

FlexPod and You Navigating to and thru the core of the Modern DataCenter

Sree Lakshmi Lanka, Solutions Architect Josh Good, Solutions Architect March 2021

FlexPod®

Neurology of a FlexPod - Application Domination

Part II – Network is always the problem. Dissecting the Tools of trade to visualize and understand the path of the packet

Flexpod@techdata.com

Course Modules

This course focuses on enabling you to do the following:

Module 8:

- Understanding modern visualization tools.
- NetApp ONTAP Connector for Cisco Intersight
- Understanding tools with modern telemetry capabilities and handle pro-active and reactive scenarios in real time.

FlexPod Value

Proven results (T) 190+ CVDs

Secure foundation Future-proof

Cloud integrated

Tiering, data protection, cloud services

Modern workloads and enterprise apps

- Al and ML, Oracle, SAP, SQL Server
- containers. Kubernetes

Fifth-generation compute

- Intel and AMD servers
- Intel Optane memory
- **NVIDIA GPUs**

High-speed fabric

- 100GbE/32Gb Fibre Channel
- NVMe over fabric

All-flash storage with end-to-end NVMe

- Virtualized, bare-metal
- Built-in encryption

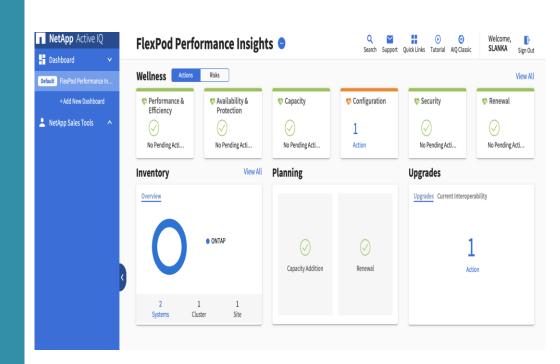

Single-vendor support

- Cloud-based monitoring
- Intersight integration

ActivelQ

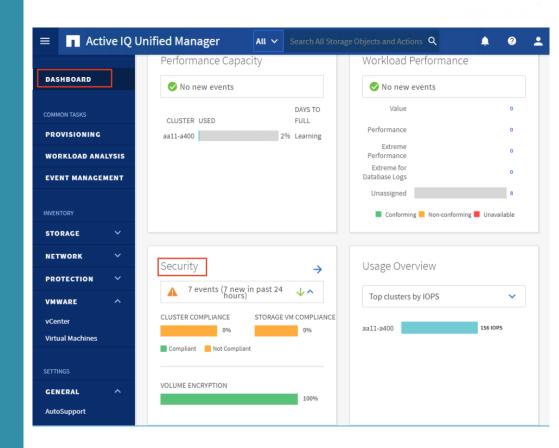

Active IQ offers an enhanced User Interface and a personalized experience with AIQ Digital Advisor Dashboards.

ActiveIQ Unified Manager

- comprehensive monitoring and proactive management tool.
- a new security risk panel.
- provides API offerings for storage management through RESTful API service interface for third party integration.

Virtual Appliance 9.7.1 for vSphere 7

Virtual Storage Console (VSC)

VASA Provider

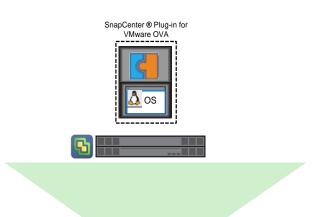

Storage Replication Adapter (SRA)

- Improved performance for large scale environments
- Configuration of ONTAP role-based access control (RBAC) by using ONTAP System Manager
- Use of ONTAP REST APIs to obtain vVols metrics for SAN storage systems that use ONTAP 9.7 and later releases, so that NetApp OnCommand® API Services is no longer required
- SRA support for Site Recovery Manager Appliance (Photon OS-based) as well as Windows based version

SnapCenter Plug-in for vSphere 7

- Easily back up VMs and datastores from vSphere
- Restore or mount from primary or secondary storage
- Create and reuse policies
- Centralized job monitoring and reporting

Infrastructure Operations Challenges

Distributed apps and IT

Physical and virtual sprawl, IoT, microservices

Human limitations

Scale, speed, complexity that make modern data centers unmanageable

Traditional management

"Building a monster to manage the monster"

Strategy for Next-Generation Systems Management

Use the cloud

Connect everything

Analyze the telemetry

Create actionable insight

Combine insight with automation

Have machines manage machines

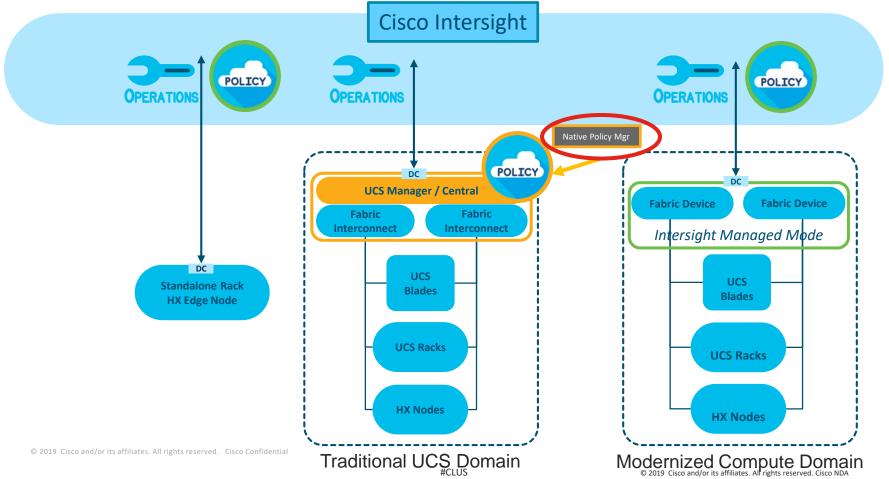

Cisco Intersight Cloud operations platform

Intelligent visualization, optimization, and orchestration for applications and infrastructure across public cloud and on-premises environments.

Intersight Managed Mode

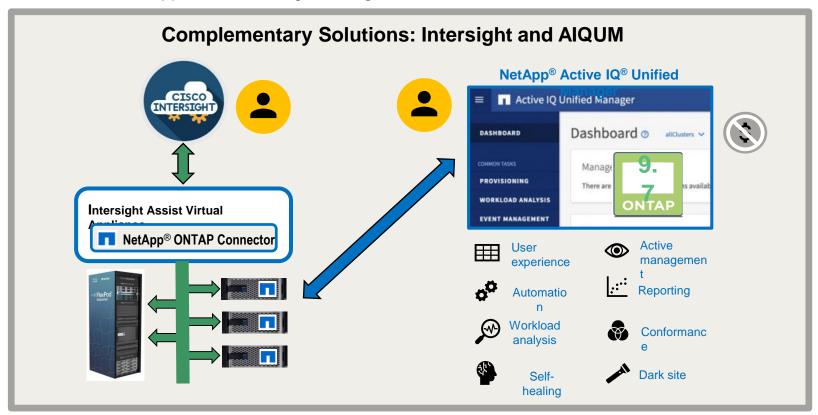

NetApp ONTAP Storage Integration with Cisco Intersight

Intersight and Active IQ Unified Manager

FlexPod and NetApp ONTAP storage management

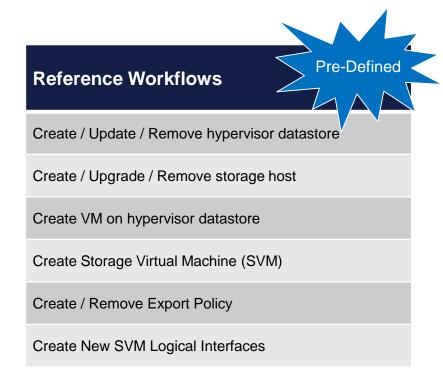

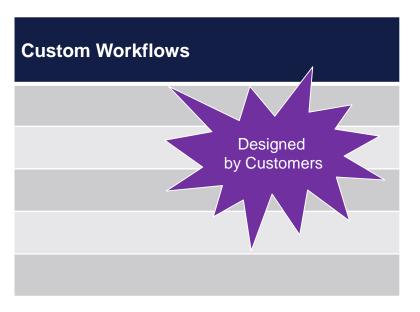

Intersight-ONTAP Tasks

NetApp® ONTAP® task	Task description		
Add storage export policy volume	Add export policy to a volume		
Add storage initiators	Add initiators to an iGroup in a SVM		
Expand storage LUN	Expand an existing LUN in a SVM		
Expand storage volume	Expand an existing volume in a SVM		
New storage export policy	Create new export policy and client match list		
New storage FC interface	Create a new logical FC interface in a SVM		
New storage IP interface	Create a new logical IP interface in a SVM		
New storage LUN MAP	Map an iGroup to a LUN		
New storage LUN	Create a new storage LUN		
New storage NAS volume	Create new storage volume with NAS mount path		
New storage SAN volume	Create new storage volume		
New storage virtual machine	Create new SVM		
New storage initiator group	Create storage initiator group		
Remove storage export policy	Remove export policy from SVM		
Remove storage initiator group	Remove iGroup from SVM		
Remove LUN	Remove LUN		
Remove storage LUN map	Remove iGroup map to a LUN		
Remove storage NetApp volume	Remove NetApp volume		
Test storage iGroup LUN map	Test to check if the selected iGroup name is mapped to LUN		

Virtualization task	Task description	
New hypervisor cluster	Add cluster to a selected hypervisor	
New hypervisor cluster	··	
New hypervisor datacenter	Create a new data center on a selected hypervisor	
New hypervisor host	Add host to a selected hypervisor	
New NFS datastore	Create new datastore on hypervisor	
New VMFS datastore	Create new datastore on a selected hypervisor	
New Virtual Machine from Template	Create VM on selected hypervisor based on template	
Confirm OVA or OVF Installation	Monito progress of VM installation from OVA, OVF	
Confirm VM provisioning	Monitor progress of VM installation from template	
Deploy VM from OVA or OVF	Deploy VM on selected hypervisor	
Expand hypervisor datastore	Expand Datastore to the full extent on hypervisor.	
Find hypervisor storage	Scan host on select hypervisor to find new volume/storage device	
Get hypervisor datastore	Get details of a datastore	
Customize guest for Linux	Guest customizations for a Linux VM	
Customize guest for Windows	Guest customizations for a Windows VM	
Remove hypervisor cluster	Remove Cluster from selected hypervisor	
Remove hypervisor data center	Remove Datacenter from selected hypervisor	
Remove hypervisor host	Remove host from selected hypervisor	
Remove VMFS datastore	Remove datastore from selected hypervisor	
Rename, hypervisor datacenter	Rename a datacenter selected hypervisor	

Intersight-ONTAP Workflows

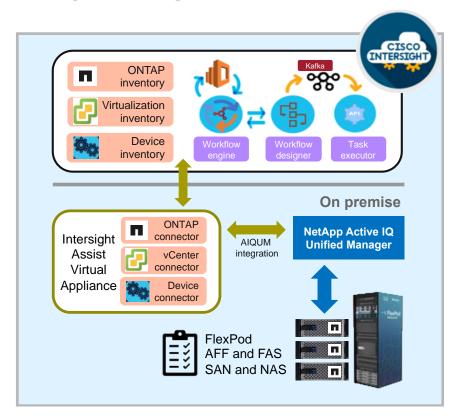

NetApp ONTAP and Cisco Intersight Integration

Extends Cisco Intersight infrastructure management to FlexPod® environments

- Intersight portal to unify and simplify user experience across data centers
 - Monitor FlexPod inventory
 - Initiate NetApp® ONTAP® storage workflow
- Integration with NetApp Active IQ[®] Unified Manager
- NetApp ONTAP Storage Connector
 - Maps Intersight API to Active IQ Unified Manager API

NetApp ONTAP Storage features from Cisco Intersight

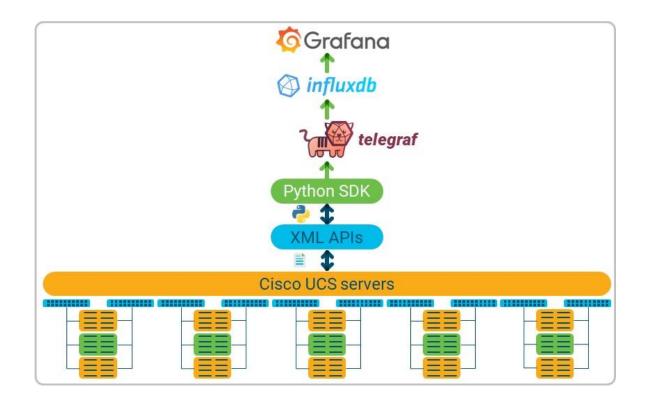

Supports SAN(FC,ISCSI) and NAS(NFS) Protocols

Monitoring Dashboard	Storage Inventory	Orchestration	Orchestration
Storage Widgets	ONTAP Clusters	Reference Workflows	Storage Tasks
Storage Array Version summary.	 ONTAP Clusters model, version, Storage Capacity, Summary of the Storage Objects. Physical Objects: Nodes, Disks, Ports. Logical Objects: SVMs, Volumes, LUNs, SAN Initiator groups, Export policies, Snapshots, Aggregates, License . 	 New/Update/Remove Hypervisor Datastore 	 New Storage Virtual Machine, IP and FC Logical
 Storage Array Model Details – Top 5 Arrays by Utilization. Top 5 Storage Volumes - Top Volumes by Utilization. 		 New/Update/Remove Storage Host or initiator Group from NetApp Storage. 	Interfaces, Volume, LUN, iGroup, Export Policy
			 Expand Storage Volume, LUN
		 New/Remove Export Policy from NetApp Storage. 	 Add Export Policy to Volume,
		 New Storage Virtual Machine. 	Add Initiators to iGroup
		New Storage Logical Interfaces	 Map/Unmap iGroup to LUN Remove Volume, LUN, Export Policy, iGroup

New Virtual Machine

Cisco UCS Monitoring UTM (UCS Traffic Monitoring)

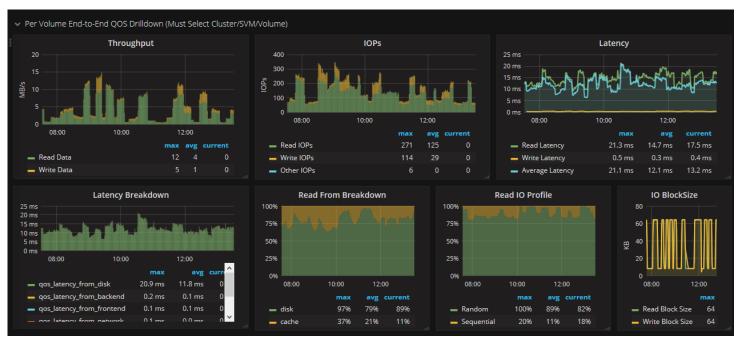

NetApp NaBox

NAbox is a packaged solution that provides NetApp metrics collection, archiving and graphing in the same virtual appliance. It is designed to be easy to deploy and operate through a web interface.

It is based on the following products:

Harvest (dashboards and data collection); Graphite (metrics database); Grafana (Web-UI for dashboards)

Thank You
