buzzy

FOR OUTDOOR BLINDS, AWNINGS, SHUTTERS,
RE-TRACTABLE ROOF SYSTEMS & MORE!

WE PRIDE OURSELVES ON QUALITY, SERVICE & PRICE
...PLUS A 5 YEAR WARRANTY AS STANDARD!

WHO ARE BOZZY?

Bozzy has been running for over 10 years starting as a two-man business, growing nationally to where we are today based in Perth, Sydney and Brisbane. We are rapidly becoming one of the most talked about exterior blind and awning companies, and by taking on challenging projects Bozzy has built a solid reputation as a leader in the field.

The Bozzy difference is that ALL our products are CUSTOM MADE to suit and compliment any outdoor space and improve your enjoyment of the outdoor lifestyle that we all love in Australia!

With a unique range and an experienced team we will provide everything you need to make an informed and confident decision. We will quote, manufacture and install your exterior blinds and products right here in Australia - no middle men!

Bozzy have a strong focus on delivering a high standard of customer service and quality for both the residential and commercial marketplace. To put it simply, where others say "we can't" Bozzy says "we can"!

Our 5 year Warranty on all workmanship and the majority of our range means we only install the highest quality materials that will stand up to our harsh Australian conditions.

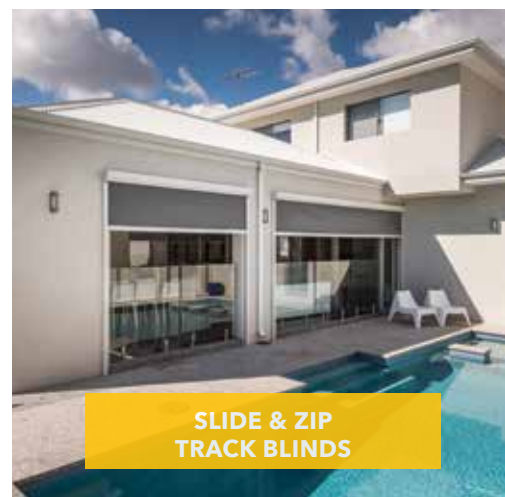

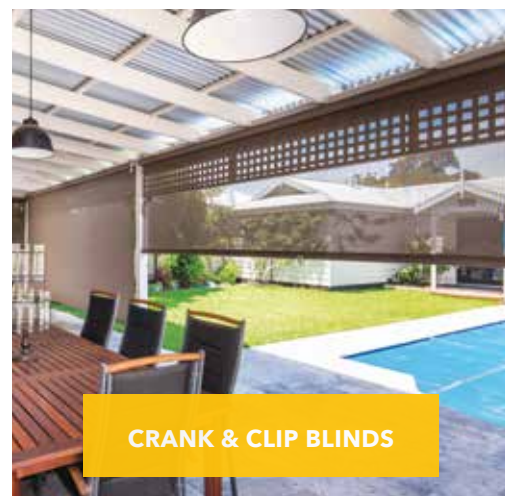

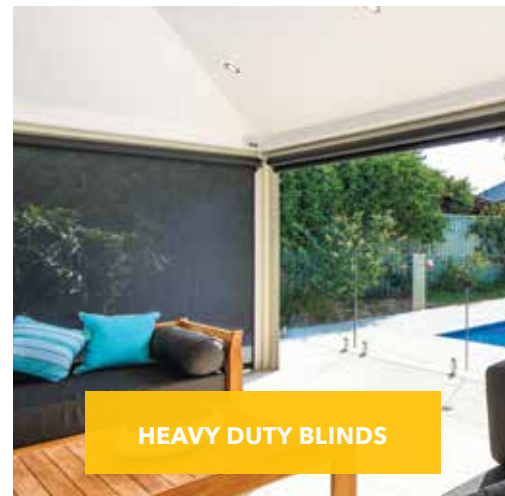

10 REASONS WHY IT'S gotta be a BOZZY!

1. We are proudly AUSTRALIAN owned and operated. We quote, manufacture and install ALL our products right here.
2. We can customise any outdoor area to suit your needs! We are the Australian outdoor blind specialists.
3. We pride ourselves on our quality; always sourcing and designing the best materials available. This gives Bozzy a leading edge in the market.
4. All our products are designed for easy use and maintenance. No ropes, zips or pulleys involved!
5. We offer a 5 year warranty on all of our products.
6. You will be sure to impress your friends and family with Bozzy's unique range of outdoor blinds.
7. Our knowledgeable and experienced team of specialists come to you for a no-obligation, free measure and quote to ensure you receive the best information and solution.
8. You will enjoy the highest standard of customer service from quote right through to fitting from our fully qualified installation team.
9. We offer fantastic member benefits through our Bozzy Buddies referral program.
10. Come in and visit one of our showrooms. If others say they can't - BOZZY CAN!

Corner look with stainless steel bracket

HEAVY DUTY CHANNEL BLINDS

Bozzy's most popular product in the outdoor blind range, it is a stylish and strong system and is most commonly used in patios and alfresco areas of your home or business.

This blind can be operated by either a Manual crank system with detachable handle or motorised using a Somfy handheld or wall mounted remote.

Guided by a 75mm x 3mm Gauge Aluminium Channel and secured using our very own reinforced aluminium bottom rail and pin locking system. The channels are a custom Bozzy design allowing you to have multiple settings and maximum tension at all times. Spanning up to a maximum of 5.8m the HD blind is still our most reliable design.

Recommended to compliment the HD Channel blind is our extensive range of HVG Mesh Extra, Ultra and Ferrari Soltis fabrics.

FEATURES

- Span up to 5.8m
- Manual or Motorised
- Huge range of fabric options
- Reduce UV, Heat & glare
- Custom Bottom rail reduces bowing
- Unlimited locking positions
- With or without Hooding/Pelmet

CRANK & CLIP/STRAP BLINDS

Bozzy's most versatile blind. Our go to blind for the more challenging install situations because of the simple yet functional design.

This blind is most commonly operated by a Manual crank system with detachable handle however it can also be motorised using a Somfy handheld or wall mounted remote where it is difficult to use the manual system.

Fixing points can be along the ground using stainless steel floor plates and straps or easy to use swivel clips on either side of the blind. This blind can also double as a "Roof to Fence" blind.

For example the blind could be fixed to your roofline and extend across to a boundary fence or wall providing shade and protection for plants, washing lines or a children's play area.

FEATURES

- Huge range of fabric options
- Simple design is easy to use
- With or without Hooding/Pelmet
- Versatile
- Span up to 5.8m
- Manual or Motorised

Stainless steel bracket

Perfect solution for Cabanas

Strap Connection

Swivel Clip Connection

Slide Track doubling as doggie door!

Outside fit with hoodboxes

“Bozzy delivered exceptional service and product. We just love our new blinds, its given us a whole new area to enjoy that keeps the wind and sun out when we want it but enjoy the view and open air too.”

L. Di Toro, Salter Point

SLIDE TRACK & ZIP TRACK BLINDS

If you are looking for an easy to use solution to enclose a patio or Al Fresco area our extensive range of Spring Loaded Blinds may be what you are looking for.

Slidetrack and Ziptrack Blinds are operated on a spring system with unique bottom locking rail mechanisms. The edge of the fabric is lined with a Keder spline that runs into a 2 part track.

This blind works especially well at lengths under 4m and is very popular with people who want a quick operation and maximum protection from the rain and bugs. They can also be mounted on the outside of your posts or walls for a more invisible and stylish appearance.

These blinds also work particularly well with the Clear and Tinted PVC, as they do not cause too much stress on this type of material.

FEATURES

- Unique bottom rail locking device
- Easy to operate, just pull up or down to your required setting
- Fully enclosed, fabric locked into side channel
- Comes with or without a top hoarding
- Can span up to 4.5 metres wide
- Huge range of Fabrics including clear and tinted PVC
- All powder coated to suit
- Residential or commercial
- Can be motorised

EXTERNAL WINDOW BLINDS

External window blinds are a classic way to create shade and privacy around your windows.

One of the most popular choices is the classic style lock arm awning. This spring operated outdoor blind is fitted above the window with stainless steel rods and adjustable guides fitted down each side.

A pelmet is usually fitted to protect the blind when retracted.

A modern alternative is the Archline awning which can be custom fitted to large windows as it works on a heavy duty pivot arm system operating on a 180 degree arch. This means it can be operated with either a crank or motorised system.

FEATURES

- Huge range of fabrics
- With or without hooding/pelmet
- Strong and durable
- Fully customised
- Residential and commercial
- Full 5 year warranty

Simple Crank Operation

“ The blinds provide shade in the summer that makes a huge difference to the temperature of the outdoor area, whilst in winter we’re able to retract the ‘ceiling’ to maximise the amount of light entering the house. ”

Fiona Scarff, Melville

Bottom Rail and Guide

WIRE GUIDE BLINDS

A modern streamlined design used mostly as an external window shade but also an excellent option for balconies and where a channel is not desirable.

The Wire guided blind is most commonly operated with the Somfy remote system however it can still be used manually with a crank handle.

Guided by Stainless steel wires on either side of the bottom rail the blind can be set any desired level with no need to secure. However we do supply stainless steel clips if required.

Wire Guide blinds are great to keep the sun off the glass and dramatically reduce heat from your windows and house. They can be connected to sun sensors - so while you are at work they can be working at home to keep the heat out and reduce energy costs!

FEATURES

- Span up to 5.6m
- Manual or motorised
- With or without hooding/pelmet
- Huge range of fabric options
- Reduce UV, heat & glare
- Powder coated bottom rail
- 316 grade stainless brackets & components

ROOF TO FENCE BLINDS

Roof to fence blinds are the ideal solution when you want shelter from the sun without losing space.

They also provide great protection for your family, pets and plants from the sun's harmful rays. We also offer water resistant solutions for furniture or maybe even your spa.

Roof to fence blinds are simply a modified version of the crank and clip blinds. They can be fitted out on an angle from your fascia, patio or wall of your house. A small strap is usually fitted to the bottom rail instead of a clip with a stainless saddle fitted to a strong fence or wall. We recommend keeping the span out to a fence or wall to no more than 2m.

Being fully retractable means you can benefit from the shade roof to fence blinds provide in summer, and in the cooler months when they are not required, simply roll them up. We also offer a more cost effective version of roof to fence blinds using an annex track and strap.

FEATURES

- Huge range of fabrics
- Customised to suit your home or business
- Crank operated
- Span up to 4.5m
- Versatile
- Great alternative to fixed structures or sails

“ My blinds look wonderful and installation was prompt. Both staff members (to measure up and install) were courteous and professional. Bozzy is a professional company to deal with.”

Glyn Ridge, Safety Bay

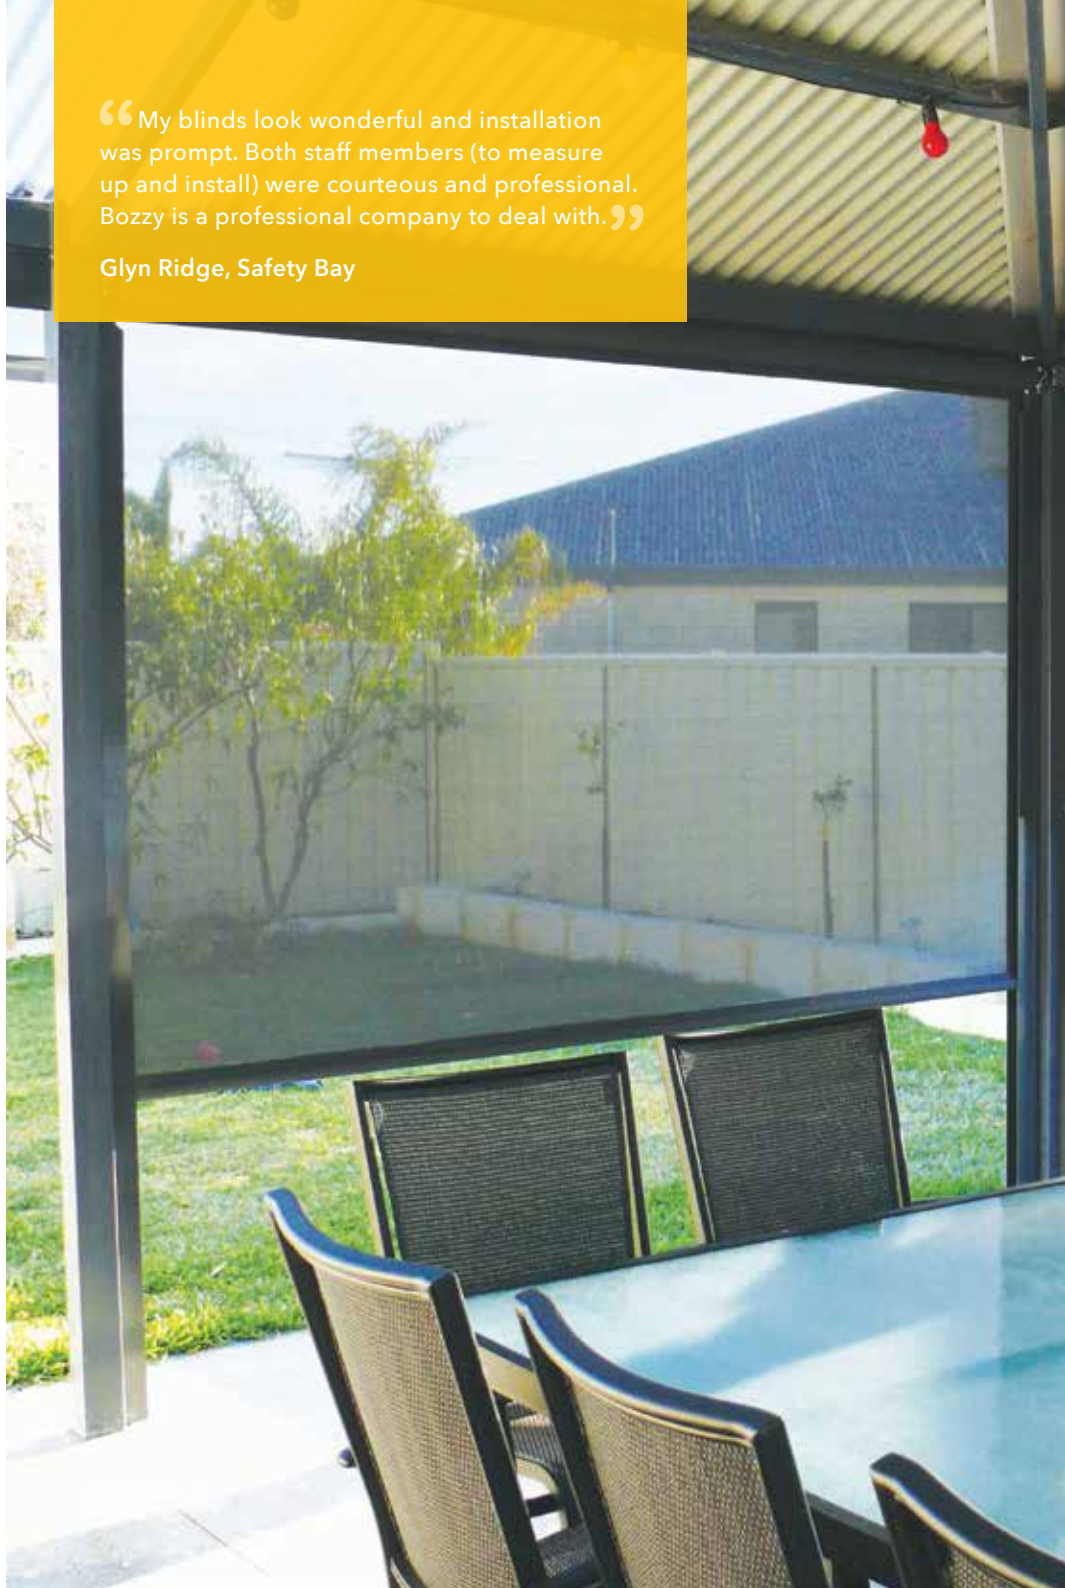

Motor with concealed power

Motion Sensor

5 Channel Waterproof Remote

MOTORISATION

In our forever changing and fast-paced world making your home life easier and up to speed is becoming more and more important. At Bozzy we believe in giving you the ultimate solution to your heat and weather protection problems.

Bozzy is an official dealer and expert of Somfy products throughout our entire range of blinds, awnings and roof systems. Somfy cover all areas of home and commercial automated solutions, and all our sales staff are trained to help you choose the best combination of products to suit your individual needs.

If it is just a simple upstairs wire guided blind you need with a sun sensor, a Folding Arm Awning with a motion sensor, or a retractable roof system for your courtyard incorporating a rain sensor. Here at Bozzy we have the answers you need for your home or business.

FEATURES

- Motors can be hard wired or operate off plugs.
- Blinds can be activated by wind or sun sensors.
- Motors are designed to be connected to your c-bus system as well.
- Impress your family and friends.
- Easy to use and operate.
- Remotes can be wall mounted or portable and operated from inside or outside.
- Concealed motor systems for dust free operation and complete peace of mind.

SHADE SAILS

Shade sails are a natural alternative to awnings or roof systems.

Bozzy can design, manufacture and install shade sails to protect your children, family and pets from the harsh Australian sun in a stylish manner. Shade sails are a cost effective solution to cover pools, lawns and courtyards.

Bozzy uses the highest quality Australian made knitted shadecloth and seatbelt webbing and recommend using nylon rope connections with stainless steel fixings. We also use high grade galvanised, powder-coated posts and engineer approved concrete footings ideal for Aussie conditions.

FEATURES

- Protect your children and family from the sun's harsh UV rays
- Stylish and cost effective solutions
- Industrial grade knitted shadecloth comes with a 10 year warranty and in a wide range of stylish colours
- Residential or commercial solutions
- Fully customised solutions
- Can be easily taken down during the winter months

Fabric Tray and Fixed Arm Bracket

FOLDING ARM AWNINGS

Need some valuable shade in your courtyard? Perhaps you need protection next to the pool on those scorching hot Aussie summer days?

Folding Arm Awnings are a tried and tested solution for residential and commercial projects where a fixed structure or shade sail is not desired. They provide excellent shade and heat protection with the push of a button or the ease of a top winder for extending in and out.

At Bozzy we have several styles in our range of window awnings, from a basic open style, to semi cassette and fully enclosed styles depending on the look and design you are after. All window awnings are custom made up to 7.5m in width and 3.6m in projection. They can be wall mounted, fascia mounted or even roof mounted using special custom roof brackets.

All our folding arm awnings are fully powder-coated and come with a huge range of stylish fabrics including breathable PVC and water resistant acrylics and polyesters. For awnings over 5m in width and 3m in projection we do recommend using the Somfy motor and remote systems for easier operation. This also allows for the option of adding wind and rain sensors.

FEATURES

- Strong arms for Australian conditions
- Huge range of fabric choices
- Pitch adjustable from 5 to 50 degrees
- Support poles optional
- Manual or motorised
- Residential and commercial
- Full 5 year warranty
- With or without rain covers

ALUMINIUM SHUTTERS & LOUVRES

Need an extra room in your house? Some privacy from those nosy neighbours? Need to protect your outdoor furniture in any weather?

Bozzy's stylish range of aluminium shutters might just be the answer you have been looking fo!

All outdoor shutters come in fixed, sliding and bi-fold design, offering practicality, versatility and style to your outdoor entertaining area. Our outdoor shutters use the highest quality powder-coated finish, come in a great range of colour options and provide more protection from our harsh Australian climate.

Aluminium shutters improve your energy efficiency, airflow and solar reflectance to enhance your outdoor living. Every system provides a stronger barrier to high wind load, (C5 series rating or 180km) meaning you have peace of mind when it comes to winter storms and coastal winds. All outdoor shutter systems come standard with marine grade 316 stainless steel and UV rated nylon components and use a 90mm blade. A huge range of accessories are also available including lockable Whitco handles, non-trip tracks and even fly screens.

We are also proud to include a full 5 year warranty on all aluminium shutters, including installation. Our experienced installers have been fully trained in all aspects of this fabulous product. All our clients have been extremely happy with our aluminium shutters and so have we!

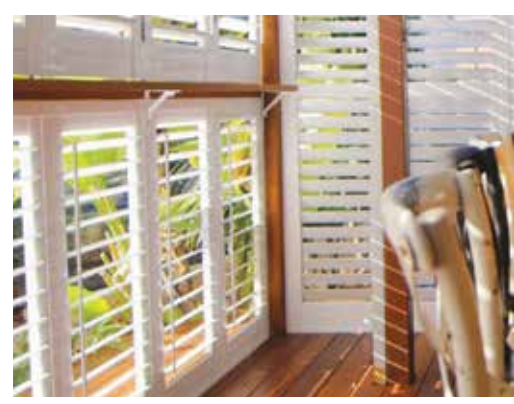

FEATURES

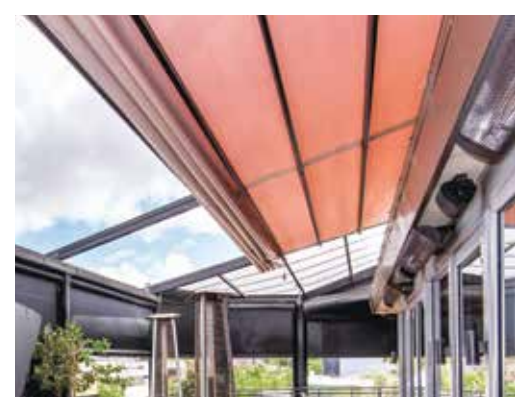

- Full range of powder-coat colours
- Cyclone rated and standard systems
- Marine grade stainless steel components
- Fully customised
- Full 5 year warranty
- Fully lockable
- Balustrade capabilities

“ We wanted a design and product that provided us with a whole new living space, from quote to design, manufacture and installation Bozzy have delivered perfectly. ”

L. Davies, Balddivis

RETRACTABLE ROOF SYSTEMS

Would you like to entertain your friends or clients under the stars, without worrying about if it's going to rain or not? Bozzy has the answer ...

... A fully Retractable OzTech Roof system. When the roof is in place it is 100% water tight with its own gutter system. It can handle strong winds and is in fact so tight and strong you can walk on it! At any time you have the choice of closing up your roof or retracting it back to allow the sun to come in - you have the best of both worlds.

Whether it's a retractable pergola for your backyard, courtyard or deck that you're looking for, or a custom made roof system to meet the needs of a restaurant, bar or commercial project, there is a Oztech model to suit your needs and style.

Utilising European technology through a custom direct drive motor system to ensure smooth and quick operation coupled with high grade extruded aluminium profiles, stainless steel components and a second to none running system is why Oztech is at the forefront in the Australian market. They are the **ONLY** retractable roof system on the market with a 117kmh rating.

The heart of the system is driven by multiple Oztech F3 eight wheel slider carriages. Each F3 slider carriage has a load limit of 600 kg that incorporates a triple layer barrier system. This works in conjunction with a timing belt that has been reinforced with multiple internal stainless steel cables to provide a pulling strength of over 966 kg. It's this tension that is applied to the fabric membrane to allow an angle of 6 degrees fall possible and ensure all water drains away.

Bozzy can quote, design, and install all systems and can also help where engineers and council planning are required. We can also provide plumbing contractors and electricians to help make the whole project run smoothly.

FEATURES

- Entertain all year round
- Spans up to 30 meters wide
- Projects up to 10 meters long
- Cyclone rated to Beaufort class 11 (up to 117 km/h)
- Full 5 year warranty
- Residential or commercial
- Fully motorised
- Optional wind and sun sensors
- Huge range of colours
- Optional LED-TEC lighting
- High grade 6063 aluminium
- Exclusive waterproof protection

COMMERCIAL INSTALLATIONS

MAXIMISE THE POTENTIAL OF YOUR OUTDOOR AREA WITH A BOZZY COMMERCIAL INSTALLATION AND ENJOY TRADE ALL YEAR ROUND WITH COMPLETE PEACE OF MIND - COME RAIN OR SHINE!

Our blinds are perfect for ensuring the comfort of your customers without impacting on any views, come rain or shine.

We can fully customise and install outdoor blinds, awnings and misters for any commercial situation - right down to printing your logo on the blinds! We work closely with builders and councils and have the facilities to supply elevated and engineer certified drawings.

CASE STUDY 1

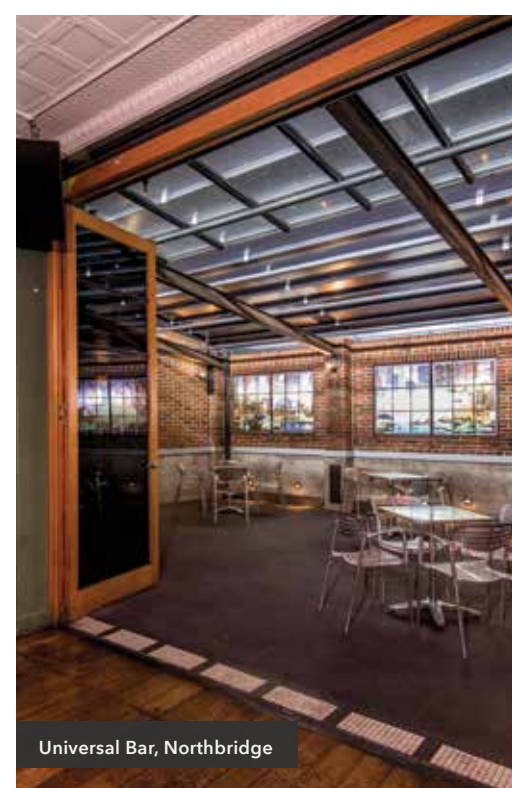

Owners of The Reveley Bar, Elizabeth Quay, with it's rooftop bar and alfresco dining options, wanted to ensure that the outdoor areas could be comfortably enjoyed by their customers during any weather conditions and at any time of the day.

The solution came in the form of the Tera retractable roof system with front gutters and LED lighting, motorised slide-tracks with PVC clear materials and a customised canopy that featuring a custom frame and fabric shells.

This one-of-a-kind project took around two weeks to complete and we are proud to say that the owners are incredibly happy with the end results and how well the colours, lighting and the finishes enhance their rooftop bar.

CASE STUDY 2

The Universal Bar, Northbridge, had an open-air bar area that was being under utilised, particularly during the winter months. They also wanted to be able to hold more functions, all year round. Bozzy Shade Blinds met with the Bar Manager and decided the Tera Retractable Roof System was the perfect solution for the space. It is fully waterproof and guttered and the The Universal have been extremely impressed with the transformation of the space since having it installed.

FABRICS & COLOURS

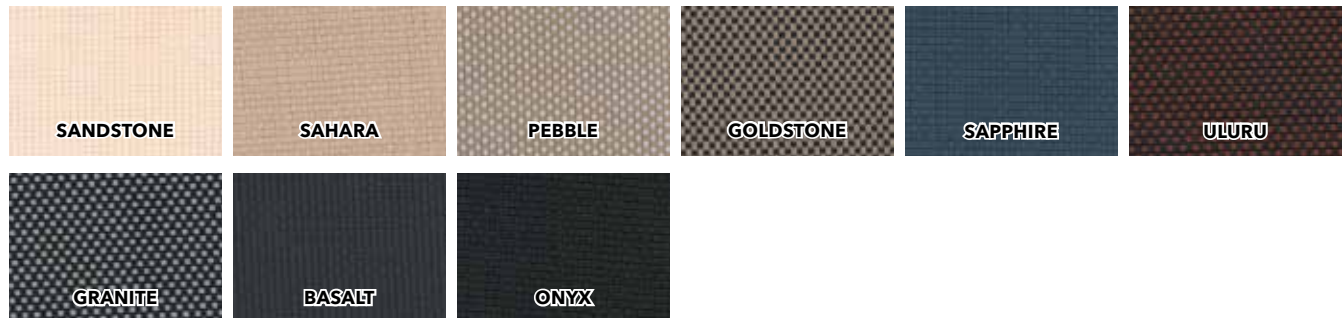

Finding the right material to incorporate with your outdoor shade and weather solution is extremely important. Reducing glare, protecting from Harmful UV rays, wind and rain reduction and of course privacy are generally the main points to consider when looking at different materials.

Both of our mesh options are a unique 2x2 tight weave, PVC coated, polyester woven shade mesh and appropriate for use over the entire range of Bozzy outdoor applications - domestic and commercial. They will reduce heat and glare in summer while protecting from wind and rain in winter. PLUS they allow you to retain your views whilst maintaining privacy.
