and then, from the cloud on which he is seated -- invisible as a true Manasaputra -- he lauds Krishna, in delight at the Avatar's feat of killing the monster Kesim. Narada is here, there, and everywhere; and yet, none of the Puranas gives the true characteristics of this great enemy of physical procreation. Whatever those characteristics may be in Hindu Esotericism, Narada -- who is called in Cis-Himalayan Occultism Pesh-Hun, the "Messenger," or the Greek Angelos -- is the sole confidant and the executor of the universal decrees of Karma and Adi-Budh: a kind of active and ever incarnating logos, who leads and guides human affairs from the beginning to the end of the Kalpa.

"Pesh-Hun" is a general not a special Hindu possession. He is the mysterious guiding intelligent power, which gives the impulse to, and regulates the impetus of cycles, Kalpas and universal events.* He is Karma's visible adjuster on a general scale; the inspirer and the leader of the greatest heroes of this Manvantara. In the exoteric works he is referred to by some very uncomplimentary names; such as "Kali-Karaka," strife-maker, "Kapi-vaktra," monkey-faced, and even "Pisuna," the spy, though elsewhere he is called Deva-Brahma. Even Sir W. Jones was strongly impressed with this mysterious character from what he gathered in his Sanskrit Studies. He compares him to Hermes and Mercury, and calls him "the eloquent messenger of the gods" (see Asiatic Res. I. p. 264). All this led the late Dr. Kenealy ("Book of God"), on the ground that the Hindus believe him to be a great Rishi, "who is for ever wandering about the earth, giving good counsel," to see in him one of his twelve Messiahs. He was, perhaps, not so far off the real track as some imagine.

What Narada really is, cannot be explained in print; nor would the modern generations of the profane gather much from the information. But it may be remarked, that if there is in the Hindu Pantheon a deity which resembles Jehovah, in, tempting by "suggestion" of thoughts and "hardening" of the hearts of those whom he would make his tools and victims, it is Narada. Only with the latter it is no desire to obtain a pretext for "plaguing," and thus showing that "I am the Lord God."

[[Footnote(s)]] -----

* This is perhaps the reason why, in the Bhagavad Gita, we are told that Brahma had communicated to Narada in the beginning that all men whatsoever, even Mlechchhas, outcasts and barbarians, might know the true nature of Vasudeva and learn to have faith in that deity.

[[Vol. 2, Page]] 49 THE MIRROR OF FUTURITY.

Nor is it through any ambitious or selfish motive; but, verily, to serve and guide universal progress and evolution.

Narada is one of the few prominent characters, save some gods, in the Puranas, who visits the so-called nether or infernal regions, Patala. Whether or not it was from his intercourse with the thousand-headed Sesha, the serpent who bears the seven Patalas and the entire world like a diadem upon his heads, and who is the great teacher of astronomy,* that Narada learned all that he knew, certain it is that he surpasses Garga's Guru in his knowledge of cyclic intricacies. It is he who has charge of our progress and national weal or woe. It is he who brings on wars and puts an end to them. In the old Stanzas Pesh-Hun is credited with having calculated and recorded all the astronomical and cosmic cycles to come, and with having taught the Science to the first gazers at the starry vault. And it is Asuramaya, who is said to have based all his astronomical works upon those records, to have determined the duration of all the past geological and cosmical periods, and the length of the all the cycles to come, till the end of this life-cycle, or the end of the seventh Race.

There is a work among the Secret Books, called the "Mirror of Futurity," wherein all the Kalpas within Kalpas and cycles within the bosom of Sesha, or infinite Time, are recorded. This work is ascribed to Pesh-Hun Narada. There is another old work which is attributed to various Atlanteans. It is these two Records which furnish us with the figures of our cycles, and the possibility of calculating the date of cycles to come. The chronological calculations which will presently be given are, however, those of the Brahmins as explained further on; but most of them are also those of the Secret Doctrine.

The chronology and computations of the Brahmin Initiates are based upon the Zodiacal records of India, and the works of the above-mentioned astronomer and magician -- Asuramaya. The Atlantean zodiacal records cannot err, as they were compiled under the guidance of those who first taught astronomy, among other things, to mankind.

But here again we are deliberately and recklessly facing a new difficulty. We shall be told that our statement is contradicted by science, in the person of a man regarded as a great authority (in the West) upon all subjects of Sanskrit literature -- Professor Albrecht Weber, of Berlin. This, to our great regret, cannot be helped; and we are ready to maintain what is now stated. Asuramaya, to whom the epic tradition points as the earliest astronomer in Aryavarta, one to whom "the

[[Footnote(s)]] -----

* Sesha, who is also Ananta, the infinite, and the "Cycle of Eternity" in esotericism, is credited with having given his astronomical knowledge to Garga, the oldest astronomer of India, who propitiated him, and forthwith knew all about the planets and how to read omens.

[[Vol. 2, Page]] 50 THE SECRET DOCTRINE.

Sun-god imparted the knowledge of the stars," in propria persona, as Dr. Weber himself states, is identified by him, in some very mysterious way, with the "Ptolemaios" of the Greeks. No more valid reason is given for this identification than that "this latter name (Ptolemaios), as we see from the inscription of Piyadasi, became the Indian 'Turamaya,' out of which the name 'Asuramaya' might very easily grow." No doubt it "might," but the vital question is -- Are there any good proofs that it has thus grown? The only evidence that is given for it is, that it must be so: "since this Maya is distinctly assigned to Romaka-pura in the West."** The Maya is evident, since no Sanskritist among Europeans can tell where that locality of "Romaka-pura" was, except, indeed, that it was somewhere "in the West." Anyhow, as no member of the Asiatic Society, or Western Orientalist, will ever listen to a Brahmanical teaching, it is useless to take the objections of European Orientalists into consideration. "Romakapura" was in "the West," certainly, since it was part and parcel of the last continent of ATLANTIS. And it is equally certain that it is Atlantis, which is assigned in the Hindu Puranas as the birth-place of Asuramaya, "as great a magician as he was an Astrologer and an Astronomer." Moreover, Prof. Weber refuses to assign any great antiquity to the Indian Zodiac, and feels inclined to think that the Hindus never knew of a Zodiac at all till "they had borrowed one from the Greeks."** This statement clashes with the most ancient traditions of India, and must therefore be ignored. (Vide "The Zodiac and its Antiquity"). We are the more justified in ignoring it, as the learned German Professor himself tells us in the introduction to his work (History of Sanskrit Literature) that "in addition to the natural obstacles which impede investigation (in India), there still prevails a dense mist of prejudices and preconceived opinions hovering over the land, and enfolding it as with a veil." Caught in that veil, it is no wonder that Dr. Weber should himself have been led into involuntary errors. Let us hope that he knows better now.

Now whether Asuramaya is to be considered a modern myth, a personage who flourished in the day of the Macedonian Greeks, or as that which he is claimed to be by the Occultists, in any case his calculations agree entirely with those of the Secret Records.

From fragments of immensely old works attributed to the Atlantean astronomer, and found in Southern India, the calendar elsewhere men-

[[Footnote(s)]] -----

* See "Lectures on the Indian Literature," p. 253, by Prof. A. Weber; in Trubner's Asiatic Series.

** Even the Maya Indians of Guatemala had their Zodiac from untold antiquity. And "primitive man acted in the same manner independently of time or locality in every age," observes a French writer.

[[Vol. 2, Page]] 51 WHAT THE EARTH-WHIRL PRODUCED.

tioned was compiled by two very learned Brahmins* in 1884 and 1885. The work is proclaimed by the best Pundits as faultless -- from the Brahmanical standpoint -- and thus far relates to the chronology of the orthodox teachings. If we compare its statements with those made several years earlier in "Isis Unveiled," with the fragmentary teachings published by some Theosophists, and with the present data derived from the Secret Books of Occultism, the whole will be found to agree perfectly, save in some details which may not be explained; for secrets of higher Initiation -- as unknown to the writer as they are to the reader -- would have to be revealed, and that cannot be done. (But see "Chronology of the Brahmins" at the close of Stanza II.)

STANZA II.
NATURE UNAIDED FAILS.

§ (5) After enormous periods the Earth creates monsters. (6) The "Creators" are displeased. (7) They dry the Earth. (8) The forms are destroyed by them. (9) The first great tides. (10) The beginning of incrustation.

5. THE WHEEL WHIRLED FOR THIRTY CRORES (of years, or 300,000,000*). IT CONSTRUCTED RUPAS (forms). SOFT STONES, THAT HARDENED (minerals); HARD PLANTS, THAT SOFTENED (vegetation). VISIBLE FROM INVISIBLE, INSECTS AND SMALL LIVES (sarisripa, swapada). SHE (the Earth) SHOOK THEM OFF HER BACK, WHENEVER THEY OVERRAN THE MOTHER (a). AFTER THIRTY CRORES OF YEARS, SHE TURNED ROUND. SHE LAID ON HER BACK; ON HER SIDE. . . . SHE WOULD CALL NO SONS OF HEAVEN, SHE WOULD ASK NO SONS OF WISDOM. SHE CREATED FROM HER OWN BOSOM. SHE EVOLVED WATER-MEN TERRIBLE AND BAD (b).

(a) This relates to an inclination of the axis -- of which there were several -- to a consequent deluge and chaos on Earth (having, however, no reference to primeval chaos), in which monsters, half-human, half-animal, were generated. We find it mentioned in the "Book of the Dead," and also in the Chaldean account of creation, on the Cutha Tablets, however mutilated.

[[Footnote(s)]] -----

* 300 million years, or Three Occult Ages. The Rig Veda has the same division. In the "Physician's Hymn," (X 97 1) it is said that "the plants came into being three ages (Triyugam) before the gods" on our Earth (See "Chronology of the Brahmins" at the end of this Stanza).

[[Vol. 2, Page]] 53 THE MONSTERS OF CHAOS.

It is not even allegory. Here we have facts, that are found repeated in the account of Pymander, as well as in the Chaldean tablets of creation. The verses may almost be checked by the Cosmogony, as given by Berosus, which has been disfigured out of recognition by Eusebius, but some of the features of which may yet be found in fragments left by ancient Greek authors -- Apollodorus, Alexander Polyhistor, etc., etc. "The water-men terrible and bad," who were the production of physical nature alone, a result of the "evolutionary impulse" and the first attempt to create man the "crown," and the aim and goal of all animal life on Earth -- are shown to be failures in our Stanzas. Do we not find the same in the Berosian Cosmogony, denounced with such vehemence as the culmination of heathen absurdity? And yet who of the Evolutionists can say that things in the beginning have not come to pass as they are described? That, as maintained in the Puranas, the Egyptian and Chaldean fragments, and even in Genesis, there have not been two, and even more, "creations" before the last formation of the Globe; which, changing its geological and atmospheric conditions, changed also its flora, its fauna, and its men? This claim agrees not only with every ancient Cosmogony, but also with modern science, and even, to a certain degree, with the theory of evolution, as may be demonstrated in a few words.

There is no "dark creation," no "Evil Dragon" conquered by a Sun-God, in the earliest World-Cosmogonies. Even with the Akkads, the great Deep (the Watery Abyss, or SPACE) was the birthplace and abode of Ea, Wisdom, the incognizable infinite Deity. But with the Semites and the later Chaldeans, the fathomless Deep becomes gross matter, sinful Substance, and Ea is changed into Tiamat, the dragon slain by Merodach, or Satan, in the astral waves.

In the Hindu Puranas, Brahma, the creator, is seen recommencing de novo several creations after as many failures; and two great creations are mentioned,* the Padma and the Varaha, the present, when the Earth was lifted out of the water by Brahma, in the shape of a boar, or "Varaha Avatar." Creation is shown as a sport, an amusement (Lila) of the creative god. The Zohar speaks of primordial worlds, which perished as soon as they came into existence. And the same is said in Midraish, Rabbi Abahu explaining distinctly (in Bereschith Rabba, Parscha IX.) that "the Holy One" had successively created and de-

[[Footnote(s)]] -----

* These two must not be confused with the seven creations or divisions in each Kalpa (See Book I. "The Seven Creations"). The primary and secondary creations are here meant.

[[Vol. 2, Page]] 54 THE SECRET DOCTRINE.

stroyed sundry worlds, before he succeeded in the present one. This does not relate only to other worlds in space, but to a mystery of our own globe contained in the allegory about the "kings of Edom." For the words, "This one pleases me," are repeated in Genesis i. 31, though in disfigured terms, as usual. The Chaldean fragments of Cosmogony on the Cuneiform inscriptions, and elsewhere, show two distinct creations of animals and men, the first being destroyed, as it was a failure. The Cosmogonical tablets prove that this our actual creation was preceded by others (See "Hibbert Lectures," p. 390); and as shown by the author of "The Qabbalah," in the Zohar, Siphrah Dzeniouta, in Jovah Rabbah, 128a, etc., etc. The Kabala states the same.

(b) Oannes (or Dagon, the Chaldean "Man-fish") divides his Cosmogony and Genesis into two portions. First the abyss of waters and darkness, wherein resided most hideous beings -- men with wings, four and two-faced men, human beings with two heads, with the legs and horns of a goat (our "goat-men,")* hippocentaurs, bulls with the heads of men, and dogs with tails of fishes. In short, combinations of various animals and men, of fishes, reptiles and other monstrous animals assuming each other's shapes and countenances. The feminine element they resided in, is personified by Thalath -- the Sea, or "Water" -- which was finally conquered by Belus, the male principle. And Polyhistor says: "Belus came and cut the woman asunder, and of one half of her he formed the Earth, and of the other half the heavens, and at the same time he destroyed the animals within her." As pertinently remarked by I. Myer, "with the Akkadians each object and power of Nature had its Zi, Spirit. The Akkadians formed their deities into triads, usually males (sexless, rather?); the Semites also had triadic deities, but introduced sex" (p. 246) -- or phallicism. With the Aryans and the earliest Akkadians all things are emanations through, not by, a creator or logos. With the Semites everything is begotten.

[[Footnote(s)]] -----

* Whence the identity of the ideas? The Chinese have the same traditions. According to the commentator Kwoh P'oh, in the work called Shan-Hai-King, "Wonders by Sea and Land," a work which was written by the historiographer Chung Ku from engravings on nine urns made by the Emperor Yu, (B.C. 2255), an interview is mentioned with men having two distinct faces on their heads, before and behind, monsters with bodies of goats and human faces, etc. Gould, in his "Mythical Monsters," p. 27, giving the names of some authors on Natural History, mentions Shan-Hai-King. According to Kwoh P'oh (A.D. 276-324) this work was compiled three thousand years before his time, or at seven dynasties distance. Yang Sun of the Ming Dynasty (commencing A.D. 1368) states that it was compiled by Kung Chia and Chung Ku (as stated above). Chung Ku at the time of the last emperor of the Hia dynasty, B.C. 1818, fearing that the emperor might destroy the books treating of the ancient time, carried them in his flight to Yin. (See "Mythical Monsters," by C. Gould, p. 27.)

[[Vol. 2, Page]] 55 UNAIDED PHYSICAL NATURE FAILS.

6. THE WATER-MEN TERRIBLE AND BAD SHE HERSELF CREATED. FROM THE REMAINS OF OTHERS (from the mineral, vegetable and animal remains) FROM THE FIRST, SECOND, AND THIRD (Rounds) SHE FORMED THEM. THE DHYANI CAME AND LOOKED. . . . THE DHYANI FROM THE BRIGHT FATHER-MOTHER, FROM THE WHITE (Solar-lunar) REGIONS THEY CAME,* FROM THE ABODES OF THE IMMORTAL-MORTALS (a).

(a) The explanations given in our Stanzas are far more clear than that which the legend of creation from the Cutha tablet would give, even were it complete. What is preserved on it, however, corroborates them. For, in the tablet, "the Lord of Angels" destroys the men in the abyss, when "there were not left the carcasses and waste" after they were slaughtered. After which they, the Great Gods, create men with the bodies of birds of the desert, human beings, "seven kings, brothers of the same family," etc., which is a reference to the locomotive qualities of the primary ethereal bodies of men, which could fly as well as they could walk,** but who "were destroyed" because they were not "perfect," i.e., they "were sexless, like the Kings of Edom."

Weeded of metaphors and allegories, what will science say to this idea of a primordial creation of species? It will object to the "Angels" and "Spirits" having anything to do therewith: but if it is nature and the physical law of evolution that are the creators of all there is now on Earth, why could there be "no such abyss" when the globe was covered with waters, in which numbers of monstrous beings were generated? Is it the "human beings" and animals with human heads and double faces, which are a point of the objection? But if man is only a higher animal and has evolved from the brute species by an infinite series of transformations, why could not the "missing links" have had human heads attached to the bodies of animals, or, being two-headed, have heads of beasts and vice versa, in Nature's early efforts? Are we not shown during the geological periods, in the ages of the reptiles and the mammalia, lizards with birds' wings, and serpents' heads on animal bodies.*** And, arguing from the standpoint of science, does not even our modern human race occasionally furnish us with monster-specimens: two-headed children, animal bodies with human heads, dog-headed babies, etc., etc.? And this proves that, if nature will still play such

[[Footnote(s)]] -----

* Gods and planetary Spirits, especially the Ribhus. "The three Ribhus" who yet become "thrice seven in number" of their gifts.

** Remember the "winged Races" of Plato; and the Popol-Vuh accounts of the first human race, which could walk, fly and see objects, however distant.

*** See "Mythical Monsters," by Charles Gould.

freaks now that she has settled for ages into the order of her evolutionary work, monsters, like those described by Berosus, were a possibility in her opening programme; which possibility may even have existed once upon a time as a law, before she sorted out her species and began regular work upon them; which indeed now admits of definite proof by the bare fact of "REVERSION," as science puts it.

This is what the doctrine teaches and demonstrates by numerous proofs. But we shall not wait for the approval of either dogmatic theology or materialistic science, but proceed with the Stanzas. Let these speak for themselves, with the help of the light thrown by the Commentaries and their explanations; the scientific aspect of these questions will be considered later on.

Thus physical nature, when left to herself in the creation of animal and man, is shown to have failed. She can produce the first two and the lower animal kingdoms, but when it comes to the turn of man, spiritual, independent and intelligent powers are required for his creation, besides the "coats of skin" and the "Breath of animal Life." The human Monads of preceding Rounds need something higher than purely physical materials to build their personalities with, under the penalty of remaining even below any "Frankenstein" animal.*

[[Footnote(s)]] -----

* In the first volume of the lately published "Introduction a l'atude des Races Humaines," by M. de Quatrefages, there is proof that since the post-tertiary period and even before that time -- since many Races were already scattered during that age on the face of the Earth -- man has not altered one iota in his physical structure. And if, surrounded for ages by a fauna that altered from one period or cycle to another, which died out, which was reborn in other forms -- so that now there does not exist one single animal on Earth, large or small, contemporary with the man of that period -- if, then, every animal has been transformed save man himself, this fact goes to prove not only his antiquity, but that he is a distinct Kingdom. Why should he alone have escaped transformation? Because, says de Quatrefages, the weapon used by him, in his struggle with nature and the ever-changing geological conditions and elements, was "his psychic force, not his physical strength or body," as in the case of animals. Give man only that dose of intelligence and reason with which other mammalia are endowed, and with his present bodily organization he will show himself the most helpless of creatures of Earth. And as everything goes to prove that the human organism with all its characteristics, peculiarities and idiosyncrasies existed already on our Globe in those far distant geological periods when there was not yet one single specimen of the now-existing forms of mammalia, what is the unavoidable conclusion? Why this: Since all the human races are of one and the same species, it follows that this species is the most ancient of all the now-living mammalia. Therefore it is the most stable and persevering of all, and was already as fully developed as it is now when all the other mammalia now known had not made even their first approach to appearance on this Earth. Such is the opinion of the great French Naturalist, who gives thereby a terrible blow to Darwinism.

[[Vol. 2, Page]] 57 THE "DOUBLE DRAGON."

7. DISPLEASED THEY WERE. OUR FLESH IS NOT THERE (they said). THIS IS NO FIT RUPA FOR OUR BROTHERS OF THE FIFTH. NO DWELLINGS FOR THE LIVES.* PURE WATERS, NOT TURBID, THEY MUST DRINK (a). LET US DRY THEM (the waters).

(a) Says the Catechism (Commentaries):--

"It is from the material Worlds that descend they, who fashion physical man at the new Manvantaras. They are inferior Lha (Spirits), possessed of a dual body (an astral within an ethereal form). They are the fashioners and creators of our body of illusion."

"Into the forms projected by the Lha (Pitris) the two letters** (the Monad, called also 'the Double Dragon') descend from the spheres of expectation.*** But they are like a roof with no walls, nor pillars to rest upon."

"Man needs four flames and three fires to become one on Earth, and he requires the essence of the forty-nine fires**** to be perfect. It is those who have deserted the Superior Spheres, the Gods of Will,***** who complete the Manu of illusion. For the 'Double Dragon' has no hold upon the mere form. It is like the breeze where there is no tree or branch to receive and harbour it. It cannot affect the form where there is no agent of transmission (Manas, "Mind") and the form knows it not."

"In the highest worlds, the three are one,***** on Earth (at first) the one becomes two. They are like the two (side) lines of a triangle that has lost its bottom line -- which is the third fire." (Catechism Book III., sec. 9.)

Now this requires some explanation before proceeding any further. To do so especially for the benefit of our Aryan Hindu brethren --

[[Footnote(s)]] -----

* The Monads of the presentments of men of the Third Round, the huge Ape-like forms.

** In the esoteric system the seven principles in man are represented by seven letters. The first two are more sacred than the four letters of the Tetragrammaton.

*** The intermediate spheres, wherein the Monads, which have not reached Nirvana, are said to slumber in unconscious inactivity between the Manvantaras.

**** Explained elsewhere. The "Three Fires," Pavaka, Pavamana, and Suchi, who had forty-five sons, who, with their three fathers and their Father Agni, constitute the 49 fires. Pavamana (fire produced by friction) is the parent of the fire of the Asuras; Suchi (Solar fire) is the parent of the fire of the gods; and Pavaka (electric fire) is the father of the fire of the Pitris (See Vayu Purana). But this is an explanation on the material and the terrestrial plane. The flames are evanescent and only periodical; the fires -- eternal in their triple unity. They correspond to the four lower, and the three higher human principles.

***** The Suras, who become later the A-Suras.

***** Atma, Buddhi and Manas. In Devachan the higher element of the Manas is needed to make it a state of perception and consciousness for the disembodied Monad.

[[Vol. 2, Page]] 58 THE SECRET DOCTRINE.

whose esoteric interpretations may differ from our own -- we shall have to explain to them the foregoing by certain passages in their own exoteric books, namely, the Puranas. In the allegories of the latter, Brahma, who is collectively the creative Force of the Universe, is said to be "at the beginning of the Yugas (cycles) . . . Possessed of the desire and of the power to create, and, impelled by the potencies of what is to be created, again and again does he, at the outset of a Kalpa, put forth a similar creation," (see Vishnu Purana, Book I. ch. V., closing Sloka. Also "Manava Dharma Shastra" I. 30.) It is now proposed to examine the exoteric account in the Vishnu Purana, and see how much it may agree or disagree with our occult version.

CREATION OF DIVINE BEINGS IN THE EXOTERIC ACCOUNTS.

In the Vishnu Purana -- which is certainly the earliest of all the scriptures of that name -- we find, as in all the others, Brahma assuming as the male God, for purposes of creation, "four bodies invested by three qualities."* It is said: "In this manner, Maitreya, Jyotsna (dawn), Ratri (night), Ahan (day), and Sandhya (evening twilight) are the four bodies of Brahma" . . (p. 81, Vol. I., Wilson's translation). As Parasara explains it, when Brahma wants to create the world anew and construct progeny through his will, in the fourfold condition (or the four orders of beings) termed gods (Dhyan Chohans), Demons** (i.e., more material Devas), Progenitors (Pitris) and men, "he collects Yoga-like (Yuyuje) his mind."

Strange to say, he begins by creating DEMONS, who thus take precedence over the angels or gods. This is no incongruity, nor is it due to inconsistency, but has, like all the rest, a profound esoteric meaning, quite clear to one free from Christian theological prejudice. He who bears in mind that the principle MAHAT, or Intellect, the "Universal Mind" (literally "the great"), which esoteric philosophy explains as the "manifested Omniscience" -- the "first product" of Pradhana (primordial matter) as Vishnu Purana says, but the first Cosmic aspect of Parabrahm or the esoteric SAT, the Universal Soul,** as Occultism

[[Footnote(s)]] -----

* This has in esotericism a direct bearing upon the seven principles of the manifested Brahma, or universe, in the same order as in man. Exoterically, it is only four principles.

** Demons is a very loose word to use, as it applies to a great number of inferior -- i.e., more material -- Spirits, or minor Gods, who are so termed because they "war" with the higher ones; but they are no devils.

*** The same order of principles in man:-- Atma (Spirit), Buddhi (Soul), its vehicle, as Matter is the Vahan of Spirit, and Manas (mind), the third, or the fifth microcosmically. On the plane of personality, Manas is the first.

[[Vol. 2, Page]] 59 THE BODIES OF BRAHMA.

teaches -- is at the root of SELF-Consciousness, will understand the reason why. The so-called "Demons" -- who are (esoterically) the Self-asserting and (intellectually) active Principle -- are the positive poles of creation, so to say; hence, the first produced. This is in brief the process as narrated allegorically in the Puranas.

"Having concentrated his mind into itself and the quality of darkness pervading Brahma's assumed body, the Asuras, issuing from his thigh, were first produced; after which, abandoning this body, it was transformed into NIGHT." (See Part II., § "The Fallen Angels.")

Two important points are involved herein:-- (a) Primarily in the Rig-Veda, the "Asuras" are shown as spiritual divine beings; their etymology is derived from asu (breath), the "Breath of God," and they mean the same as the Supreme Spirit or the Zoroastrian Ahura. It is later on, for purposes of theology and dogma, that they are shown issuing from Brahma's thigh, and that their name began to be derived from a privative, and sura, god (solar deities), or not-a-god, and that they became the enemies of the gods. Every ancient theogony without exception -- from the Aryan and the Egyptian down to that of Hesiod -- places, in the order of Cosmogonical evolution, Night before the Day; even Genesis, where "darkness is upon the face of the deep" before "the first day." The reason for this is that every Cosmogony -- except in the Secret Doctrine -- begins by the "Secondary Creation" so-called: to wit, the manifested Universe, the Genesis of which has to open by a marked differentiation between the eternal Light of Primary Creation, whose mystery must remain for ever "Darkness" to the prying finite conception and intellect of the profane, and the Secondary Evolution of manifested visible nature. The Veda contains the whole philosophy of that division without having ever been correctly explained by our Orientalists, because it has never been understood by them.

Continuing to create, Brahma assumes another form, that of the Day, and creates from his breath the gods, who are endowed with the quality of goodness (passivity)*. In his next body the quality of great passivity prevailed, which is also (negative) goodness, and from the side of that personage issued the Pitris, the progenitors of men, because, as the text explains, "Brahma thought of himself (during the process) as the father of the world."*** This is Kriya-sakti -- the mysterious Yoga power

[[Footnote(s)]] -----

* Thus, says the Commentary, the saying "by day the gods are most powerful, and by night the demons," is purely allegorical.

** This thinking of oneself as this, that, or the other, is the chief factor in the production of every kind of psychic or even physical phenomena. The words "whosoever shall say to this mountain be thou removed and cast into the sea, and shall not doubt . . . that thing will come to pass," are no vain words. Only the word "faith" ought to be translated by WILL. Faith without Will is like a wind-mill without wind -- barren of results.

[[Vol. 2, Page]] 60 THE SECRET DOCTRINE.

explained elsewhere. This body of Brahma when cast off became the Sandhya (evening twilight), the interval between day and night.

Finally Brahma assumed his last form pervaded by the quality of foulness, "and from this MEN, in whom foulness and passion predominate, were produced." This body when cast off became the dawn, or morning twilight -- the twilight of Humanity. Here Brahma stands esoterically for the Pitris. He is collectively the Pitar, "father."

The true esoteric meaning of this allegory must now be explained. Brahma here symbolizes personally the collective creators of the World and Men -- the universe with all its numberless productions of things movable and (seemingly) immovable.* He is collectively the Prajapatis, the Lords of Being; and the four bodies typify the four classes of creative powers or Dhyan Chohans, described in the Commentary directly following Stanza VII. in Book I. The whole philosophy of the so-called "Creation" of the good and evil in this world and of the whole cycle of Manvantaric results therefrom, hangs on the correct comprehension of these Four bodies of Brahma.

The reader will now be prepared to understand the real, the esoteric significance of what follows. Moreover there is an important point to be cleared up. Christian theology having arbitrarily settled and agreed that Satan with his Fallen Angels belonged to the earliest creation, Satan being the first-created, the wisest and most beautiful of God's Archangels, the word was given, the key-note struck. Henceforth all the pagan scriptures were made to yield the same meaning, and all were shown to be demoniacal, and it was and is claimed that truth and fact belong to, and commence only with, Christianity. Even the Orientalists and Mythologists, some of them no Christians at all but "infidels," or men of science, entered unconsciously to themselves, and by the mere force of association of ideas and habit, into the theological groove. Purely Brahmanical considerations, based on greed of power and ambition, allowed the masses to remain in ignorance of great truths; and the same causes led the Initiates among the early Christians to remain silent, while those who had never known the truth disfigured the order of things, judging of the hierarchy of "Angels" by their exoteric form. Thus as the Asuras had become the rebellious inferior gods fighting the higher ones in popular creeds, so the highest archangel, in truth the Agathodaemon, the eldest benevolent Logos, became with theology the "Adversary" or Satan. But is this warranted by the correct interpretation of any old Scripture? The answer is, most certainly not. As the Mazdean Scriptures of the

[[Footnote(s)]] -----

* The same idea is found in the first four chapters of Genesis, with their "Lord" and "God," which are the Elohim and the Androgynous Eloha.

[[Vol. 2, Page]] 61 WHAT THE Gnostics SAY.

Zend-Avesta, the Vendidad and others correct and expose the later cunning shuffling of the gods in the Hindu Pantheon, and restore through AHURA the Asuras to their legitimate place in theogony, so the recent discoveries of the Chaldean tablets vindicate the good name of the first divine Emanations. This is easily proved. Christian Angelology is directly and solely derived from that of the Pharisees, who brought their tenets from Babylonia. The Sadducees, the real guardians of the Laws of Moses, knew not of, and rejected, any angels, opposing even the immortality of the human Soul (not impersonal Spirit). In the Bible the only "Angels" spoken of are the "Sons of God" mentioned in Genesis vi. (who are now regarded as the Nephilim, the Fallen Angels), and several angels in human form, the "Messengers" of the Jewish God, whose own rank needs a closer analysis than heretofore given. (Vide Supra, Stanza I., sub-sections 2, 3, et seq., where it is shown that the early Akkadians called Ea, Wisdom, that which was disfigured by the later Chaldees and Semites into Tismat, Tisalat and the Thallath of Berossus, the female Sea Dragon, now Satan.) Truly -- "How art thou fallen (by the hand of man), O bright star and son of the morning!"

Now what do the Babylonian accounts of "Creation," as found on the Assyrian fragments of tiles, tell us; those very accounts upon which the Pharisees built their angelology? But compare Mr. G. Smith's "Assyrian Discoveries," p. 398, and his "Chaldean Account of Genesis," p. 107. The "Tablet with the story of the Seven Wicked Gods or Spirits," has the following account -- we print the important passages in italics:--

1. In the first days the evil Gods,
2. the angels, who were in rebellion, who in the lower part of heaven
3. had been created,
4. they caused their evil work

5. devising with wicked heads . . . etc.

Thus we are shown, as plainly as can be, on a fragment which remained unbroken, so that there can be no dubious reading, that the "rebellious angels" had been created in the lower part of heaven, i.e., that they belonged and do belong to a material plane of evolution, although as it is not the plane of which we are made cognizant through our senses, it remains generally invisible to us, and is thus regarded as subjective. Were the Gnostics so wrong, after this, in affirming that this our visible world, and especially the Earth, had been created by lower angels, the inferior Elohim, of which, as they taught, the God of Israel was one. These Gnostics were nearer in time to the records of the Archaic Secret Doctrine, and therefore ought to be allowed to have known better than non-initiated Christians, who took upon themselves, hundreds of years

[[Vol. 2, Page]] 62 THE SECRET DOCTRINE.

later, to remodel and correct what was said. But let us see what the same Tablet says further on:--

7. There were seven of them (the wicked gods) . . . (then follows the description of these, the fourth being a "serpent," the phallic symbol of the fourth Race in human Evolution).

15. The seven of them, messengers of the God Anu, their king.

Now Anu belongs to the Chaldean trinity, and is identical with Sin, the "Moon," in one aspect. And the Moon in the Hebrew Kabala is the Argha of the seed of all material life, and is still more closely connected, kabalistically, with Jehovah, who is double-sexed as Anu is. They are both represented in Esotericism and viewed from a dual aspect: male or spiritual, female or material, or Spirit and Matter, the two antagonistic principles. Hence the "Messengers of Anu," (who is Sin, the "Moon,") are shown, in verses 28 to 41, as being finally overpowered by the same Sin with the help of Bel (the Sun) and Ishtar (Venus). This is regarded as a contradiction by the Assyriologists, but is simply metaphysics in the esoteric teaching.

There is more than one interpretation, for there are seven keys to the mystery of the Fall. Moreover there are two "Falls" in Theology: the rebellion of the Archangels and their "Fall," and the "Fall" of Adam and Eve. Thus the lower as well as the higher Hierarchies are charged with a supposed crime. The word "supposed" is the true and correct term, for in both cases it is founded on misconception. Both are considered in Occultism as Karmic effects, and both belong to the law of Evolution: intellectual and spiritual on the one hand, physical and psychic on the other. The "Fall" is a universal allegory. It sets forth at one end of the ladder of Evolution the "rebellion," i.e., the action of differentiating intellection or consciousness on its various planes, seeking union with matter; and at the other, the lower end, the rebellion of matter against Spirit, or of action against spiritual inertia. And here lies the germ of an error which has had such disastrous effects on the intelligence of civilized societies for over 1,800 years. In the original allegory it is matter -- hence the more material angels -- which was regarded as the conqueror of Spirit, or the Archangels who "fell" on this plane. "They of the flaming sword (or animal passions) had put to flight the Spirits of Darkness." Yet it is the latter who fought for the supremacy of the conscious and divine spirituality on Earth and failed, succumbing to the power of matter. But in theological dogma we see the reverse. It is Michael, "who is like unto God," the representative of Jehovah, who is the leader of the celestial hosts -- as Lucifer, in Milton's fancy, is of the infernal hosts -- who has the best of Satan. It is true that the nature of

[[Vol. 2, Page]] 63 WHO ARE THE "FLAMES"?

Michael depends upon that of his Creator and Master. Who the latter is, one may find out by carefully studying the allegory of the "War in Heaven" with the astronomical key. As shown by Bentley, the "War of the Titans against the gods" in Hesiod, and also the war of the Asuras (or the Tarakamaya) against the devas in Puranic legend, are identical in all save the names. The aspects of the stars show (Bentley taking the year 945 B.C. as the nearest date for such conjunction) that "all the planets, except Saturn, were on the same side of the heavens as the Sun and Moon," and hence were his opponents. And yet it is Saturn, or the Jewish "Moon-god," who is shown as prevailing, both by Hesiod and Moses, neither of whom was understood. Thus it was that the real meaning became distorted.

STANZA II. -- Continued.

8. THE FLAMES CAME. THE FIRES WITH THE SPARKS; THE NIGHT FIRES AND THE DAY FIRES (a). THEY DRIED OUT THE TURBID DARK WATERS. WITH THEIR HEAT THEY QUENCHED THEM. THE LHAS (Spirits) OF THE HIGH; THE LHAMAYIN (those) OF BELOW, CAME (b). THEY SLEW THE FORMS, WHICH WERE TWO- AND FOUR-FACED. THEY FOUGHT THE GOAT-MEN, AND THE DOG-HEADED MEN, AND THE MEN WITH FISHES' BODIES.

(a) The "Flames" are a Hierarchy of Spirits parallel to, if not identical with, the "burning" fiery Saraph (Seraphim) mentioned by Isaiah (vi. 2-6), those who attend, according to Hebrew Theogony, "the Throne of the Almighty." Melha is the Lord of the "Flames." When he appears on Earth, he assumes the personality of a Buddha, says a popular legend. He is one of the most ancient and revered Lhas, a Buddhist St. Michael.

(b) The word "Below" must not be taken to mean infernal regions, but simply a spiritual, or rather ethereal, Being of a lower grade, because nearer to the Earth, or one step higher than our terrestrial sphere; while the Lhas are Spirits of the highest Spheres -- whence the name of the capital of Tibet, Lha-ssa.

Besides a statement of a purely physical nature and belonging to the

[[Vol. 2, Page]] 64 THE SECRET DOCTRINE.

evolution of life on Earth, there may be another allegorical meaning attached to this Sloka, or indeed, as is taught, several. The FLAMES, or "Fires," represent Spirit, or the male element, and "Water," matter, or the opposite element. And here again we find, in the action of the Spirit slaying the purely material form, a reference to the eternal struggle, on the physical and psychic planes, between Spirit and Matter, besides a scientific cosmic fact. For, as said in the next verse:--

9. MOTHER-WATER, THE GREAT SEA WEPT. SHE AROSE, SHE DISAPPEARED IN THE MOON, WHICH HAD LIFTED HER, WHICH HAD GIVEN HER BIRTH (a).

(a) Now what can this mean? Is it not an evident reference to tidal action in the early stage of the history of our planet in its fourth Round? Modern research has been busy of late in its speculations on the Palaeozoic high-tides. Mr. Darwin's theory was that not less than 52,000,000 years ago -- and probably much more -- the Moon originated from the Earth's plastic mass. Starting from the point where research was left by Helmholtz, Ferrel, Sir William Thomson and others, he retraced the course of tidal retardation of the earth's rotary motions far back into the very night of time, and placed the Moon during the infancy of our planet at only "a fraction of its present distance." In short, his theory was that it is the Moon which separated from the Earth. The tidal elevation concurring with the swing of the globular mass -- centrifugal tendency being then nearly equal to gravity -- the latter was overcome, and the tidally elevated mass could thus separate completely from the Earth.*

The Occult teaching is the reverse of this. The Moon is far older than the Earth; and, as explained in Book I., it is the latter which owes its being to the former, however astronomy and geology may explain the fact. Hence, the tides and the attraction to the Moon, as shown by the liquid portion of the Globe ever striving to raise itself towards its parent. This is the meaning of the sentence that "the Mother-Water arose and disappeared in the Moon, which had lifted her, which had given her birth."

[[Footnote(s)]] -----

* But see the difficulties suggested later, in the works of various geologists, against this theory. Compare Sir R. S. Bull's article in "Nature" (Dec. 1, 1881), and also what the American geologists say.

[[Vol. 2, Page]] 65 DIVINE WILL BECOMES EROS.

10. WHEN THEY (the Rupas) WERE DESTROYED, MOTHER-EARTH REMAINED BARE,* SHE ASKED TO BE DRIED (a).**

(a) The time for its incrustation had arrived. The waters had separated and the process was started. It was the beginning of a new life. This is what one key divulges to us. Another key teaches the origin of Water, its admixture with Fire (liquid fire it calls it),*** and enters upon an alchemical description of the progeny of the two -- solid matter such as minerals and earths. From the "Waters of Space," the progeny of the male Spirit-Fire and the female (gaseous) Water has become the Oceanic expanse on Earth. Varuna is dragged down from the infinite Space, to reign as Neptune over the finite Seas. As always, the popular fancy is found to be based on a strictly scientific foundation.

Water is the symbol of the female element everywhere; mater, from which the letter M, is derived pictorially from [[diagram]] a water hieroglyph. It is the universal matrix or the "Great Deep." Venus, the great Mother-Virgin, issues forth from the Sea-wave, and Cupid or Eros is her son. But Venus is the later mythological variant of Gaia (or Gaea), the Earth, which, in its higher aspect is Nature (Prakriti), and metaphysically Aditi, and even Mulaprakriti, the root of Prakriti or its noumenon.

Hence Cupid or Love in his primitive sense is Eros, the Divine Will, or Desire of manifesting itself through visible creation. Thence Fohat, the prototype of Eros, becomes on Earth the great power "Life-electricity," or the Spirit of "Life-giving." Let us remember the Greek Theogony and enter into the spirit of its philosophy. We are taught by the Greeks (See "Iliad" IV., 201, 246) that all things, gods included, owe their being to the Ocean and his wife Tethys, the latter being Gaea, the Earth or Nature. But who is Ocean? Ocean is the immeasurable SPACE (Spirit in Chaos), which is the Deity (see Book I.); and Tethys is not the Earth, but primordial matter in the process of formation. In our case it is no longer Aditi-Gaea who begets Ouranos or Varuna, the chief Aditya among the seven planetary gods, but Prakriti, materialised and localised. The Moon, masculine in its theogonic character, is,

[[Footnote(s)]] -----

* The goddess who gave birth to these primordial monsters, in the account of Berosus, was Thallath, in Greek Thalassa, "the Sea."

** See, for comparison, the account of creation by Berosus (Alexander Polyhistor) and the hideous beings born from the two-fold principle (Earth and Water) in the Abyss of primordial creation: Neras (Centauri, men with the limbs of horses and human bodies), and Kimnras (men with the heads of horses) created by Brahma in the commencement of the Kalpa.

*** See Commentary following Sloka 18.

[[Vol. 2, Page]] 66 THE SECRET DOCTRINE.

in its cosmic aspect only, the female generative principle, as the Sun is the male emblem thereof. Water is the progeny of the Moon, an androgyne deity with every nation.

Evolution proceeds on the laws of analogy in Kosmos as in the formation of the smallest globe. Thus the above, applying to the modus operandi at the time when the Universe was appearing, applies also in the case of our Earth's formation.

This Stanza opens by speaking of thirty crores, 30,000,000, of years. We may be asked -- What could the ancients know of the duration of geological periods, when no modern scientist or mathematician is able to calculate their duration with anything like approximate accuracy? Whether they had or had not better means (and it is maintained that they had them in their Zodiacs), still the chronology of the ancient Brahmins shall now be given as faithfully as possible.

THE CHRONOLOGY OF THE BRAHMINS.

No greater riddle exists in science, no problem is more hopelessly insoluble, than the question: How old -- even approximately -- are the Sun and Moon, the Earth and Man? What does modern science know of the duration of the ages of the World, or even of the length of geological periods?

Nothing; absolutely nothing.

If one turns to science for chronological information, one is told by those who are straightforward and truthful, as for instance Mr. Pengelly, the eminent geologist, "We do not know."* One will learn that, so far, no trustworthy numerical estimate of the ages of the world and man could be made, and that both geology and anthropology are at sea. Yet when a student of esoteric philosophy presumes to bring forward the teachings of Occult Science, he is at once sat upon. Why should this be so, since, when reduced to their own physical methods, the greatest scientists have failed to arrive even at an approximate agreement?

It is true that science can hardly be blamed for it. Indeed, in the Cimmerian darkness of the prehistoric ages, the explorers are lost in a labyrinth, whose great corridors are doorless, allowing no visible exit into the Archaic past. Lost in the maze of their own conflicting speculations, rejecting, as they have always done, the evidence of Eastern tradition, without any clue, or one single certain milestone to guide them, what can geologists or anthropologists do but pick up the slender

[[Footnote(s)]] -----

* For a similar admission see Prof. Lefevre's Philosophy, p. 481.

[[Vol. 2, Page]] 67 THE RACE THAT NEVER DIES.

thread of Ariadne where they first perceive it, and then proceed at perfect random? Therefore we are first told that the farthest date to which documentary record extends is now generally regarded by Anthropology as but "the earliest distinctly visible point of the pre-historic period." (Encyclopaedia Britannica.)

At the same time it is confessed that "beyond that period stretches back a vast indefinite series of prehistoric ages." (Ibid.)

It is with those specified "Ages" that we shall begin. They are "prehistoric" to the naked eye of matter only. To the spiritual eagle eye of the seer and the prophet of every race, Ariadne's thread stretches beyond that "historic period" without break or flaw, surely and steadily, into the very night of time; and the hand which holds it is too mighty to drop it, or even let it break. Records exist, although they may be rejected as fanciful by the profane; though many of them are tacitly accepted by philosophers and men of great learning, and meet with an unvarying refusal only from the official and collective body of orthodox science. And since the latter refuses to give us even an approximate idea of the duration of the geological ages -- save in a few conflicting and contradictory hypotheses -- let us see what Aryan philosophy can teach us.

Such computations as are given in Manu and the Puranas -- save trifling and most evidently intentional exaggerations -- are, as already stated, almost identical with those taught in esoteric philosophy. This may be seen by comparing the two in any Hindu calendar of recognised orthodoxy.

The best and most complete of all such calendars, at present, as vouched for by the learned Brahmins of Southern India, is the already mentioned Tamil calendar called the "Tirukkanda Panchanga," compiled, as we are told, from, and in full accordance with, secret fragments of Asuramaya's data. As Asuramaya is said to have been the greatest astronomer, so he is whispered to have also been the most powerful "Sorcerer" of the "WHITE ISLAND, which had become BLACK with sin," i.e., of the islands of Atlantis.

The "White Island" is a symbolical name. Asuramaya is said to have lived (see the tradition of Jhana-bhaskara) in Romaka-pura in the West: because the name is an allusion to the land and cradle of the "Sweat-born" of the Third Race. That land or continent had disappeared ages before Asuramaya lived, since he was an Atlantean; but he was a direct descendant of the Wise Race, the Race that never dies. Many are the legends concerning this hero, the pupil of Surya (the Sun-God) himself, as the Indian accounts allege. It matters little whether he lived on one or another island, but the question is to prove that he was no myth, as Dr. Weber and others would make him. The

[[Vol. 2, Page]] 68 THE SECRET DOCTRINE.

fact of "Romaka-pura in the West" being named as the birth-place of this hero of the archaic ages, is the more interesting because it is so very suggestive of the esoteric teaching about the "Sweat-born" Races, the men born from the pores of their parents. "ROMAKUPAS" means "hair-pores" in Sanskrit. In Mahabharata XII. 10,308, a people named Raumyas are said to have been created from the pores of Virabhadara, the terrible giant, who destroyed Daksha's sacrifice. Other

tribes and people are also represented as born in this way. All these are references to the later Second and the earlier Third Root Races.

The following figures are from the calendar just referred to; a footnote marks the points of disagreement with the figures of the Arya Samaj school:--

I. From the beginning of cosmic evolution,* up to the Hindu year Tarana (or 1887) 1,955,884,687 years.

II. The (astral) mineral, vegetable and animal kingdoms up to Man, have taken to evolve** 300,000,000 years.

III. Time, from the first appearance of "Humanity" (on planetary chain).....1,664,500,987 years.***

[[Footnote(s)]] -----

* The esoteric doctrine says that this "cosmic evolution" refers only to our solar system; while exoteric Hinduism makes the figures refer, if we do not mistake, to the whole Universal System.

** Another point of disagreement. Occultism says: "The astral prototypes of the mineral, vegetable and animal kingdoms up to man have taken that time (300 million years) to evolve, re-forming out of the cast-off materials of the preceding Round, which, though very dense and physical in their own cycle, are relatively ethereal as compared with the materiality of our present middle Round. At the expiration of these 300 million years, Nature, on the way to the physical and material, down the arc of descent, begins with mankind and works downwards, hardening or materialising forms as it proceeds. Thus the fossils found in strata, to which an antiquity, not of eighteen, but of many hundreds of millions of years, must be ascribed, belong in reality to forms of the preceding Round, which, while living, were far more ethereal than physical, as we know the physical. That we perceive and disinter them as tangible forms, is due to the process of materialization or crystallization referred to, which took place subsequently, at the beginning of the Fourth Round, and reached its maximum after the appearance of man, proceeding parallel with his physical evolution. This alone illustrates the fact that the degree of materiality of the Earth changes *pari passu* with that of its inhabitants. And thus man now finds, as tangible fossils, what were once the (to his present senses) ethereal forms of the lower kingdoms. The above Brahmanical figures refer to evolution beginning on Globe A, and in the First Round. In this Volume we speak only of this, the Fourth Round."

*** This difference and the change of cyphers in the last three triplets of figures, the writer cannot undertake to account for. According to every calculation, once the three hundred millions are subtracted, the figures ought to stand, 1,655,884,687. But they are given as stated in the Tamil calendar above-named and as they were translated. The school of the late Pandit Dayanand Saraswati, founder of the Arya Samaj, gives a date of 1,960,852,987. See the "Arya Magazine" of Lahore, the cover of which bears the words: "Arya era 1,960,852,987."

[[Vol. 2, Page]] 69 THE VARIOUS PRALAYAS.

IV. The number that elapsed since the "Vaivasvata Manvantara"* -- or the human period -- up to the year 1887, is just 18,618,728 years.

V. The full period of one Manvantara is 308,448,000 years.

VI. 14 "Manvantaras" plus the period of one Satya Yuga make ONE DAY OF BRAHMA, or complete Manvantara and make 4,320,000,000 years.

Therefore a Maha-Yuga consists of 4,320,000 years. **

The year 1887 is from the commencement of Kali-Yuga 4,989 years.

To make this still clearer in its details, the following computations by Rao Bahadur P. Sreenivas Row, are given from the "Theosophist" of November, 1885.

Mortal years.
360 days of mortals make a year 1
Krita Yuga contains 1,728,000
Treta Yuga contains 1,296,000
Dwapara Yuga contains 864,000
Kali Yuga contains 432,000
The total of the said four Yugas constitute a Maha Yuga 4,320,000
Seventy-one of such Maha-Yugas form the period of the reign of one Manu 306,720,000
The reign of 14 Manus embraces the duration of 994 Maha-Yugas, which is equal to 4,294,080,000

[[Footnote(s)]] -----

* VAIVASVATA Manu is the one human being -- some versions add to him the seven Rishis -- who in the Matsya Avatar allegory is saved from the Deluge in a boat, like Noah in the Ark. Therefore, this Vaivasvata Manvantara would be the "post-Diluvian" period. This, however, does not refer to the later "Atlantean" or Noah's deluge, nor to the Cosmic Deluge or Pralaya of obscurity, which preceded our Round, but to the appearance of mankind in the latter Round. There is a

great difference made, however, between the "Naimitika," occasional or incidental, "Prakritika," elemental, "Atyantika," the absolute, and "Nitya," the perpetual Pralaya; the latter being described as "Brahma's contingent re-coalescence of the Universe at the end of Brahma's DAY." The question was raised by a learned Brahmin Theosophist: "Whether there is such a thing as Cosmic Pralaya; because, otherwise, the Logos (Krishna) would have to be reborn, and he is Aja (unborn)." We cannot see why. The Logos is said to be born only metaphorically, as the Sun is born daily, or rather a beam of that Sun is born in the morning and is said to die when it disappears, whereas it is simply reabsorbed into the parent essence. Cosmic Pralaya is for things visible, not for the Arupa, formless, world. The Cosmic or Universal Pralaya comes only at the end of one hundred years of Brahma; when the Universal dissolution is said to take place. Then the Avyaya, say the exoteric scriptures, the eternal life symbolized by Vishnu, assuming the character of Rudra, the Destroyer, enters into the Seven Rays of the Sun and drinks up all the waters of the Universe. "Thus fed, the seven solar Rays dilate to seven Suns and set fire to the whole Cosmos. . . ."

** Since a Maha-Yuga is the 1,000th part of a day of Brahma.

 [[Vol. 2, Page]] 70 THE SECRET DOCTRINE.

Add Sandhis, i.e., intervals between the reign of each Manu, which amount to six Maha-Yugas, equal to 25,920,000

The total of these reigns and interregnums of 14 Manus, is 1,000 Maha-Yugas, which constitute a Kalpa, i.e., one day of Brahma 4,320,000,000

As Brahma's Night is of equal duration, one Day and Night of Brahma would contain 8,640,000,000

360 of such days and nights make one year of Brahma make 3,110,400,000,000

100 such years constitute the whole period of Brahma's age, i.e., Maha-Kalpa 311,040,000,000,000

These are the exoteric figures accepted throughout India, and they dovetail pretty nearly with those of the Secret works. The latter, moreover, amplify them by a division into a number of esoteric cycles, never mentioned in Brahmanical popular writings -- one of which, the division of the Yugas into racial cycles, is given elsewhere as an instance. The rest, in their details, have of course never been made public. They are, nevertheless, known to every "Twice-born" (Dwija, or Initiated) Brahmin, and the Puranas contain references to some of them in veiled terms, which no matter-of-fact Orientalist has yet endeavoured to make out, nor could he if he would.

These sacred astronomical cycles are of immense antiquity, and most of them pertain, as stated, to the calculations of Narada and Asuramaya. The latter has the reputation of a giant and a sorcerer. But the antediluvian giants (the Gibborim of the Bible) were not all bad or Sorcerers, as Christian Theology, which sees in every Occultist a servant of the Evil one, would have it; nor were they worse than many of "the faithful sons of the Church." A Torquemada and a Catherine de Medicis certainly did more harm in their day and in the name of their Master than any Atlantean giant or demigod of antiquity ever did; whether his name was Cyclops, or Medusa, or yet the Orphic Titan, the anguipedal monster known as Ephialtes. There were good "giants" in days of old just as there are bad "pigmyies" now; and the Rakshasas and Yakshas of Lanka are no worse than our modern dynamiters, and certain Christian and civilised generals during modern wars. Nor are they myths. "He who would laugh at Briareus and Orion ought to abstain from going to, or even talking of, Karnac or Stonehenge," remarks somewhere a modern writer.

As the Brahmanical figures given above are approximately the basic calculations of our esoteric system, the reader is requested to carefully keep them in mind.

In the "Encyclopaedia Britannica" one finds, as the last word of science, that the antiquity of man is allowed to stretch only over "tens of thou-

 [[Vol. 2, Page]] 71 SCIENTIFIC SELF-COMPLACENCE.

sands of years."** It becomes evident that as these figures may be made to fluctuate between 10,000 and 100,000, therefore they mean very little if anything, and only render still denser the darkness surrounding the question. Moreover, what matters it that science places the birth of man in the "pre- or post-glacial drift," if we are told at the same time that the so-called "ice age" is simply a long succession of ages which "shaded without abrupt change of any kind into what is termed the human or Recent period. . . the overlapping of geological periods having been the rule from the beginning of time." The latter "rule" only results in the still more puzzling, even if strictly scientific and correct, information, that "even to-day man is contemporary with the ice-age in the Alpine valleys and in the Finmark."***

Thus, had it not been for the lessons taught by the Secret Doctrine, and even by exoteric Hinduism and its traditions, we should be left to this day to float in perplexed uncertainty between the indefinite ages of one school of science, the "tens of thousands" of years of the other, and the 6,000 years of the Bible interpreters. This is one of the several reasons why, with all the respect due to the conclusions of the men of learning of our modern day, we are forced to ignore them in all such questions of pre-historic antiquity.

Modern Geology and Anthropology must, of course, disagree with our views. But Occultism will find as many weapons against these two sciences as it has against astronomical and physical theories, in spite of Mr. Laing's assurances that*** "in (chronological) calculations of this sort, concerning older and later formations, there is no theory, and they are based on positive facts, limited only by a certain possible (?) amount of error either way," occultism will prove, scientific confessions in hand, that geology is very much in error, and very often even more so than Astronomy. In this very

passage by Mr. Laing, which gives to Geology pre-eminence for correctness over Astronomy, we find a passage in flagrant contradiction to the admissions of the best Geologists themselves. Says the author --

"In short, the conclusions of Geology, at any rate up to the Silurian period,**** when the present order of things was fairly inaugurated, are approximate (truly so) facts and not theories, while the astronomical conclusions are theories based on data so uncertain, that while in some

[[Footnote(s)]] -----

* See article "Geology," in "Encyclopaedia Britannica."

** This allows a chance even to the Biblical "Adam Chronology" of 6,000 years. (Ibid.)

*** See his "Modern Science and Modern Thought."

**** To the Silurian period as regards Molluscs and Animal life -- granted; but what do they know of man?

[[Vol. 2, Page]] 72 THE SECRET DOCTRINE.

cases they give results incredibly short . . . in others they give results almost incredibly long."

After which, the reader is advised that the safest course "seems to be to assume that Geology really proves the duration of the present order of things to have been somewhere over 100 millions of years," as "Astronomy gives an enormous though unknown time in the past, and to come in the future, for the birth, growth, maturity, decline, and death of the Solar System, of which our Earth is a small planet now passing through the habitable phase." (p. 49.)

Judging from past experience, we do not entertain the slightest doubt that, once called upon to answer "the absurd unscientific and preposterous claims of exoteric (and esoteric) Aryan chronology," the scientist of "the results incredibly short," i.e., only 15,000,000 years, and the scientist, who "would require 600,000,000 years," together with those who accept Mr. Huxley's figures of 1,000,000,000 "since sedimentation began in Europe" (World Life), would all be as dogmatic one as the other. Nor would they fail to remind the Occultist and the Brahmin, that it is the modern men of science alone who represent exact science, whose duty it is to fight inaccuracy and superstition.

The earth is passing through the "habitable phase" only for the present order of things, and as far as our present mankind is concerned with its actual "coats of skin" and phosphorus for bones and brain.

We are ready to concede the 100 millions of years offered by Geology, since we are taught that our present physical mankind -- or the Vaivasvata humanity -- began only 18 millions of years ago. But Geology has no facts to give us for the duration of geological periods, as we have shown, no more indeed than has Astronomy. The authentic letter from Mr. W. Pengelly, F.R.S., quoted elsewhere, says that: "It is at present, and perhaps always will be, IMPOSSIBLE to reduce, even approximately, geological time into years or even into millenniums." And having never, hitherto, excavated a fossil man of any other than the present form -- what does Geology know of him? It has traced zones or strata and, with these, primordial zoological life, down to the Silurian. When it has, in the same way, traced man down to his primordial protoplasmic form, then we will admit that it may know something of primordial man. If it is not very material "to the bearings of modern scientific discovery on modern thought," whether "man has existed in state of constant though slow progression for the last 50,000 years of period of 15 millions, or for the last 500,000 years of a period of 150 millions" ("Modern Science, etc." p. 49), as Mr. S. Laing tells his readers, it is very much so for the claims of the Occultists. Unless the latter show that it is a possibility, if not a perfect certainty, that man

[[Vol. 2, Page]] 73 COSMOGONY, AN INTELLIGENT PLAN.

lived 18 millions of years ago, the Secret Doctrine might as well have remained unwritten. An attempt must, therefore, be made in this direction, and it is our modern geologists and men of science generally who will be brought to testify to this fact in the third part of this volume. Meanwhile, and notwithstanding the fact that Hindu Chronology is constantly represented by the Orientalists as a fiction based on no "actual computation,"* but simply a "childish boasting," it is nevertheless often twisted out of recognition to make it yield to, and fit in with, Western theories. No figures have ever been more meddled with and tortured than the famous 4, 3, 2, followed by cyphers of the Yugas and Maha-Yugas.

As the whole cycle of prehistoric events, such as the evolution and transformation of Races and the extreme antiquity of man, hangs upon the said Chronology, it becomes extremely important to check it by other existing calculations. If the Eastern Chronology is rejected, we shall at least have the consolation of proving that no other -- whether the figures of Science or of the Churches -- is one whit more reliable. As Professor Max Muller expresses it, it is often as useful to prove what a thing is not as to show what it may be. And once we succeed in pointing out the fallacies of both Christian and scientific computations -- by allowing them a fair chance of comparison with our Chronology -- neither of the two will have a reasonable ground to stand upon, in pronouncing the esoteric figures less reliable than its own.

We may here refer the reader to our earlier work "Isis Unveiled," Vol. I., p. 32, for some remarks concerning the figures which were cited a few pages back.

To-day a few more facts may be added to the information there given, which is already known to every Orientalist. The sacredness of the cycle of 4320, with additional cyphers, lies in the fact that the figures which compose it, taken separately or joined in various combinations, are each and all symbolical of the greatest mysteries in Nature. Indeed, whether one takes the 4 separately, or the 3 by itself, or the two together making 7, or again the three added together and yielding 9, all these numbers have their application in the most sacred and occult things, and record the workings of Nature in her eternally periodical phenomena. They are never erring, perpetually recurring numbers, unveiling, to him who studies the secrets of Nature, a truly divine System, an intelligent plan in Cosmogony, which results in natural cosmic

divisions of times, seasons, invisible influences, astronomical phenomena, with their action and reaction on terrestrial and even moral nature; on

[[Footnote(s)]] -----

* Wilson's "Translation of Vishnu Purana," Vol. I., pp. 50, 51.

[[Vol. 2, Page]] 74 THE SECRET DOCTRINE.

birth, death, and growth, on health and disease. All these natural events are based and depend upon cyclical processes in the Kosmos itself, producing periodic agencies which, acting from without, affect the Earth and all that lives and breathes on it, from one end to the other of any Manvantara. Causes and effects are esoteric, exoteric, and endexoteric, so to say.

In Isis Unveiled we wrote that which we now repeat:-- "We are at the bottom of a cycle and evidently in a transitory state. Plato divides the intellectual progress of the universe during every cycle into fertile and barren periods. In the sublunary regions, the spheres of the various elements remain eternally in perfect harmony with the divine nature, he says; 'but their parts,' owing to a too close proximity to earth, and their commingling with the earthly (which is matter, and therefore the realm of evil), 'are sometimes according, and sometimes contrary to (divine) nature.' When those circulations -- which Eliphas Levi calls 'currents of the astral light' -- in the universal ether which contains in itself every element, take place in harmony with the divine spirit, our earth and everything pertaining to it enjoys a fertile period. The occult powers of plants, animals, and minerals magically sympathize with the 'superior natures,' and the divine soul of man is in perfect intelligence with these 'inferior' ones. But during the barren periods, the latter lose their magic sympathy, and the spiritual sight of the majority of mankind is so blinded as to lose every notion of the superior powers of its own divine spirit. We are in a barren period: the eighteenth century, during which the malignant fever of scepticism broke out so irrepressibly, has entailed unbelief as an hereditary disease upon the nineteenth. The divine intellect is veiled in man; his animal brain alone philosophizes." And philosophizing alone, how can it understand the "SOUL DOCTRINE"?

In order not to break the thread of the narrative we shall give some striking proofs of these cyclic laws in Part II., proceeding meanwhile with our explanations of geological and racial cycles.

[[Vol. 2, Page]] 75 THE SECRET OF THE FALL OF THE ANGELS.

STANZA III.
ATTEMPTS TO CREATE MAN.

§§ (11) The Descent of the Demiurge. (12) The lunar gods ordered to create. (13) The higher gods refuse.

11. THE LORD OF THE LORDS CAME. FROM HER BODY HE SEPARATED THE WATERS, AND THAT WAS HEAVEN ABOVE, THE FIRST HEAVEN (the atmosphere, or the air, the firmament) (a).

(a) Here tradition falls again into the Universal. As in the earliest version, repeated in the Puranas, so in the latest, the Mosaic account. In the first it is said: "He the Lord" (the god who has the form of Brahma) "when the world had become one ocean (Harivamsa I. 36) concluding that within the waters lay the earth, and desirous to raise it up," to separate it, "created himself in another form. As in the preceding Kalpa (Manvantara) he had assumed the shape of a tortoise, so in this one he took the shape of a boar, etc. etc." In the Elohist "creation" (Genesis, verses 6, 7, 8, and 9) "God" creates a firmament in the midst of the waters and says "let dry land appear." And now comes the traditional peg whereunto is hung the esoteric portion of the Kabalistic interpretation.

12. THE GREAT CHOHANS (Lords), CALLED THE LORDS OF THE MOON, OF THE AIRY BODIES (a). "BRING FORTH MEN, (they were told), MEN OF YOUR NATURE. GIVE THEM (i.e., the Jivas or Monads) THEIR FORMS WITHIN. SHE (Mother Earth or Nature) WILL BUILD COVERINGS WITHOUT (external bodies). (For) MALES-FEMALES WILL THEY BE. LORDS OF THE FLAME, ALSO."

(a) Who are the Lords of the Moon? In India they are called Pitris or "lunar ancestors," but in the Hebrew scrolls it is Jehovah himself who is the "Lord of the Moon," collectively as the Host, and also as one of the Elohim. The astronomy of the Hebrews and their observance of times was regulated by the moon. A Kabalist, having shown that "Daniel . . . told off God's providence by set times," and that the "Revelation" of John "speaks of a carefully measured cubical city descending out of the heavens," etc., adds --

[[Vol. 2, Page]] 76 THE SECRET DOCTRINE.

"But the vitalizing power of heaven lay chiefly with the moon. . . . It was the Hebrew [[hebrew]] (Jehovah), and St. Paul enjoins: 'Let no man judge you for your observance of the seventh day, and the day of the new moon, which are a shadow of things to come; but the body (or substance) is of Christ' or Jehovah, that function of this power that "made the barren woman . . . a mother . . . for they are the gift of Jehovah" . . . which is a key to the objection which her husband made to the Shunamite, as to her going to the man of God -- "for it is neither the seventh day nor the day of the new moon. . . . (2 Kings, iv., 23.) The living spiritual powers of the constellations had mighty wars, marked by the movements and positions of the stars and planets, and especially as the result of the conjunction of the moon, earth, and sun. Bentley comments on the Hindu "War between the gods and the giants," as marked by the eclipse of the Sun at the ascending node of the Moon, 945 B.C. (! !), at which time was born* or produced from the sea, SRI (Sarai, S-r-i, the wife of the Hebrew A-bram**). Sri is also Venus-Aphrodite the Western emblem "of the luni-solar year or the moon (as Sri is the wife of the moon; vide foot-note), the goddess of increase*** . . ." Therefore . . . "the grand monument and landmark of the

exact period of the lunar year and month, by which this cycle (of 19 tropical years and 235 revolutions of the moon) could be calculated, was Mount Sinai -- the Lord Jehovah coming down thereon. . . . Paul speaks (then) as a mystagogue, when he says concerning the freed woman and bond woman of Abraham: 'For this Hagar (the bond-woman) is Mount Sinai in Arabia.' How could a woman be a mountain? and such a mountain! Yet . . . she was. . . . Her name was Hagar, Hebrew [[hebrew]], whose numbers re-read 235, or in exact measure, the very number of lunar months to equal nineteen tropical years to complete this cycle. . . . Mount Sinai being, in the esoteric language of the wisdom, the monument of the exact time of the lunar

[[Footnote(s)]] -----

* According to the wonderful chronology of Bentley, who wrote in days when Biblical chronology was still undisputed; and also according to that of those modern Orientalists who dwarf the Hindu dates as far as they can.

** Now Sri is the daughter of Bhrigu, one of the Prajapatis and Rishis, the chief of the Bhrigus, "the Consumers," the aerial class of gods. She is Lakshmi, the wife of Vishnu, and she is "the bride of Siva" (Gauri), and she is Sarasvati, "the watery," the wife of Brahma, because the three gods and goddesses are one, under three aspects. Read the explanation by Parasara, in Vishnu Purana in Bk. I., ch. viii. (Vol. I., Wilson's trans., p. 119), and you will understand. "The Lord of Sri" is the moon, he says, and "Sri is the wife of Narayana, the God of Gods"; Sri or Lakshmi (Venus) is Indrani, as she is Sarasvati, for in the words of Parasara: "Hari (or Iswara, "the Lord") is all that is called male in the Universe; Lakshmi is all that is termed female. There is nothing else than they." Hence she is "female," and "God" is male Nature.

*** Sri is goddess of, and herself "Fortune and Prosperity."

[[Vol. 2, Page]] 77 THE VARIOUS CLASSES OF CREATORS.

years and months, by which this spiritual vitalizing cycle could be computed -- and which mountain, indeed, was called (see Fuerst), "the Mountain of the Moon (Sin). So also Sarai (SRI), the wife of Abram, could have no child until her name was changed to Sarah, [[hebrew]], giving to her the property of this lunar influence."*

This may be regarded as a digression from the main subject; but it is a very necessary one with a view to Christian readers. For who, after studying dispassionately the respective legends of Abram or Abraham, Sarai or Sarah, who was "fair to look upon," and those of Brahma and Sarasvati, or Sri, Lakshmi-Venus, with the relations of all these to the Moon and Water; -- and especially one who understands the real Kabalistic meaning of the name Jehovah and its relation to, and connection with, the moon -- who can doubt that the story of Abram is based upon that of Brahma, or that Genesis was written upon the old lines used by every ancient nation? All in the ancient Scriptures is allegorical -- all based upon and inseparably connected with Astronomy and Cosmolatry.

13. THEY (the Moon-gods) WENT, EACH ON HIS ALLOTTED LAND: SEVEN OF THEM, EACH ON HIS LOT. THE LORDS OF THE FLAME REMAINED BEHIND. THEY WOULD NOT GO, THEY WOULD NOT CREATE (a).

(a) The Secret teachings show the divine Progenitors creating men on seven portions of the globe "each on his lot" -- i.e., each a different race of men externally and internally, and on different zones. This polygenistic claim is considered elsewhere (vide Stanza VII.). But who are "They" who create, and the "Lords of the Flame," "who do not"? Occultism divides the "Creators" into twelve classes; of which four have reached liberation to the end of the "Great Age," the fifth is ready to reach it, but still remains active on the intellectual planes, while seven are still under direct Karmic law. These last act on the man-bearing globes of our chain.

Exoteric Hindu books mention seven classes of Pitris, and among them two distinct kinds of Progenitors or Ancestors: the Barhishad and the Agnishwatta; or those possessed of the "sacred fire" and those devoid of it. Hindu ritualism seems to connect them with sacrificial fires, and with Grihasta Brahmins in earlier incarnations: those who have, and those who have not attended as they should to their household sacred fires in their previous births. The distinction, as said, is derived from the Vedas. The first and highest class (esoterically) the Agnishwatta,

[[Footnote(s)]] -----

* "Masonic Review"; Cincinnati, June 1886, Art. "The Cabbalah."

[[Vol. 2, Page]] 78 THE SECRET DOCTRINE.

are represented in the exoteric allegory as Grihasta (Brahman-householders) who, in their past births in other Manvantaras having failed to maintain their domestic fires and to offer burnt sacrifices, have lost every right to have oblations with fire presented to them. Whereas the Barhishad, being Brahmins who have kept up their household sacred fires, are thus honoured to this day. Thence the Agnishwatta are represented as devoid of, and the Barhishad as possessed of, fires.

But esoteric philosophy explains the original qualifications as being due to the difference between the natures of the two classes: the Agnishwatta Pitris are devoid of fire (i.e., of creative passion), because too divine and pure (vide supra, Sloka 11th); whereas the Barhishad, being the lunar spirits more closely connected with Earth, became the creative Elohim of form, or the Adam of dust.

The allegory says that Sanandana and other Vedhas, the Sons of Brahma, his first progeny, "were without desire or passion, inspired with the holy wisdom, estranged from the Universe and undesirous of progeny" (Vishnu Purana, Book I. vii.). This also is what is meant in Sloka 11 by the words: "They would not create," and is explained as follows:-- "The primordial Emanations from the creative Power are too near the absolute Cause. They are transitional and latent forces,

which will develop only in the next and subsequent removes." This makes it plain. Hence Brahma is said to have felt wrathful when he saw that those "embodied spirits, produced from his limbs (gatra), would not multiply themselves." After which, in the allegory, he creates other seven mind-born Sons (see "Moksha-Darma" and "Mahabharata"), namely, Marichi, Atri, Angiras, Pulastya, Pulaha, Kratu and Vasishtha, the latter being often replaced by Daksha, the most prolific of the creators. In most of the texts these Seven Sons of Vasishtha-Daksha are called the seven Rishis of the Third Manvantara; the latter referring both to the Third Round and also to the third Root-Race and its branch-Races in the Fourth Round. These are all the creators of the various beings on this Earth, the Prajapati, and at the same time they appear as divers reincarnations in the early Manvantaras or races.

It thus becomes clear why the Agnishwatta, devoid of the grosser creative fire, hence unable to create physical man, having no double, or astral body, to project, since they were without any form, are shown in exoteric allegories as Yogis, Kumaras (chaste youths), who became "rebels," Asuras, fighting and opposing gods,* etc., etc. Yet it is they

[[Footnote(s)]] -----

* Because, as the allegory shows, the Gods who had no personal merit of their own, dreading the sanctity of those self-striving incarnated Beings who had become ascetics and Yogis, and thus threatened to upset the power of the former by their self-acquired powers -- renounced them. All this has a deep philosophical meaning and refers to the evolution and acquirement of divine powers through self-exertion. Some Rishi- [[Footnote continued on next page]]

[[Vol. 2, Page]] 79 THE LIVING SPIRITUAL FIRE.

alone who could complete man, i.e., make of him a self-conscious, almost a divine being -- god on Earth. The Barhishad, though possessed of creative fire, were devoid of the higher MAHAT-mic element. Being on a level with the lower principles -- those which precede gross objective matter -- they could only give birth to the outer man, or rather to the model of the physical, the astral man. Thus, though we see them intrusted with the task by Brahma (the collective Mahat or Universal Divine Mind), the "Mystery of Creation" is repeated on Earth, only in an inverted sense, as in a mirror. It is those who are unable to create the spiritual immortal man, who project the senseless model (the Astral) of the physical Being; and, as will be seen, it was those who would not multiply, who sacrificed themselves to the good and salvation of Spiritual Humanity. For, to complete the septenary man, to add to his three lower principles and cement them with the spiritual Monad -- which could never dwell in such a form otherwise than in an absolutely latent state -- two connecting principles are needed: Manas and Kama. This requires a living Spiritual Fire of the middle principle from the fifth and third states of Pleroma. But this fire is the possession of the Triangles, not of the (perfect) Cubes, which symbolize the Angelic Beings:* the former having from the first creation got hold of it and being said to have appropriated it for themselves, as in the allegory of Prometheus. These are the active, and therefore -- in Heaven -- no longer "pure" Beings. They have become the independent and free Intelligences, shown in every Theogony as fighting for that independence and freedom, and hence -- in the ordinary sense -- "rebellious to the divine passive law." These are then those "Flames" (the Agnishwatta) who, as shown in Sloka 13, "remain behind" instead of going along with the others to create men on Earth. But the true esoteric meaning is that most of them were destined to incarnate as the Egos of the forthcoming crop of Mankind. The human Ego is neither Atman nor Buddhi, but the higher Manas: the intellectual fruition and the efflorescence of the intellectual self-conscious Egotism -- in the higher spiritual sense. The ancient works refer to it as Karana Sarira on the plane of Sutratma, which is the golden thread on which, like beads, the various personalities of this higher Ego are strung. If the reader were told, as in the semi-esoteric allegories, that these Beings were returning Nirvanees, from preceding Maha-Manvantaras -- ages of incalculable dura-

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Yogis are shown in the Puranas to be far more powerful than the gods. Secondary gods or temporary powers in Nature (the Forces) are doomed to disappear; it is only the spiritual potentiality in man which can lead him to become one with the INFINITE and the ABSOLUTE.

* See Book I., Stanzas III. to V. The triangle becomes a Pentagon (five-fold) on Earth.

[[Vol. 2, Page]] 80 THE SECRET DOCTRINE.

tion which have rolled away in the Eternity, a still more incalculable time ago -- he would hardly understand the text correctly; while some Vedantins might say: "This is not so; the Nirvanee can never return"; which is true during the Manvantara he belongs to, and erroneous where Eternity is concerned. For it is said in the Sacred Slokas:

"The thread of radiance which is imperishable and dissolves only in Nirvana, re-emerges from it in its integrity on the day when the Great Law calls all things back into action. . . ."

Hence, as the higher "Pitris or Dhyanis" had no hand in his physical creation, we find primeval man, issued from the bodies of his spiritually fireless progenitors, described as aeriform, devoid of compactness, and MINDLESS. He had no middle principle to serve him as a medium between the highest and the lowest, the spiritual man and the physical brain, for he lacked Manas. The Monads which incarnated in those empty SHELLS, remained as unconscious as when separated from their previous incomplete forms and vehicles. There is no potentiality for creation, or self-Consciousness, in a pure Spirit on this our plane, unless its too homogeneous, perfect, because divine, nature is, so to say, mixed with, and strengthened by, an essence already differentiated. It is only the lower line of the Triangle -- representing the first triad that emanates from the Universal MONAD -- that can furnish this needed consciousness on the plane of differentiated Nature. But how could these pure Emanations, which, on this principle, must have originally been themselves unconscious (in our sense), be of any use in supplying the required principle, as they could hardly have possessed it themselves? The answer is difficult to comprehend, unless one is well acquainted with the philosophical metaphysics of a beginningless and endless series of Cosmic Re-births; and becomes well impressed and familiarised with that immutable law of Nature which is ETERNAL MOTION, cyclic and spiral, therefore progressive even in its seeming retrogression. The one divine Principle, the nameless THAT of the Vedas, is the universal Total, which, neither

in its spiritual aspects and emanations, nor in its physical atoms, can ever be at "absolute rest" except during the "Nights" of Brahma. Hence, also, the "first-born" are those who are first set in motion at the beginning of a Manvantara, and thus the first to fall into the lower spheres of materiality. They who are called in Theology "the Thrones," and are the "Seat of God," must be the first incarnated men on Earth; and it becomes comprehensible, if we think of the endless series of past Manvantaras, to find that the last had to come first, and the first last. We find, in short, that the higher Angels had broken, countless aeons before, through the "Seven Circles," and thus robbed them of the Sacred fire;

[[Vol. 2, Page]] 81 MAN, A GOD IN ANIMAL FORM.

which means in plain words, that they had assimilated during their past incarnations, in lower as well as in higher worlds, all the wisdom therefrom -- the reflection of MAHAT in its various degrees of intensity. No Entity, whether angelic or human, can reach the state of Nirvana, or of absolute purity, except through aeons of suffering and the knowledge of EVIL as well as of good, as otherwise the latter remains incomprehensible.

Between man and the animal -- whose Monads (or Jivas) are fundamentally identical -- there is the impassable abyss of Mentality and Self-consciousness. What is human mind in its higher aspect, whence comes it, if it is not a portion of the essence -- and, in some rare cases of incarnation, the very essence -- of a higher Being: one from a higher and divine plane? Can man -- a god in the animal form -- be the product of Material Nature by evolution alone, even as is the animal, which differs from man in external shape, but by no means in the materials of its physical fabric, and is informed by the same, though undeveloped, Monad -- seeing that the intellectual potentialities of the two differ as the Sun does from the Glow-worm? And what is it that creates such difference, unless man is an animal plus a living god within his physical shell? Let us pause and ask ourselves seriously the question, regardless of the vagaries and sophisms of both the materialistic and the psychological modern sciences.

To some extent, it is admitted that even the esoteric teaching is allegorical. To make the latter comprehensible to the average intelligence, requires the use of symbols cast in an intelligible form. Hence the allegorical and semi-mythical narratives in the exoteric, and the (only) semi-metaphysical and objective representations in the esoteric teachings. For the purely and transcendently spiritual conceptions are adapted only to the perceptions of those who "see without eyes, hear without ears, and sense without organs," according to the graphic expression of the Commentary. The too puritan idealist is at liberty to spiritualise the tenet, whereas the modern psychologist would simply try to spirit away our "fallen," yet still divine, human Soul in its connection with Buddhi.

The mystery attached to the highly spiritual ancestors of the divine man within the earthly man is very great. His dual creation is hinted at in the Puranas, though its esoteric meaning can be approached only by collating together the many varying accounts, and reading them in their symbolical and allegorical character. So it is in the Bible, both in Genesis and even in the Epistles of Paul. For that creator, who is called in the second chapter of Genesis the "Lord God," is in the original the Elohim, or Gods (the Lords), in the plural; and while one of them makes the earthly Adam of dust, the other breathes into him the breath of life, and the third makes of him a living soul (ii. 7), all of which readings

[[Vol. 2, Page]] 82 THE SECRET DOCTRINE.

are implied in the plural number of the Elohim.* "The first man is of the Earth, the second (the last, or rather highest) is from heaven," says Paul in I. Corinthians xv. 47.

In the Aryan allegory the rebellious Sons of Brahma are all represented as holy ascetics and Yogis. Re-born in every Kalpa, they generally try to impede the work of human procreation. When Daksha, the chief of the Prajapati (creators), brings forth 10,000 sons for the purpose of peopling the world, Narada -- a son of Brahma, the great Rishi, and virtually a "Kumara," if not so in name -- interferes with, and twice frustrates Daksha's aim, by persuading those Sons to remain holy ascetics and eschew marriage. For this, Daksha curses Narada to be re-born as a man, as Brahma had cursed him before for refusing to marry, and obtain progeny, saying:-- "Perish in thy present (Deva or angelic) form and take up thy abode in the womb," i.e., become a man (Vayu Purana; Harivamsa, 170). Notwithstanding several conflicting versions of the same story, it is easy to see that Narada belongs to that class of Brahma's, "first-born," who have all proven rebellious to the law of animal procreation, for which they had to incarnate as men. Of all the Vedic Rishis, Narada, as already shown, is the most incomprehensible, because the most closely connected with the occult doctrines -- especially with the secret cycles and Kalpas (vide supra).

Certain contradictory statements about this Sage have much distracted the Orientalists. Thus he is shown as refusing positively to create (have progeny), and even as calling his father Brahma "a false teacher" for advising him to get married ("Narada-Pancha-Ratra"); nevertheless, he is referred to as one of the Prajapati, "progenitors"! In Naradiya Purana, he describes the laws and the duties of the celibate adepts; and as these occult duties do not happen to be found in the fragment of about 3,000 Stanzas in the possession of European museums, the Brahmins are proclaimed liars; the Orientalists forgetting that the Naradiya is credited with containing 25,000 Stanzas, and that it is not very likely that such MSS. should be found in the hands of the Hindu profane, those who are ready to sell any precious olla for a red pottage. Suffice it to say, that Narada is

[[Footnote(s)]] -----

* Seth, as Bunsen and others have shown, is not only the primitive god of the Semites -- early Jews included -- but also their "semi-divine ancestor." For, says Bunsen ("God in History," vol. i, pp. 233, 234), "the Seth of Genesis, the father of Enoch (the man) must be considered as originally running parallel with that derived from the Elohim, Adam's father." "According to Bunsen, the Deity (the god Seth) was the primitive god of Northern Egypt and Palestine" (Staniland Wake, "The Great Pyramid"). And Seth became considered in the later Theology of the Egyptians as "AN EVIL DAEMON," says the same Bunsen, for he is one with Typhon and one with the Hindu demons as a logical sequel.

[[Vol. 2, Page]] 83 "FIRES," "SPARKS," AND "FLAMES."

the Deva-Rishi of Occultism par excellence; and that the Occultist who does not ponder, analyse, and study Narada from his seven esoteric facets, will never be able to fathom certain anthropological, chronological, and even Cosmic Mysteries. He is one of the Fires above-mentioned, and plays a part in the evolution of this Kalpa from its incipient, down to its final stage. He is an actor who appears in each of the successive acts (Root-Races) of the present Manvantaric drama, in the world allegories which strike the key-note of esotericism, and are now becoming more familiar to the reader. But shall we turn to other ancient Scriptures and documents for the corroboration of the "Fires," "Sparks," and "Flames?" They are plentiful, if one only seeks for them in the right places. In the "Book of the Concealed Mystery," they are clearly enunciated, as also in the "Ha Idra Zuta Qadisha," or the lesser holy Assembly. The language is very mystical and veiled, yet still comprehensible. Therein, among the sparks of Prior Worlds, "vibrating Flames and Sparks," from the divine flint, the workmen proceed to create man, "male and female" (427); which "Flames and Sparks" (Angels and their Worlds, Stars and Planets) are said, figuratively, to "become extinct and die," that is to say, remain unmanifested until a certain process of nature is accomplished. To show how thickly veiled from public view are the most important facts of anthropogenesis, two passages are now quoted from two Kabalistic books. The first is from the Book of the Concealed Mystery:--

(429.) From a Light-Bearer (one of the seven sacred planets) of insupportable brightness proceeded a radiating Flame, dashing off, like a vast and mighty hammer, those sparks which were the prior worlds.

(430.) And with most subtle ether were these intermingled and bound mutually together, but only when they were conjoined together, even the great Father and great Mother.

(431.) From Hoa, himself, is AB, the Father; and from Hoa, himself, is RUACH, the Spirit; who are hidden in the Ancient of Days, and therein is that Ether concealed.

(432.) And it was connected with a Light-Bearer (a planet and its angel or regent), which went forth from that Light-Bearer of insupportable brightness, which is hidden in the bosom of Aima, the Great Mother.*

Now the following extract from the Zohar** also deals with the same mystery:-- "The Pre-Adamite Kings. 'We have learned in the Siphrah D'Tzniuotha: That the At-tee'kah DAt-tee'keen, Ancient of Ancients, before He prepared his Form, built Kings, and engraved

[[Footnote(s)]] -----

* See Mr. Mather's "Kabbalah Unveiled."

** Translated in I. Myer's Qabbalah.

[[Vol. 2, Page]] 84 THE SECRET DOCTRINE.

Kings, and sketched out Kings (men, the Kings of the animals), and they could not exist: till he overthrew them and hid them until after a time, therefore it is written: 'And these are the Kings which reigned in the land of Edom' And they could not exist till Resha'Hiv'rah, the White Head, the At'-tee'-kah D'At-tee'keen, Ancient of Ancients, arranged Himself . . . and formed all forms above and below. . . . Before He arranged himself in his Form had not been formed all those whom he desired to form, and all worlds have been destroyed . . . they did not remain in their places, because the form of the Kings had not been formed as it ought to be, and the Holy City had not been prepared." (Zohar iii., 135a; 292a Idra Zootah. Brody, etc.)

Now the plain meaning of these two allegorical and metaphysical disquisitions is simply this: Worlds and men were in turn formed and destroyed, under the law of evolution and from pre-existing material, until both the planets and their men, in our case our Earth and its animal and human races, became what they are now in the present cycle: opposite polar forces, an equilibrated compound of Spirit and Matter, of the positive and the negative, of the male and the female. Before man could become male and female physically, his prototype, the creating Elohim, had to arrange his Form on this sexual plane astrally. That is to say, the atoms and the organic forces, descending into the plane of the given differentiation, had to be marshalled in the order intended by Nature, so as to be ever carrying out, in an immaculate way, that law which the Kabala calls the Balance, through which everything that exists does so as male and female in its final perfection, in this present stage of materiality. Chochmah, Wisdom, the Male Sephiroth, had to diffuse itself in, and through, Binah, intelligent Nature, or Understanding. Therefore the First Root-race of men, sexless and mindless, had to be overthrown and "hidden until after a time"; i.e., the first race, instead of dying, disappeared in the second race, as certain lower lives and plants do in their progeny. It was a wholesale transformation. The First became the Second Root-race, without either begetting it, procreating it, or dying. "They passed by together," as it is written: "And he died and another reigned in his stead" (Genesis xxvi. 31 et seq. Zohar iii., 292a). Why? Because "the Holy City had not been prepared." And what is the "Holy City"? The Maquom (the Secret Place or the Shrine) on Earth: in other words, the human womb, the microcosmic copy and reflection of the Heavenly Matrix, the female space or primeval Chaos, in which the male Spirit fecundates the germ of the Son, or the visible Universe.* So much so, that in the paragraph on "the Emanation of the Male and Female Principles" in the Zohar

[[Footnote(s)]] -----

* Vide "The Holy of Holies: its esoteric meaning," in Part IO of this Volume.

[[Vol. 2, Page]] 85 THE SON OF YAH.

(ibid.), it is said that, on this earth, the WISDOM from the "Holy Ancient" "does not shine except in male and female." "Hohmah, Wisdom, is the Father, and BINAH, understanding, is the Mother and when they connect one with the other they bring forth and diffuse and emanate truth. In the sayings of Rabbi Je-yeva Sabah, i.e., the Old, we learned this:

What is Binah Understanding? But when they connect in one another, the [[diagram]] (Yod) in the [[diagram]] (Heh), they become impregnated and produce a Son. And, therefore, it is called Binah, Understanding. It means BeN YaH, i.e., Son of YaH. This is the completeness of the whole."*

This is also the "completeness" of phallicism by the Rabbis, its perfect apotheosis, the divine being dragged into the animal, the sublime into the grossness of the terrestrial. Nothing so graphically gross exists in Eastern Occultism, nor in the primitive Kabala -- the "Chaldean Book of Numbers." We have said so in "Isis Unveiled":--

"We find it rather unwise on the part of Catholic writers to pour out their vials of wrath in such sentences as these: 'In a multitude of pagodas, the phallic stone, ever and always assuming, like the Grecian batylos, the brutally indecent form of the lingham . . . the Maha Deva.' Before casting slurs on a symbol whose profound metaphysical meaning is too much for the modern champions of that religion of sensualism par excellence, Roman Catholicism, to grasp, they are in duty bound to destroy their oldest churches, and change the form of the cupolas of their own temples. The Mahody of Elephanta, the Round Tower of Bhargulpore, the minarets of Islam -- either rounded or pointed -- are the originals of the Campanile column of San Marco, at Venice, of the Rochester Cathedral, and of the modern Duomo of Milan. All of these steeples, turrets, domes, and Christian temples, are the reproductions of the primitive idea of the lithos, the upright phallus." (Vol. II., p. 5.)

Nevertheless, and however it may be, the fact that all these Hebrew Elohim, Sparks, and Cherubs are identical with the Devas, Rishis and the Fires and Flames, the Rudras and the forty-nine Agnis of the ancient Aryas, is sufficiently proven by and in the Kabala.

[[Footnote(s)]] -----

* Zohar iii., 290a, quoted in Isaac Myer's Qabalah, p. 387.

[[Vol. 2, Page]] 86 THE SECRET DOCTRINE.

STANZA IV. CREATION OF THE FIRST RACES.

§§ (14) Creation of men. (15) They are empty shadows. (16) The Creators are perplexed how to create a THINKING man. (17) What is needed for the formation of a perfect Man.

14. THE SEVEN HOSTS, THE "WILL (or Mind)-BORN" LORDS, PROPELLED BY THE SPIRIT OF LIFE-GIVING (Fohat), SEPARATE MEN FROM THEMSELVES, EACH ON HIS OWN ZONE (a).

(a) They threw off their "shadows" or astral bodies -- if such an ethereal being as a "lunar Spirit" may be supposed to rejoice in an astral, besides a hardly tangible body. In another Commentary it is said that the "Ancestors" breathed out the first man, as Brahma is explained to have breathed out the Suras (Gods), when they became "Asuras" (from Asu, breath). In a third it is said that they, the newly-created men, "were the shadows of the Shadows."

With regard to this sentence -- "They were the shadows of the Shadows" -- a few more words may be said and a fuller explanation attempted. This first process of the evolution of mankind is far easier to accept than the one which follows it, though one and all will be rejected and doubted even by some Kabalists, especially the Western, who study the present effects, but have neglected to study their primary causes. Nor does the writer feel competent to explain a mode of procreation so difficult of appreciation save for an Eastern Occultist. Therefore it is useless to enter here into details concerning the process, though it is minutely described in the Secret Books, as it would only lead to speaking of facts hitherto unknown to the profane world, and hence to their being misunderstood. An "Adam" made of the dust of the ground will always be found preferable, by a certain class of students, to one projected out of the ethereal body of his creator; though the former process has never been heard of, while the latter is familiar, as all know, to many Spiritualists in Europe and America, who, of all men, ought to understand it. For who of those who have witnessed the phenomenon of a materialising form oozing out of the pores of a medium or, at other times, out of his left side, can fail to credit the possibility, at least, of such a birth? If there are

[[Vol. 2, Page]] 87 MAN NOT CREATED PERFECT.

in the Universe such beings as Angels or Spirits, whose incorporeal essence may constitute an intelligent entity notwithstanding the absence of any (to us) solid organism; and if there are those who believe that a god made the first man out of dust, and breathed into him a living Soul -- and there are millions upon millions who believe both -- what does this doctrine of ours contain that is so impossible? Very soon the day will dawn, when the world will have to choose whether it will accept the miraculous creation of man (and Kosmos too) out of nothing, according to the dead letter of Genesis, or a first man born from a fantastic link -- absolutely "missing" so far -- the common ancestor of man, and of the "true ape."* Between these two fallacies,** Occult philosophy steps in. It teaches that the first human stock was projected by higher and semi-divine Beings out of their own essences. If the latter process is to be considered as abnormal or even inconceivable -- because obsolete in Nature at this point of evolution -- it is yet proven possible on the authority of certain "Spiritualistic" FACTS. Which, then, we ask of the three hypotheses or theories is the most reasonable and the least absurd? Certainly no one -- provided he is not a soul-blind materialist -- can ever object to the occult teaching.

Now, as shown, we gather from the latter that man was not "created" the complete being he is now, however imperfect he still remains. There was a spiritual, a psychic, an intellectual, and an animal evolution, from the highest to the lowest, as well as a physical development -- from the simple and homogeneous, up to the more complex and heterogeneous; though not quite on the lines traced for us by the modern evolutionists. This double evolution in two contrary directions,

required various ages, of divers natures and degrees of spirituality and intellectuality, to fabricate the being now known as man. Furthermore, the one absolute, ever acting and never erring law, which proceeds on the

[[Footnote(s)]] -----

* ". . . Huxley, supported by the most evident discoveries in Comparative Anatomy, could utter the momentous sentence that the anatomical differences between man and the highest apes are less than those between the latter and the lowest apes. In relation to our genealogical tree of man, the necessary conclusion follows that the human race has evolved gradually from the true apes." ("The Pedigree of Man," by Ernest Haeckel, translated by Ed. B. Aveling, p. 49).

What may be the scientific and logical objections to the opposite conclusion -- we would ask? The anatomical resemblances between Man and the Anthropoids -- grossly exaggerated as they are by Darwinists, as M. de Quatrefages shows -- are simply enough "accounted for" when the origin of the latter is taken into consideration.

"Nowhere, in the older deposits, is an ape to be found that approximates more closely to man, or a man that approximates more closely to an ape"

** ". . . . The same gulf which is found to-day between Man and Ape, goes back with undiminished breadth and depth to the Tertiary period. This fact alone is enough to make its untenability clear," (Dr. F. Pfaff, Prof. of Natural Science in the University of Erlangen).

[[Vol. 2, Page]] 88 THE SECRET DOCTRINE.

same lines from one eternity (or Manvantara) to the other -- ever furnishing an ascending scale for the manifested, or that which we call the great Illusion (Maha-Maya), but plunging Spirit deeper and deeper into materiality on the one hand, and then redeeming it through flesh and liberating it -- this law, we say, uses for these purposes the Beings from other and higher planes, men, or Minds (Manus), in accordance with their Karmic exigencies.

At this juncture, the reader is again asked to turn to the Indian philosophy and religion. The Esotericism of both is at one with our Secret Doctrine, however much the form may differ and vary.

ON THE IDENTITY AND DIFFERENCES OF THE INCARNATING POWERS.

THE Progenitors of Man, called in India "Fathers," Pitara or Pitris, are the creators of our bodies and lower principles. They are ourselves, as the first personalities, and we are they. Primeval man would be "the bone of their bone and the flesh of their flesh," if they had body and flesh. As stated, they were "lunar Beings."

The Endowers of man with his conscious, immortal EGO, are the "Solar Angels" -- whether so regarded metaphorically or literally. The mysteries of the Conscious EGO or human Soul are great. The esoteric name of these "Solar Angels" is, literally, the "Lords" (Nath) of "persevering ceaseless devotion" (pranidhana). Therefore they of the fifth principle (Manas) seem to be connected with, or to have originated the system of the Yogis who make of pranidhana their fifth observance (see Yoga Shastra, II., 32.) It has already been explained why the trans-Himalayan Occultists regard them as evidently identical with those who in India are termed Kumaras, Agnishwattas, and the Barhishads.

How precise and true is Plato's expression, how profound and philosophical his remark on the (human) soul or EGO, when he defined it as "a compound of the same and the other." And yet how little this hint has been understood, since the world took it to mean that the soul was the breath of God, of Jehovah. It is "the same and the other," as the great Initiate-Philosopher said; for the EGO (the "Higher Self" when merged with and in the Divine Monad) is Man, and yet the same as the "OTHER," the Angel in him incarnated, as the same with the universal MAHAT. The great classics and philosophers felt this truth, when saying that "there must be something within us which produces our thoughts. Something very subtle; it is a breath; it is fire; it is ether;

[[Vol. 2, Page]] 89 PITRIS OF THE GODS AND DEMONS.

it is quintessence; it is a slender likeness; it is an intellection; it is a number; it is harmony." (Voltaire).

All these are the Manasam and Rajasas: the Kumaras, Asuras, and other rulers and Pitris, who incarnated in the Third Race, and in this and various other ways endowed mankind with Mind.

There are seven classes of Pitris, as shown below, three incorporeal and four corporeal; and two kinds, the Agnishwatta and the Barhishad. And we may add that, as there are two kinds of Pitris, so there is a double and a triple set of Barhishad and Agnishwatta. The former, having given birth to their astral doubles, are reborn as Sons of Atri, and are the "Pitris of the Demons," or corporeal beings, on the authority of Manu (III., 196); while the Agnishwatta are reborn as Sons of Marichi (a son of Brahma), and are the Pitris of the Gods (Manu again, Matsya and Padma Puranas and Kulluka in the Laws of the Manavas, III., 195).* Moreover, the Vayu Purana declares all the seven orders to have originally been the first gods, the Vairajas, whom Brahma "with the eye of Yoga, beheld in the eternal spheres, and who are the gods of gods"; and the Matsya adds that the Gods worshipped them; while the Harivansa (S. 1, 935) distinguishes the Virajas as one class of the Pitris only -- a statement corroborated in the Secret Teachings, which, however, identify the Virajas with the elder Agnishwattas** and the Rajasas, or Abhutarajasas, who are incorporeal without even an astral phantom. Vishnu is said, in most of the MSS., to have incarnated in and through them. "In the Raivata Manvantara, again, Hari, best of gods, was born of Sambhuti, as the divine Manasas -- originating with the deities called Rajasas." Sambhuti was a daughter of Daksha, and wife of Marichi, the father of the Agnishwatta, who, along with the Rajasas, are ever associated with Manasas. As remarked by a far more able Sanskritist than Wilson, Mr. Fitzedward Hall, "Manasa is no inappropriate name for a deity associated with the Rajasas. We appear to have in it Manasam -- the same as Manas -- with the change

of termination required to express male personification" (Vishnu Purana Bk. III., ch. I., p. 17 footnote). All the sons of Viraja are Manasa, says Nilakantha. And

[[Footnote(s)]] -----

* We are quite aware that the Yayu and Matsya Puranas identify (agreeably to Western interpretation) the Agnishwatta with the seasons, and the Barhishad Pitris with the months; adding a fourth class -- the Kavyas -- cyclic years. But do not Christian, Roman Catholics identify their Angels with planets, and are not the seven Rishis become the Saptarshi -- a constellation? They are deities presiding over all the cyclic divisions.

** The Vayu Purana shows the region called Viraja-loka inhabited by the Agnishwattas.

[[Vol. 2, Page]] 90 THE SECRET DOCTRINE.

Viraja is Brahma, and, therefore, the incorporeal Pitris are called Vairajas from being the sons of Viraja, says Vayu Purana.

We could multiply our proofs ad infinitum, but it is useless. The wise will understand our meaning, the unwise are not required to. There are thirty-three crores, or 330 millions, of gods in India. But, as remarked by the learned lecturer on the Bhagavad Gita, "they may be all devas, but are by no means all 'gods', in the high spiritual sense one attributes to the term." "This is an unfortunate blunder," he remarks, "generally committed by Europeans. Deva is a kind of spiritual being, and because the same word is used in ordinary parlance to mean god, it by no means follows that we have to worship thirty-three crores of gods." And he adds suggestively: "These beings, as may be naturally inferred have a certain affinity with one of the three component Upadhis (basic principles) into which we have divided man." -- (Vide Theosophist, Feb., 1887, et seq.)

The names of the deities of a certain mystic class change with every Manvantara. Thus the twelve great gods, Jayas, created by Brahma to assist him in the work of creation in the very beginning of the Kalpa, and who, lost in Samadhi, neglected to create -- whereupon they were cursed to be repeatedly born in each Manvantara till the seventh -- are respectively called Ajitas, Tushitas, Satyas, Haris, Vaikunthas, Sadhyas, and Adityas: they are Tushitas (in the second Kalpa), and Adityas in this Vaivasvata period (see Vayu Purana), besides other names for each age. But they are identical with the Manasa or Rajasas, and these with our incarnating Dhyana Chohans. They are all classes of the Gnana-devas.

Yes; besides those beings, who, like the Yakshas, Gandharvas, Kinaras, etc., etc., taken in their individualities, inhabit the astral plane, there are real Devagnanams, and to these classes of Devas belong the Adityas, the Vairajas, the Kumaras, the Asuras, and all those high celestial beings whom Occult teaching calls Manaswin, the Wise, foremost of all, and who would have made all men the self-conscious spiritually intellectual beings they will be, had they not been "cursed" to fall into generation, and to be reborn themselves as mortals for their neglect of duty.

STANZA IV. -- (Continued.)

15. SEVEN TIMES SEVEN SHADOWS (chhayas) OF FUTURE MEN (or Amanasas) (a) WERE (thus) BORN, EACH OF HIS OWN COLOUR (complexion) AND KIND (b). EACH (also) INFERIOR TO HIS FATHER (creator). THE FATHERS, THE BONELESS, COULD GIVE NO LIFE TO BEINGS WITH

[[Vol. 2, Page]] 91 SEVEN CLASSES OF PITRIS.

BONES. THEIR PROGENY WERE BHUTA (phantoms) WITH NEITHER FORM NOR MIND, THEREFORE THEY WERE CALLED THE CHHAYA (image or shadow) RACE (c).

(a) Manu, as already remarked, comes from the root "man" to think, hence "a thinker." It is from this Sanskrit word very likely that sprung the Latin "mens," mind, the Egyptian "Menes," the "Master-Mind," the Pythagorean Monas, or conscious "thinking unit," mind also, and even our "Manas" or mind, the fifth principle in man. Hence these shadows are called amanasa, "mindless."

With the Brahmins the Pitris are very sacred, because they are the Progenitors,* or ancestors of men -- the first Manushya on this Earth -- and offerings are made to them by the Brahmin when a son is born unto him. They are more honoured and their ritual is more important than the worship of the gods (See the "Laws of Manu," Bk. III., p. 203).

May we not now search for a philosophical meaning in this dual group of progenitors?

The Pitris being divided into seven classes, we have here the mystic number again. Nearly all the Puranas agree that three of these are arupa, formless, while four are corporeal; the former being intellectual and spiritual, the latter material and devoid of intellect. Esoterically, it is the Asuras who form the first three classes of Pitris -- "born in the body of night" -- whereas the other four were produced from the body of twilight. Their fathers, the gods, were doomed to be born fools on Earth, according to Vayu Purana. The legends are purposely mixed up and made very hazy: the Pitris being in one the sons of the gods, and, in another those of Brahma; while a third makes them instructors of their own fathers. It is the Hosts of the four material classes who create men simultaneously on the seven zones.

Now, with regard to the seven classes of Pitris, each of which is again divided into seven, a word to students and a query to the profane. That class of the "Fire Dhyanis," which we identify on undeniable grounds with the Agnishwattas, is called in our school the "Heart" of the Dhyana-Chohan Body; and it is said to have incarnated in the third race of men and made

them perfect. The esoteric Mystagogy speaks of the mysterious relation existing between the hebdomadic essence or substance of this angelic Heart and that of man, whose

[[Footnote(s)]] -----

* This was hinted at in *Isis Unveiled*, Vol. I., p. xxxviii., though the full explanation could not then be given: "The Pitris are not the ancestors of the present living men, but those of the first human kind or Adamic race; the spirits of human races, which, on the great scale of descending evolution, preceded our races of men, and were physically as well as spiritually, far superior to our modern pigmies. In *Manava-Dharma-Sastra* they are called the Lunar ancestors."

[[Vol. 2, Page]] 92 THE SECRET DOCTRINE.

every physical organ, and psychic, and spiritual function, is a reflection, so to say, a copy on the terrestrial plane of the model or prototype above. Why, it is asked, should there be such a strange repetition of the number seven in the anatomical structure of man? Why should the heart have four lower "cavities and three higher divisions," answering so strangely to the septenary division of the human principles, separated into two groups, the higher and the lower; and why should the same division be found in the various classes of Pitris, and especially our Fire Dhyanis? For, as already stated, these Beings fall into four corporeal (or grosser) and three incorporeal (or subtler) "principles," or call them by any other name you please. Why do the seven nervous plexuses of the body radiate seven rays? Why are there these seven plexuses, and why seven distinct layers in the human skin?

"Having projected their shadows and made men of one element (ether), the progenitors re-ascend to Maha-loka, whence they descend periodically, when the world is renewed, to give birth to new men.

"The subtle bodies remain without understanding (Manas) until the advent of the Suras (Gods) now called Asuras (not Gods)," says the Commentary.

"Not-gods," for the Brahmins, perhaps, but the highest Breaths, for the Occultist; since those progenitors (Pitar), the formless and the intellectual, refuse to build man, but endow him with mind; the four corporeal classes creating only his body.

This is very plainly shown in various texts of the Rig Veda -- the highest authority for a Hindu of any sect whatever. Therein Asura means "spiritual divine," and the word is used as a synonym for Supreme Spirit, while in the sense of a "God," the term "Asura" is applied to Varuna and Indra and pre-eminently to Agni -- the three having been in days of old the three highest gods, before Brahmanical Theo-Mythology distorted the true meaning of almost everything in the Archaic Scriptures. But, as the key is now lost, the Asuras are hardly mentioned.

In the *Zendavesta* the same is found. In the Mazdean, or Magian, religion, "Asura" is the lord Asura Visvavedas, the "all-knowing" or "omniscient Lord"; and Asura-Mazdha, become later Ahura-Mazdha, is, as Benfey shows, "the Lord who bestows Intelligence" -- Asura-Medha and Ahura-Mazdao. Elsewhere in this work it is shown, on equally good authority, that the Indo-Iranian Asura was always regarded as sevenfold. This fact, combined with the name Mazdha, as above, which makes of the sevenfold Asura the "Lord," or "Lords" collectively "who bestow Intelligence," connects the Amshaspendis with the Asuras and with our incarnating Dhyani Chohans, as well as with the Elohim, and the seven informing gods of Egypt, Chaldea, and every other country.

Why these "gods" refused to create men is not, as stated in exoteric

[[Vol. 2, Page]] 93 A GRAND APOCALYPTIC METAPHOR.

accounts, because their pride was too great to share the celestial power of their essence with the children of Earth, but for reasons already suggested. However, allegory has indulged in endless fancies and theology taken advantage thereof in every country to make out its case against these first-born, or the logoi, and to impress it as a truth on the minds of the ignorant and credulous. (Compare also what is said about Makara and the Kumaras in connection with the Zodiac.)

The Christian system is not the only one which has degraded them into demons. Zoroastrianism and even Brahmanism have profited thereby to obtain hold over the people's mind. Even in Chaldean exotericism, Beings who refuse to create, i.e., who are said to oppose thereby the Demiurgos, are also denounced as the Spirits of Darkness. The Suras, who win their intellectual independence, fight the Suras who are devoid thereof, who are shown as passing their lives in profitless ceremonial worship based on blind faith -- a hint now ignored by the orthodox Brahmins -- and forthwith the former become A-Suras. The first and mind-born Sons of the Deity refuse to create progeny, and are cursed by Brahma to be born as men. They are hurled down to Earth, which, later on, is transformed, in theological dogma, into the infernal regions. Ahriman destroys the Bull created by Ormazd -- which is the emblem of terrestrial illusive life, the "germ of sorrow" -- and, forgetting that the perishing finite seed must die, in order that the plant of immortality, the plant of spiritual, eternal life, should sprout and live, Ahriman is proclaimed the enemy, the opposing power, the devil. Typhon cuts Osiris into fourteen pieces, in order to prevent his peopling the world and thus creating misery; and Typhon becomes, in the exoteric, theological teaching, the Power of Darkness. But all this is the exoteric shell. It is the worshippers of the latter who attribute to disobedience and rebellion the effort and self-sacrifice of those who would help men to their original status of divinity through self-conscious efforts; and it is these worshippers of Form who have made demons of the Angels of Light.

Esoteric philosophy, however, teaches that one third* of the Dhyanis -- i.e., the three classes of the Arupa Pitris, endowed with intelligence, "which is a formless breath, composed of intellectual not elementary substances" (see *Harivamsa*, 932) -- was simply doomed by the law of Karma and evolution to be reborn (or incarnated) on Earth.** Some

[[Footnote(s)]] -----

* Whence the subsequent assertions of St. John's vision, referred to in his Apocalypse, about "the great red Dragon having seven heads and ten horns, and seven crowns upon his heads," whose "tail drew the third part of the stars of heaven and did cast them to the earth" (ch. xii.).

** The verse "did cast them to the Earth," plainly shows its origin in the grandest and oldest allegory of the Aryan mystics, who, after the destruction of the Atlantean [[Footnote continued on next page]]

[[Vol. 2, Page]] 94 THE SECRET DOCTRINE.

of these were Nirmanakayas from other Manvantaras. Hence we see them, in all the Puranas, reappearing on this globe, in the third Manvantara, as Kings, Rishis and heroes (read Third Root-Race). This tenet, being too philosophical and metaphysical to be grasped by the multitudes, was, as already stated, disfigured by the priesthood for the purpose of preserving a hold over them through superstitious fear.

The supposed "rebels," then, were simply those who, compelled by Karmic law to drink the cup of gall to its last bitter drop, had to incarnate anew, and thus make responsible thinking entities of the astral statues projected by their inferior brethren. Some are said to have refused, because they had not in them the requisite materials -- i.e., an astral body -- since they were arupa. The refusal of others had reference to their having been Adepts and Yogis of long past preceding Manvantaras; another mystery. But, later on, as Nirmanakayas, they sacrificed themselves for the good and salvation of the Monads which were waiting for their turn, and which otherwise would have had to linger for countless ages in irresponsible, animal-like, though in appearance human, forms. It may be a parable and an allegory within an allegory. Its solution is left to the intuition of the student, if he only reads that which follows with his spiritual eye.

As to their fashioners or "Ancestors" -- those Angels who, in the exoteric legends, obeyed the law -- they must be identical with the Barhishad Pitris, or the Pitar-Devata, i.e., those possessed of the physical creative fire. They could only create, or rather clothe, the human Monads with their own astral Selves, but they could not make man in their image and likeness. "Man must not be like one of us," say the creative gods, entrusted with the fabrication of the lower animal but higher; (see Gen. and Plato's Timaeus). Their creating the semblance of men out of their own divine Essence means, esoterically, that it is

[[Footnote(s)]] -----

[[Footnote continued from previous page]] giants and sorcerers, concealed the truth -- astronomical, physical, and divine, as it is a page out of pre-cosmic theogony -- under various allegories. Its esoteric, true interpretation is a veritable Theodice of the "Fallen Angels," so called; the willing and the unwilling, the creators and those who refused to create, being now mixed up most perplexingly by Christian Catholics, who forget that their highest Archangel, St. Michael, who is shown to conquer (to master and to assimilate) the DRAGON OF WISDOM and of divine Self-sacrifice (now mis-called and calumniated as Satan), WAS THE FIRST TO REFUSE TO CREATE! This led to endless confusion. So little does Christian theology understand the paradoxical language of the East and its symbolism, that it even explains, in its dead letter sense, the Chinese Buddhist and Hindu exoteric rite of raising a noise during certain eclipses to scare away the "great red Dragon," which laid a plot to carry away the light! But here "Light" means esoteric Wisdom, and we have sufficiently explained the secret meaning of the terms Dragon, Serpent, etc., etc., all of which refer to Adepts and Initiates.

[[Vol. 2, Page]] 95 WHAT PROMETHEUS SYMBOLIZED.

they who became the first Race, and thus shared its destiny and further evolution. They would not, simply because they could not, give to man that sacred spark which burns and expands into the flower of human reason and self-consciousness, for they had it not to give. This was left to that class of Devas who became symbolised in Greece under the name of Prometheus, to those who had nought to do with the physical body, yet everything with the purely spiritual man. (See Part II of this volume, "The Fallen Angels"; also "The Gods of Light proceed from the Gods of Darkness.")

Each class of Creators endows man with what it has to give: the one builds his external form; the other gives him its essence, which later on becomes the Human Higher Self owing to the personal exertion of the individual; but they could not make men as they were themselves -- perfect, because sinless; sinless, because having only the first, pale shadowy outlines of attributes, and these all perfect -- from the human standpoint -- white, pure and cold as the virgin snow. Where there is no struggle, there is no merit. Humanity, "of the Earth earthy," was not destined to be created by the angels of the first divine Breath: therefore they are said to have refused to do so, and man had to be formed by more material creators,* who, in their turn, could give only what they had in their own natures, and no more. Subservient to eternal law, the pure gods could only project out of themselves shadowy men, a little less ethereal and spiritual, less divine and perfect than themselves -- shadows still. The first humanity, therefore, was a pale copy of its progenitors; too material, even in its ethereality, to be a hierarchy of gods; too spiritual and pure to be MEN, endowed as it is with every negative (Nirguna) perfection. Perfection, to be fully such, must be born out of imperfection, the incorruptible must grow out of the corruptible, having the latter as its vehicle and basis and contrast. Absolute light is absolute darkness, and vice versa. In fact, there is neither light nor

[[Footnote(s)]] -----

* In spite of all efforts to the contrary, Christian theology -- having burdened itself with the Hebrew esoteric account of the creation of man, which is understood literally -- cannot find any reasonable excuse for its "God, the Creator," who produces a man devoid of mind and sense; nor can it justify the punishment following an act, for which Adam and Eve might plead non compos. For if the couple is admitted to be ignorant of good and evil before the eating of the forbidden fruit, how could it be expected to know that disobedience was evil? If primeval man was meant to remain a half-witted, or rather witless, being, then his creation was aimless and even cruel, if produced by an omnipotent and perfect God. But Adam and Eve are shown, even in Genesis, to be created by a class of lower divine Beings, the Elohim, who are so jealous of their personal prerogatives as reasonable and intelligent creatures, that they will not allow man to become "as

one of us." This is plain, even from the dead-letter meaning of the Bible. The Gnostics, then, were right in regarding the Jewish God as belonging to a class of lower, material and not very holy denizens of the invisible World.

[[Vol. 2, Page]] 96 THE SECRET DOCTRINE.

darkness in the realms of truth. Good and Evil are twins, the progeny of Space and Time, under the sway of Maya. Separate them, by cutting off one from the other, and they will both die. Neither exists per se, since each has to be generated and created out of the other, in order to come into being; both must be known and appreciated before becoming objects of perception, hence, in mortal mind, they must be divided.

Nevertheless, as the illusionary distinction exists, it requires a lower order of creative angels to "create" inhabited globes - especially ours -- or to deal with matter on this earthly plane. The philosophical Gnostics were the first to think so, in the historical period, and to invent various systems upon this theory. Therefore in their schemes of creation, one always finds their Creators occupying a place at the very foot of the ladder of spiritual Being. With them, those who created our earth and its mortals were placed on the very limit of mayavic matter, and their followers were taught to think -- to the great disgust of the Church Fathers -- that for the creation of those wretched races, in a spiritual and moral sense, which grace our globe, no high divinity could be made responsible, but only angels of a low hierarchy,* to which class they relegated the Jewish God, Jehovah.

Mankinds different from the present are mentioned in all the ancient Cosmogonies. Plato speaks, in the Phaedrus, of a winged race of men. Aristophanes (in Plato's Banquet), speaks of a race androgynous and with round bodies. In Pymander, all the animal kingdom even is double-sexed. Thus in § 18, it is said: "The circuit having been accomplished, the knot was loosened. . . . and all the animals, which were equally androgynous, were untied (separated) together with man. . . ." for. . . "the causes had to produce effects on earth."** Again, in the ancient Quiche Manuscript, the Popol Vuh -- published by the late Abbe Brasseur de Bourbourg -- the first men are described as a race "whose sight was unlimited, and who knew all things at once": thus showing the divine knowledge of Gods, not mortals. The Secret Doctrine, correcting the unavoidable exaggerations of popular fancy, gives the facts as they are recorded in the Archaic symbols.

[[Footnote(s)]] -----

* In Isis Unveiled several of these Gnostic systems are given. One is taken from the Codex Nazaraeus, the Scriptures of the Nazarenes, who, although they existed long before the days of Christ, and even before the laws of Moses, were Gnostics, and many of them Initiates. They held their "Mysteries of Life" in Nazara (ancient and modern Nazareth), and their doctrines are a faithful echo of the teachings of the Secret Doctrine -- some of which we are now endeavouring to explain.

** See the translation from the Greek by Francois, Monsieur de Foix, Evesque d'Ayre: the work dedicated to Marguerite de France, Reine de Navarre. Edition of 1579, Bordeaux.

[[Vol. 2, Page]] 97 THE TREES OF LIFE.

(b) These "shadows" were born "each of his own colour and kind," each also "inferior to his creator," because the latter was a complete being of his kind. The Commentaries refer the first sentence to the colour or complexion of each human race thus evolved. In Pymander, the Seven primitive men, created by Nature from the "heavenly Man," all partake of the qualities of the "Seven Governors," or Rulers, who loved Man -- their own reflection and synthesis.

In the Norse Legends, one recognizes in Asgard, the habitat of the gods, as also in the Ases themselves, the same mystical loci and personifications woven into the popular "myths," as in our Secret Doctrine; and we find them in the Vedas, the Puranas, the Mazdean Scriptures and the Kabala. The Ases of Scandinavia, the rulers of the world which preceded ours, whose name means literally the "pillars of the world," its "supports," are thus identical with the Greek Cosmocrates, the "Seven Workmen or Rectors" of Pymander, the seven Rishis and Pitris of India, the seven Chaldean gods and seven evil spirits, the seven Kabalistic Sephiroth synthesised by the upper triad, and even the seven Planetary Spirits of the Christian mystics. The Ases create the earth, the seas, the sky and the clouds, the whole visible world, from the remains of the slain giant Ymir; but they do not create MAN, but only his form from the Ask or ash-tree. It is Odin who endows him with life and soul, after Lodur had given him blood and bones, and finally it is Honir who furnishes him with his intellect (manas) and with his conscious senses. The Norse Ask, the Hesiodic Ash-tree, whence issued the men of the generation of bronze, the Third Root-Race, and the Tzite tree of the Popol-Vuh, out of which the Mexican third race of men was created, are all one.* This may be plainly seen by any reader. But the Occult reason why the Norse Yggdrasil, the Hindu Aswatha, the Gogard, the Hellenic tree of life, and the Tibetan Zampun, are one with the Kabalistic Sephirothal Tree, and even with the Holy Tree made by Ahura Mazda, and the Tree of Eden -- who among the western scholars can tell? ** Nevertheless, the fruits of all those "Trees," whether Pippala or Haoma or yet the more prosaic apple, are the "plants of life," in fact and verity. The prototypes of our races were all enclosed in the microcosmic tree, which grew and developed within and under the great mundane macrocosmic tree***; and the mystery is half revealed in the Dirghotamas, where it is said: "Pippala, the sweet fruit of that tree upon which come spirits who

[[Footnote(s)]] -----

* See Max Muller's review of the Popol-Vuh.

** Mr. James Darmesteter, the translator of the Vendidad, speaking of it, says: "The tree, whatever it is . . ." (p. 209).

*** Plato's "Timaeus."

[[Vol. 2, Page]] 98 THE SECRET DOCTRINE.

love the science, and where the gods produce all marvels." As in the Gogard, among the luxuriant branches of all those mundane trees, the "Serpent" dwells. But while the Macrocosmic tree is the Serpent of Eternity and of absolute Wisdom itself, those who dwell in the Microcosmic tree are the Serpents of the manifested Wisdom. One is the One and All; the others are its reflected parts. The "tree" is man himself, of course, and the Serpents dwelling in each, the conscious Manas, the connecting link between Spirit and Matter, heaven and earth.

Everywhere, it is the same. The creating powers produce Man, but fail in their final object. All these logoi strive to endow man with conscious immortal spirit, reflected in the Mind (manas) alone; they fail, and they are all represented as being punished for the failure, if not for the attempt. What is the nature of the punishment? A sentence of imprisonment in the lower or nether region, which is our earth; the lowest in its chain; an "eternity" -- meaning the duration of the life-cycle -- in the darkness of matter, or within animal Man. It has pleased the half ignorant and half designing Church Fathers to disfigure the graphic symbol. They took advantage of the metaphor and allegory found in every old religion to turn them to the benefit of the new one. Thus man was transformed into the darkness of a material hell; his divine consciousness, obtained from his indwelling Principle (the Manasa), or the incarnated Deva, became the glaring flames of the infernal region; and our globe that Hell itself. Pippala, Haoma, the fruit of the Tree of Knowledge, were denounced as the forbidden fruit, and the "Serpent of Wisdom," the Voice of reason and consciousness, remained identified for ages with the Fallen Angel, which is the old Dragon, the Devil! (Vide Part II., "The Evil Spirit, who, or what?")

The same for the other high symbols. The Svastica, the most sacred and mystic symbol in India, the "Jaina-Cross" as it is now called by the Masons, notwithstanding its direct connection, and even identity with the Christian Cross, has become dishonoured in the same manner. It is the "devil's sign," we are told by the Indian missionaries. "Does it not shine on the head of the great Serpent of Vishnu, on the thousand headed Sessa-Ananta, in the depths of Patala, the Hindu Naraka or Hell"? It does: but what is Ananta? As Sessa, it is the almost endless Manvantaric cycle of time, and becomes infinite Time itself, when called Ananta, the great seven-headed Serpent, on which rests Vishnu, the eternal Deity, during Pralayaic inactivity. What has Satan to do with this highly metaphysical symbol? The Svastica is the most philosophically scientific of all symbols, as also the most comprehensible. It is the summary in a few lines of the whole work of creation, or evolution, as one should rather say, from Cosmo-theology down to Anthro-

[[Vol. 2, Page]] 99 THE HAMMER OF THOR.

pogony, from the indivisible unknown Parabrahm to the humble moneron of materialistic science, whose genesis is as unknown to that science as is that of the All-Deity itself. The Svastica is found heading the religious symbols of every old nation. It is the "Worker's Hammer" in the Chaldean Book of Numbers, the "Hammer" just referred to in the "Book of Concealed Mystery" (Ch. I., §§ 1, 2, 3, 4, etc.), "which striketh sparks from the flint" (Space), those sparks becoming worlds. It is "Thor's Hammer," the magic weapon forged by the dwarfs against the Giants, or the pre-cosmic Titanic forces of Nature, which rebel and, while alive in the region of matter, will not be subdued by the Gods, the Agents of Universal Harmony, but have first to be destroyed. This is why the world is formed out of the relics of the murdered Ymir. The Svastica is the Miolnir, the "storm-hammer"; and therefore it is said that when the Ases, the holy gods, after having been purified by fire (the fire of passions and suffering in their life-incarnations), become fit to dwell in Ida in eternal peace, then Miolnir will become useless. This will be when the bonds of Hel (the goddess-queen of the region of the Dead) will bind them no longer, for the kingdom of evil will have passed away. "Surtur's flames had not destroyed them, nor yet had the raging waters" of the several deluges. . . . "Then came the sons of Thor. They brought Miolnir with them, no longer as a weapon of war, but as the hammer with which to consecrate the new heaven and the new Earth. . . . "*"

Verily many are its meanings! In the Macrocosmic work, the "HAMMER OF CREATION," with its four arms bent at right angles, refers to the continual motion and revolution of the invisible Kosmos of Forces. In that of the manifested Kosmos and our Earth, it points to the rotation in the cycles of Time of the world's axes and their equatorial belts; the two lines forming the Svastica [[diagram]] meaning Spirit and Matter, the four hooks suggesting the motion in the revolving cycles. Applied to the Microcosm, Man, it shows him to be a link between heaven and Earth: the right hand being raised at the end of a horizontal arm, the left pointing to the Earth. In the Smaragdine Tablet of Hermes, the uplifted right hand is inscribed with the word "Solve," the left with the word "Coagula." It is at one and the same time an Alchemical, Cosmogonical, Anthropological, and Magical sign, with seven keys to its inner meaning. It is not too much to say that the compound symbolism of this universal and most suggestive of signs contains the key to the seven great mysteries of Kosmos. Born in the mystical conceptions of the early Aryans, and by them placed at the very threshold of eternity, on the head of the serpent Ananta, it found

[[Footnote(s)]] -----

* See "Asgard and the Gods": "The renewal of the World."

[[Vol. 2, Page]] 100 THE SECRET DOCTRINE.

its spiritual death in the scholastic interpretations of mediaeval Anthropomorphists. It is the Alpha and the Omega of universal creative Force, evolving from pure Spirit and ending in gross Matter. It is also the key to the cycle of Science, divine and human; and he who comprehends its full meaning is for ever liberated from the toils of Mahamaya, the great Illusion and Deceiver. The light that shines from under the divine hammer, now degraded into the mallet or gavel of the Grand Masters of Masonic Lodges, is sufficient to dissipate the darkness of any human schemes or fictions.

How prophetic are the songs of the three Norse Goddesses, to whom the ravens of Odin whisper of the past and the future, as they flutter around in their abode of crystal beneath the flowing river. The songs are all written down in the "Scrolls of Wisdom," of which many are lost but some still remain: and they repeat in poetical allegory the teachings of the archaic ages. To summarise from Dr. Wagner's "Asgard and the Gods," the "renewal of the world," which is a prophecy about the seventh Race of our Round told in the past tense.

The Miolnir had done its duty in this Round, and:--

". . . on the field of Ida, the field of resurrection (for the Fifth Round), the sons of the highest gods assembled, and in them their fathers rose again (the Egos of all their past incarnations). They talked of the Past and the Present, and remembered the wisdom and prophecies of their ancestor which had all been fulfilled. Near them, but unseen of them, was the strong, the mighty One, who rules all things. . . . and ordains the eternal laws that govern the world. They all knew he was there, they felt his presence and his power, but were ignorant of his name. At his command the new Earth rose out of the Waters of Space. To the South above the Field of Ida, he made another heaven called Audlang, and further off, a third, Widblain. Over Gimil's cave, a wondrous palace was erected, covered with gold and shining bright in the sun." These are the three gradually ascending planets of our "Chain." There the Gods were enthroned, as they used to be. . . . From Gimil's heights (the seventh planet or globe, the highest and the purest), they looked down upon the happy descendants of LIF and LIFTHRASIR (the coming Adam and Eve of purified humanity), and signed to them to CLIMB up higher, to rise in knowledge and wisdom, step by step, from one "heaven to another," until they were at last fit to be united to the Gods in the house of All-Father (p. 305).

He who knows the doctrines of Esoteric Buddhism, (or Wisdom), though so imperfectly sketched hitherto, will see clearly the allegory contained in the above.

Its more philosophical meaning will be better understood if the reader thinks carefully over the myth of Prometheus. It is examined

[[Vol. 2, Page]] 101 THE DIVINE BABE, AGNI.

further on in the light of the Hindu Pramantha. Degraded into a purely physiological symbol by some Orientalists, and taken in connection with terrestrial fire only, their interpretation is an insult to every religion, including Christianity, whose greatest mystery is thus dragged down to matter. The "friction" of divine Pramantha and Arani could suggest itself under this image only to the brutal conceptions of the German materialists -- than whom there are none worse. It is true that the Divine babe, Agni with the Sanskrit-speaking Race, who became Ignis with the Latins, is born from the conjunction of Pramantha and Arani (Svastica) during the sacrificial ceremony. But what of that? Twashtri (Viswakarman) is the "divine artist and carpenter"* and is also the Father of the gods and of creative fire in the Vedas. So ancient is the symbol and so sacred, that there is hardly an excavation made on the sites of old cities without its being found. A number of such terra cotta discs, called fusaioles, were found by Dr. Schliemann under the ruins of ancient Troy. Both these forms [[diagram]] and [[diagram]] were excavated in great abundance, their presence being one more proof that the ancient Trojans and their ancestors were pure Aryans.

(c) Chhaya, as already explained, is the astral image. It bears this meaning in Sanskrit works. Thus Sanjna (Spiritual Consciousness), the wife of Surya, the Sun, is shown retiring into the jungle to lead an ascetic life, and leaving behind to her husband her Chhaya, shadow or image.

[[Footnote(s)]] -----

* The "Father of the Sacred Fire," writes Prof. Jolly, "is Twashtri . . . his mother was Maya. He himself was styled Akta (anointed, [[christos]]), after the priest had poured upon his head the spirituous (?) SOMA, and on his body butter purified by sacrifice"; ("Man before Metals," p. 190). The source of his information is not given by the French Darwinist. But the lines are quoted to show that light begins to dawn even upon the materialists. Adalbert Kuhn, in his "Die Herabkunft des Feuers," identifies the two signs [[diagram]] and [[diagram]] with Arani, and designates them under this name. He adds: "This process of kindling fire naturally led men to the idea of sexual reproduction," etc. Why could not a more dignified idea, and one more occult, have led man to invent that symbol, in so far as it is connected, in one of its aspects, with human reproduction? But its chief symbolism refers to Cosmogony.

"Agni, in the condition of Akta, or anointed, is suggestive of Christ," remarks Prof. Jolly. "Maya, Mary, his mother; Twastri, St. Joseph, the carpenter of the Bible." In the Rig Veda, Viswakarman is the highest and oldest of the Gods and their "Father." He is the "carpenter or builder," because God is called even by the monotheists, "the Architect of the Universe." Still, the original idea is purely metaphysical, and had no connection with the later Phallicism.

[[Vol. 2, Page]] 102 THE SECRET DOCTRINE.

16. HOW ARE THE (real) MANUSHYAS BORN? THE MANUS WITH MINDS, HOW ARE THEY MADE? (a) THE FATHERS (Barhishad (?)) CALL TO THEIR HELP THEIR OWN FIRE (the Kavyavahana, electric fire), WHICH IS THE FIRE WHICH BURNS IN EARTH. THE SPIRIT OF THE EARTH CALLED TO HIS HELP THE SOLAR FIRE (Suchi, the spirit in the Sun). THESE THREE (the Pitris and the two fires) PRODUCED IN THEIR JOINT EFFORTS A GOOD RUPA. IT (the form) COULD STAND, WALK, RUN, RECLINE AND FLY. YET IT WAS STILL BUT A CHHAYA, A SHADOW WITH NO SENSE (b)

(a) Here an explanation again becomes necessary in the light, and with the help of the exoteric added to the esoteric scriptures. The "Manushyas" (men) and the Manus are here equivalent to the Chaldean "Adam" -- this term not meaning at all the first man, as with the Jews, or one solitary individual, but mankind collectively, as with the Chaldeans and Assyrians. It is the four orders or classes of Dhyan Chohans out of the seven, says the Commentary, "who were the progenitors of the concealed man," i.e., the subtle inner man. The "Lha" of the Moon, the lunar spirits, were, as already stated, only the ancestors of his form, i.e., of the model according to which Nature began her external work upon him. Thus primitive man was, when he appeared, only a senseless Bhuta* or a "Phantom." This "creation" was a failure, the reason of which will be explained in the Commentary on Sloka 20.

(b) This attempt was again a failure. It allegorizes the vanity of physical nature's unaided attempts to construct even a perfect animal -- let alone man. For the "Fathers," the lower Angels, are all Nature-Spirits and the higher Elementals also

possess an intelligence of their own; but this is not enough to construct a THINKING man. "Living Fire" was needed, that fire which gives the human mind its self-perception and self-consciousness, or Manas; and the progeny of Parvaka and Suchi are the animal electric and solar fires, which create animals, and could thus furnish but a physical living constitution to that first astral model of man. The first creators, then, were the Pygmalions of primeval man: they failed to animate the statue -- intellectually.

This Stanza we shall see is very suggestive. It explains the mystery of, and fills the gap between, the informing principle in man -- the

[[Footnote(s)]] -----

* It is not clear why "Bhutas" should be rendered by the Orientalists as meaning "evil Spirits" in the Puranas. In the Vishnu Purana, Book I, ch. 5, the Sloka simply says: "Bhutas -- fiends, frightful from being monkey-coloured and carnivorous"; and the word in India now means ghosts, ethereal or astral phantoms, while in esoteric teaching it means elementary substances, something made of attenuated, noncompound essence, and, specifically, the astral double of any man or animal. In this case these primitive men are the doubles of the first ethereal Dhyanis or Pitris.

[[Vol. 2, Page]] 103 THE DIVINE REBELS.

HIGHER SELF or human Monad -- and the animal Monad, both one and the same, although the former is endowed with divine intelligence, the latter with instinctual faculty alone. How is the difference to be explained, and the presence of that HIGHER SELF in man accounted for?

"The Sons of MAHAT are the quickeners of the human Plant. They are the Waters falling upon the arid soil of latent life, and the Spark that vivifies the human animal. They are the Lords of Spiritual Life eternal." . . . "In the beginning (in the Second Race) some (of the Lords) only breathed of their essence into Manushya (men); and some took in man their abode."

This shows that not all men became incarnations of the "divine Rebels," but only a few among them. The remainder had their fifth principle simply quickened by the spark thrown into it, which accounts for the great difference between the intellectual capacities of men and races. Had not the "sons of Mahat," speaking allegorically, skipped the intermediate worlds, in their impulse toward intellectual freedom, the animal man would never have been able to reach upward from this earth, and attain through self-exertion his ultimate goal. The cyclic pilgrimage would have to be performed through all the planes of existence half unconsciously, if not entirely so, as in the case of the animals. It is owing to this rebellion of intellectual life against the morbid inactivity of pure spirit, that we are what we are -- self-conscious, thinking men, with the capabilities and attributes of Gods in us, for good as much as for evil. Hence the REBELS are our saviours. Let the philosopher ponder well over this, and more than one mystery will become clear to him. It is only by the attractive force of the contrasts that the two opposites -- Spirit and Matter -- can be cemented on Earth, and, smelted in the fire of self-conscious experience and suffering, find themselves wedded in Eternity. This will reveal the meaning of many hitherto incomprehensible allegories, foolishly called "fables." (Vide infra, "The Secret of Satan.")

It explains, to begin with, the statement made in Pymander: that the "heavenly MAN," the "Son of the Father," who partook of the nature and essence of the Seven Governors, or creators and Rulers of the material world, "peeped through the Harmony and, breaking through the Seven Circles of Fire, made manifest the downward-born nature."* It explains every verse in that Hermetic narrative, as also the Greek allegory of Prometheus. Most important of all, it explains the many allegorical accounts about the "Wars in Heaven," including that of Revelation with respect to the Christian dogma of the fallen angels. It explains the "rebellion" of the oldest and highest Angels, and the meaning of their being cast down from Heaven into the depths of Hell,

[[Footnote(s)]] -----

* See "Pymander," Bk. II., verses 17 to 29.

[[Vol. 2, Page]] 104 THE SECRET DOCTRINE.

i.e., MATTER. It even solves the recent perplexity of the Assyriologists, who express their wonder through the late George Smith.

"My first idea of this part" (of the rebellion), he says, "was that the wars with the powers of Evil preceded the Creation; I now think it followed the account of the fall" (Chaldean Account of Genesis, p. 92). In this work Mr. George Smith gives an engraving, from an early Babylonian cylinder, of the Sacred Tree, the Serpent, man and woman. The tree has seven branches: three on the man's side, four on that of the female. These branches are typical of the seven Root-Races, in the third of which, at its very close, occurred the separation of the sexes and the so-called FALL into generation. The three earliest Races were sexless, then hermaphrodite; the other four, male and female, as distinct from each other. "The Dragon," says Mr. G. Smith, "which in the Chaldean account of the creation leads man to sin, is the creation of Tiamat, the living principle of the Sea, or Chaos . . . which was opposed to the deities at the creation of the world." This is an error. The Dragon is the male principle, or Phallus, personified, or rather animalized; and Tiamat, "the embodiment of the Spirit of Chaos," of the deep, or Abyss, is the female principle, the Womb. The "Spirit of Chaos and Disorder" refers to the mental perturbation which it led to. It is the sensual, attractive, magnetic principle which fascinates and seduces, the ever living active element which throws the whole world into disorder, chaos, and sin. The Serpent seduces the woman, but it is the latter who seduces man, and both are included in the Karmic curse, though only as a natural result of a cause produced. Says George Smith: "It is clear that the Dragon is included in the curse for the Fall, and that the Gods" (the Elohim, jealous at seeing the man of clay becoming a Creator in his turn, like all the animals,) "invoke on the head of the human Race all the evils which afflict humanity. Wisdom and knowledge shall injure him, he shall have family quarrels, he will anger the gods, he shall submit to tyranny. . . . he shall be disappointed in his desires, he shall pour out useless prayers, he shall commit future sin. . . No doubt subsequent lines continue this topic, but again our narrative is broken, and

it re-opens only where the gods are preparing for war with the powers of evil, which are led by Tiamat (the woman). . . . " (Babylonian Legend of Creation, p. 92.)

This account is omitted in Genesis, for monotheistic purposes. But it is a mistaken policy -- born no doubt of fear, and regard for dogmatic religion and its superstitions -- to have sought to restore the Chaldean fragments by Genesis, whereas it is the latter, far younger than any of the fragments, which ought to be explained by the former.

[[Vol. 2, Page]] 105 MAN'S FATHER, THE SUN.

17. THE BREATH (human Monad) NEEDED A FORM; THE FATHERS GAVE IT. THE BREATH NEEDED A GROSS BODY; THE EARTH MOULDED IT. THE BREATH NEEDED THE SPIRIT OF LIFE; THE SOLAR LHAS BREATHED IT INTO ITS FORM. THE BREATH NEEDED A MIRROR OF ITS BODY (astral shadow); "WE GAVE IT OUR OWN," SAID THE DHYANIS. THE BREATH NEEDED A VEHICLE OF DESIRES (Kama Rupa); "IT HAS IT," SAID THE DRAINER OF WATERS (Suchi, the fire of passion and animal instinct). THE BREATH NEEDS A MIND TO EMBRACE THE UNIVERSE; "WE CANNOT GIVE THAT," SAID THE FATHERS. "I NEVER HAD IT," SAID THE SPIRIT OF THE EARTH. "THE FORM WOULD BE CONSUMED WERE I TO GIVE IT MINE," SAID THE GREAT (solar) FIRE (nascent) MAN REMAINED AN EMPTY, SENSELESS BHUTA THUS HAVE THE BONELESS GIVEN LIFE TO THOSE WHO BECAME (later) MEN WITH BONES IN THE THIRD (race) (a).

As a full explanation is found in Stanza V. (Vide paragraph (a)), a few remarks will now suffice. The "Father" of primitive physical man, or of his body, is the vital electric principle residing in the Sun. The Moon is its Mother, because of that mysterious power in the Moon which has as decided an influence upon human gestation and generation, which it regulates, as it has on the growth of plants and animals. The "Wind" or Ether, standing in this case for the agent of transmission by which those influences are carried down from the two luminaries and diffused upon Earth, is referred to as the "nurse"; while "Spiritual Fire" alone makes of man a divine and perfect entity.

Now what is that "Spiritual Fire"? In alchemy it is HYDROGEN, in general; while in esoteric actuality it is the emanation or the Ray which proceeds from its noumenon, the "Dhyan of the first Element." Hydrogen is gas only on our terrestrial plane. But even in chemistry hydrogen "would be the only existing form of matter, in our sense of the term,"* and is very nearly allied to protyle, which is our layam. It is the father and generator, so to say, or rather the Upadhi (basis), of both AIR and WATER, and is "fire, air and water," in fact: one under three aspects; hence the chemical and alchemical trinity. In the world of manifestation or matter it is the objective symbol and the material emanation from the subjective and purely spiritual entitative Being in the region of noumena. Well might Godfrey Higgins have compared Hydrogen to, and even identified it with, the To ON, the "One" of the Greeks. For, as he remarks, Hydrogen is not Water, though it generates it; Hydrogen is not fire, though it manifests or creates it; nor is it Air, though air may be regarded as a product of the union of Water and

[[Footnote(s)]] -----

* See "Genesis of the Elements," by Prof. W. Crookes, p. 21.

[[Vol. 2, Page]] 106 THE SECRET DOCTRINE.

Fire -- since Hydrogen is found in the aqueous element of the atmosphere. It is three in one.

If one studies comparative Theogony, it is easy to find that the secret of these "Fires" was taught in the Mysteries of every ancient people, pre-eminently in Samothrace. There is not the smallest doubt that the Kabeiri, the most arcane of all the ancient deities, gods and men, great deities and Titans, are identical with the Kumaras and Rudras headed by Kartikeya - a Kumara also. This is quite evident even exoterically; and these Hindu deities were, like the Kabeiri, the personified sacred Fires of the most occult powers of Nature. The several branches of the Aryan Race, the Asiatic and the European, the Hindu and the Greek, did their best to conceal their true nature, if not their importance. As in the case of the Kumaras, the number of the Kabeiri is uncertain. Some say that there were three or four only; others say seven. Aschieros, Achiosersa, Achiochersus, and Camillus may very well stand for the alter egos of the four Kumaras -- Sanat-Kumara, Sananda, Sanaka, and Sanatana. The former deities, whose reputed father was Vulcan, were often confounded with the Dioscuri, Corybantes, Anaces, etc.; just as the Kumara, whose reputed father is Brahma, (or rather, the "Flame of his Wrath," which prompted him to perform the ninth or Kumara creation, resulting in Rudra or Nilalohita (Siva) and the Kumaras), were confounded with the Asuras, the Rudras, and the Pitris, for the simple reason that they are all one -- i.e., correlative Forces and Fires. There is no space to describe these "fires" and their real meaning here, though we may attempt to do so if the third and fourth volumes of this work are ever published. Meanwhile a few more explanations may be added.

The foregoing are all mysteries which must be left to the personal intuition of the student for solution, rather than described. If he would learn something of the secret of the FIRES, let him turn to certain works of the Alchemists, who very correctly connect fire with every element, as do the Occultists. The reader must remember that the ancients considered religion, and the natural sciences along with philosophy, to be closely and inseparably linked together. AEsculapius was the Son of Apollo -- the Sun or FIRE of Life; at once Helios, Pythios, and the god of oracular Wisdom. In exoteric religions, as much as in esoteric philosophy, the Elements -- especially fire, water, and air -- are made the progenitors of our five physical senses, and hence are directly connected (in an occult way) with them. These physical senses pertain even to a lower creation than the one called in the Puranas Pratisarga, or secondary Creation. "Liquid fire proceeds from indiscrete fire," says an Occult axiom.

"The Circle is the THOUGHT; the diameter (or the line) is the WORD;

and their union is LIFE." In the Kabala, Bath-Kol is the daughter of the Divine Voice, or primordial light, Shekinah. In the Puranas and Hindu exotericism, Vach (the Voice) is the female Logos of Brahma -- a permutation of Aditi, primordial light. And if Bath-Kol, in Jewish mysticism, is an articulate praeternatural voice from heaven, revealing to the "chosen people" the sacred traditions and laws, it is only because Vach was called, before Judaism, the "Mother of the Vedas," who entered into the Rishis and inspired them by her revelations; just as Bath-Kol is said to have inspired the prophets of Israel and the Jewish High-Priests. And both exist to this day, in their respective sacred symbologies, because the ancients associated sound or Speech with the Ether of Space, of which Sound is the characteristic. Hence Fire, Water and Air are the primordial Cosmic Trinity. "I am thy Thought, thy God, more ancient than the moist principle, the light that radiates within Darkness (Chaos), and the shining Word of God (Sound) is the Son of the Deity." ("Pymander," § 6.)*

Thus we have to study well the "Primary creation," before we can understand the Secondary. The first Race had three rudimentary elements in it; and no fire as yet; because, with the Ancients, the evolution of man, and the growth and development of his spiritual and physical senses, were subordinate to the evolution of the elements on the Cosmic plane of this Earth. All proceeds from Prabhavapyaya, the evolution of the creative and sentient principles in the gods, and even of the so-called creative deity himself. This is found in the names and appellations given to Vishnu in exoteric scriptures. As the Protologos (the Orphic), he is called Purvaja, "pregenetic," and then the other names connect him in their descending order more and more with matter.

The following order on parallel lines may be found in the evolution of the Elements and the Senses; or in Cosmic terrestrial "MAN" or "Spirit," and mortal physical man:--

1. Ether ... Hearing ... Sound.
2. Air ... Touch ... Sound and Touch.
3. Fire, or Light ... Sight ... Sound, Touch and Colour.
4. Water ... Taste ... Sound, Touch, Colour and Taste.
5. Earth ... Smell ... Sound, Touch, Colour, Taste and Smell.

As seen, each Element adds to its own characteristics, those of its

[[Footnote(s)]] -----

* The opponents of Hinduism may call the above Pantheism, Polytheism, or anything they may please. If Science is not entirely blinded by prejudice, it will see in this account a profound knowledge of natural Sciences and Physics, as well as of Metaphysics and Psychology. But to find this out, one has to study the personifications, and then convert them into chemical atoms. It will then be found to satisfy both physical and even purely materialistic Science, as well as those who see in evolution the work of the "Great Unknown Cause" in its phenomenal and illusive aspects.

predecessor; as each Root-Race adds the characterizing sense of the preceding Race. The same is true in the septenary creation of man, who evolves gradually in seven stages, and on the same principles, as will be shown further on.

Thus, while Gods or Dhyān Chohans (Devas) proceed from the First Cause -- which is not Parabrahm, for the latter is the ALL CAUSE, and cannot be referred to as the "First Cause," -- which First Cause is called in the Brahmanical Books Jagad-Yoni, "the womb of the world," mankind emanates from these active agents in Kosmos. But men, during the first and the second races, were not physical beings, but merely rudiments of the future men: Bhutas, which proceeded from Bhutadi, "origin," or the "original place whence sprung the Elements." Hence they proceeded with all the rest from Prabhavapyaya, "the place whence is the origination, and into which is the resolution of all things," as explained by the Commentator. Whence also our physical senses. Whence even the highest "created" deity itself, in our philosophy. As one with the Universe, whether we call him Brahma, Iswara, or Purusha, he is a manifested deity, -- hence created, or limited and conditioned. This is easily proven, even from the exoteric teachings.

After being called the incognizable, eternal Brahma (neuter or abstract), the Punda-Rikaksha, "supreme and imperishable glory," once that instead of Sadaika-Rupa, "changeless" or "immutable" Nature, he is addressed as Ekanaka-Rupa, "both single and manifold," he, the cause, becomes merged with his own effects; and his names, if placed in esoteric order, show the following descending scale:--

1. Mahapurusha or Paramatman Supreme Spirit.
2. Atman or Purvaja (Protologos) The living Spirit of Nature.
3. Indriyatman, or Hrishikesa Spiritual or intellectual soul (One with the senses).
5. Bhutatman The living, or Life Soul.
6. Kshetrajna Embodied soul, or the Universe of Spirit and Matter.
7. Bhrantidarsanatah False perception -- Material Universe.

The last name means something perceived or conceived of, owing to false and erroneous apprehension, as a material form; but, in fact, only Maya, illusion, as all is in our physical universe.

It is in strict analogy with ITS attributes in both the spiritual and material worlds, that the evolution of the Dhyān Chohanīc Essences takes place; the characteristics of the latter being reflected, in their turn, in Man, collectively, and in each of his principles; every one of which contains in itself, in the same progressive order, a portion of their various "fires" and elements.

STANZA V.
THE EVOLUTION OF THE SECOND RACE.

§§ (18) The Sons of Yoga. (19) The Sexless Second Race. (20) The Sons of the Sons of Twilight. (21) The "Shadow," or the Astral Man, retires within, and man develops a physical body.

18. THE FIRST (Race) WERE THE SONS OF YOGA. THEIR SONS, THE CHILDREN OF THE YELLOW FATHER AND THE WHITE MOTHER.

In the later Commentary, the sentence is translated:--

"The Sons of the Sun and of the Moon, the nursling of ether (or the wind) (a)

"They were the shadows of the shadows of the Lords (b). They (the shadows) expanded. The Spirits of the Earth clothed them; the solar Lhas warmed them (i.e. preserved the vital fire in the nascent physical forms). The Breaths had life, but had no understanding. They had no fire nor water of their own (c).

(a) Remember in this connection the Tabula Smaragdina of Hermes, the esoteric meaning of which has seven keys to it. The Astro-Chemical is well known to students, the anthropological may be given now. The "One thing" mentioned in it is MAN. It is said: "The Father of THAT ONE ONLY THING is the Sun; its Mother the Moon; the Wind carries it in his bosom, and its nurse is the Spirituous Earth." In the occult rendering of the same it is added: "and Spiritual Fire is its instructor (Guru)."

This fire is the higher Self, the Spiritual Ego, or that which is eternally reincarnating under the influence of its lower personal Selves, changing with every re-birth, full of Tanha or desire to live. It is a strange law of Nature that, on this plane, the higher (Spiritual) Nature should be, so to say, in bondage to the lower. Unless the Ego takes refuge in the Atman, the ALL-SPIRIT, and merges entirely into the essence thereof, the personal Ego may goad it to the bitter end. This cannot be thoroughly understood unless the student makes himself familiar with the mystery of evolution, which proceeds on triple lines -- spiritual, psychic and physical.

That which propels towards, and forces evolution, i.e., compels the growth and development of Man towards perfection, is (a) the MONAD,

[[Vol. 2, Page]] 110 THE SECRET DOCTRINE.

or that which acts in it unconsciously through a force inherent in itself; and (b) the lower astral body or the personal SELF. The former, whether imprisoned in a vegetable or an animal body, is endowed with, is indeed itself, that force. Owing to its identity with the ALL-FORCE, which, as said, is inherent in the Monad, it is all-potent on the Arupa, or formless plane. On our plane, its essence being too pure, it remains all-potential, but individually becomes inactive: e.g., the rays of the Sun, which contribute to the growth of vegetation, do not select this or that plant to shine upon. Uproot the plant and transfer it to a piece of soil where the sunbeam cannot reach it, and the latter will not follow it. So with the Atman: unless the higher Self or EGO gravitates towards its Sun the Monad -- the lower Ego, or personal Self, will have the upper hand in every case. For it is this Ego, with its fierce Selfishness and animal desire to live a Senseless life (Tanha), which is "the maker of the tabernacle," as Buddha calls it in Dhammapada (153 and 154). Hence the expression, "the Spirits of the Earth clothed the shadows and expanded them." To these "Spirits" belong temporarily the human astral selves; and it is they who give, or build, the physical tabernacle of man, for the Monad and its conscious principle, Manas, to dwell in. But the "Solar" Lhas, Spirits, warm them, the shadows. This is physically and literally true; metaphysically, or on the psychic and spiritual plane, it is equally true that the Atman alone warms the inner man; i.e., it enlightens it with the ray of divine life and alone is able to impart to the inner man, or the reincarnating Ego, its immortality. Thus, as we shall find, for the first three and a half Root-Races, up to the middle or turning point, it is the astral shadows of the "progenitors," the lunar Pitris, which are the formative powers in the Races, and which build and gradually force the evolution of the physical form towards perfection -- this, at the cost of a proportionate loss of spirituality. Then, from the turning point, it is the Higher Ego, or incarnating principle, the nous or Mind, which reigns over the animal Ego, and rules it whenever it is not carried down by the latter. In short, Spirituality is on its ascending arc, and the animal or physical impedes it from steadily progressing on the path of its evolution only when the selfishness of the personality has so strongly infected the real inner man with its lethal virus, that the upward attraction has lost all its power on the thinking reasonable man. In sober truth, vice and wickedness are an abnormal, unnatural manifestation, at this period of our human evolution -- at least they ought to be so. The fact that mankind was never more selfish and vicious than it is now, civilized nations having succeeded in making of the first an ethical characteristic, of the second an art, is an additional proof of the exceptional nature of the phenomenon.

[[Vol. 2, Page]] 111 THE SHELLS OF SHEBA HACHALOTH.

The entire scheme is in the "Chaldean Book of Numbers," and even in the Zohar, if one only understood the meaning of the apocalyptic hints. First comes En-Soph, the "Concealed of the Concealed," then the Point, Sephira and the later Sephiroth; then the Atzilatic World, a World of Emanations that gives birth to three other worlds -- called the Throne, the abode of pure Spirits; the second, the World of Formation, or Jetzira, the habitat of the Angels who sent forth the Third, or World of Action, the Asiatic World, which is the Earth or our World; and yet it is said of it that this world, also called Kliphoth, containing the (six other) Spheres, [[hebrew]], and matter, is the residence of the "Prince of Darkness." This is as clearly stated as can be; for Metatron, the Angel of the second or Briatic World, means Messenger [[angelos]], Angel, called the great Teacher; and under him are the Angels of the third World, Jetzira, whose ten and seven classes are the Sephiroth,* of whom it is said that "they inhabit and vivify this world as Essential Entities and Intelligences, whose

correlatives and contraries inhabit the third or Asiatic World." These "Contraries" are called "the Shells," [[hebrew]], or demons,** who inhabit the seven habitations called Sheba Hachaloth, which are simply the seven zones of our globe. Their prince is called in the Kabala Samael, the Angel of Death, who is also the seducing serpent Satan; but that Satan is also Lucifer, the bright angel of Light, the Light and Life-bringer, the "Soul" alienated from the Holy Ones, the other angels, and for a period, anticipating the time when they would have descended on Earth to incarnate in their turn.

"The Souls (Monads) are pre-existent in the world of Emanations," (Book of Wisdom viii., 20); and the Zohar teaches that in the "Soul" "is the real man, i.e., the Ego and the conscious I AM: 'Manas.' "

"They descend from the pure air to be chained to bodies," says Josephus repeating the belief of the Essenes (De Bello Judaico, 11, 12). "The air is full of Souls," states Philo, "they descend to be tied to mortal bodies, being desirous to live in them." (De Gignat, 222 c.; De Somniis, p. 455)***; because through, and in, the human form they will become progressive beings, whereas the nature of the angel is purely intransitive, therefore man has in him the potency of transcending the faculties of the Angels. Hence the Initiates in India say that it is the Brahmin, the twice-born, who rules the gods or devas; and Paul repeated it in

[[Footnote(s)]] -----

* See Vol. I. Part III., "Gods, Monads and Atoms." It is symbolised in the Pythagorean Triangle, the 10 dots within, and the seven points of the Triangle and the Cube.

** Whence the Kabalistic name of Shells given to the astral form, the body called Kama Rupa, left behind by the higher angels in the shape of the higher Manas, when the latter leaves for Devachan, forsaking its residue.

*** Which shows that the Essenes believed in re-birth and many reincarnations on Earth, as Jesus himself did, a fact we can prove from the New Testament itself.

[[Vol. 2, Page]] 112 THE SECRET DOCTRINE.

I Corinthians vi., 3: "Know ye not that we (the Initiates) shall judge angels"?

Finally, it is shown in every ancient scripture and Cosmogony that man evolved primarily as a luminous incorporeal form, over which, like the molten brass round the clay model of the sculptor, the physical frame of his body was built by, through, and from, the lower forms and types of animal terrestrial life. "The Soul and the Form when descending on Earth put on an earthly garment," says the Zohar. His protoplasmic body was not formed of that matter of which our mortal frames are fashioned. "When Adam dwelt in the garden of Eden, he was clothed in the celestial garment, which is the garment of heavenly light. . . . light of that light which was used in the garden of Eden," (Zohar II 229 B). "Man (the heavenly Adam) was created by the ten Sephiroth of the Jetzic world, and by the common power they (the seven angels of a still lower world) engendered the earthly Adam First Samael fell, and then deceiving (?) man, caused his fall also."

(b) The sentence: "They were the shadows of the shadows of the Lords," i.e., the progenitors created man out of their own astral bodies, explains an universal belief. The Devas are credited in the East with having no shadows of their own. "The devas cast no shadows," and this is the sure sign of a good holy Spirit.

Why had they "no fire or water of their own"?* Because:--

(c) That which Hydrogen is to the elements and gases on the objective plane, its noumenon is in the world of mental or subjective phenomena; since its trinitarian latent nature is mirrored in its three

[[Footnote(s)]] -----

* It is corroborated, however, as we have shown, by the esotericism of Genesis. Not only are the animals created therein after the "Adam of Dust," but vegetation is shown in the Earth before "the heavens and the Earth were created." "Every plant of the field before it (the day that the heavens and the Earth were made, v. 4) was in the Earth" (v. 5). Now, unless the Occult interpretation is accepted, which shows that in this 4th Round the Globe was covered with vegetation, and the first (astral) humanity was produced before almost anything could grow and develop thereon, what can the dead letter mean? Simply that the grass was in the earth of the Globe before that Globe was created? And yet the meaning of verse 6, which says that "there went up a mist from the Earth" and watered the whole face of the Earth before it rained, and caused the trees, etc., to grow, is plain enough. It shows also in what geological period it occurred, and further what is meant by "Heaven and Earth." It meant the firmament and dry incrustated land, separated and ridden of its vapours and exhalations. Moreover, the student must bear in mind that, as Adam Kadmon, "the male and female being" of Genesis, ch. I., is no physical human being but the host of the Elohim, among which was Jehovah himself -- so the animals mentioned in that chapter as "created" before man in the dead letter text, were no animals, but the Zodiacal signs and other sidereal bodies.

[[Vol. 2, Page]] 113 THE SECRET WORK OF CHIRAM.

active emanations from the three higher principles in man, namely, "Spirit, Soul, and Mind," or Atma, Buddhi, and Manas. It is the spiritual and also the material human basis. Rudimentary man, having been nursed by the "air" or the "wind," becomes the perfect man later on; when, with the development of "Spiritual fire," the noumenon of the "Three in One" within his Self, he acquires from his inner Self, or Instructor, the Wisdom of Self-Consciousness, which he does not possess in the beginning. Thus here again divine Spirit is symbolised by the Sun or Fire; divine Soul by Water and the Moon, both standing for the Father and Mother of Pneuma, human Soul, or Mind, symbolised by the Wind or air, for Pneuma, means "breath."

Hence in the Smaragdine Tablet, disfigured by Christian hands:--

"The Superior agrees with the Inferior; and the Inferior with the Superior; to effect that one truly wonderful Work" -- which is MAN. For the secret work of Chiram, or King Hiram in the Kabala, "one in Essence, but three in Aspect," is the Universal Agent or Lapis Philosophorum. The culmination of the Secret Work is Spiritual Perfect Man, at one end of the line; the union of the three elements is the Occult Solvent in the "Soul of the World," the Cosmic Soul or Astral Light, at the other; and, on the material plane, it is Hydrogen in its relation to the other gases. The To ON, truly; the ONE "whom no person has seen except the Son"; this sentence applying both to the metaphysical and physical Kosmos, and to the spiritual and material Man. For how could the latter understand the To ON the "One Father," if his Manas, the "Son," does not become (as) "One with the Father," and through this absorption receive enlightenment from the "divine instructor," Guru -- Atma-Buddhi?

"If thou would'st understand the SECONDARY ("Creation," so-called), oh Lanoo, thou should'st first study its relation to the PRIMARY." (Commentary, Book of Dzyan, III. 19.)

The first Race had three elements, but no living Fire. Why? Because:--

"We say four elements, my Son, but ought to say three," says Hermes Trismegistus. "In the Primary Circle" (creation) that which is marked [[diagram]] reads "Root," as in the Secondary likewise.

Thus in Alchemy or Western Hermetism (a variant on Eastern Esotericism) we find:--

X. [[diagram]] X.

Sulphur Flamma Spiritus

Hydrargyrum Natura Aqua

Sal Mater Sanguis

[[Vol. 2, Page]] 114 THE SECRET DOCTRINE.

And these three are all quaternaries completed by their Root, Fire. The Spirit, beyond manifested Nature, is the fiery BREATH in its absolute Unity. In the manifested Universe, it is the Central Spiritual Sun, the electric Fire of all Life. In our System it is the visible Sun, the Spirit of Nature, the terrestrial god. And in, on, and around the Earth, the fiery Spirit thereof -- air, fluidic fire; water, liquid fire; Earth, solid fire. All is fire -- ignis, in its ultimate constitution, or I, the root of which is O (nought) in our conceptions, the All in nature and its mind. Pro-Mater is divine fire. It is the Creator, the Destroyer, the Preserver. The primitive names of the gods are all connected with fire, from AGNI, the Aryan, to the Jewish god who "is a consuming fire." In India, God is called in various dialects, Eashoor, Esur, Iswur, and Is'Vara, in Sanskrit the Lord, from Isa, but this is primarily the name of Siva, the Destroyer; and the three Vedic chief gods are Agni (ignis), Vayu, and Surya -- Fire, Air, and the Sun, three occult degrees of fire. In the Hebrew [[hebrew]] (aza), means to illuminate, and [[hebrew]] (asha) is fire. In Occultism, "to kindle a fire" is synonymous to evoking one of the three great fire-powers, or "to call on God." In Sanskrit Osch or Asch is fire or heat; and the Egyptian word Osiris is compounded (as shown by Schelling) of the two primitives aish and asr, or a "fireenchanter." Aesar in the old Etruscan meant a God (being perhaps derived from Asura of the Vedas). Aeswar and Eswara are analogous terms, as Dr. Kenealy thought. In the Bhagavad Gita we read, "Iswara resides in every mortal being and puts in motion, by his supernatural power, all things which mount on the Wheel of Time." It is the creator and the destroyer, truly. "The primitive fire was supposed to have an insatiable appetite for devouring. Maximus of Tyre relates that the ancient Persians threw into the fire combustible matter crying: 'Devour, oh Lord!' In the Irish language Easam, or Asam, means 'to create,' and Aesar was the name of an ancient Irish god, meaning 'to light a fire' " (Kenealy). The Christian Kabalists and symbologists who disfigured Pymander -- prominent among them the Bishop of Ayre, Francois de Tours, in the 16th century -- divide the elements in this way:--

The four elements formed from divine substances and the Spirits of the Salts of Nature represented by --

[[Vol. 2, Page]] 115 SONS OF YOGA.

H, THE QUINTESSENCE, [[HEPHLOX]], FLAMMA-VIRGO (virgin oil), FLAMMA DURISSIMA, VIRGO, LUCIS AETERNA MATER.

The first race of men were, then, simply the images, the astral doubles, of their Fathers, who were the pioneers, or the most progressed Entities from a preceding though lower sphere, the shell of which is now our Moon. But even this shell is all-potential, for, having generated the Earth, it is the phantom of the Moon which, attracted by magnetic affinity, sought to form its first inhabitants, the pre-human monsters, (vide supra, Stanza II.). To assure himself of this, the student has again to turn to the Chaldean Fragments, and read what Berosus says. Berosus obtained his information, he tells us, from Ea, the male-female deity of Wisdom. While the gods were generated in its androgynous bosom (Svabhavat, Mother-space) its (the Wisdom's) reflections became on Earth the woman Omoroka, who is the Chaldean Thavatth, or the Greek Thalassa, the Deep or the Sea, which esoterically and even exoterically is the Moon. It was the Moon

(Omoroka) who presided over the monstrous creation of nondescript beings which were slain by the Dyanis. (Vide Hibbert Lectures, p. 370 et seq.; also in Part II. "Adam-Adami.")

Evolutionary law compelled the lunar "Fathers" to pass, in their monadic condition, through all the forms of life and being on this globe; but at the end of the Third Round, they were already human in their divine nature, and were thus called upon to become the creators of the forms destined to fashion the tabernacles of the less progressed Monads, whose turn it was to incarnate. These "Forms" are called "Sons of Yoga," because Yoga (union with Brahma exoterically) is the supreme condition of the passive infinite deity, since it contains all the divine energies and is the essence of Brahma, who is said (as Brahma) to create everything through Yoga power. Brahma, Vishnu and Siva are the most powerful energies of God, Brahma, the Neuter, says a

[[Footnote(s)]] -----

[[Footnote continued from previous page]] tion?" it is answered: "Study first the ABC of Occult Alchemy." In their anxiety, however, to identify Pymander, "the mouth of Mystery," with St. John the Baptist prophetically, they thus identified also the 7 Kabeiri and the Assyrian Bulls with the Cherubs of the Jews and the Apostles. Having, moreover, to draw a line of demarcation between the four and the three -- the latter being the Fallen Angels; and furthermore to avoid connecting these with the "Seven Spirits of the Face," the Archangels, they unceremoniously threw out all they did not choose to recognise. Hence the perversion in the order of the Elements, in order to make them dovetail with the order of the Gospels, and to identify the Angel-Man with Christ. With the Chaldees, the Egyptians, from whom Moses adopted the Chroub (Cherubs in their animal form), and the Ophites; with all these, the Angels, the Planets, and the Elements, were symbolized mystically and alchemically by the Lion (Mikael); the Bull (Uriel); the Dragon (Raphael); the Eagle (Gabriel); the Bear (Thot-Sabaoth); the Dog (Erataoth); the Mule (Uriel or Thartharaoth). All these have a qualificative meaning.

[[Vol. 2, Page]] 116 THE SECRET DOCTRINE.

Puranic text. Yoga here is the same as Dhyana, which word is again synonymous with Yoga in the Tibetan text, where the "Sons of Yoga" are called "Sons of Dhyana," or of that abstract meditation through which the Dhyani-Buddhas create their celestial sons, the Dhyani-Bodhisattvas. All the creatures in the world have each a superior above. "This superior, whose inner pleasure it is to emanate into them, cannot impart efflux until they have adored" -- i.e., meditated as during Yoga. (Sepher M'bo Ska-arim, translated by Isaac Myer, Qabbalah, pp. 109-111.)

19. THE SECOND RACE (was) THE PRODUCT BY BUDDING AND EXPANSION; THE A-SEXUAL (form) FROM THE SEXLESS (shadow). THUS WAS, O LANOO, THE SECOND RACE PRODUCED (a).

(a) What will be most contested by scientific authorities is this a-sexual Race, the Second, the fathers of the "Sweat-born" so-called, and perhaps still more the Third Race, the "Egg-born" androgynes. These two modes of procreation are the most difficult to comprehend, especially for the Western mind. It is evident that no explanation can be attempted for those who are not students of Occult metaphysics. European language has no words to express things which Nature repeats no more at this stage of evolution, things which therefore can have no meaning for the materialist. But there are analogies. It is not denied that in the beginning of physical evolution there must have been processes in Nature, spontaneous generation, for instance, now extinct, which are repeated in other forms. Thus we are told that microscopic research shows no permanence of any particular mode of reproducing life. For "it shows that the same organism may run through various metamorphoses in the course of its life-cycle, during some of which it may be sexual, and in others a-sexual; i.e., it may reproduce itself alternately by the co-operation of two beings of opposite sex, and also by fissure or budding from one being only, which is of no sex." "Budding" is the very word used in the Stanza. How could these Chhayas reproduce themselves otherwise; viz., procreate the Second Race, since they were ethereal, a-sexual, and even devoid, as yet, of the vehicle of desire, or Kama Rupa, which evolved only in the Third Race? They evolved the Second Race unconsciously, as do some plants. Or, perhaps, as the Amoeba, only on a more ethereal, impressive, and larger scale. If, indeed, the cell-theory applies equally to Botany and Zoology, and extends to Morphology, as well as to the Physiology of organisms,

[[Footnote(s)]] -----

* See Laing's "Modern Science and Modern Thought," p. 90.

[[Vol. 2, Page]] 117 THE OUTGROWTH OF RACES.

and if the microscopic cells are looked upon by physical science as independent living beings -- just as Occultism regards the "fiery lives" -- there is no difficulty in the conception of the primitive process of procreation.

Consider the first stages of the development of a germ-cell. Its nucleus grows, changes, and forms a double cone or spindle, thus, [[diagram]] within the cell. This spindle approaches the surface of the cell, and one half of it is extruded in the form of what are called the "polar cells." These polar cells now die, and the embryo develops from the growth and segmentation of the remaining part of the nucleus which is nourished by the substance of the cell. Then why could not beings have lived thus, and been created in this way -- at the very beginning of human and mammalian evolution?

This may, perhaps, serve as an analogy to give some idea of the process by which the Second Race was formed from the First.

The astral form clothing the Monad was surrounded, as it still is, by its egg-shaped sphere of aura, which here corresponds to the substance of the germ-cell or ovum. The astral form itself is the nucleus, now, as then, instinct with the principle of life.

When the season of reproduction arrives, the sub-astral "extrudes" a miniature of itself from the egg of surrounding aura. This germ grows and feeds on the aura till it becomes fully developed, when it gradually separates from its parent, carrying with it its own sphere of aura; just as we see living cells reproducing their like by growth and subsequent division into two.

The analogy with the "polar cells" would seem to hold good, since their death would now correspond to the change introduced by the separation of the sexes, when gestation in utero, i.e., within the cell, became the rule.

"The early Second (Root) Race were the Fathers of the 'Sweat-born'; the later Second (Root) Race were 'Sweat-born' themselves."

This passage from the Commentary refers to the work of evolution from the beginning of a Race to its close. The "Sons of Yoga," or the primitive astral race, had seven stages of evolution racially, or collectively; as every individual Being in it had, and has now. It is not Shakespeare only who divided the ages of man into a series of seven, but Nature herself. Thus the first sub-races of the Second Race were born at first by the process described on the law of analogy; while the last began gradually, *pari passu* with the evolution of the human body, to be formed otherwise. The process of reproduction had seven stages also

[[Footnote(s)]] -----

* See Book I. Part I. Stanza VII Commentary 10.

[[Vol. 2, Page]] 118 THE SECRET DOCTRINE.

in each Race, each covering aeons of time. What physiologist or biologist could tell whether the present mode of generation, with all its phases of gestation, is older than half a million, or at most one million of years, since their cycle of observation began hardly half a century ago.

Primeval human hermaphrodites are a fact in Nature well known to the ancients, and form one of Darwin's greatest perplexities. Yet there is certainly no impossibility, but, on the contrary, a great probability that hermaphroditism existed in the evolution of the early races; while on the grounds of analogy, and on that of the existence of one universal law in physical evolution, acting indifferently in the construction of plant, animal, and man, it must be so. The mistaken theories of mono-genesis, and the descent of man from the mammals instead of the reverse, are fatal to the completeness of evolution as taught in modern schools on Darwinian lines, and they will have to be abandoned in view of the insuperable difficulties which they encounter. Occult tradition -- if the terms Science and Knowledge are denied in this particular to antiquity -- can alone reconcile the inconsistencies and fill the gap. "If thou wilt know the invisible, open thine eye wide on the visible," says a Talmudic axiom.

In the "Descent of Man"* occurs the following passage; which shows how near Darwin came to the acceptance of this ancient teaching.

"It has been known that in the vertebrate kingdom one sex bears rudiments of various accessory parts appertaining to the reproductive system, which properly belong to the opposite sex. . . . Some remote progenitor of the whole vertebrate kingdom appears to have been hermaphrodite or androgynous** . . . But here we encounter a singular difficulty. In the mammalian class the males possess rudiments of a uterus with the adjacent passages in the Vesiculae prostaticae; they bear also rudiments of mammae, and some male marsupials have traces of a marsupial sac. Other analogous facts could be added. Are we then to suppose that some extremely ancient mammal continued androgynous after it had acquired the chief distinctions of its class, and therefore after it had diverged from the lower classes of the vertebrate kingdom? This seems very improbable,*** for we have to look to fishes, the lowest of all the classes, to find any still existent androgynous forms."

Mr. Darwin is evidently strongly disinclined to adopt the hypothesis which the facts so forcibly suggest, viz., that of a primeval androgynous

[[Footnote(s)]] -----

* Second Edition, p. 161.

** And why not all the progenitive first Races, human as well as animal; and why one "remote progenitor"?

*** Obviously so, on the lines of Evolutionism, which traces the mammalia to some amphibian ancestor.

[[Vol. 2, Page]] 119 THE BLASTEMA OF SCIENCE.

stem from which the mammalia sprang. His explanation runs:-- "The fact that various accessory organs proper to each sex, are found in a rudimentary condition in the opposite sex may be explained by such organs having been gradually acquired by the one sex and then transmitted in a more or less imperfect condition to the other." He instances the case of "spurs, plumes, and brilliant colours, acquired for battle or for ornament by male birds" and only partially inherited by their female descendants. In the problem to be dealt with, however, the need of a more satisfactory explanation is evident, the facts being of so much more prominent and important a character than the mere superficial details with which they are compared by Darwin. Why not candidly admit the argument in favour of the hermaphroditism which characterises the old fauna? Occultism proposes a solution which embraces the facts in a most comprehensive and simple manner. These relics of a prior androgynous stock must be placed in the same category as the pineal gland, and other organs as mysterious, which afford us silent testimony as to the reality of functions which have long since become atrophied in the course of animal and human progress, but which once played a signal part in the general economy of primeval life.

The occult doctrine, anyhow, can be advantageously compared with that of the most liberal men of science, who have theorised upon the origin of the first man.

Long before Darwin, Naudin, who gave the name of Blastema to that which the Darwinists call protoplasm, put forward a theory half occult and half scientifico-materialistic. He made Adam, the a-sexual, spring suddenly from the clay, as it is called in the Bible, the Blastema of Science. "It is from this larval form of mankind that the evolutive force effected the completion of species. For the accomplishment of this great phenomenon, Adam had to pass through a phase of immobility and unconsciousness, very analogous to the nymphal state of animals undergoing metamorphosis," explains Naudin. For the eminent botanist, Adam was not one man, however, but mankind, "which remained concealed within a temporary organism . . . distinct from all others and never contracting alliance with any of these." He shows the differentiation of sexes accomplished by "a process of germination similar to that of Medusae and Ascidians." Mankind, thus constituted physiologically, "would retain a sufficient evolutive force for the rapid production of the various great human races."

De Quatrefages criticises this position in the "Human Species." It is unscientific, he says, or, properly speaking, Naudin's ideas "do not form a scientific theory," inasmuch as primordial Blastema is connected

[[Vol. 2, Page]] 120 THE SECRET DOCTRINE.

in his theory with the First Cause, which is credited with having made potentially in the Blastema all past, present, and future beings, and thus of having in reality created these beings en masse; moreover, Naudin does not even consider the secondary Causes, or their action in this evolution of the organic world. Science, which is only occupied with Secondary Causes, has thus "nothing to say to the theory of Naudin" (p. 125).

Nor will it have any more to say to the occult teachings, which are to some extent approached by Naudin. For if we but see in his "primordial Blastema" the Dhyana-Chohanian essence, the Chhaya or double of the Pitris, which contains within itself the potentiality of all forms, we are quite in accord. But there are two real and vital differences between our teachings. M. Naudin declares that evolution has progressed by sudden leaps and bounds, instead of extending slowly over millions of years; and his primordial Blastema is endowed only with blind instincts -- a kind of unconscious First Cause in the manifested Kosmos -- which is an absurdity. Whereas it is our Dhyana Chohanian essence -- the causality of the primal cause which creates physical man -- which is the living, active and potential matter, pregnant per se with that animal consciousness of a superior kind, such as is found in the ant and the beaver, which produces the long series of physiological differentiations. Apart from this his "ancient and general process of creation" from proto-organisms is as occult as any theory of Paracelsus or Khunrath could be.

Moreover, the Kabalistic works are full of the proof of this. The Zohar, for instance, says that every type in the visible has its prototype in the invisible Universe. "All that which is in the lower (our) world is found in the upper. The Lower and the Upper act and react upon each other." (Zohar, fol. 186.) Vide infra, Part II., "Esoteric Tenets corroborated in every Scripture."

20. THEIR FATHERS WERE THE SELF-BORN. THE SELF-BORN, THE CHHAYA FROM THE BRILLIANT BODIES OF THE LORDS, THE FATHERS, THE SONS OF TWILIGHT (a).

(a) The "shadows," or Chhayas, are called the sons of the "self-born," as the latter name is applied to all the gods and Beings born through the WILL, whether of Deity or Adept. The Homunculi of Paracelsus would, perhaps, be also given this name, though the latter process is on a far more material plane. The name "Sons of Twilight" shows that the "Self-born" progenitors of our doctrine are identical with the Pitris

[[Vol. 2, Page]] 121 LEDA, CASTOR AND POLLUX.

of the Brahmanical system, as the title is a reference to their mode of birth, these Pitris being stated to have issued from Brahma's "body of twilight." (See the Puranas.)

21. WHEN THE RACE BECAME OLD, THE OLD WATERS MIXED WITH THE FRESHER WATERS (a); WHEN THE DROPS BECAME TURBID, THEY VANISHED AND DISAPPEARED, IN THE NEW STREAM, IN THE HOT STREAM OF LIFE. THE OUTER OF THE FIRST BECAME THE INNER OF THE SECOND. (b). THE OLD WING BECAME THE SHADOW, AND THE SHADOW OF THE WING (c).

(a) The old (primitive) Race merged in the second race, and became one with it.

(b) This is the mysterious process of transformation and evolution of mankind. The material of the first forms -- shadowy, ethereal, and negative -- was drawn or absorbed into, and thus became the complement of the forms of the Second Race. The Commentary explains this by saying that, as the First Race was simply composed of the astral shadows of the creative progenitors, having of course neither astral nor physical bodies of their own -- this Race never died. Its "men" melted gradually away, becoming absorbed in the bodies of their own "sweat-born" progeny, more solid than their own. The old form vanished and was absorbed by, disappeared in, the new form, more human and physical. There was no death in those days of a period more blissful than the Golden Age; but the first, or parent material was used for the formation of the new being, to form the body and even the inner or lower principles or bodies of the progeny.

(c) When the shadow retires, i.e. when the astral body becomes covered with more solid flesh, man develops a physical body. The "wing," or the ethereal form that produced its shadow and image, became the shadow of the astral body and its own progeny. The expression is queer but original.

As there may be no occasion to refer to this mystery later, it is as well to point out at once the dual meaning contained in the Greek myth bearing upon this particular phase of evolution. It is found in the several variants of the allegory of Leda and her two sons Castor and Pollux, which variants have each a special meaning. Thus in Book XI. of the *Odyssey*, Leda is spoken of as the spouse of Tyndarus, who gave birth by her husband "to two sons of valiant heart" -- Castor

[[Vol. 2, Page]] 122 THE SECRET DOCTRINE.

and Pollux. Jupiter endows them with a marvellous gift and privilege. They are semi-immortal; they live and die, each in turn, and every alternate day; [[eteremeroi]]. As the Tyndaridae, the twin brothers are an astronomical symbol, and stand for Day and Night; their two wives, Phoebe and Hilasira, the daughters of Apollo or the Sun, personifying the Dawn and the Twilight.** Again, in the allegory where Zeus is shown as the father of the two heroes -- born from the egg to which Leda gives birth -- the myth is entirely theogonical. It relates to that group of cosmic allegories in which the world is described as born from an egg. For Leda assumes in it the shape of a white swan when uniting herself to the Divine Swan.*** Leda is the mythical bird, then, to which, in the traditions of various peoples of the Aryan race, are attributed various ornithological forms of birds which all lay golden eggs.**** In the *Kalevala* (the Epic Poem of Finland), the beautiful daughter of the Ether, "the Water Mother," creates the world in conjunction with a "Duck" (another form of the Swan or Goose, *Kalahansa*), who lays six golden eggs, and the seventh, "an egg of iron," in her lap. But the variant of the Leda allegory which has a direct reference to mystic man is found in Pindar***** only, with a slighter reference to it in the Homeric hymns.***** Castor and Pollux are in it no longer the Dioscuri (of Apollodorus III. 10, 7); but become the highly significant symbol of the dual man, the Mortal and the Immortal. Not only this, but as will now be seen, they are also the symbol of the Third Race, and its transformation from the animal man into a god-man with only an animal body.

Pindar shows Leda uniting herself in the same night to her husband and also to the father of the gods -- Zeus. Thus Castor is the son of the Mortal, Pollux the progeny of the Immortal. In the allegory made up for the occasion, it is said that in a riot of vengeance against the Apherides***** Pollux kills Lynceus -- "of all mortals he whose sight is the most penetrating" -- but Castor is wounded by Idas, "he who sees and knows." Zeus puts an end to the fight by hurling his thunderbolt and killing the last two combatants. Pollux finds his brother dying.***** In

***** Castor's tomb was shown in Sparta, in days of old, says Pausanias (III., 13, 1); and Plutarch says that he was called at Argos the demi-mortal or demi-hero [[mizarchagetas]]. (See Plutarch, *Quaestiones Graecae*, 23.)

[[Vol. 2, Page]] 123 THE ALLEGORY OF CASTOR AND POLLUX.

his despair he calls upon Zeus to slay him also. "Thou canst not die altogether," answers the master of the Gods; "thou art of a divine race." But he gives him the choice: Pollux will either remain immortal, living eternally in Olympus; or, if he would share his brother's fate in all things, he must pass half his existence underground, and the other half in the golden heavenly abodes. This semi-immortality, which is also to be shared by Castor, is accepted by Pollux.* And thus the twin brothers live alternately, one during the day, and the other during the night.**

Is this a poetical fiction only? An allegory, one of those "solar myth" interpretations, higher than which no modern Orientalist seems able to soar? Indeed, it is much more. Here we have an allusion to the "Egg-born," Third Race; the first half of which is mortal, i.e., unconscious in its personality, and having nothing within itself to survive***; and the latter half of which becomes immortal in its individuality, by reason of its fifth principle being called to life by the informing gods, and thus connecting the Monad with this Earth. This is Pollux; while Castor represents the personal, mortal man, an animal of not even a superior kind, when unlinked from the divine individuality. "Twins" truly; yet divorced by death forever, unless Pollux, moved by the voice of twinship, bestows on his less favoured mortal brother a share of his own divine nature, thus associating him with his own immortality.

Such is the occult meaning of the metaphysical aspect of the allegory. The widely spread modern interpretation of it -- so celebrated in antiquity, Plutarch tells us,**** as symbolical of brotherly devotion -- namely, that it was an image borrowed from the spectacle of Nature -- is weak and inadequate to explain the secret meaning. Besides the fact that the Moon, with the Greeks, was feminine in exoteric mythology, and could therefore hardly be regarded as Castor -- and at the same time be identified with Diana -- ancient symbolists who held the Sun, the King of all sidereal orbs, as the visible image of the highest deity, would not have personified it by Pollux, a demi-god only.*****

[[Footnote(s)]] -----

* Pindar. *Nem.* x., 60, *Dissen*.

** Schol. Eurip. "Orestes," 463, Dindorf. See Decharme's "Mythol.," etc., p. 654.

*** The Monad is impersonal and a god per se, albeit unconscious on this plane. For, divorced from its third (often called fifth) principle, Manas, which is the horizontal line of the first manifested triangle or trinity, it can have no consciousness or perception of things on this earthly plane. "The highest sees through the eye of the lowest" in the manifested world; Purusha (Spirit) remains blind without the help of Prakrit (matter) in the material spheres; and so does Atma-Buddhi without Manas.

**** "Morals," p. 484 f.

***** This strange idea and interpretation are accepted by Decharme in his "Mythologie de la Grece Antique." "Castor and Pollux," he says, "are nothing but the Sun and [[Footnote continued on next page]]

[[Vol. 2, Page]] 124 THE SECRET DOCTRINE.

If from Greek mythology we pass to the Mosaic allegories and symbolism, we shall find a still more striking corroboration of the same tenet under another form. Unable to trace in Genesis the "Egg-born," we shall still find there unmistakably the androgynes, and the first three races of the Secret Doctrine hidden under most ingenious symbology in the first four chapters of Genesis.

THE DIVINE HERMAPHRODITE.

An impenetrable veil of secrecy was thrown over the occult and religious mysteries taught, after the submersion of the last remnant of the Atlantean race, some 12,000 years ago, lest they should be shared by the unworthy, and so desecrated. Of these sciences several have now become exoteric -- such as Astronomy, for instance, in its purely mathematical and physical aspect. Hence their dogmas and tenets, being all symbolised and left to the sole guardianship of parable and allegory, have been forgotten, and their meaning has become perverted. Nevertheless, one finds the hermaphrodite in the scriptures and traditions of almost every nation; and why such unanimous agreement if the statement is only a fiction?

It is this secrecy which led the Fifth Race to the establishment, or rather the re-establishment of the religious mysteries, in which ancient truths might be taught to the coming generations under the veil of allegory and symbolism. Behold the imperishable witness to the evolution of the human races from the divine, and especially from the androgynous Race -- the Egyptian Sphinx, that riddle of the Ages! Divine wisdom incarnating on earth, and forced to taste of the bitter fruit of personal experience of pain and suffering, generated under the shade of the tree of the knowledge of Good and Evil -- a secret first known only to the Elohim, the SELF-INITIATED, "higher gods" -- on earth only.*

In the Book of Enoch we have Adam,** the first divine androgyne,

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Moon, conceived as twins . . . The Sun, the immortal and powerful being that disappears every evening from the horizon and descends under the Earth, as though he would make room for the fraternal orb which comes to life with night, is Pollux, who sacrifices himself for Castor; Castor, who, inferior to his brother, owes to him his immortality: for the Moon, says Theophrastus, is only another, but feebler Sun." (De Ventis 17. See Decharme, p. 655.)

* See "Book of Enoch."

** Adam (Kadmon) is, like Brahma and Mars, the symbol of the generative and creative power typifying Water and Earth - an alchemical secret. "It takes Earth and Water to create a human soul," said Moses. Mars is the Hindu Mangala, the planet Mars, identical with Kartikeya, the "War-God," born of Gharma-ja (Siva's sweat) and of the [[Footnote continued on next page]]

[[Vol. 2, Page]] 125 JAH-HOVAH ANDROGYNOUS.

separating into man and woman, and becoming JAH-HEVA in one form, or Race, and Cain and Abel* (male and female) in its other form or Race -- the double-sexed Jehovah** -- an echo of its Aryan prototype, Brahma-Vach. After which come the Third and Fourth Root-Races of mankind*** -- that is to say, Races of men and women, or individuals of opposite sexes, no longer sexless semi-spirits and androgynes, as were the two Races which precede them. This fact is hinted at in every Anthropogony. It is found in fable and allegory, in myth and revealed Scriptures, in legend and tradition. Because, of all the great Mysteries, inherited by Initiates from hoary antiquity, this is one of the greatest. It accounts for the bi-sexual element found in every creative deity, in Brahma-Viraj-Vach, as in Adam-Jehovah-Eve, also in "Cain-Jehovah-Abel." For "The Book of the Generations of Adam" does not even mention Cain and Abel, but says only: "Male and female created he them. . . and called their name Adam" (ch. v. 5). Then it proceeds to say: "And Adam begat a son in his own likeness, after his image, and called his name Seth" (v. 3); after which he begets other sons and daughters, thus proving that Cain and Abel are his own allegorical permutations. Adam stands for the primitive human race, especially in its cosmo-sidereal sense. Not so, however, in its theo-anthropological meaning. The compound name of Jehovah, or Jah-Hovah, meaning male life and female life -- first androgynous, then separated into sexes -- is used in this sense in Genesis from ch. v. onwards. As the author of "The Source of Measures" says (p. 159): "The two words of which Jehovah is composed make up the original idea of male-female, as the birth originators"; for the Hebrew letter Jod was the membrum virile and Hovah was Eve, the mother of all living, or the procreatrix, Earth and Nature. The author believes, therefore, that "It is seen that the perfect one" (the perfect female circle or Yoni, 20612, numerically), "as originator of measures, takes also the form of birth-origin, as Hermaphrodite one; hence the phallic form and use."

Precisely; only "the phallic form and use" came long ages later; and the first and original meaning of Enos, the son of Seth, was the First Race born in the present usual way from man and woman --for Seth is no man, but a race. Before him humanity was hermaphrodite.

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Earth. He is Lokita, the red, like Brahma also and Adam. The Hindu Mars is, like Adam, born from no woman and mother. With the Egyptians, Mars was the primeval generative Principle, and so are Brahma, in exoteric teaching, and Adam, in the Kabala.

* Abel is Chebel, meaning "Pains of Birth," conception.

** See "Isis Unveiled," Vol. II, p. 398, where Jehovah is shown to be Adam and Eve blended, and Hevah, and Abel, the feminine serpent.

*** See "Isis Unveiled," Vol. I., 305: "The union of the two create a third Race, etc."

[[Vol. 2, Page]] 126 THE SECRET DOCTRINE.

While Seth is the first result (physiologically) after the FALL, he is also the first man; hence his son Enos is referred to as the "Son of man." (Vide infra.) Seth represents the later Third Race.

To screen the real mystery name of AIN-SOPH -- the Boundless and Endless No-Thing -- the Kabalists have brought forward the compound attribute-appellation of one of the personal creative Elohim, whose name was Yak and Jab, the letters i or j or y being interchangeable, or Jah-Hovah, i.e. male and female,* Jah-Eve an hermaphrodite, or the first form of humanity, the original Adam of Earth, not even Adam Kadmon, whose "mind-born son" is the earthly Jah-Hovah, mystically. And knowing this, the crafty Rabbin-Kabalist has made of it a name so secret, that he could not divulge it later on without exposing the whole scheme; and thus he was obliged to make it sacred.

How close is the identity between Brahma-Prajapati and Jehovah-Sephiroth, between Brahma-Viraj and Jehovah-Adam, the Bible and the Puranas compared can alone show. Analysed and read in the same light, they afford cogent evidence that they are two copies of the same original -- made at two periods far distant from each other. Compare once more in relation to this subject Genesis ch. 4. verses 1 and 26 and Manu I., and they will both yield their meaning. In Manu (Book I. 32) Brahma, who is also both man and god, and divides his body into male and female, stands in his esoteric meaning, as does Jehovah or Adam in the Bible, for the symbolical personification of creative and generative power, both divine and human. The Zohar affords still more convincing proof of identity, while some Rabbins repeat word for word certain original Puranic expressions; e.g., the "creation" of the world is generally considered in the Brahmanical books to be the Lila, delight or sport, the amusement of the Supreme Creator, "Vishnu being thus discrete and indiscrete substance, spirit, and time, sports like a playful boy in frolics." (Vishnu Purana, Book I., ch. ii.) Now compare this with what is said in the Book, "Nobelet' Hokhmah": "The Kabalists say that the entering into existence of the worlds happens through delight, in that Ain-Soph (? !) rejoiced in Itself, and flashed and beamed from Itself to Itself . . . which are all called delight," etc. (Quoted in Myer's "Qabbalah," p. 110). Thus it is not a "curious idea of the Qabbalists," as the author just quoted remarks, but a purely Puranic, Aryan idea. Only, why make of Ain-Soph a Creator?

The "Divine Hermaphrodite" is then Brahma-Vach-Viraj; and that of the Semites, or rather of the Jews, is Jehovah-Cain-Abel. Only the "Heathen" were, and are, more sincere and frank than were the

[[Footnote(s)]] -----

* Jod in the Kabala has for symbol the hand, the forefinger and the lingham, while numerically it is the perfect one; but it is also the number 10, male and female, when divided.

[[Vol. 2, Page]] 127 SETH OUR PROGENITOR.

later Israelites and Rabbis, who undeniably knew the real meaning of their exoteric deity. The Jews regard the name given to them -- the Yah-oudi -- as an insult. Yet they have, or would have if they only wished it, as undeniable a right to call themselves the ancient Yah-oudi, "Jah-hovians," as the Brahmins have to call themselves Brahmins, after their national deity. For Jah-hovah is the generic name of that group or hierarchy of creative planetary angels, under whose star their nation has evolved. He is one of the planetary Elohim of the regent group of Saturn. Verse 26 of Genesis, ch. iv., when read correctly, would alone give them such a right, for it calls the new race of men sprung from Seth and Enos, Jehovah, something quite different from the translation adopted in the Bible:-- "To him also, was born a son, Enos; then began men to call themselves Jah or Yah-hovah," to with men and women, the "lords of creation." One has but to read the above-mentioned verse in the original Hebrew text and by the light of the Kabala, to find that, instead of the words as they now stand translated, it is:-- "Then began men to call themselves Jehovah," which is the correct translation, and not "Then began men to call upon the name of the Lord"; the latter being a mistranslation, whether deliberate or not. Again the well-known passage: "I have gotten a man from the Lord," should read: "I have gotten a man, even Jehovah."* Luther translated the passage one way, the Roman Catholics quite differently. Bishop Wordsworth renders it: "Cain -- I have gotten Cain, from Kanithi, I have gotten." Luther: "I have gotten a man 0-- even the Lord" (Jehovah); and the author of "The Source of Measures": "I have measured a man, even Jehovah." The last is the correct rendering, because (a) a famous Rabbin, a Kabalist, explained the passage to the writer in precisely this way, and (b) because this rendering is identical with that in the Secret Doctrine of the East with regard to Brahma. In "Isis Unveiled,"** it was explained by the writer that "Cain . . . is the son of the 'Lord' not of Adam (Genesis iv. 1)" The "Lord" is Adam Kadmon, the "father" of Yodcheva, "Adam-Eve," or Jehovah, the son of sinful thought, not the progeny of flesh and blood. Seth, on the other hand, is the leader and the progenitor of the Races of the Earth; for he is the son of Adam, exoterically, but esoterically he is the progeny of Cain and Abel, since Abel or Hebel is a female, the counterpart and female half of the male Cain,

and Adam is the collective name for man and woman: "male and female (Zachar va Nakobeh) created he them . . . and called their name Adam." The verses in Genesis from chs. i. to v., are purposely mixed up for Kabalistic reasons. After MAN of

[[Footnote(s)]] -----

* See "Source of Measures," p. 227.

** Vol. II., p. 264, et seq.

[[Vol. 2, Page]] 128 THE SECRET DOCTRINE.

Genesis ch. i. 26 and Enos, Son of Man of ch. iv. v. 26, after Adam, the first androgyne, after Adam Kadmon, the sexless (the first) Logos, Adam and Eve once separated, come finally Jehovah-Eve and Cain-Jehovah. These represent distinct Root-Races, for millions of years elapsed between them.

Hence the Aryan and the Semitic Theo-anthropographies are two leaves on the same stem; their respective personifications and symbolic personages standing in relation to each other in this way.

I. The Unknowable, referred to in various ways in Rig Vedic verse, such as "Nought Was," called, later on "Parabrahm;" the [[diagram]] (Ain, nothing, or the "Ain-Soph" of the Kabalists), and again, the "Spirit" (of God) that moves upon the face of the waters, in Genesis. All these are identical. Moreover, in Genesis, ch. i., v. 2, is placed as verse 1 in the secret Kabalistic texts, where it is followed by the Elohim "creating the Heaven and the Earth." This deliberate shifting of the order of the verses was necessary for monotheistic and Kabalistic purposes. Jeremiah's curse against those Elohim (gods) who have not created the Heavens and the Earth, ch. x., v. 11, shows that there were other Elohim who had.

II. The "Heavenly" Manu-Swayambhuva, who sprang from Swayambhu-Narayana, the "Self-existent," and Adam Kadmon of the Kabalists, and the androgyne MAN of Genesis ch. 1 are also identical.

III. Manu-swayambhuva is Brahma, or the Logos; and he is Adam Kadmon, who in Genesis iv., 5, separates himself into two halves, male and female, thus becoming Jah-Hovah or Jehovah-Eve; as Manu Swayambhuva or Brahma separates himself to become "Brahma-Viraj and Vach-Viraj," male and female; all the rest of the texts and versions being blinds.

IV. Vach is the daughter of Brahma and is named Sata-Rupa, "the hundred-formed," and Savitri, "generatrix," the mother of the gods and of all living. She is identical with Eve, "the mother (of all the lords or gods or) of all living." Besides this there are many other occult meanings.

What is written in "Isis," although scattered about and very cautiously expressed at the time, is correct:

Explaining esoterically Ezekiel's wheel,* it is said of Jodhevah or Jehovah: -

"When the ternary is taken in the beginning of the Tetragram, it expresses the divine creation spiritually, without any carnal sin; taken at its opposite end it expresses the latter: it is feminine. The name of Eva is composed of three letters, that of the primitive or heavenly

[[Footnote(s)]] -----

* "Isis Unveiled," Vol. II., p. 462.

[[Vol. 2, Page]] 129 THE JEWISH GOD-NAME.

Adam, is written with one letter, Jod or Yodh; therefore it must not be read Jehovah but Ieva, or Eve. The Adam of the first chapter is the spiritual, therefore pure, androgyne Adam Kadmon. When woman issues from the rib of the second Adam (of dust), the pure Virgo is separated, and falling "into generation," or the downward cycle, becomes Scorpio, emblem of sin and matter. While the ascending cycle points to the purely spiritual races, or the ten prediluvian patriarchs, the Prajapatis and Sephiroth are led on by the creative Deity itself, who is Adam Kadmon or Yod-cheva. Spiritually, the lower one (Jehovah) is that of the terrestrial races, led on by Enoch or Libra, the seventh; who, because he is half-divine, half-terrestrial, is said to have been taken by God alive. Enoch, Hermes, and Libra, are one."

This is only one of the several meanings. No need to remind the scholar that Scorpio is the astrological sign of the organs of reproduction. Like the Indian Rishis, the Patriarchs are all convertible in their numbers, as well as interchangeable. According to the subject to which they relate they become ten, twelve, seven or five, and even fourteen, and they have the same esoteric meaning as the Manus or Rishis.

Moreover, Jehovah, as may be shown, has a variety of etymologies, but only those are true which are found in the Kabala. [[hebrew]] (Ieva) is the Old Testament term, and was pronounced Ya-va. Inman suggests that it is contracted from the two words [[hebrew]] Yahoo-lah, Jaho-Jah, or Jaho is Jah. Punctuated it is [[hebrew]] which is, however, a Rabbinical caprice to associate it with the name Adoni or [[hebrew]], which has the same points. It is curious, and indeed hardly conceivable, that the Jews anciently read the name [[hebrew]] (Adoni), when they had so many names of which Jeho and Jah and Iah constituted a part. But so it was; and Philo Byblus, who gives us the so-called fragment of Sanchoniathon, spelt it in Greek letters [[IEUO]], Javo or Jevo. Theodoret says that the Samaritans pronounced Yahva, and the Jews Yahoo. Prof. Gibbs, however, suggests its punctuation thus: [[hebrew]] (Ye-hou-vih); and he cut the Gordian knot of its true occult meaning. For in this last form, as a Hebrew verb, it means "he will -- be."* It was also derived from the Chaldaic verb [[hebrew]] or [[hebrew]] eue (eva) or eua (Eva) "to be." And so it was, since from Enosh, the "Son of Man," only, were the truly human races to begin and "to be," as males and females. This statement receives further corroboration, inasmuch as Parkhurst makes the verb [[hebrew]] to mean: (1) "To

[[Footnote(s)]] -----

* See for comparison Hosea, xii. 6, where it is so punctuated.

[[Vol. 2, Page]] 130 THE SECRET DOCTRINE.

fall down" (i.e. into generation or matter); and (2) "To be, to continue" -- as a Race. The aspirate of the word eua (Eva) "to be" being [[hebrew]] Heve (Eve), which is the feminine of [[hebrew]] and the same as Hebe, the Grecian goddess of youth and the Olympian bride of Heracles, makes the name Jehovah appear still more clearly in its primitive double-sexed form.

Finding in Sanskrit such syllables as Jah and Yah, e.g., Jah (navi) "Ganges" and Jagan-natha, "Lord of the World," it becomes clear why Mr. Rawlinson is so very confident in his works of an Aryan or Vedic influence on the early mythology of Babylon. Nor is it to be much wondered at that the alleged ten tribes of Israel disappeared during the captivity period, without leaving a trace behind them, when we are informed that the Jews had de facto but two tribes -- those of Judah and of Levi. The Levies, moreover, were not a tribe at all, but a priestly caste. The descendants have only followed their progenitors, the various patriarchs, into thin, sidereal air. There were Brahms and A-brahms, in days of old, truly, and before the first Jew had been born. Every nation held its first god and gods to be androgynous; nor could it be otherwise, since they regarded their distant primeval progenitors, their dual-sexed ancestors, as divine Beings and Gods, just as do the Chinese to this day. And they were divine in one sense, as also were their first human progeny, the "mind-born" primitive humanity, which were most assuredly bi-sexuals as all the more ancient symbols and traditions show. Under the emblematical devices and peculiar phraseology of the priesthood of old, lie latent hints of sciences as yet undiscovered during the present cycle. Well acquainted as may be a scholar with the hieratic writing and hieroglyphical system of the Egyptians, he must first of all learn to sift their records. He has to assure himself, compasses and rule in hand, that the picture writing he is examining fits, to a line, certain fixed geometrical figures which are the hidden keys to such records, before he ventures on an interpretation."

"But there are myths which speak for themselves. In this class we may include the double-sexed first creators of every Cosmogony. The Greek Zeus-Zen (AEther), and Chthonia (the chaotic earth) and Metis (water), his wives; Osiris and Isis-Latona -- the former god also representing AEther, the first emanation of the Supreme Deity, Amun, the primeval source of Light; the goddess Earth and Water again; Mithras, the rock-born god, the symbol of the male mundane fire, or the personified primordial light, and Mithra, the fire goddess, at once his mother and his wife; the pure element of fire (the active, or male principle) regarded as light and heat, in conjunction with Earth and Water, or Matter, the female or passive element of cosmical generation" -- all these are records of the primeval divine Hermaphrodite.

[[Vol. 2, Page]] 131 THE SWAN AND THE EGG.

STANZA VI.
THE EVOLUTION OF THE "SWEAT-BORN."

§§ (22) The evolution of the three races continued. (23) The second race creates the Third and perishes.

22. THEN THE SECOND EVOLVED THE SWEAT-BORN, THE THIRD (Race). THE SWEAT GREW, ITS DROPS GREW, AND THE DROPS BECAME HARD AND ROUND. THE SUN WARMED IT; THE MOON COOLED AND SHAPED IT; THE WIND FED IT UNTIL ITS RIPENESS. THE WHITE SWAN FROM THE STARRY VAULT (the Moon), OVERSHADOWED THE BIG DROP. THE EGG OF THE FUTURE RACE, THE MAN-SWAN (Hamsa) OF THE LATER THIRD (a). FIRST MALE-FEMALE, THEN MAN AND WOMAN (b).

(a) The text of the Stanza clearly implies that the human embryo was nourished ab extra by Cosmic forces, and that the "Father-Mother" furnished apparently the germ that ripened: in all probability a "sweat-born egg," to be hatched out, in some mysterious way, disconnected from the "double" parent. It is comparatively easy to conceive of an oviparous humanity, since even now man is, in one sense, "egg-born." Magendie, moreover, in his *Precis Elementaire de Physiologie*, citing "a case where the umbilical cord was ruptured and perfectly cicatrized," yet the infant was born alive, pertinently asks, "How was the circulation carried on in this organ?" On the next page he says: "Nothing is at present known respecting the use of digestion in the foetus;" and respecting its nutrition, propounds this query: "What, then, can we say of the nutrition of the foetus? Physiological works contain only vague conjectures on this point." "Ah, but," the sceptic may urge, "Magendie's book belongs to the last generation, and Science has since made such strides that his stigma of ignorance can no longer be fixed upon the profession." Indeed; then let us turn to a very great authority upon Physiology, viz., Sir M. Foster (*Text-Book of Physiology*, third edition, 1879, p. 623); and to the disadvantage of modern Science we shall find him saying, "Concerning the rise and development of the functional activities of the embryo, our knowledge is almost a blank. We know scarcely anything about the various steps by which the primary fundamental qualities of the protoplasm of the ovum are differentiated into the complex phenomena which we have attempted in

[[Vol. 2, Page]] 132 THE SECRET DOCTRINE.

this book to explain." The students of Trin. Coll. Cantab. will now kindly draw a veil before the statue of Hygeia and bandage the eyes of the busts of Galen and Hippocrates, lest they look reproachfully at their degenerate descendants. One further fact we must note. Sir M. Foster is discreetly silent about the case of the ruptured umbilical cord cited by his great French confrere.

This is a very curious statement as explained in the Commentaries. To make it clear: The First Race having created the Second by "budding," as just explained, the Second Race gives birth to the Third -- which itself is separated into three distinct divisions, consisting of men differently procreated. The first two of these are produced by an oviparous method, presumably unknown to modern Natural History. While the early sub-races of the Third Humanity procreated their species by a kind of exudation of moisture or vital fluid, the drops of which coalescing formed an oviform ball -- or shall we say egg? -- which served as an extraneous vehicle for the generation therein of a foetus and child, the mode of procreation by the later races changed, in its results at all events. The little ones of the earlier races were entirely sexless -- shapeless even for all one knows*; but those of the later races were born androgynous. It is in the Third Race that the separation of sexes occurred. From being previously a-sexual, Humanity became distinctly hermaphrodite or bi-sexual; and finally the man-bearing eggs began to give birth, gradually and almost imperceptibly in their evolutionary development, first, to Beings in which one sex predominated over the other, and, finally, to distinct men and women. And now let us search for corroboration of these statements in the religious legends of East and West. Let us take the "Egg-born Race" first. Think of Kasyapa, the Vedic sage, and the most prolific of creators. He was the son of Marichi, Brahma's mind-born son; and he is made to become the father of the Nagas, or Serpents, among other beings. Exoterically, the Nagas are semi-divine beings which have a human face and the tail of a serpent. Yet there was a race of Nagas, said to be a thousand in number only, born or rather sprung from Kadra, Kasyapa's wife, for the purpose of peopling Patala, which is undeniably America, as will be shown; and there was a NAGA-Dwipa, one of the seven divisions of Bharata-Varsha, India, inhabited by a people bearing the same name, who are allowed, even by some Orientalists, to be historical, and to have left many a trace behind them to this day.

Now the point most insisted upon at present is that, whatever origin be claimed for man, his evolution took place in this order: (1) Sexless, as all the earlier forms are; (2) then, by a natural transition, he became,

[[Footnote(s)]] -----

* See the "Timaeus."

[[Vol. 2, Page]] 133 BI-SEXUAL REPRODUCTION.

"a solitary hermaphrodite," a bi-sexual being; and (3) finally separated and became what he is now. Science teaches us that all the primitive forms, though sexless, "still retained the power of undergoing the processes of A-Sexual multiplication;" why, then, should man be excluded from that law of Nature? Bi-sexual reproduction is an evolution, a specialized and perfected form on the scale of matter of the fissiparous act of reproduction. Occult teachings are pre-eminently panspermic, and the early history of humanity is hidden only "from ordinary mortals;" nor is the history of the primitive Races buried from the Initiates in the tomb of time, as it is for profane science. Therefore, supported on the one hand by that science which shows to us progressive development and an internal cause for every external modification, as a law in Nature; and, on the other hand, by an implicit faith in the wisdom -- we may say pansophia even -- of the universal traditions gathered and preserved by the Initiates, who have perfected them into an almost faultless system -- thus supported, we venture to state the doctrine clearly.

In an able article, written some fifteen years ago, our learned and respected friend Prof. Alex. Wilder, of New York, shows the absolute logic and necessity of believing "The Primeval Race Double-Sexed," and gives a number of scientific reasons for it.* He argues firstly, "that a large part of the vegetable creation exhibits the phenomenon of bisexuality . . . the Linnaean classification enumerating thus almost all plants. This is the case in the superior families of the vegetable kingdoms as much as in the lower forms, from the Hemp to the Lombardy Poplar and Ailanthus. In the animal kingdom, in insect life, the moth generates a worm, as in the Mysteries the great secret was expressed: "Taurus Draconem genuit, et Taurum Draco." The coral-producing family, which, according to Agassiz, 'has spent many hundreds of thousands of years, during the present geological period, in building out the peninsula of Florida . . . produce their offspring from themselves like the buds and ramifications in a tree.' Bees are somewhat in the same line . . . The Aphides or plant lice keep house like Amazons, and virgin parents perpetuate the Race for ten successive generations."

What say the old sages, the philosopher-teachers of antiquity. Aristophanes speaks thus on the subject in Plato's "Banquet": "Our nature of old was not the same as it is now. It was androgynous, the form and name partaking of, and being common to both the male and female. . . . Their bodies were round, and the manner of their running

[[Footnote(s)]] -----

[[Vol. 2, Page]] 134 THE SECRET DOCTRINE.

circular.* They were terrible in force and strength and had prodigious ambition. Hence Zeus divided each of them into two, making them weaker; Apollo, under his direction, closed up the skin."

Meshia and Meshiane were but a single individual with the old Persians. "They also taught that man was the product of the tree of life, growing in androgynous pairs, till they were separated at a subsequent modification of the human form.**"

In the Toleduth (generation) of Adam, the verse "God created (bara, brought forth) man in his image, in the image of God created he him, male and female created he them," if read esoterically will yield the true sense, viz.: "The Elohim (Gods) brought forth from themselves (by modification) man in their image . . . created they him (collective humanity, or Adam), male and female created he (collective deity) them."*** This will show the esoteric point. The sexless Race was their first production, a modification of and from themselves, the pure spiritual existences; and this was Adam solus. Thence came the second Race: Adam-Eve or Jod-Heva, inactive androgynes; and finally the Third, or the "Separating Hermaphrodite," Cain and Abel, who produce the Fourth, Seth-Enos, etc. It is that Third, the last semi-spiritual race, which was also the last vehicle of the divine and innate Wisdom, ingenerate in the Enochs, the Seers of that Mankind. The Fourth, which had tasted from the fruit of the Tree of Good and Evil -- Wisdom united already to earthy, and therefore impure, intelligence

**** had consequently to acquire that Wisdom by initiation and great struggle. And the union of Wisdom and Intelligence, the former ruling the latter, is called in the Hermetic books "the God possessing the double fecundity of the two sexes." Mystically Jesus was held to be man-woman. See also in the Orphic hymns, sung during the Mysteries, we find:

[[Footnote(s)]] -----

* Compare Ezekiel's vision (chap. i) of the four divine beings who "had the likeness of a man" and yet had the appearance of a wheel, "when they went they went upon their four sides . . . for the spirit of the living creature was in the wheel."

** See Prof. Wilder's Essay "The Primeval Race Double-Sexed."

*** Eugibinus, a Christian, and the Rabbis Samuel, Manasseh ben Israel, and Maimonides taught that "Adam had two faces and one person, and from the beginning he was both male and female -- male on one side and female on the other (like Manu's Brahma), but afterwards the parts were separated." The one hundred and thirty-ninth Psalm of David recited by Rabbi Jeremiah ben Eliazar is evidence of this. "Thou hast fashioned me behind and before," not beset as in the Bible, which is absurd and meaningless, and this shows, as Prof. Wilder thinks, "that the primeval form of mankind was androgynous."

**** See the union of Chochmah, Wisdom, with Binah, Intelligence, or Jehovah, the Demiurge, called Understanding in the Proverbs of Solomon, ch. vii. Unto men Wisdom (divine occult Wisdom) crieth: "Oh, ye simple, understand Wisdom; and ye fools, be of an understanding heart." It is spirit and matter, the nous and the psyche; of the latter of which St. James says that it is "earthly, sensual, and devilish."

[[Vol. 2, Page]] 135 THE VIRGIN THIRD RACE.

"Zeus is a male, Zeus is an immortal maid." The Egyptian Ammon was the goddess Neith, in his other half. Jupiter has female breasts, Venus is bearded in some of her statues, and Ila, the goddess, is also Su-Dyumna, the god, as Vaivasvata's progeny.

"The name Adam," says Professor A. Wilder, "or man, itself implies this double form of existence. It is identical with Athamas, or Thomas (Tamil Tam), which is rendered by the Greek Didumos, a twin; if, therefore, the first woman was formed subsequently to the first man, she must, as a logical necessity, be 'taken out of man' . . . and the side which the Elohim had taken from man, 'made he a woman' (Gen. ii.). The Hebrew word here used is Tzala, which bears the translation we have given. It is easy to trace the legend in Berosus, who says that Thalath (the Omoroca, or Lady of Urka) was the beginning of creation. She was also Melita, the queen of the Moon. . . . The two twin births of Genesis, that of Cain and Abel, and of Esau and Jacob, shadow the same idea. The name 'Hebel' is the same as Eve, and its characteristic seems to be feminine," continues the author. "Unto thee shall be his desire," said the Lord God to Cain, "and thou shalt rule over him." The same language had been uttered to Eve: "Thy desire shall be to thy husband, and he shall rule over thee." . . .

Thus the pristine bi-sexual unity of the human Third Root-Race is an axiom in the Secret Doctrine. Its virgin individuals were raised to "Gods," because that Race represented their "divine Dynasty." The moderns are satisfied with worshipping the male heroes of the Fourth Race, who created gods after their own sexual image, whereas the gods of primeval mankind were "male and female."

As stated in Book I, the humanities developed coordinately, and on parallel lines with the four Elements, every new Race being physiologically adapted to meet the additional element. Our Fifth Race is rapidly approaching the Fifth Element -- call it interstellar ether, if you will -- which has more to do, however, with psychology than with physics. We men have learned to live in every climate, whether frigid or tropical, but the first two Races had nought to do with climate, nor were they subservient to any temperature or change therein. And thus, we are taught, men lived down to the close of the Third Root-Race, when eternal spring reigned over the whole globe, such as is now enjoyed by the inhabitants of Jupiter; a "world," says M. Flammarion, "which is not subject like our own to the vicissitudes of seasons nor to abrupt alternations of temperature, but which is enriched with all the treasures of eternal spring." ("Pluralite des Mondes," p. 69.) Those astronomers who maintain that Jupiter is in a molten condition, in our sense of the term, are invited to settle their dispute with this learned French

[[Vol. 2, Page]] 136 THE SECRET DOCTRINE.

Astronomer.* It must, however, be always borne in mind that the "eternal spring" referred to is only a condition cognised as such by the Jovians. It is not "spring" as we know it. In this reservation is to be found the reconciliation between the two theories here cited. Both embrace partial truths.

It is thus a universal tradition that mankind has evolved gradually into its present shape from an almost transparent condition of texture, and neither by miracle nor by sexual intercourse. Moreover, this is in full accord with the ancient philosophies; from those of Egypt and India with their Divine Dynasties down to that of Plato. And all these universal beliefs must be classed with the "presentiments" and "obstinate conceptions," some of them ineradicable, in popular faiths. Such beliefs, as remarked by Louis Figuier, are "frequently the outcome of the wisdom and observation of an infinite number of generations of men." For, "a tradition which has an uniform and universal existence,

[[Footnote(s)]] -----

* An hypothesis evolved in 1881 by Mr. Mattieu Williams seems to have impressed Astronomers but little. Says the author of "The Fuel of the Sun," in Knowledge, Dec. 23, 1881: "Applying now the researches of Dr. Andrews to the conditions of Solar existence . . . I conclude that the Sun has no nucleus, either solid, liquid, or gaseous, but is composed of

dissociated matter in the critical state, surrounded, first, by a flaming envelope, due to the recombination of the dissociated matter, and outside of this, by another envelope of vapours due to this combination."

This is a novel theory to be added to other hypotheses, all scientific and orthodox. The meaning of the "critical state" is explained by Mr. M. Williams in the same journal (Dec. 9, 1881), in an article on "Solids, Liquids, and Gases." Speaking of an experiment by Dr. Andrews on carbonic acid, the scientist says that "when 88 [[degrees]] is reached, the boundary between liquid and gas vanished; liquid and gas have blended into one mysterious intermediate fluid; an indefinite fluctuating something is there filling the whole of the tube -- an etherealised liquid or a visible gas. Hold a red-hot poker between your eye and the light; you will see an upflowing wave of movement of what appears like liquid air. The appearance of the hybrid fluid in the tube resembles this, but is sensibly denser, and evidently stands between the liquid and gaseous states of matter, as pitch or treacle stands between solid and liquid."

The temperature at which this occurs has been named by Dr. Andrews the "critical temperature"; here the gaseous and the liquid states are "continuous," and it is probable that all other substances capable of existing in both states have their own particular critical temperatures.

Speculating further upon this "critical" state, Mr. Mattieu Williams emits some quite occult theories about Jupiter and other planets. He says: "Our notions of solids, liquids, and gases are derived from our experiences of the state of matter here upon this Earth. Could we be removed to another planet, they would be curiously changed. On Mercury water would rank as one of the condensible gases; on Mars, as a fusible solid; but what on Jupiter?"

"Recent observations justify us in regarding this as a miniature sun, with an external envelope of cloudy matter, apparently of partially-condensed water, but red-hot, or probably still hotter within. His vaporous atmosphere is evidently of enormous depth, and the force of gravitation being on his visible outer surface two-and-a-half [[Footnote continued on next page]]

[[Vol. 2, Page]] 137 EGYPTIAN BELIEF.

has all the weight of scientific testimony."* And there is more than one such tradition in the Puranic allegories, as has been shown. Moreover, the doctrine that the first Race of mankind was formed out of the chhayas (astral images) of the Pitris, is fully corroborated in the Zohar. "In the Tzalam (shadow image) of Elohim (the Pitris), was made Adam (man). (Cremona, Ed. iii., 76a; Brody, Ed. iii., 159a; "Qabbalah," Isaac Myer, p. 420.)

It has been repeatedly urged as an objection that, however high the degree of metaphysical thought in ancient India, yet the old Egyptians had nothing but crass idolatry and zoolatry to boast of; Hermes, as alleged, being the work of mystic Greeks who lived in Egypt. To this, one answer can be given -- a direct proof that the Egyptians believed in the Secret Doctrine is, that it was taught to them at Initiation. Let the objectors open the "Eclogae Physicae et Ethicae" of Stobaeus, the Greek compiler of ancient fragments, who lived in the fifth century, A.D. The following is a transcription by him of an old Hermetic fragment, showing the Egyptian theory of the Soul. Translated word for word, it says:--

"From one Soul, that of ALL, spring all the Souls, which spread themselves as if purposely distributed through the world. These souls undergo many transformations; those which are already creeping creatures turn into aquatic animals; from these aquatic animals are derived land animals; and from the latter the birds. From the beings who live aloft in the air (heaven) men are born. On reaching that

[[Footnote(s)]] -----

[[Footnote continued from previous page]] times greater than that on our Earth's surface, the atmospheric pressure, in descending below this visible surface, must soon reach that at which the vapour of water would be brought to its critical condition. Therefore we may infer that the oceans of Jupiter are neither of frozen, liquid, nor gaseous water, but are oceans or atmospheres of critical water. If any fish or birds swim or fly therein, they must be very critically organized."

As the whole mass of Jupiter is 300 times greater than that of the Earth, and its compressing energy towards the centre proportional to this, its materials, if similar to those of the Earth, and no hotter, would be considerably more dense, and the whole planet would have a higher specific gravity; but we know by the movement of its satellites that, instead of this, its specific gravity is less than a fourth of that of the Earth. This justifies the conclusion that it is intensely hot; for even hydrogen, if cold, would become denser than Jupiter under such pressure.

"As all elementary substances may exist as solids, liquids, or gases, or, critically, according to the conditions of temperature and pressure, I am justified in hypothetically concluding that Jupiter is neither a solid, a liquid, nor a gaseous planet, but a critical planet, or an orb composed internally of associated elements in the critical state, and surrounded by a dense atmosphere of their vapours and those of some of their compounds such as water. The same reasoning applies to Saturn and other large and rarified planets."

It is gratifying to see how scientific imagination approaches every year more closely to the borderland of our occult teachings.

* "The Day After Death," p. 23.

[[Vol. 2, Page]] 138 THE SECRET DOCTRINE.

status of men, the Souls receive the principle of (conscious) immortality, become Spirits, then pass into the choir of gods."

23. THE SELF-BORN WERE THE CHHAYAS, THE SHADOWS FROM THE BODIES OF THE SONS OF TWILIGHT. NEITHER WATER NOR FIRE COULD DESTROY THEM. THEIR SONS WERE (so destroyed) (a).

(a) This verse cannot be understood without the help of the Commentaries. It means that the First Root-Race, the "Shadows" of the Progenitors, could not be injured, or destroyed by death. Being so ethereal and so little human in constitution, they could not be affected by any element -- flood or fire. But their "Sons," the Second Root-Race, could be and were so destroyed. As the "progenitors" merged wholly in their own astral bodies, which were their progeny; so that progeny was absorbed in its descendants, the "Sweat-born." These were the second Humanity -- composed of the most heterogeneous gigantic semi-human monsters -- the first attempts of material nature at building human bodies. The ever-blooming lands of the Second Continent (Greenland, among others) were transformed, in order, from Edens with their eternal spring, into hyperborean Hades. This transformation was due to the displacement of the great waters of the globe, to oceans changing their beds; and the bulk of the Second Race perished in this first great throes of the evolution and consolidation of the globe during the human period. Of such great cataclysms there have already been four.* And we may expect a fifth for ourselves in due course of time.

A FEW WORDS ABOUT "DELUGES" AND "NOAHS."

The accounts in the various Puranas about our Progenitors are as contradictory in their details as everything else. Thus while, in the Rig Veda, Ida (or Ila) is called the Instructress of Vaivasvata Manu, Sayana makes of her a goddess presiding over the Earth, and the Sathapatha Brahmana shows her to be the Manu's daughter, an offering of his sacrifice, and, later on, his (Vaivasvata's) wife, by whom he begat the race of Manus. In the Puranas, again, she is Vaivasvata's daughter, yet the wife of Budha (Wisdom), the illegitimate son of the Moon (Soma) and the planet Jupiter's (Brihaspati's) wife, Tara. All this, which seems a jumble to the profane, is full of philosophical meaning to the Occultist. On the very face of the narrative a secret and sacred meaning is per-

[[Footnote(s)]] -----

* The first occurred when what is now the North Pole was separated from the later Continents.

[[Vol. 2, Page]] 139 WHAT THE FLOOD MEANS.

ceivable, all the details, however, being so purposely mixed up that the experienced eye of an Initiate alone can follow them and place the events in their proper order.

The story as told in the "Mahabharata" strikes the key-note, and yet it needs to be explained by the secret sense contained in the Bhagavad Gita. It is the prologue to the drama of our (Fifth) Humanity. While Vaivasvata was engaged in devotion on the river bank, a fish craves his protection from a bigger fish. He saves and places it in a jar, where, growing larger and larger, it communicates to him the news of the forthcoming deluge. It is the well-known "Matsya Avatar," the first Avatar of Vishnu, the Dagon* of the Chaldean Xisuthrus, and many other things besides. The story is too well known to need repetition. Vishnu orders a ship to be built, in which Manu is said to be saved along with the seven Rishis, the latter, however, being absent from other texts. Here the seven Rishis stand for the seven Races, the seven principles, and various other things; for there is again a double mystery involved in this manifold allegory.

We have said elsewhere that the great Flood had several meanings, and that it referred, as also does the FALL, to both spiritual and physical, cosmic and terrestrial, events: as above, so it is below. The ship or ark -- navis -- in short, being the symbol of the female generative principle, is typified in the heavens by the Moon, and on Earth by the Womb: both being the vessels and bearers of the seeds of life and being, which the sun, or Vishnu, the male principle, vivifies and fructifies.** The First Cosmic Flood refers to primordial creation, or the formation of Heaven and the Earths; in which case Chaos and the great Deep stand for the "Flood," and the Moon for the "Mother," from whom proceed all the life-germs.*** But the terrestrial Deluge and

[[Footnote(s)]] -----

* We must remember that at the head of all the Babylonian gods were Ea, Anu, and the primeval Bel; and that Ea, the first, was the God of Wisdom, the great "God of Light" and of the DEEP, and that he was identified with Oannes, or the Biblical Dagon -- the man-fish who rose out of the Persian Gulf.

** See Part. II. § "The Holy of Holies."

*** It is far later on that the Moon became a male god; with the Hindus it was Soma, with the Chaldeans Nannak or Nannar, and Sin, the son of Mulil, the older Bel. The "Akkadians" called him the "Lord of Ghosts"; and he was the god of Nipoor (Niffer) in northern Babylonia. It is Mulil who caused the waters of the Flood to fall from heaven on Earth, for which Xisuthrus would not allow him to approach his altar. As the modern Assyriologists have now ascertained, it is the northern Nipoor which is the centre whence Chaldean (black) magic spread; and Eridu (the Southern) which was the primitive seat of the worship of the culture god, the god of divine wisdom -- the Sun-God being the supreme deity everywhere. With the Jews, the Moon is connected with Israel's Jehovah and his seed, because Ur was the chief seat of the worship of the Moon-god, and because Abraham is said to have come from Ur, when from A-bra(h)m, he becomes Abraham.

[[Vol. 2, Page]] 140 THE SECRET DOCTRINE.

its story has also its dual application. In one case it has reference to that mystery when mankind was saved from utter destruction, by the mortal woman being made the receptacle of the human seed at the end of the Third Race,* and in the other to the real and historical Atlantean submersion. In both cases the "Host" -- or the Manu which saved the seed -- is called Vaivasvata Manu. Hence the diversity between the Puranic and other versions; while in the Sathapatha Brahmana,

Vaivasvata produces a daughter and begets from her the race of Manu; which is a reference to the first human Manushyas, who had to create women by will (Kriyasakti), before they were naturally born from the hermaphrodites as an independent sex, and who were, therefore, regarded as their creator's daughters. The Puranic accounts make of her (Ida or Ila) the wife of Budha (Wisdom), the latter version referring to the events of the Atlantean flood, when Vaivasvata, the great Sage on Earth, saved the Fifth Root-race from being destroyed along with the remnants of the Fourth.

This is shown very clearly in the Bhagavad Gita, where Krishna is made to say:--

"The Seven great Rishis, the four preceding Manus, partaking of my essence, were born from my mind: from them sprung (were born) the human races and the world." (Chapter X., verse 6).

Here the four preceding "Manus," out of the seven, are the four Races** which have already lived, since Krishna belongs to the Fifth Race, his death having inaugurated the Kali Yuga. Thus Vaivasvata

[[Footnote(s)]] -----

* When Narada, the virgin-ascetic, threatened to put an end to the human race by preventing Daksha's sons from procreating it.

** This is corroborated by a learned Brahmin. In his most excellent lectures on the Bhagavad Gita (see "Theosophist," April, 1887, p. 444) the lecturer says: "There is a peculiarity to which I must call your attention. He (Krishna) speaks here of four Manus. Why does he speak of four? We are now in the seventh Manvantara, that of Vaivasvata. If he is speaking of the past Manus, he ought to speak of six, but he only mentions four. In some commentaries an attempt has been made to interpret this in a peculiar manner. The word 'Chatvaraha' is separated from the word 'Manavaha,' and is made to refer to Sanaka, Sanandana, Sanatkumara, and Sanatsujata, who are also included among the mind-born sons of Prajapati. But this interpretation will lead to a most absurd conclusion, and make the sentence contradict itself. The persons alluded to in the text have a qualifying clause in the sentence. It is well known that Sanaka and the other three refused to create, though the other sons had consented to do so; therefore, in speaking of those persons from whom humanity has sprung into existence, it would be absurd to include those four also in the list. The passage must be interpreted without splitting the compound into two nouns. The number of Manus will then be four, and the statement would then contradict the Puranic account, though it would be in harmony with the occult theory. You will recollect that it is stated (in Occultism) that we are now in the Fifth Root-Race. Each Root-Race is considered as the Santhathi of a particular Manu. Now, the Fourth Race has passed, or, in other words, there have been four past Manus. . . . "

[[Vol. 2, Page]] 141 VARIOUS DELUGES.

Manu, the son of Surya (the Sun), and the saviour of our Race, is connected with the Seed of Life, both physically and spiritually. But, at present, while speaking of all, we have to concern ourselves only with the first two.

The "Deluge" is undeniably an universal tradition. "Glacial periods" were numerous, and so were the "Deluges," for various reasons. Stockwell and Croll enumerate some half dozen Glacial Periods and subsequent Deluges -- the earliest of all being dated by them 850,000, and the last about 100,000, years ago.* But which was our Deluge? Assuredly the former, the one which to this date remains recorded in the traditions of all the peoples, from the remotest antiquity; the one that finally swept away the last peninsulas of Atlantis, beginning with Ruta and Daitya and ending with the (comparatively) small island mentioned by Plato. This is shown by the agreement of certain details in all the legends. It was the last of its gigantic character. The little deluge, the traces of which Baron Bunsen found in Central Asia, and which he places at about 10,000 years B.C., had nothing to do with either the semi-universal Deluge, or Noah's flood -- the latter being a purely mythical rendering of old traditions -- nor even with the submersion of the last Atlantean island; at least, only a moral connection.

Our Fifth Race (the non-initiated portions), hearing of many deluges, confused them, and now know of but one. This one altered the whole aspect of the globe in its interchange and shifting of land and sea.

We may compare the traditions of the Peruvians:-- "The Incas, seven in number, have re-peopled the Earth after the deluge," they say (Coste I, IV., p. 19); Humboldt mentions the Mexican version of the same legend, but confuses somewhat the details of the still-preserved legend concerning the American Noah. Nevertheless, the eminent Naturalist mentions twice seven companions and the divine bird which preceded the boat of the Aztecs, and thus makes fifteen elect instead of the seven and the fourteen. This was written probably under some involuntary reminiscence of Moses, who is said to have mentioned fifteen grandsons of Noah, who escaped with their grandsire. Then again Xisuthrus, the Chaldean Noah, is saved and translated alive to heaven -- like Enoch -- with the seven gods, the Kabirim, or the seven divine Titans; again the Chinese Yao has seven figures which sail with him and which he will animate when he lands, and use for "human seed." Osiris, when he enters the ark, or solar boat, takes seven Rays with him, etc., etc.

Sanchoniathon makes the Aletae or Titans (the Kabirim) contemporary

[[Footnote(s)]] -----

* "Smithsonian Contributions to Knowledge," xviii.; "American Journal of Science," III., xi., 456; and Croll's "Climate and Time." Lemuria was not submerged by a flood, but was destroyed by volcanic action, and afterwards sank.

[[Vol. 2, Page]] 142 THE SECRET DOCTRINE.

with Agruerus, the great Phoenician god (whom Faber sought to identify with Noah*); further, it is suspected that the name of "Titan" is derived from Tit-Ain -- "the fountains of the chaotic abyss"*** (Tit-Theus, or Tityus is "the divine deluge"); and thus the Titans, who are seven, are shown to be connected with the Flood and the seven Rishis saved by Vaivasvata Manu.***

They are the sons of Kronos (Time) and Rhea (the Earth); and as Agruerus, Saturn and Sydyk are one and the same personage, and as the seven Kabiri are said to be the sons of Sydyk or Kronos-Saturn, the Kabiri and Titans are identical. For once the pious Faber was right in his conclusions when he wrote: "I have no doubt of the seven Titans and Kabiri being the same as the seven Rishis of the Hindu mythology (?), who are said to have escaped in a boat along with Manu, the head (?) of the family."

But he is less fortunate in his speculations when he adds "The Hindoos, in their wild legends have variously perverted the history of the Noachidae (? !), yet it is remarkable that they seem to have religiously adhered to the number seven."**** Hence Captain (Col.) Wilford very judiciously observes: that "Perhaps the seven Manus, the seven Brahmadicas and the seven Rishis are the same, and make only seven individual persons."***** The seven Brahmadicas were Prajapatis, or lords 'of the prajas or creatures.' From them mankind was born, and they are probably the same with the seven Manus. . . . These seven grand ancestors of the human race were created for the purpose of replenishing the Earth with inhabitants." (Asiatic Researches, Vol. V. p. 246); and Faber adds that: "the mutual resemblance of the Kabirs, the Titans, the Rishis, and the Noetic family, is too striking to be the effect of mere accident."*****

Faber was led into this mistake, and subsequently built his entire theory concerning the Kabiri, on the fact that the name of the scriptural

[[Footnote(s)]] -----

* Agruerus is Kronos, or Saturn, and the prototype of the Israelitish Jehovah. As connected with Argha, the Moon or Ark of salvation, Noah is mythologically one with Saturn. But then this cannot relate to the terrestrial flood. (But see Faber's "Kabiri," Vol. I, pp. 35, 43, and 45.)

** See *ibid.*, Vol. II., p. 240.

*** Sanchoniathon says that the Titans were the sons of Kronos, and seven in number; and he calls them fire-worshippers, Aletae (sons of Agni?), and diluvians. Al-ait is the god of fire.

**** Of which seven, let us remark, the Aryans, and not the Semites, were the originators, while the Jews got that number from the Chaldeans.

***** Seven individual sons of God, or Pitars and Pitris; also in this case the sons of Kronos or Saturn (Kala "time") and Arkites, like the Kabiri and Titans, as their name -- "lunar ancestors" -- shows, the Moon being the Ark, or Argha, on the watery abyss of space.

***** See "Kabiri," Vol. I., p. 131.

[[Vol. 2, Page]] 143 THE ARKITE SYMBOLS.

Japhet is on the list of the Titans contained in a verse of the Orphic hymns. According to Orpheus the names of the seven "Arkite" Titans (whom Faber refuses to identify with the impious Titans, their descendants) were Koeus, Kroeus, Phorcys, Kronos, Oceanus, Hyperion, and Iapetus:--

[[Koion te, Kroion te melan, Phorkun te krataion,
Kai Kronon, Okeanon d, 'Huperioa te lapeponet.]]
-- (Orph. apud Proclum. In Tim. lib. v. p. 295.

But why could not the Babylonian Ezra have adopted the name of Iapetus for one of Noah's sons? The Kabiri, who are the Titans, are also called Manes and their mother Mania, according to Arnobius. (*Adversum Gentes*, lib. III., p. 124.) The Hindus can therefore claim with far more reason that the Manes mean their Manus, and that Mania is the female Manu. (See *Ramayana*.) Mania is Ila or Ida, the wife and daughter of Vaivasvata Manu, from whom "he begat the race of Manus." Like Rhea, the mother of the Titans, she is the Earth (Sayana making her the goddess of the Earth), and she is but the second edition and repetition of Vach. Both Ida and Vach are turned into males and females; Ida becoming Sudyumna, and Vach, "the female Viraj," turning into a woman in order to punish the Gandharvas; one version referring to cosmic and divine theogony, the other to the later period. The Manes and Mania of Arnobius are names of Indian origin, appropriated by the Greeks and Latins and disfigured by them.

Thus it is no accident, but the result of one archaic doctrine common to all, of which the Israelites, through Ezra, the author of the modernised Mosaic books, were the latest adapters. So unceremonious were they with other people's property, that Berosus (*Antiquitates Libyae*, I, fol. 8), shows that Titea -- of whom Diodorus makes the mother of the Titans or Diluvians (See *Bibl. lib. III. p. 170*) -- was the wife of Noah. For this Faber calls him the "pseudo-Berosus," yet accepts the information in order to register one proof more that the pagans have borrowed all their gods from the Jews, by transforming patriarchal material. According to our humble opinion, this is one of the best proofs possible of exactly the reverse. It shows as clearly as facts can show, that it is the Biblical pseudo-personages which are all borrowed from pagan myths, if myths they must be. It shows, at any rate, that Berosus was well aware of the source of Genesis, and that it bore the same cosmic astronomical character as the allegories of Isis-Osiris, and the Ark, and other older "Arkite" symbols. For, Berosus says that "Titea magna" was afterwards called Aretia,* and worshipped with the Earth; and this

[[Footnote(s)]] -----

* Aretia is the female form of Artes (Egyptian Mars). Thence the Chaldean (and now Hebrew) word [[hebrew]] (Aretz) "Earth." The author of "Beitrag zur Kenntniss" (Art. under "Artes" Mars) quotes: "Addit Cedrenus (*Salem I., 3*): Stella Martis ab [[Footnote continued on next page]]

identifies "Titea," Noah's consort, with Rhea, the mother of the Titans, and with Ida -- both being goddesses who preside over the Earth, and the mothers of the Manus and Manes (or Tit-an-Kabiri). And "Titea-Aretia" was worshipped as Horchia, says the same Berosus, and this is a title of Vesta, goddess of the Earth. "Sicanus deificavit Aretiam, et nominavit eam lingua Janigena Horchiam." (Ibid. lib. V. fol. 64.)

Scarce an ancient poet of historic or prehistoric days who failed to mention the sinking of the two continents -- often called isles -- in one form or another. Hence the destruction, besides Atlantis, of the Phlegyae. (See Pausanias and Nonus, who both tell how:

"From its deep-rooted base the Phlegyan isle
Stern Neptune shook, and plunged beneath the waves
Its impious inhabitants."
-- Dionysius lib xviii. p. 319).

Faber felt convinced that the "insulae Phlegyae" were Atlantis. But all such allegories are more or less distorted echoes of the Hindu tradition about that great Cataclysm, which befell the Fourth, really human, though gigantic, Race, the one which preceded the Aryan. Yet, as just said, like all other legends, that of "the Deluge has more than one meaning. It refers in Theogony, to pre-cosmic transformations, to spiritual correlations -- however absurd the term may sound to a scientific ear -- and also to subsequent Cosmogony; to the great FLOOD of WATERS (matter) in CHAOS, awakened and fructified by those Spirit-Rays which were swamped by, and perished in, the mysterious differentiation -- a pre-cosmic mystery, the Prologue to the drama of Being. Anu, Bel, and Noah preceded Adam Kadmon, Adam the Red, and Noah; just as Brahma, Vishnu, and Siva preceded Vaivasvata and the rest." (See "Isis Unveiled," Vol. II., pp. 420 et seq., where one or two of the seven meanings are hinted at.)

All this goes to show that the semi-universal deluge known to geology (first glacial period) must have occurred just at the time allotted to it by the Secret Doctrine: namely, 200,000 years (in round numbers) after the commencement of our FIFTH RACE, or about the time assigned by Messrs. Croll and Stockwell for the first glacial period: i.e., about 850,000 years ago. Thus, as the latter disturbance is attributed by geologists and astronomers to "an extreme eccentricity of the Earth's

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Egyptiis vocatur Ertesi (plantare, generare). Significat autem hoc omnis generis procreationem et vivificationem, omnisque substantiae et materiae naturam et vim ordinantem atque procreantem." It is Earth as "source of being"; or, as explained by the author of "The Source of Measures," Arts is the same in Hebrew and Egyptian, and both combine the primeval idea of Earth as source; precisely as in the Hebrew itself, under another form, Adam and Madim, (Mars) are the same, and combine the idea of Earth with Adam under the form of H-Adam-H.

orbit," and as the Secret Doctrine attributes it to the same source, but with the addition of another factor, the shifting of the Earth's axis -- a proof of which may be found in the Book of Enoch,* if the veiled language of the Puranas is not understood -- all this should tend to show that the ancients knew something of the "modern discoveries" of Science. Enoch, when speaking of "the great inclination of the Earth," which "is in travail," is quite significant and clear.

Is not this evident? Nuah is Noah, floating on the waters in his ark; the latter being the emblem of the Argha, or Moon, the feminine principle; Noah is the "spirit" falling into matter. We find him, as soon as he descends upon the Earth, planting a vineyard, drinking of the wine, and getting drunk on it, i.e., the pure spirit becomes intoxicated as soon as it is finally imprisoned in matter. The seventh chapter of Genesis is only another version of the First. Thus, while the latter reads: "and darkness was upon the face of the deep. And the spirit of God moved upon the face of the waters," in ch. 7 it is said ". . . and the waters prevailed . . . and the ark went (with Noah, the spirit) upon the face of the waters." Thus Noah, if identical with the Chaldean Nuah, is the spirit vivifying matter, which latter is Chaos, represented by the DEEP, or the Waters of the Flood. In the Babylonian legend (the pre-cosmical blended with the terrestrial event) it is Ishtar (Astaroth or Venus, the lunar goddess) who is shut up in the ark and sends out "a dove in search of dry land." ("Isis Unveiled" Vol. II, pp. 423 and 424).

George Smith notes in the "Tablets," first the creation of the moon, and then that of the sun: "Its beauty and perfection are extolled, and the regularity of its orbit, which led to its being considered the type of a judge and the regulator of the world." If this story related simply to a cosmogonical cataclysm -- even were this latter universal -- why should the goddess Ishtar or Astoreth, the Moon, speak of the creation of the sun after the deluge? The waters might have reached as high as the mountain of Nizir (Chaldean version), or Jebel Djudi (the deluge mountains of the Arabian legend), or yet Ararat (of the Biblical narrative), and even the Himalaya (of the Hindu tradition), and yet not reach the sun: the Bible itself stopped short of such a miracle! It is evident that the deluge of the people who first recorded it had another meaning, less problematical and far more philosophical than that of an universal deluge, of which there are no geological traces whatever.

As all such Cataclysms are periodical and cyclical, and as Manu Vaivasvata figures as a generic character, under various circumstances and events (vide infra: "The Seven Manus of Humanity"), there seems to be no

[[Footnote(s)]] -----

* Chap. lxiv., Sect. xi.

serious objection to the supposition that the first "great flood" had an allegorical, as well as a cosmic meaning, and that it happened at the end of the Satya Yuga, the "age of Truth," when the Second Root Race, "The Manu with bones," made its primeval appearance as "the Sweat-Born."*

The Second Flood -- the so-called "universal" -- which affected the Fourth Root Race (now conveniently regarded by theology as "the accursed race of giants," the CAINITES, and "the sons of Ham") is that flood which was first perceived by geology. If one carefully compares the accounts in the various legends of the Chaldees and other exoteric works of the nations, it will be found that all of them agree with the orthodox narratives given in the Brahmanical books. And it may be perceived that while, in the first account, "there is no God or mortal yet on Earth," when Manu Vaivasvata lands on the Himavan; in the second, the Seven Rishis are allowed to keep him company: thus showing that whereas some accounts refer to the sidereal and cosmic FLOOD before the so-called creation, the others treat, one of the Great Flood of Matter on Earth, and the other of a real watery deluge. In the Satapatha Brahmana, Manu finds that "the Flood had swept away all living creatures, and he alone was left" -- i.e., the seed of life alone remained from the previous dissolution of the Universe, or Mahapralaya, after a "Day of Brahma"; and the Mahabharata refers simply to the geological cataclysm which swept away nearly all the Fourth Race to make room for the Fifth. Therefore is Vaivasvata Manu shown under three distinct attributes in our esoteric Cosmogony:** (a) as the "Root-Manu"

[[Footnote(s)]] -----

* All such expressions are explained in the "Anthropogenesis" of this Book, and elsewhere.

** One has to remember that, in the Hindu philosophy, every differentiated unit is such only through the cycles of Maya, being one in its essence with the Supreme or One Spirit. Hence arises the seeming confusion and contradiction in the various Puranas, and at times in the same Purana, about the same individual. Vishnu -- as the many-formed Brahma, and as Brahma (neuter) -- is one, and yet he is said to be all the 28 Vyasas (Vishnu Purana). "In every Dvapara (third) age, Vishnu, in the person of Vyasa, divides the Veda, which is one, into four and many portions. Twenty-eight times have the Vedas been arranged by the great Rishis in the Vaivasvata Manvantara, in the Dvapara Yuga . . . and, consequently, twenty-eight Vyasas have passed away . . . they who were all in the form of Veda-Vyasas, who were the Vyasas of their respective eras. . . ." (Book III., Ch. III.) "This world is Brahma in Brahma, from Brahma . . . nothing further to be known." Then, again . . . "There were in the First Manvantara seven celebrated sons of Vasishtha, who in the Third Manvantara, were sons of Brahma (i.e., Rishis), the illustrious progeny of Urja." This is plain: the Humanity of the First Manvantara is that of the seventh and of all the intermediate ones. The mankind of the First Root-Race is the mankind of the second, third, fourth, fifth, etc. To the last it forms a cyclic and constant reincarnation of the Monads belonging to the Dhyan Chohans of our Planetary chain.

[[Vol. 2, Page]] 147 AGREEMENT OF DATES.

on Globe A in the First Round; (b) as the "seed of life" on Globe D in the Fourth Round; and (c) as the "Seed of Man" at the beginning of every Root-Race -- in our Fifth Race especially. The very commencement of the latter witnesses, during the Dvapara Yuga,* the destruction of the accursed sorcerers; "of that island (Plato speaking only of its last island) beyond the Pillars of Hercules, in the Atlantic Ocean, from which there was an easy transition to other islands in the neighbourhood of another large Continent" (America). It is this "Atlantic" land which was connected with the "White Island," and this White Island was Ruta; but it was not the Atala and the "White Devil" of Colonel Wilford (see "Asiatic Researches," Vol. VIII., p. 280), as already shown. It may well be remarked here that the Dvapara Yuga lasts 864,000 years, according to the Sanskrit texts; and that, if the Kali Yuga began only about 5,000 years ago, that it is just 869,000 since that destruction took place. Again, these figures are not very widely different from those given by the geologists, who place their "glacial period" 850,000 years ago.

Then "a woman was produced who came to Manu and declared herself his daughter, with whom he lived and begat the offspring of Manu." This refers to the physiological transformation of sexes during the Third Root-Race. And the allegory is too transparently clear to need much explanation. Of course, as already remarked, in the separation of sexes an androgyne being was supposed to divide his body into two halves (as in the case of Brahma and Vach, and even of Adam and Eve), and thus the female is, in a certain sense, his daughter, just as he will be her son, "the flesh of his (and her) flesh and the bone of his (and her) bone." Let it be also well remembered that not one of our Orientalists have yet learned to discern in those "contradictions and amazing nonsense," as some call the Puranas, that a reference to a Yuga may mean a Round, a Root-Race, and often a Sub-Race, as well as form a page torn out of pre-cosmic theogony. This double and triple meaning is proved by various references to one and the same individual apparently, under an identical name, while it refers, in fact, to events divided by entire Kalpas. A good instance is that of Ila. She is first represented as one thing and then as another. In the exoteric legends it is said that Manu Vaivasvata, desiring to create sons, instituted a sacrifice to Mitra and Varuna; but, through a mistake of the officiating

[[Footnote(s)]] -----

* The Dvapara Yuga differs for each Race. All races have their own cycles, which fact causes a great difference. For instance, the Fourth Sub-Race of the Atlanteans was in its Kali-Yug, when destroyed, whereas the Fifth was in its Satya or Krita Yuga. The Aryan Race is now in its Kali Yuga, and will continue to be in it for 427,000 years longer, while various "family Races," called the Semitic, Hamitic, etc., are in their own special cycles. The forthcoming 6th Sub Race -- which may begin very soon -- will be in its Satya (golden) age while we reap the fruit of our iniquity in our Kali Yuga.

[[Vol. 2, Page]] 148 THE SECRET DOCTRINE.

Brahman, a daughter only was obtained -- Ila. Then, "through the favour of the gods," her sex is changed and she becomes a man, Su-dyumna. Then she is again turned into a woman, and so on; the fable adding that Siva and his consort were pleased that "she would be male one month and female another." This has a direct reference to the Third Root-Race, whose men were androgynes. But some very learned Orientalists think (see "Hindu Classical Dictionary") and

have declared that "Ila was primarily food, nourishment, or a libation of milk; thence a stream of praise, personified as the goddess of speech." The "profane" are not told, however, the reason why "a libation of milk," or "a stream of praise," should be male and female by turn: unless, indeed there is some "internal evidence" which the occultists fail to perceive.

In their most mystical meanings, the union of Swayambhuva Manu with Vach-Sata-Rupa, his own daughter (this being the first "euhemerization" of the dual principle of which Vaivasvata Manu and Ila are a secondary and a third form), stands in Cosmic symbolism as the Root-life, the germ from which spring all the Solar Systems, the worlds, angels and the gods. For, as says Vishnu:--

"From Manu all creation, gods, Asuras, man must be produced,
By him the world must be created, that which moves and moveth not. . . ."

But we may find worse opponents than even the Western Scientists and Orientalists. If, on the question of figures, Brahmins may agree with our teaching, we are not so sure that some of them, orthodox conservatives, may not raise objections to the modes of procreation attributed to their Pitar Devas. We shall be called upon to produce the works from which we quote, while they will be invited by us to read their own Puranas a little more carefully and with an eye to the esoteric meaning. And then, we repeat again, they will find, under the veil of more or less transparent allegories, every statement made herein corroborated by their own works. One or two instances have already been given as regards the appearance of the Second Race, which is called the "Sweat-Born." This allegory is regarded as a fairy-tale, and yet it conceals a psycho-physiological phenomenon, and one of the greatest mysteries of Nature.

But in view of the chronological statements made herein, it is natural to ask:--

COULD MEN EXIST 18,000,000 YEARS AGO?

To this Occultism answers in the affirmative, notwithstanding all scientific objectors. Moreover, this duration covers only the Vaivasvata-Manu Man, i.e., the male and female entity already separated into

[[Vol. 2, Page]] 149 HOW OLD IS HUMANITY?

distinct sexes. The two and a half Races that preceded that event may have lived 300,000,000 years ago for all that science can tell. For the geological and physical difficulties in the way of the theory could not exist for the primeval, ethereal man of the Occult teachings. The whole issue of the quarrel between the profane and the esoteric sciences depends upon the belief in, and demonstration of, the existence of an astral body within the physical, the former independent of the latter. Paul d'Assier, the Positivist, seems to have proven the fact pretty plainly,* not to speak of the accumulated testimony of the ages, and that of the modern spiritualists and mystics. It will be found difficult to reject this fact in our age of proofs, tests, and ocular demonstrations.

The Secret Doctrine maintains that, notwithstanding the general cataclysms and disturbances of our globe, which -- owing to its being the period of its greatest physical development, for the Fourth Round is the middle-point of the life allotted to it -- were far more terrible and intense than during any of the three preceding Rounds (the cycles of its earlier psychic and spiritual life and of its semi-ethereal conditions) physical Humanity has existed upon it for the last 18,000,000 years.** This period was preceded by 300,000,000 years of the mineral and vegetable development. To this, all those who refuse to accept the theory of a "boneless," purely ethereal, man, will object. Science, which knows only of physical organisms, will feel indignant; and materialistic theology still more so. The first will object on logical and reasonable grounds, based on the preconception that all animate organisms have always existed on the same plane of materiality in all the ages; the last on a tissue of most absurd fictions. The ridiculous claim usually brought forward by theologians, is based on the virtual assumption that mankind (read Christians) on this planet have the honour of being the only human beings in the whole Kosmos, who dwell on a globe, and that they are consequently, the best of their kind.***

[[Footnote(s)]] -----

* "Posthumous Humanity" -- translated by H. S. Olcott, London, 1887.

** Professor Newcomb says: "The heat evolved by contraction would last only 18,000,000 years" ("Popular Astronomy," p. 500); but "a temperature permitting the existence of water could not be reached earlier than 10,000,000 years ago" (Winchell's "World-Life," p. 356). But Sir W. Thomson says that the whole age of the incrustation of the Earth is 18,000,000 years, though, this year, he has again altered his opinion and allows only 15,000,000 years as the age of the Sun. As will be shown in the Addenda, the divergence of scientific opinions is so great that no reliance can ever be placed upon scientific speculation.

*** The essay on "The Plurality of Worlds" (1853) -- an anonymous work, yet well known to have been the production of Dr. Whewell -- is a good proof of this. No Christian ought to believe in either the plurality of worlds or the geological age of the globe, argues the Author; because, if it is asserted that this world is only one among the many of its kind, which are all the work of God, as it is itself; that all are the seat [[Footnote continued on next page]]

[[Vol. 2, Page]] 150 THE SECRET DOCTRINE.

The Occultists, who believe firmly in the teachings of the mother-philosophy, repel the objections of both theologians and scientists. They maintain, on their side, that, during those periods when there must have been insufferable heat, even at the two poles, successive floods, upheaval of the valleys and constant shifting of the great waters and seas, none of these circumstances could form an impediment to human life and organization, such as is assigned by them to the early mankind. Neither the heterogeneity of ambient regions, full of deleterious gases, nor the perils of a crust hardly consolidated, could prevent the First and Second Races from making their appearance even during the Carboniferous, or the Silurian age itself.

Thus the Monads destined to animate future Races were ready for the new transformation. They had passed their phases of immetalization, of plant and animal life, from the lowest to the highest, and were waiting for their human, more intelligent form. Yet, what could the plastic modellers do but follow the laws of evolutionary Nature? Could they, as claimed by the Biblical dead-letter, form "Lord-God"-like, or as Pygmalion in the Greek allegory, Adam-Galatea out of volcanic dust, and breathe a living soul into Man? No: because the soul was already there, latent in its Monad, and needed but a coating. Pygmalion, who fails to animate his statue, and Bahak-Zivo of the Nazarean Gnostics, who fails to construct "a human soul in the creature," are, as conceptions, far more philosophical and scientific than Adam, taken in the dead-letter sense, or the Biblical Elohim-Creators. Esoteric philosophy, which teaches spontaneous generation -- after the Sishta and Prajapati have thrown the seed of life on the Earth -- shows the lower angels able to construct physical man only, even with the help of Nature, after having evolved the ethereal form out of themselves, and leaving the physical form to evolve gradually from its ethereal, or what would now be called, protoplasmic model.

This will again be objected to: "Spontaneous Generation" is an exploded theory, we shall be told. Pasteur's experiments disposed of it twenty years ago, and Professor Tyndall is against it. Well, suppose he is? He ought to know that, should spontaneous generation

[[Footnote(s)]] -----

[[Footnote continued from previous page]] of life, all the realm and dwelling of intelligent creatures endowed with will, subject to law and capable of free-will; then, it would become extravagant to think that our world should have been the subject of God's favours and His special interference, of His communications and His personal visit. Can the Earth presume to be considered the centre of the moral and religious Universe, he asks, if it has not the slightest distinction to rely upon in the physical Universe? Is it not as absurd to uphold such an assertion (of the plurality of inhabited worlds), as it would be to-day to uphold the old hypothesis of Ptolemy, who placed Earth in the centre of our system? . . . The above is quoted from memory, yet almost textually. The author fails to see that he is bursting his own soap-bubble with such a defence.

[[Vol. 2, Page]] 151 SPONTANEOUS GENERATION.

be indeed proven impossible in our present world-period and actual conditions -- which the Occultists deny -- still it would be no demonstration that it could not have taken place under different cosmic conditions, not only in the seas of the Laurentian period, but even on the then convulsed Earth. It would be interesting to know how Science could ever account for the appearance of species and life on Earth, especially of Man, once that she rejects both the Biblical teachings and spontaneous generation. Pasteur's observations, however, are far from being perfect or proven. Blanchard and Dr. Lutaud reject their importance and show that they have none. The question is so far left sub judice, as well as that other one "when, at what period, life appeared on the Earth?" As to the idea that Haeckel's Moneron -- a pinch of salt! -- has solved the problem of the origin of life, it is simply absurd. Those materialists, who feel inclined to pooh-pooh the theory of the "Self-existent," the "Self-born heavenly man," represented as an ethereal, astral man, must excuse even a tyro in Occultism laughing, in his turn, at some speculations of modern thought. After proving most learnedly that the primitive speck of protoplasm (moneron) is neither animal nor plant, but both, and that it has no ancestors among either of these, since it is that moneron which serves as a point of departure for all organized existence, we are finally told that the Monera are their own ancestors. This may be very scientific, but it is very metaphysical also; too much so, even for the Occultist.

If spontaneous generation has changed its methods now, owing perhaps to accumulated material on hand, so as to almost escape detection, it was in full swing in the genesis of terrestrial life. Even the simple physical form and the evolution of species show how Nature proceeds. The scale-bound, gigantic sauria, the winged pterodactyl, the Megalosaurus, and the hundred-feet long Iguanodon of the later period, are the transformations of the earliest representatives of the animal kingdom found in the sediments of the primary epoch. There was a time when all those above enumerated "antediluvian" monsters appeared as filamentoid infusoria without shell or crust, with neither nerves, muscles, organs nor sex, and reproduced their kind by gemmation: as do microscopical animals also, the architects and builders of our mountain ranges, agreeably to the teachings of science. Why not man in this case? Why should he not have followed the same law in his growth, i.e., gradual condensation? Every unprejudiced person would prefer to believe that primeval humanity had at first an ethereal -- or, if so preferred, a huge filamentoid, jelly-like form, evolved by gods or natural "forces," which grew, condensed throughout millions of ages, and became gigantic in its physical impulse and tendency, until it settled into the huge, physical form of the Fourth Race Man, -- rather

[[Vol. 2, Page]] 152 THE SECRET DOCTRINE.

than believe him created of the dust of the Earth (literally), or from some unknown anthropoid ancestor.

Nor does our esoteric theory clash with scientific data, except on first appearance, as Dr. A. Wilson, F.R.S., says, in a letter to "Knowledge," (Dec. 23, 1881). "Evolution -- rather Nature, in the light of evolution -- has only been studied for some twenty-five years or so. That is, of course, a mere fractional space in the history of human thought." And just because of that we do not lose all hope that materialistic science will amend its ways, and will gradually accept the esoteric teachings -- if even at first divorced from their (to science) too metaphysical elements.

Has the last word on the subject of human evolution yet been said? "Each . . . answer to the great Question (Man's Real Place in Nature), invariably asserted by the followers of its propounder, if not by himself, to be complete and final, remains in high authority and esteem, it may be for one century, it may be for twenty," writes Prof. Huxley; "but, as invariably, time proves each reply to have been a mere approximation to the truth -- tolerable chiefly on account of the ignorance of those by whom it was accepted, and wholly intolerable when tested by the larger knowledge of their successors"! Will this eminent Darwinian admit the possibility of his pithecoïd ancestry being assignable to the list of "wholly intolerable beliefs," in the "larger knowledge" of Occultists? But whence the savage? Mere "rising to the civilized state" does not account for the evolution of form.

In the same letter, "The Evolution of Man," Dr. Wilson makes other strange confessions. Thus, he observes, in answer to the queries put to "Knowledge" by "G. M.":-

" 'Has evolution effected any change in man? If so, what change? If not, why not?' . . . If we refuse to admit (as science does) that man was created a perfect being, and then became degraded, there exists only another supposition -- that of evolution. If man has arisen from a savage to a civilized state, that surely is evolution. We do not yet know, because such knowledge is difficult to acquire, if the human frame is subject to the same influences as those of lower animals. But there is little doubt that elevation from savagery to civilized life means and implies 'evolution,' and that of considerable extent. Mentally, man's evolution cannot be doubted; the ever-widening sphere of thought has sprung from small and rude beginnings, like language itself. But man's ways of life, his power of adaptation to his surroundings, and countless other circumstances, have made the facts and course of his 'evolution' very difficult to trace."

This very difficulty ought to make the Evolutionists more cautious in their affirmations. But why is evolution impossible, if "man was created a perfect being, and then became degraded?" At best it can only apply

[[Vol. 2, Page]] 153 ARISTOTLE DENIED HELIOCENTRICISM.

to the outward, physical man. As remarked in "Isis Unveiled," Darwin's evolution begins at the middle point, instead of commencing for man, as for everything else, from the universals. The Aristotle-Baconian method may have its advantages, but it has undeniably already demonstrated its defects. Pythagoras and Plato, who proceeded from the Universals downwards, are now shown more learned, in the light of modern science, than was Aristotle. For he opposed and denounced the idea of the revolution of the earth and even of its rotundity. "Almost all those," he wrote, "who affirm that they have studied heaven in its uniformity, claim that the earth is in the centre, but the philosophers of the Italian School, otherwise called the Pythagoreans, teach entirely the contrary. . . ." Because (a) the Pythagoreans were Initiates, and (b) they followed the deductive method. Whereas, Aristotle, the father of the inductive system, complained of those who taught that "the centre of our system was occupied by the Sun, and the earth was only a star, which by a rotatory motion around the same centre, produces night and day" (Vide De Caelo, Book II., c. 13.) The same with regard to man. The theory taught in the Secret Doctrine, and now expounded, is the only one, which can -- without falling into the absurdity of a "miraculous" man created out of the dust of the Earth, or the still greater fallacy of man evolving from a pinch of lime-salt, (the ex-protoplasmic moneron) -- account for his appearance on Earth.

Analogy is the guiding law in Nature, the only true Ariadne's thread that can lead us, through the inextricable paths of her domain, toward her primal and final mysteries. Nature, as a creative potency, is infinite, and no generation of physical scientists can ever boast of having exhausted the list of her ways and methods, however uniform the laws upon which she proceeds. If we can conceive of a ball of Fire-mist becoming gradually -- as it rolls through aeons of time in the interstellar spaces -- a planet, a self-luminous globe, to settle into a man-bearing world or Earth, thus having passed from a soft plastic body into a rock-bound globe; and if we see on it everything evolving from the non-nucleated jelly-speck that becomes the sarcode* of the moneron, then passes from its protistic state** into the form of an animal, to grow into a gigantic reptilian monster of the Mesozoic times; then dwindles again into the (comparatively) dwarfish crocodile, now confined solely to tropical

[[Footnote(s)]] -----

* Or what is more generally known as Protoplasm. This substance received its name of "Sarcode" from Prof. Dujardin Beaumetz far earlier.

** The Monera are indeed Protista. They are neither animals "nor plants," writes Haeckel; ". . . the whole body of the Moneron represents nothing more than a single thoroughly homogeneous particle of albumen in a firmly adhesive condition." ("Journal of Microscopical Science," Jan., 1869, p. 28.)

[[Vol. 2, Page]] 154 THE SECRET DOCTRINE.

regions, and the universally common lizard* -- how can man alone escape the general law? "There were giants on earth in those days," says Genesis, repeating the statement of all the other Eastern Scriptures; and the Titans are founded on anthropological and physiological fact.

And, as the hard-shelled crustacean was once upon a time a jelly-speck, "a thoroughly homogeneous particle of albumen in a firmly adhesive condition," so was the outward covering of primitive man, his early "coat of skin," plus an immortal spiritual monad, and a psychic temporary form and body within that shell. The modern, hard, muscular man almost impervious to any climate, was, perhaps, some 25,000,000 years ago, just what the Haeckelian Moneron is, strictly "an organism without organs," an entirely homogeneous substance with a structureless albumen body within, and a human form only outwardly.

No man of science has the right, in this century, to find the figures of the Brahmins preposterous in the question of Chronology; for their own calculations often exceed by far the claims made by esoteric science. This may easily be shown.

Helmholtz calculated that the cooling of our Earth from a temperature of 2,000 [[degrees]] to 200' Cent. must have occupied a period of no less than 350,000,000 years. Western science (including geology) seems generally to allow our globe an age of about 500,000,000 years altogether. Sir W. Thomson, however, limits the appearance of the earliest vegetable life to 100,000,000 years ago -- a statement respectfully contradicted by the archaic records. Speculations, furthermore, vary daily in the domains of science. Meanwhile, some geologists are very much opposed to such limitation. "Volger . . . calculates, that the time requisite for the deposit of the strata known to us must at least have amounted to 648 millions of years . . ." Both time and space are infinite and eternal. "The Earth, as a material existence, is indeed infinite; the changes only which it has undergone can be determined by finite periods of time" (Burmeister). "We must

therefore assume that the starry heaven is not merely in space, what no astronomer doubts, but also in time, without beginning or end; that it never was created, and is imperishable." (See Czolbe).**

Czolbe repeats exactly what the Occultists say. But the Aryan Occultists, we may be told, knew nothing of these later speculations. "They were even ignorant of the globular form of our earth."

[[Footnote(s)]] -----

* Behold the Iguanodon of the Mesozoic ages -- the monster 100 feet long -- now transformed into the small Iguana lizard of South America. Popular traditions about giants in days of old, and their mention in every mythology, including the Bible, may some day be shown to be founded on fact. In nature, the logic of analogy alone ought to make us accept these traditions as scientific verities.

** "Force and Matter"; by L. Buchner, edited by J. F. Collingwood, F.R.S.L., p. 61.

[[Vol. 2, Page]] 155 THE SOLAR SYSTEM IN THE PURANAS.

(Coleman.) To this the Vishnu Purana contains a reply, which has forced certain Orientalists to open their eyes very widely.

. . . "The Sun is stationed, for all time, in the middle of the day, and over against midnight, in all the Dwipas (continents), Maitreya! But the rising and the setting of the Sun being perpetually opposite to each other -- and in the same way, all the cardinal points, and so the cross-points, Maitreya; people speak of the rising of the Sun where they see it; and where the Sun disappears, there, to them, is his setting. Of the Sun, which is always in one and the same place, there is neither setting nor rising, for what is called rising and setting are only the seeing and the not seeing the Sun." (Vishnu Purana, Book II, ch. viii.)

To this Fitzedward Hall remarks, "The Heliocentricism taught in this passage is remarkable. It is contradicted, however, a little further on." Contradicted purposely, because it was a secret temple-teaching. Martin Haug remarked the same teaching in another passage. It is useless to calumniate the Aryans any longer.

To return to the Chronology of the geologists and anthropologists. We are afraid Science has no reasonable grounds on which she could oppose the views of the Occultists in this direction. Except that "of man, the highest organic being of creation, not a trace was found in the primary strata; only in the uppermost, the so-called alluvial layer," is all that can be urged, so far. That man was not the last member in the mammalian family, but the first in this Round, is something that science will be forced to acknowledge one day. A similar view also has already been mooted in France on very high authority.

That man can be shown to have lived in the mid-Tertiary period, and in a geological age when there did not yet exist one single specimen of the now known species of mammals, is a statement that science cannot deny and which has now been proven by de Quatrefages.* But even supposing his existence in the Eocene period is not yet demonstrated, what period of time has elapsed since the Cretaceous period? We are aware of the fact that only the boldest geologists dare to place man further back than the Miocene age. But how long, we ask, is the duration of those ages and periods since the Mesozoic time? On this, after a good deal of speculation and wrangling, science is silent, the greatest authorities upon the subject being compelled to answer to the question: "We do not know." This ought to show that the men of science are no greater authorities in this matter than are the profane. If, according to Prof. Huxley, "the time represented by the coal formation would be six millions of years,** how many more millions would be required to cover

[[Footnote(s)]] -----

* "Introduction a l'Etude des Races Humaines."

** "Modern Science and Modern Thought," by S. Laing, p. 32.

[[Vol. 2, Page]] 156 THE SECRET DOCTRINE.

the time from the Jurassic period, or the middle of the so-called "Reptilian" age (when the Third Race appeared), up to the Miocene, when the bulk of the Fourth Race was submerged?*

The writer is well aware that those specialists, whose computations of the ages of the globe and man are the most liberal, always had the shyer majority against them. But this proves very little, since the majority rarely, if ever, turns out to be right in the long run. Harvey stood alone for many years. The advocates for crossing the Atlantic with steamers were in danger of ending their days in a lunatic asylum. Mesmer is classed to this day (in the Encyclopaedias) along with Cagliostro, and St. Germain, as a charlatan and impostor. And now that Messrs. Charcot and Richet have vindicated Mesmer's claims, and that "Mesmerism" under its new name of Hypnotism -- a false nose on a very old face -- is accepted by science, it does not strengthen one's respect for that majority, when one sees the ease and unconcern with which its members treat of "Hypnotism," "Telepathic Impacts," and its other phenomena. They speak of it, in short, as if they had believed in it since the days of Solomon, and had never called its votaries, only a few years ago, "lunatics and impostors!"***

The same revulsion of thought is in store for the long period of years, claimed by esoteric philosophy as the age of sexual and physiological mankind. Therefore even the Stanza which says:--

"The mind-born, the boneless, gave being to the will-born with bones"; adding that this took place in the middle of the Third Race 18,000,000 years ago -- has yet a chance of being accepted by future scientists.

As far as XIXth century thought is concerned, we shall be told, even by some personal friends who are imbued with an abnormal respect for the shifting conclusions of science, that such a statement is absurd. How much more improbable will appear our further assertion, to the effect that the antiquity of the First Race dates back millions of years beyond this again. For, although the exact figures are withheld, and it is out of the question to refer the incipient evolution of the primeval Divine

[[Footnote(s)]] -----

* "Esoteric Buddhism," p. 70.

** The same fate is in store for spiritualistic phenomena and all the other psychological manifestations of the inner Man. Since the days of Hume, whose researches culminated in a nihilistic idealism, Psychology has gradually shifted its position to one of crass materialism. Hume is regarded as a psychologist, and yet he denied a priori the possibility of phenomena in which millions now believe, including many men of science. The Hylo-idealists of to-day are rank Annihilationists. The schools of Spencer and Bain are respectively positivist and materialist, and not metaphysical at all. It is psychism and not psychology; it reminds one as little of the Vedantic teaching as the pessimism of Schopenhauer and von Hartmann recalls the esoteric philosophy, the heart and soul of true Buddhism.

[[Vol. 2, Page]] 157 THE SLEIGHT-OF-HAND OF SCIENCE.

Races with certainty to either the early Secondary, or the Primary ages of geology, one thing is clear: that the figures 18,000,000 of years, which embrace the duration of sexual, physical, man, have to be enormously increased if the whole process of spiritual, astral and physical development is taken into account. Many geologists, indeed, consider that the duration of the Quaternary and Tertiary Ages demands the concession of such an estimate; and it is quite certain that no terrestrial conditions whatever negative the hypothesis of an Eocene Man, if evidence for his reality is forthcoming. Occultists, who maintain that the above date carries us far back into the secondary or "Reptilian" age, may refer to M. de Quatrefages in support of the possible existence of man in that remote antiquity. But with regard to the earliest Root-Races the case is very different. If the thick agglomeration of vapours, charged with carbonic acid, that escaped from the soil or was held in suspension in the atmosphere since the commencement of sedimentation, offered a fatal obstacle to the life of human organisms as now known, how, it will be asked, could the primeval men have existed? This consideration is, in reality, out of court. Such terrestrial conditions as were then operative had no touch with the plane on which the evolution of the ethereal astral races proceeded. Only in relatively recent geological periods, has the spiral course of cyclic law swept mankind into the lowest grade of physical evolution -- the plane of gross material causation. In those early ages, astral evolution was alone in progress, and the two planes, the astral and the physical,* though developing on parallel lines, had no direct point of contact with one another. It is obvious that a shadow-like ethereal man is related by virtue of his organization -- if such it can be called -- only to that plane from which the substance of his Upadhi is derived.

There are things, perhaps, that may have escaped the far-seeing -- but not all-seeing -- eyes of our modern naturalists; yet it is Nature herself who undertakes to furnish the missing links. Agnostic speculative thinkers have to choose between the version given by the Secret Doctrine of the East, and the hopelessly materialistic Darwinian and Biblical accounts of the origin of man; between no soul and no spiritual evolution, and the Occult doctrine which repudiates "Special creation" and the "Evolutionist" Anthropogenesis equally.

Again, to take up the question of "Spontaneous generation"; life -- as science shows -- has not always reigned on this terrestrial plane.

[[Footnote(s)]] -----

* It must be noted that, though the astral and physical planes of matter ran parallel with one another even in the earliest geological ages, yet they were not in the same phases of manifestation in which they are now. The Earth did not reach its present grade of density till 18,000,000 years ago. Since then both the physical and astral planes have become grosser.

[[Vol. 2, Page]] 158 THE SECRET DOCTRINE.

There was a time when even the Haeckelian Moneron -- that simple globule of Protoplasm -- had not yet appeared at the bottom of the seas. Whence came the Impulse which caused the molecules of Carbon, Nitrogen, Oxygen, etc., to group themselves into the Urschleim of Oken, that organic "slime," now christened protoplasm. What were the prototypes of the Monera? They, at least, could not have fallen in meteorites from other globes already formed, Sir W. Thomson's wild theory to this effect, notwithstanding. And if they have so fallen; if our Earth got its supply of life-germs from other planets; who, or what, had carried them into those planets? Here, again, unless the Occult teaching is accepted, we are compelled once more to face a miracle; to accept the theory of a personal, anthropomorphic Creator, the attributes and definitions of whom, as formulated by the Monotheists, clash as much with philosophy and logic, as they degrade the ideal of an infinite Universal deity, before whose incomprehensible awful grandeur the highest human intellect feels dwarfed. Let not the modern philosopher, while arbitrarily placing himself on the highest pinnacle of human intellectuality hitherto evolved, show himself spiritually and intuitionally so far below the conceptions of even the ancient Greeks, themselves on a far lower level, in these respects, than the philosophers of Eastern Aryan antiquity. Hylozoism, when philosophically understood, is the highest aspect of Pantheism. It is the only possible escape from idiotic atheism based on lethal materiality, and the still more idiotic anthropomorphic conceptions of the monotheists; between which two it stands on its own entirely neutral ground. Hylozoism demands absolute Divine Thought, which would pervade the numberless active, creating Forces, or "Creators"; which entities are moved by, and have their being in, from, and through that Divine Thought; the latter, nevertheless, having no more personal concern in them or their creations, than the Sun has in the sun-flower and its seeds, or in vegetation in general. Such active "Creators" are known to exist and are believed in, because perceived and sensed by the inner man in the Occultist. Thus the latter says that an ABSOLUTE Deity, having to be unconditioned and unrelated, cannot be thought of at the same time as an active, creating, one living

god, without immediate degradation of the ideal.* A Deity that manifests in Space and Time -- these two being simply the forms of THAT which is the Absolute ALL -- can be but a fractional part of the

[[Footnote(s)]] -----

* The conception and definition of the Absolute by Cardinal Cusa may satisfy only the Western mind, prisoned, so unconsciously to itself, and entirely degenerated by long centuries of scholastic and theological sophistry. But this "Recent philosophy of the Absolute," traced by Sir W. Hamilton to Cusa, would never satisfy the more acutely metaphysical mind of the Hindu Vedantin.

[[Vol. 2, Page]] 159 OCEANS OF CARBONIC ACID?

whole. And since that "all" cannot be divided in its absoluteness, therefore that sensed creator (we say Creators) can be at best but the mere aspect thereof. To use the same metaphor -- inadequate to express the full idea, yet well adapted to the case in hand -- these creators are like the numerous rays of the solar orb, which remains unconscious of, and unconcerned in, the work; while its mediating agents, the rays, become the instrumental media every spring -- the Manvantaric dawn of the Earth -- in fructifying and awakening the dormant vitality inherent in Nature and its differentiated matter. This was so well understood in antiquity, that even the moderately religious Aristotle remarked that such work of direct creation would be quite unbecoming to God -- [[aprepes toi theo]]. Plato and other philosophers taught the same: deity cannot set its own hand to creation, -- [[autournein hapanta]]. This Cudworth calls "Hylozoism." As old Zeno is credited by Laertius with having said, "Nature is a habit moved from itself, according to seminal principles; perfecting and containing those several things which in determinate times are produced from it, and acting agreeably to that from which it was secreted."*

Let us return to our subject, pausing to think over it. Indeed, if there was vegetable life during those periods that could feed on the then deleterious elements; and if there was even animal life whose aquatic organization could be developed, notwithstanding the supposed scarcity of Oxygen, why could there not be human life also, in its incipient physical form, i.e., in a race of beings adapted for that geological period and its surroundings? Besides, science confesses that it knows nothing of the real length of "geological periods."

But the chief question before us is, whether it is quite certain that, from the time of that which is called the "Azoic" age, there ever was such an atmosphere as that hypothesized by the Naturalists. Not all the physicists agree with this idea. Were the writer anxious to corroborate the teachings of the Secret Doctrine by exact science, it would be easy to show, on the admission of more than one physicist, that the atmosphere has changed little, if at all, since the first condensation of the oceans -- i.e., since the Laurentian period, the Pyrolithic age. Such, at any rate, is the opinion of Blanchard, S. Meunier, and even of Bischof -- as the experiments of the latter scientist with basalts have shown. For were we to take the word of the majority of scientists as to the quantity of deadly gases, and of elements entirely saturated with carbon and nitrogen, in which the vegetable and animal kingdoms are shown to have lived, thriven, and developed, then one would have to come to the curious conclusion that there were, in those days, oceans

[[Footnote(s)]] -----

*Cudworth's "Intellectual System," I. p. 328.

[[Vol. 2, Page]] 160 THE SECRET DOCTRINE.

of liquid carbonic acid, instead of water. With such an element, it becomes doubtful whether the Ganoids, or even the Primitive Trilobites themselves could live in the oceans of the primary age -- let alone in those of the Silurian, as shown by Blanchard.

The conditions that were necessary for the earliest race of mankind, however, require no elements, whether simple or compound. That which was stated at the beginning is maintained. The spiritual ethereal Entity which lived in Spaces unknown to Earth, before the first sidereal "jelly-speck" evolved in the ocean of crude Cosmic Matter, -- billions and trillions of years before our globular speck in infinity, called Earth, came into being and generated the Moneron in its drops, called Oceans -- needed no "elements." The "Manu with soft bones" could well dispense with calcic phosphate, as he had no bones, save in a figurative sense. And while even the Monera, however homogeneous their organism, still required physical conditions of life that would help them toward further evolution, the being which became primitive Man and the "Father of man," after evolving on planes of existence undreamt of by science, could well remain impervious to any state of atmospheric conditions around him. The primitive ancestor, in Brasseur de Bourbourg's "Popul-Vuh," who -- in the Mexican legends -- could act and live with equal ease under ground and water as upon the Earth, answers only to the Second and early Third Races in our texts. And if the three kingdoms of Nature were so different in pre-diluvian ages, why should not man have been composed of materials and combinations of atoms now entirely unknown to physical science? The plants and animals now known, in almost numberless varieties and species, have all developed, according to scientific hypotheses, from primitive and far fewer organic forms. Why should not the same have occurred in the case of man, the elements, and the rest? "Universal Genesis starts from the one, breaks into three, then five, and finally culminates into seven, to return into four, three, and one." (Commentary.)

For additional proofs consult Part II. of this Volume, "The Septenary in Nature."

[[Vol. 2, Page]] 161 A SUGGESTIVE STANZA.

STANZA VII.
FROM THE SEMI-DIVINE DOWN TO THE FIRST HUMAN RACES.

§§ (24) The higher creators reject in their pride the forms evolved by the "Sons of Yoga." (25) They will not incarnate in the early "Egg-born." . . (26) They select the later androgynes. (27) The first man endowed with mind.

24. THE SONS OF WISDOM, THE SONS OF NIGHT (issued from the body of Brahma when it became Night), READY FOR RE-BIRTH, CAME DOWN. THEY SAW THE (intellectually) VILE FORMS OF THE FIRST THIRD (still senseless Race) (a). "WE CAN CHOOSE," SAID THE LORDS, "WE HAVE WISDOM." SOME ENTERED THE CHHAYAS. SOME PROJECTED A SPARK. SOME DEFERRED TILL THE FOURTH (Race). FROM THEIR OWN ESSENCE THEY FILLED (intensified) THE KAMA (the vehicle of desire). THOSE WHO RECEIVED BUT A SPARK REMAINED DESTITUTE OF (higher) KNOWLEDGE. THE SPARK BURNT LOW (b). THE THIRD REMAINED MIND-LESS. THEIR JIVAS (Monads) WERE NOT READY. THESE WERE SET APART AMONG THE SEVEN (primitive human species). THEY (became the) NARROW-HEADED. THE THIRD WERE READY. IN THESE SHALL WE DWELL, SAID THE LORDS OF THE FLAME AND OF THE DARK WISDOM (c).

This Stanza contains, in itself, the whole key to the mysteries of evil, the so-called Fall of the angels, and the many problems that have puzzled the brains of the philosophers from the time that the memory of man began. It solves the secret of the subsequent inequalities of intellectual capacity, of birth or social position, and gives a logical explanation to the incomprehensible Karmic course throughout the aeons which followed. The best explanation which can be given, in view of the difficulties of the subject, shall now be attempted.

(a) Up to the Fourth Round, and even to the later part of the Third Race in this Round, Man -- if the ever-changing forms that clothed the Monads during the first three Rounds and the first two and a half races of the present one can be given that misleading name -- is, so far, only an animal intellectually. It is only in the actual midway Round that he develops in himself entirely the fourth principle as a fit vehicle for the

[[Vol. 2, Page]] 162 THE SECRET DOCTRINE.

fifth. But Manas will be relatively fully developed only in the following Round, when it will have an opportunity of becoming entirely divine until the end of the Rounds. As Christian Schoettgen says in *Horae Hebraic*, etc., the first terrestrial Adam "had only the breath of life," Nephesh, but not the living Soul.

(b) Here the inferior Races, of which there are still some analogues left -- as the Australians (now fast dying out) and some African and Oceanic tribes -- are meant. "They were not ready" signifies that the Karmic development of these Monads had not yet fitted them to occupy the forms of men destined for incarnation in higher intellectual Races. But this is explained later on.

(c) The Zohar speaks of "Black Fire," which is Absolute Light-Wisdom. To those who, prompted by old theological prejudice, may say: "But the Asuras are the rebel Devas, the opponents of the Gods -- hence devils, and the spirits of Evil," it is answered: Esoteric philosophy admits neither good nor evil per se, as existing independently in nature. The cause for both is found, as regards the Kosmos, in the necessity of contraries or contrasts, and with respect to man, in his human nature, his ignorance and passions. There is no devil or the utterly depraved, as there are no Angels absolutely perfect, though there may be spirits of Light and of Darkness; thus LUCIFER -- the spirit of Intellectual Enlightenment and Freedom of Thought -- is metaphorically the guiding beacon, which helps man to find his way through the rocks and sandbanks of Life, for Lucifer is the LOGOS in his highest, and the "Adversary" in his lowest aspect -- both of which are reflected in our Ego. Lactantius, speaking of the Nature of Christ, makes the LOGOS, the Word, the first-born brother of Satan, the "first of all creatures." (Inst. div. Book II., c. viii., "Qabbalah," 116.)

The Vishnu Purana describes these primeval creatures (the Arvaksrota) with crooked digestive canals: They were "endowed with inward manifestations, but mutually in ignorance about their kind and nature." The twenty-eight kinds of Badha, or imperfections, do not apply, as Wilson thought, to the animals now known and specified by him,* for these did not exist in those geological periods. This is quite plain in the said work, in which the first created (on this globe) are the "five-fold immovable creation," minerals and vegetables; then come those fabulous animals, Tiryaksrota, (the monsters of the abyss slain by the "Lords," see Stanzas II. and III.); then the Urdhwasrotas, the happy celestial beings, which feed on ambrosia; then lastly, the Arvaksrotas, human beings -- Brahma's

[[Footnote(s)]] -----

* See Book I., chap. v., p. 71.

[[Vol. 2, Page]] 163 CREATORS AND SUB-CREATORS.

seventh creation so-called. But these "creations," including the latter, did not occur on this globe, wherever else they may have taken place. It is not Brahma who creates things and men on this Earth, but the chief and Lord of the Prajapati, the Lords of Being and terrestrial Creation.* Obeying the command of Brahma, Daksha (the synthesis, or the aggregate, of the terrestrial creators and progenitors, Pitris included) made superior and inferior (vara and avara) things "referring to putra" progeny, and "bipeds and quadrupeds, and subsequently by his will (the Sons of Will and Yoga) made females," i.e., separated the androgynes. Here again, we have "bipeds" or men, created before the "quadrupeds" as in the esoteric teachings. (Vide supra and Stanza XII as explained.)

Since, in the exoteric accounts, the Asuras are the first beings created from the "body of night," while the Pitris issue from that of Twilight; the "gods" being placed by Parasara (Vishnu Purana) between the two, and shown to evolve from the "body of the day," it is easy to discover a determined purpose to veil the order of creation. Man is the Arvaksrota coming

from the "Body of the Dawn"; and elsewhere, man is again referred to, when the creator of the world, Brahma, is shown "creating fierce beings, denominated Bhutas and eaters of flesh," or as the text has it, "fiends frightful from being monkey-coloured and carnivorous."** Whereas the Rakshasas are generally translated by "Evil Spirits" and "the enemies of the gods," which identifies them with the Asuras. In the Ramayana, when Hanuman is reconnoitering the enemy in Lanka, he finds there Rakshasas, some hideous, "while some were beautiful to look upon," and, in Vishnu Purana, there is a direct reference to their becoming the Saviours of "Humanity," or of Brahma.

The allegory is very ingenious. Great intellect and too much knowledge are a two-edged weapon in life, and instruments for evil as well as for good. When combined with Selfishness, they will make of the whole of Humanity a footstool for the elevation of him who possesses them, and a means for the attainment of his objects; while, applied to altruistic humanitarian purposes, they may become the means of the salvation of many. At all events, the absence of self-consciousness and intellect will make of man an idiot, a brute in human form. Brahma is Mahat -- the universal Mind -- hence the too-selfish among the Rakshasas showing the desire to become possessed of it all -- to "devour" Mahat. The allegory is transparent.

At any rate, esoteric philosophy identifies the pre-Brahmanical

[[Footnote(s)]] -----

* "Vishnu Purana," Book I., chap. xv. of vol. 2.

** Ibid., Book I., chap. v.

[[Vol. 2, Page]] 164 THE SECRET DOCTRINE.

Asuras, Rudras,* Rakshasas and all the "Adversaries" of the Gods in the allegories, with the Egos, which, by incarnating in the still witless man of the Third Race, made him consciously immortal. They are, then, during the cycle of Incarnations, the true dual Logos -- the conflicting and two-faced divine Principle in Man. The Commentary that follows, and the next Stanzas may, no doubt, throw more light on this very difficult tenet, but the writer does not feel competent to give it out fully. Of the succession of Races, however, they say:--

"First come the SELF-EXISTENT on this Earth. They are the 'Spiritual Lives' projected by the absolute WILL and LAW, at the dawn of every rebirth of the worlds. These LIVES are the divine 'Sishta,' (the seed-Manus, or the Prajapati and the Pitris)."

From these proceed --

1. The First Race, the "Self-born," which are the (astral) shadows of their Progenitors.** The body was devoid of all understanding (mind, intelligence, and will). The inner being (the higher self or Monad), though within the earthly frame, was unconnected with it. The link, the Manas, was not there as yet.

2. From the First (race) emanated the second, called the "Sweat-born"*** and

[[Footnote(s)]] -----

* Whom Manu calls "our paternal grandfathers" (III., 284). The Rudras are the seven manifestations of Rudra-Siva, "the destroying god," and also the grand Yogi and ascetic.

** See § II, §§ 1, Commentary.

*** To speak of life as having arisen, and of the human race as having originated, in this absurdly unscientific way, in the face of the modern Pedigrees of Man, is to court instantaneous annihilation. The esoteric doctrine risks the danger, nevertheless, and even goes so far as to ask the impartial reader to compare the above hypothesis (if it is one) with Haeckel's theory -- now fast becoming an axiom with science -- which is quoted verbatim:--

". . . How did life, the living world of organisms, arise? And, secondly, the special question: How did the human race originate? The first of these two inquiries, that as to the first appearance of living beings, can only be decided empirically (!!) by proof of the so-called Archebiosis, or equivocal generation, or the spontaneous production of organisms of the simplest conceivable kind. Such are the Monera (Protogenes, Protamoeba, etc), exceedingly simple microscopic masses of protoplasm without structure or organisation, which take in nutriment and reproduce themselves by division. Such a Moneron as that primordial organism discovered by the renowned English zoologist Huxley, and named Bathybius Haeckelii, appears as a continuous thick protoplasmic covering at the greatest depths of the ocean, between 3,000 and 30,000 feet. It is true that the first appearance of such Monera has not up to the present moment been actually observed; but there is nothing intrinsically improbable in such an evolution." (The "Pedigree of Man," Aveling's translation, p 33.)

The Bathybius protoplasm having recently turned out to be no organic substance at all, there remains little to be said. Nor, after reading this, does one need to consume further time in refuting the further assertion that . . . "in that case man also [[Footnote continued on next page]]

[[Vol. 2, Page]] 165 TO THE MONERON THE CREATOR.

the "Boneless." This is the Second Root-Race, endowed by the preservers (Rakshasas)* and the incarnating gods (Asuras and the Kumaras) with the first primitive and weak spark (the germ of intelligence) . . . And from these in turn proceeds:--

3. The Third Root-Race, the "Two-fold" (Androgynes). The first Races hereof are shells, till the last is "inhabited" (i.e., informed) by the Dhyanis.

The Second Race, as stated above, being also sexless, evolved out of itself, at its beginning, the Third Androgyne Race by an analogous, but already more complicated process. As described in the Commentary, the very earliest of that race were:--

"The 'Sons of Passive Yoga.'* They issued from the second Manushyas

[[Footnote(s)]] -----

[[Footnote continued from previous page]] has beyond a doubt (to the minds of Haeckel and his like) arisen from the lower mammalia, apes and the earlier simian creatures, the still earlier Marsupialia, Amphibia, Pisces, by progressive transformations," all produced by "a series of natural forces working blindly. aim, without design" (p. 36).

The above-quoted passage bears its criticism on its own face. Science is made to teach that which, up to the present time, "has never been actually observed." She is made to deny the phenomenon of an intelligent nature and a vital force independent of form and matter, and to find it more scientific to teach the miraculous performance of "natural forces working blindly without aim or design." If so, then we are led to think that the physico-mechanical forces of the brains of certain eminent Scientists are leading them on as blindly to sacrifice logic and common sense on the altar of mutual admiration. Why should the protoplasmic Moneron producing the first living creature through self-division be held as a very scientific hypothesis, and an ethereal pre-human race generating the primeval men in the same fashion be tabooed as unscientific superstition? Or has materialism obtained a sole monopoly in Science?

* The Rakshasas, regarded in Indian popular theology as demons, are called the "Preservers" beyond the Himalayas. This double and contradictory meaning has its origin in a philosophical allegory, which is variously rendered in the Puranas. It is stated that when Brahma created the demons, Yakshas (from Yaksh, to eat) and the Rakshasas, both of which kinds of demons, as soon as born, wished to devour their creator, those among them that called out "Not so! oh, let him be saved (preserved)" were named Rakshasas (Vishnu Purana Book I. ch. v.). The Bhagavata Purana (III, 20, 19-21) renders the allegory differently. Brahma transformed himself into night (or ignorance) invested with a body, upon which the Yakshas and Rakshasas seized, exclaiming "Do not spare it; devour it." Brahma then cried out, "Do not devour me, spare me." This has an inner meaning of course. The "body of Night" is the darkness of ignorance, and it is the darkness of silence and secrecy. Now the Rakshasas are shown in almost every case to be Yogis, pious Saddhus and Initiates, a rather unusual occupation for demons. The meaning then is that while we have power to dispel the darkness of ignorance, "devour it," we have to preserve the sacred truth from profanation. "Brahma is for the Brahmins alone," says that proud caste. The moral of the fable is evident.

** The gradual evolution of man in the Secret Doctrine shows that all the later (to the profane the earliest) Races have their physical origin in the early Fourth Race. But it is the sub-race, which preceded the one that separated sexually, that is to be [[Footnote continued on next page]]

[[Vol. 2, Page]] 166 THE SECRET DOCTRINE.

(human race), and became oviparous. The emanations that came out of their bodies during the seasons of procreation were ovular; the small spheroidal nuclei developing into a large soft, egg-like vehicle, gradually hardened, when, after a period of gestation, it broke and the young human animal issued from it unaided, as the fowls do in our race."

This must seem to the reader ludicrously absurd. Nevertheless, it is strictly on the lines of evolutionary analogy, which science perceives in the development of the living animal species. First the moneron-like procreation by self-division (vide Haeckel); then, after a few stages, the oviparous, as in the case of the reptiles, which are followed by the birds; then, finally, the mammals with their ovoviviparous modes of producing their young ones.

If the term ovoviviparous is applied to some fish and reptiles, which hatch their eggs within their bodies, why should it not be applied to female mammalians, including woman? The ovule, in which, after impregnation, the development of the foetus takes place, is an egg.

At all events, this conception is more philosophical than that of Eve with a suddenly created placenta giving birth to Cain, because of the Apple, when even the marsupial, the earliest of mammals, is not placental yet.

Moreover, the progressive order of the methods of reproduction, as unveiled by science, is a brilliant confirmation of esoteric Ethnology. It is only necessary to tabulate the data in order to prove our assertion. (Cf. especially Schmidt's "Doctrine of Descent and Darwinism," p. 39, et. seq., and Laing's "A Modern Zoroastrian," pp. 102-111.)

1. Fission:--

(a) As seen in the division of the homogeneous speck of protoplasm, known as Moneron or Amoeba, into two.

(b) As seen in the division of the nucleated cell, in which the cell-nucleus splits into two sub-nuclei, which either develop within the original cell-wall or burst it, and multiply outside as independent entities. (Cf., the First Root-Race.)

II. Budding:--

A small portion of the parent structure swells out at the surface and finally parts company, growing to the size of the original organism; e.g., many vegetables, the sea-anemone, etc. (Cf., the Second Root-Race.)*

[[Footnote(s)]] -----

[[Footnote continued from previous page]] regarded as the spiritual ancestors of our present generations, and especially of the Eastern Aryan Races. Weber's idea that the Indo-Germanic Race preceded the Aryan Vedic Race is, to the Occultist, grotesque to the last degree.

* Every process of healing and cicatrization in the higher animal groups -- even in the case of reproduction of mutilated limbs with the Amphibians -- is effected by fission and gemmation of the elementary morphological elements.

[[Vol. 2, Page]] 167 MONADS AND ROUNDS.

III. Spores:--

A single cell thrown off by the parent organism, which develops into a multicellular organism reproducing the features of the latter, e.g., bacteria and mosses.

IV. Intermediate Hermaphroditism:--

Male and female organs inhering in the same individual; e.g., the majority of plants, worms, and snails, etc.; allied to budding. (Cf. Second and early Third Root-Races.)

V. True sexual union:--

(Cf. later Third Root-Race.)

We now come to an important point with regard to the double evolution of the human race. The Sons of Wisdom, or the spiritual Dhyanis, had become "intellectual" through their contact with matter, because they had already reached, during previous cycles of incarnation, that degree of intellect which enabled them to become independent and self-conscious entities, on this plane of matter. They were reborn only by reason of Karmic effects. They entered those who were "ready," and became the Arhats, or sages, alluded to above. This needs explanation.

It does not mean that Monads entered forms in which other Monads already were. They were "Essences," "Intelligences," and conscious spirits; entities seeking to become still more conscious by uniting with more developed matter. Their essence was too pure to be distinct from the universal essence; but their "Egos," or Manas (since they are called Manasaputra, born of "Mahat," or Brahma) had to pass through earthly human experiences to become all-wise, and be able to start on the returning ascending cycle. The Monads are not discrete principles, limited or conditioned, but rays from that one universal absolute Principle. The entrance into a dark room through the same aperture of one ray of sunlight following another will not constitute two rays, but one ray intensified. It is not in the course of natural law that man should become a perfect septenary being, before the seventh race in the seventh Round. Yet he has all these principles latent in him from his birth. Nor is it part of the evolutionary law that the Fifth principle (Manas), should receive its complete development before the Fifth Round. All such prematurely developed intellects (on the spiritual plane) in our Race are abnormal; they are those whom we call the "Fifth-Rounders." Even in the coming seventh Race, at the close of this Fourth Round, while our four lower principles will be fully developed, that of Manas will be only proportionately so. This limitation, however, refers solely to the spiritual development. The intellectual, on the physical plane, was reached during the Fourth Root-Race. Thus, those who were "half ready," who received "but a spark," constitute the average humanity which has to acquire its intellectuality during the present Manvantaric evolution,

----- [[Vol. 2, Page]] 168 THE SECRET DOCTRINE.

after which they will be ready in the next for the full reception of the "Sons of Wisdom." While those which "were not ready" at all, the latest Monads, which had hardly evolved from their last transitional and lower animal forms at the close of the Third Round, remained the "narrow-brained" of the Stanza. This explains the otherwise unaccountable degrees of intellectuality among the various races of men -- the savage Bushman and the European -- even now. Those tribes of savages, whose reasoning powers are very little above the level of the animals, are not the unjustly disinherited, or the unfavoured, as some may think -- nothing of the kind. They are simply those latest arrivals among the human Monads, which were not ready: which have to evolve during the present Round, as on the three remaining globes (hence on four different planes of being) so as to arrive at the level of the average class when they reach the Fifth Round. One remark may prove useful, as food for thought to the student in this connection. The MONADS of the lowest specimens of humanity (the "narrow-brained"* savage South-Sea Islander, the African, the Australian) had no Karma to work out when first born as men, as their more favoured brethren in intelligence had. The former are spinning out Karma only now; the latter are burdened with past, present, and future Karma. In this respect the poor savage is more fortunate than the greatest genius of civilised countries.

Let us pause before giving any more such strange teachings. Let us try and find out how far any ancient Scriptures, and even Science, permit the possibility of, or even distinctly corroborate, such wild notions as are found in our Anthropogenesis.

Recapitulating that which has been said we find:-- That the Secret Doctrine claims for man, (1) a polygenetic origin. (2) A variety of modes of procreation before humanity fell into the ordinary method of generation. (3) That the evolution of animals -- of the mammalians at any rate -- follows that of man instead of preceding it. And this is diametrically opposed to the now generally accepted theories of evolution and the descent of man from an animal ancestor.

[[Footnote(s)]] -----

* The term here means neither the dolicho-cephalic nor the brachyo-cephalic, nor yet skulls of a smaller volume, but simply brains devoid of intellect generally. The theory which would judge of the intellectual capacity of a man according to his cranial capacity, seems absurdly illogical to one who has studied the subject. The skulls of the stone period, as well as those of African Races (Bushmen included) show that the first are above rather than below the average of the brain capacity of the modern man, and the skulls of the last are on the whole (as in the case of Papuans and Polynesians

generally) larger by one cubic inch than that of the average Frenchman. Again, the cranial capacity of the Parisian of today represents an average of 1437 cubic centimetres compared to 1523 of the Auvergnat.

[[Vol. 2, Page]] 169 MONOGENISM OR POLYGENISM.

Let us, by giving to Caesar what is Caesar's, examine, first of all, the chances for the polygenetic theory among the men of science.

Now the majority of the Darwinian evolutionists incline to a polygenetic explanation of the origin of Races. On this particular question, however, scientists are, as in many other cases, at sixes and sevens; they agree to disagree.

"Does man descend from one single couple or from several groups -- monogenism or polygenism? As far as one can venture to pronounce on what in the absence of witnesses (?) will never be known (?), the second hypothesis is far the most probable."* Abel Hovelacque, in his "Science of Language," comes to a similar conclusion, arguing from the evidence available to a linguistic enquirer.

In an address delivered before the British Association, Professor W. H. Flower remarked on this question:--

"The view which appears best to accord with what is now known of the characters and distribution of the races of man . . . is a modification of the monogenistic hypothesis (!). Without entering into the difficult question of the method of man's first appearance upon the world, we must assume for it a vast antiquity, at all events as measured by any historical standard. If we had any approach to a complete palaeontological record, the history of Man could be re-constructed, but nothing of the kind is forthcoming."

Such an admission must be regarded as fatal to the dogmatism of the physical Evolutionists, and as opening a wide margin to occult speculations. The opponents of the Darwinian theory were, and still remain, polygenists. Such "intellectual giants" as John Crawford and James Hunt discussed the problem and favoured polygenesis, and in their day there was a far stronger feeling in favour of than against this theory. It is only in 1864 that Darwinians began to be wedded to the theory of unity, of which Messrs. Huxley and Lubbock became the first coryphai.

As regards that other question, of the priority of man to the animals in the order of evolution, the answer is as promptly given. If man is really the Microcosm of the Macrocosm, then the teaching has nothing so very impossible in it, and is but logical. For, man becomes that Macrocosm for the three lower kingdoms under him. Arguing from a physical standpoint, all the lower kingdoms, save the mineral -- which is light itself, crystallised and immetallised -- from plants to the creatures which preceded the first mammalians, all have been consolidated in their physical structures by means of the "cast-off dust" of those minerals, and the refuse of the human matter, whether from living or dead

[[Footnote(s)]] -----

* A. Lefevre, "Philosophy," p. 498.

[[Vol. 2, Page]] 170 THE SECRET DOCTRINE.

bodies, on which they fed and which gave them their outer bodies. In his turn, man grew more physical, by re-absorbing into his system that which he had given out, and which became transformed in the living animal crucibles through which it had passed, owing to Nature's alchemical transmutations. There were animals in those days of which our modern naturalists have never dreamed; and the stronger became physical material man, the giants of those times, the more powerful were his emanations. Once that Androgyne "humanity" separated into sexes, transformed by Nature into child-bearing engines, it ceased to procreate its like through drops of vital energy oozing out of the body. But while man was still ignorant of his procreative powers on the human plane, (before his Fall, as a believer in Adam would say,) all this vital energy, scattered far and wide from him, was used by Nature for the production of the first mammal-animal forms. Evolution is an eternal cycle of becoming, we are taught; and nature never leaves an atom unused. Moreover, from the beginning of the Round, all in Nature tends to become Man. All the impulses of the dual, centripetal and centrifugal Force are directed towards one point -- MAN. The progress in the succession of beings, says Agassiz, "consists in an increasing similarity of the living fauna, and, among the vertebrates, especially, in the increasing resemblance to man. Man is the end towards which all animal creation has tended from the first appearance of the first palaeozoic fishes."*

Just so; but "the palaeozoic fishes" being at the lower curve of the arc of the evolution of forms, this Round began with astral man, the reflection of the Dhyana Chohans, called the "Builders." Man is the alpha and the omega of objective creation. As said in "Isis Unveiled," "all things had their origin in spirit -- evolution having originally begun from above and proceeding downwards, instead of the reverse, as taught in the Darwinian theory."*** Therefore, the tendency spoken of by the eminent naturalist above quoted, is one inherent in every atom. Only, were one to apply it to both sides of the evolution, the observations made would greatly interfere with the modern theory, which has now almost become (Darwinian) law.

But in citing the passage from Agassiz' work with approval, it must not be understood that the occultists are making any concession to the theory, which derives man from the animal kingdom. The fact that in this Round he preceded the mammalia is obviously not impugned by the consideration that the latter (mammalia) follow in the wake of man.

[[Vol. 2, Page]] 171 A SUGGESTIVE EXPLANATION.

25. HOW DID THE MANASA, THE SONS OF WISDOM ACT? THEY REJECTED THE SELF-BORN, (the boneless). THEY ARE NOT READY. THEY SPURNED THE (First) SWEAT-BORN.* THEY ARE NOT QUITE READY. THEY WOULD NOT ENTER THE (First) EGG-BORN.**

To a Theist or a Christian this verse would suggest a rather theological idea: that of the Fall of the Angels through Pride. In the Secret Doctrine, however, the reasons for the refusal to incarnate in half-ready physical bodies seem to be more connected with physiological than metaphysical reasons. Not all the organisms were sufficiently ready. The incarnating powers chose the ripest fruits and spurned the rest.***

By a curious coincidence, when selecting a familiar name for the continent on which the first androgynes, the Third Root-Race, separated, the writer chose, on geographical considerations, that of "Lemuria," invented by Mr. P. L. Sclater. It is only later, that reading Haeckel's "Pedigree of Man," it was found that the German "Animalist" had chosen the name for his late continent. He traces, properly enough, the centre of human evolution to "Lemuria," but with a slight scientific variation. Speaking of it as that "cradle of mankind," he pictures the gradual transformation of the anthropoid mammal into the primeval savage!! Vogt, again, holds that in America Man sprang from a branch of the platyrrhine apes, independently of the origination of the African and Asian root-stocks from the old world catarrhinians. Anthropologists are, as usual, at loggerheads on this question, as on many others. We shall examine this claim in the light of esoteric philosophy in Stanza VIII. Meanwhile, let us give a few moments of attention to the various consecutive modes of procreation according to the laws of Evolution.

Let us begin by the mode of reproduction of the later sub-races of the Third human race, by those who found themselves endowed with the sacred fire from the spark of higher and then independent Beings, who were the psychic and spiritual parents of Man, as the lower Pitar Devata (the Pitris) were the progenitors of his physical body. That Third and holy Race consisted of men who, at their zenith, were described

[[Footnote(s)]] -----

* This is explained in the section which follows this series of Stanzas in the allegory from the Puranas concerning Kandu, the holy sage, and Pramlocha, the nymph alleged to have hypnotised him, (Vide § II., Commentary after St.I.), a suggestive allegory, scientifically, as the drops of perspiration, which she exuded, are the symbols of the spores of science (Vide infra).

** This will be explained as we proceed. This unwillingness to fashion men, or create, is symbolized in the Puranas by Daksha having to deal with his opponent Narada, the "strife-making ascetic."

*** Vide Verse 24.

[[Vol. 2, Page]] 172 THE SECRET DOCTRINE.

as, "towering giants of godly strength and beauty, and the depositories of all the mysteries of Heaven and Earth." Have they likewise fallen, if, then, incarnation was the Fall?

Of this presently. The only thing now to be noted of these is, that the chief gods and heroes of the Fourth and Fifth Races, as of later antiquity, are the deified images of these men of the Third. The days of their physiological purity, and those of their so-called Fall, have equally survived in the hearts and memories of their descendants. Hence, the dual nature shown in those gods, both virtue and sin being exalted to their highest degree, in the biographies composed by posterity. They were the pre-Adamite and the divine Races, with which even theology, in whose sight they are all "the accursed Cainite Races," now begins to busy itself.

But the action of "spiritual progenitors" of that Race has first to be disposed of. A very difficult and abstruse point has to be explained with regard to Stanzas 26 and 27. These say:--

26. WHEN THE SWEAT-BORN PRODUCED THE EGG-BORN, THE TWO-FOLD (androgynous Third Race*), THE MIGHTY, THE POWERFUL WITH BONES, THE LORDS OF WISDOM SAID: "NOW SHALL WE CREATE" (a).

Why "now" -- and not earlier? This the following sloka explains.

27. (Then) THE THIRD (race) BECAME THE VAHAN (vehicle) OF THE LORDS OF WISDOM. IT CREATED SONS OF "WILL AND YOGA," BY KRIYASAKTI (b), IT CREATED THEM, THE HOLY FATHERS, ANCESTORS OF THE ARHATS.

. . .

(a) How did they create, since the "Lords of Wisdom" are identical with the Hindu Devas, who refuse "to create"? Clearly they are the

[[Footnote(s)]] -----

* The evolutionist Professor Schmidt alludes to "the fact of the separation of sexes, as to the derivation of which from species once hermaphrodite all (the believers in creation naturally excepted) are assuredly of one accord." Such indeed is the incontestable evidence drawn from the presence of rudimentary organs. (Cf., his "Doctrine of Descent and

Darwinism," p. 159.) Apart from such palpable traces of a primeval hermaphroditism, the fact may be noted that, as Laing writes, "a study of embryology. . . shows that in the human higher animal species the distinction of sex is not developed until a considerable progress has been made in the growth of the embryo." ("A Modern Zoroastrian," p.106.) The Law of Retardation -- operative alike in the case of human races, animal species, etc., when a higher type has once been evolved -- still preserves hermaphroditism as the reproductive method of the majority of plants and many lower animals.

[[Vol. 2, Page]] 173 THE SONS OF KRIYASAKTI.

Kumaras of the Hindu Pantheon and Puranas, those elder sons of Brahma, "Sanandana and the other sons of Vedhas," who, previously created by him "without desire or passion, remained chaste, full of holy wisdom and undesirous of progeny?"*

The power, by which they first created, is just that which has since caused them to be degraded from their high status to the position of evil spirits, of Satan and his Host, created in their turn by the unclean fancy of exoteric creeds. It was by Kriyasakti, that mysterious and divine power latent in the will of every man, and which, if not called to life, quickened and developed by Yogi-training, remains dormant in 999,999 men out of a million, and gets atrophied. This power is explained in the "Twelve Signs of the Zodiac,"** as follows:--

(b) "Kriyasakti -- the mysterious power of thought which enables it to produce external, perceptible, phenomenal results by its own inherent energy. The ancients held that any idea will manifest itself externally, if one's attention (and Will) is deeply concentrated upon it; similarly, an intense volition will be followed by the desired result. A Yogi generally performs his wonders by means of Itchasakti (Will-power) and Kriyasakti."

The Third Race had thus created the so-called SONS OF WILL AND YOGA, or the "ancestors" (the spiritual forefathers) of all the subsequent and present Arhats, or Mahatmas, in a truly immaculate way. They were indeed created, not begotten, as were their brethren of the Fourth Race, who were generated sexually after the separation of sexes, the Fall of Man. For creation is but the result of will acting on phenomenal matter, the calling forth out of it the primordial divine Light and eternal Life. They were the "holy seed-grain" of the future Saviours of Humanity.

Here we have to make again a break, in order to explain certain difficult points, of which there are so many. It is almost impossible to avoid such interruptions. For explanations and a philosophical account of the nature of those beings, which are now viewed as the "Evil" and rebellious Spirits, the creators by Kriyasakti, the reader is referred to the chapters on "The Fallen Angels" and "The Mystic Dragons," in Part II. of this Volume.

The order of the evolution of the human Races stands thus in the Fifth Book of the Commentaries, and was already given:--

The First men were Chhayas (1); the second, the "Sweat-born" (2), the Third, "Egg-born," and the holy Fathers born by the power of Kriyasakti (3); the Fourth were the children of the Padmapani (Chenresi) (4).

** See "Five Years of Theosophy," p. 777.

[[Vol. 2, Page]] 174 THE SECRET DOCTRINE.

Of course such primeval modes of procreation -- by the evolution of one's image, through drops of perspiration, after that by Yoga, and then by what people will regard as magic (Kriyasakti) -- are doomed beforehand to be regarded as fairy-tales. Nevertheless, beginning with the first and ending with the last, there is really nothing miraculous in them, nor anything which could not be shown natural. This must be proven.

1. Chhaya-birth, or that primeval mode of sexless procreation, the first Race having oozed out, so to say, from the bodies of the Pitris, is hinted at in a Cosmic allegory in the Puranas.* It is the beautiful allegory and story of Sanjna, the daughter of Viswakarma -- married to the Sun, who, "unable to endure the fervours of her lord," gave him her chhaya (shadow, image, or astral body), while she herself repaired to the jungle to perform religious devotions, or Tapas. The Sun, supposing the "chhaya" to be his wife begat by her children, like Adam with Lilith -- an ethereal shadow also, as in the legend, though an actual living female monster millions of years ago.

But, perhaps, this instance proves little except the exuberant fancy of the Puranic authors. We have another proof ready. If the materialised forms, which are sometimes seen oozing out of the bodies of certain mediums could, instead of vanishing, be fixed and made solid -- the creation of the first Race would become quite comprehensible. This kind of procreation cannot fail to be suggestive to the student. Neither the mystery nor the impossibility of such a mode is certainly any greater -- while it is far more comprehensible to the mind of the true metaphysical thinker - than the mystery of the conception of the foetus, its gestation and birth as a child, as we now know it.

Now to the curious and little understood corroboration in the Puranas about the "Sweat-born."

2. Kandu is a sage and a Yogi, eminent in holy wisdom and pious austerities, which, finally, awaken the jealousy of the gods, who are represented in the Hindu Scriptures as being in never-ending strife with the ascetics. Indra, the "King of the Gods,"** finally sends one of his female Apsarasas to tempt the sage. This is no worse than Jehovah sending Sarah, Abraham's wife, to tempt Pharaoh; but in truth it is those gods (and god), who are ever trying to disturb ascetics and thus make them lose the fruit of their austerities, who ought to be regarded as "tempting demons," instead of applying the term to the Rudras, Kumaras, and Asuras, whose great sanctity and chastity seem a standing reproach to the Don Juanic gods of the Pantheon. But it is

[[Footnote(s)]] -----

* Vide "Vishnu-Purana," Book III., chap. 2.

** In the oldest MS. of "Vishnu-Purana" in the possession of an Initiate in Southern India, the god is not Indra, but Kama, the god of love and desire. See text further on.

[[Vol. 2, Page]] 175 A SAINT -- HYPNOTISED.

the reverse that we find in all the Puranic allegories, and not without good esoteric reason.

The king of the gods (or Indra) sends a beautiful Apsarasas (nymph) named Pramlocha to seduce Kandu and disturb his penance. She succeeds in her unholy purpose and "907 years six months and three days"* spent in her company seem to the sage as one day. When this psychological or hypnotic state ends, the Muni curses bitterly the creature who seduced him, thus disturbing his devotions. "Depart, begone!" he cries, "vile bundle of illusions!" . . . And Pramlocha, terrified, flies away, wiping the perspiration from her body with the leaves of the trees as she passes through the air. She went from tree to tree, and as, with the dusky shoots that crowned their summits, she dried her limbs, the child she had conceived by the Rishi came forth from the pores of her skin in drops of perspiration. The trees received the living dew; and the winds collected them into one mass. "This," said Soma (the Moon), "I matured by my rays; and gradually it increased in size, till the exhalation that had rested on the tree tops became the lovely girl named Marisha."**

Now Kandu stands here for the First Race. He is a son of the Pitris, hence one devoid of mind, which is hinted at by his being unable to discern a period of nearly one thousand years from one day; therefore he is shown to be so easily deluded and blinded. Here is a variant of the allegory in Genesis, of Adam, born an image of clay, into which the "Lord-god" breathes the breath of life but not of intellect and discrimination, which are developed only after he had tasted of the fruit of the Tree of Knowledge; in other words when he has acquired the first development of Mind, and had implanted in him Manas, whose terrestrial aspect is of the Earth earthy, though its highest faculties connect it with Spirit and the divine Soul. Pramlocha is the Hindu Lilith of the Aryan Adam; and Marisha, the daughter born of the perspiration from her pores, is the "sweat-born," and stands as a symbol for the Second Race of Mankind.

As remarked in the foot note (vide supra) it is not Indra, who now figures in the Puranas, but Kamadeva, the god of love and desire, who sends Pramlocha on Earth. Logic, besides the esoteric doctrine, shows that it must be so. For Kama is the king and lord of the Apsarasas, of whom Pramlocha is one; and, therefore, when Kandu, in cursing her,

[[Footnote(s)]] -----

* These are the exoteric figures given in a purposely reversed and distorted way, being the figure of the duration of the cycle between the first and second human race. All Orientalists to the contrary, there is not a word in any of the Puranas that has not a special esoteric meaning.

** "Vishnu Purana," Book I., ch. 15. Cf. also Vivien's temptation of Merlin (Tennyson), the same legend in Irish tradition.

[[Vol. 2, Page]] 176 THE SECRET DOCTRINE.

exclaims "Thou hast performed the office assigned by the monarch of the gods, go!" he must mean by that monarch Kama and not Indra, to whom the Apsarasas are not subservient. For Kama, again, is in the Rig Veda (x. 129) the personification of that feeling which leads and propels to creation. He was the first movement that stirred the ONE, after its manifestation from the purely abstract principle, to create, "Desire first arose in It, which was the primal germ of mind; and which sages, searching with their intellect, have discovered to be the bond which connects Entity with Non-Entity." A hymn in the Atharva Veda exalts Kama into a supreme God and Creator, and says: "Kama was born the first. Him, neither gods nor fathers (Pitara) nor men have equalled." . . . The Atharva Veda identifies him with Agni, but makes him superior to that god. The Taittiriya Brahmana makes him allegorically the son of Dharma (moral religious duty, piety and justice) and of Sraddha (faith). Elsewhere Kama is born from the heart of Brahma; therefore he is Atma-Bhu "Self-Existent," and Aja, the "unborn." His sending Pramlocha has a deep philosophical meaning; sent by Indra -- the narrative has none. As Eros was connected in early Greek mythology with the world's creation, and only afterwards became the sexual Cupid, so was Kama in his original Vedic character, (Harivansa making him a son of Lakshmi, who is Venus). The allegory, as said, shows the psychic element developing the physiological, before the birth of Daksha, the progenitor of real physical men, made to be born from Marisha and before whose time living beings and men were procreated "by the will, by sight, by touch and by Yoga," as will be shown.

This, then, is the allegory built on the mode of procreation of the Second or the "Sweat-born." The same for the Third Race in its final development.

Marisha, through the exertions of Soma, the Moon, is taken to wife by the Prachetasas, the production of the "Mind-born" sons of Brahma also*, from whom they beget the Patriarch Daksha, a son of Brahma

[[Footnote(s)]] -----

* The text has:-- "From Brahma were born mind-engendered progeny, with forms and faculties derived from his corporeal nature, embodied spirits produced from the limbs (gatra) of Dhimat (all-wise deity). These beings were the abode of the three qualities of deva-sarga (divine creation, which, as the five-fold creation, is devoid of clearness of perception, without reflection, dull of nature). But as they did not multiply themselves, Brahma created "other mind-born sons like himself," namely, the Brahma-rishis, or the Prajapati (ten and seven). Sanandana and the other sons of Vedhas (Brahma) were previously created, but, as shown elsewhere, they were "without desire or passion, inspired with holy wisdom, estranged from the universe and undesirous of progeny" (Book I, ch. 7). These Sanandana and other Kumaras are then the Gods,

who after refusing to "create progeny" are forced to incarnate in senseless men. The reader must pardon unavoidable repetitions in view of the great number of the facts given.

[[Vol. 2, Page]] 177 SWEAT-BORN AND ANDROGYNES.

also, in a former Kalpa or life, explain and add the Puranas, in order to mislead, yet speaking the truth.

(3.) The early Third Race, then, is formed from drops of "sweat," which, after many a transformation, grow into human bodies. This is not more difficult to imagine or realise than the growth of the foetus from an imperceptible germ, which foetus develops into a child, and then into a strong, heavy man. But this race again changes its mode of procreation according to the Commentaries. It is said to have emanated a vis formativa, which changed the drops of perspiration into greater drops, which grew, expanded, and became ovoid bodies -- huge eggs. In these the human foetus gestated for several years. In the Puranas, Marisha, the daughter of Kandou, the sage, becomes the wife of the Prachetasas and the mother of Daksha. Now Daksha is the father of the first human-like progenitors, having been born in this way. He is mentioned later on. The evolution of man, the microcosm, is analogous to that of the Universe, the macrocosm. His evolution stands between that of the latter and that of the animal, for which man, in his turn, is a macrocosm.

Then the race becomes:--

(4.) The androgyne, or hermaphrodite. This process of men-bearing explains, perhaps, why Aristophanes* describes the nature of the old race as androgynous, the form of every individual being rounded, "having the back and sides as in a circle," whose "manner of running was circular . . . terrible in force and strength and with prodigious ambition." Therefore, to make them weaker, "Zeus divided them (in the Third Root-Race) into two, and Apollo (the Sun), under his direction, closed up the skin." The Madagascans (the island belonged to Lemuria) have a tradition about the first man, who lived at first without eating, and, having indulged in food, a swelling appeared in his leg; this bursting, there emerged from it a female, who became the mother of their race. Truly . . . "We have our sciences of Heterogenesis and Parthenogenesis, showing that the field is yet open. . . . The polyps . . . produce their offspring from themselves, like the buds and ramifications of a tree. . . ." Why not the primitive human polyp? The very interesting polyp Stauridium passes alternately from gemmation into the sex method of reproduction. Curiously enough, though it grows merely as a polyp on a stalk, it produces gemmules, which ultimately develop into a sea-nettle or Medusa. The Medusa is utterly dissimilar to its parent-organism, the Stauridium. It also reproduces itself differently, by sexual method, and from the resulting eggs Stauridia once more put in

[[Footnote(s)]] -----

* See Plato's "Banquet."

[[Vol. 2, Page]] 178 THE SECRET DOCTRINE.

an appearance. This striking fact may assist many to understand that a form may be evolved -- as in the sexual Lemurians from Hermaphrodite parentage -- quite unlike its immediate progenitors. It is, moreover, unquestionable that in the case of human incarnations the law of Karma, racial or individual, overrides the subordinate tendencies of "Hereditry," its servant.

The meaning of the last sentence in the above-quoted Commentary on Stanza 27, namely, that the Fourth Race were the children of Padmapani, may find its explanation in a certain letter from the Inspirer of "Esoteric Buddhism" quoted on p. 68. "The majority of mankind belongs to the seventh sub-race of the Fourth Root-Race -- the above-mentioned Chinamen and their off-shoots and branchlets. (Malayans, Mongolians, Tibetans, Hungarians, Finns, and even the Esquimaux are all remnants of this last offshoot.)"

Padmapani, or Avalokiteswara in Sanskrit, is, in Tibetan, Chenresi. Now, Avalokiteswara is the great Logos in its higher aspect and in the divine regions. But in the manifested planes, he is, like Daksha, the progenitor (in a spiritual sense) of men. Padmapani-Avalokiteswara is called esoterically Bhodhisatva (or Dhyani Chohan) Chenresi Vanchug, "the powerful and all-seeing." He is considered now as the greatest protector of Asia in general, and of Tibet in particular. In order to guide the Tibetans and Lamas in holiness, and preserve the great Arhats in the world, this heavenly Being is credited with manifesting himself from age to age in human form. A popular legend has it that whenever faith begins to die out in the world, Padmapani Chenresi, the "lotus-bearer," emits a brilliant ray of light, and forthwith incarnates himself in one of the two great Lamas -- the Dalai and Teschu Lamas; finally, it is believed that he will incarnate as "the most perfect Buddha" in Tibet, instead of in India, where his predecessors, the great Rishis and Manus had appeared in the beginning of our Race, but now appear no longer. Even the exoteric appearance of Dhyani Chenresi is suggestive of the esoteric teaching. He is evidently, like Daksha, the synthesis of all the preceding Races and the progenitor of all the human Races after the Third, the first complete one, and thus is represented as the culmination of the four primeval races in his eleven-faced form. It is a column built in four rows, each series having three faces or heads of different complexions: the three faces for each race being typical of its three fundamental physiological transformations. The first is white (moon-coloured); the second is yellow; the third, red-brown; the fourth, in which are only two faces -- the third face being left a blank -- (a reference to the untimely end of the Atlanteans) is brown-black. Padmapani (Daksha) is seated on the column, and forms the apex. In this reference

[[Vol. 2, Page]] 179 THE BIRTH-DAYS OF THE DHYANIS.

compare Stanza 39. The Dhyani Chohan is represented with four arms, another allusion to the four races. For while two are folded, the third hand holds a lotus (Padmapani, "the lotus-bearer"), this flower symbolizing generation, and the fourth holds a serpent, emblem of the Wisdom in his power. On his neck is a rosary, and on his head the sign of water [[diagram]] -- matter, deluge -- while on his brow rests the third eye (Siva's eye, that of spiritual insight). His name is "Protector" (of Tibet), "Saviour of Humanity." On other occasions when he has only two arms, he is Chenresi, the Dhyani

and Bhodisatva, Chakna-padmakarpō, "he who holds a lotus." His other name is Chantong, "he of the 1,000 eyes," when he is endowed with a thousand arms and hands, on the palm of each of which is represented an eye of Wisdom, these arms radiating from his body like a forest of rays. Another of his names is Lokapati and Lokanatha (Sanskrit) "Lord of the World"; and Jigtenponpo (Tibetan), "Protector and Saviour against evil" of any kind.

Padmapani, however, is the "lotus-bearer" symbolically only for the profane; esoterically, it means the supporter of the Kalpas, the last of which, the present Maha-Kalpa (the Varaha), is called Padma, and represents one half of the life of Brahma. Though a minor Kalpa, it is called Maha, "great," because it comprises the age in which Brahma sprang from a lotus. Theoretically, the Kalpas are infinite, but practically they are divided and sub-divided in Space and Time, each division -- down to the smallest -- having its own Dhyani as patron or regent. Padmapani (Avalokiteshwara) becomes, in China, in his female aspect, Kwan-yin, "who assumes any form, at pleasure, in order to save mankind." The knowledge of the astrological aspect of the constellations on the respective "birth-days" of these Dhyanis -- Amitabha (the O-mi-to Fo, of China), included: e.g., on the 19th day of the second month, on the 17th day of the eleventh month, and on the 7th day of the third month, etc., etc. -- gives the Occultist the greatest facilities for performing what are called "magic" feats. The future of an individual is seen, with all its coming events marshalled in order, in a magic mirror placed under the ray of certain constellations. But -- beware of the reverse of the medal, SORCERY.

[[Vol. 2, Page]] 180 THE SECRET DOCTRINE.

STANZA VIII.
EVOLUTION OF THE ANIMAL MAMMALIANS. -- THE
FIRST FALL.

§§ (28) How the first mammals were produced. (29) A quasi-Darwinian Evolution. (30) The animals get solid bodies. (31) Their separation into sexes. (32) The first sin of the mindless men.

28. FROM THE DROPS OF SWEAT (a); FROM THE RESIDUE OF THE SUBSTANCE; MATTER FROM DEAD BODIES AND ANIMALS OF THE WHEEL BEFORE (previous, Third Round); AND FROM CAST-OFF DUST; THE FIRST ANIMALS (of this Round) WERE PRODUCED.

(a) The Occult doctrine maintains that, in this Round, the mammalians were a later work of evolution than man. Evolution proceeds in cycles. The great Manvantaric cycle of Seven Rounds, beginning in the First Round with mineral, vegetable, and animal, brings its evolutionary work on the descending arc to a dead stop in the middle of the Fourth Race, at the close of the first half of the Fourth Round. It is on our Earth, then, (the Fourth sphere and the lowest) and in the present Round, that this middle point has been reached. And since the Monad has passed, after its "first metallization" on Globe A, through the mineral, vegetable, and animal worlds in every degree of the three states of matter, except the last degree of the third or solid state, which it reached only at the "mid-point of evolution" it is but logical and natural that at the beginning of the Fourth Round on Globe D, Man should be the first to appear; and also that his frame should be of the most tenuous matter that is compatible with objectivity. To make it still clearer: if the Monad begins its cycle of incarnations through the three objective kingdoms on the descending curved line, it has necessarily to enter on the re-ascending curved line of the sphere as a man also. On the descending arc it is the spiritual which is gradually transformed into the material. On the middle line of the base, Spirit and Matter are equilibrated in Man. On the ascending arc, Spirit is slowly re-asserting itself at the expense of the physical, or matter, so that, at the close of the seventh Race of the Seventh Round, the Monad will find itself as

[[Vol. 2, Page]] 181 MEN, THE PROGENITORS OF ANIMALS.

free from matter and all its qualities as it was in the beginning; having gained in addition the experience and wisdom, the fruition of all its personal lives, without their evil and temptations.

This order of evolution is found also in Genesis (ch. 1 and 2) if one reads it in its true esoteric sense, for chapter i. contains the history of the first Three Rounds, as well as that of the first Three Races of the Fourth, up to that moment when Man is called to conscious life by the Elohim of Wisdom. In the first chapter, animals, whales and fowls of the air, are created before the androgyne Adam.* In the second, Adam (the sexless) comes first, and the animals only appear after him. Even the state of mental torpor and unconsciousness of the first two races, and of the first half of the Third Race, is symbolized, in the second chapter of Genesis, by the deep sleep of Adam. It was the dreamless sleep of mental inaction, the slumber of the Soul and Mind, which was meant by that "sleep," and not at all the physiological process of differentiation of sexes, as a learned French theorist (M. Naudin) imagined.

The Puranas, the Chaldean and Egyptian fragments, and also the Chinese traditions, all show an agreement with the Secret Doctrine as to the process and order of evolution. We find in them the corroboration of almost all our teaching. For instance: the statement concerning the oviparous mode of procreation of the Third Race, and even a hint at a less innocent mode of the procreation of the first mammal forms, "gigantic, transparent, dumb and monstrous they were," says the Commentary. Study the stories of the several Rishis and their multifarious progeny; e.g., Pulastya is the father of all the Serpents and Nagas -- the oviparous brood; Kasyapa was grandsire, through his wife Tamra, of the birds and of Garuda, king of the feathered tribe; while by his wife Surabhi, he was the parent of cows and buffaloes, etc., etc.

In the Secret Doctrine, the first Nagas -- beings wiser than Serpents -- are the "Sons of Will and Yoga," born before the complete separation of the sexes, "matured in the man-bearing eggs** produced by the power (Kriyasakti) of the holy sages" of the early Third Race.***

[[Footnote(s)]] -----

* An allegorical reference to the "Sacred Animals" of the Zodiac and other heavenly bodies. Some Kabalists see in them the prototypes of the animals.

** In "Hesiod," Zeus creates his third race of men out of ash-trees. In the "Popol Vuh" the Third Race of men is created out of the tree Tzita and the marrow of the reed called Sibac. But Sibac means "egg" in the mystery language of the Artufas (or Initiation caves). In a report sent in 1812 to the Cortes by Don Baptista Pino it is said: "All the Pueblos have their Artufas -- so the natives call subterranean rooms with only a single door where they (secretly) assemble. . . . These are impenetrable temples . . . and the doors are always closed to the Spaniards. . . . They adore the Sun and Moon . . . fire and the great SNAKE (the creative power), whose eggs are called Sibac."

*** There is a notable difference esoterically between the words Sarpa and Naga, though [[Footnote continued on next page]]

[[Vol. 2, Page]] 182 THE SECRET DOCTRINE.

". . . . In these were incarnated the Lords of the three (upper) worlds, the various classes of Rudras, who had been Tushitas, who had been Jayas, who are Adityas;" for, as explained by Parasara, "There are a hundred appellations of the immeasurably mighty Rudras."

Some of the descendants of the primitive Nagas, the Serpents of Wisdom, peopled America, when its continent arose during the palmy days of the great Atlantis, (America being the Patala or Antipodes of Jambu-Dwipa, not of Bharata-Varsha). Otherwise, whence the traditions and legends -- the latter always more true than history, as says Augustin Thierry -- and even the identity in the names of certain "medicine men" and priests, who exist to this day in Mexico? We shall have to say something of the Nargals and the Nagals and also of Nagalism, called "devil-worship" by the Missionaries.

In almost all the Puranas, the story of the "Sacrifice of Daksha" is given, the oldest account of which is to be found in Vayu Purana. Allegorical as it is, there is more meaning and biological revelation in it to a Naturalist, than in all the pseudo-scientific vagaries, which are regarded as learned theories and hypotheses.

Daksha, who is regarded as the Chief Progenitor, is, moreover, pointed out as the creator of physical man in the "fable," which makes him lose his head from his body in the general strife between the gods and the Raumas. This head, being burnt in the fire, is replaced by the head of a ram (Kasi-Khanda). Now the ram's head and horns are ever the symbol of generating power and of reproductive force, and are phallic. As we have shown, it is Daksha who establishes the era of men engendered by sexual intercourse. But this mode of procreation did not occur suddenly, as one may think, and required long ages before it became the one "natural" way. Therefore, his sacrifice to the gods is shown as interfered with by Siva, the destroying deity, evolution and PROGRESS personified, who is the regenerator at the same time; who destroys things under one form but to recall them to life under another more perfect type. Siva-Rudra creates the terrible Virabhadra (born of his breath) the "thousand-headed, thousand-armed" (etc.) monster, and commissions him to destroy the sacrifice prepared by Daksha. Then Virabhadra, "abiding in the region of the ghosts (ethereal men) . . .

[[Footnote(s)]] -----

[[Footnote continued from previous page]] they are both used indiscriminately. Sarpa (serpent) is from the root Srip, serpo to creep; and they are called "Ahi," from Ha, to abandon. "The sarpa was produced from Brahma's hair, which, owing to his fright at beholding the Yakshas, whom he had created horrible to behold, fell off from the head, each hair becoming a serpent. They are called Sarpa from their creeping and Ahi because they had deserted the head" (Wilson). But the Nagas, their serpent's tail notwithstanding, do not creep, but manage to walk, run and fight in the allegories.

[[Vol. 2, Page]] 183 ARCHAIC ZOOLOGY.

created from the pores of the skin (Romakupas), powerful Raumas.* (or Raumyas)." Now, however mythical the allegory, the Mahabharata, which is history as much as is the Iliad, shows** the Raumyas and other races, as springing in the same manner from the Romakupas, hair or skin pores. This allegorical description of the "sacrifice" is full of significance to the students of the Secret Doctrine who know of the "Sweat-born."

In the Vayu Purana's account of Daksha's sacrifice, moreover, it is said to have taken place in the presence of creatures born from the egg, from the vapour, vegetation, pores of the skin, and, finally only, from the womb.

Daksha typifies the early Third Race, holy and pure, still devoid of an individual Ego, and having merely the passive capacities. Brahma, therefore, commands him to create (in the exoteric texts); when, obeying the command, he made "inferior and superior" (avara and vara) progeny (putra), bipeds and quadrupeds; and by his will, gave birth to females . . . to the gods, the Daityas (giants of the Fourth Race), the snake-gods, animals, cattle and the Danavas (Titans and demon Magicians) and other beings."

. . . "From that period forward, living creatures were engendered by sexual intercourse. Before the time of Daksha, they were variously propagated -- by the will, by sight, by touch, and by Yoga-power."*** And now comes the simply zoological teaching.

29. ANIMALS WITH BONES, DRAGONS OF THE DEEP AND FLYING SARPAS (serpents) WERE ADDED TO THE CREEPING THINGS. THEY THAT CREEP ON THE GROUND GOT WINGS. THEY OF THE LONG NECKS IN THE WATER, BECAME THE PROGENITORS OF THE FOWLS OF THE AIR (a).

(a) This is a point on which the teachings and modern biological speculation are in perfect accord. The missing links representing this transition process between reptile and bird are apparent to the veriest bigot, especially in the ornithoscelidae, hesperornis, and the archaeopteryx of Vogt.

30. DURING THE THIRD (Race), THE BONELESS ANIMALS GREW AND CHANGED: THEY BECAME ANIMALS WITH BONES (a), THEIR CHHAYAS BECAME SOLID (also).

[[Footnote(s)]] -----

* Wilson translates the word as "demigods" (See his Vishnu Purana, p. 130); but Raumas or Raumyas are simply a race, a tribe.

** xii. 10308.

[[Vol. 2, Page]] 184 THE SECRET DOCTRINE.

31. THE ANIMALS SEPARATED THE FIRST (into male and female) (b)

(a) Vertebrates, and after that mammalians. Before that the animals were also ethereal proto-organisms, just as man was.

(b) The fact of former hermaphrodite mammals and the subsequent separation of sexes is now indisputable, even from the stand-point of Biology. As Prof. Oscar Schmidt, an avowed Darwinist, shows: "Use and disuse combined with selection elucidate (?) the separation of the sexes, and the existence, totally incomprehensible, of rudimentary sexual organs. In the Vertebrata especially, each sex possesses such distinct traces of the reproductive apparatus characteristic of the other, that even antiquity assumed hermaphroditism as a natural primeval form of mankind. . . . The tenacity with which the rudiments of sexual organs are inherited is remarkable. In the class of mammals, actual hermaphroditism is unheard of, although through the whole period of their development they drag along with them these residues born by their unknown ancestry, no one can say how long ago."*

31. THEY (the animals) BEGAN TO BREED. THE TWO-FOLD MAN (then) SEPARATED ALSO. HE (man), SAID "LET US AS THEY; LET US UNITE AND MAKE CREATURES." THEY DID. . . .

32. AND THOSE WHICH HAD NO SPARK (the "narrow-brained"*** TOOK HUGE SHE-ANIMALS UNTO THEM (a). THEY BEGAT UPON THEM DUMB RACES. DUMB THEY WERE (the "narrow-brained") THEMSELVES. BUT THEIR TONGUES UNTIED (b). THE TONGUES OF THEIR PROGENY REMAINED STILL. MONSTERS THEY BRED. A RACE OF CROOKED, RED-HAIR-COVERED MONSTERS, GOING ON ALL FOURS.*** A DUMB RACE, TO KEEP THE SHAME UNTOLD.****

(a) The animals "separated the first," says Stanza 31. Bear in mind that at that period men were different, even physiologically, from what

[[Footnote(s)]] -----

** See verse 24.

*** These "animals," or monsters, are not the anthropoid or any other apes, but verily what the Anthropologists might call the "missing link," the primitive lower man; see infra.

**** The shame of their animal origin which our modern scientists would emphasize if they could.

[[Vol. 2, Page]] 185 THE SIN OF THE MINDLESS MEN.

they are now, having passed the middle point of the Fifth Race. We are not told what the "huge she-animals" were; but they certainly were as different from any we know now, as were the men.

This was the first physical "fall into matter" of some of the then existing and lower races. Bear in mind Stanza 24. The "Sons of Wisdom" had spurned the early Third Race, i.e., the non-developed, and are shown incarnating in, and thereby endowing with intellect, the later Third Race. Thus the sin of the brainless or "mindless" Races, who had no "spark" and were irresponsible, fell upon those who failed to do by them their Karmic duty.

(b) See later on concerning the beginning of human speech.

WHAT MAY BE THE OBJECTIONS TO THE FOREGOING.

Thus Occultism rejects the idea that Nature developed man from the ape, or even from an ancestor common to both, but traces, on the contrary, some of the most anthropoid species to the Third Race man of the early Atlantean period. As this proposition will be maintained and defended elsewhere, a few words more are all that are needed at present. For greater clearness, however, we shall repeat in brief what was said previously in Book I., Stanza VI.

Our teachings show that, while it is quite correct to say that nature had built, at one time, around the human astral form an ape-like external shape, yet it is as correct that this shape was no more that of the "missing link," than were the coverings of that astral form, during the course of its natural evolution through all the kingdoms of nature. Nor was it, as shown in the proper place, on this Fourth Round planet that such evolution took place, but only during the First, Second, and Third Rounds, when MAN was, in turn, "a stone, a plant, and an animal" until he became what he was in the First Root-Race of present humanity. The real line of evolution differs from the Darwinian, and the two systems are irreconcilable, except when the latter is divorced from the dogma of "Natural Selection" and the like. Indeed, between the Monera of Haeckel and the Sarisripa of Manu, there lies an impassable chasm in the shape of the Jiva; for the "human" Monad, whether immetallized in the stone-atom, or invegetallized in the plant, or inanimalized in the animal, is still and ever a divine, hence also a HUMAN Monad. It ceases to be human only when it becomes absolutely divine. The terms "mineral," "vegetable" and "animal" monad are meant to create a superficial distinction: there is no such thing as a Monad (jiva)

[[Vol. 2, Page]] 186 THE SECRET DOCTRINE.

other than divine, and consequently having been, or having to become, human. And the latter term has to remain meaningless unless the difference is well understood. The Monad is a drop out of the shoreless Ocean beyond, or, to be correct, within the plane of primeval differentiation. It is divine in its higher and human in its lower condition -- the adjectives "higher" and "lower" being used for lack of better words -- and a monad it remains at all times, save in the Nirvanic state, under whatever conditions, or whatever external forms. As the Logos reflects the Universe in the Divine Mind, and the manifested Universe reflects itself in each of its Monads, as Leibnitz put it, repeating an Eastern teaching, so the MONAD has, during the cycle of its incarnations, to reflect in itself every root-form of each kingdom. Therefore, the Kabalists say correctly that "MAN becomes a stone, a plant, an animal, a man, a Spirit, and finally God. Thus accomplishing his cycle or circuit and returning to the point from which he had started as the heavenly MAN." But by "Man" the divine Monad is meant, and not the thinking Entity, much less his physical body. While rejecting the immortal Soul, the men of Science now try to trace the latter through a series of animal forms from the lowest to the highest; whereas, in truth, all the present fauna are the descendants of those primordial monsters of which the Stanzas speak. The animals -- the creeping beasts and those in the waters that preceded man in this Fourth Round, as well as those contemporary with the Third Race, and again the mammalia that are posterior to the Third and Fourth Races -- all are either directly or indirectly the mutual and correlative product (physically) of man. It is correct to say that the man of this Manvantara, i.e., during the three preceding Rounds, has passed through all the kingdoms of nature. That he was "a stone, a plant, an animal." But (a) these stones, plants, and animals were the prototypes, the filmy presentments of those of the Fourth Round; and (b) even those at the beginning of the Fourth Round were the astral shadows of the present, as the Occultists express it. And finally the forms and genera of neither man, animal, nor plant were what they became later. Thus the astral prototypes of the lower beings of the animal kingdom of the Fourth Round, which preceded (the chhayas of) Men, were the consolidated, though still very ethereal sheaths of the still more ethereal forms or models produced at the close of the Third Round on Globe D.* "Produced from the residue of the substance matter; from dead bodies of men and (other extinct) animals of the wheel before," or the previous Third Round -- as Stanza 24 tells us. Hence, while the nondescript "animals"

[[Footnote(s)]] -----

* Vide "Esoteric Buddhism."

[[Vol. 2, Page]] 187 THE DARWINISTS MISTAKEN.

that preceded the astral man at the beginning of this life-cycle on our Earth were still, so to speak, the progeny of the man of the Third Round, the mammalians of this Round owe their existence, in a great measure, to man again. Moreover, the "ancestor" of the present anthropoid animal, the ape, is the direct production of the yet mindless Man, who desecrated his human dignity by putting himself physically on the level of an animal.

The above accounts for some of the alleged physiological proofs, brought forward by the anthropologists as a demonstration of the descent of man from the animals.

The point most insisted upon by the Evolutionists is that, "The history of the embryo is an epitome of that of the race." That "every organism, in its development from the egg, runs through a series of forms, through which, in like succession, its ancestors have passed in the long course of Earth's history.* The history of the embryo . . . is a picture in little, and outline of that of the race. This conception forms the gist of our fundamental biogenetic law, which we are obliged to place at the head of the study of the fundamental law of organic development."***

This modern theory was known as a fact to, and far more philosophically expressed by, the Sages and Occultists from the remotest ages. A passage from "Isis Unveiled" may here be cited to furnish a few points of comparison. In Vol. I., pp. 388-9, it was asked why, with all their great learning, physiologists were unable to explain teratological phenomena? Any anatomist who has made the development and growth of the embryo "a subject of special study," can tell, without much brain-work, what daily experience and the evidence of his own eyes show him, viz., that up to a certain period, the human embryo is facsimile of a young batrachian in its first remove from the spawn -- tadpole. But no physiologist or anatomist seems to have had the idea of applying to the development of the human being -- from the first

[[Footnote(s)]] -----

* "A very strong argument in favour of variability is supplied by the science of Embryology. Is not a man in the uterus a simple cell, a vegetable with three or four leaflets, a tadpole with branchiae, a mammal with a tail, lastly a primate (?) and a biped? It is scarcely possible not to recognise in the embryonic evolution a rapid sketch, a faithful summary, of the entire organic series." (Lefevre, Philosophy, p. 484).

The summary alluded to is, however, only that of the store of types hoarded up in man, the microcosm. This simple explanation meets all such objections, as the presence of the rudimentary tail in the foetus -- a fact triumphantly paraded by Haeckel and Darwin as conclusively in favour of the Ape-Ancessor theory. It may also be pointed out that the presence of a vegetable with leaflets in the embryonic stages is not explained on ordinary evolutionist principles. Darwinists have not traced man through the vegetable, but Occultists have. Why then this feature in the embryo, and how do the former explain it?

** "The Proofs of Evolution," a lecture by Haeckel.

[[Vol. 2, Page]] 188 THE SECRET DOCTRINE.

instant of its physical appearance as a germ to its ultimate formation and birth -- the Pythagorean esoteric doctrine of metempsychosis, so erroneously interpreted by critics. The meaning of the axiom: "A stone becomes a plant; a plant, a beast; a beast, a man, etc." was mentioned in another place in relation to the spiritual and physical evolution of men on this Earth. We will now add a few more words to make the matter clearer.

What is the primitive shape of the future man? A grain, a corpuscle, say some physiologists; a molecule, an ovum of the ovum, say others. If it could be analysed -- by the microscope or otherwise -- of what ought we to expect to find it composed? Analogically, we should say, of a nucleus of inorganic matter, deposited from the circulation at the germinating point, and united with a deposit of organic matter. In other words, this infinitesimal nucleus of the future man is composed of the same elements as a stone -- of the same elements as the Earth, which the man is destined to inhabit. Moses is cited by the Kabalists as authority for the remark that it required earth and water to make a living being, and thus it may be said that man first appears as a stone.

At the end of three or four weeks the ovum has assumed a plant-like appearance, one extremity having become spheroidal and the other tapering like a carrot. Upon dissection it is found to be composed, like an onion, of very delicate laminae or coats, enclosing a liquid. The laminae approach each other at the lower end, and the embryo hangs from the root of the umbilicus almost like the fruit from the bough. The stone has now become changed, by "metempsychosis," into a plant. Then the embryonic creature begins to shoot out, from the inside outward, its limbs, and develops its features. The eyes are visible as two black dots; the ears, nose, and mouth form depressions, like the points of a pineapple, before they begin to project. The embryo develops into an animal-like foetus -- the shape of a tadpole -- and, like an amphibious reptile, lives in water and develops from it. Its Monad has not yet become either human or immortal, for the Kabalists tell us that this only occurs at the "fourth hour." One by one the foetus assumes the characteristics of the human being, the first flutter of the immortal breath passes through its being; it moves; and the divine essence settles in the infant frame, which it will inhabit until the moment of physical death, when man becomes a spirit.

This mysterious process of a nine-months' formation, the Kabalists call the completion of the "individual cycle of evolution." As the foetus develops amidst the liquor amnii in the womb, so the Earths germinate in the universal ether, or astral fluid, in the womb of the Universe. These cosmic children, like their pigmy inhabitants, are at first nuclei; then ovules; then gradually mature; and becoming

[[Vol. 2, Page]] 189 NATURALISTS INVENTING LINKS.

mothers, in their turn, develop mineral, vegetable, animal, and human forms. From centre to circumference, from the imperceptible vesicle to the uttermost conceivable bounds of the Kosmos, those glorious thinkers, the Occultists, trace cycle merging into cycle, containing and contained in an endless series. The embryo evolving in its pre-natal sphere, the individual in his family, the family in the state, the state in mankind, the Earth in our system, that system in its central universe, the universe in the Kosmos, and the Kosmos in the ONE CAUSE . . . thus runs their philosophy of evolution, differing as we see, from that of Haeckel:--

"All are but parts of one stupendous whole,
Whose body Nature is, and (Parabrahm) the soul . . ."

These are the proofs of Occultism, and they are rejected by Science. But how is the chasm between the mind of man and animal to be bridged in this case? How, if the anthropoid and Homo primigenius had, *argumenti gratia*, a common ancestor (in the way modern speculation puts it), did the two groups diverge so widely from one another as regards mental capacity? True, the Occultist may be told that in every case Occultism does what Science repeats; it gives a common ancestor to ape and man, since it makes the former issue from primeval man. Ay, but that "primeval man" was man only in external form. He was mindless and soulless at the time he begot, with a female animal monster, the forefather of a series of apes. This speculation -- if speculation it be -- is at least logical, and fills the chasm between the mind of man and animal. Thus it accounts for and explains the hitherto unaccountable and inexplicable. The fact that, in the present stage of evolution, Science is almost certain that no issue can follow from the union of man and animal, is considered and explained elsewhere.

Now what is the fundamental difference between the accepted (or nearly so) conclusions, as enunciated in "The Pedigree of Man," viz., that man and ape have a common ancestor; and the teachings of Occultism, which deny this conclusion and accept the fact that all things and all living beings have originated from one common source? Materialistic science makes man evolve gradually to what he is now, and, starting from the first protoplasmic speck called Moneron (which we are told has, like the rest, "originated in the course of immeasurable ages from a few, or from one simple, spontaneously arising original form, that has obeyed one law of evolution"), pass through "unknown and unknowable" types up to the ape, and thence to the human being. Where the transitional shapes are discoverable we are not told; for the simple

reason that no "missing links" between man and the apes have ever yet been found, though this fact in no way prevents men like Haeckel from inventing them ad libitum.

[[Vol. 2, Page]] 190 THE SECRET DOCTRINE.

Nor will they ever be met with; simply, again, because that link which unites man with his real ancestry is searched for on the objective plane and in the material world of forms, whereas it is safely hidden from the microscope and dissecting knife within the animal tabernacle of man himself. We repeat what we have said in Isis Unveiled:--

". All things had their origin in spirit -- evolution having originally begun from above and proceeded downward, instead of the reverse, as taught in the Darwinian theory. In other words, there has been a gradual materialization of forms until a fixed ultimate of debasement is reached. This point is that at which the doctrine of modern evolution enters into the arena of speculative hypothesis. Arrived at this period we will find it easier to understand Haeckel's Anthropogeny, which traces the pedigree of man 'from its protoplasmic root, sodden in the mud of seas which existed before the oldest of the fossiliferous rocks were deposited,' according to Professor Huxley's exposition. We may believe the man (of the Third Round) evolved 'by gradual modification of an (astral) mammal of ape-like organization' still easier when we remember that (though in a more condensed and less elegant, but still as comprehensible, phraseology) the same theory was said by Berossus to have been taught many thousands of years before his time by the man-fish Oannes or Dagon, the semi-demon of Babylonia* (though on somewhat modified lines).

"But what lies back of the Darwinian line of descent? So far as he is concerned nothing but 'unverifiable hypotheses.' For, as he puts it, he views all beings 'as the lineal descendants of some few beings which lived long before the first bed of the Silurian system was deposited.'** He does not attempt to show us who these 'few beings' were. But it answers our purpose quite as well, for, in the admission of their existence at all, resort to the ancients for corroboration and elaboration of the idea receives the stamp of scientific approbation. . . . "

Truly, as also said in our first work: "If we accept Darwin's theory of the development of species, we find that his starting-point is placed in front of an open door. We are at liberty with him, to either remain within, or cross the threshold, beyond which lies the limitless and the incomprehensible, or rather the Unutterable. If our mortal language is inadequate to express what our spirit dimly foresees in the great 'Beyond' -- while on this earth -- it must realize it at some point in the timeless Eternity." But what lies "beyond" Haeckel's theory? Why Bathybius Haeckelii, and no more!

A further answer is given in Part III. Addenda.

[[Vol. 2, Page]] 191 THE CAUSE OF DEGENERATION.

STANZA IX.
THE FINAL EVOLUTION OF MAN.

§§ (33) The creators repent. (34) They atone for their neglect. (35) Men become endowed with minds. (36) The fourth race develops perfect speech. (37) Every androgynous unit is separated and becomes bisexual.

33. SEEING WHICH (the sin committed with the animals), THE LHAS (the spirits, the "Sons of Wisdom") WHO HAD NOT BUILT MEN (who had refused to create), WEPT, SAYING:--

34. "THE AMANASA (the 'mindless') HAVE DEFILED OUR FUTURE ABODES (a). THIS IS KARMA. LET US DWELL IN THE OTHERS. LET US TEACH THEM BETTER, LEST WORSE SHOULD HAPPEN." THEY DID. . . .

35. THEN ALL BECAME ENDOWED WITH MANAS (minds). THEY SAW THE SIN OF THE MINDLESS.

But they had already separated before the ray of divine reason had enlightened the dark region of their hitherto slumbering minds, and had sinned. That is to say, they had committed evil unconsciously, by producing an effect which was unnatural. Yet, like the other six primitive brother or fellow races, even so this seventh, henceforth degenerated race, which will have to bide its time for its final development on account of the sin committed, -- even this race will find itself on the last day on one of the seven paths. For "the wise* guard the home of nature's order, they assume excellent forms in secret."** But we must see whether the "animals" tampered with, were of the same kind as those known to zoology.

[[Footnote(s)]] -----

* This verse in the Veda (X. 5-6), "The seven wise ones (rays of wisdom, Dhyanis) fashion seven paths (or lines as also Races in another sense). To one of these may the distressed mortal come" -- which is interpreted solely from the astronomical and cosmic aspect -- is one of the most pregnant in occult meaning. The "paths" may mean lines (maryadah), but they are primarily beams of light falling on the paths leading to wisdom. (See Rig Veda IV. 5-13.) It means "ways" or paths. They are, in short, the seven Rays which fall free from the macrocosmic centre, the seven principles in the metaphysical, the seven Races in the physical sense. All depends upon the key used.

[[Vol. 2, Page]] 192 THE SECRET DOCTRINE.

(a) The "Fall" occurred, according to the testimony of ancient Wisdom and the old records, as soon as Daksha (the reincarnated Creator of men and things in the early Third Race) disappeared to make room for that portion of mankind which had "separated." This is how the Commentary explains the details that preceded the "Fall":--

"In the initial period of man's Fourth evolution, the human kingdom branched off in several and various directions. The outward shape of its first specimens was not uniform, for the vehicles (the egg-like, external shells, in which the future fully physical man gestated) were often tampered with, before they hardened, by huge animals, of species now unknown, and which belonged to the tentative efforts of Nature. The result was that intermediate races of monsters, half animals, half men, were produced. But as they were failures, they were not allowed to breathe long and live, though the intrinsically paramount power of psychic over physical nature being yet very weak, and hardly established, the 'Egg-Born' Sons had taken several of their females unto themselves as mates, and bred other human monsters. Later, animal species and human races becoming gradually equilibrated, they separated and mated no longer. Man created no more -- he begot. But he also begot animals, as well as men in days of old. Therefore the Sages (or wise men), who speak of males who had no more will-begotten offspring, but begat various animals along with Danavas (giants) on females of other species -- animals being as (or in a manner of) Sons putative to them; and they (the human males) refusing in time to be regarded as (putative) fathers of dumb creatures -- spoke truthfully and wisely. Upon seeing this (state of things), the kings and Lords of the Last Races (of the Third and the Fourth) placed the seal of prohibition upon the sinful intercourse. It interfered with Karma, it developed new (Karma).* They (the divine Kings) struck the culprits with sterility. They destroyed the Red and Blue Races.**

In another we find:--

"There were blue and red-faced animal-men even in later times; not from actual intercourse (between the human and animal species), but by descent."

And still another passage mentions:--

"Red-haired, swarthy men going on all-fours, who bend and unbend (stand erect and fall on their hands again) who speak as their forefathers, and run on their hands as their giant fore-mothers."

Perchance in these specimens, Haeckelians might recognize, not the

* It is next to impossible to translate verbally some of these old Commentaries. We are often obliged to give the meaning only, and thus retranslate the verbatim translations.

** Rudra, as a Kumara, is Lilalohita -- red and blue.

[[Vol. 2, Page]] 193 THE BONELESS RACE.

Homo primigenius, but some of the lower tribes, such as some tribes of the Australian savages. Nevertheless, even these are not descended from the anthropoid apes, but from human fathers and semi-human mothers, or, to speak more correctly, from human monsters -- those "failures" mentioned in the first Commentary. The real anthropoids, Haeckel's Catarrhini and Platyrrhini, came far later, in the closing times of Atlantis. The orang-outang, the gorilla, the chimpanzee and cynocephalus are the latest and purely physical evolutions from lower anthropoid mammalians. They have a spark of the purely human essence in them; man on the other hand, has not one drop of pithecoïd* blood in his veins. Thus saith old Wisdom and universal tradition.

How was the separation of sexes effected? it is asked. Are we to believe in the old Jewish fable of the rib of Adam yielding Eve? Even such belief is more logical and reasonable than the descent of man from the Quadrumana without any reservation; as the former hides an esoteric truth under a fabulous version, while the latter conceals no deeper fact than a desire to force upon mankind a materialistic fiction. The rib is bone, and when we read in Genesis that Eve was made out of the rib, it only means that the Race with bones was produced out of a previous Race and Races, which were "boneless." This is an esoteric tenet spread far and wide, as it is almost universal under its various forms. A Tahitian tradition states that man was created out of Araea, "red

[[Footnote(s)]] -----

* This, regardless of modern materialistic evolution, which speculates in this wise: "The primitive human form, whence as we think all human species sprang, has perished this long time." (This we deny; it has only decreased in size and changed in texture.) "But many facts point to the conclusion that it was hairy and dolichocephalic." (African races are even now dolichocephalic in a great measure, but the palaeolithic Neanderthal skull, the oldest we know of, is of a large size, and no nearer to the capacity of the gorilla's cranium than that of any other now-living man). "Let us, for the time being, call this hypothetical species Homo primigenius. . . . This first species, or the Ape-man, the ancestor of all the

others, PROBABLY arose in the tropical regions of the old world from ANTHROPOID APES." Asked for proofs, the evolutionist, not the least daunted, replies: "Of these NO FOSSIL REMAINS ARE AS YET KNOWN TO US, BUT THEY WERE probably AKIN TO THE GORILLA AND ORANG OF THE PRESENT DAY." And then the Papuan negro is mentioned as the probable descendant in the first line (Pedigree of Man, p. 80).

Haeckel holds fast to Lemuria, which with East Africa and South Asia also, he mentions as the possible cradle of the primitive Ape-men; and so do many geologists. Mr. A. R. Wallace admits its reality, though in a rather modified sense, in his "Geographical Distribution of Animals." But let not Evolutionists speak so lightly of the comparative size of the brains of man and the ape, for this is very unscientific, especially when they pretend to see no difference between the two, or very little at any rate. For Vogt himself showed that, while the highest of the Apes, the gorilla, has a brain of only 30 to 51 cubic inches, the brain of the lowest of the Australian aborigines amounts to 99.35 cubic inches. The former is thus "not half of the size of the brain of a new-born babe," says Pfaff.

[[Vol. 2, Page]] 194 THE SECRET DOCTRINE.

Earth." Taaroa, the creative power, the chief god, "put man to sleep for long years, for several lives," which means racial periods, and is a reference to his mental sleep, as shown elsewhere. During that time the deity pulled an Ivi (bone) out of man and she became a woman.*

Nevertheless, whatever the allegory may mean, even its exoteric meaning necessitates a divine Builder of man -- "a Progenitor." Do we then believe in such "supernatural" beings? We say, No. Occultism has never believed in anything, whether animate or inanimate, outside nature. Nor are we Cosmolators or Polytheists for believing in "Heavenly Man" and divine men, for we have the accumulated testimony of the ages, with its unvarying evidence on every essential point, to support us in this; the Wisdom of the Ancients and UNIVERSAL tradition. We reject, however, every groundless and baseless tradition, which, having outgrown strict allegory and symbolism, has found acceptance in exoteric creeds. But that which is preserved in unanimous traditions, only the wilfully blind could reject. Hence we believe in races of beings other than our own in far remote geological periods; in races of ethereal, following incorporeal, "Arupa," men, with form but no solid substance, giants who preceded us pigmies; in dynasties of divine beings, those Kings and Instructors of the Third Race in arts and sciences, compared with which our little modern science stands less chance than elementary arithmetic with geometry.

No, certainly not. We do not believe in the supernatural but only in the superhuman, or rather interhuman, intelligences. One may easily appreciate the feeling of reluctance that an educated person would have to being classed with the superstitious and ignorant; and even realize the great truth uttered by Renan when he says that: "The supernatural has become like the original sin, a blemish that every one seems ashamed of -- even those most religious persons who refuse in our day to accept even a minimum of Bible miracles in all their crudeness, and who, seeking to reduce them to the minimum, hide and conceal it in the furthest corners of the past."**

But the "supernatural" of Renan belongs to dogma and its dead letter. It has nought to do with its Spirit nor with the reality of facts in Nature. If theology asks us to believe that four or five thousand years ago men lived 900 years and more, that a portion of mankind, the enemies of the people of Israel exclusively, was composed of giants

[[Footnote(s)]] -----

* "Polynesian Researches," Ellis. Vol.II., p. 38.

Missionaries seem to have pounced upon this name Ivi and made of it Eve. But, as shown by Professor Max Muller, Eve is not the Hebrew name but an European transformation of [[hebrew]], chavah, "life," or mother of all living; "while the Tahitian Ivi and the Maori Wheva meant bone and bone only." ("False Analogies.")

** Chaire d'Hebreu au college de France, p. 20.

[[Vol. 2, Page]] 195 THE HAIRY MEN OF CHINA.

and monsters, we decline to believe that such a thing existed in Nature 5,000 years back. For Nature never proceeds by jumps and starts, and logic and common sense, besides geology, anthropology and ethnology, have justly rebelled against such assertions. But if that same theology, giving up her fantastic chronology, had claimed that men lived 969 years -- the age of Methuselah -- five million years ago, we would have nothing to say against the claim. For in those days the physical frame of men was, compared to the present human body, as that of a megalosaurus to a common lizard.

A naturalist suggests another difficulty. The human is the only species which, however unequal in its races, can breed together. "There is no question of selection between human races," say the anti-Darwinists, and no evolutionist can deny the argument -- one which very triumphantly proves specific unity. How then can Occultism insist that a portion of the Fourth Race humanity begot young ones from females of another, only semi-human, if not quite an animal, race, the hybrids resulting from which union not only bred freely but produced the ancestors of the modern anthropoid apes? Esoteric science replies to this that it was in the very beginnings of physical man. Since then, Nature has changed her ways, and sterility is the only result of the crime of man's bestiality. But we have to this day proofs of this. The Secret Doctrine teaches that the specific unity of mankind is not without exceptions even now. For there are, or rather still were a few years ago, descendants of these half-animal tribes or races, both of remote Lemurian and Lemuro-Atlantean origin. The world knows them as Tasmanians (now extinct), Australians, Andaman Islanders, etc. The descent of the Tasmanians can be almost proved by a fact, which struck Darwin a good deal, without his being able to make anything of it. This fact deserves notice.

Now de Quatrefages and other naturalists, who seek to prove Monogenesis by the very fact of every race of mankind being capable of crossing with every other, have left out of their calculations exceptions, which do not in this case confirm the rule. Human crossing may have been a general rule from the time of the separation of sexes, and yet that other law

may assert itself, viz., sterility between two human races, just as between two animal species of various kinds, in those rare cases when a European, condescending to see in a female of a savage tribe a mate, happens to choose a member of such mixed tribes.* Darwin notes such

[[Footnote(s)]] -----

* Of such semi-animal creatures, the sole remnants known to Ethnology were the Tasmanians, a portion of the Australians and a mountain tribe in China, the men and women of which are entirely covered with hair. They were the last descendants in a direct line of the semi-animal latter-day Lemurians referred to. There are, however, considerable numbers of the mixed Lemuro-Atlantean peoples produced by various [[Footnote continued on next page]]

[[Vol. 2, Page]] 196 THE SECRET DOCTRINE.

a case in a Tasmanian tribe, whose women were suddenly struck with sterility, en masse, some time after the arrival among them of the European colonists. The great naturalist tried to explain this fact by change of diet, food, conditions, etc., but finally gave up the solution of the mystery. For the Occultist it is a very evident one. "Crossing," as it is called, of Europeans with Tasmanian women -- i.e., the representatives of a race, whose progenitors were a "soulless"* and mindless monster and a real human, though still as mindless a man -- brought on sterility. This, not alone as a consequence of a physiological law, but also as a decree of Karmic evolution in the question of further survival of the abnormal race. In no one point of the above is Science prepared to believe as yet -- but it will have to in the long run. Esoteric philosophy, let us remember, only fills the gaps made by science and corrects her false premises.

Yet, in this particular, geology and even botany and zoology support the esoteric teachings. It has been suggested by many geologists that the Australian native -- co-existing as he does with an archaic fauna and flora -- must date back to an enormous antiquity. The whole environment of this mysterious race, about whose origin ethnology is silent, is a testimony to the truth of the esoteric position.

"It is a very curious fact," says Jukes,** "that not only these marsupial animals (the mammals found in the Oxfordshire stone-field slates), but several of the shells -- as for instance, the Trigonias and even some of the plants found fossil in the Oolitic rocks -- much more nearly resemble those now living in Australia than the living forms of any other part of the globe. This might be explained on the supposition that, since the Oolitic (Jurassic) period, less change has taken place in Australia than elsewhere, and that the Australian flora and fauna consequently retain some-

[[Footnote(s)]] -----

[[Footnote continued from previous page]] crossings with such semi-human stocks -- e.g., the wild men of Borneo, the Veddhas of Ceylon, classed by Prof. Flower among Aryans (!), most of the remaining Australians, Bushmen, Negritos, Andaman Islanders, etc.

The Australians of the Gulf of St. Vincent and the neighbourhood of Adelaide are very hairy, and the brown down on the skin of boys of five or six years of age assumes a furry appearance. They are, however, degraded men -- not the closest approximation to the "pithecoïd man," as Haeckel so sweepingly affirms. Only a portion of these men are a Lemurian relic. (Cf. "Esoteric Buddhism," p.55.)

* In calling the animal "Soulless," it is not depriving the beast, from the humblest to the highest species, of a "soul," but only of a conscious surviving Ego-soul, i.e., that principle which survives after a man, and reincarnates in a like man. The animal has an astral body, that survives the physical form for a short period; but its (animal) Monad does not re-incarnate in the same, but in a higher species, and has no "Devachan" of course. It has the seeds of all the human principles in itself, but they are latent.

** "Manual of Geology," p. 302.

[[Vol. 2, Page]] 197 THE SEPARATION OF SEXES.

thing of the Oolitic type, while it had been altogether supplanted and replaced on the rest of the Globe." (! !)

Now why has less change taken place in Australia than elsewhere? Where is the *raison d'etre* for such a "curse of retardation"? It is simply because the nature of the environment develops *pari passu* with the race concerned. Correspondences rule in every quarter. The survivors of those later Lemurians, who escaped the destruction of their fellows when the main continent was submerged, became the ancestors of a portion of the present native tribes. Being a very low sub-race, begotten originally of animals, of monsters, whose very fossils are now resting miles under the sea floors, their stock has since existed in an environment strongly subjected to the law of retardation. Australia is one of the oldest lands now above the waters, and in the senile decrepitude of old age, its "virgin soil" notwithstanding. It can produce no new forms, unless helped by new and fresh races, and artificial cultivation and breeding.

To return, however, once more to the history of the Third Race, the "Sweat-Born," the "Egg-bearing," and the "Androgyne." Almost sexless, in its early beginnings, it became bisexual or androgynous; very gradually of course. The passage from the former to the latter transformation required numberless generations, during which the simple cell that issued from the earliest parent (the two in one), first developed into a bisexual being; and then the cell, becoming a regular egg, gave forth a unisexual creature. The Third-Race-mankind is the most mysterious of all the hitherto developed five Races. The mystery of the "How" of the generation of the distinct sexes must, of course, be very obscure here, as it is the business of an embryologist and a specialist, the present work giving only faint outlines of the process. But it is evident that the units of the Third Race humanity began to separate in their pre-natal shells, or eggs,* and to issue out of them as distinct male and female babes, ages after the appearance of its early progenitors. And, as time rolled on its geological periods, the newly born sub-races began to lose their natal capacities. Toward the end of the fourth sub-race, the babe lost its faculty of walking as soon as liberated from its shell, and by the end of the fifth, mankind was born under

the same conditions and by the same identical process as our historical generations. This required, of course, millions of years. The

[[Footnote(s)]] -----

* The "fables" and "myths" about Leda and Jupiter, and such like, could never have sprung up in people's fancy, had not the allegory rested on a fact in nature. Evolution, gradually transforming man into a mammal, did in his case only what it did in that of other animals. But this does not prevent man from having always stood at the head of the animal world and other organic species, and from having preceded the former.

[[Vol. 2, Page]] 198 THE SECRET DOCTRINE.

reader has been made acquainted with the approximate figures, at least of the exoteric calculations, in Stanza II.

We are approaching the turning-point of the evolution of the Races. Let us see what occult philosophy says on the origin of language.

36. THE FOURTH RACE DEVELOPED SPEECH.

The Commentaries explain that the first Race -- the ethereal or astral Sons of Yoga, also called "Self-born" -- was, in our sense, speechless, as it was devoid of mind on our plane. The Second Race had a "Sound-language," to wit, chant-like sounds composed of vowels alone. The Third Race developed in the beginning a kind of language which was only a slight improvement on the various sounds in Nature, on the cry of gigantic insects and of the first animals, which, however, were hardly nascent in the day of the "Sweat-born" (the early Third Race). In its second half, when the "Sweat-born" gave birth to the "Egg-born," (the middle Third Race); and when these, instead of "hatching out" (may the reader pardon the rather ridiculous expression when applied to human beings in our age) as androgynous beings, began to evolve into separate males and females; and when the same law of evolution led them to reproduce their kind sexually, an act which forced the creative gods, compelled by Karmic law, to incarnate in mindless men; then only was speech developed. But even then it was still no better than a tentative effort. The whole human race was at that time of "one language and of one lip." This did not prevent the last two Sub-Races of the Third Race* from building cities, and sowing far and wide the first seeds of civilization under the guidance of their divine instructors,** and their own already awakened minds. Let the reader also bear in mind that, as each of the seven races is divided into four ages -- the Golden, Silver, Bronze, and Iron Age -- so is every smallest division of such races.*** Speech then developed, according to occult teaching, in the following order:--

I. Monosyllabic speech; that of the first approximately fully developed human beings at the close of the Third Root-race, the "golden-coloured," yellow-complexioned men, after their separation into sexes, and the full

[[Footnote(s)]] -----

* To avoid confusion, let the reader remember that the term Root-Race applies to one of the seven great Races, sub-Race to one of its great Branches, and Family-Race to one of the sub-divisions, which include nations and large tribes.

** In the Section on the Divine Dynasties, the nature of these "Instructors" is explained.

*** Vide Section attached to the "Divisions into Yugas."

[[Vol. 2, Page]] 199 PRIMEVAL LANGUAGE.

awakening of their minds. Before that, they communicated through what would now be called "thought-transference," though, with the exception of the Race called the "Sons of Will and Yoga" -- the first in whom the "Sons of Wisdom" had incarnated -- thought was but very little developed in nascent physical man, and never soared above a low terrestrial level. Their physical bodies belonging to the Earth, their Monads remained on a higher plane altogether. Language could not be well developed before the full acquisition and development of their reasoning faculties. This monosyllabic speech was the vowel parent, so to speak, of the monosyllabic languages mixed with hard consonants, still in use amongst the yellow races which are known to the anthropologist.*

II. These linguistic characteristics developed into the agglutinative languages. The latter were spoken by some Atlantean races, while other parent stocks of the Fourth Race preserved the mother-language. And as languages have their cyclic evolution, their childhood, purity, growth, fall into matter, admixture with other languages, maturity, decay and finally death,** so the primitive speech of the most civilized Atlantean races -- that language, which is referred to as "Rakshasi Bhasa," in old Sanskrit works -- decayed and almost died out. While the "cream" of the Fourth Race gravitated more and more toward the apex of physical and intellectual evolution, thus leaving as an heirloom to the nascent Fifth (the Aryan) Race the inflectional, highly developed languages, the agglutinative decayed and remained as a fragmentary fossil idiom, scattered now, and nearly limited to the aboriginal tribes of America.

[[Footnote(s)]] -----

* The present yellow races are the descendants, however, of the early branches of the Fourth Race. Of the third, the only pure and direct descendants are, as said above, a portion of the fallen and degenerated Australians, whose far distant ancestors belonged to a division of the seventh Sub-race of the Third. The rest are of mixed Lemuro-Atlantean descent. They have since then entirely changed in stature and intellectual capacities.

** Language is certainly coeval with reason, and could never have been developed before men became one with the informing principles in them -- those who fructified and awoke to life the manasic element dormant in primitive man. For, as Professor Max Muller tells us in his "Science of Thought," "Thought and language are identical." Yet to add to this the reflection that thoughts which are too deep for words, do not really exist at all, is rather risky, as thought impressed upon the astral tablets exists in eternity whether expressed or not. Logos is both reason and speech. But language, proceeding in cycles, is not always adequate to express spiritual thoughts. Moreover, in one sense, the Greek Logos is the equivalent of the Sanscrit Vach, "the immortal (intellectual) ray of spirit." And the fact that Vach (as Devasena, an aspect of Saraswati, the goddess of hidden Wisdom) is the spouse of the eternal celibate Kumara, unveils a suggestive, though veiled, reference to the Kumaras, those "who refused to create," but who were compelled later on to complete divine Man by incarnating in him. All this will be fully explained in the sections that follow.

[[Vol. 2, Page]] 200 THE SECRET DOCTRINE.

III. The inflectional speech -- the root of the Sanskrit, very erroneously called "the elder sister" of the Greek, instead of its mother -- was the first language (now the mystery tongue of the Initiates, of the Fifth Race). At any rate, the "Semitic" languages are the bastard descendants of the first phonetic corruptions of the eldest children of the early Sanskrit. The occult doctrine admits of no such divisions as the Aryan and the Semite, accepting even the Turanian with ample reservations. The Semites, especially the Arabs, are later Aryans -- degenerate in spirituality and perfected in materiality. To these belong all the Jews and the Arabs. The former are a tribe descended from the Tchandalas of India, the outcasts, many of them ex-Brahmins, who sought refuge in Chaldea, in Scinde, and Aria (Iran), and were truly born from their father A-bram (No Brahmin) some 8,000 years B.C. The latter, the Arabs, are the descendants of those Aryans who would not go into India at the time of the dispersion of nations, some of whom remained on the borderlands thereof, in Afghanistan and Kabul,* and along the Oxus, while others penetrated into and invaded Arabia.

But this was when Africa had already been raised as a continent. We have meanwhile to follow, as closely as limited space will permit, the gradual evolution of the now truly human species. It is in the suddenly arrested evolution of certain sub-races, and their forced and violent diversion into the purely animal line by artificial cross-breeding, truly analogous to the hybridization, which we have now learned to utilize in the vegetable and animal kingdoms, that we have to look for the origin of the anthropoids.

[[Footnote(s)]] -----

* Ptolemy, speaking in his ninth table of the Kabolitae (Kabul tribes), calls them [[Aristophuloi]], the aristocratic or noble tribes. The Afghans call themselves Ben-Issrael (children of Is(sa)rael), from Issa, "woman and also earth," Sons of Mother Earth. But if you call an Afghan Yahoudi (Jew), he will kill you. The subject is fully treated elsewhere. The names of the supposed twelve tribes and the names of the real tribes, the same in number, of the Afghans, are the same. The Afghans being far older (at any rate, their Arabic stock) than the Israelites, no one need be surprised to find such tribal names among them as Youssoufzic, "Sons of Joseph" in Punjcaure and Boonere; the Zablistanee (Zebulon); Ben-manasseh (sons of Manasseh) among the Khojar Tartars; Isaguri, or Issachar (now Ashnagor in Afghanistan), etc., etc. The whole twelve names of the so-called twelve tribes are names of the signs of the Zodiac, as is now well proven. At any rate, the names of the oldest Arabic tribes, re-transliterated, yield the names of the zodiacal signs and of the mythical sons of Jacob likewise. Where are the traces of the Jewish twelve tribes? Nowhere. But there is a trace, and a good one, that the Jews have tried to deceive people with the help of those names. For, see what happens ages after the ten tribes had wholly disappeared from Babylon. Ptolemy Philadelphus, desiring to have the Hebrew Law translated for him into Greek (the famous Septuagint), wrote to the high priest of the Jews, Eleazar, to send him six men from each of the twelve tribes; and the seventy-two representatives (of whom sixty were ghosts apparently) came to the king in Egypt and translated the law amid miracles and wonders. See Butler's "Horae Biblicae," Josephus, and Philo Judaeus.

[[Vol. 2, Page]] 201 THE TRANSFORMATION OF THE EARTH.

In these red-haired and hair-covered monsters, the fruit of the unnatural connection between men and animals, the "Lords of Wisdom" did not incarnate, as we see. Thus by a long series of transformations due to unnatural cross-breeding (unnatural "sexual selection"), originated in due course of time the lowest specimens of humanity; while further bestiality and the fruit of their first animal efforts of reproduction begat a species which developed into mammalian apes ages later.*

As to the separation of sexes, it did not occur suddenly, as one may think. Nature proceeds slowly in whatever she does.

37. THE ONE (androgynous) BECAME TWO; ALSO ALL THE LIVING AND CREEPING THINGS, THAT WERE STILL ONE, GIANT-FISH, BIRDS, AND SERPENTS WITH SHELL-HEADS (a).

This relates evidently to the so-called age of the amphibious reptiles, during which ages science maintains that no man existed! But what could the ancients know of antediluvian prehistoric animals and monsters! Nevertheless, in Book VI. of the Commentaries is found a passage which says, freely translated:--

"When the Third separated and fell into sin by breeding men-animals, these (the animals) became ferocious, and men and they mutually destructive. Till then, there was no sin, no life taken. After (the separation) the Satya (Yuga) was at an end. The eternal spring became constant change and seasons succeeded. Cold forced men to build shelters and devise clothing. Then man appealed to the superior Fathers (the higher gods or angels). The Nirmanakaya of the Nagas, the wise Serpents and Dragons of Light came, and the precursors of the Enlightened (Buddhas). Divine Kings descended and taught men sciences and arts, for man could live no longer in the first land (Adi-Varsha, the Eden of the first Races), which had turned into a white frozen corpse."

The above is suggestive. We will see what can be inferred from this brief statement. Some may incline to think that there is more in it than is apparent at first sight.

[[Footnote(s)]] -----

* The Commentary explains that the apes are the only species, among the animals, which has gradually and with every generation and variety tended more and more to return to the original type of its male forefather -- the dark gigantic Lemurian and Atlantean.

[[Vol. 2, Page]] 202 THE SECRET DOCTRINE.

EDENS, SERPENTS, AND DRAGONS.

Whence the idea, and the true meaning of the term "Eden"? Christians will maintain that the Garden of Eden is the holy Paradise, the place desecrated by the sin of Adam and Eve; the Occultist will deny this dead-letter interpretation, and show the reverse. One need not believe and see in the Bible divine revelation in order to say that this ancient book, if read esoterically, is based upon the same universal traditions. What Eden was is partially shown in Isis Unveiled.*

It was said that: "The Garden of Eden as a locality is no myth at all; it belongs to those landmarks of history which occasionally disclose to the student that the Bible is not all mere allegory. Eden, or the Hebrew [[hebrew]] Gan-Eden, meaning the park or the garden of Eden, is an archaic name of the country watered by the Euphrates and its many branches, from Asia and Armenia to the Erythraean sea." (A. Wilder says that Gan-duniyas is a name of Babylonia.) In the Chaldean "Book of Numbers," the location is designated in numerals, and in the cypher Rosicrucian manuscript, left by Count St. Germain, it is fully described. In the Assyrian Tablets it is rendered Ganduniyas. "Behold," says the [[hebrew]] (Elohim) of Genesis, "the man is become as one of us." The Elohim may be accepted in one sense for gods or powers, and in another for Aleim, or priests -- the hierophants initiated into the good and evil of this world; for there was a college of priests called the Aleim, while the head of their caste, or the chief of the hierophants was known as Java-Aleim. Instead of becoming a neophyte, and gradually obtaining his esoteric knowledge through a regular initiation, an Adam, or Man, uses his intuitional faculties and, prompted by the serpent (Woman and matter), tastes of the Tree of Knowledge -- the esoteric or Secret Doctrine -- unlawfully. The priests of Hercules, or Mel-karth, the "Lord of the Eden," all wore "coats of skin." The text says: "And Java-Aleim made for Adam and his wife [[hebrew]] 'Chitonuth our.'" The first Hebrew word, "chiton," is the Greek [[Chiton]], Chiton. It became a Slavonic word by adoption from the Bible, and means a coat, an upper garment.

"Though containing the same substratum of esoteric truth as does every early Cosmogony, the Hebrew Scripture wears on its face the marks of a double origin. Its Genesis is purely a reminiscence of the Babylonian captivity. The names of places, men and even objects, can be traced from the original text to the Chaldeans and the Akkadians, the progenitors and Aryan instructors of the former. It is strongly contested that the Akkad tribes of Chaldea, Babylonia and Assyria were in

[[Footnote(s)]] -----

* Vol. I., pp. 575, et seq.

[[Vol. 2, Page]] 203 THE GARDEN OF EDEN, A COLLEGE.

any way cognate with the Brahmans of Hindostan; but there are more proofs in favour of this opinion than otherwise. The Shemite or Assyrian ought, perchance, to have been called the Turanian, and the Mongolians have been denominated Scyths. But if the Akkadians ever existed, otherwise than in the imagination of some ethnologists and philologists, they certainly would never have been a Turanian tribe, as some Assyriologists have striven to make us believe. They were simply emigrants on their way to Asia Minor from India, the cradle of humanity, and their sacerdotal adepts tarried to civilize and initiate a barbarian people. Halevy proved the fallacy of the Turanian mania in regard to Akkadian people, and other scientists have proved that the Babylonian civilization was neither born nor developed in that country. It was imported from India, and the importers were Brahminical Hindus."

And now, ten years after this was written, we find ourselves corroborated by Professor Sayce, who says in his first Hibbert lecture that the culture of the Babylonian city Eridu was of foreign importation. It came from India.

"Much of the theology was borrowed by the Semites from the non-Semitic Akkadians or proto-Chaldeans, whom they supplanted, and whose local cults they had neither the will nor the power to uproot. Indeed, throughout a long course of ages the two races, Semites and Akkadians, lived side by side, their notions and worship of the gods blending insensibly together."

Here, the Akkadians are called "non-Semitic," as we had insisted they were in "Isis," which is another corroboration. And we are no less right in always maintaining that the Jewish Biblical history was a compilation of historical facts, arranged from other people's history in Jewish garb -- Genesis excluded, which is esotericism pure and simple. But it is really from the Euxine to Kashmir and beyond, that science has to search for the cradle -- or rather one of the chief cradles -- of mankind and the sons of Ad-ah; and especially in after times, when the Garden of Ed-en on the Euphrates became the college of the astrologers and magi, the Aleim.

But this "college" and this Eden belong to the Fifth Race, and are simply a faint reminiscence of the Adi-varsha, of the primeval Third Race. What is the etymological meaning of the word Eden? In Greek it is [hedone], signifying voluptuousness. In this aspect it is no better than the Olympus of the Greeks, Indra's heaven (Swarga) on Mount Meru, and even the paradise full of Houris, promised by Mahomet to the faithful. The Garden of Eden was never the property of

the Jews; for China, which can hardly be suspected of having known anything of the Jews 2,000 B.C., has such a primitive garden in Central Asia inhabited by the "Dragons of Wisdom," the Initiates. And according to Klaproth,

[[Vol. 2, Page]] 204 THE SECRET DOCTRINE.

the hieroglyphical chart copied from a Japanese Cyclopaedia in the book of Fo-kone-ky, places its "Garden of Wisdom" on the plateau of Pamir between the highest peaks of the Himalayan ranges; and describing it as the culminating point of Central Asia, shows the four rivers -- Oxus, Indus, Ganges, and Silo -- flowing from a common source, the "Lake of the Dragons."

But this is not the Genetic Eden; nor is it the Kabalistical Garden of Eden. For the former -- Eden Illa-ah -- means in one sense Wisdom, a state like that of Nirvana, a paradise of Bliss; while in another sense it refers to Intellectual man himself, the container of the Eden in which grows the tree of Knowledge of good and evil: man being the Knower thereof.

Renan and Barthelemy St. Hilaire, basing themselves "on the most solid inductions," think it impossible to doubt any longer, and both place the cradle of humanity "on the region of the Timaus." Finally, the Asiatic Journal* concludes that: "All the traditions of the human race gathering its primitive families at the region of their birth-place, show them to us grouped around the countries where Jewish tradition places the Garden of Eden; where the Aryans (Zoroastrians) established their Airyana-vaego or the Meru (?). They are hemmed in to the North by the countries which join the lake Aral, and to the South by Baltistan, or Little Tibet. Everything concurs in proving that there was the abode of that primitive humanity to which we have to be traced."

That "primitive humanity" was in its Fifth Race, when the "four-mouthed Dragon," the lake, of which very few traces are now left, was the abode of the "Sons of Wisdom," the first mind-born sons of the Third Race. Yet it was neither the only one nor the primitive cradle of humanity, though it was the copy of the cradle, verily, of the first thinking divine man. It was the Paradesa, the highland of the first Sanskrit-speaking people, the Hedone, the country of delight of the Greeks, but it was not the "bower of voluptuousness" of the Chaldeans, for the latter was only the reminiscence of it; and also because it was not there that the Fall of Man occurred after the "separation." The Eden of the Jews was copied from the Chaldean copy.

That the Fall of man into generation occurred during the earliest portion of what science calls the Mesozoic times, or the age of the reptiles, is evidenced by the Bible phraseology concerning the serpent, the nature of which is explained in the Zohar. The question is not whether Eve's incident with the tempting reptile is allegorical or textual, for no one can doubt that it is the former, but to show the antiquity of the symbolism on the very face of it, and that it was not only a Jewish but an universal idea.

[[Footnote(s)]] -----

* "Journal Asiatique," seventh year, 1855.

[[Vol. 2, Page]] 205 FLYING CAMELS.

Now we find in the Zohar a very strange assertion, one that is calculated to provoke the reader to merry laughter by its ludicrous absurdity. It tells us that the serpent, which was used by Shamael (the supposed Satan), to seduce Eve, was a kind of flying camel [[kamelomorphon]].

A "flying camel" is indeed too much for the most liberal-minded F.R.S. Nevertheless, the Zohar, which can hardly be expected to use the language of a Cuvier, was right in its description:* for we find it called in the old Zoroastrian MSS. Aschmogh, which in the Avesta is represented as having lost after the Fall "its nature and its name," and is described as a huge serpent with a camel's neck.

"There are no winged serpents, nor veritable dragons," asserts Salverte,** " . . . grasshoppers are called by the Greeks winged serpents, and this metaphor may have created several narratives on the existence of winged serpents."

There are none now; but there is no reason why they should not have existed during the Mesozoic age; and Cuvier, who has reconstructed their skeletons, is a witness to "flying camels." Already, after finding simple fossils of certain saurians, the great naturalist has written, that, "if anything can justify the Hydra and other monsters, whose figures were so often repeated by mediaeval historians, it is incontestably the Plesiosaurus."***

We are unaware if Cuvier had added anything in the way of a further mea culpa. But we may well imagine his confusion, for all his slanders against archaic veracity, when he found himself in the presence of a flying saurian, "the Pterodactyl" (found in Germany), "78 feet long, and carrying vigorous wings attached to its reptilian body." That fossil is described as a reptile, the little fingers of whose hands are so elongated as to bear a long membranous wing. Here, then, the "flying camel" of the Zohar is vindicated. For surely, between the long neck of the Plesiosaurus and the membranous wing of the Pterodactyl, or still better the Mosasaurus, there is enough scientific probability to build a "flying camel," or a long-necked dragon. Prof. Cope, of Philadelphia, has shown that the Mosasaurus fossil in the chalk was a winged serpent of this kind. There are characters in its vertebrae, which indicate union with the Ophidia rather than with the Lacertilia.

And now to the main question. It is well known that Antiquity has never claimed palaeontography and paleontology among its arts and sciences; and it never had its Cuviers. Yet on Babylonian tiles, and especially in old Chinese and Japanese drawings, in the oldest Pagodas

[[Footnote(s)]] -----

* See Moses Maimonides, "More Nevochim."

** "Science Occulte," p. 646.

*** "Revolution du Globe," vol. v., p. 464.

[[Vol. 2, Page]] 206 THE SECRET DOCTRINE.

and monuments, and in the Imperial library at Pekin, many a traveller has seen and recognised perfect representations of Plesiosaurs and Pterodactyls in the multiform Chinese dragons.* Moreover, the prophets speak in the Bible of the flying fiery serpents,** and Job mentions the Leviathan.*** Now the following questions are put very directly:--

I. How could the ancient nations know anything of the extinct monsters of the carboniferous and Mesozoic times, and even represent and describe them orally and pictorially, unless they had either seen those monsters themselves or possessed descriptions of them in their traditions, which descriptions necessitate living and intelligent eye-witnesses?

II. And if such eye-witnesses are once admitted (unless retrospective clairvoyance is granted), how can humanity and the first palaeolithic men be no earlier than about the middle of the tertiary period? We must bear in mind that most of the men of science will not allow man to have appeared before the Quaternary period, and thus shut him out completely from the Cenozoic times. Here we have extinct species of animals, which disappeared from the face of the Earth millions of years ago, described by, and known to, nations whose civilization, it is said, could hardly have begun a few thousand years ago. How is this? Evidently either the Mesozoic time has to be made to overlap the Quaternary period, or man must be made the contemporary of the Pterodactyl and the Plesiosaurus.

It does not stand to reason, because the Occultists believe in and defend ancient wisdom and science, even though winged saurians are called "flying camels" in the translations of the Zohar, that we believe as readily in all the stories which the middle ages give us of such dragons. Pterodactyls and Plesiosaurs ceased to exist with the bulk

[[Footnote(s)]] -----

* We read in the "Memoire a l'Academie" of the "naive astonishment of Geoffrey St. Hilaire, when M. de Paravey showed to him in some old Chinese works and Babylonian tiles dragons, . . . saurians and ornithorhynchuses (aquatic animals found only in Australia), etc., extinct animals that he had thought unknown on earth. . . till his own day."

** See Isaiah, xxx. 6: "The viper and the flying serpent unto the land of trouble and anguish," and the fiery serpents conquered by the brazen serpent of Moses.

*** The fossils reconstructed by science, which we know ought to be sufficient warrant for the possibility of even a Leviathan, let alone Isaiah's flying serpents, or saraph mehophep, which words are translated in all the Hebrew dictionaries as "saraph," enflamed or fiery venom, and "mehophep," flying. But, although Christian theology has always connected both (Leviathan and saraph mehophep) with the devil, the expressions are metaphorical and have nought to do with the "evil one." But the word Dracon has become a synonym for the latter. In Bretagne the word Drouk now signifies "devil," whence, as we are told by Cambry ("Monuments Celtiques," p. 299), the devil's tomb in England, Draghedanum sepulcrum. In Languedoc the meteoric fires and will-o'-the-wisps are called Dragg, and in Bretagne Dreaq, Wraie (or wraith), the castle of Drogheda in Ireland meaning the devil's castle.

[[Vol. 2, Page]] 207 KIRCHER'S DRAGON.

of the Third Race. When, therefore, we are gravely asked by Roman Catholic writers to credit Christopher Scherer's and Father Kircher's cock-and-bull stories of their having seen with their own eyes living fiery and flying dragons, respectively in 1619 and 1669, we may be allowed to regard their assertions as either dreams or fibs.* Nor shall we regard otherwise than as a poetical license that other story told of Petrarch, who, while following one day his Laura in the woods and passing near a cave, is credited with having found a dragon, whom he forthwith stabbed with his dagger and killed, thus preventing the monster from devouring the lady of his heart.** We would willingly believe the story had Petrarch lived in the days of Atlantis, when such antediluvian monsters may still have existed. We deny their existence in our present era. The sea-serpent is one thing, the dragon quite another. The former is denied by the majority because it exists and lives in the very depths of the ocean, is very scarce, and rises to the surface only when compelled, perhaps, by hunger. Thus keeping invisible, it may exist and still be denied. But if there was such a thing as a dragon of the above description, how could it have ever escaped detection? It is a creature contemporary with the earliest Fifth Race, and exists no more.

[[Footnote(s)]] -----

* The ultramontane writers accept the whole series of draconian stories given by Father Kircher (Edipus Aegyptiacus, "De Genere Draconum,") quite seriously. According to that Jesuit, he himself saw a dragon which was killed in 1669 by a Roman peasant, as the director of the Museo Barberini sent it to him, to take the beast's likeness, which Father Kircher did and had it published in one of his in-folios. After this he received a letter from Christopher Scherer, Prefect of the Canton of Soleure, Switzerland, in which that official certifies to his having seen himself with his own eyes, one fine summer night in 1619, a living dragon. Having remained on his balcony "to contemplate the perfect purity of the firmament," he writes, "I saw a fiery, shining dragon rise from one of the caves of Mount Pilatus and direct itself rapidly towards Fluelen to the other end of the lake. Enormous in size, his tail was still longer and his neck very extended. His head and jaws were those of a serpent. In flying he emitted on his way numerous sparks (? !). . . I thought at first I was seeing a meteor, but soon looking more attentively, I was convinced by his flight and the conformation of his body that I saw a veritable dragon. I am happy to be thus able to enlighten your Reverence on the very real existence of those animals"; in dreams, the writer ought to have added, of long past ages.

** As a convincing proof of the reality of the fact, a Roman Catholic refers the reader to the picture of that incident painted by Simon de Sienne, a friend of the poet, on the portal of the Church Notre Dame du Don at Avignon; notwithstanding the prohibition of the Sovereign Pontiff, who "would not allow this triumph of love to be enthroned in the holy place"; and

adds: "Time has injured and rubbed out the work of art, but has not weakened its tradition." De Mirville's "Dragon-Devils" of our era seem to have no luck, as they disappear most mysteriously from the museums where they are said to have been. Thus the dragon embalmed by Ulysses Aldobranda and presented to the Musee du Senat, either in Naples or Bologna, "was there still in 1700, but is there no more." (Vol. 2, p. 427, "Pneumatologie.")

[[Vol. 2, Page]] 208 THE SECRET DOCTRINE.

The reader may inquire why we speak of dragons at all? We answer: firstly, because the knowledge of such animals is a proof of the enormous antiquity of the human race; and secondly, to show the difference between the zoological real meaning of the words "dragon," "Naga," and "Serpent," and the metaphorical one, when used symbolically. The profane reader, who knows nothing of the mystery language, is likely, whenever he finds one of these words mentioned, to accept it literally. Hence, the quid pro quos and unjust accusations. A couple of instances will suffice.

Sed et serpens? aye: but what was the nature of the serpent? Mystics intuitionally see in the serpent of Genesis an animal emblem and a high spiritual essence: a cosmic force superintelligent, a "great fallen light," a spirit sidereal, aerial and tellurian at the same time, "whose influence circumambulates the globe (qui circumambulat terram), as a Christian fanatic of the dead-letter (de Mirville) has it, and which only manifested itself under the physical emblem, which was the most convenient "with respect to its moral and intellectual coils": i.e. under the ophidian form.

But what will Christians make of the Brazen Serpent, the "DIVINE HEALER," if the serpent is to be regarded as the emblem of cunning and evil? The "Evil One" itself? How can the line of demarcation ever be settled, when it is traced arbitrarily in a sectarian theological spirit. For, if the followers of the Roman Church are taught that Mercury and AEsculapius, or Asclepius, who are, in truth, one, are "devils and sons of devils," and the wand and serpent of the latter were "the devil's wand"; how about the "brazen serpent" of Moses? Every scholar knows that both the heathen wand and the Jewish "serpent" are one and the same, namely, the Caduceus of Mercury, son of APOLLO-PYTHON. It is easy to comprehend why the Jews adopted the ophidian shape for their "seducer." With them it was purely physiological and phallic; and no amount of casuistical reasoning on the part of the Roman Catholic Church can give it another meaning, once that the mystery language is well studied, and that the Hebrew scrolls are read numerically. The Occultists know that the serpent, the Naga, and the dragon have each a septenary meaning; that the Sun, for instance, was the astronomical and cosmic emblem of the two contrasted lights, and the two serpents of the Gnostics, the good and the evil one; they also know that, when generalised, the conclusions of both science and theology present two most ridiculous extremes. For, when the former tells us that it is sufficient to trace the legends of the serpents to their primal source, the astrological legend, and to meditate seriously on the Sun, conqueror of Python, and the celestial virgin in the Zodiac forcing back the devouring dragon, if we would have the key of all the subsequent religious dogmas; it is easy to perceive that, instead of

[[Vol. 2, Page]] 209 COBRAS AS SYMBOLS.

generalising, the author simply has his eye on Christian religion and Revelation. We call this one extreme. The other we see in this: when, repeating the famous decision of the Council of Trent, theology seeks to convince the masses that "from the fall of man until the hour of his baptism the devil has full power over him, and possesses him by right (diabolum dominationem et potestatem super homines habere et jure eos possidere)." To this Occult philosophy answers: Prove first the existence of the devil as an entity, and then we may believe in such congenital possession. A very small amount of observation and knowledge of human nature may be sufficient to prove the fallacy of this theological dogma. Had SATAN any reality, in the objective or even subjective world (in the ecclesiastical sense), it is the poor devil who would find himself chronically obsessed and even possessed by the wicked -- hence by the bulk of mankind. It is humanity itself, and especially the clergy, headed by the haughty, unscrupulous and intolerant Roman Church, which have begotten, given birth to, and reared in love the evil one; but this is a digression.

"The whole world of thought is reproached by the Church with having adored the serpent. The whole of humanity 'incensed and at the same time stoned it.' The Zend Avesta speaks of it as the Kings and Vedas do, as the Edda and the Bible. . . . Everywhere the sacred serpent, the naga, and its shrine and its priest; in Rome it is the Vestal who prepares its meal with the same care as she bestows on the sacred fire. In Greece, AEsculapius cannot cure without its assistance, and delegates to it his powers. Everyone has heard of the famous Roman embassy sent by the Senate to the god of medicine and its return with the not less famous serpent, which proceeded of its own will and by itself toward its Master's temple on one of the islands of the Tiber. Not a Bacchante that did not wind it (the serpent) in her hair, not an Augur but questioned it oracularly, not a necromancer whose tomb is free from its presence! The Cainites and the Ophites call it Creator, while recognizing, as Schelling did, that the serpent is 'evil in substance and its personification.' "*"

Yes, the author is right, and if one would have a complete idea of the prestige which the serpent enjoys to our own day, one ought to study the matter in India and learn all that is believed about, and still attributed to, the Nagas (Cobras) in that country; one should also visit the Africans of Whydah, the Voodoos of Port-au-Prince and Jamaica, the Nagals of Mexico, and the Pa, or men-serpents of China, &c. But why wonder that the serpent is "adored" and at the same time cursed, since we

[[Footnote(s)]] -----

* "Sacred Serpents" on p. 432 of de Mirville's "Memoire."

[[Vol. 2, Page]] 210 THE SECRET DOCTRINE

know that from the beginning it was a symbol?*" In every ancient language the word dragon signified what it now does in Chinese -- (lang) i.e., "the being who excels in intelligence" and in Greek [[drakon]], or "he who sees and watches." And is it to the animal of that name that any of these epithets can apply? Is it not evident, wherever superstition and oblivion of the primitive meaning may have led savages now, that the said qualifications were intended to apply to the human

originals, who were symbolized by serpents and dragons? These "originals" -- called to this day in China "the Dragons of Wisdom" -- were the first disciples of the Dhyanis, who were their instructors; in short, the primitive adepts of the Third Race, and later, of the Fourth and Fifth Races. The name became universal, and no sane man before the Christian era would ever have confounded the man and the symbol.

The symbol of Chnouphis, or the soul of the world, writes Champollion, "is among others that of an enormous serpent standing on human legs; this reptile, the emblem of the good genius, is a veritable Agathodaemon. It is often represented bearded. . . . That sacred animal, identical with the serpent of the Ophites, is found engraved on numerous Gnostic or Basilidean stones The serpent has various heads, but is constantly inscribed with the letters [[CHNOUBIS]]."*** Agathodaemon was endowed "with the knowledge of good and evil," i.e., with divine Wisdom, as without the former the latter is impossible.*** Repeating lamblichus, Champollion shows him to be "the deity called [[Eichton]] (or the fire of the celestial gods -- the great **** Thot-

[[Footnote(s)]] -----

* This is about as just as though -- a few millenniums hence -- a fanatic of some future new creed, who was bent on glorifying his religion at the expense of ancient Christianity, were to say: "Everywhere the quadruped lamb was adored. The nun placed it, calling it the Agnus, on her bosom; the priest laid it on the altar. It figured in every paschal meal, and was glorified loudly in every temple. And yet the Christians dreaded it and hated it, for they slew and devoured it. . . ." Heathens, at any rate, do not eat their sacred symbols. We know of no serpent, or reptile-eaters except in Christian civilized countries, where they begin with frogs and eels, and must end with real snakes, as they have begun with lamb and ended with horse-flesh.

** "Pantheon," 3.

*** The solar Chnouphis, or Agathodaemon, is the Christos of the Gnostics, as every scholar knows. He is intimately connected with the seven sons of Sophia (Wisdom), the seven sons of Aditi (universal Wisdom), her eighth being Martanda, the Sun, which seven are the seven planetary regents or genii. Therefore Chnouphis was the spiritual Sun of Enlightenment, of Wisdom, hence the patron of all the Egyptian Initiates, as Bel-Merodach (or Bel-Belitanus) became later with the Chaldeans.

**** Hermes, or rather Thot, was a generic name. Abul Teda shows in "Historia Anti-Islamitica" five Hermes, and the names of Hermes, Nebo, Thot were given respectively in various countries to great Initiates. Thus Nebo, the son of Merodach and Zarpanitu (whom Herodotus calls Zeus-Belos), gave his name to all the great prophets, seers and Initiates. They were all "serpents of Wisdom," as connected with the Sun astronomically, and with Wisdom spiritually.

[[Vol. 2, Page]] 211 TWO SCHOOLS OF MAGIC.

Hermes), to whom Hermes Trismegistus attributes the invention of magic."*

The "invention of magic!" A strange term to use, as though the unveiling of the eternal and actual mysteries of nature could be invented! As well attribute, millenniums hence, the invention instead of the discovery of radiant matter to Prof. Crookes. Hermes was not the inventor, or even the discoverer, for, as said in the foot-note, Thot-Hermes is a generic name, as is Enoch (Enoichion, the "inner, spiritual eye"), Nebo, the prophet and seer, etc. It is not the proper name of any one living man, but a generic title of many adepts. Their connection in symbolic allegories with the serpent is due to their enlightenment by the solar and planetary gods during the earliest intellectual Race, the Third. They are all the representative patrons of the Secret Wisdom. Asclepius is the son of the Sun-god Apollo -- and he is Mercury; Nebo is the son of Bel-Merodach; Vaivasvata Manu, the great Rishi, is the son of Vivisvat -- the Sun or Surya, etc., etc. And while, astronomically, the Nagas along with the Rishis, the Gandharvas, Apsarasas, Gramanis (or Yakshas, minor gods) Yatudhanas and Devas, are the Sun's attendants throughout the twelve solar months; in theogony, and also in anthropological evolution, they are gods and men -- when incarnated in the nether world. Let the reader be reminded, in this connection, of the fact that Apollonius met in Kashmir Buddhist Nagas -- which are neither serpents zoologically, nor yet the Nagas ethnologically, but "wise men."

The Bible, from Genesis to Revelations, is but a series of historical records of the great struggle between white and black Magic, between the Adepts of the right path, the Prophets, and those of the left, the Levites, the clergy of the brutal masses. Even the students of Occultism, though some of them have more archaic MSS. and direct teaching to rely upon, find it difficult to draw a line of demarcation between the Sodales of the Right Path and those of the Left. The great schism that arose between the sons of the Fourth Race, as soon as the first Temples and Halls of Initiation had been erected under the guidance of "the Sons of God," is allegorized in the Sons of Jacob. That there were two schools of Magic, and that the orthodox Levites did not belong to the holy one, is shown in the words pronounced by the dying Jacob. And here it may be well to quote a few sentences from "Isis Unveiled."

The dying Jacob thus describes his sons: "Dan," he says, "shall be a serpent by the way, an adder in the path, that biteth the horse-heels, so that his rider shall fall backwards (i.e., he will teach candidates black magic) . . . I have waited for thy salvation, O Lord!" Of Simeon and Levi the patriarch remarks that they" . . . are brethren; instru-

[[Footnote(s)]] -----

* "Pantheon," text 15.

[[Vol. 2, Page]] 212 THE SECRET DOCTRINE.

ments of cruelty are in their habitations. O my soul, come not thou into their secret; unto their assembly."** Now in the original, the words "their secret" really are "their SOD."*** And Sod was the name for the great mysteries of Baal, Adonis and Bacchus, who were all sun-gods and had serpents for symbols. The Kabalists explain the allegory of the fiery

serpents by saying that this was the name given to the tribe of Levi, to all the Levites, in short, and that Moses was the chief of the Sodales.*** It is to the mysteries that the original meaning of the "Dragon-Slayers" has to be traced, and the question is fully treated of hereafter.

Meanwhile it follows that, if Moses was the chief of the Mysteries, he was the Hierophant thereof, and further, if, at the same time, we find the prophets thundering against the "abominations" of the people of Israel, that there were two schools. "Fiery serpents" was, then, simply the epithet given to the Levites of the priestly caste, after they had departed from the good law, the traditional teachings of Moses: and to all those who followed Black Magic. Isaiah, when referring to the "rebellious children" who will have to carry their riches into the land whence come "the viper and fiery flying serpent" (xxx. 6), or Chaldea and Egypt, whose Initiates had already greatly degenerated in his day (700 B.C.), meant the sorcerers of those lands.**** But these must be carefully distinguished from the "Fiery Dragons of Wisdom" and the "Sons of the Fire Mist."

In the "Great Book of the Mysteries" we are told that: "Seven Lords created Seven men; three Lords (Dhyan Chohans or Pitris) were holy and good, four less heavenly and full of passion. . . . The chhayas (phantoms) of the Fathers were as they."

This accounts for the differences in human nature, which is divided into seven gradations of good and evil. There were seven tabernacles ready to be inhabited by Monads under seven different Karmic conditions. The Commentaries explain on this basis the easy spread of evil, as soon as the human Forms had become real men. Some ancient

[[Footnote(s)]] -----

* "Genesis," ch. xlix.

** Dunlap, in his introduction to "Sod, the Mysteries of Adonis," explains the word "Sod" as arcanum, religious mystery, on the authority of Schindler's "Penteglott." "The secret of the Lord is with them that fear him," says Psalm xxv., 14. This is a mistranslation of the Christians, for it ought to read "Sod lhoh (the mysteries of lhoh) are for those who fear him" (Dunlap, "Mysteries of Adonis," xi). "Al (El) is terrible in the great Sod of the Kadeshim (the priests, the holy, the Initiated), Psalm lxxxix, 7" (ibid.). The Kadeshim were very far from holy. (Vide Part II., "The Holy of Holies.")

*** "The members of the priest-Colleges were called Sodales," says Freund's "Latin Lexicon" (iv. 448). "Sodalities were constituted in the Idaean Mysteries of the MIGHTY MOTHER," writes Cicero in de Senectute. ("Mysteries of Adonis.")

**** The priests of Baal who jumped over the fires. But this was a Hebrew term and a local one. "Saraph" -- "fiery or flaming venom."

[[Vol. 2, Page]] 213 THE SEVENTH SON OF THE SEVENTH SON.

philosophers ignored the seven in their genetical accounts and gave only four. Thus the Mexican local Genesis has "four good men" described as the four real ancestors of the human race, "who were neither begotten by the gods nor born of woman"; but whose creation was a wonder wrought by the creative Powers, and who were made only after "three attempts at manufacturing men had failed." The Egyptians had in their theology only "four sons of God," whereas in Pymander seven are given -- thus avoiding any mention of the evil nature of man; though when Seth from a god sank into Set-Typhon, he began to be called "the seventh son." Whence probably arose the belief that "the seventh son of the seventh son" is always a natural-born magician, though, at first, only a sorcerer was meant. APAP, the serpent symbolizing evil, is slain by Aker, Set's serpent;* therefore Set-Typhon could not be that evil. In the "Book of the Dead" it is commanded (v. 13) that chapter clxiii. should be read "in the presence of a serpent on two legs," which means a high Initiate, a Hierophant, for the discus and ram's horns** that adorn his "serpent's" head in the hieroglyphics of the title of the said chapter denote this. Over the "serpent" are represented the two mystic eyes of Ammon,*** the hidden "mystery god." This passage corroborates our assertion, and shows what the word "serpent" meant in antiquity.

But as to the Nagals and Nargals, whence came the similarity of names between the Indian Nagas and the American Nagals?

"The Nargal was the Chaldean and Assyrian chief of the Magi (Rab-Mag), and the Nagal was the chief sorcerer of the Mexican Indians. Both derive their names from Nergal-Serezer, the Assyrian god, and the Hindu Nagas. Both have the same faculties and the power to have an attendant daemon, with whom they identify themselves completely. The Chaldean and Assyrian Nargal kept his daemon, in the shape of some animal considered sacred, inside the temple; the Indian Nagal keeps his wherever he can -- in the neighbouring lake, or wood, or in the house in the shape of some household animal."****

Such similarity cannot be attributed to coincidence. A new world is discovered, and we find that, for our forefathers of the Fourth Race,

[[Footnote(s)]] -----

* "Book of the Dead" xxxix.

** The same ram's horns are found on the heads of Moses which were on some old medals seen by the writer in Palestine, one of which is in her possession. The horns, made to form part of the shining aureole on the statue of Moses in Rome (Michael Angelo), are vertical instead of being bent down to the ears, but the emblem is the same; hence the Brazen Serpent.

*** But see Harris's "Magic Papyrus" No. v.; and the ram-headed Ammon manufacturing men on a potter's wheel.

**** Brasseur de Bourbourg: "Mexique," pp. 135 and 574.

it was already an old one. That Arjuna, Krishna's companion and chela, is said to have descended into Patala, the "antipodes," and therein married Ulupi,* a Naga (or Nagini rather), the daughter of the king of the Nagas, Kauravya.**

And now it may be hoped the full meaning of the serpent emblem is proven. It is neither that of evil, nor, least of all, that of the devil; but is, indeed, the [[SEMES EILAM ABRASAX]] ("the eternal Sun-Abrasax"), the central spiritual sun of all the Kabalists, represented in some diagrams by the circle of Tiphereth.

And here, again, we may quote from our earlier volumes and enter into further explanations.

"From this region of unfathomable depth (Bythos, Aditi, Shekinah, the veil of the unknown) issues forth a circle formed of spirals. This is Tiphereth; which, in the language of symbolism, means a grand cycle, composed of smaller ones. Coiled within, so as to follow the spirals, lies the serpent -- emblem of Wisdom and Eternity -- the dual Androgyne; the cycle representing Ennoia, or the divine mind (a power which does not create but which must assimilate), and the serpent, the Agathodaemon, the Ophis, the Shadow of the Light (non-eternal, yet the greatest divine light on our plane). Both were the Logoi of the Ophites: or the Unity as Logos manifesting itself as a double principle of Good and Evil."

Were it light alone, inactive and absolute, the human mind could not appreciate nor even realise it. Shadow is that which enables light to manifest itself, and gives it objective reality. Therefore, shadow is not evil, but is the necessary and indispensable corollary which completes Light or Good: it is its creator on Earth.

According to the views of the Gnostics, these two principles are immutable Light and Shadow, Good and Evil being virtually one and having existed through all eternity, as they will ever continue to exist so long as there are manifested worlds.

This symbol accounts for the adoration by this sect of the Serpent, as the Saviour, coiled either around the sacramental loaf, or a Tau, the phallic emblem. As a Unity, Ennoia and Ophis are the Logos. When separated, one is the Tree of Life (spiritual), the other, the Tree

[[Footnote(s)]] -----

* Ulupi has an entirely Atlantean ring about it. Like Atlantis, it is neither a Greek nor a Sanskrit name, but reminds one of Mexican names.

** "Mahabharata," Adiparva, Sloka, 7788, 7789. The "Bhagavata Purana," ix., xx., 31, as explained by Sridhera, the commentator, makes Ulupi the daughter of the king of Manipura; but the late Pundit Dayanand Saraswati, certainly the greatest Sanskrit and Puranic authority in India on such questions, personally corroborated that Ulupi was daughter of the king of the Nagas at Patala, or America, 5000 years ago, and that the Nagas were Initiates.

of Knowledge of Good and Evil. Therefore, we find Ophis urging the first human couple -- the material production of Ilda-Baath, but which owed its spiritual principle to Sophia-Achamoth -- to eat of the forbidden fruit, although Ophis represents divine Wisdom.

The serpent, the Tree of Knowledge of Good and Evil, and the Tree of Life, are all symbols transplanted from the soil of India. The Arasa-Maram, the banyan tree, so sacred with the Hindus (since Vishnu during one of his incarnations, reposed under its mighty shade and there taught human philosophy and sciences), is called the Tree of Knowledge and the Tree of Life. Under the protecting foliage of this king of the forests, the Gurus teach their pupils their first lessons on immortality and initiate them into the mysteries of life and death. The Java-Aleim of the Sacerdotal College are said, in the Chaldean tradition, to have taught the sons of men to become like one of them. To the present day Foh-tchou,* who lives in his Foh-Maeyu, or temple of Buddha, on the top of the "Kouin-long-sang,"*** the great mountain, produces his greatest religious miracles under a tree called in Chinese Sung-Ming-Shu, or the Tree of Knowledge and the Tree of Life, for ignorance is death, and knowledge alone gives immortality. This marvellous display takes place every three years, when an immense concourse of Chinese Buddhists assembles in pilgrimage at the holy place.

Now it may become comprehensible why the earliest Initiates and Adepts, or the "Wise Men," for whom it is claimed that they were initiated into the mysteries of nature by the UNIVERSAL MIND, represented by the highest angels, were named the "Serpents of Wisdom" and "Dragons;" as also how the first physiologically complete couples -- after being initiated into the mystery of human creation through Ophis, the manifested Logos and the androgyne, by eating of the fruit of knowledge -- gradually began to be accused by the material spirit of posterity of having committed Sin, of having disobeyed the "Lord God," and of having been tempted by the Serpent.

So little have the first Christians (who despoiled the Jews of their Bible) understood the first four chapters of Genesis in their esoteric meaning, that they never perceived that not only was no sin intended in this disobedience, but that actually the "Serpent" was "the Lord God" himself, who, as the Ophis, the Logos, or the bearer of divine creative wisdom, taught mankind to become creators in their turn.*** They

[[Footnote(s)]] -----

* Foh-tchou, literally, in Chinese meaning Buddha's lord, or the teacher of the doctrines of Buddha-Foh.

** This mountain is situated south-west of China, almost between China and Tibet.

*** Let the reader be reminded that in the Zohar, and also in all the Kabalistic works, it is maintained that "Metatron united to Shekinah" (or Shekinah as the veil (grace) [[Footnote continued on next page]]

[[Vol. 2, Page]] 216 THE SECRET DOCTRINE.

never realised that the Cross was an evolution from the "tree and the serpent," and thus became the salvation of mankind. By this it would become the very first fundamental symbol of Creative cause, applying to geometry, to numbers, to astronomy, to measure and to animal reproduction. According to the Kabala the curse on man came with the formation of woman.* The circle was separated from its diameter line. "From the possession of the double principle in one, that is the Androgyne condition, the separation of the dual principle was made, presenting two opposites, whose destiny it was, for ever after, to seek reunion into the original one condition. The curse was this, viz.: that nature, impelling the search, evaded the desired result by the production of a new being, distinct from that reunion or oneness desired, by which the natural longing to recover a lost state was and is for ever being cheated. It is by this tantalizing process of a continued curse that Nature lives."** (Vide "Cross and Circle," Part II.)

The allegory of Adam being driven away from the "Tree of Life" means, esoterically, that the newly separated Race abused and dragged the mystery of Life down into the region of animalism and bestiality. For, as the Zohar shows, that Matronethah (Shekinah, the wife of Metatron symbolically) "is the way to the great Tree of Life, the Mighty Tree," and Shekinah is divine grace. As explained: This Tree reaches the heavenly vale and is hidden between three mountains (the upper triad of principles, in man). From these three mountains, the Tree ascends above (the adept's knowledge aspires heavenward) and then redescends below (into the adept's Ego on Earth). This Tree is revealed in the day time and is hidden during the night, i.e., revealed to an enlightened mind and hidden to Ignorance, which is night. (See Zohar I., 172, a and b.) "The Tree of the Knowledge of the Good and the Evil grows from the roots of the Tree of Life." (Comm.) But then also: "In the Kabala it is plainly to be found that 'the 'Tree of Life' was

[[Footnote(s)]] -----

[[Footnote continued from previous page]] of Ain-Soph), representing the Logos, is that very Tree of Knowledge; while Shamael -- the dark aspect of the Logos -- occupies only the rind of that tree, and has the knowledge of EVIL alone. As Lacour, who saw in the scene of the Fall (chap. iii., Genesis) an incident pertaining to Egyptian Initiation, says:-- "The Tree of the Divination, or of the Knowledge of Good and Evil . . . is the science of Tzyphon, the genius of doubt, Tzy to teach, and phon, doubt. Tzyphon is one of the Aleim; we shall see him presently under the name of Nach, the tempter" (Les OEluim, Vol. II., p. 218). He is now known to the symbologists under the name JEHOVAH.

* This is the view taken and adopted by all the Church Fathers, but it is not the real esoteric teaching. The curse did not begin with the formation of either man or woman, for their separation was a natural sequence of evolution, but for breaking the law (See supra).

** "By which (human) nature lives," not even the animal -- but the misguided, sensual and vicious nature, which men, not nature, created.

[[Vol. 2, Page]] 217 "MYTHICAL" MONSTERS A REALITY.

the ansated cross in its sexual aspect, and that the 'Tree of Knowledge' was the separation and the coming together again to fulfil the fatal condition. To display this in numbers the values of the letters composing the word Otz ([[diagram]]), tree, are 7 and 9, the seven being the holy feminine number and the nine the number of the phallic or male energy. This ansated cross is the symbol of the Egyptian female-male, Isis-Osiris, the germinal principle in all forms, based on the primal manifestation applicable in all directions and in all senses."*

This is the Kabalistic view of the Western Occultists, and it differs from the more philosophical Eastern or Aryan views upon this subject.** The separation of the sexes was in the programme of nature and of natural evolution; and the creative faculty in male and female was a gift of Divine wisdom. In the truth of such traditions the whole of antiquity, from the patrician philosopher to the humblest spiritually inclined plebeian, has believed. And as we proceed, we may successfully show that the relative truth of such legends, if not their absolute exactness -- vouched for by such giants of intellect as were Solon, Pythagoras, Plato, and others -- begins to dawn upon more than one modern scientist. He is perplexed; he stands startled and confused before proofs that are being daily accumulated before him; he feels that there is no way of solving the many historical problems that stare him in the face, unless he begins by accepting ancient traditions. Therefore, in saying that we believe absolutely in ancient records and universal legends, we need hardly plead guilty before the impartial observer, for other and far more learned writers, among those who belong to the modern scientific school, evidently believe in much that the Occultists do: e.g., in "Dragons," not only symbolically, but also in their actual existence at one time.

"It would have indeed been a bold step for anyone, some thirty years ago, to have thought of treating the public to a collection of stories ordinarily reputed fabulous, and of claiming for them the consideration due to genuine realities, or to have advocated tales, believed to be time-honoured fictions, as actual facts; and those of the nursery as being, in many instances, legends, more or less distorted, descriptive of real beings or events. Nowadays it is a less hazardous proceeding"

Thus opens the introduction to a recent (1886) and most interesting work by Mr. Charles Gould, called "Mythical Monsters." He boldly states his belief in most of these monsters. He submits that:-- "Many of the so-called mythical animals, which, throughout long ages and in all nations, have been the fertile subjects of fiction and fable, come

[[Footnote(s)]] -----

[[Vol. 2, Page]] 218 THE SECRET DOCTRINE.

legitimately within the scope of plain matter-of-fact natural history; and that they may be considered, not as the outcome of exuberant fancy, but as creatures which really once existed, and of which, unfortunately, only imperfect and inaccurate descriptions have filtered down to us, probably very much refracted, through the mists of time. . . . Traditions of creatures once co-existing with man, some of which are so weird and terrible as to appear at first sight to be impossible. For me the major part of those creatures are not chimeras but objects of rational study. The dragon, in place of being a creature evolved out of the imagination of an Aryan man by the contemplation of lightning flashing through the caverns which he tenanted, as is held by some mythologists, is an animal which once lived and dragged its ponderous coils and perhaps flew. . . . To me the specific existence of the Unicorn seems not incredible, and in fact, more probable than that theory which assigns its origin to a lunar myth* . . . For my part I doubt the general derivation of myths from 'the contemplation of the visible workings of external nature.' It seems to me easier to suppose that the palsy of time has enfeebled the utterance of these oft-told tales until their original appearance is almost unrecognisable, than that uncultured savages should possess powers of imagination and poetical invention far beyond those enjoyed by the most instructed nations of the present day; less hard to believe that these wonderful stories of gods and demigods, of giants and dwarfs, of dragons and monsters of all descriptions are transformations than to believe them to be inventions."**

It is shown by the same geologist that man, "successively traced to periods variously estimated from thirty thousand to one million years . . . , co-existed with animals which have long since become extinct (p. 20)." These animals, "weird and terrible," were, to give a few instances -- (1) "Of the genus *Cidastes*, whose huge bones and vertebrae show them to have attained a length of nearly two hundred feet. . . ." The remains of such monsters, no less than ten in number, were seen by Professor Marsh in the Mauvaises Terres of Colorado, strewn upon the plains. (2) The *Titanosaurus montanus*, reaching fifty or sixty feet in length; (3) the Dinosaurians (in the Jurassic beds of the Rocky Mountains), of still more gigantic proportions; (4) the *Atlanto-Saurus immanis*, a femur of which alone is over six feet in length, and which would be thus over one hundred feet in length! But even yet the line has not been reached, and we hear of the discovery of remains of such titanic proportions as to possess a thigh-bone over twelve feet in length (p. 37). Then we read of the monstrous *Sivatherium* in the Himalayas, the four-horned stag, as large as an elephant, and exceeding the latter in height; of the gigantic *Megatherium*: of colossal flying lizards, *Pterodactyli*, with

[[Footnote(s)]] -----

** Pp. 3 and 4, Introduction to "Mythical Monsters."

[[Vol. 2, Page]] 219 THE FLYING DRAGONS.

crocodile jaws on a duck's head, etc., etc. All these were co-existent with man, most probably attacked man, as man attacked them; and we are asked to believe that the said man was no larger then than he is now! Is it possible to conceive that, surrounded in Nature with such monstrous creatures, man, unless himself a colossal giant, could have survived, while all his foes have perished? Is it with his stone hatchet that he had the best of a *Sivatherium* or a gigantic flying saurian? Let us always bear in mind that at least one great man of science, de Quatrefages, sees no good scientific reasons why man should not have been "contemporaneous with the earliest mammalia and go back as far as the Secondary Period."*

"It appears," writes the very conservative Professor Jukes, "that the flying dragons of romance had something like a real existence in former ages of the world."** "Does the written history of man," the author goes on to ask, "comprising a few thousand years, embrace the whole course of his intelligent existence? Or have we in the long mythical eras, extending over hundreds of thousands of years, and recorded in the chronologies of Chaldea and China, shadowy mementoes of prehistoric man, handed down by tradition, and perhaps transported by a few survivors to existing lands, from others which, like the fabled Atlantis of Plato, may have been submerged, or the scene of some great catastrophe which destroyed them with all their civilization;" (p. 17).

The few remaining giant animals, such as elephants, themselves smaller than their ancestors the Mastodons, and Hippopotami, are the only surviving relics, and tend to disappear more entirely with every day. Even they have already had a few pioneers of their future genus, and have decreased in size in the same proportion as men did. For the remains of a pigmy elephant were found (*E. Falconeri*) in the cave deposits of Malta; and the same author asserts that they were associated with the remains of pigmy Hippopotami, the former being "only two feet six inches high; or the still-existing Hippopotamus (*Choeropsis*) *Liberiensis*, which M. Milne-Edwards figures as little more than two feet in height."***

Sceptics may smile and denounce our work as full of nonsense or fairy-tales. But by so doing they only justify the wisdom of the Chinese philosopher Chuang, who said that "the things that men do know can in no way be compared, numerically speaking, to the things that are unknown";**** and thus they laugh only at their own ignorance.

[[Vol. 2, Page]] 220 THE SECRET DOCTRINE.

THE "SONS OF GOD" AND THE "SACRED ISLAND."

The legend given in Isis in relation to a portion of the globe which science now concedes to have been the cradle of humanity -- though it is but one of the seven cradles, in truth -- ran, condensed, and now explained, as follows:--

"Tradition says, and the records of the Great Book (the Book of Dzyan) explain, that long before the days of Ad-am, and his inquisitive wife, He-va, where now are found but salt lakes and desolate barren deserts, there was a vast inland sea, which extended over Middle Asia, north of the proud Himalayan range, and its western prolongation. An island, which for its unparalleled beauty had no rival in the world, was inhabited by the last remnant of the race which preceded ours."

"The last remnant" meant the "Sons of Will and Yoga," who, with a few tribes, survived the great cataclysm. For it is the Third Race which inhabited the great Lemurian continent, that preceded the veritable and complete human races -- the fourth and the fifth. Therefore it was said in Isis that --

"This race could live with equal ease in water, air, or fire, for it had an unlimited control over the elements. These were the 'Sons of God'; not those who saw the daughters of men, but the real Elohim, though in the oriental Kabala they have another name. It was they who imparted Nature's most weird secrets to men, and revealed to them the ineffable, and now lost 'word.' "

The "Island," according to belief, exists to the present hour; now, as an oasis surrounded by the dreadful wildernesses of the great Desert, the Gobi -- whose sands "no foot hath crossed in the memory of man."

"This word, which is no word, has travelled once around the globe, and still lingers as a far-off dying echo in the hearts of some privileged men. The hierophants of all the Sacerdotal Colleges were aware of the existence of this island; but the 'word' was known only to the Java Aleim (Maha Chohan in another tongue), or chief lord of every college, and was passed to his successor only at the moment of death. There were many such colleges, and the old classic authors speak of them.

"There was no communication with the fair island by sea, but subterranean passages, known only to the chiefs, communicated with it in all directions."*

Tradition asserts, and archaeology accepts the truth of the legend that there is more than one city now flourishing in India, which is built on

[[Footnote(s)]] -----

* There are archaeologists, who, like Mr. James Fergusson, deny the great antiquity of even one single monument in India. In his work, "Illustrations of the Rock-Cut Temples of India," the author ventures to express the very extraordinary opinion that "Egypt had ceased to be a nation before the earliest of the cave-temples of India was excavated." In short, he does not admit the existence of any cave anterior to the reign of Asoka, and seems anxious to prove that most of these rock-cut temples were executed during a period extending from the time of that pious Buddhist king until the destruction of the Andhra dynasty of Maghada, in the beginning of the fifth century. We believe such a claim perfectly arbitrary. Further discoveries will show that it is erroneous and unwarranted.

[[Vol. 2, Page]] 221 THE CONTINENT OF THE GODS.

several other cities, making thus a subterranean city of six or seven stories high. Delhi is one of them; Allahabad another -- examples of this being found even in Europe; e.g., in Florence, which is built on several defunct Etruscan and other cities. Why, then, could not Ellora, Elephanta, Karli, and Ajunta have been built on subterranean labyrinths and passages, as claimed? Of course we do not allude to the caves which are known to every European, whether de visu or through hearsay, notwithstanding their enormous antiquity, though that is so disputed by modern archaeology. But it is a fact, known to the Initiated Brahmins of India and especially to Yogis, that there is not a cave-temple in the country but has its subterranean passages running in every direction, and that those underground caves and endless corridors have in their turn their caves and corridors.

"Who can tell that the lost Atlantis -- which is also mentioned in the Secret Book, but, again, under another name, pronounced in the sacred language -- did not exist yet in those days?" --

we went on to ask. It did exist most assuredly, as it was fast approaching its greatest days of glory and civilization when the last of the Lemurian continents went down.

"The great lost continent might have, perhaps, been situated south of Asia, extending from India to Tasmania?*" If the hypothesis (now so much doubted, and positively denied by some learned authors, who regard it as a joke of Plato's) is ever verified, then, perhaps, will the scientists believe that the description of the god-inhabited continent was not altogether a fable.** And they may then perceive that Plato's guarded hints and his attributing the narrative to Solon and the Egyptian priests, were but a prudent way of imparting the fact to the world, and, by cleverly combining truth and fiction, so disconnecting himself from a story which the obligations imposed at initiation forbade him to divulge.

"To continue the tradition, we have to add that the class of hierophants was divided into two distinct categories:*** those who were instructed by the 'Sons of God,' of the island, and who were initiated in the divine doctrine of pure revelation; and others who inhabited the lost Atlantis -- if such must be its name -- and who, being of another race, (born sexually but of divine parents), were born with a sight, which embraced all living things, and was independent of both distance and material obstacle. In short, they were the Fourth Race of men mentioned in the Popol-Vuh, whose sight was unlimited, and who knew all things at once."

In other words, they were the Lemuro-Atlanteans, the first who had

[[Footnote(s)]] -----

* America when discovered, was called Atlanta by some native tribes.

** Since then Donnelly's Atlantis has appeared, and soon its actual existence will have become a scientific fact.

*** It is so divided to this day, and theosophists and Occultists, who have learned something of the Occult but undeniable power of Dugpaship at their own expense, know this but too well.

[[Vol. 2, Page]] 222 THE SECRET DOCTRINE.

a dynasty of Spirit-Kings, not of Manes, or "ghosts," as some believe (See "Pneumatologie"), but of actual living Devas (or demi-gods or Angels, again) who had assumed bodies to rule over them, and who, in their turn, instructed them in arts and sciences. Only, as they were rupa or material Spirits, these Dhyanis were not always good. Their King Thevetata was one of the latter, and it is under the evil influence of this King-Demon that . . . the Atlantis-race became a nation of wicked magicians.

"In consequence of this, war was declared, the story of which would be too long to narrate; its substance may be found in the disfigured allegories of the race of Cain, the giants, and that of Noah and his righteous family. The conflict came to an end by the submersion of the Atlantis, which finds its imitation in the stories of the Babylonian and Mosaic flood. The giants and magicians ' . . . and all flesh died . . . and every man.' All except Xisuthrus and Noah, who are substantially identical with the great Father of the Thhnkithians in the Popol-Vuh, or the sacred book of the Guatemaleans, which also tells of his escaping in a large boat like the Hindu Noah -- Vaivasvata.

"If we believe the tradition at all, we have to credit the further story that, from the intermarrying of the progeny of the hierophants of the island and the descendants of the Atlantean Noah, sprang up a mixed race of righteous and wicked. On the one side the world had its Enochs, Moseses, various Buddhas, its numerous 'Saviours,' and great hierophants; on the other hand, its 'natural magicians' who, through lack of the restraining power of proper spiritual enlightenment, . . . perverted their gifts to evil purposes. . . ."

We may supplement this by the testimony of some records and traditions. In the "Histoire des Vierges: Les Peuples et les Continents Disparus," the author says:--

"One of the most ancient legends of India, preserved in the temples by oral and written tradition, relates that several hundred thousand years ago there existed in the Pacific Ocean an immense continent which was destroyed by geological upheaval, and the fragments of which must be sought in Madagascar, Ceylon, Sumatra, Java, Borneo, and the principal isles of Polynesia."

"The high plateaux of Hindustan and Asia, according to this hypothesis, would only have been represented in those distant epochs by great islands contiguous to the central continent According to the Brahmans, this country had attained a high civilization, and the peninsula of Hindustan, enlarged by the displacement of the waters, at the time of the grand cataclysm, has but continued the chain of the primitive traditions born in this place. These traditions give the name of Rutas to the peoples which inhabited this immense equinoctial continent, and from their speech was derived the Sanscrit. . . . And the Indo-Hellenic tradition, preserved by the most intelligent population which emigrated from the plains of India, equally relates the existence of a continent and a people to which it gives the name of Atlantis and Atlantides, and which it locates in the Atlantic in the northern portion of the Tropics."

"Apart from this fact, the supposition of an ancient continent in those latitudes, the vestiges of which may be found in the volcanic islands and moun-

[[Vol. 2, Page]] 223 THE MAGICIANS OF ATLANTIS.

tainous surface of the Azores, the Canaries and Cape de Verdes, is not devoid of geographical probability. The Greeks, who, moreover, never dared to pass beyond the pillars of Hercules, on account of their dread of the mysterious ocean, appeared too late in antiquity for the stories preserved by Plato to be anything else than an echo of the Indian legend. Moreover, when we cast a look on a planisphere, at the sight of the islands and islets strewn from the Malayan Archipelago to Polynesia, from the straits of Sunda to Easter Island, it is impossible, upon the hypothesis of continents preceding those which we inhabit, not to place there the most important of all.

"A religious belief, common to Malacca and Polynesia, that is to say, to the two opposite extremes of the Oceanic world, affirms 'that all these islands once formed two immense countries, inhabited by yellow men and black men, always at war; and that the gods, wearied with their quarrels, having charged Ocean to pacify them, the latter swallowed up the two continents, and, since, it has been impossible to make him give up his captives. Alone, the mountain-peaks and high plateaux escaped the flood, by the power of the gods, who perceived too late the mistake they had committed.'

"Whatever there may be in these traditions, and whatever may have been the place where a civilization more ancient than that of Rome, of Greece, of Egypt, and of India was developed, it is certain that this civilization did exist, and it is highly important to science to recover its traces, however feeble and fugitive they may be" (pp. 13-15).

This last tradition corroborates the one given from the "Records of the Secret Doctrine." The war mentioned between the yellow and the black men, relates to a struggle between the "sons of God" and the "sons of giants," or the inhabitants and magicians of Atlantis.

The final conclusion of the author, who personally visited all the islands of Polynesia, and devoted years to the study of the religion, language, and traditions of nearly all the peoples, is as follows:

"As to the Polynesian continent which disappeared at the time of the final geological cataclysms, its existence rests on such proofs that to be logical we can doubt no longer.

"The three summits of this continent, the Sandwich Islands, New Zealand, Easter Island, are distant from each other from fifteen to eighteen hundred leagues, and the groups of intermediate islands, Viti, Samoa, Tonga, Foutouna, Ouvea, the Marquesas, Tahiti, Poumoutou, the Gambiers, are themselves distant from these extreme points from seven or eight hundred to one thousand leagues.

"All navigators agree in saying that the extreme and the central groups could never have communicated in view of their actual geographical position, and with the insufficient means they had at hand. It is physically impossible to cross such distances in a pirogue . . . without a compass, and travel months without provisions.

"On the other hand, the aborigines of the Sandwich Islands, of Viti, of New Zealand, of the central groups, of Samoa, Tahiti, etc., had never known each other, had never heard of each other, before the arrival of the Europeans. And yet each of these people maintained that their island had at one time formed part of an

[[Vol. 2, Page]] 224 THE SECRET DOCTRINE.

immense stretch of land which extended towards the West on the side of Asia. And all, brought together, were found to speak the same language, to have the same usages, the same customs, the same religious belief. And all to the question, 'Where is the cradle of your race?' for sole response, extended their hand toward the setting sun" (Ibid., p. 308).

Geographically, this description clashes slightly with the facts in the Secret Records; but it shows the existence of such traditions, and this is all one cares for. For, as there is no smoke without fire, so a tradition must be based on some approximate truth.

In its proper place we will show modern Science fully corroborating the above and the traditions of the Secret Doctrine with regard to the two lost continents. The Easter Island relics are, for instance, the most astounding and eloquent memorials of the primeval giants. They are as grand as they are mysterious; and one has but to examine the heads of the colossal statues, that have remained unbroken on that island, to recognise in them at a glance the features of the type and character attributed to the Fourth Race giants. They seem of one cast though different in features -- that of a distinctly sensual type, such as the Atlanteans (the Daityas and "Atalantians") are represented to have in the esoteric Hindu books. Compare these with the faces of some other colossal statues in Central Asia -- those near Bamian for instance -- the portrait-statues, tradition tells us, of Buddhas belonging to previous Manvantaras; of those Buddhas and heroes who are mentioned in the Buddhist and Hindu works, as men of fabulous size,* the good and holy brothers of their wicked co-uterine brothers generally, as Ravana, the giant King of Lanka was the brother of Kumbhakarna; all descendants of the gods through the Rishis, and thus, like "Titan and his enormous brood," all "heaven's first born." These "Buddhas," though often spoilt by the symbolical representation of the great pendent ears, show a suggestive difference, perceived at a glance, between the expression of their faces and that of the Easter Isle statues. They may be of one race -- but the former are "Sons of Gods"; the latter the brood of mighty sorcerers. All these are re-incarnations, however, and apart from unavoidable exaggerations in popular fancy and tradition, they are historical characters.** When did they live? How long ago lived the

[[Footnote(s)]] -----

* An approach to the statues at Bamian -- also a Buddha 200 feet high -- is found near a Jain settlement in Southern India, and appears to be the only one that remains at present.

** Even Wilson admits that Rama and Ravana were personages founded on historical facts:--"The traditions of Southern India uniformly ascribing its civilization and the settlement of civilized Hindus (the Fifth Race) to the conquest of Lanka by Rama" (Vishnu Purana, iii., p. 318) -- the victory of the "Sons of God" over the Atlantean sorcerers, says the true tradition.

[[Vol. 2, Page]] 225 COCK AND BULL HYPOTHESES.

two races, the Third and Fourth, and how long after did the various tribes of the Fifth begin their strife, the wars between Good and Evil? We are assured by the Orientalists that chronology is both hopelessly mixed and absurdly exaggerated in the Puranas and other Hindu Scriptures. We feel quite prepared to agree with the accusation. Yet, if Aryan writers did allow their chronological pendulum to swing too far one way occasionally, beyond the legitimate limit of fact; nevertheless, when the distance of that deviation is compared with the distance of the Orientalists' deviation in the opposite direction, moderation will be found on the Brahminical side. It is the Pundit who will in the long run be found more truthful and nearer to fact than the Sanskritist. Surely, it is not because the curtailing of the latter -- even when proven to have been resorted to in order to fit a personal hobby -- is regarded by Western public opinion as "a cautious acceptance of facts," whereas the Pundit is brutally treated in print as a liar, that everyone has to see this in the same light. An impartial observer may judge it otherwise. He may either proclaim both unscrupulous historians, or justify both, each on his respective ground, and say: Hindu Aryans wrote for their Initiates, who read truth between the lines, not for the masses. If they did mix up events and confuse Ages intentionally, it was not in view of deceiving any one, but to preserve their knowledge from the prying eye of the foreigner. Otherwise, to him who can count the generations from the Manus, and the series of incarnations specified in the cases of some heroes,* the meaning and chronological order are very clear in the Puranas. As for the Western Orientalist, he must be excused, on account of his undeniable ignorance of the methods used by archaic Esotericism.

But such existing prejudices will have to give way and disappear very soon before the light of new discoveries. Already Dr. Weber's and Mr. Max Muller's favourite theories -- namely, that writing was not known in India, even in the days of

Panini (!); that the Hindus had all their arts and sciences -- even to the Zodiac and their architecture (Ferguson) -- from the Macedonian Greeks; these and other such cock-and-bull hypotheses, are threatened with ruin. It is the ghost of old Chaldea that comes to the rescue of truth. In his third Hibbert

[[Footnote(s)]] -----

* Thus we are shown one hero, to give an instance, first born as the "unrighteous but valiant monarch" (Purusha) of the Daityas, Hiranyakasipu, slain by the Avatar Nara-Sinha (Man-lion). Then he was born as Ravana, the giant king of Lanka, and killed by Rama; after which he is reborn as Sisupala, the son of Rajarishi (King Rishi) Damaghosha, when he is again killed by Krishna, the last incarnation of Vishnu. This parallel evolution of Vishnu (spirit) with a Daitya, as men, may seem meaningless, yet it gives us the key not only to the respective dates of Rama and Krishna but even to a certain psychological mystery.

[[Vol. 2, Page]] 226 THE SECRET DOCTRINE.

lecture (1887) Professor Sayce of Oxford, speaking of newly-discovered Assyrian and Babylonian cylinders, referred at length to Ea, the God of Wisdom, now identified with the Oannes, of Berosus, the half-man, half-fish, who taught the Babylonians culture and the art of writing. This Oannes, to whom, thanks only to the Biblical Deluge, an antiquity of hardly 1,500 B.C. had been hitherto allowed, is now spoken of in these terms:--

"His city was Eridu, which stood 6,000 years ago on the shores of the Persian Gulf. The name means 'the good city,' a particularly holy spot, since it was the centre from which the earliest Chaldean civilization made its way to the north. As the culture-god was represented as coming from the sea, it was possible that the culture of which Eridu was the seat was of foreign importation. We now know that there was intercourse at a very early period between Chaldea and the Sinaitic peninsula, as well as with India. The statues discovered by the French at Tel-loh (dating from at latest B.C. 4,000) were made of the extremely hard stone known as diorite, and the inscriptions on them stated the diorite to have been brought from Mazan -- i.e., the Sinaitic peninsula, which was then ruled by the Pharaohs. The statues are known to resemble in general style the diorite statue, Kephren, the builder of the second Pyramid, while, according to Mr. Petrie, the unit of measurement marked on the plan of the city, which one of the Tel-loh figures holds on his lap, is the same as that employed by the Pyramid builders. Teak wood has been found at Mugheir, or Ur of the Chaldees, although that wood is an Indian special product; add to this that an ancient Babylonian list of clothing mentions sindhu, or 'muslins,' explained as 'vegetable cloth.'"

Muslin, best known now as Dacca muslin, known in Chaldea as Hindu (Sindhu), and teak wood used 4,000 years B.C.; and yet the Hindus, to whom Chaldea owes its civilization (as well proven by Colonel vans Kennedy), were ignorant of the art of writing before the Greeks taught them their alphabet -- if we have to believe Orientalists!

[[Vol. 2, Page]] 227 THE MOON-COLOURED RACE.

STANZA X.
THE HISTORY OF THE FOURTH RACE.

§§ (38) The Birth of the Fourth, Atlantean Race. (39) The sub-races of the Fourth Humanity begin to divide and interblend; they form the first mixed races of various colours. (40) The superiority of the Atlantean over other races. (41) They fall into sin and beget children and monsters. (42) The first germs of Anthropomorphism and sexual religion. They lose their "third Eye."

38. THUS TWO BY TWO, ON THE SEVEN ZONES, THE THIRD (Race) GAVE BIRTH TO THE FOURTH (Race men). THE GODS BECAME NO-GODS (Sura became a-Sura) (a).

39. THE FIRST (Race) ON EVERY ZONE WAS MOON-COLOURED (yellow-white); THE SECOND, YELLOW, LIKE GOLD; THE THIRD, RED; THE FOURTH, BROWN, WHICH BECAME BLACK WITH SIN.* THE FIRST SEVEN (human) SHOOTINGS WERE ALL OF ONE COMPLEXION IN THE BEGINNING. THE NEXT (seven, the sub-races) BEGAN MIXING THEIR COLOURS (b).

(a) To understand this verse 38, it must be read together with the three verses of Stanza IX. Up to this point of evolution man belongs more to metaphysical than physical nature. It is only after the so-called FALL, that the races began to develop rapidly into a purely human shape. And, in order that he may correctly comprehend the full meaning of the Fall, so mystic and transcendental is it in its real significance, the student must be told at once the details which preceded

[[Footnote(s)]] -----

* Strictly speaking, it is only from the time of the Atlantean, brown and yellow giant Races, that one ought to speak of MAN, since it was the Fourth race only which was the first completely human species, however much larger in size than we are now. In "Man" (by two chelas), all that is said of the Atlanteans is quite correct. It is chiefly that race which became "black with sin" that brought the divine names of the Asuras, the Rakshasas and the Daityas into disrepute, and passed them on to posterity as the names of fiends. For, as said, the Suras (gods) or Devas having incarnated in the wise men of Atlantis, the names of Asuras and Rakshasas were given to the Atlanteans; which names, owing to their incessant

conflicts with the last remnants of the Third Race and the "Sons of Will and Yoga," have led to the later allegories about them in the Puranas. "Asura was the generic appellation of all the Atlanteans who were the enemies of the spiritual heroes of the Aryans (gods)." ("Man," p. 97.)

[[Vol. 2, Page]] 228 THE SECRET DOCTRINE.

this event; of which event modern theology has formed a pivot on which its most pernicious and absurd dogmas and beliefs are made to turn.

The archaic commentaries explain, as the reader must remember, that, of the Host of Dhyanis, whose turn it was to incarnate as the Egos of the immortal, but, on this plane, senseless monads -- that some "obeyed" (the law of evolution) immediately when the men of the Third Race became physiologically and physically ready, i.e., when they had separated into sexes. These were those early conscious Beings who, now adding conscious knowledge and will to their inherent Divine purity, created by Kriyasakti the semi-Divine man, who became the seed on earth for future adepts. Those, on the other hand, who, jealous of their intellectual freedom (unfettered as it then was by the bonds of matter), said:-- "We can choose . . . we have wisdom" (See verse 24), and incarnated far later -- these had their first Karmic punishment prepared for them. They got bodies (physiologically) inferior to their astral models, because their chhayas had belonged to progenitors of an inferior degree in the seven classes. As to those "Sons of Wisdom" who had "deferred" their incarnation till the Fourth Race, which was already tainted (physiologically) with sin and impurity, they produced a terrible cause, the Karmic result of which weighs on them to this day. It was produced in themselves, and they became the carriers of that seed of iniquity for aeons to come, because the bodies they had to inform had become defiled through their own procrastination. (See verses 32, 36.)

This was the "Fall of the angels," because of their rebellion against Karmic Law. The "fall of man" was no fall, for he was irresponsible. But "Creation" having been invented on the dualistic system as the "prerogative of God alone," the legitimate attribute patented by theology in the name of an infinite deity of their own making, this power had to be regarded as "Satanic," and as an usurpation of divine rights. Thus, the foregoing, in the light of such narrow views, must naturally be considered as a terrible slander on man, "created in the image of God," a still more dreadful blasphemy in the face of the dead-letter dogma. "Your doctrine," the Occultists were already told, "makes of man, created out of dust in the likeness of his God, a vehicle of the Devil, from the first." "Why did you make of your god a devil -- both, moreover, created in your own image?" is our reply. The esoteric interpretation of the Bible, however, sufficiently refutes this slanderous invention of theology; the Secret Doctrine must some day become the just Karma of the Churches -- more anti-Christian than the representative assemblies of the most confirmed Materialists and Atheists.

The old doctrine about the true meaning of the "Fallen Angels," in its anthropological and evolutionary sense, is contained in the Kabala,

[[Vol. 2, Page]] 229 THE MYSTERIES AMONG THE MAYAS.

and explains the Bible. It is found pre-eminent in Genesis when the latter is read in a spirit of research for truth, with no eye to dogma, and in no mood of preconception. This is easily proven. In Genesis (vi.) the "Sons of God" -- B'ne Aleim -- become enamoured of the daughters of men, marry, and reveal to their wives the mysteries unlawfully learnt by them in heaven, according to Enoch; and this is the "Fall of Angels."* But what is, in reality, the "Book of Enoch" itself, from which the author of Revelation and even the St. John of the Fourth Gospel have so profusely quoted? (e.g., verse 8, in chapter 10, about all who have come before Jesus, being "thieves and robbers.") Simply a Book of Initiation, giving out in allegory and cautious phraseology the programme of certain archaic mysteries performed in the inner temples. The author of the "Sacred Mysteries among the Mayas and Quiches" very justly suggests that the so-called "Visions" of Enoch relate to his (Enoch's) experience at initiation, and what he learned in the mysteries; while he very erroneously states his opinion that Enoch had learned them before being converted

[[Footnote(s)]] -----

* In general, the so-called orthodox Christian conceptions about the "fallen" angels or Satan, are as remarkable as they are absurd. About a dozen could be cited, of the most various character as to details, and all from the pen of educated lay authors, "University graduates" of the present quarter of our century. Thus, the author of "Earth's Earliest Ages," J. H. Pember, M.A., devotes a thick volume to proving Theosophists, Spiritualists, Metaphysicians, Agnostics, Mystics, poets, and every contemporary author on oriental speculations, to be the devoted servants of the "Prince of the Air," and irretrievably damned. He describes Satan and his Antichrist in this wise:--

"Satan is the 'Anointed Cherub' of old. . . . God created Satan, the fairest and wisest of all his creatures in this part of His Universe, and made him Prince of the World, and of the Power of the Air. . . . He was placed in an Eden, which was both far anterior to the Eden of Genesis. . . . and of an altogether different and more substantial character, resembling the New Jerusalem. Thus, Satan being perfect in wisdom, and beauty, His vast empire is our earth, if not the whole solar system. . . . Certainly no other angelic power of greater or even equal dignity has been revealed to us. The Archangel Michael himself is quoted by Jude as preserving towards the Prince of Darkness the respect due to a superior, however wicked he may be, until God has formally commanded his deposition." Then we are informed that "Satan was from the moment of his creation surrounded by the insignia of royalty" (! !): that he "awoke to consciousness to find the air filled with the rejoicing music of those whom God had appointed . . ." Then the Devil "passes from the royalty to his priestly dignity" (! !) "Satan was also a priest of the Most High," etc., etc. And now -- "Antichrist will be Satan incarnate" (pp. 56-59). The Pioneers of the coming Apollyon have already appeared -- they are the Theosophists, the Occultists, the authors of the "Perfect Way," of "Isis Unveiled," of the "Mystery of the Ages," and even of the "Light of Asia"! ! The author notes the "avowed origin" (of Theosophy) from the "descending angels," from the "Nephilim," or the angels of the VIth ch. of Genesis, and the Giants. He ought to note his own descent from them also, as the present Secret Doctrine endeavours to show -- unless he refuses to belong to the present humanity.

to Christianity (!!); furthermore, he believes that this book was written "at the beginning of the Christian era, when . . . the customs and religion of the Egyptians fell into decadency"! This is hardly possible, since Jude quotes in his epistle from the "Book of Enoch" (verse 14); and, therefore, as Archbishop Laurence, the translator of the Book of Enoch from the Ethiopic version, remarks, it "could not have been the production of a writer who lived after . . . or was even coeval with" the writers of the New Testament: unless, indeed, Jude and the Gospels, and all that follows, was also a production of the already established Church -- which, some critics say, is not impossible. But we are now concerned with the "fallen Angels" of Enoch, rather than with Enoch himself.

In Indian exotericism, these angels (Asuras) are also denounced as "the enemies of the gods;" those who oppose sacrificial worship offered to the latter. In Christian theology they are broadly referred to as the "Fallen Spirits," the heroes of various conflicting and contradictory legends about them, gathered from Pagan sources. The coluber tortuosus "the tortuous snake," a qualification said to have originated with the Jews, had quite another meaning before the Roman Church distorted it:-- among others, a purely astronomical meaning.

The "Serpent" fallen from on high, "deorsum fluens," was credited with the possession of the Keys of the Empire of the Dead, [[tou thanatus arche]] to that day, when Jesus saw it "falling like lightning from heaven" (Luke x. 17, 18), the Roman Catholic interpretation of cadebat ut fulgur to the contrary, notwithstanding; and it means indeed that even "the devils are subject" to the Logos -- who is WISDOM, but who, as the opponent of ignorance, is Satan or Lucifer at the same time. This remark refers to divine Wisdom falling like lightning on, and quickening the intellects of those who fight the devils of ignorance and superstition. Up to the time when Wisdom, in the shape of the incarnating Spirits of MAHAT, descended from on high to animate and call the Third Race to real conscious life, humanity -- if it can be so called in its animal, senseless state -- was of course doomed to -- moral as well as to physical death. The Angels fallen into generation are referred to metaphorically as Serpents and Dragons of Wisdom. On the other hand, regarded in the light of the LOGOS, the Christian Saviour, like Krishna, whether as man or logos, may be said to have saved those who believed in the secret teachings from "eternal death," to have conquered the Kingdom of Darkness, or Hell, as every Initiate does. This in the human, terrestrial form of the Initiates, and also because the logos is Christos, that principle of our inner nature which develops in us into the Spiritual Ego -- the Higher-Self -- being formed of the indissoluble union of Buddhi (the sixth) and the spiritual efflorescence of Manas, the

fifth principle.* "The Logos is passive Wisdom in Heaven and Conscious, Self-Active Wisdom on Earth," we are taught. It is the Marriage of "Heavenly man" with the "Virgin of the World" -- Nature, as described in Pymander; the result of which is their progeny -- immortal man. It is this which is called in St. John's Revelation the marriage of the lamb with his bride. (xix. 7.) That "wife" is now identified with the Church of Rome owing to the arbitrary interpretations of her votaries. But they seem to forget that her linen may be fine and white outwardly (like the "whitened sepulchre"), but that the rottenness she is inwardly filled with, is not "the righteousness of Saints" (v. 8. *ibid*), but rather the blood of the Saints she has "slain upon the earth" (chap. xviii. 24.) Thus the remark made by the great Initiate (in Luke x. 18) -- one that referred allegorically to the ray of Enlightenment and reason, falling like lightning from on high into the hearts and minds of the converts to that old wisdom-religion then presented in a new form by the wise Galilean Adeptt** -- was distorted out of recognition (as was his own personality), and made to fit in with one of the most cruel as the most pernicious of all theological dogmas. (Vide at the end of Stanza XI. "SATANIC MYTHS.")

But if Western theology alone holds the patent for, and copyright of SATAN -- in all the dogmatic horror of that fiction -- other nationalities

[[Footnote(s)]] -----

* It is not correct to refer to Christ -- as some theosophists do -- as the sixth principle in man -- Buddhi. The latter per se is a passive and latent principle, the spiritual vehicle of Atman, inseparable from the manifested Universal Soul. It is only in union and in conjunction with Self-consciousness that Buddhi becomes the Higher Self and the divine, discriminating Soul. Christos is the seventh principle, if anything.

** To make it plainer, any one who reads that passage in Luke, will see that the remark follows the report of the seventy, who rejoice that "even the devils (the spirit of controversy and reasoning, or the opposing power, since Satan means simply "adversary" or opponent) are subject unto us through thy name." (Luke x. 17.) Now, "thy name" means the name of Christos, or Logos, or the spirit of true divine wisdom, as distinct from the spirit of intellectual or mere materialistic reasoning -- the HIGHER SELF in short. And when Jesus remarks to this that he has "beheld Satan as lightning fall from heaven," it is a mere statement of his clairvoyant powers, notifying them that he already knew it, and a reference to the incarnation of the divine ray (the gods or angels) which falls into generation. For not all men, by any means, benefit by that incarnation, and with some the power remains latent and dead during the whole life. Truly "No man knoweth who the Son is, but the Father; and who the Father is, but the Son" as added by Jesus then and there (*Ibid* v. 22) -- the Church "of Christ" less than any one else. The Initiates alone understood the secret meaning of the term "Father and the Son," and knew that it referred to Spirit and Soul on the Earth. For the teachings of Christ were occult teachings, which could only be explained at the initiation. They were never intended for the masses, for Jesus forbade the twelve to go to the Gentiles and the Samaritans (Matt. x. 8), and repeated to his disciples that the "mysteries of Heaven" were for them alone, not for the multitudes (Mark iv. 11).

and religions have committed equal errors in their misinterpretation of this tenet, which is one of the most profoundly philosophical and ideal conceptions of ancient thought. For they have both disfigured and hinted at the correct meaning of it in their numerous allegories touching the subject. Nor have the

semi-esoteric dogmas of Puranic Hinduism failed to evolve very suggestive symbols and allegories concerning the rebellious and fallen gods. The Puranas teem with them; and we find a direct hint at the truth in the frequent allusions of Parasara (Vishnu Purana), to all those Rudras, Rishis, Asuras, Kumaras and Munis, having to be born in every age, to re-incarnate in every Manvantara. This (esoterically) is equivalent to saying that the FLAMES born of the Universal Mind (Mahat), owing to the mysterious workings of Karmic Will and an impulse of Evolutionary Law, had, as in Pymander -- without any gradual transition -- landed on this Earth, having broken through the seven Circles of fire, or the seven intermediate Worlds, in short.

There is an eternal cyclic law of re-births, and the series is headed at every new Manvantaric dawn by those who had enjoyed their rest from re-incarnations in previous Kalpas for incalculable AEons -- by the highest and the earliest Nirvanees. It was the turn of those "Gods" to incarnate in the present Manvantara; hence their presence on Earth, and the ensuing allegories; hence, also, the perversion of the original meaning.* The Gods who had fallen into generation, whose mission it was to complete divine man, are found represented later on as Demons, evil Spirits, and fiends, at feud and war with Gods, or the irresponsible agents of the one Eternal law. But no conception of such creatures as the devils and Satan of the Christian, Jewish, and Mahomedan religions was ever intended under those thousand and one Aryan allegories.** (See "The Fallen Angels" and "The Mystic Dragons" in Part II.)

[[Footnote(s)]] -----

* So, for instance, in the Puranas, "Pulastya," a Prajapati, or son of Brahma -- the progenitor of the Rakshasas, and the grandfather of Ravana, the Great King of Lanka (see Ramayana) -- had, in a former birth, a son named Dattoli, "who is now known as the sage Agastya" -- says Vishnu Purana. This name of Dattoli alone, has six more variants to it, or seven meanings. He is called respectively, Dattoi, Dattali, Dattotti, Dattotri, Dattobhri, Dambhobhi and Dambholi -- which seven variants have each a secret sense, and refer in the esoteric comments to various ethnological classifications, and also to physiological and anthropological mysteries of the primitive races. For, surely, the Rakshasas are not demons, but simply the primitive and ferocious giants, the Atlanteans, who were scattered on the face of the globe as the Fifth Race is now. Vasishtha is a warrant to this, if his words addressed to Parasara, who attempted a bit of JADOO (sorcery), which he calls "sacrifice," for the destruction of the Rakshasas, mean anything. For he says, "Let no more of these unoffending 'Spirits Darkness' be destroyed." (see for details Adiparvan, s. 176, Mahabharata; also the Linga Purana "Purvardha," s. 64.)

** We have a passage from a Master's letter which has a direct bearing upon these [[Footnote continued on next page]]

[[Vol. 2, Page]] 233 HOLY SATAN.

The true esoteric view about "Satan," the opinion held on this subject by the whole philosophic antiquity, is admirably brought out in an appendix, entitled "The Secret of Satan," to the second edition of Dr. A. Kingsford's "Perfect Way." No better and clearer indication of the truth could be offered to the intelligent reader, and it is therefore quoted here at some length:--

"1. And on the seventh day (seventh creation of the Hindus),* there went forth from the presence of God a mighty Angel, full of wrath and consuming, and God gave him the dominion of the outermost sphere.**

2. "Eternity brought forth Time; the Boundless gave birth to Limit; Being descended into generation."****

4. "Among the Gods is none like unto him, into whose hands are committed the kingdoms, the power and the glory of the worlds:"

5. "Thrones and empires, the dynasties of kings,**** the fall of nations, the birth of churches, the triumph of Time."

For, as is said in Hermes, "Satan is the door-keeper of the Temple of the King; he standeth in Solomon's porch; he holdeth the key of the Sanctuary, that no man enter therein, save the Anointed having the arcanum of Hermes" (v. 20 and 21).

These suggestive and majestic verses had reference with the ancient Egyptians and other civilized peoples of antiquity to the creative and generative light of the Logos (Horus, Brahma, Ahura-Mazda, etc., etc., as primeval manifestations of the ever-unmanifested Principle, e.g., Ain-Soph, Parabrahm, or Zeruana Akerne-- Boundless Time -- Kala), but the

[[Footnote(s)]] -----

[[Footnote continued from previous page]] incarnating angels. Says the letter: "Now there are, and there must be, failures in the ethereal races of the many classes of Dhyan-Chohans, or Devas (progressed entities of a previous planetary period), as well as among men. But still, as the failures are too far progressed and spiritualized to be thrown back forcibly from Dhyan-Chohanship into the vortex of a new primordial evolution through the lower Kingdoms, this then happens. Where a new solar system has to be evolved these Dhyan-Chohans are borne in by influx 'ahead' of the Elementals (Entities . . . to be developed into humanity at a future time) and remain as a latent or inactive spiritual force, in the aura of a nascent world . . . until the stage of human evolution is reached. . . . Then they become an active force and commingle with the Elementals, to develop little by little the full type of humanity." That is to say, to develop in, and endow man with his Self-conscious mind, or Manas.

* When the earth with its planetary chain and man were to appear.

** Our earth and the physical plane of consciousness.

*** When the pure, celestial Being (Dhyan Chohan) and the great Pitris of various classes were commissioned -- the one to evolve their images (Chhaya), and make of them physical man, the others to inform and thus endow him with divine intelligence and the comprehension of the Mysteries of Creation.

**** The "dynasties of the kings" who all regard themselves as the "anointed," reigning "by the Grace of God," whereas in truth, they reign by the grace of matter, the great Illusion, the Deceiver.

[[Vol. 2, Page]] 234 THE SECRET DOCTRINE.

meaning is now degraded in the Kabala. The "Anointed," who has the secrets and mysteries of Hermes (Buddha, Wisdom), and who alone is entrusted with the key to the "Sanctuary," the Womb of nature, in order to fructify it and call to active life and being the whole Kosmos, has become, with the Jews, Jehovah, the "God of generation" on the lunar mountain (Sinai, the mountain of the moon, "Sin"). The "Sanctuary" has become the "Holy of Holies," and the arcanum has been anthropomorphised and phallicised and dragged down into matter, indeed. Hence arose the necessity of making of the "Dragon of Wisdom," the Serpent of Genesis: of the conscious god who needed a body to clothe his too subjective divinity, Satan. But the "innumerable incarnations of Spirit," and "the ceaseless pulse and current of desire" refer, the first one, to our doctrine of Karmic and cyclic rebirths, the second -- to EROS, not the later god of material, physiological love, but to the divine desire in the gods, as well as in all nature, to create and give life to Beings. This, the Rays of the one "dark," because invisible and incomprehensible, FLAME could achieve only by themselves descending into matter. Therefore, as continued in the APPENDIX:

12. "Many names hath God given him (Satan), names of mystery, secret and terrible."

13. "The Adversary, because matter opposeth Spirit. Time accuseth even the Saints of the Lord."
28, 29, 31. "Stand in awe of him, and sin not; speak his name with trembling . . . For Satan is the magistrate of the justice of God (Karma); he beareth the balance and the sword . . . For to him are committed Weight and Measure and Number."

Compare the last sentence with what the Rabbi, who explains the Kabala to Prince Al-Chazari in the Book of that name, says; and it will be found that the Weight and Measure and Number are, in Sepher Jezirah, the attributes of the Sephiroth (the three Sephrim, or figures, ciphers) covering the whole collective number of 10; and that the Sephiroth are the collective Adam Kadmon, the "Heavenly Man" or the Logos. Thus Satan and the anointed were identified in ancient thought. Therefore,

33. "Satan is the minister of God, Lord of the seven mansions of Hades" . . .

The seven or Saptaloka of the Earth with the Hindus; for Hades, or the Limbo of Illusion, of which theology makes a region bordering on Hell, is simply our globe, the Earth, and thus Satan is called --
33 " . . . the angel of the manifest Worlds."

It is "Satan who is the god of our planet and the only god," and this without any allusive metaphor to its wickedness and depravity. For he is one with the Logos, "the first son, eldest of the gods," in the order

[[Vol. 2, Page]] 235 THE SHADOW OF GOD.

of microcosmic (divine) evolution; Saturn (Satan), astronomically, "is the seventh and last in the order of macrocosmic emanation, being the circumference of the kingdom of which Phoebus (the light of wisdom, also the Sun) is the centre." The Gnostics were right, then, in calling the Jewish god "an angel of matter," or he who breathed (conscious) life into Adam, and he whose planet was Saturn.

34. "And God hath put a girdle about his loins (the rings of Saturn), and the name of the girdle is Death."

In anthropogony this "girdle" is the human body with its two lower principles, which three die, while the innermost man is immortal. And now we approach the "Secret of Satan."

37, 38, 39. " . . . Upon Satan only is the shame of generation. He hath lost his virginal estate (so hath the Kumara by incarnating): uncovering heavenly secrets, he hath entered into bondage. . . . He compasseth with bonds and limits all things. . . ."

42, 43, 44. "Twain are the armies of God: in heaven the hosts of Michael; in the abyss (the manifested world) the legions of Satan. These are the unmanifest and the manifest; the free and the bound (in matter): the virginal and the fallen. And both are the Ministers of the Father, fulfilling the word Divine. . . ." Therefore --

55. "Holy is the Sabbath of god: blessed and sanctified is the name of the Angel of Havas" -- SATAN.

For, "The glory of Satan is the shadow of the Lord": God in the manifested world; "the throne of Satan is the footstool of Adonai" -- that footstool being the whole Kosmos. (Vide Part II., "Is Pleroma Satan's Lair?")

When the Church, therefore, curses Satan, it curses the cosmic reflection of God; it anathematizes God made manifest in matter or in the objective; it maledicts God, or the ever-incomprehensible WISDOM, revealing itself as Light and Shadow, good and evil in nature, in the only manner comprehensible to the limited intellect of MAN.

This is the true philosophical and metaphysical interpretation of Samael, or Satan, the adversary in the Kabala; the same tenets and spirit being found in the allegorical interpretations of every other ancient religion. This philosophical view does not interfere, however, with the historical records connected with it. We say "historical," because allegory and a mythical ornamentation around the kernel of tradition, in no wise prevent that kernel being a record of real events. Thus, the Kabala, repeating the time-honoured revelations of the once universal history of our globe and the evolution of its races, has presented it under the legendary form of the various records which have formed the Bible. Its historical foundation is now offered, in however imperfect a form, on these pages from the Secret Doctrine of the East; and thus

the allegorical and symbolical meaning of the Serpent of Genesis is found explained by the "Sons of Wisdom" (or angels from higher spheres, though all and each pertain to the kingdom of Satan, or Matter) revealing to men the mysteries of Heaven. Hence, also, all the so-called myths of the Hindu, Grecian, Chaldean, and Jewish Pantheons are found to be built on fact and truth. The giants of Genesis are the historical Atlanteans of Lanka, and the Greek Titans.

Who can forget that Troy was once upon a time proclaimed a myth, and Homer a non-existing personage, while the existence of such cities as Herculaneum and Pompeii was denied, and attributed to mere fairy legends? Yet Schliemann proved that Troy had really existed, and the two cities, though buried for long ages under the Vesuvian lava, have had their resurrection day, and live again on the surface of the earth. How many more cities and localities called "fabulous" are on the list of future discoveries, how many more personages regarded as mythical* will one day become historical, those alone can tell who read the decrees of Fate in the astral light.

As the tenets of the Eastern doctrine, however, have always been kept secret, and as the reader can hardly hope to be shown the original texts unless he becomes an accepted disciple, let the Greek and Latin scholar turn to the original texts of Hermetic literature. Let him, for one thing, read carefully the opening pages of the Pymander of Hermes Trismegistus; and then he will see our doctrines corroborated in it, however veiled its text. There also he will find the evolution of the Universe, of our Earth (called "Nature" in Pymander) as of everything else, from the "Moyst Principle" -- or the great Deep, FATHER-MOTHER -- the first differentiation in the manifested Kosmos. First the "Universal Mind," which the hand of the Christian translator has metamorphosed in the earliest renderings into God, the Father: then the "Heavenly Man,"*** which is the great Total of that Host of Angels, which was too pure for the creation of the inferior worlds or of the men of our globe, but which fell nevertheless into matter by virtue of that same evolution, as the second logos of the "Father."****

[[Footnote(s)]] -----

* See the "Primeval Manus of Humanity."

** The "Heavenly Man" -- please mark again the word -- is "the LOGOS" or the "Son" esoterically. Therefore, once that the title was applied to Christ (declared God and the very God himself) Christian theology had no choice. In order to support its dogma of the personal Trinity it had to proclaim, as it does, that the Christian Logos is the only true one, and that all the Logoi of other religions were false, and only the masquerading Evil Principles, SATAN. Now see where this led Western theology to.

*** "For the Mind, a deity abounding in both sexes, being Life and Life, brought forth by its Word another Mind or Workman; which, being God of the Fire and the Spirit, fashioned and formed seven other Governors, which in their circles contain the [[Footnote continued on next page]]

Synthetically every Creative Logos, or "the Son who is one with the Father," is the Host of the Rectores Mundi in itself. Even Christian theology makes of the seven "Angels of the Presence" the Virtues, or the personified attributes of God, which, being created by him, as the Manus were by Brahma, became Archangels. The Roman Catholic theodice itself recognising, in its creative Verbum Princeps, the head of those angels -- caput angelorum -- and the magni consilii Angelus (the Angel of the great Counsel), thus recognizes the identity of Christ and those Angels.

"The Gods became no-Gods, the Sura -- A-sura," says the text; i.e., gods became fiends -- SATAN, when read literally. But Satan will now be shown, in the teaching of the Secret Doctrine, allegorized as Good, and Sacrifice, a God of Wisdom, under different names.

The Kabala teaches that Pride and Presumption -- the two chief prompters of Selfishness and Egotism -- are the causes that emptied heaven of one third of its divine denizens -- mystically, and of one third of the stars -- astronomically; in other words, the two statements are -- the first an allegory, and the second a fact. The former, nevertheless, as shown, is intimately connected with humanity.

In their turn the Rosicrucians, who were well acquainted with the secret meaning of the tradition, kept it to themselves, teaching merely that the whole of creation was due to, and the result of, that legendary "War in Heaven" brought on by the rebellion of the angels* against creative law, or the Demiurge. The statement is correct, but the inner meaning is to this day a mystery. To elude further explanation of the difficulty by appealing to divine mystery, or to the sin of prying into its policy -- is to say nothing at all. It may prove sufficient to

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Phenomenal World, and whose disposition is called Fate or Destiny." (Section 9, ch. I, ed. of 1579).

Here it is evident that "Mind" (the primeval universal Divine Thought) is neither the Unknown unmanifested One, since it abounds in both sexes (is male and female), nor yet the Christian Father, as the latter is a male and not an androgyne. The fact is that the Father, Son, and Man are hopelessly mixed up in the translations of Pymander.

* The allegory of the fire of Prometheus is another version of the rebellion of the proud Lucifer, who was hurled down to the bottomless pit, or simply unto our Earth, to live as man. The Hindu Lucifer, the Mahasura, is also said to have become envious of the Creator's resplendent light, and, at the head of inferior Asuras (not gods, but spirits), to have rebelled against Brahma; for which Siva hurled him down to Patala. But, as philosophy goes hand in hand with allegorical fiction in Hindu myths, the devil is made to repent, and is afforded the opportunity to progress: he is a sinful man esoterically, and can by yoga devotion, and adeptship, reach his status of one with the deity, once more. Hercules, the Sun-god, descends

to Hades (the cave of Initiation) to deliver the victims from their tortures, etc., etc. The Christian Church alone creates eternal torment for the devil and the damned, that she has invented.

[[Vol. 2, Page]] 238 THE SECRET DOCTRINE.

believers in the Pope's infallibility, but will hardly satisfy the philosophical mind. Yet the truth, although known to most of the higher Kabalists, has never been told by any of their number. One and all, Kabalists and symbologists, showed an extraordinary reluctance to confess the primitive meaning of the Fall of the Angels. In a Christian such silence is only natural. Neither alchemist nor philosopher could, during the Mediaeval Ages, utter that* which in the sight of orthodox theology was a terrible blasphemy, for it would have led them directly through the "Holy" office of the Inquisition, to stake and rack. But for our modern Kabalists and Freethinkers the case is different. With the latter, we fear, it is merely human pride, vanity based on a loudly rejected and as ineradicable superstition. Since the Church, in her struggle with Manichaeism, invented the devil, and by placing

[[Footnote(s)]] -----

* Why should, for instance, Eliphas Levi, the very fearless and outspoken Kabalist, have hesitated to divulge the mystery of the Fallen Angels so-called? That he knew the fact and real meaning of the allegory -- both in its religious and mystical, as well as in its physiological sense -- is proved by his voluminous writings and frequent allusions and hints. Yet Eliphas, after having alluded to it a hundred times in his previous works, says in his latest "Histoire de la Magie," p. 220 . . . "We protest with all our might against the sovereignty and the ubiquity of Satan. We pretend neither to deny nor affirm here the tradition on the Fall of the Angels . . . but if so, then the prince of the Angelic Rebels can be at best the last and the most powerless among the condemned -- now that he is separated from deity -- which is the principle of every power. . . ." This is hazy and evasive enough; but see what Hargrave Jennings writes in his weird, staccato-like style:--

"Both Saint Michael and Saint George are types. They are sainted personages, or dignified heroes, or powers apotheosized. They are each represented with their appropriate faculties and attributes. These are reproduced and stand multiplied -- distinguished by different names in all the mythologies . . . (including the Christian). . . . The idea regarding each is a general one. This idea and representative notion is that of the all-powerful champion -- child-like in his 'Virgin innocence' -- so powerful that this god-filled innocence (the Seraphim 'Know most,' the Cherubim 'love most') can shatter the world (articulated, so to use the word -- in the magic of Lucifer, but condemned) in opposition to the artful constructions (this 'side-life') of the magnificent apostate, the mighty rebel, but yet at the same time the 'Light-bringer,' the Lucifer, the 'Morning Star,' the 'Son of the morning' -- the very highest title 'out of heaven, 'for in heaven it cannot be, but out of heaven it is everything. In an apparently incredible side of his character -- qualities are of no sex -- this archangel, St. Michael, is the invincible, sexless, celestial 'Energy' -- to dignify him by his grand characteristics -- the invisible 'Virgin Combatant,' clothed . . . and at the same time armed, in the denying mail of the Gnostic 'refusal to create.' This is another . . . 'myth within myths' . . . a stupendous 'mystery of mysteries,' because it is so impossible and contradictory. Unexplainable as the Apocalypse. Unrevealable as the 'Revelation' "(p. 213).

Nevertheless, this unexplainable and unrevealable mystery will now be explained and revealed by the doctrines of the East. But as the very erudite, but still more puzzling author of "Phallicism" gives it, of course, no uninitiated mortal would ever understand the real drift of his remarks.

[[Vol. 2, Page]] 239 THEOLOGICAL SNUFFERS.

a theological extinguisher on the radiant star-god, Lucifer, the "Son of the Morning," thus created the most gigantic of all her paradoxes -- a black and tenebrous light -- the myth has struck its roots too deep in the soil of blind faith to permit, in our age, even those, who do not acquiesce in her dogmas and laugh at her horned and cloven-footed Satan, to come out bravely and confess the antiquity of the oldest of all traditions. In a few brief words it is this. Semi-exoterically, the "First-born" of the Almighty -- Fiat Lux, -- or the angels of primordial light, were commanded to create; one third of them rebelled and refused; while those who "obeyed as Fetahil did -- failed" most signally.

To realise the refusal and failure in their correct physical meaning, one must study and understand Eastern philosophy; one has to be acquainted with the fundamental mystical tenets of the Vedantins, with regard to the utter fallacy of attributing functional activity to the infinite and absolute deity. Esoteric philosophy maintains that during the Sandhyas, the "Central Sun" emits creative light -- passively so to say. Causality is latent. It is only during the active periods of being that it gives rise to a stream of ceaseless energy, whose vibrating currents acquire more activity and potency with every rung of the hebdomadic ladder of Being which they descend. Hence it becomes comprehensible how the process of creating, or rather of fashioning, the organic Universe, with all its units of the seven kingdoms, necessitated intelligent beings -- who became collectively a Being or creative God -- differentiated already from the one absolute Unity, unrelated as the latter is to conditioned creation.*

Now the Vatican MSS. of the Kabala -- a single copy of which (in Europe) is said to have been in the possession of Count St. Germain -- contains the most complete exposition of the doctrine, including the peculiar version accepted by the Luciferians** and other Gnostics; and in that parchment the Seven Suns of Life are given in the order they are found in the Saptasurya. Only four of these, however, are mentioned in the editions of the Kabala which are procurable in the public libraries, and that even in a more or less veiled phraseology. Nevertheless even this reduced number is amply sufficient to show an identical origin, as it refers to the quaternary group of the Dhyana-Chohans, and proves the speculation to have had its origin in the Secret Doctrines of the Aryans.

[[Footnote(s)]] -----

* "Creation" -- out of pre-existent eternal substance, or matter, of course, which substance, according to our teachings, is boundless, ever-existing space.

** The Luciferians -- the sect of the fourth century who are alleged to have taught that the Soul was a carnal body transmitted to the child by its father; -- and that other religious and still earlier sect of the second century A.D., the Lucianists, who taught all this, and further, that the animal Soul was not immortal, were philosophizing on the grounds of the real Kabalistic and Occult teachings.

[[Vol. 2, Page]] 240 THE SECRET DOCTRINE.

As is well known, the Kabala never originated with the Jews, who got their ideas from the Chaldeans and the Egyptians.

Thus even the now exoteric Kabalistic teachings speak of a Central Sun, and of three secondary suns in each solar system -- our own included. As shown in that able though too materialistic work, "New Aspects of Life and Religion," which is a synopsis of the views of the Kabalists in an aspect deeply thought out and assimilated:--

"The Central Sun . . . was to them (as much as to the Aryans) the centre of Rest; the centre to which all motion was to be ultimately referred. Round this central sun . . . 'the first of three systemic suns . . . revolved on a polar plane . . . the second, on an equatorial plane' . . . and the third only was our visible sun. These four solar bodies were 'the organs on whose action what man calls the creation, the evolution of life on the planet, earth, depends.' The channels through which the influence of these bodies was conveyed to the earth they (the Kabalists) held to be electrical" (p. 287). . . . "The radiant energy flowing from the central sun* called the Earth into being as a watery globe," whose tendency, "as the nucleus of a planetary body, was to rush to the (central) Sun . . . within the sphere of whose attraction it had been created," "but the radiant energy, similarly electrifying both, withheld the one from the other, and so changed motion towards into motion round the centre of attraction, which the revolving planet (earth) thus sought to reach.

"In the organic cell the visible sun found its own proper matrix, and produced through this the animal (while maturing the vegetable) Kingdom, finally placing man at its head, in whom, through the animating action of that Kingdom, it originated the psychic cell. But the man so placed at the head of the animal kingdom, at the head of the creation, was the animal, the soul-less, the perishable man. . . . Hence man, although apparently its crown, would, by his advent have marked the close of creation; since creation, culminating in him, would at his death have entered on its decline" . . . (p. 289).

This Kabalistic view is here quoted, to show its perfect identity in spirit with the Eastern doctrine. Explain, or complete the teaching of the seven Suns with the seven systems of planes of being, of which the "Suns" are the central bodies, and you have the seven angelic planes,

[[Footnote(s)]] -----

* This "central sun" of the Occultists, which even Science is obliged to accept astronomically, for it cannot deny the presence in Sidereal Space of a central body in the milky way, a point unseen and mysterious, the ever-hidden centre of attraction of our Sun and system -- this "Sun" is viewed differently by the Occultists of the East. While the Western and Jewish Kabalists (and even some pious modern astronomers) claim that in this sun the God-head is specially present -- referring to it the volitional acts of God -- the Eastern Initiates maintain that, as the supradivine Essence of the Unknown Absolute is equally in every domain and place, the "Central Sun" is simply the centre of Universal life-Electricity; the reservoir within which that divine radiance, already differentiated at the beginning of every creation, is focussed. Though still in a laya, or neutral condition, it is, nevertheless, the one attracting, as also the ever-emitting, life Centre.

[[Vol. 2, Page]] 241 "PRINCIPLES" EXPLAINED.

whose "Host" are gods thereof, collectively. (See Comm. to Stanza VII Book I.) They are the Head-group divided into four classes from the incorporeal down to the semi-corporeal, which classes are directly connected -- though in very different ways as regards voluntary connection and functions -- with our mankind. They are three, synthesized by the fourth (the first and highest), which is called the "Central Sun" in the Kabalistic doctrine just quoted. This is the great difference between the Semitic and the Aryan Cosmogony; one materializing, humanizes the mysteries of nature; the other spiritualizes matter, and its physiology is always made subservient to metaphysics. Thus, though the seventh principle reaches man through all the phases of being, pure as an indiscrete element and an impersonal unity, it passes through (the Kabala teaches from) the Central Spiritual Sun and Group the second (the polar Sun), which two radiate on man his Atma. Group Three (the equatorial Sun) cement the Buddhi to Atman and the higher attributes of Manas, while group Four (the spirit of our visible sun) endows him with his Manas and its vehicle -- the Kama rupa, or body of passions and desires, the two elements of Ahankara which evolve individualized consciousness -- the personal ego. Finally, it is the spirit of the Earth in its triple unity that builds the physical body, attracting to it the Spirits of Life and forming his Linga Sarira.

Now, as everything proceeds cyclically, the evolution of man like everything else, the order in which he is generated is described fully in the Eastern teachings, whereas it is only hinted at in the Kabala. Says the Book of Dzyan with regard to primeval man when first projected by the "Boneless," the incorporeal Creator: "First, the Breath, then Buddhi, and the Shadow-Son (the Body) were 'CREATED.' But where was the pivot (the middle principle, Manas)? Man is doomed. When alone, the indiscrete (undifferentiated Element) and the Vahan (Buddhi) -- the cause of the causeless -- break asunder from manifested life" -- "unless cemented and held together by the middle principle, the vehicle of the personal consciousness of JIVA"; explains the Commentary. In other words, the two higher principles can have no individuality on Earth, cannot be man, unless there is (a) the Mind, the Manas-Ego, to cognize itself, and (b) the terrestrial false personality, or the body of egotistical desires and personal Will, to cement the whole, as if round a pivot (which it is, truly), to the physical form of man. It is the Fifth and the Fourth principles* -- Manas and Kama rupa -- that contain the dual personality: the real immortal Ego (if it assimilates itself to the two higher) and the false and transitory personality, the mayavi or astral body, so-called, or the animal-human Soul -- the two hav-

[[Footnote(s)]] -----

* The Fourth, and the Fifth from below beginning by the physical body; the Third and the Fourth, if we reckon from Atma.

[[Vol. 2, Page]] 242 THE SECRET DOCTRINE.

ing to be closely blended for purposes of a full terrestrial existence. Incarnate the Spiritual Monad of a Newton grafted on that of the greatest saint on earth -- in a physical body the most perfect you can think of -- i.e., in a two or even a three-principled body composed of its Sthula Sarira, prana (life principle), and linga sarira -- and, if it lacks its middle and fifth principles, you will have created an idiot -- at best a beautiful, soul-less, empty and unconscious appearance. "Cogito -- ergo sum" -- can find no room in the brain of such a creature, not on this plane, at any rate.

There are students, however, who have long ago understood the philosophical meaning underlying the allegory -- so tortured and disfigured by the Roman Church -- of the Fallen Angels. "The Kingdom of Spirits and spiritual action which flows from and is the product of Spirit Volition, is outside and contrasted with and in contradiction to the Kingdom of (divine) Souls and divine action."* As said in the text:--

"Like produces like and no more at the genesis of being, and evolution with its limited conditioned laws comes later. The Self-Existent are called CREATIONS, for they appear in the Spirit Ray, manifested through the potency inherent in its UNBORN Nature, which is beyond time and (limited or conditioned) Space. Terrene products, animate and inanimate, including mankind, are falsely called creation and creatures: they are the development (evolution) of the discrete elements." (Com. xiv.) Again:--

"The Heavenly rupa (Dhyan Chohan) creates (man) in his own form; it is a spiritual ideation consequent on the first differentiation and awakening of the universal (manifested) Substance; that form is the ideal shadow of Itself: and this is THE MAN OF THE FIRST RACE."

To express it in still clearer form, limiting the explanation to this earth only, it was the duty of the first "differentiated Egos" -- the Church calls them Archangels -- to imbue primordial matter with the evolutionary impulse and guide its formative powers in the fashioning of its productions. This it is which is referred to in the sentences both in the Eastern and Western tradition -- "the Angels were commanded to create." After the Earth had been made ready by the lower and more material powers, and its three Kingdoms fairly started on their way to be "fruitful and multiply," the higher powers, the Archangels or Dhyanis, were compelled by the evolutionary Law to descend on Earth, in order to construct the crown of its evolution - - MAN. Thus the "Self-created"

[[Footnote(s)]] -----

** Angelic, Spiritual Essences, immortal in their being because unconditioned in Eternity; periodical and conditioned in their Manvantaric manifestations.

[[Vol. 2, Page]] 243 MAN, THE PALE SHADOW OF GOD.

and the "Self-existent" projected their pale shadows; but group the Third, the Fire-Angels, rebelled and refused to join their Fellow Devas.

Hindu exotericism represents them all as Yogins, whose piety inspired them to refuse creating, as they desired to remain eternally Kumaras, "Virgin Youths," in order to, if possible, anticipate their fellows in progress towards Nirvana -- the final liberation. But, agreeably to esoteric interpretation, it was a self-sacrifice for the benefit of mankind. The "Rebels" would not create will-less irresponsible men, as the "obedient" angels did; nor could they endow human beings with only the temporary reflections of their own attributes; for even the latter, belonging to another and a so-much higher plane of consciousness, would leave man still irresponsible, hence interfere with any possibility of a higher progress. No spiritual and psychic evolution is possible on earth -- the lowest and most material plane -- for one who on that plane, at all events, is inherently perfect and cannot accumulate either merit or demerit. Man remaining the pale shadow of the inert, immutable, and motionless perfection, the one negative and passive attribute of the real I am that I am, would have been doomed to pass through life on earth as in a heavy dreamless sleep; hence a failure on this plane. The Beings, or the Being, collectively called Elohim, who first (if ever) pronounced the cruel words, "Behold, the man is become as one of us, to know good and evil; and now, lest he put forth his hand and take also of the tree of life and eat and live for ever . . ." must have been indeed the Ilda-baath, the Demiurge of the Nazarenes, filled with rage and envy against his own creature, whose reflection created Ophiomorphos. In this case it is but natural -- even from the dead letter standpoint -- to view Satan, the Serpent of Genesis, as the real creator and benefactor, the Father of Spiritual mankind. For it is he who was the "Harbinger of Light," bright radiant Lucifer, who opened the eyes of the automaton created by Jehovah, as alleged; and he who was the first to whisper: "in the day ye eat thereof ye shall be as Elohim, knowing good and evil" -- can only be regarded in the light of a Saviour. An "adversary" to Jehovah the "personating spirit," he still remains in esoteric truth the ever-loving "Messenger" (the angel), the Seraphim and Cherubim who both knew well, and loved still more, and who conferred on us spiritual, instead of physical immortality -- the latter a kind of static immortality that would have transformed man into an undying "Wandering Jew."

As narrated in King's "Gnostics," "Ilda-Baath, whom several sects regarded as the God of Moses, was not a pure spirit, he was ambitious and proud, and rejecting the spiritual light of the middle space offered him by his mother Sophia-Achamoth, he set himself to create a world of his own. Aided by his sons, the six planetary genii, he fabricated man,

[[Vol. 2, Page]] 244 THE SECRET DOCTRINE.

but this one proved a failure. It was a monster, soulless, ignorant, and crawling on all fours on the ground like a material beast. Ilda-Baath was forced to implore the help of his spiritual mother. She communicated to him a ray of her divine light, and so animated man and endowed him with a soul. And now began the animosity of Ilda-Baath toward his own creature.

Following the impulse of the divine light, man soared higher and higher in his aspirations; very soon he began presenting not the image of his creator Ilda-Baoth but rather that of the Supreme Being, the 'primitive man,' Ennoia. Then the Demiurgos was filled with rage and envy; and fixing his jealous eye on the abyss of matter, his looks envenomed with passion were suddenly reflected as in a mirror; the reflection became animate, and there arose out of the abyss Satan, serpent, Ophiomorphos -- 'the embodiment of envy and cunning. He is the union of all that is most base in matter, with the hate, envy, and craft of a spiritual intelligence.' " This is the exoteric rendering of the Gnostics, and the allegory, though a sectarian version, is suggestive, and seems true to life. It is the natural deduction from the dead letter text of chapter iii. of Genesis.

Hence the allegory of Prometheus, who steals the divine fire so as to allow men to proceed consciously on the path of spiritual evolution, thus transforming the most perfect of animals on earth into a potential god, and making him free to "take the kingdom of heaven by violence." Hence also, the curse pronounced by Zeus against Prometheus, and by Jehovah-Ilda-Baoth against his "rebellious son," Satan. The cold, pure snows of the Caucasian mountain and the never-dying, singeing fire and flames of an extinguishable hell. Two poles, yet the same idea; the dual aspect of a refined torture: a fire producer -- the personified emblem of [[Phosphoros]] of the astral fire and light in the anima mundi -- (that element of which the German materialist philosopher Moleschott said: "ohne phosphor kein gedanke," i.e., without phosphorus no thought), burning in the fierce flames of his terrestrial passions; the conflagration fired by his Thought, discerning as it now does good from evil, and yet a slave to the passions of its earthly Adam; feeling the vulture of doubt and full consciousness gnawing at its heart -- a Prometheus indeed, because a conscious, hence a responsible entity.* The curse of life is great, yet how few are those men, outside some Hindu and Sufi mystics, who would exchange all the tortures of conscious life, all the evils of a responsible existence, for the unconscious perfection of a passive (objectively) incorporeal being, or even the universal static Inertia personified in Brahma during his "night's" rest. For, to quote from an able article by one**

[[Footnote(s)]] -----

* The history of Prometheus, Karma, and human consciousness, is found further on.

** By an Englishman whose erratic genius killed him. The son of a Protestant clergyman, he became a Mahomedan, then a rabid atheist, and after meeting with a [[Footnote continued on next page]]

[[Vol. 2, Page]] 245 SATAN, A CENTRIPETAL FORCE.

who, confusing the planes of existence and consciousness, fell a victim to it:--

"Satan, or Lucifer, represents the active, or, as M. Jules Baissac calls it, the 'Centrifugal Energy of the Universe' in a cosmic sense. He is Fire, Light, Life, Struggle, Effort, Thought, Consciousness, Progress, Civilization, Liberty, Independence. At the same time he is pain, which is the Re-action of the pleasure of action, and death -- which is the revolution of life -- Satan, burning in his own hell, produced by the fury of his own momentum -- the expansive disintegration of the nebulae which is to concentrate into new worlds. And fitly is he again and again baffled by the eternal Inertia of the passive energy of the Kosmos -- the inexorable 'I AM' -- the flint from which the sparks are beaten out. Fitly is he . . . and his adherents . . . consigned to the 'sea of fire,' because it is the Sun (in one sense only in the Cosmic allegory), the fount of life in our system, where they are purified (disintegrated) and churned up to re-arrange them for another life (the resurrection); that Sun which, as the origin of the active principle of our Earth, is at once the Home and the Source of the Mundane Satan. . . ." To demonstrate furthermore the accuracy of Baissac's general theory (in *Le Diable et Satan*) cold is known to have a 'Centripetal' effect. "Under the influence of cold everything contracts. . . . Under it life hibernates, or dies out, thought congeals, and fire is extinguished. Satan is immortal in his own Fire-Sea -- it is only in the 'Nifl-heim' (the cold Hell of the Scandinavian Eddas) of the 'I AM' that he cannot exist. But for all that there is a kind of Immortal Existence in the Nifl-heim, and that existence must be painless and peaceful, because it is Unconscious and Inactive. In the Kingdom of Jehovah (if this God were all that the Jews and Christians claim for him) there is no Misery, no War, no marrying and giving in marriage, no change, no Individual Consciousness.* All is absorbed in the spirit of the most Powerful. It is emphatically a kingdom of Peace and loyal Submission as that of the 'Arch-Rebel' is one of War and Revolution. . . . It (the

[[Footnote(s)]] -----

[[Footnote continued from previous page]] master, a Guru, he became a mystic; then a theosophist who doubted, despaired; threw up white for black magic, went insane and joined the Roman Church. Then again turning round, anathematized her, re-became an atheist, and died cursing humanity, knowledge, and God, in whom he had ceased to believe. Furnished with all the esoteric data to write his "War in Heaven," he made a semi-political article out of it, mixing Malthus with Satan, and Darwin with the astral light. Peace be to his -- Shell. He is a warning to the chelas who fail. His forgotten tomb may now be seen in the Mussulman burial ground of the Joonagad, Kathiawar, in India.

* The author talks of the active, fighting, damning Jehovah as though he were a synonym of Parabrahm! We have quoted from this article to show where it dissents from theosophic teachings; otherwise it would be quoted some day against us, as everything published in the Theosophist generally is.

[[Vol. 2, Page]] 246 THE SECRET DOCTRINE.

former) is in fact what Theosophy calls Nirvana. But then Theosophy teaches that separation from the Primal Source having once occurred, Re-union can only be achieved by Will -- Effort -- which is distinctly Satanic in the sense of this essay."

It is "Satanic" from the standpoint of orthodox Romanism, for it is owing to the prototype of that which became in time the Christian Devil -- to the Radiant Archangels, Dhyans-Chohans, who refused to create, because they wanted Man to become his own creator and an immortal god -- that men can reach Nirvana and the haven of heavenly divine Peace.

To close this rather lengthy comment, the Secret Doctrine teaches that the Fire-Devas, the Rudras, and the Kumaras, the "Virgin-Angels," (to whom Michael and Gabriel, the Archangels, both belong), the divine "Rebels" -- called by the all-materializing and positive Jews, the Nahash or "Deprived" -- preferred the curse of incarnation and the long cycles of terrestrial existence and rebirths, to seeing the misery (even if unconscious) of the beings (evolved as shadows out of their Brethren) through the semi-passive energy of their too spiritual Creators. If "man's uses of life should be such as neither to animalize nor to spiritualize, but to humanize Self,"* before he can do so, he must be born human not angelic. Hence, tradition shows the celestial Yogis offering themselves as voluntary victims in order to redeem Humanity -- created god-like and perfect at first -- and to endow him with human affections and aspirations. To do this they had to give up their natural status and, descending on our globe, take up their abode on it for the whole cycle of the Mahayuga, thus exchanging their impersonal individualities for individual personalities -- the bliss of sidereal existence for the curse of terrestrial life. This voluntary sacrifice of the Fiery Angels, whose nature was Knowledge and Love, was construed by the exoteric theologies into a statement that shows "the rebel angels hurled down from heaven into the darkness of Hell" - our Earth. Hindu philosophy hints at the truth by teaching that the Asuras hurled down by Siva, are only in an intermediate state in which they prepare for higher degrees of purification and redemption from their

[[Footnote(s)]] -----

* Explaining the Kabala, Dr. H. Pratt says, "Spirit was to man (to the Jewish Rabbin, rather?) a bodiless, disembodied, or deprived, and degraded being, and hence was termed by the ideograph Nahash 'Deprived;' represented as appearing to and seducing the human race -- men through the Woman. . . . In the picture from this Nahash, this spirit was represented by a serpent, because from its destitution of bodily members, the Serpent was looked upon as a deprived and depraved and degraded creature" ("New Aspects," p. 235). Symbol for symbol there are those who would prefer that of the serpent -- the symbol of wisdom and eternity, deprived of limbs as it is -- to the Jod ([[diagram]]) -- the poetical ideograph of Jehovah in the Kabala -- the god of the male symbol of generation.

[[Vol. 2, Page]] 247 THE CURSE OF VASISHTA.

wretched condition; but Christian theology, claiming to be based on the rock of divine love, charity, and justice of him it appeals to as its Saviour -- has invented, to enforce that claim paradoxically, the dreary dogma of hell, that Archimedean lever of Roman Catholic philosophy.

As to Rabbinical Wisdom -- than which there is none more positive, materialistic, or grossly terrestrial, as it brings everything down to physiological mysteries -- it calls these Beings, the "Evil One;" and the Kabalists -- Nahash, "Deprived," as just said, and the Souls, that have thrown themselves, after having been alienated in Heaven from the Holy One, into an abyss at the dawn of their very existence, and have anticipated the time when they are to descend on earth. (Zohar iii., 61, C.)

And let me explain at once that our quarrel is not with the Zohar and the Kabala in their right interpretation -- for the latter is ours -- but only with the gross, pseudo-esoteric explanations of the later, and especially those of the Christian Kabalists.

"Our earth and man," says the Commentary, "being the products of the three Fires" -- whose three names answer, in Sanskrit, to "the electric fire, the Solar fire, and the fire produced by friction," -- these three fires, explained on the Cosmic and human planes, are Spirit, Soul, and Body, the three great Root groups, with their four additional divisions. These vary with the Schools, and become -- according to their applications -- the upadhis and the vehicles, or the noumena of these. In the exoteric accounts, they are personified by the "three sons of surpassing brilliancy and splendour" of Agni Abhimanin, the eldest son of Brahma, the Cosmic LOGOS, by Swaha, one of Daksha's* daughters. In the metaphysical sense the "Fire of friction" means the Union between Buddhi, the sixth, and Manas, the fifth, principles, which thus are united or cemented together; the fifth merging partially into and becoming part of the monad; in the physical, it relates to the creative spark, or germ, which fructifies and generates the human being. The three Fires, it is said (whose names are Pavaka, Pavamana and Suchi) were condemned by a curse of Vasishtha, the great sage, "to be born over and over again." (Bhagavata-Purana iv. 24, 4.) This is clear enough.

Therefore, the FLAMES, whose functions are confused in the exoteric books, and who are called indifferently Prajapati, Pitris, Manus, Asuras,

[[Footnote(s)]] -----

* Daksha, the "intelligent, the competent." "This name generally carries with it the idea of creative power." He is a son of Brahma, and of Aditi, and agreeably to other versions, a self-born power, which, like Minerva, sprang from his father's body. He is the chief of the Prajapati -- the Lords or Creators of Being. In Vishnu Purana, Parasara says of him, "in every Kalpa (or manvantara) Daksha and the rest are born and are again destroyed." And the Rig-Veda says that "Daksha sprang from Aditi and Aditi from Daksha," a reference to the eternal cyclic re-birth of the same divine Essence.

[[Vol. 2, Page]] 248 THE SECRET DOCTRINE.

Rishis, Kumaras,* etc. etc., are said to incarnate personally in the Third Root-Race and thus find themselves "reborn over and over again." In the Esoteric doctrine they are generally named the Asuras, or the Asu-ra Devata or Pitar-devata (gods) for, as said, they were first Gods -- and the highest -- before they became "no-gods," and had from Spirits of Heaven fallen into Spirits of the Earth** -- exoterically, note well, in orthodox dogma.

No Theologian, any more than an Orientalist, can ever understand the genealogies of the Prajapati, the Manus, and the Rishis, nor the direct connection of these -- or their correlation rather -- with the Gods, unless he has the key to the old primitive Cosmogony and Theogony, which all the Nations originally had in common. All these gods and demi-gods are

found reborn on earth, in various Kalpas and in as various characters; each, moreover, having his Karma distinctly traced, and every effect assigned to its cause.

Before other Stanzas could be explained, it was, as seen, absolutely necessary to show that the sons of "Dark Wisdom," though identical with the Archangels which Theology has chosen to call the "Fallen," are as divine and as pure and more so than all the Michaels and Gabriels so glorified in the churches. The "old Book" goes into various details of Astral life, which at this juncture would be quite incomprehensible to the reader. It may, therefore, be left for later explanations, and the First and Second Races can now only receive bare notice. Not so for the Third Race -- the Root-Race which separated into sexes, and which was the first to be endowed with reason. Men evolving *pari passu* with the globe, and the latter having "incrustated" more than a hundred million of years before -- the first human sub-race had already begun to materialize or solidify, so to say. But, as the Stanza has it: "the inner man (the conscious Entity) was not." This "Conscious Entity" Occultism says, comes from, nay, in many cases is, the very entire essence and esse of the high Intelligences condemned, by the undeviating law of Karmic evolution, to reincarnate in this *manvantara*.

[[Footnote(s)]] -----

* No one of these orders is distinct from the Pitris or Progenitors, as says Manu (iii. 284). "The wise call our fathers Vasus; our paternal grandfathers, Rudras; our paternal great grandfathers, Adityas; agreeably to a text of the Vedas," or "this is an everlasting Vedic text" in another translation.

** As now discovered by the late G. Smith in the Babylonian cylinder literature, it was the same in Chaldean theogony. Ishtar, "eldest of Heaven and of Earth." Below him the Igaga or Angels of Heaven, and the Anunnaki, or angels of Earth. Below these again various classes of Spirits and "Genii" called Sadu, Vadukku, Ekimu, Gallu -- of which some were good, some evil. (See "Babylonian Mythology.")

[[Vol. 2, Page]] 249 SCIENTIFIC ANTHROPOLOGY IN THE PURANAS.

(b) This verse (thirty-ninth) relates exclusively to the racial divisions. Strictly speaking, esoteric philosophy teaches a modified polygenesis. For, while it assigns to humanity a oneness of origin, in so far that its forefathers or "Creators" were all divine beings -- though of different classes or degrees of perfection in their hierarchy -- men were nevertheless born on seven different centres of the continent of that period. Though all of one common origin, yet for reasons given their potentialities and mental capabilities, outward or physical forms, and future characteristics, were very different.* As to their complexions, there is a suggestive allegory told in Linga Purana. The Kumdra -- the Rudra gods, so called (see further), are described as incarnations of Siva, the destroyer (of outward forms), named also Vamadeva. The latter, as a Kumara, the "Eternal Celibate," the chaste Virgin youth, springs from Brahma in each great *Manvantara*, and "again becomes four"; a reference to the four great divisions of the human races, as regards complexion and type -- and three chief variations of these. Thus in the 29th Kalpa -- in this case a reference to the transformation and evolution of the human form which Siva ever destroys and remodels periodically, down to the *manvantaric* great turning point about the middle of the Fourth (Atlantean) Race -- in the 29th Kalpa, Siva, as Swetalohita, the root Kumara, becomes, from moon-coloured, white; in his next transformation -- he is red (and in this the exoteric version differs from the Esoteric teaching); in the third -- yellow; in the fourth -- black.

Esotericism now classes these seven variations, with their four great divisions, into only three distinct primeval races -- as it does not take into consideration the First Race, which had neither type nor colour, and hardly an objective, though colossal form. The evolution of these races, their formation and development, went *pari passu* and on parallel lines with the evolution, formation, and development of three geological strata, from which the human complexion was as much derived as it was determined by the climates of those zones. It names three great divisions, namely, the RED-YELLOW, the BLACK, and the BROWN-WHITE.** The Aryan races, for instance, now varying from dark brown, almost black, red-brown-yellow, down to the whitest creamy colour, are yet all of one and the same stock -- the Fifth Root-Race -- and spring

[[Footnote(s)]] -----

* Some superior, others inferior, to suit the Karma of the various reincarnating Monads which could not be all of the same degree of purity in their last births in other worlds. This accounts for the difference of races, the inferiority of the savage, and other human varieties.

** "There are," says Topinard (English edition of "Anthropology," with preface by Professor Broca), "THREE fundamental elements of colour in the human organism -- namely, the red, the yellow, and the black, which, mixed in variable quantities with the white of the tissues, give rise to those numerous shades seen in the human family." Here is science unintentionally supporting Occultism again.

[[Vol. 2, Page]] 250 THE SECRET DOCTRINE.

from one single progenitor, called in Hindu exotericism by the generic name of Vaivasvata Manu: the latter, remember, being that generic personage, the Sage, who is said to have lived over 18,000,000 years ago, and also 850,000 years ago -- at the time of the sinking of the last remnants of the great continent of Atlantis* (See the Root and Seed Manus further on), and who is said to live even now in his mankind. (Vide at the end of this Stanza, "THE PRIMEVAL MANUS OF HUMANITY.") The light yellow is the colour of the first SOLID human race, which appeared after the middle of the Third Root Race (after its fall into generation -- as just explained), bringing on the final changes. For, it is only at that period that the last transformation took place, which brought forth man as he is now, only on a magnified scale. This Race gave birth to the Fourth Race; "Siva" gradually transforming that portion of Humanity which became "black with sin" into red-yellow (the red Indians and the Mongolians being the descendants of these) and finally into Brown-white races -- which now, together with the yellow Races, form the great bulk of Humanity. The allegory in Linga Purana is curious, as showing the great ethnological knowledge of the ancients.

When reading of "the last transformation," let the reader consider at this juncture, if that took place 18,000,000 years ago, how many millions more it must have required to reach that final stage? And if man, in his gradual consolidation, developed pari passu with the earth, how many millions of years must have elapsed during the First, Second, and the first half of the Third Race? For the Earth was in a comparatively ethereal condition before it reached its last consolidated state; the archaic teachings, moreover, telling us that, during the middle period of the Lemuro-Atlantean Race, three and a half Races after the Genesis of man, the Earth, man, and everything on the Globe was of a still grosser and more material nature, while such things as corals and some shells were still in a semi-gelatinous, astral state. The cycles that intervened since then, have already carried us onward, on the opposite ascending arc, some steps toward our dematerialization, as the spiritualists would say. The Earth, ourselves, and all things have softened since then -- aye, even our brains. But it has been objected by some theosophists that an ethereal Earth even some 15, or 20,000,000 years ago, does not square with Geology, which teaches us that winds blew, rains fell, waves broke on the shore, sands shifted and accumulated,

[[Footnote(s)]] -----

* It must be remembered that the "last remnants" here spoken of, refer to those portions of the "great continent" which still remained, and not to any of the numerous islands which existed contemporaneously with the continent. Plato's "island" was, for instance, one of such remnants; the others having sunk at various periods previously. An occult "tradition" teaches that such submersions occur whenever there is an eclipse of the "spiritual sun."

[[Vol. 2, Page]] 251 ANSWERS TO OBJECTIONS.

etc., etc., that, in short, all natural causes now in operation were then in force, "in the very earliest ages of geological time, aye, that of the oldest palaeozoic rocks." To this the following answers are given. Firstly, what is the date assigned by geology to those "oldest palaeozoic rocks"? And secondly, why could not the winds blow, rain fall, and waves (of carbonic acid apparently, as science seems to imply) break on the shore, on an Earth semi-astral, i.e., viscid? The word "astral" does not necessarily mean as thin as smoke, in occult phraseology, but rather "starry," shining or pellucid, in various and numerous degrees, from a quite filmy to a viscid state, as just observed. But it is further objected: How could an astral Earth have affected the other planets in this system? Would not the whole process get out of gear now if the attraction of one planet was suddenly removed? The objection is evidently invalid, since our system is composed of older and younger planets, some dead (like the moon), others in process of formation, for all astronomy knows to the contrary. Nor has the latter ever affirmed, so far as we know, that all the bodies of our system have sprung into existence and developed simultaneously. The Cis-Himalayan secret teachings differ from those of India in this respect. Hindu Occultism teaches that the Vaivasvata Manu Humanity is eighteen million and odd years old. We say, yes; but only so far as physical, or approximately physical, man is concerned, who dates from the close of the Third Root-Race. Beyond that period MAN, or his filmy image, may have existed for 300 million years, for all we know; since we are not taught figures which are and will remain secret with the Masters of Occult Science, as justly stated in "Esoteric Buddhism." Moreover, whereas the Hindu Puranas speak of one Vaivasvata Manu, we affirm that there were several, the name being a generic one. (Vide supra).

We must now say a few more words on the physical evolution of man.

[[Vol. 2, Page]] 251 ANSWERS TO OBJECTIONS.

ARCHAIC TEACHINGS IN THE PURANAS AND GENESIS.

PHYSICAL EVOLUTION.

The writer cannot give too much proof that the system of Cosmogony and Anthropogony as described actually existed, that its records are preserved, and that it is found mirrored even in the modern versions of ancient Scriptures.

The Puranas on the one hand, and the Jewish Scriptures on the other, are based on the same scheme of evolution, which, read esoterically and expressed in modern language, would be found to be quite as scientific as much of what now passes current as the final word of recent discovery. The only difference between the two schemes is, that

[[Vol. 2, Page]] 252 THE SECRET DOCTRINE.

the Puranas, giving as much, and perhaps more attention to the causes than to the effects, allude to the pre-Cosmic and pre-Genetic periods rather than to those of so-called Creation, whereas the Bible, saying only a few words of the former period, plunges forthwith into material genesis, and, while nearly skipping the pre-Adamic races, proceeds with its allegories concerning the Fifth Race.

Now, whatever the onslaught made on the Order of creation in Genesis, and its dead letter account certainly lends itself admirably to criticism,* he who reads the Hindu Puranas -- its allegorical exaggerations notwithstanding -- will find them quite in accordance with physical Science.

Even what appears to be the, on the face of it, perfectly nonsensical allegory of Brahma assuming the form of a Boar to rescue the Earth from under the waters, finds in the Secret Commentaries a perfectly scientific explanation, relating as it does to the many risings and sinkings, and the constant alternation of water and land from the earliest to the latest geological periods of our globe; for Science teaches us now that nine-tenths of the stratified formations of the earth's crust have been gradually constructed beneath water, at the bottom of the seas. The ancient Aryans are credited with having known nothing whatever of natural history, geology, and so on. The Jewish race is, on the other hand, proclaimed even by its severest critic, an uncompromising opponent of the Bible, (See "Modern Science and Modern Thought," p. 337), to have the merit of having conceived the idea of monotheism "earlier, and retained it more firmly, than any of the

less philosophical and more immoral religions (!!) of the ancient world." Only, while we find in Biblical esotericism physiological sexual mysteries symbolised, and very little

[[Footnote(s)]] -----

* Mr. Gladstone's unfortunate attempt to reconcile the Genetic account with science (see Nineteenth Century, "Dawn of Creation" and the "Proem to Genesis," 1886) has brought upon him the Jovian thunderbolt hurled by Mr. Huxley. The dead-letter account warranted no such attempt; and his fourfold order, or division of animated creation, has turned into the stone which, instead of killing the fly on the sleeping friend's brow, killed the man instead. Mr. Gladstone killed Genesis for ever. But this does not prove that there is no esotericism in the latter. The fact that the Jews and all the Christians, the modern as well as the early sects, have accepted the narrative literally for two thousand years, shows only their ignorance; and shows the great ingenuity and constructive ability of the initiated Rabbis, who have built the two accounts -- the Elohist and the Jehovistic -- esoterically, and have purposely confused the meaning by the vowelless glyphs or word-signs in the original text. The six days -- yom -- of creation do mean six periods of evolution, and the seventh that of culmination of perfection (not of rest), and refer to the seven Rounds and the seven Races with a distinct "creation" in each; though the use of the words boker, dawn or morning, and crib, evening twilight -- which have esoterically the same meaning as sandhya, twilight, in Sanskrit -- have led to a charge of the most crass ignorance of the order of evolution.

[[Vol. 2, Page]] 253 MR. GLADSTONE KILLS GENESIS.

more (something for which very little real philosophy is requisite), in the Puranas one may find the most scientific and philosophical "dawn of creation," which, if impartially analyzed and rendered into plain language from its fairy tale-like allegories, would show that modern zoology, geology, astronomy, and nearly all the branches of modern knowledge, have been anticipated in the ancient Science, and were known to the philosophers in their general features, if not in such detail as at present!

Puranic astronomy, with all its deliberate concealment and confusion for the purpose of leading the profane off the real track, was shown even by Bentley to be a real science; and those who are versed in the mysteries of Hindu astronomical treatises, will prove that the modern theories of the progressive condensation of nebulae, nebulous stars and suns, with the most minute details about the cyclic progress of asterisms -- far more correct than Europeans have even now -- for chronological and other purposes, were known in India to perfection.

If we turn to geology and zoology we find the same. What are all the myths and endless genealogies of the seven Prajapati, and their sons, the seven Rishis or Manus, and of their wives, sons and progeny, but a vast detailed account of the progressive development and evolution of animal creation, one species after the other? Were the highly philosophical and metaphysical Aryans -- the authors of the most perfect philosophical systems of transcendental psychology, of Codes of Ethics, and such a grammar as Panini's, of the Sankhya and Vedanta systems, and a moral code (Buddhism), proclaimed by Max Muller the most perfect on earth -- such fools, or children, as to lose their time in writing fairy-tales; such tales as the Puranas now seem to be in the eyes of those who have not the remotest idea of their secret meaning? What is the fable, the genealogy and origin of Kasyapa, with his twelve wives, by whom he had a numerous and diversified progeny of nagas (serpents), reptiles, birds, and all kinds of living things, and who was thus the father of all kinds of animals, but a veiled record of the order of evolution in this round? So far, we do not see that any Orientalist ever had the remotest conception of the truths concealed under the allegories and personifications. "The Satapatha Brahmana," says one, "gives a not very intelligible account of Kasyapa's origin. . . . He was the son of Marichi, the Son of Brahma, the father of Vivasvat, the father of Manu, the progenitor of mankind. . . . Having assumed the form of a tortoise, Prajapati created offspring. That which he created he made akarot, hence the word kurma (tortoise). Kasyapa means tortoise; hence men say: 'All creatures are descendants of Kasyapa,' etc., etc. (Hindu Class. Dict.)

He was all this; he was also the father of Garuda, the bird, the "King

[[Vol. 2, Page]] 254 THE SECRET DOCTRINE.

of the feathered tribe," who descends from, and is of one stock with the reptiles, the nagas; and who becomes their mortal enemy subsequently as he is also a cycle, a period of time, when in the course of evolution the birds which developed from reptiles in their "struggle for life," -- "survival of the fittest," etc., etc., turned in preference on those they issued from, to devour them, -- perhaps prompted by natural law, in order to make room for other and more perfect species. (Vide Part II., "Symbolism.")

In that admirable epitome of "Modern Science and Modern Thought," a lesson in natural history is offered to Mr. Gladstone, showing the utter variance with it of the Bible. The author remarks that Geology, commencing with --

" . . . the earliest known fossil, the Eozoon Canadense of the Laurentian, continued in a chain, every link of which is firmly welded, through the Silurian, with its abundance of molluscous, crustacean, and vermiform life and first indication of fishes; the Devonian, with its predominance of fish and first appearance of reptiles; the Mesozoic with its batrachians (or frog family); the Secondary formations, in which reptiles of the sea, land and air preponderated, and the first humble forms of vertebrate land animals began to appear; and finally, the Tertiary, in which mammalian life has become abundant, and type succeeding to type and species to species, are gradually differentiated and specialized, through the Eocene, Miocene, and Pliocene periods, until we arrive at the Glacial and Pre-historic periods, and at positive proof of the existence of man."

The same order, plus the description of animals unknown to modern science, is found in the commentaries on the Puranas in general, and in the Book of Dzyan -- especially. The only difference, a grave one, no doubt, -- as implying a spiritual and divine nature of man independent of his physical body in this illusionary world, in which the false personality and its cerebral basis alone is known to orthodox psychology -- is as follows. Having been in all the so-called "Seven creations," allegorizing the seven evolutionary changes, or the sub-races, we may call them, of the First Root-race of

Mankind -- MAN was on earth in this Round from the beginning. Having passed through all the kingdoms of nature in the previous three Rounds,* his physical frame -- one adapted to the thermal conditions of those early periods -- was ready to receive the divine Pilgrim at the first dawn of human life, i.e., 18,000,000 years ago. It is only at the

[[Footnote(s)]] -----

* "Follow the law of analogy" -- the Masters teach. Atma-Buddhi is dual and Manas is triple; inasmuch as the former has two aspects, and the latter three, i.e., as a principle per se, which gravitates, in its higher aspect, to Atma-Buddhi, and follows, in its lower nature, Kama, the seat of terrestrial and animal desires and passions. Now compare the evolution of the Races, the First and the Second of which are of the nature of Atma-Buddhi, their passive Spiritual progeny, and the Third Root-Race shows three distinct divisions or aspects physiologically and psychically; the earliest, sinless; the middle portions awakening to intelligence; and the third and last decidedly animal: i.e., Manas succumbs to the temptations of Kama.

[[Vol. 2, Page]] 255 FROM WORM TO MAN.

mid-point of the 3rd Root Race that man was endowed with Manas. Once united, the two and then the three made one; for though the lower animals, from the amoeba to man, received their monads, in which all the higher qualities are potential, all have to remain dormant till each reaches its human form, before which stage manas (mind) has no development in them.* In the animals every principle is paralysed, and in a foetus-like state, save the second (vital) and the third (the astral), and the rudiments of the fourth (Kama, which is desire, instinct) whose intensity and development varies and changes with the species. To the materialist wedded to the Darwinian theory, this will read like a fairy-tale, a mystification; to the believer in the inner, spiritual man, the statement will have nothing unnatural in it.

Now the writer is certain to meet what will be termed insuperable objections. We shall be told that the line of embryology, the gradual development of every individual life, and the progress of what is known to take place in the order of progressive stages of specialization -- that all this is opposed to the idea of man preceding mammals. Man begins as the humblest and most primitive vermiform creature, "from the primitive speck of protoplasm and the nucleated cell in which all life originates," and "is developed through stages undistinguishable from those of fish, reptile and mammal, until the cell finally attains the highly specialized development of the quadrumanous, and last of all, of the human type." (Laing, 335.)

This is perfectly scientific, and we have nothing against that; for all this relates to the shell of man -- his body, which in its growth is subject, of course, like every other (once called) morphological unit, to such metamorphoses. It is not those who teach the transformation of the mineral atom through crystallization -- which is the same function, and bears the same relation to its inorganic (so-called) upadhi (or basis) as the formation of cells to their organic nuclei, through plant, insect and animal into man -- it is not they who will reject this theory, as it will finally lead to the recognition of a Universal Deity in nature, ever-present and as ever invisible, and unknowable, and of intra-Cosmic gods, who all were men.**

[[Footnote(s)]] -----

* "Men are made complete only during their third, toward the fourth cycle (race). They are made 'gods' for good and evil, and responsible only when the two arcs meet (after 3 1/2 rounds towards the fifth Race). They are made so by the Nirmanakaya (spiritual or astral remains) of the Rudra-Kumaras, 'cursed to be reborn on earth again; meaning -- doomed in their natural turn to reincarnation in the higher ascending arc of the terrestrial cycle.' (Commentary IX.)

** The whole trouble is this: neither physiologists nor pathologists will recognize that the cell-germinating substance (the cytoblastema) and the mother-lye from which crystals originate, are one and the same essence, save in differentiation for purposes.

[[Vol. 2, Page]] 256 THE SECRET DOCTRINE.

But we would ask, what does science and its exact and now axiomatic discoveries prove against our Occult theory? Those who believe in the law of Evolution and gradual progressive development from a cell (which from a vital has become a morphological cell, until it awoke as protoplasm pure and simple) -- these can surely never limit their belief to one line of evolution. The types of life are innumerable; and the progress of evolution, moreover, does not go at the same rate in every kind of species. The constitution of primordial matter in the Silurian age -- we mean "primordial" matter of science -- is the same in every essential particular, save its degree of present grossness, as the primordial living matter of to-day. Nor do we find that which ought to be found, if the now orthodox theory of Evolution were quite correct, namely, a constant, ever-flowing progress in every species of being. Instead of that, what does one see? While the intermediate groups of animal being all tend toward a higher type, and while specializations, now of one type and now of another, develop through the geological ages, change forms, assume new shapes, appear and disappear with a kaleidoscopic rapidity in the description of paleontologists from one period to another, the two solitary exceptions to the general rule are those at the two opposite poles of life and type, namely -- MAN and the lower genera of being!

"Certain well-marked forms of living beings have existed through enormous epochs, surviving not only the changes of physical conditions, but persisting comparatively unaltered, while other forms of life have appeared and disappeared. Such forms may be termed 'persistent types' of life; and examples of them are abundant enough in both the animal and the vegetable worlds" (Huxley, "Proceed. of Roy. Inst.," vol. iii., p. 151).

Nevertheless, we are not given any good reason why Darwin links together reptiles, birds, amphibians, fishes, mollusca, etc., etc., as off-shoots of a moneric ancestry. Nor are we told whether reptiles, for instance, are direct descendants of the amphibian, the latter of fishes, and fishes of lower forms -- which they certainly are. For the Monads have passed through all these forms of being up to man, on every planet, in the Three preceding Rounds; every Round, as well as every subsequent Globe, from A to G, having been, and still having to be the arena of the same evolution, only repeated each time on a more solid material basis. Therefore the question:-- "What relation is there between the Third Round astral

prototypes and ordinary physical development in the course of the origination of pre-mammalian organic species?" -- is easily answered. One is the shadowy prototype of the other, the preliminary, hardly defined, and evanescent sketch on the canvas, of objects, which are destined to receive the final and vivid

[[Vol. 2, Page]] 257 THE CONTRADICTIONS OF SCIENCE.

form under the brush of the painter. The fish evolved into an amphibian -- a frog -- in the shadows of ponds, and man passed through all his metamorphoses on this Globe in the Third Round as he did in this, his Fourth Cycle. The Third Round types contributed to the formation of the types in this one. On strict analogy, the cycle of Seven Rounds in their work of the gradual formation of man through every kingdom of Nature, are repeated on a microscopical scale in the first seven months of gestation of a future human being. Let the student think over and work out this analogy. As the seven months' old unborn baby, though quite ready, yet needs two months more in which to acquire strength and consolidate; so man, having perfected his evolution during seven Rounds, remains two periods more in the womb of mother-Nature before he is born, or rather reborn a Dhyani, still more perfect than he was before he launched forth as a Monad on the newly built chain of worlds. Let the student ponder over this mystery, and then he will easily convince himself that, as there are also physical links between many classes, so there are precise domains wherein the astral merges into physical evolution. Of this Science breathes not one word. Man has evolved with and from the monkey, it says. But now see the contradiction.

Huxley proceeds to point out plants, ferns, club mosses, some of them generically identical with those now living, which are met with in the carboniferous epoch, for:-- "The cone of the oolitic Araucaria is hardly distinguishable from that of existing species. . . . Subkingdoms of animals yield the same instances. The globigerina of the Atlantic soundings is identical with the cretaceous species of the same genus . . . the tabulate corals of the Silurian epoch are wonderfully like the millepores of our own seas. . . . The arachnida, the highest group of which, the scorpions, is represented in the coal by a genus differing only from its living congeners only in . . . the eyes," etc., etc.; all of which may be closed with Dr. Carpenter's authoritative statement about the Foraminifera. "There is no evidence," he says, "of any fundamental modification or advance in the Foraminiferous type from the palaeozoic period to the present time. . . . The Foraminiferous Fauna of our own series probably present a greater range of variety than existed at any previous period; but there is no indication of any tendency to elevation towards a higher type." ("Introduction to the study of the Foraminifera," p. xi.)

Now, if there is no indication of change in the Foraminifera, a protozoon of the lowest type of life, mouthless and eyeless, except its greater variety now than before, man, who is on the uppermost rung of the ladder of being, indicates still less change, as we have seen; the skeleton of his Palaeolithic ancestor being even found

[[Vol. 2, Page]] 258 THE SECRET DOCTRINE.

superior in some respects to his present frame. Where is, then, the claimed uniformity of law, the absolute rule for one species shading off into another, and, by insensible gradations, into higher types? We see Sir William Thomson admitting as much as 400,000,000 of years in the earth's history, since the surface of the globe became sufficiently cool to permit of the presence of living things;" and during that enormous lapse of time in the Oolitic period alone, the so-called "age of reptiles," we find a most extraordinary variety and abundance of Saurian forms, the Amphibian type reaching its highest developments. We learn of Ichthyosauri and Plesiosauri in the lakes and rivers, and of winged crocodiles or lizards flying in the air. After which, in the Tertiary period "we find the Mammalian type exhibiting remarkable divergences from previously existing forms . . . Mastodons, Megatheriums, and other unwieldy denizens of the ancient forests and plains; and subsequently," are notified of -- "the gradual modification of one of the ramifications of the Quadrumanous order, into those beings from whom primeval man himself may claim to have been evolved." ("The Beginnings of Life.")

He may; but no one, except materialists, can see why he should; as there is not the slightest necessity for it, nor is such an evolution warranted by facts, for those most interested in the proofs thereof confess their utter failure to find one single fact to support their theory. There is no need for the numberless types of life to represent the members of one progressive series. They are "the products of various and different evolutionary divergences, taking place now in one direction and now in another." Therefore it is far more justifiable to say that the monkey evolved into the Quadrumanous order, than that primeval man, who has remained stationary in his human specialization ever since his fossil is found in the oldest strata, and of whom no variety is found save in colour and facial type -- has developed from a common ancestor together with the ape.

That man originates like other animals in a cell and develops "through stages undistinguishable from those of fish, reptile, and mammal until the cell attains the highly specialized development of the quadrumanous and at last the human type," is an Occult axiom thousands of years old. The Kabalistic axiom: "A stone becomes a plant; a plant a beast; a beast a man; a man a God," holds good throughout the ages. Haeckel, in his *Shopfungsgeschichte*, shows a double drawing representing two embryos -- that of a dog six weeks old, and that of a man, eight weeks. The two, except the slight difference in the head, larger and wider about the brain in the man, are

[[Footnote(s)]] -----

* "Trans. of Geolog. Soc. of Glasgow," vol. iii. Very strangely, however, he has just changed his opinion. The sun, he says, is only 15,000,000 old.

[[Vol. 2, Page]] 259 IDENTITY OF HUMAN AND ANIMAL EMBRYOS.

undistinguishable. "In fact, we may say that every human being passes through the stage of fish and reptile before arriving at that of mammal and finally of man. If we take him up at the more advanced stage where the embryo has already passed the reptilian form . . . for a considerable time, the line of development remains the same as that of other mammalia. The rudimentary limbs are exactly similar, the five fingers and toes develop in the same way, and the resemblance after the first four weeks' growth between the embryo of a man and a dog is such that it is scarcely possible

to distinguish them. Even at the age of eight weeks the embryo man is an animal with a tail hardly to be distinguished from an embryo puppy" ("Modern Science," etc., p. 171).

Why, then, not make man and dog evolve from a common ancestor, or from a reptile -- a Naga, instead of coupling man with the quadrumana? This would be just as logical as the other, and more so. The shape and the stages of the human embryo have not changed since historical times, and these metamorphoses were known to AEsculapius and Hippocrates as well as to Mr. Huxley. Therefore, since the Kabalists had remarked it since prehistoric times, it is no new discovery. In "Isis," Vol. I., 389, it is noticed and half explained.

As the embryo of man has no more of the ape in it than of any other mammal, but contains in itself the totality of the kingdoms of nature, and since it seems to be "a persistent type" of life, far more so than even the Foraminifera, it seems as illogical to make him evolve from the ape as it would be to trace his origin to the frog or the dog. Both Occult and Eastern philosophies believe in evolution, which Manu and Kapila* give with far more clearness than any scientist does at present. No need to repeat that which was fully debated in Isis Unveiled, as the reader may find all these arguments and the description of the basis on which all the Eastern doctrines of Evolution rested, in our earlier books.** But no Occultist can accept the unreasonable proposition that all the now existing forms, "from the structureless Amoeba to man," are the direct lineal descendants of organisms which lived millions and millions of years before the birth of man, in the pre-Silurian epochs, in the sea or land-

[[Footnote(s)]] -----

* Hence the philosophy in the allegory of the 7, 10, and finally 21 Prajapati, Rishis, Munis, etc., who all are made the fathers of various things and beings. The order of the seven classes or orders of plants, animals, and even inanimate things, given at random in the Puranas, is found in several commentaries in the correct rotation. Thus, Prithu is the father of the Earth. He milks her, and makes her bear every kind of grain and vegetable, all enumerated and specified. Kasyapa is the father of all the reptiles, snakes, demons, etc., etc.

** See Vol. I. 152, et seq., about the tree of evolution -- The "Mundane Tree."

[[Vol. 2, Page]] 260 THE SECRET DOCTRINE.

mud. The Occultists believe in an inherent law of progressive development.* Mr. Darwin never did, and says so himself.

On page 145 of the "Origin of Species" we find him stating that, since there can be no advantage "to the infusorian animalcule or an intestinal worm . . . to become highly organized," therefore, "natural selection," not including necessarily progressive development -- leaves the animalcule and the worm (the "persistent types") quiet.

There does not appear much uniform law in such behaviour of Nature; and it looks more like the discriminative action of some Super-Natural selection; perhaps, that aspect of Karma, which Eastern Occultists would call the "Law of Retardation," may have something to do with it.

But there is every reason to doubt whether Mr. Darwin himself ever gave such an importance to his law -- as is given to it now by his atheistic followers. The knowledge of the various living forms in the geological periods that have gone by is very meagre. The reasons given for this by Dr. Bastian are very suggestive: (1) On account of the imperfect manner in which the several forms may be represented in the strata pertaining to the period; (2) on account of the extremely limited nature of the explorations which have been made in these imperfectly representative strata; and (3) because so many parts of the record are absolutely inaccessible to us -- nearly all beneath the Silurian system having been blotted out by time, whilst those two-thirds of the earth's surface in which the remaining strata are to be found are now covered over by seas. Hence Mr. Darwin says himself:--

"For my part, following out Lyell's metaphor, I look at the geological record as a history of the world imperfectly kept, and written in a changing dialect; of this history we possess the last volume alone, relating only to two or three countries. Of this volume, only here and there a short chapter has been preserved, and of each page only here and there a few lines."

It is not on such meagre data, certainly, that the last word of Science can be said. Nor is it on any ground of human pride or unreasonable belief in man's representing even here on earth -- (in our period, perhaps) -- the highest type of life, that Occultism denies that all the preceding forms of human life belonged to types lower than our own, for it is not so. But simply because the "missing link," such as to prove the existing theory undeniably, will never be found by palaeontologists. Believing as we do that man has evolved from, and passed through, (during the preceding Rounds) the lowest forms of every life, vegetable and animal, on earth, there is nothing very degrading in the idea of having the orangoutang as an ancestor of our physical form. Quite the reverse; as it

[[Footnote(s)]] -----

* Checked and modified, however, by the Law of Retardation, which imposes a restriction on the advance of all species when a Higher Type makes its appearance.

[[Vol. 2, Page]] 261 NATURE IS UNIFORM.

would forward the Occult doctrine with regard to the final evolution of everything in terrestrial nature into man, most irresistibly. One may even enquire how it is that biologists and anthropologists, having once firmly accepted the theory of the descent of man from the ape -- how it is that they have hitherto left untouched the future evolution of the existing apes into man? This is only a logical sequence of the first theory, unless Science would make of man a privileged being, and his evolution a non-precedent in nature, quite a special and unique case. And that is what all this leads physical Science to. The reason, however, why the Occultists reject the Darwinian, and especially the Haeckelian, hypothesis is because it is the ape which is, in sober truth, a special and unique instance, not man. The pithecoïd is an accidental creation, a forced growth, the result of an unnatural process.

The occult doctrine, is, we think, more logical. It teaches a cyclic, never varying law in nature, the latter having no personal, "special design," but acting on a uniform plan that prevails through the whole manvantaric period and deals with the land worm as it deals with man. Neither the one nor the other have sought to come into being, hence both are under the same evolutionary law, and both have to progress according to Karmic law. Both have started from the same neutral centre of Life and both have to re-merge into it at the consummation of the cycle.

It is not denied that in the preceding Round man was a gigantic apelike creature; and when we say "man" we ought perhaps to say, the rough mould that was developing for the use of man in this Round only -- the middle, or the transition point of which we have hardly reached. Nor was man what he is now during the first two and a half Root-races. That point he reached, as said before, only 18,000,000 years ago, during the secondary period, as we claim.

Till then he was, according to tradition and Occult teaching, "a god on earth who had fallen into matter," or generation. This may or may not be accepted, since the Secret Doctrine does not impose itself as an infallible dogma; and since, whether its prehistoric records are accepted or rejected, it has nothing to do with the question of the actual man and his inner nature, the Fall mentioned above having left no original sin on Humanity. But all this has been sufficiently dealt with.

Furthermore, we are taught that the transformations through which man passed on the descending arc -- which is centrifugal for spirit and centripetal for matter -- and those he prepares to go through, henceforward, on his ascending path, which will reverse the direction of the two forces -- viz., matter will become centrifugal and spirit centripetal -- that all such transformations are next in store for the anthropoid ape also, all those, at any rate, who have reached the remove next to man in this

[[Vol. 2, Page]] 262 THE SECRET DOCTRINE.

Round -- and these will all be men in the Fifth Round, as present men inhabited ape-like forms in the Third, the preceding Round.

Behold, then, in the modern denizens of the great forests of Sumatra the degraded and dwarfed examples -- "blurred copies," as Mr. Huxley has it -- of ourselves, as we (the majority of mankind) were in the earliest sub-races of the Fourth Root-race during the period of what is called the "Fall into generation." The ape we know is not the product of natural evolution but an accident, a cross-breed between an animal being, or form, and man. As has been shown in the present volume (anthropogenesis), it is the speechless animal that first started sexual connection, having been the first to separate into males and females. Nor was it intended by Nature that man should follow the bestial example -- as shown by the comparatively painless procreation of their species by the animals, and the terrible suffering and danger of the same in the woman. The Ape is, indeed, as remarked in Isis Unveiled (Vol. II 278) "a transformation of species most directly connected with that of the human family -- a hybrid branch engrafted on their own stock before the final perfection of the latter" -- or man. The apes are millions of years later than the speaking human being, and are the latest contemporaries of our Fifth Race. Thus, it is most important to remember that the Egos of the apes are entities compelled by their Karma to incarnate in the animal forms, which resulted from the bestiality of the latest Third and the earliest Fourth Race men. They are entities who had already reached the "human stage" before this Round. Consequently, they form an exception to the general rule. The numberless traditions about Satyrs are no fables, but represent an extinct race of animal men. The animal "Eves" were their foremothers, and the human "Adams" their forefathers; hence the Kabalistic allegory of Lilith or Lilatu, Adam's first wife, whom the Talmud describes as a charming woman, with long wavy hair, i.e.-- a female hairy animal of a character now unknown, still a female animal, who in the Kabalistic and Talmudic allegories is called the female reflection of Samael, Samael-Lilith, or man-animal united, a being called Hayo Bischat, the Beast or Evil Beast (Zohar). It is from this unnatural union that the present apes descended. The latter are truly "speechless men," and will become speaking animals (or men of a lower order) in the Fifth Round, while the adepts of a certain school hope that some of the Egos of the apes of a higher intelligence will reappear at the close of the Sixth Root-race. What their form will be is of secondary consideration. The form means nothing. Species and genera of the flora, fauna, and the highest animal, its crown -- man, change and vary according to the environments and climatic variations, not only with every Round, but every Root-Race likewise, as well as after every geological

[[Vol. 2, Page]] 263 MILLIONS OF YEARS HENCE.

cataclysm that puts an end to, or produces a turning point in the latter. In the Sixth Root-Race the fossils of the Orang, the Gorilla and the Chimpanzee will be those of extinct quadrumanous mammals; and new forms -- though fewer and ever wider apart as ages pass on and the close of the Manvantara approaches -- will develop from the "cast off" types of the human races as they revert once again to astral, out of the mire of physical, life. There were none before man, and they will be extinct before the Seventh Race develops. Karma will lead on the monads of the unprogressed men of our race and lodge them in the newly evolved human frames of the thus physiologically regenerated baboon. (But see Part III., Addenda.)

This will take place, of course, millions of years hence. But the picture of this cyclic precession of all that lives and breathes now on earth, of each species in its turn, is a true one, and needs no "special creation" or miraculous formation of man, beast, and plant ex nihilo.

This is how Occult Science explains the absence of any link between ape and man, and shows the former evolving from the latter.

A PANORAMIC VIEW OF THE EARLY RACES.

There is a period of a few millions of years to cover between the first "mindless" race and the highly intelligent and intellectual later "Lemurians"; there is another between the earliest civilization of the Atlanteans and the historic period.

As witnesses to the Lemurians but a few silent records in the shape of half a dozen broken colossi and old cyclopean ruins are left. These are not allowed a hearing, as they are "productions of blind natural forces," we are assured by some; "quite modern" we are told by others. Tradition is left contemptuously unnoticed by sceptic and materialist, and made subservient to the Bible in every case by the too zealous Churchman. Whenever a legend, however, refuses to fit in with the Noachian "deluge theory," it is declared by the Christian clergy "the insanely delirious voice of old superstition." Atlantis is denied, when not confused with Lemuria and other departed continents, because, perhaps, Lemuria is half the creation of modern science, and has, therefore, to be believed in; while Plato's Atlantis is regarded by most of the scientists as a dream.

Atlantis is often described by believers in Plato as a prolongation of Africa. An old continent is also suspected to have existed on the Eastern coast. Only Africa, as a continent, was never part and parcel of either Lemuria or Atlantis, as we have agreed to call the Third and Fourth Continents. Their archaic appellations are never mentioned in the

[[Vol. 2, Page]] 264 THE SECRET DOCTRINE.

Puranas, nor anywhere else. But with simply one of the esoteric keys in hand it becomes an easy task to identify these departed lands in the numberless "lands of the gods," Devas and Munis described in the Puranas, in their Varshas, Dwipas, and zones. Their Sweta-Dwipa, during the early day of Lemuria, stood out like a giant-peak from the bottom of the sea; the area between Atlas and Madagascar being occupied by the waters till about the early period of Atlantis (after the disappearance of Lemuria), when Africa emerged from the bottom of the ocean, and Atlas was half-sunk.

It is of course impossible to attempt, within the compass of even several volumes, a consecutive and detailed account of the evolution and progress of the first three races -- except so far as to give a general view of it, as will be done presently. Race the first had no history of its own. Of race the second the same may be said. We shall have, therefore, to pay careful attention only to the Lemurians and the Atlanteans before the history of our own race (the Fifth) can be attempted.

What is known of other continents, besides our own, and what does history know or accept of the early races? Everything outside the repulsive speculations of materialistic science is daubed with the contemptuous term "Superstition." The wise men of to-day will believe nothing. Plato's "winged" and hermaphrodite races, and his golden age, under the reign of Saturn and the gods, are quietly brought back by Haeckel to their new place in nature: our divine races are shown to be the descendants of Catarrhine apes, and our ancestor, a piece of sea slime.

Nevertheless, as expressed by Faber, "the fictions of ancient poetry . . . will be found to comprehend some portion of historical truth." However one-sided the efforts of the learned author of the "Mysteries of the Kabiri," -- efforts directed throughout his two volumes to constrain the classical myths and symbols of old paganism, "to bear testimony to the truth of Scripture," -- time and further research have avenged, partially at least, that "truth" by showing it unveiled. Thus it is the clever adaptations of Scripture, on the contrary, which are made to bear evidence to the great wisdom of archaic paganism. This, notwithstanding the inextricable confusion into which the truth about the Kabiri -- the most mysterious gods of antiquity -- was thrown by the wild and contradictory speculations of Bishop Cumberland, Dr. Shuckford, Cudworth, Vallancey, etc., etc., and finally by Faber. Nevertheless, all, from first to last, of these scholars had to come to a certain conclusion framed by the latter. "We have no reason to think," he writes, "that the idolatry of the Gentile world was of a merely arbitrary contrivance; on the contrary, it seems to have been built, almost universally, upon a traditional remembrance of certain real events. These events I apprehend to be the destruction of

[[Vol. 2, Page]] 265 BAILLY AND FABER.

the first (the fourth in esoteric teachings) Race of mankind by the waters of the Deluge." (Chap. I. p. 9). To this, Faber adds:--

"I am persuaded that the tradition of the sinking of the Phlegian isle is the very same as that of the sinking of the island Atlantis. They both appear to me to allude to one great event, the sinking of the whole world beneath the waters of the deluge, or, if we suppose the arch of the earth to have remained in its original position, the rising of the central water above it. M. Bailly, indeed, in his work upon the Atlantis of Plato, the object of which is evidently to depreciate the authority of Scriptural chronology, labours to prove that the Atlanteans were a very ancient northern nation, long prior to the Hindoos, the Phoenicians, and the Egyptians." ("A Dissertation on the Kabiri," p. 284.)

In this Faber is in agreement with Bailly, who shows himself more learned and intuitional than those who accept Biblical chronology. Nor is the latter wrong when saying that the Atlanteans were the same as the Titans and the giants. (See "Lettres sur l'Atlantide.") Faber adopts the more willingly the opinion of his French confrere, as Bailly mentions Cosmas Indico-Pleustes, who preserved an ancient tradition about Noah -- that he "formerly inhabited the island Atlantis" (ibid). This island, whether it was the "Poseidonis" mentioned in "Esoteric Buddhism," or the Continent of Atlantis, does not much matter. The tradition is there, recorded by a Christian.

No Occultist would ever think of dispossessing Noah of his prerogatives, if he is claimed to be an Atlantean; for this would simply show that the Israelites repeated the story of Vaivasvata Manu, Xisuthrus, and so many others, and that they only changed the name, to do which they had the same right as any other nation or tribe. What we object to is the literal acceptance of Biblical chronology, as it is absurd, and in accord with neither geological data nor reason. Moreover, if Noah was an Atlantean, then he was a Titan, a giant, as Faber shows; and if a giant, then why is he not shown as such in Genesis?*

Bailly's mistake was to reject the submersion of Atlantis, and to call the Atlanteans simply a Northern and post diluvian nation, which, however, as he says, certainly "flourished before the foundation of the Hindu, the Egyptian, and the Phoenician empires." In this, had

[[Footnote(s)]] -----

* This is shown by Faber, again a pious Christian, who says that "the Noetic family also . . . bore the appellations of Atlanteans and Titans, and the great patriarch himself was called by way of eminence Atlas and Titan." (Vol. II. p. 285). And if so, then, according to the Bible, Noah must have been the progeny of the Sons of God, the fallen angels, agreeably to the same authority, and of the "daughters of men who were fair," (See Genesis, chap. vi.) And why not, since his father Lamech slew a man, and was, with all his sons and daughters (who perished in the Deluge), as bad as the rest of mankind?

[[Vol. 2, Page]] 266 THE SECRET DOCTRINE.

he only known of the existence of what we have agreed to call Lemuria, he would have again been right. For the Atlanteans were post diluvian to the Lemurians, and Lemuria was not submerged as Atlantis was, but was sunk under the waves, owing to earthquakes and subterranean fires, as Great Britain and Europe will be one day. It is the ignorance of our men of science, who will accept neither the tradition that several continents have already sunk, nor the periodical law which acts throughout the Manvantaric cycle -- it is this ignorance that is the chief cause of all the confusion. Nor is Bailly wrong again in assuring us that the Hindus, Egyptians, and Phoenicians came after the Atlanteans, for the latter belonged to the Fourth, while the Aryans and their Semitic Branch are of the Fifth Race. Plato, while repeating the story as narrated to Solon by the priests of Egypt, intentionally confuses (as every Initiate would) the two continents, and assigns to the small island which sunk last all the events pertaining to the two enormous continents, the prehistoric and traditional. Therefore, he describes the first couple, from whom the whole island was peopled, as being formed of the Earth. In saying so, he means neither Adam and Eve, nor yet his own Hellenic forefathers. His language is simply allegorical, and by alluding to "Earth," he means "matter," as the Atlanteans were really the first purely human and terrestrial race -- those that preceded it being more divine and ethereal than human and solid.

Yet Plato must have known, as would any other initiated adept, about the history of the Third Race after its "Fall," though as one pledged to silence and secrecy he never showed his knowledge in so many words. Nevertheless, it may become easier now, after acquainting oneself with even the approximate chronology of the Eastern nations -- all of which was based upon, and followed the early Aryan calculations -- to realize the immense periods of time that must have elapsed since the separation of the sexes, without mentioning the First or even the Second Root-Races. As these must remain beyond the comprehension of minds trained in Western thought, it is found useless to speak in detail of the First and Second, and even of the Third Race in its earliest stage.* One has to begin with the latter, when it reached its full human period, lest the uninitiated reader should find himself hopelessly bewildered.

[[Footnote(s)]] -----

* In that wonderful volume of Donnelly's "Atlantis, the Antediluvian World," the author, speaking of the Aryan colonies from Atlantis, and of the arts and sciences the legacy of our Fourth Race -- bravely announces that "the roots of the institutions of to-day reach back to the Miocene age." This is an enormous allowance for a modern scholar to make; but civilization dates still further back than the Miocene Atlanteans. "Secondary-period" man will be discovered, and with him his long forgotten civilization.

[[Vol. 2, Page]] 267 THE NATURAL "FALL."

The THIRD RACE FELL -- and created no longer: it begot its progeny. Being still mindless at the period of separation it begot, moreover, anomalous offspring, until its physiological nature had adjusted its instincts in the right direction. Like the "lords the gods" of the Bible the "Sons of Wisdom," the Dhyana-Chohans, had warned them to leave alone the fruit forbidden by Nature: but the warning proved of no value. Men realized the unfitness -- we must not say sin -- of what they had done, only when too late: after the angelic monads from higher spheres had incarnated in, and endowed them with understanding. To that day they had remained simply physical, like the animals generated from them. For what is the distinction? The doctrine teaches that the only difference between animate and inanimate objects on earth, between an animal and a human frame, is that in some the various "fires" are latent, and in others they are active. The vital fires are in all things and not an atom is devoid of them. But no animal has the three higher principles awakened in him; they are simply potential, latent, and thus non-existing. And so would the animal frames of men be to this day, had they been left as they came out from the bodies of their Progenitors, whose shadows they were, to grow, unfolded only by the powers and forces immanent in matter. But as said in PYMANDER:--

"This is a Mystery that to this day was sealed and hidden. Nature* being mingled with Man** brought forth a wondrous miracle; the harmonious commingling of the essence of the Seven (Pitris, governors) and her own; the Fire and the Spirit and Nature (the noumenon of matter); which (commingling) forthwith brought forth seven men of opposite sexes (negative and positive) according to the essences of the seven governors." (Divine Pymander, Chap. I., Sect. 16.)

Thus saith Hermes, the thrice great Initiate, *** "the Power of the

[[Footnote(s)]] -----

* Nature is the natural body, the shadow of the Progenitors; and --

** MAN is the "Heavenly man," as already stated.

*** The "Pymander" of our museums and libraries is an abridgement of one of the Books of Thoth, by a Platonist of Alexandria. In the Third Century it was remodelled after old Hebrew and Phoenician MSS. by a Jewish Kabbalist, and called the "Genesis of Enoch." But even its disfigured remnants show how closely its text agrees with the Archaic Doctrine, as is shown in the creation of the Seven Creators and seven primitive men. As to Enoch, Thoth or Hermes, Orpheus and Kadmus, these are all generic names, branches and offshoots of the seven primordial sages (incarnated Dhyana Chohans or Devas, in illusive, not mortal bodies) who taught Humanity all it knew, and whose earliest disciples assumed their master's names. This custom passed from the Fourth to the Fifth Race. Hence the sameness of the

traditions about Hermes (of whom Egyptologists count five) Enoch, etc., they are all inventors of letters; none of them dies but still lives, and they are the first Initiators into, and Founders of the Mysteries. The Genesis of Enoch disappeared only very lately among the Kabalists. Guillaume [[Footnote continued on next page]]

[[Vol. 2, Page]] 268 THE SECRET DOCTRINE.

Thought Divine." St. Paul, another Initiate, called our world "the enigmatical mirror of pure truth," and St. Gregory, of Nazianzen, corroborated Hermes by stating that "things visible are but the shadow and delineation of things that we cannot see." It is an eternal combination, and images are repeated from the higher rung of the ladder of being down to the lower. The "Fall of the Angels," and the "War in Heaven" are repeated on every plane, the lower "mirror" disfiguring the image of the superior mirror, and each repeating it in its own way. Thus the Christian dogmas are but the reminiscences of the paradigms of Plato, who spoke of these things cautiously, as every Initiate would. But it is all as expressed in these few sentences of the Desatir:--

"All that is on Earth, saith the Lord (Ormazd), is the shadow of something that is in the superior spheres. This luminous object (light, fire, etc.) is the shadow of that which is still more luminous than itself, and so on till it reaches ME, who am the light of lights."

In the Kabalistic books, and in the Zohar pre-eminently, the idea that everything objective on earth or in this Universe is the Shadow -- Dyooknah -- of the eternal Light or Deity, is very strong.

The Third Race was pre-eminently the bright shadow, at first, of the gods, whom tradition exiles on Earth after the allegorical war in Heaven; which became still more allegorical on Earth, for it was the war between spirit and matter. This war will last till the inner and divine man adjusts his outer terrestrial self to his own spiritual nature. Till then the dark and fierce passions of the former will be at eternal feud with his master, the Divine Man. But the animal will be tamed one day, because its nature will be changed, and harmony will reign once more between the two as before the "Fall," when even mortal man was created by the Elements and was not born.

The above is made clear in all the great theogonies, principally in the Grecian (see Hesiod and Theogony). The mutilation of Uranos by his son Kronos, who thus condemns him to impotency, has never been understood by the modern Mythographers. Yet, it is very plain; and having been universal* (vide foot note infra), it must have contained a great abstract

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Postel saw it. It was most certainly in a great measure a transcript from the books of Hermes, and far anterior to the Books of Moses, as Eliphas Levi tells his readers.

* Uranos is a modified Varuna, "the Universal encompasser," the all-embracer, and one of the oldest of the Vedic deities - SPACE, the maker of Heaven and Earth, since both are manifested out of his (or its) seed. It is only later that Varuna became the chief of the Adityas and a kind of Neptune riding on the Leviathan -- Makara, now the most sacred and mysterious of the signs of the Zodiac. Varuna, "without whom no creature can even wink," was degraded like Uranos, and, like him, he fell into generation, his functions, "the grandest cosmical functions," as Muir calls them, having been lowered down from heaven to earth by exoteric anthropomorphism. As the same [[Footnote continued on next page]]

[[Vol. 2, Page]] 269 THE SYMBOLISM OF KRONOS.

and philosophical idea, now lost to our modern sages. This punishment in the allegory marks, indeed "a new period, a second phase in the development of creation," as justly remarked by Decharme (Mythologie de la Grece Antique, p. 7), who, however, renounces the attempt to explain it. Uranos has tried to oppose an impediment to that development, or natural evolution, by destroying all his children as soon as born. Uranos, who personifies all the creative powers of, and in, Chaos (Space, or the unmanifested Deity) is thus made to pay the penalty; for it is those powers which cause the Pitris to evolve primordial men from themselves -- as, later on, these men evolve their progeny -- without any sense or desire for procreation. The work of generation, suspended during a moment, passes into the hands of Kronos,* time, who unites himself with Rhea (the earth in esotericism -- matter in general), and thus produces, after celestial -- terrestrial Titans. The whole of this symbolism relates to the mysteries of Evolution.

This allegory is the exoteric version of the esoteric doctrine given in this part of our work. For in Kronos we see the same story repeated again. As Uranos destroyed his children from Gaia (one, in the world of manifestation, with Aditi or the Great Cosmic Deep) by confining them in the bosom of the Earth, Tythea, so Kronos at this second stage of creation destroyed his children from Rhea -- by devouring them. This is an allusion to the fruitless efforts of Earth or Nature alone to create real human men. (See our Stanzas III. -- X., et seq., and also Berosus' account of primeval creation.) Time swallows its own fruitless work. Then comes Zeus -- Jupiter, who dethrones his father in his turn.** Jupiter the Titan, is Prometheus, in one sense,*** and varies from Zeus, the Great

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Orientalist says, "The attributes ascribed to Varuna (in the Vedas) impart to his character a moral elevation and sanctity far surpassing that attributed to any other Vedic Deity." But to understand correctly the reason of his fall, like that of Uranos, one has to see in every exoteric religion the imperfect and sinful work of man's fancy, and also to study the mysteries which Varuna is said to have imparted to Vasishta. Only . . . "his secrets and those of Mitra are not to be revealed to the foolish."

* Kronos is not only [[Chronos]], time, but also, as Breal showed in his Hercule et Cacus (p. 57), comes from the root Kar, "to make, to create." Whether Breal and Decharme, who quotes him, are as right in saying that in the Vedas Kronos is a

creative god, we have our doubts. Breal probably meant Karma, or rather Visva-Karma, the creative god, the "Omnificent" and the "great Architect of the world."

** The Titanic struggle, in theogony at least, is the fight for supremacy between the children of Uranos and Gaia (or Heaven and Earth in their abstract sense), the Titans, against the children of Kronos, whose chief is Zeus. It is the everlasting struggle going on to this day between the spiritual inner man and the man of flesh, in one sense.

*** Just as the "Lord God," or Jehovah, is Cain esoterically, and the "tempting serpent" as well, the male portion of the androgynous Eve, before her "Fall;" the female portion of Adam Kadmon; the left side or Binah of the right side Chochmah in the first Sephirothal Triad.

[[Vol. 2, Page]] 270 THE SECRET DOCTRINE.

"Father of the Gods." He is the "disrespectful son" in Hesiod. Hermes calls him the "Heavenly man" (Pymander); and even in the Bible he is found again under the name of Adam, and, later on -- by transmutation -- under that of Ham. Yet these are all personifications of the "sons of Wisdom." The necessary corroboration that Jupiter belongs to the purely human Atlantean cycle -- if Uranus and Kronos who precede him are found insufficient -- may be found in Hesiod, who tells us that the Immortals have made men and created the Golden and the Silver age (First and Second Races); while Jupiter created the generations of Bronze (an admixture of two elements), of Heroes, and the men of the age of Iron. After this he sends his fatal present, by Pandora, to Epimetheus, * which present Hesiod calls "a fatal gift," or the first woman. It was a punishment, he explains, sent to man "for the theft of divine creative fire." Her apparition on earth is the signal of every kind of evil. Before her appearance, the human races lived happy, exempt from sickness and suffering -- as the same races are made to live under Yima's rule, in the Mazdean Vendidad.

Two deluges may also be traced in universal tradition by carefully comparing Hesiod, the Rig Veda, the Zend-Avesta, etc., while no first man is ever mentioned in any of the theogonies save the Bible.** Everywhere the man of our race appears after a cataclysm of water, after which tradition mentions only the several designations of continents and islands which sink under the ocean waves in due time.*** "Gods and mortals have one common origin" says Hesiod (ibid. v. 108); and Pindar echoes the statement (Nem. VI., 1). Deucalion and Pyrrha, who escape the Deluge by constructing an ark like Noah's (see Apollod., 1, 7, 2, and Ovid, Metam. I, 260, 899.), ask Jupiter to re-animate the human race whom he had made to perish under the waters of the Flood. In the Slavonian Mythology (Lithuanian legend, in Grimm, Deutsche Myth. 1, 545), all men were drowned, and two old people, a man and his wife, alone remained. Then Pram-gimas (the "master of all") advised them to jump seven times on the rocks of the earth, and seven new races (couples) were born, from which came the nine Lithuanian tribes. As well understood by the author of the Mythologie de la Grece Antique -- the four ages

[[Footnote(s)]] -----

* In the Egyptian legend, translated by M. Maspero (the ex-director of the Bulaq Museum), called the "two Brothers," the original of Pandora is given. Noum, the famous heavenly artist, creates a marvellous beauty, a girl which he sends to Batoo, after which the happiness of the latter is destroyed. Batoo is man, and the girl Eve, of course. (See Maspero's Egyptian Legends, and also Decharme's "Mythologie de la Grece Antique.")

** Yima is not the "first man" in the Vendidad, but only in the theories of the Orientalists. -- See further on.

*** Boeotia, then ancient Athens, and Eleusis were submerged.

[[Vol. 2, Page]] 271 THE RACES IN GREEK MYTHOLOGY.

signify periods of time, and are also an allegorical allusion to the races. "The successive races, destroyed and replaced by others," he says, "without any period of transition, are characterized in Greece by the name of metals, to express their ever-decreasing value. Gold, the most brilliant and precious of all, symbol of purity qualifies the first race. . . . The men of the second race, those of the age of Silver, are already inferior to the first. Inert and weak creatures, all their life is no better than a long and stupid infancy. . . . They disappear. . . . The men of the age of Bronze are robust and violent (the third race); their strength is extreme. They had arms made of bronze, habitations of bronze; used nought but bronze. Iron, the black metal, was yet unknown" (Op. at D., 143-155). The fourth generation (race) is, with Hesiod, that of the heroes who fell before Thebes (see "The Seven Against Thebes," by AEschylus), or under the walls of Troy.

Thus, the four races being found mentioned by the oldest Greek poets, though very much confused anachronistically, our doctrines are once more corroborated by the classics. But this is all "Mythology" and poetry. What can modern science have to say to such an euhemerization of old fictions? The verdict is not difficult to foresee. Therefore an attempt must be made to answer by anticipation, and prove that fictions and empirical speculations are so much of the domain of that same science, that none of the men of learning have the slightest right, with such a heavy beam in their own eye, to point to the speck in the eye of the Occultist, even if that speck be not a figment of our opponents' imagination.

STANZA X. -- (Continued.)

40. THEN THE THIRD AND FOURTH (races) BECAME TALL WITH PRIDE. WE ARE THE KINGS, WE ARE THE GODS (a).

41. THEY TOOK WIVES FAIR TO LOOK AT. WIVES FROM THE "MINDLESS," THE NARROW-HEADED. THEY BRED MONSTERS, WICKED DEMONS, MALE AND FEMALE. ALSO KHADO (Dakini) WITH LITTLE MINDS (b).

42. THEY BUILT TEMPLES FOR HUMAN BODY. MALE AND FEMALE THEY WORSHIPPED (c). THEN THE THIRD EYE ACTED NO LONGER (d).

(a) Such were the first truly physical men, whose first characteristic was -- pride! It is the Third Race and the gigantic Atlanteans, the

[[Vol. 2, Page]] 272 THE SECRET DOCTRINE.

memory of whom lingered from one generation and race to another generation and race down to the days of Moses, and which found an objective form in those antediluvian giants, those terrible sorcerers and magicians, of whom the Roman Church has preserved such vivid and at the same time distorted legends. One who has read and studied the Commentaries on the archaic doctrine, will easily recognise in some Atlanteans, the prototypes of the Nimrods, the Builders of the Tower of Babel, the Hamites, and all these tutti quanti of "accursed memory," as theological literature expresses it: of those, in short, who have furnished posterity with the orthodox types of Satan. And this leads us naturally to inquire into the religious ethics of these early races, mythical as these may be.

What was the religion of the Third and Fourth Races? In the common acceptation of the term, neither the Lemurians, nor yet their progeny, the Lemuro-Atlanteans, had any, as they knew no dogma, nor had they to believe on faith. No sooner had the mental eye of man been opened to understanding, than the Third Race felt itself one with the ever-present as the ever to be unknown and invisible ALL, the One Universal Deity. Endowed with divine powers, and feeling in himself his inner God, each felt he was a Man-God in his nature, though an animal in his physical Self. The struggle between the two began from the very day they tasted of the fruit of the Tree of Wisdom; a struggle for life between the spiritual and the psychic, the psychic and the physical. Those who conquered the lower principles by obtaining mastery over the body, joined the "Sons of Light." Those who fell victims to their lower natures, became the slaves of Matter. From "Sons of Light and Wisdom" they ended by becoming the "Sons of Darkness." They had fallen in the battle of mortal life with Life immortal, and all those so fallen became the seed of the future generations of Atlanteans.*

At the dawn of his consciousness, the man of the Third Root Race had thus no beliefs that could be called religion. That is to say, he was equally as ignorant of "gay religions, full of pomp and gold" as of any system of faith or outward worship. But if the term is to be defined as the binding together of the masses in one form of reverence paid to those we feel higher than ourselves, of piety -- as a feeling expressed by a child toward a loved parent -- then even the earliest Lemurians had a religion -- and a most beautiful one -- from the very beginning of their intellectual life. Had they not their bright gods of the elements around

[[Footnote(s)]] -----

* The name is used here in the sense of, and as a synonym of "sorcerers." The Atlantean races were many, and lasted in their evolution for millions of years: all were not bad. They became so toward their end, as we (the fifth) are fast becoming now.

[[Vol. 2, Page]] 273 THE GOLDEN AGE.

them, and even within themselves?* Was not their childhood passed with, nursed and tendered by those who had given them life and called them forth to intelligent, conscious life? We are assured it was so, and we believe it. For the evolution of Spirit into matter could never have been achieved; nor would it have received its first impulse, had not the bright Spirits sacrificed their own respective super-ethereal essences to animate the man of clay, by endowing each of his inner principles with a portion, or rather, a reflection of that essence. The Dhyanis of the Seven Heavens (the seven planes of Being) are the NOUMENOI of the actual and the future Elements, just as the Angels of the Seven Powers of nature - the grosser effects of which are perceived by us in what Science is pleased to call the "modes of motion" -- the imponderable forces and what not -- are the still higher noumenoi of still higher Hierarchies.

It was the "Golden Age" in those days of old, the age when the "gods walked the earth, and mixed freely with the mortals." Since then, the gods departed (i.e., became invisible), and later generations ended by worshipping their kingdoms -- the Elements.

It was the Atlanteans, the first progeny of semi-divine man after his separation into sexes -- hence the first-begotten and humanly-born mortals -- who became the first "Sacrificers" to the god of matter. They stand in the far-away dim past, in ages more than prehistoric, as the prototype on which the great symbol of Cain was built,** as the first anthropomorphists who worshipped form and matter. That worship degenerated very soon into self-worship, thence led to phallicism, or that which reigns supreme to this day in the symbolisms of every exoteric religion of ritual, dogma, and form. Adam and Eve became matter, or furnished the soil, Cain and Abel -- the latter the life-bearing soil, the former "the tiller of that ground or field."

Thus the first Atlantean races, born on the Lemurian Continent, separated from their earliest tribes into the righteous and the unrighteous; into those who worshipped the one unseen Spirit of Nature, the ray of which man feels within himself -- or the Pantheists, and those who offered fanatical worship to the Spirits of the Earth, the dark Cosmic, anthropomorphic Powers, with whom they made alliance. These were the earliest Gibborim, "the mighty men of renown in those

[[Footnote(s)]] -----

* The "Gods of the Elements" are by no means the Elementals. The latter are at best used by them as vehicles and materials in which to clothe themselves. . . .

** Cain was the sacrificer, as shown at first in chap. iv. of Genesis, of "the fruit of the ground," of which he was first tiller, while Abel "brought of the firstlings of his flock" to the Lord. Cain is the symbol of the first male, Abel of the first female humanity, Adam and Eve being the types of the third race. (See "The Mystery of Cain and Abel.") The "murdering" is blood-shedding, but not taking life.

days" (Gen. vi.); who become with the Fifth Race the Kabirim: Kabiri with the Egyptians and the Phoenicians, Titans with the Greeks, and Rakshasas and Daityas with the Indian races.

Such was the secret and mysterious origin of all the subsequent and modern religions, especially of the worship of the later Hebrews for their tribal god. At the same time this sexual religion was closely allied to, based upon and blended, so to say, with astronomical phenomena. The Lemurians gravitated toward the North Pole, or the Heaven of their Progenitors (the Hyperborean Continent); the Atlanteans, toward the Southern Pole, the pit, cosmically and terrestrially -- whence breathe the hot passions blown into hurricanes by the cosmic Elementals, whose abode it is. The two poles were denominated, by the ancients, Dragons and Serpents -- hence good and bad Dragons and Serpents, and also the names given to the "Sons of God" (Sons of Spirit and Matter): the good and bad Magicians. This is the origin of this dual and triple nature in man. The legend of the "Fallen Angels" in its esoteric signification, contains the key to the manifold contradictions of human character; it points to the secret of man's self-consciousness; it is the angle-iron on which hinges his entire life-cycle; -- the history of his evolution and growth.

On a firm grasp of this doctrine depends the correct understanding of esoteric anthropogenesis. It gives a clue to the vexed question of the Origin of Evil; and shows how man himself is the separator of the ONE into various contrasted aspects.

The reader, therefore, will not be surprised if so considerable space is devoted in each case to an attempt to elucidate this difficult and obscure subject. A good deal must necessarily be said on its symbolical aspect; because, by so doing, hints are given to the thoughtful student for his own investigations, and more light can thus be suggested than it is possible to convey in the technical phrases of a more formal, philosophical exposition. The "Fallen Angels," so-called, are Humanity itself. The Demon of Pride, Lust, Rebellion, and Hatred, has never had any being before the appearance of physical conscious man. It is man who has begotten, nurtured, and allowed the fiend to develop in his heart; he, again, who has contaminated the indwelling god in himself, by linking the pure spirit with the impure demon of matter. And, if the Kabalistic saying, "Demon est Deus inversus" finds its metaphysical and theoretical corroboration in dual manifested nature, its practical application is found in Mankind alone.

Thus it has now become self-evident that postulating as we do (a) the appearance of man before that of other mammalia, and even before the ages of the huge reptiles; (b) periodical deluges and glacial periods owing to the karmic disturbance of the axis; and chiefly (c) the birth of man

from a Superior Being, or what materialism would call a supernatural Being, though it is only super-human -- it is evident that our teachings have very few chances of an impartial hearing. Add to it the claim that a portion of the Mankind in the Third Race -- all those Monads of men who had reached the highest point of Merit and Karma in the preceding Manvantara -- owed their psychic and rational natures to divine Beings hypostasizing into their fifth principles, and the Secret Doctrine must lose caste in the eyes of not only Materialism but even of dogmatic Christianity. For, no sooner will the latter have learned that those angels are identical with their "Fallen" Spirits, than the esoteric tenet will be proclaimed most terribly heretical and pernicious.* The divine man dwelt in the animal, and, therefore, when the physiological separation took place in the natural course of evolution -- when also "all the animal creation was untied," and males were attracted to females -- that race fell: not because they had eaten of the fruit of Knowledge and knew good from evil, but because they knew no better. Propelled by the sexless creative instinct, the early sub-races had evolved an intermediate race in which, as hinted in the Stanzas, the higher Dhyana-Chohans had incarnated.** "When we have ascertained the extent of the Universe and learnt to know all that there is in it, we will multiply our race," answer the Sons of Will and Yoga to their brethren of the same race, who invite them to do as they do. This means that the great Adepts and Initiated ascetics will "multiply," i. e., once more produce Mind-born immaculate Sons -- in the Seventh Root-Race.

It is so stated in the Puranas; in *Adi Parvan* (p. 115) and *Brahma Purana*, etc. In one portion of the *Pushkara Mahatmya*, moreover, the separation of the sexes is allegorized by Daksha, who, seeing that his will-born progeny (the "Sons of passive Yoga"), will not create men, "converts half himself into a female by whom he begets daughters," the future females of the Third Race which begat the giants of Atlantis,

[[Footnote(s)]] -----

* It is, perhaps, with an eye to this degradation of the highest and purest Spirits, who broke through the intermediate planes of lower consciousness (the "Seven circles of fire" of *Pymander*), that St. James is made to say that "this Wisdom (psuche in the original) descended not from above, but is earthly, sensual, devilish"; and Psuche is Manas, the "human soul," the Spiritual Wisdom or Soul being Buddhi. Yet Buddhi per se, being so near the Absolute, is only latent consciousness.

** This is the "undying race" as it is called in Esotericism, and exoterically the fruitless generation of the first progeny of Daksha, who curses Narada, the divine Rishi, alleged to have dissuaded the Haryaswas and the Sabalaswas, the sons of Daksha, from procreating their species, by saying "Be born in the womb; there shall not be a resting place for thee in all these regions"; after this Narada, the representative of that race of fruitless ascetics, is said, as soon as he dies in one body, to be reborn in another.

the Fourth Race, so called. In the *Vishnu Purana* it is simply said that Daksha, the father of mankind, established sexual intercourse as the means of peopling the world.

Happily for the human race the "Elect Race" had already become the vehicle of incarnation of the (intellectually and spiritually) highest Dhyanis before Humanity had become quite material. When the last sub-races -- save some lowest -- of the Third Race had perished with the great Lemurian Continent, "the seeds of the Trinity of Wisdom" had already acquired the secret of immortality on Earth, that gift which allows the same great personality to step ad libitum from one worn-out body into another.

(b) The first war that earth knew, the first human gore shed, was the result of man's eyes and senses being opened; which made him see that the daughters of his Brethren were fairer than his own, and their wives also. There were rapes committed before that of the Sabines, and Menelaus robbed of their Helens before the Fifth Race was born. Titans or giants were the stronger; their adversaries, the wiser. This took place during the Fourth Race -- that of the giants.

For "there were giants" in the days of old, indeed* and the evolutionary series of the animal world is a warrant that the same thing took place within the human races. Lower still in the order of creation we find witnesses for the same in the flora going pari passu with the fauna in respect of size. The pretty ferns we collect and dry among the leaves of our favourite volumes are the descendants of the gigantic ferns which grew during the carboniferous period.

Scriptures, and fragments of philosophical and scientific works -- in short, almost every record that has come down to us from antiquity -- contain references to giants. No one can fail to recognize the Atlanteans of the Secret Doctrine in the Rakshasas of Lanka -- the opponents conquered by Rama. Are these accounts no better than the production of empty fancy? Let us give the subject a few moments of attention.

[[Footnote(s)]] -----

* The traditions of every country and nation point to this fact. Donnelly quotes from Father Duran's *Historia Antigua de la Nueva Espana* of 1885, in which a native of Cholula, a centenarian, accounts for the building of the great pyramid of Cholula, by saying as follows: "In the beginning, before the light of the Sun had been created, this land (Cholula) was in obscurity and darkness . . . but immediately after the light of the Sun arose in the East, there appeared gigantic men . . . who built the said pyramid, its builders being scattered after that to all parts of the Earth."

"A great deal of the Central American history is taken up with the doings of an ancient race of giants called Quinanes," says the author of "Atlantis" (p. 204.)

[[Vol. 2, Page]] 277 THE GIANTS.

ARE GIANTS A FICTION?

Here, again, we come into collision with Science. The latter denies, so far, that man has ever been much larger than the average of the tall and powerful men one meets with occasionally now. Dr. Henry Gregor denounces such traditions as resting upon ill-digested facts. Instances of mistaken judgments are brought forward. Thus, in 1613, in a locality called from time immemorial the "Field of Giants" in the Lower Dauphine (France, four miles from St. Romans) enormous bones were found deeply buried in the sandy soil. They were attributed to human remains, and even to Teutobochus, the Teuton chief slain by Marius. But Cuvier's later research proved them to be the fossil remains of the *Dinotherium giganteum* of the family of tapirs, 18 feet long. Ancient buildings are pointed to as an evidence that our earliest ancestors were not much larger than we are, the entrance doors being of no larger size than they are now. The tallest man of antiquity known to us was the Roman Emperor Maximus, we are told, whose height was only seven and a half feet. Nevertheless, in our modern day we see every year men taller than this. The Hungarian who exhibited himself in the London Pavilion was nearly 9 feet high. In America a giant was shown 9 1/2 feet tall; the Montenegrin Danilo was 8 feet 7 inches. In Russia and Germany one often sees men in the lower classes above 7 feet. And as the ape-theorists are told by Mr. Darwin that the species of animals which result from cross breeding "always betray a tendency to revert to the original type," they ought to apply the same law to men. Had there been no giants as a rule in ancient days, there would be none now.

All this applies only to the historic period. And if the skeletons of the prehistoric ages have failed so far (which is positively denied) to prove undeniably in the opinion of science the claim here advanced, it is but a question of time. Moreover, as already stated, human stature is little changed since the last racial cycle. The Giants of old are all buried under the Oceans, and hundreds of thousands of years of constant friction by water would reduce to dust and pulverize a brazen, far more a human skeleton. But whence the testimony of well-known classical writers, of philosophers and men who, otherwise, never had the reputation for lying? Let us bear in mind, furthermore, that before the year 1847, when Boucher de Perthes forced it upon the attention of Science, almost nothing was known of fossil man, for archaeology complacently ignored his existence. Of Giants who were "in the earth in those days" of old, the Bible alone had spoken to the wise men of the West, the Zodiac being the solitary witness called upon to corroborate the statement in the persons of Atlas or Orion, whose mighty shoulders are said to support the world.

[[Vol. 2, Page]] 278 THE SECRET DOCTRINE.

Nevertheless, even the "Giants" have not been left without their witnesses, and one may as well examine both sides of the question. The three Sciences -- Geological, Sidereal and Scriptural (the latter in its Universal character) -- may furnish us with the needed proofs. To begin with geology; it has already confessed that the older the excavated skeletons, the larger, taller and the more powerful their structure. This is already a certain proof in hand. "All those bones" writes Frederic de Rougemont -- who, though believing too piously in Noah's ark and the Bible, is none the less a Scientific witness -- "all those skeletons found in the Departments of the Gard, in Austria, Liege, etc., etc. . . those skulls which remind all of the negro type. . . and which by reason of that type might be mistaken for animals, have all belonged to men of very high stature" . . . ("Histoire de la Terre," p. 154) The same is repeated by Lartet, an authority, who attributes a tall

stature to those who were submerged in the deluge (not necessarily "Noah's") and a smaller stature to the races which lived subsequently.

As for the evidence furnished by ancient writers, we need not stop at that of Tertullian, who assures us that in his day a number of giants were found at Carthage -- for, before his testimony can be accepted, his own identity* and actual existence would have to be proven. But we may turn to the scientific journals of 1858, which spoke of a sarcophagus of giants found that year on the site of that same city. As to the ancient pagan writers -- we have the evidence of Philostratus, who speaks of a giant skeleton twenty-two cubits long, as well as of another of twelve cubits, seen by himself at Sigeus. This skeleton may perhaps not have belonged, as believed by Protesilaus, to the giant killed by Apollo at the siege of Troy; nevertheless, it was that of a giant, as well as that other one discovered by Messecrates of Stire, at Lemnos -- "horrible to behold," according to Philostratus (Heroica, p. 35). Is it possible that prejudice would carry Science so far as to class all these men as either fools or liars?

Pliny speaks of a giant in whom he thought he recognised Orion, the son of Ephialtes (Nat. Hist., vol. VII, ch. xvi.). Plutarch declares that Sertorius saw the tomb of Antaeus, the giant; and Pausanias vouches for the actual existence of the tombs of Asterius and of Geryon, or Hillus, son of Hercules -- all giants, Titans and mighty men. Finally the Abbe Pegues (cited in de Mirville's Pneumatologie) affirms in his curious work on "The Volcanoes of Greece" that "in the neighbourhood of the volcanoes of the isle of Thera, giants with enormous skulls were found laid out under colossal stones, the erection of which must have necessi-

[[Footnote(s)]] -----

* There are critics who, finding no evidence about the existence of Tertullian save in the writings of Eusebius "the veracious," are inclined to doubt it.

[[Vol. 2, Page]] 279 CHRISTENDOM IS IDOLATROUS.

tated everywhere the use of titanic powers, and which tradition associates in all countries with the ideas about giants, volcanoes and magic." (Page 48.)

In the same work above cited of the Abbe Pegues, the author wonders why in Bible and tradition the Gibborim, (Giants, the mighty ones) the Rephaim, or the spectres (Phantoms), the Nephilim, or the fallen ones -- (irruentes) -- are shown "as if identical, though they are all men, since the Bible calls them the primitive and the mighty ones" -- e.g., Nimrod. The "Doctrine" explains the secret. These names, which belong by right only to the four preceding races and the earliest beginning of the Fifth, allude very clearly to the first two Phantom (astral) races; to the fallen one -- the Third; and to the race of the Atlantean Giants -- the Fourth, after which "men began to decrease in stature."

Bossuet (Elevations p. 56) sees the cause of subsequent universal idolatry in the "original sin." "Ye shall be as gods," says the serpent of Genesis to Eve, thus laying the first germ of the worship of false divinities. Hence, he thinks, came idolatry, or the cult and adoration of images, of anthropomorphized or human figures. But, if it is the latter that idolatry is made to rest upon, then the two Churches, the Greek and the Latin especially, are as idolatrous and pagan as any other religion.* It is only in the Fourth Race that men, who had lost all right to be considered divine, resorted to body worship, in other words to phallicism. Till then, they had been truly gods, as pure and as divine as their progenitors, and the expression of the allegorical serpent does not, as sufficiently shown in the preceding pages, refer at all to the physiological fall of men, but to their acquiring the knowledge of good and evil, which knowledge comes to them prior to their fall. It must not be forgotten that it is only after his forced expulsion from Eden that "Adam knew Eve his wife" (Genesis iv.). It is not, however, by the dead-letter of the Hebrew Bible that we shall check the tenets of the Secret Doctrine; but point out, rather, the great similarities between the two in their esoteric meaning.

It is only after his defection from the Neo-Platonists, that Clement

[[Footnote(s)]] -----

* And that, notwithstanding the formal prohibition at the great Church Council of Elyrus in A.D. 303, when it was declared that "the form of God, which is immaterial and invisible, shall not be limited by figure or shape." In 692, the council of Constantinople had similarly prohibited "to paint or represent Jesus as a lamb," as also "to bow the knee in praying, as it is the act of idolatry." But the council of Nicaea (787) brought this idolatry back, while that of Rome (883) excommunicated John, the Patriarch of Constantinople, for his showing himself a declared enemy of image worship.

[[Vol. 2, Page]] 280 THE SECRET DOCTRINE.

of Alexandria began to translate gigantes by serpentes, explaining that "Serpents and Giants signify Demons." (Genesis, chapter v.)*

We may be told that, before we draw parallels between our tenets and those of the Bible, we have to show better evidence of the existence of the giants of the Fourth Race than the reference to them found in Genesis. We answer, that the proofs we give are more satisfactory, at any rate they belong to a more literary and scientific evidence, than those of Noah's Deluge will ever be. Even the historical works of China are full of such reminiscences about the Fourth Race. In Shoo-King (4th part, chap. XXVII, p. 291), anyone can read in the French translation, "When the Mao-tse" ("that antediluvian and perverted race," explains the Annotator, "which had retired in the days of old to the rocky caves, and the descendants of whom are said to be still found in the neighbourhood of Canton"),**

[[Footnote(s)]] -----

* Treating of the Chinese Dragon and the literature of China, Mr. Ch. Gould writes in his "Mythical Monsters" on p. 212:-- "Its mythologies, histories, religions, popular stories and proverbs, all teem with references to a mysterious being who has

a physical nature and spiritual attributes. Gifted with an accepted form, which he has the supernatural power of casting off for the assumption of others, he has the power of influencing the weather, producing droughts or fertilizing rains at pleasure, of raising tempests and allaying them. Volumes could be compiled from the scattered legends which everywhere abound relating to this subject. . . . "

This "mysterious being" is the mythical Dragon, i.e., the symbol of the historical, actual Adept, the master and professor of occult sciences of old. It is stated already elsewhere, that the great "magicians" of the Fourth and Fifth Races were generally called the "Serpents" and the "Dragons" after their progenitors. All these belonged to the hierarchy of the so-called "Fiery Dragons of Wisdom," the Dhyana Chohans, answering to the Agnishwatta Pitris, the Maruts and Rudras generally, as the issue of Rudra their father, identified with the god of fire. More is said in the text. Now Clement, an initiated Neo-Platonist, knew, of course, the origin of the word "Dragon," and why the initiated Adepts were so-called, as he knew the secret of Agathodaemon, the Christ, the seven-vowelled Serpent of the Gnostics. He knew that the dogma of his new faith required the transformation of all the rivals of Jehovah, the angels supposed to have rebelled against that Elohim as the Titan-Prometheus rebelled against Zeus, the usurper of his father's kingdom; and that "Dragon" was the mystic appellation of the "Sons of Wisdom"; from this knowledge came his definition, as cruel as it was arbitrary, "Serpents and Giants signify Demons," i.e., not "Spirits," but Devils, in Church parlance.

** "What would you say to our affirmation that the Chinese -- I speak of the inland, the true Chinaman, not of the hybrid mixture between the Fourth and Fifth Races now occupying the throne, the aborigines who belong in their unallied nationality wholly to the highest and last branch of the Fourth Race -- reached their highest civilization when the Fifth had hardly appeared in Asia" (Esoteric Buddhism, p. 67). And this handful of the inland Chinese are all of a very high stature. Could the most ancient MSS. in the Lolo language (that of the aborigines of China) be got at and translated correctly, many a priceless piece of evidence would be found. But they are as rare as their language is unintelligible. So far, one or two European archaeologists only have been able to procure such priceless works.

[[Vol. 2, Page]] 281 THE SEVEN VIRGIN-YOUTHS.

"according to our ancient documents, had, owing to the beguilements of Tchy-Yeoo, troubled all the earth, it became full of brigands. . . ." The Lord Chang-ty (a king of the divine dynasty) saw that his people had lost the last vestiges of virtue. Then he commanded Tehong and Lhy (two lower Dhyana Chohans) to cut away every communication between heaven and earth. Since then, there was no more going up and down!"**

"Going up and down" means an untrammelled communication and intercourse between the two worlds. Not being in a position to give out a full and detailed history of the Third and Fourth Races, as many isolated facts concerning them as are permitted must be now collated together; especially those corroborated by direct as well as by inferential evidence found in ancient literature and history. As the "coats of skin" of men thickened, and they fell more and more into physical sin, the intercourse between physical and ethereal divine man was stopped. The veil of matter between the two planes became too dense for even the inner man to penetrate. The mysteries of Heaven and Earth, revealed to the Third Race by their celestial teachers in the days of their purity, became a great focus of light, the rays from which became necessarily weakened as they were diffused and shed upon an uncongenial, because too material soil. With the masses they degenerated into Sorcery, taking later on the shape of exoteric religions, of idolatry full of superstitions, and man-, or hero-worship. Alone a handful of primitive men -- in whom the spark of divine Wisdom burnt bright, and only strengthened in its intensity as it got dimmer and dimmer with every age in those who turned it to bad purposes -- remained the elect custodians of the Mysteries revealed to mankind by the divine Teachers. There were those among them, who remained in their Kumarc condition from the beginning; and tradition whispers, what the secret teachings affirm, namely, that these Elect were the germ of a Hierarchy which never died since that period:--

"The inner man of the first * * * only changes his body from time to time; he is ever the same, knowing neither rest nor Nirvana, spurning Devachan and remaining constantly on Earth for the salvation of mankind. . . ." "Out of the seven virgin-men (Kumara**) four sacrificed themselves for the sins of the world and the instruction of

[[Footnote(s)]] -----

* Remember the same statement in the Book of Enoch, as also the ladder seen by Jacob in his dream. The "two worlds" mean of course the "two planes of Consciousness and Being." A seer can commune with beings of a higher plane than the earth, without quitting his arm-chair.

** Vide supra the Commentary on the Four Races -- and on the "Sons of Will and Yoga," the immaculate progeny of the Androgynous Third Race.

[[Vol. 2, Page]] 282 THE SECRET DOCTRINE.

the ignorant, to remain till the end of the present Manvantara. Though unseen, they are ever present. When people say of one of them, "He is dead"; behold, he is alive and under another form. These are the Head, the Heart, the Soul, and the Seed of undying knowledge (Gnyana). Thou shalt never speak, O Lanoo, of these great ones (Maha . . .) before a multitude, mentioning them by their names. The wise alone will understand." . . . * (Catechism of the inner Schools.)

It is these sacred "Four" who have been allegorized and symbolized in the "Linga Purana," which states that Vamadeva (Siva) as Kumara is reborn in each Kalpa (Race in this instance), as four youths -- four, white; four, red; four, yellow; and four, dark or brown. Let us remember that Siva is pre-eminently and chiefly an ascetic, the patron of all Yogis and Adepts, and the allegory will become quite comprehensible. It is the spirit of Divine Wisdom and chaste asceticism itself which incarnates in these Elect. It is only after getting married and being dragged by the gods from his terrible ascetic life, that Rudra becomes Siva, a god, and not one of a very virtuous or merciful type, in the Hindu Pantheon. Higher than the "Four" is only ONE on Earth as in Heavens -- that still more mysterious and solitary Being described in Book I.

We have now to examine the nature of the "Sons of the Flame" and of "Dark Wisdom," as well as the pros and cons of the Satanic assumption.

Such broken sentences as could be made out from the fragments on the tile, which George Smith calls "the Curse after the Fall" (see p. 81 of his "Chaldean Account of Genesis"), are of course allegorical; yet they corroborate that which is taught of the true nature of the fall of the angels in our Books. Thus, it is said in line 12 that the "Lord of the earth his name called out, the father Elu" (Elohim), and pronounced his curse, which "The God Hea heard, and his liver was angry, because his man (Angelic man) had corrupted his purity (14 and 15)," for which Hea expresses the desire that "Wisdom and knowledge' hostilely may they injure him (man)."

The latter sentence points to the direct connection of the Chaldean with the Genetic account. While Hea tries to bring to nought the wisdom and knowledge gained by man, through his newly-acquired intellectual and conscious capacity of creating in his turn (thus taking the monopoly of creation out of the hands of God (the Gods)), the Elohim do the same in the third chapter of Genesis. Therefore the Elohim sent him out of Eden.

But this was of no avail. For the spirit of divine Wisdom being

[[Footnote(s)]] -----

* In the Kabala the pronunciation of the four-lettered ineffable name is "a most secret arcanum" --- "a secret of secrets."

[[Vol. 2, Page]] 283 THE SERPENT OF ETERNITY.

upon and in man -- verily the Serpent of Eternity and all Knowledge, that Manasic spirit, which made him learn the secret of creation on the Kriyasaktic, and of procreation on the earthly planes -- led him as naturally to discover his way to immortality, notwithstanding the jealousy of all the Gods.

The early Atlanto-Lemurians are charged with taking unto themselves (divine incarnations) wives of a lower race, namely, the race of the hitherto mindless men. Every ancient Scripture has the same, more or less disfigured legend. Primarily, the angelic Fall, which has transformed the "first-born" of God into the Asuras, or into the Ahriman and Typhon of the "pagans" (i.e., if the accounts given in the Book of Enoch,* and in Hermes, in Puranas and Bible are taken literally), when read esoterically means simply this:--

Sentences such as: "In his (Satan's) ambition he raises his hand against the Sanctuary of the God of Heaven" etc., ought to read: "Prompted by the law of eternal evolution and Karma, the angel incarnated on earth in man; and as his Wisdom and Knowledge are still divine, although his body is earthly, he is (allegorically) accused of divulging the mysteries of Heaven." He combines and uses the two for purposes of human, instead of super-human, procreation. Henceforth, "man will beget, not create."** But as, by so doing, he has to use

[[Footnote(s)]] -----

* Returning once more to the most important subject in the archaic Cosmogony, it may be said that even in the Norse legends, in the Sacred Scrolls of the goddess Saga, we find Loki, the brother by blood of Odin (as Typhon, Ahriman, and others are brothers of Osiris and Ormazd), becoming evil only later, when he has mixed too long with humanity. Like all other fire or light gods -- fire burning and destroying as well as warming and giving life -- he ended by being accepted in the destructive sense of "fire." The name Loki, we learn ("Asgard and the Gods," p. 250), has been derived from the old word "liechan," to enlighten. It has, therefore, the same origin as the Latin "lux, light." Hence Loki is identical with Lucifer (light-bringer). This title, given to the Prince of Darkness, is very suggestive and is a vindication in itself against theological slander. But Loki is still more closely related to Prometheus, as he is shown chained to a sharp rock, while Lucifer, identified with Satan, was chained down in hell; a circumstance, however, which prevented neither of them from acting in all freedom on Earth, if we accept the theological paradox in its fulness. Loki is a beneficent, generous and powerful god in the beginning of times, and the principle of good, not of evil, in early Scandinavian theogony.

** The Greek mythos just alluded to a few pages back, namely the mutilation of Uranos by his son Kronos in the Greek theogony, is an allusion to this theft by the Son of the Earth and Heavens of the divine creative fire. If Uranos, the personification of the celestial Powers, has to stop creating (he is made impotent by Kronos, the god in time) so, in the Egyptian Cosmogony it is Thot, the god of Wisdom, who regulates this fight between Horus and Set, the latter being served by the former as Uranos is by Kronos (see "Book of the Dead" ch. XVII. V. 26). In the Babylonian account it is the god Zu, who strips "the father of the gods" of umsimi -- the ideal creative organ not the crown (!) as G. Smith thought (see pp. 115 and 116 Chaldean Account). For, in the fragment K. 3454 (British Museum) it is said very clearly, that Zu having stripped the "venerable" [[Footnote continued on next page]]

[[Vol. 2, Page]] 284 THE SECRET DOCTRINE.

his weak body as the means of procreation, that body will pay the penalty for this wisdom, carried from heaven down to the earth; hence the corruption of physical purity will become a temporary curse.

The mediaeval Kabalists knew this well, since one of them did not fear to write: "The Kabala was first taught by God himself to a select Company of Angels who formed a theosophic school in Paradise. After the FALL the Angels most graciously communicated this heavenly doctrine to the disobedient child of Earth, to furnish the protoplasts with the means of returning to their pristine nobility and felicity" (Quoted by Christian Ginsburg from the Kabala). This shows how the event -- of the Sons of God, marrying and imparting the divine Secrets of Heaven to the daughters of men -- allegorically told by Enoch and in the sixth chapter of Genesis was interpreted by the Christian Kabalists. The whole of this period may be regarded as the pre-human period, that of divine man, or as plastic Protestant theology now has it -- the pre-adamite period. But even Genesis begins its real history (chap. vi.) by the giants of "those days" and the "Sons of god" marrying and teaching their wives -- the daughters of man.

This period is the one described in the Puranas; and relating as it does to days lost in archaic ages, hence pre-historic, how can any anthropologist feel certain whether the mankind of that period was or was not as he knows it now? The whole personnel of the Brahmanas and Puranas -- the Rishis, Prajapatis, Manus, their wives and progeny -- belong to that pre-human period. All these are the Seed of Humanity, so to speak. It is around these "Sons of God," the "Mind born" astral children of Brahma, that our physical frames have grown and developed to what they are now. For, the Puranic histories of all those men are those of our Monads, in their various and numberless incarnations on this and other spheres, events perceived by the "Siva eye" of the ancient Seers, (the "third eye" of our Stanzas) and described allegorically. Later on, they were disfigured for Sectarian purposes; mutilated, but still left with a considerable ground-work of truth in them. Nor is the philosophy less profound in such allegories for being so thickly veiled by the overgrowth of fancy.

But with the Fourth Race we reach the purely human period. Those who were hitherto semi-divine Beings, self-imprisoned in bodies which were human only in appearance, became physiologically changed and took unto themselves wives who were entirely human and fair to look

[[Footnote(s)]] -----

[[Footnote continued from previous page]] of Heaven" of his desire, he carried away the umsimi of the gods, and burnt thereby the teroti (the power) of all the other gods, thus "governing the seed of all the angels" (15). As the umsimi was on the seat of Bel, it could hardly be the "crown." A fourth version is in the Bible. Ham is the Chaldean Zu, and both are cursed for the same allegorically described crime.

[[Vol. 2, Page]] 285 THE TIBETAN LILITH.

at, but in whom lower, more material, though sidereal, beings had incarnated. These beings in female forms (Lilith is the prototype of these in the Jewish traditions) are called in the esoteric accounts "Khado" (Dakini, in Sanskrit). Allegorical legends call the chief of these Liliths, Sangye Khado, (Buddha Dakini, in Sanskrit); all are credited with the art of "walking in the air," and the greatest kindness to mortals; but no mind -- only animal instinct.*

(c) This is the beginning of a worship which, ages later, was doomed to degenerate into phallicism and sexual worship. It began by the worship of the human body -- that "miracle of miracles," as an English author calls it -- and ended by that of its respective sexes. The worshippers were giants in stature; but they were giants in knowledge and learning, though it came to them more easily than it does to the men of our modern times. Their Science was innate in them. The Lemuro-Atlantean had no need of discovering and fixing in his memory that which his informing PRINCIPLE knew at the moment of its incarnation. Time alone, and the ever-growing obtuseness of the matter in which the Principles had clothed themselves, could, the one, weaken the memory of their pre-natal knowledge, the other, blunt and even extinguish every spark of the spiritual and divine in them. Therefore had they, from the first, fallen victims to their animal natures and bred "monsters" -- i.e., men of distinct varieties from themselves.

Speaking of the Giants, Creuzer describes them well in saying that:--

"Those children of Heaven and Earth were endowed at their birth by the Sovereign Powers, the authors of their being, with extraordinary faculties both moral and physical. They commanded the Elements, knew the secrets of heaven and the earth, of the sea and the whole world, and read futurity in the stars. . . . It seems, indeed, as though one has to deal, when reading of them, not with men as we are but with Spirits of the Elements sprung from the bosom of Nature and having full sway over her. . . . All these beings are marked with a character of MAGIC and SORCERY. . . ."

And so they were, those (now) legendary heroes of the pre-historic, still, once really existing races. Creuzer was wise in his generation, for he did not charge with deliberate deceit, or dullness and superstition, an endless series of recognized philosophers, who mention these races and assert that, even in their own time, they saw their fossils. There were sceptics in days of old -- no fewer and as great as they are now. But even a Lucian, a Democritus and an Epicurus yielded to the evidence of facts and showed the discriminative capacity of really

[[Footnote(s)]] -----

* These are the beings whose legendary existence has served as a ground-work upon which to build the rabbinical Lilith, and what the believers in the Bible would term the antediluvian women, and the Kabalists the pre-Adamite races. They are no fiction -- this is certain, however fantastic the exuberance of later growth.

[[Vol. 2, Page]] 286 THE SECRET DOCTRINE.

great intellects, which can distinguish fiction from fact, and truth from exaggeration and fraud. Ancient writers were no more fools than our modern wise men are; for, as well remarked by the author of some "Notes on Aristotle's Psychology in Relation to Modern Thought" (in Mind):--

"The common division of history into ancient and modern is . . . misleading. The Greeks in the 4th century, B.C. were in many respects moderns especially, we may add, in their scepticism. They were not very likely to accept fables so easily"

Yet the "Lemurians" and the Atlanteans, "those children of Heaven and Earth," were indeed marked with a character of SORCERY; for the Esoteric doctrine charges them precisely with that, which, if believed, would put an end to the difficulties of science with regard to the origin of man, or rather, his anatomical similarities to the Anthropoid Ape. It accuses them of having committed the (to us) abominable crime of breeding with so-called "animals," and thus producing a truly pithecoïd species, now extinct. Of course, as in the question of spontaneous generation -- in which Esoteric Science believes, and which it teaches -- the possibility of such a cross-breed between man and an animal of any kind will be denied. But apart from the consideration that in those early days, as already remarked, neither the human Atlantean giants, nor yet the "animals," were the physiologically perfect men and mammalians that are now known to us,

the modern notions upon this subject -- those of the physiologists included -- are too uncertain and fluctuating to permit them an absolute denial a priori of such a fact.

A careful perusal of the Commentaries would make one think that the Being that the new "incarnate" bred with, was called an "animal," not because he was no human being, but rather because he was so dissimilar physically and mentally to the more perfect races, which had developed physiologically at an earlier period. Remember Stanza VII. and what is said in its first verse (24th):-- that when the "Sons of Wisdom" came to incarnate the first time, some of them incarnated fully, others projected into the forms only a spark, while some of the shadows were left over from being filled and perfected, till the Fourth Race. Those races, then, which "remained destitute of knowledge," or those again which were left "mindless," remained as they were, even after the natural separation of the sexes. It is these who committed the first cross-breeding, so to speak, and bred monsters; and it is from the descendants of these that the Atlanteans chose their wives. Adam and Eve were supposed, with Cain and Abel, to be the only human family on Earth. Yet we see Cain going to the land of Nod and taking there a wife. Evidently one race only was supposed perfect enough to be called human; and, even in our own day, while the Singhalese

[[Vol. 2, Page]] 287 THE RACES OF MEN NOT ALL HUMAN.

regard the Veddhas of their jungles as speaking animals and no more, some British people believe firmly, in their arrogance, that every other human family -- especially the dark Indians -- is an inferior race. Moreover there are naturalists who have sincerely considered the problem whether some savage tribes -- like the Bushmen for instance -- can be regarded as men at all. The Commentary says, in describing that species (or race) of animals "fair to look at" as a biped:-- "Having human shape, but having the lower extremities, from the waist down, covered with hair." Hence the race of the satyrs, perhaps.

If men existed two million years ago, they must have been -- just as the animals were -- quite different physically and anatomically from what they have become; and they were nearer then to the type of pure mammalian animal than they are now. Anyhow, we learn that the animal world breeds strictly inter se, i.e., in accordance with genus and species -- only since the appearance on this earth of the Atlantean race. As demonstrated by the author of that able work, "Modern Science and Modern Thought," this idea of the refusal to breed with another species, or that sterility is the only result of such breeding, "appears to be a prima facie deduction rather than an absolute law" even now. He shows that "different species, do, in fact, often breed together, as may be seen in the familiar instance of the horse and ass. It is true that in this case the mule is sterile. . . . but this rule is not universal, and recently one new hybrid race, that of the leporine, or hare-rabbit, has been created which is perfectly fertile." The progeny of wolf and dog is also instanced, as that of several other domestic animals (p. 101); "like foxes and dogs again, and the modern Swiss cattle shown by Rutimeyer as descended from three distinct species of fossil-oxen, the *Bos primigenius*, *Bos longifrons* and *Bos frontosus*." Yet some of those species, as the ape family, which so clearly resembles man in physical structure, contain, we are told, "numerous branches, which graduate into one another, but the extremes of which differ more widely than man does from the highest of the ape series" -- the gorilla and chimpanzee, for instance (see Addenda).

Thus Mr. Darwin's remark -- or shall we say the remark of Linnaeus? -- *natura non facit saltum*, is not only corroborated by Esoteric Science but would -- were there any chance of the real doctrine being accepted by any others than its direct votaries -- reconcile in more than one way, if not entirely, the modern Evolution theory with facts, as also with the absolute failure of the Anthropologists to meet with the "missing link" in our Fourth Round geological formations.

We will show elsewhere that, however unconsciously to itself, modern Science pleads our case upon its own admissions, and that de Quatrefages is perfectly right, when he suggests in his last work, that it is far more likely that the anthropoid ape should be discovered to be

[[Vol. 2, Page]] 288 THE SECRET DOCTRINE.

the descendant of man, than that these two types should have a common, fantastic and nowhere-to-be-found ancestor. Thus the wisdom of the compilers of the old Stanzas is vindicated by at least one eminent man of Science, and the Occultist prefers to believe as he ever did that --

"Man was the first and highest (mammalian) animal that appeared in this (Fourth Round) creation. Then came still huger animals; and last of all the dumb man who walks on all fours." For, "the Rakshasas (giant-demons) and Daityas (Titans) of the "White Dwipa" (continent) spoiled his (the dumb man's) Sires." (Commentary.)

Furthermore, as we see, there are anthropologists who have traced man back to an epoch which goes far to break down the apparent barrier that exists between the chronologies of modern science and the Archaic Doctrine. It is true that English scientists generally have declined to commit themselves to the sanction of the hypothesis of even a Tertiary Man. They, each and all, measure the antiquity of *Homo primigenius* by their own lights and prejudices. Huxley, indeed, ventures to speculate on a possible Pliocene or Miocene Man. Prof. Seeman and Mr. Grant Allen have relegated his advent to the Eocene, but, speaking generally, English scientists consider that we cannot safely go beyond the quaternary. Unfortunately, the facts do not accommodate the too cautious reserve of these latter. The French school of anthropology, basing their views on the discoveries of l'Abbe Bourgeois, Capellini, and others, has accepted, almost without exception, the doctrine that the traces of our ancestors are certainly to be found in the Miocene, while M. de Quatrefages now inclines to postulate a Secondary-Age Man. Further on we shall compare such estimates with the figures given in the Brahminical exoteric books which approximate to the esoteric teaching.

(d) . . . Then, "the third eye acted no longer," says the Stanza, because MAN had sunk too deep into the mire of matter.

What is the meaning of this strange and weird statement in Verse 42, concerning the "third eye of the Third Race which had died and acted no longer"?

A few more occult teachings must now be given with reference to this point as well as some others. The history of the Third and Fourth Races must be amplified, in order that it may throw some more light on the development of our present humanity; and show how the faculties, called into activity by occult training, restore man to the position he previously occupied in reference to spiritual perception and consciousness. But the phenomenon of the third Eye has to be first explained.

[[Vol. 2, Page]] 289 THE "THIRD EYE."

THE RACES WITH THE "THIRD EYE."

The subject is so unusual, the paths pursued so intricate, so full of dangerous pitfalls prepared by adverse theories and criticism, that good reasons have to be given for every step taken. While turning the light of the bull's eye called esotericism on almost every inch of the occult grounds travelled over, we have also to use its lens to throw into stronger objectivity the regions explored by exact science; this, not only in order to contrast the two, but to defend our position.*

It may be complained by some that too little is said of the physical, human side of the extinct races, in this history of their growth and evolution. Much more might be said assuredly, if simple prudence did not make us hesitate at the threshold of every new revelation. That, which finds its possibility and landmarks in the discoveries of modern science, is given; all that of which exact knowledge knows nothing and upon which it is unable to speculate -- and therefore denies as facts in nature -- is withheld.

But even such statements as these -- e.g., that of all the mammalians, man was the earliest; that it is man who is the indirect ancestor of the Ape; and that he was a kind of a Cyclops in days of old -- will all be contested, yet, scientists will never be able to prove -- except to their own satisfaction -- that it was not so. Nor can they admit that the first two races of men were too ethereal and phantom-like in their constitution, organism, and shape, even to be called physical men. For, if they do, it will be found that this is one of the reasons why their relics can never be expected to be exhumed among other fossils. Nevertheless all this is maintained. Man was the store-house, so to speak, of all the seeds of life

[[Footnote(s)]] -----

* For suggestiveness, we would recommend a short article in the Theosophist of August, 1887, "Esoteric Studies." Its author expounds therein quite an occult theory, though to the world a new idea: "the progress of the Monad concurring with the retrogression of Form" (666), i.e., "with decrease of the vis formativa." He says, "Who knows what shape vehicled the Ego in remote rings (Rounds, or races?) . . . ? May not man's type have been that of the Simiadae in its variety? Might not the monkey-kingdom of Ramayana fame rest on some far-off tradition relating to a period when that was the common lot, or rather aspect, of man?" . . . and winds up a very clever, though too short, exposition of his theory by saying that which every true occultist will endorse: "With physico-ethereal man there must be involution of sex. As physico-astral man depended on entities of the sub-human class (evolved from animal prototypes) for rebirth, so will physico-ethereal man find among the graceful, shapely orders issuing from the air-plane, one or more which will be developed for his successive embodiments when procreated forms are given -- a process which will include all mankind only very gradually. The (pre?) Adamic and post-Adamic races were giants; their ethereal counterparts may possibly be lilliputians -- beauteous, luminous, diaphanous -- but will assuredly be giants in mind" (p. 671, art. by Visconde de Figaniere, F.T.S.).

[[Vol. 2, Page]] 290 THE SECRET DOCTRINE.

for this Round, vegetable and animal alike.* As En-Soph is "One, notwithstanding the innumerable forms which are in him" (Zohar, i. 21a), so is man, on Earth the microcosm of the macrocosm. "As soon as man appeared, everything was complete. . . . for everything is comprised in man. He unites in himself all forms (Ibid., iii. 48a)." "The mystery of the earthly man is after the mystery of the Heavenly Man" (ii. 76a). The human form -- so called, because it is the vehicle (under whatever shape) of the divine man -- is, as so intuitively remarked by the author of "Esoteric Studies," "the new type, at the beginning of every Round, "as man never can be, so he never has been, manifested in a shape belonging to the animal kingdom in esse." The author proceeds, "he never formed part of that kingdom. Derived, only derived, from the most finished class of the latter, a new human form must always have been the new type of the cycle. The human shape, in one ring (?), as I imagine, becomes cast-off clothes in the next; it is then appropriated by the highest order in the servant-kingdom below."

If the idea is what we understand it to mean -- for the "rings" spoken of throw some confusion upon it -- then it is the correct esoteric teaching. Having appeared at the very beginning, and at the head of sentient and conscious life, man (the astral, or the "Soul," for the Zohar, repeating the archaic teaching, distinctly says that "the real man is the Soul, and his material frame no part of him") -- man became the living and animal UNIT, from which the "cast-off clothes" determined the shape of every life and animal in this Round.***

Thus, he "created" for ages the insects, reptiles, birds, and animals, unconsciously to himself, from his remains and relics from the Third and the Fourth Rounds. The same idea and teaching are as distinctly given in the Vendidad of the Mazdeans, as they are in the Chaldean and the Mosaic allegory of the Ark, all of which are the many national versions of the original legend given in the Hindu Scriptures. It is found in the allegory of Vaivasvata Manu and his Ark with the Seven Rishis, as in that of the Rishis, each of whom is shown the father and

[[Footnote(s)]] -----

* It may be objected that this is a contradiction. That, as the first Root-Race appeared 300,000,000 years after the vegetation had evolved, the seed of vegetable life could not be in the First Race. We say it could; for up to man's appearance in this Round, the vegetation was of quite another kind than it is now, and quite ethereal, this for the simple

reason that no grass or plants could have been physical, before there were animal or other organisms to breathe out the carbonic acid which vegetation has to imbibe for its development, its nutrition and growth. They are inter-dependent in their physical and achieved forms.

** "Visconde de Figanieri, F.T.S." (The Theosophist, Aug. 1887, page 676.)

*** It is stated in the Zohar that the "primordial worlds" (sparks) could not continue because man was not as yet. "The human form contains everything; and as it did not as yet exist, the worlds were destroyed."

[[Vol. 2, Page]] 291 MAZDEAN SYMBOLISM.

progenitor of specified animals, reptiles, and even monsters (See Vishnu and other Puranas). Open the Mazdean Vendidad, at Fargard ii., at verse 27 (73) and read the command of Ormazd to Yima, a Spirit of the Earth, who symbolizes the three races, after telling him to build a vara ("an enclosure," an argua or vehicle)

"Thither (into the vara) thou shalt bring the seeds of men and women, of the greatest, best, and finest kinds on this earth; thither thou shalt bring the seeds of every kind of cattle," etc., etc.; and v. 28 (74) . . . "all those seeds shalt thou bring, two of every kind, to be kept inexhaustible there, so long as those men shall stay in the vara." Those "men" in the "Vara" are the "Progenitors," the heavenly men or Dhyani, the future Egos who are commissioned to inform mankind. For "Vara," or the "Ark" (or again the Vehicle) simply means MAN.* Verse 30 says: . . . "thou shalt seal up the vara (after filling it up with the seeds), and thou shalt make a door and a window self-shining within," which is the Soul. And when Yima inquires of Ahura Mazda how he shall manage to make that vara, he is answered: "Crush the earth . . . and knead it with thy hands, as the potter does when kneading the potter's clay" (31).

The Egyptian ram-headed god makes man of clay on a potter's wheel, and so in Genesis do the Elohim fashion him out of the same material.

When the "Maker of the material world" (Ahura Mazda) is asked, furthermore, what is to give light "to the Vara which Yima made," he is told that "There are uncreated lights and created lights" and that "there" (in Airyana Vaego, where Vara is built), "the stars, the moon, and the Sun are only once (a year) seen to rise and set" and a year seems only as a day (and night) a clear reference to the "land of the Gods" or the (now) polar regions. Moreover another hint is contained in this verse: a distinct allusion to the "uncreated lights" which enlighten man within -- his principles. Otherwise, no sense or reason could be found in Ahura Mazda's answer (V. 40), which is forthwith followed by Verse 41 saying that "Every fortieth year, to every couple (hermaphrodite) two are born, a male and female,"*** the latter being a distinct echo of the Secret Doctrine, of a Stanza which says --

[[Footnote(s)]] -----

* This is the meaning when the allegory and symbol are opened and read by means of the human key, or the key to terrestrial anthroposophy. This interpretation of the "ark" symbolism does not in the least interfere with its astronomical, or even theogonic keys; nor with any of the other six meanings. Nor does it seem less scientific than the modern theories about the origin of man. As said, it has seven keys to it, like the rest.

** Vendidad Sadah, See also Bund. XV.; and J. Darmesteter's translation of the Vendidad. "Sacred Books of the East."

[[Vol. 2, Page]] 292 THE SECRET DOCTRINE.

"At the expiration of every forty (annual) Suns, at the end of every fortieth Day, the double one becomes four; male and female in one, in the first and second and the third. . . ."

Which is clear, since "every sun" meant a whole year, the latter being composed of one day then, as in the arctic circle it is now composed of six months. According to the old teaching, the axis of the earth gradually changes its inclination to the ecliptic, and at the period referred to, this inclination was such that a polar day lasted during the whole period of the earth's revolution about the sun, when a kind of twilight of very short duration intervened; after which the polar land resumed its position directly under the solar rays. This may be contrary to astronomy as now taught and understood: but who can say that changes in the motion of the earth, which do not take place now, did not occur millions of years back?

Returning once more to the statement that Vara meant the MAN of the Fourth Round, as much as the Earth of those days, the moon, and even Noah's ark, if one will so have it -- this is again shown in the dialogue between Ahura Mazda and Zarathustra. Thus when the latter asks --

V. 42. "O Maker of the Material World, thou Holy One! Who is he who brought the law of Mazda into the Vara which Yima made?"

"Ahura Mazda answered: 'It was the bird Karshipta, O holy Zarathustra.' . . ."

"The bird Karshipta dwells in the heavens: were he living on the earth he would be king of birds. He brought into the var of Yima, and recites the Avesta in the language of birds." (Bund. xix and xxiv.)

This again is an allegory and a symbol misunderstood by the Orientalists only, who see in this bird "an incarnation of lightning," and say its song was "often thought to be the utterance of a god and a revelation," and what not. Karshipta is the human mind-soul, and the deity thereof, symbolized in ancient Magianism by a bird, as the Greeks symbolized it by a butterfly. No sooner had Karshipta entered the Vara or man, than he understood the law of Mazda, or Divine Wisdom. In the "Book of Concealed Mystery" it is said of the tree, which is the tree of knowledge of good and evil: "In its branches (of the tree) the birds lodge and build their nests," or the Souls and the Angels have their place!.* Therefore, with the Kabalists it was a like symbol. "Bird" was a Chaldean, and has become a Hebrew synonym and symbol for Angel, a Soul,

a Spirit, or Deva; and the "Bird's Nest" was with both Heaven, and is God's bosom in the Zohar. The perfect Messiah enters Eden "into that place which is called the Bird's Nest" (Zohar, ii., 8b).

[[Footnote(s)]] -----

* See "Kabbalah Unveiled" by S. McGregor Mathers, p. 104.

[[Vol. 2, Page]] 293 ANGELS CALLED BIRDS.

"Like a bird that is flying from its nest, and that is the Soul from which the Shekeenah (divine wisdom or grace) does not move away" (Zohar, iii., 278a; Myer's Qabbalah, 217). "The Nest of the eternal Bird, the flutter of whose wings produces life, is boundless space," says the Commentary, meaning Hansa, the bird of Wisdom.

It is Adam Kadmon who is the (Sephirothal) tree, and it is he who becomes the "Tree of knowledge of good and evil" esoterically. And that "tree hath around it seven columns (seven pillars) of the world, or Rectores"; the same "Progenitors" or "Sephiroth" again "operating through the respective orders of Angels in the spheres of the seven planets," etc., one of which orders begets giants (Nephilim) on Earth.

It was the belief of entire antiquity, Pagan and Christian, that the earliest mankind was a race of giants. Certain excavations in America in mounds and in caves, have already yielded in isolated cases groups of skeletons of nine and twelve feet high.* These belong to tribes of the early Fifth Race, now degenerated to an average size of between five and six feet. But we can easily believe that the Titans and Cyclopes of old really belonged to the Fourth (Atlantean) Race, and that all the subsequent legends and allegories found in the Hindu Puranas and the Greek Hesiod and Homer, were based on the hazy reminiscences of real Titans -- men of a superhuman tremendous physical power, which enabled them to defend themselves, and hold at bay the gigantic monsters of the Mesozoic and early Cenozoic times -- and of actual Cyclopes -- three-eyed mortals.

It has been often remarked by observant writers, that the "origin of nearly every popular myth and legend could be traced invariably to a fact in Nature."

In these fantastic creations of an exuberant subjectivism, there is always an element of the objective and real. The imagination of the masses, disorderly and ill-regulated as it may be, could never have conceived and fabricated ex nihilo so many monstrous figures, such a wealth of extraordinary tales, had it not had, to serve it as a central nucleus, those floating reminiscences, obscure and vague, which unite the broken links of the chain of time to form with them the mysterious, dream foundation of our collective consciousness.**

[[Footnote(s)]] -----

* Darwinian Evolutionists who are so wont to refer to the evidence of reversion to type -- the full meaning of which, in the case of human monsters, is embraced in the esoteric solution of the embryological problem -- as proof of their arguments, would do well to inquire into those instances of modern giants who are often 8, 9, and even 11 feet high. Such reversions are imperfect, yet undeniable reproductions of the original towering man of primeval times.

** See "Mythical Monsters," by Ch. Gould, from whose interesting and scientific volume a few passages are quoted further on. See in Mr. Sinnett's "Occult World," the description of a cavern in the Himalayas filled with relics of human and animal giant bones.

[[Vol. 2, Page]] 294 THE SECRET DOCTRINE.

The evidence for the Cyclopes -- a race of giants -- will be pointed out in forthcoming Sections, in the Cyclopean remnants, so called to this day. An indication that, during its evolution and before the final adjustment of the human organism -- which became perfect and symmetrical only in the Fifth Race -- the early Fourth Race may have been three-eyed, without having necessarily a third eye in the middle of the brow, like the legendary Cyclops, is also furnished by Science.

To the Occultists who believe that spiritual and psychic involution proceeds on parallel lines with physical evolution; that the inner senses -- innate in the first human races -- atrophied during racial growth and the material development of the outer senses; to the student of Esoteric symbology, finally, this statement is no conjecture or possibility, but simply a phase of the law of growth, a proven fact, in short. They understand the meaning of this passage in the Commentaries which says:--

"There were four-armed human creatures in those early days of the male-females (hermaphrodites); with one head, yet three eyes. They could see before them and behind them.* A KALPA later (after the separation of the sexes) men having fallen into matter, their spiritual vision became dim; and coordinately the third eye commenced to lose its power. . . . When the Fourth (Race) arrived at its middle age, the inner vision had to be awakened, and acquired by artificial stimuli, the process of which was known to the old sages.** . . . The third eye, likewise, getting gradually PETRIFIED,** soon disappeared. The double-faced became the one-faced, and the eye was drawn deep into the head and is now buried under the hair. During the activity of the inner man (during trances and spiritual visions) the eye swells and expands. The Arhat sees and feels it, and regulates his action accordingly."

[[Footnote(s)]] -----

* Viz., the third eye was at the back of the head. The statement that the latest hermaphrodite humanity was "four-armed," unriddles probably the mystery of all the representations and idols of the exoteric gods of India. On the Acropolis of Argos, there was a [[Zoanon]], a rudely carved wooden statue (attributed to Daedalus), representing a three-eyed colossus, which was consecrated to Zeus Triopas (three-eyed). The head of the "god" has two eyes in its face and one

above on the top of the forehead. It is considered the most archaic of all the ancient statues (Schol. Vatic. ad Eurip. Troad. 14).

** The Inner sight could henceforth be acquired only through training and initiation, save in the cases of "natural and born magicians," sensitives and mediums, as they are called now.

*** This expression "petrified" instead of "ossified" is curious. The "back eye," which is of course the pineal gland, now so-called, the small pea-like mass of grey nervous matter attached to the back of the third ventricle of the brain, is said to almost invariably contain mineral concretions and sand, and "nothing more." (Vide Infra.)

[[Vol. 2, Page]] 295 OCCULT PHYSIOLOGY.

The undefiled Lanoo (disciple, chela) need fear no danger; he who keeps himself not in purity (who is not chaste) will receive no help from the 'deva eye.' "

Unfortunately not. The "deva-eye" exists no more for the majority of mankind. The third eye is dead, and acts no longer; but it has left behind a witness to its existence. This witness is now the PINEAL GLAND. As for the "four-armed" men, it is they who become the prototypes of the four-armed Hindu gods, as shown in a preceding footnote.

Such is the mystery of the human eye that, in their vain endeavours to explain and account for all the difficulties surrounding its action, some scientists have been forced to resort to occult explanations. The development of the Human eye gives more support to the occult anthropology than to that of the materialistic physiologists. "The eyes in the human embryo grow from within without" out of the brain, instead of being part of the skin, as in the insects and cuttlefish. Professor Lankester, thinking the brain a queer place for the eye, and attempting to explain the phenomenon on Darwinian lines, suggests the curious view that "our" earliest vertebrate ancestor was a transparent creature and hence did not mind where the eye was! And so was man "a transparent creature" once upon a time, we are taught, hence our theory holds good. But how does the Lankester hypothesis square with the Haeckelian view that the vertebrate eye originated by changes in the epidermis? If it started inside, the theory goes into the waste-basket. This seems to be proved by embryology. Moreover, Professor Lankester's extraordinary suggestion -- or shall we say admission? -- is rendered perhaps necessary by evolutionist necessities. Occultism with its teaching as to the gradual development of senses "FROM WITHIN WITHOUT," from astral prototypes, is far more satisfactory: The third eye retreated inwards when its course was run -- another point in favour of Occultism.

The allegorical expression of the Hindu mystics when speaking of the "eye of Siva," the Tri-bochana ("three-eyed"), thus receives its justification and *raison d'etre* -- the transference of the pineal gland (once that "third eye") to the forehead, being an exoteric licence. This throws also a light on the mystery -- incomprehensible to some -- of the connection between abnormal, or Spiritual Seership, and the physiological purity of the Seer. The question is often asked, "Why should celibacy and chastity be a *sine qua non* rule and condition of regular chelaship, or the development of psychic and occult powers?" The answer is contained in the Commentary. When we learn that the "third eye" was once a physiological organ, and that later on, owing to the gradual

[[Vol. 2, Page]] 296 THE SECRET DOCTRINE.

disappearance of spirituality and increase of materiality (Spiritual nature being extinguished by the physical), it became an atrophied organ, as little understood now by physiologists as the spleen is -- when we learn this, the connection will become clear. During human life the greatest impediment in the way of spiritual development, and especially to the acquirement of Yoga powers, is the activity of our physiological senses. Sexual action being closely connected, by interaction, with the spinal cord and the grey matter of the brain, it is useless to give any longer explanation. Of course, the normal and abnormal state of the brain, and the degree of active work in the medulla oblongata, reacts powerfully on the pineal gland, for, owing to the number of "centres" in that region, which controls by far the greater majority of the physiological actions of the animal economy, and also owing to the close and intimate neighbourhood of the two, there must be exerted a very powerful "inductive" action by the medulla on the pineal gland.

All this is quite plain to the Occultist, but is very vague in the sight of the general reader. The latter must then be shown the possibility of a three-eyed man in nature, in those periods when his formation was yet in a comparatively chaotic state. Such a possibility may be inferred from anatomical and zoological knowledge, first of all; then it may rest on the assumptions of materialistic science itself.

It is asserted upon the authority of Science, and upon evidence, which is not merely a fiction of theoretical speculation this time, that many of the animals -- especially among the lower orders of the vertebrata -- have a third eye, now atrophied, but necessarily active in its origin.* The Hatteria species, a lizard of the order Lacertilia, recently discovered in New Zealand (a part of ancient Lemuria so called, mark well), presents this peculiarity in a most extraordinary manner; and not only the Hatteria punctata, but the chameleon, certain reptiles, and even fishes. It was thought, at first, that it was no more than the prolongation of the brain ending with a small protuberance, called epiphysis, a little bone separated from the main bone by a cartilage, and found in every animal. But it was soon found to be more than this. It offered -- as its development and anatomical structure showed -- such an analogy with that of the eye, that it was found impossible to see in it any-

[[Footnote(s)]] -----

* "Deeply placed within the head, covered by thick skin and muscles, true eyes that cannot see are found in certain animals," also, says Haeckel: "Vertebrate . . . blind moles and field mice, blind snakes and lizards. . . . They shun daylight . . . dwelling under the ground. They were not originally blind but have evolved from ancestors that lived in the light and had well-developed eyes. The atrophied eye beneath the opaque skin may be found in these blind beings in every stage of reversion." ("Sense Organs," Haeckel.) And if two eyes could become so atrophied in lower animals, why not one eye - the pineal gland -- in man, who is but a higher animal in his physical aspect?

thing else. There were and are paleontologists who feel convinced to this day that this "third eye" has functioned in its origin, and they are certainly right. For this is what is said of the pineal gland in Quain's Anatomy (Vol. II. ninth edit., pp. 830-851. "Thalamencephalon" Interbrain):--

"It is from this part, constituting at first the whole and subsequently the hinder part of the anterior primary encephalic vesicle, that the optic vesicles are developed in the earliest period, and the fore part is that in connection with which the cerebral hemispheres and accompanying parts are formed. The thalamus opticus of each side is formed by a lateral thickening of the medullary wall, while the interval between, descending towards the base, constitutes the cavity of the third ventricle with its prolongation in the infundibulum. The grey commissure afterwards stretches across the ventricular cavity. . . . The hinder part of the roof is developed by a peculiar process, to be noticed later, into the pineal gland, which remains united on each side by its pedicles to the thalamus, and behind these a transverse band is formed as posterior commissure.

"The lamina terminalis (lamina cinerea) continues to close the third ventricle in front, below it the optic commissure forms the floor of the ventricle, and further back the infundibulum descends to be united in the sella turcica with the tissue adjoining the posterior lobe of the pituitary body.

"The two optic thalami formed from the posterior and outer part of the anterior vesicle, consist at first of a single hollow sac of nervous matter, the cavity of which communicates on each side in front with that of the commencing cerebral hemispheres, and behind with that of the middle cephalic vesicle (corpora quadrigemina). Soon, however, by increased deposit taking place in their interior, behind, below, and at the sides, the thalami become solid, and at the same time a cleft or fissure appears between them above, and penetrates down to the internal cavity, which continues open at the back part opposite the entrance of the Sylvian aqueduct. This cleft or fissure is the third ventricle. Behind, the two thalami continue united by the posterior commissure, which is distinguishable about the end of the third month, and also by the peduncles of the pineal gland. . . .

"At an early period the optic tracts may be recognised as hollow prolongations from the outer part of the wall of the thalami while they are still vesicular. At the fourth month these tracts are distinctly formed. They subsequently are prolonged backwards into connection with the corpora quadrigemina.

"The formation of the pineal gland and pituitary body presents some of the most interesting phenomena which are connected with the development of the Thalamencephalon."

The above is specially interesting when it is remembered that, were it not for the development of the hinder part of the cerebral hemispheres backwards, the pineal gland would be perfectly visible on the removal of the parietal bones. It is very interesting also to note the obvious connection to be traced between the (originally) hollow optic tracts and the eyes anteriorly, the pineal gland and its peduncles behind, and all

of these with the optic thalami. So that the recent discoveries in connection with the third eye of *Hatteria punctata* have a very important bearing on the developmental history of the human senses, and on the occult assertions in the text.

It is well known, (and also regarded as a fiction now, by those who have ceased to believe in the existence of an immortal principle in man,) that Descartes saw in the pineal gland the Seat of the Soul. Although it is joined to every part of the body, he said, there is one special portion of it in which the Soul exercises its functions more specially than in any other. And, as neither the heart, nor yet the brain could be that "special" locality, he concluded that it was that little gland tied to the brain, yet having an action independent of it, as it could easily be put into a kind of swinging motion "by the animal Spirits" which cross the cavities of the skull in every sense."

Unscientific as this may appear in our day of exact learning, Descartes was yet far nearer the occult truth than is any Haeckel. For the pineal gland, as shown, is far more connected with Soul and Spirit than with the physiological senses of man. Had the leading Scientists a glimmer of the real processes employed by the Evolutionary Impulse, and the winding cyclic course of this great law, they would know instead of conjecturing; and feel as certain of the future physical transformations of the human kind by the knowledge of its past forms. Then, would they see the fallacy and all the absurdity of their modern "blind-force" and mechanical processes of nature; realizing, in consequence of such knowledge, that the said pineal gland, for instance, could not but be disabled for physical use at this stage of our cycle. If the odd "eye" in man is now atrophied, it is a proof that, as in the lower animal, it has once been active; for nature never creates the smallest, the most insignificant form without some definite purpose and use. It was an active organ, we say, at that stage of evolution when the spiritual element in man reigned supreme over the hardly nascent intellectual and psychic elements. And, as the cycle ran down toward that point when the physiological senses were developed by, and went *pari passu* with, the growth and consolidation of the physical man, the interminable and complex vicissitudes and tribulations of zoological development, that median "eye" ended by atrophying along with the early spiritual and purely psychic characteristics in man. The eye is the mirror and also the window of the soul, says popular wisdom, ** and *Vox populi Vox Dei*.

[[Footnote(s)]] -----

* The "Nervous Ether" of Dr. B. W. Richardson, F.R.S. -- the nerve-aura of occultism. The "animal spirits" (?) are equivalent to the currents of nerve-auric compound circulation.

** Let us remember that the First Race is shown in Occult sciences as spiritual within [[Footnote continued on next page]]

In the beginning, every class and family of living species was hermaphrodite and objectively one-eyed. In the animal, whose form was as ethereal (astrally) as that of man, before the bodies of both began to evolve their coats of skin, viz., to evolve from within without the thick coating of physical substance or matter with its internal physiological mechanism -- the third eye was primarily, as in man, the only seeing organ. The two physical front eyes developed" later on in both brute and man, whose organ of physical sight was, at the commencement of the Third Race, in the same position as that of some of the blind vertebrata, in our day, i.e., beneath an opaque skin.** Only the stages of the odd, or primeval eye, in man and brute, are now inverted, as the former has already passed that animal non-rational stage in the Third Round, and is ahead of mere brute creation by a whole plane of consciousness. Therefore, while the "Cyclopean" eye was, and still is, in man the organ of spiritual sight, in the animal it was that of objective vision. And this eye, having performed its function, was replaced, in the course of physical evolution from the simple to the complex, by two eyes, and thus was stored and laid aside by nature for further use in AEons to come.

This explains why the pineal gland reached its highest development proportionately with the lowest physical development. It is the vertebrata in which it is the most prominent and objective, and in man it is

[[Footnote(s)]] -----

[[Footnote continued from previous page]] and ethereal without; the second, psycho-spiritual mentally, and ethero-physical bodily; the third, still bereft of intellect in its beginning, is astro-physical in its body, and lives an inner life, in which the psycho-spiritual element is in no way interfered with as yet by the hardly nascent physiological senses. Its two front eyes look before them without seeing either past or future. But the "third eye" "embraces ETERNITY."

* But in a very different manner to that pictured by Haeckel as an "evolution by natural selection in the struggle for existence" ("Pedigree of Man." "Sense Organs," p. 335). The mere "thermal sensibility of the skin," to hypothetical light-waves, is absurdly incompetent to account for the beautiful combination of adaptations present in the eye. It has, moreover, been previously shown that "natural Selection" is a pure myth when credited with the origination of variations (vide infra, Part III., on Darwinian mechanical causation); as the "survival of the fittest" can only take place after useful variations have sprung up, together with improved organisms. Whence came the "useful variations," which developed the eye? Only from "blind forces . . . without aim, without design?" The argument is puerile. The true solution of the mystery is to be found in the impersonal Divine Wisdom, in its IDEATION -- reflected through matter.

** Palaeontology has ascertained that in the animals of the Cenozoic age -- the Saurians especially, such as the antediluvian Labyrinthodon, whose fossil skull exhibits a perforation otherwise inexplicable -- the third, or odd eye must have been much developed. Several naturalists, among others E. Korscheldt, feel convinced that whereas, notwithstanding the opaque skin covering it, such an eye in the reptiles of the present period can only distinguish light from darkness (as the human eyes do when bound with a handkerchief, or even tightly closed), in the now extinct animals that eye functioned and was a real organ of vision.

most carefully hidden and inaccessible, except to the anatomist. No less light is thrown thereby on the future physical, spiritual, and intellectual state of mankind, in periods corresponding on parallel lines with other past periods, and always on the lines of ascending and descending cyclic evolution and development. Thus, a few centuries before the Kali yuga -- the black age which began nearly 5,000 years ago -- it was said (paraphrased into comprehensible sentences):

"We (the Fifth Root-Race) in our first half (of duration) onward (on the now ASCENDING arc of the cycle) are on the mid point of (or between) the First and the Second Races -- falling downward (i.e., the races were then on the descending arc of the cycle). . . . Calculate for thyself, Lanoo, and see." (Commentary xx.)

Calculating as advised, we find that during that transitional period -- namely, in the second half of the First Spiritual ethero-astral race -- nascent mankind was devoid of the intellectual brain element. As it was on its descending line, and as we are parallel to it, on the ascending, we are,

therefore devoid of the Spiritual element, which is now replaced by the intellectual. For, remember well, as we are in the manasa period of our cycle of races, or in the Fifth, we have, therefore, crossed the meridian point of the perfect adjustment of Spirit and Matter -- or that equilibrium between brain intellect and Spiritual perception. One important point has, however, to be borne in mind.

[[Vol. 2, Page]] 301 THE ODD EYE IS NOW A GLAND.

We are only in the Fourth Round, and it is in the Fifth that the full development of Manas, as a direct ray from the Universal MAHAT -- a ray unimpeded by matter -- will be finally reached. Nevertheless, as every sub-race and nation have their cycles and stages of developmental evolution repeated on a smaller scale, it must be the more so in the case of a Root-Race. Our race then has, as a Root-race, crossed the equatorial line and is cycling onward on the Spiritual side; but some of our sub-races still find themselves on the shadowy descending arc of their respective national cycles; while others again -- the oldest -- having crossed their crucial point, which alone decides whether a race, a nation, or a tribe will live or perish, are at the apex of spiritual development as sub-races.

It becomes comprehensible now why the "odd eye" has been gradually transformed into a simple gland, after the physical Fall of those we have agreed to call the "Lemurians."

It is a curious fact that it is especially in human beings that the cerebral hemispheres and the lateral ventricles have been developed, and that the optic thalami, corpora quadrigemina, and corpora striata are the principal parts which are developed in the mammalian brain. Moreover it is asserted that the intellect of any man may to some extent be gauged by the development of the central convolutions and the fore part of the cerebral hemispheres. It would seem a natural corollary that if the development and increased size of the pineal gland may be considered to be an index of the astral capacities and spiritual proclivities of any man, there will be a corresponding development of that part of the cranium, or an increase in the size of the pineal gland at the expense of the hinder part of the cerebral hemispheres. It is a curious speculation which would receive a confirmation in this case. We should see, below and behind, the cerebellum which has been held to be the seat of all the animal proclivities of a human being, and which is allowed by science to be the great centre for all the physiologically co-ordinated movements of the body, such as walking, eating, etc., etc.; in front, the fore-part of the brain -- the cerebral hemispheres -- the part especially connected with the development of the intellectual powers in man; and in the middle, dominating them both, and especially the animal functions, the developed pineal gland, in connection with the more highly evolved, or spiritual man.

It must be remembered that these are only physical correspondences; just as the ordinary human brain is the registering organ of memory, but not memory itself.

This is, then, the organ which gave rise to so many legends and traditions, among others to that of man with one head but two faces. These may be found in several Chinese works, besides being referred to in the

[[Vol. 2, Page]] 302 THE SECRET DOCTRINE.

Chaldean fragments. Apart from the work already cited -- the Shan Hai King, compiled by King Chia from engravings on nine urns made 2,255 B.C., by the Emperor Yu, they may be found in another work, called the "Bamboo Books," and in a third one, the "Rh Ya" -- "initiated according to tradition by Chow Kung, uncle of Wu Wang, the first Emperor of the Chow Dynasty, B.C., 1,122" -- says Mr. Ch. Gould in his "Mythical Monsters." The Bamboo Books contain the ancient annals of China, found A.D. 279 at the opening of the grave of King Seang of Wai, who died B.C. 295. Both these works mention men with two faces on one head -- one in front and one behind (p. 27).

Now that which the students of Occultism ought to know is that THE "THIRD EYE" IS INDISSOLUBLY CONNECTED WITH KARMA. The tenet is so mysterious that very few have heard of it.

The "eye of Siva" did not become entirely atrophied before the close of the Fourth Race. When spirituality and all the divine powers and attributes of the deva-man of the Third had been made the hand-maidens of the newly-awakened physiological and psychic passions of the physical man, instead of the reverse, the eye lost its powers. But such was the law of Evolution, and it was, in strict accuracy, no FALL. The sin was not in using those newly-developed powers, but in misusing them; in making of the tabernacle, designed to contain a god, the fane of every spiritual iniquity. And if we say "sin" it is merely that everyone should understand our meaning; as the term Karma* would be the right one to use in this case; while the reader who would feel perplexed at the use of the term "spiritual" instead of "physical" iniquity, is reminded of the fact that there can be no physical iniquity. The body is simply the irresponsible organ, the tool of the psychic, if not of the "Spiritual man." While in the case of the Atlanteans, it was precisely the Spiritual being which sinned, the Spirit element being still the "Master" principle in man, in those days. Thus it is in those days that the heaviest Karma of the Fifth Race was generated by our Monads.

As this sentence may again be found puzzling, it is better that it should be explained for the benefit of those who are ignorant of the theosophical teachings.

Questions with regard to Karma and re-births are constantly offered, and a great confusion seems to exist upon this subject. Those who are born and bred in the Christian faith, and have been trained in the idea

[[Footnote(s)]] -----

* Karma is a word of many meanings, and has a special term for almost every one of its aspects. It means, as a synonym of sin, the performance of some action for the attainment of an object of worldly, hence selfish, desire, which cannot fail to

be hurtful to somebody else. Karma is action, the Cause; and Karma again is "the law of ethical causation"; the effect of an act produced egotistically, when the great law of harmony depends on altruism.

[[Vol. 2, Page]] 303 THE NUMBER OF MONADS IS LIMITED.

that a new soul is created by God for every newly-born infant, are among the most perplexed. They ask whether in such case the number of incarnating Monads on earth is limited; to which they are answered in the affirmative. For, however countless, in our conceptions, the number of the incarnating monads -- even if we take into account the fact that ever since the Second Race, when their respective seven groups were furnished with bodies, several births and deaths may be allowed for every second of time in the aeons already passed -- still, there must be a limit. It was stated that Karma-Nemesis, whose bond-maid is Nature, adjusted everything in the most harmonious manner; and that, therefore, the fresh pouring-in, or arrival of new Monads, had ceased as soon as Humanity had reached its full physical development. No fresh Monads have incarnated since the middle-point of the Atlanteans. Hence, remembering that, save in the case of young children, and of individuals whose lives were violently cut off by some accident, no Spiritual Entity can re-incarnate before a period of many centuries has elapsed, such gaps alone must show that the number of Monads is necessarily finite and limited. Moreover, a reasonable time must be given to other animals for their evolutionary progress.

Hence the assertion that many of us are now working off the effects of the evil Karmic causes produced by us in Atlantean bodies. The Law of KARMA is inextricably interwoven with that of Re-incarnation.

It is only the knowledge of the constant re-births of one and the same individuality throughout the life-cycle; the assurance that the same MONADS -- among whom are many Dhyan-Chohans, or the "Gods" themselves -- have to pass through the "Circle of Necessity," rewarded or punished by such rebirth for the suffering endured or crimes committed in the former life; that those very Monads, which entered the empty, senseless shells, or astral figures of the First Race emanated by the Pitris, are the same who are now amongst us -- nay, ourselves, perchance; it is only this doctrine, we say, that can explain to us the mysterious problem of Good and Evil, and reconcile man to the terrible and apparent injustice of life. Nothing but such certainty can quiet our revolted sense of justice. For, when one unacquainted with the noble doctrine looks around him, and observes the inequalities of birth and fortune, of intellect and capacities; when one sees honour paid fools and profligates, on whom fortune has heaped her favours by mere privilege of birth, and their nearest neighbour, with all his intellect and noble virtues ---far more deserving in every way --perishing of want and for lack of sympathy; when one sees all this and has to turn away, helpless to relieve the undeserved suffering, one's ears ringing and heart aching with the cries of

[[Vol. 2, Page]] 304 THE SECRET DOCTRINE.

pain around him -- that blessed knowledge of Karma alone prevents him from cursing life and men, as well as their supposed Creator.*

Of all the terrible blasphemies and accusations virtually thrown on their God by the Monotheists, none is greater or more unpardonable than that (almost always) false humility which makes the presumably "pious" Christian assert, in connection with every evil and undeserved blow, that "such is the will of God."

Dolts and hypocrites! Blasphemers and impious Pharisees, who speak in the same breath of the endless merciful love and care of their God and creator for helpless man, and of that God scourging the good, the very best of his creatures, bleeding them to death like an insatiable Moloch! Shall we be answered to this, in Congreve's words:--

"But who shall dare to tax Eternal Justice?" Logic and simple common sense, we answer: if we are made to believe in the "original Sin," in one life, on this Earth only, for every Soul, and in an anthropomorphic Deity, who seems to have created some men only for the pleasure of condemning them to eternal hell-fire (and this whether they are good or bad, says the Predestinarian),** why should not every man endowed with reasoning powers condemn in his turn such a villainous Deity? Life would become unbearable, if one had to believe in the God created by man's unclean fancy. Luckily he exists only in human dogmas, and in the unhealthy imagination of some poets, who believe they have solved the problem by addressing him as --

"Thou great Mysterious Power, who hast involved
The pride of human wisdom, to confound
The daring scrutiny and prove the faith
Of thy presuming creatures!"

Truly a robust "faith" is required to believe that it is "presumption" to question the justice of one, who creates helpless little man but to "perplex" him, and to test a "faith" with which that "Power," moreover, may have forgotten, if not neglected, to endow him, as happens sometimes.

Compare this blind faith with the philosophical belief, based on every reasonable evidence and life-experience, in Karma-Nemesis, or the Law of Retribution. This Law -- whether Conscious or Uncon-

[[Footnote(s)]] -----

* Objectors to the doctrine of Karma should recall the fact that it is absolutely out of the question to attempt a reply to the Pessimists on other data. A firm grasp of the principles of Karmic Law knocks away the whole basis of the imposing fabric reared by the disciples of Schopenhauer and Von Hartmann.

** The doctrine and theology of Calvinists. "The purpose of God from eternity respecting all events" (which becomes fatalism and kills free will, or any attempt of exerting it for good). It is the pre-assignment or allotment of men to everlasting happiness or misery" (Catechism). A noble and encouraging Doctrine this!

scious -- predestines nothing and no one. It exists from and in Eternity, truly, for it is ETERNITY itself; and as such, since no act can be co-equal with eternity, it cannot be said to act, for it is ACTION itself. It is not the Wave which drowns a man, but the personal action of the wretch, who goes deliberately and places himself under the impersonal action of the laws that govern the Ocean's motion. Karma creates nothing, nor does it design. It is man who plans and creates causes, and Karmic law adjusts the effects; which adjustment is not an act, but universal harmony, tending ever to resume its original position, like a bough, which, bent down too forcibly, rebounds with corresponding vigour. If it happen to dislocate the arm that tried to bend it out of its natural position, shall we say that it is the bough which broke our arm, or that our own folly has brought us to grief? Karma has never sought to destroy intellectual and individual liberty, like the God invented by the Monotheists. It has not involved its decrees in darkness purposely to perplex man; nor shall it punish him who dares to scrutinise its mysteries. On the contrary, he who unveils through study and meditation its intricate paths, and throws light on those dark ways, in the windings of which so many men perish owing to their ignorance of the labyrinth of life, is working for the good of his fellow-men. KARMA is an Absolute and Eternal law in the World of manifestation; and as there can only be one Absolute, as One eternal ever present Cause, believers in Karma cannot be regarded as Atheists or materialists -- still less as fatalists."

[[Footnote(s)]] -----

* Some theosophists, in order to make Karma more comprehensible to the Western mind, as being better acquainted with the Greek than with Aryan philosophy, have made an attempt to translate it by Nemesis. Had the latter been known to the profane in antiquity, as it was understood by the Initiate, this translation of the term would be unobjectionable. As it is, it has been too much anthropomorphised by Greek fancy to permit our using it without an elaborate explanation. With the early Greeks, "from Homer to Herodotus, she was no goddess, but a moral feeling rather," says Decharme; the barrier to evil and immorality. He who transgresses it, commits a sacrilege in the eyes of the gods, and is pursued by Nemesis. But, with time, that "feeling" was deified, and its personification became an ever-fatal and punishing goddess. Therefore, if we would connect Karma with Nemesis, it has to be done in the triple character of the latter, viz., as Nemesis, Adrasteia and Themis. For, while the latter is the goddess of Universal Order and Harmony, who, like Nemesis, is commissioned to repress every excess, and keep man within the limits of Nature and righteousness under severe penalty, Adrasteia -- "the inevitable" -- represents Nemesis as the immutable effect of causes created by man himself. Nemesis, as the daughter of Dike, is the equitable goddess reserving her wrath for those alone who are maddened with pride, egoism, and impiety. (See Mesomed. Hymn. Nemes., V. 2. Brunck, Analecta II. p. 292; Mythol. de la Grece Antique, p. 304.) In short, while Nemesis is a mythological, exoteric goddess, or Power, personified and anthropomorphised in its various aspects, Karma is a highly philosophical truth, a most divine noble expression of the primitive intuition of man concerning Deity. It is a doctrine which explains the origin of Evil, and [[Footnote continued on next page]]

for Karma is one with the Unknowable, of which it is an aspect in its effects in the phenomenal world.

Intimately, or rather indissolubly, connected with Karma, then, is the law of re-birth, or of the re-incarnation of the same spiritual individuality in a long, almost interminable, series of personalities. The latter are like the various costumes and characters played by the same actor, with each of which that actor identifies himself and is identified by the public, for the space of a few hours. The inner, or real man, who personates those characters, knows the whole time that he is Hamlet for the brief space of a few acts, which represent, however, on the plane of human illusion the whole life of Hamlet. And he knows that he was, the night before, King Lear, the transformation in his turn of the Othello of a still earlier preceding night; but the outer, visible character is supposed to be ignorant of the fact. In actual life that ignorance is, unfortunately, but too real. Nevertheless, the permanent individuality is fully aware of the fact, though, through the atrophy of the "spiritual" eye in the physical body, that knowledge is unable to impress itself on the consciousness of the false personality.

The possession of a physical third eye, we are told, was enjoyed by the men of the Third Root-Race down to nearly the middle period of Third SUB-race of the Fourth Root-Race, when the consolidation and perfection of the human frame made it disappear from the outward anatomy of man. Psychically and spiritually, however, its mental and visual perceptions lasted till nearly the end of the Fourth Race, when its functions, owing to the materiality and depraved condition of mankind, died out altogether before the submersion of the bulk of the Atlantean continent. And now we may return to the Deluges and their many "Noahs."

The student has to bear in mind that there were many such deluges as that mentioned in Genesis, and three far more important ones, which will be mentioned and described in the Section devoted to the subject of pre-historic continents. To avoid erroneous conjectures, however, with regard to the claim that the esoteric doctrine has much in it of the legends contained in the Hindu Scriptures; that, again, the chronology of the latter is almost that of the former -- only explained and made clear; and that finally the belief that "Vaivasvata Manu" -- a generic name indeed! -- was the Noah of the Aryans and his prototype, all this, which is also the belief of the Occultists, necessitates at this juncture a new explanation. (Vide Part III. "Submerged Continents.")

[[Footnote(s)]] -----

[[Footnote continued from previous page]] ennobles our conceptions of what divine immutable justice ought to be, instead of degrading the unknown and unknowable Deity by making it the whimsical, cruel tyrant, which we call Providence.

THE PRIMEVAL MANUS OF HUMANITY.

Those who are aware that the "great Flood," which was connected with the sinking of an entire continent -- save what became a few islands -- could not have happened so far back as 18,000,000 years ago; and that Vaivasvata Manu is the Indian Noah connected with the Matsya (or the fish) Avatar of Vishnu -- may feel perplexed at this discrepancy between facts stated and the chronology previously given. But there is no discrepancy in truth. The reader is asked to turn to the Theosophist of July, 1883, and after studying the article therein, "The Septenary Principle in Esotericism," the whole question can be explained to him. It is in this explanation, I believe, that the Occultists differ from the Brahmins.

For the benefit of those, however, who may not have "The Theosophist" of that month and year to hand, a passage or two may now be quoted from it:

"Who was Manu, the son of Swayambhuva? The secret doctrine tells us that this Manu was no man, but the representation of the first human races evolved with the help of the Dhyani-Chohans (Devas) at the beginning of the first round. But we are told in his Laws (Book I. 80) that there are fourteen Manus for every Kalpa -- or interval from creation to creation (read interval from one minor 'Pralaya' to another*) -- and that in the present divine age, there have been as yet seven Manus. Those who know that there are seven rounds, of which we have passed three, and are now in the fourth; and who are

[[Footnote(s)]] -----

* Pralaya -- a word already explained -- is not a term that applies only to every "Night of Brahma," or the world's dissolution following every Manvantara, equal to 71 Maha-yugas. It applies also to each "obscuration" as well, and even to every Cataclysm that puts an end, by Fire or by Water in turn, to each Root-Race. Pralaya is a term like that of "Manu" -- the generic name for the Sishas, who, under the appellation of "King," are shown in the Puranas as preserved "with the seed of all things in an ark from the waters of that flood" (or the fires of a general volcanic conflagration, the commencement of which we already see for our Fifth-Race in the terrible earthquakes and eruptions of these late years, and especially in the present one) . . . which in the season of a pralaya overspreads the world" (the Earth). (See Preface, p. lxxxii., to Wilson's "Vishnu Purana.") Time is only a form of "Vishnu" -- truly, as Parasara says in that Purana. In the Hindu Yuga Kalpa, we have the regular descending series 4, 3, 2, with ciphers multiplied as occasion requires for esoteric purposes, but not, as Wilson and other Orientalists thought, for "sectarian embellishments." A Kalpa may be an age, a "Day" of Brahma, or a sidereal Kalpa, astronomical and earthly. Those calculations are found in all the Puranas, but some differ -- as for instance, "the year of the seven Rishis, 3,030 mortal years, and the year of Dhruva, 9,090 in the Linga Purana," which are again esoteric, and which do represent actual (secret) chronology. As said in the Brahma Vaivarta: "Chronologers compute a Kalpa by the life of Brahma. Minor Kalpas, as Samvarta and the rest, are numerous." "Minor Kalpas" denote here every period of destruction, as was well understood by Wilson himself, who explains the latter as "those in which the Samvarta wind or other destructive agents operate" (Vishnu Purana, p. 54, vol. I.).

[[Vol. 2, Page]] 308 THE SECRET DOCTRINE.

taught that there are seven dawns and seven twilights or fourteen Manvantaras; that at the beginning of every Round and at the end, and on, and between the planets there is an awakening to illusive life, and an awakening to real life; and that, moreover, there are root-Manus, and what we have to clumsily translate as the seed-Manus -- the seeds for the human races of the forthcoming Round (or the Sishas -- the surviving fittest*; a mystery divulged only to those who have passed their third degree in initiation) -- those who have learned all that will be better prepared to understand the meaning of the following. We are told in the Sacred Hindu scriptures that the first Manu produced six other Manus (seven primary Manus in all), and these produced in their turn each seven other Manus** (Bhrihu I, 61-63) -- the production of the latter standing in the occult treatises as 7 x 7. Thus it becomes clear that Manu -- the last one, the progenitor of our Fourth Round Humanity -- must be the seventh, since we are on our fourth Round,*** and there is a root-Manu at globe A and a seed Manu at globe G. Just as each planetary Round commences with the appearance of a 'Root Manu' (Dhyani Chohan) and closes with a 'Seed-Manu,' so a Root and a Seed Manu appear respectively at the beginning and the termination of the human period on any particular planet.**** It will be easily seen from the foregoing statement that a Manu-antaric period means, as the term implies, the time between the

[[Footnote(s)]] -----

* An intuition and a presentiment of the Sishas may be found in Mr. Sinnett's "Esoteric Buddhism," Fifth Edition. See in it Annotations -- the "Noah's Ark Theory" pp. 146, 147.

** The fact that Manu himself is made to declare that he was created by Viraj, and that he then produced the ten Prajapatis, who again produced seven Manus, who in their turn gave birth to seven other Manus (Manu, I, 33-36) relates to other still earlier mysteries, and is at the same time a blind with regard to the doctrine of the Septenary chain, and the simultaneous evolution of seven humanities, or MEN. However, the present work is written on the records of Cis-Himalayan Secret Teachings, and Brahmanical esoteric philosophy may now differ in form as the Kabala does. But they were identical in hoary antiquity.

*** There is another esoteric reason besides this one for it. A Vaivasvata is the seventh Manu, because this our Round, although the Fourth, is in the pre-septenary Manvantara, and the Round itself is in its seventh stage of materiality or physicality. The close of its middle racial point occurred during the Fourth Root Race, when man and all nature reached their lowest state of gross matter. From that time, i.e., from the end of the three and a half races, humanity and nature entered on the ascending arc of their racial cycle.

**** The interval that precedes each Yuga is called a Sandhya, composed of as many hundreds of years as there are thousands in the yuga; and that which follows the latter is named Sandhyamsa, and is of similar duration, we are told in Vishnu Purana. "The interval between the Sandhya and the Sandhyamsa is the yuga denominated Krita, Treta, etc., etc. The (four) Krita, Treta, Dwapara, and Kali constitute a great age, or aggregate of four ages: a 1000 such aggregates are a Day of Brahma; and 14 Manus reign within that term." Now had we to accept this literally then there would be only one Manu for every 4,320,000,000 years. As we are taught that it took 300,000,000 years for the two lower kingdoms to

evolve, and that our humanity is just 18 and some odd millions old -- where were the other Manus spoken of, unless the allegory means what the esoteric doctrine teaches us about the 14 being each multiplied by 49.

[[Vol. 2, Page]] 309 THE BLINDS OF EXOTERICISM.

appearance of two Manus or Dhyani Chohans; and hence a minor Manvantara is the duration of the seven races on any particular planet, and a major manvantara is the period of one human round along the Planetary chain. Moreover, that, as it is said that each of the seven Manus creates 7 x 7 Manus, and that there are 49 root-races on the seven planets during each Round, then every root-race has its Manu. The present seventh Manu is called 'Vaivasvata' and stands in the exoteric texts for that Manu who represents in India the Babylonian Xisuthrus and the Jewish Noah. But in the esoteric books we are told that Manu Vaivasvata, the progenitor of our Fifth race -- who saved it from the flood that nearly exterminated the Fourth (Atlantis) -- is not the seventh Manu, mentioned in the nomenclature of the Root, or primitive-Manus, but one of the 49 Manus emanated from this Root-Manu.

"For clearer comprehension we here give the names of the 14 Manus in their respective order and relation to each Round:--

1st Round

1st (Root) Manu on Planet A -- Swayambhuva.

1st (Seed) Manu on Planet G -- Swarochi (or) Swarotisha.

2nd Round

2nd (R) M. on Planet A -- Uttama.

2nd (S) M. " G -- Thamasa.

3rd Round

3rd (R) M. " A -- Raivata.

3rd (S) M. " G -- Chackchuska.

4th Round

4th (R) M. " A -- Vaivasvata (our progenitor)

4th (S) M. " G -- Savarna

5th Round

5th (R) M. " A -- Daksha Savarna.

5th (S) M. " G -- Brahma Savarna.

6th Round

6th (R) M. " A -- Dharma Savarna.

6th (S) M. " G -- Rudra Savarna.

7th Round

7th (R) M. " A -- Rouchya.

7th (S) M. " G -- Bhoutya.

"Vaivasvata, thus, though seventh in the order given, is the primitive Root-Manu of our fourth Human Wave (the reader must always remember that Manu is not a man but collective humanity), while our Vaivasvata was but one of the seven Minor Manus, who are made to preside over the seven races of this our planet. Each of these has to become the witness of one of the periodical and ever-recurring cataclysms (by fire and water) that close the cycle of every Root-race. And it is this Vaivasvata -- the Hindu ideal embodiment, called respectively Xisuthrus, Deukalion, Noah and by other names -- who is the allegorical man who rescued our race, when nearly the whole population of one hemisphere perished by water, while the other hemisphere was awakening from its temporary obscurity."*

[[Footnote(s)]] -----

* The words "creation," "dissolution," etc., do not render correctly the right meaning of either Manvantara or Pralaya. The Vishnu Purana enumerates several: The dissolution of all things is of four kinds, Parasara is made to say:-- Naimittika (occasional), when Brahma slumbers (his night, when, "At the end of this day occurs a re-coalescence of the Universe, called Brahma's contingent re-coalescence," because Brahma is this universe itself); "Prakritika (elemental), when the return of this universe to its original nature is partial and physical; Atyantika (absolute), identification of the embodied with the incorporeal Supreme spirit -- Mahatmic state, whether temporary or until the following Maha Kalpa: also absolute obscurity -- as of a whole [[Footnote continued on next page]]

[[Vol. 2, Page]] 310 THE SECRET DOCTRINE.

Thus it is shown that there is no real discrepancy in speaking of the Vaivasvata Manvantara (Manu-antara, lit. "between two Manus") 18,000,000 odd years ago, when physical, or the truly human man first appeared in his Fourth Round on this earth; and of the other Vaivasvatas, e.g., the Manu of the Great Cosmic or sidereal Flood (a mystery), or again the Manu Vaivasvata of the submerged Atlantis, when the racial Vaivasvata saved the elect of Humanity, the Fifth Race, from utter destruction. As the several (and quite different) events are purposely blended in the Vishnu and other Puranas in one narrative, there may yet be a great deal of perplexity left in the profane reader's mind. Therefore, as constant elucidation is needed, we must be forgiven unavoidable repetitions. The blinds which conceal the real mysteries of Esoteric philosophy are great and puzzling, and even now the last word cannot be given. The veil, however, may be a little more removed and some explanations, hitherto denied, may now be offered to the earnest student.

As somebody -- Colonel Vans Kennedy, if we do not mistake -- remarked, "the first principle in Hindu religious philosophy is Unity in diversity." If all those Manus and Rishis are called by one generic name, this is due to the fact that they are one and all the manifested Energies of one and the same LOGOS, the celestial, as well as the terrestrial messengers and permutations of that Principle which is ever in a state of activity; conscious during the period of Cosmic evolution, unconscious (from our point of view) during Cosmic rest, as the Logos sleepeth in the bosom of THAT which "sleepeth not," nor is it ever awake -- for it is SAT or Be-ness, not a Being. It is from IT that issues the great unseen Logos, who evolves all the other logoi, the primeval MANU who gives being to the other Manus, who emanate the universe and all in it collectively, and who represent in their aggregate the manifested Logos.* Hence we learn in the "Commentaries" that while no Dhyana Chohan, not even the highest, can realise completely "the condition of the preceding Cosmic evolution," "the Manus retain a knowledge of their experiences of all the Cosmic evolutions throughout Eternity." This is very plain: the first Manu is called Swayambhuva,

[[Footnote(s)]] -----

[[Footnote continued from previous page]] planetary chain, etc.; and Nitya (perpetual) Mahapralaya for the Universe, death -- for man, nitya is the extinction of life, like the extinction of a lamp," also "in sleep at night." Nitya Sarga is "constant or perpetual creation," as Nitya pralaya is "constant or perpetual destruction of all that is born." "That which ensues after a minor dissolution is called ephemeral creation. . . . This is Samyama" (production, existence, and dissolution) (Vishnu Purana, Book I., ch. vii.) The subject is so difficult that we are obliged to repeat our statements.

* But see the superb definitions of Parabrahmam and the Logos in Mr. Subba Row's Lectures on the Bhagavat Gita in the early numbers of the Theosophist of 1887, Feb., March, April, and May.

[[Vol. 2, Page]] 311 THE FOUR EARLIER RACES.

"the Self-manifested," the Son of the unmanifested FATHER. The Manus are the creators of the creators of our First Race -- the Spirit of mankind -- which does not prevent the seven Manus from having been the first "pre-Adamic" men on Earth.

Manu declares himself created by Viraj,* or Vaiswanara, (the Spirit of Humanity),** which means that his Monad emanates from the never resting Principle in the beginning of every new Cosmic activity: that Logos or UNIVERSAL MONAD (collective Elohim) that radiates from within himself all those Cosmic Monads that become the centres of activity -- progenitors of the numberless Solar systems as well as of the yet undifferentiated human monads of planetary chains as well as of every being thereon. Each Cosmic Monad is "Swayambhuva," the SELF-BORN, which becomes the Centre of Force, from within which emerges a planetary chain (of which chains there are seven in our system), and whose radiations become again so many Manus Swayambhuva (a generic name, mysterious and meaning far more than appears), each of these becoming, as a Host, the Creator of his own Humanity. (See "The Manus and the Manvantaras Explained by a Western Mystic and Mathematician.")

As to the question of the four distinct races of mankind that preceded our Fifth Race, there is nothing mystical in it, except the ethereal bodies of the first races; and it is a matter of legendary, nevertheless, very correct history. That legend is universal. And if the Western savant pleases to see in it only a myth, it does not make the slightest difference. The Mexicans had, and still have, the tradition of the fourfold destruction of the world by fire and water, just as the Egyptians had, and the Hindus have, to this day.

Trying to account for the community of legends in the remote antiquity -- held by Chinese, Chaldean, Egyptians, Indians and Greeks -- and for the absence of any certain vestige of civilization more ancient than 5,000 years, the author of "Mythical Monsters," remarks, that "we must not be surprised if we do not immediately discover the vestiges of the people of ten, fifteen, or twenty thousand years ago. With an ephemeral architecture (as in China), the sites of vast cities may have become entirely lost to recollection in a few thousands of years from natural decay . . . and how much more . . . if . . . minor cataclysms have intervened, such as local inundations, earthquakes, deposition of volcanic ashes, the spread of sandy deserts, destruction of life by

[[Footnote(s)]] -----

* See preceding foot-note.

** See Manu I., 32, 33. Vaiswanara is, in another sense, the living magnetic fire that pervades the manifested solar system. It is the most objective (to us the reverse) and ever present aspect of the ONE LIFE, for it is the Vital Principle. (See Theosophist, July, 1883, p. 249). It is also a name of Agni.

[[Vol. 2, Page]] 312 THE SECRET DOCTRINE.

deadly pestilence, by miasma, or by the outpour of sulphurous fumes." ("Mythical Monsters," by Ch. Gould, p. 134.)

And how many of such cataclysms have changed the whole surface of the earth may be inferred from this Stanza:

"During the first seven crores of the Kalpa (70,000,000 years) the Earth and its two Kingdoms (mineral and vegetable), one already having achieved its seventh circle, the other, hardly nascent, are luminous and semi-ethereal, cold, lifeless, and translucent. In the eleventh crore* the mother (Earth) grows opaque, and in the FOURTEENTH** the throes of adolescence take place. These convulsions of nature (geological changes) last till her twentieth crore of years, uninterruptedly, after which they become periodical, and at long intervals."

The last change took place nearly twelve crores of years ago (120,000,000). But the Earth with everything on her face had become cool, hard and settled ages earlier. (Commentary, xxii.)

Thus, if we are to believe esoteric teaching, there have been no more universal geological disturbances and changes for the last 120 millions of years, and the Earth was, even before that time, ready to receive her human stock. The appearance of the latter, however, in its full physical development, as already stated, took place only about eighteen millions of years ago, after the first great failure of nature to create beings alone, without the help of the divine "Fashioners," had been followed by the successive evolution of the first three races (See above Stanzas III. et seq.). The actual duration of the first two and a-half Races is withheld from all but the higher Initiates. The History of the Races begins at the separation of the Sexes, when the preceding egg-bearing androgynous race perished rapidly, and the subsequent sub-races of the

[[Footnote(s)]] -----

* This -- in the period of Secondary creation, so called. Of the Primary, when Earth is in possession of the three Elemental Kingdoms, we cannot speak for several reasons, one of which is, that, unless one is a great seer, or naturally intuitional, he will be unable to realise that which can never be expressed in any existing terms.

** Hippocrates said that number seven "By its occult virtues tended to the accomplishment of all things, to be the dispenser of life and fountain of all its changes." The life of man he divided into seven ages (Shakespeare), for "As the moon changes her phases every seven days, this number influences all sublunary beings," and even the Earth, as we know. With the child, it is the teeth that appear in the seventh month and he sheds them at seven years; at twice seven puberty begins, at three times seven all our mental and vital powers are developed, at four times seven he is in his full strength, at five times seven his passions are most developed, etc., etc. Thus for the Earth. It is now in its middle age, yet very little wiser for it. The Tetragrammaton, the four-lettered sacred name of the Deity, can be resolved on Earth only by becoming Septenary through the manifest triangle proceeding from the concealed Tetraktis. Therefore, the number seven has to be adopted on this plane. As written in the Kabala "The greater Holy Assembly" v. 1161:-- "For assuredly there is no stability in those six, save (what they derive) from the seventh. For all things depend from the SEVENTH."

[[Vol. 2, Page]] 313 THE ESOTERIC MEANING OF "FISH."

Third Root-Race appeared as an entirely new race physiologically. It is this "destruction" which is called allegorically the great "Vaivasvata Manu Deluge," when the account shows Vaivasvata Manu (or "Humanity") remaining alone on Earth in the Ark of Salvation towed by Vishnu in the shape of a monstrous fish, and the Seven Rishis "with him." The allegory is very plain:--

In the Symbolism of every nation, the "Deluge" stands for Chaotic unsettled matter -- Chaos itself: and the Water for the feminine principle -- the "Great Deep." As the Greek Lexicon of Parkhurst gives it -- "Arche (ark) answers to the Hebrew rasis, or Wisdom . . . and (at the same time) to the emblem of the female generative power, the Arg or Arca, in which the germ of nature (and of mankind) floats or broods on the great Abyss of the waters, during the interval which takes place after every mundane (or racial) cycle." Ark is also the mystic name of the divine spirit of life which broods over chaos. Now Vishnu is the divine Spirit, as an abstract principle, and also as the Preserver and Generator, or Giver of life -- the third person of the Trimurti (composed of Brahma, the Creator, Siva, the Destroyer, and Vishnu, the Preserver). Vishnu is shown in the allegory as guiding, under the form of a fish, the Ark of Vaivasvata Manu clean across the waters of the Flood. There is no use in expatiating upon the esoteric meaning of the word fish. (See Payne Knight, Inman, Gerald Massey, etc.) Its theological meanings is phallic, but the metaphysical, divine. Jesus is called the "Fish," and so were Vishnu and Bacchus: [[les]], the "Saviour" of mankind, being but the monogram of the god Bacchus called [[Ichthus]], the fish.* As to the Seven Rishis in the Ark, they symbolised the seven principles, which became complete in man only after he had separated, and become a human, and no longer a divine creature. (See for further details, "The Seventh Manu.")

Nor have we many details about the submersion of the continent inhabited by the Second Root Race. But the history of the Third, "Lemuria," is given, as is that of Atlantis, the others being only alluded to. Lemuria is said to have perished about 700,000 years before the commencement of what is now called the Tertiary age (the Eocene),** and it is during this Deluge also -- an actual geological deluge this time -- that Vaivasvata Manu is again shown as saving mankind (allegorically it is mankind, or a portion of it, the Fourth Race, which is saved); so also he saves the Fifth Race during the destruction of the last Atlanteans, the

[[Footnote(s)]] -----

* Says St. Augustin of Jesus, "For he is a fish that lives in the midst of waters." Christians called themselves little fishes -- pisciculi -- in their sacred mysteries. "So many fishes bred in the water, and saved by one great fish," says Tertullian of the Christians and Christ and the Church.

** "Esoteric Buddhism," p. 55.

[[Vol. 2, Page]] 314 THE SECRET DOCTRINE.

remnants that perished 850,000 years ago,* after which there was no great submersion until the day of Plato's Atlantis, or Poseidonis, known to the Egyptians only because it happened in such relatively recent times.

It is the submersion of the great Atlantis which is the most interesting. It is of this cataclysm that the old records (See the "Book of Enoch") say that "the ends of the Earth got loose;" and upon which the legends and allegories of Vaivasvata, Xisuthrus, Noah, Deukalion and all the tutti quanti of the Elect saved, have been built. Tradition, taking into no account the difference between sidereal and geological phenomena, calls both indifferently "deluges." Yet there is a great difference. The cataclysm which destroyed the huge continent of which Australia is the largest relic, was due to a series of subterranean convulsions and the breaking asunder of the ocean floors. That which put an end to its successor -- the fourth continent -- was brought on by successive disturbances in the axial rotation. It began during the earliest tertiary periods, and, continuing for long ages, carried away successively the last vestige of Atlantis, with the exception, perhaps, of Ceylon and a small portion of what is now Africa. It changed the face of the globe, and no memory of its flourishing

continents and isles, of its civilizations and sciences, remained in the annals of history, save in the Sacred records of the East.

Hence, Modern Science denies Atlantis and its existence. It even denies any violent shiftings of the Earth's axis, and would attribute the reason for the change of climates to other causes. But this question is still an open one. If Dr. Croll will have it that all such alterations can be accounted for by the effects of nutation and the precession of the equinoxes, there are other men of Science, such as Sir H. James (Athenaeum, Aug. 25, 1860), and Sir John Lubbock (ibid), who feel more inclined to accept the idea that they are due to a change in the position of the axis of rotation. Against this the majority of the astronomers are again arrayed. But then, what have they not denied before now, and what have they not denounced -- only to accept it later on whenever the hypothesis became undeniable fact?

How far our figures agree, or rather disagree with modern Science will be seen further in the Addenda to this Book, where the geology and anthropology of our modern day are carefully compared with the same in Archaic Science. At any rate, the period assigned in the Secret Doctrine for the sinking of Atlantis, does not seem to disagree

[[Footnote(s)]] -----

* This event, the destruction of the famous island of Ruta and the smaller one Daitya, which occurred 850,000 years ago in the later Pliocene times, must not be confounded with the submersion of the main continent of Atlantis during the Miocene period. Geologists cannot place the Miocene only so short a way back as 850,000 years; whatever they do, it is several million years ago that the main Atlantis perished.

[[Vol. 2, Page]] 315 THE INNER MAN IN THE ZOHAR.

very much with the calculations of Modern Science, which calls Atlantis "Lemuria," however, whenever it accepts such a submerged continent. With regard to the pre-human period, all that can be said, at present, is, that even up to the appearance of the "Mindless" First Race, the Earth was not without its inhabitants. More may be said: that which Science -- recognizing only physical man -- has a right to regard as the prehuman period, may be conceded to have extended from the First Race down to the first half of the Atlantean race, since it is only then that man became the "complete organic being he is now." And this would make Adamic man no older than a few million of years.*

The author of the Qabbalah remarks truly that "Man to-day, as an individual, is only a concatenation of the being-hood of precedent human life," or lives, rather. "According to the Qabbalah, the soul sparks contained in Adam (Rishoun), went into three principal classes corresponding to his three sons, viz.: Hesed, Habel, Ge-boor-ah, Qai-yin and Ra'hmin Seth. These three were divided into 70 species, called: the principal roots of the human race." (p. 422.)

"Said Rabbi Jehudah: 'How many garments (of the incorporeal man) are these which are crowned' (from the day man was 'created')? Said R. El'azar: 'The mountains of the world (the great men of the generation) are in discussion upon it, but there are three: one to clothe in that garment the Rua'h spirit, which is in the garden (of Eden) on earth: one which is more precious than all, in which the Neshamah is clothed in that Bundle of Life, between the angels of the Kings . . . : and one outside garment, which exists and does not exist, is seen and not seen. In that garment, the Nephesh is clothed, and she goes and flies in it, to and fro in the world.'" (Zohar I., 119b. col. 475; Qabbalah, 412.)

This relates to the races (their "garments," or degree of materiality) and to the three principles of man in their three vehicles.

[[Footnote(s)]] -----

* Mr. Huxley divides those races into the quintuple group of Australioids, Negroids, Mongoloids, Xanthochroics and Melanochroics -- all issuing from imaginary Anthropoids. And yet, while protesting against those who say "that the structural differences between man and apes are small and insignificant," and adding that "every bone of the gorilla bears a mark by which it can be distinguished from a corresponding human bone," and that "in the present state of creation, at least, no intermediary being fills the gap which separates the man from the troglodyte" -- the great anatomist goes on speaking of the Simian characteristics in Man! (See de Quatrefages' "The Human Species," p. 113.)

[[Vol. 2, Page]] 316 THE SECRET DOCTRINE.

STANZA XI.
THE CIVILIZATION AND DESTRUCTION OF THE FOURTH AND FIFTH RACES.

§§ (43) The Lemuro-Atlanteans build cities and spread civilization. The incipient stage of anthropomorphism. (44) Their statues, witnesses to the size of the Lemuro-Atlanteans. (45) Lemuria destroyed by fire, Atlantis by water. The Flood. (46) The destruction of the fourth race and of the last antediluvian monster-animals.

43. THEY (the Lemurians) BUILT HUGE CITIES. OF RARE EARTHS AND METALS THEY BUILT. OUT OF THE FIRES (lava) VOMITED. OUT OF THE WHITE STONE OF THE MOUNTAINS (marble) AND THE BLACK STONE (of the subterranean fires) THEY CUT THEIR OWN IMAGES, IN THEIR SIZE AND LIKENESS, AND WORSHIPPED THEM (a).

(a) As the History of the first two human races -- the last of the Lemurians and the first of the future Atlanteans -- proceeds, we have at this point to blend the two, and speak of them for a time collectively.

Here reference is also made to the divine Dynasties, such as were claimed by the Egyptians, Chaldeans, Greeks, etc., to have preceded their human kings; they are still believed in by the modern Hindus, and are enumerated in their sacred books. But of these we shall treat in their proper place. What remains to be shown is, that our modern geologists are now being driven into admitting the evident existence of submerged continents. But to confess their presence is not to accept that there were men on them during the early geological periods;* --

[[Footnote(s)]] -----

* This is the reason why, perhaps, even Easter Island with its wondrous gigantic statues -- a speaking witness to a submerged continent with a civilized mankind on it -- is hardly mentioned anywhere in the modern Encyclopaedias. Its mention is carefully avoided except in some books of Travels; modern science has an undeniable predilection for forcing upon the cultured public hypotheses, built on personal hobbies, as well-established evidence, for offering it guesses instead of Knowledge, and calling them "scientific conclusions." Its specialists will evolve a thousand and one contradictory speculations rather than confess an awkward self-evident fact -- pre-eminent among such specialists being Haeckel and his English admirers and co-thinkers. Yet "they are authorities" -- we are sternly reminded. What of that? The Pope of Rome is also an AUTHORITY and an infallible one -- for his followers; whereas the remarkable fallibility of Scientific speculations is being proven periodically with every change of the moon.

[[Vol. 2, Page]] 317 PRESENTMENTS OF TRUTHS.

ay, men and civilized nations, not Palaeolithic savages only; who, under the guidance of their divine Rulers, built large cities, cultivated arts and sciences, and knew astronomy, architecture and mathematics to perfection. This primeval civilization did not, as one may think, immediately follow their physiological transformation. Between the final evolution and the first city built, many hundred thousands of years had passed. Yet, we find the Lemurians in their sixth sub-race building their first rock-cities out of stone and lava.* One of such great cities of primitive structure was built entirely of lava, some thirty miles west from where Easter Island now stretches its narrow piece of sterile ground, and was entirely destroyed by a series of volcanic eruptions. The oldest remains of Cyclopean buildings were all the handiwork of the Lemurians of the last sub-races; and an occultist shows, therefore, no wonder on learning that the stone relics found on the small piece of land called Easter Island by Captain Cook, are "very much like the walls of the Temple of Pachacamac or the Ruins of Tia-Huanuco in Peru," ("The Countries of the World," by Robert Brown, Vol. 4, p. 43); and that they are in the CYCLOPEAN STYLE. The first large cities, however, appeared on that region of the continent which is now known as the island of Madagascar. There were civilized people and savages in

[[Footnote(s)]] -----

* Our best modern novelists, who are neither Theosophists nor Spiritualists, begin to have, nevertheless, very psychological and suggestively Occult dreams: witness Mr. Louis Stephenson and his Dr. Jekyll and Mr. Hyde, than which no grander psychological essay on Occult lines exists. Has the rising novelist, Mr. Rider Haggard, also had a prophetic or rather a retrospective clairvoyant dream before he wrote "SHE"? His imperial Kor, the great city of the dead, whose surviving living men sailed northwards after the plague had killed almost a whole nation, seems to step out in its general outlines from the imperishable pages of the old archaic records. Ayesha suggests "that those men who sailed north may have been the fathers of the first Egyptians"; and then seems to attempt a synopsis of certain letters of a MASTER quoted in "Esoteric Buddhism." For, she says, "Time after time have nations, ay, and rich and strong nations, learned in the arts, been, and passed away, and been forgotten, so that no memory of them remains. This (the nation of Kor) is but one of several; for time eats up the work of man unless, indeed, he digs in caves like the people of Kor, and then mayhap the sea swallows them, or the earthquake shakes them in. . . . Yet were not these people utterly destroyed, as I think. Some few remained in the other cities, for their cities were many. But the barbarians . . . came down upon them, and took their women to wife, and the race of the Amahagger that is now is a bastard brood of the mighty sons of Kor, and behold it dwelleth in the tombs with its fathers' bones. . ." (pp. 180, 181.)

Here the clever novelist seems to repeat the history of all the now degraded and down-fallen races of humanity. The Geologists and Anthropologists would place at the head of humanity as descendants of Homo primigenius, the ape-man, of which "NO FOSSIL REMAINS ARE AS YET KNOWN TO US," but (which) "were PROBABLY akin to the gorilla and orang of the present day" (Haeckel). In answer to whose "probably," occultists point to another and a greater probability -- the one given in our text. (See above.)

[[Vol. 2, Page]] 318 THE SECRET DOCTRINE.

those days as there are now. Evolution achieved its work of perfection with the former, and Karma -- its work of destruction on the latter. The Australians and their like are the descendants of those, who, instead of vivifying the spark dropped into them by the "Flames," extinguished it by long generations of bestiality.* The Aryan nations could trace their descent through the Atlanteans from the more spiritual races of the Lemurians, in whom the "Sons of Wisdom" had personally incarnated.**

It is with the advent of the divine Dynasties that the first civilizations were started. And while, in some regions of the Earth, a portion of mankind preferred leading a nomadic and patriarchal life, and in others savage man was hardly learning to build a fire and to protect himself against the Elements, his brothers -- more favoured than he by their Karma, and helped by the divine intelligence which informed them -- built cities, and cultivated arts and sciences. Nevertheless, and civilization notwithstanding--

[[Footnote(s)]] -----

* See Stanza II, ante. This would account for the great difference and variation between the intellectual capacities of races, nations, and individual men. While incarnating, and in other cases only informing the human vehicles evolved by the first brainless (manasless) race, the incarnating Powers and Principles had to make their choice between, and take

into account, the past Karmas of the Monads, between which and their bodies they had to become the connecting link. Besides which, as correctly stated in "Esoteric Buddhism" (p. 30), "the fifth principle, or human (intellectual) soul, in the majority of mankind is not even yet fully developed."

** It is said by Krishna, the Logos incarnate, in the Bhagavat-gita, "The seven great Rishis, the four preceding Manus, partaking of my nature, were born from my mind: from them sprang (emanated or was born) the human race and the world," (Chap. X. Verse 6.)

Here, by the seven great Rishis, the seven great rupa hierarchies or classes of Dhyana Chohans, are meant. Let us bear in mind that the Saptarshi (the seven Rishis) are the regents of the seven stars of the Great Bear, therefore, of the same nature as the angels of the planets, or the seven great Planetary Spirits. They were all reborn, all men on earth in various Kalpas and races. Moreover, "the four preceding Manus" are the four classes of the originally arupa gods -- the Kumaras, the Rudras, the Asuras, etc.: who are also said to have incarnated. They are not the Prajapatis, as the first are, but their informing principles -- some of which have incarnated in men, while others have made other men simply the vehicles of their reflections. As Krishna truly says --the same words being repeated later by another vehicle of the LOGOS -- "I am the same to all beings. . . . those who worship me (the 6th principle or the intellectual divine Soul, Buddhi, made conscious by its union with the higher faculties of Manas) are in me, and I am in them." (Ibid, 29.) The Logos, being no personality but the universal principle, is represented by all the divine Powers born of its mind -- the pure Flames, or, as they are called in Occultism, the "Intellectual Breaths" -- those angels who are said to have made themselves independent, i.e., passed from the passive and quiescent, into the active state of Self-Consciousness. When this is recognised, the true meaning of Krishna becomes comprehensible. But see Mr. Subba Row's excellent lecture on the Bhagavatgita, ("Theosophist," April 1887, p. 444.)

[[Vol. 2, Page]] 319 DEGENERATION OF MANKIND.

ing, while their pastoral brethren enjoyed wondrous powers as their birthright, they, the builders, could now obtain theirs only gradually; even these being generally used for power over physical nature and selfish and unholy purposes. Civilization has ever developed the physical and the intellectual at the cost of the psychic and spiritual. The command and the guidance over his own psychic nature, which foolish men now associate with the supernatural, were with early Humanity innate and congenital, and came to man as naturally as walking and thinking. "There is no such thing as magic" philosophises "SHE," the author forgetting that "magic" in her early day still meant the great SCIENCE OF WIDOM, and that Ayesha could not possibly know anything of the modern perversion of thought -- "though there is such a thing as knowledge of the Secrets of Nature." (p. 152). But they have become "Secrets" only in our race, and were public property with the Third.

Gradually, mankind went down in stature, for, even before the real advent of the Fourth or Atlantean race, the majority of mankind had fallen into iniquity and sin, save the hierarchy of the "Elect," the followers and disciples of the "Sons of Will and Yoga" -- called later the "Sons of the Fire Mist."

Then came the Atlanteans; the giants whose physical beauty and strength reached their climax, in accordance with evolutionary law, toward the middle period of their fourth sub-race. But, as said in the Commentary:--

The last survivors of the fair child of the White Island (the primitive Sveta-dwipa) had perished ages before. Their (Lemuria's) elect, had taken shelter on the sacred Island (now the "fabled" Shamballah, in the Gobi Desert), while some of their accursed races, separating from the main stock, now lived in the jungles and underground ("cave-men"), when the golden yellow race (the Fourth) became in its turn "black with sin." From pole to pole the Earth had changed her face for the third time, and was no longer inhabited by the Sons of Sveta-dwipa, the blessed, and Adhityanya, east and west, the first, the one and the pure, had become corrupted. . . . The demi-gods of the Third had made room for the semi-demons of the Fourth Race. Sveta-dwipa, whose northern parts of the Toyambudhi the seven Kumaras (Sanaka, Sananda, Sanatana, Sanatkumara, Jata, Vodhu, and Panchasikha) had visited, agreeably with exoteric tradition (See the Uttara Khanda of the Padma Purana; Asiat. Researches also, Vol. XI., pp. 99, 100); the White Island had veiled her face. Her children now lived on the Black land, wherein, later on, Daityas from the seventh Dwipa (Pushkara) and Rakshasas from the seventh

[[Vol. 2, Page]] 320 THE SECRET DOCTRINE.

climate replaced the Saddhus and the ascetics of the Third age, who "had descended to them from other and higher regions." . . .

It is evident that, taken in their dead letter, the Puranas read as an absurd tissue of fairy tales and no better. But if one reads chapters I., II. and III. from Book II. (Vol. II.) of Vishnu Purana and accepts verbatim its geography, geodesy, and ethnology, in the matter of Priyavrata's seven sons, among whom the father divides the seven Dwipas (Continental Islands); and then proceeds to study how the eldest son, the King of Jambu-dwipa, Agnidhra, apportioned Jambu-dwipa among his nine sons; and then how Nabhi his son, who had a hundred sons and apportioned all these in his turn -- then the reader is likely to throw the book away and pronounce it a farrago of nonsense. But the esoteric student will understand that, in the days when the Puranas were written, the true meaning was clear only to the Initiated Brahmins, who wrote those works allegorically and would not give the whole truth to the masses. And he will explain to the Orientalists who, beginning with Colonel Wilford and ending with Professor Weber, made and still are making such a mess of it, that the first three chapters (See Wilson's trans. of Vishnu Purana Book II et seq.) purposely confuse the following subjects and events:--

I. The series of Kalpas or Ages (also of Races) are never taken into account; e.g., events which have happened in one being allowed to stand along with those which took place in another. The chronological order is entirely ignored. This is shown by several of the Sanskrit commentators, who explain the incompatibility of events and calculations in saying -- "Whenever any contradictions in different Puranas are observed, they are ascribed . . . to differences of Kalpas and the like" (Vishnu and Bhagavata Puranas).

II. The several meanings of the words "Manvantara" and "Kalpa" or age, are withheld, and the general one only given.

III. In the genealogy and geography of the Kings and their Varshas (countries) and Dwipas, they are all allowed to be regarded as terrestrial regions.

Now, the truth is that, without entering into too minute details, it is easy and permissible to show that:--

(a) The Seven Dwipas apportioned to Priyavrata's septenary progeny refer to several localities: first of all to our planetary chain. Jambu-dwipa alone representing our globe, the six others are the (to us) invisible companion globes of this earth. This is shown by the very nature of the allegorical and symbolic descriptions. Jambu (dwipa) "is in the centre of all these (the so-called insular continents) and is surrounded" by a sea of salt water (lavana), whereas Plaksha, Salmalia,

[[Vol. 2, Page]] 321 THE HINDU SYMBOLIZATION.

Kusa, Krauncha, Saka and Pushkara, are "surrounded severally -- by great seas of sugar-cane juice, of wine, of clarified butter, of curds, of milk," etc., etc., and such like metaphorical names. (Chap. II, Book II) This is shown furthermore by --

(b) Bhaskara Acharya, who uses expressions from the Secret Doctrine and its books, in his description of the sidereal position of all these dwipas:-- "the sea of milk and the sea of curds" etc., meaning the Milky Way, and the various congeries of nebulae; the more so, since he names "the country to the south of the equator Bhur-loka, that to the north Bhuva-loka, Swar, Mahar, Jana, Tapo and Satya lokas"; and says: "Those lokas are gradually attained by increasing religious merits," i.e., they are various paradises. (See Bibliotheca Indica. Trans. of the Goladhyaya of the Siddhanta-siromani III., 21-44).

(c) That this geographical division of seven allegorical continents, islands, mountains, seas and countries, does not belong only to our Round nor even to our races (the name of Bharata Varsha (India) notwithstanding), is explained in the texts themselves by the narrator of Vishnu Purana. For he closes the first chapter by saying: "Bharata (the son of Nabhi, who gave his name to Bharata-Varsha or India) consigned the Kingdom to his son Sumati . . . and abandoned his life at Salagrama. He was afterwards born again as a religious Brahman, in a distinguished family of ascetics . . . under these princes (Bharata's descendants) Bharata Varsha was divided into nine portions, and their descendants held successively possession of the country for seventy-one periods of the aggregate of the four ages," or the reign of a Manu, representing a Mahayuga of 4,320,000 years.

But having said so much, Parasara suddenly explains that "this was the creation of Swayambhuva Manu, by which the earth was peopled when he presided over the first Manvantara, in the Kalpa of Varaha," i.e., the boar incarnation, or Avatar. Now every Brahmin knows that it is only with Vaivasvata Manu that our Humanity began on this Earth (or Round). And if the Western reader turns to the sub-section on "The Primeval Manus of Humanity," he will see that Vaivasvata is the seventh of the fourteen Manus who preside over our planetary chain during its life cycle: i.e., that representing or standing in every Round for two Manus of the same name (a Root and a Seed Manu), he is the Root Manu of the Fourth Round, hence the seventh. Wilson finds in this only "an incongruity" (see his Vishnu Purana, vol. II., p. 108, footnote), and speculates that "the patriarchal genealogies are older than the chronological system of Manvantaras and Kalpas," and thus "have been rather clumsily distributed amongst the different periods." It is nothing of the kind.

[[Vol. 2, Page]] 322 THE SECRET DOCTRINE.

But as Orientalists know nothing of the secret teaching, they will take everything literally, and then turn round and abuse the writers of that which they do not comprehend!

These genealogies embrace a period of three and a half Rounds; they speak of pre-human periods, and explain the descent into generation of every Manu -- the first manifested sparks of the ONE Unity -- and show, furthermore, each of these human sparks dividing into, and multiplying by, first, the Pitars, the human ancestors, then by human Races. No being can become God, or Deva, unless he passes through the human cycles. Therefore the Sloka says, "Happy are those who are born, even from the (latent) condition of gods, as men, in Bharata-varsha; as that is the way to . . . final liberation." In Jambu-dwipa, Bharata is considered the best of its divisions, because IT IS THE LAND OF WORKS. In it alone "it is that the succession of four Yugas (ages), the Krita, the Treta, the Dwapara, and Kali take place"; when, therefore, Parasara, asked by Maitreya "to give him the descriptions of the Earth," returns again to the enumeration of the same Dwipas with the same seas, etc., as those he had described in the Swayambhuva Manvantara -- it is simply a blind, yet, to him who reads between the lines, the Four great Races and the Fifth are there, ay, with their sub-divisions, islands, and continents, some of which were called by the names of celestial lokas, and by those of other globes. Hence the confusion.

All these are called by the Orientalists "mythical" and "fabulous" islands and lands.* Very true, some are not of this earth, but they still exist. The "White Island" and Atala, at all events, are no myths, since the latter was the name contemptuously applied by the earliest pioneers of the Fifth Race to the land of Sin -- Atlantis, in general, not to Plato's island alone; and since the former was (a) the Sveta-dwipa of theogony, and (b) Saka-dwipa, or Atlantis (its earliest portions) in its beginnings. This was when it yet had its "seven holy rivers that washed away all sin," and its "seven districts, wherein there was no dereliction of virtue, no contention, no deviation from virtue," as it was then inhabited by the caste of the Magas -- that caste which even the Brahmins acknowledged as not inferior to their own -- and which was

[[Footnote(s)]] -----

* In a lecture, Professor Pengelly, F.R.S., quoting Professor Oliver, makes him say "that the present Atlantic islands' Flora affords no substantial evidence of a former direct communication with the mainland of the New World," but himself adds that, at the same time, "at some period of the Tertiary epoch, N. E. Asia was united to N. W. America, perhaps by the line

where the Aleutian chain of islands now extends." Thus Occult Science alone can reconcile the contradictions and hesitations of modern Science. Moreover, surely the argument for the existence of Atlantis does not rest on Botany alone.

[[Vol. 2, Page]] 323 THE MAGIS IN THE DAYS OF KRISHNA.

the nursery of the first Zaratushta. The Brahmins are shown consulting with Gauramukha, on Narada's advice, who told them to invite the Magas as priests of the Sun in the temple built by Samba (the reputed) son of Krishna, who in reality had none. In this the Puranas are historical --allegory notwithstanding -- and Occultism is stating facts.

The whole story is told in Bhavishya Purana. It is stated that, having been cured by Surya (the Sun) of leprosy, Samba, having built a temple dedicated to the Sun, was looking for pious Brahmins to perform the appointed rites in it, and receive donations made to the God. But Narada (this virgin ascetic whom one finds in every age in the Puranas) advised him not to do so, as Manu forbade the Brahmins to receive emoluments for the performance of religious rites. He therefore referred Samba to Gauramukha (white face), the Purohita or family priest of Hgrasena, King of Mathura, who would tell him whom he could best employ. The priest directed Samba to invite the Magas, the worshippers of Surya, to discharge the duty. Ignorant of the place they lived in, it is Surya, the Sun himself, who directs Samba to Sakadwipa beyond the salt water. Then Samba performs the journey, using Garuda (Vishnu's and Krishna's vehicle, the great Bird) who lands him among the Magas, etc.

Now Krishna, who lived 5,000 years ago, and Narada, who is found reborn in every cycle (or race), besides Garuda -- the symbol esoterically of the great cycle -- show the allegory; yet the Magas are the Magi of Chaldea, and their class and worship were born on the earlier Atlantis, in Saka-dwipa, the Sinless. All the Orientalists are agreed that the Magas of Saka-dwipa are the forefathers of the fire-worshipping Parsis. Our quarrel with them rests, as usual, on their dwarfing hundreds of thousands to a few centuries this time: they carry the event -- Narada and Samba notwithstanding -- to the days of the flight of the Parsis to Gujerat, which is simply absurd, as that was in the VIIIth cent. of our era. Though the Magas in the Bhavishya Purana are credited with still living in Saka-dwipa in the day of Krishna's Son, yet the last of it -- Plato's "Atlantis" -- had perished 6000 years before. They were Mag "late of" Saka-Dwipa, and lived in those days in Chaldea. This is an intentional confusion, again.

The earliest pioneers of the Fourth Race were not Atlanteans, nor yet the human Asuras and the Rakshasas which they became later. In those days large portions of the future continent of Atlantis were yet part and parcel of the Ocean floors. "Lemuria," as we have called the continent of the Third Race, was then a gigantic land.* It covered

[[Footnote(s)]] -----

* As shown in the Introduction, it stands to reason that neither the name of Lemuria nor even Atlantis are the real archaic names of the lost continents, but have been adopted by us for the sake of clearness. Atlantis was the name given to those [[Footnote continued on next page]]

[[Vol. 2, Page]] 324 THE SECRET DOCTRINE.

the whole area of space from the foot of the Himalayas, which separated it from the inland sea rolling its waves over what is now Tibet, Mongolia, and the great desert of Schamo (Gobi); from Chittagong, westward to Hardwar, and eastward to Assam. From thence, it stretched South across what is known to us as Southern India, Ceylon, and Sumatra; then embracing on its way, as we go South, Madagascar on its right hand and Australia and Tasmania on its left, it ran down to within a few degrees of the Antarctic Circle; when, from Australia, an inland region on the Mother Continent in those ages, it extended far into the Pacific Ocean, not only beyond Rapa-nui (Teapy, or Easter Island) which now lies in latitude 26 S., and longitude 110 W. (See Addenda to this Book II., Section, "Proofs of the Submerged Continents.") This statement seems corroborated by Science, -- even if only partially; as, when discussing continental trends, and showing the infra-Arctic masses trending generally with the Meridian, several ancient continents are generally mentioned, though inferentially. Among such the "Mascarene continent," which included Madagascar, stretching north and south, is spoken of, and the existence of another ancient continent running "from Spitzbergen to the Straits of Dover, while most of the other parts of Europe were sea bottom," is taught.* The latter corroborates, then, the Occult teaching which shows the (now) polar regions as the earliest of the seven cradles of Humanity, and as the tomb of the bulk of the mankind of that region during the Third Race, when the gigantic continent of Lemuria began separating into smaller continents. This is due, according to the explanation in the Commentary, to a decrease of velocity in the earth's rotation:--

"When the Wheel runs at the usual rate, its extremities (the poles) agree with its middle circle (equator), when it runs slower and tilts in every direction, there is a great disturbance on the face of the Earth. The waters flow toward

[[Footnote(s)]] -----

[[Footnote continued from previous page]] portions of the submerged Fourth-Race continent which were "beyond the pillars of Hercules," and which happened to keep above water after the general cataclysm. The last remnant of these -- Plato's Atlantis, or the "Poseidon" (another substitute or rather a translation of the real name) -- was the last of it some 11,000 years ago. Most of the correct names of the countries and islands of both continents are given in the Puranas; but to mention them specially, as found in other more ancient works, such as the Surya Siddhanta, would necessitate too lengthy explanations. If, in earlier writings, the two seem to have been too faintly disconnected, this must be due to careless reading and want of reflection. If ages hence, Europeans are referred to as Aryans, and a reader confuses them with the Hindus and the latter with the Fourth Race, as they live (some of them) in ancient Lanka -- the blame will not fall on the writer.

* See Professor Dana's article, "American Journal of Science," III, v. 442-3; Prof. Winchell's "World Life"; and other geological works.

the two ends, and new lands arise in the middle belt (equatorial lands), while those at the ends are subject to pralayas by submersion"

And again:--

. . . "Thus the wheel (the Earth) is subject to, and regulated by, the Spirit of the Moon, for the breath of its waters (tides). Toward the close of the age (Kalpa) of a great (root) race, the regents of the moon (the Pitar fathers, or Pitris) begin drawing harder, and thus flatten the wheel about its belt, when it goes down in some places and swells in others, and the swelling running toward the extremities (poles) new lands will arise and old ones be sucked in."

We have but to read astronomical and geological works, to see the meaning of the above very clearly. Scientists (modern Specialists) have ascertained the influence of the tides on the geological distribution of land and water on the planets, and the shifting of the oceans with a corresponding subsidence and rise of continents and new lands. Science knows, or thinks it knows, that this occurs periodically.* Professor Todd believes he can trace the series of oscillations backward to the periods of the earth's first incrustation. (See "American Naturalist," XVIII., 15 et seq.); therefore it seems easy for Science to verify the Esoteric statements. We propose to treat of this at greater length in the Addenda. (Vide §§ V. and VI.)

It is asked by some Theosophists: "What will Atlantis be like when raised?" they understanding from a few words in "Esoteric Buddhism" that "old continents" that have been submerged will reappear. Here, again, there is a slight misconception. Were the same identical lands of Atlantis that were submerged to be raised again, then they would, indeed, be barren for ages. Because the Atlantic sea-bottom is covered with some 5,000 feet of chalk at present, and more is forming -- a new "cretaceous formation" of strata, in fact -- is no reason why, when the time for a new continent to appear arrives, a geological convulsion and upraising of the sea bottom should not dispose of these 5,000 feet of chalk for the formation of some mountains and 5,000 more come to the surface. The racial cataclysms are not a Noah's deluge for forty days -- a kind of Bombay monsoon.

[[Footnote(s)]] -----

* Speaking on periodical elevation and subsidence of the equatorial and polar regions, and ensuing changes of climate, Mr. Winchell (professor of Geology at Michigan) says -- "As the movements here contemplated are cyclical, the same conditions would recur again and again; and accordingly the same fauna might return again and again to the same region, with intervals of occupation by another fauna. Progressive sedimentation would preserve the records of such faunal alterations; and there would be presented the phenomena of 'colonies' 're-appearitions' and other faunal dislocations in the vertical and horizontal distributions of fossil remains. These phenomena are well known to the student of geology." ("Effects of Astronomical Changes.")

That the periodical sinking and re-appearance of the mighty continents, now called Atlantis and Lemuria by the modern writers, is no fiction, will be demonstrated in the Section in which all the proofs of the same have been collated together. The most archaic Sanskrit and Tamil works teem with references to both Continents. The seven sacred Islands (Dwipas) are mentioned in the Surya Siddhanta, the oldest astronomical work in the whole world, and in the works of Asura Maya, the Atlantean astronomer whom Professor Weber has made out re-incarnated in Ptolemy. Yet, it is a mistake to call these "sacred islands" Atlantean -- as done by us; for, like everything else in the Hindu Sacred Books, they are made to refer to several things. The heirloom left by Priyavrata, the Son of Swayambhuva Manu, to his seven sons -- was not Atlantis, even though one or two of these islands survived the subsidence of their fellows, and offered shelter, ages later, to Atlanteans, whose continent had been submerged in its turn. When originally mentioned by Parasara (Vishnu Purana) the seven refer to an esoteric doctrine which is explained further on. Of all the seven islands, Jambu-dwipa is the only one that is terrestrial, for it is our globe. In the Puranas every reference to the North of Meru is connected with that primeval Eldorado, now the North Polar region; which, when the magnolia blossomed there where now we see an unexplored endless desert of ice, was then a continent again. Science speaks of an ancient continent which stretched from Spitzbergen down to the Straits of Dover. The Secret Doctrine teaches that, in the earliest geological periods, these regions formed a horse-shoe-like continent, whose one end, the Eastern, far more northward than North Cornwall, included Greenland, and the other contained Behring Straits as an inland piece of ground, and descended southward in its natural trend down to the British Isles, which in those days must have been right under the lower curve of the semi-circle. This continent was raised simultaneously with the submersion of the equatorial portions of Lemuria. Ages later, some of the Lemurian remains re-appeared again on the face of the Oceans. Therefore, though it can be said without departing from truth that Atlantis is included in the Seven great insular continents, since the Fourth Race Atlanteans got some of the Lemurian relics, and, settling on the islands, included them among their lands and continents, yet a difference should be made and an explanation given, once that a fuller and more accurate account is attempted, as in the present work. Easter Island was also taken possession of in this manner by some Atlanteans; who, having escaped from the cataclysm which befell their own land, settled on that remnant of Lemuria only to perish thereon, when destroyed in one day by its volcanic fires and lava. This may be regarded as fiction by certain geographers and geologists; to the Occul-

tists it is history. What does Science know to the contrary? "Until the appearance of a map, published at Basle in 1522, wherein the name of America appears for the first time, the latter was believed to be part of India Science also refuses to sanction the wild hypothesis that there was a time when the Indian peninsula at one end of the line, and South America at the other, were connected by a belt of islands and continents. The India of the pre-historic ages was doubly connected with the two Americas. The lands of the ancestors of those whom Ammianus Marcellinus calls the 'Brahmans of Upper India' stretched from Kashmir far into the (now) deserts of Schamo. A pedestrian from the north

might then have reached -- hardly wetting his feet -- the Alaskan peninsula, through Manchooria, across the future Gulf of Tartary, the Kurile and Aleutian islands; while another traveller, furnished with a canoe, and starting from the South, could have walked over from Siam, crossed the Polynesian Islands and trudged into any part of the continent of South America." (But see "Five years of Theosophy," art. "Leaflets from Esoteric History," pp. 338 and 340.) This was written from the words of a MASTER -- a rather doubtful authority for the materialists and the sceptics. But here we have one of their own flock, and a bird of the same feather -- Ernest Haeckel, who, in his distribution of races, corroborates the statement almost verbatim: . . . "It would seem that the region on the earth's surface where the evolution of these primitive men from the CLOSELY RELATED CATARRHINE APES (! !) took place, must be sought either in Southern Asia or Eastern Africa [which, by the bye, was not even in existence when the Third Race flourished -- H.P.B.] or in Lemuria. Lemuria is an ancient continent now sunk beneath the waters of the Indian Ocean, which, lying to the South of the Asia of to-day, stretched on the one hand eastwards to upper India and Sunda Island, on the other westward as far as Madagascar and Africa." (See supra and compare "The Pedigree of Man," p. 80-81.)

In the epoch we are treating of, the Continent of "Lemuria," had already broken asunder in many places, and formed new separate continents. There was, nevertheless, neither Africa nor the Americas, still less Europe in those days, all these slumbering yet on the Ocean floors. Nor was there much of present Asia; for the cis-Himalayan regions were covered with seas, and beyond this stretched the "lotus leaves" of Sveta-dwipa, the countries now called Greenland, Eastern and Western Siberia, etc., etc. The immense Continent, which had once reigned supreme over the Indian, Atlantic, and Pacific Oceans, now consisted of huge islands which were gradually disappearing one after the other, until the final convulsion engulfed the last remains of it. Easter Isle, for instance, belongs to the earliest civilisation of the Third

[[Vol. 2, Page]] 328 THE SECRET DOCTRINE.

Race. Submerged with the rest, a volcanic and sudden uplifting of the Ocean floor, raised the small relic of the Archaic ages untouched, with its volcano and statues, during the Champlain epoch of northern polar submersion, as a standing witness to the existence of Lemuria. It is said that some of the Australian tribes are the last remnants of the last descendants of the Third Race.

In this we are again corroborated to a degree by materialistic Science. Haeckel, when speaking of Blumenbach's brown or Malay race and the Australians and Papuans, remarks:-- "There is much likeness between these last and the Aborigines of Polynesia, that Australian island-world, that seems to have been once on a time a gigantic and continuous continent." ("Pedigree of Man," p. 82. But see footnote supra and the Addenda.)

It certainly was, since it stretched, during the Third Race, east and west, as far as where the two Americas now lie, and since the present Australia is but a portion of it, as are also a few surviving islands sown hither and thither on the face of the Pacific and a large bit of California, which belonged to it. Funnily enough, Haeckel, in his fantastic "Pedigree of Man," considers "the Australians of to-day as the lineal descendants, almost unchanged (? !), of that second branch of the primitive human race. . . that spread northwards, at first chiefly in Asia, from the home of man's infancy, and seems to have been the parent of all the other straight-haired races of men. . . . The one, woolly-haired, migrated in part, westwards" . . . (i.e., to Africa and northwards to New Guinea, which countries had then, as said, no existence as yet) . . . "the other, straight-haired, was evolved farther to the north in Asia . . . and peopled Australia . . ." (p. 81). "Behold," writes a MASTER, "the relics of that once great nation (Lemuria of the Third Race) in some of the flat-headed aborigines of your Australia" ("Esoteric Buddhism," p. 65). But they belong to the last remnants of the Seventh Sub-race of the Third. Prof. Haeckel must also have dreamt a dream and seen for once a true vision!

It is to this period that we have to look for the first appearance of the Ancestors of those, who are termed by us the most ancient peoples of the world -- now called respectively the Aryan Hindus, the Egyptians, and the oldest Persians, on the one hand, and the Chaldees and Phoenicians on the other. These were governed by the DIVINE DYNASTIES, i.e., kings and rulers who had of mortal man only his physical appearance as it was then, but who were Beings from spheres higher and more celestial than our own sphere will be, long Manvantaras hence. It is useless of course to attempt to force their existence on sceptics. Their greatest pride consists in proving their patronymic denomination as catarrhinides; which fact they try to demonstrate on the alleged

[[Vol. 2, Page]] 329 CHANGES OF CLIMATE.

authority of the Coccyx appended to their os sacrum, that rudimentary tail which, if they only had it long enough, they would wag in joy and for ever, in honour of its eminent discoverer. These will remain as faithful to their ape-ancestors as Christians will to tailless Adam. The Secret Doctrine, however, sets right on this point theosophists and students of Occult Sciences.

If we regard the Second portion of the Third Race as the first representatives of the really human race with solid bones, then Haeckel's surmise that "the evolution of the primitive men took place . . . in either Southern Asia or . . . Lemuria" -- Africa, whether Eastern or Western being out of question -- is correct enough, if not entirely so. To be accurate, however, in the same way that the evolution of the First Race (from the bodies of the pitars) took place on seven distinctly separated regions of the (then) only Earth at the arctic pole -- so did the ultimate transformation of the Third occur: it began in those northern regions, which have just been described a few pages back as including Behring's Straits, and what there then was of dry land in Central Asia, when the climate was semi-tropical even in the Arctic regions and most adapted to the primitive wants of nascent physical man. That region, however, has been more than once frigid and tropical in turn since the appearance of man. The commentary tells us that the Third Race was only about the middle point of its development when:--

"The axle of the Wheel tilted. The Sun and Moon shone no longer over the heads of that portion of the SWEAT BORN; people knew snow, ice, and frost, and men, plants, and animals were dwarfed in their growth. Those that did not perish REMAINED AS HALF-GROWN BABES* IN SIZE AND INTELLECT. This was the third pralaya of the races.**

Which means again, that our globe is subject to seven periodical entire changes which go pari passu with the races. For the Secret Doctrine teaches that, during this Round, there must be seven terrestrial pralayas, three occasioned by the change in the inclination of the earth's axis. It is a law which acts at its appointed time, and not at all blindly, as science may think, but in strict accordance and harmony with Karmic law. In Occultism this inexorable law is referred to as "the great ADJUSTER." Science confesses its ignorance of the cause producing climatic vicissitudes and such changes in the axial direction, which are always followed by these vicissitudes; nor does it seem so sure of the axial changes. And being unable to account for them, it is prepared rather to deny the axial phenomena altogether, than admit the intelligent Karmic hand and

[[Footnote(s)]] -----

* "Half-grown babes" in comparison with their giant Brethren on other zones. So would we now.

** Relates to Lemuria.

[[Vol. 2, Page]] 330 THE SECRET DOCTRINE.

law which alone could reasonably explain such sudden changes and their results. It has tried to account for them by various more or less fantastic speculations; one of which would be the sudden, and as imaginary, collision of our earth with a comet (De Boucheporn's hypothesis), as the cause of all the geological revolutions. But we prefer holding to our esoteric explanation, since FOHAT is as good as any comet, having, in addition, universal intelligence to guide him.

Thus, since Vaivasvata Manu's Humanity appeared on this Earth, there have already been four such axial disturbances; when the old continents -- save the first one -- were sucked in by the oceans, other lands appeared, and huge mountain chains arose where there had been none before. The face of the Globe was completely changed each time; the survival of the fittest nations and races was secured through timely help; and the unfit ones -- the failures -- were disposed of by being swept off the earth. Such sorting and shifting does not happen between sunset and sunrise, as one may think, but requires several thousands of years before the new house is set in order.

The Sub-races are subject to the same cleansing process, as also the side-branchlets (the family-Races). Let one, well-acquainted with astronomy and mathematics, throw a retrospective glance into the twilight and shadows of the Past. Let him observe, take notes of what he knows of the history of peoples and nations, and collate their respective rises and falls with what is known of astronomical cycles -- especially with the Sidereal year, equal to 25,868 of our solar years.* If the observer is gifted with the faintest intuition, then will he find how the weal and woe of nations is intimately connected with the beginning and close of this sidereal cycle. True, the non-occultist has the disadvantage that he has no such far distant times to rely upon. He knows nothing, through exact Science, of what took place nearly 10,000 years ago; yet he may find consolation in the knowledge or -- if he so prefers -- speculation on the fate of every one of the modern nations he knows of -- about 16,000 years hence.

[[Footnote(s)]] -----

* There are other cycles, of course, cycles within cycles -- and this is just that which creates such a difficulty in the calculations of racial events. The circuit of the ecliptic is completed in 25,868 years. And, with regard to our Earth, it is calculated that the equinoctial point falls back fifty minutes ten seconds, annually. But there is another cycle within this one. It is said that "as the apsis goes forward to meet it at the rate of eleven minutes twenty-four seconds, annually," (see the article on Astronomy in Encyclopaedia Britannica), "this would complete a revolution in one hundred and fifteen thousand three hundred and two years (115,302). The approximation of the equinox and the apsis is the sum of these motions, sixty-one minutes thirty-four seconds, and hence the equinox returns to the same position in relation to the apsis in 21,128 years." We have mentioned this cycle in Isis Unveiled, Vol. I., in relation to other cycles. Each has a marked influence on its contemporary race.

[[Vol. 2, Page]] 331 PRE-HISTORIC STATUES.

Our meaning is very clear. Every sidereal year the tropics recede from the pole four degrees in each revolution from the equinoctial points, as the equator rounds through the Zodiacal constellations. Now, as every astronomer knows, at present the tropic is only twenty-three degrees and a fraction less than half a degree from the equator. Hence it has still 2 1/2 degrees to run before the end of the Sidereal year; which gives humanity in general, and our civilized races in particular, a reprieve of about 16,000 years.*

After the Great Flood of the Third Race (the Lemurians) --

"Men decreased considerably in stature, and the duration of their lives was diminished. Having fallen down in godliness they mixed with animal races, and intermarried among giants and Pigmies (the dwarfed races of the Poles) . . . Many acquired DIVINE, more -- UNLAWFUL knowledge, and followed willingly the LEFT PATH." (Commentary xxxiii.)

Thus were the Atlanteans approaching destruction in their turn. How many geological periods it took to accomplish this fourth destruction? Who can tell. . . . But we are told that --

(44.) THEY (the Atlanteans) BUILT GREAT IMAGES, NINE YATIS HIGH (27 feet) -- THE SIZE OF THEIR BODIES (a). LUNAR FIRES HAD DESTROYED THE LAND OF THEIR FATHERS (the Lemurians). WATER THREATENED THE FOURTH (Race) (b).

(a) It is well worth noticing that most of the gigantic statues discovered on Easter Island, a portion of an undeniably submerged continent -- as also those found on the outskirts of Gobi, a region which had been submerged for untold ages

-- are all between 20 and 30 feet high. The statues found by Cook on Easter Island measured almost all twenty-seven feet in height, and eight feet across the shoulders. (See § "Stones, Witnesses to Giants," at the end of this Stanza.) The writer is well aware that the modern archaeologists have decided now that "these statues are not very old," as declared by one of the high officials of the British Museum, where some of them now are. But this is one of those arbitrary decisions of modern science which does not carry much weight.

We are told that it is after the destruction of "Lemuria" by subterranean fires that men went on steadily decreasing in stature -- a process already commenced after their physical FALL -- and that finally, some millions of years after, they reached between six and seven feet, and are now dwindling down (as the older Asiatic races) to nearer five than

[[Footnote(s)]] -----

* See at the end of this Stanza "On the Duration of Ages and Cycles."

[[Vol. 2, Page]] 332 THE SECRET DOCTRINE.

six feet. As Pickering shows, there is in the Malay race (a sub-race of the Fourth Root Race) a singular diversity of stature; the members of the Polynesian family (Tahitians, Samoans, and Tonga islanders) are of a higher stature than the rest of mankind; but the Indian tribes and the inhabitants of the Indo-Chinese countries are decidedly below the general average. This is easily explained. The Polynesians belong to the very earliest of the surviving sub-races, the others to the very last and transitory stock. As the Tasmanians are now completely extinct, and the Australians rapidly dying out, so will the other old races soon follow.

(b) Now, how could those records have been preserved? we may be asked. Even the knowledge of the Zodiac is denied to the Hindus by our kind and learned Orientalists, who conclude that the Aryan Hindus knew nothing of it, before the Greeks brought it into the country. This uncalled-for slander was so sufficiently refuted by Bailly, and what is more, by the clear evidence of facts, as not to need very much additional refutation. While the Egyptians have on their Zodiacs (See Denon's "Voyage en Egypte" Vol. II.) irrefutable proofs of records having embraced more than three-and-a-half sidereal years -- or about 87,000 years -- the Hindu calculations cover nearly thirty-three such years, or 850,000 years. The Egyptian priests assured Herodotus that the Pole of the Earth and the Pole of the Ecliptic had formerly coincided. But, as remarked by the author of the Sphixiad, "These poor benighted Hindoos have registered a knowledge of Astronomy for ten times 25,000 years since the (last local) Flood (in Asia), or Age of Horror," in the latitude of India. And they possess recorded observations from the date of the first Great Flood within the Aryan historical memory -- that which submerged the last portions of Atlantis, 850,000 years ago. The floods which preceded are, of course, more traditional than historical.

The sinking and transformation of Lemuria beginning nearly at the Arctic Circle (Norway), the Third Race ended its career in Lanka, or rather on that which became Lanka with the Atlanteans. The small remnant now known as Ceylon is the Northern highland of ancient Lanka, while the enormous island of that name was, in the Lemurian period, the gigantic continent described a few pages back. As a MASTER says (See "Esoteric Buddhism," p. 65):-- "Why should not your geologists bear in mind that under the continents explored and fathomed by them . . . there may be hidden, deep in the fathomless, or rather unfathomed ocean beds, other and far older continents whose strata have never been geologically explored; and that they may some day upset entirely their present theories? Why not admit that our present continents have, like Lemuria and Atlantis,

[[Vol. 2, Page]] 333 THE OLD CONTINENTS.

been several times already submerged, and had the time to re-appear again and bear their new groups of mankind and civilisations; and that at the first great geological upheaval at the next cataclysm, in the series of periodical cataclysms that occur from the beginning to the end of every Round, our already autopsized continents will go down and the Lemurias and Atlantises come up again?"

Not the same identical continents, of course.

But here an explanation is needed. No confusion need arise as regards the postulation of a Northern "Lemuria." The prolongation of that great continent into the North Atlantic Ocean is in no way subversive of the opinions so widely held as to the site of the lost Atlantis, and one corroborates the other. It must be noted that the Lemuria, which served as the cradle of the Third Root-Race, not only embraced a vast area in the Pacific and Indian Oceans, but extended in the shape of a horse-shoe past Madagascar, round "South Africa" (then a mere fragment in process of formation), through the Atlantic up to Norway. The great English fresh-water deposit called the Wealden -- which every geologist regards as the mouth of a former great river -- is the bed of the main stream which drained Northern Lemuria in the Secondary Age. The former reality of this river is a fact of science -- will its votaries acknowledge the necessity of accepting the Secondary-age Northern Lemuria, which their data demand? Professor Berthold Seeman not only accepted the reality of such a mighty continent, but regarded Australia and Europe as formerly portions of one continent -- thus corroborating the whole "horse-shoe" doctrine already enunciated. No more striking confirmation of our position could be given, than the fact that the ELEVATED RIDGE in the Atlantic basin, 9,000 feet in height, which runs for some two or three thousand miles southwards from a point near the British Islands, first slopes towards South America, then shifts almost at right angles to proceed in a SOUTH-EASTERLY line toward the African coast, whence it runs on southward to Tristan d'Acunha. This ridge is a remnant of an Atlantic continent, and, could it be traced further, would establish the reality of a submarine horse-shoe junction with a former continent in the Indian Ocean. (Cf. chart adapted from the "Challenger" and "Dolphin" soundings in Mr. Donnelly's, "Atlantis, the Antediluvian World," p. 47.)

The Atlantic portion of Lemuria was the geological basis of what is generally known as Atlantis. The latter, indeed, must be regarded rather as a development of the Atlantic prolongation of Lemuria, than as an entirely new mass of land upheaved to meet the special requirements of the Fourth Root-Race. Just as in the case of Race-evolution, so in that of the shifting and re-shifting of continental masses, no hard and fast line can be drawn where a new order ends and another begins. Continuity in natural processes is never broken. Thus the Fourth Race

Atlanteans were developed from a nucleus of Northern Lemurian Third Race Men, centred, roughly speaking, toward a point of land in what is now the mid-Atlantic Ocean. Their continent was formed by the coalescence of many islands and peninsulas which were upheaved in the ordinary course of time and became ultimately the true home of the great Race known as the Atlanteans. After this consummation was once attained it follows, as stated on the highest "occult" authority, that "Lemuria should no more be confounded with the Atlantis Continent, than Europe with America." ("Esoteric Buddhism," p. 58.)

The above, coming from quarters so discredited by orthodox Science, will, of course, be regarded by it as a more or less happy fiction. Even the clever work of Donnelly, already mentioned, is put aside, notwithstanding that its statements are all confined within a frame of strictly scientific proofs. But we write for the future. Discoveries in this direction will vindicate the claims of the Asiatic philosophers, who maintain that Sciences -- Geology, Ethnology, and History included -- were pursued by the Antediluvian nations who lived an untold number of ages ago. Future finds will justify the correctness of the present observations of such acute minds as H. A. Taine and Renan. The former shows that the civilizations of such archaic nations as the Egyptians, Aryans of India, Chaldeans, Chinese, and Assyrians are the result of preceding civilizations during "myriads of centuries";* and the latter points to the fact that, "Egypt at the beginning appears mature, old, and entirely without mythical and heroic ages, as if the country had never known youth. Its civilization has no infancy, and its art no archaic period. The civilization of the Old Monarchy did not begin with infancy. It was already mature."** To this Professor R. Owen adds that, "Egypt is recorded to have been a civilized and governed community before the time of Menes"; and Winchell ("Pre-Adamites," p. 120), that "at the epoch of Menes the Egyptians were already a civilized and numerous people. Manetho tells us that Athotis, the son of this first king Menes, built the palace of Memphis; that he was a physician, and left anatomical books."

This is quite natural if we have to believe the statements of Herodotus, who records in Euterpe (cxlii.), that the written history of the Egyptian priests dated from about 12,000 years before his time. But what are 12,000 or even 120,000 years compared with the millions of years elapsed since the Lemurian period? The latter, however, has not been left without witnesses, its tremendous antiquity, notwithstanding. The complete records of the growth, development, social, and even political life of the Lemurians, have been preserved in the

[[Footnote(s)]] -----

* "History of English Literature," p. 23.

** Quoted in "Atlantis," etc., p. 132.

secret annals. Unfortunately, few are those who can read them; and those who could would still be unable to understand the language, unless acquainted with all the seven keys of its symbolism. For the comprehension of the Occult Doctrine is based on that of the seven sciences; which sciences find their expression in the seven different applications of the secret records to the exoteric texts. Thus we have to deal with modes of thought on seven entirely different planes of Ideality. Every text relates to, and has to be rendered from, one of the following standpoints --

1. The Realistic plane of thought;
2. The Idealistic;
3. The purely Divine or Spiritual.

The other planes too far transcend the average consciousness, especially of the materialistic mind, to admit of their being even symbolized in terms of ordinary phraseology. There is no purely mythical element in any of the ancient religious texts; but the mode of thought in which they were originally written has to be found out and closely adhered to during the process of interpretation. For, it is either symbolical (archaic mode of thought), emblematical (a later though very ancient mode of thought), parabolical (allegory), hieroglyphical, or again logo-grammatical -- the most difficult method of all, as every letter, as in the Chinese language, represents a whole word. Thus, almost every proper name, whether in the Vedas, the "Book of the Dead," or the Bible (to a degree), is composed of such logograms. No one who is not initiated into the mystery of the occult religious logography can presume to know what a name in any ancient fragment means, before he has mastered the meaning of every letter that composes it. How is it to be expected that the merely profane thinker, however great his erudition in orthodox symbolism, so to say -- i.e., in that symbolism which can never get out of the old grooves of Solar-myth and sexual-worship -- shall penetrate into the arcana behind the veil. One who deals with the husk or shell of the dead letter, and devotes himself to the kaleidoscopic transformation of barren word-symbols, can never expect to get beyond the vagaries of modern mythologists.

Thus, Vaivasvata, Xisuthrus, Deukalion, Noah, etc., etc. -- all the head-figures of the world-deluges, universal and partial, astronomical or geological -- all furnish in their very names the records of the causes and effects which led to the event, if one can but read them fully. All such deluges are based on events that took place in nature, and stand as historical records, therefore, whether they were sidereal, geological, or even simply allegorical, of a moral event on other and higher planes of being. This we believe has now been sufficiently demonstrated during the long explanation necessitated by the allegorical Stanzas.

To speak of a race nine yatis, or 27 feet high, in a work claiming a more scientific character than "Jack the Giant-Killer," is a somewhat unusual proceeding. "Where are your proofs?" the writer will be asked. In History and tradition, is the answer. Traditions about a race of giants in days of old are universal; they exist in oral and written lore. India had her

Danavas and Daityas; Ceylon had her Rakshasas; Greece, her Titans; Egypt, her colossal Heroes; Chaldea, her Izdubars (Nimrod); and the Jews their Emims of the land of Moab, with the famous giants, Anakim (Numbers xiii. 33). Moses speaks of Og, a king who was nine cubits high (15 ft. 4 in.) and four wide (Deut. iii. 11), and Goliath was "six cubits and a span in height" (or 10 ft. 7 in.). The only difference found between the "revealed Scripture" and the evidence furnished to us by Herodotus, Diodorus Siculus, Homer, Pliny, Plutarch, Philostratus, etc., etc., is this: While the pagans mention only the skeletons of giants, dead untold ages before, relics that some of them had personally seen, the Bible interpreters unblushingly demand that geology and archaeology should believe, that several countries were inhabited by such giants in the day of Moses; giants before whom the Jews were as grasshoppers, and who still existed in the days of Joshua and David. Unfortunately their own chronology is in the way. Either the latter or the giants have to be given up. (But see Part III., Addenda, the closing chapter.)

Of still standing witnesses to the submerged continents, and the colossal men that inhabited them, there are still a few. Archaeology claims several such on this globe, though beyond wondering "what these may be" -- it never made any serious attempt to solve the mystery. Besides the Easter Island statues mentioned already, to what epoch do the colossal statues, still erect and intact near Bamian, belong? Archaeology assigns them to the first centuries of Christianity (as usual), and errs in this as it does in many other speculations. A few words of description will show the readers what are the statues of both Easter Isle and Bamian. We will first examine what is known of them to orthodox Science. In "The Countries of the World," by Robert Brown, in Vol. IV., page 43, it is stated that --

"Teapi, Rapa-nui, or Easter Island, is an isolated spot almost 2,000 miles from the South American coast. . . . In length it is about twelve miles, in breadth four . . . and there is an extinct crater 1,050 feet high in its centre. The island abounds in craters, which have been extinct for so long that no tradition of their activity remains. . . .

". . . But who made the great stone images (p. 44, etc.) which are now the chief attraction of the island to visitors? No one knows" -- says the reviewer. "It is more than likely that they were here when the present inhabitants (a handful of Polynesian savages) arrived. . . . Their workmanship is

[[Vol. 2, Page]] 337 THE MYSTERY OF EASTER ISLAND.

of a high order . . . and it is believed that the race who formed them were the frequenters of the natives of Peru and other portions of South America. . . . Even at the date of Cook's visit, some of the statues, measuring 27 feet in height and eight across the shoulders were lying overthrown, while others still standing appeared much larger. One of the latter was so lofty that the shade was sufficient to shelter a party of thirty persons from the heat of the sun. The platforms on which these colossal images stood averaged from thirty to forty feet in length, twelve to sixteen broad. . . . all built of hewn stone in the Cyclopean style, very much like the walls of the Temple of Pachacamac, or the ruins of Tia-Huanuco in Peru" (vol. iii., pp. 310, 311).

"THERE IS NO REASON TO BELIEVE THAT ANY OF THE STATUES HAVE BEEN BUILT UP, BIT BY BIT, BY SCAFFOLDING ERECTED AROUND THEM" -- adds the journal very suggestively -- without explaining how they could be built otherwise, unless made by giants of the same size as the statues themselves. One of the best of these colossal images is now in the British Museum. The images at Ronororaka -- the only ones now found erect -- are four in number, three deeply sunk in the soil, and one resting on the back of its head like the head of a man asleep. Their types, though all are long-headed, are different; and they are evidently meant for portraits, as the noses, the mouths and chins differ greatly in form, their head-dress, moreover -- a kind of flat cap with a back piece attached to it to cover the back portion of the head -- showing that the originals were no savages of the stone period. Verily the question may be asked -- "Who made them?" -- but it is not archaeology nor yet geology that is likely to answer, though the latter recognizes in the Island a portion of a submerged continent.

But who cut the Bamian, still more colossal, statues, the tallest and the most gigantic in the whole world, for Bartholdi's "Statue of Liberty" (now at New York) is a dwarf when compared with the largest of the five images. Burnes, and several learned Jesuits who have visited the place, speak of a mountain "all honeycombed with gigantic cells," with two immense giants cut in the same rock. They are referred to as the modern Miaotse (vide supra, quotation from Shoo-King) the last surviving witnesses of the Miaotse who had "troubled the earth"; the Jesuits are right, and the Archaeologists, who see Buddhas in the largest of these statues, are mistaken. For all those numberless gigantic ruins discovered one after the other in our day, all those immense avenues of colossal ruins that cross North America along and beyond the Rocky Mountains, are the work of the Cyclopes, the true and actual Giants of old. "Masses of enormous human bones" were found "in America, near Misorte," a celebrated modern traveller tells us, precisely on the spot which local tradition points out as the landing

[[Vol. 2, Page]] 338 THE SECRET DOCTRINE.

spot of those giants who overran America when it had hardly arisen from the waters (See "De La Vega," Vol. ix., ch. ix.)*

Central Asian traditions say the same of the Bamian statues. What are they, and what is the place where they have stood for countless ages, defying the cataclysms around them, and even the hand of man, as in the instance of the hordes of Timoor and the Vandal-warriors of Nadir-Shah? Bamian is a small, miserable, half-ruined town in Central Asia, half-way between Cabul and Balkh, at the foot of Kobhibaba, a huge mountain of the Paropamisian (or Hindu-Kush) chain, some 8,500 feet above the level of the sea. In days of old, Bamian was a portion of the ancient city of Djooljool, ruined and destroyed to the last stone by Tchengis-Khan in the XIIIth century. The whole valley is hemmed in by colossal rocks, which are full of partially natural and partially artificial caves and grottoes, once the dwellings of Buddhist monks who had established in them their viharas. Such viharas are to be met with in profusion, to this day, in the rock-cut temples of India and the valleys of Jellalabad. It is at the entrance of some of these that five enormous statues, of what is regarded as Buddha, have been discovered or rather rediscovered in our century, as the famous Chinese traveller, Hiouen-Thsang, speaks of, and saw them, when he visited Bamian in the VIIth century.

When it is maintained that no larger statues exist on the whole globe, the fact is easily proven on the evidence of all the travellers who have examined them and taken their measurements. Thus, the largest is 173 feet high, or seventy feet higher than the "Statue of Liberty" now at New York, as the latter is only 105 feet or 34 metres high. The famous Colossus of Rhodes itself, between whose limbs passed easily the largest vessels of those days, measured only 120 to 130 feet in height. The second statue, cut out in the rock like the first one, is only 120 feet (15 feet taller than the said "Liberty").** The third statue is only 60 feet high -- the two others still smaller, the last one being only a little larger than the average tall man of our present race. The first and largest of the Colossi represents a man draped in a kind of toga; M. de Nadeylac thinks (See infra) that the general appearance of the figure, the lines of the head, the drapery, and especially the large hanging ears, point out undeniably that Buddha was meant to be represented. But the above proves nothing. Notwithstanding the fact

[[Footnote(s)]] -----

* See also "Pneumatologie des Esprits" Vol. III., p. 55, de Mirville.

** The first and second have, in common with Bartholdi's Statue, an entrance at the foot, leading by a winding staircase cut in the rock up into the heads of the statues. The eminent French archeologist and anthropologist, the Marquis de Nadeylac, justly remarks in his work that there never was in ancient or in modern times a sculptured human figure more colossal than the first of the two.

[[Vol. 2, Page]] 339 THE ANTEDILUVIAN BUDDHAS.

that most of the now existing figures of Buddha, represented in the posture of Samadhi, have large drooping ears, this is a later innovation and an afterthought. The primitive idea was due to esoteric allegory. The unnaturally large ears symbolize the omniscience of wisdom, and were meant as a reminder of the power of Him who knows and hears all, and whose benevolent love and attention for all creatures nothing can escape. "The merciful Lord, our Master, hears the cry of agony of the smallest of the small, beyond vale and mountain, and hastens to its deliverance":--says a Stanza. Gautama Buddha was an Aryan Hindu, and an approach to such ears is found only among the Mongolian Burmese and Siamese, who, as in Cochin, distort them artificially. The Buddhist monks, who turned the grottos of the Miaotse into Viharas and cells, came into Central Asia about or in the first century of the Christian era. Therefore Hiouen Tshang, speaking of the colossal statue, says that "the shining of the gold ornamentation that overlaid the statue" in his day "dazzled one's eyes," but of such gilding there remains not a vestige in modern times. The very drapery, in contrast to the figure itself, cut out in the standing rock, is made of plaster and modelled over the stone image. Talbot, who has made the most careful examination, found that this drapery belonged to a far later epoch. The statue itself has therefore to be assigned to a far earlier period than Buddhism. Whom does it represent in such case, it may be asked?

Once more tradition, corroborated by written records, answers the query, and explains the mystery. The Buddhist Arhats and Ascetics found the five statues, and many more, now crumbled down to dust, and as the three were found by them in colossal niches at the entrance of their future abode, they covered the figures with plaster, and, over the old, modelled new statues made to represent Lord Tathagata. The interior walls of the niches are covered to this day with bright paintings of human figures, and the sacred image of Buddha is repeated in every group. These frescoes and ornaments - which remind one of the Byzantine style of painting -- are all due to the piety of the monk-ascetics, like some other minor figures and rock-cut ornamentations. But the five statues belong to the handiwork of the Initiates of the Fourth Race, who sought refuge, after the submersion of their continent, in the fastnesses and on the summits of the Central Asian mountain chains. Moreover, the five statues are an imperishable record of the esoteric teaching about the gradual evolution of the races.

The largest is made to represent the First Race of mankind, its ethereal body being commemorated in hard, everlasting stone, for the instruction of future generations, as its remembrance would otherwise never have

[[Vol. 2, Page]] 340 THE SECRET DOCTRINE.

survived the Atlantean Deluge. The second -- 120 feet high -- represents the sweat-born; and the third -- measuring 60 feet -- immortalizes the race that fell, and thereby inaugurated the first physical race, born of father and mother, the last descendants of which are represented in the Statues found on Easter Isle; but they were only from 20 to 25 feet in stature at the epoch when Lemuria was submerged, after it had been nearly destroyed by volcanic fires. The Fourth Race was still smaller, though gigantic in comparison with our present Fifth Race, and the series culminated finally in the latter. (See the following sub-section on "Cyclopean Ruins, and Colossal Stones as Witnesses to Giants.")

These are, then, the "Giants" of antiquity, the ante- and post-diluvian Gibborim of the Bible. They lived and flourished one million rather than between three and four thousand years ago. The Anakim of Joshua, whose hosts were as "grasshoppers" in comparison with them, are thus a piece of Israelite fancy, unless indeed the people of Israel claim for Joshua an antiquity and origin in the Eocene, or at any rate in the Miocene age, and change the millenniums of their chronology into millions of years.

In everything that pertains to prehistoric times the reader ought to bear the wise words of Montaigne in his mind. Saith the great French philosopher:--

" . . . It is a sottish presumption to disdain and condemne that for false, which unto us seemeth to beare no show of likelihood or truth: which is an ordinarie fault in those who persuade themselves to be of more sufficiencie than the vulgar sort.

" . . . But reason hath taught me, that so resolutely to condemne a thing for false and impossible, is to assume unto himself the advantage to have the bounds and limits of God's will, and the power of our common Mother Nature tied to his sleeve, and that there is no greater folly in the world than to reduce them to the measure of our capacitie and bounds of our sufficiencie.

"If we term those things monsters or miracles to which our reason cannot attain, how many doe such daily present themselves unto our sight? Let us consider through what cloudes, and how blinde-folde we are led to the knowledge of most things that passe our hands; verily we shall finde it is rather custome than Science that receiveth, the strangeness of them from us: and that those things, were they newly presented unto us, wee should doubtless deeme them as much or more unlikely and incredible than any other." (Essays, chap. xxvi.)

A fair-minded scholar should, before denying the possibility of our history and records, search modern History, as well as the universal traditions scattered throughout ancient and modern literature, for traces left by these marvellous early races. Few among the unbelievers suspect the wealth of corroborative evidence which is found scattered about and buried even in the British Museum alone. The

[[Vol. 2, Page]] 341 THE MATERIALISM OF THE BIBLE.

reader is asked to throw one more glance at the subject-matter treated of in the chapter which follows:--

CYCLOPEAN RUINS AND COLOSSAL STONES AS WITNESSES TO GIANTS.

In his enormous works -- Memoires addressees a l'Academie des Sciences -- de Mirville, carrying out the task of proving the reality of the devil and showing his abode in every ancient and modern idol, has collected several hundred pages of "historical evidence" that in the days of miracle -- Pagan and Biblical -- the stones walked, spoke, delivered oracles, and even sung. That finally, "Christ-stone," or Christ-Rock, "the spiritual Rock" that followed "Israel" (I Corinth. x. 4) "became a Jupiter lapis," swallowed by his father Saturn, "under the shape of a stone."* We will not stop to discuss the evident misuse and materialization of Biblical metaphors, simply for the sake of proving the Satanism of idols, though a good deal might be said** on this subject. But without claiming any such peripateticism and innate psychic faculties for our stones, we may collect, in our turn, every available evidence on hand, to show that (a) had there been no giants to move about such colossal rocks, there could never have been a Stonehenge, a Carnac (Brittany) and other such Cyclopean structures; and (b) were there no such thing as MAGIC, there could never have been so many witnesses to oracular and speaking stones.

In the Achaica (p. 81) we find Pausanias confessing that, in beginning his work, he had regarded the Greeks as mighty stupid "for worshipping stones." But, having reached Arcadia, he adds: "I have changed my way of thinking." Therefore, without worshipping stones or stone idols and statues, which is the same -- a crime Roman Catholics are unwise to reproach Pagans with, as they do likewise -- one may be allowed to believe in what so many great philosophers and holy men have believed in, without deserving to be called an "idiot" by modern Pausaniases.

The reader is referred to Volume VI. of the Academie des Inscriptions (Memoires, p. 518, et seq.) if he would study the various properties of flints and pebbles from the standpoint of Magic and psychic powers. In a poem on Stones attributed to Orpheus, those stones are divided into ophites and siderites, "serpent-stones" and "star-stones." "The 'Ophite'

[[Footnote(s)]] -----

* Pierres Animees et parlantes., p. 283. Theologie de la Pierre, 270.

** Saturn is Kronos -- "Time." His swallowing Jupiter lapis may turn out one day a prophecy. "Peter (Cephas, lapis), is the stone on which the Church of Rome is built" we are assured. But Kronos is as sure "to swallow it" one day, as he has swallowed Jupiter-lapis and still greater characters.

[[Vol. 2, Page]] 342 THE SECRET DOCTRINE.

is shaggy, hard, heavy, black, and has the gift of speech; when one prepares to cast it away, it produces a sound similar to the cry of a child. It is by means of this stone that Helanos foretold the ruin of Troy, his fatherland . . ." etc. (Falconnet.)

Sanchoniathon and Philo Byblius, in referring to these betyles, call them "Animated Stones." Photius repeats what Damascius, Asclepiades, Isidorus and the physician Eusebius had asserted before him. The latter (Eusebius) never parted with his ophites, which he carried in his bosom, and received oracles from them, delivered in a small voice resembling a low whistling.* Arnobius (a holy man who, "from a Pagan had become one of the lights of the Church," Christians tell their readers) confesses he could never meet on his passage with one of such stones without putting it questions, "which is answered occasionally in a clear and sharp small voice." Where is the difference between the Christian and the Pagan ophites, we ask?

It is also known that the famous stone at Westminster was called liafail -- "the speaking stone," -- which raised its voice only to name the king that had to be chosen. Cambry (Monuments Celtiques) says he saw it when it still bore the inscription:--**

"Ni fallat fatum, Scoti quocumque locatum
Invenient lapidem, regnasse tenentur ibidem."

Finally, Suidas speaks of a certain Heraclius, who could distinguish at a glance the inanimate stones from those which were endowed with motion; and Pliny mentions stones which "ran away when a hand approached them." (See Dictionnaire des Religions par l'abbe Bertrand; art. on words Heraclius and Betyles.)

De Mirville -- who seeks to justify the Bible -- inquires very pertinently, why the monstrous stones of Stonehenge were called in days of old chior-gaur (from Cor, "dance," whence chorea, and gaur, a GIANT), or the dance of giants? And then he sends the reader to receive his reply from the Bishop of St. Gildas. But the authors of the Voyage dans le Comte

[[Footnote(s)]] -----

* The same, of course, as the "small voice" heard by Elijah after the earthquake at the mouth of the cave. (I Kings xix. 12.)

** The rocking, or Logan, stones bear various names. The Celts had their clacha-brath, the "Destiny or judgment-stone"; the divining-stone, or "stone of the ordeal" and the oracle stone; the moving or animated stone of the Phoenicians; the rumbling stone of the Irish. Brittany has its "pierres branlantes" at Huelgoat. They are found in the Old and the New Worlds: in the British Islands, France, Spain, Italy, Russia, Germany, etc., as in North America. (See Hodson's "Letters from North America," Vol. II., p. 440.) Pliny speaks of several in Asia (Hist. Nat. Lib. I., c. 96), and Apollonius Rhodius expatiates on the rocking stones, and says that they are "stones placed on the apex of a tumulus, and so sensitive as to be movable by the mind" (Ackerman's Arth. Index, p. 34), referring no doubt to the ancient priests who moved such stones by will-power and from a distance.

[[Vol. 2, Page]] 343 THE "ROCKING-STONES" IN EUROPE.

de Cornouailles, sur les traces des giants, and of various learned works on the ruins of Stonehenge,* Carnac and West Hoadley, give far better and more reliable information upon this particular subject. In those regions -- true forests of rocks -- immense monoliths are found, "some weighing over 500,000 kilograms" (Cambry). These "hinging stones" of Salisbury Plain are believed to be the remains of a Druidical temple. But the Druids were historical men and not Cyclopes, nor giants. Who then, if not giants, could ever raise such masses (especially those at Carnac and West Hoadley), range them in such symmetrical order that they should represent the planisphere, and place them in such wonderful equipoise that they seem to hardly touch the ground, are set in motion at the slightest touch of the finger, and would yet resist the efforts of twenty men who should attempt to displace them.

We say, that most of these stones are the relics of the last Atlanteans. We shall be answered that all the geologists claim them to be of a natural origin. That, a rock when "weathering," i.e., losing flake after flake of its substance under influence of weather, assumes this form. That, the "tors" in West England exhibit curious forms, also produced by this cause. That, finally, as all scientists consider the "rocking stones to be of purely natural origin, wind, rain, etc., causing disintegration of rocks in layers" -- our statement will be justly denied, especially as "we see this process of rock-modification in progress around us to-day." Let us examine the case.

But read what Geology has to say, and you will learn that often these gigantic masses do not even belong to the countries wherein they are now fixed; that their geological congeners often pertain to strata unknown in those regions and to be found only far beyond the seas. Mr. William Tooke (French trans., Sepulture des Tartares. Arch. VII, p. 222), speculating upon the enormous blocks of granite which are strewn over Southern Russia and Siberia, tells the reader that there, where they now rest, there are neither rocks nor mountains; and that they must have been brought over "from immense distances and with prodigious efforts." Charton (Voyageurs Anciens et Modernes, Vol. I., p. 230) speaks of a specimen of such rock "from Ireland," which had been submitted to the analysis of an eminent English geologist, who assigned to it a foreign origin, "most probably African."

This is a strange coincidence, as Irish tradition attributes the origin of her circular stones to a Sorcerer who brought them from Africa. De Mirville sees in that sorcerer "an accursed Hamite." We see in him a

[[Footnote(s)]] -----

** Ham was no more a Titan or Giant than Shem and Japhet. They are either all Arkite Titans, as Faber shows them, or myths.

[[Vol. 2, Page]] 344 THE SECRET DOCTRINE

dark Atlantean, or perhaps even some earlier Lemurian, who had survived till the birth of the British Islands -- GIANTS in every and any case.*

"Men," says Cambry, naively, "have nothing to do with it . . . for never could human power and industry undertake anything of this kind. Nature alone has accomplished it all (!!) and Science will demonstrate it some day" (!!) (p. 88). Nevertheless, it is a human, though gigantic power, which has accomplished it, and no more "nature" alone than god or devil.

"Science," having undertaken to demonstrate that even the mind and Spirit of man are simply the production of blind forces, is quite capable of accepting the task. It may come out some fine morning, and seek to prove that nature alone has marshalled the gigantic rocks of Stonehenge, traced their position with mathematical precision, given them the form of the Dendera planisphere and of the signs of the Zodiac, and brought stones weighing over one million of pounds flying from Africa and Asia to England and Ireland!

It is true that Cambry recanted later on. "I had believed for a long time," he says, "that Nature alone could produce those wonders . . . but I recant . . . chance is unable to create such marvellous combinations . . . and those who placed the said rocks in equipoise, are the same who have raised the moving masses of the pond of Huelgoat, near Concarneau. . . ." Dr. John Watson, quoted by the same author "Antiquites Celtiques," p. 99, says, when speaking of the moving rocks,

or Rocking-Stones situated on the slope of Golcar (the "Enchanter"): "The astonishing movement of those masses poised in equilibrium made the Celts compare them to gods." . . .

In "Stonehenge" (Flinders Petrie) it is said that "Stonehenge is built of the stone of the district, a red sandstone, or 'sarsen' stone, locally called 'grey wethers.' But some of the stones, especially those which are said to have been devoted to astronomical purposes, have been brought from a distance, probably the North of Ireland."

To close, the reflections of a man of Science, in an article upon the subject published in 1850 in the Revue Archeologique (p. 473), are worthy of being quoted. Says the paper, concerning the rocking stones:--

"Every stone is a block whose weight would try the most powerful machines. There are, in a word, scattered throughout the globe, masses, before which the word materials seems to remain inexplicable, at the sight of which imagination is confounded, and that had to be endowed with a name as colossal as the

[[Footnote(s)]] -----

* Diodorus Siculus asserts that in the days of Isis, all men were of a vast stature, who were denominated by the Hellenes Giants. [Gk chars] "[Oi den Aiguptoi muthologousi kata ten Isidos helikian gegonenai tinas polusomatous]."

[[Vol. 2, Page]] 345 LIVING, SPEAKING, AND MOVING STONES.

things themselves. Besides which, these immense rocking stones, called sometimes routers -- placed upright on one of their sides as on a point, their equipoise being so perfect that the slightest touch is sufficient to set them in motion . . . betray a most positive knowledge of statics. Reciprocal counter-motion, surfaces, plane, convex and concave, in turn . . . all this allies them to Cyclopean monuments, of which it can be said with good reason, repeating after de La Vega that 'the demons seem to have worked on them more than men.' "

For once we agree with our friends and foes, the Roman Catholics, and ask whether such prodigies of statics and equilibrium, applied to masses weighing millions of pounds, can be the work of Palaeolithic savages, of cave-men, taller than the average man in our century, yet ordinary mortals as we are? It is no use for our purpose to refer to the various traditions attached to the rocking-stones. Still, it may be as well to remind the English reader of Giraldus Cambrensis, who speaks of such a stone on the Isle of Mona, which returned to its place, every effort made to keep it elsewhere notwithstanding. At the time of the conquest of Ireland by Henry II., a Count Hugo Cestrensis, desiring to convince himself of the reality of the fact, tied the Mona stone to a far bigger one and had them thrown into the sea. On the following morning it was found in its accustomed place. . . The learned William of Salisbury warrants the fact by testifying to its presence in the wall of a church where he had seen it in 1554. . . And this reminds one of what Pliny said of the stone left by the Argonauts at Cyzicum, which the Cyzicans had placed in the Prytanea "whence it ran away several times, which forced them to lead it" (Nat. Hist., XXXVI., p. 592) . . . Here we have immense stones stated by all antiquity to be "living, moving, speaking and self-perambulating." They were also capable, it seems, of making people run away, since they have been called routers ("to put to flight," to rout) and Des Mousseaux shows them all to be prophetic stones and

[[Footnote(s)]] -----

* "It is difficult," writes Creuzer, "not to suspect in the structures of Tiryns and Mycenae planetary forces supposed to be moved by celestial powers, analogous to the famous Dactyles." (Pelasges et Cyclopes). To this day Science is ignorant on the subject of the Cyclopes. They are supposed to have built all the so-called "Cyclopean" works whose erection necessitated several regiments of Giants, and -- they were only seventy-seven in all (about one hundred, Creuzer thinks). They are called "Builders," and Occultism calls them the INITIATORS, who, initiating some Pelasgians, thus laid the foundation stone of true MASONRY. Herodotus associates the Cyclops with Perseus "the son of an Assyrian demon" (I. VI. p. 54). Raoul Rochette found that Palaemonius, the Cyclops, to whom a sanctuary was raised, "was the Tyrian Hercules." Anyhow, he was the builder of the sacred columns of Gadir, covered with mysterious characters to which Apollonius of Tyana was the only one in his age to possess the key; and with figures which may still be found on the walls of Ellora, the gigantic ruins of the temple of Viswakarma, "the builder and artificer of the Gods."

[[Vol. 2, Page]] 346 THE SECRET DOCTRINE.

called mad stones (see his, "Dieu et les Dieux," p. 587). "The rocking-stone is accepted in Science. Why did it rock, why was it made to do so? One must be blind not to see that this motion was one more means of divination, and that they were called for this very reason 'the stones of truth.'" (de Mirville, "Fetichisme")*

This is history, the Past of prehistoric times, warranting the same in later ages. The Dracontia, sacred to the moon and the serpent, were the more ancient "Rocks of Destiny" of older nations, whose motion, or rocking, was a code perfectly clear to the initiated priests, who alone had the key to this ancient reading. Vormius and Olaius Magnus show that it was according to the orders of the oracle, "whose voice spoke through the immense rocks raised by the colossal powers of ancient giants," that the kings of Scandinavia were elected. "In India and Persia," says Pliny, "it is she (the Persian Oitoe) whom the magi had to consult for the election of their sovereigns" (Nat. Hist., lxxvii., chap. LIV.); and he describes (in chap. XXXVIII., 1. ii.) a rock overshadowing Harpasa, in Asia, and placed in such a manner that "a single finger

[[Footnote(s)]] -----

* Messrs. Richardson and Barth are said to have been amazed at finding in the Desert of Sahara the same trilithic and raised stones they had seen in Asia, Circassia, Etruria, and in all the North of Europe. Mr. Rivett-Carnac, B.C.S., of Allahabad, the distinguished Archaeologist, shows the same amazement in finding the description given by Sir J. Simpson of the cuplike markings on stones and rocks in England, Scotland, and other Western countries -- "offering an extraordinary resemblance" to "the marks on the trap Boulders which encircle the Barrows near Nagpur" (the city of

Snakes). The eminent scholar saw in this "another and very extraordinary addition to the mass of evidence. . . that a branch of the nomadic tribes, who swept at an early date over Europe, penetrated into India also." We say Lemuria, Atlantis and her giants, and the earliest races of the Fifth Root-Race had all a hand in these betyles, lithoi, and "magic" stones in general. The cup marks noticed by Sir J. Simpson, and the "holes scooped out on the face" of rocks and monuments found by Mr. Rivett-Carnac "of different sizes varying from six inches to an inch-and-a-half in diameter, and in depth from one to one-and-a-half inch generally arranged in perpendicular lines presenting many permutations in the number and size and arrangement of the cups" -- are simply written RECORDS of the oldest races. Whosoever examines with attention the drawings made of such marks in the "Archaeological Notes on Ancient Sculpturing on Rocks in Kumaon, India, etc.," will find in it the most primitive style of marking or recording; something of the sort having been adopted by the American inventors of the Morse code of telegraphic writing, which reminds us of the Agham writing, a combination of long and short strokes, as Mr. Rivett-Carnac describes it "cut on sandstone." Sweden, Norway, and Scandinavia are full of such written records, the Runic characters having followed the cup-marks and long and short strokes. In "Johannes Magnus' Infolio" one sees the representation of the demi-god, the giant Starchaterus (Starkad, the pupil of Kroszharsgrani, the Magician) who holds under each arm a huge stone covered with Runic characters; and Starkad, according to Scandinavian legend, went to Ireland and performed marvellous deeds in the North and South, East and West. (See "Asgard and the Gods.")

[[Vol. 2, Page]] 347 UNIVERSAL WITNESSES.

can move it, while the weight of the whole body makes it resist." Why then should not the rocking stones of Ireland, or those of Brinham, in Yorkshire, have served for the same mode of divination or oracular communications? The hugest of them are evidently the relics of the Atlanteans; the smaller ones, such as Brinham Rocks, with some revolving stones on their summit, are copies from the more ancient lithoi. Had not the bishops of the middle ages destroyed all the plans of the Dracontia they could lay their hands on, Science would know more of these.* As it is, we know that they were universally used during long prehistoric ages, and all for the same purposes of prophecy and MAGIC. E. Biot, a member of the Institute of France, published in his *Antiquites de France*, Vol. ix., an article showing the Chatam peramba (the Field of Death, or ancient burial ground in Malabar), to be identical with the old tombs at Carnac -- "a prominence and a central tomb." . . . "Bones are found in them (the tombs)," he says, "and Mr. Hillwell tells us that some of these are enormous, the natives (of Malabar) calling the tombs the dwellings of Rakshasas (giants)." Several stone circles, "considered the work of the Panch Pandava (five Pandus), as all such monuments are in India, so numerous in that country," when opened by the direction of Rajah Vasariddi, "were found to contain human bones of a very large size." (T. A. Wise, in "History of Paganism in Caledonia," p. 36).

Again, de Mirville is right in his generalization, if not in his conclusions. As the long cherished theory that the Dracontia are mostly witnesses to "great natural geological commotions" (Charlton), and "are the work of Nature" (Cambry) is now exploded, his remarks are very just. "Before the impossibility of such a theory is asserted, we advise Science to reflect . . . and, above all, no longer to class Titans and Giants among primitive legends: for their works are there, under our eyes, and those rocking stones will oscillate on their basis to the end of the world to help them to see clearer and realise once for all, that one is not altogether a candidate for Charenton for believing in wonders certified to by the whole of Antiquity" ("Fetichisme," p. 288).

It is just what we can never repeat too often, though the voices of both Occultists and Roman Catholics are raised in the desert. Nevertheless, no one can fail to see that Science is as inconsistent, to say the least, in its modern speculations, as was ancient and mediaeval theology in its interpretations of the so-called Revelation. Science would have men descend from the pithecoïd ape -- a transformation requiring millions of years -- and yet fears to make mankind older than 100,000 years! Science teaches the gradual transformation of species,

[[Footnote(s)]] -----

* Charlton, the Author of "Voyageurs anciens et modernes," quoted by de Mirville.

[[Vol. 2, Page]] 348 THE SECRET DOCTRINE.

natural selection and evolution from the lowest form to the highest; from mollusc to fish, from reptile to bird and mammalian. Yet it refuses to man, who physiologically is only a higher mammal and animal, such transformation of his external form. But if the monstrous iguanodon of the Wealden may have been the ancestor of the diminutive iguana of to-day, why could not the monstrous man of the Secret Doctrine have become the modern man -- the link between Animal and Angel? Is there anything more unscientific in this "theory," than in that of refusing to man any spiritual immortal Ego, making of him an automaton, and ranking him, at the same time, as a distinct genus in the system of Nature? Occult Sciences may be less scientific than the present exact Sciences, they are withal more logical and consistent in their teachings. Physical forces, and natural affinities of atoms may be sufficient as factors to transform a plant into an animal; but it requires more than a mere interplay between certain material aggregates and their environment, to call to life a fully conscious man; even though he were no more indeed than a ramification between two "poor cousins" of the Quadrumanous order. Occult Sciences admit with Haeckel that (objective) life on our globe "is a logical postulate of Scientific natural history," but add that the rejection of a like Spiritual involution, from within without, of invisible subjective Spirit-life -- eternal and a Principle in Nature -- is more illogical, if possible, than to say that the Universe and all in it has been gradually built by blind forces inherent in matter, without any external help.

Suppose an Occultist were to claim that the first grand organ of a cathedral had come originally into being in the following manner. First, there was a progressive and gradual elaboration in Space of an organizable material, which resulted in the production of a state of matter named organic PROTEIN. Then, under the influence of incident forces, those states having been thrown into a phase of unstable equilibrium, they slowly and majestically evolved into and resulted in new combinations of carved and polished wood, of brass pins and staples, of leather and ivory, wind-pipes and bellows. After which, having adapted all its parts into one harmonious and symmetrical machine, the organ suddenly pealed forth Mozart's Requiem. This was followed by a Sonata of Beethoven, etc., ad infinitum; its keys playing of themselves and the wind blowing into the pipes by its own inherent force and fancy. . . . What would Science say to such a theory? Yet, it is

precisely in such wise that the materialistic savants tell us that the Universe was formed, with its millions of beings, and man, its spiritual crown.

Whatever may have been the real inner thought of Mr. Herbert Spencer, when writing on the subject of the gradual transformation of

[[Vol. 2, Page]] 349 IT TAKES A GOD TO BECOME A MAN.

species, what he says in it applies to our doctrine. "Construed in terms of evolution, every kind of being is conceived as a product of modifications wrought by insensible gradations on a pre-existing kind of being." ("Essays on Physiology," Subj. p. 144.) Then why, in this case, should not historical man be the product of a modification on a pre-existent and pre-historical kind of man, even supposing for argument's sake that there is nothing within him to last longer than, or live independently of, his physical structure? But this is not so! For, when we are told that "organic matters are produced in the laboratory by what we may literally call artificial evolution" (Appendix to "Principles of Biology," p. 482), we answer the distinguished English philosopher, that Alchemists and great adepts have done as much, and, indeed, far more, before the chemists ever attempted to "build out of dissociated elements complex combinations." The Homunculi of Paracelsus are a fact in Alchemy, and will become one in Chemistry very likely, and then Mrs. Shelley's Frankenstein will have to be regarded as a prophecy. But no chemist, or Alchemist either, will ever endow such a "Frankenstein's Monster" with more than animal instinct, unless indeed he does that which the "Progenitors" are credited with, namely, if he leaves his own physical body, and incarnates in the "empty form." But even this would be an artificial, not a natural man, for our "Progenitors" had, in the course of eternal evolution, to become gods before they became men.

The above digression, if one, is an attempt at justification before the few thinking men of the coming century who may read this. But this accounts also for the reason why the best and most spiritual men of our present day can no longer be satisfied with either Science or theology; and why they prefer any such "psychic craze" to the dogmatic assertions of both, neither of the two having anything better to offer than blind faith in their respective infallibility. Universal tradition is indeed the far safer guide in life. And universal tradition shows primitive man living for ages together with his Creators and first instructors -- the Elohim -- in the World's "Garden of Eden," or "Delight." We shall treat of the Divine Instructors in Stanza XII.

46. ALL HOLY SAVED, THE UNHOLY DESTROYED. WITH THEM MOST OF THE HUGE ANIMALS PRODUCED FROM THE SWEAT OF THE EARTH (b).

[[Vol. 2, Page]] 350 THE SECRET DOCTRINE.

(a) As this subject -- the fourth great deluge on our globe in this Round -- is fully treated in the chapters that follow the last Stanza, to say anything more at present would be mere repetition. The seven great islands (Dwipas) belonged to the continent of Atlantis. The secret teachings show that the "Deluge" overtook the Fourth, giant Race, not on account of their depravity, or because they had become "black with sin," but simply because such is the fate of every continent, which -- like everything else under our Sun -- is born, lives, becomes decrepit, and dies. This was when the Fifth Race was in its infancy.

(b) Thus the giants perished -- the magicians and the sorcerers, adds the fancy of popular tradition, but "all holy saved," and alone the "unholy were destroyed." This was due, however, as much to the prevision of the "holy" ones, who had not lost the use of their "third eye," as to Karma and natural law. Speaking of the subsequent race (our Fifth Humanity), the commentary says:--

"Alone the handful of those Elect, whose divine instructors had gone to inhabit that Sacred Island -- 'from whence the last Saviour will come' -- now kept mankind from becoming one-half the exterminator of the other [as mankind does now -- H.P.B.]. It (mankind) became divided. Two-thirds of it were ruled by Dynasties of lower, material Spirits of the earth, who took possession of the easily accessible bodies; one-third remained faithful, and joined with the nascent Fifth Race -- the divine Incarnates. When the Poles moved (for the fourth time) this did not affect those who were protected, and who had separated from the Fourth Race. Like the Lemurians -- alone the ungodly Atlanteans perished, and 'were seen no more . . ."

[[Vol. 2, Page]] 351 THE "GREAT DRAGONS" AND SERPENTS.

STANZA XII.
THE FIFTH RACE AND ITS DIVINE INSTRUCTORS.

§§ (47) The remnants of the first two races disappear for ever. Groups of the various Atlantean races saved from the Deluge along with the Forefathers of the Fifth. (48) The origins of our present Race, the Fifth. The first divine Dynasties. (49) The earliest glimmerings in History, now pinned to the allegorical chronology of the Bible, and "universal" History slavishly following it. -- The nature of the first instructors and civilizers of mankind.

47. FEW (men) REMAINED. SOME YELLOW, SOME BROWN AND BLACK, AND SOME RED, REMAINED. THE MOON-COLOURED (of the primitive Divine Stock) WERE GONE FOR EVER (a) . . .

48. THE FIFTH RACE PRODUCED FROM THE HOLY STOCK (remained). IT WAS RULED BY HER FIRST DIVINE KINGS.

49. THE "SERPENTS" WHO RE-DESCENDED; WHO MADE PEACE WITH THE FIFTH (Race), WHO TAUGHT AND INSTRUCTED IT (b) . . .

(a) This verse (47) relates to the Fifth Race. History does not begin with it, but living and ever-recurring tradition does. History -- or what is called history -- does not go further back than the fantastic origins of our fifth sub-race, a "few thousands" of years. It is the sub-divisions of this first sub-race of the Fifth Root-Race which are referred to in the sentence, "Some yellow, some brown and black, and some red, remained." The "moon coloured" (i.e., the First and the Second Races) were gone for ever -- ay, without leaving any traces whatever; and that, so far back as the third "Deluge" of the Third Lemurian race, that "Great Dragon," whose tail sweeps whole nations out of existence in the twinkling of an eye. And this is the true meaning of the Verse in the COMMENTARY which says:

"The GREAT DRAGON has respect but for the 'SERPENTS' of WISDOM, the Serpents whose holes are now under the triangular stones," i.e., "the Pyramids, at the four corners of the world."

(b) This tells us clearly that which is mentioned more than once elsewhere in the Commentaries; namely, that the Adepts or "Wise" men of the three Races (the Third, Fourth and the Fifth) dwelt in subterranean habitats, generally under some kind of pyramidal structure, if not

[[Vol. 2, Page]] 352 THE SECRET DOCTRINE.

actually under a pyramid. For such "pyramids" existed in the four corners of the world and were never the monopoly of the land of the Pharaohs, though until found scattered all over the two Americas, under and over ground, beneath and amidst virgin forests, as in plain and vale, they were supposed to be the exclusive property of Egypt. If the true geometrically correct pyramids are no longer found in European regions, many of the supposed early neolithic caves, of the colossal triangular, pyramidal and conical menhirs in the Morbihan, and Brittany generally; many of the Danish tumuli and even of the "giant tombs" of Sardinia with their inseparable companions, the nuraghi, are so many more or less clumsy copies of the pyramids. Most of these are the works of the first settlers on the newly-born continent and isles of Europe, the -- "some yellow, some brown and black, and some red" -- races that remained after the submersion of the last Atlantean continents and islands (850,000 years ago), with the exception of Plato's Atlantean island, and before the arrival of the great Aryan races; while others were built by the earliest immigrants from the East. Those who can hardly accept the antiquity of the human race so far back as the 57,000 years assigned by Dr. Dowler to the skeleton found by him at New Orleans on the banks of the Mississippi, will, of course, reject these facts. But they may find themselves mistaken some day. It is the foolish self-glorification of the Arcadians who styled themselves [[proselenoi]] -- older than the moon -- and of the people of Attica, who claimed that they had existed before the sun appeared in heaven, that we may disparage, not their undeniable antiquity. Nor can we laugh at the universal belief that we had giant ancestors. The fact that the bones of the mammoth and mastodon, and, in one case, those of a gigantic salamander, have been mistaken for human bones, does not make away with the difficulty that, of all the mammalians, man is the only one whom science will not allow to have dwarfed down, like all other animal frames, from the giant homo diluvii to the creature between 5 and 6 feet that he is now.

But the "Serpents of Wisdom" have preserved their records well, and the history of the human evolution is traced in heaven as it is traced on underground walls. Humanity and the stars are bound together indissolubly, because of the intelligences that rule the latter.

Modern symbologists may scoff at this and call it "fancy," but "it is unquestionable that the Deluge has (ever) been associated in the legends of some Eastern peoples not only with the Pyramids, but also with the constellations," writes Mr. Staniland Wake ("The Great Pyramid"). The "Old Dragon" is identical with the "great Flood," says Mr. Proctor (in "Knowledge," Vol. I., p. 243): "We know that in the past the constellation of the Dragon was at the pole, or boss, of the celestial sphere. In stellar temples . . . the Dragon would be the

[[Vol. 2, Page]] 353 THE ASTRONOMICAL DRAGON.

uppermost or ruling constellation . . . it is singular how closely the constellations . . . correspond in sequence and in range of right ascension with the events recorded respecting the (Biblical) Flood."

The reasons for this singularity have been made clear in this work. But it shows only that there were several Deluges mixed up in the memories and traditions of the sub-races of the Fifth Race. The first great "Flood" was astronomical and cosmical, while several others were terrestrial. Yet, this did not prevent our very learned friend Mr. Gerald Massey -- an Initiate truly in the mysteries of the British Museum, still only a Self-initiate -- from declaring and insisting that the Atlantean submersion and Deluge were only the anthropomorphized fancies of ignorant people; and that Atlantis was no better than an astronomical allegory. Nevertheless, the great Zodiacal allegory is based upon historical events, and one can hardly interfere with the other; and it stands also to reason that every student of Occultism knows what that astronomical and zodiacal allegory means. Smith shows in the Nimrod Epic of the Assyrian tablets the real meaning of it. Its "twelve cantos" refer to the "annual course of the Sun through the twelve months of the year. Each tablet answers to a special month, and contains a distinct reference to the animal forms in the signs of the Zodiac"; the eleventh canto being "consecrated to Rimmon, the God of storms and of rain, and harmonizes with the eleventh sign of the Zodiac -- Aquarius, or the Waterman" (Nineteenth Century, 1882, p. 236). But even this is preceded in the old records by the pre-astronomical Cosmic FLOOD, which became allegorized and symbolized in the above Zodiacal or Noah's Flood. But this

has nothing to do with Atlantis. The Pyramids are closely connected with the ideas of both the Great Dragon (the constellation), the "Dragons of Wisdom," or the great Initiates of the Third and Fourth Races, and the Floods of the Nile, regarded as a divine reminder of the great Atlantic Flood. The astronomical records of Universal History, however, are said to have had their beginnings with the Third Sub-race of the Fourth Root-race or the Atlanteans. When was it? Occult data show that even since the time of the regular establishment of the Zodiacal calculations in Egypt, the poles have been thrice inverted.

We will presently return once more to this statement. Such symbols as are represented by the Signs of the Zodiac -- a fact which offers a handle to materialists upon which to hang their one-sided theories and opinions -- have too profound a signification, and their bearing upon our Humanity is too important to suffer dismissal in a few words. Meanwhile, we have to consider the meaning of that other statement which mentions (verse 48) the first divine Kings, who are said to have "redescended," guided and instructed our Fifth Race after the last deluge!

[[Vol. 2, Page]] 354 THE SECRET DOCTRINE.

We shall consider this last claim historically in the sections that follow, but must end with a few more details on the subject of "Serpents."

The rough commentaries on the Archaic Stanzas have to end here. Further elucidation requires proofs obtained from ancient, mediaeval, and modern works that have treated of these subjects. All such evidence has now to be gathered in, collated and brought together in better order, so as to compel the attention of the reader to this wealth of historical proofs. And as the manifold meaning of the weird symbol -- so often referred to and suggestive of the "tempter of man" in the orthodox light of the church -- can never be too strongly insisted upon, it seems more advisable to exhaust the subject by every available proof at this juncture, even at the risk of repetition. The Titans and Kabirs have been invariably made out by our theologians and some pious symbologists as indissolubly connected with the grotesque personage called devil, and every proof to the contrary has been hitherto as invariably rejected and ignored; therefore, the occultist must neglect nothing which may tend to defeat this conspiracy of slander. It is proposed to divide the subjects involved in these three last verses into several groups, and examine them in this final chapter as carefully and as fully as space permits. A few more details may thus be added to the general evidences of antiquity, on the most disputed tenets of Occultism and the Esoteric Doctrine -- the bulk of which will be found in Part II. on Symbology.

SERPENTS AND DRAGONS UNDER DIFFERENT SYMBOLISMS.

The name of the Dragon in Chaldea was not written phonetically, but was represented by two monograms, probably meaning, according to the Orientalists, "the scaly one." "This description," very pertinently remarks G. Smith, "of course might apply either to a fabulous dragon, a serpent, or a fish," and we may add: "It applies in one case to Makara, the tenth Zodiacal sign, meaning in Sanskrit a non-descript amphibious animal, generally called Crocodile, and really signifying something else. (Vide Part II., "The Mysteries of the Hebdomad.") This, then, is a virtual admission that the Assyriologists, at all events, know nothing certain as to the status of the "Dragon" in ancient Chaldea, whence the Hebrews got their symbolism, only to be afterwards robbed of it by the Christians, who made of the "Scaly one" a living entity and a maleficent power.

A specimen of Dragons, "winged and scaled," may be seen in the British Museum. Representing the events of the Fall according to the same authority, there are also two figures sitting on each side of a tree, and holding out their hands to the "apple," while at the back of the "Tree"

[[Vol. 2, Page]] 355 THE NAASENIAN GNOSTICS.

is the Dragon-Serpent. Esoterically, the two figures are two "Chaldees" ready for initiation, the Serpent symbolising the "Initiator"; while the jealous gods, who curse the three, are the exoteric profane clergy. Not much of the literal "Biblical event" there, as any occultist can see.

"The Great Dragon has respect but for the Serpents of Wisdom," says the Stanza; thus proving the correctness of our explanation of the two figures and the "Serpent."

"The Serpents who redescended . . . who taught and instructed" the Fifth Race. What sane man is capable of believing in our day that real serpents are hereby meant? Hence the rough guess, now become almost an axiom with the men of science, that those who wrote in antiquity upon various sacred Dragons and Serpents either were superstitious and credulous people, or were bent upon deceiving those more ignorant than themselves. Yet, from Homer downwards, the term implied something hidden from the profane.

"Terrible are the gods when they manifest themselves" -- those gods whom men call Dragons. And AElianus, treating in his "De Natura Animalium" of these Ophidean symbols, makes certain remarks which show that he understood well the nature of this most ancient of symbols. Thus he most pertinently explains with regard to the above Homeric verse -- "For the Dragon, while sacred and to be worshipped, has within himself something still more of the divine nature of which it is better (for others?) to remain in ignorance" (Book xi., ch. 17).

This "Dragon" having a septenary meaning, the highest and the lowest may be given. The former is identical with the "Self-born," the Logos (the Hindu Aja). He was the second person of the Trinity, the SON, with the Christian Gnostics called the Naasenians, or Serpent-Worshippers. His symbol was the constellation of the Dragon.* Its seven "stars" are the seven stars held in the hand of the "Alpha and Omega" in Revelation. In its most terrestrial meaning, the term "Dragon" was applied to the Wise men.

This portion of the religious symbolism of antiquity is very abstruse and mysterious, and may remain incomprehensible to the profane. In our modern day it so jars on the Christian ear that it can hardly escape, all civilization notwithstanding,

being regarded as a direct denunciation of the most cherished Christian dogmas, the subject of which required, to do it justice, the pen and genius of Milton, whose poetical fiction has now taken root in the Church as a revealed dogma.

Did the allegory of the Dragon and his supposed conqueror in

[[Footnote(s)]] -----

* As shown by H. Lizeray in the "Trinite Chretienne Devoilee" -- placed between the immutable Father (the Pole, a fixed Point) and mutable matter, the Dragon transmits to the latter the influences received by him from the Pole, whence his name -- the Verbum.

[[Vol. 2, Page]] 356 THE SECRET DOCTRINE.

Heaven originate with St. John, and in his Revelation? Emphatically we answer -- No. His "Dragon" is Neptune, the symbol of Atlantean magic.

To demonstrate the negation the reader is asked to examine the symbolism of the Serpent or the Dragon under its several aspects.

THE SIDEREAL AND COSMIC GLYPHS.

Every astronomer -- besides Occultists and Astrologers -- knows that, figuratively, the astral light, the milky way, and also the path of the Sun to the tropics of Cancer and Capricorn, as well as the circles of the Sidereal or Tropical year, were always called "Serpents" in the allegorical and mystic phraseology of the adepts.

This, cosmically, as well as metaphorically. Poseidon is a "Dragon": "Chozzar, called by the profane Neptune" (Peratae Gnostics); the "Good and Perfect Serpent," the Messiah of the Naaseni, whose symbol in Heaven is Draco.

But one ought to discriminate between the characters of this symbol. For instance: Zoroastrian Esotericism is identical with that of the Secret Doctrine; and when, as an example, we read in the Vendidad complaints uttered against the "Serpent," whose bites have transformed the beautiful, eternal spring of Airyana-Vaego, changing it into winter, generating disease and death, at the same time as mental and psychic consumption, every occultist knows that the Serpent alluded to is the north pole, as also the pole of the heavens.* The latter produces the seasons according to the angle at which it penetrates the centre of the earth. The two axes were no more parallel; hence the eternal spring of Airyana Vaego by the good river Daitya had disappeared, and "the Aryan Magi had to emigrate to Sagdiani" -- say the exoteric accounts. But the esoteric teaching states that the pole had passed through the equator, and that the "land of bliss" of the Fourth Race, its inheritance from the Third, had now become the region of desolation and woe. This alone ought to be an incontrovertible proof of the great antiquity of the Zoroastrian Scriptures. The Neo-Aryans of the post-diluvian age could, of course, hardly recognise the mountains, on the summits of which their forefathers had met before the Flood, and conversed with the pure "Yazathas" (celestial Spirits of the Elements), whose life and food they had once shared. As shown by Eckstein (Revue Archeologique, 8th year, 1885), "the Vendidad seems to point out a great change in the atmosphere of central Asia; strong volcanic eruptions and the collapse of a whole range of mountains in the neighbourhood of the Kara-Korum chain."

[[Footnote(s)]] -----

* Symbolized by the Egyptians under the form of a Serpent with a hawk's head.

[[Vol. 2, Page]] 357 THE TWO MYSTIC POLES.

The Egyptians, according to Eusebius, who for once (and for a wonder) wrote the truth, symbolised Kosmos by a large fiery circle, representing a serpent with a hawk's head lying across its diameter. "Here we have the pole of the earth within the plane of the ecliptic, attended with all the fiery consequences that must arise from such a state of the heavens: when the whole Zodiac in 25,000 (odd) years, must have reddened with the solar blaze, and each sign must have been vertical to the polar region." (See Mackey's "Sphinxiad.")

Meru -- the abode of the gods -- was placed, as before explained, in the North Pole, while Patala, the nether region, was supposed to lie in the South. As each symbol in esoteric philosophy has seven keys, geographically, Meru and Patala have one significance and represent localities; while astronomically, they have another, and mean "the two poles," which meanings ended by their being often rendered in exoteric sectarianism -- the "Mountain" and the "Pit," or Heaven and Hell. If we hold at present only to the astronomical and geographical significance, it may be found that the ancients knew the topography and nature of the Arctic and Antarctic regions better than any of our modern astronomers; they had reasons, and good ones for naming one the "Mountain" and the other the "Pit." As the author just quoted half explains, Helion and Acheron meant nearly the same: "Heli-on is the Sun in the highest" (Helios, Heli-on, the "most high"); "and Acheron is 32 deg. above the pole, and 32 below it, the allegorical river being thus supposed to touch the northern horizon in the latitude of 32 degrees. The vast concave, that is for ever hidden from our sight and which surrounded the southern pole, being therefore called the PIT, while observing, toward the Northern pole that a certain circuit in the heavens always appeared above the horizon -- they called it the Mountain. As Meru is the high abode of the Gods, these were said to ascend and descend periodically; by which (astronomically) the Zodiacal gods were meant, the passing of the original North Pole of the Earth to the South Pole of the heaven." "In that age," adds the author of that curious work, the "Sphinxiad" and of "Urania's Key to the Revelations" -- "at noon, the ecliptic would be parallel with the meridian, and part of the Zodiac would descend from the North Pole to the north horizon; crossing the eight coils of the Serpent (eight sidereal years, or over 200,000 solar years), which would seem like an imaginary ladder with eight staves reaching from the earth up to the pole, i.e., the throne of Jove. Up this ladder, then, the Gods, i.e., the signs of the Zodiac, ascended

and descended. (Jacob's ladder and the angels) It is more than 400,000 years since the Zodiac formed the sides of this ladder."

This is an ingenious explanation, even if it is not altogether free from occult heresy. Yet it is nearer the truth than many of a more scientific

[[Vol. 2, Page]] 358 THE SECRET DOCTRINE.

and especially theological character. As just said, the Christian trinity was purely astronomical from its beginning, which made Rutilius say -- of those who euhemerized it -- "Judaea gens, radix stultorum."

But the profane, and especially the Christian fanatics, ever in search of scientific corroboration for their dead-letter texts, will persist in seeing in the celestial pole the true Serpent of Genesis, Satan, the Enemy of mankind, instead of what it is - a cosmic metaphor. When the gods are said to forsake the earth, it does not only mean the gods, protectors and instructors, but also the minor gods -- the regents of the Zodiacal signs. Yet, the former, as actual and existing Entities which gave birth to, nursed, and instructed mankind in its early youth, appear in every Scripture, in that of the Zoroastrians as much as in the Hindu Gospels. Ormazd, or Ahura-Mazda, the "Lord of Wisdom," is the synthesis of the Amshaspendis (or Amesha-Spenta -- "Immortal Benefactors"),* the "Word," however, or the Logos and its six highest aspects in Mazdyanism. These "Immortal Benefactors" are described in Zamyad yasht as the "Amesha-Spentas, the shining, having efficacious eyes, great, helpful . . . imperishable and pure which are all seven of like mind, like speech, all seven doing alike . . . which are the creators and destroyers of the creatures of Ahura-Mazda, their creators and overseers, their protectors and rulers"

These few lines alone indicate the dual and even the triple character of the Amshaspendis, our Dhyan-Chohans or the "Serpents of Wisdom." They are identical with, and yet separate from Ormazd (Ahura-Mazda). They are also the Angels of the Stars of the Christians -- the Sary-azatas of the Zoroastrians -- or again the seven planets (including the sun) of every religion.** The epithet -- "the shining having efficacious eyes" -- proves it. This on the physical and sidereal planes. On the spiritual, they are the divine powers of Ahura-Mazda; but on the astral or psychic plane again, they are the "Builders," the "watchers," the Pitar (fathers), and the first Preceptors of mankind.

When mortals shall have become sufficiently spiritualised, there will be no more need of forcing them into a correct comprehension of ancient Wisdom. Men will know then, that there never yet was a great World-reformer, whose name has passed into our generation, who (a) was not a direct emanation of the LOGOS (under whatever name known to us), i.e., an essential incarnation of one of "the seven," of the "divine Spirit who is sevenfold"; and (b) who had not appeared before, during the

[[Footnote(s)]] -----

* Also translated as "blissful Immortals" by Dr. W. Geiger; but the first is more correct.

** These "seven" became the eight, the Ogdoad, of the later materialized religions, the seventh, or the highest principle, being no longer the pervading Spirit, the Synthesis, but becoming an anthropomorphic number, or additional unit.

[[Vol. 2, Page]] 359 GOD AND NATURE ANTHROPOMORPHIZED.

past Cycles. They will recognise, then, the cause which produces in history and chronology certain riddles of the ages; the reason why, for instance, it is impossible for them to assign any reliable date to Zoroaster, who is found multiplied by twelve and fourteen in the Dabistan; why the Rishis and Manus are so mixed up in their numbers and individualities; why Krishna and Buddha speak of themselves as re-incarnations, i.e., Krishna is identified with the Rishi Narayana, and Gautama gives a series of his previous births; and why the former, especially, being "the very supreme Brahma," is yet called Amsamsavata -- "a part of a part" only of the Supreme on Earth. Finally, why Osiris is a great God, and at the same time a "prince on Earth," who reappears in Thoth-Hermes, and why Jesus (in Hebrew, Joshua) of Nazareth is recognised, cabalistically, in Joshua, the Son of Nun, as well as in other personages. The esoteric doctrine explains it by saying that each of these (as many others) had first appeared on earth as one of the seven powers of the LOGOS, individualized as a God or "Angel" (messenger); then, mixed with matter, they had re-appeared in turn as great sages and instructors who "taught the Fifth Race," after having instructed the two preceding races, had ruled during the Divine Dynasties, and had finally sacrificed themselves, to be reborn under various circumstances for the good of mankind, and for its salvation at certain critical periods; until in their last incarnations they had become truly only "the parts of a part" on earth, though de facto the One Supreme in Nature.

This is the metaphysics of Theogony. And, as every "Power" among the SEVEN has (once individualized) in his charge one of the elements of creation, and rules over it,* hence the many meanings in every symbol, which, unless interpreted according to the esoteric methods, generally lead to an inextricable confusion.

Does the Western Kabbalist -- generally an opponent of the Eastern Occultist -- require a proof? Let him open Eliphas Levi's *Histoire de la Magic*, p. 53, and carefully examine his "Grand Symbole Kabbalistique" of the Zohar. He will find, on the engraving given, a white man standing erect and a black woman upside down, i.e., standing on her head, her legs passing under the extended arms of the male figure, and protruding behind his shoulders, while their hands join at an angle on each side. Eliphas Levi makes of it, God and Nature; or God, "light," mirrored inversely in "Nature and Matter," darkness. Kabbalistically and symbolically he is right; but only so far as emblematical cosmogony goes. Nor has he invented the symbol any more

[[Footnote(s)]] -----

* These elements are:-- The cosmic, the terrene, the mineral, the vegetable, the animal, the aqueous, and finally the human -- in their physical, spiritual, and psychic aspects.

than the Kabalists have: the two figures in white and black stone have existed in the temples of Egypt from time immemorial -- agreeably to tradition; and historically -- ever since the day of King Cambyses, who personally saw them. Therefore the symbol must have been in existence since nearly 2,500 years ago. This, at the very least, for that Persian sovereign, who was a son of Cyrus the Great, succeeded his father in the year 529 B.C. These figures were the two Kabiri personifying the opposite poles. Herodotus (Thalia, No. 77) tells posterity that when Cambyses entered the temple of the Kabirim, he went into an inextinguishable fit of laughter, on perceiving what he thought a man erect and a woman standing on the top of her head before him. These were the poles, however, whose symbol was intended to commemorate "the passing of the original North Pole of the Earth to the South Pole of the Heaven," as perceived by Mackey.* But they represented also the poles inverted, in consequence of the great inclination of the axis, bringing each time as a result the displacement of the Oceans, the submersion of the polar lands, and the consequent upheaval of new continents in the equatorial regions, and vice versa. These Kabirim were the "Deluge" gods.

This may help us to get at the key of the seemingly hopeless confusion among the numbers of names and titles given to one and the same gods, and classes of gods. Faber showed already, at the beginning of this century, the identity of the Corybantes, Curetes, Dioscuri, Anactes, Dii Magni, Idei Dactyli, Lares, Penates, Manes,** Titans, and Aletae with the KABIRI. And we have shown that the latter were the same as the Manus, the Rishis, and our Dhyān Chohans, who incarnated in the Elect of the Third and Fourth Races. Thus, while in Theogony the Kabiri-Titans were seven great gods: cosmically and astronomically the Titans were called Atlantes, because, perhaps, as Faber says, they were connected

[[Footnote(s)]] -----

* Who adds that the Egyptians had various ways of representing the angles of the Poles. Also in Perry's View of the Levant there is "a figure representing the South Pole of the Earth in the constellation of the Harp," in which the poles appear like two straight rods, surmounted with hawks' wings, but they were also often represented as serpents with heads of hawks, one at each end.

** Faber and Bishop Cumberland would make them all the later pagan personifications, as the former writer has it, of "the Noetic Ark, and no other than the Patriarch (Noah) and his family" (!) See his "Kabiri," Vol. I., 136; because, we are told, "after the Deluge in commemoration of the event, the pious Noachidae had established a religious festival, which was, later on, corrupted by their impious descendants; demons or hero-gods; and at length unblushing obscenity usurped the name and garb of religion" (Vol. I., p. 10.). Now this is indeed putting an extinguisher upon the human reasoning powers, not only of antiquity, but even of our present generations. Reverse the statement, and explain after the words "Noah and his family" that what is meant by that patriarch and family is simply the Jewish version of a Samothracian mystery, of Saturn, or Kronos-Sadic and his Sons, and then we may say Amen.

(a) with At-al-as "the divine Sun," and (b) with tit "the deluge." But this, if true, is only the exoteric version. Esoterically, the meaning of their symbols depends on the appellation, or title, used. The seven mysterious, awe-inspiring great gods -- the Dioscuri,* the deities surrounded with the darkness of occult nature -- become the Idei (or Idaic finger) with the adept-healer by metals. The true etymology of the name lares (now signifying "ghosts") must be sought in the Etruscan word "Iars," "conductor," "leader." Sanchoniathon translates the word Aletae as fire worshippers, and Tabor believes it derived from Al-Orit, "the god of fire." Both are right, as in both cases it is a reference to the Sun (the highest God), toward whom the planetary gods "gravitate" (astronomically and allegorically) and whom they worship. As Lares, they are truly the Solar Deities, though Faber's etymology, who says that "Iar" is a contraction of "El-Ar," the solar deity, is not very correct. They are the "Iares," the conductors and leaders of men. As Aletae, they were the seven planets -- astronomically; and as Lares, the regents of the same, our protectors and rulers -- mystically. For purposes of exoteric or phallic worship, as also cosmically, they were the Kabiri, their attributes being recognised in these two capacities by the name of the temples to which they respectively belonged, and those of their priests. They all belonged, however, to the Septenary creative and informing groups of Dhyān Chohans. The Sabeans, who worshipped the "regents of the Seven planets" as the Hindus do their Rishis, held Seth and his son Hermes (Enoch or Enos) as the highest among the planetary gods. Seth and Enos were borrowed from the Sabeans and then disfigured by the Jews (exoterically); but the truth can still be traced about them even in Genesis.** Seth is the "progenitor" of those early men of the Third Race in whom the "Planetary" angels had incarnated -- a Dhyān Chohan himself, who belonged to the informing gods; and Enos (Hanoch or Enoch) or Hermes, was said to be his son -- because it was a generic name for all the early Seers ("Enoichion"). Thence the worship. The Arabic writer Soyuti says that the earliest records mention Seth, or Set, as the founder of Sabeanism; and therefore that the pyramids which embody the planetary system were regarded as the place of sepulchre of both Seth and Idris (Hermes or Enoch), (See Vyse, "Operations," Vol. II., p. 358); that thither Sabeans proceeded

[[Footnote(s)]] -----

* Who became later on, with the Greeks, limited only to Castor and Pollux. But in the days of Lemuria, the Dioscuri, the "Egg-born," were the Seven Dhyān Chohans (Agnishwatta-Kumara) who incarnated in the Seven Elect of the Third Race.

** Clement of Alexandria recognized the astronomical significance of chapter xxv. et seq. of Exodus. According to the Mosaic doctrine, he says that the seven planets help in the generation of terrestrial things. The two cherubs standing on the two sides of the sacred tetragrammaton represent the Ursa Major and Ursa Minor.

on pilgrimage, and chanted prayers seven times a day, turning to the North (the Mount Meru, Kaph, Olympus, etc., etc.) (See Palgrave, Vol. II., p. 264). Abd Allatif says curious things about the Sabeans and their books. So does Eddin Ahmed

Ben Yahya, who wrote 200 years later. While the latter maintains "that each pyramid was consecrated to a star" (a star regent rather), Abd Allatif assures us "that he had read in Sabean books that one pyramid was the tomb of Agathodaemon and the other of Hermes" (Vyse, Vol. II., p. 342). "Agathodaemon was none other than Seth, and, according to some writers, Hermes was his son," adds Mr. Staniland Wake in "The Great Pyramid," p. 57.

Thus, while in Samothrace and the oldest Egyptian temples they were the great Cosmic Gods (the seven and the forty-nine Sacred Fires), in the Grecian fanes their rites became mostly phallic, therefore to the profane, obscene. In the latter case they were 3 and 4, or 7 -- the male and female principles -- (the crux ansata); this division showing why some classical writers held that they were only three, while others named four. And these were -- the Kabiri -- Axieros (in his female aspect, Demeter); Axio-Kersa (Persephone)*; Axiokersos (Pluto or Hades); and Kadmos or Kadmilos (Hermes -- not the ithyphallic Hermes mentioned by Herodotus (II. 51) but "he of the sacred legend," explained only during the Samothracian mysteries). This identification, due, according to the Scholiast Apollon (Rh. I. 217), to an indiscretion of Mnaseas, is none at all, as names alone do not reveal much. There were still others again who maintained, being as right in their way, that there were only two Kabiri. These were, esoterically, the two Dioscuri, Castor and Pollux, and exoterically, Jupiter and Bacchus. The two personified the terrestrial poles, geodesically; the terrestrial, and the pole of the heavens -- astronomically, as also the physical and the spiritual man. The story of Semele and Jupiter and the birth of Bacchus, the Bimater, with all the circumstances attending it, needs only to be read esoterically to understand the allegory. The parts played in the event by the fire, water, earth, etc., in the many versions, will show how "the father of the gods"

[[Footnote(s)]] -----

* It is a curious idea -- yet one not very far from the truth, perhaps -- that speculation of Mackey, the self-made Adept of Norwich, found in his "Mythological Astronomy." He says that the Kabiri named Axieros and Axiokersa derived their names (a) from Kab or Cab, a measure, and from Urim, the heavens: the Kabirim being thus "a measure of the heavens"; and (b) that their distinctive names, implying the principle of generation, referred to the sexes. For, "the word sex was formerly understood by aix; which has now settled . . . into sex." And he refers to "Encyclopaedia Londinus" at the word "aspiration." Now if we give the aspirated sound to Axieros, it would be Saxieros; and the other pole would be Saxiokersa. The two poles would thus become the generators of the other powers of nature -- they would be the parents: therefore the most powerful gods.

[[Vol. 2, Page]] 363 THE POLES, THE "HEAVENLY MEASURE."

and the "merry God of the wine" were also made to personify the two terrestrial Poles. The telluric, metalline, magnetic, electric and the fiery elements are all so many allusions and references to the cosmic and astronomic character of the diluvian tragedy. In astronomy, the poles are indeed the "heavenly measure" (vide note supra); and so are the Kabiri Dioscuri, as will be shown, and the Kabiri-Titans, to whom Diodorus ascribes the invention of fire* and the art of manufacturing iron. Moreover, Pausanias shows that the original Kabiric deity was Prometheus. (I. ix. p. 751.)

But the fact that, astronomically, the Titans-Kabirim were also the generators and regulators of the seasons, and cosmically the great Volcanic Energies, the gods presiding over all the metals and terrestrial works, does not prevent them from being, in their original divine characters, the beneficent Entities who, symbolized in Prometheus, brought light to the world, and endowed humanity with intellect and reason. They are pre-eminently in every theogony -- especially in the Hindu -- the sacred divine fires, 3, 7, or 49, according as the allegory demands it. Their very names prove it, as they are the Agni-putra (Sons of the Fire) in India, and the genii of the fire under numerous names in Greece and elsewhere. Welcker, Maury, and now Decharme, show the name Kabeiron meaning "the powerful through fire," from the Greek word [[kaio]] "to burn." The Semitic Kabirim, "the powerful, the mighty, and the great," answering to the Greek [[megaloï dunatoi]], are later epithets. They were universally worshipped, and their origin is lost in the night of time. Yet whether propitiated in Phrygia, Phoenicia, the Troad, Thrace, Egypt, Lemnos or Sicily, their cult was always connected with fire; their temples ever built in the most volcanic localities, and in exoteric worship they belonged to Chthonian divinities. Therefore Christianity has made of them infernal gods.

They are truly "the great, beneficent and powerful Gods," as Cassius Hermone calls them (See Macrob. Sat. I., iii., c. 4, p. 376). At Thebes, Kore and Demeter, the Kabirim, had a sanctuary (Pausan. IX. 22; 5), and at Memphis, the Kabiri had a temple so sacred, that none, excepting the priests, were suffered to enter their holy precincts (Herodotus I. ii., c. 37). But we must not lose sight, at the same time, of the fact that the title of Kabiri was a generic one; that the Kabiri (the mighty gods as well as mortals), were of both sexes, as also terrestrial, celestial and kosmic. That, while in their later capacity of the Rulers of sidereal and terrestrial powers, a purely geological phenomenon (as it is now

[[Footnote(s)]] -----

* The word "guebra" comes from Kabiri, gabiri, and means Persian ancient fire-worshippers, or Parsis. Kabiri became gabiri and then remained as an appellation of the Zoroastrians in Persia. (See Hyde's "De Religio Persarum," cap. 29.)

[[Vol. 2, Page]] 364 THE SECRET DOCTRINE.

regarded) was symbolized in the persons of those rulers, they were also, in the beginning of times, the rulers of mankind. When incarnated as Kings of the "divine Dynasties," they gave the first impulse to civilizations, and directed the mind with which they had endowed men to the invention and perfection of all the arts and sciences. Thus the Kabiri are said to have appeared as the benefactors of men, and as such they lived for ages in the memory of nations. To them -- the Kabiri or Titans -- is ascribed the invention of letters (the Devanagari, or the alphabet and language of the gods), of laws and legislature; of architecture, as of the various modes of magic, so-called; and of the medical use of plants. Hermes, Orpheus, Cadmus, Asclepius, all those demi-gods and heroes, to whom is ascribed the revelation of sciences to men, and in whom Bryant, Faber, Bishop Cumberland, and so many other Christian writers -- too zealous for plain truth -- would force posterity to see only pagan copies of one and sole prototype, named Noah -- are all generic names.

It is the Kabiri who are credited with having revealed, by producing corn or wheat, the great boon of agriculture. What Isis-Osiris, the once living Kabiria, has done in Egypt, that Ceres is said to have done in Sicily; they all belong to one class.

That the Serpents were ever the emblems of wisdom and prudence is again shown by the caduceus of Mercury, one with Thot, the god of wisdom, with Hermes, and so on. The two serpents, entwined around the rod, are phallic symbols of Jupiter and other gods who transformed themselves into snakes for purposes of seducing goddesses -- but only in the unclean fancies of profane symbologists. The serpent has ever been the symbol of the adept, and of his powers of immortality and divine knowledge. Mercury in his psychopompic character, conducting and guiding with the caduceus the souls of the dead to Hades and even raising the dead to life with it, is simply a very transparent allegory. It shows the dual power of the Secret Wisdom: the black and the white magic. It shows this personified Wisdom guiding the Soul after death, and its power to call to life that which is dead -- a very deep metaphor if one thinks over its meaning. Every people of antiquity revered this symbol, with the exception of Christians, who chose to forget the brazen Serpent of Moses, and even the implied acknowledgment of the great wisdom and prudence of the Serpent by Jesus himself, "Be ye wise as serpents and harmless as doves." The Chinese, one of the oldest nations of our Fifth Race, made of it the emblem of their Emperors, who are thus the degenerate successors of the "Serpents" or Initiates, who ruled the early races of the Fifth Humanity. The Emperor's throne is the "Dragon's Seat," and his dresses of State are embroidered with the likeness of the

[[Vol. 2, Page]] 365 THE VARIOUS NOAHS.

Dragon. The aphorisms in the oldest books of China, moreover, say plainly that the "Dragon" is a human, albeit divine, Being. Speaking of the "Yellow Dragon," the chief of the others, the Twan-ying-t'u, says: "His wisdom and virtue are unfathomable . . . he does not go in company and does not live in herds (he is an ascetic). He wanders in the wilds beyond the heavens. He goes and comes, fulfilling the decree (Karma); at the proper seasons if there is perfection he comes forth, if not he remains (invisible)." . . . And Kon-fu-tyu is made to say by Lu-lan, "The Dragon feeds in the pure water of Wisdom and sports in the clear waters of Life."

OUR DIVINE INSTRUCTORS.

Now Atlantis and the Phlegyan isle are not the only record that is left of the deluge. China has also her tradition and the story of an island or continent, which it calls Ma-li-ga-si-ma, and which Kaempfer and Faber spell "Maurigosima," for some mysterious phonetic reasons of their own. Kaempfer, in his "Japan" (Appendix, p. 13), gives the tradition: The island, owing to the iniquity of its giants, sinks to the bottom of the ocean, and Peiru-un, the king, the Chinese Noah, escapes alone with his family owing to a warning of the gods through two idols. It is that pious prince and his descendants who have peopled China. The Chinese traditions speak of the divine dynasties of Kings as much as those of any other nations.

At the same time there is not an old fragment but shows belief in a multiform and even multigeneric evolution -- spiritual, psychic, intellectual and physical -- of human beings, just as given in the present work. A few of these claims have now to be considered.

Our races -- they all show -- have sprung from divine races, by whatever name they are called. Whether we deal with the Indian Rishis or Pitris; with the Chinese Chim-nang and Tchan-gy -- their "divine man" and demi-gods; with the Akkadian Dingir and Mul-lil -- the creative god and the "Gods of the ghost-world"; with the Egyptian Isis-Osiris and Thot; with the Hebrew Elohim, or again with Manco Capac and his Peruvian progeny -- the story varies nowhere. Every nation has Amshaspends* (six exoterically), ten and seven Chaldean Anedots,

[[Footnote(s)]] -----

* The Amshaspends are six -- if Ormazd, their chief and Logos, is excluded. But in the secret doctrine he is the seventh and highest, just as Pthah is the seventh Kabir among the Kabiri.

[[Vol. 2, Page]] 366 THE SECRET DOCTRINE.

ten and seven Sephiroth, etc., etc. One and all have been derived from the primitive Dhyana-Chohans of the Esoteric doctrine, or the "Builders" of the Stanzas (Book I.). From Manu, Thot-Hermes, Oannes-Dagon, and Edris-Enoch, down to Plato and Panadores, all tell us of seven divine Dynasties, of seven Lemurian, and seven Atlantean divisions of the Earth; of the seven primitive and dual gods who descend from their celestial abode* and reign on Earth, teaching mankind Astronomy, Architecture, and all the other sciences that have come down to us. These Beings appear first as "gods" and Creators; then they merge in nascent man, to finally emerge as "divine-Kings and Rulers." But this fact has been gradually forgotten. As Bosuage shows, the Egyptians themselves confessed that science flourished in their country only since Isis-Osiris, whom they continue to adore as gods, "though they had become Princes in human form." And he adds of Osiris-Isis (the divine androgynous:-- "It is said that this Prince (Isis-Osiris) built cities in Egypt, stopped the overflowing of the Nile; invented agriculture, the use of the vine, music, astronomy, and geometry."

When Abul-Feda says in his "Historia Anteislamica" (Fleisher, p. 16) that the Sabeian language was established by Seth and Edris (Enoch) -- he means by "Sabeian language" astronomy. In the "Melelwa Nohil" (MS. 47 in Nic. Cat.) Hermes is called the disciple of Agathodaemon. And in another account (See Col. Vyse's 2nd Vol. of the "Pyramids of Ghizeh," p. 364, MS. 785, Uri's Cat.) Agathodaemon is mentioned as a "King of Egypt." Celepas Geraldinus gives curious traditions about Henoch. He calls him the "divine giant." In the "Book of the various names of the Nile," the same author (the historian Ahmed-Ben-Yusouf Eltiphas) tells us of the belief among the Semitic Arabs that Seth (become later the Egyptian Typhon, Set), had been one of the seven angels (or Patriarchs in the Bible): then he became a mortal and Adam's son, after which he communicated the gift of prophecy and astronomical science to Jared, who passed it to his son Henoch. But Henoch (Idris) "the author of thirty books, was Sabeian by origin" (i.e., belonging to the Saba, "a Host"); "having

established the rites and ceremonies of primitive worship, he went to the East, where he constructed 140 cities, of which Edessa was the least important, then returned to Egypt where he became its King." Thus, he is identified with Hermes. But there were five Hermes -- or rather one, who appeared -- as some Manus and Rishis did -- in several different characters. In the Burham-i-Kati he is mentioned as "Hormig," a name of the planet Mercury or Budha; and Wednes-

[[Footnote(s)]] -----

* In the Purana it is identified with Vishnu's or Brahma's Sveta Dwipa of Mount Meru.

[[Vol. 2, Page]] 367 HERMES IN ASTRONOMY AND ELSEWHERE.

day was sacred both to Hermes and Thot. The Hermes of Oriental tradition, worshipped at Phineata and said to have fled after the death of Argus into Egypt, civilized it under the name of Thoth. But under whichever of these characters, he is always credited with having transferred all the sciences from latent to active potency, i.e., with having been the first to teach magic to Egypt and to Greece, before the days of Magna Graecia, and when the Greeks were not even Hellenes.

Not only Herodotus -- the "father of History" -- tells us of the marvellous dynasties of gods that preceded the reign of mortals, followed by the dynasties of demi-gods, Heroes, and finally men, but the whole series of classics support him; Diodorus, Eratosthenes, Plato, Manetho, etc., etc., repeat the same, and never vary the order given.

"It is, indeed," as Creuzer shows:--

"From the spheres of the stars wherein dwell the gods of light that wisdom descends to the inferior spheres." "In the system of the ancient priests (Hierophants and Adepts) all things without exception, gods, the genii, manes (souls), the whole world, are conjointly developed in Space and duration. The pyramid may be considered as the symbol of this magnificent hierarchy of Spirits. . . . "*

There were more efforts made by the modern historians (French Academicians, like Renan, chiefly) to suppress truth by ignoring the ancient annals of divine Kings, than is strictly consistent with honesty. But M. Renan could never be more unwilling than was Eratosthenes 260 years B.C. to accept the unpalatable fact; and yet the latter found himself obliged to recognise its truth. For this, the great astronomer is treated with great contempt by his colleagues 2,000 years later. Manetho became with them "a superstitious priest born and bred in the atmosphere of other lying priests of Heliopolis" (Freret). "All those historians and priests," justly remarks the demonologist, de Mirville, "so veracious when repeating stories of human kings and men, suddenly become extremely suspicious no sooner do they go back to their gods." . . . But there is the synchronistic table of Abydos, which, thanks to the genius of Champollion, has now vindicated the good faith of the priests of Egypt (Manetho's above all), and that of Ptolemy. In the Turin papyrus, the most remarkable of all, in the words of the Egyptologist, de Rouge:--

". . . Champollion, struck with amazement, found that he had under his own eyes the whole truth. . . . It was the remains of a list of dynasties embracing the furthest mythic times, or the REIGN OF THE GODS AND HEROES. . . . At the very outset of this curious

[[Footnote(s)]] -----

* Ch. iv. of "Egypt," p. 441.

[[Vol. 2, Page]] 368 THE SECRET DOCTRINE.

papyrus we have to arrive at the conviction that so far back already as the period of Ramses, those mythic and heroic traditions were just as Manetho had transmitted them to us; we see figuring in them, as Kings of Egypt, the gods Seb, Osiris, Horus, Thoth-Hermes, and the goddess Ma, a long period of centuries being assigned to the reign of each of these." (Ann. de Philologie Chretienne, Vol. XXXII., p. 442).

The synchronistic tables of Manetho, besides the fact that they were disfigured by Eusebius for dishonest purposes, had never gone beyond Manetho. The chronology of the divine Kings and Dynasties, like that of the age of humanity, has ever been in the hands of the priests, and was kept secret from the profane multitudes.

Africa, as a continent, it is said, appeared before Europe did; nevertheless it appeared later than Lemuria and even the earliest Atlantis. That the whole region of what is now Egypt and the deserts was once upon a time covered with the sea, was known firstly through Herodotus, Strabo, Pliny, and all the Greeks; and, secondly, through geology. Abyssinia was once upon a time an island; and the Delta was the first country occupied by the pioneer emigrants who came with their gods from the North-east.

When was it? History is silent upon the subject. Fortunately we have the Dendera Zodiac, the planisphere on the ceiling of one of the oldest Egyptian temples, which records the fact. This Zodiac, with its mysterious three Virgos between the Lion and Libra, has found its OEdipus, who understood the riddle of these signs, and justified the truthfulness of those priests who told Herodotus that:-- (a) The poles of the Earth and the Ecliptic had formerly coincided; and (b) That even since their first Zodiacal records were commenced, the Poles have been three times within the plane of the Ecliptic, as the Initiates taught.

Baillly had not sufficient words at his command to express his surprise at the sameness of all such traditions about the divine races. "What are finally," he exclaims, "all those reigns of Indian Devas and Persian Peris? . . . Or, those reigns and dynasties of the Chinese legends; those Tien-hoang or the Kings of Heaven, quite distinct from the Ti-hoang, the Kings on Earth, and the Gin-hoang the King's men, a distinction which is in perfect accord with that other one made by the Greeks and the Egyptians, in enumerating their dynasties of Gods, of demi-gods, and of mortals."*

"Now," says Panadoras, "it is before that time (Menes), that the reign of the seven gods who rule the world took place. It was during that period that those benefactors of humanity descended on Earth and taught

[[Footnote(s)]] -----

* Histoire de l'Astronomie Ancienne.

[[Vol. 2, Page]] 369 WHAT THE PRIESTS TOLD HERODOTUS.

men to calculate the course of the sun and moon by the twelve signs of the Ecliptic."

Nearly five hundred years before the actual era, Herodotus was shown by the priests of Egypt the statues of their human Kings and Pontiffs-piromis (the archi-prophets or Maha-Chohans of the temples), born one from the other (without the intervention of woman) who had reigned before Menes, their first human King. These statues, he says, were enormous colossi in wood, three hundred and forty-five in number, each of which had his name, his history and his annals. And they assured Herodotus* (unless the most truthful of historians, the "Father of History," is now accused of fibbing, just in this instance) that no historian could ever understand or write an account of these superhuman Kings, unless he had studied and learned the history of the three dynasties that preceded the human -- namely, the DYNASTIES OF THE GODS, that of demi-gods, and of the Heroes, or giants. These "three dynasties" are the three Races.**

Translated into the language of the Esoteric doctrine, these three dynasties would also be those of the Devas, of Kimpurushas, and of Danavas and Daityas -- otherwise gods, celestial spirits, and giants or Titans. "Happy are those who are born, even from the condition of gods, as men, in Bharata-Varsha!" exclaim the incarnated gods themselves, during the Third Root-Race. Bharata is India, but in this case it symbolized the chosen land in those days, and was considered the best of the divisions of Jambu-dwipa, as it was the land of active (spiritual) works par excellence; the land of initiation and of divine knowledge.

Can one fail to recognise in Creuzer great powers of intuition, when, being almost unacquainted with the Aryan Hindu philosophies, little known in his day, he wrote:--

"We modern Europeans feel surprised when hearing talk of the Spirits of the Sun, Moon, etc. But we repeat again, the natural good sense and the upright

[[Footnote(s)]] -----

* See also Memoires a l'Academie, etc., of de Mirville, Vol. III., for a mass of evidence.

** In Vishnu-Purana, Book II., chap. 3, 4, et seq., may be found many corroborations of the same, if one reads carefully. The reigns of gods, lower gods, and men are all enumerated in the descriptions of the seven Islands, seven seas, seven mountains, etc., etc., ruled by Kings. Each king is said invariably to have seven sons, an allusion to the seven sub-races. One instance will do. The King of Kusa dwipa had seven sons (follow names) . . . "after whom the seven portions (Varsha) of the island were called. There reside mankind along with Daityas and Danavas, as well as with spirits of Heaven (Gandharvas, Yakshas, Kimpurushas, etc.) and gods." (Chapter iv.) There is but one exception in the case of King Priyavrata, the son of the first Manu, Swayambhuva -- who had ten sons. But of these, three -- Medha, Agnibahu, and Putra -- became ascetics, and refused their portions. Thus Priyavrata divided the earth again into seven continents.

[[Vol. 2, Page]] 370 THE SECRET DOCTRINE.

judgment of the ancient peoples, quite foreign to our entirely material ideas upon celestial mechanics and physical sciences . . . could not see in the stars and planets only that which we see: namely, simple masses of light, or opaque bodies moving in circuits in sidereal space, merely according to the laws of attraction or repulsion; but they saw in them living bodies, animated by spirits as they saw the same in every kingdom of nature. . . . This doctrine of spirits, so consistent and conformable to nature, from which it was derived, formed a grand and unique conception, wherein the physical, the moral, and the political aspects were all blended together . . ." ("Egypte," pp. 450 to 455.)

It is such a conception only that can lead man to form a correct conclusion about his origin and the genesis of everything in the universe -- of Heaven and Earth, between which he is a living link. Without such a psychological link, and the feeling of its presence, no science can ever progress, and the realm of knowledge must be limited to the analysis of physical matter only.

Occultists believe in "spirits," because they feel (and some see) themselves surrounded on every side by them.* Materialists do not. They live on this earth, just as, in the world of insects and even of fishes, some creatures live surrounded by myriads of their own genus, without seeing, or so much as sensing them.**

Plato is the first sage among the classics who speaks at length of the

[[Footnote(s)]] -----

* As a general rule, now that the very nature of the inner man has become as blind as his physical nature, man is situated on this globe as the Amphioxus is in the Ocean. Surrounded by shoals and millions of various other fishes and creatures that see it, the Amphioxus species --having neither brain nor any of the senses possessed by the other classes -- sees them not. Who knows whether, on the Darwinian theory, these "Branchiostoma" are not the direct ancestors of our Materialists.

** The Occultists have been accused of worshipping gods or devils. We deny this. Among the numberless hosts of spirits -- men that were, and those who will be men -- there are those immeasurably superior to the human race, higher and

holier than the highest Saint on Earth, and wiser than any mortal without exception. And there are those again who are no better than we are, as some are far worse and inferior to the lowest savage. It is the latter classes that command the readiest communication with our earth, who perceive and sense us, as the clairvoyants perceive and sense them. The close proximity of our respective abodes and planes of perception are in favour of such inter-communication unfortunately, as they are ever ready to interfere with our affairs for weal or woe. If we are asked how it is that none but sensitive hysterical natures, neuro- and psycho-pathic persons see and occasionally talk with "Spirits," we answer the question by several other queries. We ask: "Do you know the nature of hallucination, and can you define its psychic process? How can you tell that all such visions are due merely to physical hallucinations? What makes you feel so sure that mental and nervous diseases, while drawing a veil over our normal senses (so-called) do not reveal at the same time vistas unknown to the healthy man, by throwing open doors usually closed against your scientific perceptions (?): or that a psycho-spiritual faculty does not forthwith replace the loss, or the temporary atrophy, of a purely physical sense? It is disease, or the exuberance of nervous fluid which produces mediumship and visions --hallucinations, as you call them. But what does Science know even of mediumship?" Truly were the [[Footnote continued on next page]]

[[Vol. 2, Page]] 371 A UNIVERSAL CORROBORATION.

divine Dynasties, and locates them on a vast continent which he calls Atlantis. Bailly was not the first nor last to believe the same, and he had been preceded and anticipated in this theory by Father Kircher. This learned Jesuit writes in "OEdipus Aegyptiacus" (Vol. I., p. 70):--

"I confess, for a long time I had regarded all this (dynasties and the Atlantis) as pure fables (meras nugas) to the day when, better instructed in Oriental languages, I judged that all those legends must be, after all, only the development of a great truth. . . ."

As de Rougemont shows, Theopompus, in his Meropis, made the priests of Phrygia and Asia Minor speak exactly as the priests of Sais did when they revealed to Solon the history and fate of Atlantis. According to Theopompus, it was a unique continent of an indefinite size, and containing two countries inhabited by two races -- a fighting, warrior race, and a pious, meditative race,* which Theopompus symbolizes by two cities.** The pious "city" was continually visited by the gods; the belligerent "city" was inhabited by various beings invulnerable to iron, liable to be mortally wounded only by stone and wood.*** De Rougemont treats this as a pure fiction of Theopompus ("Peuple Primitif," vol. iii. 157) and even sees a fraud (supercherie) in the assertion of the Saitic priests. This was denounced by the "Demonologists" as illogical. In the words of De Mirville:-- "A supercherie which was based on a belief, the product of faith of the whole antiquity; a supposition which yet gave its name to a whole mountain chain (the Atlas); which specified with the greatest precision a topographical region (by placing some of its lands at a small distance from Cadiz and the strait of Calpetus), which prophesied, 2,000 years before Columbus, the great trans-oceanic land situated beyond that Atlantis and which "is reached" it said -- "by the islands not of the blessed, but of the good spirits [[eudaimonia]] (our 'Iles Fortunees') -- such a supposition can never be an universal chimera." (A word on "Atlantis," p. 29.)

It is certain that, whether "chimera" or reality, the priests of the whole world had it from one and the same source: the universal tradition

[[Footnote(s)]] -----

[[Footnote continued from previous page]] modern Charcots to pay attention to the delirium of their patients from a more psychic standpoint, Science, and physiology especially, might be more benefited than they are now, and truth have a wider field of fact in its knowledge.

* These were the early Aryans and the bulk of the Fourth Root Races -- the former pious and meditative (yoga-contemplation), the latter -- a fighting race of sorcerers, who were rapidly degenerating owing to their uncontrolled passions.

** The Northern and Southern Divisions of Lemuria-Atlantis. The Hyperborean and the Equatorial lands of the two continents. (See Sections about Lemuria and Atlantis in History.)

*** This is Occult and refers to the property of iron which, attracted by magnetic elements, is repelled by others, which are made, by an occult process, as impervious to it as water to a blow.

[[Vol. 2, Page]] 372 THE SECRET DOCTRINE.

about the third great continent which perished some 850,000 years ago.* A continent inhabited by two distinct races; distinct physically and especially morally; both deeply versed in primeval wisdom and the secrets of nature; mutually antagonistic in their struggle, during the course and progress of their double evolution. Whence even the Chinese teachings upon the subject, if it is but a fiction? Have they not recorded the existence once upon a time of a holy island beyond the sun (Tcheou), and beyond which were situated the lands of the immortal men? (See de Rougemont, *ibid.*) Do they not still believe that the remnants of those immortal men -- who survived when the holy island had become black with sin and perished -- have found refuge in the great desert of Gobi, where they still reside invisible to all, and defended from approach by hosts of Spirits?

"If one has to lend ear to traditions," writes the very unbelieving Boulanger, ("Regne des Dieux," Introduction) . . . "the latter place before the reign of Kings, that of the Heroes and demi-gods; and still earlier and beyond they place the marvellous reign of the gods and all the fables of the golden age. . . . One feels surprised that annals so interesting should have been rejected by almost all our historians. And yet the ideas communicated by them were once universally admitted and revered by all the peoples; not a few revere them still, making them the basis of their daily life. Such considerations seem to necessitate a less hurried judgment. . . . The ancients, from whom we hold these traditions, which we accept no longer because we do not understand them now, must have had motives for believing in them furnished by their greater proximity to the first ages, and which the distance that separates us from them refuses to us . . . Plato in his

fourth book of Laws, says that, long before the construction of the first cities, Saturn had established on earth a certain form of government under which man was very happy. As it is the golden age he refers to, or to that reign of gods so celebrated in ancient fables . . . let us see the ideas he had of that happy age, and what was the occasion he had to introduce this fable into a treatise on politics. According to Plato, in order to obtain clear and precise ideas on royalty, its origin and power, one has to turn back to the first principles of history and tradition. Great changes, he says, have occurred in days of old, in heaven and on earth, and the present state of things is one of the results (Karma). Our traditions tell us of many marvels, of changes that have taken place in the course of the Sun, of Saturn's reign, and of a thousand other matters that remained scattered about in human memory; but one never hears anything of the EVIL which has

[[Footnote(s)]] -----

* The first continent, or island, if so preferred, "the cap of the North Pole," has never perished; nor will it to the end of the Seven Races.

[[Vol. 2, Page]] 373 WHEAT BROUGHT DOWN BY THE GODS.

produced those revolutions, nor of the evil which directly followed them. Yet . . . that Evil is the principle one has to talk about, to be able to treat of royalty and the origin of power. . . ."

That evil, Plato seems to see in the sameness or consubstantiality of the natures of the rulers and the ruled, for he says that long before man built his cities, in the golden age, there was naught but happiness on earth, for there were no needs. Why? Because Saturn, knowing that man could not rule man, without injustice filling forthwith the universe through his whims and vanity, would not allow any mortal to obtain power over his fellow creatures. To do this the god used the same means we use ourselves with regard to our flocks. We do not place a bullock or a ram over our bullocks and rams, but give them a leader, a shepherd, i.e., a being of a species quite different from their own and of a superior nature. It is just what Saturn did. He loved mankind and placed to rule over it no mortal King or prince but -- "Spirits and genii [[daimones]] of a divine nature more excellent than that of man."

It was god, the Logos (the synthesis of the Host) who thus presiding over the genii, became the first shepherd and leader of men.* When the world had ceased to be so governed and the gods retired, "ferocious beasts devoured a portion of mankind." "Left to their own resources and industry, inventors then appeared among them successively and discovered fire, wheat, wine; and public gratitude deified them . . ."("De Legibus" 1, iv.; in Crit. and in Politic).

And mankind was right, as fire by friction was the first mystery of nature, the first and chief property of matter that was revealed to man.

"Fruits and grain, unknown to Earth to that day, were brought by the 'Lords of Wisdom' for the benefit of those they ruled - from other lokas (spheres). . . ." say the Commentaries. Now: "The earliest inventions (?) of mankind are the most wonderful that the race has ever made. . . The first use of fire, and the discovery of the methods by which it can be kindled; the domestication of animals; and, above all, the processes by which the various cereals were first developed out of some wild grasses (?) -- these are all discoveries with which, in ingenuity and in importance, no subsequent discoveries may compare. They are all unknown to history -- all lost in the light of an EFFULGENT DAWN." ("Unity of Nature," Argyll.)

This will be doubted and denied in our proud generation. But if it is asserted that there are no grains and fruits unknown to earth, then we may remind the reader that wheat has never been found in the wild state: it is not a product of the earth. All the other cereals have been traced to their primogenital forms in various species of wild grasses, but wheat has

[[Footnote(s)]] -----

* The Secret Doctrine explains and expounds that which Plato says, for it teaches that those "inventors" were gods and demi-gods (Devas and Rishis) who had become -- some deliberately, some forced to by Karma -- incarnated in man.

[[Vol. 2, Page]] 374 THE SECRET DOCTRINE.

hitherto defied the efforts of botanists to trace it to its origin. And let us bear in mind, in this connection, how sacred was that cereal with the Egyptian priests; wheat being placed even with their mummies, and found thousands of years later in their coffins. Remember:-- "The servants of Horus glean the wheat in the field of Aanroo. . . wheat seven cubits high." ("Book of the Dead," chap. xcix., 33; and clvi., 4.)* The reader is referred to Stanza VII., Verse 3, Book I., wherein this verse is explained in another of its meanings, and also to the "Book of the Dead," chap. cix., v. 4 and 5.

"I am the Queen of these regions," says the Egyptian Isis; "I was the first to reveal to mortals the mysteries of wheat and corn. . . I am she who rises in the constellation of the dog . . . (Dog-star) . . . Rejoice, O Egypt! thou who wert my nurse." (Book I., chap. XIV.**

Sirius was called the dog-star. It was the star of Mercury or Budha, called the great instructor of mankind, before other Buddhas.

The book of the Chinese Y-King, attributes the discovery of agriculture to "the instruction given to men by celestial genii."

"Woe, woe to the men who know nought, observe nought, nor will they see. . . They are all blind*** since they remain ignorant how much the world is full of various and invisible creatures which crowd even in the most sacred places" (Zohar, Part I., col. 177.)

The "Sons of God" have existed and do exist. From the Hindu Brahmaputras and Manasaputras (Sons of Brahma and Mind-born sons) down to the B'ne-aleim of the Jewish Bible, the faith of the centuries and

[[Footnote(s)]] -----

* This is a direct reference to the esoteric division of man's principles symbolised by the divine wheat. The legend which inscribes the third Registrar of the papyrus (Chap. cx. of the "Book of the Dead") states: "This is the region of the Manes (disembodied men) seven cubits high -- to wit: those just translated and supposed to be still sevenfold with all their principles, even the body represented astrally in the Kama-loka or Hades, before their separation" and, there is wheat three cubits high for mummies in a state of perfection" (i.e., those already separated, whose three higher principles are in Devachan "who are permitted to glean it." This region (Devachan) is called "the land of the re-birth of gods," and shown to be inhabited by Scheo, Tefnant, and Seb. The "region for the manes seven cubits high," (for the yet imperfect mummies), and the region for those "in a state of perfection" who "glean wheat three cubits high," is as clear as possible. The Egyptians had the same esoteric philosophy which is now taught by the cis-Himalayan adepts, who, when buried, have corn and wheat placed over them.

** There are Egyptologists who have tried to identify Osiris with Menes, which is quite erroneous. Bunsen assigns to Menes an antiquity of 5867 years B.C., and is denounced for it by Christians. But "Isis-Osiris" reigned in Egypt before the Dendera Zodiac was painted on the ceiling of that temple, and that is over 75,000 years ago!

*** In the text, "corked up" or "screwed up."

[[Vol. 2, Page]] 375 "SONS OF GOD" PERFECT AND IMPERFECT.

universal tradition force reason to yield to such evidence. Of what value is independent criticism so called, or "internal evidence" (based usually on the respective hobbies of the critics), in the face of the universal testimony, which never varied throughout the historical cycles? Read esoterically the sixth chapter of Genesis, which repeats the statements of the Secret Doctrine, only changing slightly its form, and drawing a different conclusion which clashes even with the Zohar. "There were giants in the earth in those days; and also after that when 'the Sons of God' (b'ne-aleim) "came in unto the daughters of men, and they bare children to them, the same became mighty men which were of old, men of renown" (or giants).*

What does this sentence "and also after that" signify unless it means when explained: "There were giants in the earth BEFORE, i.e., before the sinless sons of the Third Race; and also after that when other sons of God, lower in nature, inaugurated sexual connection on earth (as Daksha did, when he saw that his Manasaputras would not people the earth)"? And then comes a long break in this chapter vi. of Genesis, between verses 4 and 5. For surely, it was not in or through the wickedness of the "mighty men" . . . men of renown, among whom is placed Nimrod the "mighty hunter before the Lord," that "god saw that the wickedness of man was great," nor in the builders of Babel, for this was after the Deluge; but in the progeny of the giants who produced monstra quaedam de genere giganteo, monsters from whence sprang the lower races of men, now represented on earth by a few miserable dying-out tribes and the huge anthropoid apes.

And if we are taken to task by theologians, whether Protestant or Roman Catholic, we have only to refer them to their own literal texts. The above quoted verse was ever a dilemma, not alone for the men of science and Biblical scholars, but also for priests. For, as the Rev. Father Peronne puts it:-- "Either they (the B'ne-aleim) were good angels, and in such case how could they fall? Or they were bad (angels) and in this case could not be called b'ne-aleim, the "sons of God." (Praelationes theol. ch. ii.) This Biblical riddle -- "the real sense of which no author has ever understood," as candidly confessed by Fourmont** -- can only be explained by the Occult doctrine, through the Zohar to the Western, and the Book of Dzyan to the Eastern. What the former says we have seen; what the Zohar tells us is this: B'ne-aleim was a name common to the Malachim (the good Messengers) and to the Ischin ("the lower angels") (Rabbi Parcha).

We may add for the benefit of the demonologists that their Satan,

[[Footnote(s)]] -----

* Genesis vi., v. 4.

** Reflections critiques sur l'origine des anciens peuples.

[[Vol. 2, Page]] 376 THE SECRET DOCTRINE.

"the adversary," is included in Job among the sons of God or b'ne-aleim who visit their father." (Chapter i.) But of this later on.

Now the Zohar says that the Ischin, the beautiful B'ne-aleim, were not guilty, but mixed themselves with mortal men because they were sent on earth to do so. (Book of Ruth and Schadash; fol. 63, col. 3; Amsterdam edition). Elsewhere the same volume shows these b'ne-aleim belonging to the tenth sub-division of the "Thrones" (Zohar, part iii., col. 113. But see also 1st vol. 184). It also explains that the Ischin, "men-spirits," viri spirituales, now that men can see them no longer, help magicians to produce, through their science, homunculi which are not small men but "men smaller (in the sense of inferiority) than men." Both show themselves under the form that the Ischin had then, i.e., gaseous and ethereal. Their chief is Azazel.

But Azazel, whom the Church dogma will associate with Satan, is nothing of the kind. Azazel is a mystery, as explained elsewhere, and it is so expressed in Maimonides, "In More Nevochim" (chapter xxvi., p. 8). "There is an impenetrable mystery in the narrative concerning Azazel." And so there is, as Lanci, a librarian to the Vatican and one who ought to know, says -- we have quoted him before -- that "this venerable divine name (nome divino e venerabile) has become

through the pen of Biblical scholars, a devil, a wilderness, a mountain, and a he-goat" (Sagra Scrittura). Therefore it seems foolish to derive the name as Spencer does, from Ajal (separated) and El (god), hence "one separated from God," the DEVIL. In the Zohar, Azazel is rather the Sacrificial victim than the "formal adversary of Jehovah," as Spencer would have it (II., pp. 14, 29).

The amount of malicious fancy and fiction bestowed on that "Host" by various fanatical writers is quite extraordinary. Azazel and his "host" are simply the Hebrew "Prometheus," and ought to be viewed from the same standpoint. The Zohar shows the Ischin chained on the mountain in the desert, allegorically; thus simply alluding to those "spirits" as being chained to the earth during the cycle of incarnation. Azazel (or Azazel) is one of the chiefs of the "transgressing" angels in Enoch, who descending upon Ardis, the top of Mount Armon, bound themselves by swearing loyalty to each other. It is said that Azazel taught men to make swords, knives, shields, to fabricate mirrors (?) to make one see what is behind him (viz., "magic mirrors"). Amazarak taught all the sorcerers and dividers of roots; Amers taught the solution of magic; Barkayal, astrology; Akibeel, the meaning of portents and signs; Tamial, astronomy; and Asaradel taught the motion of the moon. "These seven were the first instructors of the Fourth man" (i.e., of the Fourth Race). But why should allegory be always understood as meaning all that its dead-letter expresses?

[[Vol. 2, Page]] 377 THE FALLACIES OF THE TWO CHURCHES.

It is the symbolical representation of the great struggle between divine wisdom, nous, and its earthly reflection, Psuche, or between Spirit and Soul, in Heaven and on Earth. In Heaven --because the divine MONAD had voluntarily exiled itself therefrom, to descend, for incarnating purposes, to a lower plane and thus transform the animal of clay into an immortal god. For, as Eliphaz Levi tells us, "the angels aspire to become men; for the perfect man, the man-god, is above even angels." On Earth -- because no sooner had Spirit descended than it was strangled in the coils of matter.

Strange to say, the Occult teaching reverses the characters; it is the anthropomorphous archangel with the Christians, and the man-like God with the Hindus, which represent matter in this case; and the Dragon, or Serpent, Spirit. Occult symbolism furnishes the key to the mystery; theological symbolics conceal it still more. For the former explains many a saying in the Bible and even in the New Testament which have hitherto remained incomprehensible; while the latter, owing to its dogma of Satan and his rebellion, has belittled the character and nature of its would-be infinite, absolutely perfect god, and created the greatest evil and curse on earth -- belief in a personal Devil. This mystery is opened with the key to its metaphysical symbolism now restored; while that of theological interpretation shows the gods and the archangels standing as symbols for the dead letter or dogmatic religions, and as arrayed against the pure truths of Spirit, naked and unadorned with fancy.

Many were the hints thrown out in this direction in "Isis Unveiled," and a still greater number of references to this mystery may be found scattered throughout these volumes. To make the point clear once for all: that which the clergy of every dogmatic religion -- pre-eminently the Christian -- points out as Satan, the enemy of God, is in reality, the highest divine Spirit -- (occult Wisdom on Earth) -- in its naturally antagonistic character to every worldly, evanescent illusion, dogmatic or ecclesiastical religions included. Thus, the Latin Church, intolerant, bigoted and cruel to all who do not choose to be its slaves; the Church which calls itself the bride of Christ, and the trustee at the same time of Peter, to whom the rebuke of the Master "get thee behind me Satan" was justly addressed; and again the Protestant Church which, while calling itself Christian, paradoxically replaces the New Dispensation by the old "Law of Moses" which Christ openly repudiated: both these Churches are fighting against divine Truth, when repudiating and slandering the Dragon of esoteric (because divine) Wisdom. Whenever anathematizing the Gnostic Solar Chnouphis -- the Agathodaemon -- Christos, or the theosophical Serpent of Eternity, or even the Serpent of Genesis -- they

[[Vol. 2, Page]] 378 THE SECRET DOCTRINE.

are moved by the same Spirit of dark fanaticism that moved the Pharisees to curse Jesus by saying to him "Say we not well thou hast a devil?"

Read the account about Indra (Vayu) in the Rig-Veda, the occult volume par excellence of Aryanism, and then compare it with the same in the Puranas -- the exoteric version thereof, and the purposely garbled account of the true Wisdom religion. In the Rig Veda Indra is the highest and greatest of the Gods, and his Soma-drinking is allegorical of his highly spiritual nature. In the Puranas Indra becomes a profligate, and a regular drunkard on the Soma juice, in the terrestrial way. He is the conqueror of all the "enemies of the gods" -- the Daityas, Nagas (Serpents), Asuras, all the Serpent-gods, and of Vritri, the Cosmic Serpent. Indra is the St. Michael of the Hindu Pantheon -- the chief of the militant Host. Turning to the Bible, we find Satan, one of the "Sons of God" (Job. i. 6), becoming in exoteric interpretation the Devil, and the Dragon in its infernal, evil sense. But in the Kabala ("Book of Numbers") Samael, who is Satan, is shown to be identical with St. Michael, the slayer of the Dragon. How is this? For it is said that Tselem (the image) reflects alike Michael and Samael who are one. Both proceed, it is taught, from Ruach (Spirit), Neschamah (Soul) and Nephesch (life). In the "Chaldean Book of Numbers" Samael is the concealed (occult) Wisdom, and Michael the higher terrestrial Wisdom, both emanating from the same source but diverging after their issue from the mundane soul, which on Earth is Mahat (intellectual understanding, or Manas (the seat of Intellect). They diverge, because one (Michael) is influenced by Neschamah, while the other (Samael) remains uninfluenced. This tenet was perverted by the dogmatic spirit of the Church; which, loathing independent Spirit, uninfluenced by the external form (hence by dogma), forthwith made of Samael-Satan (the most wise and spiritual spirit of all) -- the adversary of its anthropomorphic God and sensual physical man, the DEVIL!

THE ORIGIN OF THE SATANIC MYTH.

Let us then fathom this creation of the Patristic fancy still deeper, and find its prototype with the Pagans. The origin of the new Satanic myth is easy to trace. The tradition of the Dragon and the Sun is echoed in every part of the world, both in its civilized and semi-savage regions. It took rise in the whisperings about secret initiations among the profane, and was

established universally through the once universal heliolatrous religion. There was a time when the four parts of the world were covered with the temples sacred to the Sun and the Dragon;

[[Vol. 2, Page]] 379 THE SECRET OF THE DRAGON.

but the cult is now preserved mostly in China and the Buddhist countries, "Bel and the Dragon being uniformly coupled together, and the priest of the Ophite religion as uniformly assuming the name of his God" ("Archaeology," Vol. xxv., p. 220, London). In the religions of the past, it is in Egypt we have to seek for its Western origin. The Ophites adopted their rites from Hermes Trismegistus, and heliolatrous worship crossed over with its Sun-gods into the land of the Pharaohs from India. In the gods of Stonehenge we recognise the divinities of Delphi and Babylon, and in those of the latter the devas of the Vedic nations. Bel and the Dragon, Apollo and Python, Krishna and Kaliya, Osiris and Typhon are all one under many names -- the latest of which are Michael and the Red Dragon, and St. George and his Dragon. As Michael is "one as God," or his "Double," for terrestrial purposes, and is one of the Elohim, the fighting angel, he is thus simply a permutation of Jehovah. Whatever the Cosmic or astronomical event that first gave rise to the allegory of the "War of Heaven," its earthly origin has to be sought in the temples of Initiation and archaic crypts. The following are the proofs:--

We find (a) the priests assuming the name of the gods they served; (b) the "Dragons" held throughout all antiquity as the symbols of Immortality and Wisdom, of secret Knowledge and of Eternity; and (c) the hierophants of Egypt, of Babylon, and India, styling themselves generally the "Sons of the Dragon" and "Serpents"; thus the teachings of the Secret Doctrine are thereby corroborated.

There were numerous catacombs in Egypt and Chaldea, some of them of a very vast extent. The most renowned of them were the subterranean crypts of Thebes and Memphis. The former, beginning on the western side of the Nile, extended towards the Lybian desert, and were known as the Serpent's catacombs, or passages. It was there that were performed the sacred mysteries of the kuklos anagkes, the "Unavoidable Cycle," more generally known as "the circle of necessity"; the inexorable doom imposed upon every soul after the bodily death, and when it has been judged in the Amenthian region.

In de Bourbourg's book, Votan, the Mexican demi-god, in narrating his expedition, describes a subterranean passage which ran underground, and terminated at the root of the heavens, adding that this passage was a snake's hole, "un agujero de colubra"; and that he was admitted to it because he was himself "a son of the snakes," or a serpent. ("Die Phoinizier," 70.)

This is, indeed, very suggestive; for his description of the snake's hole is that of the ancient Egyptian crypt, as above mentioned. The hierophants, moreover, of Egypt, as of Babylon, generally styled them-

[[Vol. 2, Page]] 380 THE SECRET DOCTRINE.

selves the "Sons of the Serpent-god," or "Sons of the Dragon," during the mysteries.

"The Assyrian priest bore always the name of his god," says Movers. The Druids of the Celto-Britannic regions also called themselves snakes. "I am a Serpent, I am a Druid," they exclaimed. The Egyptian Karnak is twin brother to the Carnac of Bretagne, the latter Carnac meaning the serpent's mount. The Dracontia once covered the surface of the globe, and these temples were sacred to the Dragon, only because it was the symbol of the sun, which, in its turn, was the symbol of the highest god -- the Phoenician Elion or Elion, whom Abraham recognised as El Elion.* Besides the surname of serpents, they were called the "builders," the "architects"; for the immense grandeur of their temples and monuments was such that even now the pulverised remains of them "frighten the mathematical calculations of our modern engineers," says Taliesin.**

De Bourbourg hints that the chiefs of the name of Votan, the Quetzco-Cohuatl, or Serpent deity of the Mexicans, are the descendants of Ham and Canaan. "I am Hivim," they say. "Being a Hivim, I am of the great race of the Dragon (snake). I am a snake myself, for I am a Hivim." ("Cartas," 51; "Isis Unveiled," Vol. I., 553, et seq.)

Furthermore, the "War in Heaven" is shown, in one of its significations, to have meant and referred to those terrible struggles in store for the candidate for adeptship, between himself and his (by magic) personified human passions, when the inner enlightened man had to either slay them or fail. In the former case he became the "Dragon-Slayer," as having happily overcome all the temptations; and a "Son of the Serpent" and a Serpent himself, having cast off his old skin and being born in a new body, becoming a Son of Wisdom and Immortality in Eternity. (See Part II. on the Satanic Myth.)

Seth, the reputed forefather of Israel, is only a Jewish travesty of Hermes, the God of Wisdom, called also Thoth, Tat, Seth, Set, and Satan. He is also Typhon -- the same as Apophis, the Dragon slain by Horus; for Typhon was also called Set. He is simply the dark side of Osiris, his brother, as Angra Mainyu is the black shadow of Ahura-mazda. Terrestrially, all these allegories were connected with the trials of adeptship and initiation. Astronomically, they referred to the Solar and Lunar eclipses, the mythical explanations of which we find to this day in India and Ceylon, where any one can study the allegorical narratives and traditions which have remained unchanged for many thousands of years.

[[Footnote(s)]] -----

* See Sanchoniathon in "Eusebius," Pr. Ev. 36; Genesis xiv.

** "Society of Antiquaries of London," vol. xxv. p. 220.

[[Vol. 2, Page]] 381 THE THEFT OF RAHU.

Rahu, mythologically is a Daitya -- a giant, a Demi-god, the lower part of whose body ended in a Dragon or Serpent's tail. During the churning of the Ocean, when the gods produced amrita -- the water of Immortality -- he stole some of it, and drinking, became immortal. The Sun and Moon, who had detected him in his theft, denounced him to Vishnu, who placed him in the stellar spheres, the upper portion of his body representing the Dragon's head and the lower (Ketu) the Dragon's tail; the two being the ascending and descending nodes. Since then, Rahu wreaks his vengeance on the Sun and Moon by occasionally swallowing them. But this fable had another mystic meaning, since Rahu, the Dragon's head, played a prominent part in the mysteries of the Sun's (Vikartana's) initiation, when the candidate and the Dragon had a supreme fight.

The caves of the Rishis, the abodes of Tiresias and the Greek seers, were modelled on those of the Nagas -- the Hindu King-Snakes, who dwelled in cavities of the rocks under the ground. From Sessa, the thousand-headed Serpent, on which Vishnu rests, down to Python, the dragon serpent oracle, all point to the secret meaning of the myth. In India we find the fact mentioned in the earliest Puranas. The children of Surasa are the "mighty Dragons." The Vayu Purana replacing "Surasa" (of Vishnu Purana) by Danayas or Danavas -- the descendants of Danu by the sage Kasyapa -- and those Danavas being the giants (or Titans) who warred against the gods, they are thus shown identical with the "Dragons" and "Serpents" of Wisdom.

By simply comparing the Sun-gods of every country, one may find their allegories agreeing perfectly with one another; and the more the allegorical symbol is occult the more its corresponding symbol in other systems agrees with it. Thus, if from three systems widely differing from each other in appearance -- the old Aryan, the ancient Greek, and the modern Christian schemes -- we select several Sun-gods and dragons at random, these will be found copied from each other.

Let us take Agni the fire-god, Indra the firmament, and Karttikeya from the Hindus; the Greek Apollo; and Mikael, the "Angel of the Sun," the first of the AEons, called by the Gnostics "the saviour" -- and proceed in order.

(1) Agni -- the fire-god -- is called in the Rig-Veda Vaiswanara. Now Vaisvanara is a Danava -- a giant-demon,* whose daughters Puloma and Kalaka are the mothers of numberless Danavas (30 millions), by

[[Footnote(s)]] -----

* He is thus named and included in the list of the Danavas in Vayu Purana; the Commentator of Bhagavata Purana calls him a son of Danu, but the name means also "Spirit of Humanity."

[[Vol. 2, Page]] 382 THE SECRET DOCTRINE.

Kasyapa,* and live in Hiranyapura, "the golden city," floating in the air. Therefore, Indra is, in a fashion, the step-son of these two as a son of Kasyapa; and Kasyapa is, in this sense, identical with Agni, the fire-god, or Sun (Kasyapa-Aditya). To this same group belongs Skanda or Karttikeya (god of War, the six-faced planet Mars astronomically), a Kumara, or virgin-youth, born of Agni** for the purpose of destroying Taraka, the Danava Demon, the grandson of Kasyapa by Hiranyaksha, his son,*** whose (Taraka's) yogi austerities were so extraordinary that they became formidable to the gods, who feared such a rival in power.**** While Indra, the bright god of the Firmament, kills Vritra (or Ahi), the Serpent-Demon -- for which feat he is called Vritra-han, "the destroyer of Vritra"; he also leads the hosts of Devas (Angels or gods) against other gods who rebel against Brahma, for which he is entitled Jishnu, "leader of the celestial Host." Karttikeya is found bearing the same titles. For killing Taraka, the Danava, he is Taraka-Jit, "Vanquisher of Taraka,"***** "Kumara Guha," "the mysterious Virgin-youth" "Siddha-Sena" -- "the leader of the Siddhas"; and Saktidhara -- "Spear-holder."

(2.) Now take Apollo, the Grecian sun-god, and by comparing the mythical accounts given of him, see whether he does not answer both

[[Footnote(s)]] -----

* Kasyapa is called the Son of Brahma, and is the "Self-Born" to whom a great part of the work of creation is attributed. He is one of the seven Rishis; exoterically, the son of Marichi, the son of Brahma; while Atharva-veda says, "The Self-born Kasyapa sprang from Time"; and esoterically -- Time and Space are forms of the One incognizable Deity. As an Aditya, Indra is son of Kasyapa, as also Vaivasvata Manu, our progenitor. In the instance given in the text, he is Kasyapa-Aditya, the Sun, and the Sun-god, from whom all the "Cosmic" Demons, Dragons (nagas), Serpent, or Snake-gods, and Danavas, the giants, are born. The meaning of the allegories given above is purely astronomical and cosmical, but will serve to prove the identity of all.

** All such stories differ in the exoteric texts. In the Mahabharata, Karttikeya, "the six-faced Mars," is the son of Rudra or Siva, Self-born without a mother from the seed of Siva cast into the fire. But Karttikeya is generally called Agnibhu, "fire born."

*** Hiranyaksha is the ruler or king of the fifth region of Patala, a Snake-god.

**** The Elohim also feared the knowledge of Good and Evil for Adam, and therefore are shown as expelling him from Eden or killing him spiritually.

***** The story told is, that Taraka (called also Kalabhana), owing to his extraordinary Yoga-powers, had obtained all the divine knowledge of yoga-vidya and occult powers of the gods, who conspired against him. Here we see the "obedient" Host of Archangels or minor gods conspiring against the (future) Fallen angels, whom Enoch accuses of the great crime of disclosing to the world all "the secret things done in heaven." It is Michael, Gabriel, Raphael, Surgal and Uriel who denounced the Lord God those of their Brethren who were said to have pried into the divine mysteries and taught them to men: by this means they themselves escaped a like punishment. Michael was commissioned to fight the Dragon, and so was Karttikeya, and under the same circumstances. Both are "leaders of the Celestial Host," both Virgins, both

"leaders of Saints," "Spear-holders" (Saktidhara), etc., etc. Karttikeya is the original of Michael and St. George, as surely as Indra is the prototype of Karttikeya.

[[Vol. 2, Page]] 383 THE GODS, THE FACETS OF ONE GEM.

to Indra, Karttikeya, and even Kasyapa-Aditya, and at the same time to Michael (as the Angelic form of Jehovah) the "angel of the Sun," who is "like," and "one with, God." Later ingenious interpretations for monotheistic purposes, elevated though they be into not-to-be questioned Church dogmas, prove nothing, except the abuse of human authority and power, perhaps.

Apollo is Helios (the Sun), Phoibus-Apollo ("the light of life and of the World"**) who arises out of the golden-winged cup (the sun); hence he is the sun-god par excellence. At the moment of his birth he asks for his bow to kill Python, the Demon Dragon, who attacked his mother before his birth,** and whom he is divinely commissioned to destroy -- like Karttikeya, who is born for the purpose of killing Taraka, the too holy and wise demon. Apollo is born on a sidereal island called Asteria -- "the golden star island," the "earth which floats in the air," which is the Hindu golden Hiranyapura; "he is called the pure, [[agnos]], Agnus Dei (the Indian Agni, as Dr. Kenealy thinks), and in the primal myth he is exempt "from all sensual love" ("Book of God," p. 88). He is, therefore, a Kumara, like Karttikeya, and as Indra was in his earlier life and biographies. Python, moreover, the "red Dragon," connects Apollo with Michael, who fights the Apocalyptic Dragon, who wants to attack the woman in child-birth (See Revelation xii.), as Python attacks Apollo's mother. Can any one fail to see the identity? Had the Rt. Hon. W. E. Gladstone, who prides himself on his Greek scholarship and understanding of the spirit of Homer's allegories, ever had a real inkling of the esoteric meaning of the Iliad and Odyssey, he would have understood St. John's "Revelation," and even the Pentateuch, better than he does. For the way to the Bible lies through Hermes, Bel, and Homer, as the way to these is through the Hindu and Chaldean religious symbols.

The repetition of this archaic tradition is found in ch. xii. of St. John's Revelations, and comes from the Babylonian legends without the smallest doubt, though the Babylonian story had its origin in the allegories of the Aryans. The fragment read by the late George Smith (See "The Chaldean account of Genesis," p. 304) is sufficient to disclose the source of the xii. chapter of the Apocalypse. Here it is as given by the eminent Assyriologist:

"Our . . . fragment refers to the creation of mankind, called Adam; as (the man) in the Bible, he is made perfect . . . but afterwards joins

[[Footnote(s)]] -----

* The "life and the light" of the material physical world, the delight of the senses -- not of the soul. Apollo is pre-eminently the human god, the god of emotional, pomp-loving and theatrical Church ritualism, with lights and music.

** See chap. xii. in Revelation where we find Apollo's mother persecuted by that Python, the Red Dragon, who is also Porphyron, the scarlet or red Titan.

[[Vol. 2, Page]] 384 THE SECRET DOCTRINE.

with the dragon of the Deep, the animal of Tiamat, the Spirit of Chaos, and offends against his god, who curses him, and calls down on his head all the evils and troubles of Humanity."*

"This is followed by a war between the dragon and the powers of evil, or chaos on one side and the gods on the other."

"The gods have weapons forged for them,** and Merodach (the archangel Michael in Revelation) undertakes to lead the heavenly host against the dragons. The war, which is described with spirit, ends, of course, in the triumph of the principles of Good. . . .****

This war of gods with the powers of the Deep, refers also, in its last and terrestrial application, to the struggle between the Aryan adepts of the nascent Fifth Race and the Sorcerers of Atlantis, the Demons of the Deep, the Islanders surrounded with water who disappeared in the Deluge. (See the last pages of Vol. I., "Isis Unveiled," Atlantis.)

The symbols of the dragons and "War in Heaven" have, as already stated, more than one significance; religious, astronomical and geological events being included in the one common allegory. But it had also a Cosmological meaning. In India the Dragon story is repeated in one of its forms in the battles of Indra with Vritra. In the Vedas this Ahi-Vritra is referred to as the Demon of Drought, the terrible hot Wind. Indra is shown to be constantly at war with him; and with the help of his thunder and lightning the god compels Ahi-Vritra to pour down in rain on Earth, and then slays him. Hence, Indra is called the Vritra-Han or "the slayer of Vritra," as Michael is called the Conqueror and "Slayer of the Dragon." Both these "Enemies" are then the "Old Dragon" precipitated into the depths of the Earth, in this one sense.

The Zend-Avestic Amshaspends are a Host with a leader like St. Michael over them, and seem identical with the legions of Heaven, when one reads the Vendidad. Thus in Fargard XIX., ii. 13 (42), Zarathustra is told by Ahura Mazda to "invoke the Amesha Spenta who rule over the seven Karshvares**** of the Earth"; which Karshvares in their seven

[[Footnote(s)]] -----

* No "god" who curses his (supposed) own work, because he has made it imperfect, can be the one infinite absolute wisdom, whether called Bel or Jehovah.

** In the Indian allegory of Tarakamaya, the war between the gods and the Asuras headed by Soma (the moon, the King of Plants), it is Viswa-Karma, the artificer of the gods, who forges, like Vulcan (Tubal-Kain), their weapons for them.

*** We have said elsewhere that the "woman with child" of Revelation (xii.) was Aime, the great mother, or Binah, the third Sephiroth, "whose name is Jehovah"; and the "Dragon," who seeks to devour her coming child (the Universe), is the

Dragon of absolute Wisdom -- that Wisdom which, recognising the non-separateness of the Universe and everything in it from the Absolute ALL, sees in it no better than the great Illusion, Mahamaya, hence the cause of misery and suffering.

**** The "Seven Karshvares of the Earth" -- the seven spheres of our planetary chain, [[Footnote continued on next page]]

[[Vol. 2, Page]] 385 THE BUILDERS OF THE MATERIAL WORLD.

applications refer equally to the seven spheres of our planetary chain, to the seven planets, the seven heavens, etc., according to whether the sense is applied to a physical, supra-mundane, or simply a sidereal world. In the same Fargard (ii. and iii.), in his invocation against Angra Mainyu and his Host, Zarathustra appeals to them in these words: "I invoke the seven bright Sravah with their sons and their flocks" (42 Vendid. Soddh). The "Sravah" -- a word which the Orientalists have given up as one "of unknown meaning" -- means the same Amshaspend, but in their highest occult meaning. The "Sravah" are the noumenoi of the phenomenal Amshaspend, the souls or spirits of those manifested Powers; and "their sons and their flock" refers to the planetary angels and their sidereal flock of stars and constellations. "Amshaspend" is the exoteric term used in terrestrial combinations and affairs only. Zarathustra addresses Ahura Mazda constantly as "thou, the maker of the material world." Ormazd is the father of our earth (Spenta Armaiti), and she is referred to, when personified, as "the fair daughter of Ahura Mazda" (Fargard, XIX. ii.), who is also the creator of the Tree (of occult and spiritual knowledge and wisdom) from which the mystic and mysterious Caresma is taken. But the occult name of the bright God was never pronounced outside the temple.

Samael or Satan, the seducing Serpent of Genesis, and one of the primeval angels who rebelled, is the name of the "Red Dragon." He is the Angel of Death, the Talmud saying that "the Angel of Death and Satan are the same," and, killed by Michael, he is once more killed by St. George, who also is a Dragon Slayer; but see the transformations of this. Samael is identical with the Simoom, the hot wind of the desert, or again with the Vedic demon of drought, as Vritra; "Simoom is called Atabutos" or -- Diabolos, the devil.

Typhon, or the Dragon Aphophis -- the Accuser in the "Book of the Dead" -- is worsted by Horus, who pierces his opponent's head with a spear; and Typhon is the all-destroying wind of the desert, the rebellious element that throws everything into confusion. As Set -- he is the darkness of night, the murderer of Osiris, who is the light of day and the sun. Archaeology demonstrates that Horus is identical with Anubis,* whose effigy was discovered upon an Egyptian monument, with a cuirass and a spear, like Michael and St. George. Anubis is also represented

[[Footnote(s)]] ----- §

[[Footnote continued from previous page]] the seven worlds -- also mentioned in the Rig-Veda -- are fully referred to elsewhere. There are six rajamsi (worlds) above prithivi -- the earth, or "this" (idam), as opposed to that which is yonder (the six globes on the three other planes). (See Rig-Veda, I., 34; III., 56; VII., 10411, and V., 60, 6. See § on Chronology.)

* Verse 62, chap. xvii., "Book of the Dead": Anubis is Horus who melts in him who is eyeless.

[[Vol. 2, Page]] 386 THE SECRET DOCTRINE.

as slaying a dragon, that has the head and tail of a serpent. (See Lenoir's "Du Dragon de Metz.")

Cosmologically, then, all the Dragons and Serpents conquered by their "Slayers" are, in their origin, the turbulent confused principles in Chaos, brought to order by the Sun-gods or creative powers. In the "Book of the Dead" those principles are called "the Sons of Rebellion." (See also "Egyptian Pantheon," pp. 20, 23.) "In that night, the oppressor, the murderer of Osiris, otherwise called the deceiving Serpent (Verse 54) . . . calls the Sons of Rebellion in Air, and when they arrive to the East of Heavens, then there is War in Heaven and in the entire World" (v. 49, "Book of the Dead," xvii.).

In the Scandinavian Eddas the "War" of the Ases with the Hrim-thurses (frost-giants), and of Asathor with the Jotuns, the Serpents and Dragons and the "wolf" who comes out of "Darkness" --- is the repetition of the same myth. The "evil Spirits,"* having begun by being simply the emblems of Chaos, became euhemerized by the superstition of the rabble, until they have finally won the right of citizenship in the most civilized and learned races of this globe -- since its creation as alleged -- and became a dogma with Christians. As George Smith has it: "The evil principles (Spirits) emblems of Chaos" (in Chaldea and Assyria as in Egypt, we see) . . . "resist this change and make war on the Moon, the eldest son of Bel, drawing over to their side the Sun, Venus and the atmospheric god Vul." ("Assyrian Discoveries," p. 403.) This is only another version of the Hindu "War in Heaven," between Soma, the moon, and the gods -- Indra being the atmospheric Vul; which shows it plainly to be both a Cosmogonical and an astronomical allegory, woven into and drawn from the earliest theogony as taught in the Mysteries.

It is in the religious doctrines of the Gnostics that the real meaning of the Dragon, the Serpent, the Goat, and all those symbols of powers now called Evil, can be seen the best; as it is they who divulged the esoteric nature of the Jewish Substitute for AIN-SOPH in their teachings; of the true meaning of which, while the Rabbins concealed it, the Christians, with a few exceptions, knew nothing. Surely Jesus of Nazareth would have hardly advised his apostles to show themselves as wise as the serpent, had the latter been a symbol of the Evil one; nor would the Ophites, the learned Egyptian Gnostics of "the Brotherhood of the Serpent," have revered a living snake in their ceremonies as the emblem of WISDOM, the divine Sophia (and a type of the all-good, not the all-bad), were that reptile so closely connected with Satan. The fact is, that even as a common ophidian it has ever been a dual symbol; and

[[Footnote(s)]] -----

* These "evil Spirits" can by no means be identified with Satan or the Great Dragon. They are the Elementals generated or begotten by ignorance -- Cosmic and human passions -- or Chaos.

[[Vol. 2, Page]] 387 WHO FIRST CREATED WOMAN?

as a Dragon it had never been anything else than a symbol of the manifested Deity in its great Wisdom. The Draco volans, the flying Dragon of the early painters, may be an exaggerated picture of the real extinct antediluvian animal; but those who have faith in the Occult teachings believe that in the days of old there were such creatures as flying Dragons, or a kind of Pterodactyl, and that it is those gigantic winged lizards that served as the prototypes for the Seraph of Moses and his great Brazen Serpent.* The Jews had worshipped the latter idol themselves, but, after the religious reforms brought about by Hezekiah, turned round, and called that symbol of the great or Higher God of every other nation -- a Devil, and their own usurper -- the "One God."**

The appellation Sa'tan, in Hebrew satan, "an adversary" (from the verb shatana, "to be adverse," to persecute) belongs by right to the first and cruelest "adversary of all the other gods" -- Jehovah, not to the Serpent, which spoke only words of sympathy and wisdom, and is at the worst, even in the dogma, "the adversary of men." This dogma, based as it is on chapter iii. of Genesis, is as illogical and unjust as it is paradoxical. For who was the first to create that original and hence-forward universal tempter of man -- the woman? Not the serpent surely, but the "Lord God" himself, who, saying:-- "It is not good that the man should be alone" -- made woman, and "brought her unto the man" (18-22). If the unpleasant little incident that followed was and is still to be regarded as the "original sin," then it exhibits the Creator's divine foresight in a poor light indeed. It would have been far better for the first Adam (of chap. 1.) to have been left either "male and female," or "alone." It is the Lord God, evidently, who was the real cause of all the mischief, the "agent provocateur," and the Serpent -- only a prototype of Azazel, "the scapegoat for the sin of (the God of) Israel," the poor Tragos having to pay the penalty for his Master's and Creator's blunder. This, of course, is addressed only to those who accept the opening events of the drama of humanity in Genesis in their dead-letter sense. Those who read them esoterically, are not reduced to fanciful

[[Footnote(s)]] -----

* See Numbers xxi. 8-9. God orders Moses to build a brazen Serpent "Saraph"; to look upon which heals those bitten by the fiery serpents. The latter were the Seraphim, each one of which, as Isaiah shows (vi. 2), "had six wings"; they are the symbols of Jehovah, and of all the other Demiurgi who produce out of themselves six sons or likenesses -- Seven with their Creator. Thus, the Brazen Serpent is Jehovah, the chief of the "fiery serpents." And yet, in 2 Kings xviii., it is shown that King Hezekiah, who, like as David his father, "did that which was right in the sight of the Lord" -- "brake in pieces the brazen serpent that Moses had made . . . and called it Nehushtan," or piece of brass.

** And Satan stood up against Israel and moved David to number Israel (Chron. xxi. 1.) "The anger of the Lord Jehovah was kindled against Israel," and he moved David to say: "Go, number Israel" (2 Samuel, xxiv. 1). The two are then identical.

[[Vol. 2, Page]] 388 THE SECRET DOCTRINE.

speculations and hypothesis; they know how to read the symbolism therein contained, and cannot err.

There is at present no need to touch upon the mystic and manifold meaning of the name Jehovah in its abstract sense, one independent of the Deity falsely called by that name. It was a blind created purposely by the Rabbins, a secret preserved by them with ten-fold care after the Christians had despoiled them of this God-name which was their own property.* But the following statement is made. The personage who is named in the first four chapters of Genesis variously as "God," the "Lord God," and "Lord" simply, is not one and the same person; certainly it is not Jehovah. There are three distinct classes or groups of the Elohim called Sephiroth in the Kabala, Jehovah appearing only in chapter iv., in the first verse of which he is named Cain, and in the last transformed into mankind -- male and female, jah-veh.** The "Serpent," moreover, is not Satan, but the bright Angel, one of the Elohim clothed in radiance and glory, who, promising the woman that if they ate of the forbidden fruit "ye shall not surely die," kept his promise, and made man immortal in his incorruptible nature. He is the lao of the mysteries, the chief of the Androgyne creators of men. Chapter iii. contains (esoterically) the withdrawal of the veil of ignorance that closed the perceptions of the Angelic Man, made in the image of the "Boneless" gods, and the opening of his consciousness to his real nature; thus showing the bright Angel (Lucifer) in the light of a giver of Immortality, and as the "Enlightener"; while the real Fall into generation and matter is to be sought in chapter iv. There, Jehovah-Cain, the male part of Adam the dual man, having separated himself from Eve, creates in her "Abel," the first natural woman,* and sheds the Virgin blood. Now Cain, being shown identical with Jehovah, on the authority of the correct reading of verse i. (chapter iv., Genesis), in the original Hebrew text; and the Rabbins teaching that "Kin (Cain), the Evil, was the Son of Eve by Samael, the devil who took Adam's place"; and the Talmud adding that "the evil Spirit, Satan, and Samael, the angel of Death, are the same" --(Babba Battra, 16a) -- it becomes easy to see that Jehovah (mankind, or "Jah-hovah") and Satan (therefore the tempting Serpent) are one and

[[Footnote(s)]] -----

* Dozens of the most erudite writers have sifted thoroughly the various meanings of the name J'hovah (with, and without the masoretic points), and shown their multifarious bearings. The best of such works is the "Source of Measures, the Hebrew Egyptian Mystery."

** In the above-mentioned work (p. 233 App.), verse 26 of the 4th chap. of Genesis is correctly translated "then men began to call themselves Jehovah," but less correctly explained, perhaps, as the last word ought to be written Jah (male) Hovah (female), to show that from that time the race of distinctly separate man and woman began.

*** See for explanation the excellent pages of appendix vii. of the same work.

[[Vol. 2, Page]] 389 JEHOVAH OPHIOMORPHOS.

the same in every particular. There is no Devil, no Evil, outside mankind to produce a Devil. Evil is a necessity in, and one of the supporters of the manifested universe. It is a necessity for progress and evolution, as night is necessary for the production of Day, and Death for that of Life -- that man may live for ever.

Satan represents metaphysically simply the reverse or the polar opposite of everything in nature.* He is the "adversary," allegorically, the "murderer," and the great Enemy of all, because there is nothing in the whole universe that has not two sides -- the reverses of the same medal. But in that case, light, goodness, beauty, etc., may be called Satan with as much propriety as the Devil, since they are the adversaries of darkness, badness, and ugliness. And now the philosophy and the rationale of certain early Christian sects -- called heretical and viewed as the abomination of the times -- will become more comprehensible. We may understand how it was that the sect of SATANIANS came to be degraded, and were anathematized without any hope of vindication in a future day, since they kept their tenets secret. How, on the same principle, the CAINITES came to be degraded, and even the (Judas) ISCARIOTES; the true character of the treacherous apostle having never been correctly presented before the tribunal of Humanity.

As a direct consequence, the tenets of the Gnostic sects also become clear. Each of these sects was founded by an Initiate, while their tenets were based on the correct knowledge of the symbolism of every nation. Thus it becomes comprehensible why Ilda-Baath was regarded by most of them as the god of Moses, and was held as a proud, ambitious, and impure spirit, who had abused his power by usurping the place of the highest God, though he was no better, and in some respects far worse than his brethren Elohim; the latter representing the all-embracing, manifested deity only in their collectivity, since they were the fashioners of the first differentiations of the primary Cosmic substance for the creation of the phenomenal Universe. Therefore Jehovah was called by the Gnostics the Creator of, and one with Ophiomorphos, the Serpent, Satan, or EVIL. (See "Isis Unveiled," II, 184). They taught that Turbo and Adonai were "names of Jao-Jehovah, who is an emanation of Ilda Baath" (Codex Nazaraeus). (See Part II., "The Fallen Angels.") This amounted in their language to saying what the Rabbins expressed in a more veiled way, by stating that -- "Cain had been generated by Samael or Satan."

[[Footnote(s)]] -----

* In Demonology, Satan is the leader of the opposition in Hell, the monarch of which was Beelzebub. He belongs to the fifth kind or class of demons (of which there are nine according to mediaeval demonology), and he is at the head of witches and sorcerers. But see in the text the true meaning of Baphomet, the goat-headed Satan, one with Azazel, the scape goat of Israel. Nature is the god PAN.

[[Vol. 2, Page]] 390 THE SECRET DOCTRINE.

The fallen Angels are made in every ancient system the prototypes of fallen men -- allegorically, and, those men themselves -- esoterically. Thus the Elohim of the hour of creation became the "Beni-Elohim," the sons of God, among whom is Satan -- in the Semitic traditions; war in heaven between Thraetaona and Azhi-dahaka, the destroying Serpent, ends on earth, according to Burnouf, in the battle of pious men against the power of Evil, "of the Iranians with the Aryan Brahmins of India." And the conflict of the gods with the Asuras is repeated in the Great War -- the Mahabharata. In the latest religion of all, Christianity, all the Combatants, gods and demons, adversaries in both the camps, are now transformed into Dragons and Satans, simply in order to connect EVIL personified with the Serpent of Genesis, and thus prove the new dogma.*

NOAH WAS A KABIR, HENCE HE MUST HAVE BEEN A DEMON.

It matters little whether it is Isis, or Ceres -- the "Kabiria" -- or again the Kabiri, who have taught men agriculture; but it is very important to prevent fanatics from monopolising all the facts in history and legend, and from fathering their distortions of truth, history, and legend upon one man. Noah is either a myth along with the others, or one whose legend was built upon the Kabirian or Titanic tradition, as taught in Samothrace; he has, therefore, no claim to be monopolized by either Jew or Christian. If, as Faber tried to demonstrate at such cost of learning and research, Noah is an Atlantean and a Titan, and his family are the Kabiri or pious Titans, etc. -- then biblical chronology falls by its own weight, and along with it all the patriarchs -- the antediluvian and pre-Atlantean Titans. As now discovered and proven, Cain is Mars, the god of power and generation, and of the first (sexual) bloodshed.** Tubal-Cain is a Kabir, "an instructor of every artificer in brass and iron"; or -- if this will please better -- he is one with Hephaestos or Vulcan; Jabal is taken from the Kabiri -- instructors in agriculture, "such as have cattle," and Jubal is "the father of all those who handle the harp," he, or they who fabricated the harp for Kronos and the trident for Poseidon.***

[[Footnote(s)]] -----

* Vide for further details upon the Satanic myth, Part II. on Symbolism, in this volume.

** As he is also Vulcan or Vul-cain, the greatest god with the later Egyptians, and the greatest Kabir. The god of time was Chium in Egypt, or Saturn, or Seth, and Chium is the same as Cain.

*** See Strabo, comparing them to the Cyclopes -- XIV. p. 653 et seq. (Callim in Del., 31 Stat. Silo. IV., 6, 47; etc., etc.)

[[Vol. 2, Page]] 391 THE FLOOD LEGENDS.

The history or "fables" about the mysterious Telchines -- fables echoing each and all the archaic events of our esoteric teachings -- furnish us with a key to the origin of Cain's genealogy (Genesis, ch. iii.); they give the reason why the Roman Catholic Church identifies "the accursed blood" of Cain and Ham with Sorcery, and makes it responsible for the Deluge. Were not the Telchines -- it is argued -- the mysterious ironworkers of Rhodes; they who were the first to raise statues to the gods, furnish them with weapons, and men with magic arts? And is it not they who were destroyed by a deluge at the command of Zeus, as the Cainites were by that of Jehovah?

The Telchines are simply the Kabiri and the Titans, in another form. They are the Atlanteans also. "Like Lemnos and Samothrace," says Decharme, "Rhodes, the birth-place of the Telchines, is an island of volcanic formation." (Genii of Fire, p. 271.) The island of Rhodes emerged suddenly out of the seas, after having been previously engulfed by the Ocean, say the traditions. Like Samothrace (of the Kabiri) it is connected in the memory of men with the Flood legends. As enough has been said on this subject, however, it may be left for the present.

But we may add a few more words about Noah, the Jewish representative of nearly every pagan God in one or another character. The Homeric songs contain, poetized, all the later fables about the Patriarchs, who are all sidereal, cosmic, and numerical symbols and signs. The attempt to disconnect the two genealogies -- those of Seth and Cain* -- and the further attempt, as futile, to show them real, historical men, has only led to more serious inquiries into the history of the Past, and to discoveries which have damaged for ever the supposed revelation. For instance, the identity of Noah and Melchizedek being established, the further identity of Melchizedek, or Father Sadik, with Kronos-Saturn is proved also.

That it is so may be easily demonstrated. It is not denied by any of the Christian writers. Bryant (See "Analysis of Ancient Mythology," Vol. II., p. 760) concurs with all those who are of opinion, that Sydic, or

[[Footnote(s)]] -----

* Nothing could be more awkward and childish, we say, than this fruitless attempt to disconnect the genealogies of Cain and of Seth, or to conceal the identity of names under a different spelling. Thus, Cain has a Son ENOCH, and Seth a Son ENOCH also (Enos, Ch'anoch, Hanoch; -- one may do what one likes with Hebrew unvowelled names). In the Cainite line Enoch begets IRAD, Irad MEHUJAEEL, the latter METHUSAEL, and Methusael, Lamech. In the Sethite line, Enoch begets Cainan, and this one MAHALEEL (a variation on Mehujael), who gives birth to JARAD (or Irad); Jarad to ENOCH (Number 3), who produces Methuselah (from Methusael), and finally Lamech closes the list. Now all these are symbols (Kabalistically) of solar and lunar years, of astronomical periods, and of physiological (phallic) functions, just as in any other pagan symbolical creed. This has been proven by a number of writers.

[[Vol. 2, Page]] 392 THE SECRET DOCTRINE.

Sadic, was the patriarch Noah (as also Melchizedek); and that the name by which he is called, or Sadik, corresponds to the character given of him in Genesis, chap. vi., 9. "He was [[diagram]], Sadic, a JUST man, and perfect in his generation. All science and every useful art were attributed to him, and through his sons transmitted to posterity." (See New Encyclopaedia by Abraham Rees, F.R.S.)

Now it is Sanchoniathon, who informs the world that the Kabiri were the Sons of Sydic or Zedek (Melchizedek). True enough, this information, having descended to us through Eusebius (Preparatio Evangelica), may be regarded with a certain amount of suspicion, as it is more than likely that he dealt with Sanchoniathon's works as he has with Manetho's Synchronistic Tables. But let us suppose that the identification of Sydic, Kronos, or Saturn with Noah and Melchizedek, is based on one of the Eusebian pious hypotheses. Let us accept it as such, along with Noah's characteristic as a just man, and his supposed duplicate, the mysterious Melchizedek, King of Salem, and priest of the high god, after "his own order" (See Hebrews, ch. v. 6, and vii. 1, et seq.); and finally, having seen what they all were spiritually, astronomically, psychically and cosmically, let us now see what they became rabbinically and KABALISTICALLY.

Speaking of Adam, Kain, Mars, etc., as personifications, we find the author of "The Source of Measures" enunciating our very esoteric teachings in his Kabalistic researches. Thus he says:--

"Now Mars was the lord of birth and of death, of generation and of destruction, of ploughing, of building, of sculpture or stone-cutting, of Architecture . . . in fine, of all . . . ARTS. He was the primeval principle, disintegrating into the modification of two opposites for production. Astronomically, too,* he held the birthplace of the day and year, the place of its increase of strength, Aries, and likewise the place of its death, Scorpio. He held the house of Venus, and that of the Scorpion. He, as birth, was good; as death, was Evil. As good, he was light; as bad, he was night. As good, he was man; as bad, he was woman. He held the cardinal points, and as Cain, or Vulcan,** or Pater Sadik, or Melchizedek, he was lord of the Ecliptic, or

[[Footnote(s)]] -----

* The AEolian name of Mars was [[Ares]], and the Greek Ares, [[Ares]], is a name over the etymological significance of which, philologists and Indianists, Greek and Sanskrit scholars have vainly worked to this day. Very strangely, Max Muller connects both the names Mars and Ares with the Sanskrit root mar, whence he traces their derivation, and from which, he says, the name of Maruts (the storm-gods) comes. Welcker, however, offers more correct etymologies. (See Griech. Gotterlehre, I., 415.) However it may be, etymologies of roots and words alone will never yield the esoteric meaning fully, though they may help to useful guesses.

** As the same author shows: "The very name Vulcain appears in the reading; for in the first words (of chap. iv. Genesis, 5) is to be found V'elcain, or V'ulcain, agreeably to the deepened u sound of the letter vau. Out of its immediate context, it may be [[Footnote continued on next page]]

[[Vol. 2, Page]] 393 THE LEGENDS OF IRAN.

balance, or line of adjustment, and therefore was THE JUST ONE. The ancients held to there being seven planets, or great gods, growing out of eight, and Pater Sadik, the Just or Right One, was lord of the eighth, which was Mater Terra. ("Source of Measures," p. 186-70.)

This makes their functions plain enough after they had been degraded, and establishes the identity.

The Noachian Deluge, as described in its dead letter and within the period of Biblical chronology, having been shown to have never existed, the pious, but very arbitrary supposition of Bishop Cumberland has but to follow that deluge into the land of fiction. Indeed it seems rather fanciful to any impartial observer to be told that there were "two distinct races of Kabiri," the first consisting of Ham and Mizraim, whom he conceives to be Jupiter and Dionysus of Mnaseas; the second, "of the children of Shem, are the Kabiri of Sochoniston, while their father Sydyk is consequently the Scriptural Shem." (Append. de Cabiris, ap. Orig. gent. p. 364, 376, and the latter statement on p. 357.)

The Kabirim, "the mighty ones," are identical with our primeval Dhyam-Chohans, with the corporeal and the incorporeal Pitris, and with all the rulers and instructors of the primeval races, which are referred to as the Gods and Kings of the divine Dynasties.

THE OLDEST PERSIAN TRADITIONS ABOUT THE POLAR, AND THE SUBMERGED CONTINENTS.

Legendary lore could not distort facts so effectually as to reduce them to unrecognisable shape. Between the traditions of Egypt and Greece on the one hand, and Persia on the other -- a country ever at war with the former -- there is too great a similarity of figures and numbers to allow such coincidence to be due to simple chance. This was well proven by Bailly. Let us pause for a moment to examine these traditions from every available source, to compare the better those of the Magi with the so-called Grecian "fables."

Those legends have now passed into popular tales, the folklore of Persia, as many a real fiction has found its way into our universal History. The stories of King Arthur and his knights of the Round Table are also fairy tales to all appearance; yet they are based on facts, and pertain to the History of England. Why should not the folklore of Iran be part and parcel of the history and the pre-historic events of Atlantis? That folklore says as follows:

[[Footnote(s)]] -----

[[Footnote continued from previous page]] read as "and the god Cain," or Vulcain. If, however, anything is wanting to confirm the Cain-Vulcain idea, Fuerst says: [[hebrew]], Cain, the iron point of a lance, a smith (blacksmith), inventor of sharp iron tools and smith work" (p. 278).

[[Vol. 2, Page]] 394 THE SECRET DOCTRINE.

Before the creation of Adam, two races lived and succeeded each other on Earth; the Devs who reigned 7,000 years, and the Peris (the Izeds) who reigned but 2,000, during the existence of the former. The Devs were giants, strong and wicked; the Peris were smaller in stature, but wiser and kinder.

Here we recognize the Atlantean giants and the Aryans, or the Rakshasas of the Ramayana and the children of Bharata Varsha, or India; the ante- and the post-diluvians of the Bible.

Gyan (or rather Gnan, true or occult Wisdom and knowledge), also called Gian-ben-Gian (or Wisdom, son of Wisdom), was the king of the Peris.* He had a shield as famous as that of Achilles, only instead of serving against an enemy in war, it served as a protection against black magic, the sorcery of the Devs. Gian-ben-Gian had reigned 2,000 years when Iblis, the devil, was permitted by God to defeat the Devs and scatter them to the other end of the world. Even the magic shield, which, produced on the principles of astrology, destroyed charms, enchantments, and bad spells, could not prevail against Iblis, who was an agent of Fate (or Karma).** They count ten kings in their last metropolis called Khanoom, and make the tenth, Kaimurath, identical with the Hebrew Adam. These kings answer to the ten antediluvian generations of kings as given by Berosus.

Distorted as those legends are now found, one can hardly fail to identify them with the Chaldean, Egyptian, Greek, and even Hebrew traditions. The latter, disdaining in its exclusiveness to speak of pre-adamite nations, yet allows these to be clearly inferred, by sending out Cain -- one of the two only living men on earth -- into the land of Nod, where he gets married and builds a city (Gen. iv.), etc.

Now if we compare the 9,000 years mentioned by the Persian tales with the 9,000 years, which Plato declared had passed since the submersion of the last Atlantis, a very strange fact is made apparent. Bailly remarked, but distorted it by his interpretation. The Secret Doctrine may restore the figures to their true meaning. "First of all," we read in "Critias" that "one must remember that 9,000 years have elapsed since the war of the nations, which lived above and outside the Pillars of Hercules, and those which peopled the lands on this side."

[[Footnote(s)]] -----

* Some derive the word from Paras which produced Pars, Persia, Pars; but it may be equally derived from Pitar or Pitris, the Hindu progenitors of the Fifth Race -- the Fathers of Wisdom or the Sons of "Will and Yoga" -- who were called Pitar, as were the divine Pitars of the First Race.

** See for these traditions the "Collection of Persian Legends," in Russian, Georgian, Armenian, and Persian; Herbelot's narrative Legendes Persanes, "Bibliotheque Orientale," p. 298, 387, etc., and Danville's Memoires. We give in a condensed narrative that which is scattered in hundreds of volumes in European and Asiatic languages, as well as in oral traditions.

[[Vol. 2, Page]] 395 ESOTERIC CHRONOLOGY.

In "Timaeus" Plato says the same. The Secret Doctrine declaring that most of the later islander Atlanteans perished in the interval between 850,000 and 700,000 years ago, and that the Aryans were 200,000 years old when the first great

"island" or continent was submerged, there hardly seems any reconciliation possible between the figures. But there is, in truth. Plato, being an Initiate, had to use the veiled language of the Sanctuary, and so had the Magi of Chaldea and Persia, through whose exoteric revelations the Persian legends were preserved and passed to posterity. Thus, one finds the Hebrews calling a week "seven days," and "a week of years" when each of its days represents 360 solar years, and the whole "week" is 2,520 years, in fact. They had a Sabbatical week, a Sabbatical year, etc., etc., and their Sabbath lasted indifferently 24 hours or 24,000 years -- in their secret calculations of the Sods. We of the present times call an age a century. They of Plato's day, the initiated writers, at any rate, meant by a millenium, not a thousand but 100,000 years; Hindus, more independent than any, never concealed their chronology. Thus, when saying 9,000 years, the Initiates will read 900,000 years, during which space of time -- i.e., from the first appearance of the Aryan race, when the Pliocene portions of the once great Atlantis began gradually sinking* and other continents to appear on the surface, down to the final disappearance of Plato's small island of Atlantis, the Aryan races had never ceased to fight with the descendants of the first giant races. This war lasted till nearly the close of the age which preceded the Kali Yug, and was the Mahabharatean war so famous in Indian History. Such blending of the events and epochs, and the bringing down of hundreds of thousands into thousands of years, does not interfere with the numbers of years that had elapsed, according to the statement made by the Egyptian priests to Solon, since the destruction of the last portion of Atlantis. The 9,000 years were the correct figures given. The latter event has never been kept a secret, and had only faded out of the memory of the Greeks. The Egyptians had their records complete, because isolated; for, being surrounded by sea and desert, they had been left untrammelled by other nations, till about a few millenniums before our era.

History, for the first time, catches a glimpse of Egypt and its great mysteries through Herodotus, if we do not take into account the Bible, and its queer chronology.** And how little Herodotus could tell is

[[Footnote(s)]] -----

* The main continent perished in the Miocene times, as already stated.

** From Bede downwards all the chronologists of the Church have differed among themselves, and contradicted each other. "The chronology of the Hebrew text has been grossly altered, especially in the interval next after the Deluge":-- says Whiston (Old Test., p. 20).

[[Vol. 2, Page]] 396 THE SECRET DOCTRINE.

confessed by himself when speaking of a mysterious tomb of an Initiate at Sais, in the sacred precinct of Minerva. There, he says "behind the chapel . . . is the tomb of One, whose name I consider it impious to divulge . . . In the enclosure stand large obelisks and there is a lake near, surrounded with a stone wall formed in a circle. In this lake they perform by night, that person's adventures, which they call Mysteries: on these matters, however, though I am accurately acquainted with the particulars of them, I must observe a discreet silence" (ii. 170).

On the other hand, it is well to know that no secret was so well preserved and so sacred with the ancients, as that of their cycles and computations. From the Egyptians down to the Jews it was held as the highest sin to divulge anything pertaining to the correct measure of time. It was for divulging the secrets of the Gods, that Tantalus was plunged into the infernal regions; the keepers of the sacred Sibylline Books were threatened with the death penalty for revealing a word from them. Sigalions (images of Harpocrates) were in every temple -- especially in those of Isis and Serapis -- each pressing a finger to the lips; while the Hebrews taught that to divulge, after initiation into the Rabbinical mysteries, the secrets of Kabala, was like eating of the fruit of the Tree of Knowledge: it was punishable by death.

And yet, we Europeans accepted the exoteric chronology of the Jews! What wonder that it has influenced and coloured ever since all our conceptions of science and the duration of things!

The Persian traditions, then, are full of two nations or races, now entirely extinct, as some think; whereas, they are only transformed. They are ever speaking of, and describing the mountains of Kaf (Kafaristan?), which contain a gallery built by the giant Argeak, wherein the statues of the ancient men under all their forms are preserved. They call them Sulimans (Solomons), or the wise kings of the East, and count seventy-two kings of that name.* Three among them reigned for 1,000 years each. (Herbelot, p. 829.)

Siamek, the beloved son of Kaimurath (Adam), their first king, died murdered by his giant brother. The father had a perpetual fire preserved on the tomb which contained his cremated ashes; hence -- the origin of fire-worship, as some Orientalists think.

Then came Huschenk, the prudent and the wise. It was his dynasty which re-discovered metals and precious stones, which had been concealed by the Devs or Giants in the bowels of the earth; how to make brass-work, to cut canals, and improve agriculture. As usual, it is Huschenk, again, who is credited with having written the work called

[[Footnote(s)]] -----

* Thence King Solomon, whose traces are nowhere to be found outside of the Bible, and the description of whose magnificent palace and city dovetail with those of the Persian tales; though they were unknown to all pagan travellers, even to Herodotus.

[[Vol. 2, Page]] 397 THE PERSIAN PHOENIX.

"Eternal Wisdom," and even with having built the cities of Luz, Babylon and Ispahan, though they were built ages later. But as modern Delhi is built on six other older cities, so these just-named cities may be built on emplacements of other cities of an immense antiquity. As to his date, it can only be inferred from another legend.

In the same tradition that wise prince is credited with having made war against the giants on a twelve-legged horse, whose birth is attributed to the amours of a crocodile with a female hippopotamus. This dodecaped was found on the "dry island" or new continent; much force and cunning had to be used to secure the wonderful animal, but no sooner had Huschenk mounted him, than he defeated every enemy. No giants could withstand his tremendous power. Notwithstanding, this king of kings was killed by an enormous rock thrown at him by the giants from the great mountains of Damavend.*

Tahmurath is the third king of Persia, the St. George of Iran, the knight who always has the best of, and who kills, the Dragon. He is the great enemy of the Devs who, in his day, dwelled in the mountains of Kaf, and occasionally made raids on the Peris. The old French chronicles of the Persian folklore call him the Dev-bend, the conqueror of the giants. He, too, is credited with having founded Babylon, Nineveh, Diarbek, etc., etc. Like his grand-sire Huschenk, Tahmurath (Taimuraz) also had his steed, only far more rare and rapid -- a bird called Simorgh-Anke. A marvellous bird, in truth, intelligent, a polyglot, and even very religious. (See Orient. Collect. ii., 119.) What says that Persian Phoenix? It complains of its old age, for it is born cycles and cycles before the days of Adam (also Kaimurath). It has witnessed the revolutions of long centuries. It has seen the birth and the close of twelve cycles of 7,000 years each, which multiplied esoterically will give us again 840,000 years.** (Orient. Collect. ii., 119 et seq.) Simorgh is born with the last deluge of the pre-Adamites, says the "romance of Simorgh and the good Khalif"! (Tales of Derbent.)

What says the "Book of Numbers"? Esoterically, Adam Rishoon is the lunar Spirit (Jehovah, in a sense, or the Pitris) and his three Sons -- Ka-yin, Habel, and Seth -- represent the three races, as already explained. Noah-Xisuthrus represents in his turn (in the cosmo-geological key) the 3rd Race separated, and his three sons, its last three races; Ham, moreover, symbolizing that race which uncovered the "nakedness" of the Parent Race, and of the "Mindless," i.e., committed sin.

[[Footnote(s)]] -----

* Orient. Trad., p. 454. See also Bailly's "Lettres sur l'Atlantide."

** Remember that the Rabbins teach that there are to be seven successive renewals of the globe; that each will last 7,000 years, the total duration being thus 49,000 years (See Rabbi Parcha's "wheel"; also Kenealy's "Book of God," p. 176). This refers to 7 Rounds, 7 Root-races, and sub-races, the truly occult figures, though sorely confused.

[[Vol. 2, Page]] 398 THE SECRET DOCTRINE.

Tahmurath visits on his winged steed (Ahriman) the Mountains of Koh-Kaf or Kaph. He finds there the Peris ill-treated by the giants, and slays Argen, and the giant Demrusch. Then he liberates the good Peri, Mergiana*, whom Demrusch had kept as a prisoner, and takes her over to the dry island, i.e., the new continent of Europe.** After him came Giamschid, who builds Esikekar, or Persepolis. This king reigns 700 years, and believes himself, in his great pride, immortal, and demands divine honours. Fate punishes him, he wanders for 100 years in the world under the name of Dhulkarnayn "the two horned." But this epithet has no connection with the "two-horned" gentleman of the cloven foot. The "two-horned" is the epithet given in Asia, uncivilized enough to know nothing of the attributes of the devil, to those conquerors who have subdued the world from the East to the West.

Then come the usurper Zohac, and Feridan, one of the Persian heroes, who vanquishes the former, and shuts him up in the mountains of Damavend. These are followed by many others down to Kaikobad, who founded a new dynasty.

Such is the legendary history of Persia, and we have to analyze it. What are the mountains of Kaf to begin with?

Whatever they may be in their geographical status, whether they are the Caucasian or Central Asian mountains, it is far beyond these mountains to the North, that legend places the Devs and Peris; the latter the remote ancestors of the Parses or Farses. Oriental tradition is ever referring to an unknown glacial, gloomy sea, and to a dark region, within which, nevertheless, are situated the Fortunate Islands, wherein bubbles, from the beginning of life on earth, the fountain of life (Herbelot, p. 593; Armenian Tales, p. 35). But the legend asserts, moreover, that a portion of the first dry island (continent), having detached itself from the main body, has remained, since then, beyond the mountains of Koh-kaf, "the stony girdle that surrounds the world." A journey of seven months' duration will bring him who is possessed of "Soliman's ring" to that "fountain," if he keeps on journeying North straight before him as the bird flies. Journeying therefore from Persia straight north, will bring one along the sixtieth degree of longitude, holding to the west, to Nova Zembla; and from the Caucasus to the eternal ice beyond the Arctic circle would land one between 60 and 45 degrees of longitude, or between Nova Zembla and Spitzbergen. This, of course, if one has the dodecapedian horse of

[[Footnote(s)]] -----

* Mergain, or Morgana, the fairy sister of King Arthur, is thus shown of Oriental descent.

** Where we find her, indeed, in Great Britain, in the romance of the Knights of the Round Table. Whence the identity of name and fairy-hood, if both heroines did not symbolize the same historical event which had passed into a legend?

[[Vol. 2, Page]] 399 THE ARCTIC CONTINENT.

Huschenk or the winged Simorgh of Tahmurath (or Taimuraz), upon which to cross over the Arctic Ocean.*

Nevertheless, the wandering songsters of Persia and the Caucasus will maintain, to this day, that far beyond the snow-capped summits of Kap, or Caucasus, there is a great continent now concealed from all. That it is reached by those who can secure the services of the twelvelegged progeny of the crocodile and the female hippopotamus, whose legs become at will twelve wings**, or by those who have the patience to wait for the good pleasure of Simorgh-anke, who promised that before she dies she will reveal the hidden continent to all, and make it once more visible and within easy reach, by

means of a bridge, which the Ocean Devs will build between that portion of the "dry island" and its severed parts.*** This relates, of course, to the seventh race, Simorgh being the Manvantaric cycle.

It is very curious that Cosmas Indicopleustes, who lived in the sixth century A.D., should have always maintained that man was born, and dwelt at first in a country beyond the Ocean, a proof of which had been given him in India, by a learned Chaldean (Cosmas Indicopleustes in Collect. nova Patrum, t. ii, p. 188; also see Journ. des Savants, Suppl. 1707, p. 20.) He says: "The lands we live in are surrounded by the ocean, but beyond that ocean there is another land which touches the walls of the sky; and it is in this land that man was created and lived in paradise. During the Deluge, Noah was carried in his ark into the land his posterity now inhabits." (Ibid.) The twelve-legged horse of Huschenk was found on that continent named the dry island. (Supra, p. 154.)

The "Christian topography" of Cosmas Indicopleustes and its merits are well known; but here the good father repeats a universal tradition, now, moreover, corroborated by facts. Every arctic traveller suspects a continent or a "dry island" beyond the line of eternal ice. Perhaps now the meaning of the following passage from one of the Commentaries may become clearer.

[[Footnote(s)]] -----

* To this day the aborigines of Caucasus speak of their mountains as Kap-kaz, using the consonant p instead of the usual v (Kavkaz or Caucasus). But their bards say that it requires seven months for a swift horse to reach the "dry land" beyond Kaf, holding north without ever deviating from one's way.

** Bailly thought he saw in this horse a twelve-oared ship. The Secret Doctrine teaches that the early Third Race built boats and flotillas before it built houses. But the "horse," though a much later animal, has, nevertheless, a more occult primitive meaning. The crocodile and the hippopotamus were held sacred and represented divine symbols, both with the ancient Egyptians and with the Mexicans. Poseidon is, in Homer, the God of the Horse, and assumes that form himself to please Ceres. Arion, their progeny, is one of the aspects of that "horse," which is a cycle.

*** The severed parts must be Norway and other lands in the neighbourhood of the Arctic Circle.

[[Vol. 2, Page]] 400 THE SECRET DOCTRINE.

"In the first beginnings of (human) life, the only dry land was on the Right end* of the sphere, where it (the globe) is motionless.** The whole earth was one vast watery desert, and the waters were tepid . . . There man was born on the seven zones of the immortal, the indestructible of the Manvantara.*** There was eternal spring in darkness. (But) that which is darkness to the man of today, was light to the man of his dawn. There, the gods rested, and Fohat**** reigns ever since . . . Thus the wise fathers say that man is born in the head of his mother (earth), and that her feet at the left end generated (begot) the evil winds that blow from the mouth of the lower Dragon . . . Between the first and second (races) the eternal central (land) was divided by the water of life.*****

"It flows around and animates her (mother earth's) body. Its one end issues from her head; it becomes foul at her feet (the Southern Pole). It gets purified (on its return) to her heart -- which beats under the foot of the sacred Shambalah, which then (in the beginnings) was not yet born. For it is in the belt of man's dwelling (the earth) that lies concealed the life and health of all that lives and breathes.***** During the first and second (races) the belt was covered with the great waters. (But) the great mother travelled under the waves and a new land was joined to the first one which our wise men call the head-gear (the cap). She travelled harder for the third (race) and her waist and navel appeared above the

[[Footnote(s)]] -----

* The two poles are called the right and left ends of our globe -- the right being the North Pole -- or the head and feet of the earth. Every beneficent (astral and cosmic) action comes from the North; every lethal influence from the South Pole. They are much connected with and influence "right" and "left" hand magic.

** The more one approaches the poles the less rotation is felt; at the poles proper, the diurnal revolution is quite neutralized. Thence the expression that the sphere is "motionless."

*** It is averred in Occultism that the land or island, which crowns the North Pole like a skull-cap, is the only one which prevails during the whole Manvantara of our "Round." All the central continents and lands will emerge from the sea bottom many times in turn, but this land will never change.

**** Bear in mind that the Vedic and Avestian name of Fohat is Apam-Napat. In the Avesta he stands between the fire-yazatas and the water-yazatas. The literal meaning is "Son of the Waters," but these "waters" are not the liquid we know, but Ether -- the fiery waters of space. Fohat is the "Son of Ether" in its highest aspect, Akasa, the Mother-Father of the primitive Seven, and of Sound or LOGOS. Fohat is the light of the latter. See Book I.

***** This "water" is the blood or fluid of life which animates the earth, compared here to a living body.

***** Occult teaching corroborates the popular tradition which asserts the existence of a fountain of life in the bowels of the earth and in the North Pole. It is the blood of the earth, the electromagnetic current, which circulates through all the arteries; and which is said to be found stored in the "navel" of the earth.

[[Vol. 2, Page]] 401 THE UNREACHABLE LAND.

water. It was the belt, the sacred Himavat, which stretches around the world.* She broke toward the setting sun from her neck** downward (to the south west), into many lands and islands, but the eternal land (the cap) broke not asunder. Dry lands covered the face of the silent waters to the four sides of the world. All these perished (in their turn). Then appeared

the abode of the wicked (the Atlantis). The eternal land was now hid, for the waters became solid (frozen) under the breath of her nostrils and the evil winds from the Dragon's mouth," etc., etc.

This shows that Northern Asia is as old as the Second Race. One may even say that Asia is contemporary with man, since from the very beginnings of human life its root-continent, so to speak, already existed; that part of the world now known as Asia being only cut off from it in a later age, and divided by the glacial waters.

If, then, the teaching is understood correctly, the first continent which came into existence capped over the whole North Pole like one unbroken crust, and remains so to this day, beyond that inland sea which seemed like an unreachable mirage to the few arctic travellers who perceived it.

During the Second Race more land emerged from under the waters as a continuation of the "head" from the neck. Beginning on both hemispheres, on the line above the most northern part of Spitzbergen*** on

[[Footnote(s)]] -----

* Occultism points to the Himalayan chain as that "belt," and maintains that whether under the water or above, it encircles the globe. The navel is described as situated to the setting sun or to the west of the Himavat in which lie the roots of Meru, which mountain is north of the Himalaya. Meru is not "the fabulous mountain in the navel or centre of the earth," but its roots and foundations are in that navel, though it is in the far north itself. This connects it with the "central" land "that never perishes"; the land in which "the day of the mortal lasts six months and his night another six months." As the Vishnu Purana has it: "for the North of Meru there is, therefore, always night during day in other regions; for Meru is north of all the dwipas and varshas" (islands and countries). (Book II., chap. viii.) Meru is therefore neither on Atlas as Wilford suggests, nor, as Wilson tried to show, "absolutely in the centre of the globe," only because "relatively with the inhabitants of the several portions, to all of whom the East is that quarter where the sun first appears."

** Even the Commentaries do not refrain from Oriental metaphor. The globe is likened to the body of a woman, "mother earth." From her neck downward, means from the inland sea now beyond the impassable barrier of ice. The Earth, as Parasara says: "is the mother and nurse, augmented with all creatures and their qualities, the comprehender of all the worlds."

*** For the Stanzas call this locality by a term translated in the commentary as a place of no latitude (niraksha) the abode of the gods. As a scholiast says from the Surya-Sidhanta:

"Above this (the Siddha) goes the sun when situated at the equinoxes; they have neither equinoctial shadow nor elevation of the pole (akshonnati, v. 42). In both directions from these are two pole-stars (dhruvatara), fixed in the midst of the sky; [[Footnote continued on next page]]

[[Vol. 2, Page]] 402 THE SECRET DOCTRINE.

Mercator's Projection, on our side, it may have included, on the American side, the localities that are now occupied by Baffin's Bay and the neighbouring islands and promontories. There it hardly reached, southward, the 70th degree of latitude; here -- it formed the horse-shoe continent of which the commentary speaks; of the two ends of which, one included Greenland with a prolongation which crossed the 50th degree a little south west, and the other Kamschatka, the two ends being united by what is now the northern fringe of the coasts of Eastern and Western Siberia. This broke asunder and disappeared. In the early part of the Third Race -- Lemuria was formed (Vide supra). When it was destroyed in its turn, Atlantis appeared.

WESTERN SPECULATIONS,
FOUNDED ON THE GREEK AND PURANIC TRADITIONS.

Thus it becomes natural to find that, on even such meagre data as have reached the profane historian, Rudbeck, a Swedish scientist, tried to prove about two centuries ago that Sweden was the Atlantis of Plato. He thought, even, that he had found in the configuration of ancient Upsala, the situation and measurements given by the Greek sage of the capital of "Atlantis." As Bailly proved, Rudbeck was mistaken; but so was Bailly likewise, and still more. For Sweden and Norway had formed part and parcel of ancient Lemuria, and also of Atlantis on the European side, just as Eastern and Western Siberia and Kamschatka had belonged to it, on the Asiatic. Only, once more, when was it? We can find it out approximately only by studying the Puranas, if we will have nought to do with the Secret teachings.

Three quarters of a century have already elapsed since Captain (now Colonel) Wilford brought forward his fanciful theories about the British islands being the "White Island," the Atala of the Puranas. This was sheer nonsense, as the Atala is one of the seven dwipas, or islands, belonging to the nether lokas, one of the seven regions of Patala (the antipodes). Moreover, as Wilford* shows, the Puranas place it "on

[[Footnote(s)]] -----

[[Footnote continued from previous page]] to those who are situated in places of no latitude (niraksha) both these have their place in the horizon. Hence there is (on that land) no elevation of the poles, the two pole-stars being situated in their horizon; but their degrees of colatitude (lumbaka) are 90; at Meru the degrees of latitude (aksha) are of the same number." (43 and 44.)

* Wilford makes many mistakes. He identifies, for instance, Sveta-dwipa (the white Island), the "island in the northern part of Toyambhudi," with England, and then tries to identify it with Atala (a nether region) and Atlantis. Now the former is the abode of Vishnu, exoterically, and Atala is a hell. He also places it in the Euxine or Icschu (Black) Sea, and then seems to connect it, in another place, with Africa and Atlas.

[[Vol. 2, Page]] 403 ORIENTALISTS IN THE WRONG BOX.

the seventh zone or seventh climate," -- rather, on the seventh measure of heat: which thus locates it between the latitudes of 24 and 28 degrees north. It is then to be sought on the same degree as the Tropic of Cancer, whereas England is between the 50th and 60th degrees of latitude. Wilford speaks of it as Atala, Atlantis, the white island. And in vol. viii. of *Journal of Asiatic Researches*, p. 280, its enemy is called the "White Devil," the demon of terror. For he says: "In their (the Hindu and Mahomedan) romances, we see Kai-caus going to the mountain of 'As-burj, at the foot of which the Sun sets,' to fight the Dev-Sefid, or white devil, the Taradaitya of the Puranas, whose abode was on the seventh stage of the world, answering to the seventh zone of the Buddhists, or the White Island."

Now here the Orientalists have been, and are still, facing the Sphinx's riddle, the wrong solution of which will ever destroy their authority, if not their persons, in the eyes of every Hindu scholar, even those who are not initiates. For there is not a statement in the Puranas -- on the conflicting details of which Wilford based his speculations -- which has not several meanings, and does not apply to both the physical and the metaphysical worlds. If the old Hindus divided the face of the globe geographically into seven zones, climates, dwipas, and into seven hells and seven heavens, allegorically, that measure of seven did not apply in both cases to the same localities. It is the north pole, the country of "Meru," which is the seventh division, as it answers to the Seventh principle (or fourth metaphysically), of the occult calculation, for it represents the region of Atma, of pure soul, and Spirituality. Hence Pushkara is shown as the seventh zone, or dwipa, which encompasses the Kshira Ocean, or Ocean of milk (the ever-frozen white region) in the Vishnu (and other) Puranas (Book II ch. iv.). And Pushkara, with its two Varshas, lies directly at the foot of Meru. For it is said that "the two countries north and south of Meru are shaped like a bow," . . . and that "one half of the surface of the earth is on the south of Meru and the other half on the north of Meru -- beyond which is half of Pushkara" (Vishnu Purana, *Asiatic Researches*, etc.). Geographically, then, Pushkara is America, Northern and Southern; and allegorically it is the prolongation of Jambu-dwipa* in the middle of

[[Footnote(s)]] -----

* Every name in the Puranas has to be examined at least under two aspects; geographically, and metaphysically, in its allegorical application; e.g., Nila, the (blue) mountain which is one of the boundaries to the north of Meru, is again to be sought geographically in a mountain range in Orissa, and again in a mountain quite different from the others (in Western Africa). Jambu-dwipa is Vishnu's dominion -- the world, limited in the Puranas to our globe, the region which contains Meru only, and again it is divided to contain Bharata-varsha (India), its best division, and the fairest, says Parasara. Likewise with Pushkara and all others.

[[Vol. 2, Page]] 404 THE SECRET DOCTRINE.

which stands Meru, for it is the country inhabited by beings who live ten thousand years, who are free from sickness or failing; where there is neither virtue nor vice, caste or laws, for these men are "of the same nature as the Gods," (Vishnu Purana, Book II. ch. iv.). Wilford is inclined to see Meru in Mount Atlas, and locates there also the Loka-lokas. Now Meru, we are told, which is the Swar-loka, the abode of Brahma, of Vishnu, and the Olympus of Indian exoteric religions, is described geographically as "passing through the middle of the earth-globe, and protruding on either side" (Surya Siddhanta, v. 5, Whitney's trans.). On its upper station are the gods, on the nether (or South pole) is the abode of demons (hells). How can then Meru be Mount Atlas? Besides which, Taradaitya, a demon, cannot be placed on the seventh zone if the latter is identified with the "white" Island, which is Sveta-dwipa, for reasons given in the foot-note. (Vide infra.)

Wilford accuses the modern Brahmins "of having jumbled them (islands and countries) all together" (A.R. III. 300); but he jumbled them still more. He believes that as the Brahmanda and Vayu Puranas divide the old continent into seven dwipas, said to be surrounded by a vast ocean, beyond which lie the regions and mountains of Atala (ibid), hence "most probably the Greeks divided the nation of Atlantis, which, as it could not be found after having once been discovered, they conceived to have been destroyed by some shock of nature."

Finding certain difficulties in believing that the Egyptian priests, Plato, and even Homer, had all built their notions of Atlantis on Atala -- a nether region located at the Southern pole -- we prefer holding to the statements given in the secret books. We believe in the seven "continents," four of which have already lived their day, the fifth still exists, and two are to appear in the future. We believe that each of these is not strictly a continent in the modern sense of the word, but that each name, from Jambu down to Pushkara,* refers to the geographical names given (i.) to the dry lands covering the face of the whole earth during the period of a Root-Race, in general; and (ii.) to what remained of these after a geological (race) Pralaya -- as "Jambu," for instance: and (iii.) to those localities which will enter, after the future cataclysms, into the formation of new universal "continents," peninsulas, or dwipas** -- each continent being, in one sense, a greater or smaller region of dry land surrounded with water. Thus, that whatever

[[Footnote(s)]] -----

* Jambu, Plaksha, Salmali, Kusa, Krauncha, Saka, and Pushkara.

** Such as Saka and Pushkara, for instance, which do not yet exist, but into which will enter such lands as some portions of America, of Africa, and Central Asia, with the Gobi region. Let us bear in mind that Upadwipas means "root" islands, or the dry land in general.

[[Vol. 2, Page]] 405 FUTURE CONTINENTS, SYMBOLIZED.

"jumble" the nomenclature of these may represent to the profane, there is none, in fact, to him who has the key.

Thus, we believe we know that, though two of the Puranic "islands" -- the sixth and seventh "continents" -- are yet to come, nevertheless there were, or there are, lands which will enter into the composition of the future dry lands, of new earths whose geographical faces will be entirely changed, as were those of the past. Therefore we find in the Puranas that Saka-dwipa is (or will be) a continent, and that Sankha-dwipa, as shown in the Vayu Purana, is only "a minor island," one of the nine divisions (to which Vayu adds six more) of Bharata Varsha. Because Sankha-dwipa was peopled by "Mlechchhas (unclean foreigners), who worshipped Hindu divinities," therefore they were connected with India.* This accounts for Sankhasura, a King of a portion of Sankha-dwipa, who was killed by Krishna; that King who resided in the palace "which was an ocean shell, and whose subjects lived in shells also," says Wilford.

"On the banks of the Nile** (?) there were frequent contests between the Devatas (divine beings, demi-gods) and the Daityas (giants); but the latter tribe having prevailed, their King, Sankhasura, who resided in the Ocean, made frequent incursions in the night" (As. Res., Vol. III. 225.)

It is not on the banks of the Nile, but on the coasts of Western Africa, south of where now lies Morocco, that these battles took place. There was a time when the whole of the Sahara desert was a sea, then a continent as fertile as the Delta, and then, only after another temporary submersion, it became a desert similar to that other wilderness, the desert of Shamo or Gobi. This is shown in Puranic tradition, for on the same page as above cited, it is said: "The people were between two fires; for, while Sankhasura was ravaging one side of the continent, Krauncha (or Cracacha), King of Kraunch, used to desolate the other; both armies . . . thus changed the most fertile regions into a savage desert."

That not only the last island of Atlantis, spoken of by Plato, but a large continent, first divided, and then broken later on into seven peninsulas and islands (called dwipas), preceded Europe, is sure. It covered the whole of the North and South Atlantic regions, as well as portions of the North and South Pacific, and had islands even in the Indian Ocean (relics of Lemuria). The claim is corroborated by Indian Puranas, Greek writers, and Asiatic, Persian, and Mohammedan traditions. Wilford, who confuses sorely the Hindu and the Mussulman legends, shows this, however, clearly. (See Vol. VIII., X. and XI. of

[[Footnote(s)]] -----

* They were called demons, Asuras, giants, and monsters, because of their wickedness; and thus their country was likened to Atala -- a hell, because of that.

** Not on the river Nile, surely, but near the Nila mountains of the Atlas range.

[[Vol. 2, Page]] 406 THE SECRET DOCTRINE.

Asiatic Researches.) And his facts and quotations from the Puranas give direct and conclusive evidence that the Aryan Hindus and other ancient nations were earlier navigators than the Phoenicians, who are now credited with having been the first seamen that appeared in the post-diluvian times. This is what is given in the Journal of the Asiatic Society, III., pp. 325, et seq.--

"In their distress the few nations who survived (in the war between Devatas and Daityas) raised their hands to Bhagavan, 'Let him who can deliver us . . . be our King'; using the word I'T (a magic term not understood by Wilford, evidently) which re-echoed through the whole country."

Then comes a violent storm, the waters of the Kali are strangely agitated, "when there appeared from the waves . . . a man, afterwards called I'T, at the head of a numerous army, saying abhayan, no fear" . . . and scattered the enemy. "The King I'T," explains Wilford, "is a subordinate incarnation of M'rira" (Mrida, a form of Rudra, probably?) who "re-established peace and prosperity throughout all Sankha-dwipa, through Barbaradesa, Hissast'han and Awasthan or Arabia . . ." etc., etc.

Surely, if the Hindu Puranas give a description of wars on continents and islands situated beyond Western Africa in the Atlantic Ocean; if their writers speak of Barbaras and other people such as Arabs -- they who were never known to navigate, or cross the Kala pani (the black waters of the Ocean) in the days of Phoenician navigation -- then their Puranas must be older than those Phoenicians (placed at from 2,000 to 3,000 years B.C.). At any rate those traditions must have been older;* as --

"In the above accounts," writes an adept, "the Hindus speak of this island as existing and in great power; it must, therefore, have been more than eleven thousand years ago."

But another calculation and proof may be adduced of the great antiquity of these Hindu Aryans who knew of (because they had once dwelt in it) and described the last surviving island of Atlantis -- or rather of that remnant of the Eastern portion of that continent which had

[[Footnote(s)]] -----

* Says Wilford of the division of Atlantis and Bharata or India, confusing the two accounts and Priyavrata with Medhatithi:-
- "The division was made by Priyavrata. . . . He had ten sons, and it was his intention to divide the whole world. In the same manner Neptune divided Atlantis between his ten sons. . . . One of them had . . . the extremity of the Atlantis" -- which "is probably the old continent. . . . This Atlantis was overwhelmed by a flood. . . . and it seems that by Atlantis we should understand the Antediluvian Earth over which ten princes were born to rule according to the mythology of the West (and of the East, also) but seven only of them sat upon the throne." (Vol. III. p. 286.) . . . Some also are of opinion that of the seven dwipas six were destroyed by a flood (Vol. VIII. p. 367). Wilford takes it to be "Gades which included Spain," but it was Plato's island -- rather.

[[Vol. 2, Page]] 407 THE PUZZLES OF ANTIQUITY.

perished soon after the upheaval of the two Americas* -- the two Varshas of Pushkara. This may be demonstrated, moreover, on an astronomical calculation by an adept who criticises Wilford. For recalling what the Orientalist had brought forward concerning the Mount Ashburj "at the foot of which the sun sets," where was the war between the Devatas and the Daityas,** he says:--

"We will consider, then, the latitude and longitude of the lost island, and of the remaining Mount Ashburj. It was on the seventh stage of the world, i.e., in the seventh climate (which is between the latitude of 24 degrees and latitude 28 degrees north) . . . This island, the daughter of the Ocean, is frequently described as lying in the West; and the sun is represented as setting at the foot of its mountain (Ashburj, Atlas, Teneriffe or Nila, no matter the name), and fighting the white Devil of the 'White Island.' "

Now, considering this statement from its astronomical aspect, and knowing that Krishna is the incarnated Sun (Vishnu), a solar God; and that he is said to have killed Dev-Sefid, the white giant -- a possible personification of the ancient inhabitants at the foot of the Atlas -- perchance Krishna may be only a representation of the vertical beams of the Sun? Those inhabitants (the Atlantes) are, we have seen, accused by Diodorus of daily cursing the Sun, and ever fighting his influence. This is an astronomical interpretation of course. But it will now be proved that Sankhasura, and Sancha dwipa, and all their history, is also geographically and ethnologically Plato's "Atlantis" in Hindu dress.

It was just remarked that since, in the Puranic accounts, the island is still existing, then those accounts must be older than the 11,000 years elapsed since Sancha dwipa, or the Poseidonis of Atlantis, disappeared. Is it not barely possible that Hindus should have known the island still earlier? Let us turn again to astronomical demonstrations, which make this quite plain if one assumes, according to the said adept, that "at the time when the summer tropical 'colure' passed through the Pleiades, when cor-Leonis would be upon the equator; and when Leo was vertical to Ceylon at sunset, then would Taurus be vertical to the island of Atlantis at noon."

This explains, perhaps, why the Singhalese, the heirs of the

[[Footnote(s)]] -----

* America, the "new" world -- is thus, though not much, older; still it is older than Europe, the "old world."

** If Div or Dev-Sefid's (the Taradaitya's) abode was on the seventh stage, it is because he came from Pushkara, the Patala (antipodes) of India, or from America. The latter touched the walls, so to say, of Atlantis, before the latter sank finally. The word Patala, meaning both the antipodal countries and infernal regions, thus became synonymous in ideas and attributes as well as in name.

[[Vol. 2, Page]] 408 THE SECRET DOCTRINE.

Rakshasas and Giants of Lanka, and the direct descendants of Singha, or Leo, became connected with Sancha dwipa or Poseidonis (Plato's Atlantis). Only, as shown by Mackey's "Sphinxiad," this must have occurred about 23,000 years ago, astronomically; at which time the obliquity of the ecliptic must have been rather more than 27 degrees, and consequently Taurus must have passed over "Atlantis" or "Sancha dwipa." And that it was so is clearly demonstrated.

"The sacred bull Nandi was brought from Bharata to Sancha to meet Rishabha (Taurus) every Kalpa. But when those of the White Island (who descended originally from Sveta dwipa),* who had mixed with the Daityas (giants) of the land of iniquity, had become black with Sin, then Nandi remained for ever in the "White Island" (or Sveta dwipa.) "Those of the Fourth World (race) lost AUM" -- say the Commentaries.

Asburj (or Azburj), whether the peak of Teneriffe or not, was a volcano, when the sinking of the "western Atala" (or hell) began, and those who were saved told the tale to their children. Plato's Atlantis perished between water below and fire above; the great mountain vomiting flames all the while. "The 'fire-vomiting Monster' survived alone out of the ruins of the unfortunate island."

Do the Greeks, accused of borrowing a Hindu fiction (Atala), and inventing from it another (Atlantis), stand also accused of getting their geographical notions and the number seven from them? (Vide in Part II. the several sections on the SEPTENATE in nature.)

"The famous Atlantis exists no longer, but we can hardly doubt that it did once," says Proclus, "for Marcellus, who wrote a history of Ethiopian affairs, says that such, and so great an island once existed, and this is evidenced by those who composed histories relative to the external sea. For they relate that in this time there were seven islands in the Atlantic sea sacred to Proserpine; and besides these, three of immense magnitude, sacred to Pluto . . . Jupiter . . . and Neptune. And, besides this, the inhabitants of the last island (Poseidonis) preserved the memory of the prodigious magnitude of the Atlantic island as related by their ancestors, and of its governing for many periods all the islands in the Atlantic sea. From this isle one may pass to other large

[[Footnote(s)]] -----

* Neither Atlantis, nor yet Sancha dwipa, was ever called "White Island." When tradition says that "the White Island became black on account of the sins of people" it only means the denizens of the "White Island," or Siddhapura, or Sveta dwipa, who descended to the Atlantis of the Third and Fourth races, to "inform the latter; and who, having incarnated, became black with sin" -- a figure of speech. All the Avatars of Vishnu are said to come originally from the White Island. According to Tibetan tradition the White Island is the only locality which escapes the general fate of other dwipas and can be destroyed by neither fire nor water, for -- it is the "eternal land."

[[Vol. 2, Page]] 409 WHAT MARCELLUS SAYS.

islands beyond, which are not far from the firm land, near which is the true sea."

"These seven dwipas (inaccurately rendered islands) constitute, according to Marcellus, the body of the famous Atlantis," writes Wilford himself. . . . This evidently shows that Atlantis is the old continent. . . . The Atlantis was destroyed after a violent storm (?): this is well known to the Puranics, some of whom assert that in consequence of this dreadful convulsion of nature, six of the dwipas disappeared" . . . (xi., 27).

Enough proofs have now been given to satisfy the greatest sceptic. Nevertheless, direct proofs based on exact science are also added. Volumes might be written, however, to no purpose for those who will neither see nor hear, except through the eyes and ears of their respective authorities.

Hence the teaching of the Roman Catholic scholiasts, namely, that Hermon, the mount in the land of Mizpeth -- meaning "anathema," "destruction" -- is the same as Mount Armon. As a proof of this, Josephus is often quoted, as affirming that still in his own day enormous bones of giants were daily discovered on it. But it was the land of Balaam the prophet, whom the "Lord loved well"; and so mixed up are facts and personages in the said scholiasts' brains, that, when the Zohar explains the "birds" which inspired Balaam to mean "Serpents," to wit, the wise men and adepts at whose school he had learnt the mysteries of prophecy -- the opportunity is again taken of showing Mount Hermon inhabited by the "winged dragons of Evil, whose chief is Samael" (the Jewish Satan).

"It is to those unclean spirits chained on Mount Hermon of the Desert, that the scapegoat of Israel, who assumed the name of one of them (Azaz(y)el), was sent" (Spencer).

We say it is not so. The Zohar has the following explanation on the practice of magic which is called in Hebrew Nehhaschim, or the "Serpents' Works." It says (Part III. col. 302):-- "It is called nehhaschim, because the magicians (practical Kabalists) work surrounded by the light of the primordial serpent, which they perceive in heaven as a luminous zone composed of myriads of small stars" . . . which means simply the astral light, so called by the Martinists, by Eliphas Levi, and now by all the modern Occultists. (Vide Sections about.)

THE "CURSE" FROM A PHILOSOPHICAL POINT OF VIEW.

The foregoing teachings of the SECRET DOCTRINE, supplemented by universal traditions, must now have demonstrated that the Brahmanas and Puranas, the Yathas and other Mazdean Scriptures,

[[Vol. 2, Page]] 410 THE SECRET DOCTRINE.

down to the Egyptian, Greek, and Roman, and finally to the Jewish Sacred records, all have the same origin. None are meaningless and baseless stories, invented to entrap the unwary profane: all are allegories intended to convey, under a more or less fantastic veil, the great truths gathered in the same field of pre-historic tradition. Space forbids us from entering, in these two volumes, into further and more minute details with respect to the four Races which preceded our own. But before offering to the student the history of the psychic and spiritual evolution of the direct antediluvian fathers of our Fifth (Aryan) humanity, and before demonstrating its bearing upon all the other side branches grown from the same trunk, we have to elucidate a few more facts. It has been shown, on the evidence of the whole ancient literary world, and the intuitional speculations of more than one philosopher and scientist of the later ages, that the tenets of our Esoteric Doctrine are corroborated by inferential as well as by direct proof in almost every case. That neither the "legendary" giants, nor the lost continents, nor yet the evolution of the preceding races, are quite baseless tales. In the Addenda which close this volume, science will find itself more than once unable to reply; they will, it is hoped, finally dispose of every sceptical remark with regard to the sacred number in nature, and our figures in general. (Vide §§ on the Septenaries.)

Meanwhile, one task is left incomplete: that of disposing of that most pernicious of all the theological dogmas -- the CURSE under which mankind is alleged to have suffered ever since the supposed disobedience of Adam and Eve in the bower of Eden.

Creative powers in man were the gift of divine wisdom, not the result of sin. This is clearly instanced in the paradoxical behaviour of Jehovah, who first curses Adam and Eve (or Humanity) for the supposed committed crime, and then blesses his "chosen people" by saying "Be fruitful and multiply, and replenish the earth" (Gen. ix. 1). The curse was not brought on mankind by the Fourth Race, for the comparatively sinless Third Race, the still more gigantic Antediluvians, had perished in the same way; hence the Deluge was no punishment, but simply a result of a periodical and geological law. Nor was the curse of KARMA called down upon them for seeking natural union, as all the mindless animal-world does in its proper seasons; but, for abusing the creative power, for desecrating the divine gift, and wasting the life-essence for no purpose except bestial personal gratification. When understood, the third chapter of Genesis will be found to refer to the Adam and Eve of the closing Third and the commencing Fourth Races. In the beginning, conception was as easy for woman as it was for all animal creation. Nature had never intended that woman should bring forth her young ones "in sorrow." Since that period, however, during the

[[Vol. 2, Page]] 411 THE ANCIENT AND THE MODERN MAN.

evolution of the Fourth Race, there came enmity between its seed, and the "Serpent's" seed, the seed or product of Karma and divine wisdom. For the seed of woman or lust, bruised the head of the seed of the fruit of wisdom and knowledge, by turning the holy mystery of procreation into animal gratification; hence the law of Karma "bruised the heel" of the Atlantean race, by gradually changing physiologically, morally, physically, and mentally, the whole nature of the Fourth Race of mankind,* until, from the healthy King of animal creation of the Third Race, man became in the Fifth, our

race, a helpless, scrofulous being, and has now become the wealthiest heir on the globe to constitutional and hereditary diseases, the most consciously and intelligently bestial of all animals!**

This is the real CURSE from the physiological standpoint, almost the only one touched upon in the Kabalistic esotericism. Viewed from this aspect, the curse is undeniable, for it is evident. The intellectual evolution, in its progress hand-in-hand with the physical, has certainly been a curse instead of a blessing -- a gift quickened by the "Lords of Wisdom," who have poured on the human manas the fresh dew of their own spirit and essence. The divine Titan has then suffered in vain; and one feels inclined to regret his benefaction to mankind, and sigh for those days so graphically depicted by AEschylus, in his "Prometheus Bound," when, at the close of the first Titanic age (the age that followed that of ethereal man, of the pious Kandu and Pramlocha), nascent, physical mankind, still mindless and (physiologically) senseless, is described as --

"Seeing, they saw in vain;
Hearing, they heard not; but like shapes in dreams,
Through the long time all things at random mixed."

Our Saviours, the Agnishwatta and other divine "Sons of the Flame of Wisdom" (personified by the Greeks in Prometheus***), may well, in

[[Footnote(s)]] -----

* How wise and grand, how far-seeing and morally beneficent are the laws of Manu on connubial life, when compared with the licence tacitly allowed to man in civilized countries. That those laws have been neglected for the last two millenniums does not prevent us from admiring their forethought. The Brahmin was a grihasta, a family man, till a certain period of his life, when, after begetting a son, he broke with married life and became a chaste Yogi. His very connubial life was regulated by his Brahmin astrologer in accordance with his nature. Therefore, in such countries as the Punjab, for instance, where the lethal influence of Mussulman, and later on of European, licentiousness, has hardly touched the orthodox Aryan castes, one still finds the finest men -- so far as stature and physical strength go -- on the whole globe; whereas the mighty men of old have found themselves replaced in the Deccan, and especially in Bengal, by men whose generation becomes with every century (and almost with every year) dwarfed and weakened.

** Diseases and over-population are facts that can never be denied.

*** In Mrs. Anna Swanwick's volumes, "The Dramas of AEschylus," it is said of "Prometheus Bound" (Vol. II., pp. 146, 147), that Prometheus truly appears in it "as [[Footnote continued on next page]]

[[Vol. 2, Page]] 412 THE SECRET DOCTRINE.

the injustice of the human heart, be left unrecognized and unthanked. They may, in our ignorance of the truth, be indirectly cursed for Pandora's gift: but to find themselves proclaimed and declared by the mouth of the clergy, the EVIL ONES, is too heavy a Karma for "Him" "who dared alone" -- when Zeus "ardently desired" to quench the entire human race -- to save "that mortal race" from perdition, or, as the suffering Titan is made to say:--

"From sinking blasted down to Hades' gloom.
For this by the dire tortures I am bent,
Grievous to suffer, piteous to behold,
I who did mortals pity!"

The chorus remarking very pertinently:--

"Vast boon was this thou gavest unto mortals"

Prometheus answers:--

"Yea, and besides 'twas I that gave them fire.
CHORUS: Have now these short-lived creatures flame-eyed fire?
PROM.: Ay, and by it full many arts will learn. . . ."

But, with the arts, the fire received has turned into the greatest curse: the animal element, and consciousness of its possession, has changed periodical instinct into chronic animalism and sensuality.* It is this which hangs over humanity like a heavy funereal pall. Thus arises the responsibility of free-will; the Titanic passions which represent humanity in its darkest aspect; "the restless insatiability of the lower passions and desires, when, with self-asserting insolence, they bid defiance to the restraints of law."**

Prometheus having endowed man, according to Plato's "Protagoras," with that "wisdom which ministers to physical well-being," but the lower aspect of manas of the animal (Kama) having remained unchanged,

[[Footnote(s)]] -----

[[Footnote continued from previous page]] the champion and benefactor of mankind, whose condition . . . is depicted as weak and miserable in the extreme. . . . Zeus, it is said, proposed to annihilate these puny ephemerals, and to plant upon the earth a new race in their stead." We see the Lords of Being doing likewise, and exterminating the first product of nature and the sea, in the Stanzas (V, et seq.). . . . Prometheus represents himself as having frustrated this design, and as being consequently subjected, for the sake of mortals, to the most agonising pain, inflicted by the remorseless cruelty of Zeus. We have, thus, the Titan, the symbol of finite reason and free will (of intellectual humanity, or the higher aspect of Manas), depicted as the sublime philanthropist, while Zeus, the supreme deity of Hellas, is portrayed as the cruel and obdurate despot, a character peculiarly revolting to Athenian sentiment." The reason for it is explained further on. The

"Supreme Deity" bears, in every ancient Pantheon -- including that of the Jews -- a dual character, composed of light and shadow.

* The animal world, having simple instinct to guide it, has its seasons of procreation, and the sexes become neutralized during the rest of the year. Therefore, the free animal knows sickness but once in its life -- before it dies.

** Introduction to "Prometheus Bound," p. 152.

[[Vol. 2, Page]] 413 THE TRAVESTY OF PROMETHEUS.

instead of "an untainted mind, heaven's first gift" (AEschylus), there was created the eternal vulture of the ever unsatisfied desire, of regret and despair coupled with "the dreamlike feebleness that fetters the blind race of mortals" (p. 556), unto the day when Prometheus is released by his heaven-appointed deliverer, Herakles.

Now Christians -- Roman Catholics especially -- have tried to prophetically connect this drama with the coming of Christ. No greater mistake could be made. The true theosophist, the pursuer of divine wisdom and worshipper of ABSOLUTE perfection -- the unknown deity which is neither Zeus nor Jehovah -- will demur to such an idea. Pointing to antiquity he will prove that there never was an original sin, but only an abuse of physical intelligence -- the psychic being guided by the animal, and both putting out the light of the spiritual. He will say, "All ye who can read between the lines, study ancient wisdom in the old dramas -- the Indian and the Greek; read carefully the one just mentioned, one enacted on the theatres of Athens 2,400 years ago, namely 'Prometheus Bound' " The myth belongs to neither Hesiod nor AEschylus; but, as Bunsen says, it "is older than the Hellenes themselves," for it belongs, in truth, to the dawn of human consciousness. The Crucified Titan is the personified symbol of the collective Logos, the "Host," and of the "Lords of Wisdom" or the HEAVENLY MAN, who incarnated in Humanity. Moreover, as his name Pro-me-theus, meaning "he who sees before him" or futurity, shows* -- in the arts he devised and taught to humanity, psychological insight was not the least. For as he complains to the daughters of Oceanos:--

"Of prophecies the various modes I fixed,
And among dreams did first discriminate
The truthful vision . . . and mortals guided
To a mysterious art.
All arts to mortals from Prometheus came. . ."

[[Footnote(s)]] -----

* From [[pro metis]] pro metis, "forethought." "Professor Kuhn," we are told in the above-named volumes of "The Dramas of AEschylus," "considers the name of the Titan to be derived from the Sanskrit word Pramantha, the instrument used for kindling fire. The root mand or manth, implies rotatory motion, and the word manthami (used to denote the process of fire kindling) acquired the secondary sense of snatching away; hence we find another word of the same stock, pramatha, signifying theft." This is very ingenious, but perhaps not altogether correct; besides, there is a very prosaic element in it. No doubt in physical nature, the higher forms may develop from the lower ones, but it is hardly so in the world of thought. And as we are told that the word manthami passed into the Greek language and became the word manthano, to learn; that is to say, to appropriate knowledge; whence prometheia, fore-knowledge, fore-thought; we may find, in searching, a more poetical origin for the "fire-bringer" than that displayed in its Sanskrit origin. The Svastica, the sacred sign and the instrument for kindling sacred fire, may explain it better. "Prometheus, the fire-bringer, is the Pramantha personified," goes on the author; "he finds his prototype in the Aryan [[Footnote continued on next page]]

[[Vol. 2, Page]] 414 THE SECRET DOCTRINE.

Leaving for a few pages the main subject, let us pause and see what may be the hidden meaning of this, the most ancient as it is the most suggestive of traditional allegories. As it relates directly to the early races, this will be no real digression.

The subject of AEschylus' drama (the trilogy is lost) is known to all cultured readers. The demi-god robs the gods (the Elohim) of their secret -- the mystery of the creative fire. For this sacrilegious attempt he is struck down by KRONOS* and delivered unto Zeus, the FATHER and creator of a mankind which he would wish to have blind intellectually, and animal-like; a personal deity, which will not see MAN "like one of us." Hence Prometheus, "the fire and light-giver," is chained on Mount Caucasus and condemned to suffer torture. But the triform Fates (Karma), whose decrees, as the Titan says, even Zeus:--

"E'en he the fore-ordained cannot escape. . ."

-- ordain that those sufferings will last only to that day when a son of Zeus --

"Ay, a son bearing stronger than his sire" (787)

.....

"One of thine (Io's) own descendants it must be. ."(791)

-- is born. This "Son" will deliver Prometheus (the suffering Humanity) from his own fatal gift. His name is, "He who has to come. . . ."

On the authority, then, of these few lines, which, like any other allegorical sentence, may be twisted into almost any meaning; namely, on the words pronounced by Prometheus and addressed to Io, the daughter of Inachos, persecuted by Zeus -- a whole prophecy is constructed by some Catholic writers. Says the crucified Titan:--

"And, portent past belief, the speaking oaks

By which full clearly, in no riddling phrase
Wast hailed as the illustrious spouse of Zeus
. (v. 853).
. . . . stroking thee
With touch alone of unalarming hand;
Then thou dark Epaphos shalt bear, whose name
Records his sacred gendering" (870)

This was construed by several fanatics -- des Mousseaux and de Mir-

[[Footnote(s)]] -----

[[Footnote continued from previous page]] Matarisvan, a divine . . . personage, closely associated with the fire god of the Veda, Agni. . . . "Mati, in Sanskrit, is "understanding," and a synonym of MAHAT and manas, and must be of some account in the origin of the name: Promati is the son of Fohat, and has his story also.

* Kronos is "time," and thus the allegory becomes very suggestive. (See closing pages of this Sub-section.)

[[Vol. 2, Page]] 415 CHRIST CONNECTED WITH EPAPHOS.

ville amongst others -- into a clear prophecy. Io -- "is the mother of God," we are told, and "dark Epaphos" -- Christ. But, the latter has not dethroned his father, except metaphorically, if one has to regard Jehovah as that "Father"; nor has the Christian Saviour hurled his Father down into Hades. Prometheus says, in verse 930, that Zeus will be humbled yet; as for himself:--

" such marriage he prepares
Which from his throne of power to nothingness
Shall hurl him down; so shall be all fulfilled
His father Kronos' curse
. . . . Then let him sit
Confiding in his lofty thunder-peals,
And wielding with both hands the fiery bolt;
For these shall not avail, but fail he shall,
A fall disgraceful, not to be endured" (v. 980).

"Dark Epaphos" was the Dionysos-Sabazius, the son of Zeus and of Demeter in the Sabasian Mysteries, during which the "father of the gods," assuming the shape of a Serpent, begot on Demeter, Dionysos, or the solar Bacchus. Io is the moon, and at the same time the EVE of a new race, and so is Demeter -- in the present case. The Promethean myth is a prophecy indeed; but it does not relate to any of the cyclic Saviours who have appeared periodically in various countries and among various nations, in their transitional conditions of evolution. It points to the last of the mysteries of cyclic transformations, in the series of which mankind, having passed from the ethereal to the solid physical state, from spiritual to physiological procreation, is now carried onward on the opposite arc of the cycle, toward that second phase of its primitive state, when woman knew no man, and human progeny was created, not begotten.

That state will return to it and to the world at large, when the latter shall discover and really appreciate the truths which underlie this vast problem of sex. It will be like "the light that never shone on sea or land," and has to come to men through the Theosophical Society. That light will lead on and up to the true spiritual intuition. Then (as expressed once in a letter to a theosophist), "the world will have a race of Buddhas and Christs, for the world will have discovered that individuals have it in their own powers to procreate Buddha-like children -- or demons." "When that knowledge comes, all dogmatic religions, and with these the demons, will die out."

If we reflect upon the serial development of the allegory, and the character of the heroes, the mystery may be unriddled. KRONOS is of course "time" in its cyclic course. He swallows his children -- the

[[Footnote(s)]] -----

* See, for explanation of this curse, the last page of the present sub-section.

[[Vol. 2, Page]] 416 THE SECRET DOCTRINE.

personal gods of exoteric dogmas included. He has swallowed instead of Zeus, his stone idol; but the symbol has grown, and has only developed in human fancy as mankind was cycling down toward only its physical and intellectual -- not spiritual -- perfection. When it is as far advanced in its spiritual evolution Kronos will be no longer deceived. Instead of the stone image he will have swallowed the anthropomorphic fiction itself. Because, the serpent of wisdom, represented in the Sabasian mysteries by the anthropomorphised Logos, the unity of spiritual and physical Powers, will have begotten in Time (Kronos) a progeny -- Dionysos-Bacchus or the "dark Epaphos," the "mighty one" -- the race that will overthrow him. Where will he be born? Prometheus traces him to his origin and birth-place in his prophecy to Io. Io is the moon-goddess of generation -- for she is Isis and she is Eve, the great mother.* He traces the path of the (racial) wanderings as plainly as words can express it. She has to quit Europe and go to Asia's continent, reaching there the highest of the mountains of Caucasus (737), the Titan telling her:--

"When thou hast crossed the flood, limit betwixt
Two continents, fronting the burning East." (810)

that she must travel eastward, after passing the "Kimmerian Bosphorus," and cross what is evidently the Volga and now Astrakhan on the Caspian Sea. After this she will encounter "fierce northern blasts" and cross thither to the land of the "Arimaspians" (east of Herodotus' Scythia) to --

"Pluto's gold-abounding flood. . ."(825)

Which is rightly conjectured by Professor Newman to have meant the

[[Footnote(s)]] -----

* It is complained by the author of the version on, and translator of, "Prometheus Bound" that in this tracing of Io's wanderings, "no consistency with our known geography is attainable" (p. 191, Vol. II). There may be good reason for it. First of all it is the journey and wandering from place to place of the race from which the "tenth," or Kalki Avatar, so called, is to issue. This he calls the "Kingly race born in Argos" (888). But Argos has no reference here to Argos in Greece. It comes from Arg or arca -- the female generative power symbolised in the moon -- the navi-formed Argha of the mysteries, meaning the Queen of Heaven. Eustathius shows that, in the dialect of the Arg-ians, Io signified the moon; while esotericism explains it as the divine Androgyne, or the mystic 10; in Hebrew 10 is the perfect number, or Jehovah. Arghya in Sanskrit is the libation cup, the navi-form or boat-shaped vessel in which flowers and fruit are offered to the deities. Arghyanath is a title of the Maha-Chohan, meaning "the Lord of Libations;" and Arghya Varsha -- "the land of libations" -- is the mystery name of that region which extends from Kailas mountain nearly to the Schamo Desert -- from within which the Kalki Avatar is expected. The Airyana-Varsedya of the Zoroastrians, as a locality, is identical with it. It is now said to have been situated between the sea of Aral, Baltistan, and little Tibet; but in olden times its area was far larger, as it was the birth-place of physical humanity, of which Io is the mother and symbol.

[[Vol. 2, Page]] 417 THE MISTAKE OF ARRIAN EXPLAINED.

Ural, the Arimaspi of Herodotus being "the recognised inhabitants of this golden region."

And here comes, between verses 825 and 835, a puzzle to all the European interpreters. Says the Titan:--

"To these (Arimaspi and Grypes) approach not; a far border land
Thou next wilt reach, where dwells a swarthy race
Near the Sun's founts, where is the Aethiopian "river";
Along its banks proceed till thou attain
The mighty rapids, where from Byblis heights
Pure draughts of sacred water Neilos sends . . . "

There Io was ordained to found a colony for herself and sons. Now we must see how the passage is interpreted. As Io is told that she has to travel eastward till she comes to the river Ethiops, which she is to follow till it falls into the Nile -- hence the perplexity. "According to the geographical theories of the earliest Greeks" we are informed by the author of the version on "Prometheus Bound" --

"This condition was fulfilled by the river Indus. Arrian (vi. i.) mentions that Alexander the Great, when preparing to sail down the Indus (having seen crocodiles in the river Indus, and in no other river except the Nile . . .), seemed to himself to have discovered the sources of the Nile, as though the Nile, rising from some place in India, and flowing through much desert land, and thereby losing its name Indus, next . . . flowed through inhabited land, being now called the Nile by the Ethiopians of those parts and afterwards by the Egyptians. Virgil in the 4th Georgic echoes the absolute error" (p. 197, Vol. II.).

Both Alexander and Virgil may have erred considerably in their geographical notions; but the prophecy of Prometheus has not so sinned, in the least -- not, at any rate, in its esoteric spirit. When a certain race is symbolised, and events pertaining to its history are rendered allegorically, no topographical accuracy ought to be expected in the itinerary traced for its personification. Yet it so happens, that the river "Ethiops" is certainly the Indus, and it is also the Nil or Nila. It is the river born on the Kailas (heaven) mountain, the mansion of the gods -- 22,000 feet above the level of the sea. It was the Ethiops river -- and was so called by the Greeks, long before the days of Alexander, because its banks, from Attock down to Sind, were peopled by tribes generally referred to as the Eastern Ethiopians. India and Egypt were two kindred nations, and the Eastern Ethiopians -- the mighty builders -- have come from India, as is pretty well proved, it is hoped, in "ISIS UNVEILED." (Vol. I. p. 569-70).

Then why could not Alexander, and even the learned Virgil have used the word Nile or Neilos when speaking of the Indus, since it is one of its names? To this day that river is called, in the regions around Kala-Bagh, nil (blue), and Nilah, "the blue river." The water here is of such dark blue colour that the name given to it from time immemorial led to

[[Vol. 2, Page]] 418 THE SECRET DOCTRINE.

a small town on its banks being called by the same name. It exists to this day. Evidently Arrian -- who wrote far later than the day of Alexander, and who was ignorant of the old name of the Indus -- has unconsciously slandered the Greek conqueror. Nor are our modern historians much wiser, in judging as they do. For they often make the most sweeping declarations on mere appearances, as much as their ancient colleagues ever did in days of old, when no Encyclopaedias were yet ready for them.

The race of IO, "the cow-horned maid" is then simply the first pioneer race of the Aethiopians brought by her from the Indus to the Nile (which received its name in memory of the mother river of the colonists from India*). For does not Prometheus say to Io** that the sacred Neilos (the god, not the river) --

. . . "He to the land, three-cornered, thee shall guide," -- namely, to the Delta, where her sons are foreordained to found --
. . . . "that far-off colony . . ." (v. 830 et seq.).

It is there that a new race (the Egyptians) will begin, and a "female race" (873) which, "fifth in descent" from dark Epaphos --

"Fifty in number shall return to Argos."

Then one of the fifty virgins will fail through love and shall -- . . .

A kingly race in Argos bear

.
But from this seed shall dauntless heroes spring,
Bow-famous, who shall free me from these ills."

When this hero shall arise, the Titan does not reveal; for as he remarks:--

"This, to set forth at large needs lengthy speech."

[[Footnote(s)]] -----

* Alexander, who was better acquainted with Attock than with India (where he never went) could not have failed to hear the Indus near its very sources called Nil and Nilah. Even if a mistake, it is thus easily accounted for.

** That Io is identical allegorically with Isis and the moon is shown by her being "cow-horned." The allegory undeniably reached Greece from India, where Vach -- "the melodious cow" (Rig-Veda) "from whom mankind was produced" (Bhagavata Purana) is shown in the Aitareya Brahmana as pursued by her father Brahma, who was moved by an illicit passion, and changed her into a deer. Hence Io, refusing to yield to Jupiter's passion, becomes "horned." The cow was in every country the symbol of the passive generative power of nature, Isis, Vach, Venus -- the mother of the prolific god of love, Cupid, but, at the same time, that of the Logos whose symbol became with the Egyptians and the Indians -- the bull -- as testified to by Apis and the Hindu bulls in the most ancient temples. In esoteric philosophy the cow is the symbol of creative nature, and the Bull (her calf) the spirit which vivifies her, or "the Holy Spirit," as Mr. Kenealy shows. Hence the symbol of the horns. These were sacred also with the Jews, who placed near the altar horns of Shittim wood, by seizing which a criminal ensured his safety.

[[Vol. 2, Page]] 419 WAS AESCHYLUS INITIATED?

But "Argos" is Arghya Varsha, the land of libation of the old Hierophants, whence the deliverer of Humanity will appear, a name which became ages later that of its neighbour, India -- the Arya-varta of old.

That the subject formed part of the Sabasian mysteries is made known by several ancient writers: by Cicero (in Tuscul. Quaest. I, ii. No. 20) and by Clemens Alexandrinus (Strom. I, ii., oper. tom. 1, p. 467 -- Ed. Potter's). The latter writers are the only ones who attribute the fact that AEschylus was charged by the Athenians with sacrilege and condemned to be stoned to death, to its true cause. They say that having been himself uninitiated, AEschylus had profaned the Mysteries by exposing them in his trilogies on a public stage.* But he would have incurred the same condemnation had he been initiated -- which must have been the case, as otherwise he must, like Socrates, have had a daimon to reveal to him the secret and sacred allegorical drama of initiation. At all events, it is not the "father of the Greek tragedy" who invented the prophecy of Prometheus; for he only repeated in dramatic form that which was revealed by the priests during the MYSTERIA of the Sabasia.** The latter, however, is one of the oldest sacred festivals, whose origin is to this day unknown to history. Mythologists connect it through Mithras (the Sun, called Sabasius on some old monuments) with Jupiter and Bacchus. But it was never the property of the Greeks, but dates from days immemorial.

The translators of the drama wonder how AEschylus could become guilty of such "discrepancy between the character of Zeus as portrayed in the 'Prometheus Bound' and that depicted in the remaining dramas." (Mrs. A. Swanwick.) This is just because AEschylus, like Shakespeare, was and will ever remain the intellectual "Sphinx" of the ages. Between Zeus, the abstract deity of Grecian thought, and the Olympic Zeus, there was an abyss. The latter represented during the mysteries no higher a principle than the lower aspect of human physical intelligence -- Manas wedded to Kama; Prometheus -- its divine aspect merging into and aspiring to Buddhi -- the divine Soul. Zeus was the human soul and nothing more, whenever shown yielding to his lower passions, -- the jealous God, revengeful and cruel in its egotism or I-AM-NESS. Hence, Zeus is represented as a serpent -- the intellectual tempter of man -- which, nevertheless, begets in the course of

[[Footnote(s)]] -----

* Herodotus and Pausanias supposed that the cause of the condemnation was that AEschylus, adopting the theogony of the Egyptians, made Diana, the daughter of Ceres, and not of Latona. (See Aelian Var. Hist. I, v. c. xviii., tom. 1, p. 433 Edition Gronov.) But AEschylus was initiated.

** Sabasia was a periodical festival with mysteries enacted in honour of some gods, a variant on the Mithraic Mysteries. The whole evolution of the races was performed in them.

[[Vol. 2, Page]] 420 THE SECRET DOCTRINE.

cyclic evolution the "Man-Saviour," the solar Bacchus or "Dionysos," more than a man.

Dionysos is one with Osiris, with Krishna, and with Buddha (the heavenly wise), and with the coming (tenth) Avatar, the glorified Spiritual Christos, who will deliver the suffering Christos (mankind, or Prometheus, on its trial). This, say

Brahminical and Buddhistic legends, echoed by the Zoroastrian and now by the Christian teachings (the latter only occasionally), will happen at the end of Kaliyuga. It is only after the appearance of Kalki-Avatar, or Sosiosh, that man will be born from woman without sin. Then will Brahma, the Hindu deity; Ahura-Mazda (Ormazd), the Zoroastrian; Zeus, the Greco-Olympian Don Juan; Jehovah, the jealous, repenting, cruel, tribal God of the Israelites, and all their likes in the universal Pantheon of human fancy -- vanish and disappear in thin air. And along with these will vanish their shadows, the dark aspects of all those deities, ever represented as their "twin brothers" and creatures, in exoteric legend, their own reflection on earth -- in esoteric philosophy. The Ahrimans and Typhons, the Samaels and Satans, must be all dethroned on that day, when every dark evil passion will be subdued.

There is one eternal Law in nature, one that always tends to adjust contraries and to produce final harmony. It is owing to this law of spiritual development superseding the physical and purely intellectual, that mankind will become freed from its false gods, and find itself finally -- SELF-REDEEMED.

In its final revelation, the old myth of Prometheus -- his proto- and anti-types being found in every ancient theogony -- stands in each of them at the very origin of physical evil, because at the threshold of human physical life. KRONOS is "Time," whose first law is that the order of the successive and harmonious phases in the process of evolution during cyclic development should be strictly preserved -- under the severe penalty of abnormal growth with all its ensuing results. It was not in the programme of natural development that man -- higher animal though he may be -- should become at once -- intellectually, spiritually, and psychically -- the demi-god he is on earth, while his physical frame remains weaker and more helpless and ephemeral than that of almost any huge mammal. The contrast is too grotesque and violent; the tabernacle much too unworthy of its indwelling god. The gift of Prometheus thus became a CURSE -- though foreknown and foreseen by the HOST personified in that personage, as his name well shows.* It is in this that rests, at one and the same time,

[[Footnote(s)]] -----

* Vide supra, a foot-note concerning the etymology of [[prometis]] prometis or forethought. Prometheus confesses it in the drama when saying:-- [[Footnote continued on next page]]

[[Vol. 2, Page]] 421 ONE OF THE FUNCTIONS OF ZEUS.

its sin and its redemption. For the Host that incarnated in a portion of humanity, though led to it by Karma or Nemesis, preferred free-will to passive slavery, intellectual self-conscious pain and even torture "while myriad time shall flow" -- to inane, imbecile, instinctual beatitude. Knowing such an incarnation was premature and not in the programme of nature, the heavenly host, "Prometheus," still sacrificed itself to benefit thereby, at least, one portion of mankind.* But while saving man from mental darkness, they inflicted upon him the tortures of the self-consciousness of his responsibility -- the result of his free will -- besides every ill to which mortal man and flesh are heir to. This torture Prometheus accepted for himself, since the Host became henceforward blended with the tabernacle prepared for them, which was still unachieved at that period of formation.

Spiritual evolution being incapable of keeping pace with the physical, once its homogeneity was broken by the admixture, the gift thus became the chief cause, if not the sole origin of Evil.** The allegory which shows KRONOS cursing Zeus for dethroning him (in the primitive "golden" age of Saturn, when all men were demi-gods), and for creating a physical race of men weak and helpless in comparison; and then as delivering to his (Zeus') revenge the culprit, who despoiled the gods of their prerogative of creation and who thereby raised man to their level, intellectually and spiritually -- is highly philosophical. In the case of Prometheus, Zeus represents the Host of the primeval progenitors, of the PITAR, the "Fathers" who created man senseless

[[Footnote(s)]] -----

[[Footnote continued from previous page]]

"Oh! holy Ether, swiftly-winged gales

Behold what I, a god, from gods endure

.

And yet what say I? Clearly I foreknew

All that must happen

. . . . The Destined it behoves,

As best I may, to bear, for well I wot

How incontestable the strength of Fate (105)

"Fate" stands here for KARMA, or Nemesis.

* Mankind is obviously divided into god-informed men and lower human creatures. The intellectual difference between the Aryan and other civilized nations and such savages as the South Sea Islanders, is inexplicable on any other grounds. No amount of culture, nor generations of training amid civilization, could raise such human specimens as the Bushmen, the Veddhas of Ceylon, and some African tribes, to the same intellectual level as the Aryans, the Semites, and the Turanians so called. The "sacred spark" is missing in them and it is they who are the only inferior races on the globe, now happily -- owing to the wise adjustment of nature which ever works in that direction -- fast dying out. Verily mankind is "of one blood," but not of the same essence. We are the hot-house, artificially quickened plants in nature, having in us a spark, which in them is latent.

** The philosophical view of Indian metaphysics places the Root of Evil in the differentiation of the Homogeneous into the Heterogeneous, of the unit into plurality.

[[Vol. 2, Page]] 422 THE SECRET DOCTRINE.

and without any mind; while the divine Titan stands for the Spiritual creators, the devas who "fell" into generation. The former are spiritually lower, but physically stronger, than the "Prometheans": therefore, the latter are shown conquered. "The lower Host, whose work the Titan spoiled and thus defeated the plans of Zeus," was on this earth in its own sphere and plane of action; whereas, the superior Host was an exile from Heaven, who had got entangled in the meshes of matter. They (the inferior "Host") were masters of all the Cosmic and lower titanic forces; the higher Titan possessed only the intellectual and spiritual fire. This drama of the struggle of Prometheus with the Olympic tyrant and despot, sensual Zeus, one sees enacted daily within our actual mankind: the lower passions chain the higher aspirations to the rock of matter, to generate in many a case the vulture of sorrow, pain, and repentance. In every such case one sees once more -

"A god . . . in fetters, anguish fraught;
The foe of Zeus, in hatred held by all. . . ."

A god, bereft even of that supreme consolation of Prometheus, who suffered in self-sacrifice --

"For that to men he bare too fond a mind. . . ."

as the divine Titan is moved by altruism, but the mortal man by Selfishness and Egoism in every instance.

The modern Prometheus has now become Epi-metheus, "he who sees only after the event"; because the universal philanthropy of the former has long ago degenerated into selfishness and self-adoration. Man will re-become the free Titan of old, but not before cyclic evolution has re-established the broken harmony between the two natures -- the terrestrial and the divine; after which he becomes impermeable to the lower titanic forces, invulnerable in his personality, and immortal in his individuality, which cannot happen before every animal element is eliminated from his nature. When man understands that "Deus non fecit mortem" (Sap. I., 13), but that man has created it himself, he will re-become the Prometheus before his Fall.

For the full symbolism of Prometheus and the origin of this mythos in Greece, the reader is referred to Part II. of this Volume, chapter "A Second Key to Prometheus," etc. In the said Part -- a kind of supplement to the present portion -- every additional information is given upon those tenets that will be the most controverted and questioned. This work is so heterodox, when confronted with the acknowledged standards of theology and modern science, that no proof which tends to show that these standards often usurp an illegal authority should be neglected.

[[Vol. 2, Page]] 423 THE "BUDDHAS OF CONFESSION."

ADDITIONAL FRAGMENTS FROM A COMMENTARY ON THE VERSES OF STANZA XII.

THE MS. from which these additional explanations are taken belongs to the group called "Tongshaktchi Sangye Songa," or the Records of the "Thirty-five Buddhas of Confession," as they are exoterically called. These personages, however, though called in the Northern Buddhist religion "Buddhas," may just as well be called Rishis, or Avatars, etc., as they are "Buddhas who have preceded Sakyamuni" only for the Northern followers of the ethics preached by Gautama. These great Mahatmas, or Buddhas, are a universal and common property: they are historical sages -- at any rate, for all the Occultists who believe in such a hierarchy of Sages, the existence of which has been proved to them by the learned ones of the Fraternity. They are chosen from among some ninety-seven Buddhas in one group, and fifty-three in another,* mostly imaginary personages, who are really the personifications of the powers of the first-named.** These "baskets" of the oldest writings on "palm leaves" are kept very secret. Each MS. has appended to it a short synopsis of the history of that sub-race to which the particular "Buddha-Lha" belonged. The one special MS. from which the fragments which follow are extracted, and then rendered into a more comprehensible language, is said to have been copied from stone tablets which belonged to a Buddha of the earliest day of the Fifth Race, who had witnessed the Deluge and the submersion of the chief continents of the Atlantean race. The day when much, if not all, of that which is given here from the archaic records, will be found correct, is not far distant. Then the modern symbologists will acquire the certitude that even Odin, or the god Woden, the highest god in the German and Scandinavian mythology, is one of these thirty-five Buddhas; one of the earliest, indeed, for the continent to which he and his race belonged, is also one of the earliest. So early, in truth, that in the days when tropical nature was to be found, where now lie eternal unthawing snows, one could cross almost by dry land from Norway via Iceland and Greenland, to the lands that at present surround Hudson's

[[Footnote(s)]] -----

* Gautama Buddha, named Shakya Thub-pa, is the twenty-seventh of the last group, as most of these Buddhas belong to the divine dynasties which instructed mankind.

** Of these "Buddhas," or the "Enlightened," the far distant predecessors of Gautama the Buddha, and who represent, we are taught, once living men, great adepts and Saints, in whom the "Sons of Wisdom" had incarnated, and who were, therefore, so to speak, minor Avatars of the Celestial Beings -- eleven only belong to the Atlantean race, and 24 to the Fifth race, from its beginnings. They are identical with the Tirtankaras of the Jainas.

[[Vol. 2, Page]] 424 THE SECRET DOCTRINE.

Bay.* Just, as in the palmy days of the Atlantean giants, the sons of the "giants from the East," a pilgrim could perform a journey from what in our days is termed the Sahara desert, to the lands which now rest in dreamless sleep at the bottom of the waters of the Gulf of Mexico and the Caribbean Sea. Events which were never written outside the human memory, but which were religiously transmitted from one generation to another, and from race to race, may have been preserved by constant transmission "within the book volume of the brain," and through countless aeons, with more truth and accuracy than inside any written document or record. "That which is part of our souls is eternal," says Thackeray; and what can be nearer to our souls than that which happens at the dawns of our lives? Those lives are countless, but the soul or spirit that animates us throughout these myriads of existences is the same; and though "the book and volume" of

the physical brain may forget events within the scope of one terrestrial life, the bulk of collective recollections can never desert the divine soul within us. Its whispers may be too soft, the sound of its words too far off the plane perceived by our physical senses; yet the shadow of events that were, just as much as the shadow of the events that are to come, is within its perceptive powers, and is ever present before its mind's eye.

It is this soul-voice, perhaps, which tells those who believe in tradition more than in written History, that what is said below is all true, and relates to pre-historic facts.

This is what is written in one passage:--

"THE KINGS OF LIGHT HAVE DEPARTED IN WRATH. THE SINS OF MEN HAVE BECOME SO BLACK THAT EARTH QUIVERS IN HER GREAT AGONY. . . . THE AZURE SEATS REMAIN EMPTY. WHO OF THE BROWN, WHO OF THE RED, OR YET AMONG THE BLACK (races), CAN SIT IN THE SEATS OF THE BLESSED, THE SEATS OF KNOWLEDGE AND MERCY! WHO CAN ASSUME THE FLOWER OF POWER, THE PLANT OF THE GOLDEN STEM AND THE AZURE BLOSSOM?"

[[Footnote(s)]] -----

* This may account for the similarity of the artificial mounds in the U. S. of America, and the tumuli in Norway. It is this identity that led some American archaeologists to suggest that Norwegian mariners had discovered America some one thousand years ago. (Vide Holmboe's *Traces de Bouddhisme en Norvege*, p. 23). There is no doubt that America is that "far distant land into which pious men and heavy storms had transferred the sacred doctrine," as a Chinese writer suggested by his description to Neumann. But neither Professor Holmboe, of Stockholm, nor the American archaeologists, have guessed the right age of the mounds, or the tumuli. The fact that Norwegians may have re-discovered the land that their long-forgotten forefathers believed to have perished in the general submersion, does not conflict with that other fact that the Secret Doctrine of the land which was the cradle of physical man, and of the Fifth Race, had found its way into the so-called New World ages and ages before the "Sacred Doctrine" of Buddhism.

[[Vol. 2, Page]] 425 THE OLDEST RECORDS ABOUT ATLANTIS.

The "Kings of Light" is the name given in all old records to the Sovereigns of the divine Dynasties. The "azure seats" are translated "celestial thrones" in certain documents. The "flower of power" is now the Lotus; what it may have been at that period, who can tell.

The writer proceeds, like the later Jeremiah, to bewail the fate of his people. They had become bereft of their "azure" (celestial) kings, and "they of the Deva hue," the moon-like complexion, and "they of the refulgent (golden) face" have gone "to the land of bliss, the land of metal and fire"; or -- agreeably with the rules of symbolism -- to the lands lying North and East, from whence "the great waters have been swept away, sucked in by the earth and dissipated in the air." The wise races had perceived "the black storm-dragons, called down by the dragons of wisdom" -- and "had fled, led on by the shining Protectors of the most Excellent Land" -- the great ancient adepts, presumably; those the Hindus refer to as their Manus and Rishis. One of them was Vaivasvata Manu.

They "of the yellow hue" are the forefathers of those whom Ethnology now classes as the Turanians, the Mongols, Chinese and other ancient nations; and the land they fled to was no other than Central Asia. There entire new races were born; there they lived and died until the separation of the nations. But this "separation" did not take place either in the localities assigned for it by modern science, nor in the way the Aryans are shown to have divided and separated by Mr. Max Muller and other Aryanists. Nearly two-thirds of one million years have elapsed since that period. The yellow-faced giants of the post-Atlantean day, had ample time, throughout this forced confinement to one part of the world, and with the same racial blood and without any fresh infusion or admixture in it, to branch off during a period of nearly 700,000 years into the most heterogeneous and diversified types. The same is shown in Africa; nowhere does a more extraordinary variability of types exist, from black to almost white, from gigantic men to dwarfish races; and this only because of their forced isolation. The Africans have never left their continent for several hundred thousands of years. If to-morrow the continent of Europe were to disappear and other lands to re-emerge instead; and if the African tribes were to separate and scatter on the face of the earth, it is they who, in about a hundred thousand years hence, would form the bulk of the civilized nations. And it is the descendants of those of our highly cultured nations, who might have survived on some one island, without any means of crossing the new seas, that would fall back into a state of relative savagery. Thus the reason given for dividing humanity into superior and inferior races falls to the ground and becomes a fallacy.

[[Vol. 2, Page]] 426 THE SECRET DOCTRINE.

Such are the statements made and facts given in the archaic records. Collating and comparing them with some modern theories of Evolution, minus natural selection (Vide "Physiological Selection" by G. J. Romanes, F.R.S.), these statements appear quite reasonable and logical.* Thus, while the Aryans are the descendants of the yellow Adams, the gigantic and highly civilized tlanto-Aryan race, the Semites -- and the Jews along with them -- are those of the red Adam; and both de Quatrefages and the writers of the Mosaic Genesis are right. For, could chapter v. of the First Book of Moses be compared with the genealogies found in our Archaic Bible, the period from Adam unto Noah would be found noticed therein, of course under different names, the respective years of the Patriarchs being turned into periods, the whole being shown symbolical and allegorical. In the MS. under consideration many and frequent are the references to the great knowledge and civilization of the Atlantean nations, showing the polity of several of them and the nature of their arts and sciences. If the Third Root-Race, the Lemuro-Atlanteans, are already spoken of as having been drowned "with their high civilizations and gods" ("*Esoteric Buddhism*," p. 65), how much more may the same be said of the Atlanteans!

It is from the Fourth Race that the early Aryans got their knowledge of "the bundle of wonderful things," the Sabha and Mayasabha, mentioned in the Mahabharata, the gift of Mayasur to the Pandavas. It is from them that they learnt aeronautics, Viwan Vidya (the "knowledge of flying in air-vehicles"), and, therefore, their great arts of meteorography and

meteorology. It is from them, again, that the Aryans inherited their most valuable science of the hidden virtues of precious and other stones, of chemistry, or rather alchemy, of mineralogy, geology, physics and astronomy.

Several times the writer has put to herself the question: "Is the story of Exodus -- in its details at least -- as narrated in the Old Testament, original? Or is it, like the story of Moses himself and many others, simply another version of the legends told of the Atlanteans?" For who, upon hearing the story told of the latter, will fail to perceive the great similarity of the fundamental features? The anger of "God" at the obduracy of Pharaoh, his command to the "chosen" ones, to spoil the Egyptians, before departing, of their "jewels of silver and jewels of gold" (Exod. xi.); and finally the Egyptians and their Pharaoh drowned in the Red Sea (xiv.). For here is a fragment of the earlier story from the Commentary:--

[[Footnote(s)]] -----

* Vide the first pages of Part III., SCIENCE AND THE SECRET DOCTRINE CONTRASTED.

[[Vol. 2, Page]] 427 THE DOOM OF ATLANTIS.

. . . "And the 'great King of the dazzling Face,' the chief of all the Yellow-faced, was sad, seeing the sins of the Black-faced.

'He sent his air-vehicles (Viwan) to all his brother-chiefs (chiefs of other nations and tribes) with pious men within, saying: 'Prepare. Arise ye men of the good law, and cross the land while (yet) dry.'

'The Lords of the storm are approaching. Their chariots are nearing the land. One night and two days only shall the Lords of the Dark Face (the Sorcerers) live on this patient land. She is doomed, and they have to descend with her. The nether Lords of the Fires (the Gnomes and fire Elementals) are preparing their magic Agneyastra (fire-weapons worked by magic). But the Lords of the Dark Eye ("Evil Eye") are stronger than they (the Elementals) and they are the slaves of the mighty ones. They are versed in Ashtar (Vidya, the highest magical knowledge). * Come and use yours (i.e., your magic powers, in order to counteract those of the Sorcerers). Let every lord of the Dazzling Face (an adept of the White Magic) cause the Viwan of every lord of the Dark Face to come into his hands (or possession), lest any (of the Sorcerers) should by its means escape from the waters, avoid the rod of the Four, (Karmic deities) and save his wicked' (followers, or people).

'May every yellow face send sleep from himself (mesmerize?) to every black face. May even they (the Sorcerers) avoid pain and suffering. May every man true to the Solar Gods bind (paralyze) every man under the lunar gods, lest he should suffer or escape his destiny.

'And may every yellow face offer of his life-water (blood) to the speaking animal of a black face, lest he awaken his master.**

'The hour has struck, the black night is ready, etc., etc.

.....

'Let their destiny be accomplished. We are the servants of the great Four.*** May the Kings of light return.' "

[[Footnote(s)]] -----

* Wrote the late Brahmachari Bawa, a Yogi of great renown and holiness: "Extensive works on Ashtar Vidya and such other sciences were at different times compiled in the languages of the times. But the Sanskrit originals were lost at the time of the partial deluge of our country." . . . (See Theosophist of June, 1880, "Some Things the Aryans Knew.") For Agneyastra, see Wilson's Specimens of the Hindu Theatre, I., p. 297.

** Some wonderful, artificially-made beast, similar in some way to Frankenstein's creation, which spoke and warned his master of every approaching danger. The master was a "black magician," the mechanical animal was informed by a djin, an Elemental, according to the accounts. The blood of a pure man alone could destroy him. Vide Part II., xxvii., "Seven in Astronomy, Science, and Magic."

*** The four Karmic gods, called the Four Maharajahs in the Stanzas.

[[Vol. 2, Page]] 428 THE SECRET DOCTRINE.

"The great King fell upon his dazzling Face and wept. . . .

"When the Kings assembled the waters had already moved. . . .

"(But) the nations had now crossed the dry lands. They were beyond the water mark. Their Kings reached them in their Viwans, and led them on to the lands of Fire and Metal (East and North)."

.....

Still, in another passage, it is said:--

" . . . Stars (meteors) showered on the lands of the black Faces; but they slept.

"The speaking beasts (the magic watchers) kept quiet.

"The nether lords waited for orders, but they came not, for their masters slept.

"The waters arose, and covered the valleys from one end of the Earth to the other. High lands remained, the bottom of the Earth (the lands of the antipodes) remained dry. There dwelt those who escaped; the men of the yellow-faces and of the straight eye (the frank and sincere people).

"When the Lords of the Dark Faces awoke and bethought themselves of their Viwans in order to escape from the rising waters, they found them gone."

Then a passage shows some of the more powerful magicians of the "Dark Face" -- who awoke earlier than the others -- pursuing those who had "spoilt them" and who were in the rear-guard, for -- "the nations that were led away, were as thick as the stars of the milky way," says a more modern Commentary, written in Sanskrit only.

"Like as a dragon-snake uncoils slowly its body, so the Sons of men, led on by the Sons of Wisdom, opened their folds, and spreading out, expanded like a running stream of sweet waters. . . . many of the faint-hearted among them perished on their way. But most were saved."

Yet the pursuers, "whose heads and chests soared high above the water," chased them "for three lunar terms" until finally reached by the rising waves, they perished to the last man, the soil sinking under their feet and the earth engulfing those who had desecrated her.

This sounds a good deal like the original material upon which the similar story in Exodus was built many hundred thousands of years later. The biography of Moses, the story of his birth, childhood and rescue from the Nile by Pharaoh's daughter, is now shown to have been adapted from the Chaldean narrative about Sargon. And if so, the Assyrian tile in the British Museum being a good proof of it, why not that of the Jews robbing the Egyptians of their jewels, the death of Pharaoh and his army, and so on? The gigantic magicians of Ruta and Daitya, the "lords of the Dark Face," may have become in the later narrative the Egyptian Magi, and the yellow-faced nations of

[[Vol. 2, Page]] 429 SHADOWY MEMENTOS OF THE PAST.

the Fifth Race, the virtuous sons of Jacob, the "chosen people." . . . One more statement has to be made: There have been several Divine Dynasties -- a series for every Root Race beginning with the Third, each series according and adapted to its Humanity. The last Seven Dynasties referred to in the Egyptian and Chaldean records belong to the Fifth Race, which, though generally called Aryan, was not entirely so, as it was ever largely mixed up with races to which Ethnology gives other names. It would be impossible, in view of the limited space at our disposal, to go any further into the description of the Atlanteans, in whom the whole East believes as much as we believe in the ancient Egyptians, but whose existence the majority of the Western Scientists deny, as they have denied, before this, many a truth, from the existence of Homer down to that of the carrier pigeon. The civilization of the Atlanteans was greater even than that of the Egyptians. It is their degenerate descendants, the nation of Plato's Atlantis, which built the first Pyramids in the country, and that certainly before the advent of the "Eastern Aethiopians," as Herodotus calls the Egyptians. This may be well inferred from the statement made by Ammianus Marcellinus, who says of the Pyramids that "there are also subterranean passages and winding retreats, which, it is said, men skilful in the ancient mysteries, by means of which they divined the coming of a flood, constructed in different places lest the memory of all their sacred ceremonies should be lost."

These men who "divined the coming of floods" were not Egyptians, who never had any, except the periodical rising of the Nile. Who were they? The last remnants of the Atlanteans, we maintain. Those races which are dimly suspected by Science, and thinking of which Mr. Ch. Gould, the well-known geologist, says: "Can we suppose that we have at all exhausted the great museum of nature? Have we, in fact, penetrated yet beyond its antechambers? Does the written history of man, comprising a few thousand years, embrace the whole course of his intelligent existence? Or have we in the long mythical eras, extending over hundreds of thousands of years, and recorded in the chronologies of Chaldea and of China, shadowy mementos of pre-historic man, handed down by tradition, and perhaps transported by a few survivors to existing lands from others, which, like the fabled (?) Atlantis of Plato, may have been submerged, or the scene of some great catastrophe which destroyed them with all their civilization" ("Mythical Monsters," p. 19).

After this one can turn with more confidence to the words of a Master who wrote, several years before these words were penned by Mr. Gould:-- "The Fourth Race had its periods of the highest civilization. Greek and Roman and even Egyptian civilizations are nothing com-

[[Vol. 2, Page]] 430 THE SECRET DOCTRINE.

pared to the civilizations that began with the Third Race" -- after its separation.

But if this civilization and the mastery of arts and sciences are denied to the Third and Fourth Races, no one will deny that between the great civilizations of antiquity, such as those of Egypt and India, there stretched the dark ages of crass ignorance and barbarism ever since the beginning of the Christian era up to our modern civilization; during which period all recollection of these traditions was lost. As said in Isis Unveiled: "Why should we forget that, ages before the prow of the adventurous Genoese clove the Western waters, the Phoenician vessels had circumnavigated the globe, and spread civilization in regions now silent and deserted? What archaeologist will dare assert that the same hand which planned the Pyramids of Egypt, Karnak, and the thousand ruins now crumbling to oblivion on the sandy banks of the Nile, did not erect the monumental Nagkon-Wat of Cambodia? or trace the hieroglyphics on the obelisks and doors of the deserted Indian village, newly discovered in British Columbia by Lord Dufferin? or those on the ruins of Palenque and Uxmal, of Central America? Do not the relics we treasure in our museums -- last mementos of the long 'lost arts' -- speak loudly in favour of ancient civilization? And do they not prove, over and over again, that nations and continents that have passed away have buried along with them arts and sciences, which neither the first crucible ever heated in a mediaeval cloister, nor the last cracked by a modern chemist, have revived, nor will -- at least, in the present century."

And the same question may be put now that was put then; it may be once more asked: "How does it happen that the most advanced standpoint that has been reached in our times, only enables us to see in the dim distance up the Alpine

path of knowledge the monumental proofs that earlier explorers have left to mark the plateaux they had reached and occupied?

"If modern masters are so much in advance of the old ones, why do they not restore to us the lost arts of our postdiluvian forefathers? Why do they not give us the unfading colours of Luxor -- the Tyrian purple; the bright vermilion and dazzling blue which decorate the walls of this place, and are as bright as on the first day of their application? The indestructible cement of the pyramids and of ancient aqueducts; the Damascus blade, which can be turned like a corkscrew in its scabbard without breaking; the gorgeous, unparalleled tints of the stained glass that is found amid the dust of old ruins and beams in the windows of ancient cathedrals; and the secret of the true malleable glass? And if chemistry is so little able to rival even the early mediaeval ages in some arts, why boast of achievements which, accord-

[[Vol. 2, Page]] 431 MISTAKES OF THE EGYPTOLOGISTS.

ing to strong probability, were perfectly known thousands of years ago? The more archeology and philology advance, the more humiliating to our pride are the discoveries which are daily made, the more glorious testimony do they bear in behalf of those who, perhaps on account of the distance of their remote antiquity, have been until now considered ignorant flounders in the deepest mire of superstition."

Among other arts and sciences, the ancients -- ay, as a heirloom from the Atlanteans -- had those of astronomy and symbolism, which included the knowledge of the Zodiac.

As already explained, the whole of antiquity believed, with good reason, that humanity and its races are all intimately connected with the planets, and these with Zodiacal signs. The whole world's History is recorded in the latter. In the ancient temples of Egypt this was proved by the Dendera Zodiac; but except in an Arabic work, the property of a Sufi, the writer has never met with a correct copy of these marvellous records of the past, as also of the future, history of our globe. Yet the original records exist, most undeniably.

As Europeans are unacquainted with the real Zodiacs of India, nor do they understand those they happen to know (witness Bentley), the reader is advised, in order to verify the statement, to turn to the work of Denon (Travels in Egypt, Vol. II.) in which, if understood, the two famous Egyptian Zodiacs, can be found and examined. Having seen them personally, the writer has no longer need to trust to what other students -- who have examined and studied both very carefully - have to say of them. As asserted by the Egyptian Priests to Herodotus, who was informed that the terrestrial Pole and the Pole of the Ecliptic had formerly coincided, thus was it found and corroborated by Mackey.* For he states that the Poles are represented on the Zodiacs in both positions, "And in that which shows the Poles (polar axes) at right angles, there are marks which prove that 'it was not the last time they were in that position; but the first' -- after the Zodiacs had been traced." "Capricorn," he adds, "is represented at the North Pole, and Cancer is divided, near its middle, at the South Pole; which is a confirmation that originally they had their winter when the Sun was in Cancer; but the chief characteristics of its being a monument commemorating the first time that the Pole had been in that position, are the Lion and the Virgin." (See in Part II., §"A Mystery of the Zodiac.")

Broadly calculated, it is believed by the Egyptologists that the great Pyramid was built 3,350 B.C. (See Proctor, Knowledge, Vol. I. pp. 242, 400); and that Menes and his Dynasty existed 750 years before the Fourth

[[Footnote(s)]] -----

* "The Mythological Astronomy of the Ancients Demonstrated" by a strangely intuitional symbologist and astronomer, a kind of a self-made adept of Norwich, who lived in the first quarter of this century.

[[Vol. 2, Page]] 432 THE SECRET DOCTRINE.

Dynasty (supposed to have built the Pyramids) had appeared ("The Great Pyramid," Staniland Wake). Thus 4,100 years B.C. is the age assigned to Menes. Now Sir J. Gardner Wilkinson's declaration that "all the facts lead to the conclusion that the Egyptians had already made very great progress in the arts of civilization before the age of Menes, and perhaps before they immigrated into the valley of the Nile" (Rawlinson's "Herodotus," vol. ii. p. 345) is very suggestive, as destroying this hypothesis. It points to great civilization in prehistoric times, and a still greater antiquity. The Schesoo-Hor ("the servants of Horus") were the people who had settled in Egypt; and, as M. G. Maspero affirms, it is to this prehistoric race that "belongs the honour . . . of having founded the principal cities of Egypt, and established the most important sanctuaries." This was before the great Pyramid epoch, and when Egypt had hardly arisen from the waters. Yet "they possessed the hieroglyphic form of writing special to the Egyptians, and must have been already considerably advanced in civilization." It was, says Lenormant, "the country of the great prehistoric sanctuaries, seats of the sacerdotal dominion, which played the most important part in the origin of civilization." What is the date assigned to this people? We hear of 4,000, at the utmost of 5,000 years B.C. (Maspero). Now it is claimed that it is by means of the cycle of 25,868 years (the Sidereal year) that the approximate year of the erection of the Great Pyramid can be ascertained. "Assuming that the long narrow downward passage was directed towards the pole star of the pyramid builders, astronomers have shown that . . . Alpha Draconis, the then pole-star, was in the required position about 3,350 B.C., as well as in 2,170 B.C. (Proctor, quoted by Staniland Wake.) But we are also told that "this relative position of Alpha Draconis and Alcyone being an extraordinary one . . . it could not occur again for a whole sidereal year" (ibid). This demonstrates that, since the Dendera Zodiac shows the passage of three sidereal years, the great Pyramid must have been built 78,000 years ago, or in any case that this possibility deserves to be accepted at least as readily as the later date of 3,350 B.C.

Now on the Zodiac of a certain temple in far Northern India, as on the Dendera Zodiac, the same characteristics of the signs are found. Those who know well the Hindu symbols and constellations, will be able to find out by the description of the Egyptian, whether the indications of the chronological time are correct or not. On the Dendera Zodiac as preserved by the modern Egyptian Coptic and Greek adepts, and explained a little differently by Mackey, the Lion stands upon the Hydra and his tail is almost straight, pointing downwards at an angle of forty or fifty degrees, this position agreeing with the original conformation of these constellations. "But in many places we see the Lion (Simha),"

[[Vol. 2, Page]] 433 THEORIES OF A SELF-MADE ADEPT.

Mackey adds, "with his tail turned up over his back, and ending with a Serpent's head; thereby showing that the Lion had been 'inverted'; which, indeed, must have been the case with the whole Zodiac and every other Constellation, when the Pole had been inverted."

Speaking of the Circular Zodiac, given also by Denon, he says:-- There, "the Lion is standing on the Serpent, and his tail forming a curve downward, from which it is found that though six or seven hundred thousand years must have passed between the two positions, yet they had made but little difference between in the constellations of Leo and the Hydra; while Virgo is represented very differently in the two. In the circular Zodiac, the Virgin is nursing her child; but it seems that they had not had that idea when the pole was first within the plane of the Ecliptic; for in this Zodiac, as given by Denon, we see three Virgins between the Lion and the Scales, the last of which holds in her hand an ear of wheat. It is much to be lamented that there is in this Zodiac a breach of the figure in the latter part of Leo and the beginning of Virgo which has taken away one Decan out of each sign."

Nevertheless, the meaning is plain, as the three Zodiacs belong to three different epochs: namely, to the last three family races of the fourth Sub-race of the Fifth Root-race, each of which must have lived approximately from 25 to 30,000 years. The first of these (the "Aryan-Asiatics") witnessed the doom of the last of the populations of the "giant Atlanteans"* who perished some 850,000 years ago (the Ruta and Daitya Island-Continents) toward the close of the Miocene Age.** The fourth sub-race witnessed the destruction of the last remnant of the Atlanteans -- the Aryo-Atlanteans in the last island of Atlantis, namely, some 11,000 years ago. In order to understand this the reader

[[Footnote(s)]] -----

* The term "Atlantean" must not mislead the reader to regard these as one race only, or even a nation. It is as though one said "Asiatics." Many, multityped, and various were the Atlanteans, who represented several humanities, and almost a countless number of races and nations, more varied indeed than would be the "Europeans" were this name to be given indiscriminately to the five existing parts of the world; which, at the rate colonization is proceeding, will be the case, perhaps, in less than two or three hundred years. There were brown, red, yellow, white and black Atlanteans; giants and dwarfs (as some African tribes comparatively are, even now).

** Says a teacher in "Esoteric Buddhism," on p. 64: "In the Eocene age, even in its very first part, the great cycle of the fourth race men (the Lemuro) Atlanteans had already reached its highest point (of civilization), and the great continent, the father of nearly all the present continents, showed the first symptoms of sinking. . . ." And on page 70, it is shown that Atlantis as a whole perished during the Miocene period. To show how the continents, races, nations and cycles overlap each other, one has but to think of Lemuria, the last of whose lands perished about 700,000 years before the beginning of the Tertiary period (see p. 65 of the same work), and the last of "Atlantis" only 11,000 years ago; thus both overlapping -- one the Atlantean period, and the other the Aryan.

[[Vol. 2, Page]] 434 THE SECRET DOCTRINE.

is asked to glance at the diagram of the genealogical tree of the Fifth Root-Race -- generally, though hardly correctly, called the Aryan race, and the explanations appended to it.

Let the reader remember well that which is said of the divisions of Root Races and the evolution of Humanity in this work, and stated clearly and concisely in Mr. Sinnett's "Esoteric Buddhism."

1. There are seven ROUNDS in every manvantara; this one is the Fourth, and we are in the Fifth Root-Race, at present.
2. Each Root-Race has seven sub-races.
3. Each sub-race has, in its turn, seven ramifications, which may be called Branch or "Family" races.
4. The little tribes, shoots, and offshoots of the last-named are countless and depend on Karmic action. Examine the "genealogical tree" hereto appended, and you will understand. The illustration is purely diagrammatic, and is only intended to assist the reader in obtaining a slight grasp of the subject, amidst the confusion which exists between the terms which have been used at different times for the divisions of Humanity. It is also here attempted to express in figures -- but only within approximate limits, for the sake of comparison -- the duration of time through which it is possible to definitely distinguish one division from another. It would only lead to hopeless confusion if any attempt were made to give accurate dates to a few; for the Races, Sub-Races, etc., etc., down to their smallest ramifications, overlap and are entangled with each other until it is nearly impossible to separate them.

The human Race has been compared to a tree, and this serves admirably as an illustration.

[[diagram]]

The main stem of a tree may be compared to the ROOT-RACE (A).

[[Vol. 2, Page]] 435 ILLUSTRATION OF THE RACES.

Its larger limbs to the various SUB-RACES; seven in number (B1, B2).

On each of these limbs are seven BRANCHES, OR FAMILY-RACES. (C).

After this the cactus-plant is a better illustration, for its fleshy "leaves" are covered with sharp spines, each of which may be compared to a nation or tribe of human beings.

Now our Fifth Root-Race has already been in existence -- as a race sui generis and quite free from its parent stem -- about 1,000,000 years; therefore it must be inferred that each of the four preceding Sub-Races has lived approximately 210,000 years; thus each Family-Race has an average existence of about 30,000 years. Thus the European "Family Race" has still a good many thousand years to run, although the nations or the innumerable spines upon it, vary with each succeeding "season" of three or four thousand years. It is somewhat curious to mark the comparative approximation of duration between the lives of a "Family-Race" and a "Sidereal year."

The knowledge of the foregoing, and the accurately correct division, formed part and parcel of the Mysteries, where these Sciences were taught to the disciples, and where they were transmitted by one hierophant to another. Everyone is aware that the European astronomers assign (arbitrarily enough) the date of the invention of the Egyptian Zodiac to the years 2000 or 2400 B.C. (Proctor); and insist that this invention coincides in its date with that of the erection of the Great Pyramid. This, to an Occultist and Eastern astronomer, must appear quite absurd. The year of the Kaliyuga is said to have begun between the 17th and 18th of February in the year 3102 B.C. Now the Hindus claim that in the year 20400 before Kaliyugam, the origin of their Zodiac coincided with the spring equinox -- there being at the time a conjunction of the Sun and Moon -- and Bailly proved by a lengthy and careful computation of that date, that, even if fictitious, the epoch from which they had started to establish the beginning of their Kaliyug was very real. That "epoch is the year 3102 before our era," he writes. (See Part III., Book I. "Hindu Astronomy defended by an Academician".) The lunar eclipse arriving just a fortnight after the beginning of the black Age -- it took place in a point situated between the Wheat Ear of Virgo and the star θ of the same constellation. One of their most esoteric Cycles is based upon certain conjunctions and respective positions of Virgo and the Pleiades -- (Krittika). Hence, as the Egyptians brought their Zodiac from Southern India and Lanka,* the esoteric meaning was evidently identical. The three "Virgins," or Virgo in three different positions, meant, with both, the record of the first three "divine or astronomical Dynasties," who taught the Third

[[Footnote(s)]] -----

* Ceylon.

[[Vol. 2, Page]] 436 THE SECRET DOCTRINE.

Root-Race; and after having abandoned the Atlanteans to their doom, returned (or redescended, rather) during the third Sub-Race of the Fifth, in order to reveal to saved humanity the mysteries of their birth-place -- the sidereal Heavens. The same symbolical record of the human races and the three Dynasties (Gods, Manes -- semi-divine astrals of the Third and Fourth, and the "Heroes" of the Fifth Race), which preceded the purely human kings, was found in the distribution of the tiers and passages of the Egyptian Labyrinth. As the three inversions of the Poles of course changed the face of the Zodiac, a new one had to be constructed each time. In Mackey's "Sphinxiad" the speculations of the bold author must have horrified the orthodox portion of the population of Norwich, as he says, fantastically enough:--

"But, after all, the greatest length of time recorded by those monuments (the Labyrinth, the Pyramids and the Zodiacs) does not exceed five millions of years (which is not so)*; which falls short of the records given us both by the (esoteric) Chinese and Hindus; which latter nation has registered a knowledge of time for seven or eight millions of years**; which I have seen upon a talisman of porcelain. . . ."

The Egyptian priests had the Zodiacs of the Atlantean Asura-Maya, as the modern Hindus still have. As stated in "Esoteric Buddhism," the Egyptians, as well as the Greeks and "Romans" some thousand years ago, were "remnants of the Atlanto-Aryans," i.e., the former, of the older, or the Ruta Atlanteans; the last-named, the descendants of the last race of that island, whose sudden disappearance was narrated to Solon by the Egyptian Initiates. The human Dynasty of the older Egyptians, beginning with Menes, had all the knowledge of the Atlanteans, though there was no more Atlantean blood in their veins. Nevertheless, they had preserved all their Archaic records. All this has been shown long ago.*** And it is just because the Egyptian Zodiac is between 75 and 80,000 years old that the Zodiac of the Greeks is far later. Volney has correctly pointed out in his "Ruins of Empires" (p. 360) that it is only 16,984 years old, or up to the present date 17,082.****

[[Footnote(s)]] -----

* The forefathers of the Aryan Brahmins had their Zodiacal calculations and Zodiac from those born by Kriyasakti power, the "Sons of Yoga"; the Egyptians from the Atlanteans of Ruta.

** The former, therefore, may have registered time for seven or eight millions of years, but the Egyptians could not.

*** This question was amply challenged, and as amply discussed and answered. See Five Years of Theosophy. (Art. "Mr. Sinnett's Esoteric Buddhism," pp. 325-46).

**** Volney says that, as Aries was in its 15th degree 1447 B.C., it follows that the first degree of "Libra" could not have coincided with the vernal equinox more lately than 15,194 years B.C., to which if you add 1790 since Christ, when Volney wrote this, it appears that 16,984 years have elapsed since the (Greek or rather Hellenic) origin of the Zodiac.

[[Vol. 2, Page]] 437 MORE IN THE FORTHCOMING VOLUMES.

CONCLUSION.

Space forbids us to say anything more, and this part of the "Secret Doctrine" has to be closed. The forty-nine Stanzas and the few fragments from the Commentaries just given are all that can be published in these volumes. These, with

some still older records -- to which none but the highest Initiates have access -- and a whole library of comments, glossaries, and explanations, form the synopsis of Man's genesis.

It is from the Commentaries that we have hitherto quoted and tried to explain the hidden meaning of some of the allegories, thus showing the true views of esoteric antiquity upon geology, anthropology, and even ethnology. We will endeavour in the Part which follows, to establish a still closer metaphysical connection between the earliest races and their Creators, the divine men from other worlds; accompanying the statements proffered with the most important demonstrations of the same in esoteric Astronomy and Symbolism.

In Volume III. of this work (the said volume and the IVth being almost ready) a brief history of all the great adepts known to the ancients and the moderns in their chronological order will be given, as also a bird's eye view of the Mysteries, their birth, growth, decay, and final death -- in Europe. This could not find room in the present work. Volume IV. will be almost entirely devoted to Occult teachings.

The duration of the periods that separate, in space and time, the Fourth from the Fifth Race -- in the historical* or even the legendary beginnings of the latter -- is too tremendous for us to offer, even to a Theosophist, any more detailed accounts of them. During the course of the post-diluvian ages -- marked at certain periodical epochs by the most terrible cataclysms -- too many races and nations were born, and have disappeared almost without leaving a trace, for any one to offer any description of the slightest value concerning them. Whether the Masters of Wisdom have a consecutive and full history of our race from its incipient stage down to the present times; whether they possess the uninterrupted record of man since he became the complete physical being, and became thereby the king of the animals and master on this earth -- is not for the writer to say. Most probably they have,

[[Footnote(s)]] -----

* The word "historical" is used, because, although historians have dwarfed almost absurdly the dates that separate certain events from our modern day, nevertheless, once that they are known and accepted, they belong to history. Thus the Trojan War is an historical event; and though even less than 1,000 years B.C. is the date assigned to it, yet in truth it is nearer 6,000 than 5,000 years B.C.

[[Vol. 2, Page]] 438 THE SECRET DOCTRINE.

and such is our own personal conviction. But if so, this knowledge is only for the highest Initiates, who do not take their students into their confidence. The writer can, therefore, give but what she has herself been taught, and no more.

But even this will appear to the profane reader rather as a weird, fantastic dream, than as a possible reality.

This is only natural and as it should be, since for years such was the impression made upon the humble writer of these pages herself. Born and bred in European, matter-of-fact and presumably civilized countries, she assimilated the foregoing with the utmost difficulty. But there are proofs of a certain character which become irrefutable and are undeniable in the long run, to every earnest and unprejudiced mind. For a series of years such were offered to her, and now she has the full certitude that our present globe and its human races must have been born, grown and developed in this, and in no other way.

But this is the personal view of the writer; and her orthodoxy cannot be expected to have any more weight than any other "doxy," in the eyes of those to whom every fresh theory is heterodox until otherwise proved. Therefore are we Occultists fully prepared for such questions as these: "How does one know that the writer has not invented the whole scheme? And supposing she has not, how can one tell that the whole of the foregoing, as given in the Stanzas, is not the product of the imagination of the ancients? How could they have preserved the records of such an immense, such an incredible antiquity?"

The answer that the history of this world since its formation and to its end "is written in the stars," i.e., is recorded in the Zodiac and the Universal Symbolism whose keys are in the keeping of the Initiates, will hardly satisfy the doubters. The antiquity of the Zodiac in Egypt is much doubted, and it is denied point-blank with regard to India. "Your conclusions are often excellent, but your premises are always doubtful," the writer was once told by a profane friend. To this, the answer came that it was one point, at least, gained on the scientific syllogisms. For, with the exception of a few problems from the domain of purely physical science, both the premises and conclusions of the men of Science are as hypothetical as they are almost invariably erroneous. And if they do not so appear to the profane, the reason is simply this: the said profane is very little aware, taking as he does his scientific data on faith, that both premises and conclusions are generally the product of the same brains, which, however learned, are not infallible; a truism demonstrated daily by the shifting and re-shifting of scientific theories and speculations.

However it may be, the records of the temples, Zodiacal and traditional, as well as the ideographic records of the East, as read by the

[[Vol. 2, Page]] 439 MODERN SCIENCE MISTRUSTED.

adepts of the Sacred Science and Vidya, are not a whit more doubtful than the so-called ancient history of the European nations, now edited, corrected, and amplified by half a century of archaeological discoveries, and the very problematical readings of the Assyrian tiles, cuneiform fragments, and Egyptian hieroglyphics. So are our data based upon the same readings, in addition to an almost inexhaustible number of Secret works of which Europe knows nothing -- plus the perfect knowledge by the Initiates of the symbolism of every word so recorded. Some of these records belong to an immense antiquity. Every archaeologist and palaeontologist is acquainted with the ideographic productions of certain semi-savage tribes, who from time immemorial have aimed at rendering their thoughts symbolically. This is the earliest mode of recording events and ideas. And how old this knowledge is in the human race may be inferred from some signs, evidently ideographic, found on hatchets of the Palaeolithic period. The red Indian tribes of America, only a few years ago

comparatively speaking, petitioned the President of the United States to grant them possession of four small lakes, the petition being written on the tiny surface of a piece of a fabric, which is covered with barely a dozen representations of animals and birds. (See Lubbock.) The American savages have a number of such different kinds of writing, but not one of our Scientists is yet familiar, or even knows of the early hieroglyphic cypher, still preserved in some Fraternities, and named in Occultism the Senzar. Moreover, all those who have decided to regard such modes of writing -- e.g., the ideographs of the Red Indians, and even the Chinese characters -- as "attempts of the early races of mankind to express their untutored thoughts," will decidedly object to our statement, that writing was invented by the Atlanteans, and not at all by the Phoenicians. Indeed, such a claim as that writing was known to mankind many hundreds of millenniums ago, in the face of the philologists who have decreed that writing was unknown in the days of, and to Panini, in India, as also to the Greeks in the time of Homer, will be met by general disapprobation, if not with silent scorn. All denial and ridicule notwithstanding, the Occultists will maintain the claim, and simply for this reason: from Bacon down to our modern Royal Society, we have a too long period, full of the most ludicrous mistakes made by Science, to warrant our believing in modern scientific assumptions rather than in the denials of our Teachers. Writing, our scientists say, was unknown to Panini; and this sage nevertheless composed a grammar which contains 3,996 rules, and is the most perfect of all the grammars that were ever made! Panini is made out to have lived barely a few centuries B.C., by the most liberal; and the rocks in Iran and Central Asia (whence the philologists and historians

[[Vol. 2, Page]] 440 THE SECRET DOCTRINE.

show us the ancestors of the same Panini, the Brahmins, coming into India) are covered with writing, two and three thousand years old (12,000, according to some fearless palaeontologists).

Writing was an *ars incognita* in the days of Hesiod and Homer, agreeably to Grote, and unknown to the Greeks so late as 770 B.C.; and the Phoenicians who had invented it, and knew writing as far back as 1500 B.C., at the earliest,* were living among the Greeks, and elbowing them, all the time! All these scientific and contradictory conclusions disappeared, however, into thin air, when Schliemann discovered (a) the site of ancient Troy, whose actual existence had been so long regarded as a fable; and (b), excavated on that site earthenware vessels with inscriptions in characters unknown to the paleontologists and the all-denying Sanskritists. Who will now deny Troy, or these Archaic inscriptions? As Professor Virchow witnesses:-- "I was myself an eye-witness of two such discoveries, and helped to gather the articles together. The slanderers have long since been silenced, who were not ashamed to charge the discoverer with an imposture."** Nor were truthful women spared any more than truthful men. Du Chaillu, Gordon-Cumming, Madame Merian,*** Bruce, and a host of others were charged with lying.

Madame Merian -- says the author of "Mythical Monsters," who gives this information in the Introduction -- was accused of deliberate falsehood in reference to her description of a bird-eating spider nearly two hundred years ago. But now-a-days reliable observers have confirmed it in regard to South America, India, and elsewhere. Audubon was accused by botanists of having invented the yellow water-lily, which he figured in his *Birds of the South* under the name of *Nymphaea lutea*, and after having lain under the imputation for years, was confirmed at last by the discovery of the long-lost flower in Florida in 1876 (*Pop. Sci. Monthly*, No. 60, April 1877). And, as Audubon was called a liar for this, and for his *Holiaetus Washingtonii*,**** so Victor Hugo was ridiculed for . . . his marvellous word-painting of the devil-fish, and his description of a man becoming its helpless victim. "The thing was derided as an impossibility; yet within a few years were discovered, on the shores of Newfoundland, cuttle fish with arms extending to thirty feet in length, and capable of dragging a good-sized

[[Footnote(s)]] -----

* It is an historical fact that Sanchoniathon compiled and wrote in Phoenician characters -- from annals and State documents in the archives of the older Phoenician cities -- the full record of their religion in 1250 B.C.

*** Gosse writes of the latter: "She is set down a thorough heretic, not at all to be believed, a manufacturer of unsound natural history, an inventor of false facts in science." ("*Romance of Natural History*," p. 227.)

**** Dr. Cover writes: "That famous bird of Washington was a myth; either Audubon was mistaken, or else, as some do not hesitate to affirm, he lied about it."

[[Vol. 2, Page]] 441 A WHOLESAL DENIAL.

boat beneath the surface; and their action has been reproduced for centuries past . . . by Japanese artists." ("*Mythical Monsters*," p. 11 *Introd.*.)

And if Troy was denied, and regarded as a myth; the existence of *Herculaneum* and *Pompeii* declared a fiction; the travels of Marco Polo laughed at and called as absurd a fable as one of Baron Munchausen's tales, why should the writer of "*Isis Unveiled*" and of the "*Secret Doctrine*" be any better treated? Mr. Charles Gould, the author of the above-cited volume quotes in his excellent work a few lines from Macmillan (1860), which are as true as life, and too much to the point not to be reproduced: "When a naturalist, either by visiting such spots of earth as are still out of the way, or by his good fortune, finds a very queer plant or animal, he is forthwith accused of inventing his game. . . . As soon as the creature is found to sin against preconception, the great (mis ?) guiding Spirit, a priori by name, who furnishes philosophers with their omniscience *pro re nata*, whispers that no such thing can be, and forthwith there is a charge of hoax. The heavens themselves have been charged with hoaxes. When Leverrier and Adams predicted a planet by calculation, it was gravely asserted in some quarters that the planet which had been calculated was not the planet but another which had clandestinely and improperly got into the neighbourhood of the true body. The disposition to suspect hoax is stronger than the disposition to hoax. Who was it that first announced that the classical writings of Greece and Rome were one huge hoax perpetrated by the monks in what the announcer would be as little or less inclined than Dr. Maitland to call the dark ages?" (p. 13).

Thus let it be. No disbeliever who takes the "Secret Doctrine" for a "hoax" is forced or even asked to credit our statements. These have already been proclaimed to be such by certain very clever American journalists before even the work went to press.*

Nor, is it after all, necessary that any one should believe in the Occult Sciences and the old teachings, before one knows anything or even

[[Footnote(s)]] -----

* So far back as July, 1888, at a time when the MSS. of this work had not yet left my writing table, and the Secret Doctrine was utterly unknown to the world, it was already being denounced as a product of my brain and no more. These are the flattering terms in which the Evening Telegraph (of America) referred to this still unpublished work in its issue of June 30, 1888: "Among the fascinating books for July reading is Mme. Blavatsky's new book on Theosophy . . . (!) the SECRET DOCTRINE. . . . But because she can soar back into the Brahmin ignorance . . . (! ?) . . . is no proof that everything she says is true." And once the prejudiced verdict given on the mistaken notion that my book was out, and that the reviewer had read it, neither of which was or could be the case, now that it is really out the critic will have to support his first statement, whether correct or otherwise, and thus get out of it, probably by a more slashing criticism than ever.

[[Vol. 2, Page]] 442 THE SECRET DOCTRINE.

believes in his own soul. No great truth was ever accepted a priori, and generally a century or two passed before it began to glimmer in the human consciousness as a possible verity, except in such cases as the positive discovery of the thing claimed as a fact. The truths of to-day are the falsehoods and errors of yesterday, and vice versa. It is only in the XXth century that portions, if not the whole, of the present work will be vindicated.

It is no fact going against our statements, therefore, even if Sir John Evans does affirm that writing was unknown in the stone age. For it may have been unknown during that period in the Fifth Aryan race, and have been perfectly known to the Atlanteans of the Fourth, in the palmy days of their highest civilization. The cycles of the rise and fall of the nations and races are there to account for it.

If told that there have been cases before now of forged pseudographs being palmed off on the credulous, and that our work may be classed with Jacolliot's "Bible in India" (in which, by the way, there are more truths among its errors than are found in the works of orthodox and recognized Orientalists) -- the charge and comparison will dismay us very little. We bide our time. Even the famous "Ezour-Veda" of the last century, considered by Voltaire "the most precious gift from the East to the West," and by Max Muller "about the silliest book that can be read," is not altogether without facts and truths in it. The cases when the a priori negations of specialists became justified by subsequent corroborations form but an insignificant percentage of those that were fully vindicated by subsequent discoveries, and confirmed to the great dismay of the learned objectors. "Ezour Veda," was a very small bone of contention compared with the triumph of Sir William Jones, Anquetil de Perron, and others in the matter of Sanskrit and its literature. Such facts are recorded by Professor Max Muller himself, who, speaking of the discomfiture of Dugald Stewart and Co. in connection with this, states that "if the facts about Sanskrit were true, Dugald Stewart was too wise not to see that the conclusions drawn from them were inevitable. He therefore denied the reality of such a language as Sanskrit altogether, and wrote his famous essay to prove that Sanskrit had been put together after the model of Greek and Latin, by those arch-forgers and liars, the Brahmins, and that the whole of Sanskrit literature was an imposition" (Science of Language, p. 168). The writer is quite willing and feels proud to keep company with these Brahmins, and other historical "liars," in the opinion of our modern Dugald Stewarts. She has lived too long, and her experience has been too varied and personal, for her not to know at least something of human nature. "When you doubt, abstain," says the wise Zoroaster,

[[Vol. 2, Page]] 443 PARADOXES OF SCIENCE.

whose prudent aphorism is found corroborated in every case by daily life and experience. Yet, like St. John the Baptist, this sage of the past Ages is found preaching in the desert, in company with a more modern philosopher, namely Bacon, who offers the same priceless bit of practical Wisdom. "In contemplation," he says (in any question of Knowledge, we add), "if a man begin with certainties, he shall end in doubts; but if he will be content to begin with doubts, he shall end in certainties."

With this piece of advice from the father of English Philosophy to the representatives of British scepticism we ought to close the debate, but our theosophical readers are entitled to a final piece of Occult information.

Enough was said to show that evolution in general, events, mankind, and everything else in Nature proceed in cycles. We have spoken of seven Races, five of which have nearly completed their earthly career, and have claimed that every Root-Race, with its sub-races and innumerable family divisions and tribes, was entirely distinct from its preceding and succeeding race. This will be objected to, on the authority of uniform experience in the question of Anthropology, and Ethnology. Man was -- save in colour and type, and perhaps a difference in facial peculiarities and cranial capacity -- ever the same under every climate and in every part of the world, say the Naturalists: ay, even in stature. This, while maintaining that man descends from the same unknown ancestor as the ape, a claim that is logically impossible without an infinite variation of stature and form, from his first evolution into a biped. The very logical persons who maintain both propositions are welcome to their paradoxical views. Once more we address only those who, doubting the general derivation of myths from "the contemplation of the visible workings of external nature" . . . think it, "less hard to believe that these wonderful stories of gods and demi-gods, of giants and dwarfs, of dragons and monsters of all descriptions, are transformations, than to believe them to be inventions." It is only such "transformations" in physical nature, as much as in the memory and conceptions of our present mankind, that the Secret Doctrine teaches. It confronts the purely speculative hypotheses of modern Science, based upon the experience and exact observations of barely a few centuries, with the unbroken tradition and records of its Sanctuaries; and brushing away that tissue of cobweb-like theories, spun in

the darkness that covers a period of hardly a few millenniums back, and which Europeans call their "History," the Old Science says to us: Listen, now, to my version of the memoirs of Humanity.

The human Races are born one from the other, grow, develop, become

[[Vol. 2, Page]] 444 THE SECRET DOCTRINE.

old, and die. Their sub-races and nations follow the same rule. If your all-denying modern science and so-called philosophy do not contest that the human family is composed of a variety of well-defined types and races, it is only because the fact is undeniable, no one would say that there was no external difference between an Englishman, an African negro, and a Japanese or Chinaman. On the other hand it is formally denied by most naturalists that mixed human races, i.e., the seeds for entirely new races, are any longer formed in our days. But this last is maintained on good grounds by de Quatrefages and some others.

Nevertheless our general proposition will not be accepted. It will be said that whatever forms man has passed through in the long pre-historic Past there are no more changes for him (save certain variations, as at present) in the future. Hence that our Sixth and Seventh Root Races are fictions.

To this it is again answered: How do you know? Your experience is limited to a few thousand years, to less than a day in the whole age of Humanity and to the present types of the actual continents and isles of our Fifth Race. How can you tell what will or will not be? Meanwhile, such is the prophecy of the Secret Books and their no uncertain statements.

Since the beginning of the Atlantean Race many million years have passed, yet we find the last of the Atlanteans, still mixed up with the Aryan element, 11,000 years ago. This shows the enormous overlapping of one race over the race which succeeds it, though in character and external type the elder loses its characteristics, and assumes the new features of the younger race. This is proved in all the formations of mixed human races. Now, Occult philosophy teaches that even now, under our very eyes, the new Race and Races are preparing to be formed, and that it is in America that the transformation will take place, and has already silently commenced.

Pure Anglo-Saxons hardly three hundred years ago, the Americans of the United States have already become a nation apart, and, owing to a strong admixture of various nationalities and inter-marriage, almost a race sui generis, not only mentally, but also physically. "Every mixed race, when uniform and settled, has been able to play the part of a primary race in fresh crossings," says de Quatrefages. "Mankind, in its present state, has thus been formed, certainly, for the greatest part, by the successive crossing of a number of races at present undetermined" ("The Human Species," p. 274.)

Thus the Americans have become in only three centuries a "primary race," pro tem., before becoming a race apart, and strongly separated from all other now existing races. They are, in short, the germs of the Sixth sub-race, and in some few hundred years more, will become

[[Vol. 2, Page]] 445 THE COMING NEW RACE.

most decidedly the pioneers of that race which must succeed to the present European or fifth sub-race, in all its new characteristics. After this, in about 25,000 years, they will launch into preparations for the seventh sub-race; until, in consequence of cataclysms -- the first series of those which must one day destroy Europe, and still later the whole Aryan race (and thus affect both Americas), as also most of the lands directly connected with the confines of our continent and isles -- the Sixth Root-Race will have appeared on the stage of our Round. When shall this be? Who knows save the great Masters of Wisdom, perchance, and they are as silent upon the subject as the snow-capped peaks that tower above them. All we know is, that it will silently come into existence; so silently, indeed, that for long millenniums shall its pioneers -- the peculiar children who will grow into peculiar men and women -- be regarded as anomalous *lusus naturae*, abnormal oddities physically and mentally. Then, as they increase, and their numbers become with every age greater, one day they will awake to find themselves in a majority. It is the present men who will then begin to be regarded as exceptional mongrels, until these die out in their turn in civilised lands; surviving only in small groups on islands -- the mountain peaks of to-day -- where they will vegetate, degenerate, and finally die out, perhaps millions of years hence, as the Aztecs have, as the Nyam-Nyam and the dwarfish Moola Koorumba of the Nilghiri Hills are dying. All these are the remnants of once mighty races, the recollection of whose existence has entirely died out of the remembrance of the modern generations, just as we shall vanish from the memory of the Sixth Race Humanity. The Fifth will overlap the Sixth Race for many hundreds of millenniums, changing with it slower than its new successor, still changing in stature, general physique, and mentality, just as the Fourth overlapped our Aryan race, and the Third had overlapped the Atlanteans.

This process of preparation for the Sixth great Race must last throughout the whole sixth and seventh sub-races (vide supra, the diagram of the Genealogical Tree of the Fifth Race). But the last remnants of the Fifth Continent will not disappear until some time after the birth of the new Race; when another and new dwelling, the sixth continent, will have appeared above the new waters on the face of the globe, so as to receive the new stranger. To it also will emigrate and settle all those who shall be fortunate enough to escape the general disaster. When this shall be -- as just said -- it is not for the writer to know. Only, as nature no more proceeds by sudden jumps and starts, than man changes suddenly from a child into a mature man, the final cataclysm will be preceded by many smaller submersions and destructions both by wave and volcanic fires. The exultant pulse will beat

[[Vol. 2, Page]] 446 THE SECRET DOCTRINE.

high in the heart of the race now in the American zone, but there will be no more Americans when the Sixth Race commences; no more, in fact, than Europeans; for they will have now become a new race, and many new nations. Yet the Fifth will not die, but survive for a while: overlapping the new Race for many hundred thousands of years to come, it will become transformed with it -- slower than its new successor -- still getting entirely altered in mentality, general physique, and stature. Mankind will not grow again into giant bodies as in the case of the Lemurians and the Atlanteans;

because while the evolution of the Fourth race led the latter down to the very bottom of materiality in its physical development, the present Race is on its ascending arc; and the Sixth will be rapidly growing out of its bonds of matter, and even of flesh.

Thus it is the mankind of the New world -- one by far the senior of our Old one, a fact men had also forgotten -- of Patala (the Antipodes, or the Nether World, as America is called in India), whose mission and Karma it is, to sow the seeds for a forthcoming, grander, and far more glorious Race than any of those we know of at present. The Cycles of Matter will be succeeded by Cycles of Spirituality and a fully developed mind. On the law of parallel history and races, the majority of the future mankind will be composed of glorious Adepts. Humanity is the child of cyclic Destiny, and not one of its Units can escape its unconscious mission, or get rid of the burden of its co-operative work with nature. Thus will mankind, race after race, perform its appointed cycle-pilgrimage. Climates will, and have already begun, to change, each tropical year after the other dropping one sub-race, but only to beget another higher race on the ascending cycle; while a series of other less favoured groups -- the failures of nature -- will, like some individual men, vanish from the human family without even leaving a trace behind.

Such is the course of Nature under the sway of KARMIC LAW: of the ever present and the ever-becoming Nature. For, in the words of a Sage, known only to a few Occultists:-- "THE PRESENT IS THE CHILD OF THE PAST; THE FUTURE, THE BEGOTTEN OF THE PRESENT. AND YET, O PRESENT MOMENT! KNOWEST THOU NOT THAT THOU HAST NO PARENT, NOR CANST THOU HAVE A CHILD; THAT THOU ART EVER BEGETTING BUT THYSELF? BEFORE THOU HAST EVEN BEGUN TO SAY 'I AM THE PROGENY OF THE DEPARTED MOMENT, THE CHILD OF THE PAST,' THOU HAST BECOME THAT PAST ITSELF. BEFORE THOU UTTEREST THE LAST SYLLABLE, BEHOLD! THOU ART NO MORE THE PRESENT BUT VERILY THAT FUTURE. THUS, ARE THE PAST, THE PRESENT, AND THE FUTURE, THE EVER-LIVING TRINITY IN ONE -- THE MAHAMAYA OF THE ABSOLUTE IS."

BOOK II. -- PART II.

ESOTERIC TENETS CORROBORATED IN EVERY SCRIPTURE.

IN view of the strangeness of the teachings, and of many a doctrine which from the modern scientific stand-point must seem absurd, some necessary and additional explanations have to be made. The theories contained in the Second Part of the Stanzas are even more difficult to assimilate than those which are embodied in Vol. 1, on Cosmogony. Theology, therefore, has to be questioned here, as Science will be in the Addenda (Part III.). Since our doctrines differ so widely from the current ideas of both Materialism and Theology, the Occultists must be ever prepared to repel the attacks of either or of both.

The reader can never be too often reminded that, as the abundant quotations from various old Scriptures prove, these teachings are as old as the world; and that the present work is a simple attempt to render, in modern language and in a phraseology with which the scientific and educated student is familiar, archaic Genesis and History as taught in certain Asiatic centres of esoteric learning. They must be accepted or rejected on their own merits, fully or partially; but not before they have been carefully compared with the corresponding theological dogmas and the modern scientific theories and speculations.

One feels a serious doubt whether, with all its intellectual acuteness, our age is destined to discover in each western nation even one solitary uninitiated scholar or philosopher capable of fully comprehending the spirit of archaic philosophy. Nor can one be expected to do so, before the real meaning of these terms, the Alpha and the Omega of Eastern esotericism, the words Sat and Asat, -- so freely used in the Rig-Veda, and elsewhere -- is thoroughly assimilated. Without this key to the Aryan Wisdom, the Cosmogony of the Rishis and the Arhats is in danger of remaining a dead letter to the average Orientalist. Asat is not merely the negation of Sat, nor is it the "not yet existing"; for Sat is in itself neither the "existent," nor "being." SAT is the immutable, the ever present, changeless and eternal root, from and through which all proceeds. But it is far more than the potential force in the seed, which propels onward the process of development, or what is now called evolution. It is the ever becoming, though the never manifesting.* Sat

[[Footnote(s)]] -----

* The Hegelian doctrine, which identifies Absolute Being or "Be-ness" with "non-Being," and represents the Universe as an eternal becoming, is identical with the Vedanta philosophy.

[[Vol. 2, Page]] 450 THE SECRET DOCTRINE.

is born from Asat, and ASAT is begotten by Sat: the perpetual motion in a circle, truly; yet a circle that can be squared only at the supreme Initiation, at the threshold of Paranirvana.

Barth started a reflection on the Rig-Veda which was meant for a stern criticism, an unusual, therefore, as was thought, an original view of this archaic volume. It so happened, however, that, while criticising, that scholar revealed a truth, without being himself aware of its full importance. He premises by saying that "neither in the language nor in the thought of the Rig-Veda" has he "been able to discover that quality of primitive natural simplicity, which so many are fain to see in it." Barth had Max Muller in his mind's eye when writing this. For the famous Oxford professor has throughout characterised the hymns of the Rig Veda, as the unsophisticated expression of the religious feeling of a pastoral innocent people. "In the Vedic hymns the ideas and myths appear in their simplest and freshest form;" -- the Sanskrit scholar thinks. Barth is of a different opinion, however.

So divided and personal are the opinions of Sanskritists as to the importance and intrinsic value of the Rig Veda, that those opinions become entirely biased whichever way they incline. Thus Mr. Max Muller declares that: "Nowhere is the wide distance which separates the ancient poems of India from the most ancient literature of Greece more clearly felt, than when we compare the growing myths of the Veda with the full grown and decayed myths on which the poetry of Homer is founded. The Veda is the real Theogony of the Aryan races, while that of Hesiod is a distorted caricature of the original image." This is a sweeping assertion, and perhaps rather unjust in its general application. But why not try to account for it? Orientalists cannot do so, for they reject the chronology of the Secret Doctrine, and could hardly admit the fact that between the Rig-Vedic hymns and Hesiod's Theogony tens of thousands of years have elapsed. So they fail to see that the Greek myths are no longer the primitive symbolical language of the Initiates, the disciples of the gods-Hierophants, the divine ancient "sacrificers," and that disfigured by the distance, and encumbered by the exuberant growth of human profane fancy, they now stand like distorted images of stars in running waves. But if Hesiod's Cosmogony and Theogony are to be viewed as caricatures of the original images, how much more so the myths in the Hebrew Genesis in the sight of those, for whom they are no more divine revelation or the word of God, than Hesiod's Theogony is for Mr. Gladstone.

"The poetry it (the Rig Veda) contains appears to me, on the contrary," says Barth "to be of a singularly refined character and

[[Vol. 2, Page]] 451 THE VEDAS WRITTEN BY INITIATES.

artificially elaborated, full of allusions and reticences, of pretensions (?) to mysticism and theosophic insight, and the manner of its expression is such as reminds one more frequently of the phraseology in use among certain small groups of initiated, than the poetic language of a large community." ("The Religions of India," p. xiii.)

We will not stop to enquire of the critic what he can know of the phraseology in use among the "initiated," or whether he belongs himself to such a group; for, in the latter case, he would hardly have used such language. But the above shows the remarkable disagreement between scholars even with regard to the external character of the Rig Veda. What, then, can any of the modern Sanskritists know about its internal or esoteric meaning, beyond the correct inference of Barth, that this Scripture has been compiled by INITIATES?

The whole of the present work is an endeavour to prove this truth. The ancient adepts have solved the great problems of science, however unwilling modern materialism may be to admit the fact. The mysteries of Life and Death were fathomed by the great master-minds of antiquity; and if they have preserved them in secrecy and silence, it is because these problems formed part of the sacred mysteries; and, secondly, because they must have remained incomprehensible to the vast majority of men then, as they do now. If such teachings are still regarded as chimeras by our opponents in philosophy, it may be a consolation to the Theosophists to learn, on good proofs, that the speculations of modern psychologists -- whether serious Idealists, like Mr. Herbert Spencer, or wool-gathering pseudo-Idealists -- are far more chimerical. Indeed, instead of resting on the firm foundation of facts in Nature, they are the unhealthy will-o'-the-wisps of materialistic imagination, of the brains that evolved them -- and no more. While they deny, we affirm; and our affirmation is corroborated by almost all the sages of antiquity. Believing in Occultism and a host of invisible Potencies for good reasons, we say: Certus sum, scio quod credidi; to which our critics reply: Credat Judaeus Apella. Neither is converted by the other, nor does such result affect even our little planet. E pur se muove!

Nor is there any need of proselytizing. As remarked by the wise Cicero, "Time destroys the speculations of man, but it confirms the judgment of nature." Let us bide our time. Meanwhile, it is not in the human constitution to witness in silence the destruction of one's gods, whether they be true or false. And as theology and materialism have combined together to destroy the old gods of antiquity and seek to disfigure every old philosophical conception, it is but just that the lovers of old wisdom should defend their position, by proving that the whole arsenal of the two is, at best, formed of new weapons made out of very old material.

[[Vol. 2, Page]] 452 THE SECRET DOCTRINE.

§ XVI.

ADAM-ADAMI.

NAMES such as Adam-Adami, used by Mr. Chwolsohn in his "Nabathean Agriculture"* and derided by M. Renan, may prove little to the profane. To the Occultist, however, once that the term is found in a work of such immense antiquity as the above cited, it proves a good deal: for instance that Adami was a manifold symbol, originating with the Aryan people, as the root word shows, and having been taken from them by the Semites and the Turanians -- as many other things were.

"Adam-Adami" is a generic compound name as old as languages are. The Secret Doctrine teaches that Ad-i was the name given to the first speaking race of mankind -- in this Round -- by the Aryans. Hence the Adonim and Adonai (the

ancient plural form of the word Adon), which the Jews applied to their Jehovah and angels, who were simply the first spiritual and ethereal sons of the earth; and the god Adonis, who in his many variations stood for the "First Lord." Adam is the Sanskrit Ada-Nath, also meaning first Lord, as Ad-Isvara, or any Ad (the first) followed by any adjective or substantive. The reason for this is that such truths were a common inheritance. It was a revelation received by the first mankind before that time which, in Biblical phraseology, is called "the period of one lip and word," or speech; knowledge expanded by man's own intuition later on, but still later hidden from profanation under an adequate symbology. The author of the "Qabbalah, (according to), the philosophical writings of Ibn Gebirol," shows the Israelite using "Adonai," (Lord) instead of Eh'yeh (I am) and YHVH, and adds that, while Adonai is rendered "Lord" in the Bible, "the lowest designation, or the Deity in Nature, the more general term Elohim, is translated God." (p. 175.)

A curious work was translated in 1860 or thereabout, by the Orientalist Chwolsohn, and presented to ever-incredulous and flippant Europe under the innocent title of Nabathean Agriculture. In the opinion of the translator that archaic volume is "a complete initiation into the mysteries of the pre-Adamite nations, on the authority of undeniably authentic documents." It is "an invaluable compendium, the full epitome of the Doctrines held, of the arts and sciences, not only of the Chaldeans, but also of the Assyrians and Canaanites of the prehistoric ages." These

[[Footnote(s)]] -----

* Vide infra.

[[Vol. 2, Page]] 453 "NABATHEAN AGRICULTURE."

"Nabatheans" -- as some critics thought -- were simply the Sabeans, or Chaldean star-worshippers. The work is a retranslation from the Arabic, into which language it was at first translated from the Chaldean.

Masoudi, the Arabic Historian, speaks of those Nabatheans, and explains their origin in this wise: "After the Deluge (?) the nations established themselves in various countries. Among these were the Nabatheans, who founded the city of Babylon, and were those descendants of Ham who settled in the same province under the leadership of Nimrod, the son of Cush, who was the son of Ham, and great-grandson of Noah. . . . This took place at the time when Nimrod received the governorship of Babylonia as the delegate of Dzahhak named Biurasp."

The translator, Chwolsohn, finds that the assertions of this historian are in perfect accord with those of Moses in Genesis; while more irreverent critics might express the opinion that for this very reason their truth should be suspected. It is useless to argue this point, which is of no value in the present question. The weather-beaten, long-since-buried problem, and the difficulty of accounting, on any logical ground, for the phenomenal derivation of millions of people of various races, of many civilized nations and tribes, from three couples (Noah's sons) in 346 years* after the Deluge, may be left to the Karma of the author of Genesis, whether he is called Moses or Ezra. That which is interesting in the work noticed is its, the doctrines enunciated in it, which are again, if read esoterically, almost all of them identical with the Secret Teachings.

Quatremere suggested that this book might have been simply a copy made under Nebuchadnezzar II., from some Hamitic treatise, "infinitely more ancient," while the author maintains, on "internal and external evidence," that its Chaldean original was written out from the oral discourses and teachings of a wealthy Babylonian landowner, named Qu-tamy, who had used for those lectures still more ancient materials. The first Arabic translation is placed by Chwolsohn so far back as the XIII. cent. B.C. On the first page of this "revelation," the author, or amanuensis, Qu-tamy, declares that "the doctrines propounded therein, were originally told by Saturn to the Moon, who communicated them to her idol, which idol revealed them to her devotee, the writer -- the adept Scribe of that work -- Qu-tamy.

The details given by the God for the benefit and instruction of mortals, show periods of incalculable duration and a series of numberless kingdoms and Dynasties that preceded the appearance on Earth of

[[Footnote(s)]] -----

* See Genesis and the authorised Chronology. In Chapt. ix. "Noah leaveth the Ark" "B.C. 2348." Chapter x. "Nimrod the first Monarch," stands over "B.C. 1998."

[[Vol. 2, Page]] 454 THE SECRET DOCTRINE.

Adami (the "red-earth"). These periods have aroused, as might have been expected, the defenders of the chronology of the Biblical dead-letter meaning almost to fury. De Rougemont was the first to make a levee-in-arms against the translator. He reproaches him* with "sacrificing Moses to an anonymous author." Berosus, he urges, "however great were his chronological errors, was at least in perfect accord with the prophet with regard to the first men, since he speaks of Alorus-Adam, of Xisuthrus-Noah, and of Belus-Nimrod," etc. "Therefore," he adds, "the work must be an APOCRYPHA to be ranged with its contemporaries -- the fourth book of Esdras, that of Enoch, the Sibylline Oracles, and the Book of Hermes -- every one of these dating no further back than two or three centuries B.C." Ewald came down still harder on Chwolsohn, and finally M. Renan. In the "Revue Germanique,"** the ex-pupil pulls down the authority of his master, by asking him to show a reason why his Nabathean Agriculture should not be the fraudulent work of some Jew of the third or fourth century of our era? It can hardly be otherwise -- argues the romancer of the "Life of Jesus." Since, in this in-folio on astrology and Sorcery we recognise in the personages introduced by Qu-tamy, all the patriarchs of the Biblical legends, such as Adam-Adami, Anouka-Noah, and his Ibrahim-Abraham etc., etc."

This is no reason, since Adam and others are generic names. Meanwhile it is humbly submitted that, all things considered, an apocrypha -- if even of the third century A.D., instead of the thirteenth century B.C., as suggested by Quatremere -- is old enough to appear genuine as a document, and so satisfy the demands of the most exacting archaeologist and critic. For, even admitting, for argument's sake, that this literary relic has been compiled by "some Jew of the third century of our era" -- what of that? Leaving the credibility of its doctrines for a moment aside, why should it be

less entitled to a hearing, or less instructive as reflecting older opinions, than any other religious work, also a "compilation from old texts" or oral tradition -- of the same or even a later age? In such case we should have to reject and call "apocryphal" the Kuran -- two centuries older, though we know it to have sprung, Minerva-like, direct from the brain of the Arabian prophet; and we should have to pooh-pooh all the information we can get from the Talmud, which, in its present form, was also compiled from older materials, and is not earlier than the IX. century of our era.

The curious "Bible" of the Chaldean adept, and the various criticisms upon it (as in the Chwolsohn's translation), are noticed, because it has an important bearing upon a great portion of the present work.

[[Vol. 2, Page]] 455 MANY VIEWS OF MANY MINDS.

With the exception of M. Renan, an iconoclast by principle -- so pointedly called by Jules Lemaitre "le Paganini du Neant" -- the worst fault found with the work is, it would seem, that the "apocrypha" pretends to have been communicated as a revelation to an adept by, and from, the "idol of the moon," who received it from "Saturn." Hence, very naturally, it is "a fairy tale all round." To this there is but one answer: it is no more a fairy tale than the Bible, and if one falls, the other must follow it. Even the mode of divination through "the idol of the moon" is the same as practised by David, Saul, and the High Priests of the Jewish Tabernacle by means of the Teraphim. In Volume III., Part II. of this present work, the practical methods of such ancient divination will be found.

The "Nabathean Agriculture" is a compilation indeed; it is no apocrypha, but the repetition of the tenets of the Secret Doctrine under the exoteric Chaldean form of national symbols, for the purpose of "cloaking" the tenets, just as the Books of Hermes and the Puranas are Egyptian and Hindu attempts at the same. The work was as well known in antiquity as it was during the Middle Ages. Maimonides speaks of it, and refers more than once to this Chaldeo-Arabic MS., calling the Nabatheans by their co-religionary name, i.e., "star-worshippers," or Sabeans, but yet failing to see in this disfigured word "Nabatheans" the mystic name of the caste devoted to Nebo (god of secret wisdom), which shows on its face that the Nabatheans were an occult Brotherhood.* The Nabatheans who, according to the Persian Yezidi, originally came to Syria from Busrah, were the degenerate members of that fraternity; still their religion, even at that late day, was purely Kabalistic.** Nebo is the deity of the planet Mercury, and Mercury is the god of Wisdom or Hermes, and Budha, which the Jews called [[hebrew]] "the Lord on high, the aspiring," . . . and the Greeks Nabo, [[Nabo]], hence Nabatheans. Notwithstanding that Maimonides calls their doctrines "heathenish foolishness" and their archaic literature "Sabaeorum foetum," he places their "agriculture," the Bible of Qu-tamy, in the first rank of Archaic literature; and Abarbinel

[[Footnote(s)]] -----

* "I will mention to thee the writings . . . respecting the belief of the Sabeans," he says. "The most famous is the Book 'The Agriculture of the Nabatheans,' which has been translated by Ibn Wahohijah. This book is full of heathenish foolishness. . . It speaks of preparations of TALISMANS, the drawing down of the powers of the SPIRITS, MAGIC, DEMONS, and ghouls, which make their abode in the desert." (Maimonides, quoted by Dr. D. Chwolsohn, "Die Ssabier und der Ssabismus," II., p. 458.) The Nabatheans of Mount Lebanon believed in the Seven Archangels, as their forefathers had believed in the Seven Great Stars, the abodes and bodies of these Archangels, believed in to this day by the Roman Catholics, as is shown elsewhere.

** See "Isis Unveiled," Vol. II., p. 197.

[[Vol. 2, Page]] 456 THE SECRET DOCTRINE.

praises it in unmeasured terms. Spencer, quoting the latter, speaks of it as that "most excellent Oriental work," adding (vol. 1., p. 354) that by Nabatheans, the Sabeans, the Chaldeans, and the Egyptians, in short all those nations against whom the laws of Moses were most severely enacted, have to be understood.

Nebo, the oldest God of Wisdom of Babylonia and Mesopotamia, was identical with the Hindu Budha and Hermes-Mercury of the Greeks. A slight change in the sexes of the parents is the only alteration. As Budha was the Son of Soma (the Moon) in India, and of the wife of Brihaspati (Jupiter), so Nebo was the son of Zarpa-nitu (the Moon deity) and of Merodach, who had become Jupiter, after having been a Sun God. As Mercury the planet, Nebo was the "overseer" among the seven gods of the planets; and as the personification of the Secret Wisdom he was Nabin, a seer and a prophet. The fact that Moses is made to die and disappear on the mount sacred to Nebo, shows him an initiate and a priest of that god under another name; for this God of Wisdom was the great creative deity, and was worshipped as such, not alone at Borsippa in his gorgeous Temple, or planet-tower. He was likewise adored by the Moabites, the Canaanites, the Assyrians, and throughout the whole of Palestine: then why not by the Israelites? "The planetary temple of Babylon" had "its holy of holies" within the shrine of Nebo, the prophet god of Wisdom. We are told in the Hibbert Lectures, "The ancient Babylonians had an intercessor between men and the gods . . . and Nebo, was the 'proclaimer' or 'prophet,' as he made known the desire of his father Merodach."

Nebo is a creator, like Budha, of the Fourth and also of the Fifth Race. For the former starts a new race of Adepts, and the latter, the Solar-Lunar Dynasty, or the men of these Races and Round. Both are the Adams of their respective creatures. Adam-Adami is a personation of the dual Adam: of the paradigmic Adam-Kadmon, the creator, and of the lower Adam, the terrestrial, who, as the Syrian Kabalists have it, had only nephesh, "the breath of life," but no living soul, until after his Fall.

If, therefore, Renan persists in regarding the Chaldean Scriptures -- or what remains of them -- as apocryphal, it is quite immaterial to truth and fact. There are other Orientalists who may be of a different opinion; and even were they not, it would still really matter very little. These doctrines contain the teachings of Esoteric philosophy, and this must suffice. To those who understand nothing of symbology it may appear astrolatry, pure and simple, or to him who would conceal the esoteric truth, even "heathenish foolishness." Maimonides, however, while expressing scorn for the esotericism in the religion of other nations, confessed esotericism and symbology in his own, preached

[[Vol. 2, Page]] 457 THE KABALISTIC FOUR ADAMS.

silence and secrecy upon the true meaning of Mosaic sayings, and thus came to grief. The Doctrines of Qu-tamy, the Chaldean, are, in short, the allegorical rendering of the religion of the earliest nations of the Fifth Race.

Why then should M. Renan treat the name "Adam-Adami" with such academical contempt? The author of the "Origins of Christianity" evidently knows nothing of the "origins of pagan symbolism" or of Esotericism either, otherwise he would have known that the name was a form of universal symbol, referring, even with the Jews, not to one man, but to four distinct humanities or mankinds. This is very easily proven.

The Kabalists teach the existence of four distinct Adams, or the transformation of four consecutive Adams, the emanations from the Dyooknah (divine phantom) of the Heavenly Man, an ethereal combination of Neschamah, the highest Soul or Spirit: this Adam having, of course, neither a gross human body, nor a body of desire. This "Adam" is the prototype (tzure) of the second Adam. That they represent our Five Races is certain, as everyone can see by their description in the Kabala: the first being the "perfect, Holy Adam"; . . . "a shadow that disappeared" (the Kings of Edom) produced from the divine Tzelem (Image); the second is called the protoplasmic androgyne Adam of the future terrestrial and separated Adam; the third Adam is the man made of "dust" (the first, innocent Adam); and the fourth, is the supposed forefather of our own race -- the Fallen Adam. See, however, the admirably clear description of these in Mr. Isaac Myer's "Qabbalah," p. 418, et seq. He gives only four Adams, because of the Kings of Edom, no doubt. "The fourth Adam," he writes, ". . . was clothed with skin, flesh, nerves, etc. This answers to the Lower Nephesh and Guff, i.e., body, united. He has the animal power of reproduction and continuance of species," and this is the human Root-Race.

It is just at this point that the modern Kabalists -- led into error by the long generations of Christian mystics who have tampered with the Kabalistic records wherever they could -- diverge from the Occultists in their interpretations, and take the later thought for the earlier idea. The original Kabala was entirely metaphysical, and had no concern with animal, or terrestrial sexes; the later Kabala has suffocated the divine ideal under the heavy phallic element. The Kabalists say:-- "God made man male and female." "Among the Qabbalists, the necessity to continued creation and existence is called the Balance," says the author of Qabbalah; and being without this "Balance," connected with Ma-qom (mysterious place),* even the First Race is not,

[[Footnote(s)]] -----

* Simply, the womb, the "Holy of Holies" with the Semites.

[[Vol. 2, Page]] 458 THE SECRET DOCTRINE.

as we have seen, recognized by the Sons of the Fifth Adam. From the highest Heavenly Man, the upper Adam who is "male female" or Androgyne, down to the Adam of dust, these personified symbols are all connected with sex and procreation. With the Eastern Occultists it is entirely the reverse. The sexual relation they consider as a "Karma" pertaining only to the mundane relation of man, who is dominated by Illusion, a thing to be put aside, the moment that the person becomes "wise." They considered it a most fortunate circumstance if the Guru (teacher) found in his pupil an aptitude for the pure life of Brahmacharya. Their dual symbols were to them but the poetical imagery of the sublime correlation of creative Cosmic forces. And this ideal conception is found beaming like a golden ray upon each idol, however coarse and grotesque, in the crowded galleries of the sombre fanes of India and other Mother lands of cults.

This will be demonstrated in the following Section.

Meanwhile, it may be added that, with the Gnostics, the second Adam also emanates from the Primeval Man, the Ophite Adamas, in "whose image he is made"; the third, from this second -- an Androgyne. The latter is symbolized in the 6th and 7th pairs of the male-female AEons, --Amphian-Essumene, and Vannanin-Lamer (Father and Mother; vide Valentinian Table, in Epiphanius) -- while the fourth Adam, or Race, is represented by a Priapean monster. The latter -- a post-Christian fancy -- is the degraded copy of the ante-Christian Gnostic symbol of the "Good One," or "He, who created before anything existed," the Celestial Priapus -- truly born from Venus and Bacchus when that God returned from his expedition into India, for Venus and Bacchus are the post-types of Aditi and the Spirit. The later Priapus, one, however, with Agathodaemon, the Gnostic Saviour, and even with Abraxas, is no longer the glyph for abstract creative Power, but symbolizes the four Adams, or Races, the fifth being represented by the five branches cut off from the Tree of Life on which the old man stands in the Gnostic gems. The number of the Root-Races was recorded in the ancient Greek temples by the seven vowels, of which five were framed in a panel in the Initiation halls of the Adyta. The Egyptian glyph for it was a hand with five fingers spread, the fifth or little finger being only half-grown, and also five "N's" -- hieroglyphs standing for that letter. The Romans used the five vowels A E I O V in their fanes; and this archaic symbol was adopted during the middle ages as a motto by the House of the Hapsburgs. Sic transit gloria!

[[Vol. 2, Page]] 459 THE "GOD" SUB ROSA.

§ XVII.

THE "HOLY OF HOLIES."

ITS DEGRADATION.

THE Sanctum Sanctorum of the Ancients, i.e., that recess on the Western side of the Temple which was enclosed on three sides by blank walls and had its only aperture or door hung over with a curtain -- also called the Adytum -- was common to all ancient nations.

Nevertheless, a great difference is found between the secret meanings of this symbolical place, in the esotericism of the Pagans and that of later Jews; though the symbology of it was originally identical throughout the ancient Races and Nations. The Gentiles, by placing in the Adytum a sarcophagus, or a tomb (taphos), and the solar-god to whom the temple was consecrated, held it, as Pantheists, in the greatest veneration. They regarded it -- in its esoteric meaning -- as the symbol of resurrection, cosmic, solar (or diurnal), and human. It embraced the wide range of periodical and (in time) punctual, Manvantaras, or the re-awakenings of Kosmos, Earth, and Man to new existences; the sun being the most poetical and also the most grandiose symbol of the same in heaven, and man -- in his re-incarnations -- on Earth. The Jews -- whose realism, if judged by the dead letter, was as practical and gross in the days of Moses as it is now* -- in the course of their estrangement from the gods of their pagan neighbours, consummated a national and levitical polity, by the device of setting forth their Holy of Holies as the most solemn sign of their Monotheism -- exoterically; while seeing in it but a universal phallic symbol -- esoterically. While the Kabalists knew but Ain-Soph and the "gods" of the Mysteries, the Levites had no tomb, no god in their adytum but the "Sacred" Ark of the Covenant -- their "Holy of Holies."

When the esoteric meaning of this recess is made clear, however, the profane will be better able to understand why David danced "uncovered" before the ark of the Covenant, and was so anxious to appear vile for the sake of his "Lord," and base in his own sight. (See 2 Samuel vi. 16-22.)

The ark is the navi-form Argha of the Mysteries. Parkhurst, who has

[[Footnote(s)]] -----

* But it was not so, in reality, witness their prophets. It is the later Rabbis and the Talmudic scheme that killed out all spirituality from the body of their symbols; leaving only their Scriptures -- a dead shell, from which the Soul has departed.

[[Vol. 2, Page]] 460 THE SECRET DOCTRINE.

a long dissertation upon it in his Greek dictionary, and who never breathes a word about it in the Hebrew lexicon, explains it thus:-- "[Arche] in this application answers to the Hebrew rasiit or wisdom . . . a word which had the meaning of the emblem of the female generative power, the Arg or Arca, in which the germ of all nature was supposed to float or brood on the great abyss during the interval which took place after every mundane cycle." Quite so; and the Jewish ark of the Covenant had precisely the same significance; with the supplementary addition that, instead of a beautiful and chaste sarcophagus (the symbol of the matrix of Nature and resurrection) as in the Sanctum sanctorum of the pagans, they had the ark made still more realistic in its construction by the two cherubs set up on the coffer or ark of the covenant, facing each other, with their wings spread in such a manner as to form a perfect yoni (as now seen in India). Besides which, this generative symbol had its significance enforced by the four mystic letters of Jehovah's name, namely, [[hebrew]]; or [[hebrew]] meaning Jod (membrum Virile, see Kabala); [[hebrew]] (the womb); [[hebrew]] (Vau, a crook or a hook, a nail), and [[hebrew]] again, meaning also "an opening"; the whole forming the perfect bisexual emblem or symbol or Y (e) H (o) V (a) H, the male and female symbol.

Perhaps also, when people realise the true meaning of the office and title of the Kadesh Kadeshim, "the holy ones," or "the consecrated to the temple of the Lord," -- the "Holy of Holies" of the latter may assume an aspect far from edifying.

Iacchus again is Iao or Jehovah; and Baal or Adon, like Bacchus, was a phallic god. "Who shall ascend into the hill (the high place) of the Lord?" asks the holy king David, "who shall stand in the place of his Kadushu [[hebrew]]?" (Psalms xxiv. 3). Kadesh may mean in one sense to devote, hallow, sanctify, and even to initiate or to set apart; but it also means the ministry of lascivious rites (the Venus-worship) and the true interpretation of the word Kadesh is bluntly rendered in Deuteronomy xxiii. 17; Hosea iv. 14; and Genesis xxxvii. from verses 15 to 22. The "holy" Kadeshuth of the Bible were identical, as to the duties of their office, with the Nautch-girls of the later Hindu pagodas. The Hebrew Kadeshim, or galli, lived "by the house of the Lord, where the women wove hangings for the grove," or the bust of Venus-Astarte, says verse the seventh in the twenty-third chapter of 2 Kings.

The dance performed by David round the ark was the "circle-dance." said to have been prescribed by the Amazons for the Mysteries. Such was the dance of the daughters of Shiloh (Judges xxi. 21, 23 et passim), and the leaping of the prophets of Baal (I Kings xviii. 26). It was simply a characteristic of the Sabeian worship, for it denoted the motion of the planets round the sun. That the dance was a Bacchic frenzy is

[[Vol. 2, Page]] 461 WHAT WAS THE CIRCLE-DANCE.

apparent. Sistra were used on the occasion, and the taunt of Michal and the King's reply are very expressive. Isis Unveiled, Vol. II., p. 49.

"The Ark, in which are preserved the germs of all living things necessary to repeople the earth, represents the survival of life, and the supremacy of spirit over matter, through the conflict of the opposing powers of nature. In the Astro-Theosophic chart of the Western Rite, the Ark corresponds with the navel, and is placed at the sinister side, the side of the woman (the moon), one of whose symbols is the left pillar of Solomon's temple -- BOAZ. The umbilicus is connected through the placenta with the receptacle in which are fructified the embryos of the race. . . The Ark is the sacred Argha of the Hindus, and thus the relation in which it stands to Noah's ark may be easily inferred when we learn that the Argha was an oblong vessel, used by the high priests as a sacrificial chalice in the worship of Isis, Astarte, and Venus-

Aphrodite, all of whom were goddesses of the generative powers of nature, or of matter -- hence representing symbolically the Ark containing the germs of all living things." ("Isis Unveiled," Vol. II., p. 444.) Mistaken is he who accepts the Kabalistic works of to-day, and the interpretations of the Zohar by the Rabbis, for the genuine Kabalistic lore of old!* For no more to-day than in the day of Frederick von Schelling does the Kabala accessible to Europe and America, contain much more than "ruins and fragments, much distorted remnants still of that primitive system which is the key to all religious systems" (See Kabbala, by Prof. Franck, Preface). The oldest system and the

[[Footnote(s)]] -----

* The author of the "Qabbalah" makes several attempts to prove conclusively the antiquity of the Zohar. Thus he shows that Moses de Leon could not be the author or the forger of the Zoharic works in the XIIIth century, as he is accused of being, since Ibn Gebirol gave out the same philosophical teaching 225 years before the day of Moses de Leon. No true Kabbalist or scholar will ever deny the fact. It is certain that Ibn Gebirol based his doctrines upon the oldest Kabalistic sources, namely, the "Chaldean Book of Numbers," as well as some no longer extant Midrashim, the same, no doubt, as those used by Moses de Leon. But it is just the difference between the two ways of treating the same esoteric subjects, which, while proving the enormous antiquity of the esoteric system, points to a decided ring of Talmudistic and even Christian sectarianism in the compilation and glossaries of the Zoharic system by Rabbi Moses. Ibn Gebirol never quoted from the Scriptures to enforce the teachings (vide I. Myer's Qabbalah, p. 7). Moses de Leon has made of the Zohar that which it has remained to this day, "a running commentary on the . . . Books of the Pentateuch" (ibid.), with a few later additions made by Christian hands. One follows the archaic esoteric philosophy; the other, only that portion which was adapted to the lost Books of Moses restored by Ezra. Thus, while the system, or the trunk on which the primitive original Zohar was engrafted, is of an immense antiquity many of the (later) Zoharic offshoots are strongly coloured by the peculiar views held by Christian Gnostics (Syrian and Chaldean), the friends and co-workers of Moses de Leon who, as shown by Munk, accepted their interpretations.

[[Vol. 2, Page]] 462 THE SECRET DOCTRINE.

Chaldean Kabala were identical. The latest renderings of the Zohar are those of the Synagogue in the early centuries -- i.e., the Torah, dogmatic and uncompromising.

The "King's Chamber" in Cheops' Pyramid is thus an Egyptian "Holy of Holies." On the days of the Mysteries of Initiation, the candidate, representing the solar god, had to descend into the Sarcophagus, and represent the energizing ray, entering into the fecund womb of Nature. Emerging from it on the following morning, he typified the resurrection of life after the change called Death. In the great MYSTERIES his figurative death lasted two days, when with the Sun he arose on third morning, after a last night of the most cruel trials. While the postulant represented the Sun -- the all-vivifying Orb that "resurrects" every morning but to impart life to all -- the Sarcophagus was symbolic of the female principle. This, in Egypt; its form and shape changed with every country, provided it remained a vessel, a symbolic navis or boat-shaped vehicle, and a container, symbolically, of germs or the germ of life. In India, it is the "golden" Cow through which the candidate for Brahminism has to pass if he desires to be a Brahmin, and to become DWIJA ("reborn a second time"). The crescent-form Argha of the Greeks was the type of the Queen of Heaven -- Diana, or the Moon. She was the great Mother of all Existences, as the Sun was the Father. The Jews, previous to, as well as after their metamorphosis of Jehovah into a male god, worshipped Astoreth, which made Isaiah declare: "Your new moons and feasts my soul hateth," (i. 14); saying which, he was evidently unjust. Astoreth and the New-moon (the crescent argha) festivals, had no worse significance as a form of public worship than had the hidden meaning of the moon in general, which was Kabalistically connected directly with, and sacred to, Jehovah, as is well known; with the sole difference that one was the female and the other the male aspect of the moon, and of the star Venus.

The Sun (the Father), the Moon (the Mother), and Mercury-Thoth (the Son), were the earliest Trinity of the Egyptians, who personified them in Osiris, Isis, and Thoth (Hermes). In [[PISTIS SOPHIA]], the seven great gods, divided into two triads and the highest God (the Sun) are: the lower [[Tridunameis]], whose powers reside respectively in Mars, Mercury and Venus; and the higher Triad ("the three unseen gods") who dwell in the Moon, Jupiter and Saturn; (vide §§ 359 and 361 et seq).

This requires no proof. Astoreth was in one sense an impersonal symbol of nature, the ship of Life carrying throughout the boundless Sidereal Ocean the germs of all being. And when she was not identified with Venus, like every other "Queen of Heaven" to whom cakes and buns were offered in sacrifice, Astoreth became the reflection of the

[[Vol. 2, Page]] 463 CHRISTIAN SYMBOLISM

Chaldean "Nuah, the Universal Mother" (female Noah, considered as one with the ark), and of the female triad, Ana, Belita and Davikina; called, when blended into one, "Sovereign goddess, lady of the Nether Abyss, Mother of gods, Queen of the Earth, and Queen of fecundity." Later, Belita or Damti (the sea), the Mother of the City of Erech (the great Chaldean Necropolis) became Eve; and now she is Mary the Virgin, in the Latin Church, represented as standing on the crescent-moon, and, at times on the Globe, to vary the programme. The navi, or ship-like form of the crescent, which blends in itself all those common symbols of the ship of life, such as Noah's ark, the Yoni of the Hindus, and the ark of the Covenant, is the female symbol of the Universal "Mothers of the gods," and is now found under its Christian symbol in every Church, as the nave (from navis, the ship).* The navis -- the Sidereal vessel -- is fructified by the Spirit of Life -- the male God; or, as the learned Kenealy (in his Apocalypse) calls it very appropriately -- the Holy Spirit. In Western religious symbology the Crescent was the male, the full moon, the female aspect of that universal Spirit. "The mystic word Alm, which the prophet Mahomet prefixed to many chapters of the Koran, alludes to her as the Alm, the immaculate Virgin of the heavens. And -- the sublime ever falling into the ridiculous -- it is from this root Alm that we have to derive the word Almeh -- the Egyptian dancing-girls. The latter are "Virgins" of the same type as the Nautchnis in India, and the (female) Kadeshim, the Holy Ones of the Jewish temples (those consecrated to Jehovah, who represented both sexes), whose holy functions in the Israelite fanes were identical with those of the Nautchnis.

Now Eustathius declares that ([IO]) IO means the moon, in the dialect of the Argians; and it was one of the names of the same in Egypt. Says Jablonski, "[IO], loh, Aegyptiis LUNAM significat neque habent illi in communi sermonis usu, aliud nomen quo Lunam, designat praeter IO." The pillar and Circle (IO), now constituting the first decimal number, and which with Pythagoras was the perfect number contained in the Tetractis,** became later a pre-eminently phallic Number -- amongst the Jews, foremost of all, with whom it is the male and female Jehovah.

This is how a scholar explains it:--

[[Footnote(s)]] -----

* Timaeus, the Locrian, speaking of Arka, calls her "the Principle of best things." The word arcane, "hidden," or secret, is derived from Arka. "To no one is the Arcane shown except to the most High" (Codex Nazareus), alluding to nature the female, and Spirit, the male Power. All the Sun-Gods were called Archagetos "born from the Arka," the divine Virgin-Mother of the Heavens.

** Because composed of ten dots arranged triangularly in four rows. It is the Tetragrammaton of the Western Kabalists.

[[Vol. 2, Page]] 464 THE SECRET DOCTRINE.

"I find, on the Rosetta stone of Uhlemann, the word mouth, also in Seiffarth, viz., the name of the Moon used as a cycle of Time, hence the lunar month from the hieroglyph [[diagram]] with [[diagram]] and [[diagram]] as determinatives given, as the Coptic I O H, or I O H. The Hebrew [[hebrew]] may also be used as I O H, for the letter yau, or [[hebrew]], was used for o and for u, and for v or w. This, before the Massora, of which the . was used as [[hebrew]] = o, [[hebrew]] = u, and [[hebrew]] = v or w. Now I had worked it out by original search that the great distinctive function of the god-name Jehovah was designative of the influence of the moon as the causative of generation, and as of its exact value as a lunar year in the natural measure of days, as you will fully see, And here comes this linguistic same word from a source far more ancient; viz., the Coptic, or rather from the old Egyptian in time of the Coptic." . . . (From a MS.)

This is the more remarkable when Egyptology compares this with the little which it knows about the Theban triad -- composed of Ammon, Mouth, (or Mout) and their son Khonsoo. This triad was, when united, contained in the moon as their common symbol; and when separated, it was Khonsoo who was the god, LUNUS, being thus confounded with Thot and Phtah. His mother Mout(h) -- the name signifying Mother, by the bye, not the moon, which was only her Symbol -- is called the "Queen of Heaven"; the "Virgin," etc., etc., as she is an aspect of Isis, Hathor, and other mother goddesses. She was less the wife than the mother of Ammon, whose distinct title is "the husband of his Mother." In a statuette at Boulaq, Cairo, this triad is represented (Number 1981 Serapeum, Greek Period) as a mummy-god holding in his hand three different sceptres, and bearing the lunar disc on his head, the characteristic tress of hair showing the design of representing it as that of an infant god, or "the Sun," in the triad. He was the god of Destinies in Thebes, and appears under two aspects (1) as "Khonsoo, the Lunar god, and Lord of Thebes, Nofir-hotpoo -- 'he who is in absolute repose'; and (2) as Khonsoo Iri-sokhroo, or 'Khonsoo, who executes Destiny': the former preparing the events and conceiving them for those born under his generative influence; the latter putting them into action." (See Maspero's Definitions). Under theogonic permutations Ammon becomes Horus, HOR-AMMON, and Mout(h)-Isis is seen suckling him in a statuette of the Saitic period. (Abydos.) In his turn, in this transformed triad, Khonsoo becomes Thot-Lunus, "he who operates salvation." His brow is crowned with the head of an ibis decorated with the lunar disc and the diadem called IO-tef.

Now all these symbols are certainly found reflected in (some believe them identical with) the Yave, or Jehovah of the Bible. This will be

[[Vol. 2, Page]] 465 THE "FOUR-FACED" BRAHMA.

made plain to any one who reads "The Source of Measures," or "Hebrew Egyptian Mystery," and understands the undeniable, clear, and mathematical proofs that the esoteric foundations, or the system used in the building of the Great Pyramid, and the architectural measurements in the Temple of Solomon (whether the latter be mythical or real), Noah's ark, and the ark of the Covenant, are the same. If anything in the world can settle the dispute that the old, as much as the later, Jews (post-Babylonian), and especially the former, built their theogony and religion on the very same foundation as all Pagans did, it is the work in question.

And now it may be as well to remind the reader of that which was said of I A O, in our work, "Isis Unveiled."

"No other deity affords such a variety of etymologies as Jaho, nor is there any name which can be so variously pronounced. It is only by associating it with the Masoretic points that the later Rabbins succeeded in making Jehovah read 'Adonai' -- or Lord, as Philo Byblius spells it in Greek letters [[IEUO]] -- IEVO. Theodoret says that the Samaritans pronounced it Jahe (yahra), and the Jews Yaho; which would make it as we have shown, I -- Ah -- O. Diodorus states that 'among the Jews they relate that Moses called the god lao.' It is on the authority of the Bible itself, therefore, that we maintain that before his initiation by Jethro, his father-in-law, Moses had never known the word Jaho."*

The above receives corroboration in a private letter from a very learned Kabalist. In STANZA IV. and elsewhere it is stated that exoterically Brahma (neuter), so flippantly and so often confused by the Orientalists with Brahma -- the male, is sometimes called Kala-hansa (Swan in the eternity), and the esoteric meaning of A-ham-sa, is given. (I -- am -- he, so ham being equal to sah "he," and aham "I" -- a mystic anagram and permutation). It is also the "four-faced" Brahma, the Chatur mukha (the perfect cube) forming itself within, and from the infinite circle; and again the use of the 1, 3, 5, and [[diagram]] = 14, as the esoteric hierarchy of the Dhyana Chohans is explained. On this, the said correspondent comments in this way:--

"Of the 1, 3, 5, and twice 7, intending and very especially 13,514, which on a circle may be read as 31415 (or [[pi]] value), I think there cannot be a possibility of doubting; and especially when considered with symbol marks on sacr,** 'Chakra,' or Circle of Vishnu.

"But let me carry your description a step further:-- You say 'The One from

[[Footnote(s)]] -----

* The student must be aware that Jethro is called the "father-in-law" of Moses; not because Moses was really married to one of his seven daughters. Moses was an Initiate, if he ever existed, and as such an ascetic, a nazir, and could never be married. It is an allegory like everything else. Zipporah (the shining) is one of the personified Occult Sciences given by Revel-Jethro, the Midian priest Initiator, to Moses, his Egyptian pupil. The "well" by which Moses sat down in his flight from the Pharaoh symbolizes the "well of Knowledge."

** In Hebrew the phallic symbol lingham and Yoni.

[[Vol. 2, Page]] 466 THE SECRET DOCTRINE.

the Egg, the six, and the five (See Stanza IV., Book I.) give the numbers 1065, the value of the first born'. . . . If it be so, then in 1065 we have the famous Jehovah's name, the Jve or Jave, or Jupiter, and by change of [[hebrew]] to [[hebrew]] or h to n, then [[hebrew]] or the Latin Jun or Juno, the base of the Chinese riddle, the key measuring numbers of Sni (Sinai) and Jehovah coming down on that mount, which numbers (1,065) are but the use of our ratio of 113 to 355 because $1,065 = 355 \times 3$ which is circumference to a diameter of $113 \times 3 = 339$. Thus the first born of Brahma Prajapati (or any Demiurgos) indicates a measuring use of a circular relation taken from the Chakra (or Vishnu) and, as stated above, the Divine manifestation takes the form of life and the first born."

"It is a most singular thing: At the entrance passage to the King's chamber the measurement from the surface of the Great Step* and the Grand Gallery to the top of the said gallery, is by the very careful measures of Piazzi Smyth 339 inches.

[[diagram]]

Take A as a centre and with this radius describe a circle; the diameter of that circle will be $339 \times 2 = 678$, and these numbers are those of the expression and the raven, in the 'Dove and raven' scenes or pictures of the Flood of Noah; (the radius is taken to show division into two parts, which are 1,065 each) for $113 (\text{man}) \times 6 = 678$; and the diameter to a circumference of $1,065 \times 2$ -- so we have here an indication of cosmic man on this high grade or step, at the entrance of the King's Chamber (the Holy of Holies) -- which is the womb. Now this passage is of such a height that a man to enter it must stoop. But a man upright is 113, and broken, or stooping, he becomes $133 / 2 = 5.65 \times 10$, [[over]] [[hebrew]] or Jehovah. That is, he personifies** him as entering the Holy of Holies. But by Hebrew Esotericism the chief function of Jehovah was child giving, etc., and that because, by the numbers of his name, he was the measure of the lunar year, which cycle of time, because by its factor of 7 (seven) it ran so co-ordinately with the periods of the quickening, viability, and gestation, was taken as the causative of the generative action and therefore was worshipped and besought."

This discovery connects Jehovah still more with all the other creative and generative gods, solar and lunar, and especially with "King" Soma, the Hindu Deus Lunus, the moon, because of the esoteric influence attributed to this planet in Occultism. There are other corroborations of it, however, in Hebrew tradition itself. Adam is spoken of in

[[Footnote(s)]] -----

* It is on that step that one arrives on the plane of the level or floor and open entrance to the King's chamber, the Egyptian "Holy of Holies."

** The candidate for initiation always personified the god of the temple he belonged to, as the High Priest personified the god at all times; just as the Pope now personates Peter and even Jesus Christ upon entering the inner altar -- the Christian "Holy of Holies."

[[Vol. 2, Page]] 467 THE ETYMOLOGY OF "SACRAMENT."

Maimonides (More Nevochim, "The Guide of the Perplexed" -- truly!) in two aspects; as a man, like all others born of a man and a woman, and -- as the prophet of the Moon; the reason of which is now made apparent, and has to be explained.

Adam, as the supposed great "Progenitor of the human race," is, as Adam Kadmon, made in the image of God -- a priapic image, therefore. The Hebrew words sacr and n'cabvah are, literally translated, lingham (phallus) and yoni, notwithstanding their translation in the Bible (Genesis i. v. 27.) "male and female." As said there "God creates 'Man in his own image'. . . . in the image of God created he him, male and female created he them," the androgyne Adam-Kadmon. Now this Kabbalistic name is not that of a living man, nor even of a human or divine Being, but of the two sexes or organs of procreation, called in Hebrew with that usual sincerity of language pre-eminently Biblical, sacr and n'cabvah*; these two being, therefore, the image under which the "Lord God" appeared usually to his chosen people. That this is so, is now undeniably proven by almost all the symbologists and Hebrew scholars as well as by the Kabala. Therefore Adam is in one sense Jehovah. This makes plain another general tradition in the East mentioned in Gregorie's "Notes and Observations upon several passages in Scripture" (1684. Vol. 1 pp. 120-21) and quoted by Hargrave Jennings in his Phallicism: "That Adam was commanded by God that his dead body should be kept above ground till committed to the middle of the earth by a priest of the most High God." Therefore, "Noah daily prayed in the ark before the BODY OF ADAM," or before the Phallus in the ark, or Holy of Holies, again. He who is a Kabbalist and accustomed to the incessant permutation of Biblical names, once they are interpreted numerically and symbolically, will understand what is meant. Jehovah, from the two words of which his name is composed, "makes up the original idea of male-female as birth-originator, for the [[diagram]] was the membrum virile and Houak was Eve." So . . . "the perfect one, as originator of measures, takes also the form of birth origin, as hermaphrodite one; hence the phallic use of form." ("Source of

Measures," 159). Besides the same author shows and demonstrates numerically and geometrically that (a) Arets, earth, Adam, man, and H'Adam are cognate with each other, and are personified in the Bible under one form, as the Egyptian and Hebrew Mars, god of the generation; and (b) that Jehovah, or Jah, is

[[Footnote(s)]] -----

* Jehovah says to Moses "the Summation of my name is Sacr, the carrier of the germ" -- phallus. "It is the vehicle of the annunciation, and the sacr has passed down through ages to the sacr-factum of the Roman priest, and the sacr-fice, and sacrament of the English speaking race." (Source of Measures, p. 236) Thence marriage is a sacrament in the Greek and Roman Churches.

[[Vol. 2, Page]] 468 THE SECRET DOCTRINE.

Noah, or Jehovah is Noah in Hebrew would be [[hebrew]], or literally in English, Inch."

The above affords, then, a key to the said traditions. Noah, a divine permutation, the supposed saviour of Humanity, who carries in his ark or argha (the moon), the germs of all living things, worships before the "body of Adam," which body is the image of, and a Creator itself. Hence Adam is called the "Prophet of the Moon," the Argha or "Holy of Holies" of the [[hebrew]] (Yodh). This also shows the origin of the Jewish popular belief that the face of Moses is in the moon -- i.e., the spots in the Moon. For Moses and Jehovah are once more permutations, as has been shown Kabalistically. Says the author of the "Source of Measures" (p. 271): "There is one fact in regard to Moses and his works too important to be omitted. When he is instructed by the Lord as to his mission, the power name assumed by the Deity is, I am that I am, the Hebrew words being:--

[[hebrew]]

a various reading of [[hebrew]]. Now, Moses is [[hebrew]], and equals 345. Add the values of the new form of the name Jehovah, $21 + 501 + 21 = 543$, or, by a reverse reading, 345; thus showing Moses to be a form of Jehovah in this combination. $21 \div 2 = 10.5$, or, reversed, 501, so that the asher or the that in I am that I am is simply a guide to a use of 21 or 7×3 ; 501 [[squared]] = $251 +$, a very valuable pyramid number, etc., etc.

For a clearer explanation for the benefit of non-Kabalists we put it thus: "I am that I am" is in Hebrew:--

Ahiye Asher Ahiye
[[hebrew]] [[hebrew]] [[hebrew]]
5, 10, 5, 1 200, 300, 1 5, 10, 5, 1

Add the numbers of these separate words and you have:--

[[hebrew]] [[hebrew]] [[hebrew]]
21 501 21

(which relates to the process of descending in fire on the mount to make man, etc., etc.), and which is explained to be but a check and use of the numbers of the mountains; for:-- on one side we have $10 + 5 + 6 = 21$, down the middle 501, and on the other side $6 + 5 + 10 = 21$." (From the same author.) (Vide § XXII., "The Symbolism of the Mystery Name IAO.")

The "Holy of Holies," both Kabalistic and Rabbinical, are thus shown as an international symbol, and common property. Neither has originated with the Hebrews; but owing to the too realistic handling of the half-initiated Levites, the symbol has with them acquired a significance which it hardly has with any other people to this day,

[[Vol. 2, Page]] 469 THE OLD AND THE NEW JEHOVAH.

and which it was originally never meant to have by the true Kabalist. The Lingham and Yoni of the modern average Hindu is, on the face of it, of course, no better than the Rabbinical "Holy of Holies," -- but it is no worse; and this is a point gained on the Christian traducers of the Asiatic religious philosophies. For, in such religious myths, in the hidden symbolism of a creed and philosophy, the spirit of the tenets propounded ought to decide their relative value. And who will say, that, examined either way, this so-called "Wisdom," applied solely to the uses and benefit of one little nation, has ever developed in it anything like national ethics. The Prophets are there, to show the walk in life, before, during, and after the days of Moses, of the chosen but "stiff-necked" people. That they have had at one time the Wisdom-Religion and use of the universal language and its symbols at their disposal and in their possession, is proved by the same esotericism existing to this day in India with regard to the "Holy of Holies." This, as said, was and still is the passage through the "golden" cow in the same stooping position as the one shown in the gallery of the pyramid, which identified man with Jehovah in Hebrew esotericism. The whole difference lies in the Spirit of Interpretation. With the Hindus as with the ancient Egyptians that spirit was and is entirely metaphysical and psychological; with the Hebrews it was realistic and physiological. It pointed to the first sexual separation of the human race (Eve giving birth to Cain-Jehovah, as shown in the "Source of Measures"); to the consummation of terrestrial physiological union and conception (as in the allegory of Cain shedding Abel's blood -- Habel, the feminine principle) and -- child-bearing; a process shown to have begun in the Third Race, or with Adam's THIRD son, Seth, with whose son Henoch, men began to call themselves Jehovah or Jah-hovah, the male Jod and Havah or Eve -- to wit, male and female beings.* Thus the difference lies in the religious and ethical feeling, but the two symbols are identical. There is no doubt that, with the fully initiated Judaeans Tanaim, the inner sense of the symbolism was as holy in its abstraction as with the ancient Aryan Dwijas. The worship of the "god in the ark" dates only from David; and for a thousand years Israel knew of no phallic Jehovah. And now the old Kabala, edited and re-edited, has become tainted with it.

With the ancient Aryans the hidden meaning was grandiose, sublime, and poetical, however much the external appearance of their symbol may now militate against the claim. The ceremony of passing through

[[Footnote(s)]] -----

* In the fourth chapter of Genesis, v. 26, it is mis-translated, ". . . And he called his name Enos (man); then began men to call upon the name of the Lord." -- which has no sense in it, since Adam and the others must have done the same.

[[Vol. 2, Page]] 470 THE SECRET DOCTRINE.

the Holy of Holies (now symbolized by the cow), in the beginning through the temple Hiranya gharba (the radiant Egg) -- in itself a symbol of Universal, abstract nature -- meant spiritual conception and birth, or rather the re-birth of the individual and his regeneration: the stooping man at the entrance of the Sanctum Sanctorum, ready to pass through the matrix of mother nature, or the physical creature ready to re-become the original spiritual Being, pre-natal MAN. With the Semite, that stooping man meant the fall of Spirit into matter, and that fall and degradation were apotheosized by him with the result of dragging Deity down to the level of man. For the Aryan, the symbol represented the divorce of Spirit from matter, its merging into and return to its primal Source; for the Semite, the wedlock of spiritual man with material female nature, the physiological being taking pre-eminence over the psychological and the purely immaterial. The Aryan views of the symbolism were those of the whole Pagan world; the Semite interpretations emanated from, and were pre-eminently those of a small tribe, thus marking its national features and the idiosyncratic defects that characterize many of the Jews to this day -- gross realism, selfishness, and sensuality. They had made a bargain, through their father Jacob, with their tribal deity, self-exalted above all others, and a covenant that his "seed shall be as the dust of the earth"; and that deity could have no better image henceforth than that of the symbol of generation, and, as representation, a number and numbers.

Carlyle has wise words for both these nations. With the Hindu Aryan -- the most metaphysical and spiritual people on earth -- religion has ever been, in his words, "an everlasting lode-star, that beams the brighter in the heavens the darker here on earth grows the night around him." The religion of the Hindu detaches him from this earth; therefore, even now, the cow-symbol is one of the grandest and most philosophical among all others in its inner meaning. To the "MASTERS" and "Lords" of European potencies -- the Israelites -- certain words of Carlyle apply still more admirably; for them "religion is a wise prudential feeling grounded on mere calculation" -- and it was so from its beginnings. Having burdened themselves with it, Christian nations feel bound to defend and poetise it, at the expense of all other religions.

But it was not so with the ancient nations. For them the passage entrance and the sarcophagus in the King's chamber meant regeneration -- not generation. It was the most solemn symbol, a Holy of Holies, indeed, wherein were created immortal Hierophants and "Sons of God" -- never mortal men and Sons of lust and flesh -- as now in the hidden sense of the Semite Kabbalist. The reason for the difference in the views of the two races is easy to account for. The Aryan Hindu belongs to the oldest races now on earth; the Semite Hebrew to the latest. One is nearly one

[[Vol. 2, Page 471]] THE CRAFT OF THE RABBINS.

million years old; the other is a small sub-race some 8,000 years old and no more.*

But Phallic worship has developed only with the gradual loss of the keys to the inner meaning of religious symbols; and there was a day when the Israelites had beliefs as pure as the Aryans have. But now Judaism, built solely on Phallic worship, has become one of the latest creeds in Asia, and theologically a religion of hate and malice toward everyone and everything outside themselves. Philo Judaeus shows what was the genuine Hebrew faith. The sacred Writings, he says, prescribe what we ought to do . . . commanding us to hate the heathen and their laws and institutions. They did hate Baal or Bacchus worship publicly, but left its worst features to be followed secretly; and it is with the Talmudic Jews that the grand symbols of nature were the most profaned. With them, as now shown by the discovery of the key to the correct Bible reading -- Geometry, the fifth divine Science ("fifth" -- because it is the fifth key in the series of the Seven Keys to the Universal esoteric language and symbology) was desecrated, and by them applied to conceal the most terrestrial and grossly sexual mysteries, wherein both Deity and religion were degraded.

We are told that it is just the same with our Brahma-prajapati, with Osiris and all other creative gods. Quite so, when their rites are judged exoterically and externally; the reverse when their inner meaning is unveiled, as we see. The Hindu Lingham is identical with "Jacob's Pillar" -- most undeniably. But the difference, as said, seems to consist in that the esoteric significance of the Lingham was too truly sacred and metaphysical to be revealed to the profane and the vulgar; hence its superficial appearance was left to the speculations of the mob. Nor would the Aryan Hierophant and Brahmin, in their proud exclusiveness and the satisfaction of their knowledge, go to the trouble of concealing its primeval nakedness under cunningly devised fables; whereas the Rabbi, having interpreted the symbol to suit his own tendencies, had to veil the crude significance; and this served a double purpose -- that of keeping his secret to himself and of exalting himself

[[Footnote(s)]] -----

* Strictly speaking, the Jews are an artificial Aryan race, born in India, and belonging to the Caucasian division. No one who is familiar with the Armenians and the Parsis can fail to recognize in the three the same Aryan, Caucasian type. From the seven primitive types of the Fifth Race there now remain on Earth but three. As Prof. W. H. Flower aptly said in 1885, "I cannot resist the conclusion so often arrived at by various anthropologists -- that the primitive man, whatever he may have been, has in the course of ages diverged into three extreme types, represented by the Caucasian of Europe, the Mongolian of Asia, and the Ethiopian of Africa, and that all existing individuals of the species can be ranged around these types. . . ." (The President's address at the Anthropol. Inst. of Great Britain, etc.) Considering that our Race has reached its Fifth Sub-race, how can it be otherwise?

[[Vol. 2, Page]] 472 THE SECRET DOCTRINE.

in his supposed monotheism over the heathen, whom his Law commanded him to hate.* A commandment now gladly accepted by the Christian too, in spite of another and later commandment -- "love each other." Both India and Egypt had and have their sacred lotuses, symbolic of the same "Holy of Holies" -- the Lotus growing in the water, a double feminine symbol -- the bearer of its own seed and root of all. Viraj and Horus are both male symbols, emanating from androgynous Nature, one from Brahma and his female counterpart Vach, the other, from Osiris and Isis -- never from the One infinite God. In the Judaeo-Christian systems it is different. Whereas the lotus, containing Brahma, the Universe, is shown growing out of Vishnu's navel, the Central point in the Waters of Infinite Space, and whereas Horus springs from the lotus of the Celestial Nile -- all these abstract pantheistic ideas are dwarfed and made terrestrially concrete in the Bible: one is almost inclined to say that in the esoteric they are grosser and still more anthropomorphic, than in their exoteric rendering. Take as an example the same symbol, even in its Christian application; the lilies in the hand of the Archangel Gabriel (Luke i. 28). In Hinduism -- the "Holy of Holies" is a universal abstraction, whose dramatis personae are Infinite Spirit and Nature; in Christian Judaism, it is a personal God, outside of that Nature, and the human Womb -- Eve, Sarah, etc., etc.; hence, an anthropomorphic phallic god, and his image -- man.

Thus it is maintained, that with regard to the of the Bible, one of two hypotheses has to be admitted. Either behind the symbolic substitute -- Jehovah -- there was the unknown, incognizable Deity, the Kabalistic Ain-Soph; or, the Jews have been from the beginning, no better than the dead-letter Lingham--** worshippers of the India of to-day. We say it was the former; and that, therefore, the secret or esoteric worship of the Jews was the same Pantheism that the Vedantin philosophers are reproached with to-day; Jehovah was a substitute for purposes of an exoteric national faith, and had no importance or reality in the eyes of the erudite priests and philosophers -- the Sadducees, the

[[Footnote(s)]] -----

* Whenever such analogies between the Gentiles and the Jews, and later the Christians, were pointed out, it was the invariable custom of the latter to say that it was the work of the Devil who forced the Pagans to imitate the Jews for the purpose of throwing a slur on the religion of the one, true living God. To this Faber says very justly "Some have imagined that the Gentiles were servile copyists of the Israelites, and that each point of similitude was borrowed from the Mosaical Institutes. But this theory will by no means solve the problem: both because we find the very same resemblance in the ceremonies of nations far different from Palestine, as we do in the rites of those who are in its immediate vicinity, and because it seems incredible that all should have borrowed from one which was universally disliked and despised." (Pagan Idol. I., 104.)

** Their consecrated pillars (unhewn stones) erected by Abraham and Jacob were LINGHI.

[[Vol. 2, Page]] 473 THE ELOHISTIC AND JEHOVISTIC TEXTS.

most refined as the most learned of all the Israelite sects, who stand as a living proof with their contemptuous rejection of every belief, save the LAW. For how could those who invented the stupendous scheme now known as the Bible, or their successors who knew, as all Kabalists do, that it was so invented for a popular blind -- how could they, we ask, feel reverence for such a phallic symbol and a NUMBER, as Jehovah is shown most undeniably to be in the Kabalistic works? How could anyone worthy of the name of a philosopher, and knowing the real secret meaning of their "pillar of Jacob," their Bethel, oil-anointed phalli, and their "Brazen Serpent," worship such a gross symbol, and minister unto it, seeing in it their "Covenant" -- the Lord Himself! Let the reader turn to Gemara Sanhedrin and judge. As various writers have shown, and as brutally stated in Hargrave Jennings' Phallicism (p. 67) "We know from the Jewish records that the Ark contained a table of stone. . . . that stone was phallic, and yet identical with the sacred name Jehovah . . . which written in unpointed Hebrew with four letters, is J-E-V-E or JHVH (the H being merely an aspirate and the same as E). This process leaves us the two letters I and V (in another form U); then if we place the I in the U we have the 'Holy of Holies'; we also have the Lingha and Yoni and Argha of the Hindus, the Isvara and 'supreme Lord'; and here we have the whole secret of its mystic and arc-celestial import, confirmed in itself by being identical with the Linyoni (?) of the Ark of the Covenant."

The Biblical Jews of to-day do not date from Moses but from David -- even admitting the identity of the old genuine with the later and remodelled Mosaic scrolls. Before that time their nationality is lost in the mists of prehistoric darkness, the veil from which is now withdrawn as much as we have space to do so. It is only to the days of the Babylonian captivity that the Old Testament may be referred by the most lenient criticism, as the approximately correct views that were current about the days of Moses. Even such fanatical Christians and worshippers of Jehovah as the Rev. Mr. Horne, have to admit the numerous changes and alterations made by the later compilers of the "Book of God," since it was found by Hilckiah (See "Introduction to the Old Testament," and also Bishop Colenso's "Elohistic and Jehovistic writers"); and that "the Pentateuch arose out of the primitive or older documents, by means of a SUPPLEMENTARY One." The Elohistic texts were re-written 500 years after the date of Moses; the Jehovistic 800, on the authority of the Bible chronology itself. Hence, it is maintained that the deity, represented as the organ of generation in his pillar form, and as a symbol of the double-sexed organ in the numeral value of the letters of his name, or [[hebrew]] the Yodh (phallus), and [[hebrew]] He (the opening, or

[[Vol. 2, Page]] 474 THE SECRET DOCTRINE.

the Womb) according to Kabalistic authority -- is of a far later date than the Elohim symbols and is borrowed from the Pagan exoteric rites; and Jehovah is thus on a par with the Lingham and Yoni found on every road-side in India.

Just as the IAO of the mysteries was distinct from Jehovah, so was the later IAO and Abraxas of some Gnostic sects identical with the god of the Hebrews, who was the same with the Egyptian Horus. This is undeniably proven on "heathen" as on the Gnostic "Christian" gems. In Matter's collection of such gems there is a "Horus" seated on the lotus, inscribed [[ABRASAXIAO]] (Abraxas IAO) -- an address exactly parallel to the so frequent [[EIS ZETS SARAPI]] (Eis zets sarapi) on the contemporary Heathen gems; and therefore only to be translated by "Abraxas is the One Jehovah" (King's Gnostics, p. 327). But who was Abraxas? As the same author shows -- "the numerical or Kabalistic value of the name Abraxas directly refer to the Persian title of the god 'Mithra,' Ruler of the year, worshipped from the earliest times under the appellation of IAO." Thus, the Sun, in one aspect, the moon or the Lunar genius, in another, that generative deity

whom the Gnostics saluted as "Thou that presidest over the Mysteries of the Father and the Son, who shinest in the night-time, holding the second rank, the first Lord of Death."

It is only in his capacity of the genius of the moon, the latter being credited in the old cosmogony with being the parent of our Earth, that Jehovah could ever be regarded as the creator of our globe and its Heaven, namely, the Firmament.

The knowledge of all this will be no proof, however, to the average bigot. Missionaries will go on with the most virulent attacks on the religions of India, and Christians read with the same benighted smile of satisfaction as ever these preposterously unjust words of Coleridge, "It is highly worthy of observation that the inspired writings received by Christians are distinguishable from all other books PRETENDING TO INSPIRATION, from the Scriptures of the Brahmins, and even from the Koran, in their strong and frequent recommendation of TRUTH (! !). . . ."

[[Vol. 2, Page]] 475 NATURE, A STONE-COLD MOTHER.

§ XVIII.

ON THE MYTH OF THE "FALLEN ANGEL," IN ITS VARIOUS ASPECTS.

A.

THE EVIL SPIRIT: WHO, AND WHAT?

OUR present quarrel is exclusively with theology. The Church enforces belief in a personal god and a personal devil, while Occultism shows the fallacy of such a belief. And though for the Pantheists and Occultists, as much as for the Pessimists, Nature is no better than "a comely mother, but stone cold" -- this is true only so far as regards external physical nature. They both agree that, to the superficial observer, she is no better than an immense slaughter-house wherein butchers become victims, and victims executioners in their turn. It is quite natural that the pessimistically inclined profane, once convinced of Nature's numerous shortcomings and failures, and especially of her autophagous propensities, should imagine this to be the best evidence that there is no deity in abscondito within Nature, nor anything divine in her. Nor is it less natural that the materialist and the physicist should imagine that everything is due to blind force and chance, and to the survival of the strongest, even more often than of the fittest. But the Occultists, who regard physical nature as a bundle of most varied illusions on the plane of deceptive perceptions; who recognise in every pain and suffering but the necessary pangs of incessant procreation: a series of stages toward an ever-growing perfectibility, which is visible in the silent influence of never-erring Karma, or abstract nature -- the Occultists, we say, view the great Mother otherwise. Woe to those who live without suffering. Stagnation and death is the future of all that vegetates without a change. And how can there be any change for the better without proportionate suffering during the preceding stage? Is it not those only who have learnt the deceptive value of earthly hopes and the illusive allurements of external nature who are destined to solve the great problems of life, pain, and death?

If our modern philosophers -- preceded by the medieval scholars -- have helped themselves to more than one fundamental idea of antiquity, theologians have built their God and his Archangels, their Satan and his Angels, along with the Logos and his staff, entirely out of the dramatis personae of the old heathen Pantheons. They would have been

[[Vol. 2, Page]] 476 THE SECRET DOCTRINE.

welcome to these, had they not cunningly distorted the original characters, perverted the philosophical meaning, and taking advantage of the ignorance of Christendom -- the result of long ages of mental sleep, during which humanity was permitted to think only by proxy -- tossed every symbol into the most inextricable confusion. One of their most sinful achievements in this direction, was the transformation of the divine alter ego into the grotesque Satan of their theology.

As the whole philosophy of the problem of evil hangs upon the correct comprehension of the constitution of the inner being of nature and man, of the divine within the animal, and hence also the correctness of the whole system as given in these pages, with regard to the crown piece of evolution -- MAN -- we cannot take sufficient precautions against theological subterfuges. When the good St. Augustine and the fiery Tertullian called the Devil "the monkey of God," this could be attributed to the ignorance of the age they lived in. It is more difficult to excuse our modern writers on the same ground. The translation of Mazdean literature has afforded to the Roman Catholic writers the pretext for proving their point in the same direction once more. They have taken advantage of the dual nature of Ahura Mazda in the Zend Avesta and the Vendidad, and of his Amshaspends, to emphasize still further their wild theories. Satan is the plagiarist and the copyist by anticipation of the religion which came ages later. This was one of the master strokes of the Latin Church, its best trump-card after the appearance of Spiritualism in Europe. Though only a succes d'estime, in general, even among those who are not interested in either Theosophy or Spiritualism, yet the weapon is often used by the Christian (Roman Catholic) Kabalists against the Eastern Occultists.

Now even the Materialists are quite harmless, and may be regarded as the friends of Theosophy, when compared to some fanatical "Christian" (as they call themselves, "Sectarian" as we call them) Kabalists, on the Continent. These read the Zohar, not to find in it ancient Wisdom, but to discover in its verses, by mangling the texts and meaning, Christian dogmas, where none could ever have been meant; and, having fished them out with the collective help of jesuitical casuistry and learning, the supposed "Kabalists" proceed to write books and to mislead less far-sighted students of the Kabala.*

[[Footnote(s)]] -----

* Such a pseudo-Kabalist was the Marquis de Mirville in France, who, having studied the Zohar and other old remnants of Jewish Wisdom under the "Chevalier" Drach, an ancient Rabbi Kabalist converted to the Romish Church -- wrote with his

help half a dozen volumes full of slander and calumnies against every prominent Spiritualist and Kabalist. From 1848 up to 1860 he persecuted unrelentingly the old Count d'Ourches, one of the earliest Eastern Occultists in France, a man the scope of whose occult knowledge will never be appreciated correctly by his survivors, because he screened his real beliefs and knowledge under the mask of Spiritism.

[[Vol. 2, Page]] 477 THE GENESIS OF THE DEVIL.

May we not then be permitted to drag the deep rivers of the Past, and thus bring to the surface the root idea that led to the transformation of the Wisdom-God, who had first been regarded as the creator of everything that exists, into an Angel of Evil -- a ridiculous horned biped, half goat and half monkey, with hoofs and a tail? We need not go out of the way to compare the pagan demons of either Egypt, India, or Chaldea with the devil of Christianity, for no such comparison is possible. But we may stop to glance at the biography of the Christian Devil, a piratical reprint from the Chaldeo-Judean mythology:--

The primitive origin of this personification rests upon the Akkadian conception of the cosmic powers -- the Heavens and the Earth -- in eternal feud and struggle with Chaos. Their Silik-Muludag, "the God amongst all the Gods," the "merciful guardian of men on Earth," was the Son of Hea (or Ea) the great God of Wisdom, called by the Babylonians Nebu. With both peoples -- as in the case of the Hindu gods -- their deities were both beneficent and maleficent. As Evil and punishment are the agents of Karma, in an absolutely just retributive sense, so Evil was the servant of the good (Hibbert Lect. 1887, pp. 101-115). The reading of the Chaldeo-Assyrian tiles has now demonstrated it beyond a shadow of doubt. We find the same idea in the Zohar. Satan was a Son, and an Angel of God. With all the Semitic nations, the Spirit of the Earth was as much the Creator in his own realm as the Spirit of the Heavens. They were twin brothers and interchangeable in their functions, when not two in one. Nothing of that which we find in Genesis is absent from the Chaldeo-Assyrian religious beliefs, even in the little that has hitherto been deciphered. The great "Face of the Deep" of Genesis is traced in the Tohu-bohu, "Deep," "Primeval Space," or Chaos of the Babylonians. Wisdom (the Great Unseen God) -- called in Genesis chap. i. the "Spirit of God" -- lived, for the older Babylonians as for the Akkadians, in the Sea of Space. Toward the days described by Berosus, this sea became the visible waters on the face of the Earth -- the crystalline abode of the great mother, the mother of Ea and all the gods, which became, still later, the great Dragon Tiamat, the Sea Serpent. Its last stage of development was the great struggle of Bel with the Dragon -- the Devil!

Whence the Christian idea that God cursed the Devil? The God of the Jews, whomsoever he was, forbids cursing Satan. Philo Judaeus and Josephus both state that the Law (the Pentateuch and the Talmud) undeviatingly forbid one to curse the adversary, as also the gods of the gentiles. "Thou shalt not revile the gods," quoth the god of Moses (Exodus xxii. 28), for it is God who "hath divided (them) unto all nations" (Deut. iv. 19); and those who speak evil of

----- [[Vol. 2, Page]] 478 THE SECRET DOCTRINE.

"Dignities" (gods) are called "filthy dreamers" by Jude (8). For even Michael the Archangel durst not bring against him (the devil) a railing accusation, but said: "The Lord rebuke thee" (ibid 9). Finally the same is repeated in the Talmud.* "Satan appeared one day to a man who used to curse him daily, and said to him: 'Why dost thou this?' Consider that God himself would not curse me, but merely said: 'The Lord rebuke thee, Satan.' ***

This bit of Talmudic information shows plainly two things: (a) that St. Michael is called "God" in the Talmud, and somebody else "the Lord"; and (b) that Satan is a God, of whom even the "Lord" is in fear. All we read in the Zohar and other Kabalistic works on Satan shows plainly that this "personage" is simply the personification of the abstract evil, which is the weapon of Karmic law and KARMA. It is our human nature and man himself, as it is said that "Satan is always near and inextricably interwoven with man." It is only a question of that Power being latent or active in us.

It is a well-known fact -- to learned Symbologists at all events -- that in every great religion of antiquity, it is the Logos Demiurge (the second logos), or the first emanation from the mind (Mahat), who is made to strike, so to say, the key-note of that which may be called the correlation of individuality and personality in the subsequent scheme of evolution. The Logos it is, who is shown in the mystic symbolism of cosmogony, theogony, and anthropogony, playing two parts in the drama of Creation and Being, i.e., that of the purely human personality and the divine impersonality of the so-called Avatars, or divine incarnations, and of the universal Spirit, called Christos by the Gnostics, and the Farvarshi (or Ferouer) of Ahura Mazda in the Mazdean philosophy. On the lower rungs of theogony the celestial Beings of lower Hierarchies had each a Farvarshi, or a celestial "Double." It is the same, only a still more mystic, reassertion of the Kabalistic axiom, "Deus est Demon inversus"; the word "demon," however, as in the case of Socrates, and in the spirit of the meaning given to it by the whole of antiquity, standing for the guardian Spirit, an "Angel," not a devil of Satanic descent, as theology will have it. The Roman Catholic Church shows its usual logic and consistency by accepting, as the ferouer of Christ, St. Michael, who was "his Angel Guardian," as proved by St. Thomas,*** while he calls the prototypes of Michael and his synonyms, such as Mercury, for example, devils

[[Footnote(s)]] -----

[[Vol. 2, Page]] 479 GOD AND DEVIL, BOTH METATRONS.

The Church accepts positively the tenet that Christ has his Ferouer as any other god or mortal has. Writes de Mirville: "Here we have the two heroes of the Old Testament, the Verbum (?), or the second Jehovah, and his face ('Presence,' as the Protestants translate) forming both but one, and yet being two, a mystery which seemed to us unsolvable before we

had studied the doctrine of the Mazdean ferouers, and learnt that the ferouer was the spiritual potency, at once image, face, and the guardian of the Soul which finally assimilates the ferouer." (Memoires a l'Academie, Vol. v., p. 516.) This is almost correct.

Among other absurdities, the Kabalists maintain that the word metatron being divided into [[meta, thronon]], means near the throne. It means quite the reverse, as meta means "beyond" and not "near." This is of great importance in our argument. St. Michael, then, the quis ut Deus, is the translator, so to speak, of the invisible world into the visible and the objective.

They maintain, furthermore, along with the Roman Catholic Church, that in the Biblical and Christian theology there does not exist a "higher celestial personality, after the Trinity, than that of the Archangel or the Seraphim, Michael." According to them, the conqueror of the Dragon is "the archisatrap of the sacred militia, the guardian of the planets, the King of the Stars, the slayer of Satan and the most powerful Rector." In the mystic astronomy of these gentlemen, he is "the conqueror of Ahriman, who having upset the sidereal throne of the usurper, bathes in his stead in the solar fires"; and, defender of the Christ-Sun, he approaches so near his Master, "that he seems to become one with him Owing to this fusion with the WORD (Verbum) the Protestants, and among them Calvin, ended by losing sight entirely of the duality, and saw no Michael but only his Master," writes the Abbe Caron. The Roman Catholics, and especially their Kabalists, know better; and it is they who explain to the world this duality, which affords to them the means of glorifying the chosen ones of the Church, and of rejecting and anathematizing all those Gods who may be in the way of their dogmas.

Thus the same titles and the same names are given in turn to God and the Archangel. Both are called Metatron, "both have the name of Jehovah applied to them when they speak one in the other" (sic) as, according to the Zohar, the term signifies equally "the Master and the Ambassador." Both are the Angel of the Face, because, as we are informed, if, on the one hand, the "Word" is called "the face (or the Presence) and the image of the substance of God," on the other, "when

[[Footnote(s)]] -----

[[Footnote continued from previous page]] O living image of Divinity! O great thaumaturgist of the old Testament! O invisible Vicar of Christ within his Church! . . ." etc., etc. The work is in great honour in the Latin Church.

[[Vol. 2, Page]] 480 THE SECRET DOCTRINE.

speaking of the Saviour to the Israelites, Isaiah (?) tells them that "the angel of his presence saved them in their affliction" -- "so he was their Saviour."* Elsewhere he (Michael) is called very plainly "the Prince of the Faces of the Lord, the glory of the Lord." Both (Jehovah and Michael) are "the guides of Israel" . . . chiefs of the armies of the Lord, Supreme Judges of the souls and even Seraphs.****

The whole of the above is given on the authority of various works by Roman Catholics, and must, therefore, be orthodox. Some expressions are translated to show what subtle theologians and casuists mean by the term Ferouer,**** a word borrowed by some French writers from the Zend Avesta, as said, and utilized in Roman Catholicism for a purpose Zoroaster was very far from anticipating. In Fargard XIX. of the Vendidad it is said (verse 14), "Invoke, O Zarathustra! my Farvarshi, who am Ahura Mazda, the greatest, the best, the fairest of all beings, the most solid, the most intelligent, . . . and whose soul is the Holy Word" (Mathra Spenta). The French Orientalists translate Farvarshi by "Ferouer."

Now what is a Ferouer, or Farvarshi? In some Mazdean works (e.g., Ormazd Ahriman, §§ 112, 113), it is plainly implied that Farvarshi is the inner, immortal man (or that Ego which reincarnates); that it existed before its physical body and survives all such it happens to be clothed in. "Not only man was endowed with the Farvarshi, but gods too, and the sky, fire, waters, and plants." (Introduction to the Vendidad, by J. Darmesteter). This shows as plainly as can be shown that the ferouer is the "spiritual counterpart" of whether god, animal, plant, or even element, i.e., the refined and the purer part of the grosser creation, the soul of the body, whatever the body may happen to be. Therefore does Ahura Mazda recommend Zarathustra to invoke his Farvarshi and not himself (Ahura-Mazda); that is to say, the impersonal and true Essence of Deity, one with Zoroaster's own Atman (or Christos), not the false and personal appearance. This is quite clear.

Now it is on this divine and ethereal prototype that the Roman Catholics seized so as to build up the supposed difference between their god and angels, and the deity and its aspects, or the gods of the old religions. Thus, while calling Mercury, Venus, Jupiter (whether as gods or planets) DEVILS, they yet make of the same Mercury the ferouer of their Christ. This fact is undeniable. Vossius (De Idol., II., 373)

**** That which is called in the Vendidad "Farvarshi," the immortal part of an individual, that which outlives man -- the Higher Ego, say the Occultists, or the divine Double.

[[Vol. 2, Page]] 481 FRAUDULENT TRANSLATION OF THE BIBLE.

proves that Michael is the Mercury of the pagans, and Maury and other French writers corroborate him, and add that "according to great theologians Mercury and the Sun are one," (?) and no wonder, they think, since "Mercury being so near the Wisdom of the Verbum (the Sun), must be absorbed by and confounded with him."

This "pagan" view was accepted from the first century of our era, as shown in the ORIGINAL Acts of the Apostles (the English translation being worthless). So much is Michael the Mercury of the Greeks and other nations, that when the inhabitants of Lystra mistook Paul and Barnabas for Mercury and Jupiter -- "the gods have come down to us in the likeness of men," -- verse 12 (xiv.) adds: "And they called Barnabas Zeus, and Paul, Hermes (or Mercury), because he was the leader of the WORD (Verbum)," and not "the chief speaker," as erroneously translated in the authorised, and repeated even in the revised, English Bible. Michael is the angel in the Vision, the Son of God, "who was like unto a Son of Man." It is the Hermes-Christos of the Gnostics, the Anubis-Syrius of the Egyptians, the Counsellor of Osiris in Amenti, the Michael leontoid [[ophiomorphos]] of the Ophites, who wears on certain Gnostic jewels a lion head, like his father Ildabaoth. (See King's Gnostics.)

Now to all this the Roman Catholic Church consents tacitly, many of her writers avowing it publicly. And, unable to deny the flagrant "borrowing" of their Church, who "spoil" the symbols of her seniors, as the Jews had "spoil" the Egyptians of their jewels of silver and gold, they explain the fact quite coolly and as seriously. Thus the writers who were hitherto timid enough to see, in this repetition by Christian dogmas of old Pagan ideas, "a legendary plagiarism perpetrated by man," are gravely assured that, far from such a simple solution of the almost perfect resemblance, it has to be attributed to quite another cause: "to a prehistorical plagiarism, of a superhuman origin."

If the reader would know how, he must kindly turn to the same fifth volume of de Mirville's work. Please note that this author was the official and recognised defender of the Roman Church, and was helped by the learning of all the Jesuits. On page 518 we read:--

"We have pointed out several demi-gods, and also very historical heroes of the pagans, who were predestined from the moment of their birth, to ape while dishonouring it, the nativity of the hero, who was quite God, before whom the whole earth had to bow; we traced them being born as he was, from an immaculate mother; we saw them strangling serpents in their cradles, fighting against demons, performing miracles, dying as martyrs, descending to the nether world and rising again from the dead. And we have bitterly deplored that timid and shy Christians should feel compelled to explain all such identities on the ground of

[[Vol. 2, Page]] 482 THE SECRET DOCTRINE.

coincidence of myth and symbol. They forgot apparently these words of the Saviour: 'ALL THAT CAME BEFORE ME ARE THIEVES AND ROBBERS,' a word which explains all without any absurd negation and which I commented in these words 'The Evangel is a sublime drama, parodied and played before its appointed time by ruffians.' "

The "ruffians" (les droles), are of course demons whose manager is Satan. Now this is the easiest and the most sublime and simple way of getting out of the difficulty! The Rev. Dr. Lundy, a Protestant de Mirville, followed the happy suggestion in his "Monumental Christianity," and so did Dr. Sepp of Munich in his works written to prove the divinity of Jesus and the Satanic origin of all other Saviours. So much greater the pity that a systematic and collective plagiarism, which went on for several centuries on the most gigantic scale, should be explained by another plagiarism, this time in the fourth Gospel. For the sentence quoted from it, "All that ever came before me, etc.," is a verbatim repetition of words written in the "Book of Enoch" lxxxix. In the Introduction to Archbishop Lawrence's translation of it from an Ethiopic MS. in the Bodleian Library, the editor, author of the "Evolution of Christianity," remarks:--

"In revising the proof-sheets of the Book of Enoch the parable of the sheep, rescued by the good Shepherd from hireling guardians and ferocious wolves, is obviously borrowed by the fourth Evangelist from Enoch, lxxxix., in which the author depicts the shepherds as killing . . . the sheep before the advent of their Lord, and thus discloses the true meaning of that hitherto mysterious passage in the Johannine parable -- 'All that ever came before me are thieves and robbers' -- language in which we now detect an obvious reference to the allegorical shepherds of Enoch."

It is too late in the day to claim that it is Enoch who borrowed from the New Testament, instead of vice versa. Jude (14-15) quotes verbatim from Enoch a long passage about the coming of the Lord with his 10,000 saints, and naming specifically the prophet, acknowledges the source. This "parallelism between prophet and apostle, have placed beyond controversy that, in the eyes of the author of an Epistle accepted as divine revelation, the Book of Enoch was the inspired production of an antediluvian patriarch . . ." and further " . . . the cumulative coincidence of language and ideas in Enoch and the authors of N.T. Scripture, . . . clearly indicates that the work of the Semitic Milton was the inexhaustible source from which Evangelists and Apostles, or the men who wrote in their names, borrowed their conceptions of the resurrection, judgment, immortality, perdition, and of the universal reign of righteousness under the eternal dominion of the Son of Man. This Evangelical plagiarism culminates in the Revelation of John, which adapts the visions

[[Vol. 2, Page]] 483 VEDAS, ONCE UNIVERSAL.

of Enoch to Christianity, with modifications in which we miss the sublime simplicity of the great Master of apocalyptic prediction, who prophesied in the name of the antediluvian Patriarch." (INT. xxxv.)

"Antediluvian," truly; but if the phraseology of the text dates hardly a few centuries or even millenniums before the historical era, then it is no more the original prediction of the events to come, but, in its turn, a copy of some scripture of a prehistoric religion. . . . "In the Krita age, Vishnu, in the form of Kapila and other (inspired sages) . . . imparts to the world true wisdom as Enoch did. In the Treta age he restrains the wicked, in the form of a universal monarch (the Chakravartin or the 'Everlasting King' of Enoch)" and protects the three worlds (or races). In the Dwapara age, in the person of Veda-Vyasa, he divides the one Veda into four, and distributes it into hundreds (Sata) of branches." Truly so; the Veda of the earliest Aryans, before it was written, went forth into every nation of the Atlanto-Lemurians, and sowed the first seeds of all the now existing old religions. The off-shoots of the never dying tree of wisdom have scattered their dead leaves even on Judaeo-Christianity. And at the end of the Kali, our present age, Vishnu, or the "Everlasting King" will appear as Kalki, and re-establish righteousness upon earth. The minds of those who live at that time shall be awakened, and become as pellucid as crystal. "The men who are thus changed by virtue of that peculiar time (the sixth race) shall be as the seeds of

other human beings, and shall give birth to a race who shall follow the laws of the Krita age of purity"; i.e., it shall be the seventh race, the race of "Buddhas," the "Sons of God," born of immaculate parents.

B.

THE GODS OF LIGHT PROCEED FROM THE GODS OF DARKNESS.

Thus it is pretty well established that Christ, the Logos, or the God in Space and the Saviour on Earth, is but one of the echoes of the same antediluvian and sorely misunderstood Wisdom. The history begins by the descent on Earth of the "Gods" who incarnate in mankind, and this is the FALL. Whether Brahma hurled down on Earth in the allegory by Bhagavant, or Jupiter by Kronos, all are the symbols of the human races. Once landed on, and having touched this planet of dense matter, no snow-white wings of the highest angel can remain immaculate, or the Avatar (or incarnation) be perfect, as every such Avatar is

[[Footnote(s)]] -----

* Saith Uriel (chap. xxvi. v. 3), in the "Book of Enoch" "all those who have received mercy shall for ever bless God the everlasting King," who will reign over them.

[[Vol. 2, Page]] 484 THE SECRET DOCTRINE.

the fall of a God into generation. Nowhere is the metaphysical truth more clear, when explained esoterically, or more hidden from the average comprehension of those who instead of appreciating the sublimity of the idea can only degrade, than in the Upanishads, the esoteric glossaries of the Vedas. The Rig-Veda, as Guignault characterized it, "is the most sublime conception of the great highways of Humanity." The Vedas are, and will remain for ever, in the esotericism of the Vedanta and the Upanishads, "the mirror of the eternal Wisdom."

For over sixteen centuries the new masks, forced on the faces of the old gods, have screened them from public curiosity, but they have finally proved a misfit. Yet the metaphorical FALL, and as metaphorical atonement and crucifixion, led Western Humanity through roads knee-deep in blood. Worse than all, they led it to believe in the dogma of the evil spirit distinct from the spirit of all good, whereas the former lives in all matter and pre-eminently in man. Finally it created the God-slandering dogma of Hell and eternal perdition; it spread a thick film between the higher intuitions of man and divine verities; and, most pernicious result of all, it made people remain ignorant of the fact that there were no fiends, no dark demons in the Universe before man's own appearance on this, and probably on other earths. Henceforth the people were led to accept, as the problematical consolation for this world's sorrows, the thought of original sin.

The philosophy of that law in Nature, which implants in man as well as in every beast a passionate, inherent, and instinctive desire for freedom and self-guidance, pertains to psychology and cannot be touched on now. To show the feeling in higher Intelligences, to analyse and give a natural reason for it, would necessitate, moreover, an endless philosophical explanation for which there is no room here. Perhaps, the best synthesis of this feeling is found in three lines of Milton's Paradise Lost. Says the "Fallen One":--

"Here we may reign secure; and in my choice,
To reign is worth ambition, though in hell!
Better to reign in hell than serve in heaven"

Better be man, the crown of terrestrial production and king over its opus operatum, than be lost among the will-less spiritual Hosts in Heaven.

We have said elsewhere that the dogma of the first Fall rested on a few verses in Revelation; these verses being now shown a plagiarism from Enoch by some scholars. These grew into endless theories and speculations, which gradually acquired the importance of dogma and inspired tradition. Every one wanted to explain the verse about the seven-headed dragon with his ten horns and seven crowns, whose tail

[[Vol. 2, Page]] 485 THE SONS OF ETERNITY.

"drew the third part of the stars of heaven, and did cast them to the earth," and whose place, with that of his angels, "was found no more in heaven." What the seven heads of the Dragon (cycle) mean, and its five wicked kings also, may be learned in the Addenda which close Part III. of this Volume.

From Newton to Bossuet speculations were incessantly evolved in Christian brains with regard to these obscure verses. . . . "The star that falls, is the heresiarch Theodosius" . . . explains Bossuet. "The clouds of smoke, are the heresies of the Montanists. . . . The third part of the stars, are the martyrs, and especially the doctors of divinity. . . ."

Bossuet ought to have known, however, that the events described in Revelation were not original, and may, as shown, be found in other and pagan traditions. There were no scholastics nor Montanists during Vedic times, nor yet far later in China. But Christian theology had to be protected and saved.

This was only natural. But why should truth be sacrificed in order to protect from destruction the lucubrations of Christian theologians?

The princeps aeris hujus, the "prince of the air" of St. Paul, is not the devil, but the effects of the astral light, as Eliphas Levi correctly explains. The Devil is not "the God of this period," as he says, for it is the deity of every age and period,

since man appeared on earth, and matter, in its countless forms and states, had to fight for its evanescent existence against other disintegrating Forces.

The "Dragon" is simply the symbol of the cycle and of the "Sons of Manvantaric Eternity," who had descended on earth during a certain epoch of its formative period. The "clouds of smoke" are a geological phenomenon. The "third part of the stars of heaven" cast down to the earth -- refers to the divine Monads, (the Spirits of the Stars in Astrology) that circumambulate our globe; i.e., the human Egos destined to perform the whole cycle of incarnations. This sentence, qui circumambulat terram, however, is again referred to the DEVIL in theology, the mythical father of Evil being said to "fall like lightning." Unfortunately for this interpretation, the "Son of Man," or Christ, is expected, on the personal testimony of Jesus, to descend on earth likewise, "As the lightning cometh out of the East,"** just in the same shape and under the same symbol as Satan, who is seen "as lightning to fall from heaven."*** All these metaphors and figures of speech, pre-eminently Oriental in their character, must have their origin searched for in the East. In all the ancient cosmogonies light comes from darkness. In Egypt, as elsewhere, darkness was "the

[[Footnote(s)]] -----

* Matthew xxiv. 27.

** Luke x. 18.

[[Vol. 2, Page]] 486 THE SECRET DOCTRINE.

principle of all things." Hence Pymander, the "Thought divine," issues as light from DARKNESS. Behemoth* is the principle of Darkness, or Satan, in Roman Catholic Theology, and yet Job says of him that "Behemoth is the chief (principle) of the ways of God" (xl. 19) -- "Principium viarum Domini Behemoth!"

Consistency does not seem to be a favourite virtue in any portion of divine Revelation, so-called -- not as interpreted by theologians, at any rate.

The Egyptians and the Chaldeans referred the birth of their divine Dynasties to that period when creative Earth was in her last final throes, in giving birth to her prehistoric mountain ranges, which have since disappeared, her seas and her continents. Her face was covered with "deep Darkness and in that (Secondary) Chaos was the principle of all things" that developed on the globe later on. And our geologists have ascertained that there was such a terrestrial conflagration in the early geological periods, several hundred millions of years ago.** As to the tradition itself, every country and nation had it, each under its respective national form.

It is not alone Egypt, Greece, Scandinavia or Mexico, that had their Typhon, Python, Loki and its "falling" Demon, but China, also. The Celestials have a whole literature upon the subject. In King, it is said that in consequence of a rebellion against Ti of a proud Spirit who said he was Ti himself, seven choirs of celestial spirits were exiled upon earth, which "brought a change in all nature, heaven itself bending down and uniting with earth."

And in the "Y-King," one reads: "The flying Dragon, superb and rebellious, suffers now, and his pride is punished; he thought he would reign in heaven, he reigns only on the earth."

Again, the Tchoon-Tsieoo says allegorically: "one night the stars ceased shining in darkness, and deserted it, falling down like rain upon the earth, where they are now hidden." These stars are the Monads.

Chinese cosmogonies have their "Lord of the Flame" and their "Celestial Virgin," with little "Spirits to help and minister to her; and big Spirits to fight those who are the enemies of other gods." But all this does not prove that the said allegories are presentments or prophetic writings which all refer to Christian theology.

The best proof one can offer to Christian Theologians that the

[[Footnote(s)]] -----

* The Protestant Bible defines Behemoth innocently -- "The elephant as some think" (See marginal note in Job xl. 19) in the authorised versions.

** Astronomy, however, knows nothing of stars that have disappeared unless from visibility, never from existence, since the Science of Astronomy became known. Temporary stars are only variable stars, and it is believed even that the new stars of Kepler and Tycho Brahe may still be seen.

[[Vol. 2, Page]] 487 THE SHADOWS OF THE SHADOWS.

esoteric meaning in the Bible -- in both Testaments -- was the assertion of the same idea as in our Archaic teachings -- to wit, that the "Fall of the Angels" referred simply to the incarnation of angels "who had broken through the Seven Circles" - - is found in the Zohar. Now the Kabala of Simeon Ben Iochai is the soul and essence of its allegory, as the later Christian Kabala is the "dark cloaked" Mosaic Pentateuch. And it says (in the Agrippa MSS.):

"The wisdom of the Kabala rests in the science of the equilibrium and Harmony."

"Forces that manifest without having been first equilibrated perish in space" ("equilibrated" meaning differentiated).

"Thus perished the first Kings (the Divine Dynasties) of the ancient world, the self-produced Princes of giants. They fell like rootless trees, and were seen no more: for they were the Shadow of the Shadow"; to wit, the chhaya of the Shadowy Pitris. (Vide about the "Kings of Edom.")

"But those that came after them, who shooting down like falling stars were enshrined in the shadows -- prevailed and to this day": Dhyanis, who by incarnating in those "empty shadows," inaugurated the era of mankind.

Every sentence in the ancient cosmogonies, unfolds to him who can read between the lines the identity of the ideas, though under different garbs.
