FOUR SEASONS ROYAL & PRESIDENTIAL SUITES PROJECT PROFILE

SEAMLESS INTERGRATION

Four Seasons Orlando came to ZIO for a simplistic technology design that would facilitate daily operations for guests staying at the Royal and Presidential suites.

BACKGROUND

Located in Orlando, Florida, Four Seasons Resort is among the most luxurious and desired. Residing in the most magical place on earth, Four Seasons, is home to guests from all over the world. The Canadian-based company has, for nearly 50 years, transformed the hospitality industry by combining friendliness and efficiency with the finest traditions of international hotel keeping. Since its birth in 1961 Four Seasons has grown in size and recognition around the world. ZIO was recommended by Lutron to provide an analysis of the lighting systems at the resort. ZIO's objectives were to understand the existing systems, identify current system issues and limitations, and make recommendations for providing a comprehensive upgrade of the existing systems to a unified Quantum total light management platform.

HOSPITALITY SUITES

KEY TO COLLABORATION

CHALLENGE

ZIO discovered a very unreliable and complicated system for the end users, which in many instances led to guests not even being able to use a single TV.

SOLUTION

ZIO designed a simple state of the art entertainment system that was easy to navigate. The entire system is operated from iPad's within the room featuring a much more simple user interface. So simple, international guests that do not speak English can operate the system, performing all basic functions. Additional features included the ability for a guest to stream audio and video from their mobile devices to any zone in the system while at the same time stay connected to the properties WiFi guest network for Internet access.

HOSPITALITY SUITES

SOLUTION ORIENTED

RESULTS

ZIO was able to implement iPads with Crestron PinPoint beacons to provide location awareness to each iPad. Allowing the user interface to automatically switch the iPad control area without guest intervention, preventing confusion or training. This feature ensures that if an iPad is moved between rooms, it will always be controlling the room the guest is in.

Key Project Equipment

- » Fable and Wardrobe Grafik Eye QS lighting controllers
- » Palm Ballroom Sivoia QS Motorized Draperies
- » Grand Ballroom Sivoia QS Motorized Draperies
- » Royal Suite Sivoia QS Motorized Draperies
- » Presidential Suite Sivoia QS Motorized Draperies
- » Implemented iPads with Crestron Pinpoint

WHO WE ARE

We are a team passionate about the latest home integration technology.

ABOUT US

ZIO is a Winter Park-based technology solutions provider for residential and commercial segments. Beyond traditional product sales and installation we deliver solutions; solutions that are custom designed for each and every client's specific needs.

For over fifteen years, the experienced and award-winning professionals at ZIO have been partnering with clients at their homes and offices to design, install and support custom solutions with the latest yet affordable technology. ZIO employs a full-time staff of over 20 committed and passionate employees.

We are passionate about being the technology partner of choice. Our mission is to make technology an asset for our customers, by striving to make their technology seamless.
